Biochemistry & Molecular Biology

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

Standard program for the Sc.B. degree
Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits. Students are expected to take courses that will count toward the concentration ABC/NC. Students should discuss the S/NC option with their concentration advisor if circumstances warrant consideration. Students should not register S/NC for a concentration course without advisor pre-approval.

Three courses in mathematics, statistics and/or computer science, typically including MATH 0090, MATH 0100, or equivalent) 1
Two courses in physics, typically: 1
PHYS 0030 Basic Physics
or PHYS 0050 Foundations of Mechanics
or ENGN 0030 Introduction to Engineering

PHYS 0040 Basic Physics
or PHYS 0060 Foundations of Electromagnetism and Modern Physics
or ENGN 0040 Dynamics and Vibrations

Three courses in physical and organic chemistry: 3
CHEM 0330 Equilibrium, Rate, and Structure
CHEM 0350/0360 Organic Chemistry

One course in biophysical or related chemistry: 1
CHEM 0400 Biophysical and Bioinorganic Chemistry
or CHEM 0500 Inorganic Chemistry
or CHEM 1660 Instrumental Analysis with Environmental Applications

- or -
GEOL 1660 Instrumental Analysis with Environmental Applications

Three courses in biochemistry: 3
BIOL 0280 Introductory Biochemistry
BIOL 1270 Advanced Biochemistry
CHEM 1230 Chemical Biology
or CHEM 1240 Biochemistry

Select two semester courses of independent research approved by a concentration advisor: 2
BIOL 1950/1960 Directed Research/Independent Study

- or -
CHEM 0970/0980 Undergraduate Research

Suggested Elective Courses:

Students are required to take six (6) elective courses: four (4) taken from the chart below and two (2) from any science or mathematics course relevant to biochemistry, cell and molecular biology from the suggested courses below:

### Biology Electives:
- BIOL 0200 The Foundation of Living Systems
- BIOL 0470 Genetics
- BIOL 0500 Cell and Molecular Biology
- BIOL 0530 Principles of Immunology
- BIOL 0800 Principles of Physiology
- BIOL 1050 Biology of the Eukaryotic Cell
- BIOL 1090 Polymer Science for Biomaterials
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1110 Topics in Signal Transduction
- BIOL 1200 Protein Biophysics and Structure
- BIOL 1150 Stem Cell Engineering
- BIOL 1260 Physiological Pharmacology
- BIOL 1290 Cancer Biology
- BIOL 1540 Molecular Genetics
- BIOL 1560 Virology

### Neuroscience Electives: 2
- NEUR 1020 Principles of Neurobiology
- NEUR 1670 Neuropharmacology and Synaptic Transmission

### Chemistry Electives:
- CHEM 0500 Inorganic Chemistry
- CHEM 1140 Physical Chemistry: Quantum Chemistry
- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- CHEM 1450 Advanced Organic Chemistry

### Quantitative Science or Mathematics Electives: 2
Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Total Credits 20

1. Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.
2. or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

### Honors Requirements for Biochemistry
All ScB Biochemistry concentrators are candidates for Honors; no separate application is necessary.

The requirements for Honors in Biochemistry are:
* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.25.
* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent. Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (http://www.brown.edu/academics/chemistry/undergraduate).
* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.
