Brown University is a leading Ivy League institution and the only major research university in the nation where undergraduates are the architects of their own course of study. Brown is distinguished by its unique undergraduate academic program, a world-class faculty, outstanding graduate and medical students, and a tradition of innovative and rigorous multidisciplinary study.

The University's mission—to serve the community, the nation, and the world by educating and preparing students (in the words of the College charter) to “discharge the offices of life with usefulness and reputation”—is fulfilled through a strong partnership of students and teachers.

The seventh oldest university in America, Brown was established in 1764 as Rhode Island College in the town of Warren, Rhode Island, and enrolled its first students in 1765. In 1770 the College moved to its present location, and in 1804 it was renamed Brown University to honor a $5,000 donation from local merchant Nicholas Brown. Today the University’s main campus covers nearly 140 acres on a historic residential hill overlooking downtown Providence, a vibrant city of some 170,000 people and the capital of Rhode Island.

Brown draws men and women from all over the United States and many other countries. Distinguished by their academic excellence, creativity, self-direction, leadership, and faculty known for its prize-winning multidisciplinary scholarship and dedication to teaching. By providing a rich undergraduate experience together with strong graduate and medical programs, the University fosters internal and external discovery at every level of the academic enterprise.

Brown is internationally known for its dynamic undergraduate curriculum, implemented by faculty vote in 1969. Undergraduates must pass 30 courses and complete the requirements for a concentration, or major, in order to receive a bachelor’s degree. The curriculum does not require distribution or core courses outside the concentration. More than 2,000 undergraduate courses support just under 80 concentrations, many of them interdisciplinary, and a wide variety of independent studies.

At the heart of the Brown curriculum are three basic principles: that students are active participants in learning; that acquiring analytical and critical skills is as important as mastering factual knowledge; and that learning requires opportunities for experimentation and cross-disciplinary synthesis.

The Graduate School at Brown is a national leader in the creation and dissemination of new knowledge. In 2003, Brown celebrated the centennial of the Graduate Department, formally established in 1903 to confer advanced degrees.

The Warren Alpert Medical School, which awarded its first M.D. degrees in 1975, is renowned for innovation in medical education and for its programs in family medicine and primary care. The Warren Alpert Medical School now enrolls some 400 students, most of whom are accepted through Brown’s unique Program in Liberal Medical Education (PLME), which combines undergraduate study with professional studies in medicine.

Beginning in 2002, fortified by vigorous leadership, prudent planning, and new ideas, the University launched an exciting program for academic enrichment to enlarge its faculty by 100 members over the next five to ten years, improve support for graduate students, and invest in libraries, information technology, and academic facilities. As part of this extensive program of improvements, the University instituted a need-blind undergraduate admission process to ensure all worthy applicants access to the University, regardless of their ability to pay.

Brown University is accredited by the New England Association of Schools and Colleges. In addition, the Warren Alpert Medical School is accredited by the Liaison Committee on Medical Education. The School of Engineering has received accreditation from the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for its bachelor of science programs in civil, chemical, electrical, materials, and mechanical engineering.

Foreword

Brown University is a leading Ivy League institution and the only major research university in the nation where undergraduates are the architects of their own course of study. Brown is distinguished by its unique undergraduate academic program, a world-class faculty, outstanding graduate and medical students, and a tradition of innovative and rigorous multidisciplinary study.

The University’s mission—to serve the community, the nation, and the world by educating and preparing students (in the words of the College charter) to “discharge the offices of life with usefulness and reputation”—is fulfilled through a strong partnership of students and teachers.

The seventh oldest university in America, Brown was established in 1764 as Rhode Island College in the town of Warren, Rhode Island, and enrolled its first students in 1765. In 1770 the College moved to its present location, and in 1804 it was renamed Brown University to honor a $5,000 donation from local merchant Nicholas Brown. Today the University’s main campus covers nearly 140 acres on a historic residential hill overlooking downtown Providence, a vibrant city of some 170,000 people and the capital of Rhode Island.

Brown draws men and women from all over the United States and many other countries. Distinguished by their academic excellence, creativity, self-direction, leadership, and faculty known for its prize-winning multidisciplinary scholarship and dedication to teaching. By providing a rich undergraduate experience together with strong graduate and medical programs, the University fosters internal and external discovery at every level of the academic enterprise.

Brown is internationally known for its dynamic undergraduate curriculum, implemented by faculty vote in 1969. Undergraduates must pass 30 courses and complete the requirements for a concentration, or major, in order to receive a bachelor’s degree. The curriculum does not require distribution or core courses outside the concentration. More than 2,000 undergraduate courses support just under 80 concentrations, many of them interdisciplinary, and a wide variety of independent studies.

At the heart of the Brown curriculum are three basic principles: that students are active participants in learning; that acquiring analytical and critical skills is as important as mastering factual knowledge; and that learning requires opportunities for experimentation and cross-disciplinary synthesis.

The Graduate School at Brown is a national leader in the creation and dissemination of new knowledge. In 2003, Brown celebrated the centennial of the Graduate Department, formally established in 1903 to confer advanced degrees.

The Warren Alpert Medical School, which awarded its first M.D. degrees in 1975, is renowned for innovation in medical education and for its programs in family medicine and primary care. The Warren Alpert Medical School now enrolls some 400 students, most of whom are accepted through Brown’s unique Program in Liberal Medical Education (PLME), which combines undergraduate study with professional studies in medicine.

Beginning in 2002, fortified by vigorous leadership, prudent planning, and new ideas, the University launched an exciting program for academic enrichment to enlarge its faculty by 100 members over the next five to ten years, improve support for graduate students, and invest in libraries, information technology, and academic facilities. As part of this extensive program of improvements, the University instituted a need-blind undergraduate admission process to ensure all worthy applicants access to the University, regardless of their ability to pay.

Brown University is accredited by the New England Association of Schools and Colleges. In addition, the Warren Alpert Medical School is accredited by the Liaison Committee on Medical Education. The School of Engineering has received accreditation from the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for its bachelor of science programs in civil, chemical, electrical, materials, and mechanical engineering.
Leadership

The Corporation

Officers

• Christina H. Paxson, President
• Thomas J. Tisch, Chancellor
• Jerome C. Vascellaro, Vice Chancellor
• Donald C. Hood, Secretary
• Alison S. Ressler, Treasurer

Board of Fellows

• Mark S. Blumenkranz
• Richard A. Friedman
• Laura Geller
• Theresia Gouw
• Donald C. Hood
• Robin A. Lenhardt
• Samuel M. Mencoff
• Jonathan M. Nelson
• Christina H. Paxson
• O. Rogerlee Thompson

Clinical Assistant Professor in Surgery
Sasha H. Bahkru
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology
Shiva Balaghi
Visiting Assistant Professor of History and History of Art and Architecture
Thomas F. Banchoff
Professor of Mathematics
Utpala Bandyopadhyay
Clinical Assistant Professor in Health Services, Policy and Practice
Priya Banerjee
Clinical Assistant Professor in Pathology and Laboratory Medicine
Mohammad Banki
Clinical Instructor in Surgery
Jie Bao
Adjunct Assistant Professor of Chemistry
Marilyn M. Barbour
Adjunct Associate Professor of Medicine
Barbara E. Barker
Associate Professor of Pathology and Laboratory Medicine
David H. Barker
Assistant Professor of Psychiatry and Human Behavior (Research)
David J. Barker
Adjunct Assistant Professor of Modern Culture and Media
Glad Barnea
Robert and Nancy Carney Assistant Professor of Neuroscience
Nancy P. Barnett
Associate Professor of Behavioral and Social Sciences (Research)
Anthony J. Barone III
Clinical Assistant Professor in Surgery (Otolaryngology)
Gordon Barr
Visiting Scientist in Engineering
Steven Barreto
Clinical Assistant Professor in Psychiatry and Human Behavior
Rowland P. Barrett
Associate Professor of Psychiatry and Human Behavior
Christine E. Barron
Associate Professor of Pediatrics (Clinical)
Thomas Bartnikas
Assistant Professor of Pathology and Laboratory Medicine
Keith Richard Bartolomei
Clinical Assistant Professor in Medicine
Omer Bartov
John P. Birkelund Distinguished Professor of European History
Jay M. Baruch
Associate Professor of Emergency Medicine
Francis Basile
Clinical Associate Professor in Medicine
Laura R. Bass
Associate Professor of Hispanic Studies; Associate Professor of History of Art and Architecture
William C. Bastan
Clinical Instructor in Pathology and Laboratory Medicine
Amir Basu
Associate Professor of Chemistry
Kim A. Basu
Clinical Instructor in Medicine
Kevin G. Bath
Assistant Professor of Neuroscience (Research)
Kerri L. Batra
Assistant Professor of Medicine
Cynthia Battle
Associate Professor of Psychiatry and Human Behavior (Research)
Beth W. Bauer
Senior Lecturer in Hispanic Studies
Cici X. C. Bauer
Assistant Professor of Biostatistics
Carol L. Baum
Assistant Professor of Pediatrics (Clinical)
Nathaniel Baum-Snow
Associate Professor of Economics; Associate Professor of Urban Studies
Wanda W. Bayeza
Visiting Senior Lecturer and Distinguished Artist in Residence in Africana Studies
Ana Baylin
Adjunct Assistant Professor of Epidemiology
George P. Bayliss
Assistant Professor of Medicine
Carthene R. Bazemore-Walker
Adjunct Associate Professor of Chemistry
Alexander T. Bazilevskiy
Visiting Professor of Geological Sciences
Samuel I. Beale
Professor Emeritus of Biology
Mark F. Bear
Adjunct Professor of Brain and Neural Systems (Research)
Francesca L. Beaudoin
Assistant Professor of Emergency Medicine
Bruce M. Becker
Professor of Emergency Medicine; Professor of Behavioral and Social Sciences
Sara J. Becker
Assistant Professor of Psychiatry and Human Behavior (Research)
Tanya J. Becker
Clinical Assistant Professor in Pediatrics
Martin Beckmann
Professor Emeritus of Economics
Curt G. Beckwith
Associate Professor of Medicine
Patrick Bedard
Assistant Professor of Neuroscience (Research)
Vikram Behera
Clinical Instructor in Medicine
M. david Beitle
Clinical Assistant Professor in Obstetrics and Gynecology
Camelia Bejan
Visiting Assistant Professor of Economics
Michael D. Beland
Associate Professor of Diagnostic Imaging
Christina Bellanti
Clinical Assistant Professor in Psychiatry and Human Behavior
Irene Belsky
Clinical Assistant Professor in Family Medicine
G. Jesse Bender
Assistant Professor of Pediatrics
Judith L. Bender
Professor of Biology
Kristen Benito
Assistant Professor of Psychiatry and Human Behavior (Research)
David J. Bennett
Visiting Scholar in Philosophy
Jabbar R. Bennett
Clinical Assistant Professor in Medicine
Richard J. Bennett
Associate Professor of Medical Science
Reda Bensmaia
University Professor Emeritus of French Studies and Comparative Literature
Judith D. Bentkover
Adjunct Professor of Health Services, Policy and Practice
Adia Benton
Clinical Associate Professor in Pediatrics
Jacques Benun
Clinical Assistant Professor in Surgery (Anesthesiology)
Lionel Bercovitch
Professor of Dermatology
Stephen Berenson
Clinical Professor in Theatre Arts and Performance Studies
J. Roderic Beresford
Professor of Engineering
Alexander Berezin
Clinical Assistant Professor in Surgery (Anesthesiology)
Geoffrey H. Berg
Clinical Instructor in Medicine
Katherine Bergeron
Professor of Music
Amauldo Berges
Clinical Assistant Professor in Psychiatry and Human Behavior
Seth F. Berkley
Adjunct Professor of Medicine
Nathaniel A. Berman
Rahel Varnhagen Professor of International Affairs, Law, and Modern Culture
Amir B. Bernaba
Clinical Instructor in Emergency Medicine
Douglas B. Berton
Clinical Assistant Professor in Psychiatry and Human Behavior
Scott David Berns
Clinical Professor in Pediatrics
Wesley H. Bernskoetter
Manning Assistant Professor of Chemistry
Paul Bernstein
Clinical Instructor in Neurosurgery
Susan Bernstein
Professor of Comparative Literature; Professor of German Studies
Robert Berry
Associate Professor of Obstetrics and Gynecology (Clinical)
David M. Berson
Sidney A. Fox and Dorothea Doctors Fox Professorship of Ophthalmology and Visual Science
Arthur A. Bert
Clinical Professor in Surgery (Anesthesiology)
John J. Bert
Clinical Assistant Professor in Obstetrics and Gynecology
Richard G. Bertini
Clinical Assistant Professor Emeritus in Orthopaedics
Jonathan M. Bertman
Clinical Assistant Professor in Family Medicine
Mark D. Bertness
Robert P. Brown Professor of Biology
Richard W. Besdine
David S. Greer M.D. Professor of Geriatric Medicine
Laurel D. Bestock
Vartan Gregorian Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies
Jack R. Bevivino  
Clinical Assistant Professor in Surgery

Timothy R. T. Bewes  
Professor of English

Christina A. Beyer  
Clinical Instructor in Medicine

Radika Bhaskar  
Visiting Assistant Professor of Environmental Studies

Harikrishna Bhatt  
Assistant Professor of Medicine (Clinical)

Reena A. Bhatt  
Clinical Assistant Professor in Surgery (Plastic Surgery)

Piero Biancani  
Professor Emeritus of Medicine (Research)

Cesario Bianchi  
Associate Professor of Surgery (Research)

Robert A. Bickford  
Professor Emerita of History of Art and Architecture

L. Cinnamon Bidwell  
Assistant Professor of Psychiatry and Human Behavior (Research);  
Assistant Professor of Behavioral and Social Sciences (Research)

Lucien J. E. Bienenstock  
Associate Professor of Applied Mathematics and Neuroscience

Thomas J. Biersteker  
Adjunct Professor of International Studies

Bahar Bilgen  
Assistant Professor of Orthopaedics (Research)

Courtney C. Bilodeau  
Assistant Professor of Medicine (Clinical)

William D. Binder  
Adjunct Assistant Professor of Emergency Medicine

Briannan E. Bintz  
Adjunct Instructor in Pathology and Laboratory Medicine

Eric B. Bittner  
Assistant Professor of Medicine (Clinical)

Christine Anne Biron  
Esther Elizabeth Brintzenhoff Professor of Medical Science

Daniel J. Bisaccio  
Lecturer in Education

Cheryl Priebe Bishoff  
Teaching Associate in Music

Frederic Bishop  
Professor Emeritus of Applied Mathematics

Navaneel Biswas  
Clinical Instructor in Medicine

Michael J. Black  
Adjunct Professor of Computer Science (Research)

Karen Blackmer  
Clinical Assistant Professor in Family Medicine

Brian S. Blais  
Adjunct Professor of Brain and Neural Systems

Dawna A. Blake  
Clinical Assistant Professor in Medicine

Karyn K. Blane  
Clinical Assistant Professor in Psychiatry and Human Behavior

Mutlu Konuk Blasing  
Professor of English

Joaquín Blau  
Assistant Professor of Economics

Andrew S. Blazar  
Clinical Professor in Obstetrics and Gynecology

Douglas L. Blecker  
Clinical Instructor in Medicine

Thomas A. Bledsoe  
Clinical Associate Professor in Medicine

Cynthia Bliss  
Clinical Instructor in Pediatrics

Joseph M. Bliss  
Associate Professor of Pediatrics

Thomas F. Bliss  
Clinical Assistant Professor in Orthopaedics

Stanley Hoyt Block  
Clinical Associate Professor in Pediatrics

Erika L. Bloom  
Assistant Professor of Psychiatry and Human Behavior (Research)

Andrew S. Blum  
Associate Professor of Neurology

Roger B. Blumberg  
Adjunct Lecturer in Computer Science

Janet A. Blume  
Associate Professor of Engineering

Sheila E. Blumstein  
Albert D. Mead Professor of Cognitive, Linguistic and Psychological Sciences

Mark M. Blyth  
Professor of Political Science and International Studies

Pamela Boachieho  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Beth C. Bock  
Professor of Psychiatry and Human Behavior (Research)

John P. Bodel  
W. Duncan MacMillan II Professor of Classics

Deborah Boedeker  
Professor Emerita of Classics

Alan Boegel  
Professor of Medical Science

Daniela Boerescu  
Clinical Assistant Professor in Psychiatry and Human Behavior

John R. Boekamp  
Clinical Assistant Professor in Psychiatry and Human Behavior

Kim Boekelheide  
Professor of Medical Science

Dania Boerescu  
Clinical Assistant Professor in Psychiatry and Human Behavior

Julie Boerger  
Associate Professor of Psychiatry and Human Behavior (Clinical);  
Associate Professor of Pediatrics (Clinical)

Barrymore A. Boggs  
Harmon Family Professor of Africana Studies

Christina L. Boisseau  
Assistant Professor of Psychiatry and Human Behavior (Research)

Robert J. Boland  
Professor of Psychiatry and Human Behavior

Dale S. Bonde  
Associate Professor of Psychiatry and Human Behavior (Research)

Heidi Bonde  
Professor of History of Art and Architecture;  
Professor of Archaeology and the Ancient World

Charlotte M. Boney  
Professor of Pediatrics

Alice E. Bonitate  
Associate Professor of Medicine (Clinical)

M. Christopher Borden  
Clinical Assistant Professor in Psychiatry and Human Behavior
Bruno Borenstein
Clinical Assistant Professor Emeritus in Medicine

Octavio Augusto Borges
Clinical Instructor in Surgery (Ophthalmology)

Jeffrey Borkan
Professor of Family Medicine

Christopher T. Born
Intrepid Heroes Professor of Orthopedic Surgery

Belinda Borrelli
Professor of Psychiatry and Human Behavior (Research)

Brian E. Borsari
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

David A. Borton
Adjunct Assistant Professor of Engineering

George Herbert Borts
George S. and Nancy B.Parker Professor of Economics

Michel-André R. Bossy
Professor Emeritus of French Studies

Andrew G. Bostom
Associate Professor of Medicine

Leslie A. Bostrom
Professor of Visual Art

Paul J. Botelho
Clinical Assistant Professor in Surgery (Ophthalmology)

Ghada Bourjeily
Associate Professor of Medicine

David B. Bouslough
Clinical Assistant Professor in Emergency Medicine

Lawrence P. Bowen
Clinical Assistant Professor in Surgery (Plastic Surgery)

Wayne D. Bowen
Upjohn Professor of Pharmacology

Allan Francis Bower
Royce Family Professor in Teaching Excellence and Professor of Engineering

Lisa D. Bowie
Clinical Assistant Professor in Family Medicine

Kathleen Cote Bowling
Clinical Associate Professor in Obstetrics and Gynecology

Jerroid L. Boxerman
Associate Professor of Diagnostic Imaging

George K. Boyd
Clinical Associate Professor Emeritus in Pediatrics

Kathleen A. Boyd
Teaching Associate in Music

Lisa D. Boyle
Clinical Assistant Professor in Obstetrics and Gynecology

Michelle A. Boyle
Clinical Assistant Professor in Family Medicine

William Braden
Clinical Assistant Professor in Psychiatry and Human Behavior

Linda A. Bradley
Associate Professor of Pathology and Laboratory Medicine (Research)

Elizabeth Brainerd
Professor of Medical Science

Jordan N. Branch
Assistant Professor of Political Science

Nancy H. Brand
Clinical Assistant Professor in Psychiatry and Human Behavior

Peter C. Brash
Clinical Assistant Professor in Surgery (Ophthalmology)

Jeffrey P. Bratberg
Adjunct Associate Professor of Medicine

Joseph M. Braun
Assistant Professor of Epidemiology

Lundy Braun
Royce Family Professor in Teaching Excellence

Alexander Braverman
Professor of Mathematics

James A. Brcek
Clinical Assistant Professor in Psychiatry and Human Behavior

Barrett W. Bready
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Andrew S. Brem
Professor Emeritus of Pediatrics

Debra L. Brendel
Clinical Assistant Professor in Obstetrics and Gynecology

Dror Brenner
Lecturer in Economics

Patricia Bresky
Clinical Assistant Professor in Psychiatry and Human Behavior

Tracy Breton
Visiting Professor of English

Corey L. Bretschneider
Professor of Political Science

Kenneth S. Breuer
Professor of Engineering; Professor of Ecology and Evolutionary Biology

Clyde L. Briant
Otis Everett Randall University Professor of Engineering

Steven C. Brin
Clinical Assistant Professor in Medicine

Deborah Elaine Britt
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Willoughby B. Britton
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Behavioral and Social Sciences (Research)

Justin Broackes
Professor of Philosophy

Dan Brock
Professor Emeritus of Philosophy

Jeffrey F. Brock
Professor of Mathematics

Alexander S. Brodsky
Assistant Professor of Medical Science

Cheryl Brodsky
Clinical Assistant Professor in Obstetrics and Gynecology

Jeffrey M. Brody
Associate Professor of Diagnostic Imaging (Clinical)

Julia G. Brody
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Richard Brody
Clinical Assistant Professor in Family Medicine

Deirdre Brogan
Clinical Assistant Professor in Psychiatry and Human Behavior

Cynthia J. Brokaw
Professor of History

Reinier Broker
Visiting Assistant Professor of Mathematics

Fred A. Brosco
Clinical Assistant Professor in Obstetrics and Gynecology

Doris Brossard
Teaching Associate in French Studies
Laurent Brossay
Associate Professor of Medical Science
E. Christine Brousseau
Assistant Professor of Obstetrics and Gynecology (Clinical)
Andrew Browder
Professor Emeritus of Mathematics
Daniel C. Brown
Clinical Assistant Professor in Family Medicine
Douglas C. Brown
Adjunct Lecturer in English
Edward M. Brown
Clinical Associate Professor Emeritus in Psychiatry and Human Behavior
Joanna D. Brown
Clinical Assistant Professor in Family Medicine
Keith Brown
Professor of International Studies (Research)
Larry K. Brown
Professor of Psychiatry and Human Behavior
Linda L. Brown
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics
Phil Brown
Adjunct Professor of Pathology and Laboratory Medicine
Richard A. Brown
Professor of Psychiatry and Human Behavior
Steven A. Brown
Clinical Assistant Professor in Surgery (Oral & Maxillofacial Surgery)
Walter A. Brown
Clinical Professor in Psychiatry and Human Behavior
William D. Brown
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)
Palmita Brumett
Visiting Professor of History
Nicholas P. Bruno
Clinical Assistant Professor in Dermatology
Elizabeth Johnson Bryan
Associate Professor of English
Richard G. Bryan
Clinical Assistant Professor in Surgery (Ophthalmology)
Margaret Bublitz
Instructor in Psychiatry and Human Behavior (Research)
Gary Bubly
Clinical Associate Professor in Emergency Medicine; Clinical Associate Professor in Medicine
David Buchta
Lecturer in Classics
Jennifer Buckley
Clinical Instructor in Family Medicine
Maria L. Buckley
Clinical Assistant Professor in Psychiatry and Human Behavior
George B. Buczko
Clinical Associate Professor in Surgery (Anesthesiology)
Julio Cesar Bueno de Andrade
Visiting Scientist in Mathematics
Mari Jo Buhle
Professor Emerita of American Studies
Joachim Buhmann
Visiting Professor of Applied Mathematics
Stephen L. Buka
Professor of Epidemiology
Christopher Bull
Senior Lecturer in Engineering
David Bullard
Assistant Professor of Emergency Medicine (Clinical)
Richard D. Bungiro
Lecturer in Biology
Andrew E. Burchard
Clinical Assistant Professor in Surgery (Otolaryngology)
Jasmina Burdzovic Andreas
Assistant Professor of Epidemiology (Research)
Michael D. Burgard
Clinical Assistant Professor in Psychiatry and Human Behavior
Frederick W. Burgess
Clinical Professor in Surgery (Anesthesiology)
Robert T. Burke
Associate Professor of Pediatrics (Clinical)
Nancy J. Burnside
Assistant Professor of Dermatology (Clinical)
Jeffrey M. Burock
Clinical Assistant Professor in Psychiatry and Human Behavior
Stuart Burrows
Associate Professor of English
Osman Safa Burzali
Visiting Scholar in History
Douglas M. Burt
Clinical Assistant Professor in Medicine
Rebecca D. Burwell
Professor of Cognitive, Linguistic, and Psychological Sciences
Andrew M. Busch
Assistant Professor of Psychiatry and Human Behavior (Research)
Stephen S. Bush
Assistant Professor of Religious Studies
Amy Turner Bushnell
Adjunct Associate Professor of History
John E. Buster
Professor of Obstetrics and Gynecology
James Butera
Clinical Associate Professor in Medicine
Melissa A. Buttarro
Clinical Assistant Professor in Psychiatry and Human Behavior
William M. Buttnor
Clinical Assistant Professor in Family Medicine
Debrity Cabezaz
Visiting Scholar in Modern Culture and Media
Claudia S. R. Cabrera
Adjunct Assistant Professor of Medicine
Blake Cady
Professor Emeritus of Surgery
Richard E. Caesar
Clinical Instructor in Surgery (Urology)
Deborah Cahill
Clinical Assistant Professor in Surgery (Anesthesiology)
Jonathan F. Cahill
Assistant Professor of Neurology (Clinical)
Terrence F. Cahill
Clinical Associate Professor in Obstetrics and Gynecology
Joseph M. Caìati
Clinical Assistant Professor in Surgery (Anesthesiology)
Rachael L. Caìati
Assistant Professor of Diagnostic Imaging (Clinical)
Anthony Angelo Caldamone  
Professor of Surgery (Urology); Professor of Pediatrics

Nicholas A. Califano  
Clinical Associate Professor in Medicine

Joseph F. Callaghan  
Clinical Assistant Professor Emeritus in Surgery (Urology)

Charles M. Callahan  
Assistant Professor of Emergency Medicine (Clinical)

Keith Callahan  
Clinical Assistant Professor in Family Medicine

Joseph M. Calo  
Professor Emeritus of Engineering

Carlos Camargo  
Adjunct Professor of Pediatrics

Melani C. Cammett  
Associate Professor of Political Science

Karen T. Cammuso  
Clinical Assistant Professor in Psychiatry and Human Behavior

Christopher A. Campagnari  
Clinical Assistant Professor in Family Medicine

Christopher P. Campanile  
Clinical Associate Professor in Family Medicine

Andrew G. Campbell  
Associate Professor of Medical Science

David E. Cane  
Vernon K. Krieble Professor of Chemistry

Lauralyn B. Cannistra  
Clinical Associate Professor in Medicine

Weibiao Cao  
Assistant Professor of Medicine (Research); Assistant Professor of Pathology and Laboratory Medicine (Research)

Carmine J. Capalbo  
Clinical Associate Professor Emeritus in Surgery

Christy Capone  
Assistant Professor of Psychiatry and Human Behavior

Elizabeth C. Cappelletti  
Clinical Instructor in Obstetrics and Gynecology

Geoffrey Capraro  
Clinical Assistant Professor of Emergency Medicine

Cassandra L. Carberry  
Assistant Professor of Obstetrics and Gynecology (Clinical)

David A. Garcieri  
Clinical Assistant Professor in Obstetrics and Gynecology

Esteban V. Cardemil  
Adjunct Associate Professor of Psychiatry and Human Behavior

Zoe G. Cardon  
Professor of Geological Sciences (MBL)

Claude Carey  
Associate Professor of Slavic Languages

Kate B. Carey  
Professor of Behavioral and Social Sciences

Michael Carey  
Professor of Psychiatry and Human Behavior; Professor of Behavioral and Social Sciences

Gerardo P. Carino  
Assistant Professor of Medicine

Lynn Carlson  
Lecturer in Geological Sciences

Robert A. Carnevale  
Clinical Associate Professor in Medicine

Kathleen Carney-Godley  
Clinical Assistant Professor in Dermatology

Mark Carol  
Adjunct Assistant Professor of Radiation Oncology

Colleen M. Caron  
Clinical Assistant Professor in Epidemiology

Charles C. J. Carpenter  
Professor of Medicine

Gene Carpenter  
Professor Emeritus of Chemistry

Linda L. Carpenter  
Professor of Psychiatry and Human Behavior

Stephen R. Carr  
Professor of Obstetrics and Gynecology

Brion P. Carroll  
Clinical Assistant Professor in Health Services, Policy and Practice

Mary A. Caruskadon  
Professor of Psychiatry and Human Behavior

Sandra A. Carson  
Adjunct Professor of Obstetrics and Gynecology

Brenda Carter  
Visiting Assistant Professor of American Studies

David P. Carter  
Clinical Associate Professor in Family Medicine

E. Jane Carter  
Associate Professor of Medicine

Rebecca L. Carter  
Assistant Professor of Anthropology and Urban Studies

Joseph E. Caruolo  
Clinical Assistant Professor Emeritus in Surgery

Angelina C. A. Carvalho  
Professor Emerita of Medicine

Brad G. Case  
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Health Services, Policy and Practice (Research)

Sarah Case  
Assistant Professor of Emergency Medicine (Clinical)

Leslie E. Cashel  
Clinical Instructor in Medicine

William J. Cashore  
Professor of Pediatrics

Melinda A. Caskey  
Assistant Professor of Pediatrics

Brian P. Casserly  
Adjunct Assistant Professor of Medicine

John Cassese  
Assistant Professor of Diagnostic Imaging (Clinical); Assistant Professor of Pediatrics (Clinical)

Gastone Castellani  
Adjunct Professor of Brain Science (Research)

Caroline Castiglione  
Associate Professor of Italian Studies

Jorge J. Castillo  
Assistant Professor of Medicine

Maria Esperanza Casullo  
Visiting Associate Professor of Latin American and Caribbean Studies

Bruce Caswell  
Professor Emeritus of Engineering

Thomas E. Cataldo  
Assistant Professor of Surgery

John Cava  
Clinical Instructor in Medicine

Colleen Cavanaugh  
Clinical Assistant Professor in Obstetrics and Gynecology
Timothy Cavanaugh  
Clinical Assistant Professor in Family Medicine

John Cayley  
Professor of Literary Arts

Stefano Cazzaniga  
Clinical Assistant Professor in Medicine

Samuele Centorrino  
Visiting Assistant Professor of Economics

Carolina S. Cerezo  
Assistant Professor of Pediatrics (Clinical)

Dilek O. Cermik  
Clinical Assistant Professor in Obstetrics and Gynecology

Ronald M. Cesario  
Lecturer in Theatre Arts and Performance Studies

Ugur Cetintemel  
Professor of Computer Science

Chung-Ja M. Cha  
Associate Professor Emerita of Pediatrics (Research)

Stephen L. Chabot  
Clinical Assistant Professor in Family Medicine

John A. Chaffey  
Clinical Assistant Professor in Medicine

Karmela Kim Chan  
Clinical Assistant Professor in Medicine

Philip A. Chan  
Assistant Professor of Medicine

Rabin F. Chandran  
Associate Professor of Family Medicine (Clinical)

Joyce R. Chang  
Clinical Assistant Professor in Medicine

Julia Chang  
Assistant Professor of Hispanic Studies

Kevin J. Chang  
Assistant Professor of Diagnostic Imaging

Lo-Bin Chang  
Visiting Assistant Professor of Applied Mathematics

Victoria C. Chang  
Assistant Professor of Neurology (Clinical)

Kimberle C. Chapin  
Professor of Pathology and Laboratory Medicine; Professor of Medicine

Heather A. Chapman  
Clinical Assistant Professor in Pediatrics

Laura L. Chapman  
Assistant Professor of Emergency Medicine (Clinical)

Eugene Charniak  
University Professor of Computer Science

Kevin P. Charpentier  
Assistant Professor of Surgery

Eric Chason  
Professor of Engineering

Yael Chatav Schonbrun  
Assistant Professor of Psychiatry and Human Behavior (Research)

Devasis Chatterjee  
Assistant Professor of Medicine (Research)

Anjulika Chawla  
Associate Professor of Pediatrics (Clinical)

Kenneth Chay  
Professor of Economics

Joseph Chazan  
Clinical Professor Emeritus in Medicine

Ross E. Cheit  
Professor of Public Policy and Political Science

Iwona Chelminski  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jing Chen  
Research Associate in Chemistry

Kenneth K. L. Chen  
Assistant Professor of Medicine; Assistant Professor of Obstetrics and Gynecology

Qian Chen  
Michael G. Ehrlich, MD Professor of Orthopedic Research

Tzung-Huei Herbert Chen  
Clinical Instructor in Surgery (Anesthesiology)

Wenhui Chen  
Lecturer in East Asian Studies

Xuwen Chen  
Tamarkin Assistant Professor of Mathematics

Yupeng Chen  
Instructor in Orthopaedics (Research)

Shibin Cheng  
Assistant Professor of Medicine (Research)

Vicky Cheng  
Assistant Professor of Medicine (Clinical)

Edward G. Chemesky  
Clinical Instructor in Diagnostic Imaging

John F. Cherry  
Joukowsky Family Professor of Archaeology

Michael K. Chin  
Clinical Assistant Professor in Family Medicine

Martina Chirilus-Bruckner  
Visiting Scientist in Applied Mathematics

Adam Chodobski  
Associate Professor of Emergency Medicine (Research)

Bum-Rak Choi  
Assistant Professor of Medicine (Research)

Kue Chung Choi  
Clinical Assistant Professor in Obstetrics and Gynecology

Esther Choo  
Assistant Professor of Emergency Medicine

Pradeep Chopra  
Assistant Professor of Medicine (Clinical)

Nitsan Chorev  
Associate Professor of Sociology

Wayne Kw Chou  
Assistant Professor of Chemistry (Research)

Gaurav Choudhary  
Associate Professor of Medicine

David P. Christensen  
Professor of Philosophy

Fredric V. Christian  
Clinical Assistant Professor in Medicine

Mirena Christoff  
Senior Lecturer in Language Studies

David J. Chronley  
Clinical Assistant Professor in Pediatrics

Antony Chu  
Assistant Professor of Medicine

Ming-Yu Wang Chu  
Professor Emerita of Medicine (Research)

Shih-Hsi Chu  
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology (Research)
Rosalind Y. Chua  
Teaching Associate in Music  
Cheng-Chieh Chuang  
Clinical Assistant Professor in Family Medicine  
Howard P. Chudacoff  
George L. Littlefield Professor of American History  
Minji Chun  
Visiting Lecturer in East Asian Studies  
Thomas H. Chun  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics  
Wendy Hui Kyong Chun  
Professor of Modern Culture and Media; Professor of History of Art and Architecture  
Chun-Shiang Chung  
Assistant Professor of Surgery (Research)  
Erica Chung  
Assistant Professor of Pediatrics  
Russell M. Church  
Edgar L. Marston Professor of Psychology  
Lydia R. Ciariello  
Assistant Professor of Emergency Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)  
Sybil Cineas  
Assistant Professor of Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)  
William Ciclit Jr  
J. Murray Beardsley Professor of Surgery  
Mark Cladis  
Brooke Russell Astor Professor of Humanities  
Wayne C. Clairborne  
Clinical Associate Professor in Obstetrics and Gynecology  
Melissa A. Clark  
Professor of Epidemiology; Professor of Obstetrics and Gynecology  
Jennifer G. Clarke  
Associate Professor of Medicine; Associate Professor of Obstetrics and Gynecology  
Michael Clarkson  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)  
Michelle Clayton  
Associate Professor of Hispanic Studies and Associate Professor of Comparative Literature  
Colleen A. Cleary  
Clinical Assistant Professor in Family Medicine  
Steven C. Clemens  
Associate Professor of Geological Sciences (Research)  
Jeffrey D. Clement  
Clinical Assistant Professor in Medicine  
Richard Clements  
Assistant Professor of Surgery (Research)  
James G. Clifton  
Assistant Professor of Medical Science (Research)  
Rodney J. Clifton  
Rush C. Hawkins University Professor Emeritus of Engineering  
David R. Cloutier  
Clinical Assistant Professor in Surgery  
Brian Clyne  
Associate Professor of Emergency Medicine  
Radlan C. Clytus  
Assistant Professor of English and American Studies  
Roger Cobb  
Professor of Political Science  
Charles E. Cobb Jr  
Visiting Professor of Africana Studies  
Thomas B. Coburn  
Visiting Scholar in Religious Studies  
Mia Coetzee  
Assistant Professor of Medicine (Research)  
Daniel T. Coghlin  
Assistant Professor of Pediatrics (Clinical)  
Andrew Cohen  
Professor of Medicine  
Evan Cohen  
Clinical Assistant Professor in Medicine  
Jon Cohen  
Adjunct Lecturer in Engineering  
Steven Irvin Cohen  
Clinical Assistant Professor in Surgery (Urology)  
Wendy Cohen  
Clinical Assistant Professor in Family Medicine  
Uriel Cohen Priva  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences  
Jamieson V. Cohn  
Assistant Professor of Emergency Medicine (Clinical)  
Anthony G. Cokes  
Professor of Modern Culture and Media  
Mauro Colavita  
 Clinical Assistant Professor in Obstetrics and Gynecology  
Suzanne Marie Colby  
 Professor of Psychiatry and Human Behavior (Research)  
Arlene M. Cole  
 Adjunct Lecturer in Music  
Brian J. Cole  
 Professor of Mathematics  
Annette W. Coleman  
Stephen T Olney Professor Emerita of Natural History  
Jeffrey Coleman  
Assistant Professor of Medicine (Research)  
John R. Coleman  
Professor Emeritus of Biology  
Reid W. Coleman  
Clinical Associate Professor in Medicine  
Bradley J. Collins  
Clinical Assistant Professor in Medicine  
Raymond F. Collins  
Visiting Scholar in Religious Studies  
Douglas J. Colson  
Clinical Instructor in Surgery (Otolaryngology)  
Curt Columbus  
Clinical Professor in Theatre Arts and Performance Studies  
Ruth Melanie Colwill  
Professor of Cognitive, Linguistic, and Psychological Sciences  
Jack D. Combs  
Lecturer in Public Policy  
Jonathan P. Conant  
Assistant Professor of History  
Jeanine M. Connolly  
Clinical Assistant Professor in Obstetrics and Gynecology  
Michael Connolly  
Assistant Professor of Surgery (Trauma)
Francis Connor Jr  
Clinical Associate Professor in Surgery (Oral & Maxillofacial Surgery)

Barry William Connors  
L. Herbert Ballou University Professor of Neuroscience

Erika F. Constantine  
Clinical Assistant Professor in Emergency Medicine; Clinical Assistant Professor in Pediatrics

Herbert P. Constantine  
Professor Emeritus of Health Services, Policy and Practice

Maria Constantiniou  
Clinical Assistant Professor in Medicine

John M. Conte  
Clinical Assistant Professor in Medicine

Maureen H. Conte  
Adjunct Associate Professor of Geological Sciences

Harold J. Cook  
John F. Nickoll Professor of History

Linda J. Cook  
Professor of Political Science; Professor of Slavic Languages

Richard I. Cook  
Visiting Scientist in Physics

Valerie A. Cooley  
Lecturer in Public Policy

Kathryn Coolidge  
Clinical Instructor in Medicine

David B. Cooper  
Professor Emeritus of Engineering

George Cooper  
Clinical Associate Professor Emeritus in Surgery

Leon N. Cooper  
Thomas J. Watson, Sr. Professor of Science

Mary Reich Cooper  
Assistant Professor of Medicine (Research)

Reid F. Cooper  
Professor of Geological Sciences

Robert Coover  
T.B. Stowell University Professor Emeritus of Literary Arts

Robert Douglas Cope  
Associate Professor of History

Joan K. Copjec  
Professor of Modern Culture and Media

A. Michael Coppa  
Clinical Instructor in Obstetrics and Gynecology

Paul Coppock  
Visiting Scholar in Philosophy

William M. Corrao  
Clinical Professor in Medicine

Giselle A. Core  
Clinical Assistant Professor in Psychiatry and Human Behavior

Silvia Adriana Barbosa Correia  
Visiting Scholar in Portuguese and Brazilian Studies

Stephen Correia  
Assistant Professor of Psychiatry and Human Behavior

Dominic Corrigan  
Clinical Associate Professor in Medicine

R. William Corwin  
Clinical Assistant Professor in Medicine

Christopher J. Cosgrove  
Clinical Assistant Professor in Medicine

Garth Rees Cosgrove  
Professor of Neurosurgery

Joseph A. Costa  
Clinical Assistant Professor in Family Medicine

Jennifer N. Costanza  
Visiting Assistant Professor of Development Studies

Geanina O. Costea  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ellen M. Costello  
Clinical Assistant Professor in Psychiatry and Human Behavior

Philippe Cote  
Clinical Assistant Professor in Psychiatry and Human Behavior

Richard A. Cottiero  
Clinical Associate Professor in Medicine

Donald R. Coustan  
Professor of Obstetrics and Gynecology

Shiavax Cowasji  
Clinical Assistant Professor in Medicine

Hugh P. Cowdin Jr  
Clinical Assistant Professor in Surgery (Anesthesiology)

Robert Creton  
Assistant Professor of Medicine (Clinical)

Constance M. Crawford  
Clinical Assistant Professor in Obstetrics and Gynecology

Frederick Crisafulli  
Clinical Associate Professor in Medicine

Gene Crisafulli  
Teaching Associate in Music

Joseph Crisco III  
Henry F. Lippitt Professor of Orthopedics

John J. Cronan  
Professor of Diagnostic Imaging

Scott J. Cruikshank  
Assistant Professor of Neuroscience (Research)

Antonio P. Cruz  
Clinical Assistant Professor in Dermatology

Larry Culpepper  
Adjunct Professor of Family Medicine

Catherine A. Cummings  
Clinical Associate Professor in Emergency Medicine

Danielle A. Cummings  
Clinical Instructor in Surgery (Oral & Maxillofacial Surgery)

Francis J. Cummings  
Adjunct Associate Professor of Medicine

Michael L. Cummings  
Clinical Instructor in Pediatrics

Stephen Cummings  
Clinical Assistant Professor in Family Medicine
Ruggero Curci
Adjunct Professor of Chemistry

Oscar M. Curet
Visiting Scholar in Engineering

Wilfredo Curioso
Clinical Assistant Professor in Medicine

Bruce H. Curran
Clinical Associate Professor in Radiation Oncology

Robert E. Curran
Clinical Assistant Professor in Surgery (Ophthalmology)

Alicia Curtin
Assistant Professor of Family Medicine (Clinical)

William A. Curtin
Adjunct Professor of Engineering (Research)

Anne Cushing-Brescia
Clinical Assistant Professor in Medicine

Fiery A. Cushman
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Marlene Cutitar
Clinical Assistant Professor in Surgery

David Cutts
Professor of Physics

Susan Cu-Uvin
Professor of Medicine; Professor of Obstetrics and Gynecology; Professor of Health Services, Policy and Practice

Michele G. Cyr
Professor of Medicine

John K. Czerwein
Clinical Assistant Professor in Orthopaedics

Maxim J. Daamen
Associate Professor of Psychiatry and Human Behavior

Constantine Michael Dafermos
Alumni-Alumnae University Professor of Applied Mathematics

Issa J. Dahabreh
Assistant Professor of Health Services, Policy and Practice (Research)

Albert E. Dahlberg
Professor of Medical Science

Lori A. Dailio
Assistant Professor of Neurology (Research); Assistant Professor of Health Services, Policy and Practice (Research)

Karen Daigle
Clinical Associate Professor in Pediatrics

Tanya Dailey
Assistant Professor of Obstetrics and Gynecology (Clinical)

Arthur D. Daily
Clinical Associate Professor Emeritus in Dermatology

Pedro Dal Bo
Associate Professor of Economics

Jean Marie Daley
Assistant Professor of Surgery (Research)

Kristy L. Dalrymple Gaudiano
Assistant Professor of Psychiatry and Human Behavior (Research)

Robert A. D’Andrea
Adjunct Lecturer in Economics

Henry D’Angelo
Clinical Assistant Professor in Family Medicine

Michelle M. Daniel
Assistant Professor of Emergency Medicine (Clinical)

Jerry Delmar Daniels
Associate Professor of Engineering

Kwame Dapaah-Afruye
Clinical Associate Professor in Medicine

Laia Darder Estevez
Teaching Associate in Language Studies

Eric M. Darling
Assistant Professor of Medical Science; Assistant Professor of Engineering; Assistant Professor of Orthopaedics

Georgios D. Daskalopoulos
Professor of Mathematics

Sean P. David
Adjunct Associate Professor of Family Medicine

Kristopher Davignon
Clinical Assistant Professor in Surgery (Anesthesiology)

Jennifer D. Davis
Associate Professor of Psychiatry and Human Behavior (Clinical)

Robert Paul Davis
Professor Emeritus of Medical Science

Stephen W. Davis
Clinical Associate Professor in Family Medicine

Susan Day
Associate Professor of Pediatrics (Clinical)

T. Eugene Day
Adjunct Assistant Professor of Emergency Medicine

Cornelia Dean
Visiting Lecturer in Environmental Studies

Mark R. Dean
Stephen Robert Assistant Professor of Economics

Thomas L. Dean
Adjunct Professor of Computer Science

Lynne Debenedette
Senior Lecturer in Slavic Languages

Carol L. DeBoer-Langworthy
Lecturer in English

Jeri B. Debrohun
Associate Professor of Classics

Geoffroy DeClippel
Assistant Professor of Economics

Linda Deegan
Professor of Ecology and Evolutionary Biology (MBL)

Silvia Degli Esposti
Associate Professor of Medicine (Clinical)

Christopher L. de Graffenried
Assistant Professor of Molecular Microbiology and Immunology (Research)

Laura Dehl
Clinical Assistant Professor in Psychiatry and Human Behavior

Suzanne M. DeLaMonte
Professor of Pathology and Laboratory Medicine; Professor of Neurosurgery

Carol Lowery Delaney
Visiting Scholar in Religious Studies

Sarah Delaney
Associate Professor of Chemistry

Danny L. DeLange
Teaching Associate in Music

Sara Delaporta
Clinical Instructor in Family Medicine

Ronald A. DeLellis
Professor Emeritus of Pathology and Laboratory Medicine

Cedric de Leon
Visiting Scholar in Sociology

Deborah Del Gais
Visiting Scholar in East Asian Studies
Paul V. Del Guercio  
Clinical Assistant Professor in Family Medicine

Francine A. D’Elia  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ian P. Dell’Antonio  
Associate Professor of Physics

Thomas D. Della Torre  
Clinical Assistant Professor in Family Medicine

Alison DeLong  
Associate Professor of Biology

Kathryn E. Demos  
Assistant Professor of Psychiatry and Human Behavior (Research)

Timothy Denison  
Adjunct Assistant Professor of Engineering

Penelope Hill Dennehy  
Professor of Pediatrics

Jane Mackenzie Dennison  
Clinical Assistant Professor in Pediatrics

Dorothy L. Denniston  
Associate Professor Emerita of Africana Studies

Lisa R. Denny  
Clinical Assistant Professor in Family Medicine

David Denofrio  
Adjunct Associate Professor of Medicine

Thomas D. Denucci  
Clinical Assistant Professor in Medicine

Nicola F. Denzey  
Visiting Associate Professor of Religious Studies

Sean C. L. Deoni  
Assistant Professor of Engineering

Monique E. DePaepe  
Professor of Pathology and Laboratory Medicine

Vera A. De Palo  
Associate Professor of Medicine

Judith Depue  
Clinical Professor in Psychiatry and Human Behavior

Leo Depuydt  
Professor of Egyptology and Ancient Western Asian Studies

Zoltan Derdak  
Assistant Professor of Medicine (Research)

Angela DeRobertis  
Clinical Assistant Professor in Radiation Oncology

Allan Mark Deutsch  
Clinical Associate Professor Emeritus in Diagnostic Imaging

Theresa J. Devine  
Lecturer in Public Policy

Paula Deyoung  
Clinical Instructor in Obstetrics and Gynecology

Giulio G. Diamante  
Clinical Assistant Professor in Surgery (Ophthalmology)

Joseph Anthony Diaz  
Associate Professor of Medicine

Alexander Diaz De Villalvilla  
Assistant Professor of Medicine (Clinical)

Joseph DiBenedetto  
Clinical Assistant Professor in Medicine

Lisa Dicarlo  
Visiting Assistant Professor of Sociology

Margaret A. Dicarlo  
Clinical Assistant Professor in Psychiatry and Human Behavior

James H. Dickerson II  
Adjunct Associate Professor of Physics

Daniel P. Dickstein  
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics

Susan Dickstein  
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics

Elizabeth R. Didie  
Clinical Assistant Professor in Psychiatry and Human Behavior

Gerald J. Diebold  
Professor of Chemistry

Dinusha W. Dietrich  
Clinical Assistant Professor in Pediatrics

Wendell S. Dietrich  
Professor Emeritus of Judaic Studies

Christopher W. Digiovanni  
Professor of Orthopaedics

Amy Bach Dilello  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ann Dill  
Associate Professor of Sociology

Joseph Dimase  
Clinical Assistant Professor Emeritus in Medicine

Qifan Ding  
Visiting Lecturer in East Asian Studies

John Diorio  
Clinical Assistant Professor in Obstetrics and Gynecology

Thomas Dipetrillo  
Associate Professor of Radiation Oncology

Paul A. Disilvestro  
Associate Professor of Obstetrics and Gynecology

Stephen Dizio  
Clinical Assistant Professor in Psychiatry and Human Behavior

Beata E. Dizoglio  
Clinical Assistant Professor in Obstetrics and Gynecology

Curtis Doberstein  
Associate Professor of Neurosurgery (Clinical)

Nikola Dobrilovic  
Assistant Professor of Surgery

Vladimir Dobruskin  
Visiting Professor of Applied Mathematics

Robert J. Dobrzynski Jr  
Clinical Assistant Professor in Medicine

Thomas W. Doepnner Jr  
Associate Professor of Computer Science (Research)

Jimmie D. Doll  
Jesse H. and Louisa D. Sharpe Metcalf Professor of Chemistry

Lisa Ruth Domagalski  
Clinical Assistant Professor in Obstetrics and Gynecology

Fulvio Domini  
Professor of Cognitive, Linguistic, and Psychological Sciences

Wai-Sun Don  
Visiting Professor of Applied Mathematics

John E. Donahue  
Associate Professor of Pathology and Laboratory Medicine; Associate Professor of Neurology

John P. Donahue  
Clinical Assistant Professor in Surgery (Ophthalmology)

Abigail Donaldson  
Assistant Professor of Pediatrics
David Donaldson  
Clinical Assistant Professor in Medicine

Deidre L. Donaldson  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Walter E. Donat  
Clinical Associate Professor in Medicine

Linda L. Donegan  
Assistant Professor of Diagnostic Imaging (Clinical)

Hongjie Dong  
Associate Professor of Applied Mathematics

Jeffrey P. Donnelly  
Adjunct Associate Professor of Geological Sciences

John P. Donoghue  
Henry Merritt Wriston Professor of Neuroscience

Alexei A. Doohovskoy  
Teaching Associate in Music

Miquel Dorca  
Visiting Lecturer in Physics

David D. Dore  
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Epidemiology

Gary S. Dorfman  
Professor Emeritus of Diagnostic Imaging

David M. Dosa  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine

Sales Augusto Dos Santos  
Visiting Scholar in Africana Studies

Beshara B. Doumani  
Joukowsky Family Professor of Modern Middle East History

Jeffrey Dover  
Adjunct Associate Professor of Dermatology

Robert M. Dowben  
Adjunct Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology

Joseph L. Dowling Jr  
Clinical Associate Professor Emeritus in Surgery

Thomas J. Doyle  
Assistant Professor of Medicine (Clinical)

Craig A. Dreeszen  
Adjunct Assistant Professor of John Nicholas Brown Center

James Dreier  
Professor of Philosophy

Thomas Drew  
Clinical Associate Professor in Medicine

Elizabeth I. Drewniak  
Instructor in Orthopaedics (Research)

Sam Driver  
Professor Emeritus of Slavic Languages

Viren A. D’Sa  
Assistant Professor of Pediatrics (Clinical)

Fenghai Duan  
Assistant Professor of Biostatistics (Research)

Kristina M. Duarte  
Assistant Professor of Family Medicine (Clinical)

Gregory J. Dubel  
Assistant Professor of Diagnostic Imaging

Joseph F. Ducharme  
Clinical Assistant Professor in Surgery (Ophthalmology)

Hugh Ducklow  
Professor of Ecology and Evolutionary Biology (MBL)

Brian E. Duff  
Clinical Associate Professor in Surgery (Otolaryngology)

Christine M. Duffy  
Assistant Professor of Medicine

Susan Duffy  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Raymond G. Dufresne  
Professor of Dermatology

Luba Dumenco  
Lecturer in Pathology and Laboratory Medicine

Dorothy M. Dumont  
Research Associate in Medicine

Nancy R. Dunbar  
Senior Lecturer Emerita in Theatre Arts and Performance Studies

Annmarie Dunican  
Assistant Professor of Surgery (Clinical)

Casey Dunn  
Manning Assistant Professor of Ecology & Evolutionary Biology

Shira I. Dunsiger  
Assistant Professor of Behavioral and Social Sciences (Research)

George J. DuPont  
Clinical Assistant Professor in Surgery (Oral & Maxillofacial Surgery)

Paul G. Dupuis  
IBM Professor of Applied Mathematics

Damian E. Dupuy  
Professor of Diagnostic Imaging

Frank Durand  
Professor Emeritus of Hispanic Studies

Kevin M. Dushay  
Assistant Professor of Medicine (Clinical)

Richard L. Dvorin  
Clinical Assistant Professor in Pediatrics

Lance D. Dworkin  
Professor of Medicine

Jacob Dyckman  
Associate Professor Emeritus of Pathology and Laboratory Medicine

Candace L. Dyer  
Clinical Assistant Professor in Surgery

Robert K. Dyer  
Clinical Assistant Professor in Dermatology

Anani Dzidziienyo  
Associate Professor of Africana Studies; Associate Professor of Portuguese and Brazilian Studies

Mary Frances Dzurinko  
Clinical Assistant Professor in Surgery

J. Donald Easton  
Professor Emeritus of Neurology

Charles B. Eaton  
Professor of Family Medicine; Professor of Epidemiology

Jonathan W. Eaton  
William R. Rhodes ’57 Professor of International Economics

Craig P. Ebersen  
Associate Professor of Orthopaedics

Sue E. Eckert  
Senior Fellow in International Studies

Julia Edelman  
Adjunct Instructor in Obstetrics and Gynecology

Timothy H. Edgar  
Visiting Fellow in International Studies

Laura M. Edmonds  
Assistant Professor of Medicine (Clinical)

Assistant Professor of Literary Arts
Arvin S. Glicksman
Professor Emeritus of Medical Science
Maurice Glicksman
Professor Emeritus of Engineering and Physics
Mary Gluck
Professor of History
Douglas R. Gnepp
Professor of Pathology and Laboratory Medicine
Moses Goddard
Associate Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)
Maria Esperanza Godoy Luque
Teaching Associate in Hispanic Studies
Erik K. Godwin
Lecturer in Public Policy
Reginald Y. Goh
Associate Professor of Medicine
Jessica Gokee La Rose
Adjunct Assistant Professor of Psychiatry and Human Behavior
Adam Golaski
Visiting Lecturer in English
Amy P. Goldberg
Assistant Professor of Pediatrics (Clinical)
Elizabeth M. Goldberg
Assistant Professor of Emergency Medicine
Ellyn R. Goldberg
Adjunct Lecturer in Education
Laura B. Goldberg
Assistant Professor of Medicine
Richard J. Goldberg
Professor of Psychiatry and Human Behavior
Robert J. Goldberg
Adjunct Professor of Epidemiology
William Arthur Golden
Clinical Assistant Professor in Medicine
Amy Goldfarb
Clinical Instructor in Medicine
Eric Goldlust
Assistant Professor of Emergency Medicine
Debra L. Goldman
Clinical Assistant Professor in Obstetrics and Gynecology
Roberta E. Goldman
Clinical Professor in Family Medicine
David L. Goldsby
Associate Professor of Geological Sciences (Research)
Frances K. Goldscheider
Professor Emerita of Sociology
Michael G. Goldstein
Adjunct Professor of Psychiatry and Human Behavior
Dragan Golijanin  
Assistant Professor of Surgery (Urology)

Sanda A. Golopentia  
Professor Emerita of French Studies

Natalia Golova  
Assistant Professor of Pediatrics (Clinical)

Vladimir Golstein  
Associate Professor of Slavic Languages

Spencer Golub  
Professor of Theatre Arts and Performance Studies; Professor of Comparative Literature; Professor of Slavic Languages

Marta Gomez-Chiarri  
Visiting Professor of Computational Molecular Biology

Rujun Gong  
Associate Professor of Medicine (Research)

Assawin Gongvatana  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Katherine R. Goodman  
Professor Emerita of German Studies

Thomas G. Goodwillie  
Professor of Mathematics

Matthew S. Goodwin  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Dana A. Gooley  
Associate Professor of Music

Geetha Gopalakrishnan  
Associate Professor of Medicine

Pamima Gorbach  
Adjunct Professor of Medicine

Alan L. Gordon  
Clinical Assistant Professor in Psychiatry and Human Behavior

Catherine M. Gordon  
Professor of Pediatrics

Leslie B. Gordon  
Associate Professor of Pediatrics (Research)

Norman M. Gordon  
Clinical Associate Professor in Neurology

Paul C. Gordon  
Associate Professor of Medicine (Clinical)

George E. Goslow Jr  
Professor Emeritus of Biology

Carin A. Got  
Clinical Instructor in Surgery (Anesthesiology)

David M. Gottlesman  
Clinical Assistant Professor in Psychiatry and Human Behavior

Alma Gottlieb  
Visiting Scholar in Anthropology

Amy S. Gottlieb  
Associate Professor of Medicine (Clinical); Associate Professor of Obstetrics and Gynecology (Clinical)

Michael Gottsegen  
Visiting Scholar in Religious Studies

Brett W. Goudie  
Assistant Professor of Pediatrics (Clinical)

Philip Gould  
Nicholas Brown Professor of Oratory and Belles Lettres

Alexander H. Gourevitch  
Assistant Professor of Political Science

Barbara Gourlay  
Lecturer in Language Studies

Pedro Luis Gozalo  
Associate Professor of Health Services, Policy and Practice (Research)

David C. Grabowski  
Adjunct Associate Professor of Health Services, Policy and Practice

Janet Grace  
Professor of Psychiatry and Human Behavior (Clinical)

Mark Gradstein  
Visiting Professor of Economics

Michael Grady  
Clinical Assistant Professor in Education

Rod A. Gragg  
Clinical Assistant Professor in Psychiatry and Human Behavior

Cornelius O. Granai  
Professor of Obstetrics and Gynecology

Enzo Granato  
Adjunct Professor of Physics

David J. Grand  
Associate Professor of Diagnostic Imaging

Susan W. Graseck  
Senior Fellow in International Studies

Stephen Graubard  
Professor Emeritus of History

Stefan Gravenstein  
Adjunct Professor of Medicine; Adjunct Professor of Health Services, Policy and Practice

Theresa A. Graves  
Assistant Professor of Surgery (Clinical)

Robyn A. Gray  
Assistant Professor of Obstetrics and Gynecology (Clinical)

James N. Green  
Professor of History; Professor of Portuguese and Brazilian Studies

Traci C. Green  
Assistant Professor of Emergency Medicine (Research); Assistant Professor of Epidemiology (Research)

Benjamin D. Greenberg  
Associate Professor of Psychiatry and Human Behavior

Paul B. Greenberg  
Clinical Associate Professor in Surgery (Ophthalmology)

David J. Greenblatt  
Adjunct Professor of Medicine

A. Gerson Greenburg  
Professor Emeritus of Surgery

Jack Greene  
Adjunct Professor of History

Shawn Greenlee  
Visiting Assistant Professor of Modern Culture and Media

Melanie S. Greenman  
Clinical Instructor in Obstetrics and Gynecology

Neil R. Greenspan  
Clinical Associate Professor in Medicine

Amy R. Greenwald  
Associate Professor of Computer Science

David S. Greer  
Professor Emeritus of Health Services, Policy and Practice

Kristin Lynch Gregg  
Clinical Assistant Professor in Emergency Medicine

Shea C. Gregg  
Assistant Professor of Surgery

Stephen H. Gregory  
Associate Professor of Medicine (Research)

Steven T. Gregory  
Associate Professor of Medical Science (Research)

Herbert Grenander  
Professor Emeritus of Applied Mathematics
Abdel-Hai Hammo
Assistant Professor of Pediatrics (Clinical)
Milton William Hamolsky
Professor Emeritus of Medical Science
Brittany Star Hampton
Associate Professor of Obstetrics and Gynecology
Lija Han
Visiting Scholar in Applied Mathematics
Allen S. Hanlon
Adjunct Assistant Professor of Environmental Studies
Sajeev Handa
Clinical Assistant Professor in Medicine
Johanna M. Hanink
Robert Gale Noyes Assistant Professor of Humanities
L. Corey Hanley
Assistant Professor of Pathology and Laboratory Medicine (Clinical)
Roger T. Hanlon
Professor of Ecology and Evolutionary Biology (MBL)
Cynthia M. Hanna
Clinical Assistant Professor in Obstetrics and Gynecology
Katrine Hansen
Assistant Professor of Pathology and Laboratory Medicine
Daniel J. Hanson
Clinical Professor Emeritus in Diagnostic Imaging
Rongrong Hao
Visiting Lecturer in East Asian Studies
Gita V. Harapanahally
Assistant Professor of Neurology (Clinical); Assistant Professor of Pediatrics (Clinical)
Edward Hardy
Visiting Lecturer in English
Erica J. Hardy
Assistant Professor of Medicine (Clinical)
George E. Hardy
Clinical Assistant Professor in Pediatrics
Zeev Harel
Professor of Pediatrics
I. M. Harjito
Teaching Associate in Music
Ann Harleman
Visiting Scholar in American Studies
Omur Harmansah
Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies
Karen M. Harrett
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology
Thomas J. Haronian
Clinical Assistant Professor in Emergency Medicine
Daniel Harp
Teaching Associate in Music
Michael S. Harper
University Professor of Literary Arts
James S. Harper III
Associate Professor of Pathology and Laboratory Medicine (Clinical)
Colin Harrington
Associate Professor of Psychiatry and Human Behavior (Clinical); Associate Professor of Medicine (Clinical)
David T. Harrington
Professor of Surgery
Elizabeth O. Harrington
Associate Professor of Medicine (Research)
Adam D. Harris
Assistant Professor of Medicine
Timothy J. G. Harris
Munro, Goodwin, Wilkinson Professor of European History
Abigail Harrison
Assistant Professor of Behavioral and Social Sciences (Research)
Douglas J. Harrison
Assistant Professor of Pediatrics
Emily C. Harrison
Clinical Assistant Professor in Family Medicine
Magdalena Harrison
Visiting Lecturer in Slavic Languages
Matthew T. Harrison
Assistant Professor of Applied Mathematics
Terry E. Harrison-Goldman
Clinical Assistant Professor in Psychiatry and Human Behavior
Pamela A. Harrop
Clinical Assistant Professor in Medicine
Anne C. Hart
Professor of Neuroscience
Ashley Hart
Assistant Professor of Psychiatry and Human Behavior (Research)
Chantelle N. Hart
Associate Professor of Psychiatry and Human Behavior (Research)
Katherine Hart
Clinical Instructor in Pediatrics
Stephanie Hartselle
Clinical Assistant Professor in Psychiatry and Human Behavior
Susan Ashbrook Harvey
Royce Family Professor in Teaching Excellence and Professor of Religious Studies and Willard Prescott and Annie McClelland Smith Professor of History and Religion
Joseph I. Harwell
Clinical Associate Professor in Medicine; Clinical Associate Professor in Pediatrics
Sadaf Hashmi
Clinical Assistant Professor in Psychiatry and Human Behavior
Alla O. Hassan
Visiting Lecturer in Language Studies
Linda R. Hassan
Clinical Assistant Professor in Medicine
Justine Hastings
Associate Professor of Economics
Meredith K. Hastings
Joukowsky Family Assistant Professor of Geological Sciences
Kathryn Hatch
Clinical Assistant Professor in Surgery (Ophthalmology)
Beverly Haviland
Senior Lecturer in American Studies
Risa Weisberg Hawkins
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Family Medicine (Research)
Edward Hawrot
Alva O Way University Professor of Medical Science
Tawfiq F. Hawwa
Clinical Associate Professor in Obstetrics and Gynecology
Brian C. Hayden
Adjunct Professor of Cognitive, Linguistic, and Psychological Sciences
Kenneth Haynes
Professor of Comparative Literature; Professor of Classics
James H. Hays
Manning Assistant Professor of Computer Science
Anthony Richard Hayward
Adjunct Professor of Pediatrics
Barrett Hazeltine
Professor Emeritus of Engineering
Jiman He
Assistant Professor of Medicine (Research)
Mai He
Assistant Professor of Pathology and Laboratory Medicine
James W. Head III
Louis ande Elizabeth Scherck Distinguished Professor of the Geological Sciences
Eugene H. Healey
Clinical Assistant Professor Emeritus in Surgery
Terrance T. Healey
Assistant Professor of Diagnostic Imaging
Dwight B. Heath
Professor Emeritus of Anthropology
Richard Heck
Romeo Elton Professor of Natural Theology
Daiithi J. Hefferman
Assistant Professor of Surgery
Robert C. Heffron
Clinical Assistant Professor in Family Medicine
William C. Heindel
Professor of Cognitive, Linguistic, and Psychological Sciences
Ulrich Heintz
Professor of Physics
Dwayne Heitmiller
Clinical Assistant Professor in Psychiatry and Human Behavior
Stephen L. Helfand
Professor of Biology
Patrick G. Heller
Professor of Sociology and International Studies
David L. Henann
Assistant Professor of Engineering
J. Vernon Henderson
Visiting Professor of Population Studies (Research)
Karen Heninger
Teaching Associate in Music
Kammi Joy Henrikson
Assistant Professor of Pathology and Laboratory Medicine
Paget Henry
Professor of Africana Studies and Sociology
Christine V. Herbert
Clinical Assistant Professor in Medicine
Timothy D. Herbert
Henry L. Doherty Professor of Oceanography
David Herec
Clinical Assistant Professor in Medicine
Thaddeus W. Hetliczek
Assistant Professor of Diagnostic Imaging
Maurice P. Herlihy
Professor of Computer Science
Arnold Herman
Clinical Associate Professor in Surgery
Debra S. Herman
Clinical Assistant Professor in Psychiatry and Human Behavior
John F. Hermance
Professor Emeritus of Geological Sciences
Lynn Hernandez
Assistant Professor of Behavioral and Social Sciences (Research)

Melvin Hershkowitz
Clinical Assistant Professor Emeritus in Medicine
Rachel Herz
Adjunct Assistant Professor of Psychiatry and Human Behavior
Kathleen M. Hess
Senior Lecturer in Chemistry
Laura E. Hess
Adjunct Assistant Professor of East Asian Studies
Lynn Hess
Clinical Assistant Professor in Psychiatry and Human Behavior
Jan Sickmann Hesthaven
Adjunct Professor of Applied Mathematics (Research)
Timothy C. Hett
Lecturer in Theatre Arts and Performance Studies
Linda Heuman
Visiting Scholar in Religious Studies
Peter Heywood
Professor of Biology
Lauri A. Hicks
Adjunct Assistant Professor of Medicine
Pamela C. High
Professor of Pediatrics (Clinical)
Nathaniel G. Hilger
Assistant Professor of Economics
Christopher S. Hill
Professor of Philosophy
Constance R. Hiller
Clinical Instructor in Pediatrics
Mary M. Hillstrom
Assistant Professor of Diagnostic Imaging (Clinical)
Sachiko Hiramatsu
Visiting Lecturer in East Asian Studies
Howard S. Hirsch
Clinical Assistant Professor in Orthopaedics
Laurence M. Hirshberg
Clinical Assistant Professor in Psychiatry and Human Behavior
James G. Hirth
Professor of Geological Sciences
Kathleen C. Hittner
Clinical Professor in Surgery (Anesthesiology)
Douglas C. Hixson
Professor Emeritus of Medicine (Research)
Lynn T. Ho
Clinical Assistant Professor in Family Medicine
John Hobbie
Professor of Ecology and Evolutionary Biology (MBL)
Leigh R. Hochberg
Associate Professor of Engineering
Diane Hoffman-Kim
Associate Professor of Medical Science and Engineering
Jeffrey Hoffstein
Professor of Mathematics
Robert J. Hofmann
Clinical Assistant Professor in Surgery (Ophthalmology)
Dawn B. Hogan
Assistant Professor of Family Medicine (Clinical)
Dennis Hogan
Robert E. Turner Distinguished Professor of Population Studies
Joseph W. Hogan
Professor of Biostatistics
Mary H. Hohenhaus
Assistant Professor of Medicine (Clinical)
Leigh Anne Hohlstein
Clinical Assistant Professor in Psychiatry and Human Behavior
Horacio B. Hojman
Clinical Assistant Professor in Psychiatry and Human Behavior
Karen A. Holler
Clinical Assistant Professor in Psychiatry and Human Behavior
Peter Amberg Hollmann
Clinical Assistant Professor in Family Medicine
Marida C. Hollos
Professor of Anthropology
Michael Holloway
Assistant Professor of Pediatrics (Research)
Justin A. Holmer
Associate Professor of Mathematics
Katherine M. Holmes
Clinical Assistant Professor in Family Medicine
Andrew W. Holowinsky
Associate Professor Emeritus of Molecular Biology, Cell Biology and Biochemistry
Jesse M. Holstein
Teaching Associate in Music
Bonnie H. Honig
Professor of Modern Culture and Media
Cathleen S. Hood
Clinical Assistant Professor in Family Medicine
Ryan James Hooper
Visiting Scientist in Physics
Elizabeth M. Hoover
Assistant Professor of American Studies
Robert W. Hopkins
Professor Emeritus of Medical Science
Terrence P. Hopmann
Professor Emeritus of Political Science
Frederic G. Hoppin Jr
Professor Emeritus of Medicine
Anisul Hoque
Visiting Scholar in Literary Arts
John F. X. Horan
Clinical Assistant Professor in Family Medicine
Marko Horb
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)
Andrew R. Hordes
Clinical Associate Professor in Medicine
Jeffrey D. Horowitz
Clinical Instructor in Medicine
Karyn J. Horowitz
Clinical Assistant Professor in Psychiatry and Human Behavior
Diana M. Horrigan
Lecturer in Molecular Pharmacology, Physiology and Biotechnology
Rolf-Peter Michael Horstmann
Visiting Professor of Philosophy
Abraham Horvitz
Clinical Associate Professor Emeritus in Surgery
Harold Milton Horwitz
Clinical Associate Professor in Medicine
Jennifer J. Hosmer
Clinical Assistant Professor in Obstetrics and Gynecology
Adriana M. Hoss
Clinical Instructor in Medicine
Christopher D. Houck
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)
E. Andres Houseman
Adjunct Associate Professor of Epidemiology
Stephen D. Houston
Dupree Family Professor of Social Science
Elisabeth D. Howard
Clinical Assistant Professor in Obstetrics and Gynecology
Joanna E. Howard
Visiting Lecturer in Literary Arts
Margaret M. Howard
Professor of Psychiatry and Human Behavior (Clinical); Professor of Medicine (Clinical)
Chanelle J. Howe
Assistant Professor of Epidemiology
Pamela M. Howell
Visiting Lecturer in Theatre Arts and Performance Studies
Peter Howitt
Lyn Crost Professor Emeritus of Social Sciences and Professor Emeritus of Economics
James P. Hoye
Clinical Assistant Professor in Family Medicine
Kelly L. Hoye
Clinical Assistant Professor in Family Medicine
Din-yu Hsieh
Professor Emeritus of Applied Mathematics
Lung-Hua Hu
Senior Lecturer in East Asian Studies
Susie Lee Hu
Assistant Professor of Medicine
Austin Huang
Assistant Professor of Medicine (Research)
Jeff Huang
Assistant Professor of Computer Science
Yen-Tsung Huang
Assistant Professor of Epidemiology
Yongsong Huang
Professor of Geological Sciences
Yunfeng Huang
Assistant Professor of Radiation Oncology
Jia-Lin Huang Hsieh
Visiting Lecturer in East Asian Studies
Julie A. Huber
Assistant Professor of Ecology and Evolutionary Biology (MBL)
Evelyn Hu-Dehart
Professor of History; Professor of American Studies
Nathan Hudepohl
Assistant Professor of History; Professor of American Studies
Neha Hudepohl
Assistant Professor of Emergency Medicine
Neha Hudepohl
Assistant Professor of Radiology
David Hughes
Adjunct Assistant Professor of Pediatrics
John F. Hughes
Professor of Computer Science
Michael Jan Hulstyn
Associate Professor of Orthopaedics
Anne L. Hum
Adjunct Professor of Family Medicine
Jeffrey I. Hunt
Associate Professor of Psychiatry and Human Behavior
Vincent R. Hunt  
Professor Emeritus of Family Medicine

Linda A. Hunter  
Clinical Assistant Professor in Obstetrics and Gynecology

Mary Paula Hunter  
Visiting Scholar in American Studies

Robert H. Hurt  
Professor of Engineering

Brett Hurteau  
Clinical Assistant Professor in Family Medicine

Reema Husain  
Clinical Assistant Professor in Psychiatry and Human Behavior

John Hustad  
Adjunct Assistant Professor of Behavioral and Social Sciences

Quyen Huynh  
Adjunct Professor of Brain Science (Research)

Kathleen Hwang  
Assistant Professor of Surgery (Urology); Assistant Professor of Pathology and Laboratory Medicine

Harry Iannotti  
Clinical Assistant Professor in Surgery (Urology)

Edward A. Iannuccilli  
Clinical Professor Emeritus in Medicine

Jason D. Iannuccilli  
Assistant Professor of Diagnostic Imaging

Molly Ierulli  
Visiting Assistant Professor of Comparative Literature

Sadia Iftikhar  
Clinical Assistant Professor in Medicine

Alba Iglesias Vazquez  
Teaching Associate in Hispanic Studies

Catherine Imbriglio  
Senior Lecturer in English

James Ingraham  
Clinical Assistant Professor in Psychiatry and Human Behavior

Nathan Ingrator  
Adjunct Professor of Brain Science

Orna Intrator  
Associate Professor of Health Services, Policy and Practice (Research)

Julianne Ip  
Clinical Associate Professor in Family Medicine

Joshua Irizarry  
Visiting Scholar in Anthropology

Ahmad Ismail  
Assistant Professor of Medicine (Clinical)

Janet Isserlis  
Lecturer in American Studies

Sorin Istrail  
Julie Nguyen Brown Professor of Computational and Mathematical Science

Jose Itzigsohn  
Professor of Sociology

Henry F. Izeman  
Clinical Associate Professor Emeritus in Medicine

Justin Izzo  
Assistant Professor of French Studies

Barbara W. Jablow  
Clinical Assistant Professor in Family Medicine

Mouve Jabre Raughey  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Brian W. Jack  
Adjunct Associate Professor of Family Medicine

Benjamin T. Jackson  
Professor Emeritus of Surgery

Donald C. Jackson  
Professor Emeritus of Medical Science

Francine Jackson  
Research Associate in Physics

Ivor M. D. Jackson  
Professor Emeritus of Medicine

Margot Jackson  
Assistant Professor of Sociology

Yuko Imoto Jackson  
Senior Lecturer in East Asian Studies

Nancy J. Jacobs  
Associate Professor of History and Africana Studies

David C. Jacobson  
Professor of Judaic Studies

Pauline I. Jacobson  
Professor of Cognitive, Linguistic, and Psychological Sciences

Marc A. Jaffe  
Clinical Assistant Professor in Obstetrics and Gynecology

Daniel Jaffee  
Clinical Instructor in Surgery (Urology)

Ludvikas Jagminas  
Adjunct Associate Professor of Emergency Medicine

Amada M. Jamieson  
Assistant Professor of Molecular Microbiology and Immunology

Barbara N. Jandasek  
Assistant Professor of Psychiatry and Human Behavior (Research)

Robert H. Janigian Jr  
Clinical Assistant Professor in Surgery (Ophthalmology)

Christine Marie Janis  
Professor of Biology

Matthew D. Jankowich  
Assistant Professor of Medicine

Jane Jaquette  
Adjunct Professor of International Studies

Alexander Jaworski  
Assistant Professor of Neuroscience

Gregory D. Jay  
Professor of Emergency Medicine; Professor of Medicine; Professor of Engineering (Research)

Robert R. Jay  
Professor Emeritus of Anthropology

Ravi Jayanti  
Clinical Instructor in Medicine

Mahesh V. Jayaraman  
Associate Professor of Diagnostic Imaging; Associate Professor of Neurosurgery

Thomas W. Jean  
Assistant Professor of Medicine (Clinical)

Elissa Jelalian  
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics

Nathaniel J. Jellinek  
Clinical Assistant Professor in Dermatology

Melissa A. Jenkins  
Clinical Assistant Professor in Psychiatry and Human Behavior

Odest C. Jenkins  
Associate Professor of Computer Science

Emestine G. Jennings  
Assistant Professor of Psychiatry and Human Behavior (Research)
Kathryne Jennings
Teaching Associate in Music
Carole A. Jenny
Professor of Pediatrics
Ilse M. Jenouri
Clinical Associate Professor in Emergency Medicine
Carol J. Jensen
Clinical Assistant Professor in Psychiatry and Human Behavior
Jennifer Jeremiah
Clinical Associate Professor in Medicine
Beth A. Jersekey
Assistant Professor of Psychiatry and Human Behavior (Research)
Antal Jevicki
Professor of Physics
Suriya Jeyapalan
Assistant Professor of Neurology
Sharon Mullane Jezard
Clinical Assistant Professor in Family Medicine
Huiling Ji
Assistant Professor of Obstetrics and Gynecology (Research)
Zupeng Jia
Visiting Scientist in Applied Mathematics
Yongwen Jiang
Clinical Assistant Professor in Epidemiology
Tong Jiao
Senior Research Associate in Engineering
Hitesh K. Jindal
Assistant Professor of Medicine (Research)
Linda Jiorle-Nagy
Teaching Associate in Music
Louis Frederick Jodry
Senior Lecturer in Music
Gerwald Jogl
Associate Professor of Biology
Conrad E. Johanson
Professor Emeritus of Neurosurgery
Benjamin Johnson
Clinical Assistant Professor in Psychiatry and Human Behavior
Christine Johnson
Clinical Assistant Professor in Family Medicine
Eileen G. Johnson
Clinical Assistant Professor in Psychiatry and Human Behavior
Gary D. Johnson
Associate Professor of Neurology (Clinical)
Jennifer E. Johnson
Associate Professor of Psychiatry and Human Behavior (Research)
Julie M. Johnson
Assistant Professor of Obstetrics and Gynecology (Clinical)
Mark A. Johnson
Associate Professor of Biology
Michael P. Johnson
Clinical Assistant Professor in Medicine
Robert G. M. Johnston
Clinical Assistant Professor in Psychiatry and Human Behavior
Thom Jones
Clinical Professor in Theatre Arts and Performance Studies
Hannes Jonsson
Adjunct Professor of Chemistry
Plakyil J. Joseph
Clinical Assistant Professor in Medicine

David Josephson
Professor of Music
Martha Joukowsky
Professor Emerita of Archaeology and the Ancient World
Lynne Joyrich
Professor of Modern Culture and Media
Thomas P. Jundt
Visiting Assistant Professor of History
Annmarie Jurczak
Clinical Assistant Professor in Obstetrics and Gynecology
David Kadmon
Clinical Assistant Professor in Family Medicine
Carl Kaestle
Professor Emeritus of Education
Samuel Kagan
Clinical Assistant Professor in Family Medicine
Christopher W. Kahler
Professor of Behavioral and Social Sciences
Charles B. Kahn
Professor Emeritus of Medicine
Coppelia Kahn
Professor of English
Jeremy A. Kahn
Adjunct Professor of Mathematics
Sewell I. Kahn
Clinical Assistant Professor Emeritus in Medicine
Leway Kailani
Clinical Instructor in Medicine
S. Paul Kajencki
Clinical Assistant Professor in Family Medicine
Ariel B. Kalinowski
Visiting Scholar in Literary Arts
Satyan Kalkunte
Instructor in Pediatrics (Research)
Eva Kallin
Associate Professor Emerita of Mathematics
Brett D. Kalmowitz
Clinical Assistant Professor in Medicine
Achyut Kamat
Clinical Associate Professor in Emergency Medicine
Elena Kamenetsky
Clinical Assistant Professor Emerita in Neurology
Agnes B. Kane
Professor of Medical Science
Rami Kantor
Associate Professor of Medicine
Barbara T. Kao
Clinical Assistant Professor in Pediatrics
Hung-Teh Kao
Associate Professor of Psychiatry and Human Behavior (Research)
David Kaplan
Clinical Assistant Professor in Emergency Medicine
Stephen R. Kaplan
Clinical Professor Emeritus in Medicine
Gazemend Kaplani
Visiting Scholar in Literary Arts
Nicolaos Kapouleas
Professor of Mathematics
Peter Karczmar
Clinical Assistant Professor in Medicine
K. F. Sture Karlsson
Professor Emeritus of Engineering
George E. Karniadakis
Charles P. Pinelli and John Palmer Barstow Professor of Applied Mathematics
Caroline Anne Karp
Senior Lecturer in Environmental Studies
Mohit Kasibhatla
Clinical Assistant Professor in Radiation Oncology
Daniel J. Katz
Lecturer in Mathematics
David E. Katz
Clinical Assistant Professor in Medicine
Emily R. Katz
Assistant Professor of Psychiatry and Human Behavior (Clinical)
E. Tamar Katz
Associate Professor of English; Associate Professor of Urban Studies
Gary M. Katzman
Clinical Assistant Professor in Medicine
Julie Kauer
Professor of Medical Science; Professor of Neuroscience
Donald G. Kaufman
Clinical Assistant Professor Emeritus in Medicine
Joel M. Kaufman
Clinical Associate Professor in Neurology
Craig Kaufmann
Clinical Assistant Professor in Psychiatry and Human Behavior
Karla R. Kaun
Assistant Professor of Neuroscience
John C. Kawaoka
Clinical Assistant Professor in Dermatology
William E. Kaye
Professor Emeritus of Medicine
William Keach
Professor of English
Edward Keating
Clinical Assistant Professor in Medicine
W. Scott Keigwin
Clinical Assistant Professor in Family Medicine
Akilah J. Keita
Assistant Professor of Behavioral and Social Sciences
Gabor I. Keitner
Professor of Psychiatry and Human Behavior
David Keller
Adjunct Associate Professor of Family Medicine
Martin B. Keller
Professor Emeritus of Psychiatry and Human Behavior
James R. Kelner
Fellow in Environmental Change Initiative
Colleen C. Kelly
Clinical Assistant Professor in Medicine
John F. Kelly
Adjunct Associate Professor of Behavioral and Social Sciences
Megan M. Kelly
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
Susan M. Kelly
Clinical Assistant Professor in Psychiatry and Human Behavior
Karl T. Kelsey
Professor of Epidemiology; Professor of Pathology and Laboratory Medicine
Ibram X. Kendi
Visiting Scholar in Africana Studies
Kathleen Kendra
Clinical Assistant Professor in Psychiatry and Human Behavior
George A. Kenna
Assistant Professor of Psychiatry and Human Behavior (Research)
Christine A. Kennedy
Clinical Assistant Professor in Family Medicine
Michael D. Kennedy
Professor of Sociology
James Kennelly
Visiting Scholar in Classics
Claire Kenyon
Professor of Computer Science
Richard W. Kenyon
William R. Kenan, Jr. University Professor of Mathematics
Zhong Yang Belinda Ker
Clinical Instructor in Medicine
Richard I. Kerbel
Adjunct Lecturer in Public Policy
Karen L. Kerman
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)
Arthur B. Kern
Clinical Professor Emeritus in Dermatology
Catherine Kerr
Assistant Professor of Family Medicine (Research)
Laura Kertz
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences
David I. Kertz
Paul R. Dupee, Jr. University Professor of Social Science
Youenn Yves J. Kervennic
Senior Lecturer in French Studies
Martin J. Kerzer
Clinical Assistant Professor in Family Medicine
Haneesh Kesari
Assistant Professor of Engineering
Noubar Kessimian
Associate Professor of Pathology and Laboratory Medicine (Clinical)
Martin Keszler
Professor of Pediatrics
Nancy Khalek
William A. Dyer, Jr. Assistant Professor of Humanities
Hanan I. Khalil
Assistant Professor of Diagnostic Imaging (Clinical)
Jacques Khalip
Associate Professor of English
Amir A. Khan
Clinical Assistant Professor in Psychiatry and Human Behavior
Pervez A. Khatib
Clinical Assistant Professor in Family Medicine
Razib Khaund
Clinical Assistant Professor in Medicine
Elias Khawam
Clinical Instructor in Medicine
Nabil Y. Khoury
Clinical Associate Professor in Obstetrics and Gynecology
Sergei Khurshchev
Visiting Professor of Slavic Languages
Humera Khurshid
Assistant Professor of Medicine (Clinical)
Stephen E. Kidd
Assistant Professor of Classics

Douglas P. Kiel
Adjunct Professor of Epidemiology

Susan M. Kiene
Adjunct Assistant Professor of Behavioral and Social Sciences

Louise Sadler KieSSLing
Professor Emerita of Pediatrics

Jane E. Kiff
Assistant Professor of Pediatrics (Clinical)

Sarah E. Kile
Assistant Professor of East Asian Studies

Margaret Hershberger Kileynek
Visiting Lecturer in Chemistry

Daniel Kim
Associate Professor of English

Dongho Kim
Research Associate in Cognitive, Linguistic, and Psychological Sciences

Doyoon Kim
Visiting Scientist in Applied Mathematics

Eunhee Kim
Assistant Professor of Biostatistics

Eunsuk Kim
Assistant Professor of Chemistry

Hyun K. Kim
Clinical Assistant Professor in Epidemiology

Jaegwon Kim
William Herbert Perry Faunce Professor of Philosophy

Jin Ho Kim
Senior Research Associate in Engineering

Kerri Kim
Clinical Assistant Professor in Psychiatry and Human Behavior

Kyu Kwang Kim
Assistant Professor of Obstetrics and Gynecology (Research)

Kyung-Suk Kim
Professor of Engineering

Michael Hyun-Ook Kim
Professor of Medicine

Miran Kim
Assistant Professor of Medicine (Research)

Seunghyun Kim
Associate Professor of Engineering (Research)

Brian Andrew Kimble
Clinical Associate Professor in Medicine

Katherine C. Kimbrell
Clinical Instructor in Emergency Medicine

Benjamin B. Kimia
Professor of Engineering

Robert S. L. Kind
Clinical Professor Emeritus in Surgery

Boyd P. King
Clinical Associate Professor Emeritus in Medicine

Mariah D. King
Visiting Assistant Professor of Environmental Studies

Angus I. Kingon
Professor of Engineering

Timothy Kinsella
Professor of Radiation Oncology

Stephen A. Kinzer
Visiting Fellow in International Studies

Elizabeth D. Kirk
Professor Emerita of English

Malcolm M. Kirk
Clinical Assistant Professor in Medicine

Jennifer E. Kitter
Clinical Assistant Professor in Psychiatry and Human Behavior

Frank Kleibergen
Professor of Economics

Donald E. Klein
Clinical Associate Professor in Pediatrics

Erika Klein
Clinical Assistant Professor in Obstetrics and Gynecology

Michael D. Klein
Clinical Assistant Professor in Family Medicine

Philip Klein
Professor of Computer Science

Robert B. Klein
Sylvia Kay Hassenfeld Professor of Pediatrics

Marc Patrick Brag Klemp
Visiting Assistant Professor of Population Studies

Jack H. Klie
Clinical Assistant Professor in Medicine

Petra Klinge
Associate Professor of Neurosurgery

James R. Klinger
Professor of Medicine

Adam Klipfel
Clinical Assistant Professor in Surgery

Cindy E. Klipfel
Clinical Assistant Professor in Pediatrics

Margaret G. Klitzke
Clinical Assistant Professor in Psychiatry and Human Behavior

Caroline J. Klivans
Adjunct Assistant Professor of Applied Mathematics, and Computer Science

Thomas W. Kniesche
Associate Professor of German Studies

Brian G. Knight
Professor of Economics

George B. Knight
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Robert E. Knisley
Clinical Associate Professor Emeritus in Medicine

Bettina Maria Knoll
Assistant Professor of Medicine (Clinical)

Paul M. Knopf
Charles A. and Helen B. Stuart Professor Emeritus of Medical Science

Valerie S. Knopik
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Behavioral and Social Sciences (Research)

Leo Kobayashi
Associate Professor of Emergency Medicine

Robert Kohn
Professor of Psychiatry and Human Behavior

Daphne Koinis-Mitchell
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Pediatrics (Research)

Ema M. Kojic
Associate Professor of Medicine

Aravind Kokkirala
Instructor in Medicine (Clinical)
Paul Kolesnikow  
Teaching Associate in Music  
Yuri V. Kondratiev  
Teaching Associate in French Studies  
R. James Koness  
Clinical Assistant Professor in Surgery  
Linghua Kong  
Visiting Scientist in Applied Mathematics  
David Konstan  
John Rowe Workman Distinguished Professor Emeritus of Classics and Professor Emeritus of Comparative Literature  
Matthew A. Kopp  
Clinical Associate Professor in Emergency Medicine  
Gideon Koren  
Professor of Medicine  
Andrei Korotkov  
Senior Research Associate in Physics  
Kenneth S. Kor  
Associate Professor of Medicine  
Kristie J. Koski  
Assistant Professor of Chemistry  
Stefan G. Kostadinov  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)  
J. Michael Kosterlitz  
Harrison E. Farnsworth Professor of Physics  
Renu O. Kothari  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Ashok K. Koul  
Senior Lecturer in Language Studies  
Savvas M. Koushiappas  
Assistant Professor of Physics  
Nicola M. Kouttab  
Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)  
Lilya Koyfman  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Ross S. Kraemer  
Professor of Religious Studies and Judaic Studies  
Matthew A. Kraft  
Assistant Professor of Education  
Thomas A. Krahn  
Clinical Assistant Professor in Medicine  
Naomi R. Kramer  
Clinical Assistant Professor in Medicine  
Peter D. Kramer  
Clinical Professor in Psychiatry and Human Behavior  
Tim Klas Kraska  
Assistant Professor of Computer Science  
Sharon R. Krause  
Professor of Political Science  
Virginia A. Krauss  
Associate Professor of French Studies  
Dennis S. Krauss  
Clinical Assistant Professor in Medicine  
Shepard Krech III  
Professor Emeritus of Anthropology  
Jill A. Kreiling  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)  
David Farrell Krell  
Visiting Professor of German Studies  
Heather Kreth  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Andrea Kretzschmar  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Shriram Krishnamurthi  
Professor of Computer Science  
George Kroumpouzos  
Clinical Associate Professor in Dermatology  
Joachim Israel Krueger  
Professor of Cognitive, Linguistic, and Psychological Sciences  
Julia A. Knell  
Visiting Lecturer in Language Studies  
Brandon H. Krupp  
Clinical Associate Professor in Psychiatry and Human Behavior  
Magdalena Krzystolik  
Clinical Associate Professor in Surgery (Ophthalmology)  
Indrek Kulaots  
Lecturer in Engineering  
Sharvan K. Kumar  
Professor of Engineering  
Caroline L. Kuo  
Assistant Professor of Behavioral and Social Sciences (Research)  
Sylvia Kuo  
Lecturer in Economics  
Marina Kuperman-Beade  
Clinical Assistant Professor in Dermatology  
Arlet G. Kurkchubasche  
Associate Professor of Surgery (Pediatric Surgery); Associate Professor of Pediatrics  
Jayne A. Kurkjian  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Kathleen Mary Kurokowski  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences (Research)  
Jonathan David Kurtis  
Professor of Pathology and Laboratory Medicine  
Harold J. Kushner  
Professor Emeritus of Applied Mathematics and Engineering and L. Herbert Ballou University Professor Emeritus  
Johanna M. Kutluhan  
Tamarkin Assistant Professor of Mathematics  
James Kuzner  
Assistant Professor of English  
Awewura Kwara  
Associate Professor of Medicine  
Rosalind E. Ladd  
Visiting Scholar in Philosophy  
John V. Ladetto  
Clinical Assistant Professor in Medicine  
John E. Lafleuer  
Assistant Professor of Emergency Medicine  
Donna M. Lafontaine  
Clinical Associate Professor in Obstetrics and Gynecology  
W. Curt Lafrance  
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Neurology (Research)  
Linda L. Lagasse  
Associate Professor of Pediatrics (Research)  
Ricardo Lagos Escobar  
Professor-at-Large in International Studies  
David H. Laidlaw  
Professor of Computer Science
Chandan N. Lakhiani  
Assistant Professor of Pediatrics (Clinical)

Linda Laliberte-Cote  
Clinical Assistant Professor in Health Services, Policy and Practice

Michelle A. Lally  
Associate Professor of Medicine; Associate Professor of Health Services, Policy and Practice

Kenneth R. Lamantia  
Clinical Assistant Professor in Surgery (Anesthesiology)

Robert H. Lambe  
Clinical Assistant Professor in Family Medicine

Jennifer F. Lambert  
Clinical Assistant Professor in Psychiatry and Human Behavior

Robert E. Lambiase  
Associate Professor of Diagnostic Imaging

Jon K. Lambrecht  
Clinical Assistant Professor in Medicine

Chad E. Lamendola  
Clinical Assistant Professor in Family Medicine

Anthony Lancaster  
Herbert H Goldberger Professor Emeritus of Economics

Jane L. Lancaster  
Adjunct Assistant Professor of History

Carol Landau  
Clinical Professor in Psychiatry and Human Behavior; Clinical Professor in Medicine

Alan Landman  
Associate Professor of Mathematics

George P. Landow  
Professor Emeritus of English

Shoshana M. Landow  
Clinical Assistant Professor in Dermatology

Greg Landsberg  
Professor of Physics

Arthur Landy  
University Professor of Molecular Biology, Cellular Biology and Biochemistry

Thomas P. Lang  
Clinical Assistant Professor in Surgery (Ophthalmology)

Elizabeth Lange  
Clinical Associate Professor in Pediatrics

Thilo Sascha Lange  
Adjunct Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Robert E. Lanou Jr  
Professor of Physics (Research)

Candace S. Lapidus  
Clinical Assistant Professor in Pediatrics

Kerry L. Laplante  
Adjunct Associate Professor of Medicine

Elizabeth A. Laposata  
Clinical Associate Professor in Pathology and Laboratory Medicine

Abbot Laptook  
Professor of Pediatrics

Rebecca Laptook  
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)

Jerome M. Larkin  
Assistant Professor of Medicine (Clinical)

Charles Larmore  
W. Duncan MacMillan Family Professor of the Humanities

Erica N. Larschan  
Richard and Edna Salomon Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Eric D. Larson  
Visiting Scholar in Race and Ethnicity in America

Lawrence E. Larson  
Professor of Engineering

Lucia Larson  
Associate Professor of Medicine

Pnina Laster  
Visiting Lecturer in Judaic Studies

John C. Lathrop  
Clinical Associate Professor Emeritus in Obstetrics and Gynecology

Syed A. Latif  
Professor of Pathology and Laboratory Medicine (Clinical)

David Lattimore  
Professor Emeritus of East Asian Studies

Joseph Lau  
Professor of Health Services, Policy and Practice

Bernd Laudenberg  
Adjunct Instructor in Family Medicine

Joseph R. Lauro  
Assistant Professor of Emergency Medicine (Clinical)

Joseph J. Laviola  
Adjunct Assistant Professor of Computer Science (Research)

Ronald Lawler  
Professor Emeritus of Chemistry

Charles Lawrence  
Professor of Applied Mathematics

Kira T. Lawrence  
Adjunct Associate Professor of Geological Sciences

W. Dwayne Lawrence  
Professor of Pathology and Laboratory Medicine

Bruce A. Lazarus  
Clinical Assistant Professor in Family Medicine

Elizabeth Lazarus  
Assistant Professor of Diagnostic Imaging

Tricia M. Leahey  
Assistant Professor of Psychiatry and Human Behavior (Research)

Beatrice E. Lechner  
Assistant Professor of Pediatrics

Casey Man-Sum Lee  
Visiting Instructor in East Asian Studies

Catherine Lee  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Christina S. Lee  
Adjunct Associate Professor of Behavioral and Social Sciences

David Lee  
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics

George Lee  
Clinical Assistant Professor in Medicine

Han-Kyu Lee  
Instructor in Neurology (Research)

Jung-Eun Lee  
Assistant Professor of Geological Sciences

Lawrence W. Lee  
Clinical Assistant Professor in Family Medicine

Michael H. Lee  
Assistant Professor of Emergency Medicine

Robert George Lee  
Associate Professor of American Studies
Brown University

Sung-Hee Rhim Lee
Clinical Assistant Professor in Obstetrics and Gynecology
Sung-Woo Lee
Assistant Professor of Radiation Oncology
Yoonjin Lee
Visiting Associate Professor of Mathematics
Yun J. Lee
Clinical Assistant Professor in Pediatrics
Michelle J. Lefebvre
Clinical Instructor in Pediatrics
Janet Lefkowitz
Clinical Instructor in Obstetrics and Gynecology
Craig T. Lefort
Assistant Professor of Surgery (Research)
Robert Legare
Associate Professor of Obstetrics and Gynecology (Clinical); Associate Professor of Medicine (Clinical)
Mark P. Legolvan
Assistant Professor of Pathology and Laboratory Medicine
Jessaca B. Leinaweaver
Associate Professor of Anthropology
Philip E. Leis
Professor Emeritus of Anthropology
Mary D. Lekas
Clinical Professor Emerita in Surgery
Natalie Leland
Adjunct Assistant Professor of Health Services, Policy and Practice
Neal S. Leleiko
Professor of Pediatrics
Carole Lengyel
Clinical Assistant Professor in Pediatrics
John Lenz
Professor Emeritus of Philosophy
Louis A. Leone
Professor Emeritus of Medicine
Michael J. Lepore
Adjunct Assistant Professor of Health Services, Policy and Practice
Heather M. Leslie
Peggy and Henry D. Sharpe Assistant Professor of Environmental Studies
Barry M. Lester
Professor of Psychiatry and Human Behavior; Professor of Pediatrics
Natalie Lester
Clinical Assistant Professor in Psychiatry and Human Behavior
Susan M. Letourneau
Visiting Scholar in Cognitive, Linguistic, and Psychological Sciences
Emily A. Leven
Instructor in Medicine (Clinical)
Margaret Levi
Senior Fellow in International Studies
Frank S. Levin
Professor Emeritus of Physics
William A. Levin
Clinical Associate Professor in Medicine
Adam Levine
Assistant Professor of Emergency Medicine
Daniel J. Levine
Clinical Associate Professor in Medicine
Laura Levine
Clinical Assistant Professor in Psychiatry and Human Behavior
Todd P. Levine
Assistant Professor of Psychiatry and Human Behavior (Research)
Andrew T. Levinson
Assistant Professor of Medicine (Clinical)
Paul David Levinson
Associate Professor of Medicine
Anthony D. Levitas
Senior Fellow in International Studies
Alexander Levitsky
Professor of Slavic Languages
Carol S. Levitt
Clinical Assistant Professor in Family Medicine
Dore J. Levy
Professor of Comparative Literature; Professor of East Asian Studies
Mitchell M. Levy
Professor of Religion
Jin Li
Professor of Education
Ji Su Li
Associate Professor of Medicine (Research)
Ming Li
Assistant Professor of Medicine (Research)
Siping Li
Assistant Professor of Medicine (Research)
Xingjie Li
Prager Assistant Professor of Applied Mathematics
Yan Liang
Professor of Geological Sciences
N. Peter Libbey
Clinical Associate Professor in Pathology and Laboratory Medicine
Jonah M. Licht
Clinical Assistant Professor in Medicine
Rashmi Shetty Licht
Clinical Assistant Professor in Surgery (Urology)
Warren E. Licht
Clinical Assistant Professor in Medicine
Stephen Lichtenbaum
Roland George Dwight Richardson University Professor of Mathematics
Kristin N. Lichtenberg
Clinical Assistant Professor in Family Medicine
David P. Lichtenstein
Clinical Assistant Professor in Psychiatry and Human Behavior
Diana Elliott Lidofsky
Clinical Assistant Professor in Psychiatry and Human Behavior
Sheldon Lidofsky
Clinical Assistant Professor in Medicine
Paul B. Lieberman
Associate Professor of Psychiatry and Human Behavior (Clinical)
Phillip Lieberman
George Hazard Croker University Professor Emeritus
Stacey P. Lievenese
Clinical Assistant Professor in Obstetrics and Gynecology
Joseph T. Lifrak  
Clinical Assistant Professor in Family Medicine

Jason Lillis  
Assistant Professor of Psychiatry and Human Behavior (Research)

Eng Beng Lim  
Assistant Professor of Theatre Arts and Performance Studies

Yow-Pin Lim  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Richard S. Limbird Jr  
Clinical Assistant Professor in Orthopaedics

James G. Linakis  
Professor of Emergency Medicine; Professor of Pediatrics

Evelyn Lincoln  
Professor of History of Art and Architecture and Italian Studies

Monica Linden  
Lecturer in Neuroscience

David G. Lindquist  
Professor of Sociology

Xinsheng Sean Ling  
Professor of Physics

Crystal D. Linkletter  
Adjunct Assistant Professor of Biostatistics

James Lippincott  
Clinical Assistant Professor in Family Medicine

Diane Lipscombe  
Professor of Neuroscience

Nancy T. Littell  
Clinical Assistant Professor in Medicine

Michael L. Litman  
Professor of Computer Science

Fenghong Liu  
Assistant Professor of Radiation Oncology

Joseph T. C. Liu  
Professor of Engineering

Paul Liu  
Professor of Surgery (Clinical)(Plastic Surgery)

Shuyun Liu  
Visiting Scholar in East Asian Studies

Simin Liu  
Professor of Epidemiology; Professor of Medicine

Tao Liu  
Assistant Professor of Biostatistics (Research)

Xiadong Liu  
Visiting Scientist in Geological Sciences

Zhihong Liu  
Adjunct Professor of Medicine

David J. Livingston  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Hilda Llorens  
Visiting Assistant Professor of American Studies

Albert C. Lo  
Associate Professor of Neurology; Associate Professor of Epidemiology

Debra J. Lobato  
Professor of Psychiatry and Human Behavior (Clinical); Professor of Pediatrics (Clinical)

Richard M. Locke  
Professor of Political Science

John Logan  
Professor of Sociology

Kristin Lombardi  
Assistant Professor of Pediatrics (Clinical)

Michele M. Lomme  
Assistant Professor of Pathology and Laboratory Medicine

Thomas Lonardo  
Adjunct Lecturer in Economics

Cynthia L. Loncar  
Assistant Professor of Pediatrics (Research)

Richard H. Longabaugh  
Professor Emeritus of Psychiatry and Human Behavior (Research)

John R. Lonks  
Associate Professor of Medicine

Salvatore J. Loporchio  
Clinical Assistant Professor in Surgery (Ophthalmology)

Peem Lorvidhaya  
Clinical Assistant Professor in Medicine

Phyllis T. Losikoff  
Assistant Professor of Pediatrics (Clinical)

Eric B. Loucks  
Assistant Professor of Epidemiology

Sydney Louis  
Professor Emeritus of Neurology

Ana P. Lourenco  
Assistant Professor of Diagnostic Imaging

Glenn C. Loury  
Merton P. Stoltz Professor of Social Sciences

Frederick R. Love  
Professor Emeritus of German Studies

Christine M. Low  
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)

David Lowe  
Associate Professor of Physics

Elizabeth A. Lowenhaupt  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Abraham F. Lowenthal  
Clinical Associate Professor in International Studies

Bing Lu  
Adjunct Assistant Professor of Family Medicine

Qing Lu  
Assistant Professor of Medicine (Research)

Steven D. Lubars  
Professor of American Studies; Professor of History; Professor of History of Art and Architecture

Jonathan D. Lubin  
Professor Emeritus of Mathematics and Engineering

John R. Lucas  
Lecturer Emeritus in Theatre, Speech and Dance

Phillip R. Lucas  
Adjunct Professor of Orthopaedics

Arnold M. Ludwig  
Adjunct Professor of Psychiatry and Human Behavior

Melissa Ludwig  
Clinical Assistant Professor in Psychiatry and Human Behavior

Stephanie N. Lueckel  
Assistant Professor of Surgery (Clinical)

Ivana Lukacova-Zib  
Assistant Professor of Medicine (Clinical)

Katarina Lukatela  
Clinical Assistant Professor in Psychiatry and Human Behavior
Francois I. Luks  
Professor of Surgery; Professor of Obstetrics and Gynecology; Professor of Pediatrics  
Xi Luo  
Assistant Professor of Biostatistics  
Mark Lurie  
Assistant Professor of Epidemiology; Assistant Professor of Medicine  
Catherine A. Lutz  
Thomas J. Watson, Jr. Family Professor of International Studies  
Kerri Luzzo  
Clinical Instructor in Family Medicine  
Amanda Lynch  
Professor of Geological Sciences  
Mary E. Lyster  
Clinical Assistant Professor in Family Medicine  
Anna A. Lysyanska  
Associate Professor of Computer Science  
Jason T. Machan  
Assistant Professor of Orthopaedics (Research); Assistant Professor of Surgery (Research)  
James Mackillop  
Adjunct Associate Professor of Behavioral and Social Sciences  
Scott F. MacKinnon  
Clinical Assistant Professor in Surgery (Anesthesiology)  
David B. MacLean  
Adjunct Associate Professor of Medicine  
Yvon Jean Maday  
Visiting Professor of Applied Mathematics  
Susanna R. Magee  
Assistant Professor of Family Medicine  
Henry G. Magendantz  
Clinical Associate Professor in Obstetrics and Gynecology  
Molly Magill  
Assistant Professor of Behavioral and Social Sciences (Research)  
Michael J. Maher  
Assistant Professor of Medicine (Clinical)  
Martha B. Mainiero  
Professor of Diagnostic Imaging  
Abby L. Maizel  
Adjunct Professor of Pathology and Laboratory Medicine  
Marta B. Majczak  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Henry Majewski  
Professor Emeritus of French Studies  
Samir H. Makarious  
Clinical Assistant Professor in Medicine  
Tariq K. Malik  
Clinical Associate Professor in Medicine  
Bertram F. Malle  
Professor of Cognitive, Linguistic, and Psychological Sciences  
John Mallet-Paret  
George Ide Chase Professor of Physical Science  
Paul F. Malloy  
Professor of Psychiatry and Human Behavior  
Steven A. Mallozzi  
Clinical Assistant Professor in Medicine  
Charles A. Malone  
Professor Emeritus of Psychiatry and Human Behavior  
Patrick M. Malone  
Professor Emeritus of American Studies  
Sara Maloni  
Tamarkin Assistant Professor  
Shafiq T. Mamdani  
Clinical Assistant Professor in Medicine  
Maria C. Mancebo  
Assistant Professor of Psychiatry and Human Behavior (Research)  
Maud Mandel  
Associate Professor of History and Judaic Studies  
Shreyas Mandre  
Assistant Professor of Engineering  
Shamlal Mangray  
Associate Professor of Pathology and Laboratory Medicine (Clinical)  
James Manis  
Clinical Associate Professor Emeritus in Medicine  
Bradley Manning  
Clinical Instructor in Medicine  
Jeffrey Manning  
Clinical Assistant Professor in Family Medicine  
Margaret M. Mannix  
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)  
Anthony Lynn Mansell  
Professor Emeritus of Pediatrics  
Kalyan Mantripragada  
Clinical Instructor in Medicine  
Ginger L. Manzo  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Pierre R. Manzo  
Clinical Assistant Professor in Family Medicine  
Abigail Marcaccio  
Assistant Professor of Psychiatry and Human Behavior (Research)  
Beth G. Marcaccio  
Clinical Assistant Professor in Obstetrics and Gynecology  
Edward J. Marcaccio  
Associate Professor of Surgery (Clinical)  
John R. Marcaccio  
Clinical Assistant Professor Emeritus in Surgery (Urology)  
Vincent F. Marcaccio  
Clinical Instructor in Medicine  
David A. Marcoux  
Clinical Assistant Professor in Medicine  
Bess Marcus  
Adjunct Professor of Behavioral and Social Sciences; Adjunct Professor of Psychiatry and Human Behavior  
Peter S. Margolis  
Clinical Assistant Professor in Medicine  
Louis J. Marino  
Clinical Associate Professor in Psychiatry and Human Behavior  
Peter M. Marino  
Adjunct Lecturer in Public Policy  
Humphrey J. Maris  
Hazard Professor of Physics  
Hon Fong Louie Mark  
Clinical Professor Emeritus in Pediatrics  
David Mark Welch  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)  
Donald J. Marsh  
Frank L. Day Professor Emeritus of Biology  
Robert M. Marsh  
Professor Emeritus of Sociology  
Brandon David Lewis Marshall  
Assistant Professor of Epidemiology
Jean McElroy Marshall  
Professor Emeritus of Medical Science  
John Marshall  
Professor of Medical Science  
Lowry Marshall  
Professor of Theatre Arts and Performance Studies  
Robert J. Marshall  
Clinical Associate Professor in Health Services, Policy and Practice  
Carmen J. Marsit  
Adjunct Assistant Professor of Epidemiology  
John Bradley Marston  
Professor of Physics  
Carla M. Martin  
Clinical Assistant Professor in Family Medicine  
Courtney J. Martin  
Assistant Professor of History of Art and Architecture  
Douglas W. Martin  
Assistant Professor of Medicine (Clinical)  
Edward W. Martin  
Clinical Associate Professor in Medicine  
Margary Martin  
Visiting Assistant Professor of Education  
Saul A. Martin  
Clinical Assistant Professor Emeritus in Psychiatry and Human Behavior  
Ronald L. Martinez  
Professor of Italian Studies  
Julie A. Marton  
Adjunct Lecturer in Engineering  
Daniel Toby Marwil  
Clinical Instructor in Pediatrics  
Andrew Maslow  
Clinical Associate Professor in Surgery (Anesthesiology)  
Carole Maso  
Professor of Literary Arts  
Paul Mason  
Teaching Associate in Music  
Nadine R. Mastroleo  
Assistant Professor of Behavioral and Social Sciences (Research)  
Cara A. Mathews  
Assistant Professor of Obstetrics and Gynecology  
Donnath Mathews  
Assistant Professor of Medicine (Clinical)  
Edith Mathiowitz  
Professor of Medical Science; Professor of Engineering  
Christopher M. Matkovic  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Robley Matthews  
Professor Emeritus of Geological Sciences  
Anastasios Matzavinos Toumasis  
Assistant Professor of Applied Mathematics  
Jennifer L. Maude  
Clinical Instructor in Medicine  
Kate E. Mavrich  
Assistant Professor of Medicine (Clinical)  
Martin R. Maxey  
Professor of Applied Mathematics  
Kenneth Hugh Mayer  
Adjunct Professor of Medicine; Adjunct Professor of Epidemiology  
William W. Mayo-Smith  
Professor of Diagnostic Imaging  
Jeffrey M. Mazer  
Assistant Professor of Medicine  
Peter J. Mazzaglia  
Assistant Professor of Surgery (Clinical)  
Andrea C. Mazzarino  
Research Fellow in International Studies  
Aldo Mazzucchelli  
Adjunct Assistant Professor of Hispanic Studies  
Jeanne McCaffery  
Associate Professor of Psychiatry and Human Behavior (Research)  
Kathleen M. McCarten  
Professor of Diagnostic Imaging (Clinical); Professor of Pediatrics (Clinical)  
James R. McCartney  
Assistant Professor Emeritus of Psychiatry and Human Behavior  
John P. Mc Caskey  
Visiting Lecturer in Political Science  
Thomas McCauley  
Clinical Assistant Professor in Surgery (Ophthalmology)  
James L. McClain  
Professor of History  
Adam M. McCloskey  
Assistant Professor of Economics  
Steven G. McClory  
Clinical Assistant Professor in Medicine  
Donald E. McClure  
Professor Emeritus of Applied Mathematics  
Brynja J. McConarty  
Assistant Professor of Medicine (Clinical)  
David W. McConville  
Clinical Assistant Professor in Psychiatry and Human Behavior  
F. Dennis McCool  
Professor of Medicine  
Carolyn K. McCourt  
Assistant Professor of Obstetrics and Gynecology  
Charles E. McCoy  
Clinical Associate Professor in Medicine  
Rose McDermott  
Professor of Political Science  
Stefan McDonough  
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology  
Brian McEleney  
Clinical Professor in Theatre Arts and Performance Studies  
Matthew Richards McGarrell  
Senior Lecturer in Music  
Kelly Ann McGarry  
Associate Professor of Medicine  
Stephen T. McGarvey  
Professor of Epidemiology  
John E. McGearry  
Assistant Professor of Psychiatry and Human Behavior  
Brian M. McGillen  
Assistant Professor of Medicine (Clinical)  
Karen L. Mcgoldrick  
Clinical Assistant Professor in Obstetrics and Gynecology  
John McGonigle  
Clinical Instructor in Family Medicine  
Edward D. Mcgookin  
Clinical Associate Professor in Pediatrics; Clinical Associate Professor in Family Medicine
Andrew P. McGrath  
Clinical Instructor in Pediatrics

Alyson J. McGregor  
Assistant Professor of Emergency Medicine

Patrick J. McGuigan  
Adjunct Lecturer in Public Policy

Patrick J. McHugh  
Lecturer in Engineering

James T. McIlwain  
Clinical Assistant Professor in Psychiatry and Human Behavior

Sidney A. Fox and Dorothea Doctors Fox Professor Emeritus of Ophthalmology and Visual Science

Kevin M. McKay  
Assistant Professor of Medicine

George R. McEndall  
Associate Professor of Medicine

Michael McKeown  
Professor of Medical Science

Kevin McLaughlin  
George Hazard Crooker University Professor of English

Nicole McLaughlin  
Assistant Professor of Psychiatry and Human Behavior (Research)

Suzanne McLaughlin  
Assistant Professor of Pediatrics and Medicine

Paul N. McMillan  
Associate Professor of Pathology and Laboratory Medicine (Clinical); Associate Professor of Neurosurgery (Clinical)

Joseph M. McNamara  
Assistant Professor of Pediatrics (Clinical)

Megan J. McNamara  
Clinical Instructor in Emergency Medicine

Lynn McNicoll  
Associate Professor of Medicine (Clinical)

Laura H. McPeake  
Assistant Professor of Emergency Medicine (Clinical)

William H. McQuade  
Adjunct Assistant Professor of Family Medicine

Elizabeth L. McQuaid  
Associate Professor of Psychiatry and Human Behavior (Research)

Robert G. McRae  
Clinical Assistant Professor in Surgery (Otolaryngology)

Richard K. Mead  
Clinical Associate Professor Emeritus in Medicine

Richard Alan Meckel  
Associate Professor of American Studies

Antone A. Medeiros  
Professor Emeritus of Medicine

Carroll A. Medeiros  
Clinical Assistant Professor in Obstetrics and Gynecology

Damian Medi  
Assistant Professor of Orthopaedics; Assistant Professor of Medicine

Ildiko Medve  
Clinical Assistant Professor in Medicine

Anthony E. Mega  
Associate Professor of Medicine (Clinical); Associate Professor of Surgery (Clinical) (Urology)

Neil R. Mehrotra  
Assistant Professor of Economics

Niharika D. Mehta  
Assistant Professor of Medicine (Clinical)

Barbara J. Meier  
Senior Lecturer in Computer Science

Joseph Stoddard Meisel  
Adjunct Assistant Professor of History

Jerry Melillo  
Professor of Ecology and Evolutionary Biology (MBL)

Joanne Melish  
Visiting Scholar in American Studies

Michelle L. Mellon  
Assistant Professor of Neurology

Michael J. Mello  
Associate Professor of Emergency Medicine; Associate Professor of Health Services, Policy and Practice

A. Sattar N. Memon  
Clinical Associate Professor Emeritus in Medicine

Lisa M. Menard-Manlove  
Clinical Assistant Professor in Family Medicine

Ulrike Mende  
Associate Professor of Medicine

Manuela M. Mendes  
Clinical Assistant Professor in Family Medicine

Kristina C. Mendicino  
Assistant Professor of German Studies

Govind Menon  
Professor of Applied Mathematics

Judith S. Mercer  
Adjunct Professor of Pediatrics

Roland C. Merchant  
Associate Professor of Emergency Medicine; Associate Professor of Epidemiology

Derek Merck  
Assistant Professor of Diagnostic Imaging (Research); Assistant Professor of Engineering (Research)

Lisa Merck  
Assistant Professor of Emergency Medicine; Assistant Professor of Diagnostic Imaging

Robert D. Meringolo  
Clinical Associate Professor in Medicine

Leonard A. Merrell  
Professor of Medicine

Stephen T. Memoff  
Associate Professor of Neurology (Clinical)

Stephanie Merritt  
Professor of Comparative Literature and Hispanic Studies

Christopher H. Merritt  
Assistant Professor of Emergency Medicine

Brian Mertes  
Clinical Professor in Theatre Arts and Performance Studies

John A. Mertus  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences (Research)

Geralyn M. L. Messerlian  
Professor of Pathology and Laboratory Medicine

Markus Meuwly  
Adjunct Associate Professor of Chemistry

David R. Meyer  
Professor Emeritus of Sociology and Urban Studies

Stylianos G. Michalopoulos  
Assistant Professor of Economics

Dominique S. Michaud  
Professor of Epidemiology

Jacqueline Michaud  
Clinical Instructor in Medicine
Ian Michelow  
Assistant Professor of Pediatrics

Ralph P. Miech  
Associate Professor Emeritus of Medical Science

Michael E. Migliori  
Clinical Professor in Surgery (Ophthalmology)

Jeffrey P. Migneault  
Clinical Assistant Professor in Family Medicine

Lisa M. Mignone  
Assistant Professor of Classics

Alexandar Mihailovic  
Visiting Professor of Slavic Languages

Maria D. Mileno  
Associate Professor of Medicine

Alison Miller  
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

E. Bradley Miller  
Clinical Assistant Professor in Surgery (Urology)

Edward A. Miller  
Adjunct Associate Professor of Health Services, Policy and Practice

Ivan W. Miller  
Professor of Psychiatry and Human Behavior

Janice S. Miller  
Clinical Assistant Professor in Family Medicine

Kenneth Raymond Miller  
Professor of Biology

Kiri M. Miller  
Associate Professor of Music

Margaret Miller  
Associate Professor of Medicine

Susan Miller  
Professor of Health Services, Policy and Practice (Research)

Ralph E. Miliken  
Assistant Professor of Geological Sciences

Richard P. Milman  
Professor of Medicine and Pediatrics

David R. Mills  
Assistant Professor of Medicine (Research)

Taro Minami  
Assistant Professor of Medicine (Clinical)

Diane E. Minasian  
Clinical Assistant Professor in Family Medicine

Martin M. Miner  
Clinical Associate Professor in Family Medicine; Clinical Associate Professor in Surgery (Urology)

Thomas J. Miner  
Associate Professor of Surgery

Jane Minutti  
Clinical Assistant Professor in Family Medicine

Patricia Allison Minugh  
Clinical Assistant Professor in Behavioral and Social Sciences

Robert Miranda Jr  
Associate Professor of Psychiatry and Human Behavior (Research)

John P. Miskovsky  
Clinical Assistant Professor in Medicine

Cristina L. Mitchell  
Clinical Assistant Professor in Family Medicine

Vesna Mitrovic  
Associate Professor of Physics

Amy C. B. Milnar  
Assistant Professor of Geological Sciences

Vladan Milnar  
Assistant Professor of Engineering (Research)

John Modell  
Professor Emeritus of Education and Sociology

Poonam Modha  
Clinical Assistant Professor in Psychiatry and Human Behavior

Andrew K. Moffit  
Adjunct Lecturer in Education

Jeffrey S. Moffit  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Susan L. Moffitt  
Mary Teft and John Hazen White, Sr. Assistant Professor of Political Science and Public Policy

Leslie C. Mohiman  
Clinical Instructor in Pediatrics

Ethan Moitra  
Assistant Professor of Psychiatry and Human Behavior (Research)

Anthony Molho  
Professor Emeritus of History

Joyce E. Monac  
Clinical Assistant Professor in Pediatrics

Barbara Monahan  
Senior Lecturer Emerita in Slavic Languages

Jack M. Monchik  
Clinical Professor in Surgery (Endocrine Surgery)

Keith O. Monchik  
Clinical Assistant Professor in Family Medicine

Brian Montague  
Assistant Professor of Medicine; Assistant Professor of Health Services, Policy and Practice

Terri L. Montague  
Assistant Professor of Medicine

Alain J. Montegut  
Adjunct Assistant Professor of Family Medicine

George Monteiro  
Professor Emeritus of English

Lois A. Monteiro  
Professor Emerita of Behavioral and Social Sciences

James E. Monti  
Clinical Associate Professor in Emergency Medicine

Peter M. Monti  
Donald G. Millar Distinguished Professor of Alcohol and Addiction Studies

Christine Montross  
Assistant Professor of Psychiatry and Human Behavior

Carmen V. Monzon  
Clinical Assistant Professor in Psychiatry and Human Behavior; Clinical Assistant Professor in Medicine

Christopher I. Moore  
Associate Professor of Neuroscience

Douglas C. Moore  
Clinical Assistant Professor in Orthopaedics

Jason H. Moore  
Adjunct Associate Professor of Psychiatry and Human Behavior

Kym Moore  
Assistant Professor of Theatre Arts and Performance Studies

Richard G. Moore  
Professor of Obstetrics and Gynecology

Vincent Mor  
Florence Pirce Grant University Professor

Sandro Mario Moraldo  
Visiting Professor of German Studies
Eduardo Morales  
Clinical Instructor in Medicine

John H. Moran  
Clinical Associate Professor in Pediatrics

Christopher J. Morath  
Adjunct Assistant Professor of Physics

Sarah Morchen  
Clinical Instructor in Family Medicine

Rebecca Sherrill More  
Visiting Scholar in History

James L. Morgan  
Professor of Cognitive, Linguistic, and Psychological Sciences

Jeffrey R. Morgan  
Professor of Medical Science; Professor of Engineering

Thomas F. Morgan  
Clinical Assistant Professor in Neurology

Richard V. Morgera  
Clinical Assistant Professor in Family Medicine

William J. Morocco  
Clinical Instructor in Pediatrics

James A. Morone Jr  
John Hazen White Professor of Public Policy

David J. Morris  
Professor of Pathology and Laboratory Medicine

Paul E. Morrissey  
Associate Professor of Surgery

Eric M. Morrow  
Assistant Professor of Biology; Assistant Professor of Psychiatry and Human Behavior

Kathleen M. Morrow  
Associate Professor of Psychiatry and Human Behavior (Research)

Douglas H. Morse  
Hermon Bumpus Professor Emeritus of Biology

Theodore F. Morse  
Professor Emeritus of Engineering

John Rollin Morton  
Clinical Assistant Professor in Family Medicine

James R. Moses  
Lecturer in Music

Steven F. Moss  
Professor of Medicine

Albert S. Most  
Professor of Medicine

Samir G. Moubayed  
Clinical Associate Professor Emeritus in Obstetrics and Gynecology

Bernard A. Moule  
Clinical Associate Professor in Surgery (Urology)

Anthony Moulton  
Clinical Professor in Surgery (Cardiothoracic Surgery)

Jonathan S. Movson  
Assistant Professor of Diagnostic Imaging (Clinical)

Kimberly L. Mowry  
Robin Chemers Neustein Professor of Biomedicine

Jennie J. Muglia  
Associate Professor of Dermatology (Clinical)

Elias I. Muhanna  
Assistant Professor of Comparative Literature

Nadia Mujahid  
Assistant Professor of Medicine (Clinical)

Tokir Mujtaba  
Clinical Instructor in Medicine

Tracy K. Mullare  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jeffrey M. Muller  
Professor of History of Art and Architecture

David Mumford  
Professor Emeritus of Applied Mathematics

Jeremy R. Mumford  
Visiting Assistant Professor of History

Joseph L. Mundy  
Professor of Engineering (Research)

Annmarie Munoz  
Clinical Assistant Professor in Surgery (Anesthesiology)

Kaivan Munshi  
Adjunct Professor of Population Studies

Christopher S. Muratore  
Assistant Professor of Surgery; Assistant Professor of Pediatrics

Brian L. Murphy  
Clinical Associate Professor in Diagnostic Imaging

Donald R. Murphy  
Clinical Assistant Professor in Family Medicine

John A. Murphy  
Clinical Assistant Professor Emeritus in Obstetrics and Gynecology

John B. Murphy  
Professor of Medicine; Professor of Family Medicine

John F. Murphy  
Clinical Assistant Professor in Medicine

Marjorie A. Murphy  
Professor of Surgery (Clinical)(Ophthalmology)

Timothy P. Murphy  
Professor of Diagnostic Imaging

Anne L. Murray  
Clinical Assistant Professor in Obstetrics and Gynecology

David W. Murray  
Lecturer in Environmental Studies

Rolland D. Murray  
Associate Professor of English

Jayasimha N. Murthy  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Sandra J. Musial  
Clinical Assistant Professor in Pediatrics

John F. Mustard  
Professor of Geological Sciences

Ann W. Mwangi  
Adjunct Assistant Professor of Biostatistics

Tracey L. Myatt  
Clinical Assistant Professor in Pediatrics

Deborah L. Myers  
Professor of Obstetrics and Gynecology

Emily Myers  
Adjunct Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

James R. Myers  
Clinical Associate Professor in Medicine

Wade Myers  
Professor of Psychiatry and Human Behavior

Eleftherios E. Mylonakis  
Dean's Professor of Medical Science

Paul T. Myoda  
Assistant Professor of Visual Art

Drayton Nabers  
Associate Professor of English
Ahmed Nadeem  
Clinical Assistant Professor in Medicine

Srini S. Nagavarapu  
Assistant Professor of Economics and Environmental Studies

Yu Jin Nah  
Clinical Instructor in Medicine

Dinesh G. Nair  
Adjunct Instructor in Neurology

Peter Nakhla  
Clinical Instructor in Medicine

Aman Nanda  
Associate Professor of Medicine

Anthony M. Napoli  
Assistant Professor of Economics and Environmental Studies

Meenakshi Narain  
Professor of Physics

Akil Narayan  
Visiting Assistant Professor of Applied Mathematics

Srinivasa Narayanaswamy  
Clinical Instructor in Medicine

Justin M. Nash  
Professor of Family Medicine; Professor of Psychiatry and Human Behavior

Marjorie Nasin  
Assistant Professor of Pediatrics (Clinical)

Jack Nassau  
Clinical Associate Professor in Psychiatry and Human Behavior

Andrew T. Nathanson  
Clinical Associate Professor in Emergency Medicine

Rebecca A. Nedostup  
Associate Professor of History

Christopher Neill  
Associate Professor of Ecology and Evolutionary Biology (MBL)

Marguerite A. Neill  
Associate Professor of Medicine

Ezequiel Neimark  
Assistant Professor of Pediatrics (Clinical)

Megan Kate Nelson  
Visiting Lecturer in History

Peter Gale Nelson  
Senior Lecturer in Literary Arts

Ron J. Nelson  
Professor Emeritus of Music

Lina R. Nemchenok  
Clinical Instructor in Medicine

Saed Nemr  
Clinical Instructor in Medicine

Nicola Neretti  
Assistant Professor of Biology

Dawn K. Nero  
Clinical Assistant Professor in Psychiatry and Human Behavior

Predrag V. Neskovic  
Adjunct Assistant Professor of Brain Science (Research)

Elizabeth M. Nestor  
Clinical Professor in Emergency Medicine

Dietrich Neumann  
Professor of History of Art and Architecture; Professor of Italian Studies; Professor of Urban Studies

Laura S. Nevel  
Clinical Assistant Professor in Obstetrics and Gynecology

Joshua W. Neves  
Assistant Professor of Modern Culture and Media

Chad P. Nevola  
Clinical Assistant Professor in Pediatrics

Karen A. Newman  
Owen F. Walker '33 Professor of Humanities and Professor of Comparative Literature

Lucile F. Newman  
Professor Emerita of Biostatistics

Michael Newstein  
Adjunct Assistant Professor of Medicine

Christopher Newton  
Clinical Assistant Professor in Surgery (Ophthalmology)

Karen Y. Ng  
Clinical Assistant Professor in Family Medicine

Thomas Ng  
Associate Professor of Surgery (Cardiothoracic Surgery)

Owen F. Walker '33 Professor of Humanities and Professor of Comparative Literature

Rebecca A. Nedostup  
Associate Professor of History

Guy R. Nicastri  
Adjunct Lecturer in Economics

Peter T. Nigri  
Clinical Assistant Professor in Surgery (Otolaryngology)

Eduardo A. Nilni  
Professor of Medicine (Research); Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Ted D. Nirenberg  
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Emergency Medicine (Research)

Douglas R. Nickel  
Andrea V. Rosenthal Professor of History of Art and Architecture

Heather M. Niemeier  
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Pura Nieto Hernandez  
Senior Lecturer in Classics

Karen A. Newman  
Owen F. Walker '33 Professor of Humanities and Professor of Comparative Literature

Richard B. Noto  
Professor of Diagnostic Imaging

Roger H. Nozaki  
Lecturer in Sociology

Judith Nudelman  
Clinical Associate Professor in Family Medicine

Melissa Brooks Nothnagle  
Associate Professor of Family Medicine

Richard B. Noto  
Professor of Diagnostic Imaging (Clinical)

Linda Nicci  
Clinical Professor in Medicine

Douglas R. Nickel  
Andrea V. Rosenthal Professor of History of Art and Architecture

Heather M. Niemeier  
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Lindsey M. O. Newman  
Clinical Associate Professor in Obstetrics and Gynecology

Arthur W. Noel  
Clinical Assistant Professor in Diagnostic Imaging

Thomas E. Noonan  
Adjunct Associate Professor of Health Services, Policy and Practice

Weixing Niu  
Visiting Scholar in Egyptology and Ancient Western Asian Studies

Arthur W. Noel  
Clinical Assistant Professor in Diagnostic Imaging

Patricia A. Nolan  
Adjunct Associate Professor of Health Services, Policy and Practice

Thomas E. Noonan  
Clinical Assistant Professor in Medicine

Georg Noren  
Professor Emeritus of Neurosurgery

Maureen Nosal  
Adjunct Lecturer in Education

Melissa Brooks Nothnagle  
Associate Professor of Family Medicine

Richard B. Noto  
Professor of Diagnostic Imaging (Clinical)

Roger H. Nozaki  
Lecturer in Sociology

Judith Nudelman  
Clinical Associate Professor in Family Medicine

Nicole R. Nugent  
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)
Tara E. Nummedal  
Associate Professor of History; Associate Professor of Italian Studies

Amy Nunn  
Assistant Professor of Medicine (Research); Assistant Professor of Behavioral and Social Sciences (Research)

Arto V. Nummikko  
L. Herbert Ballou University Professor of Engineering

Elena Oancea  
Assistant Professor of Medical Science

Dina Obeid  
Visiting Scholar in Physics

Barbara M. O'Brien  
Associate Professor of Obstetrics and Gynecology

Erin M. O'Brien  
Clinical Assistant Professor in Psychiatry and Human Behavior

James A. O'Brien  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Jill A. O'Brien  
Clinical Instructor in Medicine

Xian Marie O'Brien  
Instructor in Surgery (Research)

Monica H. O'Connell  
Visiting Scholar in American Studies

Bonnie O'Connor  
Professor of Pediatrics (Clinical)

David Joseph Odeh  
Adjunct Lecturer in Engineering

Katja Odening  
Adjunct Assistant Professor of Medicine

Patricia M. Ogara  
Clinical Assistant Professor in Pathology and Laboratory Medicine

Hee Oh  
Adjunct Professor of Mathematics

Kathleen A. O'Heelan  
Clinical Assistant Professor in Family Medicine

Richard K. Ohnmacht  
Clinical Associate Professor in Pediatrics

Ikenna Okereke  
Assistant Professor of Surgery (Cardiothoracic Surgery)

Michal Oklot  
Assistant Professor of Slavic Languages

Anthony J. Oldcorn  
Professor Emeritus of Italian Studies

Rudolf Oldenburg  
Professor of Physics (MBL)

G. Richard Olds Sr  
Adjunct Professor of Medicine

Jeanne M. Oliva  
Clinical Assistant Professor in Medicine

Alvaro Olivares  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ruben Oliven  
Adjunct Professor of International Studies

Graham Oliver  
Professor of Classics

Karen Oliver  
Clinical Assistant Professor in Psychiatry and Human Behavior

Susan P. Oliverio  
Assistant Professor of Medicine (Clinical)

Adam Olszewski  
Assistant Professor of Medicine

Segun Dele Olubanwo  
Visiting Scholar in Chemistry

Saul Olyan  
Samuel Ungerleider, Jr. Professor of Judaic Studies

Jonathan O'Muircheartaigh  
Visiting Scientist in Engineering

Iker Leon Ona  
Visiting Scholar in Chemistry

Warren Ong  
Clinical Assistant Professor in Psychiatry and Human Behavior

Steven M. Opal  
Professor of Medicine

Don Operario  
Associate Professor of Behavioral and Social Sciences

Adi Ophir  
Visiting Associate Professor of Cogut Humanities Center

Lindsay M. Orchowski  
Assistant Professor of Psychiatry and Human Behavior (Research)

Marion E. Orr  
Frederick Lippitt Professor of Public Policy

Jay M. Orson  
Clinical Associate Professor Emeritus in Pediatrics

Julio C. Ortega  
Professor of Hispanic Studies

Francisco Amado Mejia Ortiz  
Adjunct Professor of Medicine

Jose Ramon Ortiz  
Clinical Professor of Pathology and Laboratory Medicine

Ithohi I. Osayimwese  
Assistant Professor of History of Art and Architecture

Brenda Marie Osbey  
Visiting Professor of Africana Studies

Edward P. Osborn  
Visiting Professor of African Studies

Roanne Osborne-Gaskin  
Clinical Assistant Professor in Family Medicine

Dirk Mathias Oschmann  
Visiting Professor of German Studies

Wendy A. Ossman  
Clinical Assistant Professor in Psychiatry and Human Behavior

Thomas P. O'Toole  
Professor of Medicine

Brian R. Ott  
Professor of Neurology

Joyce Ou  
Assistant Professor of Pathology and Laboratory Medicine

Frank L. Overly  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Adetokunbo A. Oyelose  
Assistant Professor of Neurosurgery

Calvin E. Oyer  
Clinical Associate Professor in Pathology and Laboratory Medicine

Ilker Ozden  
Assistant Professor of Engineering (Research)

Iike Ozbekin  
Visiting Scholar in Cognitive, Linguistic, and Psychological Sciences

Margaret Paccione-Dyszlewski  
Clinical Assistant Professor in Psychiatry and Human Behavior
Jan Mateusz Pacewicz
Assistant Professor of Sociology and Urban Studies
Cristina A. Pacheco
Clinical Assistant Professor in Family Medicine
Domenico Pacifici
Assistant Professor of Engineering
James F. Padbury
William and Mary Oh - William and Elsa Zopfi Professor of Pediatrics for Perinatal Research
Robert C. Padden
Professor Emeritus of History and Portuguese and Brazilian Studies
Rafael E. Padilla
Clinical Assistant Professor in Surgery (Anesthesiology)
Nitin P. Padture
Professor of Engineering
Maria Pagano
Adjunct Associate Professor of Psychiatry and Human Behavior
Lyman A. Page
Clinical Professor Emeritus in Pediatrics
Rebecca Page
Associate Professor of Biology
Talbot Page
Professor Emeritus of Economics and Environmental Studies
Kelly Pagidas
Associate Professor of Obstetrics and Gynecology
Michael J. Paglia
Clinical Assistant Professor in Obstetrics and Gynecology
David C. Paine
Professor of Engineering
Francisco Pais Cardoso
Teaching Associate in Music
Anjali Palav
Clinical Assistant Professor in Psychiatry and Human Behavior
Adam D. Pallant
Associate Professor of Pediatrics (Clinical)
Rohan Palmer
Assistant Professor of Psychiatry and Human Behavior (Research)
Lynne M. Palmisciano
Assistant Professor of Emergency Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)
G. Tayhas R. Palmore
Professor of Engineering; Professor of Chemistry
Glenn E. Palomaki
Associate Professor of Pathology and Laboratory Medicine (Research)
Mark A. Palumbo
Associate Professor of Orthopaedics
Bai-Chuan Pan
Professor Emeritus of Medicine (Research)
Heather Panaro
Clinical Assistant Professor in Surgery (Anesthesiology)
Stephen V. Panaro
Clinical Assistant Professor in Surgery (Anesthesiology)
Nikolaos Panou
Visiting Assistant Professor of Comparative Literature
Dennis Pantazatos
Assistant Professor of Medicine (Research)
Elisa Giardina Papa
Adjunct Assistant Professor of Modern Culture and Media
Efstratos Papaioannou
Associate Professor of Classics
Parmenion Papamichos Chronakis
Visiting Assistant Professor of History
George D. Papandonatos
Associate Professor of Biostatistics (Research)
Rebecca K. Papas
Assistant Professor of Psychiatry and Human Behavior (Research)
John P. Papay
Assistant Professor of Education; Assistant Professor of Economics
Martin R. Papazian
Clinical Assistant Professor in Surgery (Otolaryngology)
Stephanie Parade
Assistant Professor of Psychiatry and Human Behavior (Research)
Michael A. Paradiso
Sidney A. Fox and Dorothea Doctors Fox Professorship of Ophthalmology and Visual Science
Laura C. Parajon
Adjunct Instructor in Family Medicine
Gyan Pareek
Associate Professor of Surgery (Urology)
Alfred F. Parisi
Professor Emeritus of Medicine
Donna R. Parker
Associate Professor of Family Medicine (Research); Associate Professor of Epidemiology (Research)
Stephen Parman
Assistant Professor of Geological Sciences
Marco A. Parmeggiani Rueda
Visiting Scholar in Philosophy
Edgar M. Parmentier
Professor of Geological Sciences
Robert A. Partridge
Adjunct Associate Professor of Emergency Medicine
James T. Pascalides
Clinical Assistant Professor in Orthopaedics
George Pasquarello
Clinical Assistant Professor in Family Medicine
Mary Ann C. Passero
Clinical Associate Professor in Pediatrics
Michael A. Passero
Adjunct Associate Professor of Medicine
Dhiren Patel
Clinical Instructor in Family Medicine
Robert L. Patrick
Associate Professor of Medical Science
David R. Patterson
Professor of Ecology and Evolutionary Biology (MBL)
Robert B. Patterson
Clinical Professor in Surgery
William R. Patterson III
Senior Lecturer in Engineering
Christina Paxson
Professor of Economics and Public Policy
Gillian E. Pearis
Clinical Assistant Professor in Psychiatry and Human Behavior
Deborah N. Pearlman
Assistant Professor of Epidemiology (Research)
Teri B. Pearlstein
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Medicine
Matthew Pearssal
Clinical Instructor in Surgery (Anesthesiology)
David W. Pearson
Clinical Assistant Professor Emeritus in Psychiatry and Human Behavior
David E. Pedersen  
Visiting Lecturer in Anthropology

Robert A. Pelcovits  
Professor of Physics

Andrew Pennock  
Lecturer in Public Policy

Frank A. Pensa  
Clinical Associate Professor in Obstetrics and Gynecology

Michael A. Pepi  
Clinical Assistant Professor in Obstetrics and Gynecology

Vincent Pera Jr  
Clinical Assistant Professor in Medicine

Helen Perdicoyianni-Paleologou  
Visiting Scholar in Classics

Kimberly J. Perez  
Assistant Professor of Medicine

Maria Dolores Martos Perez  
Visiting Scholar in Hispanic Studies

Elliot M. Perlman  
Clinical Associate Professor in Surgery (Ophthalmology)

Marc A. Perlman  
Associate Professor of Music

Adrienne J. Perry  
Clinical Assistant Professor in Obstetrics and Gynecology

Curtis L. Perry  
Professor Emeritus of History

Keisha-Khan Y. Perry  
Assistant Professor of Africana Studies

Samuel E. Perry  
Assistant Professor of East Asian Studies

Francis J. Pescosolido  
Clinical Associate Professor in Psychiatry and Human Behavior

Georges Peter  
Professor Emeritus of Pediatrics

Andrew A. Peterson  
Assistant Professor of Engineering

Heidi H. Peterson  
Clinical Assistant Professor in Family Medicine

Wolfgang Peti  
Associate Professor of Medical Science; Associate Professor of Chemistry

Robert A. Petteruti  
Adjunct Lecturer in Engineering

Steven F. Petteruti  
Adjunct Lecturer in Engineering

John A. Pezzullo  
Assistant Professor of Diagnostic Imaging (Clinical)

Suzanne Phelan  
Adjunct Associate Professor of Psychiatry and Human Behavior

Noah S. Philip  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Bruce A. Phillips  
Clinical Assistant Professor in Family Medicine

Katharine A. Phillips  
Professor of Psychiatry and Human Behavior

Martin R. Phillips  
Clinical Assistant Professor in Surgery

Paul Schuyler Phillips  
Senior Lecturer in Music

Maureen Phipps  
Professor of Obstetrics and Gynecology; Professor of Epidemiology

Chanika Phornphutkul  
Associate Professor of Pediatrics

Marcelle L. Piccolello  
Assistant Professor of Diagnostic Imaging (Clinical)

Dawn M. Picotte  
Clinical Assistant Professor in Psychiatry and Human Behavior

Carle M. Pieters  
Professor of Geological Sciences (Research)

M. Halit Pinar  
Professor of Pathology and Laboratory Medicine

Paulo Sergio Pinheiro  
Adjunct Professor of International Studies

Megan Pinkston-Camp  
Assistant Professor of Psychiatry and Human Behavior (Research)

Anthony Pinto  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Bernadine M. Pinto  
Professor of Psychiatry and Human Behavior (Research)

Stefan R. Piperov  
Assistant Professor of Physics (Research)

Jill Catherine Pipher  
Elisha Benjamin Andrews Professor of Mathematics

Paul A. Pirraglia  
Associate Professor of Medicine

Irene Piryatinsky  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Latha R. Pisharodi  
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Mark M. Pitt  
Professor of Population Studies (Research)

Martha A. Pizzarello  
Clinical Assistant Professor in Obstetrics and Gynecology

Peter A. Pizzarello  
Clinical Assistant Professor in Family Medicine

Beth Plante  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Matthew J. Plante  
Clinical Assistant Professor in Family Medicine

Wendy A. Plante  
Clinical Associate Professor in Psychiatry and Human Behavior

Kevin M. Plouffe  
Teaching Associate in Music

Barry A. Plummer  
Clinical Associate Professor in Psychiatry and Human Behavior

Alan D. Podis  
Clinical Assistant Professor in Surgery (Urology)

Jose R. Polanco  
Clinical Assistant Professor in Medicine

Jeffrey S. Poland  
Visiting Professor of History

Ethan Pollock  
Associate Professor of History; Associate Professor of Slavic Languages

David S. Pomerantz  
Clinical Assistant Professor in Dermatology

Michael A. Pomerantz  
Clinical Assistant Professor in Medicine

Samuel H. Poon  
Clinical Assistant Professor in Medicine

Carol Jean Poore  
Professor Emerita of German Studies
Athena Poppas  
Associate Professor of Medicine

Aurora E. Pop-Vicas  
Assistant Professor of Medicine

Stephen Porder  
Associate Professor of Ecology and Evolutionary Biology

Gisela I. Porras  
Clinical Assistant Professor in Pediatrics

David C. Portelli  
Clinical Associate Professor in Emergency Medicine

Paul S. Porter  
Assistant Professor of Emergency Medicine (Clinical)

Ryan A. Portner  
Visiting Scientist in Geological Sciences

Barbara Porton  
Assistant Professor of Psychiatry and Human Behavior (Research)

Roy M. Poses  
Clinical Associate Professor in Medicine

Michael T. Poshkus  
Assistant Professor of Medicine (Clinical)

Rock Positano  
Adjunct Assistant Professor of Orthopaedics

Donn A. Posner  
Clinical Associate Professor in Psychiatry and Human Behavior

Anton Post  
Professor of Ecology and Evolutionary Biology (MBL)

N. Stevenson Potter  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Ronald Matthew Potvin  
Adjunct Instructor in John Nicholas Brown Center

Morris Leon Pover  
Professor Emeritus of Medical Science

Elizabeth E. Powell  
Visiting Assistant Professor of Engineering

Donya A. Powers  
Clinical Associate Professor in Family Medicine

Marylin M. Powers  
Clinical Assistant Professor in Obstetrics and Gynecology

Thomas R. Powers  
Professor of Engineering; Professor of Physics

Raymond O. Powrie  
Professor of Medicine; Professor of Obstetrics and Gynecology

Warren L. Prell  
Henry L. Doherty Professor of Oceanography

Francesca Preparata  
An Wang Professor of Computer Science

Amanda B. Pressman  
Assistant Professor of Medicine (Clinical)

David E. Preston  
Adjunct Lecturer in Public Policy

Robert W. Preucel  
Professor of Anthropology

Ann Back Price  
Clinical Assistant Professor in Psychiatry and Human Behavior

Katharine A. Price  
Clinical Instructor in Medicine

Lawrence H. Price  
Professor of Psychiatry and Human Behavior

Jennifer M. Primack  
Assistant Professor of Psychiatry and Human Behavior (Research)

Lawrence Proano  
Clinical Associate Professor in Emergency Medicine

Romano Prodi  
Professor at Large

Kittichai Promrat  
Associate Professor of Medicine

Sherri Provencal  
Clinical Assistant Professor in Psychiatry and Human Behavior

Donald E. Pryor  
Adjunct Lecturer in Environmental Studies

Joseph Michael Pucci  
Associate Professor of Classics; Associate Professor of Comparative Literature

Albert J. Puerini  
Clinical Assistant Professor in Family Medicine

Siegfried M. Pueschel  
Professor Emeritus of Pediatrics

Mathew Pulicken  
Assistant Professor of Neurology (Clinical)

Anthony J. Purcell  
Clinical Assistant Professor in Family Medicine

M. Yakub A. Puthawala  
Clinical Associate Professor in Radiation Oncology

Michael C. J. Putnam  
Professor Emeritus of Classics

Louis Puttman  
Professor of Economics

C. Brandon Qualls  
Clinical Assistant Professor in Psychiatry and Human Behavior

M. Ruhul Quddus  
Associate Professor of Pathology and Laboratory Medicine

Henry Querfurth  
Associate Professor of Neurology

Matthew I. Quesenberry  
Assistant Professor of Medicine

Peter J. Quesenberry  
Paul Calabresi, MD Professor of Oncology

David G. Quigley  
Clinical Assistant Professor in Orthopaedics

Dianne P. Quigley  
Adjunct Assistant Professor of Environmental Studies (Research)

Jose Bernardo Q. Quintos  
Associate Professor of Pediatrics (Clinical)

Kurt A. Raafaub  
Professor Emeritus of Classics

Joseph S. Rabatin  
Associate Professor of Medicine (Clinical)

Melinda Alliker Rabb  
Professor of English

Carolyn S. Rabin  
Assistant Professor of Psychiatry and Human Behavior (Research)

Steve Rabson  
Professor Emeritus of East Asian Studies

Gregory Rachu  
Clinical Instructor in Family Medicine

Michael A. Raciti  
Clinical Assistant Professor in Psychiatry and Human Behavior

Dale F. Radka  
Clinical Assistant Professor in Psychiatry and Human Behavior

Susan D. Raffa  
Clinical Assistant Professor in Psychiatry and Human Behavior
Ahmed S. Rahman
Visiting Associate Professor of Economics
Aishah Rahman
Professor Emerita of Literary Arts
Philip R. Raiford
Clinical Assistant Professor in Family Medicine
Herbert Rakatansky
Clinical Professor Emeritus in Medicine
William Rakowski
Professor of Behavioral and Social Sciences
Sohini Ramachandran
Assistant Professor of Biology
Christine M. Ramalho
Clinical Assistant Professor in Surgery (Oral & Maxillofacial Surgery)
Kavita Ramanan
Professor of Applied Mathematics
Richard M. Rambuss
Professor of English
Donald A. Ramos
Clinical Assistant Professor in Obstetrics and Gynecology
Bharat Ramratnam
Associate Professor of Medicine
Susan Ramsey
Associate Professor of Psychiatry and Human Behavior (Research);
Associate Professor of Medicine (Research)
Kenneth R. Ramsley
Visiting Investigator in Engineering
David M. Rand
Professor of Biology
Rebecca W. Randall
Clinical Assistant Professor in Obstetrics and Gynecology
Megan L. Ranney
Assistant Professor of Emergency Medicine
Benjamin J. Raphael
Associate Professor of Computer Science
Charles R. Rardin
Associate Professor of Obstetrics and Gynecology
Tarek R. Rashid
Clinical Instructor in Medicine
Wasim Rashid
Clinical Assistant Professor in Psychiatry and Human Behavior
Steven A. Rasmussen
Mary E. Zucker Professor of Psychiatry and Human Behavior
Edward Rastetter
Professor of Ecology and Evolutionary Biology (MBL)
Lucille A. Rathier
Clinical Assistant Professor in Psychiatry and Human Behavior
Nooredin Raufi
Clinical Instructor in Surgery (Anesthesiology)
Neha P. Raukar
Assistant Professor of Emergency Medicine
Stephanie Ravillon
Lecturer in French Studies
Thangam Ravindranathan
Associate Professor of French Studies
Roger D. Raymond
Clinical Assistant Professor in Medicine
Christine E. Rayner
Clinical Assistant Professor in Family Medicine
James R. Rayner
Clinical Assistant Professor in Emergency Medicine
Jonathan Readey
Lecturer in English
Patricia R. Recupero
Clinical Professor in Psychiatry and Human Behavior
Sherief Reda
Associate Professor of Engineering
Madhavi K. Reddy
Assistant Professor of Psychiatry and Human Behavior (Research)
Marc Redfield
Professor of English and Comparative Literature
Joseph D. Reed
Professor of Classics
Robert A. Reenan
Professor of Biology
Frances Regas
Clinical Assistant Professor in Surgery (Anesthesiology)
Vishram B. Rege
Clinical Associate Professor Emeritus in Medicine
Bernard M. Reginster
Professor of Philosophy
Richard A. Regnante
Clinical Instructor in Medicine
David Reichert
Visiting Scholar in Cognitive, Linguistic, and Psychological Sciences
Ravit Reichman
Associate Professor of English
Jonathan S. Reichner
Associate Professor of Surgery (Research)
Lawrence E. Reinstein
Adjunct Professor of Radiation Oncology
Steven P. Reiss
Professor of Computer Science
Amy G. Remensnyder
Associate Professor of History
Eric M. Renault
C.V. Starr Professor of Commerce, Organizations and Entrepreneurship
Richard D. Rende
Associate Professor of Psychiatry and Human Behavior (Research)
Michelle Renee
Clinical Assistant Professor in Education
Barbara M. Reo
Lecturer in Theatre Arts and Performance Studies
Murray Resnick
Professor of Pathology and Laboratory Medicine
Susan K. Resnick
Visiting Lecturer in English
Linda J. Resnik
Associate Professor of Health Services, Policy and Practice (Research)
Carolyn H. Revercomb
Clinical Assistant Professor in Pathology and Laboratory Medicine
Joel W. Revill
Adjunct Assistant Professor of History
William R. Rhodes
Professor at Large
Geoffrey Ribbons
Professor Emeritus of Hispanic Studies
Iole Ribizzi-Akhtar
Clinical Assistant Professor in Medicine
Anthony R. Ricci
Clinical Instructor in Medicine
Ronald R. H. Ricco
Clinical Assistant Professor in Family Medicine

Louis B. Rice
Joukowsky Family Professor of Medicine

Harlan G. Rich
Associate Professor of Medicine

Jeremy J. Rich
Assistant Professor of Ecology and Evolutionary Biology

Josiah D. Rich
Professor of Medicine; Professor of Epidemiology

Norman Rich
Professor Emeritus of History

Joan L. Richards
Professor of History

Elizabeth E. Richardson
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Peter Damian Richardson
Professor of Engineering

Katherine Richman
Assistant Professor of Medicine

Marc Richman
Professor Emeritus of Engineering

Gerhard Richter
Professor of German Studies

Michelle L. Rickerby
Clinical Associate Professor in Psychiatry and Human Behavior

Kenneth C. Rickler
Clinical Associate Professor in Psychiatry and Human Behavior; Clinical Associate Professor in Neurology

Mark S. Ridlen
Associate Professor of Diagnostic Imaging (Clinical)

Renee Ridzon
Adjunct Assistant Professor of Medicine

Anne L. Rieger
Visiting Scholar in Chemistry

Lucas B. Rieppel
Assistant Professor of History

Timothy B. Riker
Visiting Lecturer in Language Studies

Raymond S. Riley
Clinical Professor Emeritus in Medicine

Mark A. Ringewicz
Clinical Assistant Professor in Family Medicine

Patricia M. Risica
Assistant Professor of Epidemiology (Research)

Robert Risica
Clinical Assistant Professor in Surgery (Otolaryngology)

Dianne C. Ritchie
Adjunct Assistant Professor of Family Medicine

Dale A. Ritter
Senior Lecturer in Biology

Massimo Riva
Professor of Italian Studies

Mark J. Rivard
Adjunct Professor of Radiation Oncology

David Rivera
Clinical Instructor in Surgery (Ophthalmology)

Jorge Rivera
Clinical Assistant Professor in Surgery (Ophthalmology)

Igor Rivin
Visiting Professor of Mathematics

Tina Rizack
Assistant Professor of Medicine (Clinical); Assistant Professor of Obstetrics and Gynecology (Clinical)

Syed A. Rizvi
Associate Professor of Neurology (Clinical)

Christie J. Rizzo
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)

Philip R. Rizzuto
Clinical Associate Professor in Surgery (Ophthalmology)

Brandy Roane
Adjunct Assistant Professor of Psychiatry and Human Behavior

Barbara H. Roberts
Clinical Associate Professor in Medicine

Debra L. Roberts
Clinical Assistant Professor in Family Medicine

J. Timmons Roberts
Ittleson Professor of Environmental Studies

Thomas Roberts
Associate Professor of Ecology and Evolutionary Biology

Alexander P. Robertson
Clinical Assistant Professor in Orthopaedics

James F. Robertson
Clinical Assistant Professor in Medicine

Henry J. Robidoux
Clinical Associate Professor Emeritus in Surgery

Leslie Robinson-Bostom
Professor of Dermatology

Katina M. Robison
Assistant Professor of Obstetrics and Gynecology

Marcia B. Robitaille
Clinical Assistant Professor in Emergency Medicine

Seth E. Rockman
Associate Professor of History

Randy Rockney
Professor of Pediatrics; Professor of Family Medicine

Karim Roder
Assistant Professor of Medicine (Research)

Daniel Rodriguez
Assistant Professor of Psychiatry and Human Behavior (Research)

Marina Rodriguez
Clinical Instructor in Medicine

Pablo Rodriguez
Clinical Associate Professor in Obstetrics and Gynecology

Ralph E. Rodriguez
Associate Professor of American Studies; Associate Professor of English

Thomas A. Roesler
Associate Professor of Psychiatry and Human Behavior

Jamison E. Rogers
Assistant Professor of Psychiatry and Human Behavior (Clinical)

William H. Rogers
Adjunct Professor of Health Services, Policy and Practice

Jeffrey M. Rogg
Associate Professor of Diagnostic Imaging

Donald Rohr
Professor Emeritus of History

Thomas E. Rohrer
Adjunct Associate Professor of Dermatology

Damaris J. Rohsenow
Professor of Behavioral and Social Sciences (Research)
Felipe Rojas Silva
Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies

Thomas D. Romeo
Clinical Assistant Professor Emeritus in Health Services, Policy and Practice

Ellen Frances Rooney
Professor of Modern Culture and Media and English

Gary Rose
Adjunct Professor of Health Services, Policy and Practice

Patricia L. Rose
Professor of Africana Studies

Henry Rosemont
Visiting Scholar in Religious Studies

Karen J. Rosen
Clinical Assistant Professor in Psychiatry and Human Behavior

Michael I. Rosen
Professor Emeritus of Mathematics

Philip Rosen
Professor of Modern Culture and Media

Rochelle K. Rosen
Assistant Professor of Behavioral and Social Sciences (Research)

Wilma S. F. Rosen
Clinical Assistant Professor Emerita in Psychiatry and Human Behavior

Jerrold N. Rosenberg
Clinical Assistant Professor in Orthopaedics

Michael C. Rosenberg
Clinical Assistant Professor in Family Medicine

Noah K. Rosenberg
Adjunct Assistant Professor of Emergency Medicine

Mindy S. Rosenbloom
Clinical Assistant Professor in Psychiatry and Human Behavior

Karen Rosene Montella
Professor of Medicine

Cynthia Rosengard
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Medicine (Research)

Jacob Karl Rosenstein
Assistant Professor of Engineering

Andrew Rosenzweig
Clinical Assistant Professor in Psychiatry and Human Behavior

Christoph Rose-Petruck
Professor of Chemistry

Albert M. Ross
Clinical Associate Professor in Pediatrics

Fred A. Rotenberg
Assistant Professor of Surgery (Clinical)(Anesthesiology)

Harold D. Roth
Professor of Religious Studies and East Asian Studies

Julie L. Roth
Assistant Professor of Neurology

Leslie A. Roth
Assistant Professor of Surgery

Frank G. Rothman
Professor Emeritus of Biology

Lynn Rothschild
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry

Marcos Boris Rotman
Professor Emeritus of Medical Science

Kathleen M. Rotondo
Associate Professor of Pediatrics (Clinical)

Sharon I. Rounds
Professor of Medicine; Professor of Pathology and Laboratory Medicine

Stephen N. Rous
Clinical Professor in Surgery (Urology)

Dwight J. Rouse
Professor of Obstetrics and Gynecology

Joseph W. Rovan
Professor of Music

Brenda N. Roy
Clinical Assistant Professor in Obstetrics and Gynecology

G. Dean Roye
Assistant Professor of Surgery (Clinical)

Karen Rozen
Visiting Associate Professor of Economics

Boris L. Rozovsky
Ford Foundation Professor of Applied Mathematics

Amity Rubeor
Assistant Professor of Family Medicine (Clinical)

Patricia E. Rubertone
Professor of Anthropology

Lee Rubin
Assistant Professor of Orthopaedics

Lowell J. Rubin
Clinical Assistant Professor in Psychiatry and Human Behavior

David H. Rubinstein
Teaching Associate in Music

Fedor M. Rudakov
Adjunct Assistant Professor of Chemistry

Susan A. Rudders
Assistant Professor of Pediatrics

Sarah Ruden
Visiting Scholar in Classics

Suzanne Rudnicki
Adjunct Lecturer in Chemistry

Jessica Rueschemeyer
Adjunct Professor of International Studies

Richard J. Ruggieri
Clinical Assistant Professor in Medicine

Charles M. Ruhl
Clinical Assistant Professor in Surgery (Otolaryngology)

Renee B. Rulin
Clinical Assistant Professor in Family Medicine

James M. Russell
Associate Professor of Geological Sciences

Lorna B. Russell
Assistant Professor of Medicine (Clinical)

Geoffrey R. Russom
Professor Emeritus of English

Sandra Russo-Rodriguez
Lecturer in Chemistry

Malcolm J. Rutherford
Professor Emeritus of Geological Sciences

Matthew T. Rutz
Assistant Professor of Egyptology and Ancient Western Asian Studies

J. Mark Ryan
Clinical Assistant Professor in Medicine

Vanessa L. Ryan
Assistant Professor of English

Clinical Associate Professor in Radiation Oncology

Thomas Trikalinos  
Associate Professor of Health Services, Policy and Practice

Anubhav Tripathi  
Associate Professor of Engineering; Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Amal N. Trivedi  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine

Caroline A. Troise  
Clinical Assistant Professor in Medicine

Wilson A. Truccolo-Filho  
Assistant Professor of Neuroscience (Research)

Margaret Tryforos  
Clinical Assistant Professor in Family Medicine

Devin Tsai  
Clinical Instructor in Emergency Medicine

Hsin-I Tseng  
Lecturer in East Asian Studies

Yi-Tang Tseng  
Clinical Assistant Associate Professor of Pediatrics (Research)

Ekaterini V. Tsiapali  
Clinical Assistant Professor in Obstetrics and Gynecology; Clinical Assistant Professor in Surgery

William G. Tsiaras  
Clinical Professor in Surgery (Ophthalmology)
Robert J. Tubbs  
Assistant Professor of Emergency Medicine

Joseph R. Tucci  
Adjunct Professor of Medicine

Christopher Joshua Tucker  
Assistant Professor of Music

Gregory S. Tucker  
Professor of Physics

Jan A. Tullis  
Professor Emerita of Geological Sciences

Terry E. Tullis  
Professor Emeritus of Geological Sciences

Glenn A. Tung  
Professor of Diagnostic Imaging

Christopher A. Tuttle  
Visiting Scholar in Archaeology and the Ancient World

Jean E. Twomey  
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)

Barbara Tylenda  
Clinical Associate Professor in Psychiatry and Human Behavior

Denise A. Tyler  
Assistant Professor of Health Services, Policy and Practice (Research)

John H. Tyler  
Professor of Education; Professor of Economics; Professor of Public Policy

Audrey R. Tyrka  
Associate Professor of Psychiatry and Human Behavior

Holly Tytell  
Clinical Assistant Professor in Psychiatry and Human Behavior

Lisa A. Uebelacker  
Associate Professor of Psychiatry and Human Behavior (Research)

Jody Ann Underwood  
Clinical Assistant Professor in Psychiatry and Human Behavior

William S. Unger  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jessica L. Unick  
Assistant Professor of Psychiatry and Human Behavior (Research)

Eliyzer Upfal  
Professor of Computer Science

Jonathan D. Uri  
Clinical Assistant Professor in Surgery (Anesthesiology)

Wilson F. Utter  
Clinical Associate Professor Emeritus in Pediatrics

Alper Uzun  
Instructor in Pediatrics (Research)

Daniel Vaca  
Visiting Assistant Professor of Religious Studies

Constantine Vafidis  
Clinical Instructor in Family Medicine

Jonathan Valente  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Luiz Fernando Valente  
Professor of Portuguese and Brazilian Studies and Comparative Literature

Paul A. Valiant  
Assistant Professor of Computer Science

Anne M. Valk  
Adjunct Associate Professor of American Studies

James M. Valles Jr  
Professor of Physics

James Van Cleve  
Adjunct Professor of Philosophy

Andries van Dam  
Thomas J. Watson Jr. University Professor of Technology and Education

Jacob Vandenberg  
Assistant Professor of Medicine (Research)

Herman H. Vandenburg  
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology

Axel van de Walle  
Associate Professor of Engineering

Fabio Vandin  
Assistant Professor of Computer Science (Research)

Peter van Dommelen  
Joukowsky Family Professor of Archaeology and Professor of Anthropology

David A. Vandyke  
Clinical Assistant Professor in Family Medicine

Rebecca M. Vanel  
Assistant Professor of History of Art and Architecture

Eliza van Reen  
Assistant Professor of Psychiatry and Human Behavior (Research)

Erin Vanscoyoc  
Assistant Professor of Pediatrics (Clinical); Assistant Professor of Medicine (Clinical)

Andre van Tonder  
Visiting Scholar in Physics

Marcia W. Vanvleet  
Assistant Professor of Pediatrics

Leah K. Vanway  
Associate Professor of Sociology

Paul E. A. van Zuiden  
Clinical Assistant Professor in Medicine

Mercedes Vaquer  
Professor of Hispanic Studies

Ashutosh Varshney  
Sol Goldman Charitable Trust Professor in International Studies and Social Sciences

Charles A. Vase  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Alex Vasquez  
Visiting Scholar in Race and Ethnicity in America

Shalene A. M. Vasquez  
Visiting Scholar in Race and Ethnicity in America

Sreekala Vasudevan  
Clinical Instructor in Medicine

Nico Vehse  
Assistant Professor of Pediatrics

Corey E. Ventetuolo  
Assistant Professor of Medicine; Assistant Professor of Health Services, Policy and Practice

Daniele Vendini  
Assistant Professor of Applied Mathematics (Research)

Armand D. Versaci  
Clinical Professor Emeritus in Surgery

Alice-Lee Vestner  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Michael P. Vezneridis  
Professor of Surgery

Todd D. Viccione  
Clinical Instructor in Medicine
Brown University

Anthony Vidler
Professor of History of Art and Architecture

Laura Viehmann
Clinical Assistant Professor in Pediatrics

Nelson H. Vieira
University Professor of Portuguese and Brazilian Studies and Professor of Judaic Studies

Marguerite B. Vigliani
Clinical Associate Professor in Obstetrics and Gynecology

Rendueles Villalba Il
Clinical Associate Professor in Psychiatry and Human Behavior

Anna L. Villavicencio
Clinical Assistant Professor in Psychiatry and Human Behavior

Bianca L. Viray
Tamarkin Assistant Professor of Mathematics

Meera Sushila Viswanathan
Associate Professor of Comparative Literature; Associate Professor of East Asian Studies

Sivamainthan Vithianathan
Associate Professor of Surgery (Clinical)

Gwenn M. Vittimberga
Clinical Assistant Professor in Dermatology

Patrick M. Vivier
Associate Professor of Health Services, Policy and Practice; Associate Professor of Pediatrics

Petia Vlahovska
Associate Professor of Engineering

Benjamin S. Vogel
Clinical Assistant Professor in Obstetrics and Gynecology

Betty R. Vohr
Professor of Pediatrics

Rajiv Vohra
Ford Foundation Professor of Economics

Anastasia Volovich
Associate Professor of Physics

Annette E. von Dem Bussche
Assistant Professor of Pathology and Laboratory Medicine (Research)

Michael Vorenberg
Associate Professor of History

Matthew D. Vrees
Clinical Assistant Professor in Surgery

Roxanne Vrees
Assistant Professor of Obstetrics and Gynecology

Jonathan K. Waage
Professor Emeritus of Biology

Rajan Wadhawan
Adjunct Assistant Professor of Pediatrics

Safa F. Wagdi
Clinical Assistant Professor in Surgery (Ophthalmology)

Hedy S. Wald
Clinical Associate Professor in Family Medicine

Bernard K. Waldrop
Brooke Russell Astor Emeritus Professor of the Humanities

Rosmarie Waldrop
Visiting Scholar in Literary Arts

Homer F. Walker
Visiting Professor of Applied Mathematics

W. Scott Walker
Clinical Assistant Professor in Obstetrics and Gynecology

Byron C. Wallace
Assistant Professor of Health Services, Policy and Practice (Research)

Eric Wallace
Clinical Assistant Professor in Family Medicine

Edward G. Walsh
Assistant Professor of Neuroscience (Research)

Eric Ferguson Walsh
Clinical Assistant Professor in Orthopaedics

Jennifer Walsh
Instructor in Psychiatry and Human Behavior (Research)

Joseph B. Walsh
Visiting Scholar in Geological Sciences

Anne S. Walters
Clinical Associate Professor in Psychiatry and Human Behavior

Haizhou Wang
Visiting Associate Professor of Pembroke Center

Hui Wang
Associate Professor of Applied Mathematics

Hye-Sook Wang
Associate Professor of East Asian Studies

Lai-Sheng Wang
Professor of Chemistry

Lingzhen Wang
Associate Professor of East Asian Studies

Li-Qiong Wang
Lecturer in Chemistry

Shiping Wang
Visiting Scientist in Applied Mathematics

Xiaotian Wang
Assistant Professor of Surgery (Research)(Plastic Surgery)

Yang Wang
Senior Lecturer in East Asian Studies

Yihong Wang
Assistant Professor of Pathology and Laboratory Medicine

Christine A. Wanke
Adjunct Professor of Medicine

Robert P. Ward
Visiting Lecturer in English

David Warren
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Kay B. Warren
Charles C. Tillinghast, Jr. ’32 University Professor of International Studies

Otis U. Warren
Assistant Professor of Emergency Medicine (Clinical)

William H. Warren Jr
Chancellor’s Professor

Sabita S. Warrier
Assistant Professor of Medicine

Takeo Watanabe
Adjunct Lecturer in Engineering

Shoggy T. Wayn
Senior Lecturer in French Studies

Marvin S. Wasson
Clinical Assistant Professor in Pediatrics

Anthony J. Watson
Adjunct Assistant Professor of History
Delma-Jean Watts  
Assistant Professor of Pediatrics (Clinical)

Banice M. Webber  
Clinical Associate Professor Emeritus in Radiation Oncology

Thompson Webb III  
Professor Emeritus of Geological Sciences

Peter M. Weber  
Professor of Chemistry

Peter Wegner  
Professor Emeritus of Computer Science

Lei Wei  
Associate Professor of Orthopaedics (Research)

Marilyn Weigner  
Clinical Associate Professor in Medicine

Barbara J. Weil  
Clinical Assistant Professor in Medicine

David N. Weil  
James and Meryl Tisch Professor of Economics

Jerome H. Weiner  
Professor Emeritus of Engineering and Physics

Daniel M. Weinreich  
Associate Professor in the Center for Computational Molecular Biology; Associate Professor of Ecology and Evolutionary Biology

Arnold Louis Weinstein  
Edna and Richard Salomon Distinguished Professor of Comparative Literature

Deborah F. Weinstein  
Lecturer in Pembroke Center

Lauren M. Weinstock  
Assistant Professor of Psychiatry and Human Behavior (Research)

James H. Weintrub  
Clinical Assistant Professor in Surgery (Plastic Surgery)

Marjorie E. Weishaar  
Clinical Professor in Psychiatry and Human Behavior

Rebecca B. Weitz-Shapiro  
Lecturer in the Center for Computational Molecular Biology; Associate Professor of Ecology and Evolutionary Biology

Caiju Wen  
Visiting Lecturer in East Asian Studies

Jane Wen  
Clinical Instructor in Medicine

Linda C. Wendell  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Katharine D. Wenstrom  
Professor of Obstetrics and Gynecology

Susan J. Wenzel  
Assistant Professor of Psychiatry and Human Behavior (Research)

John Wermer  
Professor Emeritus of Mathematics

Lee V. Wesner  
Clinical Assistant Professor in Surgery (Anesthesiology)

Gary M. Wessel  
Professor of Biology

Conrad W. Wesselhoeft Jr  
Professor Emeritus of Surgery (Clinical)

Albert F. Wessen  
Professor Emeritus of Sociology

Holly K. Westervelt  
Associate Professor of Psychiatry and Human Behavior (Clinical)

Peter J. Westervelt  
Professor Emeritus of Physics

Robert J. Westlake  
Professor Emeritus of Psychiatry and Human Behavior

Judith B. Westrick  
Clinical Instructor in Pediatrics

Terrie T. Wette  
Professor of Health Services, Policy and Practice

Patrick Weyer  
Clinical Assistant Professor in Medicine

Gary G. Wharton  
Clinical Assistant Professor in Obstetrics and Gynecology

Kristi A. Wharton  
Professor of Biology

Elizabeth Wheeler  
Clinical Assistant Professor in Psychiatry and Human Behavior

William B. Whelihan  
Clinical Associate Professor in Psychiatry and Human Behavior

Emily M. White  
Clinical Assistant Professor in Obstetrics and Gynecology

Jordan White  
Assistant Professor of Family Medicine (Clinical)

Michael White  
Professor of Sociology

Russell E. White  
Clinical Associate Professor in Surgery

Laura Brave Whiteley  
Professor of Psychiatry and Human Behavior (Research)

Esther K. Whitfield  
Associate Professor of Comparative Literature and Hispanic Studies

Hillary Whitlatch  
Assistant Professor of Medicine

Annie J. Wiart  
Senior Lecturer in French Studies

John Edgar Wideman  
Asa Messer Professor of Africana Studies

Edward L. Widmer  
Adjunct Professor of History

Doreen L. Wiggins  
Clinical Assistant Professor in Obstetrics and Gynecology

Faith Wilding  
Visiting Scholar in Pembroke Center

Brian Wiley  
Clinical Assistant Professor in Emergency Medicine

Caroline S. Wilkel  
Clinical Assistant Professor in Dermatology

Joanne E. Wilkinson  
Adjunct Assistant Professor of Family Medicine

David M. Williams  
Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Psychiatry and Human Behavior

Kenneth Williams  
Associate Professor of Emergency Medicine (Clinical)
Lea Everard Williams  
Professor Emeritus of History

Robert R. Williams  
Clinical Associate Professor in Obstetrics and Gynecology

Paul Gregory Willard  
Professor of Chemistry

Andre Willis  
Visiting Assistant Professor of Religious Studies

Matthew D. Willis  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

David R. Wills  
Professor of French Studies

Ira B. Wilson  
Professor of Health Services, Policy and Practice; Professor of Medicine

Jeffrey M. Wilson  
Clinical Assistant Professor in Family Medicine

Julie M. Wilson  
Clinical Assistant Professor in Psychiatry and Human Behavior

Valerie Petit Wilson  
Clinical Professor in Health Services, Policy and Practice

Janet L. Witterdink  
Clinical Associate Professor in Neurology

Inge Crosman Wimmers  
Professor Emerita of French Studies

Jeffrey P. Wincze  
Clinical Assistant Professor in Psychiatry and Human Behavior

John P. Wincze  
Clinical Professor in Psychiatry and Human Behavior

Eric Winer  
Assistant Professor of Medicine (Clinical)

Edward Wing  
Frank L. Day Professor of Biology

Rena R. Wing  
Professor of Psychiatry and Human Behavior

Rudolf M. Winkes  
Professor Emeritus of History of Art and Architecture

Marion F. Winkler  
Associate Professor of Surgery

Todd E. Winkler  
Professor of Music

Sabrina M. Witherby  
Assistant Professor of Medicine (Clinical)

Jon D. Witman  
Professor of Biology

Edward G. Wittels  
Associate Professor of Medicine

Aaron Wold  
Professor Emeritus of Chemistry

Patricia N. Wold  
Clinical Assistant Professor Emerita in Psychiatry and Human Behavior

Jennifer C. Wolff  
Assistant Professor of Psychiatry and Human Behavior (Research)

Ivan S. Wolfson  
Clinical Assistant Professor in Family Medicine

Arthur W. Y. Wong  
Clinical Instructor in Surgery (Urology)

Ian Y. Wong  
Assistant Professor of Engineering

Kenneth K. Wong  
Walter and Lenore Annenberg Professor of Education Policy

Mark Wood  
Adjunct Professor of Behavioral and Social Sciences

Susan J. Wood  
Visiting Scholar in American Studies

Harold A. Woodcome Jr  
Clinical Associate Professor in Surgery (Ophthalmology)

Margaret S. Wool  
Clinical Associate Professor in Family Medicine; Clinical Associate Professor in Behavioral and Social Sciences

Karen L. Wooffall-Quinn  
Clinical Associate Professor in Medicine

Hugh Woolverton III  
Clinical Assistant Professor in Family Medicine

Billy R. Wooten  
Professor Emeritus of Psychology

Michael S. Worden  
Assistant Professor of Neuroscience (Research)

Carolyn D. Wright  
Isreal J. Kapenstein Professor of English

David B. Wright  
Adjunct Assistant Professor of Health Services, Policy and Practice

Jack C. Wright  
Associate Professor of Cognitive, Linguistic, and Psychological Sciences

Daniel E. Wrobleski  
Clinical Instructor in Surgery

Haiwei Wu  
Assistant Professor of Pediatrics (Research)

Tony C. Wu  
Clinical Associate Professor in Medicine

Wen-Chih Wu  
Associate Professor of Medicine; Associate Professor of Epidemiology

Youping Wu  
Research Fellow in Surgery

Zhijin J. Wu  
Associate Professor of Biostatistics

Donna M. Wulff  
Professor Emerita of Religious Studies

William Wyatt  
Professor Emeritus of Classics

David Wyss  
Adjunct Professor of Economics and International Relations

Gang Xiao  
Professor of Physics

Jinjun Xiong  
Assistant Professor of Pathology and Laboratory Medicine

Haiyan Xu  
Assistant Professor of Medicine (Research)

Jingming Xu  
Charles C. Tillinghast, Jr. ’32 University Professor of Engineering

Israel Yaar  
Associate Professor Emeritus of Neurology

Alexander Yakhot  
Visiting Professor of Applied Mathematics

Evgeny Yakirevich  
Associate Professor of Pathology and Laboratory Medicine

Ali Yalcindag  
Associate Professor of Pediatrics (Clinical)

Kikuko Yamashita  
Associate Professor of East Asian Studies

Joseph Yammine  
Assistant Professor of Medicine (Clinical)
Ronald A. Yankee  
Professor Emeritus of Medicine

Akio Yasuhara  
Adjunct Assistant Professor of Economics

Yvette E. Yatchmink  
Associate Professor of Pediatrics (Clinical)

Patricia Ybarra  
Associate Professor of Theatre Arts and Performance Studies

Shirley Yen Matloff  
Associate Professor of Psychiatry and Human Behavior (Research)

Kyongmin Yeo  
Visiting Scholar in Applied Mathematics

Mei Yin  
Tamarkin Assistant Professor

Ming Yin  
Assistant Professor of Engineering (Research)

See-Chen Ying  
Professor of Physics

Xiaomin Ying  
Visiting Scholar in East Asian Studies

David C. Yoburn  
Clinical Associate Professor in Medicine

Young Ok You  
Assistant Professor of Chemistry (Research)

Mark Young  
Clinical Assistant Professor in Family Medicine

Richard Yund  
Professor Emeritus of Geological Sciences

Hanady Zainah  
Clinical Instructor in Medicine

Nickolas D. Zallier  
Assistant Professor of Medicine (Research)

Vazira F-Y Zamindar  
Associate Professor of History

Dominick Zangari  
Clinical Assistant Professor in Surgery (Ophthalmology)

Raymond P. Zarlengo  
Clinical Assistant Professor in Pediatrics

Alexander Zaslavsky  
Professor of Engineering; Professor of Physics

Vladislav Zayas  
Clinical Assistant Professor in Neurology

Professor of History of Art and Architecture

Mark Zervas  
Manning Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Cunxian Zhang  
Associate Professor of Pathology and Laboratory Medicine

Peng Zhang  
Assistant Professor of Medicine (Research)

Qizhong Zhang  
Visiting Scholar in East Asian Studies

Xiangxiong Zhang  
Visiting Scholar in Applied Mathematics

Zheng Zhang  
Assistant Professor of Biostatistics (Research)

Anatoly Zhiltkovich  
Professor of Medical Science

Chunhui Zhou  
Visiting Scholar in Applied Mathematics

Shougang Zhuang  
Associate Professor of Medicine (Research)

Rashid Zia  
Manning Assistant Professor of Engineering

Panagiotis Ziakas  
Instructor in Medicine (Research)

Robert Zielinski  
Clinical Assistant Professor in Psychiatry and Human Behavior

Beth Anne Zielinski-Habershaw  
Lecturer in Molecular Pharmacology, Physiology and Biotechnology

Richard J. Zienowicz  
Associate Professor of Surgery (Plastic Surgery)

Sally Zierler  
Professor Emerita of Epidemiology

Stanley Zimmerman  
Professor Emeritus of Biology

Anita L. Zimmerman  
Professor of Medical Science

Mark Zimmerman  
Professor of Psychiatry and Human Behavior

Bernard Zimmermann III  
Adjunct Associate Professor of Medicine

Matthew B. Zimmt  
Royce Family Professor in Teaching Excellence and Professor of Chemistry

Brian Zink  
Frances Weeden Gibson-Ernest A. Inannuccilli, MD, Professor of Emergency Medicine

Stephen H. Zinner  
Adjunct Professor of Medicine

David Amato Zinno  
Teaching Associate in Music

Samuel Zipp  
Assistant Professor of American Studies and Urban Studies

Jeanne Ziter  
Clinical Instructor in Pediatrics

Caron Zionick  
Professor of Psychiatry and Human Behavior; Professor of Medicine; Professor of Obstetrics and Gynecology

Janet Zweig  
Adjunct Assistant Professor of John Nicholas Brown Center

John F. Zwetchkenbaum  
Clinical Instructor in Medicine
General Regulations

General academic requirements
Undergraduate degrees:
Information regarding general academic degree requirements are listed under 'The College' section of the University Bulletin as well as on the respective websites of the Office of the Registrar (http://brown.edu/Administration/Registrar/guidelines/undergrad_progs) and the Dean of the College (http://brown.edu/Administration/Dean_of_the_College/degree).

Advanced degrees:
Information regarding Advanced degree requirements for specific academic programs are listed on the Graduate School (http://www.brown.edu/academics/degree-granting) website. Information regarding general and overall guidelines for advanced degrees are also listed on the Office of the Registrar (http://www.brown.edu/Administration/Registrar/guidelines/advanced_progs) website.

Enrollment and course registration

Instructions about enrollment will be sent via e-mail prior to the opening of each semester to all students. To complete enrollment, all requirements of the pertinent administrative offices of the University must be met, including registration for courses, payment of accounts, and arrangements for housing as appropriate. Fees will be charged for failure to meet established deadlines. All students must complete enrollment in order to be eligible to remain at the University.

Students are urged to note carefully the instructions provided at registration in order to assure eligibility for enrollment, proper registration in courses, and to avoid unnecessary payment of Late Registration and Change of Course fees. All registration materials and/or processes are considered official university documents. Any falsification of signatures or other tampering with such forms/processes constitutes a violation of the Academic Code.

All registration-related deadlines for each semester are listed in the 'Academic Calendar' section of the Bulletin and also on the Office of the Registrar website as well as answers to common registration-related questions.

For the full text on the Academic Regulations and Instructions for Registration, see the Registrar’s Office web site at: http://www.brown.edu/Administration/Registrar/guidelines/index.html

For a tutorial on registration, see: http://www.brown.edu/CIS/Training/onlinetraining/index.php

To access the most up-to-date course information including credit bearing summer session offerings (*The course information in the PDF versions of the University Bulletin and Course Announcement Bulletin is current as of August 2013,*see: http://selfservice.brown.edu/menu and select ‘Brown Course Search’

Course Credit

The semester course is the unit of credit. This is defined as a course taken for the duration of one semester and, for purposes of evaluation, may be considered the approximate equivalent of four semester hours.

Maximum Course Load and Auditing

No student enrolled in The College or the Graduate School may enroll for more than five Brown credits in a semester. A degree candidate paying full tuition (4 or more enrollment units per semester) and is enrolled in less than five academic credits may be permitted to audit (see below section on auditing) additional course(s). At no time may a student be registered for more than 5 credits/courses including audits.

Enrollment Without Academic Credit

Auditing. An auditor is a student who is registered in a course without earning academic credit upon successful completion under the following conditions: (1) the student must be properly registered for it; (2) the student must pay the usual course fee except as indicated in the next paragraph; (3) the student is entitled to all instruction in the course, including conferences, the criticism of papers, tests, and examinations.

Any student registered on a full-time basis may be permitted to audit additional courses in any semester without charge. The total number of course registrations, including audits, may not exceed five credits. Non-degree or student paying less than four enrollment units of tuition may choose to audit if they so choose, but the student does so with the understanding that they will pay the equivalent rate as if registered for academic credit.

With the concurrence of the instructor, the fact that a course has been audited shall be entered on the permanent record of any student electing this privilege. The status of a course in which a student has registered may not be changed from audit to credit after the fourth week of classes or from credit to audit after midsemester.

Vagabonding. A “vagabond” is a student who, with the permission of the instructor involved, visits a given course occasionally or regularly without payment of fee. It is understood that such a student shall be entitled to participate in classes and activities, including discussions, conferences, and papers, only at the pleasure of the instructor.

Attendance, Grading, Examinations

Attendance

It is in the interest of every student to attend all sessions of the classes in which registered, and each student has an obligation to contribute to the academic performance of all by full participation in the work of each class; however, within such limits as are necessary for the general welfare, a student benefits also from exercising discretion and assuming responsibility for his or her educational progress.

Accordingly, unless the instructor imposes attendance requirements, students are not limited with respect to the number of absences from a course. When, in the instructor’s opinion, a student is abusing the privilege of voluntary attendance, the appropriate dean’s office should be notified so that appropriate action may be taken.

A student is always fully responsible for any course work missed because of absences and will be assigned failing grades in final examinations missed without excuse from the dean’s office.

No student organization shall make any appointment for undergraduates which conflicts with college exercises unless permission has been obtained from the dean.

Grading System

At the end of each semester final grades are given in semester courses. In all courses, except those designated by the instructor as Mandatory Satisfactory/No Credit, a student may, in consultation with the advisor, elect to be graded on a basis of either Satisfactory/No Credit or A, B, C/No Credit. A student must for every course taken indicate by the end of the fourth week of the semester which basis for grading is elected.

Any student regularly enrolled in a course, no matter whether for A, B, C/No Credit or for Satisfactory/No Credit, may request from the instructor a more detailed written evaluation of his or her work. (See Course Performance Report below.) Such supplemental evaluations are intended primarily for the information of the student and do not replace departmental evaluations.

No Credit. This grade is given when courses are not satisfactorily completed. The notation No Credit, and the description of the course in which it is given, are not entered on the official academic transcript.

1. Courses may be designated to be graded on a Mandatory Satisfactory/No Credit basis for all students enrolled on the initiative of the instructor. The designation of a course by an instructor to be graded S/NC only must be announced no later than the first day of classes and entails the responsibility for providing Course
Performance Report forms to all students who request them. An asterisk shall accompany the listing on the transcript of any course that has been designated by the instructor to be graded on the basis of S/NC only, with an appropriate explanation of the symbol provided.

2. In exceptional circumstances, a course may be left incomplete (except for a regularly scheduled final examination—see paragraph 3 below), with the instructor’s consent. In such cases, a grade of INC will be assigned provided that the student has filed a request for extension of time to complete the work of the course and the instructor has consented to such a request. Unless an earlier date is specified by the instructor, grades of INC must be made up as follows: for Semester I, by midsemester of Semester II; for Semester II or the for-credit 7 week Summer Session, by the first day of Fall semester. Extensions beyond semester in which the course left incomplete was taken may be granted by the instructor who will indicate this in writing to the registrar. A course not completed by the designated time will be assigned a grade of NC unless the instructor indicates that sufficient work has been completed to justify course credit by submitting, as appropriate, a grade change from INC to A, B, C, or S. A grade of NC assigned in accordance with these provisions may be changed subsequently, but no later than one calendar year after the end of the semester in which the course was taken.

3. If a student is absent from a regularly scheduled final examination for a course, the instructor will assign a grade of ABS. If the absence from the examination is excused by the dean, the student will be permitted to take a Special Examination. The Special Examination will be administered by the Office of the Registrar in accordance with the provisions in the Faculty Rules for such examinations, unless other arrangements are agreed to by the instructor and the student, and communicated to the registrar. If the absence from the final examination is not excused by the dean, the student will receive no credit for the course.

4. A grade of INCABS will be assigned if appropriate and will be resolved in accordance with the provisions of No. 3 and No. 4 above.

Year Courses: A year course is one in which both halves must be passed in order to get credit for the entire year. The grade at the end of the first semester is normally a temporary one. Neither semester may be elected independently without special permission. The final grade submitted at the end of the course covers the work of the entire year and is recorded as the final grade for both semesters. It is normally expected that the second half of a year course will be completed in the second semester of the same academic year in which the first half was taken. If the second half of the year course is not completed at the end of that academic year, the grade for the first semester will become a No Credit. If the student completes the second part of the year course during a later academic year, he or she may need to notify the Registrar’s Office, in order to reactivate the first part of the course.

In registering for the second half of a year course, students must register for credit if the first half was taken for credit. Similarly, if registered for audit in the first half, the second half of the course registration must also be as an audit. Exceptions must be approved by both the academic department and the Committee on Academic Standing.

Repeating Courses: Unless a course is explicitly approved by either the College Curriculum Council or Graduate Council as being able to be repeated for credit, Once course credit has been earned with an initial passing grade A,B,C, or Satisfactory (S) or through Transfer Credit it cannot be officially registered for again for in an effort to improve one’s initial grade.

Grade Requirements for Advanced Degrees: A minimum grade of either Satisfactory or C in a 1000 or 2000 level course carries credit toward all advanced degrees. Individual departments may, subject to the approval of the Graduate Council, set higher grade requirements.

Advanced degree candidates may be required to register in courses primarily for undergraduates (numbered 1–999); these courses do not carry advanced degree credit. On occasion, however, and with approval of the student’s department and the dean, a student may register for such a course with extra work for advanced degree credit. This course then has the same standing as a 1000-level course and an EX is noted on the transcript. This provision for extra work does not apply to courses of the level of 1–999 taken for graduate credit by students in MD program.

Course Performance Reports: Students, regardless of grade option selected, may request the instructor to complete a Course Performance Report. This request has to be made prior to midssemester. The instructor may decline to complete such a form if it is believed he or she has inadequate information to do so. Particular consideration should be given to requests from students for whom the course is part of their concentration program. Copies of Course Performance Reports will be made available to: (1) the student, (2) the dean’s office, and (3) the student’s concentration advisor. While not part of the official record, Course Performance Reports may be sent out of the University at the student’s request as information on his or her work at Brown University. In such cases, the student must provide copies of all material to be enclosed at the time the transcript is requested.

Concentration Evaluations: Undergraduate students may request a written evaluation of performance in concentration, which will consist of the student’s own statement and an evaluation prepared by an appropriate faculty member. The following points may be included in such an evaluation: any special characteristics of the concentration program; information not on the student’s official transcript, such as the interest and motivation of the student, the probable capacity for more advanced work, the ability to conduct research, and so forth; and a comment describing the bases on which the evaluation was prepared. If the student elects to have a concentration evaluation prepared, the student’s statement and request for departmental evaluation should be submitted to the concentration advisor by the end of the first week of the student’s final semester. There is no specific form for concentration evaluations; faculty may use whatever format they choose.

Transcripts: Requests for transcripts must be made either in writing by completing a Transcript Order Form, or electronically. For further information please visit the Office of the Registrar’s website (http://www.brown.edu/Administration/Registrar). Transcripts will be issued only if all financial obligations to the University have been met.

An official transcript consists of a copy of the permanent record listing courses passed and grades received. A statement is added to all transcripts explaining the grading system and indicating that the student may elect to include other material with the official transcript. The student should choose this material in consultation with his or her advisor. The University will mail this material in one envelope along with the official transcript.

Examinations

A final, written examination (at the end of each semester) shall be given in each course numbered under 2000 unless the instructor of a particular course decides to use some other mode of final evaluation. If the written examination is not to be used, the mode of final examination which is to be used shall be made known to the students in the course no later than midterm and, in addition, the department and the registrar shall be informed.

Final Examination Schedule: A pre-defined period at the close of each semester is provided for final examinations for those courses for which such an examination is scheduled. Two examination periods are scheduled for each day. The examination group is determined by, in most cases, the offering time associated with the course (indicated by the figure in parentheses) and also as displayed on Banner Web. The schedule for 2013-2014 is as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>9 am Group</th>

**Exam Excuses:** The Office of the Dean of the College is solely responsible for determining whether a student's absence from a final examination is excused. To ensure equitable treatment of all students, students are excused from exams only for family or medical emergencies or for religious reasons. Please note that students' travel plans are never an excuse for missing a final exam. Faculty wishing to grant a student an exam excuse may contact the appropriate academic deans authorized to grant exam excuses. In emergency situations, students who are unable to contact their professors must contact the Office of the Dean of the College, which will determine whether or not an exam excuse is warranted. Course instructors are notified of exam excuses granted by the Dean of the College Office.

Consistent with Brown's policy on nondiscrimination, students who are unable to take a final examination due to religious observance may arrange to take their final at an alternate time. Consultation is required with the course instructor, the Chaplain's Office, and the Office of the Registrar, and the arrangements must be made by mid-semester. Students may obtain more information and an application for rescheduling a final due to religious observance from the Registrar's Office.

Make-up exams for approved exam excuses are administered by the Registrar in the second week of the subsequent fall or spring term. The Registrar's Office informs students by email of the date, time, and location of make-up exams.

Placement and Achievement Tests in Foreign Languages. Placement tests in the foreign languages are given during Orientation Program in the fall and during the first week of classes in each semester.

All students, before taking college courses in a foreign language in which they have presented entrance credit, must take either a placement test at Brown University or, preferably, a College Board Language Achievement Test in secondary school. Students with outstanding performance on these tests, or on the Advanced Placement Tests of the College Entrance Examination Board, may be admitted to advanced courses without the usual course prerequisites.

**Student Code of Conduct**

**Academic Code Violations**

All cases of academic dishonesty among undergraduates, graduate, or medical students, as defined in the Academic Code at Brown University, shall be referred to the dean of the College, Graduate School, or Medical School, or his or her designated representative. A student accused of such an offense shall be notified in writing as soon as possible of the specific charge or charges against him or her before his or her case is considered. The student shall be given the opportunity of a hearing before the designated representative of the dean of the College, Graduate School, or Medical School, and two members of the faculty, at which all relevant facts may be presented. A student shall have the right to appeal any decision to the dean of the College, Graduate School, or Medical School within five business days after receipt of the official letter outlining the case and the decision reached. For definitions of offenses against the Academic Code, procedures, policies, and a list of penalties, see the pamphlet issued by the Office of the Dean of the College, Principles of the Brown University Community: The Academic Code and Non-Academic Disciplinary System.

**Nonacademic Discipline**

Brown strives to sustain a learning environment that supports individual exploration. Central to this effort are the four primary Principles of the Brown University Community: individual integrity, respect for others, respect for University resources, and respect for the values of teaching, learning and scholarship. Our community believes that adherence to these principles supports the overall academic mission of the University. Violations of these principles will be handled through the procedures governing the Academic Code and the Non-Academic Disciplinary Procedures. These procedures are designed to address behaviors that impede the educational activity of the University or that infringe upon the rights of others.

Non-academic disciplinary cases are administered by the Office of Student Life, the Peer Community Standards Board, and the University Disciplinary Council. Specific hearing procedures can be found online at www.brown.edu/randr. Printed copies of the Non-Academic Disciplinary Procedures are available from the Office of Student Life.

The College

Admission

In order to receive information about admission to the undergraduate college, please visit our website to register online: www.brown.edu/Administration/Admission. Requests for applications for admission to undergraduate study should be addressed to:

College Admission Office
Brown University
Box 1876
Providence, Rhode Island 02912
(401) 863-2378

The application deadline for the regular admission process is January 1 of the year of desired entrance to Brown. An early plan is available for students who wish to receive December notification. Early Decision candidates must apply as early in the fall of the senior year of high school as possible but in any case by November 1.

Subject Requirements

Brown’s commitment to fostering a liberal education assumes that a candidate for admission will profit most from pursuing a comprehensive college preparatory program. A strong background in English (both literature and writing), foreign languages, mathematics, science, and history will enable students to benefit from the intellectual opportunities offered by Brown University. Brown considers the programs listed below to be a desirable secondary school preparation.

- **English**—four years with significant emphasis on writing, continued through the senior year;
- **Mathematics**—at least three years of college preparatory mathematics, preferably continued through the senior year;
- **Foreign Language**—at least three years, preferably continued through the senior year;
- **Laboratory Science**—at least two years of laboratory science above the freshman-year level. Prospective science or engineering students should take both physics and chemistry, and as advanced a level of mathematics as possible;
- **History**—at least two years, including American History;
- **The Arts**—at least one year of study in music or art;
- **Elective Subjects**—at least one year of elective academic subjects;
- **Information Technology**—facility with computers is recommended for all applicants.

Exceptions may be made. The Board of Admission encourages the growth of innovative programs and welcomes applications from students of varying educational backgrounds who have shown outstanding intellectual promise. Exceptionally able students who are well-prepared to enter college before completion of secondary school may also be admitted, although such cases are unusual.

College Entrance Examination Board Tests

Each applicant must take the Scholastic Assessment Test (SAT Reasoning Test) and any two SAT Subject Tests of the College Entrance Examination Board no later than January of the senior year. Scores for the examinations administered through the American College Testing Program (the ACT) may be submitted in lieu of those of the College Board; the ACT with the Writing Test will serve as a substitute for the SAT requirements. It is the responsibility of each candidate to take the appropriate tests and to see that they are officially reported to the Board of Admission at The College by January 1 (or the January administration of the tests). A final decision on the application cannot be made until official scores have been received.

Advanced Placement Examinations

Brown participates in the Advanced Placement Program of the College Entrance Examination Board. The program’s aims are “to give able students challenging educational experiences in school, and to increase for these able students the opportunity to take advanced work in college.” Students enrolled in secondary schools participating in this program may take the appropriate examinations given in May and have the scores sent to the Office of the Dean of the College. Course credit and/or placement is determined by the appropriate academic department of Brown University, which may review the examination booklets and other materials. Policies on credit and/or placement vary from department to department. Students will be notified of such credit upon matriculation at Brown. Subjects in which course credit may be granted include American history, art history, biology, economics, European history, French, German, Latin, mathematics, physics, and Spanish.

Advanced Placement credits may not be applied to the minimum 30 courses needed to earn a Brown degree.

Advanced Standing for Work Done Prior to Entrance

Freshmen who have taken college courses at an accredited institution prior to matriculation at Brown may be considered for some advanced standing. Further, freshmen who have received certification under various international educational systems may also be considered for advanced standing. Questions concerning course credit and advanced standing should be addressed to the Office of the Dean of the College.

Course Credit and Advanced Standing

By the end of their fifth semester, students must declare to the Office of the Dean of the College whether or not they wish to use their A.P. and/or international examination credit to accelerate their graduation. To use credit for acceleration, students may request one semester of Advanced Standing (and enrollment credit) for 3–6 course credits or two semesters of Advanced Standing (and enrollment credit) for 7–10 course credits. Students not requesting Advanced Standing (and enrollment credit) from the registrar by this deadline may not do so subsequently, except by petitioning the Committee on Academic Standing.

Transfer Admission from Other Colleges

Only a limited number of transfer students can be accepted each year. A maximum of two years of study elsewhere is transferable; online, extension, and correspondence courses are not transferable, nor are courses outside the realm of defined academic disciplines (nursing, radio electronics and/or broadcasting, or business administration, to name a few). Students who wish to be considered as transfer candidates should write or call The College Admission Office for additional information, application forms, and procedures.

Special and Visiting Students

Each year, a number of students enrolled at other colleges spend a semester or a year as “visitors” at Brown to pursue course work (toward credit at their own college) not offered at their own institution. Others are accepted on a nonmatriculated basis for a limited number of courses and are classified as special students.

Resumed Education Program

The Resumed Undergraduate Education program at Brown University enables a person who has interrupted his or her formal education for five or more years, or who is twenty-five years or older, to enroll as a fully matriculated student and to study at a full or part-time rate. Some applicants have begun college work already; others have interrupted their education after completing high school. The Board of Admission for Resumed Education goes beyond the traditional bases of secondary school grades and college board scores in maturity, commitment, and future potential.

Interested people should write to:

The Resumed Undergraduate Education Program
The College Admission Office, Box 1876
Brown University, Providence, Rhode Island 02912
or call (401) 863-2378.
Requirements for Baccalaureate Degrees

Baccalaureate Degree Programs

At Brown, two baccalaureate degrees are awarded—the Bachelor of Arts (A.B.) and the Bachelor of Science (Sc.B.). The degree awarded is determined by a student’s chosen concentration program. All Brown undergraduates must complete the requirements for either an A.B. or a Sc.B. in order to earn the baccalaureate degree at Brown.

The Sc.B. degree recognizes a science concentration that demonstrates both breadth and depth in science beyond the minimum required for the A.B. degree in the same field. An Sc.B. program normally follows these guidelines:

1. The concentration program, with the exception of Engineering, shall require no more than ten courses in any one department. The total number of concentration courses required shall not exceed twenty (twenty-one for Engineering).
2. At least one semester course of independent study, research, or design in the concentration discipline must be included.
3. Additional electives must be chosen to meet the quantity requirement for all baccalaureate degrees. In cases where the student successfully complete the Sc.B. degree on the basis of one concentration as well as an additional concentration associated with an A.B. degree, only one degree (Bachelor of Science) is awarded upon graduation. *See below for requirements associated with combined degrees.*

Degrees with Distinction

Baccalaureate degrees may be awarded with distinction (magna cum laude) to those students whose percentage of quality grades -- grades of "A" or "S with Distinction" -- in courses taken at Brown puts them in the top 20% of the entire undergraduate graduating class. The Registrar will provide an opportunity for students to indicate that they do not wish to be considered for a degree with distinction.

Quantity and Progress Requirements

In order to graduate with a Brown baccalaureate degree, a student must successfully complete at least 30 courses (equivalent to 120 semester hours), 15 of which must be taken at Brown. A maximum of 4 summer courses may be applied toward this requirement. Approved study at another institution may also count toward the 30-course degree requirement.

The standard semester course load at Brown is four courses. Full-time students are permitted to enroll in a maximum of five courses in a given semester; students may take three courses in a semester as long as doing so will not bring them below the level of good academic standing. A student may not enroll in fewer than three courses in any semester without written permission from a designated academic dean. Resumed Undergraduate Education students may study on either a part-time or full-time basis.

Residence Requirement

With the exception of students admitted to the Resumed Undergraduate Education (RUE) Program, every candidate for a baccalaureate degree must be in residence at Brown for at least four semesters as a full-time student. Credits from Brown Exchange programs, Brown Approved Alternative Study Abroad programs, and the Brown Summer School do not apply to the residency requirement. Students in the RUE Program must be in residence for the equivalent of four full-time semesters. RUE students may study on either a part-time or full-time basis. Every student must spend sufficient time in concentration studies to permit faculty evaluation of his or her concentration.

Writing Requirement

In order to earn a baccalaureate degree, all students must demonstrate the ability to write well. Learning to write well is a developmental process that occurs over time; Brown students are therefore expected to work on their writing across the four years, in their general studies and the concentration. Students may begin to fulfill this expectation by taking one or more WRIT designated courses, which require students to draft and revise writing assignments based on feedback about their prose. When they declare their concentration, students explain what writing they have completed at Brown and the writing they intend to do in the concentration. The University provides an online portfolio in which students may save examples of their best work each year. This evidence allows students to demonstrate their abilities not only to Brown advisors but also to future colleagues and employers.

All students are expected to communicate effectively in writing in all of their courses. If an instructor is concerned about a student’s ability to write competently, he or she may contact the Associate Dean of the College for Writing, who will help the student identify a course in which the student may work on writing. Some students may be urged to complete a writing course when they first study at Brown; such cases are determined on the basis of materials students submit when applying for admission to Brown or during the summer prior to matriculation. Students with identified writing concerns who do not complete such a course satisfactorily and/or are judged by the dean to be incompetent in writing will be refused registration by the Committee on Academic Standing until they demonstrate that they can meet University standards for written communication.

Concentration Requirement

An academic concentration is the focal point for a student’s undergraduate educational experience at Brown. It is an in-depth study centering on a discipline or disciplines, a problem or a theme, or a broad question. Concentrations aid intellectual development by encouraging conceptual and methodological study on a sophisticated level. A concentration may coincide in some ways with specific prerequisite training for professional goals, but professional training is not the central aspect of the concentration process. Rather, the concentration is designed to foster students’ command of an area of knowledge and ability to use a concentration’s concepts and methods in a coherent manner.

Brown offers standard concentrations that lead to either the Sc.B. or the A.B. degree. In keeping with the philosophy of the open curriculum, students may design an independent concentration if standard concentration offerings do not match their interests. Independent concentration proposals are sponsored by at least one faculty member and must be reviewed and approved by a subcommittee of the College Curriculum Council.

A listing of departmental and interdepartmental concentration programs that are currently available may be found at: http://www.brown.edu/academics/college/concentrations/. The programs have been approved and are subject to periodic review by the College Curriculum Council. Guidelines for preparing an independent concentration proposal are on the Dean of the College website.

All students must request, in writing, admission to a concentration program no later than the middle of their fourth semester, before pre-registering for semester five (usually spring semester of sophomore year). The written proposal should outline the student’s major objectives in choosing the concentration, while also listing the specific courses to be taken. This proposal functions as a kind of contract, and is signed jointly by the student and the concentration advisor for the relevant department or program. Once the contract has been signed, the departmental concentration advisor becomes the student’s advisor for the remainder of his or her time at Brown.

Students may complete as many as three concentrations during a regular four-year program. Brown does not offer minors. A student who satisfactorily completes more than one concentration program may have that fact indicated on his or her permanent record. In order to accomplish this, the student must have filed a declaration form for each concentration by the end of the pre-registration period in the student’s seventh semester. Sponsorship and authorization of each concentration program shall follow the usual procedures.

No student will be permitted to register for his or her fifth semester unless a declaration of concentration has been filed. Students failing to complete registration on time because of the failure to file a concentration declaration will be subject to the same action taken by the University for all cases of late registration (see Financial Information (p. 617)).
Honors in the Concentration: Students whose work in the field of concentration has demonstrated superior quality and culminated in an honors thesis of distinction are awarded departmental honors at Commencement. The designation “Honors” is included on the student’s transcript and diploma. No distinctions are made among quality levels of honors work. Students considering honors work should consult their departmental, interdepartmental, or independent concentration advisor.

Recommendations for honors are due in early May preceding Commencement. Brown does not grant honors retroactively. Therefore, students who consider taking a grade of Incomplete in a thesis project should understand that they will not receive honors unless the thesis is completed in time to be evaluated by faculty readers and a recommendation submitted before graduation.

Enrollment Requirement

By decision of the Corporation, prior to the awarding of a baccalaureate degree each student is required to accumulate eight semesters, or 32 units, of enrollment credit. The eight-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-Levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.)

Requirements for Combined Degree Programs

Combined A.B./Sc.B. Degree

Students who wish to earn a combined A.B. and Sc.B. degree may do so in a five-year program in which work for both degrees proceeds concurrently. Students who elect this five-year plan will usually arrange their programs of study so that they may change to either degree candidacy alone prior to the fourth year.

Requirements for this degree program are as follows:

• Declaration of intent. A formal application approved by the appropriate dean must be filed with the Registrar no later than the student’s fifth semester of study.

• Satisfactory completion of the Sc.B. requirements for a standard concentration program in the life sciences, physical sciences or mathematics, or an approved independent Sc.B. program spanning one or more of these areas.

• Satisfactory completion of the A.B. requirements for a standard or independent concentration in the humanities or social sciences.

• A minimum of 38 courses passed. Transfer credits are awarded according to the University’s standard rules and regulations.

• At least three years in residence.

• Ten semesters, or 40 units, of enrollment credit. At least six of the ten semesters must be completed in residence at Brown. The ten-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-Levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.) (Note: The Brown Corporation has enacted a provision allowing students in the five-year A.B.-Sc.B. program who complete all academic requirements in nine semesters to terminate their studies at that point, provided the Committee on Academic Standing (CAS) approves the breadth and quality of the student’s program. In that case, the enrollment requirement will be reduced to nine semesters. This provision is subject to review by the Corporation’s Academic Council.)

Concurrent Program Leading to a Baccalaureate Degree and a Master’s Degree

Subject to the prior approval of the department involved, the Graduate Council, and the Committee on Academic Standing, exceptionally capable students may be permitted, in their junior year, to enter a graduate program of study leading to the earning of both baccalaureate and master’s degrees at the end of eight or nine semesters. Students who are granted this permission complete a minimum of 34 courses within eight or nine semesters. Specific requirements for both degrees must be met, although some courses may be used for credit toward both degrees. Normally, no more than two courses counted toward the undergraduate concentration may be used to fulfill the requirements of the graduate degree. The program includes at least two 2000-level courses, not including any 2000-level courses counted for the independent project or thesis.

In cases where the requirements for an advanced degree are partially completed by students in meeting the requirements for a baccalaureate degree, graduate credit for such work may be allowed upon formal admission to the Graduate School. The Graduate Council shall, in consultation with the department involved, determine the remaining requirements to be satisfied for the advanced degree.

The Committee on Academic Standing follows certain guidelines in considering requests for admission to this combined degree program. Interested students should obtain a copy of these guidelines at the Office of the Registrar prior to filing an application.

Integrated Five-Year Baccalaureate–Master’s Degree Program

With the approval of the Graduate Council, academic departments may establish integrated programs leading to the successive awarding of the bachelor’s and the master’s degrees. In such programs, a student may offer up to two courses taken during undergraduate study at Brown in partial fulfillment of the requirements for the master’s degree. In all cases, the equivalent of at least six semester courses must be taken in-residence at Brown University.

A student must apply for admission to an integrated program no later than the end of the third week of his or her penultimate semester of undergraduate study. Admission to the Graduate School for the fifth year will ordinarily be a matter of course; however, such admission must be applied for at the proper time and decided on in the regular way. Students interested in this program should consult with the Associate Dean for Academic Affairs in the Graduate School.

Brown-Rhode Island School of Design Dual Degree Program

In this five-year program, students complete a baccalaureate degree at Brown and a Bachelor of Fine Arts (B.F.A.) degree at RISD. The Brown degree earned by students in the program will ordinarily be an A.B. degree. Earning a Bachelor of Science degree is not prohibited, but doing so is difficult because Sc.B. programs are more credit heavy than A.B. programs. For this reason, permission to pursue an Sc.B. in this program is granted on a case-by-case basis. The RISD degree will in all cases be a bachelor of fine arts (B.F.A.) degree. Other degrees offered at RISD ordinarily take five years and thus are excluded from the program.

To gain admission to the program, students must apply to and be admitted by both schools. Because of the program’s strict requirements, only students applying to enter as first-year students are eligible. Approximately 15 students matriculate in the program each year. Once admitted to the program, students must complete 156 credit hours, at least 60 of which (15 courses) must be taken at Brown. This requirement does not include courses earned on Brown sponsored exchange or approved study abroad programs.
Program in Liberal Medical Education

Each year, Brown’s Program in Liberal Medical Education (PLME) matriculates approximately fifty first-year students who will pursue an undergraduate degree and professional studies in medicine in a single eight-year program. As undergraduates, PLME students may choose to work toward an A.B. or Sc.B. degree in the sciences, or toward an A.B. in the humanities, social sciences, or behavioral sciences. The undergraduate experience is designed to prepare students for the last four years of the program, which constitute the medical school years and culminate in the MD degree.

To apply to the PLME program, students submit the standard Brown application. Candidates considered admissible by the College Admission Office are reviewed by the PLME Advisory Board. Applicants not admitted to PLME are still considered candidates to the College for the Bachelor of Arts or Bachelor of Science degree.

Academic Advising Programs

A strong network of advisors and mentors helps students engage fully and successfully with Brown’s open learning environment. Brown’s advising programs are designed to facilitate these relationships and provide students with maximum opportunity to formulate and achieve their educational objectives. Students are expected to take the initiative in seeking out and working with advisors to make the best use of their time at Brown.

To ensure that students have the guidance and support they need to make informed choices, the University assigns each first-year student two advising partners: an academic advisor. The academic advisor provides a long-term institutional perspective on educational options while generally informing, sometimes encouraging, and occasionally challenging students. The student Meiklejohn provides an experienced perspective on the ins and outs of course registration, course reputations, prerequisites, and the like.

As first-year students transition to the sophomore year, they are encouraged to stay with their first-year advisors so that they can benefit from the continuity and depth of a two-year advising relationship. Most do stay with the same advisor, although some select a different faculty member or administrator. The efforts of assigned sophomores are augmented by Randall Advisors and Sophomore Deans in the Dean of the College Office. These advising resources constitute the foundation of “sophomore advising” at Brown and help students navigate the critical second year of undergraduate study.

Students declare a concentration in their fourth semester of study. Concentration advisors help with this process by explaining the dimensions of their academic disciplines, reading and providing feedback on students’ concentration declaration essays, and advising students during their final two years at Brown. Faculty of individual departments and programs that administrate concentrations often serve as informal advisors to their concentrators.

Students in all four years can interact informally with advisors over coffee or tea in Advising Central, located on the second floor of J. Walter Wilson. Academic deans and Faculty Advising Fellows hold office hours in Advising Central every weekday afternoon. Faculty Advising Fellows (FAFs) are experienced academic advisors who are interested in students’ lives both in and outside the classroom. By directing students to Brown’s many programs and resources, FAFs can help first years, sophomores, juniors, and seniors make the most of their college experience.

A broad network of academic, co-curricular, and personal counseling complements the work of assigned advisors and faculty fellows. Throughout the year, deans in the College and in the Office of Student Life provide one-on-one consultation to all students who request it. Additional support is available from the Tutoring Program, the Curricular Resource Center, the Sarah Doyle Women’s Center, the Third World Center, the Career Development Center, the professional staff in University Health Services, and the chaplains. Peer advising groups include Brown’s Meiklejohn advising program, residential peer leaders, minority peer counselors, Career Center peer counselors, pre-med peer counselors, and athlete peer advisors.

Academic Support Services

A number of programs support undergraduates’ academic success and help them take full advantage of the curriculum.

• The Office of Co-Curricular Advising and Tutoring organizes academic coaching, group tutoring, and individualized tutoring. Group tutoring is offered for select courses in chemistry, economics, math, and physics. Individual tutoring is available by application.

• The Curricular Resource Center provides advising, facilitation and reference materials for students wishing to design their own courses (ISPs and GISPs), to craft independent concentrations, and to explore options for time away from Brown.

• Disability Support Services coordinates and facilitates services for students, faculty, and staff with physical, psychological, and learning disabilities.

• The Math Resource Center assists students in introductory mathematics courses.

• The Science Center offers academic support, tutoring, science-related activities, and a network of faculty and peer advisors familiar with Brown’s science curricula. Through various events and workshops, the Center works to increase the Brown community’s understanding of science.

• The Writing Center provides individual and group writing support to any member of the Brown community. Writing Center staff members help students with all stages of the writing process, from finding a topic through drafting, revising, and final editing. Writing Center associates also offer workshops for groups of students on various writing topics.

Academic Standing

The Brown Faculty and Corporation set the minimum standards students must meet in order to earn the baccalaureate degree. Undergraduate students are normally expected to take 4 courses each semester for a total of 32 courses in 8 semesters and will ordinarily complete 8 courses in every 2 consecutive semesters. Students must complete a minimum of 30 courses in 8 semesters. (Successful completion means a course completed with a grade of A, B, C, or S.)

To remain in good academic standing, Brown students must satisfactorily complete at least three courses by the end of the first semester, seven courses by the end of the second semester, eleven courses by the end of the third, fifteen by the end of the fourth, eighteen by the end of the fifth, twenty-two by the end of the sixth, twenty-six by the end of the seventh, and thirty courses to graduate after eight semesters. In addition, students making satisfactory academic progress will complete a minimum of seven courses in any two consecutive semesters. Academic standing is determined only on the basis of courses completed at Brown. Transfer credit, Advanced Placement (A.P.) credit, and summer credit earned away from Brown do not figure in the determination of academic standing.

Undergraduates who, in the judgment of the Committee on Academic Standing, have unsatisfactory scholastic records may be placed in one of three categories—Academic Warning, Serious Warning, or Academic Suspension—which include a permanent transcript notation. The Committee’s judgment will depend on the extent of a student’s academic deficiency as defined by rules approved by the Faculty on February 5, 1991:

Academic Warning cautions a student that his or her record is below the standard for graduation.

Serious Warning notifies a student that, unless the record improves, he or she will be subject to academic suspension at the end of the semester.

Academic Suspension may be ordered when the Committee finds that a student’s academic record falls more than two credits below the number expected for the student’s semester level.

Students on Academic Warning and Serious Warning are required to obtain special academic advising from an assigned dean.

Guidelines for Study Elsewhere

Students who wish to transfer credit for study completed at other four-year institutions may do so with prior approval of the appropriate departments.
and the Committee on Academic Standing (CAS). The rules governing transfer credit for study away from Brown are complex. One set of rules governs study abroad; another applies to study away in the U.S. Yet another set of rules applies to summer study transfer credits. This section describes the policies and procedures that are most commonly called into play when matriculated students wish to have credits from elsewhere added to their Brown transcript.

Students may receive up to eight course credits for work undertaken during one academic year. In a semester credit hour system, one Brown course is considered the equivalent of four semester hours. In a quarter credit hour system, one Brown course is considered the equivalent of six quarter hours. For that reason, the number of course credits received for study away from Brown may not be equal to the number of courses taken. For example, a student taking three four-semester-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of three Brown course credits. However, a student taking three four-quarter-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of two Brown course credits. It is the student's responsibility to clarify in advance any concerns regarding the amount of transfer credit that may be awarded.

In order to be considered for transfer credit, courses must be completed with a grade of C or better, and an official transcript must be received by Brown's Office of the Registrar from the host institution. This transcript will be retained by the University. All transfer credit must receive faculty and Committee on Academic Standing approval. Students should also keep all records from their work away, including: course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from an academic department at Brown.

The Brown transcript will indicate the name of the host institution, the time period during which the student studied there, as well as the courses taken and/or unassigned credits at Brown. In the case of Brown sponsored exchange and approved study abroad programs during the academic year, all course work is reflected with the actual course title and a grade of 'S.' Students applying to graduate and professional schools are often asked to provide official transcripts from all institutions at which they have been enrolled. In such cases, the student will need to request copies of their transcripts from the study-away institution.

Study Away in the U.S.

Students planning to study elsewhere in the United States should obtain an instruction sheet and a preliminary transfer credit approval form from the Dean of the College website. Students should then work out a program and present it to their concentration advisor and/or other appropriate faculty members for approval. When the preliminary transfer credit form is returned to the study away dean, that dean will approve it on a tentative basis for submission to the Committee on Academic Standing (CAS). In which case the student must then submit a request for transfer credit for study away, and complete forms for that petition will be made available. Students should also keep all records from their work away, including, course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from an academic department at Brown.

Study Away during the Summer

Two avenues of study are available to undergraduate students interested in summer work. They may take courses in Brown's Summer School, or apply for transfer credit from other summer programs—either domestic or international—that meet certain conditions. Whether studying in the U.S. or abroad, students must study at accredited, degree granting, four-year institutions. Extension division courses are generally not allowed. Students should obtain preliminary approval for summer study away from Brown by the Committee on Academic Standing and appropriate faculty.

Students may count as many as four summer courses from all sources (or their equivalent, if summer courses carrying fewer than 4 credits were transferred to Brown) toward the baccalaureate degree. No more than the equivalent of two Brown courses will be transcripted for any given summer of enrollment. Summer transfer credit may not be used to advance a student's date of graduation, nor will it figure in the determination of academic standing. Students interested in summer study elsewhere should consult with the Dean of the College office or the Office of International Programs (OIP), as appropriate.

International Study

Brown's Office of International Programs (OIP) coordinates all study abroad undertaken by Brown students either on Brown sponsored programs or on Brown approved programs. At present, Brown sponsors programs in France, Spain, Cuba, Czech Republic, Italy, Germany, Denmark, Sweden, The United Kingdom, Tanzania, Japan, Barbados, Brazil, India. Students interested in study abroad should check with OIP as far in advance of any intended study as possible. Brown students of any nationality are not allowed to study abroad in countries where there is a travel ban by the U.S. State Department.

The College Curriculum Council (CCC) has established the following guidelines for study abroad by Brown students:

To receive credit for international study, students must spend at least one semester enrolled in an international institution of higher learning, subject to the same rules and regulations as the host institution’s regular students. There are two exceptions: where the language of study is one in which sufficient proficiency is unlikely to be achieved by the average Brown undergraduate, but the student should study the language while in the country; and where the usual assessment procedures may not be appropriate, in which case special arrangements may have to be made. Students may not study on itinerant programs (i.e., those which travel through many sites rather than being based in one primary site). Nor may the study at an institution known or not found in regular university programs overseas, such as studio art or theater arts. Prerequisites for such programs will be stated and must include previous coursework pertinent to the intended study abroad.

International Study and Brown Curriculum

International study should complement the student’s program of study at Brown. This should be ascertained by the Office of International Programs (OIP) in consultation with the CCC subcommittee on International Study, the Committee on Academic Standing (CAS), and regional advisory committees.

Non-Brown programs

Brown’s Office of International Programs works closely with key academic departments to develop a list of programs approved for international study. This list includes all Brown- sponsored programs and programs administered by institutions other than Brown in each region. All such programs should conform to the above guidelines for international study. Students do not need CAS approval for study on these programs. The list will be reviewed every two years, and any new Brown-sponsored programs are added immediately.

For Programs Not on the List

Students may petition for approval to study on other programs but should be sure to check the international study guidelines to see if the proposed program meets the criteria. Grounds for exceptions include: the desire to study in a country where there is no approved program; or the desire to study at an institution known for excellence in a specific field. Students must submit a written rationale, a tentative list of courses, and a supporting statement by a faculty member who is familiar with the program or who has expertise in the field of study being pursued. The proposal will be evaluated by the appropriate regional committee; CAS will make the final decision.

OIP reports annually on petition actions to the CCC subcommittee on international study.

Students planning to study abroad must be in good academic standing. They must be able to demonstrate competency in a foreign language, if one is involved in the international study opportunity. Brown program
Curricular Programs

Diversity Perspectives

Diversity Perspectives courses focus primarily or at least substantially on the knowledge and experience of groups that are underrepresented in traditional approaches to knowledge and learning. These courses examine the ways in which disciplines, histories, and paradigms of knowledge are reconfigured by the study of diversity-related intellectual questions.

Diversity Perspectives courses are designated “DVPS” at the end of course descriptions. They may be viewed in Brown Course Search by choosing “Diversity Perspectives” in the Curricular Programs field.

First Year Seminars

First-year seminars ensure close contact between first-year students and faculty members while simultaneously offering a rigorous introduction to the concepts and methods of a particular subject area or department. Seminars have few if any prerequisites and are offered in all areas of the curriculum, from anthropology to physics to literary arts. Students receive regular feedback on the work they produce for the seminars, and seminar faculty often serve as informal mentors for their students long after the class has ended.

First-year seminars are designated “FYS” at the end of course descriptions. A complete list of each semester’s seminars may be viewed in the Brown Course Search by choosing “First-Year Seminars” in the Curricular Programs field. Registration for first-year seminars takes place during the summer prior to students’ matriculation to Brown. Depending on availability, first-year students may also add seminars to their course schedules during pre-registration and shopping periods.

Liberal Learning

The Liberal Learning course list was created to assist students in planning a course of study consistent with the goals of a liberal education. These courses, which are an established part of the Brown curriculum, emphasize synthesis rather than survey and focus on methods, concepts, and values. Reflecting Brown’s conviction that liberal education requires active student involvement, Liberal Learning courses entail extensive student participation through papers, projects, reports, and class discussion.

Liberal Learning Courses are designated with “LILE” at the end of course descriptions. A complete list of each semester’s LILE courses may be viewed in the Brown Course Search by choosing “Liberal Learning” in the Curricular Programs field.

Writing-Designated Courses

Brown students are expected to work on writing in their general studies and in the concentration. Students may begin to fulfill this expectation by taking at least one course that carries the WRIT designation. WRIT courses are offered across the curriculum and help students develop the ability to write well in styles appropriate to different academic disciplines.

A complete list of each semester’s WRIT courses may be viewed in the Brown Course Search by choosing “Writing-Designated Courses” in the Curricular Programs field.

The Graduate School

The Graduate School oversees graduate education at Brown University, which prepares students for distinguished careers in research, teaching, and as experts in the public and private sectors. Master’s students are trained to assess information and trends in their fields and to create original works. Doctoral students perform research at the highest level, advancing knowledge in their fields.

The rigors of research, analysis, debate, performance, and publication prepare our graduates to help solve local, national, and international problems.

Brown University offers more than 70 graduate programs through the Graduate School. Brown has a friendly scale and collaborative culture. With nearly 2,000 graduate students and more than 700 full-time faculty members, Brown offers exceptionally close mentoring in its doctoral and terminal master’s programs.

The Graduate School website (http://www.brown.edu/academics/gradschool) serves as the primary source of information on doctoral programs (http://www.brown.edu/academics/gradschool/phd-programs) and master’s programs (http://www.brown.edu/academics/gradschool/masters-programs) including a distinct page (also contained with this Bulletin) for each program in terms of application and completion requirements. The Graduate School website also explains the general application (http://www.brown.edu/academics/gradschool/application-information) process as well as provides the link to the online application.

Information on general rules and regulations are detailed on the Graduate School (http://www.brown.edu/academics/gradschool/academics/rules-regulations) site. The Graduate School Handbook, dissertation guidelines, and master’s thesis guidelines can all be found in that section. Additional regulations with regards to overall requirements and tuition regulations can also be found on the Office of the Registrar’s website.
The Division of Biology and Medicine

The Division of Biology and Medicine is home to five academic departments, fourteen clinical departments, and is affiliated with seven diverse teaching hospitals (http://brown.edu/academics/medical/about/hospitals) in and around Providence. At the Division’s core is the Warren Alpert Medical School and the five academic departments in Biology (which includes study at the undergraduate and graduate levels).

For more information on Brown’s many research centers, institutes, programs, and other initiatives in the health and life sciences found within the Division of Biology and Medicine, please visit http://biomed.brown.edu/research/cip.

For further summary information on the academic units within the Division, please follow the below links:

- The Warren Alpert Medical School of Brown University (p. 85)
- Biology (Undergraduate) (p. 93)
- Biology (Graduate) (p. 107)
- Neuroscience (p. 112)

The Warren Alpert Medical School of Brown University

Dean
Jack A. Elias

Admissions

Students interested in the study of medicine at the Warren Alpert Medical School of Brown University may apply through a variety of admission routes designed to create a highly qualified and diverse medical student body.

The majority of the 120 matriculants in the first-year class apply through the American College Application Service (AMCAS). Approximately (40%) of the first-year class enroll from Brown’s eight-year combined Bachelor’s-medical degree Program in Liberal Medical Education. These students are joined by students entering through special programs at institutions with which the medical school has formed linkages (postbaccalaureate and early identification). These admission routes are described below.

AMCAS Admission

Qualified students or graduates of accredited colleges or universities in the United States or Canada may apply to Alpert Medical School (AMS) through the AMCAS route. Individuals must first complete and submit the electronic AMCAS application, found on the website of the American Association of Medical Colleges (https://www.aamc.org), and indicate that they wish to apply to the Warren Alpert Medical School of Brown University. Applicants must also complete a web-based secondary application (forwarded by AMS Office of Admissions) and submit an application fee to be considered an eligible candidate for admission.

The AMCAS applicant pool for the most recent entering class (MD 2016) was competitive, with over 3300 applicants vying for 57 seats (of 120). The applicant pool was impressive in geographic scope and size, including residents of 49 states, the District of Columbia, the Commonwealth of Puerto Rico, and a number of foreign countries (predominantly Canada, China, and South Korea).

Additional information and related admission requirements may be found at http://www.brown.edu/academics/medical/admission. The Office of Admissions may be contacted by email (MedSchool_Admisions@brown.edu) or telephone (401) 863-2149. Letters and other correspondence should be mailed to the Office of Admissions, Box G-M, Brown University, Providence, RI 02912-9706.

Program in Liberal Medical Education (PLME)

The Program in Liberal Medical Education is an eight-year continuum of liberal arts and medical education leading to both the bachelor’s and M.D. degrees. The PLME is open to high school graduates who have applied to and are simultaneously admitted to Brown for their undergraduate studies. The PLME seeks highly qualified and strongly motivated high school students who are committed to a career in medicine at an early age and who also wish to pursue another area of academic interest to an advanced level of scholarship within the framework of a broad liberal education.

From a large (approximately 2,000) and highly qualified applicant pool, roughly 50 students matriculate annually. For additional information regarding the PLME, access the website at http://www.brown.edu/academics/medical/plme/ or contact the College Admission Office, Brown University, Prospect Street, Providence, RI 02912-9706; (401) 863-2378.

Postbaccalaureate Linkage Programs

The Postbaccalaureate (PB) Linkages are cooperative ventures between Alpert Medical School and the Premedical PB Programs at Bryn Mawr College, Columbia University, Johns Hopkins University, and Goucher College. Postbaccalaureate students enrolled in these programs may be offered admission to the medical school during the spring semester of their first year of study, thus allowing them to enter the medical school in the next class.

Selection occurs by a nomination process in which the premedical advisor selects candidates meeting established eligibility criteria (e.g., age, postbac grade point average). The number of PB students in each medical school class depends upon the number of places available as well as the caliber of the applicant pool. PB students nominated for admission must apply to AMCAS and complete an AMS secondary application. The MCAT is not required for admission. Timelines for this process are distributed to PB Program Directors on a yearly basis. Completed applications are reviewed by a subcommittee of the Admissions Committee, which selects nominees for interviews. The interviews follow the same protocol as that for AMCAS applicants and the same evaluation form is used.

The Early Identification Program (EIP)

The Early Identification Program (EIP) provides selected students at cooperating institutions with a place at Alpert Medical School upon continued academic progress and college graduation. This route provides opportunities for a medical career to two groups:

- Rhode Island residents enrolled at Providence College, Rhode Island College, and the University of Rhode Island; and
- Students enrolled at Tougaloo College, a historically black, liberal arts institution in Mississippi.

Eligible students are identified by their premedical advisor in the sophomore year of college, participate in selected PLME activities, and enroll in medical school after receiving the bachelor’s degree. Generally, up to two students may be admitted annually from each school. For more information and application procedures, please contact the premedical advisor at the participating institutions. For more information access the website at http://www.brown.edu/academics/medical/admission/special-programs/special-programs://www.brown.edu/academics/medical/admission/special-programs/special-programs)

Definition of Rhode Island Residency for Medical School Admission

An individual is considered a Rhode Island resident if he or she graduated from a Rhode Island high school and if the individual’s parent(s) have lived in Rhode Island for the previous two calendar years, as documented by federal tax returns. For dependent students, the custodial parent(s) must claim the student as a dependent on his or her federal tax returns for the prior two years. Individuals who are independent (i.e., not living with parents and filing individual federal tax returns for the previous two years) must have at least one parent residing in Rhode Island for the previous two years, as documented by federal tax returns.

Brown University
Selection Factors

Students admitted to Alpert Medical School must attain competence in the sciences basic to medicine at a sufficient level to provide adequate preparation for medical school. Applicants are expected to demonstrate competence by successfully completing the following premedical course requirements at a college or university in the United States or Canada: one semester of organic chemistry; and two semesters of physics, inorganic chemistry, and social and behavioral sciences. The Medical College Admission Test (MCAT) is required for AMCAS route applicants. All applicants are selected on the basis of academic achievement, faculty evaluations, evidence of maturity, motivation, leadership, integrity, and compassion. For the PLME, Brown seeks highly qualified and strongly motivated students who wish to pursue an area of academic interest to an advanced level of scholarship within the framework of a liberal premedical education.

In order to be eligible for consideration, candidates must present a minimum cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken as a matriculated student at an undergraduate college. Applicants who have attended graduate school must achieve a cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken in graduate school. Applicants must have completed requirements for the baccalaureate degree before matriculating into the medical school. All applicants must have completed all of the requirements for the M.D. degree by the Dean of Medicine and Biological Sciences. The processes for assessing whether applicants will be able to meet the competency requirements for the M.D. degree are described in Technical Standards for Medicine, listed below.

In keeping with the mission of Brown University, the office of admissions recognizes the importance of diversity to the success of the medical school. Dimensions of diversity include, but are not limited to: race, ethnicity, religious affiliation, gender identity, sexual orientation, veteran status, age, socioeconomic status and geographic background. Multicultural perspectives enrich educational understanding, improve outreach to the community, enhance trust and communication, and facilitate development of culturally appropriate clinical and research programs.

Technical Standards for Medicine

Process for Assessing Whether Applicants Meet Technical Standards for Medicine:

1. No inquiry will be made on the application forms concerning disability. Brown’s policies regarding technical abilities and skills necessary to meet the competency requirements are included with the letter of admission, and students are asked at that time to contact the Associate Dean for Medical Education if they have any concerns about their ability to meet these standards.

2. Applicants who are identified as having a disability through volunteered information, supporting credentials, or interviews will have an assessment of their ability to meet competency requirements only after a determination is made of their admissibility to the medical program.

3. Those applicants with disabilities deemed admissible to the Medical School will be requested to have submitted on their behalf appropriate documentation in regard to the disability from a qualified health professional. The health professional will be asked to provide an opinion on the candidate’s ability to meet the competency requirements for the M.D. degree. The applicant may also be requested to respond to that question.

4. The responses will be submitted to a committee appointed by the Dean of Medicine and Biological Sciences. This committee may ask for a review of the supporting documentation by appropriate members of the faculty in regard to the applicant’s meeting the competency requirements. The committee will ascertain what accommodations, if any, the medical program would need to make in order that the applicant might be able to meet the competency requirements, and assess the feasibility of any needed accommodations.

5. The committee will review the information received to determine if the applicant will be able to meet the competency requirements, with reasonable accommodations on the part of the medical program, if necessary.

6. The committee will recommend to the Dean of Medicine and Biological Sciences acceptance of applicants who can meet the competency requirements or will recommend nonacceptance if they cannot.

Process for Assessing Student’s Ability to Continue in the Medical School Should Disability Occur After Matriculation at Brown University:

1. A student who develops a disability after matriculation at Brown University may be identified to the Medical Student Affairs Office through a variety of sources, e.g., reporting of accident or illness by peers, family, friends, or faculty and subsequent follow-up with health professionals managing the care.

2. If the degree to which the student has become disabled raises questions related to meeting the competency requirements after a review by the Associate Dean for Medical Education, a meeting of an ad hoc committee will be set up to discuss the situation. The student will be asked to meet with the committee members, unless the disability is so severe that the student needs to be represented by another individual. In some cases, it might be more appropriate to have a health professional, not directly involved in the care, serve as a consultant to the committee on the issues surrounding the disability.

3. The ad hoc committee will develop a recommendation as to the student’s ability to successfully pursue a medical education based on his or her ability to meet the competency requirements of the medical program. These educational accommodations will be discussed with the appropriate course directors to be certain that there is agreement on how the student will be managed. If facilities accommodations are recommended, the committee will discuss these with the appropriate individuals to be certain that the needs for the disabled student can be provided. The committee’s recommendations will be discussed with the student or his or her representative in the event that the student cannot attend.

4. When the recommendation is that the disabled student can meet the medical program’s competency requirements, the committee will develop a report on any educational program accommodations that, if made, will still meet the competency requirements.

5. Should the decision of the committee be to recommend to the dean that the student be dropped from enrollment in the medical program, the normal due process appeals mechanism will be in effect, and the Student Affairs Office will work with the individual as appropriate on potential alternative career options. For students in the Program in Liberal Medical Education continuum, being dropped from the program due to inability to meet competency requirements for medical education does not necessitate the withdrawal of the student from the undergraduate college if that phase of the student’s education has not been completed.

Advanced Scholarship

Medical students who wish to earn an advanced degree (M.A., Sc.M., M.P.H., Ph.D.) must meet the requirements of the Graduate School. Numerous academic departments at Brown offer graduate programs. All graduate studies are carried out under the supervision of a faculty member of a graduate program at Brown University and are subject to the specific requirements of that program in addition to the general guidelines given below. Students should discuss their interests and goals with a director of a graduate program in planning any study that might lead to an advanced graduate degree.
Educational Programs
Program in Liberal Medical Education
The Program in Liberal Medical Education (PLME) offers a unique opportunity to combine undergraduate education and professional studies in medicine into an eight-year program. The PLME is not an accelerated medical program. Rather, it encourages students to take advantage of the breadth of a liberal arts education, to take charge of their education, and to become active learners. At Brown, creative students need not sacrifice the benefits of a rich liberal arts education in order to gain admission to medical school.

The PLME provides great flexibility in curriculum planning. During the early years, students take courses related to their chosen concentration and to obtain a broad liberal education. In addition, students take courses designed to meet the competencies required for admission to Alpert Medical School. This begins with courses in the natural, social and behavioral sciences, and mathematics, which provide a foundation for later medical science and clinical courses.

Students may choose to work towards an A.B. or Sc.B. degree in the sciences, or to fulfill the requirements for an A.B. in the humanities, social sciences or behavioral sciences. Several interdisciplinary concentrations such as Public Policy and International Relations are also available. The expected duration of the program is eight years. The last four years of the program culminate in the M.D. degree.

Brown’s entire faculty is available to PLME students. This access to faculty throughout the University fosters collaborative teaching and research among scholars and students from widely divergent disciplines. Although the program is characterized by the unique breadth of educational opportunities available to students, it has great strength in the conventional biomedical sciences accompanied by in depth research opportunities as well.

The Medical Curriculum
The Alpert Medical School curriculum has been designed and implemented with the intention of creating an integrated, contemporary, compassionate, and flexible program of learning for our students. Our approach to medical education is predicated on the vision that tomorrow’s physician must be a lifelong learner who is scientifically and clinically enlightened, patient and service-centered, and who understands the economic underpinnings of the US health care system. Our goal is to train physicians who will provide informed and compassionate care while at the same time serving as leaders and change agents for the healthcare system. To achieve the latter goal, we aim to train physicians who will be leaders at all levels.

These educational goals are pursued through a curriculum with the following structure. During Years 1 and 2, students enroll in four sequential semesters of Integrated Medical Sciences (IMS-I through -IV) and Doctoring-I through -IV. The elective Scholarly Concentrations Program is introduced to students during Year 1. Year 3 allows students to explore core disciplines and related specialties through the completion of required clerkships in medicine, surgery, pediatrics, obstetrics & gynecology, psychiatry, and family medicine. The transition from the third year to the fourth year takes place in May, after which time students have the opportunity to develop a program of elective rotations aimed at finalizing a career choice, and obtaining and preparing for a residency in their chosen field.

Alpert Medical School continues to employ a competency-based curriculum that was officially launched in 1996 for the graduating MD Class of 2000. The rationale behind the competency-based curriculum stems from the need to define the outcomes of the educational process: what are the desirable qualities of a medical school graduate, and what constitutes the essential knowledge base that will enable a graduate to make a successful transition to his or her chosen medical field?

All students are expected to gain competency in the Nine Abilities (see below) and knowledge base by graduation. Each course within the core curriculum of the Medical School identifies which abilities and parts of the knowledge base it addresses. Students may also meet the competency requirements through individualized study, group independent study projects (GISPs), or alternative courses that might be arranged as part of collaborative learning opportunities.

Nine Abilities:
1. Effective communication
2. Basic clinical skills
3. Using basic science in the practice of medicine
4. Diagnosis, prevention, and treatment
5. Lifelong learning
6. Professionalism
7. Community health promotion and advocacy
8. Moral reasoning and clinical ethics
9. Clinical decision making

For additional information regarding Alpert Medical School please visit the website at: http://brown.edu/academics/medical/

Courses
Biology
BIOL 3001. Clerkship in Medicine.
Twelve weeks.

BIOL 3010. Systemic Pathology.
First-semester systemic pathology course building on the general principles of disease introduced in general pathology IMS-1. Objectives include learning the classification of systemic disease according to basic pathological mechanisms, describing and explaining the functional and structural changes produced by the most common diseases, and enhancing the ability to diagnose and treat patients. Runs in parallel with pathophysiology BIOL 3500; covers four organ system segments: cardiovascular, renal, and pulmonary and supporting structures.

BIOL 3015. Individualized Clerkship in Medicine.

BIOL 3020. Nephrology.
No description available.

BIOL 3025. Longitudinal in Renal Disease.
No description available.

BIOL 3030. Clinical Nephrology.
No description available.

BIOL 3035. Clinical Nephrology.
No description available.

BIOL 3037. Longitudinal in Nephrology.
No description available.

BIOL 3040. Clinical Dermatology.
No description available.

BIOL 3045. Longitudinal in Dermatology.
No description available.

BIOL 3050. Gastroenterology.
No description available.

BIOL 3060. Gastroenterology.
No description available.

BIOL 3070. Infectious Disease.
No description available.

BIOL 3080. HIV/AIDS.
No description available.

BIOL 3090. Allergy and Clinical Immunology Seminar.
The pathophysiology, diagnosis, and treatment of allergic and immunologic diseases. Particularly addresses the following diseases: asthma, rhinitis, sinusitis, urticaria, anaphylaxis, primary immunodeficiencies, food allergy, allergic reactions to medications, atopic eczema and insect-sting allergy. Molecular, cellular, and genetic components of allergy and other immunologic inflammation guide consideration of the diagnosis, clinical management, and prevention of allergic and other immunological diseases.

First-semester systemic pathology course building on the general principles of disease introduced in general pathology IMS-1. Objectives include learning the classification of systemic disease according to basic pathological mechanisms, describing and explaining the functional and structural changes produced by the most common diseases, and enhancing the ability to diagnose and treat patients. Runs in parallel with pathophysiology BIOL 3500; covers four organ system segments: cardiovascular, renal, and pulmonary and supporting structures.

BIOL 4210. Otorhinolaryngology.
No description available.
BIOL 4212. Longitudinal in Otolaryngology. No description available.
BIOL 4250. Trauma. No description available.
BIOL 4270. Advanced Clinical Clerkship in Cardiac Surgery. No description available.
BIOL 4280. Introduction to Thoracic Surgery. No description available.
BIOL 4285. 4th Year Surgery Boot Camp.
BIOL 4510. Pediatric Hematology Oncology. No description available.
BIOL 4520. Pediatric Neurology. No description available.
BIOL 4525. Longitudinal in Pediatric Neurology. No description available.
BIOL 4530. Pediatric Urology. No description available.
BIOL 4560. Pediatric Cardiology. No description available.
BIOL 4570. Pediatric Infectious Diseases. No description available.
BIOL 4580. Pediatric Endocrinology. No description available.
BIOL 4600. Pediatric Neurorehabilitation. No description available.
BIOL 4640. Subinternship in Pediatric Critical Care. No description available.
BIOL 4680. Subinternship in Pediatric Hematology-Oncology. No description available.

BIOL 4905. Individualized Clerkship in Ob/Gyn.
BIOL 4930. Longitudinal in Obstetrics and Gynecology. No description available.
BIOL 4940. Reproductive Endocrinology and Infertility. No description available.
BIOL 4950. Subinternship in Gynecologic Oncology and Pelvic Surgery. No description available.
BIOL 4955. Subinternship in Women's Ambulatory Ob-Gyn.
BIOL 4960. Women's Reproductive Health Topics. No description available.
BIOL 4975. Gynecologic and Breast Pathology. No description available.
BIOL 4980. Patients with Women's Cancers. No description available.
BIOL 5105. Individualized Clerkship in Psychiatry.
BIOL 5110. Subinternship in Psychiatry. No description available.
BIOL 5150. Neuropsychiatry and Behavioral Neurology. No description available.
BIOL 5200. Outpatient Psychiatry. No description available.
BIOL 5215. Longitudinal in Child Psychiatry.
BIOL 5270. Psychiatry of Late Life. No description available.
BIOL 5480. Rural Community Medicine. No description available.
BIOL 5490. Geriatrics and Rehabilitation. No description available.
BIOL 5510. Introduction to the Basic Science Curriculum in the Medical School.
The preclinical elective is designed for PLME students who will enter the Alpert Medical School. The seminar series provides prospectives on teaching and learning in the Alpert Medical School—with a specific focus...
on understanding how the basic sciences are addressed in lectures and in
the laboratory.

BIOL 5525. Medical French Elective.
BIOL 5530. College Student Health.
No description available.
BIOL 5540. Controversies in Health Care Policy.
No description available.
BIOL 5560. Law and Medicine.
No description available.
BIOL 5570. Elective in San Lucas Toliman, Guatemala.
No description available.
BIOL 5580. Frontier Nursing Service, Mary Breckinridge Hospital.
No description available.

BIOL 5850. Primary Care Sports Medicine.
BIOL 5860. Preventive Cardiology Nutrition.
No description available.
BIOL 5870. Subinternship in Family Medicine.
No description available.
BIOL 5880. Clinical Skills Clerkship Teaching Academy.
No description available.
BIOL 5885. Clinical Skills Clerkship.
BIOL 5890. Outdoor Medicine and Intern Survival.
No description available.

BIOL 5900. Art and Medicine Seminar.
No description available.
BIOL 5920. Public Health and Primary Care in Rural Honduras.
BIOL 5990. Internship Preparation Elective.
BIOL 6010. Human Morphology II.
No description available.
BIOL 6110. Applied Pathology.
No description available.
BIOL 6120. Research in Pediatric Pathology.
No description available.
BIOL 6140. Seminar in Clinical Pathological, Developmental and Pediatric Pathology.
No description available.
BIOL 6260. Radiation Oncology in Free Standing Facility.
No description available.
BIOL 6270. Longitudinal in Vascular and Interventional Radiology.
No description available.
BIOL 6275. Longitudinal in Radiation Oncology.
BIOL 6280. Diagnostic Radiology and Nuclear Medicine.
No description available.
BIOL 6290. Diagnostic Radiology.
No description available.
BIOL 6300. Nuclear Medicine Preceptorship.
No description available.
BIOL 6320. Vascular and Interventional Radiology.
No description available.
No description available.
BIOL 6360. Neuroradiology.
No description available.
BIOL 6380. Pediatric Radiology.
No description available.
BIOL 6390. Intro to Women's Diagnostic Imaging.
No description available.
BIOL 6400. Radiation Oncology.
No description available.
BIOL 6500. Cancer Action and Reflection (CARE).
No description available.
BIOL 6501. Medical Chinese Elective.
Students will attain a working knowledge of Chinese relevant to medical
practice in order to better communicate with and serve Chinese-speaking
patients. Open to students who a proficient in the Mandarin dialect of
Chinese.
BIOL 6502. Medical Spanish.
The course is designed for students to gain beginning-level competence
in Medical Spanish that will enable them to communicate more effectively
with Spanish-speaking patients and their families. Specifically, the
students will develop critical Spanish lexicon and language skills for
conducting the medical interview. Perquisite: Background in Spanish.
Grading: S/NC
BIOL 6503. Poverty, Health and Law.
No description available.
BIOL 6504. Health Care in America.
No description available.
BIOL 6505. Introduction to Multidisciplinary Fetal Medicine.
An 8-session elective seminar for 2nd year medical school students.
Emphasis is placed on the multidisciplinary approach to medical problems.
The course concentrates on those conditions for which fetal and/or
neonatal intervention may be indicated, from gene therapy to fetal surgical
intervention.
No description available.

BIOL 6507. Elective in Mindfulness Training.
No description available.

BIOL 6508. Gender and Sexuality in Healthcare: Caring for All Patients.
The goal of the course is to provide medical students with the knowledge needed to effectively and competently work with a growingly diverse patient (and colleague) population. Contemporary medical school curricula are lacking in the instruction and discussion of patients of all genders and sexualities. This elective will address this need. The course will consist of eight 2-hour sessions, with guest speakers lecturing for the first hour and small group discussion happening for the second hour. Students are required to keep a journal of their experiences as their final assignment for the class. The class will be graded S/NC.
The topics range from LGBTQ Teenagers to Institutionalized Homophobia to Hormone Therapy, led by experts in each field.

BIOL 6509. Introduction to Surgery.
No description available.

BIOL 6510. Topics in Medicine - An International Perspective at U Rostock, Germany.
No description available.

BIOL 6511. Comparative Medical Ethics at U of of Tubingen, Germany.
No description available.

BIOL 6512. Modern Genetics: Ethics, Policy, and the Doctor-Patient Relationship.
No description available.

BIOL 6513. (Play)writing and Medicine.
No description available.

This elective seminar for 1st and 2nd year medical school and PLME students will introduce them to the world of complementary and alternative forms of healing (CAM) and place it into a framework of an Integrative medicine.

BIOL 6515. Humanities as Medical Instruments.

BIOL 6516. Design and Health.

BIOL 6550. Medical Students Outreach to Mothers to Be (MOMS).
No description available.

BIOL 6551. The Bionic Human Elective.
No description available.

BIOL 6652. Wilderness Medicine Preclinical Elective.
The Wilderness Medicine elective is designed to instill the basic survival skills training necessary for environments outside the hospital, both urban and wild. It combines didactic lectures on such topics as toxicology and travel medicine with field skills sessions & workshops (e.g. suturing, splinting). These sessions also include mock medical scenarios, such as near drownings, for the students to handle. It includes off-campus consultation with experts to review their medical emergency procedures. A final project consisting of writing about a popular wilderness myth and its voracity is required.

BIOL 6653. Refugee Health and Advocacy.
No description available.

No description available.

BIOL 6655. Health Care of Underserved.
No description available.

No description available.

BIOL 6657. Sexual Health.
No description available.

BIOL 6658. Medical Impact of Translational and Basic Science.
No description available.

BIOL 6659. Entrepreneurship in Medicine.

BIOL 6800. Elective in Biotechnology.
No description available.

BIOL 7000. Away Elective 1.
No description available.

BIOL 7010. Away Elective 2.
No description available.

BIOL 7020. Away Elective 3.
No description available.

BIOL 7030. Away Elective 4.
No description available.

BIOL 7040. Away Elective 5.
No description available.

BIOL 7050. Away Elective.
No description available.

BIOL 7100. Independent Study 1.
No description available.

BIOL 7110. Independent Study 2.
No description available.

BIOL 7120. Independent Study 3.
No description available.

BIOL 7140. Approved Subinternship Independent Study.
No description available.

BIOL 7150. Independent Study.
No description available.

BIOL 7160. Scholarly Concentration Independent Study.
No description available.

BIOL 7200. International Elective: University of Bologna (Italy).

BIOL 7210. International Elective: Moi University (Kenya).

BIOL 7225. International Elective: University of Rostock (Germany).

BIOL 7230. International Elective: Technion-Israel Institute of Technology.

BIOL 7240. International Elective: University of Tuebingen (Germany).

BIOL 7301. Seminar on Race + Health Disparities.

BIOL 7500. Longitudinal Independent Study.
No description available.

BIOL 7600. Approved Subinternship Away.
No description available.

Program in Liberal Medical Education

This program has been developed for Brown PLME students and first year Italian medical students to familiarize the future physicians with the much-debated theme of health care delivery and policies. Students will focus on medicine beyond science through the critical study of how socioeconomic and cultural factors impact this field. Students will compare the Italian and American systems, focusing on historical structures and current issues in health care regulation. Enrollment limited to 10.
PLME 1000. PLME Senior Seminar in Scientific Medicine.
This course is an interdisciplinary and integrative science course that will supplement the preparation of both PLME and pre-medical students for the study of medicine in the 21st century. The course will use a case-based approach to relevant and contemporary subjects in medicine and health care, such as: biological systems and their interactions; diagnosis and therapy optimization; and the humanistic aspects of patient care. The course is intended for seniors interested in attending medical school but will preferentially enroll PLME students. Prerequisite: PLME competency in Biology, Chemistry (inorganic and organic), Physics, and introductory calculus. Enrollment limited to 40. SNRC

Biology (Undergraduate)

Associate Dean of Biology and Chair
Edward Hawrot

Director of Undergraduate Affairs
Marjorie E. Thompson

The Undergraduate Program in Biology offers courses at all levels of biological organization: molecular, cellular, organismal and population, and concentration programs with varying degrees of multidisciplinary or specialty foci. There is a vast range of collaborative opportunities for independent study and research under the mentorship of the faculty. Faculty maintain research programs at the cutting edge of their fields including biochemistry, biophysics, cell biology, developmental biology, ecology, evolution, genetics, immunology, molecular biology, neurobiology, physiology, anatomy, artificial organs, microbiology, virology, experimental pathology, and pharmacology. The close administrative relationship with the Alpert Medical School offers additional opportunities for blending fundamental biology and clinical sciences in research projects at the Brown-affiliated hospitals.

The Biology Undergraduate Affairs Office is a full service academic resource center, serving a key role for students of the life sciences here. The Office provides individualized advising for students at all levels; oversees student-faculty research collaborations, holds special events and maintains a variety of programs that support and enrich student life. For further information, please visit: http://biology.brown.edu/bug/

Biology Concentration Requirements

The Biology concentration enables students to study, in depth and in breadth, the science of life and living matter. Whether pursuing the A.B. or Sc.B. in biology, students can expect to learn broadly in the discipline through a selection of courses in three areas: cell and molecular biology, structure and function, and organismal biology. In addition, students pursuing the ScB complete a thematic cluster through which they gain an in-depth understanding of a particular biological subfield (examples include immunobiology, ecology and evolutionary biology, and biotechnology). The concentration also emphasizes practical skills and experimental design. Concentrators are therefore required to take at least three courses with a laboratory or fieldwork component. Within all of these requirements, students have a high degree of flexibility and choice. Broad research opportunities are also available across several departments within the basic sciences as well.

Standard program for the A.B. Biology

The concentration program for the A.B. in Biology consists of four prerequisite courses in math and chemistry and ten courses in biological sciences, including courses in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology. Beyond the area requirement, students may choose up to two, upper-level science courses from an approved selection for science concentrators.

Prerequisites: 1

CHEM 0330 Equilibrium, Rate, and Structure 1

CHEM 0350 Organic Chemistry 1

MATH 0090 Introductory Calculus, Part I (or equivalent placement) 1

One of the following:

MATH 0100 Introductory Calculus, Part II 1

MATH 0170 Advanced Placement Calculus (or equivalent placement) 1

Or a statistics course, to be approved by the concentration advisor.

Core courses: 4

BIOL 0200 The Foundation of Living Systems (AP credit accepted, placement test available) 1

The Area requirement must be fulfilled by taking at least one course in each of these groups: 3

Area 1 (Cell/Molecular Biology)

BIOL 0280 Introductory Biochemistry

BIOL 0470 Genetics

BIOL 0500 Cell and Molecular Biology

BIOL 0510 Introductory Microbiology

BIOL 0530 Principles of Immunology

BIOL 1050 Biology of the Eukaryotic Cell

BIOL 1100 Cell Physiology and Biophysics

BIOL 1310 Developmental Biology

NEUR 1020 Principles of Neurobiology

Area 2 (Structure/Function)

BIOL 0320 Vertebrate Embryology

BIOL 0400 Biological Design: Structural Architecture of Organisms

BIOL 0440 Plant Organism

BIOL 0800 Principles of Physiology

BIOL 1100 Cell Physiology and Biophysics

BIOL 1880 Comparative Biology of the Vertebrates

NEUR 0010 The Brain: An Introduction to Neuroscience

Area 3 (Organismal Biology)

BIOL 0380 The Ecology and Evolution of Infectious Disease

BIOL 0390 Vertebrate Evolution and Diversity

BIOL 0400 Biological Design: Structural Architecture of Organisms

BIOL 0410 Vertebrate Zoology

BIOL 0420 Principles of Ecology

BIOL 0430 The Evolution of Plant Diversity

BIOL 0475 Conservation Medicine

BIOL 0480 Evolutionary Biology

BIOL 1410 Evolutionary Genetics

BIOL 1430 The Computational Theory of Molecular Evolution

BIOL 1800 Animal Locomotion

BIOL 1880 Comparative Biology of the Vertebrates

ENVS 0455 Coastal Ecology and Conservation

ENVS 0490 Environmental Science in a Changing World

Six additional courses chosen from BIOL and/or NEUR offerings for concentrators

Options within the Core may include up to two related sciences which are approved courses for science concentrators, as follows: 4

GEOL 0220 Physical Processes in Geology (or above)

CHEM 0360 Organic Chemistry (or above)

CLPS 0110 Mechanisms of Animal Behavior (formerly PSYC 0500)

CLPS 0400 Brain Damage and the Mind (formerly PSYC 0470)

CLPS 0410 Principles of Behavioral Neuroscience (formerly PSYC 0750)
The concentration program for the Sc.B. in Biology consists of five prerequisite courses in math and chemistry and ten courses in biological sciences, including courses in each of the following three areas:

**Area 1: Cell/Molecular Biology**

- CHEM 0360 Organic Chemistry (and above) 1
- PHYS 0030 Basic Physics and Basic Physics
- PHYS 0050 Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics
- ENGN 0030 Introduction to Engineering and Dynamics and Vibrations
- MATH 0090 Introductory Calculus, Part I 1
- MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1

**Area 2: Structure/Function**

- CHEM 0360 Organic Chemistry (and above) 1
- PHYS 0030 Basic Physics and Basic Physics
- PHYS 0050 Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics
- ENGN 0030 Introduction to Engineering and Dynamics and Vibrations
- MATH 0090 Introductory Calculus, Part I 1
- MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1

**Area 3: Organismal Biology**

- CHEM 0360 Organic Chemistry (and above) 1
- PHYS 0030 Basic Physics and Basic Physics
- PHYS 0050 Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics
- ENGN 0030 Introduction to Engineering and Dynamics and Vibrations
- MATH 0090 Introductory Calculus, Part I 1
- MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1

The Area requirement must be fulfilled by taking at least one course in each of these groups:

- **Core Courses:**
  - BIOL 0200 The Foundation of Living Systems 1
  - BIOL 1950/1960 Directed Research/Independent Study 1

- **Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Biology Undergraduate Affairs Office (Arnold, Room 124) or at the Research Projects Collection, found at http://biology.brown.edu/bug/honors.

- **Standard Program for the Sc.B. Biology**

- **Prerequisites:**
  - MATH 0090 Introductory Calculus, Part I 1
  - MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1
  - or MATH 0170 Advanced Placement Calculus
  - CHEM 0360 Organic Chemistry (and above) 1
  - Select one of the following series:
    - PHYS 0030 Basic Physics and Basic Physics
    - PHYS 0050 Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics
    - ENGN 0030 Introduction to Engineering and Dynamics and Vibrations
    - MATH 0090 Introductory Calculus, Part I 1
    - MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1

- **Related sciences must be above prerequisite level, and suitable for science concentrators.**

- **Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Biology Undergraduate Affairs Office (Arnold, Room 124) or at the Research Projects Collection, found at http://biology.brown.edu/bug/honors.

- **Standard Program for the Sc.B. Biology**

- **The concentration program for the Sc.B. in Biology consists of five prerequisite courses in math and chemistry and ten courses in biological sciences, including courses in each of the following three areas:**
  - **Area 1: Cell/Molecular Biology**
  - **Area 2: Structure/Function**
  - **Area 3: Organismal Biology**

- **Five additional courses chosen from BIOL and/or NEUR offerings for concentrators.**

- **Options within the Core may include up to two related sciences which are approved courses for science concentrators, as follows:**
  - MATH 0180 Intermediate Calculus (and above)
  - PHYS 0470 Genetics
  - BIOL 0510 Introductory Microbiology
  - BIOL 0500 Cell and Molecular Biology
  - BIOL 1050 Biology of the Eukaryotic Cell
  - BIOL 1100 Cell Physiology and Biophysics
  - BIOL 1310 Developmental Biology
  - NEUR 1020 Principles of Neurobiology
  - NEUR 0010 The Brain: An Introduction to Neuroscience
  - BIOL 1110 Topics in Signal Transduction
  - BIOL 1880 Comparative Biology of the Vertebrates
  - BIOL 1880 Comparative Biology of the Vertebrates

**Courses in the history or philosophy of science (e.g., HIST 1190); related sciences must be above 1000-level.**

**EXCLUSIONS:** BIOL 1920 and BIOL 2840.

**AP scores of 4 or above may substitute Math courses.**

**Prerequisites:**

- MATH 0090 Introductory Calculus, Part I 1
- MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1
- PHYS 0470 Genetics
- PHYS 0470 Genetics
- CHEM 0360 Organic Chemistry (and above) 1
- ENGN 0030 Introduction to Engineering and Dynamics and Vibrations
- MATH 0090 Introductory Calculus, Part I 1
- MATH 0100 Introductory Calculus, Part II (or equivalent placement) 1

**Total Credits:** 14
PHYS 0470  Electricity and Magnetism (and above) Courses in the history or philosophy of science (e.g., HIST 1190); also a course from the BIOL 1920 series and others by permission of an instructor. 

Statistics: 

SOC 1100  Introductory Statistics for Social Research

CLPS 0900  Quantitative Methods in Psychology (formerly COGS/PSYC 0900)

APMA 0650  Essential Statistics

EDUC 1110  Introductory Statistics for Education Research and Policy Analysis

ECON 1620  Introduction to Econometrics

**Thematic Cluster Courses:**

Three additional biological sciences courses (not including BIOL 1950/1960 research) that form a logical thematic cluster. Examples of thematic clusters include: Molecular Biology; Immunology; Ecology and Evolutionary Biology; Physiology and Biotechnology; Neurobiology; Physical Sciences. 

**Total Credits: 18**

1. AP scores of 4 or 5 may substitute Math courses.
2. At least two biology and/or neuroscience courses must be above 1000-level. EXCLUSIONS: BIOL 1920 and BIOL 2840. *Courses numbered below BIOL 0100 do not carry concentration credit. At least three of the biology and/or neuroscience courses must include laboratory or fieldwork. No substitutions per above Area lists. If a course is listed in more than one area, it may be used to fulfill one of those; the other must be fulfilled by a different course*
3. If substantial research is carried out away from Brown, it must be approved by an appropriate Brown BioMed faculty member but does not carry course credit toward the Core program.
4. See listing on website for options. Related sciences must be above prerequisite level, and suitable for science concentrators.
5. At least two, and preferably all three, must be above 1000-level. Courses used for the cluster, must be approved by an advisor and/or Dean Thompson.

**Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/BIOL 1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Biology Undergraduate Affairs Office (Arnold, Room 124) or at the Research Projects Collection, found at http://biology.brown.edu/bug/honors.

**Stipulations for Biology Programs:**

1. For double concentrations, no more than two courses may overlap (i.e., be used to meet requirements of both) programs, prerequisites excepted.
2. No more than two semesters of directed research may be used as concentration credits. Each does count as an individual core towards the program, but only carry one lab credit towards the three required.
3. Transfer or study abroad courses may be used within the program, subject to approval of advisor, and Dean Thompson.

**Health & Human Biology Concentration Requirements**

Health and Human Biology is an interdisciplinary concentration whose goals are to provide a rigorous foundation in the biological sciences with substantive course work in humanities and social sciences within a subfield of Human Health and Disease. The program includes: background courses, a biology core courses, a set of theme courses, and a Senior Capstone activity. Background courses provide the essential foundations in chemistry, mathematics, methods, and basic biology. These support the Biology core comprised of a flexible menu of intermediate and advanced courses. A required portion of the Biology core is Genetics, which is considered a cornerstone of human biology and its interface with other fields. The Biology core underscores the related coursework within the Health and Disease Theme. This course grouping is comprised of social science and humanities courses and must form a cohesive, thoughtful cohort. Suggested theme subfoci must be discussed and approved by an advisor. It is expected that these course selections will evolve over the course of the student’s college career, as each semester’s experience builds on the previous one. A senior year capstone course or experience should build on the program’s theme.

**Program Requirements**

**REQUIRED BACKGROUND:**

Four (4) courses including:

| BIOL 0950 & CHEM 0330 | Introductory Calculus, Part I and Equilibrium, Rate, and Structure and The Foundation of Living Systems (or equivalent placement) |
| APMA 0650 & BIOL 0200 | Essential Statistics |

Choose one (1) Statistics or Methods course (chosen with advisor’s approval), for example:

| APMA 0650 | Essential Statistics |
| or SOC 1100 | Introductory Statistics for Social Research |
| or BIOL 0495 | Statistical Analysis of Biological Data |
| or CLPS 0900 | Quantitative Methods in Psychology (formerly COGS/PSYC 0900) |
| or EDUC 1100 | Introduction to Qualitative Research Methods |

**CORE PROGRAM:**

In addition to the stated background in Chemistry, Math, Biology and Statistics, five (5) Biology plus four (4) coherently-grouped Theme courses, plus a Senior-Year Capstone course or project. (See description of Capstone at link below this table).

**BIOLOGY:**

A thoughtful, advisor-approved grouping of five (5) courses, including:

Genetics, which can be fulfilled in the following ways:

| BIOL 0470 | Genetics |

**-OR-**

| BIOL 0480 & BIOL 0500 | Evolutionary Biology and Cell and Molecular Biology |

**-OR-**

| BIOL 0480 & BIOL 0510 | Evolutionary Biology and Introductory Microbiology |

a) Select one (1) course in structure, development and physiology such as:

| BIOL 0320 | Vertebrate Embryology |
| or BIOL 0400 | Biological Design: Structural Architecture of Organisms |
| or BIOL 0800 | Principles of Physiology |
| or BIOL 1310 | Developmental Biology |
| or BIOL 1880 | Comparative Biology of the Vertebrates |
| or NEUR 0010 | The Brain: An Introduction to Neuroscience |

b) Select one (1) course in organismal/population biology such as:

| BIOL 0380 | The Ecology and Evolution of Infectious Disease |
| or BIOL 0390 | Vertebrate Evolution and Diversity |
| or BIOL 0400 | Biological Design: Structural Architecture of Organisms |
| or BIOL 0410 | Invertebrate Zoology |
| or BIOL 0415 | Microbes in the Environment |
| or BIOL 0420 | Principles of Ecology |
| or BIOL 0475 | Conservation Medicine |
| or BIOL 0480 | Evolutionary Biology |
| or BIOL 1410 | Evolutionary Genetics |
| or BIOL 1430 | The Computational Theory of Molecular Evolution |
| or BIOL 1475 | Biogeography |
| or BIOL 1480 | Terrestrial Biogeochemistry and the Functioning of Ecosystems |
or BIOL 1880  Comparative Biology of the Vertebrates
or ENVS 0490  Environmental Science in a Changing World
or ENVS 0455  Coastal Ecology and Conservation
or ENVS 1455  Marine Conservation Science and Policy

c) Two (2) Biology or Neuroscience courses that relate to and support
the chosen theme course grouping (see below). 3

THEME: (see examples below)
Four (4) appropriate and cohesively grouped courses from non-
bioptique and non-neuroscience offerings

The unifying theme in this program is Human Health and Disease.
With advisor’s assistance, a subfocus is chosen from departments such as: CLPS, PHP, EDUC, GNSS, SOC, ANTH, HIST, SCSO, ETHN, ENVS, ARRT, PPAI, and sections of BIOL 1920; others by
approval or suggestion of the advisor. Approved courses must be
suitable for concentrators, and at least one must be advanced (>1000
level in the discipline). EXCLUSIONS: BIOL 1920 and BIOL 2840,
which carry theme or capstone credit (BIOL 1920C) only. *Courses
numbered below BIOL 0100 do not carry concentration credit.

SENIOR CAPSTONE ACTIVITY  4
1) The Capstone activity must be approved by the concentration
advisor and must be carried out DURING the Senior year.
2) Honors in Human Biology is based on approved Capstone
Research that yields a thesis and oral presentation, plus quality
grades (see more information about Honors below).

Total Credits 14

CAPSTONE: See description of Capstone at http://biology.brown.edu/bug/
human-biology.

THEME: Examples of thematic subfoci that may describe a course
grouping include (but are not necessarily limited to):
• Health Behavior (Brain & Behavior)
• Health Systems Structure and Policy
• Culture and Health
• Environmental Health
• Global/International Health
• Women’s/Children’s Health
• Disability/Ethics
• Social context
• Race and ethnic disparities in disease

Examples of possible THEME COURSES are listed in this pdf.

HONORS: See more information about Honors at http://biology.brown.edu/
bug/honors.

1 Note: These latter two options involve TWO courses, both of which
would therefore count as part of the five biology course portion of the
program.
2 BIOL 0480 serves as the organismal/population biology course that is required
3 At least one of these at the advanced (>1000) level.
4 May be fulfilled by an independent activity such as an approved
relevant advanced course, or seminar or, Directed Research (eg,
BIOL 1950/1960, or an independent study in another Department if
approved by the concentration advisor),or an appropriate internship
accompanied by a scholarly paper written under the direction of a
Brown faculty mentor. The Capstone activity must be approved by
the concentration advisor and must be carried out DURING the senior
year.

Applied Mathematics-Biology
Concentration Requirements
The Applied Math - Biology concentration recognizes that mathematics
is essential to address many modern biological problems in the post
genomic era. Specifically, high throughput technologies have rendered
vast new biological data sets that require novel analytical skills for the
most basic analyses. These technologies are spawning a new "data-
driven" paradigm in the biological sciences and the fields of bioinformatics
and systems biology. The foundations of these new fields are inherently
mathematical, with a focus on probability, statistical inference, and
systems dynamics. These mathematical methods apply very broadly
in many biological fields including some like population growth, spread
of disease, that predate the genomics revolution. Nevertheless, the
application of these methods in areas of biology from molecular genetics
to evolutionary biology has grown very rapidly in with the availability
of vast amounts of genomic sequence data. Required coursework in
this program aims at ensuring expertise in mathematical and statistical
sciences, and their application in biology. The students will focus
in particular areas of biology. The program culminates in a senior
capstone experience that pairs student and faculty in creative research
collaborations.

Standard program for the Sc.B. degree
Required coursework in this program aims at ensuring expertise in
mathematical and statistical sciences, and their application in biology. The
students will focus in particular areas of biology. The program culminates
in a senior capstone experience that pairs student and faculty in creative
research collaborations. Applied Math – Biology concentrators are
prepared for careers in medicine, public health, industry and academic
research.

Required Courses:
Students are required to take all of the following courses.

Select one of the following sequences:

APMA 0350 Methods of Applied Mathematics I, II
& APMA 0360 and Methods of Applied Mathematics I, II
APMA 0330 Methods of Applied Mathematics I, II
& APMA 0340 and Methods of Applied Mathematics I, II
APMA 1650 Statistical Inference I
One (1) additional APMA approved 1000-level course.
MATH 0090 Introductory Calculus, Part I (or equivalent
placement)
MATH 0100 Introductory Calculus, Part II (or equivalent
placement)
or MATH 0170 Advanced Placement Calculus
MATH 0180 Intermediate Calculus
MATH 0520 Linear Algebra (or an approved applied math
course)
CHEM 0330 Equilibrium, Rate, and Structure  1
PHYS 0030 Basic Physics
or PHYS 0050 Foundations of Mechanics
PHYS 0040 Basic Physics
or PHYS 0060 Foundations of Electromagnetism and Modern Physics

Additional Courses
In addition to required courses listed above, students must take the following:

Two additional courses in applied math, biology, chemistry, math, or
physics. At least one of these must be a directed research course that
reflects the theme of this program, for example:

APMA 1970 Independent Study
BIOL 1950 Directed Research/Independent Study
or BIOL 1960 Directed Research/Independent Study

Four biology courses agreed upon by the student and advisor, for
example:

Areas of Emphasis and Suggested Courses:
A breadth of courses in multiple areas is suggested. For students
with particular interests, the following areas of emphasis can be
considered.

Biochemistry
BIOL 0280 Introductory Biochemistry
**Biochemistry & Molecular Biology Concentration Requirements**

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

**Standard program for the Sc.B. degree**

Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>

</tbody>
</table>

**Genetics**

- BIOL 0470: Genetics
- BIOL 1410: Evolutionary Genetics

**Total Credits**: 17

1 It is recommended that some concentrators take organic chemistry or biochemistry.

**Biochemistry**

- CHEM 0350: Organic Chemistry
- CHEM 1230: Chemical Biology
- CHEM 1240: Biochemistry
- BIOL 1270: Advanced Biochemistry

**Cells, Tissues, and Organs**

- BIOL 0800: Principles of Physiology
- BIOL 1100: Cell Physiology and Biophysics
- BIOL 1190: Synaptic Transmission and Plasticity
- BIOL 1090: Polymer Science for Biomaterials
- BIOL 1120: Biomaterials
- BIOL 1140: Tissue Engineering
- BIOL 1150: Stem Cell Engineering

**Neurosciences**

- APMA 0410: Mathematical Methods in the Brain Sciences
- BIOL 0410: Invertebrate Zoology
- BIOL 0420: Principles of Ecology
- BIOL 0430: The Evolution of Plant Diversity
- BIOL 0480: Evolutionary Biology
- BIOL 1410: Evolutionary Genetics
- BIOL 1420: Experimental Design in Ecology
- BIOL 1430: The Computational Theory of Molecular Evolution

**Total Credits**: 17

**Quantitative Science or Mathematics Electives:** 2

**Suggested Elective Courses:**

Students are required to take six (6) elective courses: four (4) taken from the chart below and two (2) from any science or mathematics course relevant to biochemistry, cell and molecular biology from the suggested courses below:

**Biology Electives:**

- BIOL 0200: The Foundation of Living Systems
- BIOL 0470: Genetics
- BIOL 0500: Cell and Molecular Biology
- BIOL 0530: Principles of Immunology
- BIOL 0800: Principles of Physiology
- BIOL 1050: Biology of the Eukaryotic Cell
- BIOL 1090: Polymer Science for Biomaterials
- BIOL 1100: Cell Physiology and Biophysics
- BIOL 1110: Topics in Signal Transduction
- BIOL 1200: Protein Biophysics and Structure
- BIOL 1150: Stem Cell Engineering
- BIOL 1260: Physiological Pharmacology
- BIOL 1290: Cancer Biology
- BIOL 1540: Molecular Genetics
- BIOL 1560: Virology

**Neuroscience Electives:** 2

- NEUR 1020: Principles of Neurobiology
- NEUR 1670: Neuropharmacology and Synaptic Transmission

**Chemistry Electives:**

- CHEM 0500: Inorganic Chemistry
- CHEM 1140: Physical Chemistry: Quantum Chemistry
- CHEM 1220: Computational Tools in Biochemistry and Chemical Biology
- CHEM 1230: Chemical Biology
- CHEM 1240: Biochemistry
- CHEM 1450: Advanced Organic Chemistry

**Total Credits**: 2
Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Total Credits 20

1 Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.
2 or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

Biomedical Engineering Concentration Requirements

Biomedical Engineering is an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. It is administered jointly by the School of Engineering and the Division of Biology and Medicine. The educational objectives of Biomedical Engineering are to prepare students for careers of useful service to society, to engage committed scholars in the productive application of the tools of engineering to the subject matter of biology across the spectrum of research and teaching, to provide opportunities for teamwork, open ended problem-solving and critical thinking. The objectives prepare students 1) well versed in the basic sciences of mathematics, physics, and chemistry; 2) fluent in contemporary biology, comfortable with its reductionist traditions and its movement toward a molecular understanding, and familiar with its experimental assays; 3) educated in the tools and skill-sets of engineers, particularly the ability to quantify, synthesize, and integrate, and able to apply these tools both theoretically and experimentally to living systems and other subject matter in biology; 4) well prepared to complete their education and training in further study at the graduate or professional level, and conditioned to recognize the need for such further work; and 5) endowed with the attributes of an education in a leading liberal arts institution: the ability to think clearly, decide fairly, and communicate effectively.

Biophysics Concentration Requirements

Biophysics is that it is a quantitative science that requires a significant level of competence in physics, chemistry, mathematics, and biology. These areas therefore form the required background coursework for this program, and serve as a springboard to an advanced focus, developed in consultation with a concentration advisor. Advanced foci may include structure-function relations of macromolecules, biomechanics of cell cytoskeleton, biotechnology for drug and gene delivery, molecular mechanisms of membrane transport, sensory signal transduction, for examples. The program also requires a capstone research project that reflects this focus and may be drawn from collaborative research opportunities offered by faculty in biology, chemistry, or physics departments.

Additional detailed information about the field of Biophysics may be found at: http://www.biophysics.org/AboutUs/Biophysics/tabid/517/Default.aspx

### Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience and visualization. The program educates the student liberally in these fields, building on a foundation of coursework that may then focus via several possible tracks. The program offers four tracks: computational genomics, biological sciences, molecular modeling and applied mathematics and statistical genomics. The program requires a senior capstone experience that pairs students and faculty in creative research collaborations.

### Six courses in one of the following four tracks:

#### Computational Genomics Track:

- Three of the following:
  - CSCI 1230 Introduction to Computer Graphics
  - CSCI 1270 Database Management Systems
  - CSCI 1410 Introduction to Artificial Intelligence
  - CSCI 1550 Probability and Computing: Randomized Algorithms and Probabilistic Analysis
  - CSCI 1570 Design and Analysis of Algorithms
  - or other Computer Science courses approved by the concentration advisor
- Three of the following:
  - CSCI 0310 Introduction to Computer Systems
  - CSCI 0320 Introduction to Software Engineering
  - CSCI 1820 Algorithmic Foundations of Computational Biology
  - PHP 2620 Statistical Methods in Bioinformatics, I
  - APMA 1660 Statistical Inference II

---

**Total Credits:** 19
The Division of Biology and Medicine

BIOL 1430 The Computational Theory of Molecular Evolution

Biological Sciences track
At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.
Select two courses from the following:
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Molecular Modeling Track:
- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
At least three courses from the following:
- CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
- CHEM 1230 Chemical Biology
or CHEM 1240 Biochemistry
or BIOL 1270 Advanced Biochemistry
- BIOL 0530 Principles of Immunology
- BIOL 1260 Physiological Pharmacology
- BIOL 1540 Molecular Genetics
Two courses from the following:
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Applied Mathematics and Statistical Genomics Track:
At least three courses from the following:
- APMA 1660 Statistical Inference II
- APMA 1690 Computational Probability and Statistics
- CSCI 1410 Introduction to Artificial Intelligence
- APMA 0340 Methods of Applied Mathematics I, II
- APMA 0330 Methods of Applied Mathematics I, II
At least three of the following:
- BIOL 1430 The Computational Theory of Molecular Evolution
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1070 Quantitative Models of Biological Systems

Total Credits 19

1 Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. A minimum of one semester of independent study is required, although many students may conduct a full year of independent study.

2 This track is designed for students whose interests lie in the development of algorithms and high-quality software (tools and systems) for biological applications.

3 This track is designed for students whose interests lean more towards biological questions.

4 This track is designed for students who wish to gain competence in the field of molecular modeling and drug design.

5 This track is designed for students whose interest focuses on extracting information from genomic and molecular biology data, and modeling the dynamics of these systems. Substitution of more advanced courses with consent of advisor is permitted.

Honors:
To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

Marine Biology Concentration Requirements
Marine biology encompasses the study of living organisms in the ocean or other marine or brackish bodies of water. Because marine organisms play an important role in sustaining life on earth, and because of the diverse habitats studied by marine biologists, concentrators must study broadly in the basic sciences and become familiar with the varied research techniques in the field. Consequently, students begin their learning with foundational courses in biology, mathematics, chemistry, and physics. Subsequent coursework in the concentration exposes students to a range of topics in biology (e.g., Invertebrate Zoology, Ecology, Physiology, Conservation) and courses in other sciences, including geological sciences, computer science, and engineering. Students are encouraged to spend a summer or semester conducting research at a field station. The field experience is a key feature of this program and provides scholarly interaction with leaders in the field so that students are mentored at the cutting edge.

Courses

Introduces the basic principles of human nutrition, and the application of these principles to the specific needs of humans, and the role of nutrition in chronic diseases. Provides an overview of the nutrients and their use by the human body. Also examines the role of nutrients in specific functions and disease states of the body. Not for biology concentration credit. Enrollment limited to 100. LILE

BIOL 0040. Nutrition for Fitness and Physical Activity.
Reviews the role of nutrition in physical activity and health. It is designed to provide the student with the information and skills needed to translate nutrition and physical activity recommendations into guidelines for both the athlete for maximal performance and the non-athlete to improve both health and body weight. Students will learn the use of the energy yielding nutrition in physical activity and how food choices can influence both athletic performance and long-term health through the effect on risk factors for chronic diseases. Prerequisite: BIOL 0030. Enrollment limited to 20. Instructor permission required

BIOL 0060. Introduction to Human Physiology.
An introduction to human physiology aimed primarily at undergraduates who are not concentrating in biology. Topics include basic cardiovascular, respiratory, kidney, gastrointestinal, endocrine, and neuromuscular function, as well as aspects of reproduction and exercise physiology. Not for biology concentration credit. BIOL 0060 should not be taken following BIOL 0800 or the equivalent.

BIOL 0080. Biotechnology Management.
An examination of the pharmaceutical, biotechnology, and medical product industries: what they are, how they function, whence they originate, and various perspectives on why some succeed and others fail. Pathways from lab-bench to marketplace are described as are the pervasive influences of the FDA, patent office, and courts. Extensive reading; emphasis on oral presentation. Primarily intended for students planning a career in biomedical industry. Not for biology concentration credit. Students MUST register for the lecture section and the conference. Enrollment limited to 20.

BIOL 0150A. Techniques and Analyses using DNA-Based Biotechnology.
Students will study and practice a range of methods used in molecular biology while examining the ways in which those tools are used in research and in the development of medical treatments. This experience, combined with the reading and discussion of selected papers from the primary literature, fosters development of a skill set critically important for the modern day biology student. Expected background: high school Biology course. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0150B. Statistical Computing for Biology.
Modern biological research is a data rich endeavor, necessitating strong quantitative and computational skills to interpret the results of experimental and observational studies. In this course we will explore the application of statistics and modeling in biological research and environmental science. Topics covered will include basic probability, experimental design, sampling, hypothesis testing and mathematical models for prediction. No prior statistics knowledge is assumed. Enrollment limited to 10 first year students and sophomores. Instructor permission required. This is a half-credit course. S/NC

BIOL 0150C. Methods for Extraction and Analyzing Secondary Metabolites of Medicinal Plants.
Plant secondary metabolites are currently the subject of much research interest when investigating new target compounds for potential medicine from natural products. New leads for drugs and phytomedicines from plants and plant parts have been increasing at a rapid rate especially by the pharmaceutical industry. Many plants have been selected and collected for their specific secondary compounds and healing powers by ethnobotanists in the field. The final step is the extraction, analyzing and identification of these plant specimens. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0150D. Techniques in Regenerative Medicine: Cells, Scaffolds and Staining.
Regenerative Medicine, also known as Tissue Engineering, is the process of creating living, functional tissues to repair or replace native tissue or organ functions that have been lost due to disease or congenital defects. As such, it is a prominent scientific discipline that can either "stand alone" or complement material-based research efforts in the areas of device design, drug delivery, diagnostics and pharmaceuticals. Students will develop proficiencies in basic cell culture techniques, early stage tissue regeneration strategies and histochimical characterization of mammalian cell constructs. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0170. Biotechnology in Medicine.
Introduces undergraduates to the main technological advances currently dominating the practice of medicine. Provides an overview of the objectives, techniques, and problems related to the application of biomedical technology to the diagnosis and treatment of disease and the contemporary health care industry. Topics include: pharmaceutical development and formulation; organ replacement by prosthesis and transplantation; medical imaging; tissue engineering, therapeutic cloning, regenerative medicine; stem cells; societal, economic, and ethical issues. This course does carry Biology concentration credit.

BIOL 0180. The Biology of AIDS.
AIDS represents an example of the vulnerability of humans to new infectious agents. We will review some human infectious diseases including small pox yellow fever and influenza, and then explore AIDS/HIV. First characterized in 1981, AIDS became the leading cause of death in U.S. males aged 25-44 within a decade. We will examine what factors make HIV such a potent pathogen. The course is intended for students beginning in biology. Expected: BIOL 0200, or equivalent placement. This course does carry Biology concentration credit.

BIOL 0190E. Botanical Roots of Modern Medicine.
This course will explore a variety of medicinal plants found throughout the world, the diverse cultures that use them in their daily lives and the scientific underpinnings of their medicinal uses. In conjunction with readings, students will gain a hands-on approach in lab, observing, identifying and growing these plants. Enrollment limited to: 20. Students MUST register for the lecture section and the lab.

BIOL 0190F. Darwinian Medicine.
Explores evolutionary explanations of why we get sick, and how this can shape, or misshape, our interpretations of medicine. Draws on evolutionary genetics, population biology, molecular biology and physiology. This course will build on evolutionary biology and then focus on disease processes such as infection, aging, cancer, allergy, diabetes, and obesity. Enrollment limited to 20 first year students. FYS

BIOL 0190H. Plants, Food, and People.
Examines the selection, breeding, cultivation and uses of food plants. Discusses the effects on agriculture of pathogens, climate change, and loss of biodiversity. Considers whether enough food can be produced for a world population of potentially 10 billion, while sustaining biodiversity and environmental quality. Course will include two papers and assistance from

Courses
Writing Fellows; feedback from first paper will be available when writing second paper. Enrollment limited to 40. LILE

We will examine how the pace and shape of scientific progress is affected by the social/cultural context and the "personality" of the individual. We will look into how the interplay between society and the individual affects how scientific theories arise, are presented, are debated and are accepted. The course will initially focus on Charles Darwin and his theory of Natural Selection using the biography of Adrian Desmond and James Moore, "Darwin: The Life of a Tormented Evolutionist." Enrollment limited to 20 first year students. FYS

BIOL 0190Q. Climate Change and Species Extinction.
In this course students will go beyond the headlines and delve into the science to explore the impact of climate change on species extinction. Students will explore the integration of science and technology through traditional textbooks, primary literature, open source databases, simulations, and discussions. Students will investigate the impact of climate change on species distribution, ecology, and behavior through interactive, inquiry-based, collaborative classroom investigations. Students will learn to integrate information from a variety of sources and disciplines and share their ideas through classroom discussion, written assignments, and oral presentations. Enrollment limited to 20 first year students. FYS

BIOL 0190R. Phage Hunters, Part I.
A research-based lab class for freshmen; both semesters are required in the sequence. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over winter break, and are annotated in the spring. One hour lecture, discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, and HS chemistry. Instructor permission required. Admittance based on review of applications in the first class. Limited to 20 freshmen. S/NC only. FYS

BIOL 0190S. Phage Hunters, Part II.
A research-based laboratory class for freshmen; both semesters are required. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over winter break, and are annotated in the spring. One hour lecture, discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, HS chemistry, and permission of the instructor. Students are expected to take both fall and spring courses in the sequence. Enrollment limited to 20 first year students. S/NC only. Instructor permission required. FYS

This course presents an integrated account of development, structure and function in plants, especially seed plants. Laboratory examination of plants will be correlated with lectures to follow development from the embryo to the mature plant, and to consider how genetics and environment affect processes such as germination, growth, functions of plant hormones and phytochrome, photosynthesis, uptake into plants and transport through plants, flowering, dormancy, and formation of flowers and fruit, etc. Offered in Semester I in alternate years beginning in 2013. Enrollment limited to 20 first year students. FYS WRIT

BIOL 0200. The Foundation of Living Systems.
A broad overview of biological systems, emphasizing patterns and processes that form the basis of life. Explores essentials of biochemistry, molecular, and cellular biology and their relationship to the larger issues of ecology, evolution, and development. Examines current research trends in biology and their influence on culture. Appropriate for all students interested in biology. Serves as a gateway course to much of the intermediate and advanced curriculum. Placement tests are offered (contact Jody_Hall@brown.edu); AP scores of 4 or 5 are equivalent to BIOL 0200, and place a student out of this course. Students will be assigned to a lab section during the second week of class.

BIOL 0280. Introductory Biochemistry.
Lectures and recitation sections explore the mechanisms involved in the principles of macromolecular structure and function, the organization and regulation of pathways for intermediary metabolism, and the transfer of information from genes to proteins. It is expected that students have taken CHEM 0350 or are taking it concurrently.

BIOL 0300. Endocrinology.
A basic examination of endocrinology with emphasis on hormone biosynthesis, mechanism of action, physiological roles, and endocrine pathology. Topics include: mechanism of action of steroid, amine, and peptide hormones; neuroendocrinology; reproductive endocrinology; and endocrinology of metabolism and calcium homeostasis. It is expected that students have taken BIOL 0200 (or equivalent) and CHEM 0350.

BIOL 0320. Vertebrate Embryology.
Introduction to the developmental anatomy of vertebrate embryos, including humans, in an evolutionary context, through lecture, discussion and microscope slide study. Gametogenesis through germ layers and their organ system derivatives. Expected: BIOL 0200, or equivalent placement, or AP Biology score of 4 or 5. Limited to 18 freshmen and 18 sophomores. Students MUST register for the lecture section and the lab.

BIOL 0380. The Ecology and Evolution of Infectious Disease.
We will survey the diverse biology of microbes responsible for human infectious disease, develop and apply ecological and evolutionary theory to infectious microbes, and provide practical experience interpreting and synthesizing the peer-reviewed scientific literature. The discovery of infectious microbes, the role of genetic novelty, population structure and transmission mode, and the influence of clinical therapies and host immune response will be considered. Evaluation will be based on preparation, participation, weekly student presentations, brief weekly written assignments, a midterm and a final. Expected: BIOL 0200 or equivalent. Enrollment limited to 25 first year students and sophomores. Instructor permission required. LILE

BIOL 0390. Vertebrate Evolution and Diversity.
An overview of vertebrate evolution that not only covers historical events, but also introduces various scientific concepts and modes of thought. Topics include pale and present biodiversity, convergent evolution, biogeography, competition, continental drift, climatic change over time, the notion of evolution as progress, and a whole-animal approach to understanding evolutionary events. Enrollment limited to 50. WRIT

Many questions about the workings of living creatures can be answered by joining math, physics, and biology. We will identify basic physical science concepts that help biologists understand the structure and function of animals, plants, and microorganisms, and use these to study how the physical world constrains and facilitates the evolution of the extraordinary design and diversity of organisms. For first and second year students; others by permission. Recommended background: BIOL 0200, or equivalent. Enrollment limited to 40. Instructor permission required.

BIOL 0410. Invertebrate Zoology.
A survey of invertebrate animals emphasizing evolutionary patterns and ecological relationships. Functional morphology, physiology, reproduction, development, and behavior of invertebrates will be examined. Laboratory exercises and two separate day-long field trips provide firsthand experience with the animals. Expected: BIOL 0200 or equivalent. Enrollment limited to 44. Students MUST register for the lecture section and a lab.

Course examines the diversity of microbial life in the environment. Surveys key services that microbes perform on land and sea, including biodegradation of contaminants in the environment and ecosystem processes related to climate change. Examines biological interactions of symbioses, quorum sensing, and antibiotic production in a ecological context. Explores the genomic mechanisms explaining physiological and life history strategies in microbes. Demonstrate knowledge of the diversity of microbes in the environment and benefits in an ecological and evolutionary context. Lecture based, two fieldtrips to expand appreciation for microbial ecology. BIOL 0200 or equivalent placement; CHEM 0330. Enrollment limited to 20 sophomores. WRIT
The principles, concepts, and controversies involved in the study of the distribution and abundance of plant and animal populations and their integration into natural communities. Emphasizes interactions among organisms and the hierarchical nature of ecological processes affecting individuals, populations, and communities. Expected: BIOL 0200 (or equivalent) and MATH 0900. Lectures and weekly discussion.

BIOL 0430. The Evolution of Plant Diversity.
Examines the evolutionary history of plants from a phylogenetic perspective. Introduces the science of phylogenetics - how to infer phylogenies and how to use them to understand organismal evolution. Highlights major trends in plant evolution over the past 400 million years. Lectures survey major plant lineages, with special focus on flowering plants. Weekly labs, field trips, and assignments stress basic plant anatomy and morphology, identification, and learning the local flora. Expected: BIOL 0200 (or equivalent placement). WRIT

BIOL 0440. Plant Organism.
This course focuses on what plants do and how they do it. Introduces the biology of plants, their growth and development, structural features, and their cellular and organismal responses to key stimuli. Examines physiological, reproductive and developmental strategies throughout the plant life cycle and in relation to environmental challenges. Discusses the significance of various plant model systems for genetic research and understanding of mechanisms controlling plant growth and development. Prerequisites: BIOL 0200 (or equivalent placement). Students MUST register for the lecture section and a lab.

BIOL 0470. Genetics.
Genetic phenomena at the molecular, cellular, organismal, and population levels. Topics include transmission of genes and chromosomes, mutation, structure and regulation of the expression of the genetic material, elements of genetic engineering, and evolutionary genetics. One laboratory session and one discussion session per week. (Students should not plan to take BIOL 0470 after 1540.) Expected: BIOL 0200 (or equivalent placement). Students will be assigned to Lab sections the first week of class.

How have fruit bats contributed to the emergence of Nipah virus in Malaysia? Is an infectious cancer going to drive the Tasmanian Devil to extinction? Will a warmer world be a sicker world? We will consider these and additional topics at the intersection of global change biology and infectious disease emergence in this course. The course should be of interest to pre-med, general biology, and public health concentrators looking for an interdisciplinary learning classroom experience. Conservation Medicine will satisfy the "Area 3" organismal biology concentration requirement for Biology and Human Biology. Expected background: BIOL 0200 or equivalent placement. Enrollment limited to 25 sophomores and juniors. Instructor permission required.

BIOL 0480. Evolutionary Biology.
A broad introduction to the patterns and processes of evolution at diverse levels of biological organization. Topics covered include natural selection, adaptation, speciation, systematics, macroevolution, mass extinction events, and human evolution. Weekly discussion sections involve debates on original research papers. Occasional problem sets involve computer exercises with population genetics and phylogeny reconstruction. Expected: BIOL 0200 (or equivalent placement).

BIOL 0495. Statistical Analysis of Biological Data.
A first course in probability distributions and the use of statistical methods for biological data. Topics covered will include describing data, statistical inference (hypothesis tests and confidence intervals), analyzing associations, and methods for categorical data (contingency tables and odds ratios). Methods will be applied to data drawn from areas of biological inquiry. For statistics or related science credit in Biology programs. Carries Lab credit. Expected background: BIOL 0200 or equivalent, math equivalent to MATH 0100. This course is for related science credit only in Biological Sciences concentration programs. Enrollment limited to 40 undergraduates.

BIOL 0500. Cell and Molecular Biology.
This course examines the structure and function of the basic unit of an organism, the cell. An experimental approach is used to examine cellular functions, ranging from gene transcription, cell division and protein secretion, to cell motility, and signal transduction. Relevance to health and disease will be considered. Expected: BIOL 0200 (or equivalent placement).

BIOL 0510. Introductory Microbiology.
Introduces role of microbes in our understanding of biology at the cellular and molecular level. Focuses on microbial significance for infectious disease, public health, genetics, biotechnology, and biogeochemical cycles. Laboratory involves basic microbiological techniques and selection and manipulation of microbes and their genes. Expected: BIOL 0200 (or equivalent placement); CHEM 0330. Students MUST register for the lecture section and the lab. Enrollment limited to 72. Students should email Samantha_Plouffe@brown.edu to get on the waitlist.

BIOL 0530. Principles of Immunology.
Introduction to experimental and theoretical foundations of immunology. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; regulation of immune responses through cellular interactions. Applications of concepts to medically significant issues (vaccines, transplantation, inflammation, autoimmunity, cancer, HIV/AIDS) are discussed. Interpretative analysis of experimental data is emphasized. Expected background: BIOL 0200 or equivalent placement.

BIOL 0800. Principles of Physiology.
Introduction to the function and integration of organ systems with an emphasis on human physiology. Includes basic concepts in cell and organ system physiology as well as fundamentals of modern trends in physiological science. Emphasizes the application of physical and chemical principles to organ function at both the cellular and systemic levels. Expected: BIOL 0200 or equivalent.

BIOL 0860. Diet and Chronic Disease.
This course addresses the relationship of food to the development and treatment of chronic diseases. Chronic diseases discussed are obesity, dyslipidemia/heart disease, diabetes mellitus, cancers and osteoporosis. Dietary recommendations for these diseases are critically assessed. Geared toward students interested in nutrition, medicine, and public health. Prerequisites: BIOL 0030 and 0800, plus permission of the instructor. Enrollment limited to 20.

BIOL 0920A. Controversies in Medicine.
Why and how do controversies in medicine emerge at specific moments in time? Why do scientists come to different conclusions based on the same data? Does it matter how we interpret controversies? This sophomore-level seminar critically analyzes contemporary controversies in medicine and public health. Using a case study approach, we will examine the social and political assumptions that inform important controversies. Questions related to the relationship between science, the media, activism, and health inequality will be woven into the case studies. Enrollment limited to 20. Instructor permission required. (For theme, not biology credit in Health and Human Health and Biology only.)

BIOL 0940A. Viral Epidemics.
This sophomore seminar will examine epidemics (outbreaks) of viral infections from a historical perspective. We will also cover current literature and up to the minute news accounts of infectious disease related outbreaks occurring around the globe. The major focus will be on virus related diseases but any microbial outbreak in the news will be explored. The seminar will cover basic aspects of microbial pathogenesis so students can gain an appreciation of microbial host interactions. Essential writing skills will also be developed. Enrollment limited to 20 sophomore students. WRIT S/NC

BIOL 0950B. Topics in Science Communications: Science Journalism Practicum.
Participants will understand how to read scientific research papers to interpret their findings and communicate these to a broader lay audience; analyze and understand best practices in science writing and the challenges of covering science for mass media; interviewing; fair
BIOL 0960. Independent Study in Science Writing. Incorporates a nontechnical science journalism component into the BioMed curriculum. A series of four to six specific assignments are recommended, based on topics derived from another biology course taken previously by the student, whose instructor has agreed to serve as a BIOL 0960 sponsor. Assignments may include, for example, investigative or analytical reviews, or feature articles on ethical or social impacts of new discoveries. The student and instructor schedule meetings to discuss topics and due dates, review rough drafts, and evaluate completed work. Not for concentration credit in the biological sciences programs. Written permission must be obtained from Dean M. Thompson prior to registering. Section numbers vary by instructor. Half credit.

BIOL 1050. Biology of the Eukaryotic Cell. Examines organelles and macromolecular complexes of eukaryotic cells with respect to structural and functional roles in major cellular activities. Emphasizes experimental basis for knowledge in modern cell biology using original literature, and discusses validity of current concepts. For advanced undergraduates and beginning graduate students. Complementary to BIOL 1270 and 1540. Prerequisites: BIOL 0280, 0470, 0500, or instructor permission. Graduate students register for BIOL 2050.

BIOL 1070. Biotechnology and Global Health. This course examines contemporary biotechnologies used to combat the predominant, worldwide problems in human health. Global health will be addressed from the scientific and engineering perspectives while integrating public health policy, health systems and economics, medical and research ethics, and technology regulation and management. This course is intended for graduate and advanced undergraduate students in biology, engineering, or related fields who have an interest in global health initiatives. Expected background: BIOL 0200 and BIOL 0800, or equivalents. Preference will be granted to graduate students in the Biotechnology and Biomedical Engineering programs. Only for related course credit in Biology, and for theme course credit in Health and Human Biology programs. Enrollment limited to 20. Instructor permission required.

BIOL 1090. Polymer Science for Biomaterials. Basic principles of polymer science and its application in medicine. Topics include basic polymerization chemistry, kinetics of polymerization and depolymerization with emphasis on biodegradable polymers, characterization of polymers by physical methods, bulk and surface properties, behavior of polymers in solutions, crystallization, gelation, and liquid crystals. Hands-on experience with polymer characterization. Expected: CHEM 0350. Enrollment limited to 40.

BIOL 1100. Cell Physiology and Biophysics. Current topics in cell physiology, with an emphasis on membrane-mediated interactions between cells and their environment. Topics may include: ion channel structure, function and regulation; intracellular regulatory molecules; mechanisms of sensory transduction; membrane receptors and second messenger systems; vesicle secretion; and cytoskeletal regulation of cell function. Lectures, discussion, and student presentations of the current literature. Expected: BIOL 0800 or NEUR 0010. Instructor permission required. Registration overrides will not be given out until after the first one or two classes. Enrollment limited to 30, and admission is based on seniority -- graduate students, seniors, then juniors (realistically, first and second-year undergrads have almost no chance of admission). A signup sheet will be passed around on the first day of class.

BIOL 1110. Topics in Signal Transduction. Signal transduction is one of the most rapidly developing fields in biomedical sciences. Defects in signaling pathways can be responsible for diseases such as cancer, diabetes, cardiovascular disorders and psychoses. This course offers students an overview of the molecular pathways that allow cells to receive and process signals from their external environment, with an emphasis on the emerging state-of-the-art techniques used in their study. Expected background: BIOL 0200, 0280, 0470, or 0500. Enrollment limited to 20 juniors and seniors. Instructor permission required.

BIOL 1120. Biomatials. A biomaterial is defined as a material suitable for use in medical implants that come in direct contact with patients’ tissues. These include polymers, metals, and ceramics, and materials obtained from biological sources or through recombinant biotechnology. Goal: to provide comprehensive coverage of biomaterial science and technology. Emphasizes the transition from replacement to repair strategies. For advanced undergraduates and graduate students. Prerequisite: BIOL 0800 or instructor permission.

BIOL 1140. Tissue Engineering. Tissue engineering is an interdisciplinary field that incorporates progress in cellular and molecular biology, biomaterials science, and engineering, to advance the goal of replacing or regenerating compromised tissue function. Using an integrative approach, we will examine tissue design and development, manipulation of the tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Expected: CHEM 0330, plus BIOL 0500 or 0800. Enrollment limited to 20. Instructor permission required.

BIOL 1150. Stem Cell Engineering. Stem cell engineering focuses on using adult, embryonic, and induced stem cells to repair damaged or diseased tissues. This course will examine the role of stem cells in development, tissue homeostasis, and wound healing, as well as how they are being applied in regenerative medicine. A lecture and discussion format for major topic areas. Students will receive hands-on training in how to isolate, culture, and differentiate adult stem cells in a laboratory setting. Expected: CHEM 0330 and BIOL 0500 or an equivalent course in cell biology or physiology. Cell culture experience highly recommended. Enrollment limited to 20. Instructor permission required.

BIOL 1160. Principles of Exercise Physiology. Application of the basic principles of physiology to the study of the response mechanisms of the human body during exercise. Topics include muscle and neural control, energy metabolism, cardiovascular and respiratory effects, endocrinology, principles of training, and special topics (e.g., diving, high altitude, and microgravity). Student presentations based on scientific articles are included. Expected: BIOL 0800 or written permission of the instructor.

BIOL 1180. Comparative Animal Physiology. Comparative approach to the function and regulation of animal systems with an emphasis on vertebrates. Topics include circulation, gas exchange, neuromuscular function, excretion, acid-base and ion regulation, and temperature regulation. Considers the unity and diversity of physiological processes in animals differing both in phylogeny and environmental adaptation. Original papers are discussed. Expected: BIOL 0800 or equivalent.

BIOL 1190. Synthetic Transmission and Plasticity. Synapses are the means by which the nervous system communicates. In this seminar-style course, we will explore the molecular and physiological underpinnings of synaptic transmission. We will then examine ways in which synapses can modulate their strength during development, learning, and other adaptive processes. Expected: BIOL 0800 or NEUR 1020. Enrollment limited to 20. Instructor’s permission required.

BIOL 1200. Protein Biophysics and Structure. Structural Biology is the science to determine 3-dimensional structures of biomacromolecules (i.e. proteins, RNA, and DNA). These structures enable biologists to understand and explore their function. Since proteins, RNA, and DNA are the primary molecules of life, structural biology enables us to understand and influence these molecular machineries which form the basis of all biological processes. Throughout the class, the students will see examples of biologically important proteins and protein complexes that will allow them to correlate structure and biological function. Prerequisite: BIOL 0280.

BIOL 1210. Synthetic Biological Systems. A multidisciplinary course that combines science and engineering providing a solid foundation in a cutting edge field of biological engineering. Synthetic biology is a mixture of biology, chemistry, engineering, genetic engineering and biophysics. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of...
biological parts, that fit together to form more complex systems. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level.

BIOL 1220. Synthetic Biological Systems in Theory and Practice. A multidisciplinary laboratory, lecture, and discussion based course that combines several areas of science and engineering providing a foundation in the cutting edge field of synthetic biological engineering. The field of synthetic biology is centered around trying to make biology easier to engineer. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts that fit together making complex systems. This course will combine classes, guest lectures and discussion lab visits to give students the best possible tools for understanding and applying research in synthetic biology. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level, and permission of the instructor.

BIOL 1260. Physiological Pharmacology. Covers the physiology of human disease (e.g., Heart failure and arrhythmia; cancer signaling pathways with a focus on breast cancer; neurological disorders such as schizophrenia and Parkinson’s disease) and discusses the pharmacology of the drugs used to treat disease. A group of the most commonly prescribed drugs is discussed in terms of their fundamental modes of action and clinical importance. Expected: BIOL 0800.

BIOL 1270. Advanced Biochemistry. An advanced course in biochemistry, biochemical methods, and reading of the primary literature, featuring systematic coverage of the biochemistry of the central dogma, including DNA (replication, repair, recombination), RNA (regulation and mechanism of transcription, processing, turnover), and proteins structure, synthesis, modification, degradation, mechanisms of action, function). Expected: BIOL 0280, CHEM 0350, 0360. Graduate students register for BIOL 2270.

BIOL 1290. Cancer Biology. Provides a conceptual understanding of molecular events underlying development of human cancer. Focused on genetic changes leading to malignant transformation of cells. Covers cell cycle control, DNA damage, mutagenesis, cancer predisposition syndromes, oncogenic viruses, tumor immunology, metastasis, cancer chemotherapy and drug resistance. Lecture plus discussion of primary literature. Prerequisites: BIOL 0280, 0470 or 0500.

BIOL 1310. Developmental Biology. Covers the molecular and cellular events of development from fertilized egg to adult. Genetic basis of body form, cell fate specification and differentiation, processes controlling morphogenesis, growth, stem cells and regeneration will be examined. Differential gene regulation, intercellular signaling and their evolutionary conservation will be central to discussion of mechanisms governing developmental processes. Additional topics: developmental plasticity, impact of epigenetic and environmental factors, and basis of disease gleaned from developmental biology research. Live embryos will complement and reinforce concepts covered in class. Enrollment limited to 36. Expected: BIOL 0200 (or equivalent), and one course in genetics, cell biology or embryology.

BIOL 1315. Developmental Neurogenetics. We will explore molecular and genetic mechanisms that control nervous system development. Included: state-of-the-art experimental approaches used to investigate nervous system patterning, neuronal cell fate decisions, diversification, and differentiation. Also covered: how neural circuits and synapses are established along with mechanisms of developmental brain disorders, how cellular reprogramming may be used to interrogate disease processes and cell-based therapies for treating neurological disease. The course relies on primary literature. Labs utilize live embryos and stem cells. Expected background: Basic courses in neuroscience, development, or genetics. For advanced undergraduates or grad students. Register for both the lecture and lab. Enrollment limited to 30.

BIOL 1330. Biology of Reproduction. This course is an advanced, seminar-based course. Primary literature is emphasized to complement the format of extensive student seminar presentations. It is essential that students have a strong background in biology in order to gain the most from this course. The emphasis of the course is student seminar presentation and extensive discussion on the material. This is often the first opportunity for students to present/ discuss science in a seminar format. Expected background: a course in Cell Biology (e.g. BIOL 0500 or 1050), and two additional Biology courses above the introductory (BIOL 0200) level. Enrollment limited to 20.

BIOL 1410. Evolutionary Genetics. This course will focus on selected topics in molecular population genetics, molecular evolution, and comparative genomics. Classic and current primary literature at the interface of evolution and genetics will be discussed in a seminar format. The laboratory involves wet-lab exercises (allozymes, PCR, RFLP, sequencing), plus computer labs using DNA analysis packages. Students will prepare a final grant proposal on specific research interests. Expected: BIOL 0470 or 0480. Students MUST register for the lecture section and the lab. Enrollment limited to 20.

BIOL 1420. Experimental Design in Ecology. An overview and discussion of the basic principles used to design lab and field experiments in ecology and environmental science. Topics include: replication and statistical power, appropriate use of factorial designs, nonparametric methods, post hoc texts, natural versus manipulative experiments, experimental artifacts and impact study design. Discussions based on primary literature and a new text. Expected: BIOL 0420.

BIOL 1425. Phylogenetic Biology. This course is the study of the evolutionary relationships between organisms, and the use of evolutionary relationships to understand other aspects of organism biology. This course will provide a detailed picture of the statistical, mathematical, and computational tools for building phylogenies and using them to study evolution. Enrollment is by instructor permission. Students will present scientific papers in class and complete a final project consisting of their own phylogenetic analysis. Expected Background: Evolutionary Biology and quantitative methods (such as statistics, computation, or math). Open to juniors, seniors, and graduate students. Enrollment limited to 16.

BIOL 1430. The Computational Theory of Molecular Evolution. This course employs intellectual traditions from computer science and biology to investigate the properties and principles of DNA sequence evolution. The roles of mutation, natural selection, population size and subdivision, and genetic recombination are explored. Lectures complemented by web-based computer exercises. Expected: either an introduction to evolution (BIOL 0200, 0480) or to computer science (CSCI 0150, 0160, 0170).

BIOL 1440. Marine Biology. An examination of current topics in the ecology of marine organisms and communities. Current literature and ideas are analyzed in a seminar format (5hr/week). A class research project provides hands-on experience with designing and interpreting experimental field work. Prerequisites: BIOL 0410 and 0420. Instructor’s permission required.

BIOL 1465. Human Population Genomics. An introduction to human genomics and the evolutionary forces that shape observed genetic variation across humans today. Topics will include the relationship among humans and other primates, human population genetics and genomics, and examples of the concomitant evolution of both cultural traits and domesticated organisms. Assignments include a class presentation and reviewing papers on a selected topic. Expected background: BIOL 0470 or 0480, and BIOL 0495, PHP 2500, or equivalent. Enrollment limited to 25. Instructor permission required.

BIOL 1470. Conservation Biology. Conservation Biology is the scientific study of the phenomena that affect the maintenance, loss, and restoration of biological diversity. Topics covered include: 1) the impacts of global warming, species invasions, and habitat destruction on biodiversity, 2) strategies developed to combat these threats, and 3) a consideration of key economic and ethical tradeoffs. Special attention will be paid to current debate and controversies within this rapidly emerging field of study. Readings will include the primary
BIOL 1475. Biogeography.
Will provide an overview of the field of biogeography—the study of geography of living organisms. Class meetings will be split between lectures and discussions. Each discussion will expose students to foundational papers, which set the context for the field’s development, and more recent papers, which show where the field is headed. Each student will conduct a short (but time consuming) original research project on some topic in biogeography. Prerequisites: BIOL 0420 and 0480. Expected: one taxonomy-based course (e.g., BIOL 0410, 0430, or 0460). Enrollment limited to 15 juniors, seniors, and graduate students. Instructor permission required.

BIOL 1480. Terrestrial Biogeochemistry and the Functioning of Ecosystems.
Three fundamental multidisciplinary questions will be addressed: How do ecosystems work? What limits the growth of life on Earth? How are humans altering the framework in which all life exists? Earth is basically a closed chemical system, and the reactions that support life are fueled by sunlight. But added to this chemistry and physics is the tremendous influence of life. Life created an oxygen atmosphere; the evolution of biological nitrogen fixation exponentially increased how many organisms could exist, and the soils that support human food production developed only by biologically-mediated processes. Throughout Earth’s 4.5 billion-year history changes in Earth’s basic biogeochemical processes have been fairly slow. Under our inattentive stewardship, we have almost instantaneously altered all of the major element cycles. We will focus heavily on what these changes mean for life on Earth. Instructor permission required.

BIOL 1500. Plant Physiological Ecology.
An in-depth look at plant ecological strategy, focusing on the anatomical and physiological adaptations of plants to particular environments. Additional topics include plant-animal interactions, historical biogeography, and community assembly processes. A comparative, phylogenetic approach is emphasized. Lectures present a broad overview of topics, and discussions focus on current outstanding problems. Lab exercises provide hands-on experience in designing experiments, measuring plant performance, and scientific writing. Required laboratory hours to be arranged by the instructor. Expected: BIOL 0430 or BIOL 0440. Enrollment limited to 15.

BIOL 1520. Innate Immunity.
Innate immunity is the initial response to microbes that prevents infection of the host. It acts within minutes to hours, allowing the development of the adaptive response in vertebrates. It is the sole mechanism of defense in invertebrates such as insects. The components and mechanisms dictating this response are explored. Prerequisite: BIOL 0530. Enrollment limited to 30. Graduate students must obtain instructor permission.

BIOL 1540. Molecular Genetics.
Covers advanced genetic and molecular methods and their use in analysis of complex biological phenomena such as development, signaling, behavior, and disease. Discusses how these techniques are applied in various organisms, with emphasis on the major Eukaryotic genetic model systems (Drosophila, nematodes, mouse, yeast, Arabidopsis) and on human genetics. Uses primary literature to analyze the design of forward– and reverse–genetic approaches to discover novel gene function. For advanced undergraduates and beginning graduate students. Prerequisite for undergraduates: BIOL 0470 or instructor permission. Expected background: any of BIOL 0280, 0500, 1050, or 1310. Graduate students must register for BIOL 2540.

BIOL 1550. Biology of Emerging Microbial Diseases.
Emerging diseases influence the health of human populations in less developed countries and are expected to have similar effects worldwide. Rising incidence of “new” diseases underscores the need for knowledge of infection mechanisms and their outcomes. Focuses on biochemical, genetic, cellular and immunological events of emerging pathogens and host responses. Expected: BIOL 0470 or BIOL 0630.

BIOL 1560. Virology.
Emphasizes the understanding of molecular mechanisms of viral pathogenesis. Begins with a general introduction to the field of virology and then focuses on the molecular biology of specific viruses that are associated with human disease. Lectures based on current literature. Prerequisite: BIOL 0280, 0470, or 0530, or instructor permission.

BIOL 1600. Development of Vaccines to Infectious Diseases.
Provides background on steps involved in vaccine development, from conceptualization to production to immunization. Considers infectious diseases and their associated vaccines in the context of community health. Appropriate for any student wanting to gain an understanding of vaccine science, and also provides a foundation for other advanced courses in immunology and infectious disease, biomedical research, or medical/graduate studies. Activities include an in-class presentation and a research paper on a topic chosen by the student. Prerequisites: BIOL 0530, plus one of the following: BIOL 0280, 0470, 0500 or 0510.

How and why do animals run, jump, swim and fly? Physiology, anatomy, ecology, and evolutionary history all influence, and are influenced by, the way animals move around. We will integrate analyses from many levels of biological organization - from molecular motors, through bone-muscle systems, to biogeography - with methods and approaches from mechanics, fluid dynamics, and robotics. Expected: BIOL 0800 and PHYS 0030. Instructor permission required.

BIOL 1820. Environmental Health and Disease.
Fundamental concepts relating to the adverse effects of chemical agents on human health. Topics include dose-response relationships, absorption, distribution, metabolism, excretion, mechanisms of toxicity, and the effects of selected environmental toxicants on organ systems. Many of these concepts will be reinforced through the use of a case-study approach where a pertinent environmental issue is incorporated into the ongoing lectures. Expected: BIOL 0500 and BIOL 0800, plus either ENVS 0490 or BIOL 0420.

BIOL 1850. Environmental and Genetic Toxicology.
Human disease is produced by complex interactions between inherited genetic predisposition and environmental exposures. These interactions will be explored at the molecular, cellular, and systemic levels. Prototype diseases will include hereditary disorders of hemoglobin, hypercholesterolemia, birth defects, and cancer. Expected: Cell Biology.

BIOL 1870. Techniques in Pathobiology.
A methodology course featuring laboratory and lecture instruction in established and leading-edge technologies. Examples: flow cytometry (multi-parameter analysis, cell sorting, DNA analysis, apoptosis analysis); molecular biology (PCR, in situ hybridization, southern blotting, cytogenetics, gene cloning, bioinformatics); digital imaging (image acquisition, processing and analysis); light microscopy (confocal, immuno-histochemistry); transmission electron microscopy (immuno/lectin/ enzyme cytochemistry); scanning electron microscopy (including x-ray microanalysis).

BIOL 1880. Comparative Biology of the Vertebrates.
The biology, structure, and evolutionary history of the vertebrates considered phylogenetically, emphasizing evolution of the major body systems. Stresses an evolutionary approach to the correlation of structure and function with environment and mode of life. Labs include dissection of several different vertebrates and comparative osteological material. Emphasis of course is on critical thinking rather than memorization of material. Recommended: BIOL 0320 or 0800. First year students must obtain instructor permission to register. Enrollment limited to 32. Students MUST register for the lecture section and the lab.

BIOL 1890. Human Histology.
A comprehensive study of the structure and function of human tissues and organs providing a foundation for the understanding of pathologic alterations. Relationships are drawn to aspects of development, growth, physiology, and gross anatomy. For Pfizer students only.

BIOL 1920B. Health Inequality in Historical Perspective.
This seminar course takes a historical perspective to explore the fundamental causes of health inequality in the US. We will draw on a
series of case studies from the 19th century to the present to examine the socio-political and economic context of health and disease, focusing specifically on how race, class, and gender shape the experience of health, notions of disease causality, and public health responses. Topics include the health consequences of immigration, incarceration, race-based medicine, the Chicago heat wave, and Katrina. BIOL 0200 and previous course work in African Studies and/or Science and Technology Studies preferred. Enrollment is restricted to second and third year students and is limited to 20 students. Written permission required. An application for entry will be distributed on the first day of class. Not for concentration credit as a biology course.

BIOL 1920C. Social Contexts of Disease.
What shapes our understandings of disease, and what makes a disease real? How might we explain the demise of formerly prevalent diseases and the arrival of others? How do politics, technologies, and institutions affect conceptions of disease and structure their treatment? Will examine the impact of social context on patients’ experiences of disease, including clinical, scientific, and public health approaches. Will consider disease in relation to social relationships, power of the state to regulate disease, and cultural care of the body. Enrollment limited to 20 students; instructor permission required; serves as Capstone in Health and Human Biology. Not for concentration credit.

BIOL 1920D. Race, Difference and Biomedical Research: Historical Considerations.
Course examines the debate over race, health, and genetics in historical context. An overarching goal is to understand how the social world informs the scientific questions, the design of research studies, and the interpretation of findings. How have the theories and practices of biomedical science and technology produced knowledge of "race" and racial difference historically? How does race relate to gender and class? What are the implications for understanding health inequality? Previous course work in biomedical science, history of science, science and technology studies, and Africana Studies preferred. For advanced undergraduate and graduate students. Instructor permission required. Enrollment limited to 20. WRIT

BIOL 1941A. Plants in a Changing Planet.
Plants are the foundation of Earth’s ecosystems and essential to human survival and civilization. This seminar will examine the physiological, ecological, and evolutionary responses of plants to rapid environmental change, and the consequences for agriculture and the structure and function of natural systems. Expected background: at least one of the following courses - BIOL 0420, 0430, 0440, 0480, or ENVS 0490.

BIOL 1941E. Biotechnology and Global Health.
This course examines contemporary biotechnologies used to combat the predominant, worldwide problems in human health. Global health will be addressed from the scientific and engineering perspectives while integrating public health policy, health systems and economics, medical and research ethics, and technology regulation and management. This course is intended for graduate and advanced undergraduate students in biology, engineering, or related fields who have an interest in global health initiatives. Expected background: BIOL 0200 and BIOL 0800, or equivalents. Preference will be granted to graduate students in the Biotechnology and Biomedical Engineering programs. Enrollment limited to 20. Instructor permission required.

Directed research/independent study in biological sciences: basic science, social studies of biomedical science, and clinically-oriented projects, mentored by individual faculty members in the Division of Biology and Medicine. Sites include campus and hospital based facilities. Information on specific opportunities with BioMed faculty is found in an online research database maintained at biology.brown.edu/bug/pages/research.html. Basic science projects are suited for Biological Sciences programs; clinical, behavioral, and human subject-based projects for Health/Human Biology programs, along with opportunities for projects dealing with social studies of biological science and health. Projects can serve as the basis for Honors theses, or to fulfill research requirements in a Bio-Med concentration program; non-concentrators are also welcome. The Honors process is described here: Biology.brown.edu/bug/honors

(Nota: Faculty from outside the Division may supervise projects, with advisor’s approval, for bio-med program concentrators, but should do so using their Department’s own Independent Study course number.)

REGISTRATION requires an agreement and research plan between faculty mentor and student, including a formal, written proposal. The proposal (available at the site biology.brown.edu/bug/ugres) must be submitted to Dean Marjorie Thompson (Rm. 124 Arnold) for review and approval, then an override for registration is issued to the student. Most students do not preregister, but add this course at the start of the semester of the planned project. Required: A completed proposal form, sponsor’s and concentration advisor’s approval.

No more than two (2) semesters of BIOL 1950/1960 may be used toward a concentration program in the biological sciences.

Please see description for BIOL 1950.

BIOL XLIST. Courses of Interest to Biology Concentrators.
Fall 2013
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Environmental Studies
ENVS 0455 Coastal Ecology and Conservation
ENVS 0490 Environmental Science in a Changing World

Biology (Graduate)

Associate Dean of Biology and Chair
Edward Hawrot

Associate Dean of Graduate and Postdoctoral Studies
Elizabeth O. Harrington

Graduate Biological Sciences Education

The Division of Biology and Medicine offers multiple programs of advanced graduate study leading to the degrees of A.M., Sc.M., and Ph.D. These programs are thematically based: Biotechnology; Molecular Biology, Cell Biology, and Biochemistry; Molecular Pharmacology and Physiology; Pathobiology; Ecology and Evolutionary Biology; Computational Biology; Neuroscience; and Biomedical Engineering.

The research network at Brown features advanced facilities situated on campus and at partner institutions which encourages discovery and innovation with state-of-the-art equipment and resources, including: Genomics Core (http://www.brown.edu/Research/CGP/core/equipment) and Proteomics Facility (http://biomed.brown.edu/epscor_proteomics), Bioimaging facility (http://www.brown.edu/Facilities/Leduc_Bioimaging_Facility), Mouse Transgenic and Knockout Core (http://www.brown.edu/Departments/Molecular_Biology/transgenic), Animal Care Facilities (http://biomed.brown.edu/ancares), Plant Environmental Center (http://www.brown.edu/Departments/EEB/research/morphology.htm), RI BioBank (http://biomed.brown.edu/rhode-island-biobank), Molecular Pathology Core (http://brown.edu/Research/SPR/coreD.shtml). More information about the Division’s Research Facilities can be found here: http://biomed.brown.edu/research/facilities.

Students entering graduate programs generally have appropriate preparatory course work as well as significant research experience. Courses are chosen with the advice of program counselors, and may include, in addition to divisional offerings, courses offered by other university departments. As a part of the doctoral training most students will be required to participate in the teaching of one or more courses related to the program.

For further information on Graduate Study in the Biological Sciences at Brown, please visit the Office of Graduate and Postdoctoral Studies website: http://biomed.brown.edu/grad-postdoc/
Biotechnology Graduate Program

Brown University offers Master of Science (Sc.M.), Master of Arts (A.M.) and Doctor of Philosophy (Ph.D.) degrees in Biotechnology. The graduate program is designed for students with degrees in basic sciences such as biology, chemistry, biophysics, physics, mathematics, or material sciences that seek additional education and training in the biological sciences. The program is particularly directed towards students without an engineering degree.

Topics of research include: nanomedicine; neurotechnology; functional imaging; cardiovascular research; stem cell technology; biomaterials for cell and tissue growth; nanotechnology; drug and gene delivery; pharmaceutical technology; cancer; tissue engineering and drug discovery.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biotechnology-0

Ecology and Evolutionary Biology Graduate Program

The graduate program in Ecology and Evolutionary Biology is intended for highly qualified students who plan to pursue a career that includes research or teaching in ecology and/or evolutionary biology. Admission to graduate study is open to candidates for the Ph.D. degree. Individual programs are designed to meet each student's needs and interests while providing a strong background in ecology, evolutionary biology and related disciplines. All students are expected to attain proficiency in ecological and evolutionary theory, quantitative research methods, statistical analysis, writing, and oral presentation. Depending on the student's interests, they may be expected to demonstrate proficiency in other areas such as functional morphology or genetics and genomics. This proficiency may be attained through coursework, seminars, independent reading, and laboratory and field programs.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-ecology-and-evolutionary-biology

Pathobiology Graduate Program

The graduate program in Pathobiology is an interdepartmental and interdepartmental program leading to the Doctor of Philosophy (Ph.D.) degree. The program is devoted to biomedical research into the mechanisms of human diseases. The four major research and teaching thematic areas are: I) Toxicology & Environmental Pathology, II) Immunology & Infectious Diseases, III) Aging, and IV) Cancer biology. Training may be obtained in the areas of immunopathology, pulmonary pathology, chemical pathology, environmental and viral carcinogenesis, cancer biology, toxicologic pathology, extracellular matrix biology, hepatology, aging, and infectious diseases.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-pathobiology

Molecular Biology, Cell Biology, and Biochemistry Graduate Program

The graduate program in Molecular Biology, Cell biology, and Biochemistry (MCB) is intended for highly qualified students who plan to pursue a career which includes research in biology or medical sciences. The MCB Program offers a Doctor of Philosophy (Ph.D.) degree as well as 5th Year Master of Arts (A.M.) and Master of Science (Sc.M.) degrees. The program is interdisciplinary, focusing on molecular and cellular aspects of developmental biology, genetics, genomics and gene expression, signal transduction, oncogenesis, immunology, protein biochemistry, structural biology, proteomics, cell surface receptors, molecular modeling, DNA/RNA protein interactions, epigenetics, and virology.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-molecular-biology-cell-biology-and-biochemistry

Molecular Pharmacology and Physiology Graduate Program

The graduate program in Molecular Pharmacology and Physiology offers advanced training appropriate for academic and research careers in the fields of biology and medical sciences that include molecular and structural pharmacology; neuropharmacology; cellular, comparative, and organ systems physiology; and chemical biology. Programs of study and research are developed individually in consultation with the student’s adviser and advisory committee and are designed to ensure expertise in the student’s principal field. Admission is ordinarily limited to applicants for the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-molecular-pharmacology-and-physiology

Biomedical Engineering Graduate Program

The Biomedical Engineering (BME) program provides cutting-edge, interdisciplinary, graduate-level education at the interface of engineering, biology, and medicine. The program features an interdisciplinary approach in four complementary research areas: I) repair and regenerative medicine, II) neuro-engineering, III) motion sciences/biomechanics and IV) biomedical devices and imaging. Research in these areas is advancing the understanding of fundamental problems in engineering, biology and medicine, while developing new therapies to improve the quality of life for people with medical problems. The program is distinguished by its quantitative rigor and strong collaborative connections between academic science, clinical medicine, and industry. The BME graduate program is designed for students with backgrounds in physics, mathematics, or engineering that seek additional education and training in the biological sciences.

The Biomedical Engineering program offers both the Master of Science (Sc.M) degree and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomedical-engineering

Courses

BIOL 2010. Quantitative Approaches to Biology

Graduate level introduction to quantitative and computational methods in modern biology. Topics include Programming, Modeling, Algorithms, Bioinformatics, Applied Statistics, Structural Biology, Molecular Dynamics, Enzyme Kinetics, and Population and Quantitative Human Genetics. Preference is given to graduate students in Molecular Biology, Cell Biology and Biochemistry and Molecular Pharmacology, Physiology, and Biotechnology. Limited to 20 students. Instructor permission required.

BIOL 2030. Foundations for Advanced Study in the Life Sciences

A double-credit graduate course on multidisciplinary experimental approaches to biological questions. Focusing on primary literature, lectures and discussions cover the mechanisms and regulation of basic cellular processes involving nucleic acids (synthesis, structure, maintenance and transmission) and proteins (synthesis, maturation, function) and their integration into more complex circuits (signaling, organelle biogenesis and inheritance, cell cycle control). Discussion section is required. Required for PhD students in the MCB Graduate Program; all others must obtain instructor permission. Enrollment is limited to graduate students.
BIOL 2050. Biology of the Eukaryotic Cell. (Undergraduate students should register for BIOL 1050.)

BIOL 2060. Ultrastructure/Bioimaging.
This course examines microscopy and image analysis in the life sciences. Theoretical and practical aspects of microscopy will be discussed. Students will obtain hands-on experience with electron microscopy, light microscopy, fluorescence microscopy, and confocal microscopy. Students will learn to display images in 3D. For graduate students and advanced undergraduates. Instructor permission required.

BIOL 2110. Drug and Gene Delivery.
Topics in drug delivery systems including history of the field, advantages of controlled release technology, stabilization and release of proteins, fabrication methods, regulatory considerations, economic aspects, patents and intellectual property rights, and more. Prepares students for research in industry and academia, and offers information for consultants in the field. Expected: BIOL 1090, 1120; CHEM 0350, 0360.

BIOL 2130. Techniques in Molecular and Cell Science.
This course provides hands-on laboratory training in state-of-the-art techniques in molecular and cellular sciences, and reinforces this training with didactic lectures that stress key principles, the quantitative approach and the most exciting applications of these technologies in the context of current research. Areas covered include cell culture, tissue engineering, DNA cloning, gene therapy, quantitative assays, microscopy and image analysis. Enrollment is limited to 12; written permission required. Permission will be granted after the first class. Students MUST register for the lecture section and a lab.

BIOL 2135. Pharmacokinetics and Drug Design.
Consists of the absorption, distribution, metabolism, and elimination of drugs. These factors, including dosage, determine the concentration of drugs at its sites of action, and intensity of effects. Will examine models describing the relationship between plasma drug concentrations and therapeutic drug effect. Will acquire biologic sampling techniques, analytic methods for measurement of drugs and metabolites, and procedures facilitating data used in designing drugs and dosage regimens. Prerequisite: BIOL 0800 or equivalent. Enrollment limited to 20. Preference given to graduate students in Biotechnology and BME, especially Masters students. Graduate students (PhD and ScM) from other programs enroll if permission of instructor is granted.

BIOL 2140. Principles in Experimental Surgery.
An introduction to the principles and practice of surgery, sterile technique, anesthesia, and laboratory animal care. Intended to provide highly supervised, hands-on experience in techniques for humane handling and surgical management of experimental animal subjects. Emphasizes surgical technique, anesthesia technique, and laboratory animal medicine. Prerequisite: BIOL 0800. Limited to five (5) Graduate students only. Instructor permission required. Students MUST register for the lecture section and the lab.

BIOL 2145. Molecular Targets of Drug Discovery.
This course emphasizes the role of cell physiology in the identification of drug targets and the development of novel drugs. Specific protein drug targets such as G-protein coupled receptors will be examined in detail from identifying a target to development of drugs for that target and the physiological consequences. Prerequisite: BIOL 0800. Enrollment limited to 20. Preference is given to graduate students in Biotechnology and BME, especially Masters students. Graduate students from other programs may enroll if permission of the instructor is granted.

Focused on the effective dissemination of scientific information. Through practical examples of activities common to the profession (writing a grant proposal, presenting research work orally, and preparing a critical review of a submitted scientific manuscript), students will develop the skills necessary to effectively communicate scientific ideas, experiments and results. Each of the activities will be dissected into key sets that will be individually developed with the aid of interactive discussions and peer review. Enrollment limited to 12 graduate students.

BIOL 2155. Special Topics in Biotechnology Writing.
This is the first course in a two semester sequence that continues with BIOL 2156. It is intended for ScM students (Biotechnology) who are not doing lab-based research. Students choose from a list of topics and faculty mentors in the field biotechnology. Students conduct in-depth research and writing with the goal of producing a final report and presentation equivalent to a professional consultant’s report and worthy of a ScM thesis. Students meet once per week with mentors to monitor progress plus weekly for background lectures relevant to all projects. Prerequisite: BIOL 0280 and 1120; CHEM 0350/0360 or equivalent. Enrollment limited to 20.

BIOL 2156. Special Topics in Biotechnology Writing.
This is the second semester of a two semester course open to Biotechnology Masters students not involved in lab-based research. Students choose from a list of topics and faculty mentors provided in the field biotechnology. Teams conduct in-depth research and writing, with the goal of producing a final report and presentation equivalent to a professional consultant’s report and worthy of a masters thesis. Students meet once per week with a mentor to monitor progress. All teams meet weekly for background lectures. With permission of instructor and Director of Biotechnology Graduate Program required. Prerequisite: BIOL 0280 and 1120; CHEM 0350/0360 or equivalent. Enrollment limited to 20 students.

This course will cover principles and practical applications of important analytical tools used in the field of Biotechnology. Topics covered include spectroscopy, chromatography, and physical and chemical methods of characterization of a variety of molecules used for therapeutic applications. The molecules will range in size from traditional drugs with molecular weights of less than 1000, peptides and proteins as well as siRNA and industrial polymers. This course is suitable for students intending on pursuing a career in biomedical research in academia or industry. Prerequisites: BIOL 0280, BIOL 1120, CHEM 0350/0360, or equivalent course. Enrollment limited to 20 Masters students in Biotechnology and BME.

BIOL 2170. Molecular Pharmacology and Physiology.
Fundamental concepts in pharmacology and physiology from the cellular/molecular level to organ systems. Required of first-year graduate students in Molecular Pharmacology and Physiology.

BIOL 2200A. Molecular Biology and Chemistry.
A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission. Enrollment limited to 20.

BIOL 2200B. Post–Transcriptional Regulations of Gene Expression.
Enrollment limited to 20.

BIOL 2200C. Central Dogma and Structural Biology.
A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission.

BIOL 2200D. Current Topics in Biochemistry: Biochemical Genomics.
A critical evaluation of current research in biochemistry and molecular biology focusing on the mechanism and regulation of transcription. Intensive reading, critical analysis, and discussion of the relevant literature in the context of student presentations in seminars. Advanced undergraduates with permission of the instructor. Enrollment limited to 20 students. Instructor permission required.

BIOL 2210A. Molecular Mechanisms in Site–Specific Recombination and DNA Transposition.
Enrollment limited to 20.

BIOL 2210B. Ribosomes: Molecular Mechanisms in Ribosome Synthesis and Function.
Protein synthesis is a fundamental cellular process mediated by ribosomes. Rapid advances in the study of ribosomes have culminated in its x-ray crystal structure for which the Nobel prize was awarded. This course will focus on progress in understanding: ribosome structure and function, ribosome biogenesis and export, quality control, ribosome degradation, and interface of ribosomes with other cellular pathways (cell cycle, etc). Topics will be explored using the current literature with
Biological processes are studied across different scales, from the intricate details of cellular mechanisms to the evolutionary processes that shape organisms. This course will explore the molecular and cellular mechanisms underlying biological processes, with a focus on understanding how genes and their products give rise to the diverse structures and functions observed at all levels of biological organization.

**Biological Signaling**
- **Biological Signaling:** This course will cover the fundamental principles of signal transduction, including the role of receptors, second messengers, and intracellular signaling pathways. Students will learn how signals are generated and transmitted within cells, and how these signals regulate cellular processes.
- **RNA World:** Recent evidence suggests that RNA molecules played a critical role in the origin of life. This course will explore the role of RNAs in cellular processes, including their role in regulating gene expression and protein synthesis.

**Ribosome and Protein Synthesis**
- **Ribosome:** The ribosome is a fundamental cellular machine responsible for translating genetic information into protein. This course will cover the structure and function of the ribosome, including its role in the initiation, elongation, and termination of protein synthesis.
- **Protein Synthesis:** This course will cover the basic principles of protein synthesis, including the role of messenger RNA, transfer RNA, and ribosomes. Students will learn about the fundamental mechanisms of protein synthesis and how they are conserved across all organisms.

**Developmental Biology**
- **Developmental Biology:** This course will cover the molecular and cellular mechanisms underlying development, including gene expression, cell fate specification, and morphogenesis. Students will learn about the role of signaling molecules and transcription factors in regulating development.

**Aging and Disease**
- **Aging and Disease:** This course will explore the molecular mechanisms underlying aging, including the role of cellular senescence, DNA damage, and telomere shortening. Students will learn about the genetic and environmental factors that contribute to aging and the implications for disease.

**Biomedical Engineering and Biotechnology**
- **Biomedical Engineering and Biotechnology:** This seminar course will provide a broad introduction to the latest developments in biomedical engineering and biotechnology. Students will learn about the design and development of medical devices, drug delivery systems, and biotechnological tools.

**Neurogenetics**
- **Neurogenetics:** This course will cover the genetic basis of human diseases, including neurodevelopmental disorders, neurodegenerative diseases, and psychiatric disorders. Students will learn about the role of genetic mutations in disease and the potential for genetic therapies.

**Pathogens and Host Interaction**
- **Pathogens and Host Interaction:** This course will cover the molecular mechanisms underlying host-pathogen interactions, including the role of pathogen virulence factors and host defenses. Students will learn about the fundamental principles of host-pathogen interactions and the implications for disease.

The course will involve a combination of lectures, seminars, and research projects. Students will be required to present their research findings and participate in class discussions. The course will culminate with a final research project, which will involve a comprehensive literature review and the development of a research proposal. This course is suitable for undergraduate and graduate students interested in pursuing careers in biological sciences, biotechnology, or related fields.
nature. Lectures and presentations are based on reading of the primary and secondary literature.

**BIOL 2320E. Genetic Control of Cell Fate Decisions**
A cells fate is acquired in a process whereby largely uncommitted progenitor cells are instructed down a commitment path that ultimately results in a specific cell type with distinct molecular and physiological properties. This process is critical for the establishment of all cell types and tissues and is poised to be a critical topic in cell-based therapeutic strategies. We will investigate the intrinsic and extrinsic mechanisms that manifest at the genetic level to impart cell fate decisions on progenitors. Advanced undergraduates with permission of the instructor.

**BIOL 2330B. Current Topics in Developmental Biology: Design the Ultimate Bio-Energy Crop.**
Can we replace oil wells with corn fields? Join us (Profs. Sam Beale and Mark Johnson) for a thought experiment where we consider the limitations for using plants as energy sources and try to come up with strategies to overcome them. Developmental Biology Questions: What are the developmental pathways that control leaf shape and size? What are the developmental pathways that control CO2 uptake? Biochemical Questions: What are biochemical limits of photosynthetic carbon fixation? Can the chemical composition of plants be modified to yield more efficient plant fuel sources?

**BIOL 2330C. To Be Determined.**

**BIOL 2340. Neurogenetics and Disease.**
Genetic mutations provide a powerful approach to dissect complex biologic problems. We will focus on fascinating discoveries from "forward genetic" studies – moving from nervous system phenotype to genetic mutation discovery. There will be an emphasis of neurologic disease phenotypes and the use of novel genomic methods to elucidate the central molecular and cellular causes for these conditions. The course will emphasize the use of "reverse genetics" – engineered mutations in model systems – to dissect nervous system function and disease mechanisms. Disorders to be covered include autism, intellectual disability, schizophrenia, epilepsy. Enrollment limited to 20. Instructor permission required.

**BIOL 2350. The Biology of Aging.**
Studying the mechanisms underlying the process of aging promises to be one of the next frontiers in biomedical science. Understanding the biology of aging is important for the long-term possibility of increasing life span, and for the immediate benefits it will have on age-related diseases. As demographics of industrialized countries have changed, age-related diseases such as cancer/cardiovascular/stroke, osteoporosis/arthritis/Alzheimer’s have assumed epidemic proportions. Understanding the aging process is a pre-requisite for designing interventions for treatment. Focus is on examining the biology of aging through the examination of a molecular/cellular/genetic and demographic nature. Suggested prerequisites: BIOL 0200, 0280, 0470, 0800. Enrollment limited to 20. Advanced undergraduates with permission of instructor.

**BIOL 2430. Topics in Ecology and Evolutionary Biology.**
Current literature in ecology, behavior, and evolutionary biology is discussed in seminar format. Topics and instructors change each semester. Representative topics have included: structuring of communities, biomechanics, coevolution, quantitative genetics, life history strategies, and units of selection. Expected: courses in advanced ecology and genetics.

**BIOL 2440. Topics in Ecology and Evolutionary Biology.**
See Topics In Ecology And Evolutionary Biology (BIOL 2430) for course description.

**BIOL 2450. Exchange Scholar Program.**

**BIOL 2480B. Dissection of Genetic and Molecular Mechanisms.**
The transfer of traits from one individual to another is a fundamental process in biology. In this course, we will explore the diversity of molecular mechanisms underlying phenotypic inheritance through a critical evaluation of primary literature, with special emphasis on the design and implementation of novel strategies to study these processes. For graduate students and advanced undergraduates with a strong background in genetics. Expected: BIOL 0470 and BIOL 1540. Written permission required for undergraduates.

**BIOL 2480C. DNA Replication, Recombination and Repair.**
Emphasizes critical reading and discussion of the primary literature as it relates to DNA transactions such as DNA replication and recombination in prokaryotic and eukaryotic cells. Class participation and oral presentations will be required and the basis for course grade determination. Topics of discussion will cover diverse model systems and may include: Epigenetic Regulation Via Chromatin Remodeling and Modification; Mechanisms of DNA Replication, Recombination and Repair; Transcriptional Regulation; Structural Basis of Epigenetic Regulation; RNA interference and antiviral therapeutics; Trinucleotide Repeat Expansions and Neurological Disease; and Mechanisms of Vertebrate Development. The course is open to graduate students; advanced undergraduates with permission of the instructor. Class will meet one, three hour period per week; to be arranged.

**BIOL 2480D. Molecular Neurogenetics.**
Enrollment limited to 20. Instructor permission required.

**BIOL 2490A. Nuclear Hormone Receptors in Growth, Differentiation and Disease.**
Key developmental and homeostatic hormones such as steroid hormones (e.g. estrogen, testosterone, glucocorticoids), and lipophilic non-steroids (e.g. retinoid, thyroid hormone) act through receptors that directly bind DNA and control gene expression. This course examines the activities, structures, functions, and mechanisms of action of these Nuclear Hormone Receptors and the consequences of alterations in protein or hormone function. Approaches span genetics, biochemistry, genomics, proteomics, and developmental biology.

**BIOL 2490B. To Be Determined.**

**BIOL 2540. Molecular Genetics.**
(Undergraduate students should register for BIOL 1540.)

**BIOL 2640A. Viral Immunology.**
Viral Immunology is an advanced topics course in Microbiology and Immunology which will be focused on viral immunology. Weekly meetings will cover different issues concerning defense against viral infections and pathology related to viral infection, with focus on viral-host interactions. Topics will be selected to present either important basic concepts in the context of immune responses and/or major challenges in controlling viral infections. Recent advances in understanding virus-host interactions, host responses to viruses, cytokine regulation of immune responses or cytokine-mediated pathology during viral infections will be emphasized.

**BIOL 2640B. Microbial Pathogenesis.**
Examines microbial pathogens and the underlying mechanisms by which infectious organisms cause diseases. Bacterial, fungal, protozoal and viral pathogens will be studied using tools of modern biology. Also examined are the host’s immune responses to infection and disease. Areas covered include mechanisms of pathogen internationalization and survival, immune responses, signal transduction and pathophysiology. Expected: BIOL 0510, 0530, or 1550.

**BIOL 2640C. The Immune System.**
Introduction to the experimental and theoretical foundations of immunology and the function of the mammalian immune system. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; and regulation of immune responses through cellular interactions. Application of concepts to medically significant issues (vaccines, transplantation, hypersensitivity, autoimmunity, cancer, immunodeficiency) is discussed. Interpretative analysis of experimental data is emphasized. Activities include written assignments that analyze a hypothetical immune system and a final paper addressing an immunological topic of the student’s choosing. For Pfister students only.

**BIOL 2850. Introduction to Research in Pathobiology.**
Introduces incoming pathobiology graduate students with research opportunities in the laboratories of program faculty. Consists of seminars with individual faculty members in the graduate program in pathobiology. Required background reading of recent papers lead to a discussion of current research in the faculty member’s laboratory. Additional discussions
include safety and ethical issues in research. Open only to first-year graduate students in the program in pathobiology.

**Biol 2860. Molecular Mechanisms of Disease.**
This course is designed for Pathobiology Graduate Program students and requires an understanding of modern biochemistry and cell and molecular biology. Topics include cell injury and adaptation, inflammation, wound healing, thrombosis and vascular disease, carcinogenesis and environmental toxicology. Wilson's disease will be a focus of discussion throughout the course. Both research articles and a text will be used. Practical sessions will be scheduled to introduce various laboratory tools, including microscopy. The course will emphasize the development of presentation skills and research design, in the context of the tools and knowledge base critical to modern interdisciplinary research into mechanisms of disease. Undergraduates require instructor permission.

**Biol 2940A. Molecular Pharmacology and Physiology Seminar.**
Professional development seminar required of all first-year graduate students in the Molecular Pharmacology and Physiology Graduate Program, and open to graduate students in other programs. Topics include grants and funding, effective oral presentation skills, alternative careers in science, and others. All students will be required to present a research seminar during the scheduled class time. Instructor permission required for graduate students outside the Molecular Pharmacology and Physiology Graduate Program. Not intended for undergraduate students.

**Biol 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**Biol 2980. Graduate Independent Study.**
Independent study projects at the graduate level. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**Biol 2985. Graduate Seminar.**
Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

**Biol 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**Biol 2995. Thesis.**
Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

---

**Neuroscience**

**Chair**
Barry William Connors

Neuroscience is the scientific study of the nervous system, including its development, functions, and pathologies. It is an interdisciplinary field that encompasses neurobiology (anatomy, physiology, biochemistry, molecular biology, genetics), elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. The Department of Neuroscience offers a graduate concentration leading to the Sc.B. degree and a graduate program leading to the Ph.D. degree. These programs include courses offered by the department and by several allied departments. The Department of Neuroscience has modern facilities for conducting research in a broad range of areas from molecular mechanisms to behavior and undergraduate students are encouraged to pursue research projects.

For additional information, please visit: http://neuroscience.brown.edu/

**Neuroscience Concentration Requirements**

Neuroscience is an interdisciplinary field that seeks to understand the functions and diseases of the nervous system. It draws on knowledge from neurobiology as well as elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. Through the Neuroscience concentration, students develop foundational knowledge through courses in biology, chemistry, and mathematics as well as three core courses in neuroscience. They are also required to develop facility with research methodologies (through courses in statistics and laboratory methods) before moving into specific topics in the field (e.g., visual physiology, neurochemistry and behavior, and synaptic transmission and plasticity). Members of the Neuroscience faculty are affiliated with the Brown Institute for Brain Science, a multidisciplinary program that promotes collaborative research about the brain. Prospective concentrators should contact Heather_Shalvey@brown.edu in order to have a faculty advisor assigned to them.

**Standard program for the Sc.B. degree**

The concentration combines a general science background with a number of specific courses devoted to the cellular, molecular, and integrative functions of the nervous system. The concentration allows considerable flexibility for students to tailor a program to their individual interests. Elective courses focus on a variety of areas including molecular mechanisms, cellular function, sensory and motor systems, neuropharmacology, learning and memory, animal behavior, cognitive function, bioengineering, theoretical neuroscience and computer modeling.

The concentration in neuroscience leads to an Sc.B. degree. The following background courses, or their equivalent, are required for the degree:

**Neuroscience Graduate Program**

The graduate program in Neuroscience offers graduate study leading to the Doctor of Philosophy (Ph.D.) degree. The program is designed to educate and train scientists who will become leaders in the field and contribute to society through research, teaching and professional service. The core of the training involves close interaction with faculty to develop expertise in biological, behavioral, and theoretical aspects of neuroscience. Graduate research and training are carried out in the laboratories of the program’s faculty. These faculty trainers lead outstanding well-funded research programs that use cutting edge technology to explore the nervous system.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-neuroscience
Courses

NEUR 0010. The Brain: An Introduction to Neuroscience.
Introduction to the mammalian nervous system with emphasis on the structure and function of the human brain. Topics include the function of nerve cells, sensory systems, control of movement and speech, learning and memory, emotion, and diseases of the brain. No prerequisites, but knowledge of biology and chemistry at the high school level is assumed.

NEUR 0650. Biology of Hearing,
Examines the sensory and perceptual system for hearing: the external, middle, and inner ears; the active processes of the cochlea; sound transduction and neural coding; neural information processing by the auditory system; and the nature of auditory perception and its biological substrate. Prerequisite: an introductory course in Neuroscience, Cognitive Science, Physics, Engineering or Psychology.

NEUR 0700. Psychoactive Drugs and Society.
Will examine psychoactive drugs from two perspectives: (1) biological mechanisms of drug action and (2) the impact of psychoactive drug use on society and society attitudes towards psychoactive drug usage. Drugs to be discussed will include alcohol, opiates, cocaine, marijuana, LSD, nicotine and caffeine, as well as drugs used therapeutically to treat psychiatric disorders. This course will benefit students who are interested in exploring both the biological and social aspects of psychoactive drug use. Prerequisite: NEUR 0010 or equivalent.

NEUR 1020. Principles of Neurobiology.
A lecture course covering fundamental concepts of cellular and molecular neurobiology. Topics include structure of ion channels, synaptic transmission, synaptic development, molecular mechanisms of synaptic plasticity, learning and memory and neurological diseases. Prerequisite: NEUR 0010. Strongly recommended: BIOL 0200 or equivalent.

NEUR 1030. Neural Systems.
This lecture course examines key principles that underlie the function of neural systems ranging in complexity from peripheral receptors to central mechanisms of behavioral control. Prerequisite: NEUR 0010 or the equivalent. First year students require instructor approval.

NEUR 1040. Developmental Neurobiology.
Explores the fundamental mechanisms underlying neural development. Topics include patterning of the nervous system, birth and death of neurons, axon guidance, and the formation, maintenance, and plasticity of synaptic connections. Emphasizes the cellular, molecular, and genetic basis of these events and how these basic processes interact with experience to shape the brain. Illustrations are drawn from systems ranging from worms to humans. Requirements: NEUR 1020 and BIOL 0200, or written permission.

NEUR 1440. Neural Dynamics.
Neurons and systems of neurons vary in their activity patterns on millisecond to second time scales, commonly referred to as "neural dynamics." This course addresses mechanisms underlying this flexibility and its potential meaning for information processing in the brain. The course integrates biophysical, single neuron and human studies. Examples topics include the impact of attention on neural firing rates, oscillations and sensory representation in neocortex, and the origins and potential meaning of the dynamics during sleep. Students will be introduced to computational modeling as a method to gain insight into dynamics, but no prior mathematics or programming background is required.

NEUR 1520. Data Analysis for Neuroscience.
Application of quantitative techniques to neural data sets including traditional and state-of-the-art approaches. Topics include spike train, EEG, and image analysis. Additional types of data sets may be included based on student interest. Hands-on experience working with real data sets, and students are welcome to provide their own data for analysis. Emphasis on basic computer programming skills in MATLAB. Prerequisite: one of APMA 0650, APMA 1650, CLPS 0900, EDUC 1110, PHP 2500, PHP 2510, or SOC 1100. Enrollment limited to 18.

NEUR 1540. Neurobiology of Learning and Memory.
Exploration of learning and memory from the molecular to the behavioral level. Topics will include declarative and procedural memory formation and storage, associative and non-associative learning, cellular and molecular mechanisms for learning, and disorders affecting learning and memory. Examples will be drawn from numerous brain areas and a variety of model systems, including humans. Students will gain experience interpreting experiments from primary literature. Prerequisite: NEUR 1020.

NEUR 1600. Experimental Neurobiology.
Intensive laboratory experience in neuroscience appropriate for students with basic background in Neurobiology. Learn and employ the classical neurophysiological techniques of extracellular recording, intracellular recording and receptive field mapping using a variety of animal species. Experiments will include recording of sensory signals in the cockroach leg; frog sciatic nerve and sciatic nerve/muscle preparation; intracellular recording of neurons in Aplysia; receptive field mapping in frog skin; and visual field mapping in the frog lectum. Labs are supplemented by informal lectures. Prerequisites: NEUR 0010, 1020, and PHY'S 0030; or equivalent. Instructor permission required; enrollment limited to 18. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 5, 2013.

NEUR 1650. Structure of the Nervous System.
Combined lecture and laboratory course on the anatomy of the central nervous system. Lectures survey the circuitry of the major neural systems for sensation, movement, cognition, and emotion. Laboratory exercises (Mon. 10:30-12:30) include brain dissections, microscopy of neural tissue, and discussion of clinical cases. Prerequisites: NEUR 0010, 1020, and 1030. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 16, 2013. Instructor permission required.

NEUR 1660. Neural Basis of Cognition.
Lecture course. Emphasizes the systems approach to neuroscience and examines several neural systems that mediate perception, action, higher visual and motor processing, learning, memory, attention, emotion, consciousness and sleep. The course focuses on experiments involving behavioral electrophysiology and discusses mechanisms mediating neural activity that mediates cognition. Prerequisites: NEUR 0010 and NEUR 1030, or instructor permission.

NEUR 1670. Neupharmacology and Synaptic Transmission.
Sytaptic transmission will be studied from a biochemical and pharmacological point of view. We will explore the factors regulating neurotransmitter synthesis, storage, release, receptor interaction, and termination of action. Proposed mechanisms of psychoactive drugs and biochemical theories of psychiatric disorders will be examined. Prerequisites: NEUR 0010 and BIOL 0200 or the equivalent.

NEUR 1680. Computational Neuroscience.
A lecture and computing lab course providing an introduction to quantitative analysis of neural activity and encoding, as well as modeling of neurons and neural systems. Emphasizes Matlab-based computer simulation. Prerequisites: NEUR 0010 or 1020; APMA 0410 or 1650, or equivalent. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 5, 2013. Instructor permission required.

NEUR 1740. The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders.
The goals of this course are to illustrate what basic science can teach us about neurological disorders and how these pathologies illuminate the functioning of the normal nervous system. Consideration will be given to monallelic diseases (e.g. Fragile X Syndrome, Duchenne Muscular Dystrophy and Tuberous Sclerosis) as well as genetically complex disorders, such as Autism, Schizophrenia and Alzheimer's Disease. Emphasis will be on the cellular and molecular basis of these disorders and how insights at these levels might lead to the development of therapies. Prerequisites: NEUR 1020. BIOL 0470 suggested.

This critical reading course will investigate the behavioral and neural mechanisms of motor learning. Readings will focus on work done with neuroimaging, neural recording and neuropsychological approaches that have addressed how the brain organizes and controls different forms of motor learning including simple conditional, practice-related changes and sensory-motor associations. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.
NEUR 1930B. From Neurophysiology to Perception.
This seminar will use readings from the research literature to explore the neural basis of perception. There will be an emphasis on vision, though other sensory modalities may be discussed. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.

NEUR 1930D. Cells and Circuits of the Nervous System.
Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Appropriate for graduates and undergraduates with strong neuroscience background. Offered alternate years. Previously offered as NEUR 2150.

NEUR 1930E. Great Controversies in Neurobiology.
This upper-level course examines some of the great controversies in the history of neurobiology. Reading material is drawn primarily from the primary scientific literature, so students are expected to already be familiar with reading scientific papers. Each theme will focus on a particular controversy, examining experimental evidence supporting both sides of the issue. Prerequisites: NEUR 0010 and NEUR 1020. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 17, 2012. Instructor permission required.

NEUR 1930F. Brain Interfaces for Humans.
Seminar course will cover developing and existing neurotechnology to restore lost human neurological functions. It will cover stimulation technologies to restore hearing, vision and touch, recording technologies to return function for persons with paralysis. The course will also cover devices to modulate brain function (e.g. deep brain stimulators). We will discuss early brain technologies, the present state neural sensors and decoders and future technology developments (e.g. brain-machine hybrids, human augmentation), as well as ethical implications. A final paper will be required. Instructor permission required. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030; 1 year of physics, calculus. Enrollment restricted to 20 Neuroscience Concentrators and Graduate Students. Sign-up sheet in Sidney Frank Hall, room 315 beginning April 16, 2013.

NEUR 1930G. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.
The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructors permission required. Enrollment limited to 15. Sign-up Sheet in Sidney Frank Hall 315 beginning April 16, 2013.

NEUR 1930I. Neural Correlates of Consciousness.
This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up required by Google Docs. Strongly Recommended: NEUR 1030. Enrollment limited to 15. Instructor permission required.

NEUR 1930N. Region of Interest: An In-Depth Analysis of One Brain Area.
In-depth exploration of one region of the brain. Topics will include: cell types and properties; synaptic properties; plasticity; connections to other brain areas; sub-divisions within the area; the region's role in sensation and perception; the region's role in action and behavior; the region's role in learning and memory; and diseases and disorders associated with the region. By studying one brain area closely, students will gain a deeper understanding of concepts and principles that apply throughout the brain. Students will gain experience with primary literature and learn about tools and techniques for studying the area. Topic for Fall 2013: The Thalamus. Prerequisite: NEUR 1020 and 1030. Enrollment limited to 15. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 16, 2013.

NEUR 1940B. Neuroethology.
Neuroethology is concerned with the neural systems serving such naturally occurring behaviors as orientation in the environment, finding food, predator detection, social communication, circadian and seasonal rhythms, and locomotion and tracking. This seminar will examine selected examples of the neuroethological approach to analysis of brain function, which sometime leads to conclusions different from those of laboratory-based experiments on traditional animal models. Sign-up sheet in Sidney Frank Hall, room 315 beginning November 5, 2013. Instructor permission required.

NEUR 1940C. Topics in Visual Physiology.
Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Appropriate for graduate students and undergraduates with a strong neuroscience background. Offered in alternate years. (Previously offered as NEUR 2120.)

NEUR 1940D. Higher Cortical Function.
This reading course examines a series of high-level neurocognitive deficits from the perspectives of popular science and basic neuroscience. Prerequisite: NEUR 1030. Instructor permission required. Sign-up sheet in Sidney Frank Hall, Room 318 beginning November 4th.

NEUR 1940E. Molecular Neurobiology: Genes, Circuits and Behavior.
In this seminar course, we will discuss primary research articles, both recent and classical, covering topics ranging from the generation of neuronal diversity to the control of behavior by specific neural circuits. Instructor permission required; enrollment limited to 15. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 5, 2013.

NEUR 1940G. Drugs and the Brain.
This is a seminar course devoted to the reading and analyzing of original research articles dealing with the interaction between drugs and the brain. This will include drugs used to analyze normal brain function, as well as drugs of abuse and drugs used for therapeutic purposes. This course is intended for undergraduate and graduate students with a strong background in neuropharmacology. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required.

NEUR 1940I. Neural Correlates of Consciousness.
This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required.

Laboratory-oriented research in neuroscience, supervised by staff members. A student, under the guidance of a neuroscience faculty member, proposes a topic for research, develops the procedures for its investigation, and writes a report of the results of his or her study. Independent study may replace only one required course in the neuroscience concentration. Prerequisites include NEUR 0010, 1020 and 1030. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Permission must be obtained from the Neuroscience Department.

NEUR 2010. Graduate Proseminar in Neuroscience.
A study of selected topics in experimental and theoretical neuroscience. Presented by neuroscience faculty, students, and outside speakers. A required course for all students in the neuroscience graduate program.

See Graduate Pro-Seminar In Neuroscience (NEUR 2010) for course description.

NEUR 2030. Advanced Molecular and Cellular Neurobiology I.
Focuses on molecular and cellular approaches used to study the CNS at the level of single molecules, individual cells and single synapses by concentrating on fundamental mechanisms of CNS information transfer, integration, and storage. Topics include biophysics of single channels, neural transmission and synaptic function. Enrollment limited to graduate students.

NEUR 2040. Advanced Molecular and Cellular Neurobiology II.
This course continues the investigation of molecular and cellular approaches used to study the CNS from the level of individual genes to...
the control of behavior. Topics include patterning of the nervous system, generation of neuronal diversity, axonal guidance, synapse formation, the control of behavior by specific neural circuits and neurodegenerative diseases. Enrollment is limited to graduate students.

**NEUR 2050. Advanced Systems Neuroscience.**
Focuses on systems approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major sensory, regulatory, and motor systems. Enrollment limited to graduate students.

**NEUR 2060. Advanced Systems Neuroscience.**
Focuses on cognitive approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major cognitive systems, including perception, decisions, learning and memory, emotion and reward, language, and higher cortical function. Instructor permission required.

**NEUR 2120. Topics in Visual Physiology.**
Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Primarily for graduate students with a strong background in neuroscience and a working knowledge of the anatomy and physiology of the mammalian visual system. Offered in alternate years. Instructor permission required.

**NEUR 2150. Cells and Circuits of the Nervous System.**
Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Primarily for graduate students with a background in basic neurobiology, or undergraduates with permission. Offered alternate years.

**NEUR 2160. Neurochemistry and Behavior.**
Examines behavior from a neurochemical perspective via readings and discussions based on original research articles. Intended primarily for graduate students with a strong background in neurochemistry and neuropharmacology and advanced undergraduates with an appropriate background. Offered alternate years. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 6, 2012.

**NEUR 2920. Behavior: A Genetic and Molecular Perspective.**
Many of the cellular and molecular mechanisms that underlie behavior are conserved across species. This seminar course draws on work in invertebrate and vertebrate species to examine the genes and molecules that have been implicated in diverse behaviors. Topics to be discussed include circadian rhythms, pair bonding, migration, and aggression. Each week, students will read two to three papers from the primary literature and actively participate in class discussion. Prerequisites: NEUR 0010 and NEUR 1020 (undergraduate students) or NEUR 2030 (graduate students). Enrollment limited to 13. Instructor permission required.

**NEUR 2930C. Historical Foundations of the Neurosciences.**
Two year sequence starting Fall 2010; students register for one year at a time. The first year (2010-2011) will examine the history of basic neuroscientific concepts from the late Greeks (Galen) to the later 19th century, up to Cajal (neuron doctrine) and Sherrington (reflexes and integration). Since the seminar meets only monthly, it must be taken in the Fall and Spring semesters to receive a semester’s credit. For credit, a substantial paper (approximately 15 pages) is required at the end of the Spring semester. Primarily for graduate students in neuroscience, cognitive science, and psychology. Others may be admitted after discussion with the instructor. Auditors are welcome if they share in the rotating duty of presenting seminars. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 20, 2010.

**NEUR 2930E. Bench to Bedside: Unraveling Diseases of the Nervous System.**
Enrollment restricted to graduate students.

**NEUR 2930F. Diseases, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.**
The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructor permission required. Enrollment limited to 15 Graduate students. Sign-up sheet in Sidney Frank Hall 318 beginning April 22nd.

**NEUR 2940A. Advanced Molecular Neurobiology.**
No description available.

**NEUR 2940G. Historical Foundations of the Neurosciences II.**
Continuation of a two year sequence focusing on the conceptual foundations in the history of neuroscience, from the late nineteenth century to the present. Primarily for graduate students in neuroscience, cognitive science, and psychology, but senior undergraduates may be admitted with written permission from the instructor. Seminar meets monthly, and must be taken for the full year to receive one semester credit.

**NEUR 2940H. Ethics and Skills Workshop.**
The ethics and skills workshops will be lead by faculty trainers in the Neuroscience Graduate Program. We will cover the following or similar topics over a two year period: Plagiarism, scientific accuracy, data ownership, expectations of advisory committees and mentors, authorship disagreements, and conflicts among lab members. Enrollment restricted to graduate students.

**NEUR 2940I. Neural Correlates of Consciousness.**
Will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead the discussions. Primarily for graduate students. Senior undergraduates neuroscience concentrators and others may be admitted after discussion with the instructor. Instructor permission required. S/NC

**NEUR 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**NEUR 2980. Graduate Independent Study.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

**NEUR 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
The School of Engineering

Dean
Lawrence E. Larson
Brown University’s School of Engineering educates future leaders in the fundamentals of engineering in an environment of world-class research. We stress an interdisciplinary approach and a broad understanding of underlying global issues. Collaborations across the campus and beyond strengthen our development of technological advances that address challenges of vital importance to us all.

Along with our associations with the other scholarly disciplines – biology, medicine, physics, chemistry, computer science, the humanities and the social sciences – our co-operations bring unique solutions to challenging problems. The School focuses on unique and innovative clustering of faculty; in terms of research groups, engineers of all types team together with non-engineers to tackle some of the biggest problems facing engineering and science today. Our talents and expertise lie in the interdisciplinary domain where the seemingly diverse disciplines converge.

The School of Engineering offers courses and programs leading to the Bachelor of Science (Sc.B - seven of the eight programs are ABET accredited), the Bachelor of Arts (A.B.), the Master of Science (Sc.M), The Master of Science in Innovation Management and Entrepreneurship (Sc.MIME), and the Doctor a Philosophy (Ph.D).

The Barus and Holley Building houses both the School of Engineering and the Department of Physics. The building contains additional engineering laboratories as well as offices for faculty and graduate students.

For additional information please visit the School’s website at: http://brown.edu/academics/engineering

Engineering Concentration Requirements

The concentration in Engineering equips students with a solid foundation for productive careers in engineering, to advance the knowledge base for future technologies, and to merge teaching, scholarship, and practice in the pursuit of solutions to human needs. The concentration offers one standard A.B. program and seven ABET-accredited Sc.B. degree programs: biomedical engineering, a stand-alone interdisciplinary concentration; and six different tracks in Engineering: chemical and biochemical, civil (through 2016), computer, electrical, environmental, materials, and mechanical engineering. In addition, one interdisciplinary degree program, engineering and physics, is offered. These programs are described in detail in the booklet, Engineering Undergraduate Programs (available online at http://brown.edu/academics/engineering/undergraduate-study/program-guide).

Students without one year of secondary school level preparation in calculus should take MATH 0090, MATH 0100 in their first year. These students need to be familiar with multivariable calculus for ENGN 0510, which is often taken during the first semester of the sophomore year. Such students are urged to acquire the necessary math background through self-study, by taking a summer course, or by deferring until additional mathematics has been taken. In addition, all students must successfully complete a minimum of four courses in the humanities and/or social sciences. See the entry under Biomedical Engineering and Computer Engineering for course requirements for these degree programs.

The program of each student must be approved by the Engineering Concentration Committee, which issues more detailed guidelines and program suggestions.

Chemical and Biochemical Track:

1. Core Courses:

   - ENGN 0030 Introduction to Engineering
   - ENGN 0040 Dynamics and Vibrations
   - ENGN 0410 Materials Science
   - ENGN 0510 Electricity and Magnetism
   - ENGN 0520 Electrical Circuits and Signals
   - ENGN 0720 Thermodynamics
   - ENGN 0810 Fluid Mechanics
   - CHEM 0330 Equilibrium, Rate, and Structure
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering)

2. An Upper-level Sequence:

   - ENGN 1110 Transport and Biotransport Processes
   - ENGN 1120 Chemical and Biochemical Reactor Design 1
   - ENGN 1130 Phase and Chemical Equilibria 1
   - ENGN 1140 Chemical Process Design
   - ENGN 1710 Heat and Mass Transfer
   - CHEM 0350 Organic Chemistry
   - One additional elective Chemistry course with a significant laboratory component 2

3. One approved, upper-level elective course in the natural sciences, to be selected from the four specific areas of chemistry, physics, life sciences, and materials science. 3

Total Credits: 21

1 Note: ENGN 1120 and 1130 are only offered in alternate years.
2 For example: CHEM 0360, CHEM 0400, CHEM 0500, CHEM 1170, etc.
3 For suggestions of acceptable courses, see the Concentration Advisor.
Civil Engineering Track (Available to students entering Brown on or before the Fall of 2012):

Important Announcement: Civil Engineering as a standalone ABET accredited program will continue through May, 2016, and will be available to all students currently enrolled at Brown, including those who arrived as Freshmen in the Fall of 2012 (the class of 2016).

Students entering in the class of 2017 with interest in Structural Engineering will be able to concentrate in this discipline through a Structures track within the ABET-accredited Mechanical Engineering program.

Students interested in Environmental Problems and Planning are directed to the ABET-accredited program in Chemical and Biochemical Engineering.

</table>
ENGN 2911G Physical Design of Digital Integrated Circuits
ENGN 2911X Reconfigurable Computing: Accelerate Your Algorithms
ENGN 2911Y Verification, Test, Synthesis
Other ENGN courses subject to approval
Select two of the following:
CSCI 0320 Introduction to Software Engineering
CSCI 1230 Introduction to Computer Graphics
CSCI 1270 Database Management Systems
CSCI 1380 Distributed Computer Systems
CSCI 1410 Introduction to Artificial Intelligence
CSCI 1480 Building Intelligent Robots
CSCI 1570 Design and Analysis of Algorithms
CSCI 1670 Operating Systems
CSCI 1680 Computer Networks
CSCI 1730 Introduction to Programming Languages
CSCI 1760 Introduction to Multiprocessor Synchronization
CSCI 1900 Software System Design
Other Computer Science courses subject to approval of the Engineering Concentration Committee.

3 b. For the Multimedia Signal Processing Specialty:
APMA 1170 Introduction to Computational Linear Algebra
Select two of the following:
ENGN 1580 Communication Systems
ENGN 1610 Image Understanding
ENGN 2500 Medical Image Analysis
ENGN 2520 Pattern Recognition and Machine Learning
ENGN 2530 Digital Signal Processing
ENGN 2540 Speech Processing
ENGN 2560 Computer Vision
ENGN 2570 Applied Stochastic Processes
ENGN 2910X Video Processing
Select one of the following:
CSCI 0320 Introduction to Software Engineering
CSCI 1230 Introduction to Computer Graphics
CSCI 1410 Introduction to Artificial Intelligence
CSCI 1460 Introduction to Computational Linguistics
CSCI 1570 Design and Analysis of Algorithms
CSCI 1900 Software System Design
other CSCI courses subject to the approval of the Engineering Concentration Committee
One additional course from the APMA, ENGN, and CSCI courses listed above.
4. Capstone Course/Independent Study, 1

Total Credits 21

1 Capstone Course/Independent Study: ENGN 1970/ENGN 1971, an independent study relevant to the specialty selected by the student. For the Computer Systems Specialty, may be used as the Capstone, but then cannot be counted for the ENGN choice above in 3a. The independent study project should provide students with exposure to current research topics. In order to assure satisfactory progress in their independent study, students enrolled will meet at least bi-weekly with their advisors and give two oral reports to the group during the semester. A final written report will also be required. In addition, students will meet as a group with faculty to share ideas and help nurture an environment of collaborative research.

Electrical Engineering Track:
1. Core Courses:
ENGN 0030 Introduction to Engineering 1
ENGN 0040 Dynamics and Vibrations 1
ENGN 0410 Materials Science 1
ENGN 0510 Electricity and Magnetism 1
ENGN 0520 Electrical Circuits and Signals 1
ENGN 0720 Thermodynamics 1
ENGN 0310 Mechanics of Solids and Structures 1
or ENGN 0810 Fluid Mechanics 1
CHEM 0330 Equilibrium, Rate, and Structure 1
MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
MATH 0200 Intermediate Calculus (Physics/Engineering) 1
APMA 0330 Methods of Applied Mathematics I, II 1
APMA 0340 Methods of Applied Mathematics I, II 1
CSCI 0040 Introduction to Scientific Computing and Problem Solving 1
PHYS 0790 Physics of Matter 1

2. Four courses from the following:
ENGN 1570 Linear System Analysis 1
ENGN 1620 Analysis and Design of Electronic Circuits 1
ENGN 1630 Digital Electronics Systems Design 1
ENGN 1000 Projects in Engineering Design 1
or ENGN 1650 Embedded Microprocessor Design 1
or ENGN 1970 Independent Studies in Engineering 1
or ENGN 1971 Independent Study in Engineering 1
3. The student shall choose the other three courses to satisfy requirements of a selected specialty area: Bioelectrical Engineering, Communications Systems, Computer Engineering, Multimedia Signal Processing, Microelectronic Systems, or Solid State Electronics and Photonics. 2

Total Credits 21

1 Or any other 1000-level Physics course
2 Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.brown.edu/academics/engineering/content/program-guide).

Environmental Engineering Track:
1. Core Courses:
ENGN 0030 Introduction to Engineering 1
ENGN 0040 Dynamics and Vibrations 1
ENGN 0410 Materials Science 1
ENGN 0510 Electricity and Magnetism 1
ENGN 0720 Thermodynamics 1
ENGN 0810 Fluid Mechanics 1
CHEM 0330 Equilibrium, Rate, and Structure 1
ENVS 0490 Environmental Science in a Changing World 1
BIOL 0200 The Foundation of Living Systems 1
MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
MATH 0200 Intermediate Calculus (Physics/Engineering) 1
APMA 0330 Methods of Applied Mathematics I, II 1

2. Approved required course on Statistical methods 1
3. Approved required Earth Science course 1
4. Approved required Biology course related to environmental sciences 1
5. Approved Engineering capstone design course (e.g. ENGN 1000 or equivalent)¹
6. Five upper level courses (at least four must be ENGN)¹,²
Total Credits 21
¹ At least five courses from numbers 2-6 must be at the 1000 level or above.
² Consult the School of Engineering Undergraduate Program booklet regarding specific details of specific focuses in the Environmental Engineering track: http://www.brown.edu/academics/engineering/sites/brown.edu.academics.engineering/files/uploads/EUP%20Year12_13FINAL.pdf

Materials Engineering Track:

1. Core Courses:
   - ENGN 0030 Introduction to Engineering 1
   - ENGN 0040 Dynamics and Vibrations 1
   - ENGN 0410 Materials Science 1
   - ENGN 0510 Electricity and Magnetism 1
   - ENGN 0520 Electrical Circuits and Signals 1
   - ENGN 0720 Thermodynamics 1
   - ENGN 0310 Mechanics of Solids and Structures 1
   or ENGN 0810 Fluid Mechanics 1
   - CHEM 0330 Equilibrium, Rate, and Structure 1
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
   - MATH 0200 Intermediate Calculus (Physics/Engineering) 1
   - APMA 0330 Methods of Applied Mathematics I, II 1
   - APMA 0340 Methods of Applied Mathematics I, II 1
   - CSCI 0040 Introduction to Scientific Computing and Problem Solving 1
   - PHYS 0790 Physics of Matter 1

2. The student must take the following:
   - ENGN 1410 Physical Chemistry of Solids 1
   - ENGN 1420 Kinetics Processes in Materials Science and Engineering 1
   - ENGN 1440 Mechanical Properties of Materials 1
   - ENGN 1000 Projects in Engineering Design 1

3. Three of the following upper level materials courses:²
   - ENGN 1450 Properties and Processing of Electronic Materials 1
   - ENGN 1470 Structure and Properties of Nonmetallic Materials 1
   - ENGN 1480 Metallic Materials 1
   - ENGN 1490 Biomaterials 1

4. Upper level courses recommended to satisfy requirements of a selected specialty area. Mechanical Properties and Mechanical Processing, Electrical Properties and Applications of Materials to Solid State Electronics, Chemistry and Materials Processing and Synthesis, or Biomaterials, may be found in the Engineering Undergraduate Programs booklet available online at http://www.engin.brown.edu/undergrad/guide/index.html.

Total Credits 21
¹ Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.engin.brown.edu/undergrad/guide/index.html).

Engineering and Physics Concentration Requirements

The Sc.B. degree program in Engineering-Physics, sponsored jointly by the Division of Engineering and the Department of Physics, provides students with an in-depth understanding of the fundamental principles underlying modern technology. Specifically, it gives those who are interested in applied technical problems a strong background in physics and mathematics beyond that given in the standard engineering program. Students take a significant part of the usual engineering and physics programs, obtain substantial laboratory experience, and take several upper-level courses focusing on applied physics. The program allows students to take either the standard physics or engineering programs during their first two years and then switch to this combined program.

The total number of physical science courses required for the program is 19. (We assume that a student begins his or her mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 or equivalent are encouraged but not required to take an additional upper-level mathematics course.)

The courses are as follows:

Select one of the following Series:
   - PHYS 0050 & PHYS 0060 Foundations of Mechanics and Electromagnetism
   - PHYS 0070 & PHYS 0160 Analytical Mechanics and Introduction to Relativity and Quantum Physics
   - ENGN 0030 & ENGN 0040 Introduction to Engineering and Dynamics and Vibrations

Select one of the following Series:
   - MATH 0170 & MATH 0180 Advanced Placement Calculus and Intermediate Calculus
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering) & MATH 0200 Intermediate Calculus (Physics/Engineering)

Select three additional higher-level math, applied math, or mathematical physics (PHYS 0720) courses.

Select one of the following Series:
   - CSCI 0040 Introduction to Scientific Computing and Problem Solving (or higher-level programming course such as CSCI 0150.)

Total Credits 21
¹ Or, with permission, ENGN 1970 or ENGN 1971, containing an equivalent design experience relevant to Materials Engineering.
² These courses are taken in either the junior or senior year.

Mechanical Engineering Track:

Core Courses:
   - ENGN 0030 Introduction to Engineering 1
   - ENGN 0040 Dynamics and Vibrations 1
   - ENGN 0410 Materials Science 1
   - ENGN 0510 Electricity and Magnetism 1
   - ENGN 0520 Electrical Circuits and Signals 1
   - ENGN 0720 Thermodynamics 1
   - ENGN 0310 Mechanics of Solids and Structures 1
   - ENGN 0810 Fluid Mechanics 1
   - CHEM 0330 Equilibrium, Rate, and Structure 1
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
   - MATH 0200 Intermediate Calculus (Physics/Engineering) 1
   - APMA 0330 Methods of Applied Mathematics I, II 1
   - APMA 0340 Methods of Applied Mathematics I, II 1
   - An approved computer science course 1
   - PHYS 0790 Physics of Matter (recommended for all options except Biomechanics, for which it is BIOL 0800) 1

Six upper level courses to satisfy requirements of a selected specialty area: Aerospace Applications, Biomechanics, Energy Conversion and Fluid and Thermal Systems, Engineering Mechanics, or Mechanical Systems: Dynamics, Materials and Design.¹

Total Credits 21
¹ Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.engin.brown.edu/undergrad/guide/index.html).
The School of Engineering

Biomedical Engineering Concentration

Requirements

Biomedical Engineering is an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. It is administered jointly by the School of Engineering and the Division of Biology and Medicine. The educational objectives of Biomedical Engineering are to prepare students for careers of useful service to society, to engage committed scholars in the productive application of the tools of engineering to the subject matter of biology across the spectrum of research and teaching, to provide opportunities for teamwork, open ended problem-solving and critical thinking. The objectives prepare students 1) well versed in the basic sciences of mathematics, physics, and chemistry; 2) fluent in contemporary biology, comfortable with its reductionist traditions and its movement toward a molecular understanding, and familiar with its experimental assays; 3) educated in the tools and skill-sets of engineers, particularly the ability to quantify, synthesize, and integrate, and able to apply these tools both theoretically and experimentally to living systems and other subject matter in biology; 4) well prepared to complete their education and training in further study at the graduate or professional level, and conditioned to recognize the need for such further work; and 5) endowed with the attributes of an education in a leading liberal arts institution: the ability to think clearly, decide fairly, and communicate effectively.

Total Credits 19

1 Advanced students can replace one math course with CHEM 0360.
2 Advanced students (premeds) can replace with BIOL 0470, BIOL 0530, or other biology courses.
Engineering Graduate Program

The School of Engineering directly offers graduate programs leading to the Master of Science (Sc.M.) degree; the Master of Science in Innovation Management and Entrepreneurship (Sc.MIME); and the Doctor of Philosophy (Ph.D.) degree.

In addition, the School of Engineering in collaboration with the Division of Biology and Medicine offers an interdisciplinary graduate program leading to the Master of Science (Sc.M.) and Doctor of Philosophy (Ph.D.) in Biomedical Engineering.

For more information on admission and program requirements for the Sc.M. or Ph.D. in Engineering, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/engineering

Courses

This course will address the impact that technology has on society, the central role of technology on many political issues, and the need for all educated individuals to understand basic technology and reach an informed opinion on a particular topic of national or international interest. The course will begin with a brief history of technology.

ENGN 0030. Introduction to Engineering.

An introduction to various engineering disciplines, thought processes, and issues. Topics include computing in engineering, engineering design, optimization, and estimation. Case studies in engineering are used to illustrate engineering fields and scientific principles, including in-depth studies of statics and optics. Laboratories and design projects are included. Prerequisite: one of the following: APMA 0330, 0340, 0350, 0360, MATH 0100, 0170, 0180, 0190, 0260, 0350, 0520, 0540, which may be taken concurrently.

Students MUST register for the course lecture (M01) and one of the sections during the SAME registration session. Banner will not allow a student to register for one component without registering for the other at the same time. Further, if you drop one component of the course on Banner, both components will be dropped.

ENGN 0040. Dynamics and Vibrations.

Study of the kinematics and dynamics of particles and rigid bodies. Principles of motion of mechanical systems. Concepts of inertia, work, kinetic energy, linear momentum, angular momentum, and impact. Applications to engineering systems, satellite orbits, harmonic vibrations of one and two degree of freedom systems. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030. Corequisite: MATH 0200 or 0180.

ENGN 0090. Management of Industrial and Nonprofit Organizations.

Exposes students to the concepts and techniques of management. Topics include marketing, strategy, finance, operations, organizational structure, and human relations. Guest lecturers describe aspects of actual organizations. Lectures and discussions.

ENGN 0120A. Crossing the Consumer Chasm by Design.

Technologies have shaped human life since tools were sticks and flints to today's hydrocarbon powered, silicon managed era. Some spread throughout society; bread, cell phones, airplanes, but most never do; personal jet packs, Apple Newton, freeze dried ice cream.
ENGN 0410. Materials Science.
Relationship between the structure of matter and its engineering properties. Topics: primary and secondary bonding; crystal structure; atomic transport in solids; defects in crystals; mechanical behavior of materials; phase diagrams and their utilization; heat treatment of metals and alloys; electrical, optical, and magnetic properties of materials; strengthening mechanisms in solids and relationships between microstructure and properties; corrosion and oxidation. Lectures, recitations, laboratory.

ENGN 0510. Electricity and Magnetism.
Fundamental laws of electricity and magnetism and their role in engineering applications. Concepts of charge, current, potential, electric field, magnetic field, resistance, capacitance, and inductance. Electric and magnetic properties of materials. Electromagnetic wave propagation. Lectures, recitation, and laboratory. Prerequisites: ENGN 0030 or PHYS 0070; ENGN 0040 or PHYS 0160 (previously 0080); MATH 0180 or 0200; and APMA 0330 or 0350 (may be taken concurrently).

ENGN 0520. Electrical Circuits and Signals.
An introduction to electrical circuits and signals. Emphasizes the analysis and design of systems described by ordinary linear differential equations. The frequency domain is introduced, including the effects of sampling and windowing in computer simulations. Other topics include transient analysis, Fourier series, and Laplace transform. Laboratories apply concepts to real problems in audio and controls. Lectures, recitation, and laboratory. Prerequisite: MATH 0180 or MATH 0200; courses may be taken concurrently to ENGN 0520.

ENGN 0720. Thermodynamics.
An introduction to macroscopic thermodynamics and some of its engineering applications. Presents basic concepts related to equilibrium, and the zeroth, first and second laws for both closed and open systems. Examples include analysis of engines, turbines, and other engineering cycles, phase equilibrium and separation processes, chemical reactions, surface phenomena, magnetic and dielectric materials. Lectures, recitations, and laboratory. Prerequisites: ENGN 0030 or ENGN 0040. Recommended: ENGN 0410 or CHEM 0330.

ENGN 0900. Managerial Decision Making.
Ways of making effective decisions in managerial situations, especially situations with a significant technological component; decision analysis; time value of money; competitive situations; forecasting; planning and scheduling; manufacturing strategy; corporate culture. Lectures and discussions. Prerequisite: ENGN 0090 or MATH 0100.

ENGN 0930A. Appropriate Technology.
Our goal for this course is that you leave it with the ability to think and act rationally and concretely on issues of technology and the human condition. We will provide background on useful technologies (e.g., wind, solar, hydro), techniques to fabricate them, and an opportunity to explore the obstacles to their implementation.

ENGN 0930C. DesignStudio.
DESIGNSTUDIO is a course open to students interested in learning through making. Working in a studio environment, we will iteratively design, build, and test projects, as we imaginatively frame design problems, and develop novel strategies for addressing those problems. We will explore design thinking, creative collaboration, exploratory play, ideation, iteration, prototyping, CNC milling and laser cutting – in addition to other strategies that enhance our creative processes - as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 16. Instructor permission required.

ENGN 1000. Projects in Engineering Design.
Projects in design for concentrators in chemical, electrical, materials, and mechanical engineering. Students generally work in teams on projects that are defined through discussions with the instructor. An assembled product or detailed design description is the goal of the semester's effort. Prerequisite: completion of engineering core program. Written permission required.

Entrepreneurship is innovation in practice: transforming ideas into opportunities, and, through a deliberate process, opportunities into commercial realities. These entrepreneurial activities can take place in two contexts: the creation of new organizations; and within existing organizations. This course will present an entrepreneurial framework for these entrepreneurial processes, supported by case studies that illustrate essential elements. Successful entrepreneurs and expert practitioners will be introduced who will highlight practical approaches to entrepreneurial success. Enrollment limited to 35. WRIT

ENGN 1110. Transport and Biotransport Processes.
Aim: To develop a fundamental understanding of mass transport in chemical and biological systems. The course includes: mechanism of transport, biochemical interactions and separations; mass transport in reacting systems; absorption; membrane and transvascular transport; electrophoretic separations; pharmacokinetics and drug transport; equilibrium stage processes; distillation and extraction. Other features: design concepts; modern experimental and computing techniques; laboratory exercises.

ENGN 1120. Chemical and Biochemical Reactor Design.
Stoichiometry, thermodynamics, mechanisms, and rate expressions of homogeneous and heterogeneous chemical and biochemical systems. Basic concepts in homogeneous chemical and bioreactor design and ideal reactor models. Chemostats and enzymatic reactors. Optimization. Temperature and energy effects in reactors. Introduction to heterogeneous chemical and bioreactor design. Prerequisite: ENGN 0720 or physical chemistry. Offered in alternate years.

ENGN 1130. Phase and Chemical Equilibria.
Application of the first and second laws of thermodynamics and conservation of mass to the analysis of chemical and environmental processes, phase and chemical equilibria and partitioning of species in multiphase, nonreactive and reactive systems. Thermodynamic properties of fluid mixtures-correlation and estimation. Applications and examples drawn from chemical processing and environmental problems. Prerequisite: ENGN 0720.

ENGN 1140. Chemical Process Design.
Chemical process synthesis, flow charting, and evaluation of design alternatives. Process equipment sizing as determined by rate phenomena, economics, and thermodynamic limitations. Introduction to optimization theory. Applications of these principles to case studies. Prerequisites: ENGN 1110, 1130; ENGN 1120 (may be taken concurrently).

ENGN 1210. Biomechanics.

ENGN 1220. Neuroengineering.
Course Goals: To develop an advanced understanding of how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be harnessed to design devices to assist people with neurologic disease or injury. Fundamental topics in neuronal and neural signal generation, recording methods, and stimulation methods. Clinical/Translational topics include multiple clinically available and emerging neurotechnologies. Prerequisites: NEUR 0010 and ENGN 0510; or instructor permission, which may be provided after discussion with course faculty.

ENGN 1230. Instrumentation Design.
Sensors for pressure, temperature, blood flow, muscle and neural activity. Amplifiers, filters, and A/D-D/A converters. The use of computers in
ENGN 1300. Structural Analysis.
A unified study of truss, beam, frame, plate, and shell structures. Emphasis on principles of virtual work and numerical methods of elastic structural analysis by matrix methods. Includes calculation of deflections and reactions in beam structures, beam vibrations, and column buckling. Theorems of plastic limit analysis. Plate bending. Membrane stresses and local bending effects in axially symmetric shells. Prerequisite: ENGN 0310.

ENGN 1310. Planning and Design of Systems.
No description available.

ENGN 1340. Water Supply and Wastewater Treatment.
The hydrological cycle, surface water hydrology, ground water hydrology. Emphasis on formulation of mathematical models of various flow problems and their solution by analytical or numerical means. Typical problems: open channel and river flows; flood routing; ground water flow in aquifers and into wells. Topics in wastewater treatment plant design: mixing, residence time, aeration, and, bacteriological and chemical treatment processes. Prerequisite: ENGN 0810. Enrollment limited to 40.

Classification and identification of geological materials; mechanical and physical properties and methods of testing. Elements of the analysis of stress and strain in rock and soil masses; theories of failure, theory of seepage. Problems of building foundations; consolidation and settlement; stability of earth slopes and embankments. Includes geotechnical laboratory. Prerequisite: ENGN 0310.

A unified study of the dynamics of particles, rigid bodies, and deformable continua. Generalized coordinates and Lagrange's equations; variational principles; stability of equilibrium; vibrations of discrete systems and of elastic continua, and wave propagation. Prerequisites: ENGN 0040, APMA 0340, or equivalent.

ENGN 1380. Design of Civil Engineering Structures.
This course provides an introduction to the design of steel and reinforced concrete structures using ultimate strength methods. Lectures will cover key concepts of design theory, building codes, and standards using examples from real structures. Students will apply concepts through computer labs, homework problems, and a design project. Lectures plus lab. Prerequisite: ENGN 1300.

ENGN 1400. Analytical Methods in Biomaterials.
Analytical methods and instrumentation currently used to characterize biomaterials. Specific methods/instrumentation covered include: molecular scale analysis (NMR, FTIR, UV-Vis spectroscopy); surface analysis (AFM, SEM, XPS, contact angle goniometry, ellipsometry, quartz crystal microbalance, electrochemistry, grazing angle IR); bulk analysis (DSC, mechanical testing) and biological analysis (bioassays, florescence and confocal microscopy). Prerequisites: CHEM 0330, CHEM 0350, ENGN 0040 and BIOL 0200. Enrollment limited to 40.

ENGN 1410. Physical Chemistry of Solids.
Application of physical chemistry and solid state chemistry to the structure and properties of engineering solids as used in solid state devices, ceramics, and metallurgy. Equilibrium and free energy of heterogeneous systems, thermodynamics of solutions, chemical kinetics, diffusion, catalysis and corrosion, solid state transformations. Case studies taken from industrial practice. Prerequisites: ENGN 0410, 0720.

This course introduces the basic principles and formulations that describe kinetic processes in materials science and engineering. These are divided into the following principle types of mechanisms: solid state diffusion, reactions at surfaces and interfaces, and phase transformations. The final section of the course applies these principles to several relevant materials processing systems. Prerequisites: ENGN 0410, 0720, 1410 or equivalent.

Begins with basic concepts of mechanical properties common to all materials, with some emphasis on dislocation theory. Particular attention is given to the relationship between mechanical properties and microstructures. The different types of mechanical tests that are used in each of these fields are analyzed. Lectures plus laboratories. Prerequisite: ENGN 0410.

Focuses on the science of electronic materials, the materials at the heart of modern microelectronics and optoelectronics. Addresses fundamental issues controlling their properties, processing, and reliability. Topics include band structure of semiconductors, basic devices structures (junctions and transistors), sputter deposition, molecular beam epitaxy, chemical vapor deposition, ion implantation, oxidation, and issues affecting reliability. Materials challenges that must be resolved for future generations of electronic devices.

A study of the structure and properties of nonmetallic materials such as glasses, polymers, elastomers, and ceramics. The crystal structure of ceramics and polymers, and the noncrystalline networks and chains of glasses, polymers, and elastomers and the generation of microstructures and macrostructures are considered. The mechanical, chemical, electrical, magnetic, and optical properties and their dependence on structure are developed. Laboratory. Prerequisite: ENGN 0410.

ENGN 1480. Metallic Materials.
The microstructure of metals, microstructural evolution during processing, and the relationships between the microstructure and the physical properties of the material. Crystallography and x-ray diffraction. Crystalline defects, dislocations, grain boundaries, and their effects on mechanical and other properties. Solid state diffusion and solid state phase transformations. Oxidation and corrosion. Laboratory. Prerequisite: ENGN 0410, 1410.

ENGN 1490. Biomaterials.
Biomaterials science, the study of the application of materials to problems in biology and medicine, is characterized by medical needs, basic research, and advanced technological development. Topics covered in this course include materials used in bone and joint replacement, the cardiovascular system, artificial organs, skin and nerve regeneration, implantable electrodes and electronic devices, drug delivery, and ophthalmology.

Developing a good understanding of the principles of electromagnetics and applying them to contemporary EM topics, through examples in today's applications: Antenna (from iPhone, to insects, and to RFID); Display optics (from LCD to Peacock feather); Guided waves (from microwave circuits to microwave oven); Diffractions and Interferences (from optical lithography limit to antireflection in solar cell and photodetector); and EM and optical properties of materials and nanostructures. Prerequisite: ENGN 0510 or PHYS 0470, or equivalent.

ENGN 1570. Linear System Analysis.
Analysis of discrete and continuous electrical signals and systems in both time and frequency domains. Modulation, sampling, spectral analysis, analog and digital filtering. Fourier, Laplace and z-transforms, the state-space approach, stability of linear systems. Prerequisite: ENGN 0520.

ENGN 1580. Communication Systems.
Analysis and design of modern digital communication systems. Includes: sampling theorem; entropy measure of signal information content; pulse code modulation; amplitude and single sideband modulation; review of probability theory; stochastic processes and their use in communication systems; detection of signals buried in noise; communication channel capacity; coding principles; communication networks. Laboratory projects. Prerequisite: ENGN 1570. APMA 1650 or MATH 1610 helpful but not required.

ENGN 1590. Introduction to Semiconductors and Semiconductor Electronics.
An introduction to the physics of fundamental electronic processes that underlie the operation of semiconductor devices on a microscopic scale. Basic electronic properties of semiconductors and effects at interfaces
heterogeneous media, such as pn junctions and hetero-structure barriers and quantum wells. These junctions, barriers and wells are used as building blocks for devices, focusing on bipolar and field-effect transistors. Modern trends in micro- and opto-electronic devices are discussed. A brief fabrication lab will introduce pn junction fabrication technology. Prerequisites: ENGN 0410 and 0510.

**ENGN 1600. Design and Implementation of Very Large-Scale Integrated Systems.**

VLSI (Very Large Scale Integration) CMOS (Complementary Metal Oxide Semiconductor) technology is the main driver of our digital revolution. The goal of the course is to learn how to design and implement VLSI digital circuits and optimize them with respect to different objectives such as area, speed, and power dissipation. Design and analysis will be carried out using computer-aided tools. Prerequisite: ENGN 1630, or instructor permission.

**ENGN 1610. Image Understanding.**

Image processing is a technology experiencing explosive growth; it is central to medical image analysis and transmission, industrial inspection, image enhancement, indexing into pictorial and video databases, e.g., WWW, and to robotic vision, face recognition, and image compression. This senior-level undergraduate course covers theoretical underpinnings of this field and includes a series of practical MATLAB image processing projects. ENGN 1570 is recommended but not required.

**ENGN 1620. Analysis and Design of Electronic Circuits.**

Elementary device physics and circuit characteristics of semiconductor diodes, bipolar junction transistors (BJTs), and field effect transistors (FETs). Analysis and design of practical circuits using discrete semiconductor devices. Constraint on and techniques for linear integrated circuit (IC) design and the use of linear ICs as circuit building blocks. Laboratory. Prerequisites: ENGN 0510, 0520 or equivalent.

**ENGN 1630. Digital Electronics Systems Design.**

Fundamentals of digital logic design including: Boolean algebra, gates, truth tables, logic families, flip-flops, finite state machines, memory, and timing. More advanced topics include A-D conversion, binary arithmetic, CPU organization, programmable logic (CPLDs and FPGAs), and VHDL. Extensive laboratory requirement. Not open to first year students; permission required for sophomores.

**ENGN 1640. Design of Computing Systems.**

This course introduces the main concepts and techniques for designing computing systems. Topics covered include assembly language, instruction set design, pipelining, superscalar and VLIW processor design, memory subsystem design, and I/O interfacing. Laboratory topics include programmable logic devices, hardware definition languages, and implementation of a bootable version of the pipelined MIPS processor. Laboratory emphasizes design optimizations with respect to speed and design area. Prerequisites: ENGN 1630 or passing of a quiz on basic digital logic concepts, or instructor permission.

**ENGN 1650. Embedded Microprocessor Design.**

This is a combined lecture and design project course offering experience in the open-ended design of an electronic product or system employing an embedded microprocessor by small-group design teams. Activity includes product specification, circuit design, programming, printed circuit layout, construction, packaging, and economic assessment. Teams are expected to produce functional products. Lecture topics will be adjusted to reflect the chosen design problems. Emphasis is placed on the criteria for choosing processors and on the interfaces and programming requirements of the system. Primarily for senior concentrators. Experience with C programming is helpful but not required. Prerequisite ENGN 1630 or permission of the instructor.

**ENGN 1680. Design and Fabrication of Semiconductor Devices.**

Contemporary practice in the design and fabrication of semiconductor devices. The realization of basic electronic device functions on the semiconductor platform is a central theme in a coordinated lecture and laboratory course. Topics include microcircuit photolithography, layout and design scaling rules for integrated circuits; and techniques in semiconductor and thin film processing as they apply to ULSI circuit manufacturing. Prerequisite: ENGN 1590 or permission.

**ENGN 1690. Photonics and Applications.**

Science and engineering principles of photonics and optoelectronics, that provide foundation to a broad range of technologies from internet to lighting, from lasers to DVD, from satellite images to computer display, from solar cells to single molecule detection. Topical content: light as waves in media, on surface, and through holes; interference and waveguiding; light generation by spontaneous emission or by stimulation; LED, Laser, Photodetector, Optical amplifier and modulator, etc. Prerequisite: ENGN 0510 or equivalent.

**ENGN 1700. Jet Engines and Aerospace Propulsion.**

Dynamics and thermodynamics of compressible internal flows with applications to jet engines for both power and propulsion, rocket engines and other propulsion systems. Thermodynamic analyses of engine cycles with and without afterburners. Fluid dynamics of high Mach number systems. Structural and Materials considerations for engine design. Team projects for analysis and design of novel jet engine concepts. Prerequisite: ENGN 0720 and 0810.

**ENGN 1710. Heat and Mass Transfer.**

**ENGN 1720. Design of Engines and Turbines.**

**ENGN 1740. Computer Aided Visualization and Design.**

Provides instruction in the application of computers to the design methods in engineering. Hands-on experience in use of CAD/CAE software packages for geometric modeling, visualization, and drafting. Emphasis on applications to solids and structural problems. Independent design projects are carried out. Course counts as an ABET upper-level design course for mechanical and civil engineering concentrators. Prerequisite: ENGN 0310.

**ENGN 1750. Advanced Mechanics of Solids.**

**ENGN 1760. Machine Design.**

Design of mechanical devices utilizing techniques developed in ENGN 1750. Additional subjects include material failure criteria, vibration of multimass systems, and control systems. Corequisite: ENGN 1370. Please contact Professor Rick Fleeter for special permission.

Please see this video describing the course in more detail: http://www.youtube.com/watch?v=CVVsZIzMQ0dY&feature=mfu_in_order&list=UL

**ENGN 1860. Advanced Fluid Mechanics.**

Aims to give mechanical engineering students a deeper and more thorough grounding in principles and basic applications. Topics include review of the conservation principles; inviscid flow; viscous flow, including aerodynamics lubrication theory; laminar boundary layers; wave motions and wave drag. Lectures, assignments, computational projects, and laboratory. Prerequisites: ENGN 0720 and 0810.

**ENGN 1900. Construction of the Entrepreneurial Enterprise Framework: From Decision Making to Opportunity Creation.**

Students examine and engage with the decision making process in the modern enterprise, including investment, negotiation, and opportunity creation. This is done in an entrepreneurial context. Teams research and present orally and in writing on major class themes. Case studies.
Socratic discussion models, readings, guest lectures, rhetoric and writing fellows support for videotaped oral and written business plans are utilized. Enrollment limited to 35.

ENGN 1930A. 3D Photography
By 3D photography we refer to a number of processes that use cameras and lights to capture the shape and appearance of 3D objects. In this course we will first study and build basic 3D techniques and systems, and then cover several closely related methods based on signal processing techniques, constrained energy minimization, and the solution of diffusion differential equations to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Applications include computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality.

ENGN 1930B. Photonics and Biophotonics.
Biophotonics deals with interactions between light and biological matter that combine lasers, photonics, nanotechnology, and biotechnology. The course will introduce the biology/photonics interface and discuss topics like photobiology, biosensors, bioimaging techniques, light activated therapy, microarray technology, tissue engineering with light, and bionanophotonics. Prerequisites: science and engineering background.

ENGN 1930C. Civil Engineering Project.
Provides a major design experience for civil engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in civil engineering concentration. Intended for students in their senior year. Offered as a half-credit course each semester.

ENGN 1930D. Large Scale Engineering Design Project.
Provides a major design experience for civil, mechanical, and, with approval, environmental engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in the engineering concentrations. Intended for students in their senior year.

ENGN 1930F. Entrepreneurship and Good Work: Engineering Dreams.
In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of ‘good work’. Using a combination of relevant case studies., readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one’s working years. Enrollment limited to 24. Written permission required.

ENGN 1930G. Entrepreneurship I.
Teams of students from Engineering, COE and other technical and non-technical disciplines form simulated tech startup companies working on mentor-defined opportunities, from conception to commercialization. Intellectual property, marketing, definition of a product requirements document, human factors (including team building), safety and environmental concerns, and legal concerns are emphasized. Students in the COE Technology Management Track should complete ENGN 1010 prior to this course. Enrollment in the course is limited and students must fill out a formal application (though COE tech track seniors are automatically approved). The course meets TR from 2:30-3:50, and other outside meeting hours will be arranged. WRIT

ENGN 1930H. Entrepreneurship II.
Please see ENGN 1930G for course description. Enrollment limited to 24. WRIT

ENGN 1930I. Ethics and Professionalism.
Issues of ethics and professionalism for the engineer and for members of other professions. The principal objectives are to examine the responsibility a person accepts when practicing his or her profession and to provide opportunities for students to explore the ethical aspects of their profession, become comfortable and confident discussing and using value systems, and practice effective expression of ideas in oral and written form.

ENGN 1930K. High-Performance Sensors and Multimedia.
Design, construction, and programming of embedded systems with system-on-chip processors, and audio/visual sensors for real-time applications. Design and implementation of distributed audio/visual applications. Hands-on project oriented hardware/software course.

ENGN 1930L. Biomedical Engineering Design, Research and Modeling.
This course introduces students to design, modeling and analysis of biological systems. The first portion of the course focuses on linear systems. Research projects in design will be analyzed. The course also introduces students to the Matlab programming language, which allows them to implement the design models discussed in class. For seniors only.

ENGN 1930M. Industrial Design.
Brown engineering and RISD industrial design faculty lead product development teams through a design cycle. Engineers explore industrial design, designers gain some insight into engineering, and both groups can apply their skills to challenging problems. Frequent presentations, field trips, critiques, and labs. Preference given to seniors. Prerequisites: completion of engineering core. Enrollment limited to 15 students.

ENGN 1930N. Introduction to Magnetic Resonance Imaging and Neuroimaging.
Magnetic resonance imaging (MRI) is a powerful tool for investigating the biological structure and functional dynamics across an incredibly broad spatial and temporal scale. This course will provide an understanding of the basic physical principles of magnetic resonance; including signal generation, detection and contrast mechanisms; as well as image acquisition techniques and reconstruction methods. This course is aimed at undergraduate and graduate students from a variety of disciplines, including: Engineering, Computer Science, Applied Mathematics, Physics, Cognitive Science and Neuroscience as well as medical students and residents. Students should have a basic understanding of matrix mathematics and familiarity with the concepts of magnetism and waves.

Integrated analysis and design of MicroElectroMechanical Systems (MEMS), which are highly integrated micron-scale devices used in many applications: sensors, energy (engines), optics, bioengineering, chemical processing, etc. Provides an introduction to the science and art of design, fabrication, performance, and use of MEMS in all disciplines of engineering.

ENGN 1930P. Solid Biomechanics.
Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

ENGN 1930Q. Molecular and Cell Biology for Engineers.
Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics, models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

ENGN 1930R. Land Use and Built Environment: An entrepreneurial view.
Through the use of readings, group discussions, students presentations and guest lectures, students examine and challenge the analytical and structural frameworks which underlie and support public and private land and use the urban and suburban built environments. Students build an understanding and theory of how social, political, governmental and economic forces interact with society’s present and future physical space needs.

ENGN 1930T. Vehicle Design.
No description available.

ENGN 1930U. Renewable Energy Technologies.
Analysis of the thermodynamics, physics, engineering and policy issues associated with renewable and non-renewable energy technologies
with applications appropriate to both the developed and the developing world. Specific technologies that will be studied include Fossil fuels, Wind, Solar, Hydro, Biomass and Nuclear. Energy consumption technologies, such as power generation and transportation will also be studied. Some technical background, such as ENGN 0310, 0404 and 0720, is strongly recommended.

ENGN 1930W. The Art and Science of Light.
This studio course explores artificial light from both artistic and scientific perspectives. Laboratory demonstrations on optics and new light emitting materials will be counterbalanced by presentations on the historical and contemporary integration of these materials within the fields of architecture, industrial design, and sculpture. Students will be asked to reimagine the light bulb by developing artistic design alternatives to conventional lighting. Extensive outside work is expected. Written permission required.

Taught via Socratic method, this course will use case studies that explore essential elements of the entrepreneurial process: Defining Entrepreneurship; Recognizing Opportunities and Developing Business Models; Assembling The Team; Raising Financial Resources; Managing Uncertainty; Managing the Growing Venture; and Realizing Value. Guests will include successful entrepreneurs and expert practitioners who will highlight practical approaches to entrepreneurial success. Please note that beginning with the very first class, students MUST read the session’s case study and supplemental readings, to be ready for participation in discussions. For the first day’s assignment, please contact Professor Warshay directly at Daniel_Warshay@brown.edu. Enrollment limited to 35. WRIT

ENGN 1930Y. Social Enterprises.
This course will combine reading, discussion, field work, and guest talks by practitioners and theorists to delve into the workings of a variety of social enterprise models. Prerequisites: Social Entrepreneurship (ENGN1930Q) or comparable experience and an existing relationship with a social enterprise.

ENGN 1930Z. Robot Design.

ENGN 1931A. Photovoltacs Engineering.
This seminar course will provide an overview of the operation, design, characterization, and manufacturing of photovoltaic solar cells and panels. The course will span a range from the fundamental physics of solar cell operation to highly applied, industrially relevant engineering topics. Recommended prerequisites: Good knowledge of basic physics and electromagnetism concepts; proficiency in ENGN 0510 or PHYS 0470; This course is designed for undergraduate and graduate students in Physics, Chemistry and Engineering interested in the field of alternative energy with a focus in photovoltaics. Enrollment limited to 20.

ENGN 1931D. Design of Mechanical Assemblies.
An introduction to the design and development of mechanical assemblies suitable for production over a range of volumes, from prototypes to high volume manufacture. The course is intended to present an overview of basic machine components and manufacturing processes from the perspective of a design engineer in a contemporary industrial setting. The objective of which being to provide students the background necessary to create mechanical assemblies from blank-page concepts through to production ready designs. Coursework will include both theoretical and experimental exercises as well as two group projects working on a mechanical assembly produced via high volume manufacture. Prerequisite: ENGN 0310, 1740. Enrollment limited to 20.

ENGN 1931E. Writing Science.
This seminar focuses on communicating scientific and technical information to a lay audience in ways that engage and inform. The focus is on writing about new findings, scientific disputes and policy debates, along with producing profiles, feature articles, op-eds and blog posts. Students who complete this seminar will learn how to turn a collection of facts into a story, ways of explaining complex topics in simple terms, and how to differentiate between crucial technical details and clutter. Proficiency in English is assumed. Permission from the instructor is required. Preference will be given to seniors and graduate students. Enrollment limited to 15. WRIT

The course will explore where the majority of "useful" energy originates today. Main fossil energy sources (e.g., coal, crude oil, gas, shale oil, tar sands) and their chemical characteristics will be considered. Environmental aspects of fuel production (mining, drilling), fuel conversion technologies, both for delivering heat and power, and why there are limitations on the conversion to the latter. Calculations of "carbon footprint" will be illustrated. Common examples of emissions control technologies, including carbon capture and sequestration, will be presented. Policy and social implications of these energy issues will be discussed. Prerequisites: CHEM 0330 and ENGN 0720.

Independent Study in Engineering. Instructor permission required after submitting online proposal (http://brown.edu/academics/engineering/content/independent-study). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

Independent Study in Engineering. Instructor permission required after submitting online proposal (http://brown.edu/academics/engineering/content/independent-study). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

An introduction to methods of mathematical analysis in physical science and engineering. The first semester course includes linear algebra and tensor analysis; analytic functions of a complex variable; integration in the complex plane; potential theory. The second semester course includes probability theory; eigenvalue problems; calculus of variations and extremum principles; wave propagation; other partial differential equations of evolution.

An introduction to methods of mathematical analysis in physical science and engineering. The first semester course includes linear algebra and tensor analysis; analytic functions of a complex variable; integration in the complex plane; potential theory. The second semester course includes probability theory; eigenvalue problems; calculus of variations and extremum principles; wave propagation; other partial differential equations of evolution.

ENGN 2110. Business Engineering Fundamentals I.
The course examines core concepts in distinct areas through three modules: (1) intellectual property and business law, (2) technical marketing and (3) finance. All aspects of intellectual property will be treated, models on how to analyze markets will be discussed, culminating in a finance module which utilizes accounting fundamentals and models to perform financial analysis.

ENGN 2120. Business Engineering Fundamentals II.
The course examines core concepts in distinct areas through three modules: (1) organizations, leadership, and human capital, (2) implementing radical technology change, and (3) engineering ethics. Organization, leadership and human capital focuses on the attributes of effective leadership and the tactical operation of start-up companies, implementing radical technological change centers on disruptive technologies and their adaptation in the marketplace, and ethics treats the issues that arise in small start-up organizations with an emphasis on the interface of ethics and environmental, health and safety issues.
ENGN 2210. Innovation and Technology Management I.
Examines core concepts through four modules: (1) Industry Dynamics of Technological Innovation, (2) Formulating Technological Innovation Strategy, (3) Implementing Technological Innovation Strategy, and (4) Early Commercialization and Deployment. Industry Dynamics of Innovation will explore some of the drivers of technology innovation. Implementing Technological Innovation Strategy explores execution issues concerning the flow of technology and innovation from concept to physical product or service. Early Commercialization and Deployment will focus on more salient strategic and operational issues related to commercial readiness and roll-out of a technology-based product or service. Emphasis will be on technology oriented entrepreneurial enterprises, but exploration will also include larger more established organizations.

ENGN 2140. Innovation and Technology Management II.
Explores concepts relevant to the management of operations in industrial enterprises with an emphasis on technology-oriented firms. Topics fall into three basic modules: (1) Capacity Planning, (2) Industrial Engineering, and (3) Materials & Resource Engineering. Capacity Planning will focus on capacity considerations in manufacturing and service organizations. Industrial Engineering will examine optimizing plant and process layouts. Materials & Resource Engineering will cover various aspects of planning and scheduling material, labor, and work center capacity. Inventory management techniques will also be introduced and examined as will concepts such as materials requirements planning and aggregate planning.

ENGN 2150. Technology Entrepreneurship and Commercialization I.
ENGN 2150 and the spring ENGN 2160 form a sequence that develops the skills for technology-based entrepreneurship. It teaches creation of viable high-growth-potential new ventures from emerging science and technology. It is from emerging S&T that a high percentage of new jobs are created, both by existing large companies and through the formation of new companies. You will examine S&T for new opportunities, create novel product or service concepts from these sources and determine whether these concepts truly represent new business opportunities. Pedagogy is a combination of lectures and "experiential learning", with work undertaken as a two-semester project. Enrollment limited to 30 graduate students in the IMEE program.

ENGN 2160. Technology Entrepreneurship and Commercialization II.
ENGN 2160 and the prerequisite fall course 2150 form a course sequence that develops the knowledge of, and embeds the skills for, technology-based entrepreneurship. While 2150 has helped you to examine science and technology sources, and create a portfolio of opportunities from these, this course continues by developing selected opportunities into a compelling business case for the creation of a high growth potential new venture. Once again, learning is by a combination of lectures and "experiential learning", with work undertaken as a guided two-semester project. Prerequisite: ENGN 2150. Enrollment limited to 30 graduate students in the IMEE program.

ENGN 2180. Globalization Immersion Experience and Entrepreneurship Laboratory.
In this course, students will gain a better understanding of the political, social and cultural dynamics that influence entrepreneurial enterprises in different world regions. Meetings will be arranged with high technology companies and their venture arms, academic incubators, investment professionals, legal professionals, government officials, entrepreneurs, and other university faculty and students. The semester becomes a global entrepreneurship and innovation "laboratory" where students experience and take part in guest lectures from experts working in other countries. Classroom discussions, student presentations, papers and readings will be used to focus and further understand the globalization dynamic and its relationship to entrepreneurship. Prerequisite: ENGN 2110. Enrollment limited to 30 graduate students in the PRIME program.

ENGN 2210. Continuum Mechanics.

ENGN 2240. Linear Elasticity.

ENGN 2270. Advanced Elasticity.

ENGN 2280. Topics in Continuum Mechanics.
Devoted to one or more advanced topics in continuum mechanics not covered in detail by the regular courses. Examples are: nonlinear viscoelastic constitutive equations, strain gradient and micropolar theories of elasticity, coupled mechanical and thermal or electromagnetic phenomena, and continuum thermodynamics.

ENGN 2290. Plasticity.
Theory of the inelastic behavior of materials with negligible time effects. Experimental background for metals and fundamental postulates for plastic stress-strain relations. Variational principles for incremental elastic-plastic problems, uniqueness. Upper and lower bound theorems of limit analysis and shakedown. Slip line theory. Representative problems in structural analysis, metal forming, indentation, strain and stress concentrations at notches, and ductile failure.

ENGN 2320. Experimental Mechanics.
The design and evaluation of experiments in solid mechanics. Considers methods for experimental stress analysis and for the mechanical testing of materials. Topics covered include photoelasticity, creep and relaxation tests, high-speed testing, stress wave propagation, fatigue, and fracture. Techniques, instrumentation, and recording systems for the static and dynamic measurement of mechanical parameters such as forces, displacements, velocities, accelerations, and strains.

ENGN 2370A. Thin Films.
No description available.

ENGN 2370B. Topics in Solid and Structural Mechanics.
Devoted to one or more advanced topics in solid and structural mechanics not covered in detail by the regular courses, such as: numerical methods in solid mechanics, theory of optimal design, shell structures and instability, or other topics of interest to the staff or visitors.

ENGN 2380. Fracture Mechanics.
Theory of electron optics and principles of transmission electron microscopy, including dynamical theory of electron diffraction and image contrast. Applications to materials analysis including defect, boundary, and phase analysis. Analytical electron microscopy including convergent beam diffraction, energy dispersive x-ray analysis, and energy loss spectroscopy. Intensive laboratory exercises.

ENGN 2410. Thermodynamics of Materials. 

ENGN 2420. Kinetic Processes and Mechanisms in Materials Science. 
Continuum and atomistic descriptions of diffusion in solids. Reactions involving surfaces and interfaces, including evaporation, adsorption, grain growth, and coarsening. Phase transformation kinetics, including nucleation, growth, solidification, spinodal decomposition, and martensitic transformations. Analysis of systems with multiple kinetic mechanisms (typical examples include oxidation, crystal growth, and sintering). Prerequisite: background in basic thermodynamics. Recommended: ENGN 1410 or 2410 or equivalent.

ENGN 2430. Deformation Behavior of Materials. 
Linear elasticity as applied to isotropic and anisotropic materials; yield criteria including Von Mises, Tresca, Mohr-Coulomb, and Hill. Plastic deformation and slip. Dislocation theory. Mechanisms of hardening. Microstructural models of ductile, intergranular, and cleavage fracture. Toughening mechanisms. Creep, Fatigue. Prerequisites: ENGN 0410 and ENGN 1440 or equivalent.

ENGN 2440. Strength of Solids. 
Mechanical behavior of solids as interpreted through atomistic mechanisms. Theory and characteristics of dislocations in continuous and crystalline media. Intrinsic and extrinsic stacking faults, extended dislocations, point defects, nodes and networks, disclinations, crystal boundaries. Applications of dislocation theory to single and polycrystalline plasticity, work-hardening, stress-corrosion, creep, fatigue, hardening mechanisms, etc.

ENGN 2490A. Crystal Structures and Crystallography. 
The study and experimental analysis of solid structures from crystallography and crystal chemistry viewpoints. Electronic structure of the atom as related to core level chemical analysis techniques in material science, atomic arrangements in solids, form crystallography, crystal symmetry and symmetry of finite objects, and experimental techniques in x-ray diffraction. ENGN 2490B. To Be Determined.

ENGN 2500. Medical Image Analysis. 
Explosive growth in medical image analysis has enabled noninvasive methods to diagnose and treat diseases. The course will first discuss the fundamentals of formation of medical images such as CT, MRI, ultrasound, and nuclear imaging; then consider clinical constraints and discuss methods in image guided therapy/surgery, techniques to detect, delineate, measure, and visualize medical organs and structures.

ENGN 2501. Digital Geometry Processing. 
Three-dimensional geometric models are fundamental for applications in computer vision, computer graphics, medical imaging, computer aided design, visualization, multimedia, and many other related fields. This course includes the study of basic data structures and algorithms for representing, creating, manipulating, animating, editing, and analyzing digital geometry models, such as point clouds and polygon meshes, as well as state-of-the-art material from the current scientific literature. This is a project oriented course with several programming assignments and a final project. Students are expected to have successfully completed an introductory computer graphics/vision course or have an equivalent background. Instructor permission required. Open to seniors and graduate students.

ENGN 2502. 3D Photography. 
In 3D Photography, cameras and lights are used to capture the shape and appearance of 3D objects represented as graphical models for applications such as computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality. This course covers 3D capture techniques and systems, surface representations and data structures, as well as methods to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Instructor permission required.

This course covers fundamental topics in pattern recognition and machine learning. We will consider applications in computer vision, signal processing, speech recognition and information retrieval. Topics include: decision theory, parametric and non-parametric learning, dimensionality reduction, graphical models, exact and approximate inference, semi-supervised learning, generalization bounds and support vector machines. Prerequisites: basic probability, linear algebra, calculus and some programming experience.

An introduction to the basics of linear, shift invariant systems and signals. Quantization and sampling issues are introduced. Discrete time and DFT properties, fast DFT algorithms, and spectral analysis are discussed. IIR and FIR digital filter design is a focus; stochastic and deterministic signals are introduced. MATLAB exercises are a significant part of the course.

ENGN 2540. Speech Processing. 
The basics for speech production and hearing are introduced. PDEs and simplified vocal-tract models are derived. LPC, DFT filterbank and time varying signal processing for speech recognition analysis are discussed in mathematical detail. Dynamic programming, vector quantization, hidden Markov modeling, and neural-network pattern recognition for speech are introduced. Offered every other year.

ENGN 2560. Computer Vision. 
An interdisciplinary exploration of the fundamentals of engineering computer vision systems (e.g., medical imaging, satellite photo interpretation, industrial inspection, robotics, etc.). Classical machine vision paradigms in relation to perceptual theories, physiology of the visual context, and mathematical frameworks. Selections from Gestalt psychology, Gibsonian approach primate visual pathways, edge-detection, segmentation, orientation-selectivity, relaxation-labeling, shading, texture, stereo, shape, object-recognition.

The study of stochastic processes and a number of applications central to electrical engineering. Analysis of continuous and discrete time Gaussian and second order stochastic processes. Stochastic calculus, Innovations and spectral representations. Markov random fields. Applications to Kalman filtering, the detection of signals in the presence of noise, and two-dimensional image processing. MATLAB projects. Prerequisite: an undergraduate level course in probability or statistics.

ENGN 2600. Electronic Processes in Semiconductors. 
Electronic processes primarily in semiconductors with tetrahedral bonding (Si, Ge, GaAs compounds). Topics include phonon spectra, band structure, impurity states, electron and hole distributions, optical properties, electron plasma, scattering processes, excess and hot carriers, semiconductor-metal transitions, one- and two-dimensional electron gas, and amorphous semiconductors. Prerequisite: PHYS 2410 or equivalent.

Current and proposed semiconductor devices: bipolar transistors (silicon and heterojunction); field effect transistors (MOSFETs, heterostructure, and submicron FETs); hot-electron and quantum-effect devices; and photonic devices (LEDs, semiconductor lasers, and photodetectors). Prerequisites: ENGN 1590 or equivalent introductory device course; some quantum mechanics helpful but not required.

ENGN 2620. Solid State Quantum and Optoelectronics. 
Incorporates the study of interaction of radiation with matter emphasizing lasers, nonlinear optics, and semiconductor quantum electronics. Q-switching and mode-locking, electro- and acousto-optic interactions,
harmonic generation and parametric processes, self-focusing and phase modulation, stimulated Raman and Brillouin scattering, ultrashort pulse generation, nonlinear processes of conduction electrons in semiconductors, bulk and surface polaritons. Prerequisite: ENGN 2600 or equivalent.

ENGN 2630. Electro-Optical Properties of Materials and Biomolecules.
Fundamental ideas and principles relevant to the understanding of the electrical and optical properties of materials and bio-molecules are emphasized. The mathematics is deliberately kept to a minimum. Topics include metals, semiconductors dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, photosynthesis and redox proteins. Prerequisites: ENGN 0510 and PHYS 0470.

ENGN 2640. Classical Theoretical Physics II (PHYS 2040).
Interested students must register for PHYS 2040.

ENGN 2660. Physics and Technology of Semiconductor Heterostructures.
Covers, largely from an experimental point of view, topics of current interest in semiconductor heterostructure physics and technology; magentotransport in two-dimensional electron gas; integer and fractional quantum Hall effects; resonant tunneling and superlattice transport; optical and transport properties of quantum wires and dots; heterostructures based devices; other topics of student interest. Prerequisites: PHYS 1410 or equivalent quantum mechanics and ENGN 1590 or introductory device course helpful but not required.

ENGN 2730. Advanced Thermodynamics I.
Fundamental principles of macroscopic equilibrium; thermodynamic stability; Gibbs relations and chemical thermodynamics; applications to various systems, including fluids, solids, and magnetic and dielectric materials. Fundamental principles of macroscopic nonequilibrium thermodynamics (irreversible processes). Entropy production; Curie's principle; Onsager-Casimir reciprocal relations; applications to transport and relaxation phenomena in continuous systems.

ENGN 2740. Advanced Thermodynamics II.
Introduction to the statistical mechanics of equilibrium phenomena for classical and quantum-mechanical systems. Ensemble theory; fluctuations; statistical interpretation of the laws of thermodynamics; applications to ideal gases, chemical equilibrium, simple crystals, magnetic and dielectric materials, radiation, and condensation phenomena.

ENGN 2760. Heat and Mass Transfer.

ENGN 2770. Catalyst Design and Atomistic Reaction Engineering.
Covers the principles of operation of heterogeneous catalysts and advanced reaction engineering with an emphasis on catalysis theory. Includes electronic structure calculations, linear scaling relations, free energy relations, surface reactivity, rate theory, and electrocatalytic concepts. Applications of study in this course will focus on catalysts for energy conversion. Students should have a background in chemical reactions and thermodynamics.

ENGN 2810. Fluid Mechanics I.
Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

ENGN 2820. Fluid Mechanics II.
Introduction to concepts basic to current fluid mechanics research: hydrodynamic stability, the concept of average fluid mechanics, introduction to turbulence and to multiphase flow, wave motion, and topics in inviscid and compressible flow.

ENGN 2880A. Chemical Reaction Engineering.
Elements of chemical rate processes; steady-state and transient behavior of continuous-flow chemical reactors; uniqueness, multiplicity, and stability in chemical reactor systems and individual catalyst particles; heterogeneous chemical reactor analysis focusing packed beds (continuum and discrete models) and fluidized beds (deterministic and stochastic models).

ENGN 2910A. Advanced Computer Architecture.
This class focuses on advanced computer architecture concepts, including super-scalar processor design, out-of-order execution, branch prediction, multi-core processors, memory hierarchy consistency, GPU architectures, and architecture of large-scale systems such as data centers and supercomputers. Class work expected to include HWs, Labs, and projects. Prerequisite: ENGN 1640 or permission of instructor.

ENGN 2910B. Advanced Process in Materials: Thin Film Processing and Characterization.
No description available.

ENGN 2910C. Advanced Processing of Materials.
This course will present a detailed consideration of processing of specific types of materials. In this particular offering, electronic materials will be the focus of the discussion. Detailed state of the art methods of processing will be described and the relationship between processing and the resulting properties will be discussed.

ENGN 2910D. Engineering and Design I.
No description available.

ENGN 2910E. Complex Fluids.
Complex fluids comprise a large class of "soft" microstructured materials which are encountered extensively in engineering applications and biological systems. This course will explore the interrelation between the microscale physics, microstructure and macroscopic properties of complex fluids. Topics include surfactants and self-assembly, intermolecular forces and stability of colloidal suspensions, polymer solutions, ordered phases and liquid crystals, electrokinetic phenomena, rheology.

ENGN 2910F. Nano and Micro Mechanics of Solid Interfaces.
This course covers the topics: Mechanics of intermolecular forces and surface forces; Adhesion and friction of hydrophobic and hydrophilic surface complexes; Mechanics aspect of chemical etching and chemical reactions on solid surfaces; Interface energetics and kinetics with anisotropic elasticity and diffusion equations; Micromechanics of grain boundaries and interface fracture Nano and micro mechanics of single asperity and rough-surface contact friction.

ENGN 2910G. Topics in Translational Research and Technologies.
To improve human health, engineering and scientific discoveries must be explored in the context of application and translated into human/societal value. Translational research is creating a fundamental change in the way basic science and engineering research has operated for decades, breaking down the literal and figurative walls that separate basic scientists/ engineers and clinical researchers. Such discoveries typically begin at "the bench" with basic research--and in the case of medicine--then progress to the clinical level, or the patient’s "bedside." This seminar course will utilize case studies to demonstrate to students how the translational research unfolds. Lectures will be delivered by clinicians, medical researchers, engineers, and entrepreneurs, with case studies focused on topics ranging from value creation, IRB, HIPAA, FDA approval, etc.

ENGN 2910H. Flat Panel Display.
No description available.

ENGN 2910I. Mechanics of Entropic Forces in Biological Adhesion.
Course will cover fundamental concepts of entropic force and its significance in mechanical systems involving "soft matter". A prominent example is cell adhesion which plays a central role in cell migration, spreading, differentiation and growth. For such problems, the importance of mechanics and mechanical forces has been widely recognized and are currently under intensive research. This course is also aimed to stimulate live discussions on potential research topics and opportunities at the interface between solid mechanics and biological mechanics, with emphasis on cell-substrate, cell-cell and cell-particle interaction. Fundamental concepts to be discussed include Brownian motion, fluctuation, diffusion, dissipation, ligand-receptor bonds, single molecule
mechanics, stochastic dynamics of binding/rebinding, elasticity, stress fibers, cytoskeleton, focal adhesion and endocytosis.

**ENGN 2910K. Cell Mechanics.** Course is designed for students with a strong background that want to learn more about mathematical and mechanical descriptions of the cell and its functions. It will include an overview of cell biology emphasizing locomotion, mitosis (cell division), intracellular transport, cellular mechanotransduction, and biological material properties. The course will draw examples from recent theoretical and experimental research investigations, and teach quantitative tools commonly used by engineers in the field.

**ENGN 2910L. Chemical and Transport Processes in the Environment.** This course will cover fundamental properties and processes that are important for the fate and transport of chemicals in the environment. Topics will include biodegradation, complexation, sorption, phase-partitioning, and solution chemistry. Emphasis will be placed on natural and engineered environmental systems, including a range of environmentally relevant media (e.g. water, air, soil/sediments, plants, organisms). Conceptual understanding of chemical structure and its role in environmental transport will be highlighted, while quantitative approaches will be used to solve problems. This course is relevant for graduate students interested in environmental pollution chemistry. Undergraduates need permission of the instructor to register.

**ENGN 2910M. Biosensors and Applied Microfluidics.** This course will acquaint students with two modules: 1) new approaches to detection and quantification of biological molecules for diverse purposes ranging from medical diagnostics to food safety to defense, 2) processes at the microscale which can be translated into applications. The topics will include sensing platforms, devices, instrumentation, biomolecular engineering of probe molecules, quantitative evaluation, separations, sample stacking, DNA/protein sizing and diagnostic devices for use in developing countries. Lectures, assignments, a group design project and a laboratory will acquaint students with the state-of-the-art in biosensors and applied microfluidics. The course is relevant to physicists, chemists, biologists and engineers.

**ENGN 2910N. Molecular and Cellular Biomechanics.** Mechanics and statistical mechanics applied to biological systems. Topics will include semiflexible polymers (DNA, microtubules, actin, flagella), membranes, and molecular motors. We will cover fundamentals including Brownian motion, random walks, diffusion, the fluctuation-dissipation theorem, and electrostatics of ions in solutions.

**ENGN 2910O. Molecular Simulation Methods in Mechanics and Physics.** Random numbers in molecular simulations, Monte Carlo methods applied to equilibrium systems, Kinetic Monte Carlo methods, Molecular dynamics with simple potentials - equilibrium properties in various ensembles (EN, NVT, NPT, NoT) and non-equilibrium properties. Simulations with three-body potentials and EAM potentials. Molecular statics. Introduction to quantum mechanical methods, Application to the above methods to defect interactions in solids, structure of surfaces, crystal growth and structure of nanostructures.

**ENGN 2910P. Nano-system Design.** The goal of this course is to provide a broad understanding of the many fields that are involved in electronic nanotechnology. The material will focus on considering how new basic devices intended to replace silicon-based transistors, such as single-molecule organic switches and nanotube electron conduits, will impact VLSI, computer architecture, and how we may design systems to take advantage of the opportunities they offer. Class will include a mix of lectures and discussion on assigned reading of recent publications. Students will be responsible for leading and participating in these discussions. A course project will also be required. Prerequisites: ENGN 1640 and 1600 are helpful, but not required.

**ENGN 2910T. Physics of Materials.** No description available.

**ENGN 2910U. Quantum, Statistical and Continuum Mechanics.** No description available.

**ENGN 2910V. Simulation Methods in Physics and Mechanics.** No description available.

**ENGN 2910W. Synthesis of VLSI Systems.** Promotes understanding of the algorithms used in designing many of today's CAD tools used for VLSI. Topics include synthesis of two-level and multi-level logic, logic testability and automatic test pattern generation, technology mapping, and sequential synthesis. Also introduces efficient manipulation algorithms for logic functions (based on Binary Decision Diagrams). Prerequisite: ENGN 1630. ENGN 1600 is helpful.

**ENGN 2910X. Video Processing.** This special topic course will address the rapidly evolving technologies involved in representing and processing video data, including compression, tracking and 3-D modeling. The course will involve projects to implement live and file-based video processing algorithms as well as periodic quizzes. Projects will be carried out primarily in C++.

**ENGN 2910Z. Small Wonders: The Science, Technology, and Human Health Impacts of Nanomaterials.** Survey course focusing on nanomaterials as enabling components in emerging nanotechnologies. Covers scaling laws for physicochemical properties, synthesis routes, manipulation and characterization tools, and example applications in sensors, composites, advanced energy devices, and nanomedicine. Impacts of nanomaterials on environment and health, including the interactions between nanoscale structures and biological molecules, cells, and whole organisms. Undergraduate enrollment by permission.

**ENGN 2911A. Nanoelectronics.** Review and analysis of novel and exotic electronic devices, and proposals for extending scaling into the nanometer regime. Contemporary research and development in areas such as nonclassical CMOS; single-electron and nanocrystal memories; 1D nanotube and nanowire transistors, qubits, quantum dots, spin transistors, molecular electronics; and the realization of such elements in arrays and biologically inspired networks.

**ENGN 2911B. Electrical and Optical Properties of Materials and Biomolecules.** Fundamental ideas and basic principles relevant to the understanding of the electrical and optical properties of solid-state materials and biomolecules are emphasized. Topics, including metals, semiconductors, dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, and redox proteins, are selected in order to explain the operation of devices having current or future applications in engineering.

**ENGN 2911C. Digital Integrated Circuit Testing and Hardware Security.** Testing of digital integrated circuits has historically focused on the detection and diagnosis of manufacturing defects. However, in the past few years, testing for security has become an important hot topic. This class will cover testing fundamentals along with new approaches for the detection of hardware Trojans (malicious circuitry inserted into a design by an adversary). Related topics in hardware security and authentication, including physically unclonable functions, will also be discussed. Prerequisite: ENGN 1630 or equivalent or permission of instructor.

**ENGN 2911D. Engineering and Design II.** No description available.

**ENGN 2911E. New Frontiers of Solid Mechanics in Nano- and Bio-Research.** Course will cover fundamental concepts and methods in continuum, atomistic and statistical modeling of nanoscale and hierarchical materials in engineering and biology. Various systems and phenomena, including thin films, nanocrystalline materials, fracture, hierarchical tissue structures of bone and gecko, cell adhesion and endocytosis, carbon nanotubes
and biomolecular assembly, are selected to stimulate discussions at the forefront of solid mechanics research.

ENGN 2911F. Topics in Emerging and Breakthrough Technologies. No description available.

ENGN 2911G. Physical Design of Digital Integrated Circuits. This class investigates the physical principles and algorithmic methodologies that are used in physically designing and implementing state-of-the-art digital circuits and high-performance processors. We'll also survey the main available design implementation tools in the market and examine new directions for innovative solutions.

ENGN 2911J. Computational Electromagnetics. This course will introduce numerical techniques for solving practical and theoretical problems in optical science. Using Matlab and Mathematica, students will develop a toolkit for physical optics and build an intuition for wave propagation (e.g. transfer matrices), Fourier optics (beam propagation methods, normal mode analysis), light emission/absorption (surface- and cavity-enhanced lifetimes) as well as general finite difference schemes (frequency and time domain). Prerequisites: ENGN 0510 or PHYS 0470; APMA 0330 or APMA 0350; MATH 0520 or MATH 0540; or equivalent courses.

ENGN 2911K. Biological Impacts of Nanomaterials. This course will emphasize advancements nanomaterials have made in several fields. In doing so, this course will cover fundamentals of nanomaterial synthesis and biological responses of nanomaterials if ingested, inhaled, or implanted. Biological concepts (immune response, cellular toxicity, etc.) will be combined with engineering concepts (manufacturing and property control) to understand the relationship between manufacturing and biological impacts of nanomaterials.

ENGN 2911L. Environmental Technologies and Human Health. No description available.

ENGN 2911X. Reconfigurable Computing: Accelerate Your Algorithms. Driven by recent innovations in Field-Programmable Gate Arrays (FPGAs), reconfigurable computing offers unique ways to accelerate key algorithms. FPGAs offer a programmable logic fabric that provides the necessary hardware and communication assets to exploit parallelism opportunities arising in various algorithms. By mapping algorithms directly into programmable logic, FPGA accelerators can deliver 10X-100X performance increases over generic processors for a large range of application domains. The class will describe FPGA architectures, reconfigurable systems, languages (SystemC) and design tools. The class will show a class of algorithmic techniques (e.g., dynamic programming) that are particularly attractive targets for reconfigurable computing. Mapping specific algorithms from different domains will also be described. These include computer vision, image and signal processing, network security, and bioinformatics algorithms. The class requires basic hardware and programming languages knowledge.

ENGN 2911Y. Verification, Test, Synthesis. This course will provide an overview of algorithms and techniques in electronic design automation relating to the synthesis, verification, and test of digital integrated circuits. Some topics covered will include synthesis of two-level and multi-level circuits, logic minimization, representations of combinational and sequential circuits for design automation, ordered binary decision diagrams, equivalence checking, verification coverage, assertions, and automatic test pattern generation. Classic techniques and recent state-of-the-art research advances will both be discussed.

ENGN 2911Z. Principles of Nano-Optics. The goal of this course is to help students build an intuition for light-matter interactions at the nanoscale, especially when optically active elements are located near complex surfaces. The course will begin with a review of the theoretical foundations of macroscopic electrodynamics, but will continue on to discuss specific experimental techniques for investigating microscopic behavior. Topics will include near-field optical microscopy, quantum dots and single molecule spectroscopy, surface plasmon polaritons, local density of states, and photonic crystals.

ENGN 2912A. Toxicity of Nanoparticles. This course will emphasize advancements nanoparticles have made in several medical fields such as preventing, diagnosing, and treating various diseases. This course will integrate fundamental knowledge of toxicity into such applications. In particular, the course will cover current results in terms of nanoparticle applications and potential toxicity. Toxicity in such organs as the lungs, blood, kidneys, liver etc. will be emphasized. Biological concepts will be combined with engineering concepts to understand the relationship between manufacturing and nanoparticle toxicity.

ENGN 2912B. Scientific Programming in C++. Introduction to the C++ language with examples from topics in numerical analysis, differential equations and finite elements. As a prerequisite, some programming knowledge, e.g., MATLAB projects. The course will cover the main C++ elements: data types; pointers; references; conditional expressions; streams; templates; Standard Template Library(STL); design and debugging techniques.

ENGN 2912C. Future Directions in Computing: From Bio and Quantum to Nano and 3D. Silicon-based electronics is the foundation of computing devices. The computer industry is reaching an important milestone, where physical limits arising from using optical lithography manufacturing techniques can stop the evolution of computational power as predicted by Moore's law. In this class, we explore some of the alternatives that can be used for future computing devices. Topics covered include: quantum computing, bio-based computing, spin-based computing, nanotube-based computing, computing with light and 3D chips.

ENGN 2912D. Networks and Network-on-Chip Design. Network-on-Chip communication fabrics are a very recent approach to multi-core system-on-chip design. This class will cover state-of-the-art research in the design and test of network-on-chip communication hardware and will compare these on-chip communication networks to more traditional networks. Additional aspects of system-on-chip design and test will also be explored. Prerequisites: ENGN 1630 and ENGN 1640 or equivalent experience in digital design.

ENGN 2912E. Low Power VLSI System Design. This course deals with the design of digital systems for low power dissipation. Issues that will be addressed include CMOS power dissipation, analysis and design tools used for lower power digital circuits, design methodologies for low power CMOS circuits, low power architecture designs, and a discussion on future challenges in low power digital design. Prerequisites: familiarity with basic MOSFET structure and computer architecture principles; some circuit analysis helpful.

ENGN 2912F. Soft Matter. This course is a special topics graduate course on soft matter, treating polymers, liquid crystals, surfactants, and colloids. The different topics will be unified by a common approach using statistical mechanics.

ENGN 2912H. Interfacial Phenomena. This course is an introduction to mechanics of material interfaces. Particular cases considered are liquid surfaces (surface tension, contact line slip, electro-wetting, etc), lipid membranes, and thin elastic plates and shells. The course will cover detailed analyses of statics and dynamics of these interface. Classical and modern research papers related to these topics will form the motivation for the discussion. A unified treatment of these apparently disparate interfaces is presented to conclude the course. Prerequisites: ENGN 2010, 2020, 2210, or 2810.

ENGN 2912I. Selected Topics in Physics of Locomotion (PHYS 2610E). Interested students must register for PHYS 2610E.

ENGN 2912J. Mixed-Signal Electronic Design. ADCs, DACs, switched-capacitor circuits, noise and distortion. Circuit simulation and system design projects. Examples will be used from various biological sensing and instrumentation applications and recent scientific literature. Prerequisite: ENGN 1620 and 1630, or instructor permission. Enrollment limited to 20.

ENGN 2912P. Topics in Optimization. This course will cover various topics in discrete and continuous optimization. Topics include graph algorithms, dynamic programming,
linear programming, convex optimization and coarse-to-fine methods. Prerequisites: CSCI 1570 and one of MATH 0520 or CSCI 0530. Undergraduate students require instructor permission to register.

**ENGN 2920A. Complex Fluids: Particles and Interfaces.**
Introduces disperse systems (colloidal suspensions, emulsions, surfactant solutions, blood) with special attention to the thermodynamics and mechanics of interfaces. The course will bridge the physico-chemical and mechanical perspectives in the study of these materials. The intended audience is graduate students in Engineering, Physics, Chemistry, and Applied Mathematics. Prerequisite: We will sometimes use material from ENGN 2010/2020, such as differential equations, Fourier and Laplace transforms, elementary differential geometry, basic probability, vector calculus. Knowledge of basic solid/fluid mechanics will be helpful.

**ENGN 2920B. Mechanics of Energy Storage Materials.**
This course introduces the students to the mechanics aspects of battery materials and some of the current research problems. It will consist of a series of lectures by experts from academia and industry, which will cover the state of the art in lithium ion batteries, the role of mechanics in advancing the field, experimental studies, continuum modeling and practical design issues. There will be approximately one lecture each week (150 min); each lecture will focus on a specific aspect of battery materials, giving an in-depth treatment of scientific problems, the current state of understanding and future challenges.

**ENGN 2920D. Environmental Technologies and Human Health.**
This course explores interdisciplinary approaches to environmental safety and health drawing from Brown University faculty and other affiliated experts. Topics include history of environmental regulation and waste management; origin and chemistry of pollutants; biological impacts of exposure and risk assessment; pollutant dispersion, transport and bioaccumulation; and remediation technologies. Emphasis is placed on how scientific research impacts regulatory and engineering decisions regarding cleanup and management of contaminated sites. The target audience is graduate students and advanced undergraduates (permission required) with prior coursework or research in engineering, biology, or environmental studies. Enrollment limited to 30.

**ENGN 2930. Atomistic Modeling of Materials.**
This class describes the fundamentals of statistical mechanics with a focus on both traditional analytic methods and modern atomistic simulations methods. The class is divided in two parts. (i) Techniques used to calculate interactions at the atomic level are first covered, from simple interatomic potentials to quantum mechanical first-principles methods. (ii) Simulations techniques to sample atomic degrees of freedom for obtaining macroscopic quantities are then discussed, such as Monte Carlo and Molecular Dynamics. The tools presented in class are illustrated with ongoing examples that illustrate how these methods work in concert. Enrollment limited to 40 graduate students.

**ENGN 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ENGN 2980. Special Projects, Reading, Research and Design.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ENGN 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
Community Health Concentration Requirements

Community Health is an interdisciplinary concentration through which students examine a variety of issues, including population health and disease, health policy, cross-cultural and international aspects of health, the organizational and social structures through which health services are delivered and received, and the public health system. Courses in the concentration allow students to explore the ways in which the social, political, behavioral and biological sciences contribute to the understanding of patterns of population distributions of health and disease. The concentration also provides students with courses in basic research methods and statistics necessary for problem solving and critical thinking in the emerging emphasis on evidence-based health care.

The requirements listed below are specific to the AB Community Health concentrators in the class of 2015 and earlier. Students in the class of 2016 and beyond, please visit http://bulletin.brown.edu/the-college/concentrations/pubh/ for the AB Public Health concentration requirements. Students interested in the combination AB Community Health/MPH degree should visit http://brown.edu/academics/public-health/abmph-required-courses for a list of those requirements.

Required Courses:

<table>

### Public Health Concentration Requirements

The requirements listed below are for AB Public Health concentrators in the class of 2016 and beyond. AB Community Health concentrators, in the classes of 2014 and 2015 should refer to [http://bulletin.brown.edu/the-college/concentrations/comm/h/](http://bulletin.brown.edu/the-college/concentrations/comm/h/) for degree requirements.

#### Required Courses:
- **PHP 0310** Health Care in the United States 1
- **PHP 0320** Introduction to Public Health 1
- **PHP 1910** Community Health Senior Seminar 1
- **PHP 1980** in both semesters of their senior year to conduct research and write the honors thesis.

#### Environmental Health and Policy Electives (Students must select one of the following):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Total Credits 12

1 No more than two (2) of the electives can be Human Biology/Physiology courses.

Honors: An Honors track is available for students who qualify. Honors track students are also required to enroll in PHP 1980 in both semesters of their senior year to conduct research and write the honors thesis. Please visit http://brown.edu/academics/public-health/honors-track for details.

Inquiries: Sarah Hemond (Sarah_Hemond@brown.edu)

Master of Public Health Graduate Program

The Master of Public Health (M.P.H.) degree is dedicated to developing skilled professionals who are committed to improving the health of communities by translating rigorous scientific research into sound, evidence-based public health policy and practice.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-public-health

Biostatistics Graduate Program

The graduate program in Biostatistics offers comprehensive course work leading to a Master of Science (Sc.M.); a Master of Arts (A.M.); and the Doctor of Philosophy (Ph.D.) degrees. The graduate programs in Biostatistics are designed to provide training in theory, methodology, and practice of statistics in biology, public health, and medical science. The program provides comprehensive training in theory and methods of biostatistics, but is highly interdisciplinary and requires students to acquire expertise in a filed of application. The Ph.D. program is intended to enable graduates to pursue independent programs of research; the Sc.M. and A.M. programs provide training for application of advanced methodology in professional and academic settings.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biostatistics

Behavioral Social Sciences Intervention Graduate Program

The interdisciplinary Master of Science (Sc.M.) and Master of Arts (A.M.) program in Behavioral and Social Sciences Intervention (BSSI) trains graduate students who are interested in analyzing the complex behavioral and social determinants of public health, and in developing interventions to change behaviors and improve social contexts related to public health.
Clinical and Translational Research Graduate Program

The goal of the Master of Science (Sc.M.) degree program in Clinical and Translational Research is to train clinicians and basic scientists to extend basic scientific research into the clinical arena, ultimately leading to improvements in individual and population health. By translating basic research into improved clinical outcomes, researchers and clinicians are able to provide new treatments to patients more efficiently and quickly.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-behavioral-and-social-sciences-intervention

Epidemiology Graduate Program

The graduate program in Epidemiology offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. Using sophisticated study designs, statistical analyses, field investigations, and laboratory techniques, epidemiology students investigate the multiple causes of a disease, disease distribution (geographic, ecological, and social), methods of transmission, and measures for control and prevention.

For more information on admission and program requirements, please visit: http://brown.edu/academics/public-health/epidemiology/home

Health Services Research Graduate Program

The graduate program in Health Services Research offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The program seeks to develop scientists experienced in the use of state-of-the-art experimental and non-experimental research methods to investigate how people obtain access to health care, the components and impacts of health care costs, and what happens to patients as a result of care. Health services research aims to identify the most effective ways to organize, manage, finance, and deliver high quality care to benefit population health.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-clinical-and-translational-research

Courses

PHP 0030. Health of Hispaniola.
Two developing countries, Dominican Republic and Haiti, have widely differing health outcomes despite centuries of shared experience on the Caribbean Island of Hispaniola. This course will examine the history, politics, economics, culture, international relations, demography, and geography, as well as epidemiology and health services, to demonstrate that multiple factors, both recent and long-standing, determine the present health of these populations. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

PHP 0040. Addiction: The Causes, Cures and Consequences of Substance Abuse in Modern Society.
Addiction has been recognized by the psychological and medical community as a chronic, physical disease, affecting the body in ways which mirror the mechanisms of other neurological disorders. However, despite definitive research suggesting the genetic and physical roots of addiction disorders, the disease of addiction still faces significant prejudice from laws and societies seeking to place blame upon addicts themselves. Stereotypes and misconceptions that cast addicts as morally corrupt deviants lacking in will power still pervade cultural and political discourse, creating and maintaining powerful stigmas that prohibit addicts and their families from seeking care. Enrollment limited to 20 first year students. FYS WRIT

PHP 0050. Pain and the Human Condition: Exploring the Science, Medicine, and Culture of Pain.
Pain is a universal human experience, yet it is highly subjective. For most, pain represents an occasionally unpleasant, self-limited experience. However, for others, chronic pain persists beyond the recovery from an injury or as a result of a chronic health condition. Persons with chronic pain often describe their pain as permeating every aspect of their lives. While an active area of research, pain remains a significant challenge to the individual seeking treatment, the health care provider and society. This multidisciplinary course introduces students to scientific, medical, and public health aspects of pain and explores personal narratives and cultural meanings of pain. Enrollment limited to 20 first year students. FYS WRIT

PHP 0310. Health Care in the United States.
Introduction to the health care delivery system. An overview of the U.S. health care financing, delivery and regulatory system. Considers the interaction between paying for and providing and assuring the quality of health services; changes in one component of the system inevitably affect the others. Addresses the balance between employer funded health insurance, publicly funded health insurance and the consequences of not being insured. Seven discussion sections arranged during the semester. Open to undergraduates only.

PHP 0320. Introduction to Public Health.
An introductory overview of the U.S. Public Health System with an emphasis on the core functions of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. Presents a comprehensive overview of the environmental and behavior factors associated with health promotion and disease prevention.

PHP 1010. Doctors and Patients- Clinical Communication in Medicine.
Communication is central to medical practice and interpersonal relationships between patients and physicians can often be powerful curative agents. This course reviews theory and research on physician-patient communication. In addition to lectures, readings, and discussions, students will have opportunities to observe physicians in clinical settings. Appropriate for students interested in communication sciences, health psychology, health education, pre-med and other clinical training, and medical anthropology. Enrollment limited to 20.

PHP 1070. The Burden of Disease in Developing Countries.
Defines and critically examines environmental, epidemiologic, demographic, biomedial, and anthropological perspectives on health and disease in developing countries. Emphasis on changes in the underlying causes of morbidity and mortality during economic development. Focuses on the biosocial ecology of diseases. Required major term paper worth 50% of final grade is scholarly centerpiece of course. Weekly discussion sections and small group research projects supplement the two exams and term paper. Guest lecturers cover different diseases and public health perspectives. Enrollment limited to 65. DVPS LILE WRIT

PHP 1100. Comparative Health Care Systems.
Focuses on principles of national health system organization and cross-national comparative analysis. Emphasizes application of comparative models to the analysis of health and health-related systems among nations at varying levels of economic development and health care reform. Addresses research questions related to population health and systems’ performance. Questionnaire completion required for Freshman and Sophomore students. Enrollment limited to 30.

PHP 1320. Survey Research in Health Care.
An introduction to the methodology of survey research as it is conducted by social scientists and epidemiologists. Provides an overview of all aspects of study design and instrument development as well as an introduction to statistical analysis of survey data. Prerequisite: PHP 0320. Students should fulfill the department’s statistics requirement prior to taking, or concurrently with, this course.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-behavioral-and-social-sciences-intervention
PHP 1350. Prisoner Health Inside Out.
Correctional institutions are reservoirs of physical and mental illness. 60% of prisoners are substance involved; 50% suffer from mental illness; 34% are addicted. Infectious disease rates top ten times those of the general public. Nine million prisoners--overwhelmingly uninsured and poor, predominantly men of color--return to their communities annually. The public health implications of these numbers are staggering. This course brings together some of the nation's top researchers in correctional health and substance use and addiction with the state's senior prison administrators to examine the extraordinary health challenges--and care and treatment possibilities--our epidemic of incarceration has created.

The course is intended to challenge students from different disciplines to develop strategies to address the challenges of establishing and sustaining HIV/AIDS care and treatment programs in Africa. The course will begin with a general introduction to HIV/AIDS to provide a foundation wherein students will obtain a basic scientific and sociological understanding of the disease. Discussion topics on: the impact of AIDS, introducing antiretroviral therapy in Africa, monitoring and evaluating ARV therapy scale up and developing a country wide plan for a national laboratory system to support HIV/AIDS care and treatment will be facilitated through the use of case studies. Enrollment limited to 25 juniors and seniors.

The course focuses on nutritional status influences on population health of low and middle income countries. It covers both 1) undernutrition, including protein-calorie malnutrition and specific micronutrient deficiencies; and 2) overnutrition, including obesity. It covers morbidity and mortality associated with under- and overnutrition. Nutritional aspects of maternal and child health and the association of nutritional exposures early in life and later adult health are emphasized. Specific areas include nutritional status measurement, including body size and composition, dietary intake and physical activity, as well as household, community, and national, socioeconomic and political factors. Prerequisites: PHP 1070, 2120, 2150, or BIOL 0030.

Problems and issues surrounding delivery of emergency medical services in U.S. Topics: cost of illness; rationing health care; living wills; malpractice and its effects; effects of alcohol and other risk behavior. Priority to community health concentrators and PLME students pursuing MPH degree. Enrollment limited to 60.

PHP 1530. Case Studies in Public Health: The Role of Governments, Communities and Professions.
This course provides an integrated knowledge of the public health's development, policy, practice and infrastructure and its relationship to medical care, social services and the environment. The matrix approach juxtaposes public health content (e.g., infectious disease) and public health tools (e.g., behavioral theory, policy/advocacy/epidemiology/quality improvement/program planning) using case studies. It aims to strengthen students' capacity to apply a population-based viewpoint to public health practice. Prerequisite: PHP 0320. Enrollment limited to 40.

PHP 1540. Alcohol Use and Misuse.
Reviews the epidemiology of alcohol use, abuse, and dependence and examines its neurobiological and behavioral underpinnings. Covers etiology including physiological, genetic, psychological and social cultural influences, and prevention, brief intervention and treatment considerations. Course background in psychology, sociology, or community health is recommended. Recommended prerequisites: PHP 0320 and CLPS 0010. Enrollment limited to 20 juniors, seniors, and graduate students.

PHP 1600. Obesity in the 21st Century: Causes, Consequences and Countermeasures.
The scope of obesity knowledge is too large to cover during one single course, therefore we will focus primarily on obesity-related health outcomes, assessment of obesity, obesity epidemiology, social and behavioral correlates of obesity, obesity and stigma, policy and interventions across population groups. The readings for this course are multi-disciplinary in nature and integrate epidemiological, biological, sociological, political and philosophical perspectives. This course is specific to the United States and thus all readings will reflect this contextual focus. Enrollment limited to 30.

PHP 1680D. Ethical Perspectives in Environmental Health.
Introduction to ethical principles and concepts shaping emerging field of environmental ethics. Examines interfaces between policy, science, economic and social drivers attendant to ethical decision-making related to environmental issues. Environmental actions/decisions are used as case studies to identify, review and analyze ethical principles and approaches. Impact of national and international decisions are examined for their local impact. Enrollment limited to: 25.

PHP 1680H. Nutritional Problems in the Developing World.
Research related to nutritional problems in the developing world including undernutrition (macronutrient and micronutrient deficiencies), the nutrition transition and emerging problems of obesity and chronic disease. A public health perspective considering nutritional issues through the lifecycle is applied. Contrasts diet and nutritional assessment at the individual and population level. Written permission required. Enrollment limited to 20.

PHP 1680I. Pathology to Power: Disability, Health and Community.
This course offers a comprehensive view of health and community concerns experienced by people with disabilities. Guest speakers, site visits, and hands-on field research involving interactions with people with disabilities will facilitate the students gaining a multi-layered understanding of the issues faced by people with disabilities and their families.

PHP 1680J. The Race To Inner Space: Conflating Science, Politics, and Economics To Promote Brain Health.
Provides an understanding of how funds are raised and spent for disease-targeted research; Provides hands-on experience and exposure to public and private decisionmakers influencing healthcare policy related to diseases of the brain; Provides an understanding of issues, challenges, and opportunities related to neurological and psychiatric illness parity with other illnesses; Identifies lessons learned from health care research funding policy successes and failures; and, Identifies directions for future brain health policy research related to the measurement of program effectiveness and comparative effectiveness, economic benefit. Permission of primary instructor (J. Bentkover) required. Enrollment limited to 24 juniors, seniors, and graduate students.

PHP 1680K. Introduction to Conducting Clinical Research.
This course is intended to help students become familiar with the design and implementation of clinical research, including ethical and logistical processes related to collecting data and interpretation of published medical literature. In addition to weekly sessions, the course requires 4-6 hours weekly in the Emergency Department at Rhode Island Hospital enrolling patients in clinical trials. As students will be directly exposed to patient and clinical care, the course is limited to 12 students for the semester. Interested students should contact the course director to be considered for enrollment. Not open to first year students. Instructor permission required.

PHP 1680M. The Epidemiology of Violence and its Consequences.
Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Intended as a junior/ senior level course. Prerequisite: PHP 2120 or equivalent. Enrollment limited to 10.

PHP 1680N. Tobacco, Smoking, and the Evil Empire.
Reviews the epidemiology of smoking and nicotine addiction and briefly examines its neurobiological and behavioral underpinnings. Covers prevention efforts and state-of-the-art treatment interventions with an emphasis on policy implications. Course background in psychology, sociology, or community health is recommended. Suggested prerequisites: PHP 0320 and CLPS 0010. Restricted to juniors, seniors, and graduate students.

PHP 1680R. Obesity and Eating Disorders.
This course examines two distinct yet overlapping health conditions, obesity and eating disorders. These are multi-factorial conditions, and material in psychology, medicine, nutrition, and exercise science, will be
covered. This course will focus on addressing these conditions through primary, secondary, and tertiary prevention efforts at the individual and environmental level.

PHP 1680S. Bioethics at the Bedside.
This course explores a variety of topics in biomedical ethics. Each class will begin with a vignette, short film, or speaker, followed by a short lecture. A large portion of class time will then be devoted to class discussion/review. The course has four parts: introduction to medical ethics in which we consider what value we assign to individuals within various ethical constructs; discussion of bioethical issues at the beginning and end of life; examination of the duty of physicians; and selection of additional topics exploring ethical issues that arise from the social, economic, and cultural differences between physician and patient. Enrollment limited to 30.

PHP 1680T. Translation, Diffusion and Cultural Relevance of Health Promotion Interventions.
Intended to help students become familiar with three key aspects of disease prevention/health promotion programs: (1) how findings from "basic" behavioral and social science(BSS) research are tested for effectiveness in real-life settings(translation); (2) how programs with demonstrated effectiveness, in one or more local settings, are introduced and adopted more broadly (diffusion); and (3) how cultural relevance is involved in both translation and diffusion. Translation and Diffusion will comprise the two main sections of the semester. Cultural relevance will be a theme integrated into each part of the course. Appropriate for BSSI, MPH, and advanced undergraduate students with coursework in public/community health. Open to juniors and seniors only.

PHP 1700. Current Topics in Environmental Health.
This course is designed to introduce students to the field of environmental health, and demonstrate how environmental health is integrated into various aspects of our lives, both directly and indirectly. Topics to be covered include: toxic metals, vector-borne disease, food safety, water quality, radiation, pesticides, air quality, hazardous waste, risk assessment, and the role of the community in environmental health. Several topics will be presented by guest speakers so that students can learn from the expertise of professionals in the field. Enrollment limited to 40.

PHP 1740. Principles of Health Behavior and Health Promotion Interventions.
Examines health behavior decision-making and elements for design of health promotion interventions. Covers theories of health behavior (focusing on primary and secondary prevention), principles of intervention design, and reading of research literature. Emphasizes psychological, social, and proximate environmental influences on individuals' health-related behaviors. Restricted to juniors, seniors, and graduate students. Prerequisite: PHP 3020 or equivalent. Enrollment limited to 25.

This seminar, open by invitation only to participants in the TRI-Lab program, will investigate a range of topics related to the healthy development of children from pregnancy through school entry, including the prevalence and determinants of major health and developmental concerns of infants and young children as well as key state and federal programs designed to address them. Readings, lectures, discussions, and in-class exercises will be used to foster collaborative inquiry by students, faculty, and community participants. Students will develop projects aimed at advancing or refining solutions to key healthy early childhood development challenges in Rhode Island.

PHP 1910. Community Health Senior Seminar.
Disparities in health and health care have been documented in the U.S. and globally. Students will develop a needs assessment relevant to health disparities at the local or global level; systematically review, synthesize, and critique a body of literature; use knowledge and tools from previous public health classes to pose a research question, and then find, create and manipulate data to perform appropriate analysis; interpret and present study results; and learn to work collaboratively towards a specific public health research goal. Prerequisite: PHP 3010, 3020, and 1320. Open to Senior Community Health concentrators only.

The course provides an overview of social determinants of health. Examples of topics include health effects of educational attainment, social integration, neighborhood socioeconomic characteristics, racial discrimination, gender, income inequality, childhood socioeconomic circumstances, parental neglect, and job strain. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Open to graduate students and advanced undergraduates.

A special project may be arranged in consultation with an individual faculty sponsor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Two semesters of PHP 1980, Honors Thesis Preparation, will be devoted to the development and implementation of an Honors project, and of the writing of the Honors Thesis for the Community Health Concentration.

This course provides an introduction to the concepts and scope of public health nutrition with a focus mainly on the U.S. Students will gain an understanding of the science behind national dietary recommendations and learn about dietary assessment methods, determinants of food intake, and interventions to improve diet. The course will emphasize the ways in which environment and policy can influence the nutritional status of diverse population groups. It will also focus on controversial topics in nutrition and will employ hands-on activities such as self-dietary assessment, in-class debates, evaluation of popular media and individual presentation of nutrition topics of interest. Enrollment limited to 25 juniors, seniors, and graduate students.

Provides a theoretical and practical basis for measurement in health care. Introduces measurement theory, scale development, and criteria to be considered when choosing measures in clinical practice and research. Practical exercises include questionnaire development and a written research protocol for the development and validation of a new measure. Prerequisites: PHP 2120, 2130.

PHP 2020. Disability Over the Life Course.
An overview of the epidemiology of physical and cognitive disability in America, associated patterns of medical and social service use, and current as well as "ideal" population-specific systems of formal and family care. Also explores medical, social, and psychological needs associated with the stage of life in which disability is experienced. Prerequisites for advanced undergraduates are PHP 3010 or SOC 1550, and introductory statistics.

PHP 2030. Clinical Trials Methodology.
We will examine the modern clinical trial as a methodology for evaluating interventions related to treatment, rehabilitation, prevention and diagnosis. Topics include the history and rationale for clinical trials, ethical issues, study design, protocol development, sample size considerations, quality assurance, statistical analysis, systematic reviews and meta-analysis, and reporting of results. Extensively illustrated with examples from various fields of health care research. Recommended prerequisites: introductory epidemiology and statistics. Pre-requisites: PHP 2120, and either PHP 2508, 2510, or 2520. Open to graduate students only.

Emphasizes the theory of sampling and survey methods and their application to public health research. Topics include: survey design and planning; principles of sampling and survey terminology; questionnaire construction; protection of human subjects; data collection (including interviewing and data coding procedures); and application, presentation, and evaluation of results. Suggested prerequisites: PHP 2120, and PHP 2508 or 2510. Open to graduate students only.

PHP 2060. Qualitative Methods in Health Research.
Introduces qualitative approaches to data collection and analysis in health research. Methods covered include: participant observation, key-informant interviews, focus groups, innovative data collection strategies, and non-obtrusive measures. Students will use applied projects to develop skills in: qualitative data collection and management, interviewing, transcript analysis using computerized software, triangulation between qualitative
and quantitative data, and report preparation for qualitative studies. Enrollment limited to 20 graduate students.

**PHP 2070. Public Health/Community Service Internship.** The course is an introduction to the history, organization, resources, concepts and issues of public health and health care. Students will be matched according to their interests in a related practical experience in a health-related organization, with the expectation that they complete a project or produce a product of public health utility. This gives students an opportunity to critically apply knowledge and skills learned in didactic sessions. Instructor permission required.

**PHP 2075. MPH Analytic Internship.** The primary objective of this course is to gain hands-on experience in using data to address public health questions. Concepts from previous courses will be re-enforced as students work through the steps of addressing a public health question. Both data analysis and data interpretation will be emphasized in the context of a public health question. STA 8.0 will be used to analyze data. Prerequisites: PHP 2120, and either PHP 2500 or 2510. Open to graduate students in the MPH program only.

**PHP 2080. Ethical and Legal Issues in Public Health.** Uses case study strategies to: identify key ethical principles, values, legal authorities and regulation relevant to public health practice and research; evaluate public health research designs in terms of ethical and legal principles; conduct ethical analyses of public health interventions by identifying potential ethical and legal concerns and conflicts; and employ strategies for working effectively with special populations, including the design of culturally appropriate interventions. Open to graduate students only.

**PHP 2090. Scientific Writing in Public Health.** Addresses methodologic and operational issues associated with developing research studies in epidemiology (including clinical trials). Students prepare protocols for research studies in human populations with attention to ethical guidelines and regulations. Students critique completed proposals, are exposed to existing systems for submission and review of funding applications, as well as controversial issues such as conflict of interest. Prerequisite: PHP 2120. Enrollment limited to 10 graduate students. For Summer enrollment, students must be accepted to the Clinical and Translational Research Institute. S/NC

**PHP 2120. Introduction to Methods in Epidemiologic Research.** Epidemiology quantifies patterns and determinants of human population health, with a goal of reducing the burden of disease, injury, and disability. An intensive first course in epidemiological methods, students learn core principles of study design and data analysis through critiques of published epidemiological studies as well as hands-on practice through weekly exercises and assignments. This is a graduate-level course aimed at masters and PhD students. The course is not open to first year students or sophomores but may be available for advanced undergraduates with the instructor’s permission.

**PHP 2130. Human Biology for Public Health.** This course provides basic principles of human biology and its applications to public health. Examples of biology topics include the cardiovascular system, endocrine system, immune system, nervous system, genetics, cancer, cardiovascular disease, HIV/AIDS, and depression. Examples of applied topics include strengths and weaknesses of using biomarkers, accuracy and precision of biological measures, quality assurance and quality control methods for using biomarkers for public health research. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

**PHP 2150. Foundations in Epidemiologic Research Methods.** The overall objective of this course is to provide students with a strong foundation in epidemiologic research methods at the first of a two- or four-course sequence in epidemiologic methods aimed at students who expect to eventually conduct their own epidemiologic research. There will be a strong quantitative focus in this course. By the end of the foundations course, students should be sufficiently familiar with epidemiologic research methods to begin to apply these methods to their own work. Prerequisite: PHP 2507 or 2510 (either may be taken concurrently); the typical student will also have some introductory knowledge of epidemiology.

**PHP 2170. Injury As A Public Health Problem.** Injury causes significant morbidity and mortality in the U.S. and across the globe. However, injuries – both violent and non-violent – are eminently preventable. The overarching objective of this course is to enable students to understand the epidemiology of injury and violence, as well as strategies to improve public health through injury prevention. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

**PHP 2180. Interpretation and Application of Epidemiology.** This advanced graduate seminar extends methodologic training in epidemiology and integrates it with subject matter knowledge to enhance inferences about epidemiologic research and its application to policy. Students will build on a foundation of methods training through Intermediate Epidemiology (PHP 2200) with selected advanced methods topics such as meta-analysis, imputation, and the tools of clinical epidemiology. Each week, a new methodologic topic will be introduced and we will develop a specific application of epidemiology to causal inference and policy. Prerequisite: PHP 2200. Open to graduate students only.

**PHP 2200. Intermediate Methods in Epidemiologic Research.** This second course in epidemiologic methods reinforces the concepts and methods taught in PHP 2150, with in-depth instruction in issues of study design, assessing threats to study validity including confounding and selection bias, and analyzing data with standard regression models. The course emphasizes hands-on learning and includes a combination of didactic lectures, discussions of methodologic papers, and a required laboratory component where students will learn to apply the concepts learned in class to real-world problems. Prerequisites: PHP 2150 and either 2510 or 2507, or permission of the instructor. Co-requisite: PHP 2511 or 2508.

**PHP 2210. Epidemiology of Chronic Disease.** A survey of central issues in selected health conditions that have major disabling consequences. The focus is on epidemiologic and biologic features of these conditions and their social and biologic determinants such as smoking, poverty, occupational exposures, nutrition, and heredity. Methodological areas include classification, screening, lead time bias, time trends, etc. Seminar format. Students present reviews of selected topics. Open to graduate and advanced undergraduate students.

**PHP 2220A. Epidemiology of Violence and Its Consequences.** Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Prerequisite: PHP 2120 or knowledge of elementary epidemiologic methods. Enrollment limited to 10.

**PHP 2220B. Nutritional Epidemiology** Although epidemiology is logically equipped to address the dietary causes of disease, the complex nature of diet has posed an unusually difficult challenge to this discipline. This course will focus on the methodological challenges that epidemiologists face in studying dietary factors as determinants of chronic diseases. Dietary assessment methods, biomarkers, and anthropometric measures will be reviewed. Substantive material and up-to-date issues will be used as examples. The course will consist of lectures and exercises to develop basic skills to allow students to have a strong grounding in this field. Open to graduate students only.

**PHP 2220C. Perinatal Epidemiology.** Provides an overview of topics related to reproduction, maternal and fetal outcomes of pregnancy, and longer term consequences of adverse pregnancy outcomes. Methodological issues unique to reproductive and perinatal epidemiology are discussed, as well as general epidemiologic methods. However, injuries – both violent and non-violent – are eminently preventable. The overarching objective of this course is to enable students to understand the epidemiology of injury and violence, as well as strategies to improve public health through injury prevention. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

Brown University
PHP 2220E. Topics in Environmental and Occupational Epidemiology. This course introduces students to the epidemiological study of historical and contemporary environmental/occupational agents, focusing on study design, biases, and methodological tools used to evaluate and extend the evidence linking exposures to human disease. The course will discuss applications, strengths, and limitations of different study designs and their use in studying specific environmental agents. Didactic lectures and student-led discussions will be used to provide students with a basic understanding of and the tools to apply/extend their knowledge of specific environmental agents (cell phones and endocrine disruptors) and special topics (children's neurodevelopment and epigenetics). Prerequisite: PHP 2120 or equivalent.

PHP 2220G. Methodological and Practical Issues in Global Health Research. This seminar-style course will develop critical thinking and writing about global health research among graduate students interested in population health. Reading and writing assignments are on key conceptual, methodological, and practical issues. It is interdisciplinary in nature but will reflect public health and epidemiologic perspectives on measures of population health, health disparities, interactions of effects on health, and implementation research. It is suitable for graduate students in the public health sciences, social sciences, pathobiology, and public policy. Prior training in epidemiologic methods and global health, or their equivalents, are expected. Recommended prerequisite: PHP 2120. Open to graduate and medical students only.

PHP 2220H. Methodological Issues in the Epidemiology, Treatment and Prevention of HIV. The purpose of this graduate-level seminar is to use HIV as an example to introduce students to a variety of methodological issues in the epidemiologic study of infectious diseases. While we will study the treatment and prevention of HIV in great detail, emphasizing the current state of knowledge and critiquing the most recent literature, this course aims to use HIV as an example to better understand the variety and complexity of methodological issues in global and domestic infectious disease epidemiology today. Enrollment limited to 25 graduate students. Prerequisite: PHP 2120 or 2150; and PHP 2508 or 2511; or instructor permission.

PHP 2222. Genetics, Human Population and Diseases. The purpose of this course is: 1) to introduce students to genetics, genomics and various designs of genetic studies of human diseases, and 2) to discuss selected topics in challenges and advances in human genetic studies. Some prior knowledge with genetics or epidemiology is preferred. This course may be most appropriate for second-year MPH, ScM, or PhD students, as well as first-year graduate students and advanced undergraduate students with previous exposure to introductory epidemiology and biostatistics. Prerequisite: introductory-level statistical analyses and epidemiology courses, such as PHP 2507 or 2510, and 2120 or 2150. Undergraduates need permission of instructor to register. Enrollment limited to 20.

PHP 2230. Epidemiology of Infectious Diseases. From Black Death to Typhoid Mary to the more recent H1N1 pandemic, infectious disease epidemics have been recorded throughout written history. The top 5 infectious diseases cause more than 14 million deaths per year globally, accounting for roughly 25% of all deaths. This course will introduce students to the field of infectious disease epidemiology. Topics will include a history of infectious diseases, epidemiology and control of infectious diseases, analytic methods, study design, outbreak investigations, and statistical modeling. Prerequisite: PHP 2120. Instructor permission required. Enrollment limited to 15 graduate and medical students.

PHP 2240. Methods of Environmental Epidemiology. In this course, students will understand, implement, and interpret the design and analysis tools commonly used in environmental epidemiology. Topics to be discussed include cohort, time-series, case-crossover, and panel study designs, modeling of flexible dose-effect relationships, consequences of measurement error and missing data, and analyses of effects of exposures with unknown latencies. Although these methods will be presented in the context of estimating the health effects of environmental exposures, many of these methods are readily applied to other fields. Prerequisite: PHP 2200 or instructor permission. Open to graduate students only.

PHP 2250. Advanced Quantitative Methods in Epidemiologic Research. This course provides students with conceptual and quantitative tools based on counterfactual theory to make causal inference using data obtained from observational studies. Causal diagrams will be used to provide alternative definitions of and inform correcting for common biases. Non-, semi-, and fully parametric methods for addressing these biases will be discussed. These methods include standard regression, instrumental variables, propensity scores, inverse probability weighting, and marginal structural models. Settings when such methods may not be appropriate will be emphasized. Prerequisite: PHP 2200 and 2511; or PHP 2200 and 2508; or instructor permission. Enrollment limited to 25 graduate students.

PHP 2300. Research Methods in Behavioral Science. This course provides students with fundamental principles of behavioral and social research methodology for understanding the determinants of public health problems, and for executing and testing public health interventions. We will focus on experimental methods, observational studies, and qualitative approaches. We will develop skills in understanding and interpreting data—both quantitative and qualitative. Throughout the course we will emphasize ethical, cultural, and professional issues for designing public health interventions. Prior coursework in research methodology and quantitative methods is recommended but not required. Open to graduate students and advanced undergraduates. Enrollment limited to 15.

PHP 2310. Physical Activity and Public Health. This course examines physical activity and health with an emphasis on the development of behavioral interventions to increase physical activity. Students gain knowledge of the impact of physical activity on health outcomes as well as differences in physical activity among subpopulations. They are introduced to behavioral theories, intervention design approaches, measurement issues, and methods that are relevant to physical activity. Through seminar discussions, a group project, and presentations, students engage with the material and gain skills in the development and evaluation of behavioral interventions. Students with an interest in behavioral interventions and physical activity will benefit from taking the course. Recommended prerequisites: PHP 1740, 2320, or 2360. Enrollment limited to 20. Open to graduate students and seniors concentrating in Community Health.

PHP 2320. Environmental and Policy Influences on the Obesity Epidemic. This course examines environmental influences on the obesity epidemic with an emphasis on the impact of the built environment and policy on physical activity. Through seminar discussions, literature reviews, policy briefs, and presentations, students will engage with the material and gain skills in the development of policy and environmental change strategies to impact physical inactivity and poor diet. Students with an interest in environmental change and policy to prevent obesity and increase physical activity will benefit from taking this course. Enrollment limited to 25.

PHP 2325. Place Matters: Exploring Community-Level Contexts on Health Behaviors, Outcomes and Disparities. There is growing recognition among researchers, public health practitioners and policymakers that place matters for health behaviors and health outcomes. But what is place, and why does it matter? As with many health-related outcomes, the prevalence of ill health is unequally distributed across populations with certain features playing significant roles on health. In this course, we will explore the features of community environments and the associations with health behaviors (e.g. physical activity, preventive care, alcohol, sexual behaviors) and health outcomes (e.g. obesity, cardiovascular disease and mental health). This course is specific to the US and all readings reflect this focus. Enrollment limited to 25.

PHP 2330. Behavioral and Social Approaches to HIV Prevention. This course examines concepts, approaches, and empirical findings from behavioral and social research aiming to prevent HIV transmission. Students will become familiar with behavioral theories, social epidemiological principles, intervention design and measurement issues, and debates within the field of HIV prevention. A particular focus of this
course is on the state of empirical research and the linkages between science and HIV prevention practice/policy. Students will conduct weekly readings, engage actively in seminar discussions, and participate in small-group presentations and research activities. Prior coursework in public health research methodology is recommended. Prerequisites: PHP 1740 and 2120. Enrollment limited to 25 graduate and medical students.

PHP 2340. Behavioral and Social Science Theory for Health Promotion.
This course will help students become familiar with behavioral and social science theories commonly used for planning disease prevention/health promotion interventions. In addition to review of specific theories, topics to be discussed include: how theories are developed and tested; challenges and potential pitfalls in using theory for intervention planning; and creation of causal diagrams based on concepts from theories. Undergraduates need permission of instructor; priority will be for Community Health concentrators. Enrollment limited to 25.

PHP 2350. Economics of Medical Therapies: Health Policy and Practice.
Introduces methods and applications of decision analysis, cost-effectiveness analysis, and benefit-cost analysis in public health policy and practice, including health care technology assessment, medical decision making, and health resource allocation. Examines technical features of these methods, problems associated with implementing them, and advantages and pitfalls in their application in setting public health policy. Open to juniors, seniors, and graduate students.

PHP 2360. Designing and Evaluating Public Health Interventions.
Aims to develop skills in designing and evaluating public health interventions. Levels of intervention include the individual; families or small groups; organizations such as schools, worksites, health care settings; communities; social marketing and health communications; policy and environmental changes. Will identify personal and environmental factors that affect public health and discuss needs assessment, formative research, cultural sensitivity, behavior change theories, intervention mapping, process and impact/outcome evaluation and dissemination. Students will critique intervention studies and gain experience in developing a hypothetical behavior change intervention. Graduate students and AB-MPH undergraduates only.

PHP 2370. Etiology of Substance Use Disorders.
This course will help students become familiar with behavioral, genetic, neurobiological, and cultural factors related to the onset and course of substance use disorders. In addition to review of specific theories, empirical evidence supporting models will be covered as will the integration of evidence across models. Priority will be given to postdoctoral fellows.

PHP 2371. Psychosocial and Pharmacologic Treatment of Substance Use Disorders.
Intended to provide an overview of the history of the treatment of substance use disorders; assessment methods designed to determine progress in substance use treatment; and the current most common types of psychosocial and pharmacologic treatments for substance use. Enrollment limited to 20 graduate and medical students. Instructor permission required.

This class will explore Health Communication, with a focus on behavioral and social science interventions delivered through health communication programs. The course is structured so that basic building blocks (i.e., definitions of health communication, public health context for health communications interventions, theories of health communication and health behavior change) are presented sequentially early in the semester. Students will synthesize knowledge and demonstrate their understanding of the role of health communication through a final research project. Seniors with concentration in Community Health may enroll with instructor's permission. Enrollment limited to 20 graduate and medical students.

PHP 2390. Quantitative Methods for Behavioral and Social Sciences Intervention Research.
This course provides broad coverage of the quantitative methods used in behavioral intervention research ranging from descriptive data analysis to longitudinal methods. Students will learn to conduct, interpret, and write up a range of statistical procedures including basic psychometrics, t-tests and ANOVAs, correlations, and multiple regression. Students also will be introduced to more advanced techniques used for longitudinal data analysis in order to understand their common uses in behavioral intervention research. The course provides students in the Master's program in Behavioral and Social Sciences Intervention the requisite skills to conduct analyses of behavioral data as part of their Master’s Thesis. Enrollment limited to 15 graduate students in the BSSI Master’s program and the MPH program.

Reviews the development of the health care delivery, financing and regulatory control systems in the U.S. and reviews the literature on the relationship between health system structure and the services used and health outcomes that populations experience. A case-study approach is used to understand the inter-relationship between financing, delivery and regulatory components of the health system and their implication for public health by drawing on epidemiological, economic, political and sociological principals. Prerequisites: Graduate standing or PHP 0310 or PHP 0070 (not available to first year students or sophomores). Instructor permission required.

PHP 2410E. Medicare: A Data Based Policy Examination.
This course will explore the role of Medicare as America’s health insurer for the elderly and disabled through the use of real Medicare insurance claims data, examining how Medicare policy changes in financing and regulation have affected the delivery and receipt of medical services. At the end of the course students will: 1) know the history of important Medicare policy changes; 2) be able to construct aggregated patient case mix acuity adjusted measures of provider quality using insurance claims data; 3) be able to conduct policy analyses using Medicare claims data that are sensitive to standardized coding schemes. Enrollment limited to 15 graduate students. Prerequisite: PHP 2120, 2508, or 2510. Instructor permission required.

Students will learn an overview of evaluation methodologies using both primary data collection and administrative data. Evaluation methods will be taught in the context of published studies and guest speakers’ work covering a broad range of public health interest areas. Students will develop a proposal to evaluate a public health program that is ongoing or in the planning stage at the Rhode Island Department of Health or other public health-related human service agency. The proposed evaluation will be designed to balance scientific rigor with cost efficiency and viability.

PHP 2430. Analysis of Population Based Datasets.
Epidemiologic, health services, and social research often conducts "secondary analysis" of existing population-based datasets. Benefits include their representative sampling frames allowing generalizability to larger populations, timeliness, and lower cost. In addition, computer technology makes it possible to link some databases providing richer sources of information. There are several technical and methodological concerns when conducting "secondary analysis." Students will download, link, and analyze several data sets to understand the advantages of these data for health policy analysis as well as understand and apply different analytic methods. Familiarity with statistical analysis software is required. Prerequisites: PHP 2120, and either PHP 2508 (may be taken concurrently) or 2510. Open to graduate and medical students only.

Systematic reviews and meta-analyses are increasingly used to inform decisions at all levels of healthcare, from the bedside to policy-making. This course picks up after PHP 2415 (Introduction to Evidence-based Medicine) that introduced basic concepts and simple meta-analysis of parallel arm randomized trials with dichotomous or continuous outcomes. The emphasis is on the quantitative synthesis of more complex data, including survival data, diagnostic tests, genotypic outcomes, and multivariate data (multiple outcomes, time-points or treatments – network meta-analysis). In addition to pre-requisites, students should have clinical background or training in basic concepts in medicine (must discuss with instructor), and facility with a statistical programing environment: R or Stata.
PHP 2440. Introduction to Pharmacoepidemiology
The course will focus on substantive topics in pharmacoepidemiology, including relevant principles of pharmacology, inference from spontaneous case reports, study design considerations, premarketing pharmacoepidemiology, common data sources for pharmacoepidemiologic studies, drug utilization review, adherence, and the development, implementation, and assessment of therapeutic risk management policies. The course will also focus on issues in pharmacovigilance, including the legal and historical basis of pharmacovigilance, evaluation of individual adverse drug events, signal detection, active safety surveillance, and medication errors. A clinical background is not required. Prerequisites are PHP2120 and PHP2510 (or PHP2507) or permission of the instructor.

PHP 2450. Measuring and Improving the Quality of Health Care
The quality of health care in the United States is in urgent need of improvement. This course will focus on the science of measuring and improving the quality of health care. Topics will include quality assessment, patient safety, medical errors, public reporting, financial incentives, organizational change, and health care disparities. Students will engage in a team-based quality improvement project. Open to graduate and medical students only.

PHP 2451. Exchange Scholar Program.

PHP 2460. Research Methods in Clinical, Translational and Health Services Research.
This course will take an applied approach to understanding research methods used in health research. Students will explore concepts, gain knowledge and develop skills in the following areas: 1. Developing and refining research questions; 2. Designing research projects and appropriately implementing research methodologies; 3. Understanding the strengths and weaknesses of different study designs in addressing specific research questions, including an understanding of threats to validity; 4. Identifying Data Sources, including primary and secondary sources; 5. Understanding research ethics, including IRB processes and HIPAA regulations. Students must be accepted to the Clinical and Translational Research Summer Institute to enroll.

PHP 2470. Topics in Clinical, Translational and Health Services Research.
Through a combination of mini-courses and seminars, students will explore concepts, gain knowledge and develop skills in a variety of public health areas. To receive a half credit for this course, students will be required to successfully complete 70 units. Units must be pre-determined by the course instructor and the unit instructor. Units are generally based on the number of in-person contact hours and the number of outside of classroom/homework hours required for a mini-course or seminar. Students must receive special permission from the instructor or be accepted to the Clinical and Translational Research Summer Institute to enroll.

PHP 2480. Selected Topics in Global Health Economics.
This course will survey selected topics in global health economics. It is designed to introduce students to specific issues, theory and practice of health economics at the global level. The first part of the course will survey research papers on econometric methods in global health including: field experiments, instrumental variables, propensity score matching and regression discontinuity. The second part will discuss current topics such as: conditional economic incentives for providers and consumers, social health insurance, public goods, and externalities. Prerequisites: PHP 2511 and ECON 1110, or equivalent. Enrollment limited to 8 graduate students. Instructor permission required.

This course will cover applications of epidemiologic methods to the study of medical interventions (drugs, vaccines, devices, and procedures), focusing on advanced methods. We will use formal frameworks of causal inference. The course will focus on substantive topics in pharmacoepidemiology, including design and analytic strategies to overcome the limitations of common data sources. Other topics include the assessment of therapeutic risk management policies. Although a clinical background will be useful, it is not required. Prerequisites: PHP 2120, or PHP 2150 and 2200, and PHP 2507, 2510, or 2520, and PHP 2508 or 2511; or instructor permission. Enrollment limited to 20.

PHP 2500. Introduction to Biostatistics
The first in a two-course series designed for students who seek to develop skills in biostatistical reasoning and data analysis. Offers an introduction to basic concepts and methods of statistics as applied to diverse problems in the health sciences. Methods for exploring and presenting data; direct and indirect standardization; probability; hypothesis testing; interval estimation; inference for means and proportions; simple linear regression, etc. Statistical computing is fully integrated into the course. Not open to freshmen or sophomores.

PHP 2501. Introduction to Multivariate Regression.
The first in a series of two-half semester courses on regression methods, designed for students who seek to develop biostatistical reasoning and data analysis skills. This course provides an introduction to multiple linear and logistic regression models as applied to diverse problems in the health sciences. PHP 2500 or equivalent is a prerequisite.

PHP 2502. Regression Analysis Discrete and Event Time Data.
The second course in the sequence on Introductory Biostatistics methods. This course will focus on regression methods (multiple linear regress, ANOVA, ANCOVA) and their natural extensions such as Logistic and Poisson regression in applications to diverse problems in the health sciences. Additionally, this course will cover regression methods for time to event data such as Cox regression for survival data. PHP 2500 or equivalent is a prerequisite.

PHP 2507. Biostatistics and Applied Data Analysis I.
The objective of the year long, two-course sequence is for students to develop the knowledge, skills and perspectives necessary to analyze data in order to answer a public health questions. The year long sequence will focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, data analysis, data interpretation and the presentation of results. Through lectures, labs and small group discussions, this fall semester course will focus on identifying public health data sets, refining research questions, univariate and bivariate analyses and presentation of initial results. Prerequisite: understanding of basic math concepts and terms; basic functional knowledge of Stata. Enrollment limited to 50 MPH, CTR, and BSSI students. Instructor permission required.

PHP 2508. BioStatistics and Data Analysis II.
Biostatistics and Applied Data Analysis II is the second course in a year-long, two-course sequence designed to develop the skills and knowledge to use data to address public health questions. The courses are specifically for students in the Brown MPH program, and the training programs in Clinical and Translational Research. The course is comprised of one acafall semester hour required for a mini-course or seminar. Students must be accepted to the Clinical and Translational Research Summer Institute to enroll.

PHP 2502. Regression Analysis Discrete and Event Time Data.
The second course in the sequence on Introductory Biostatistics methods. This course will focus on regression methods (multiple linear regress, ANOVA, ANCOVA) and their natural extensions such as Logistic and Poisson regression in applications to diverse problems in the health sciences. Additionally, this course will cover regression methods for time to event data such as Cox regression for survival data. PHP 2500 or equivalent is a prerequisite.

PHP 2507. Biostatistics and Applied Data Analysis I.
The objective of the year long, two-course sequence is for students to develop the knowledge, skills and perspectives necessary to analyze data in order to answer a public health questions. The year long sequence will focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, data analysis, data interpretation and the presentation of results. Through lectures, labs and small group discussions, this fall semester course will focus on identifying public health data sets, refining research questions, univariate and bivariate analyses and presentation of initial results. Prerequisite: PHP 2507. Enrollment limited to 46. Instructor permission required.

PHP 2510. Principles of Biostatistics and Data Analysis.
Intensive first course in biostatistical methodology, focusing on problems arising in public health, life sciences, and biomedical disciplines. Summarizing and representing data; basic probability; fundamentals of inference; hypothesis testing; likelihood methods. Inference for means and proportions; linear regression and analysis of variance; basics of experimental design; nonparametrics; logistic regression. Open to advanced undergraduates with permission from the instructor.

Applied multivariate statistics, presenting a unified treatment of modern regression models for discrete and continuous data. Topics include multiple linear and nonlinear regression for continuous response data, analysis of variance and covariance, logistic regression, Poisson regression, and Cox regression. Prerequisite: APMA 1650 or PHP 2510. Open to advanced undergraduates with permission from the instructor.

PHP 2520. Statistical Inference I.
First of two courses that provide a comprehensive introduction to the theory of modern statistical inference. PHP 2520 presents a survey of fundamental ideas and methods, including sufficiency, likelihood based inference, hypothesis testing, asymptotic theory, and Bayesian inference.
PHP 2530. Bayesian Statistical Methods.
Surveys the state of the art in Bayesian methods and their applications. Discussion of the fundamentals followed by more advanced topics including hierarchical models, Markov Chain Monte Carlo, and other methods for sampling from the posterior distribution, robustness, and sensitivity analysis, and approaches to model selection and diagnostics. Features nontrivial applications of Bayesian methods from diverse scientific fields, with emphasis on biomedical research. Prerequisites: APMA 1650, PHP 2510, PHP 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

PHP 2540. Advanced Methods for Multivariate Analysis.
Survey of modern statistical methods for analysis of multivariate and high-dimensional data. Topics include inference for multivariate normally distributed data, methods for data reduction, classification and clustering, multiple comparisons for high-dimensional data, analysis of multidimensional contingency tables, and functional data analysis. Applications to diverse areas of scientific research, such as genomics, biomarker evaluation, and neuroscience will be featured. Prerequisites: APMA 1650 and 1660; or PHP 2520. Open to advanced undergraduates with permission from the instructor.

PHP 2580. Statistical Inference II.
This sequence of two courses provides a comprehensive introduction to the theory of modern inference. PHP 2580 covers such topics as non-parametric statistics, quasi-likelihood, resampling techniques, statistical learning, and methods for high-dimensional Bioinformatics data. Prerequisite: PHP 2520. Open to advanced undergraduates with permission from the instructor.

PHP 2601. Linear and Generalized Linear Models.
Generalized linear models provide a unifying framework for regression. Important examples include linear regression, log-linear models, and logistic regression. GLMs for continuous, binary, ordinal, nominal, and count data. Topics include model parameterization, parametric and nonparametric estimation, and model diagnostics. Methods for incomplete data are introduced. Computing with modern software is emphasized. Prerequisites: APMA 1650 or PHP 2520. Open to advanced undergraduates with permission from the instructor.

PHP 2602. Analysis of Lifetime Data.
Comprehensive overview of methods for inference from censored event time data, with emphasis on nonparametric and semiparametric approaches. Topics include nonparametric hazard estimation, semiparametric proportional hazards models, frailty models, multiple event processes, with application to biomedical and public health data. Computational approaches using statistical software are emphasized. Prerequisites: PHP 2510 and 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

PHP 2603. Analysis of Longitudinal Data.
Comprehensive coverage of methods for drawing inference from longitudinal observations. Theoretical and practical aspects of modeling, with emphasis on regression methods. Topics include: multilevel and marginal models; estimation methods; study design; handling dropout and nonresponse; methods for observational data (e.g. time-dependent confounding, endogeneity, selection bias). SAS and S-Plus software are used. Prerequisite: Statistical inference (APMA 1650-1660 at minimum), regression (PHP 2511), working knowledge of matrix algebra (e.g. MATH 0520). Open to advanced undergraduates with permission from the instructor.

PHP 2604. Statistical Methods for Spatial Data.
This course covers a variety of topics for spatial data, including data visualization, Bayesian hierarchical models, spatial models, as well as the computation techniques and statistical software to implement these models. Examples of applications will include, but are not limited to, spatial modeling of data from epidemiology, environmental studies and social sciences. Prerequisites: APMA 1650-1660 or PHP 2510-2511, and MATH 0520; some experience with scientific computing.

PHP 2610. Causal Inference and Missing Data.
Systematic overview of modern statistical methods for handling incomplete data and for drawing causal inferences from "broken experiments" and observational studies. Topics include modeling approaches, propensity score adjustment, instrumental variables, inverse weighting methods and sensitivity analysis. Case studies used throughout to illustrate ideas and concepts. Prerequisite: MATH 1610 or PHP 2511. Open to advanced undergraduates with permission from the instructor.

PHP 2620. Statistical Methods in Bioinformatics, I.
Introduction to statistical concepts and methods used in selected areas of bioinformatics. Organized in three modules, covering statistical methodology for: (a) analysis of microarray data, with emphasis on application in gene expression experiments, (b) proteomics studies, (c) analysis of biological sequences. Brief review and succinct discussion of biological subject matter will be provided for each area. Available software will be introduced. Intro level statistics (PHP 2507/2508 or PHP 2510/2511) recommended. Other students should contact instructor. Intro to software R and Bioconductor tools provided in lab. Open to advanced undergraduates with permission from the instructor.

This course is designed to cover essential elements of preparing for a career in research in biostatistics. The course will cover: methods of statistical research, with a focus on problem solving in real applications; key elements of communicating research, including writing for academic publication, writing and collaborating on grant proposals, and preparing and delivering oral presentations; and professional and research ethics, with emphasis on ethics of statistical practice in multidisciplinary collaborations. Enrollment limited to 15 graduate students in Biostatistics. Students must be in research phase of program of study.

PHP 2690A. Advanced Topics in Biostatistics.
Introduction to applications of statistics and the way statisticians collaborate in interdisciplinary research. Guest lecturers from industry, government and academia will describe how statisticians fit into their environment. Techniques for effective collaboration and oral and written presentation of work including interviewing, writing proposals, giving talks, working with a team and consulting as an individual will be taught. Designed for graduate students (Masters or PhD) who would like to learn how to collaborate on projects with non-statisticians. Permission of the instructor is required to enroll for the course.

PHP 2690B. Introduction to Bayesian Inference: Hierarchical Models and Spatial Analysis.
Intended as a first introduction to Bayesian inference. Relevant theoretical background will be reviewed, and the Bayesian paradigm will be introduced, including choice of prior distributions and calculation of posterior distributions. Main emphasis will be on how to use Bayesian thinking to develop models for data with complex structure. Hierarchical models, meta-analysis, Bayesian design and shrinkage estimation will be covered. The benefits of hierarchical modeling will be applied to spatial data analysis as a special topic. Students will be introduced to Bayesian computing and WinBUGS, which is a necessary skill for many modern analyses. Prerequisites: PHP 2510 and 2511, or equivalent. Additional exposure to statistical inference, statistical computing, and a course in calculus would be useful. Open to graduate students only.

PHP 2690D. Advanced Topics in Biostatistics: Practical Tools for Data Analysis.
Designed for graduate and advanced undergraduate students who will be analyzing data and want to develop a practical hands-on toolkit. Topics including data collection and management, exploratory data analysis, fitting and checking models, simulation, handling missing data and presentation of results will be developed through a series of case studies based on different types of data requiring a variety of statistical methods. Statistical programming techniques including functions, graphs and tables will be emphasized. Students should have familiarity with basic concepts of statistics through regression. Permission of instructor required.

PHP 2950. Doctoral Seminar in Public Health.
The purpose of this seminar is to facilitate discussions of current scientific literature in epidemiology, biostatistics, health services, and public health in general. The main goal is to expose students to current methodological issues and controversies in epidemiology, biostatistics, health services,
and public health, in an effort to integrate knowledge across disciplines.

This seminar is by instructor permission only and is only open to doctoral students in Epidemiology, Biostatistics and Health Services Research.

**PHP 2980. Graduate Independent Study and Thesis Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2985. MPH Independent Study for Thesis Preparation and Research.**
This optional half credit course may be taken up to two times during preparation for the MPH degree. It provides MPH students with self-directed thesis research and preparation time under the guidance of a thesis advisor. Prior to taking this course the student and advisor must reach agreement as to what constitutes satisfactory completion of the course (e.g., completion of a satisfactory literature review, attainment of specific thesis benchmarks, or completion of the thesis). Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2990. Thesis Preparation.**
No description available.

**PHP XLIST. Courses of Interest to Concentrators in Community Health.**
Continuing Education

Continuing Education at Brown University offers multiple, high quality programs in the areas of:

- Adult & Professional Studies
- Undergraduate Summer Session for academic credit
- Non-credit Pre-College programs for students who wish to preapre for college life and experience life on an Ivy-League campus

In addition, in partnership with the Graduate School the division of Continuing Education administers an Executive Master of Healthcare Leadership program.

For further information on any of the the programs offered through Continuing Education please visit their website at: http://www.brown.edu/ce/

Executive Masters Program

Executive Master of Healthcare Leadership

The Brown University Executive Master of Healthcare Leadership prepares visionary leaders to transform healthcare. This 16-month intensive degree program is designed for clinicians, executives, and senior administrators who have significant responsibility in the healthcare industry; including those from health care delivery, public health, drug and product manufacturing, health care consulting, health management systems, insurance, patient advocacy, and from legal, policy and regulatory settings. It is a blend of on-campus and online learning that allows participants to work full time while pursuing an advanced degree.

The faculty and participants in the program have a depth of experience in the healthcare industry and are fully engaged in addressing the gaps and constraints of the current system. The course of study is tailored to this industry and leadership development is purposefully considered in the healthcare context.

Course of Study

- Creating the Learning Healthcare Organization
- Data-Driven Decision Making: The structure, conduct, review, and evaluation of research
- Financial Decisions in the Changing Healthcare Landscape
- Healthcare Policy: Yesterday, today, and tomorrow
- Information-empowered Patient Care: Electronic health records, health information technology, and medical information systems
- Management and Marketing Skills for Transforming Healthcare
- Navigating the Regulatory Maze
- Strategic Planning and Value Creation in Integrated Healthcare
- The Critical Challenge

For further information including admission criteria and tuition and fees please visit: http://www.brown.edu/ce/executive/healthcare-leadership/

Courses

EMHL 2000. Strategic Planning and Value Creation in Integrated Healthcare

In this course, participants explore the meaning of value creation in healthcare organizations—how it relates to high performance, how it varies and is measured in different healthcare segments, and how it is embodied in the structure and performance of their own organizations. A holistic High Performance Model of enterprise value creation is presented, including strategic planning, process improvement, and resource and organizational alignment. The model is discussed from the perspectives of a variety of healthcare organizations—with the goal of applying the model to create value for the participants’ own organizations.

In this course, students appraise past and current political, legal, technological, and economic U.S. healthcare policy developments.

Students critically examine the implementation of alternative methods of health services delivery and financing within multiple global healthcare systems. Participants question assumptions, think creatively, and consider integrated patient care solutions to prepare for change and new paradigms within the global healthcare sector.

In this course, students develop the management, marketing, and leadership skills needed to guide organizational change and refine their personal leadership style to lead in today’s rapidly-changing health care landscape. Particular focus is placed on negotiation, conflict management, collaboration, and team building skills. Participants create a robust plan for their continuous development as a leader. Students also learn how to harness the power of social media to develop their brand and their organization’s influence in the marketplace.

EMHL 2030. Data-Driven Decision Making: The Structure, Conduct, Review, and Evaluation of Research

This course will provide an overview of the methods and applications of therapy economics, biostatistics and epidemiology in healthcare sector decision-making. Specific topics include: the application of therapy economics and economic evaluation to treatments, pharmacoeconomics and technology assessment; the assessment and interpretation of published epidemiological studies; institutional oversight of epidemiological research programs; the four key steps of statistical analysis (identification of scientific programs or problems of interest, collection of the required data, analysis and summary of data, and generation of a conclusion).

EMHL 2040. Navigating the Regulatory Maze

This course explores the culture of decision making as well as the structure and role of key US and international regulatory bodies. Students explore how health care is regulated with an eye towards understanding how existing regulations improve quality, enhance access, and control cost. The topics of risk management, public health, and product/drug regulation are emphasized.

EMHL 2050. Healthcare Information Technology

This course will provide an overview of the major aspects of information technology (IT) as they relate to both the causes of and the solutions to current problems in healthcare. Issues of standardization, integration, communication and patient engagement will be stressed, and the types of strategic planning for and governance of information systems will be explored. During the course students will be presented with real problems in the field of HIT and explore possible solutions.

EMHL 2080. The Critical Challenge: Capstone Project

In this project, supervised by Executive Master of Healthcare Leadership (EMHL) faculty, students identify a critical challenge within healthcare and then work collaboratively to integrate knowledge from various perspectives and healthcare sectors and to apply relevant skills to develop possible solutions to their challenge. Students draw upon knowledge and skills from coursework with particular emphasis on collaborating across healthcare sectors, considering ethical implications, communicating effectively and developing creative and viable solutions. Upon completion of this project, students will be able to successfully integrate knowledge of healthcare policy, strategic planning, regulation, management, marketing, healthcare research, quality improvement, finance and information technology to address a critical challenge within healthcare. Project outcomes should prove applicable to professional practice. This course spans two semesters.
Departments, Centers, Programs and Institutes

Africana Studies

Chair
Paget Henry

Located in the historic Churchill House on the campus of Brown University, the Department of Africana Studies is the intellectual center for faculty and students interested in the artistic, historical, literary, and theoretical expressions of the various cultures of Africa and the African Diaspora. Central to the intellectual work of the department is the close collaboration of artists and scholars in examining relationships between academic and artistic knowledge about the world and human experience. Our commitment to rigorous scholarship and robust student and community development is grounded in a truly global understanding of the reach and implications of the Africana World.

For additional information, please visit the department’s website: http://brown.edu/Departments/Africana_Studies/

Africana Studies Concentration

Requirements

The concentration in Africana Studies critically examines the artistic, historical, literary, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Central to the work of students and faculty in the concentration is the close collaboration of artists, scholars, and writers in examining relationships between academic and artistic knowledge about the world and human experience. Concentrators work closely with faculty members in developing new knowledge about the world and human existence through the critical and comprehensive study of the peoples and cultures of Africa and the African Diaspora. Concentrators are encouraged to study abroad in Africa, the Caribbean, and/or Latin America and to acquire language competency in a language other than English spoken in Africa and the diaspora.

In order to develop requisite competency, Africana Studies concentrators must complete eight (8) semester-long courses offered by or cross-listed with the Department. Concentrators may also petition the Department to accept other appropriate courses.

Of these courses, the following two Africana Studies courses are required:
- AFRI 0090 An Introduction to Africana Studies (Fall ONLY)
- AFRI 1360 Africana Studies: Knowledge, Texts and Methodology – Senior Capstone Seminar (Spring ONLY)

The Department strongly encourages foreign study in Africa, the Caribbean, and Latin America, during the student’s junior year. While the department actively supports programs in South Africa, Tanzania, Ethiopia, Brazil, and the English-Speaking Caribbean, concentrators must complete at least six (6) courses in residence at Brown.

The Department also encourages the acquisition of language competencies, in addition to English, which are spoken in Africa and the Diaspora. Since no continental African language is currently offered at Brown, concentrators who study abroad and acquire certified competency in any African language are welcome to petition the department for competency credit.

Honors

Africana Studies’ concentrators with outstanding records may be admitted to the department’s Honors Program. Prior to the end of the concentrator’s junior year and while working in consultation with a faculty advisor, the student must prepare a work plan. This plan, not to exceed three (3) typewritten pages, must be approved and signed by the faculty advisor who is to direct the Honor’s thesis. At the onset of the senior year, the Honor’s candidate is expected to have become familiar with the secondary works in the field. Secondary readings should be extensive and be incorporated into the work plan. The Honor’s candidate is also expected to complete a research paper of distinguished quality while enrolled in a 1000-level seminar. Participation in the Africana Studies senior-level capstone seminar AFRI 1360 is required.

For students completing graduation requirements by the end of Semester I (Fall), projects must be submitted by December 1st. For students completing graduation requirements by Semester II (Spring), the project should be submitted by April 20th. By the end of the fourth (4th) week of the concentrator’s seventh (7th) semester, a written proposal approved by the advisor and a secondary reader must be submitted to the concentration advisor. A progress report, prepared and signed by the student and countersigned by the faculty advisor must be presented to the concentration advisor.

Africana Studies Graduate Program

The department of Africana Studies offers a graduate program leading to the Ph.D. in Africana Studies. For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/africana-studies-0

Courses

AFRI 0090. An Introduction to Africana Studies.
This course introduces students to the vibrant and contested field of Africana Studies by critically exploring and analyzing the links and disjunctures in the cultural, political, and intellectual practices and experiences of people of African descent throughout the African diaspora. Beginning with a critical overview of the history, theoretical orientations, and multiple methodological strategies of the discipline, the course is divided into three thematic units that examine intellectuals, politics, and movements; identity construction and formation; and literary, cultural, and aesthetic theories and practices in the African diaspora. DVPS LILE WRIT

AFRI 0100A. Playwriting I (TAPS 0100).
Interested students must register for TAPS 0100.

AFRI 0110B. The Last Professors
Addresses the profound effects of contemporary economic, political, and social changes on the role and function of the university in the 21st century. A primary concern of the seminar is to critically analyze how and in what ways the transformations in the broader society challenges, constrain, and, at times, frustrate critical intellectual activity. The seminar will draw on a broad and diverse set of readings ranging from classic statements by Cardinal Newman and W.E.B. DuBois to contemporary critical analyses by Henry Giroux and Adolph Reed, Jr. Enrollment limited to 20 first year students. SYS

AFRI 0110C. Autobiography of the Civil Rights Movement.
Most of the rich written history of the civil rights movement originates from first-hand accounts documented in oral histories and autobiographies. This interdisciplinary course plots the milestones of the civil rights movement through the lens of several autobiographies. The aim is to critique autobiography as a historical document as well as use it to tell the stories of the civil rights movement. We will compare and contrast different texts, analyze content and map a history of the era. Students will work with a writing fellow to develop one critical paper and one autobiographical paper. Enrollment limited to 20 first year students. SYS WRIT

AFRI 0120. Philosophy of Race and Gender.
Prejudice of many kinds, such as racism and sexism is so embedded in our modern social institutions, and so traditional and pervasive that we often fail to notice it. Furthermore, race and gender have been used repeatedly to explain differences. This course is a rigorous examination of the philosophical meanings of race and gender, from a variety of historical, anthropological and feminists perspectives.
AFRI 0155. People Without History: Archaeology of Atlantic Africa and the Diaspora (ARCH 0155).
Interested students must register for ARCH 0155.

AFRI 0160. Twentieth-Century Africa.
An introduction to recent African history, the course combines chronological and topical approaches. It is organized around the major epochs of colonialism, decolonization and post-colonial independence, but within those periods, we will concentrate on themes such as health, environment, development, the state and artistic expression. Readings draw heavily on primary sources. Three exams and two projects, including group work.

AFRI 0170. Afro-American History and Society Before 1800.
Focuses on the history of Africans and persons of African decent in the part of North America that now constitutes the U.S. Centers on the 18th century, but gives some attention to the 17th and 19th centuries as well. Most of the readings are devoted to the English colonies, but some concern themselves with Dutch, French, and Spanish settlements.

AFRI 0190. Caribbean History and Society Before 1800.
Examines some of the themes important in the multiracial societies of the Caribbean from the 17th through the early years of the 19th century. Explores Creole societies, plantation economies, ethnicity, maroon societies, class and racial divisions, acculturation, syncretic religions, and patterns of slave resistance. Danish, Dutch, English, French, and Spanish settlements are studied.

AFRI 0200. Modern Caribbean History and Society.
This course will critically examine five themes in modern Caribbean history and society: What is the Caribbean? Nationalism, religion, economic development, and popular culture. These themes will be discussed with reference to the different geographical, racial, cultural and political spaces, which comprise the Caribbean.

AFRI 0210. Afro Latin Americans and Blackness in the Americas.
This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present-day. Emphasis is on a multidisciplinary engagement with issues and the exposure of students to the critical discussion of national images and realities about blackness and Africa-descended institutions and practices. The role of racial issues in national and transnational encounters and the consequences of migration of people and ideas within the hemisphere are explored.

AFRI 0220. From Emancipation to Obama: Journeys in African American History.
This course explores African American History through the lens of black freedom struggles. The struggles take all forms, between black and white from local to national levels, within and between black communities, and between men and women. This course assumes some familiarity with basic U.S. History and will utilize a variety of primary sources from autobiographical material to visual art and music as well as the usual monographs and articles. Aside from reading, students will be required to work with a writing fellow on 2 papers. There are also 2 exams.

AFRI 0280. Race, Slavery, Modernity and Knowledge.
This course will review some of the central texts that constitute the different meanings of modernity and discuss how these texts became part of our framework for thinking about modernity, the human self and its different representations. The course will also engage texts that make attempts to complicate the meanings of modernity through a set of engagements with the issues of slavery, colonialism and race. Some key works in the course are: modernity, knowledge production, double-consciousness, social construction of race, racial slavery, coloniality. First Year Seminar

AFRI 0330. Mande Dance, Music and Culture (TAPS 0330).
Interested students must register for TAPS 0330.

AFRI 0560. Psychology of the Black Experience.
This course is designed to facilitate understanding of African American psychological experiences. We begin by critically reviewing historical approaches to the psychological study of Black people. We then shift to an examination of the themes, and research currently being generated by those involved in the quest for scholarly self-definition and for redefinition of the psychological fabric of the Black experience.

AFRI 0570. 20th Century Black Feminist Thought and Practice in the U.S.
This course will explore the ways that black women in the U.S. have experienced racial and gendered discrimination as well as what sorts of strategies (e.g., political, intellectual, narrative, and creative) black women have devised in response. We will be especially concerned with elements of African-American feminist thought and its articulation in writings, music, literature and practice/activism in the 20th century U.S. Enrollment limited to 80.

AFRI 0580. Black Theology.
"In this era of Black Power... theology cannot afford to be silent." This lecture course will plumb the depths of James H. Cone's statement by critically interrogating the cultural, political, and theological dimensions of the development and evolution of Black Theology. The course will consider the nature and task of theology with particular reference to its contested role in American public life, the complex relation between theology, race, and radical politics, and the connections and disjunctures between Black Theology and the fields of history, literature, and philosophy.

AFRI 0600. Race, Gender, and Urban Politics.
This course will introduce students to the methods and practice of studying black urban life with a primary focus on US cities. We will critically examine the urban cultural studies debates concerned with race, gender, class and sexuality. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics include tourism, immigration, poverty, popular culture, gentrification, violence, and criminalization. WRIT

AFRI 0620. African-American Life in the City.
This course examines the social and cultural history of black urban communities by examining the foundation of black communities in Chicago, New York and Los Angeles. We will examine how migration and the intersections of race, class, culture and gender shape life in urban places, reveal the structural forces that define black urban communities, and explore urban African-American expressive forms. Enrollment limited to 45. WRIT

AFRI 0630. Drama and War in Africa: New Voices.
This course is an historical, political and topical examination of the subject of War on the African continent as seen through the lens of artistic response. Class discussions will be based on the different Stage, Screen and Radio Dramas that will serve as course materials. We will analyze reflections by African artists and scholars on the violent conflicts that have characterized the region, since recent history, as well as closely related international perspectives, such as those evident in Hotel Rwanda and The Last King of Scotland. We will also explore how political actors have used performative techniques, and will specifically examine the ways that other members of society (especially women and children) deal with such crises. Canonical African dramatists like Fugard, Ngugi, Soyinka and Ousmane will be referred to, but emphasis will be laid upon the New Voices emerging from a range of African nations, including Rwanda, Uganda, Congo, Senegal, Sudan and South Africa, that have engaged with the subject of war.

Using an interdisciplinary methodology this course will examine three current issues in African societies: War, Violence and Sovereignty; the Politics of Gender in the African postcolony and the meanings of History, Trauma and Public Memory in some African societies. We will undertake this examination by "thinking about Africa differently," that is by thinking about these three issues outside of the dominant set of images, tropes and ideas that have conventionally constructed a particular version of Africa.

AFRI 0650. Eighteenth-Century Art-Imagining the Global Eighteenth-Century (HIAA 0650).
Interested students must register for HIAA 0650.

AFRI 0700. Freedom Films.
"Freedom Films" is a First Year Seminar which will focus on historical documentary films related to the Southern Civil Rights Movement of the 1960s. We will analyze how these films reflect, change, and inform our views of the traditional Civil Rights Movement and how some offer contrasting narratives of that movement. We will also examine how and
AFRI 0700E. Postcolonial Literature (ENGL 0700E).
Interested students must register for ENGL 0700E.

AFRI 0710A. Racial and Gender Politics in Contemporary Brazil.
Brazil is commonly understood as an example of a "racially democratic" nation, but as scholars have recently shown, racism permeates all aspects of Brazilian society. This course traces the development of the theorization of race, racial identity and race relations in contemporary Brazil. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics will include colonialism and enslavement, nationalism, social activism and popular culture. We will also consider how Brazilian social relations differ from or conform to other racialized patterns in other nation-states in the Americas. Particular attention will be placed on the interrelationship between race, gender, class, and nation. WRIT

AFRI 0710B. Ethics of Black Power.
In his now classic text Blood in My Eye, George Jackson writes "All revolution should be love inspired". This course will plumb the depths of Jackson's remark by critically interrogating the ethical dimensions of the Black Power concept and the cultural, ideological, and political interventions influenced by the conceptual revolution. We will assess the ethical parameters of the various ideological tendencies that influenced the conceptual formulation and political articulation of Black Power including Black Nationalism, Feminism, Liberalism, Marxism-Leninism-Maoism and Pan-Africanism.

AFRI 0760A. Rastafarianism.
This course explores the philosophy, history, politics, and theology of Rastafari, one of the Caribbean's most influential and misunderstood liberation movements.

AFRI 0760B. Raggae, Rastafari and Revolution.
Bob Marley in the song Revolution declares, "Revolution Reveals." Beginning from this frame this course will examine the history of Rastafari since it was formed in the late 1930s as an Afro-Caribbean religious practice. It will examine how the emergence of reggae music in Jamaica in the late 1960s mixed and then became one central ingredient of what has been called "conscious music" in the period of the flowering of anti-colonial and black radicalism in the 20th century. The course will explore how reggae music became a form of subaltern language rethinking questions of nation and history in the Caribbean and Africa.

AFRI 0800B. African American Literature and the Legacy of Slavery (ENGL 0710B).
Interested students must register for ENGL 0710B.

Interested students must register for RELS 0820.

AFRI 0850. The Politics of Gender in the Caribbean Novel.
This course will examine 20th Century Caribbean Literature as a genre, which poses challenges to colonialism and raises profound questions of sovereignty. It will examine how Contemporary Caribbean Literature contributes to the world of literature in general.

AFRI 0880. Hip Hop Music and Cultures.
This course will explore both the history of the emergence of Hip Hop and the heated debates that surround it: aesthetics, censorship, sexism, violence, musical theft, originality, authenticity, the politics of cross-racial exchanges, urban black nihilism, and corporate influences on culture. These debates will be framed by our consideration of urban black life, African-American cultural formations, gender, representation, technology, commodification, pleasure and politics. Enrollment limited to 200.

AFRI 0890. Narratives of Power.
Close readings and critical discussion of some of the most influential discussions of power in the past two centuries. Seeks to develop an appreciation of the complexity and elusiveness of discourses of power.

AFRI 0901A. Unruly Crossings: Queerness, Race and Globalization (MCM 0901A).
Interested students must register for MCM 0901A.

This course examines the ways in which literature is influenced by major historical events with special reference to the literatures of the Caribbean. Students will undertake a critical examination of the fictional representation of Europe's encounter with Africa and Asia in the Americas.

AFRI 0980. Fela Anukalpo Kuti and the Social, Cultural, Political, and Aesthetic Implications of AfroBeat.
Fela! The social, cultural, political and aesthetic implications of Afrobeat. This course will examine how all of the above converge in the development and evolution of Afrobeat, with a particular focus on the impact of "colonialism" on African society and culture. Interested students should have an interest in cross-cultural analysis, music appreciation, and the willingness to explore and investigate West African/Nigerian/Yoruba society and culture.

An interdisciplinary approach to the study of plays that address the identities and issues of black gay men and lesbians and offers various perspectives from within and without the black gay and Lesbian artistic communities. Focuses on analysis of unpublished titles. Also includes published works by Baraka, Bullins, Corbitt, Gibson, Holmes, West, and Pomo Afro Homos. Some evening screenings of videotapes. Enrollment limited to 40. WRIT

AFRI 1020A. Black Cultural Studies.
No description available.

AFRI 1020B. Freedom in Africana Political Thought.
This course will be a comparative analysis of freedom as a central value in political thought. It will do this by comparing the knowledge and practices of freedom to slaves in the Haitian Revolution, the ideas of freedom in the Civil Rights Movement, and then finally, the conceptions of freedom in South Africa. Enrollment limited to 30.

AFRI 1020C. The Afro-Luso-Brazilian Triangle.
Examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. Enrollment limited to 40.

AFRI 1020D. Race, Rights, Rebellion.
Provides an in-depth examination of different kinds of social movements. Emphasis will be placed on the theoretical and methodological distinctions among the various kinds of social protests and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, key concepts will include power, resistance, subaltern, hegemony, identity politics and consciousness.

AFRI 1050A. Advanced RPM Playwriting.
Third level of RPM Playwriting; for students that have successfully completed RPM Playwriting and Intermediate RPM Playwriting (workshop). Instructor permission.

AFRI 1050B. Africana Feminism.
No description available.

AFRI 1050D. Intermediate RPM Playwriting.
Second level of RPM Playwriting; for students that want to continue developing their RPM plays or want to begin a new project (workshop).

AFRI 1050E. RPM Playwriting.
Research-to-Performance Method (RPM) Playwriting guides students through the process of developing new plays that are informed by scholarly research (workshop).

AFRI 1050G. Narrating the Radical Self.
How black women in the United States and elsewhere have written about their lives in autobiographies will be the focus of this course. We will discuss black women's use of autobiographical writing to document their
own individual experiences in political movements as well as to provide key insights into how black people throughout the black diaspora have organized in recent history. Enrollment limited to 20.

AFRI 1050H. Introduction to Post-Colonial African and African Diasporic Theatre.
This class will explore plays/theatrical works and ideologies of a selected group of playwrights from Africa, the Caribbean, and the United States. Exploring Culture, Creativity and Theatre practices, the course will focus on the ways in which these artists have syncretically responded to varied forms of colonization and creolization. This class will also pay attention to the Post Colonial Social and historical context that continues to impact and influence these modes of artistic production.

AFRI 1050K. Special Topics in RPM Playwriting: Playwriting Strategies From Contemporary Black Theatre.
A study of Aristotle’s Poetics in relation to Dubois’ four principles of black theatre and Audre Lorde’s essay “The Master’s Tools.” What makes black theatre “black”? We will analyze plays from the 20th Century African-American canon as sites of aesthetic resistance to “normative” American Theatre; and write our own one-act plays based upon our discoveries. Prerequisite: Course is restricted to students who have taken any Africana Studies RPM Playwriting course, Theatre Arts Introduction to Playwriting, Literary Arts Intermediate or Advanced playwriting courses, or has playwriting experience.

AFRI 1050L. RPM Playwriting: Advanced and Staging.

AFRI 1050M. Roots of African American Fiction: Oral Narrative through Richard Wright.
This course will employ a variety of narrative forms -- oral folktales, WPA narratives, slave narratives, short stories by European and American writers -- will also investigate the multiple traditions of African American fiction.

AFRI 1050P. Art and Civic Engagement: Creativity/Reality.
The primary objective of this course is to learn about and reflect upon public art and communities. This course will use selected public art and artists’ ideologies as a framework for exploring culture, creativity, politics and practices and focus on the ways in which these public art works and artists’ responses to varied forms of internal and external operators and stimuli successfully and unsuccessfully give voice to aspects of the environment, history, culture, social justice, health, politics and the imagination. This course will also pay attention to arts organizations, government agencies, history, power relations, human resources as well as leadership and the political that continues to influence public modes of artistic production.

This seminar examines various examples of creative and poetic non-fiction, pertaining to race and the African American experience. While touching upon historic examples and precedent, emphasis will be on contemporary works, including the genres of poetry, drama, the narrative, the memoir, the travelogue and the personal essay. The course will explore what these works offer to the knowledge, popularization and perception of black history and to the shaping of cultural dialogue on blackness and race. Enrollment limited to 25.

AFRI 1050R. The History of Afro Futurism and Black Science Fiction.
Any class called The History Of Afro Futurism and Black Science Fiction automatically begs the question – “Well, what isn’t futuristic about being Black in America?” The entire history of Black America can be seen as a fundamentally futurological and science fiction enterprise – a perpetual biding on hope and struggling for change endeavor that frequently employs far flung visions of tomorrow and other more oblique speculative stratagems in pursuit of outcomes barely foreseeable in the near-present. Enrollment limited to 25.

AFRI 1060A. Africa Since 1950.
This seminar offers a survey of post-colonial African history, while probing the challenges of writing post-colonial history. Readings and discussions will focus on histories that bridge the colonial and post-colonial periods. How robust are these periods? What can historians draw from post-colonial theory? How can historical narratives account for both the colonial legacy and post-colonial dynamism. Enrollment limited to 20; instructor permission required. Students with a background in African history or contemporary African social science will be given priority. Interested students should email the professor at Nancy_Jacobs@brown.edu. DVPS

AFRI 1060C. Contemporary African Philosophy.
An examination of some of the most influential work on problems of identity and being, theology and theodicy, time and history, method and evaluation, race and racism, postcoloniality and liberation in contemporary African philosophy. Readings include the work of Anthony Appiah, Frantz Fanon, Kwame Gyekye, Pauline Hourtondji, D. A. Masolo, John Mbili, Kwame Nkrumah, Léopold Senghor, Tsenay Serequeberhan, among other.

AFRI 1060D. Harlem Renaissance.
Explores the literature, music, and art of the so-called Harlem Renaissance, within the context of broader transformations in African American and American culture and politics in the decades of the 1920s. Readings include books by Langston Hughes, Zora Neale Hurston, Nella Larsen, Alain Locke, Wallace Thurman, and Claude McKay; contemporary essays, reviews and manifestoes; and recent critical studies.

AFRI 1060E. West African Writers and Political Kingdom.
Do West African writers have a role to play in the changing political landscape of their countries? An examination of the ways and means through which a select group of West African writers have dealt with issues that relate to the role of the state in the management of individual and group relations, the politics of gender, civil and military relations, and the construction of new forms of civil society. Enrollment limited to 20.

AFRI 1060F. Philosophy and Race.
This advanced seminar in Africana philosophy will examine critical texts and thinkers that articulate the problems, methods, and techniques for interrogating the interrelationships between the discourse of philosophy and modern conceptions of race. The seminar will move to consider contemporary engagements in this area by drawing on readings and thinkers from analytical, continental, feminist, marxist, and pragmatist philosophical traditions.

AFRI 1060G. Black Radical Tradition.
This advanced seminar in Africana philosophy will explore the contours of insurgent forms of Africana social and political philosophy. With a temporal focus on the twentieth century, we will concern ourselves with explicating the dominant themes, theoretical orientations, and methodological understandings that inform constructions and articulations of the varieties of Africana feminism/womanism, black nationalism, Marxism-Leninism-Maoism, Pan-Africanism, and radical democracy. Enrollment limited to 20.

AFRI 1060H. Racial Frontier in South African History.
This seminar will focus on racial categories in South Africa. We will explore dynamic categories of race from the 17th through 20th centuries. Topics include the relationship of race and class; racial violence; the transmission of culture and knowledge across racial boundaries; intimate relations over racial boundaries; segregation; and race and nation. We will give attention to critiquing the ways that historians have represented race and the ways that conceptions of the category have evolved within the discipline, but the emphasis will be on recent scholarship. Students will be expected to participate actively in the seminar, to write one book review, and one research paper. Enrollment limited to 20.

AFRI 1060I. Africana Philosophy of Religion.
Who, or rather, what is God to the oppressed? This advanced seminar in Africana philosophy will examine the various theories, methods, and arguments that engage perennial questions that arise when contemplating God. The seminar will focus on questions of philosophical method and theological exposition while also being critically attuned to modes of social and cultural analysis and critique, particularly those perspectives inspired by forms of critical theory, feminist theory, and Marxist theory. Limited enrollment.

In this course we will analyze how contemporary, emerging and marginally-read African writers contest the traditional and widely-held interpretations, understanding and assumptions of African literature. We will read and think about African literature in the contemporary post-colonial and post-apartheid moment in Africa. Authors discussed include
Dambudzo Marechera, Zoe Wicomb and Binyavanga Wainaina, among others.

AFRI 1060L. Varieties of American Philosopher Experience. In contrast to Pragmatist and European-oriented views of American philosophy, this course will examine the colonial dimensions and features of American philosophy that emerged out of the colonial soil of early America. Out of this soil sprang extended debates between Native Americans, Euro-Americans and African Americans over the legitimacy of the hegemony that Euro-Americans were establishing over increasing portions of North America. This course views American philosophy as having within it two opposing traditions that have been engaged in ongoing angry dialogues: the dominant or Prosperian tradition of Euro-Americans and the subjugated or Caliban tradition of Native Americans and African Americans.

AFRI 1060M. African Environmental History. This seminar will be devoted to the study of the environment and power in the history of sub-Saharan Africa. The goals for this class are that you learn more about the history of Africa, about the ways that relations with the environment shaped its human history, about the construction of environmental knowledge and its repercussions, and about historical research. This course also has an applied dimension. Eight African environmental professionals visiting Brown through the Watson Scholars of the Environment (WISE) program will also participate in the class. In their final course project, students will conduct research of use to the WISE fellows on historical cases related to their training at Brown. (For more information see http://www.watsoninstitute.org/ge/watson_scholars/). This course qualifies as a capstone seminar in the history department. Enrollment limited to 20 students. Instructors permission is required. Interested students should email the instructor at Nancy_Jacobs@brown.edu with a description of their interests and background.

AFRI 1060P. African Literature: Chinua Achebe. We will analyze the works of Chinua Achebe. In particular, we will explore how Chinua Achebe's novels and essays contest the traditional and widely-held interpretations, understanding and assumptions of African people and literature. We will read and consider his work in both pre and post colonial African contexts. In addition to the sessions held by the instructor, Professor Chinua Achebe, himself, will join the class for several sessions to engage in conversation with students.

AFRI 1060Q. The New Science of Race: Racial Biomedicine in the 21st Century. This course draws on film, news media, scientific discourse, and social theory to engage biomedicine's most controversial investigations of race and the social scientific questions they have provoked. The course asks: How is contemporary science imagining, constructing, and producing knowledge about race? What are the social, political, and cultural implications of this knowledge? Students will be introduced to important science studies methods that we will apply to historical and contemporary research agendas. No prior knowledge of science or racial theory is required. Enrollment preference will be given to juniors and seniors. Limited to 20.

AFRI 1060R. Comparative Africana Literatures and Criticism. Caribbean, African American and African literature has been called engaged literature with explicit commitments to memory, history and ways to think about the political. This course will explore a set of writers, their novels, critical essays and their practices of criticism. It will examine anti-colonial, post-colonial writers as well as African American writers who in the words of Toni Morrison, "rip that veil drawn over proceedings to terrible to relate." We will in this course read the works of George Lamming, Patrick Chamoiseau, Toni Morrison, Richard Wright, Edwidge Danticat, Yvonne Vera, Zoe Wicomb and Njabulo Ndebele.

AFRI 1060S. Race, Science, and Society: Genomics and Beyond (SCSO 1200). Interested students must register for SCSO 1200.

AFRI 1060T. South Africa since 1990. South Africa transformed after 1990, but the past remains powerful. This seminar explores the endurance and erosion of the apartheid legacy, as expressed in historical and fictional narratives. We begin with transition to majority rule and continue with the administrations of Mandela, Mbeki, and Zuma, connecting the formative histories of these leaders with the changing dynamics of politics. We end with narratives about the ways that ordinary people experienced new times. The syllabus includes scholarly works in history and politics, biography, fiction and film. Two short writing assignments and a major research paper. Enrollment limited to 20 juniors and seniors. DVPS WRIT

AFRI 1060V. Black Transnationalism. This seminar will explore the complex dynamics of black transnationalism during the long 20th century, focusing on the circulation of ideas and practices by Africans and African-descended communities and how they were contested and reconfigured as they flowed back and forth. Particular attention will be paid to some less-examined archives, interpretations and perspectives; ideas of black women activist-scholars; aesthetic practices, sonic regimes and religion; insights and experiences of those who lived diaspora. Seminar readings and discussions will introduce and "trouble" some key theoretical issues in the notion of black transnationalism, e.g. diaspora, Pan-Africanism, globality, translocalism, identity, articulation, and solidarity. Enrollment limited to 20.

AFRI 1070. The Life and Work of W. E. B. Du Bois. From the publication of The Souls of Black Folk in 1903 until his death in Ghana sixty years later, W. E. B. Du Bois remained one of America's most penetrating analysts of what he called "the color line." Students read and discuss a selection of Du Bois's writings from his career as journalist, essayist, sociologist, historian, poet, political leader, and pioneering Pan-Africanist. Prerequisite: one course in AC, AF or US History.

AFRI 1090. Black Freedom Struggle Since 1945. Lecture course that examines the extended history of the mass civil rights movement in the U.S. Starting at World War II, we consider the roles of the courts, the federal and state governments, organizations, local communities, individuals and various activist strategies in the ongoing struggle for African American equality, focusing on African American agency, particularly in the South, but also in Boston, Mass. Sources include photographs, documentaries, movies, letters, speeches, autobiographies, and secondary readings. Requirements: Weekly readings, documentary viewings, 4 short papers, 2 exams.

AFRI 1110. Voices Beneath the Veil. Thirty plays, written by Afro-American playwrights and presented on the American stage between 1858 and the 1990s, are examined as cultural and historical documents of Afro-American realities. Supplemental readings from the humanities and social sciences provide critical framework for in-class discussions and student papers. Instructor permission required. WRIT

AFRI 1110L. Aspects of Contemporary Prose Practice (LITR 1110L). Interested students must register for LITR 1110L.

AFRI 1120. African American Folk Traditions and Cultural Expression. A research, development, and performance workshop designed to explore, examine, and articulate various folk traditions and cultural expressions of African Americans. Readings include slave narratives, folktales, and the works of Hughes, Hurston, Bass, and Baraka. Topics covered are music as the African American language of choice; Africannisms in Afro-American culture; and race, color, class, and culture. Instructor permission required.

AFRI 1140. Women, the State and Violence. Examines the role of black women in 20th-century political movements, including with the turn-of-the-century antilynching campaigns, the southern civil rights movement, the black liberation movement, and contemporary educational activism for human rights. Central concerns include history of American radicalism and analyses of antiracist
experiences, and the politics stemming from African American women’s leadership. Prerequisites: AF 150 and/or AF 125.

AFRI 1150. Afro-Caribbean Philosophy. An introduction to the field of Afro-Caribbean philosophy. The first half focuses on the history of the field, identifying its African background and surveying some of its major schools, such as the Afro-Christians, the poetists, the historicists, and existentialists. The second half consists of a more intensive comparative focus on the ontologies and epistemologies of two of these schools.

AFRI 1150F. Home and Abroad (LITR 1150F). Interested students must register for LITR 1150F.

AFRI 1160. Public Health in Africa: History, Politics, and Practice. Examines the ways in which medical knowledge has been produced in sub-Saharan Africa. Treats all medical discourses and practices—including biomedicine and “indigenous” and pluralist medicines—as culturally-based systems of knowledge production. Explores the political economy of health and disease and the role of medicine and medical practices (hygiene, epidemiology, demography) in producing and maintaining power in both the colonial and postcolonial periods.

AFRI 1170. African American Women’s History. Recovers black women’s history and renegotiates American history. Throughout the seminar, discussions will analyze the various tensions that complicate black women’s lives, from accommodation to resistance, or gender issues versus racial issues, or the class tensions that pervade the African American community. Through the series of readings loosely hinged around themes and concepts, students will gain knowledge and understanding of the rich social, intellectual, political and economic networks and activities that African American women undertook on a daily basis in order to survive, progress and uplift. The course encourages the development of a broader and more comprehensive grasp of the complexities American, racial and gender histories. Must have taken at least one Women’s History course and one U.S. history course. Enrollment limited to 20. DVPS LILE WRIT

AFRI 1180. Visual Cultures of the Afro-Americas. This course will examine how the visual modalities of power operate to ascribe, authenticate, and contest meaning within the Afro-Americas, understood here to include Afro-Caribbean, Afro-Latin American and African-American cultures. We will query the complex histories and technologies that constitute the social life of vision in the Afro-Americas, while cognizant of the fact that the field of visuality cannot be understood from single point of view. We will consider images made of and images made by peoples of African descent throughout the Americas as we attend to the reception, interpretation and reproduction of images, as well fields of invisibility. Enrollment limited to 20 juniors and seniors.

AFRI 1190. Haiti, “A New World, A Free World”: History, Art, Politics and Revolution. This course will examine the dual Haitian Revolution as a pivotal moment in the making of the modern world. It will review the various historical interpretations of the Haitian events, examine how these events contribute to or trouble our ideas about modern politics and notions of freedom as well as our conceptions of revolution. The course will engage in these issues by working through three archives: Vodou Religion; The Art of the Revolution and the conventional historiography about the revolution, and will be tied to the hosting of a joint Brown/RISD exhibition on Haitian Art. Enrollment limited to 15 juniors and seniors concentrating in Africana Studies, Visual Art, or History; and 15 RISD students.

AFRI 1200D. African Cinema (MCM 1200D). Interested students must register for MCM 1200D.

AFRI 1210. Afro-Brazilians and the Brazilian Polity. Explores the history and present-day conditions of Afro-Brazilians, looking specifically at the uses of Africana in contemporary Brazil, political and cultural movements among Afro-Brazilians, domestic politics and its external dimensions, and Brazilian race relations within a global comparative framework. Texts from a variety of disciplines. A reading knowledge of Portuguese is not required but students so advantaged should inform the instructor.

AFRI 1250. Women in the Civil Rights Movement. This seminar focuses on women in the civil rights movements, spanning the years of 1955-1968. This course examines issues of gender, race, sexuality, social protest, nonviolent civil disobedience and self-defense during the height of activism against apartheid in the United States and for civil rights.

AFRI 1260. The Organizing Tradition of the Southern Civil Rights Movement. This seminar aims to fill in some of the gaps of the official canon by emphasizing that the modern (1954-1966) southern civil rights movement was not as it is mainly portrayed, a movement of mass protest in public spaces led by charismatic leaders; rather, a movement of grassroots community organizing - quiet day-to-day work. Enrollment limited to 40.

AFRI 1280. Writing About Race in the Post Civil Rights Era. This seminar is an explanation of the transformation of racial policies, relations and rhetorics since the end of the civil rights era in the United States. We will examine the complex ways race has remained central to US society and yet has dramatically shifted- examining terms such as: color-blind society; integration; political race, racialized (and gendered) community formation. Enrollment limited to 20. WRIT

AFRI 1281. Africana Dance in the US (TAPS 1281U). Interested students must register for TAPS 1281U.

AFRI 1360. Africana Studies: Knowledge, Texts and Methodology. This course will explore the issues of Africana Studies as a discipline by engaging in a series of critical readings of the central texts, which laid the protocols of the discipline. The course will also raise issues of knowledge production and methodologies. This course is a senior capstone seminar. Open to all senior Africana Studies concentrators; others by instructor permission only. Enrollment limited to 25. DVPS LILE

AFRI 1410. Africans and the West: Studies in the History of Ideas. This course will examine the political thought of a selection of African thinkers from the period of slavery to the 20th century. It will examine the political thought of thinkers like, Franz Fanon, Ida B. Wells, Cugoano, CLR James, W.E.B. DuBois and Rastafari. The course will be an exploration of black radical intellectual tradition and its different meanings.

AFRI 1440. Theorizing the Black Diaspora. This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community.

AFRI 1470. Southern African History. This course examines major themes of the history of southern Africa from the earliest times until 1994, with a heavy emphasis on historiographical debates. Our discussions of the South African past will always be informed by a consideration of the approach of the scholars who have interpreted and presented it as history. Our major questions concern the origins of historical change and the creation of racial groups. We will probe the significance of race in South African history but also the limitations of its explanatory power. Readings are arranged at three levels. First, we will be reading primary sources, to gain experience in working with the evidence that informs historical work. Second, we will be working through a concise textbook that summarizes the major themes of South African history. Third, we will be reading specialized scholarly books and articles, chosen to illustrate recent discussions about the interpretation of South Africa’s past. The course will meet twice a week for lecture and discussion groups will meet once a week.

AFRI 1500. Incarceration, Education, and Political Literacy. This seminar (w/out audits) in politics and social justice is open to juniors/seniors. Captivity has become a critical political-social phenomenon in U.S. democracy, given that the United States has over two million people in prison/jails/INS detention centers. This two-part, one-year long course explores and maps (using cyber technology) captivity and criminality in the United States, focusing on race, gender, politics and literacy. Students are strongly urged to take both semesters; the second semester course as practicum, with training in cyber-technology and community-based
learning/literacy, is open only to those who complete the fall course (PI I) and the grade option for the second part of the course will be S/NC. Pre-Semester writing assignment required; see syllabus on WebCT for details.

AFRI 1540. Black Popular Cultures.
This course is an historical and topical examination of the development of black popular cultures. We will explore the debates about popular culture and specifically examine the ways that race (as well as gender, sexuality and class) shape these debates. In addition we will explore specific black popular cultural practices (music, dance, film, radio, theater, etc.) as well as the larger contexts for their production and reception. Instructor permission required.

The aim of the course is to introduce students to novels like Head's A Question of Power, El Saadawi's God Dies by the Nile, Acheche's Half of a Yellow Sun and other major prose works by contemporary African women writers. It will present the African woman as a writer, her environment and her commitments. The emphasis is on the writing of continental African women, but will include works of other women writers. For a brief but necessary historical background to the course, it will be introduced with selections from Margaret Busby's Daughters of Africa. Enrollment limited to 25.

AFRI 1600. History, Nation, Popular Culture and Caribbean Politics.
Examines Jamaican popular music as an ideological site of resistance to Creole nationalist versions of Caribbean history and politics. It grapples with the meanings of race, history, and nation-state as contested notions in Jamaican/Caribbean society tracing an alternative genealogy of Caribbean history and politics.

Interested students must register for ARCH 1615.

Examines the development of a unique African/ American cultural and political identity in New Orleans. The seminar focuses on the development of the Faubourg Tremé, the oldest free black community in the United States, and covers the period from 1718 until 1899. Topics include: slavery and resistance; relations between enslaved and free blacks; social and political agitation; and the resulting early development of the nation's Civil Rights movement and legislation. There is discussion also of the formation and continued tradition of artists' and artisans' guilds; Creole language (e.g., Creole slave songs, proverbs); NOLA relationship to the Caribbean and Latin America. Enrollment limited to 20. DVPS

Focus on origins of Modernism among Africana authors of the Americas, with emphasis on the poetry, poetics and poetry movements of Brazil and Latin America, the Caribbean and US from 1888 through the first half of the 20th century. Begins with an overview of innovations wrought by Rubén Darío of Nicaragua, arguably the first modernist poet, and continues with the Harlem Renaissance of the 1910's and 20's; the Brazilian writers at the center of the Week of Modern Art of 1922; Caribbean writers of the Negrimo and Negritude movements; concludes with the work of such US and Anglophone Caribbean poets as Gwendolyn Brooks, Robert Hayden and Martin Carter. Enrollment limited to 20. DVPS

This course on the history of Africa begins as European empire unraveled after the Second World War and ends with a look toward the future. Development was high on the international and national agenda in the mid-twentieth century, but the most conspicuous outcome of the following decades was dependency and decline. Yet the story is more mixed than has been represented in American headlines; it was not one of predetermined and constant failure. More than ever, at the beginning of this new millennium, conditions across the continent have diverged. What are current signs for future development or continuing crisis? WRIT

AFRI 1710A. Political Visions and Community Formations.
This course aims to consider the depths of connection between forms of racialized, gender, class and sexual oppression vis a vis the creation and maintenance of community and intimate social bonds among the oppressed. We will read sociologists, historians and others who have worked on this intersection and musicians and writers such as: Morrison, Bambara, Baldwin, Hill-Collins, Hansberry, soul and neo-soul artists. Instructor permission required. Enrollment limited to 20.

AFRI 1710H. Black Internationalism and African American Literature (ENGL 1710H).
Interested students must register for ENGL 1710H.

AFRI 1710I. Harlem Renaissance: The Politics of Culture (ENGL 1710I).
Interested students must register for ENGL 1710I.

Interested students must register for ENGL 1710J.

AFRI 1710P. The Literature and Culture of Black Power Reconsidered (ENGL 1710P).
Interested students must register for ENGL 1710P.

A lecture course examining the history of Eastern Africa from earliest times until 1963. The area includes the Great Lakes region, the Horn of Africa, Madagascar, and the East African Coast. The major topics are: precolonial interactions, the development of states and stateless societies, contact with other Indian Ocean people, the slave trade, colonial rule, and independence movements.

AFRI 1760B. Contemporary African American Literature and the End(s) of Identity (ENGL 1760B).
Interested students must register for ENGL 1760B.

AFRI 1760T. Literary Africa (ENGL 1760T).
Interested students must register for ENGL 1760T.

AFRI 1800. Race, Empire and Modernity.
Taking Cicero's notion of empire as "ways of life", this course will survey the history of empires as forms of rule. It will explore how race has been deployed in the various types of empire. The course will pay particular attention to empires in modernity since 1492. The course will think about the various technologies of rule and their discourses of power.

This course examines some contemporary responses to the human condition in Africa. Topics will include Democracy, human rights, instability, social justice, identity, community and solidarity. These topics will be approached through the works of Canonical figures such as Leopold Senghor, K. Nkromah, Frantz Fanon, Steve Biko and the recent analytical (T. Kiros), Hermeneutical (T. Serequeberhan), Existential (L. Gordon) Historicism and poeticism (P. Henry) and Postcolonial Mislocation (M. Diawara).

AFRI 1850. The Civil Rights Movement: History and Legacy.
Explores the origins, conduct and complex legacy of the Civil Rights Movement. Topics include: historical roots of the movement; the campaign against legal segregation; the birth of S.N.C.C.; Black Power; the impact of the Cold War, Vietnam and the coming of African independence; and the movement's impact on other political struggles, including movements among women, Latinos, and Native Americans.

AFRI 1890G. Contemporary Art of Africa and the Diaspora (AFRI 1890G).
Interested students must register for HIAA 1890G.

AFRI 1900A. Senior Seminar in Science and Society (SCSO 1900).
Interested students must register for SCSO 1900.

AFRI 1900T. The Postcolonial and the Postmodern (ENGL 1900T).
Interested students must register for ENGL 1900T.

AFRI 1905D. African American Musical Theatre (MUSC 1905D).
Interested students must register for MUSC 1905D.

Interested students must register for BIOL 1920A.

AFRI 1920B. Health Inequality in Historical Perspective (BIOL 1920B).
Interested students must register for BIOL 1920B.
AFRI 1920D. Race, Difference and Biomedical Research: Historical Considerations (BIOL 1920D). Interested students must register for BIOL 1920D.

AFRI 1950. Philosophy, Literature and the Caribbean Novel. This is a thematic course on the philosophical and literary themes which emerge from the Caribbean novel and writing in general.

AFRI 1955. History and Memory in Africana Literature. Focuses on the close reading of nine works by writers of African descent - encompassing a variety of eras, forms and genres, stretching from the slave narrative to more contemporary settings. The thrust is to examine how each writer wrestles with issues of history and memory, with particular attention to the sometimes explicit, sometimes implicit interest in ideas and modes of expression that are rooted in African culture. Enrollment limited to 20 sophomores, juniors, and seniors; preference given to Africana Studies and English concentrators.

AFRI 1970. Independent Reading and Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

AFRI 2001. Theories of Africana Thought: Intellectual History and Critical Theory. This course will be a close reading of the various ideas, theories and practices of the thinkers, writers, artists and activists whose work and practices have constituted an Africana intellectual tradition. In conducting this review we will examine questions around the formation and the history of thought and intellectual traditions in general. We will also think about the various fields of knowledge which have shaped Africana thought. The course therefore will spend some time working through the different meanings of intellectual work and critical thought and theory. Enrollment limited to 12 graduate students.

AFRI 2002. Theories of Africana Thought: Literary and Expressive Cultures. A preoccupation of Africana Studies involves the central yet highly contested role of the notion of what constitutes black culture in the modern world. To what degree can we claim aesthetic and other distinctions between black cultures in the Diaspora and other modern western cultural practices and expressive forms? What role did enslavement, forced migration and segregation play in shaping Africana culture in the modern west? These cultural debates which played a central role in literary, musical, philosophical, aesthetic, historical and sociological analyses of the culture of people of African descent frame this course. Enrollment limited to 12 graduate students.

AFRI 2100. Race and the Modern World. Race and the Modern World is a team taught interdisciplinary graduate seminar that critically examines the intersections of ideas, institutions, ideologies, and practices that have defined race and processes of racialization in the modern era. The seminar will closely examine the theoretical and methodological issues in the critical study of race; the politics and political theories of race; the imbrications of discourses of race, culture, and public life; the political economy of race; and the intellectual history of the discourse of race with an emphasis on the university as a key site in the production of racial knowledge. Enrollment limited to 20.

AFRI 2101. Africana Studies and Interdisciplinarity. This graduate seminar brings together various methodological and theoretical approaches to interpreting Africana life, culture, thought, and politics. Placing special emphasis on emergent scholarship that shapes and reshapes the discipline of Africana Studies, we examine a selection of humanistic and social scientific studies of various local, national, and international contexts. Texts demonstrate the ways in which innovative interdisciplinary methods are crucial for understanding the complexity of Africana world. We will give attention to the strategies scholars utilize to formulate their research questions, design their methodologies, and create new ideas that contribute to the advancement of Africana Studies scholarship. Enrollment limited to 20.

AFRI 2104. Theorizing the Black Diaspora. This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community. Enrollment limited to 20.

AFRI 2110. Anthropological Theories in Africa (ANTH 2110). Interested students must register for ANTH 2110.

AFRI 2450. Exchange Scholar Program.

AFRI 2600L. Seminar: Afro-Theism (RELS 2600L). Interested students must register for RELS 2600L.

AFRI 2760U. Reading the Black Masses in Literature and Critical Practice (ENGL 2760U). Interested students must register for ENGL 2760U.

AFRI 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z). Interested students must register for ENGL 2760Z.

AFRI 2970C. Rethinking the Civil Rights Movement (HIST 2970C). Interested students must register for HIST 2970C.

American Studies

Chair

Matthew Guterl

The Department of American Studies at Brown remains committed to the interdisciplinary study of the American experience, drawing on a range of methodologies and practices to understand American society and cultures. As one of the oldest departments of American Studies, Brown’s program has an almost seventy year history of activist teaching faculty fully engaged in research; prize-winning and productive graduate students who now teach their own students around the world; and curious and exciting undergraduates who use their educations in a wide range of fields from medicine to law; from social work to library science. In 2005, in collaboration with the Center for Public Humanities (http://www.brown.edu/academics/public-humanities), that administers the degree program, American Studies began an A.M. in Public Humanities, based on our revitalized undergraduate curriculum that fosters a publicly engaged scholarship and the John Nicholas Brown Center’s mission to support and strengthen the work of arts and cultural organizations that strive to preserve, interpret, and make the humanities, meaningful and accessible. Faculty and students have together pioneered new avenues in transnational research, exploring the role of the United States in the world and the importance of the world in the United States, and expanded our research and teaching into digital scholarship.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/AmCiv/

American Studies Concentration Requirements

The concentration in American Studies seeks to understand American society and cultures as emerging from historical and contemporary processes at work in local, national, and global contexts. Concentrators study four broad themes: social structure and the practices of identity, space and place, production and consumption of culture, and science, technology, and everyday life. The concentration is predicated on the ideal of scholarly engagement with the public, so students take junior seminars that engage some aspect of the public humanities such as public policy, memorialization, community studies or civic engagement. Study abroad is supported and encouraged.

A concentrator in American Studies will be able to:
• Analyze texts, contexts, and data from multiple disciplinary and historical perspectives
• Synthesize research as verbal, visual and/or digital presentations
• Explore the theory and/or practice of the engagement of scholarship with a broader public
• Understand how American society and cultures have been and are being shaped by global flows of people, goods and ideas
• Experiment with new media as critical tools for scholarship

Concentrators have gone on to a vast variety of careers, including law, public humanities, politics, public service, academics, business, creative arts, and medicine.

Each concentrator will take 10 courses including a Junior Seminar as one of four seminars. Courses are organized by the four themes and four approaches that define America Studies at Brown. Each concentrator will use this framework to create an individual focus in consultation with the Concentration Advisor.

The focus is the flexible core of the concentration. Here each student builds a coherent and dynamic interdisciplinary structure of related courses that develops his or her compelling interest in some aspect of American experience. The four themes and four approaches provide the foundation on which each student builds a unique concentration in American Studies.

All seniors in the class of 2013 forward will be required to do a capstone.

Some concentrators may elect to do an Honors Thesis. Study abroad is supported and encouraged.

Four Themes and Four Approaches

American Studies at Brown is concerned with four broad themes:

• Social Structures and the Practices of Identity: How do communities and individuals come to define themselves, and how do others define them, in terms of, among other categories, nation, region, class, race, ethnicity, gender, sex, religion, age and sexuality? How do organizations and institutions function socially and culturally? What are the roles of social movements, economic structures, politics and government?

• Space and Place: How is space organized, and how do people make place? This includes the study of natural and built environments; local, regional, national and transnational communities; and international and inter-regional flows of people, goods, and ideas.

• Production and Consumption of Culture: How do people represent their experiences and ideas as culture? How is culture transmitted, appropriated and consumed? What is the role of artists and the expressive arts, including literature, visual arts and performance?

• Science, Technology, and Everyday Life: How does work and the deployment of science and technology shape American culture? How do everyday social practices of work, leisure and consumption provide agency for people?

How we study

American Studies at Brown emphasizes four intersecting approaches that are critical tools for understanding these themes:

• Cultural and Social Analysis: Reading and analyzing different kinds of texts, including literary, visual, aural, oral, material objects and landscapes. Examining ethnic and racial groups, institutions, organizations and social movements.

• Global/International Contextualization: Comprehending the United States as a society and culture that has been shaped by the historical and contemporary flows of people, goods and ideas from around the world and in turn, learning about the various ways in which America has shaped the world.

• New Media Understandings: Understanding the creation of new forms of discourse, new ways of knowing and new modes of social organization made possible by succeeding media revolutions. Using new media as a critical tool for scholarship.

• Publicly Engaged Scholarship: Connecting the theory and the practice of publicly-engaged research, understanding and presentation, from community-based scholarship to ethnography, oral history, and museum exhibits. Civic engagement might include structured and reflective participation in a local community or communities or the application of general theoretical knowledge to understanding social issues.

American Studies Graduate Program

The department of American Studies offers graduate programs leading to the Master of Arts (A.M.) in American Studies, and the Doctor of Philosophy (Ph.D.) in American Studies.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/american-studies

In collaboration with the JNBC, who administers the degree program, the department of American Studies also offers the Master of Arts (A.M.) in Public Humanities.

For more information regarding admission and Public Humanities program requirements please visit: http://www.brown.edu/academics/gradschool/programs/public-humanities

Courses

AMST 0150B. Boston: A City Through Time.
This interdisciplinary seminar for first year students will examine the City of Boston from its seventeenth-century origins to the present day. Among the topics covered will be architecture, city planning, physical expansion, political leadership, urban renewal, historical preservation, park development, racial and ethnic tensions, and suburban sprawl. Includes a Boston tour. Enrollment limited to 20 first year students. FYS

AMST 0150D. The West in the American Imagination.
No region has such a purchase on Americans’ collective imagination as the West. No region is so drenched in misrepresentation and mythology. In this seminar, we will use fiction, film, and works of history to explore the American West as both historical reality and wellspring of collective myth. Enrollment limited to 20 first year students. FYS

AMST 0150F. What Does A Woman Want?.
This course is an introduction to psychoanalysis and its vexed and productive relationships to women and feminism. Freud asked his famous question: “What does a woman want?” after years of clinical practice and theoretical speculation. Woman’s desire remained a mystery to him, but the attempt to solve it has given rise to a rethinking of human sexuality, of gender, of social structures, and of creativity. We will read foundational texts by Freud and by feminist disciples and critics of psychoanalysis theories. The literary texts will be read as critiques of theoretical positions, as well as examples of particular historical constructions of gender. The course is broadly interdisciplinary and explores the boundaries and intersections of different disciplinary practices and frameworks. Enrollment limited to 20 first year students. FYS

AMST 0150L. Race, Sex, and Biology: A Cultural History of Differences.
Are your race, gender, and sexual orientation biologically pre-determined? This course traces the history and cultural implications of theories of racial and sexual differences. We examine three “scientific” theories – Darwinism, eugenics, and genetics – in popular culture, public policies and social movements, and consider how these social constructs both empowered and disempowered women, homosexuals, and racial minorities. Enrollment limited to 20 first year students. FYS WR/IT

AMST 0150J. The Boy Problem.
Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation’s ills. Particular attention will
be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 first year students. FYS

AMST 0150K. Culture, Communities, and Change.

Studying varied organizations such as museums, community arts groups, rock bands, and dance companies, this seminar works on three levels. Students consider the role of cultural production in local, national, and international economies and lives; think about methods for studying creative communities; and write the "biographies" of Providence cultural organizations. Issues of tourism, representation, hierarchy, urban space, and social change as well as questions about who puts culture to work and the role of cultural workers will be addressed. We will consider public humanities, engaged scholarship and community organizing as methods as we explore the Providence cultural scene. Enrollment limited to 17 first year students. FYS WRIT

AMST 0150L. Object Histories: The Material Culture of Early America (HIST 0970A).

Interested students must register for HIST 0970A.

AMST 0190A. Selling Love, Selling Sex: Romance in Popular Culture.

Where do our beliefs about love and romance come from? Is it true that "sex sells"? This course examines representations of love in advertising and popular culture from the 1920s, 1950s, 1980s and the present. We'll compare texts such as Ladie's Home Journal, I Love Lucy, and Dynasty to Maxim, Desperate Housewives, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190B. Histories of Memory/Memories of History.

This course examines the role of historical narratives in popular culture and politics, using memoir, films, newspapers, political cartoons, and scholarship to think about how such narratives build and break local, national, and transnational communities, serve and interrupt different kinds of political agendas, and reform the way we orient ourselves to the way we live and to those with whom we live. How is the past made? By whom? Topics will include the Holocaust, the Vietnam War, Columbus, memorials, and holidays. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190C. American (Mass)culinities: Sexuality, Race and Aesthetics.

This course explores masculinity in American popular cultures since 1945. Starting with theories of homosociality, racial and gender formation at the turn of the century, to modern and post-modern cultural productions that visualize or narrativize "masculinity" including novels, films, and video. Through frameworks of psychoanalytic theory, queer theory and critical race theory we think about masculinity as narrative, as a set of discourses, an epistemology, an aesthetic and privileged form of Americana. How we understand the politics of race and sexuality through images of male bodies? What it means to decipher masculinity and men? What are the relationships between gender/genre? Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190D. Popular Music and the City.

This course will examine the relationship between popular music and its sociocultural context by concentrating on three urban music forms: blues, soul, and hip hop. Readings will focus on: (1) concepts such as audiences, the music industry, cultural infrastructure, and race; (2) processes such as urbanization, demographic change, and the politicization of popular music. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190E. It's the End of the World As We Know It: Zombie and Apocalypse Narratives in American Pop Culture.

Zombie narratives originated as part of racist colonial ideologies prevalent in Haiti and the Caribbean, and have since become a means of social and political critique. This course charts how the zombie has been re-appropriated and redeployed in American culture. Taking an interdisciplinary approach, we examine zombie and apocalypse narratives in film, literature, comics, and video games. Enrollment limited to 17 first year students and sophomores. WRIT

Beyond the lure of the "exotic" food, cultural festivals, and distinctive architecture of Chinatowns, Little Tokyos, Filipincities, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are at once historical remnants of an exclusionary past and the current embodiment of the diversity of ethnic communities. This class seeks to understand such spaces by considering the people involved — those within and outside of the community — and the complex relationships among community groups. Texts will include histories, maps, works by urban planners, and a field trip to Boston’s Chinatown. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States.

This course traces nativist anti-immigrant movements and violence in the United States. Starting in the colonial period and ending with contemporary issues, the course demonstrates how anti-immigrant movements occur across place and time and serve to police the boundaries of U.S. citizenship. The course relies on fiction, documentary films and other historical texts to highlight continuing violent conflicts. We focus on the use of "vigilante" violence and put contemporary discussions of immigration in a new frame. Enrollment limited to 17 first year students and sophomores. WRIT

This course argues that two broad "languages" of social reform, coming out of the Populist and Progressive Movements of the late nineteenth century, have shaped the ways in which Americans understand politics. Students consider how these nationalizing narratives construct race, class, and gender. Films and texts include "Stepford Wives," "Easy Rider," and "Wall Street." Enrollment limited to 17 first year students and sophomores. WRIT

What Americans call the "Vietnam War," the Vietnamese remember as the "War of Resistance against the United States for National Salvation." This class seeks to explore multiple American and Vietnamese perspectives on a prolonged conflict that profoundly shaped the nations’ political, social, and cultural landscapes. We focus on differences and similarities in Vietnamese and American interpretations of the origins, conduct and denouement of the war. We examine war memories through memoirs, monuments, movies, documentaries, magazines, and newspapers, as well as in foreign and domestic policies. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190S. Los Angeles Plays Itself: Culture and Critique in the City of Angels.

Explores the history of culture produced in and about Los Angeles during the last century, examining representations of the city in literature, film, television, music, and theory. Texts ranging from detective novels to teen dramas to hip-hop songs will reveal the ongoing conversations and conflicts among Los Angeles’s diverse inhabitants that have shaped its physical, cultural, and social landscapes. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190T. Talking Social Reform: From Populism and Progressivism to Obama and McCain.

This course argues that two broad "languages" of social reform, coming out of the Populist and Progressive Movements of the late nineteenth century, have shaped the ways in which Americans understand politics. Students consider how the possibilities for contemporary reform and change have been informed by these languages. We will examine political texts discussing the New Deal, the eugenics movement, the Cold War, liberalism, and the New Left, among others. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190U. Sports Mediated: Athletics and the Production of Culture in 20th Century America.

When we watch sports, we’re watching more than a game. Newspapers, radio, television, and the internet produce athletic spectacles within certain cultural boundaries determined by profits, as well as by race, gender and class. The course questions how sports media played a generative role in late twentieth century American culture through three case studies: Michael Jordan’s rise to sports stardom; the emergence of skateboarding as an “alternative” sport; and controversies surrounding transgender and transsexual athletes. Non-sports fans are welcome and encouraged!
Enrollment limited to 17 first year students and sophomores. Instructor permission required. WRIT

AMST 0190V. Reading the City: Literary Tourism in New York, Los Angeles, Santo Domingo and Manila
What shapes our conception of a city we haven’t visited? Is it the novels we read or the films we watch? How do our ideas change when we tour or live there? This course investigates New York, Los Angeles, Santo Domingo, and Manila through the various social, political and sexual experiences portrayed in novels, creative nonfiction, poetry, and film. Mindful of our own role as reader-tourists, we will compare depictions of reading, visiting, touring, and living in cities especially with regards to issues of identity and its transformation. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190W. Displaying Activism Then and Now: Making an Exhibition for Social Justice.
We will investigate the possibilities for activism and social relevance through museum exhibitions. We will create an exhibition at the John Hay Library that displays historical and contemporary activism, based on student choices of possible movements including queer rights, animal rights, and environmental concerns. Students choose objects, write labels, and act as curators for the exhibit. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy.
Today’s women workers migrate at a historically unprecedented rate. This class looks at Third World women who migrate for work in global cities. We examine their experiences through the intersectional lens of gender, race, class, and nationality. We also question the social, political, and economic forces that drive migration and draw women workers to specific destinations. Finally, we will look at the multiple inequalities these workers confront and the ways in which they negotiate and challenge them. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190Y. Dead or Alive?: The American West in Popular Culture.
This course traces the imagined Western frontier as seen in television, film, photographs, museum exhibits, art, tourism, amusement parks, performance, video games, and science fiction. It explores these imagined spaces through the lenses of popular and visual culture, placing the West within the larger social, cultural, economic, and political histories of the US. Both real and imagined, these images defined and consolidated the identities of Westerners and those who wanted to be Westerners. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191G. TV on History: Representations of the American Past on Commercial Television.
This course explores commercial television’s influence on our understanding of the American past and the way that this sense of history, in turn, helps audiences to form cultural and political identities. We will discuss foundational methods for critical analysis of television as we use this inquiry to examine some of the guiding themes of American Studies. This class, which has a significant viewing component, traces the evolution of history-based programming in many genres and considers the message and impact of programs such as Ken Burns’ Civil War, Roots, Colonial House, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

From waiting periods to mandatory ultrasounds, a record number of provisions aimed at restricting women’s access to abortion were enacted in 24 U.S. states in 2011. Dubbed the “war on women” by numerous observers, these legislative battles evidence the difficulty in determining reproduction’s “proper” place in governmental politics. But is there more to this battle than abortion? Beginning with Roe v. Wade, this course explores how labor, welfare, women’s citizenship, the family, religion, and activism alter mainstream conceptions of reproductive politics. Using a variety of sources, including films and websites, we will consider what an expansive reproductive freedom might entail. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191I. Mapping the South Asian Diaspora: Citizenship, Identity and Popular Culture.
This course looks at the migration and cultural productions of the South Asian diasporic communities in the U.S. and England. We’ll explore how South Asian immigrants navigate questions of citizenship and identity, while maintaining (or disrupting) connections to the South Asian subcontinent. Through an examination of the ways in which gender, nationalism, class, and sexuality are discussed and performed in literature, film and television, we can trouble the idea of a singular way of being South Asian, causing us to question how we read “home” and “abroad.” Enrollment limited to 17 first year students and sophomores. WRIT

In this course students will look critically at cabaret, documentary film, theatre, dance, popular music, and museum exhibitions, rethinking the ways that Black performances have been configured in debates about American identity in the 20th Century. Rather than try to understand Black performance, and performers, in reductive aesthetic and political frameworks, students will read and write about them as heterogeneous and complex. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191K. New Jack(ed) Cinema: Negotiating Race, Criminality, and Place in the Hollywood Film.
This interdisciplinary course engages critically with film to examine issues of race and criminality, and to better understand our collective, spatial, and personal identities. We study a sub-genre of films, from the 1990s, and investigate how these films interact and intersect with other cultural texts and narratives of race, criminality, sexuality, gender, and the American dream. Films studied include “Colors”; “New Jack City”; “Clockers”; “Boyz ’n the Hood”; and “Menace II Society”; while readings come from film studies, sociology, history, memoir, and policy studies. Enrollment limited to 17 first-year students and sophomores. WRIT

AMST 0191L. Are You Creative?: The Rise of a Modern Virtue.
Are you creative, or, even, a “creative”? Do you plan to be an entrepreneur, a writer, or an artist? Today, “creativity” is championed by education activists, fringe artists, and corporate CEOs alike. This course gives a critical perspective by tracing the biography of an idea through various fields. We will look everywhere for signs of creativity and focus on the relationship between creativity, work, and economic development, taking of Providence, RI, the “Creative Capital” as an example. We will talk to people involved in various aspects of the city’s creative strategy to observe the effects of this powerful idea. Enrollment limited to 17 first year students and sophomores. WRIT

This course examines how our understanding of one of the most mediated armed conflicts of the twentieth century has changed. Why has “Vietnam” become a metaphor for imperial wars and how has it figured in cultural production within and beyond the United States? Considering photographs, films, and personal narratives beginning during the war and continuing into the present, we recognize the fictive and flexible nature of history and how even the worst experiences are made available for collective memory and mass consumption. The course works to decenter the United States and takes into account long-range ramifications and multiple voices. Enrollment limited to 17 first year students and sophomores. WRIT

What does it mean to be Korean American? This course explores the historical and contemporary experiences of people of Korean descent in the United States. In the broader context of U.S.-Korean/Asian relations and through the lenses of race, ethnicity, class, and gender, this course will examine the connections and differences in the lives of diverse Korean populations. The composition of these populations ranges from adoptees, military wives, and entrepreneurs to secondary migrants from Latin America. Throughout the semester, students will be familiarized with the central themes in immigration and ethnic studies such as diaspora, transnationalism, racial formation, and community formation. Enrollment limited to 17 first years and sophomores.
AMST 0191Q. Disbelieving the Evidence: Popular Opposition to 20th Century Public Health Initiatives.
Why do Americans reject programs that make them healthier? Many of the most effective public health initiatives in the 20th century encountered deep resistance. This course explores three initiatives (vaccination, fluoride, and black lung) that continue to generate skepticism or outright opposition. Students will practice several different styles of writing intended for different audiences, including an op-ed and a Wikipedia entry. This writing-designed course will appeal to students of public health, politics, and those interested in the social impact of medical research, as well as those wanting practice in science writing. Enrollment limited to 17 first year students and sophomores. WRIT

Beyond the "exotic" dishes, cultural festivals, and distinct architecture of Chinatowns, Little Tokyos, Little Manilas, Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are both historical remnants of racial oppression and the current home of diverse ethnic communities. Using field trips, films, first person accounts and scholarly explorations, this class examines such spaces by considering the people involved—tourists and residents—and how their complex relationship creates urban and suburban ethnic spaces. Students will workshop and revise papers as well as gain a grounding in approaches to Asian American studies, urban studies, and to the study of public spaces. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191Q. Revolting Bodies: Aesthetics, Representation, and Popular Culture.
Our bodies make us feel (un)comfortable, sublime, ridiculous, grotesque. In this course we examine how social and visual images of our bodies force us to consider our identities in socially approved ways. We employ cultural and disability studies, queer theory, science fiction, and film to ask how representations structure the way we "know" and "see" bodies. Reality television, performance art, and blogs will allow us to consider how revolting bodies can become bodies in revolt—bodies that imagine new possibilities. Students interested in queer, feminist and African American theoretical perspectives and those in health sciences are welcome. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 1250B. Gravestones and Burying Grounds.
Students examine gravestones and burying grounds as material evidence of American cultural history. Themes include the forms of written language and visual imagery in colonial New England, changing roles of women and minorities in society, historical craft practices, implications of stylistic change, attitudes towards death and bereavement, and the material evidence of discrete cultural traditions. Includes field trips.

AMST 1250E. The Neoclassical Ideal in America, 1775-1840.
This course examines the art, architecture, and domestic furnishing of America in the early national period. It focuses on visual culture as a reflection of the new nation's self image as a democratic and enlightened society. Includes class visits to local burying grounds and museum collections, and a Saturday Boston field trip.

Examines the cultural significance of the automobile. Engages with films, television, popular culture, and public documents to investigate the role of the automobile in American society. Includes class visits to museum exhibitions and automotive sites. Students will apply historical knowledge and research methods to the study of the automobile. Enrollment limited to 50.

This 8-week summer course begins with four weeks in Hong Kong, exploring the ways that private individuals, institutions, and government have preserved the city's cultural heritage, examining the conflict and negotiation of economic and political interests in urban renewal and heritage conservation and preservation. The second four weeks are in Providence, where students will explore the history and present-day philosophy and politics of preserving sites and stories from Colonial times to the present, exploring historical archaeology, historic preservation, museum exhibition, and oral history. This is a double credit course. Enrollment limited to nine Brown students and nine from Hong Kong. S/NC

AMST 1570. Site-Specific Writing in Brown's Historical Spaces.
Using on-site writing techniques, students will write, workshop, and direct research-based site-specific short plays to be performed by local actors in historic Providence mansions. Class discussion will explore local history (class includes a walking tour), performance texts, and types of site-specific work. Students will emerge having written and developed a research-based work in a National Historical Landmark. Enrollment limited to 13. S/NC
AMST 1610A. American Advertising: History and Consequences.
Traces the history of American advertising, particularly in the 20th century, to understand the role advertising plays in our culture. Topics include the rise of national advertising, the economics of the advertising industry, the relation of advertising to consumption, the depiction of advertising in fiction and film, and broadcast advertising. LILE

AMST 1610C. American Popular Culture.
This interdisciplinary course examines the history of popular culture in the industrialized United States, drawing on methodologies from different fields, and using a variety of evidence, including minstrel song sheets, amusement parks, television, and romance novels. We look at the audience, the producers and the texts presented by American popular culture both domestically and internationally. LILE WRIT

AMST 1610F. Asian America Since 1945.
Since the end of WWII the Asian American community has undergone radical transformations. This course will examine the shifting political and cultural status of Asians in America, the demographic revolution in Asian America ushered in with the Immigration Reform Act of 1964, Asian Americans and globalization of the US economy, and Asian Americans in contemporary US race relations. DVPS

AMST 1610G. Asian American History.
This course focuses on Asian America as a historical subject and on Asian Americans as makers of their own histories. It is loosely chronological but principally organized around the emergence of an Asian American historical voice. Films, personal accounts, and historical analyses will be read. Many of the texts feature photographs, which we will engage primarily as historical documents. Examining the material realities they represent or suggest, we will also probe their political, economic and cultural dimensions. As weapon, commodity and heirloom, photography has been integral to shaping Asian Americans’ visibility and therefore their social position in the United States.

AMST 1610H. Asian Immigration to the Americas.
Asian America is an extremely diverse community including fifth generation Californians and yesterday’s arrivals: Hmong from Laos, Indians from Guyana, Japanese from Brazil, native born Americans, immigrants, refugees, adoptees, doctors, garment workers, physicists, poets, and storekeepers. The patterns of migration and settlement from Asia to the Americas-U.S. and Canada, the Caribbean and Latin America—over the past two hundred years are examined.

AMST 1610I. Beyond Chinatown: Asian Communities in the United States.
From Manila villages in 18th-century Louisiana, to Punjabi-Mexican families in early 20th-century California, to today’s “little Saigons” and Asians in cyberspace, Asian Americans have built a diverse array of communities in the U.S. The historical circumstances, social forces, and political movements that have shaped these communities are examined. Particular attention paid to the dynamics of race, ethnicity, class, gender, and sexuality in the development of these communities.

Examines the history of women/gender in relation to discourses about sexuality (both physical and mental) in the era of the Civil War through the progressive era. It samples a variety of ideas and movements, including efforts to regulate sexuality and initiatives to advance women into the medical and “helping” professions. Specialization is given to issues of class, race and ethnicity. DVPS

Examines the evolution of child welfare in the United States from its origins in the late 19th century through the purported crisis in the late 20th. Specifically, will trace the history of policies and programs aimed at providing support for dependent children, and at dealing with deviant or delinquent children. Emphasis will be on understanding the social, cultural, and political contexts in which child welfare was formed and transformed during this century.

AMST 1610M. Childhood and Adolescence in American Literature and Culture.
A survey of how changing ideas of childhood and the “new” construction of the category of adolescence are mirrored in American fiction and poetry from the Puritans to the present. Among the writers considered are Anne Bradstreet, Harriet Beecher Stowe, Mark Twain, Henry James, and J. D. Salinger. Provides a comparative cultural perspective by studying works by Wordsworth, Dickens, Pater, and Kosinski.

AMST 1610N. Citizenship, Race, and National Belonging in the Americas.
What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, this course compares the racial and social experience of the U.S. Latinos with that of the populations in various countries in the hemisphere.

AMST 1610O. Civil Rights and the Legacy of the 1960s.
Recent mainstream interpretations of the 1960s tend to neglect the presence and participation of Chicanos and Puerto Ricans in the various movements for civil rights. Using an interdisciplinary approach and drawing on historical, autobiographical and contemporary texts, films, and documentaries, this course examines the Latino experience during the Civil Rights period and explores its legacy today in the lives of Latino and other racial minorities.

AMST 1610P. Class, Culture, and Politics.
Surveys the working class and radical movements that have challenged the ruling economic, political, and cultural systems. Major topics include the railroad uprising of 1877, the Knights of Labor, sexual utopianism and spiritualism, black nationalism, the Socialist and Communist parties, women’s and gay liberation, and the modern ecology movement. Emphasizes cultures. Prerequisite: At least one semester of a college-level course in U.S. history or literature. LILE

AMST 1610R. History of Sexuality in the United States.
This course introduces students to the history of sexuality in America from the colonial era to the present. This is not only a history of gay and lesbian communities. Rather it builds on those histories to create a portrait of how Americans, gay and straight, lived sexual lives in relation to disciplines of knowledge, cultural and political institutions, and popular culture.

AMST 1610S. Immigration to the United States from the Sixteenth Century to the Present.
Explores 350 years of immigration to what is now the U.S. Organization is both chronological and topical. We will reconstruct and compare the major waves of immigration, consider causal theories of migration, examine U.S. immigration policy over time, debate the economic impact of immigration, and discuss the institutions and strategies that immigrants have designed to facilitate adaptation.

AMST 1610U. Introduction to Latino Studies.
A survey of the ways that aspects of the histories and cultures of the U.S. and Latin America have contributed to shape public policy issues and to differentiate the experiences of U.S. Latinos. Among the questions guiding class discussions: What are the implications of grouping nationally, racially, and socially heterogeneous populations under one term, such as Hispanic or Latino? To what extent do “ethnic labels” foster alliances among different ethnic or racial groups? DVPS LILE

AMST 1610V. Introduction to Latino Studies II: Culture and Identity.
Explores the ways in which gender roles and intergenerational expectations diversify by race, class, national identity, and citizenship status-shape the varied identities and cultural experiences of Latinos and Latinas in different decades of the post-World War II period in the U.S.

AMST 1610W. Latino Immigration in the 20th Century.
The purpose of this course is to examine the political, economic, cultural and social impact of Latina/o immigration in the 20th Century and on Latina/o identity formation. We examine the intimate and personal history of the United States in relation to Latin America, Central America, the Caribbean, and Mexico that established interdependent relationships between nations and its people.

AMST 1610X. Latino Popular Music and Culture.
This course explores the various forms of popular culture associated with U.S. Latino communities. It focuses on the production, dissemination, and consumption of mass mediated cultural forms, primarily music, television, film and journalism, but it also examines other cultural expressions such as vernacular art, food, festivals, and folklore. Prerequisite: At least one semester of college-level course in U.S. history or literature.
AMST 1610Y. Latinos and Film.
Examines the way Latinos have been constructed-and misrepresented-in Hollywood film from the silent era to the present, and compares these images with contemporary Latino-made films that counteract Hollywood stereotypes with more accurate and complex images of their own histories and cultures. Readings introduce students to film criticism from a Latino perspective. Weekly screenings in and outside class.

AMST 1610Z. American Popular Culture.
Popular culture is part of everyday life, but also an important site to examine how American identities have been both shaped and reflected through film, television, music, performance, and fashion. We trace American popular culture from the nineteenth century to the present, paying particular attention to the development of different media, and looking at the production and reception of popular culture, as well as the cultural texts themselves. WRIT

Examines the literature of first and second generation immigrant/ethnic writers from 1900 to the 1970's. Attempts to place the individual works (primarily novels) in their literary and sociocultural contexts, examining them as conscious works of literature written within and against American and imported literary traditions and as creative contributions to an ongoing national discourse on immigration and ethnicity. DVPS

AMST 1611C. Pacific Rim in American History.
This course is a comparative study of Filipino, Chinese, Japanese, Korean and Indian settlement in the United States. It begins in the 1700s when Filipino seamen first settled in what is now Louisiana and Texas and concludes with the end of World War II. Attention will be given to immigration from Asia and its relationship to the development of the capitalist world system, the role that Asian American labor played in class and racial formation in America the political economies of Asian American communities, and the various social movements and legislative efforts to exclude Asians from American society and Asian resistance to exclusion.

AMST 1611E. Popular Culture in the United States.
Focusing on popular culture since industrialization, the course will examine particular forms (broadcasting, romance novels, amusement parks, sports) we will as look at the producers of, and the audiences for, those forms. Requirements include three papers based on outside readings and a final.

AMST 1611F. Race, Gender, and Community in Latina Autobiography.
Examines how Latinas chronicle their identities in transitions vis-à-vis markers of race and gender. Through autobiography, memoir, literary criticism, and theoretical readings emphasizing the negotiations of self, place and community via social and geographical locations including family, region, and the nation. Engages in critical interpretation of the socio-cultural and political worldviews of Latina self-discovery and self-authorship.

AMST 1611G. Race, Ethnicity, Religion and Community.
This course examines the intersection of religion and community for communities of color in the United States. A survey of these communities is guided by the desire to discover the collective stories and memories that socialize social and ethnic identities, and serve as a source of personal and political transformation. Out point of entry for understanding the sacred is at "ground level" perspective.

AMST 1611H. Religion and Society in the United States.
Offers a sociological perspective on theories of the relationship between religion and societies that will help us understand and analyze current religious practices and trends, both inside and outside of religious institutions. Students will conduct several observations in religious institutions and create religious rituals of their own.

AMST 1611J. Sex, Love, Race: Miscegenation, Mixed Race and Interracial Relations.
This class will explore the conditions and consequences for crossing racial boundaries in North America. We will take a multidisciplinary approach, exploring literary, anthropological, and historical writings along with several feature and documentary film treatments of the subject.

Examines the evolution of U.S. child welfare from its origins in the late 19th century through its purported crisis in the late 20th century. Traces the history of policies and programs aimed at: providing support for dependent children; improving infant and child survival and health; protecting children from exploitation and abuse; and dealing with deviant and delinquent children.

AMST 1611M. Trauma and the Shame of the Unspeakable: The Holocaust, Slavery, and Childhood Sexual Abuse.
The problem of representing traumatic experience has been raised by philosophers, artists, and survivors. This course compares three historical situations by reading histories, memoirs, fictions, poems; viewing photographs and film; and analyzing the material cultural artifacts such as memorials. Readings will include Freud, Harriet Jacobs, La Capra, Primo Levi, Toni Morrison and "Maus" by Art Spigelman.

AMST 1611Q. The Asian American Case: Race, Immigration and the
Requirements for the course will include two papers/projects and a final exam.

AMST 1611R. Bourgeois Blues: Class Conflict in African American Family History.
The problem of representing traumatic experience has been raised by philosophers, artists, and survivors. This course compares three historical situations by reading histories, memoirs, fictions, poems; viewing photographs and film; and analyzing the material cultural artifacts such as memorials. Readings will include Freud, Harriet Jacobs, La Capra, Primo Levi, Toni Morrison and "Maus" by Art Spigelman.

AMST 1611V. Color Me Cool: A Survey of Contemporary Graphic Novels.
Surveys a variety of comic books and graphic novels, both mainstream and independent. The emphasis, however, will be on the independent graphic novel. Students will also read history and criticism to understand better the context from which the books emerge and to grasp more firmly their visual and textual aesthetics. Must attend first three lectures to be eligible for enrollment.

AMST 1611W. Asian Americans and Popular Culture.
From the Fu Manchu to Lucy Liu, Asian Americans have long been the objects of loathing, terror and desire, in American popular culture. This course looks at Asian Americans in popular culture, music, theater, film and television as subjects, producers and consumers.

AMST 1611X. Narratives of Liberation.
The theme of human liberation has appeared in literary works from around the world and across centuries. This course will examine a variety of narratives that foreground the attainment of physical, spiritual, and political freedom for individuals and groups. Beginning with the Book of Exodus and traveling through African American slave narratives, British proto-feminist novels, Latin American testimonios, and contemporary films, we will examine how a wide range of writers and filmmakers have conceptualized the goal and the process of liberation in their works.

Requirements for the course will include two papers/projects and a final exam.
AMST 1611Z. The Century of Immigration.
Examines in depth the period of immigration that stretched from the 1820s through the 1920s and witnessed the migration of over 36 million Europeans, Asians, Canadians, and Latin Americans to the United States. Explores causal theories of migration and settlement, examines the role of family, religion, work, politics, cultural production, and entertainment in immigrant/ethnic communities, and traces the development and impact of federal immigration policy.

AMST 1612A. Chicago and America.
This course explores the history of Chicago, but also uses the city as a way to think about issues in American history. Sources include novels, memoirs, popular histories, film, and music.

AMST 1612B. Celluloid America.
The American motion picture developed as a unique art form in the late 19th century and its enduring cultural and social significance is irrefutable. In this course, we will explore US history using cinema to explore the cultural values represented within and shaped by the medium. Topics include the invention of the moving image, the rise and fall of the Hollywood studio system, and the emergence and evolution of film genres and styles (i.e. westerns, film noir, musicals, etc.) as a means of economically appealing to the masses and cultivating viewership domestically and abroad.

AMST 1612C. Growing Up in America.
This course will consider American narratives of adolescence and coming of age from the nineteenth century to the present. We will examine the archetypal aspects of coming to grips with maturity and the world, class and gender roles, and the invention of “adolescence” as a new psychological category. International perspectives will be provided by reading some British and Japanese works. Authors covered will include Dickens, Melville, Twain, Alcott, Kerouac, Hemingway, Baldwin, Mishima and Tan, among others. Lectures, class discussions and student reports.

AMST 1612D. Cities of Sound: Place and History in American Pop Music.
This course investigates the relationship between popular music and cities. We will look at a number of case studies from the history of music in the twentieth century. We will try to tease out the ways that certain places produce or influence certain sounds and the ways that musicians reflect on the places they come from in their music. Accordingly, we will consider both the social and cultural history of particular cities and regions—New Orleans, Memphis, Chicago, New York, Washington DC, and others—and aesthetic and cultural analyses of various forms of music—including blues, jazz, punk, hip-hop, and others.

AMST 1612G. Henry James Goes to the Movies.
This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - *Washington Square*, *The Turn of the Screw*, *The Portrait of a Lady*, and *The Golden Bowl* - and study the narrative and visual choices as interpretations of James’s texts. Critical readings on the art of fiction and the art of film will also be introduced.

AMST 1612K. Immigrant America and Its Children.
With a focus on the experiences of the immigrant second generation, this course seeks to expose students to the recent social science literature on contemporary immigration to the United States, including discussions on its origins, adaptation patterns, and long-term effects on American society. We will closely examine patterns of assimilation and adaptation for the children of immigrants, address the challenges they confront when trying to straddle two cultures, describe their ethnic identity formation, and interrogate the effects of their increasing presence on U.S. schools and society in general. The experiences of the second generation will be examined in various institutions including the family, labor market, schools, and community, and we situate these institutions in both national and transnational spheres. The course will consist of lectures by the instructor combined with class discussion of assigned texts. This course will also provide students with an analytic framework to address questions of multiculturalism. The course will also help students develop a better understanding of the dynamics of race, class, gender, and sexuality in society.

AMST 1612L. Eating Cultures: Food and Society.
This course will look at various ways to understand the complex role of food in society. We will look at issues of food production and consumption, and how our relationship to food contributes to the political and social structures that we live with. Our approach will be historical and pay special attention to the ways in which communities of color and immigrants have shaped, and have been shaped by, the food they cultivate, harvest, consume, and market. Field trips and readings explore how food creates ways for people to form bonds of belonging while also creating bonds of control and regimes of inequality. Enrollment limited to 20.

AMST 1612M. Children of Immigrants.
Gives an overview of the experiences of the children of contemporary immigrants in the United States. It looks at their experiences in key social institutions including schools, the family and ethnic community. The course will examine the integration of immigrant children and how factors of race, class, and gender shape their experiences. To address the integration of immigrant children, the course will look at their process of assimilation, maintenance of transnational ties, and lastly the formation of youth identity.

AMST 1612N. Political Theatre of the Americas (TAPS 1610).
Interested students must register for TAPS 1610.

AMST 1612O. 21st Century American Drama (TAPS 1650).
Interested students must register for TAPS 1650.

AMST 1612P. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805).
Interested students must register for HIST 1805.

AMST 1612Q. Women / Writing / Power.
An introduction to American women’s writing and to the development of feminist literary practice and theory. This course will cover a broad historical range from the colonial poets Anne Bradstreet and Phillis Wheatley to contemporary writers Toni Morrison, a Nobel Laureate, and Marilynne Robinson, a Pulitzer Prize winner. Attention to the effects of racial, class, and cultural differences will inform this course that will focus on gender and literature. LILE

AMST 1612R. Race, Inequality, and the American City since 1945.
This course will explore the dynamics of race and class in American cities during the post-World War II period. The readings and discussions will focus on suburbanization, the decline of central cities, conflict over the use and definition of urban space, urban governance, spatial fortification, and popular dissent. The cities examined will include Buenos Aires, Chicago, Detroit, Liverpool, Los Angeles, New York City, São Paulo, and St. Louis.

AMST 1612S. Introduction to American Indian Studies (ETHN 1890H).
Interested students must register for ETHN 1890H.

AMST 1612U. Religion, Politics, and Culture in America, 1865 - Present (HIST 1801).
Interested students must register for HIST 1801.

AMST 1612V. History of Religion in America, 1600-1865 (HIST 1800).
Interested students must register for HIST 1800.

AMST 1612W. Rethinking Women’s Bodies and Rights: Transnational Reproductive Politics.
This course examines the issues and debates surrounding women’s reproduction in the United States and beyond. It pays special attention to how knowledge and technology travel across national/cultural borders and how women’s reproductive functions are deeply connected to international politics and events abroad. Topics include: birth control, eugenics, population control, abortion, prostitution, reproductive hazards, genetic counseling, new reproductive technologies, midwifery, breastfeeding, and menstruation. Students will analyze historical and contemporary materials concerning women’s reproductive roles, as well as read scholarly studies on reproductive issues in various parts of the world.

AMST 1612X. Performances in the Asians (TAPS 1270).
Interested students must register for TAPS 1270.

AMST 1612Y. Twentieth-Century Western Theatre and Performance (TAPS 1250).
Interested students must register for TAPS 1250.
AMST 1612Z. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805).
Interested students must register for HIST 1805.

AMST 1700B. Death and Dying in America.
No description available. Open to juniors and seniors concentrating in American Studies.

AMST 1700C. Slavery in American History, Culture and Memory.
Nearly four centuries have passed since the first enslaved Africans arrived in what is today the United States. More than 140 years have passed since American slavery was abolished. Yet slavery remains a palpable presence in the United States. In this interdisciplinary course, we will examine slavery as a problem in American history, culture, and memory, exploring the institution and its legacies in such spheres as history, literature, cinema, visual arts, and heritage tourism. Open to juniors and seniors concentrating in American Studies.

AMST 1700F. American Publics.
Americans worry about the quality of their civic life and fear its decline. This junior seminar examines an important concept, the public sphere, in its popular and political dimensions as well as looking at the challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet—and offers a range of possible final projects. Not open to first year students or sophomores. Enrollment limited to 20. WRIT

AMST 1700G. Public Memory: Narratives of 9/11.
This junior seminar will focus on narratives concerned with the events of 9/11 and their aftermath: documentary, testimony, stories, memoirs, novels, graphic novels and feature films. We will also study and visit some of the memorials and museums that have been proposed or created in connection to 9/11 and consider them in the context of public memory and public art. Course work will require a project or research paper that engages the question of the role of the humanities in the creation of the public memory of catastrophic events. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1700I. Community Engagement with Health and the Environment.
This junior seminar explores how local community organizations are taking up issues of health and the environment in culturally relevant contexts. We will examine issues of environmental justice, health disparities and the basic tenets of community based participatory research. We will then partner with a local community organization and, depending on need, assist in the design, implementation, and/or evaluation of a program designed to improve the local environment and/or health status of the community. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1800. Honors Seminar.
This seminar is for second-semester junior American Studies concentrators who are interested in writing an honors thesis in their senior year. The outcome of this course will be a proposal for the honors thesis along with a bibliography and a research plan and schedule. Topics covered will be the research methods associated with different disciplines; how to make the thesis interdisciplinary; integrating public projects and new media into a thesis. Open to juniors concentrating in American Studies. Enrollment limited to 20. S/NC

AMST 1900B. America and the Asian Pacific: A Cultural History.
From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DVPS LILE

AMST 1900D. America as a Trans-Pacific Culture.
From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DVPS LILE

AMST 1900F. Transnational Popular Culture.
This course looks at popular culture as a transnational phenomenon. Taking up issues of cultural imperialism, globalization, domestication, and the economics of the culture industry, the course considers the history of cultural flows, from nineteenth century topics such as Chinese opera in the U.S. and Wild West shows in Europe to twenty-first century fast food, anime, sports, Disney, and music. We will consider both the consumers and producers of popular culture in Europe, South America, Asia and Africa, as well as those in the United States. Enrollment limited to 20 juniors and seniors. LILE

AMST 1900I. Latina/o Cultural Theory.
Advanced seminar designed to familiarize students with past and present debates in Latina/o Studies. Knowledge of these critical conversations will aid students in making their own contributions to the field as they write their theses and dissertations. We will read such folks as Jose Limon, Mary Pat Brady, Frances Aparicio, and Gustavo Perez Firmat, to name but a few. Enrollment limited to 20 juniors and seniors.

AMST 1900J. Race, Immigration and Citizenship.
"Who can become an American?" is a central question in American society. This seminar examines the construction of national identity, citizenship as a legal and cultural status, and the struggle for equal protection of the law. The experience of excluded Asian and Latino immigrants are key to understanding this historical and ongoing process. Enrollment limited to 20 juniors and seniors.

AMST 1900K. China in the American Imagination.
Since Columbus, China has occupied a special place in the way America has been imagined and in the ways Americans have imagined their place in the world. This seminar will explore the relationship between China and America from Columbus to the present. While politics and diplomacy play an important role, the emphasis will be on trade, immigration and culture. Enrollment limited to 20 juniors and seniors.

AMST 1900L. Cold War Culture The American Culture in the Cold War.
This seminar will explore domestic politics, social movements, family life, sexuality, gender roles and relations, intellectual currents, and popular culture in the United States during the Cold War years. Special topics include adolescence, "conformity", and the rise of television. Sources include historical monographs, memoir, film, and fiction. Enrollment limited to 20 juniors and seniors.

AMST 1900N. Ethnicity, Identity and Culture in 20th Century New York.
Explores the processes by which 20th-century New Yorkers created a self-consciously modern, urban, and ethnic American culture. Focuses on literary and artistic representations of life in 20th-century New York as manifested in works by five ethnic groups of New Yorkers that immigrated or migrated to the city after 1800: Jews, African Americans, Italians, Chinese, and Puerto Picans. Enrollment limited to 20 juniors and seniors.

AMST 1900O. Filipino American Cultures.
Examines the situation of Filipinos in the U.S. Drawing from social history, cultural studies, literature, and visual culture, the readings focus on the Filipino experience in the U.S. through a study of self-representations in various forms such as literature and visual culture. Readings include Campomanes, Rafael, Bulosan, Limark, and San Juan. Enrollment limited to 20 juniors and seniors.

AMST 1900Q. From Perry to Pokemon: Japan in the United States, the United States in Japan.
This course traces the cultural interactions between Japan and the United States beginning with Matthew Perry is 1854 voyage. Topics include Japanese scrolls depicting Perris arrival; paintings, architecture and musical forms that traveled between the two countries; the U.S. occupation of Japan after World War II; the popularity of anime and other Japanese films in the U.S.; and the importance of American popular culture in post-war Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900R. Gender, Race, and Class in the United States.
Focuses on the emergent feminist scholarship that both empirically and theoretically analyzes how the intersection of race, class, gender, sexual preference, and age shapes the lives of women, men, and transgendered people in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900S. Green Cities: Parks and Designed Landscapes in Urban America.
Examines the cultural meaning and public use of greenspace in American towns and cities. Covers city parks and metropolitan park systems; the
Examines the literature produced by immigrants and their children who limited to 20 juniors and seniors.

Between 1854 and 1965, Asian immigrants to the United States and other countries in the Americas were barred from immigration and citizenship. Circuit of ideas and political movements evolved to resist exclusion, disenfranchisement, and discrimination. We will examine: Chinese Americans and the Chinese revolution, the Ghadar movement among Indians of the Diaspora, and the Japanese American left and Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900V. Immigrants, Exiles, Refugees, and Citizens in the Americas.
Focuses on populations who leave their homelands within the Americas. Examines the meaning of categories "refugee," "exile," "citizen," and "immigrant" in the postwar period. Explores the experience and reasons of people who leave their homelands, the relations between their countries of origin and their new society, and their access to rights in both countries. Questions the extent of population movements in the Americas as redefining conceptions of citizenship, rights, nation, and national identity in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900W. Latina/o Literature: The Shifting Boundaries of Identity.
Focuses on the relationship between national identity and ethnic identity in narratives by and about Mexican American, Puerto Rican, Cuban, Dominican and Central and South American women in the U.S. Texts by and about women from other ethnic and minority groups. Readings from Gloria Anzaldúa, Judith Ortiz Cofer, Dolores Prida, Cristina García, Julia Alvarez, among others. Enrollment limited to 20 juniors and seniors.

AMST 1900X. Latina/o Religions: Encounters of Contestations and Transformations.
The purpose of this seminar is to survey and review the literature in the new and emerging field of Latina/o Religions. We seek to define the Latina/o religious experience and identify its unique qualities and expressions in relation to other religious movements and expressions in the Americas. Enrollment limited to 20 juniors and seniors.

AMST 1900Y. Latino New York.
The Latino population of NYC in the present generation has generated new lines of inquiry for the study of diasporas in contemporary urban settings. This course undertakes an analysis of this experience from diverse interdisciplinary perspectives, with a focus on cultural expressions and representations and with a view toward new ethnographic and historical approaches. Enrollment limited to 20 juniors and seniors.

AMST 1900Z. Latinos and Film.
Analyzes the way Latino ethnicities have been constructed-and misrepresented-in Hollywood films from the silent era to the present, and examines contemporary work by Latino directors, producers, screenwriters, and actors who produce films that counteract the negative stereotypes of Hollywood films with more accurate, complex, and positive images of their own histories and cultures. Weekly screenings both in and out of class and readings that introduce a new body of film criticism from a Latino perspective. Enrollment limited to 20 juniors and seniors.

AMST 1901A. Latinos in Black and White: Race, Ethnicity and Identity in the Americas.
This seminar looks critically at traditional models of "race relations" in the Americas, the historical development and expressions of "blackness," "brownness" and "whiteness" at regional, national and international levels, and their contemporary articulations and ramifications. A primary focus will be the social and political dimensions of "ethnicity" and "race" in relations between Caribbeans and African Americans in New York City. Enrollment limited to 20 juniors and seniors.

AMST 1901C. Making America: The Immigrant Experience in Literature.
Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurs. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors.

AMST 1901D. Motherhood in Black and White.
Focuses on American motherhood with respect to race: under slavery; at the turn of the 20th century; and in contemporary society. Texts include fiction, film, history, feminist and psychoanalytic theory, e.g. "Uncle Tom's Cabin," "Incidents in the Life of a Slave Girl," "Imitation of Life," and "The Reproduction of Mothering." Enrollment limited to 20. Instructor permission required. DVPS WRIT

This is a research seminar designed to explore questions relating to the cultural construction of Asians as a racial group in the United States. The seminar will interrogate the ideas of race, ideology, Orientalism and popular culture. The seminar will then analyze various moments in the formation of dominant images of Asians in American Culture. Enrollment limited to 20 juniors and seniors.

AMST 1901G. Race and Art in America.
How do art and space function as a critical practice, a tool of resistance, and a form of self-determination in racialized 20th-century America? This course will introduce students to ways of looking at and analyzing examples of visual, performance, and mixed-media artwork by African American, Asian American, and Chicano artists who resist, challenge, deconstruct, and subvert traditional concepts of art. Enrollment limited to 20 juniors and seniors.

AMST 1901H. Race and Poststructuralism.
Poststructuralism continues to be a major preoccupation in the discourse of the academic left, but relatively few courses consider how poststructuralist interrogations of subjectivity and history can help us to think about race in a U.S. context. This seminar begins with an overview of key poststructuralist concepts, then moves to poststructuralist texts which take up race as a primary object, and finally takes up the collision between poststructuralist thought and racial identity politics. Enrollment limited to 20 juniors and seniors.

AMST 1901I. Race and Sexuality in Contemporary U.S. Film.
This course aims at producing cultural criticism about the representation of race and sexuality in U.S. films of the 1980s-90s. By examining the circulation of images and ideas about bodies in Hollywood and "independent" production, we consider how cultural norms are constructed. Texts include films, popular film criticism (print and televisival), film theory, and industrial history. Enrollment limited to 20 juniors and seniors.

From 1870 to 1943, Chinese were defined by their "race" as ineligible for citizenship and immigration. Similar prohibitions against Japanese, Filipinos, and Indians followed in the early 20th century. This seminar will examine Asian American struggles against exclusion and how they shaped American definitions of citizenship, race, and constitutional rights. Enrollment limited to 20 juniors and seniors.

AMST 1901K. Racial Formation in North America
No description available. Enrollment limited to 20 juniors and seniors.

AMST 1901L. Reading Latina/o History through Fiction
No description available. Enrollment limited to 20 juniors and seniors.

AMST 1901M. Race Immigration and the Law: The Asian American Case
From 1870 to 1943, Chinese were defined by their "race" as ineligible for citizenship and immigration. Similar prohibitions against Japanese, Filipinos, and Indians followed in the early 20th century. This seminar will examine Asian American struggles against exclusion and how they shaped American definitions of citizenship, race, and constitutional rights. Enrollment limited to 20 juniors and seniors.

AMST 1901N. Race Immigration and the Law: The Asian American Case
From 1870 to 1943, Chinese were defined by their "race" as ineligible for citizenship and immigration. Similar prohibitions against Japanese, Filipinos, and Indians followed in the early 20th century. This seminar will examine Asian American struggles against exclusion and how they shaped American definitions of citizenship, race, and constitutional rights. Enrollment limited to 20 juniors and seniors.

AMST 1901O. Reading Latina/o History through Fiction
Examining the imaginative act of writing, the course studies the fictional portrayal of historical subjects, facts, and events. Focuses on how non-fiction is fictionalized in contemporary Latina and Latino novels. How do "Latino" facts--molded by struggles for civil and human rights and U.S. foreign intervention--speak? How does novelist orient readers toward an understanding of social reality? Enrollment limited to 20 juniors and seniors.

AMST 1901P. Race Immigration and the Law: The Asian American Case
Examining the imaginative act of writing, the course studies the fictional portrayal of historical subjects, facts, and events. Focuses on how non-fiction is fictionalized in contemporary Latina and Latino novels. How do "Latino" facts--molded by struggles for civil and human rights and U.S. foreign intervention--speak? How does novelist orient readers toward an understanding of social reality? Enrollment limited to 20 juniors and seniors.

Departments, Centers, Programs and Institutes
possibilities and challenges posed by various types of evidence: visual and literary representations, memoirs, child rearing advice, toys and play, children’s literature, clothing, and protective and restrictive laws. Enrollment limited to 20 juniors and seniors. DVPS

AMST 1901O. Rivers in the Industrial City.
Rivers promote industrial development and serve as important resources and cultural amenities for communities that have a substantial manufacturing base. This interdisciplinary seminar looks at the use and abuse of rivers in American industrial cities from the 18th century to the present. Enrollment limited to 20 juniors and seniors.

Surveys Hollywood representations of dominant masculinity with the aim of interrogating these representations. Considers how such representations have changed over time and how changes may be read in relation to contemporary social, economic, and political pressures. In addition, considers how these texts interact with theoretical issues of representation, identification, and spectatorship. Enrollment limited to 20 juniors and seniors.

AMST 1901R. Social Movements of the 1960s.
This course examines U.S. social movements from 1954 through 1974, concentrating on the 1960s. Drawing on primary and secondary sources, we examine such topics as the Civil Rights Movement and the emergence of Black Nationalism, the antinuclear movement, the relationship between the New Left and second-wave feminism, and the movement for gay liberation. The course also pays attention to how the ‘sixties’ are represented in contemporary culture. Enrollment limited to 20 juniors and seniors.

AMST 1901S. Society and Identity: A Comparative Approach to the Colonial Americas.
Compares New Spain, the British North American mainland, and the Caribbean from initial colonization in the 16th century to 18th-century wars of independence. Focuses on the complex interplay of class, gender, race, and ethnicity that defined social formations and shaped identities. Reading biographies of ordinary people as well as synthetic histories, engages the past on different levels and connects individual identity and action to broader historical processes. Enrollment limited to 20 juniors and seniors.

The American Dream is one of the great myths of our national history— not “myth” in the sense of a falsehood, but rather a widely-held belief whose validity cannot be definitively proved or disproved (like “all men are created equal”). Using sermons, fiction, songs, and other cultural forms, this research seminar explores the complexities of the myth from the time of the Puritans to the present. Enrollment limited to 20 juniors and seniors.

AMST 1901V. The Contested City: Urban Culture in America, 1880-1940.
Focusing on the popular culture of American cities, this course examines the evolution, commercialization, uses, and struggles over vaudeville, jazz, and early film, and leisure activities such as dancing, nightclubbing, drinking, and shopping. Consideration will be given to the gendered, class-based, and racialized nature of leisure activities and spaces, reform efforts, and the dynamics of social change. Prerequisite: At least one semester of college-level course in U.S. history or literature. Enrollment limited to 20 juniors and seniors.

AMST 1901W. The Development of Black Feminism.
Beginning with the participation of black women in the abolition movement and ranging forward to current black women novelists and feminist theorists, this course will examine the intellectual development of black feminism. We will pay particular attention to black feminism as an area of critical study, and will explore the concepts of representation, ideology, discourse, race, gender, and sexuality. Enrollment limited to 20 juniors and seniors.

Will examine the origin and design, at the beginning of this century, of the U.S. child welfare system. The separation of child from adult welfare, the definition of a special relationship between children and the state; foster care versus institutional care; the juvenile justice system; child labor; infant and maternal welfare; aid to children in families; and school-based welfare are some of the topics to be covered. Enrollment limited to 20 juniors and seniors.

AMST 1901Z. The Old/New Immigration.
By comparing and contrasting the migration and adaptation experiences of Russian Jews and southern Italians, explores in depth the massive immigration from eastern and southern Europe that took place between 1880 and 1924. Topics include: the causes and countours of emigration, settlement patterns, adaptation and assimilation, ideologies of left and right, immigration as a gendered experience, immigrant writers and intellectuals, nativism and restriction, and the “new immigration” and national memory. Enrollment limited to 20 juniors and seniors.

AMST 1902A. The Politics of Asian American Culture.
From Bret Harte’s “Heathen Chinee” to Bill Clinton’s John Huang, Asian Americans have been represented as aliens in American culture. The task of Asian American cultural production has been to create a space for an Asian American citizenship. This course looks at autobiography, fiction, drama, film, and cultural criticism to understand how Asian American culture makers have sought to combat imposed stereotypes, subvert structural hegemony, and undermine self-imposed orthodoxies. Enrollment limited to 20 juniors and seniors.

Confronts the notion of Latinos as “foreign” by demonstrating historical depth and geographic breadth of the Hispanic/Latino experience in what is now U.S. territory—from colonial Florida, California, and the Southwest, to early 20th-century Puerto Rican and Cuban communities in New York. Explores contrasting Hispanic and Anglo views of the presence of Hispanics via such diverse sources as historical chronicles and autobiographies, Hollywood films, romance novels, and popular music. Enrollment limited to 20 juniors and seniors.

AMST 1902H. Topics in Asian American History and Culture: Diasporas and Transnationalisms.
This seminar reviews the theoretical literatures on diaspora and transnationalism. We then place Asian migrations to the Americas (North America, Hawaii, the West Indies, Central and Latin America) in the context of migrations out of and within Asia in the 19th and 20th centuries. Finally, we consider transnationalism as an analytical framework for understanding the process of Asian-American community formation. Enrollment limited to 20 juniors and seniors.

What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, the racial and social experience of U.S. Latinos are compared with that of the populations in various countries in the hemisphere. Theoretical readings and empirical examples. Enrollment limited to 20 juniors and seniors.

AMST 1902N. Uncovering the Story of Latina/o Identity: Movement, Space and Culture.
This course examines the multiple ways of knowing and understanding Latina/o cultural identity and expression in the Americas. The story of a Latina/o cultural identity is mapped out as place and sentiment in both historical and contemporary periods. We utilize theory and method from both the social sciences and the humanities to uncover and better understand the story of Latina/o identity and ourselves. Enrollment limited to 20 juniors and seniors.

AMST 1902O. Urban Borderlands.
This course analyzes changing patterns of immigration from Latin America to the U.S. by comparatively examining the emergence of various Latino communities and cultures in selected cities. It explores interethnic relations among the various Latino communities, as well as Latinos’ interactions with other racial and ethnic groups. The cities to be considered are Los Angeles, New York, Miami, San Antonio, Washington DC, and Providence—the last of which will be explored via student projects in the community. Enrollment limited to 20 juniors and seniors.

AMST 1902P. Women and American Modernism, 1900-1940.
No description available. Enrollment limited to 20 juniors and seniors.
AMST 1902Q. Chicano Studies Seminar
Explores the culture and politics of Mexican people in the United States leading up to and through the 1960s and 1970s, and the post-nationalist period that continues to the present. Our approach will be interdisciplinary, including readings and films that explore the history, sexuality, art, music, labor, and gendered identities of this diverse community. Prerequisite: Introduction to America/Ethnic Studies recommended. Enrollment limited to 20 juniors and seniors.

AMST 1902T. Henry James and The American Scene

AMST 1902Y. The Black Female Body in American Culture
This course on gender and representation will use the black female body as an example of the ways in which images, both verbal and visual, of women of color are utilized within American culture. Through literature, film, visual art, and popular culture, we will consider the legacy of slavery, the persistence of stereotypes, sexual violence, and black women's resistance. Enrollment limited to 20 juniors and seniors.

AMST 1902Z. Radio: From Hams to Podcasts.
This course examines the history of radio broadcasting and asks if a consideration of radio's historic flexibility can predict the future of this interesting medium. Readings will focus on the exciting new field of radio studies, emphasizing economics, structures, and listeners. Topics include radio's ability to cross borders, create racial and gender categories, and change programming possibilities. Enrollment limited to 20 juniors and seniors.

AMST 1903B. Alien-nation: Latina/o Im/migration in Comparative Perspective.
Explores how Latina/o immigration to the United States has reshaped the meaning of “America” over the last hundred years. We will study Latina/os in comparison to other im/migrants and examine how US immigration policy has created a nation partly composed of “alien” residents, some citizens, others not, who have constructed alternative notions of belonging. Enrollment limited to 20 juniors and seniors.

AMST 1903E. City of the American Century: The Culture and Politics of Urbanism in Postwar New York City.
This seminar will investigate the life, history and culture of New York City from World War II to the fiscal crisis of the mid 1970’s, with a particular interest in transformations in the built environment of the city and region. We will primarily focus on the cultural representations, intellectual visions, and political struggles that arose around these transformations, but will also consider their effects on everyday life. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies.

AMST 1903F. Topics in Asian American History: Migration, Race and Citizenship.
This seminar will explore the relationship between Asian Americans and the US State in three historical moments; the era of exclusion, WWII internment, and the post-civil rights era. We will look at citizenship as a cultural signifier that organizes race, gender, sexuality and class as well as a legal status. Enrollment limited to 20 juniors and seniors.

AMST 1903G. Oral History and Community Memory
Students in this seminar will conduct oral history interviews and archival research to create an audio and visual history of one Providence neighborhood. Collected materials will be prepared for public presentation as a walking tour and web site. Enrollment limited to 20 juniors, seniors, and graduate students.

AMST 1903H. Space and Place: Geographies of the Black Atlantic.
Is the map on an iPhone representative of the space beneath our feet? Does a ‘map’ have to represent geographic space or can it represent something else? For centuries people have sought to make sense of the geographies of their everyday lives as well as environments out of their purview. In this course, we will engage with a number of approaches to space and place including historical, cultural, ethnographic, literary, geographic, and artistic, focusing on African diasporas and the Black Atlantic. Students will analyze texts, artworks, and web-based projects, and at the end of the course, create their own maps. Enrollment limited to 20 juniors, seniors, and graduate students.

AMST 1903P. Please, Please Me
This seminar will investigate theories of pleasure and its representation in a range of fictional texts. What is it that makes a text pleasing and for whom? How do we talk about pleasure and explain it to others? I am especially interested in the representation of pleasure from the 1970s on. Enrollment limited to 20 juniors and seniors.

AMST 1903Q. Out of Place: Regional Boundaries and their Transgression in Novels, Photography, Public Humanities.
This class explores the meaning of “region” in contemporary American culture. Focusing primarily on the West, we’ll examine the construction and transgression of geographical and ideological regional boundaries. Questions considered include: What does crossing boundaries tell us about the stability and meaning of region? What role do race, gender, and nationality play in moving across regional lines? What do shifting regional identities tell us about the possibilities and problems in ways of transforming identity? Sources include fiction, essays, websites, and photography. We use skills and ideas built over the semester to consider the ways museums and other public sites construct regional boundaries. Enrollment limited to 20 juniors and seniors, with priority given to American Studies concentrators.

AMST 1903R. Big Business, the Bomb, and Smokey Bear: Cold War Origins of Today's Environmental Movement.
Beginning with the psychological, cultural, and environmental changes brought by the Atomic Bomb, this seminar traces Americans’ growing environmental awareness and concern with corporate power. We will look at classics like Aldo Leopold’s Sand County Almanac and Rachel Carson’s Silent Spring, as well as films, poetry, popular texts, and histories complicating traditional notions of the origins and conduct of the contemporary environmental movement. Students will have the opportunity to explore an aspect of environmentalism or the environment in depth through a semester writing project. Enrollment limited to 20 juniors and seniors.

AMST 1903T. The Materiality of History: Material Culture Theory and Practice.
Focusing on Native American, early American, and contemporary US material culture, this course develops critical methods for analyzing historic materials, not as silent monuments to the past, but as legible research materials for scholarly work. Who studies ‘things’, and with what methods? From the invisible to the living to the monumental, what are the limits of “thingness”? What is the role of commodification and American consumerism? Through selected readings and site visits, we will identify ‘best practices’ for integrating artifacts, collectibles, and every day things with documentary research in narrating and exhibiting the past. Enrollment limited to 20 juniors and seniors.

AMST 1903V. Asian and Latino Immigration.
This seminar examines the ways in which the histories of Asian and Latino immigration parallel and intersect each other throughout US history. Capitalist development and labor migrations; wars and refugees; immigration policies and changing racial formations will be among the topics we explore. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies and Ethnic Studies. DVPS

AMST 1903W. The Boy Problem: Male Adolescence as Social Pathology.
Beginning with the psychological, cultural, and environmental changes brought by the Atomic Bomb, this seminar traces Americans’ growing environmental awareness and concern with corporate power. We will look at classics like Aldo Leopold’s Sand County Almanac and Rachel Carson’s Silent Spring, as well as films, poetry, popular texts, and histories complicating traditional notions of the origins and conduct of the contemporary environmental movement. Students will have the opportunity to explore an aspect of environmentalism or the environment in depth through a semester writing project. Enrollment limited to 20 juniors and seniors.

AMST 1903X. Style and the Man: Masculinity in Fashion and U.S. History.
This class will examine the role clothes have played in constructing notions of masculinity and manhood from the mid-19th century to the
present. We will take seriously the oft-heard comment, "the clothes make the man," by studying the sartorial circumstances around the formation of men's fashion. These circumstances include class, ethnicity, race, gender, sexuality, and generation. Our study will be episodic and privilege New York and Los Angeles, though other locations will be considered comparatively. Enrollment limited to 20 juniors and seniors concentrating in American Studies.

**AMST 1903Y. American Publics.** Americans worry about the quality of their civic life and fear its decline. We examine the public sphere’s popular and political dimensions as well as challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet. Taught simultaneously with the same course at the University of Melbourne, Australia, students will be linked digitally for discussion and collaborative writing. Enrollment limited to 20 juniors and seniors.

**AMST 1903Z. Shrine, House or Home: Rethinking the House Museum Paradigm.** This seminar will examine historic house museums within the context of American culture from the founding of Mount Vernon in 1853 to their present decline in popularity and relevance. Utilizing sources from a variety of disciplines including literature, women’s and family history, and museum and preservation theory and practice, students will re-examine the prevailing historic house museum paradigm and develop interpretation plans for house museums in the Providence area. Enrollment limited to 20. If oversubscribed, priority is given to students in the Public Humanities Programs and Department of American Civilizations. No prerequisites.

**AMST 1904A. Memories, Memorials, Collections and Commemorations.** To understand how American culture thinks about the past, we will explore a range of texts including museum exhibits, historical society collections, memorials, and civic celebrations. These sites and objects, the material culture of memory, help us understand the construction of national, community and personal identity. Students will also undertake practical projects in memorialization and commemoration, among them designing the program for a new memorial to the Rhode Island slave trade. Enrollment limited to 20 juniors and seniors.

**AMST 1904B. Henry James Goes to the Movies.** This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - Washington Square, The Turn of the Screw, The Portrait of a Lady, and The Golden Bowl - and study the narrative and visual choices as interpretations of James’s texts. Critical readings on the art of fiction and the art of film will also be included. Enrollment limited to 20. WRIT

**AMST 1904C. The Pacific Rim in American History.** Investigates the circuits of people, goods and ideas between Asia and the Americas. Although these flows have been at work for the past half millennium, this course will focus principally on three historical moments: the trading world of the 17th and 18th centuries; colonialisms and their critics in the late 19th and early 20th centuries; and the “American Century” in the late 20th century. Enrollment limited to 20 juniors and seniors.

**AMST 1904D. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative.** In 1893, Historian Fredrick Jackson Turner declared “the closing of the American frontier,” touching off an argument among historians about the meaning and significance of European expansion and settlement in the area west of the Mississippi River. Historians, filmmakers, television producers and photographers have continued the debate in their writings, images, and drama that will be the subject of this class. We will consider the various ways The West has "ended" in popular culture and academia, and consider how these narratives shape our present perceptions of the region and the people and cultures that inhabit and border it. Enrollment limited to 20 juniors and seniors.

**AMST 1904E. Autobiography and Memoirs in Recent American History (HIST 1970N).** Interested students must register for HIST 1970N.

**AMST 1904F. The American Experience: The Southeast Asian Refugees/Americans.** Explores the complexity of the American experience, the displacements and diasporas of the Vietnamese, the Cambodians, the Hmong, the Lao, and the Lu Mien in America through multiplicity of perspectives and interdisciplinary approach. Special emphases are on the reinvention of new lives in New World, the American-born generation, how the American-ness and the sense of "home" are constructed, defined, and contested through literary and cinematic works, self-representations, and cultural productions written and produced by these new Asian Americans themselves. Enrollment limited to 20. DVPS

**AMST 1904G. Museums, Identities, Nationhood.** Will explore the national museum as a cultural institution in a range of contrasting contexts, revealing how these museums have been used to create a sense of national self, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, postcolonialism and multiculturalism which have come to the fore in national politics in recent decades. Enrollment limited to 20 juniors, seniors, and graduate students.

**AMST 1904H. The Teen Age: Youth, Society and Culture in Early Cold War America.** An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 20 juniors and seniors.

**AMST 1904I. Art/Place.** This course surveys the many ways in which contemporary artists respond to, remake, and intervene in places, and teaches students to articulate their own creative responses to place. We will be working intensively in Providence’s Jewelry District, collaborating with the nonprofit Artists in Context to create a public artwork, and developing each person’s creative practice in response to the narrative and aesthetic prompts of this contested space. The course will culminate in a final exhibition of student projects curated by the students themselves. Enrollment limited to 14.

**AMST 1904J. The Asian American Movement: Communities, Politics and Culture.** In 1969 students at S.F. State College invented a new social category; they called it Asian America. This seminar begins with an examination the Asian American Movement, its origins and aspirations, its ideological cross currents, its failures and enduring legacies. But the central question we will ask is, what relevance does the Asian American Movement have for struggles for social justice today? Enrollment limited to 20 juniors and seniors.

**AMST 1904L. Cultural Heritage, Curation and Creativity.** The course examines current theories and practices in cultural heritage work from various international perspectives and places them in dialogue with practices, theories and critical perspectives from the contemporary arts. It offers students the opportunity to participate in a practical and creative cultural heritage project, realizing a curated experience/event/experience within the urban environment of Providence. Questions of material and form; the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Following readings in cultural heritage theory, curatorial studies and critical theory, the course will engage students both intellectually and practically through individual and group curatorial projects. Enrollment limited to 14 juniors and seniors. LILE

**AMST 1904M. Charles Chapin and the Urban Public Health Movement.** Examines the science, politics, and programs of the 19th and early 20th century urban public health movement. Scope will be national but the focus will be on Providence, particularly during the tenure of Charles Chapin as Superintendent of Health. Will result in the mounting of an exhibit illustrating and explaining one of facet of the movement. Enrollment limited to 20 juniors and seniors.

**AMST 1904N. The Korean War in Color (ENGL 1761V).** Interested students must register for ENGL 1761V.
AMST 1904D. Native American Environmental Health Movements (ETHN 1890J).
Interested students must register for ETHN 1890J.

AMST 1904P. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).
Interested students must register for ENGL 1900R.

AMST 1904Q. Engendering Empire (ETHN 1890K).
Interested students must register for ETHN 1890K.

This course explores the challenges to narrative modes, institutional patterns, and models for studies in material culture that are posed by emerging digital media practices. This course will focus on the example of the collections and resources of the Haffenreffer Museum of Anthropology. Readings in brain science and anthropology that focus on the cognitive and social mechanics of cultural capital formation to project development techniques in simulation and prototyping that derive from movie production, interaction design, game development and architecture. Students from a broad spectrum of arts and science backgrounds, including specifically those from museum curation and computer science, are welcome. Enrollment limited to 15. LILE

AMST 1904S. Ethnic American Folklore: Continuity and the Creative Process.
The course investigates how folklore and the oral culture of diverse cultural groups have transformed within their texts and in their creative representations and meanings. It looks into the dynamics of cultural continuity and the creative process involved, from oral narratives, foodscape, family lore, the senses of place, and the senses of home. At the juncture of the oral, the written, the popular, and the high tech, what are the new cultural forms, new cultural products, communication milieu and venues negotiated and contested. Anthropological field research methods and training will be a major emphasis of the course. Enrollment limited to 20.

Debates about women and work seem to be everywhere in American culture, dominated by the question of whether professional women can "have it all." Simultaneously, women—especially women of color—continue to be concentrated in the lowest-level, most poorly-paid jobs. And as more families depend on women’s income, the contradictions between waged work and unwaged family work grow more acute. Controversies about women and their labor—waged and unwaged—have a long history in the U.S. This course will explore current debates from historical, sociological, and theoretical perspectives, with particular attention to the impact of race and class. Enrollment limited to 20 sophomores, juniors, and seniors.

AMST 1904U. Museum Collecting and Collections.
This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits, and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments.

AMST 1904V. Decolonizing Minds: A People’s History of the World.
This seminar will explore the knowledge-production and military-financial infrastructures that maintain empires, as well as the means through which people have either resisted or embraced empire. While some attention will be made to the 19th and early 20th century colonial context, the bulk of the course will focus on the Cold War liberal era to the neoliberal regime that continues today. Possible topics include: popular culture and ideology, the Cold War university, area studies, international anti-war networks, transnational labor activism, the anti-colonial radical tradition, and the Arab Spring/Occupy Movements. Weekly readings: evaluation based on participation and analytical essays. Enrollment limited to 20. DVPS

AMST 1904W. Native American Environmental Health Movements (ETHN 1890J).
Interested students must register for ETHN 1890J.

AMST 1904X. Imagining And Depicting China In America.
Geographically remote and less-obviously intertwined politically and culturally, China’s distance has fostered an active imaginary, producing rich visual and textual resources. This seminar examines narrative and visual culture over the long period Americans have been fascinated with China and the Chinese, from the 18th century to the present. Visual primary sources are our principal “texts” and include paintings, cartoons, decorative arts, photography, films, fiction, news articles, and government documents. The goal of the course is to interrogate how we envision China and the Chinese today, placing that vision within a critical historical perspective. Enrollment limited to 20. DVPS

AMST 1904Y. Lincoln, Whitman, and The Civil War (ENGL 1561O).
Interested students must register for ENGL 1561O.

AMST 1904Z. Old Media New Artists: Innovation and Contingency in African American Culture.
What are the defining characteristics of newness in twentieth-century African American culture? How have black creative artists repurposed their respective disciplines in accordance with and against the shifting productivities of African American social politics? Through an interdisciplinary focus that considers music, literature, visual arts, and interactive media, this seminar proposes several alternative epistemological frameworks for recognizing the emerging artistry of our time. Enrollment limited to 20 juniors and seniors.

AMST 1905A. Crises in American Capitalism.
We are now in the midst of what is commonly called the Great Recession—the biggest economic crisis since the Great Depression. This course investigates these two crises in American capitalism: how they were caused, resisted, represented, and remembered. Students will be asked to interrogate the meanings of these economic crises, and to consider their various political and cultural uses. Assigned texts will include history, fiction, journalism, film, memoir, and photography. Enrollment limited to 20 sophomores, juniors, and seniors.

AMST 1905B. Media and Modern Childhood (GNSS 1960S).
Interested students must register for GNSS 1960S.

AMST 1905C. Mainstream Journalism in America (through the prism of The New York Times).
Jefferson is supposed to have said that if he were forced to choose between a free government and a free press he would choose a free press, because without it a free government would not survive. It is certainly true that newspapers, and later the electronic media, have had major impacts on American politics and society. Now these media are in a period of convulsive change; their business model is broken and no one can fix it. This course will consider the growth, evolution, influence and future of these media, particularly The New York Times. Enrollment limited to 20.

AMST 1905D. African American Musical Theatre (MUSC 1905D).
Interested students must register for MUSC 1905D.

AMST 1905E. American Poetry II: Modernism (ENGL 1711A).
Interested students must register for ENGL 1711A.

AMST 1905F. American Poetry I: Puritans through the Nineteenth Century (ENGL 1511O).
Interested students must register for ENGL 1511O.

AMST 1905G. Literature and the Problem of Poverty (ENGL 1710K).
Interested students must register for ENGL 1710K.

AMST 1905H. Global Queer Performance (TAPS 1420).
Interested students must register for TAPS 1420.

AMST 1970. Independent Reading and Research.
Required of all honors candidates in the senior year. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

AMST 2010. Introduction to Interdisciplinary Methods.
Introduction to interdisciplinary studies required of all first-year graduate students in American Studies. Graduate students from other departments may enroll with permission of the instructor.
AMST 2020E. Introduction to Interdisciplinary American Studies. 
This graduate-level course offers an introduction to the discipline of American Studies through a close reading of four important texts representing different methodologies and theories within the discipline. We will also read a series of seminal articles focused on transnationalism, highlighting the significance of border-crossings to the American experience throughout the semester. The goal of the course is to familiarize students with pedagogical approaches within American Studies, through active seminar discussions, fieldtrips within the community, and work with material and visual media as well as secondary texts.

AMST 2220A. Digital Scholarship. 
This course examines how the social sciences and humanities changed as a result of the information revolution. We will look at changes in museums, publishing, knowledge production, and pedagogy. Students learn digital tools and use them to create new media projects experimenting with public scholarship, digital humanities research, archival tools, and/or classroom possibilities. Digital novices welcome. Enrollment limited to 20.

AMST 2220B. Culture, Politics and the Metropolitan-Built Environment. 
This interdisciplinary readings seminar will provide graduate students with an introduction to recent scholarly work on 20th century and contemporary cities and suburbs. Readings will be drawn from cultural, political, social, and intellectual history, American Studies, political science, sociology, and ethnography. They will investigate the interconnections between urban and suburban development and the role of ideology, class, gender, race, and globalization in shaping planning, architecture, culture, policy, politics, and social movements. This class is open to students in American Studies, History, Sociology, Political Science, Anthropology, and other disciplines who find themselves interested in multi-disciplinary approaches to the study of cities and suburbs.

AMST 2220D. Museums in Their Communities. 
This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc.) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed. Open to graduate students only.

AMST 2220E. American Orientalism and Asian American Literary Criticism (ENGL 2760Y). 
Interested students must register for ENGL 2760Y.

AMST 2450. Exchange Scholar Program.

AMST 2500. Museum Interpretation of the American Experience. 
A seminar examining methods of museum interpretation, the ways that museums convey information to the public with exhibits, tours, demonstrations, films, video tapes, slide shows, interactive computer programs, publications, and other techniques. We will visit museums that have an historical or anthropological focus and read theoretical and critical writings on the public interpretation of American material culture.

AMST 2510. Industrial Archaeology. 
No description available. S/NC

Examines the methodological and theoretical underpinnings of current and past American studies scholarship. Enrollment limited to graduate students with preference given to American Studies graduate students. S/NC

This course surveys public humanities work, including cultural heritage preservation and interpretation, museum collecting and exhibition, informal education, and cultural development. It also provides an overview of the contexts of that work in nonprofit organizations, including governance, management, and development.

AMST 2550A. Asian American Political Movements to 1970. 
This research seminar will examine political movements in Asian immigrant communities in the United States and the Caribbean before the emergence of "Asian America" in the late 1960s.

AMST 2550B. The Japanese in the Americas. 
A research seminar on the comparative historical experience of Japanese in Hawaii, mainland U.S., Brazil, and Peru. Open to undergraduates with permission of instructor.

AMST 2550C. Advanced Seminar on Asian American History. 
Advanced seminar on Asian-American history, diaspora studies and globalization.

This seminar presents and analyzes contemporary institutional initiatives and policies relating to culture, including public art, tourism, historic preservation, and museums. It demonstrates how political, social, cultural, advocacy, and media organizations from the local to international level shape policies designed to protect and present cultural sites and activities in society. Enrollment limited to 10 graduate students.

AMST 2650. Introduction to Public Humanities. 
This class, a foundational course for the MA in Public Humanities with preference given to American Studies graduate students, will address the theoretical bases of the public humanities, including topics of history and memory, museums and memorials, the roles of expertise and experience, community cultural development, and material culture. Enrollment limited to 20 graduate students.

AMST 2651. The Responsive Museum. 
This course considers the many kinds of experiences available to people in art museums. Although art museums have tended to embrace the values of art history, visitors use them in surprising, personally meaningful, powerful ways. Among the topics we will activate: building community, stimulating creativity, evoking memory and associations, learning about the self and others, healing, and crossing cultural boundaries. Enrollment limited to 15 graduate students.

AMST 2652. Community Documentary and Storytelling. 
This course focuses on ways that documentary methodologies and storytelling help individuals articulate and negotiate issues of race, ethnicity, gender and social class in local and regional communities. Through readings, discussions, and presentations by guest speakers, students will examine written, digital, visual, video/film, and oral presentations and performances as ways to express community stories. We will also consider how such projects can facilitate civic engagement. The class will involve participation in a community documentary project. Enrollment limited to 15 graduate students.

The course offers an opportunity for RISD and Brown students to work together to understand the growing interdisciplinary field of public art. We will explore the potential of working in the public realm as artists and/or arts administrators. Topics include: pivotal events and artworks that formed the history of public art from the early 20th century to the present; approaches to site-specificity; ideas of community and audience; current debates around defining the public and public space; temporary vs. permanent work; controversies in public art; memorials, monuments, and anti-monuments; case studies; public art administration models, among others. It is both a seminar and a studio; students work individually and together on research, presentations, proposals and public projects. Contact the instructor Janet Zweig (janetzweig@earthlink.net). Enrollment limited to 12 seniors and graduate students. Instructor permission required.

AMST 2654. Designing Heritages: From Archaeological Sensibilities to Relational Heritages. 
Do you believe in the past? This course takes as its starting assumption that pasts are not temporally distant from today. They are contemporary experiences whose structure and mediation impact how we live in our shared world. This course will explore the intellectual history of archaeological thought and the development of heritage theory. While simultaneously exploring practical design skills, it will provide context to contemporary synergies between art, archaeology and heritage studies through interdisciplinary studies of architecture, art history, cultural criticism, heritage studies and archaeological theory. Enrollment limited to 18 seniors and graduate students.
AMST 2656. Cultural Policy Planning
Cultural policy is the aggregate of governmental activities in the arts, humanities, and heritage. This seminar explores its history and public/private context and offers practical insights about how to influence cultural policy design, especially methods to achieve public consensus through planning. Students discuss contemporary issues, examine policy planning principles, and learn practical methods through case study to develop policy recommendations. Enrollment limited to 20 seniors and graduate students.

AMST 2657. Museum Interpretation Practices
Examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop an interpretive practice through a series of workshops, exercises, site visits and critical discussions. Enrollment limited to 14: seven seniors and graduate students, along with seven RISD students.

AMST 2658. Releasing the Imagination in Public Humanities Practice
Designed to stimulate and nourish creative approaches to work in museums and other venues of public humanities practice. Students will be invited into a series of creative adventures drawing on essential skills of close looking, deep listening, persuasive writing, and creative production. Essays from Maxine Greene’s "Landscapes of Learning" and "Releasing the Imagination," as well as an array of personal essays, exhibition catalogues, fiction, and research from the fields of education, sociology, and psychology. Enrollment limited to 15 graduate students; undergraduates may be admitted with instructor permission.

AMST 2659. "Paradigm Dramas" Revisited: American Studies in Historical Perspective
The course offers an in-depth exploration of the radical roots and continual transformations of the academic discipline of American Studies within particular historical contexts, beginning in the early 20th century into the present. We will read seminal texts responsible for the formation of defining moments in the discipline’s history, including the "myth & symbol school," "American exceptionalism," multiculturalism, post-nationalism and transnational American Studies. Students will produce reviews of current texts and reflect on future possibilities for a mature and globalized American Studies. Enrollment limited to 20 graduate students.

AMST 2660. Projects in Public Humanities
Devoted to one or more advanced projects in Public Humanities not covered in detail by the regular courses. Projects in public humanities provide practical, hands-on project and group project management experience that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty advisor to project completion. Written permission and topic description required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN by the deadline. Enrollment limited to 20. Prerequisite: AMCV 2650 or demonstrated ability of equivalent experience. Instructor permission required.

AMST 2661. Visualizations in the Humanities: From the Cabinet of Curiosities to the Geoparser
Museums, maps, network graphs and datasets reflect and shape the work of scholars in the humanities. This course provides an overview of the way that literary and historical scholars have organized, analyzed, and presented their research to each other and the public. The course includes theoretical, historical and practical work. The first part of the course is historical; the second part will focus on the tools of the digital humanities, with students undertaking projects in their fields of study. Enrollment limited to 20.

AMST 2670. Practicum in Public Humanities
Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester’s or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

AMST 2680. Practicum in Public Humanities
Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester’s or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

AMST 2690. Management of Cultural Institutions
This course explores public humanities institutions as an organizational system that interacts with broader community systems. Students will emerge with an understanding of the realities of the managerial, governance and financial structures of public humanities institutions and how those structures interact with mission, programming and audience. The course is designed to help those who work on the program side of public humanities and cultural institutions--as educators, librarians, curators, interpreters, exhibit designers, public programming coordinators, grand makers, etc.--engage more strategically with those aspects of their institutions that encompass planning, organizational behavior, revenue generation, finance, marketing, and governance.

AMST 2691. Poetry in Service to Schools and the Community
Poetry in service to the community honors a connection between poetry and wisdom, assumes that poetry is a wisdom medium (vehicle, vessel, conveyance) toward more enlightened thinking and practice. In this way, it is also an ideal medium for extending our study and practice beyond Brown, conducting workshops in schools, community centers, youth detention facilities and elsewhere. The class emphasizes community building, in teaching partnerships and workshops throughout Providence, in Renga and workshop groups. Poetry is the connective tissue; building relationships is at the heart of the practice. Students will write and teach. Enrollment limited to 16.

AMST 2692. Community Arts with Young People
Blurring the boundaries between artist and audience, practitioners of community arts have engaged underrepresented audiences who have traditionally relegated to more passive forms of participation, including young people with little access to arts education. This class provides students the opportunity to research and/or to conduct their own community arts projects with young people in Providence. Students will develop a deeper and more critical understanding of theorizing and implementing community arts projects with youth; will examine how to create pedagogic conditions with youth through the arts and humanities, as well as ways to systematically observe, document, and analyze these pedagogies. Enrollment limited to 15.

AMST 2693. Community Arts with Young People
BLURRING THE BOUNDARIES BETWEEN ARTIST AND AUDIENCE, PRACTITIONERS OF COMMUNITY ARTS HAVE ENGAGED UNDERREPRESENTED AUDIENCES WHO HAVE TRADITIONALLY RELEGATED TO MORE PASSIVE FORMS OF PARTICIPATION, INCLUDING YOUNG PEOPLE WITH LITTLE ACCESS TO ARTS EDUCATION. THIS CLASS PROVIDES STUDENTS THE OPPORTUNITY TO RESEARCH AND/OR TO CONDUCT THEIR OWN COMMUNITY ARTS PROJECTS WITH YOUNG PEOPLE IN PROVIDENCE. STUDENTS WILL DEVELOP A DEEPER AND MORE CRITICAL UNDERSTANDING OF THEORIZING AND IMPLEMENTING COMMUNITY ARTS PROJECTS WITH YOUTH; WILL EXAMINE HOW TO CREATE PEDAGOGIC CONDITIONS WITH YOUTH THROUGH THE ARTS AND HUMANITIES, AS WELL AS WAYS TO SYSTEMATICALLY OBSERVE, DOCUMENT, AND ANALYZE THESE PEDAGOGIES. ENROLLMENT LIMITED TO 15.

AMST 2694. Community Arts with Young People
What should museums be in the 21st ce? Are museums of today relevant to cultural historical, scientific, artistic, political and educational purposes? How can they provide more meaningful encounters with objects to inspire curiosity and to honor their creators? How can museums relate to their diverse communities today? Must they own objects to be museums? Growing from the historical basis for museum theory, We’ll suggest alternative directions, create platforms for new perspectives. We'll rely on readings, discussion, and meetings with museum leaders, and on independent creative research. All will be challenged to invent their own concept of "museum". Enrollment limited to 12.

AMST 2695. Museum as Idea
What should museums be in the 21st ce? Are museums of today relevant to cultural historical, scientific, artistic, political and educational purposes? How can they provide more meaningful encounters with objects to inspire curiosity and to honor their creators? How can museums relate to their diverse communities today? Must they own objects to be museums? Growing from the historical basis for museum theory, We’ll suggest alternative directions, create platforms for new perspectives. We'll rely on readings, discussion, and meetings with museum leaders, and on independent creative research. All will be challenged to invent their own concept of "museum". Enrollment limited to 12.

AMST 2696. Museum Interpretation Practices
This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15.

AMST 2697. Museum Interpretation Practices
This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15.

AMST 2698. Museum Interpretation Practices
This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15.

AMST 2699. Digital Storytelling
Digital storytelling takes the traditional craft and attributes of telling stories and merges it with diverse digital media. The digital media becomes integral to how and why stories are told. The course will explore digital storytelling in its many forms, including narrated film shorts, movement capture, locative media, digital timelines, DJing, electronic novels, audio documentaries, narrative computer games, podcasting, and blogging among others. The purpose of the course is to introduce students to a
broad set of digital tools that will expand their capability to engage diverse publics in the construction and dissemination of knowledge in the arts and humanities. Enrollment limited to 15.

AMST 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z). Interested students must register for ENGL 2760Z.

AMST 2920. Independent Reading and Research. Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

AMST 2921. Independent Reading and Research. Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

AMST 2922. Independent Reading and Research. Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

AMST 2923. Independent Reading and Research. Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

AMST 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Annenberg Institute for School Reform

The Annenberg Institute for School Reform (AISR) is a national policy research and reform-support organization, located at Brown University, that collaborates with school districts and communities to improve the conditions and outcomes of urban schools. AISR focuses on three crucial issues in education reform today: school transformation, college and career readiness, and expanded learning time. This work is grounded in a vision of a "smart education system" -- a high-functioning district collaborating with community partners to provide a comprehensive web of opportunities and supports for its students, inside and outside the school.

Established in 1993 by education reform leader Theodore (Ted) Sizer, the founder and chair of the then-Brown University-based Coalition for Essential Schools, the organization was renamed shortly thereafter to honor philanthropist, former diplomat and publisher Walter H. Annenberg, following the Annenberg Foundation’s $50-million donation to endow AISR. A University Corporation-appointed Board of Overseers, chaired by Brown’s president, governs AISR. Dr. Warren Simmons is AISR’s executive director.

In 2000, AISR formed a national task force to examine the education-reform role of urban school districts, and concluded that their redesign is essential to the achievement of equity and school improvement. Through its District Redesign & Leadership (DR&L) practice, AISR currently collaborates with urban districts to build capacity to strengthen their schools and students -- with active participation of the community and other partners -- and develops an array of tools to support them.

In 2006, AISR formed the Community Organizing & Engagement (CO&E) practice by incorporating the Community Involvement Program, formerly based at New York University, and opening a New York City office. CO&E supports community organizing for education reform by helping youth, parent, and community groups to develop sufficient power to improve the quality of education in low-performing urban school districts.

AISR’s Research and Policy staff engage in a range of projects to inform both AISR’s own work and the fields of district-level reform and community organizing for school reform. This includes original research, documentation and evaluation of reform efforts, analyses of current education policies, and the development of tools to share lessons and best practices.

In collaboration with Brown’s Education Department, AISR established a Master’s Program in Urban Policy (UEP) in 2006. The tightly focused, 12-month academic curriculum, integrated with a nine-month internship, is designed to impart a set of core skills and competencies necessary for successful careers in urban education policy. To date, degrees have been conferred on 75 graduates. In 2012, AISR’s Board of Overseers established the Ruth J. Simmons Urban Education Policy Scholarship, a permanent annual award for UEP Master’s degree candidates that honors the University’s retired president and former AISR Board chair.

AISR also serves as a bridge from Brown to Providence and the state, providing support for the Providence Public School District, the R.I. Department of Education, the Central Falls School District, and the Providence Mayor’s Children & Youth Cabinet. In 2008-09, AISR supported the Governor’s Urban Task Force, a key factor in Rhode Island’s successful Race to the Top application. Furthermore, in partnership with the Rhode Island Foundation, AISR sponsored a series of six forums in 2011-13 focused on "Building a 21st Century Education System" in the Ocean State.

Additional information can be found at: http://www.annenberginstitute.org/

Anthropology

Chair
Daniel J. Smith

The Department of Anthropology at Brown is a vibrant, award-winning group of scholars in the subfields of cultural anthropology, archaeology, and anthropological linguistics. Our research and teaching cover a wide range of the field, with special strengths in anthropological demography, political anthropology, medical anthropology, language and culture, ethnicity, gender, ancient writing and representation, early urbanism, historical and forensic archaeology, and Latin American studies.

As a discipline, Anthropology works at the crossroads of the social sciences and the humanities, and it works to understand human experience in all of its fullness. Unlike other departments, Anthropology does not restrict itself to a single aspect of human social life, such as the political or the aesthetic. Conversations in our classrooms and seminar rooms attempt to put behavior in the broadest contexts of meaning, power, institutions, and history. They cast a global net, ranging from discussions of the transnational process of foreign aid between Japan and Latin America to the hieroglyphic system of the ancient Mayan people to the relationship between Islamic ethics and organ transplant in Egypt. In a world of increasing specialization and fragmentation of knowledge, Anthropology provides an opportunity to look at the big picture and find it in the locally meaningful. In a world of manifold crises, it provides opportunities for applying the knowledge it produces, and in a world of increasingly global connection, the discipline provides many roadmaps.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Anthropology/

Anthropology Concentration Requirements

Anthropology is the study of human beings from all times and all places, offering holistic, comparative, international, and humanistic perspective. In studying and interpreting the vast range of similarities and differences in human societies and cultures, anthropologists also seek to understand how people themselves make sense of the world in which they live. The
Department of Anthropology at Brown is a vibrant, award-winning group of scholars working primarily in the subfields of cultural anthropology, archaeology, and anthropological linguistics. The concentration provides students with a broad introduction to the discipline and includes the major subdisciplines of the field: sociocultural anthropology, archaeology, anthropological linguistics, and biological anthropology.

Concentrators should select their courses in anthropology in consultation with the concentration advisor. At least nine courses in anthropology are required, including:

Select one of the following sociocultural/linguistic anthropology classes:

- ANTH 0100 Introduction to Cultural Anthropology
- ANTH 0200 Culture and Human Behavior
- ANTH 0300 Culture and Health
- ANTH 0800 Sound and Symbols: Introduction to Linguistic Anthropology

Select one of the following biological anthropology/archaeology classes:

- ANTH 0310 Human Evolution
- ANTH 0500 Past Forward: Discovering Anthropological Archaeology

Select one of the following, normally taken in junior or sophomore year:

- ANTH 1900 History of Anthropology: Anthropological Theories
- ANTH 1940 Ethnographic Research Methods
- ANTH 1950 Archaeological Field Work
- ANTH 1621 Material Culture Practicum
- A course from the ANTH 1910 Series (Normally taken in senior year)

Five additional Anthropology courses.

Total Credits

1 Of the required courses, at least five courses counted toward the concentration must be offered at the 1000-level or above and one course must be on a particular world area.

**Honors**

Candidates for honors should apply to the concentration advisor by the end of his or her 6th semester, but no later than the 4th week of the 7th semester. An application consists of a brief statement addressing the focus of a proposed thesis and the names and signatures of two faculty members from the Department of Anthropology who have agreed to serve as the student's honors committee—one as honors thesis advisor, the other as a reader. Candidates for honors are required to:

1. Fulfill the standard concentration requirements.
2. Take two additional courses, usually courses that may be used for thesis preparation.
3. Have a majority of A's in the concentration.
4. Submit an approved honors thesis.

**Field Work**

Concentrators interested in archaeology are urged to obtain training in field archaeology by participating in Brown-sponsored field research, or by participating in an archaeological field school elsewhere.

**Anthropology Graduate Program**

The department of Anthropology offers a Doctor of Philosophy (Ph.D.) program as well as a Master of Arts (A.M.) program.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/anthropology

**Courses**

**ANTH 0066A. Politics of Race and Culture.**

Addressing the subjects of race, culture and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach.

**ANTH 0066B. Mythscapes.**

An experimental seminar that will combine classroom discussion with visits to field sites within walking distance of the Brown campus. The aim will be to acquaint students with some fundamentals of symbolic analysis and to apply these fundamentals to interpreting the moral and historical messages suffused in the landscapes around us. Readings will include sources on the anthropological interpretation of myth combined with historical sources on Brown and its neighboring communities and institutions. Students will acquire a deeper sense of the mythic qualities of this place and some analytical tools for understanding mythscapes elsewhere. Enrollment limited to 20 first year students. FYS DVPS

**ANTH 0066C. Population and Culture.**

This seminar for first year students examines the relationship between individuals and population and the impact of culture on population. How do the lives and actions of individuals cumulate to the characteristics of a population? How do the characteristics of a population affect the lives of the people in it? For first year students only.

**ANTH 0066D. Who Owns the Past?**

Examines the role of the past in the present. Using examples from the U.S. and other parts of the world, we will look at how archaeological evidence is implicated in contemporary cultural and political issues. Students will learn that the past is not just the focus of archaeologists' interest and scientific inquiries, but is also a subject romanticized by antiquarians, mobilized in nation-building, marketed for profit, re-enancted as entertainment, consumed by tourists, and glorified in commemoration. Understanding these different and competing valuations, claims, and uses of the archaeological past will provide an introduction to why the past matters in the present and to the future. Enrollment limited to 20 first year students.

**ANTH 0066E. Colonial Cities.**

This course attempts to understand the nature of colonialism in Africa and India. Comparative methodological approach to the study of colonial cities introduces the students to a multiple and interlocking idea and symbols used by colonial power to create in their images, cities which reflect their own image. For first year students only.

**ANTH 0066F. Families and Households.**

This course explores the diversity of families and households, both between cultures and within cultures; changes in family forms over time, changing experiences of family over the life course, the diverse meanings, metaphors, and values of "family"; and current controversies about what families are and what they should be. Enrollment limited to 20 first year students. Instructor permission required.

**ANTH 0066G. Explorers and Cultural Encounters.**

Looks at famous land and sea expeditions, including Marco Polo, Cheng Ho, James Cook, Samuel Hearne, Elisha Kane, Ernest Shackleton and others. Whether the voyage was inspired by a specific intellectual inquiry, mapping, exploration of a new land, establishing a new trade route, friendly alliance, or a colonial expansion, these expeditions changed the views people had about the world, peoples, and places.

**ANTH 0066I. Human Trafficking.**

We will retrace the development and impact of the 2000 UN Protocol to Prevent, Suppress, and Punish Human Trafficking, especially women and children. This set of norms was created as a supplement to the UN Convention against International Organized Crime. This course will deal with the protocol as both a legal as a living document, with a history and ongoing political relevance.

**ANTH 0066J. So You Want to Change the World?**

Examines from an anthropological perspective efforts to address global poverty that are typically labeled as "development." The enterprise of development is considered critically, both with regard to the intentions and purposes that underlie the actions of wealthy countries, donor organizations, and expatriate development workers and with regard to the
outcomes for the people who are the intended beneficiaries. Privileging the perspectives of ordinary people in developing countries, but also looking carefully at the institutions involved in development, the course relies heavily on ethnographic case studies that will draw students into the complexity of one of the greatest contemporary global problems: social inequality. Enrollment limited to 20 first year students. FYS DVPS LILE ANTH 0066K. International Perspectives of Women’s Agency and Society. This course is designed to address the postcolonial identities and the cross cultural issues of women through anthropology and women’s writings. Identifying select cases from Africa and Asia. We will analyze the cross-cultural issues and meaning of gender, the cultural construction of gender, the significant ideology that defines the paradigm through which we come to understand a woman’s domain, agency and empowerment, and the modes of behavior in the spheres of everyday life. S/NC only. Reserved for First Year students. Enrollment limited to 20. FYS LILE ANTH 0066L. Beyond World Music: Singing and Language. An introduction to music and language in cultural context. Drawing on case studies from around the world, we consider how music and language are intimately connected. Topics covered include cannibals’ singing in colonial Brazil, music and electoral politics in Texas, working class culture and country music, singing and society in the Amazon, whistle speech and songwriting in indigenous Mexico, Apache identity and popular music, modernity and classical Indian music, music and mass advertising in the United States, and the politics of Zulu music production in South Africa. Reserved for First Year students. Enrollment limited to 20. ANTH 0066M. Holy Wars. No description available. ANTH 0066N. Peoples and Cultures of Greater Mexico. This course will focus on the cultural area known as Greater Mexico, incorporating Mexicans resident south of the Rio Grande, as well as the approximately 25 million Mexicans living permanently or for at a time in the United States. Specific topics to be covered in the class include: urban peasants and rural proletarians, recent challenges to gender conventions, national and international migration, nationalism and the changing meanings of the Conquest and colonial periods, land and indigenous rights, everyday violence, machismo, popular culture, and protest and rebellion. Limited to first-year students. ANTH 0066O. How to do Things With Gifts: Charity, Corruption and Friendship Across Cultures. In all human societies, people exchange goods and services, From Adam Smith onwards, economists have emphasized the central importance of the “free” market, where self-interested individuals strike bargains, and simultaneously expand humanity’s “common stock.” Yet costly practices-expensive weddings, charitable donations, corporate hospitality-still flourish, which appears designed to build human relationships rather than generate hard profits. And in today’s global economy, personal gifts remain an essential part of doing business in places like China, Japan, India, and Saudi Arabia. Where mainstream economists see inefficiency or corruption, this course explores classic and contemporary alternative understandings of gift-giving’s cultural significance. ANTH 0066P. Transnational Lives: Anthropology of Migration and Mobilities. In an era characterized by globalization, by the increasing and rapid flows of ideologies, information, money, goods, and people across national borders, how do individuals, families, and communities grapple with the new forms of existence brought forth by migration? This course will explore what migration does: the effects of mobility on a range of practices that include parenting, health, gender roles, marriage, politics, and anthropological research itself. We will consider three overlapping issues: the everyday practices of transnational living in a variety of cross-cultural settings; the theory and methodology anthropologists use to better understand local experiences of migration; and the ways in which migration has been effectively politicized. Enrollment limited to 20 first year students. FYS LILE WRIT ANTH 0066Q. Crisis of Identities in the Global Order. The seminar is intended to engage first-year students in discussion and analysis of one of the perplexing questions of the modern age. Why, with globalization and an attendant world-view shaped by the technological revolutions of communication that appeal to commonalities, we find more emphasis on local differences, more conflicts related to identities determined by opposition to “the other”? A concordant question will be: what is the common denominator for the concept of identity? Enrollment limited to 20 first year students. FYS ANTH 0066R. Child and Youth Cultures. This first year seminar addresses childhood from two linked but distinctive theoretical perspectives. First, what is childhood? Rather than assuming it is a universal category, we will explore how childhood has been constructed differently through history and across cultures, in opposition to infancy, youth, and adulthood. Second, who are children? In contrast to conventional representations of young people as passive objects of socialization, we will review anthropological conceptions of children and youth as social actors with respect to identity formation, cultural expression, and political economy. Enrollment limited to 20 first year students. DVPS FYS WRIT ANTH 0066S. Contemporary Egypt in Revolution. On January 25, 2011 protestors in Egypt amassed in Tahrir Square in Cairo with basic demands: Bread, Freedom, Social Equality, and Human Dignity. After hundreds of peaceful protestors were killed at the hands of riot police and hired thugs, eighteen days later, President Husni Mubarak resigned. Yet since then, hundreds more have been killed, Egypt’s revolution continues, and the basic demands are as crucial today as they were at its inception. We will read contemporary Egypt from the perspectives of anthropologists and social historians, and discuss the value of social theory and analysis for understanding current political turmoil. Enrollment limited to 20 first year students. DVPS FYS. S/NC ANTH 0066T. Postcolonial Matters: Material Culture between Colonialism and Globalization. This course is about things - “stuff” - as it is about people past and present and their entanglements in and through colonial situations. It explores colonialism past and present through the combined lenses of postcolonial theory and material culture - the emphasis is thus not so much on literary and figural representations of colonial conflicts and engagements but rather on the material surroundings of people living those colonial worlds. In other words, this course is about what people did and about the things they used to construct their daily lives in colonial situations across the globe and through time. Enrollment limited to 20 first year students. FYS ANTH 0100. Introduction to Cultural Anthropology. This course provides an introduction to cultural anthropology, surveying its defining questions, methods, and findings. We will examine the history and utility of anthropology’s hallmark method, ethnography, the long-term immersion of the researcher in the culture under study. We will compare cultural anthropological findings and comportment in other cultures to its conclusions and conduct in our own. No prerequisites. WRIT ANTH 0110. Anthropology and Global Social Problems: Health, Development and Security. The course introduces anthropological approaches to some of the central problems we face in the globalizing twenty-first century. We will trace both large- and small-scale movements of people, commodities, borders, and pollution to improve our understanding of the complex international, transnational, and local social phenomena that shape the human experience today. ANTH 0125. Violence and the State. This course allows students the opportunity to interrogate the relation between violence and the state. Students will be introduced to a variety of analytical frames through which to understand both the concept of violence and that of the state from an anthropological perspective. Through diverse case studies we will consider topics such as what it means to see and be seen by the state, the rationalization of “exceptional” violence, and domination through symbolic violence. The course has no prerequisites, but a foundational course in the social sciences is recommended.
ANTH 0200. Culture and Human Behavior.
The goal is to challenge our beliefs about some taken for granted assumptions about human behavior and psyche by examining cultures with different conceptions of self and cognition. We will examine the issues of the role of nature and nurture in development, the nature of intelligence, coming of age, the association of psychological characteristics with gender and the naturalness of emotions.

ANTH 0300. Culture and Health.
An introduction to the field of Medical Anthropology. Lecture reading and discussion will examine the social context of health and illness, looking at the diverse ways in which humans use cultural resources to cope with disease and develop medical systems. The course will provide an introduction to the overall theoretical frameworks that guide anthropological approaches to studying human health related behavior. Medical anthropology offers a unique and revealing perspective on the cultural diversity that characterizes human experiences of sexuality, disease, aging, mental illness, disability, inequality and death. DVPS LILE WRIT

ANTH 0301. Gender and Politics.
This course focuses on ideologies of gender and sexuality cross-culturally and how they influence peoples' involvement in political processes. We begin with a broad working definition of politics-power dynamics and arrangements whereby groups are affected by one another. The course looks at the circumstances under which peoples' gender and sexual identities are mobilized into social movements, and the conditions and social consequences of public visibility. Our broader aim is to understand ways in which gendered inequalities produce--and are produced by--forms of political exclusion, as well as innovative ways in which people transform existing structures of power.

ANTH 0302. Anthropology of Gender and Globalization.
We live in a global world in which the movements of people, goods, and ideas cause productive frictions, transforming the prevailing formations of gender and sexuality. This course examines the intersections of gender and globalization by looking at how globalization shapes cultural constructions and political configurations of gender, and exploring how an ethnographic focus on gender sheds light on various aspects of globalization. Topics covered include anthropological theory of gender and sexuality, gender and global capital, gender and the (colonial) state, and gender and global politics (including gender activism, human rights, and development). Open to undergraduates only. DVPS LILE

ANTH 0310. Human Evolution.
Examination of theory and evidence on human evolution in the past, present and future. Topics include evolution and adaptation, biocultural adaptation, fossil evidence, behavioral evolution in primates, human genetic variation and contemporary human biological variation. WRIT

Explores the complex issues of growing up as an ethnic, bicultural, or a multicultural person and how these dual or multiple identities affect or interact with individual behavior, priorities, the sense of self, and how individual identity is formulated and defined. Cross-cultural and interdisciplinary approaches combining anthropology, comparative human development, interethnic communication, life history, and literary works are used. Instructor permission required.

ANTH 0450. Two Billion Cars: Humans, Markets, Cultures, and the Automobile.
The global car population is predicted to reach two billion by the year 2020. The social, political, health, and environmental consequences are immense. These, as well as the cultural and political economic explanations for the car population explosion, will be explored in this class, as will alternative futures for transit.

ANTH 0500. Past Forward: Discovering Anthropological Archaeology.
This course offers a broad journey through the human past, from material culture crafted by our evolutionary ancestors to the remnants of the recent historic past. To facilitate this journey, the class explores the methods, concepts, and theories that anthropologists employ in the study of past peoples, places, and things. Case studies stretch across the globe. As a hands-on endeavor, archaeology focuses on tangible evidence. In this course, small-group discussion, laboratory, and field exercises will complement lectures, leading to an understanding of how anthropologists study the past and how that knowledge affects the present. LILE WRIT

ANTH 0510. Who Owns the Past?
This class examines the relationship between the Western world and African indigenous cultures, heritage, and ideas of the past. By looking at the history of science in reference to the treatment of Africans and African material culture, we will question who owns the rights to an indigenous past.

The figure of the pirate is an all-time favorite in Western imagination. It has inspired some of the most popular narratives of the past, solidly grounded in classic literature and contemporary visual culture. Focusing on the mid-17th century, the golden age of piracy in the Atlantic World, this course will use historical and archaeological date to investigate the way in which the image of the pirate has been constructed in the West, as an embodiment of cultural, legal, moral and sexual transgression, and as an object of both fascination and fear which is still current in the contemporary, global world. DVPS LILE

ANTH 0520. Classic Mayan Civilization.
Examines the history, culture, and society of the Classic Maya, with special emphasis on Preclassic precursors, dynasties, environmental adaptation, imagery, architecture, urban form, and the Maya Collapse.

ANTH 0680. Foragers, Farmers, Feasts, and Famines: An Anthropology of Food.
An exploration of the human experience of food and nutrition from evolutionary, archaeological, and cross-cultural perspectives. The course will review the various approaches employed by anthropologists and archaeologists to understand diet and subsistence in the past and present. Starting with the evolutionary roots of the human diet in Plio-Pleistocene Africa, we will trace patterns of human subsistence to the present, including the social and health implications of the agricultural revolution. We will then explore modern foodways in cross-cultural perspective, focusing on the interplay of ecology, politics, technology, and cultural beliefs. LILE WRIT

ANTH 0800. Sound and Symbols: Introduction to Linguistic Anthropology.
This introduction to the study of language and culture considers how language not only reflects social reality but also creates it. We'll examine specific cases of broad current relevance, in the process learning how an analytical anthropological approach to language use lays bare its often hidden power. We’ll consider how language creates and reinforces social inequality and difference, how language promotes and resists globalization, and how language is used creatively in performance, literature, film, advertising, and mass media. We will also consider how language does important social work in specific contexts, such as classrooms, courtrooms, medical settings, and political campaigns. DVPS LILE

ANTH 1020. AIDS in Global Perspective.
Communities around the world are affected in different ways by the HIV-AIDS pandemic. This course is concerned with cross-cultural variation in knowledge, perception, and treatment of AIDS in a global context. Twenty-five years into the global epidemic, how does social and cultural variation influence the continued spread or management of the disease? In addition to reading significant anthropological works related to the meaning of AIDS in cultural context, the course will address major public health initiatives related to the global AIDS pandemic, and offer an anthropological critique of their design, implementation and success. Enrollment limited to 40.

ANTH 1100. Circumpolar Ethnography.
An examination of the traditional and modern lifeways of native peoples across the Arctic and subarctic from European Lapland through Siberia, Alaska, Canada, and Greenland. Topics covered are society; ethnicity; religion (Shamanism); art; and politics, including issues of land claims and home rule.

In this course we engage with anthropological literature and films on the diverse ethnicities, cultures, and "tribe" of sub-Saharan Africa. We trace the histories and the processes of cultural, social, and political change, beginning with colonialism and ending with the contemporary
period. We will deconstruct and debunk dominant Western ideas of Africa that present it as primitive and characterized by poverty, AIDS, famine, and violence. We will learn about how Africans see and represent themselves through reading ethnographies, engaging with African popular culture, and watching documentary films.

**ANTH 1119. Andean Anthropology.**

The area studies paradigm continues to provide solid information about "culture areas," and the rich ethnography and archaeology of Andean societies is no exception. Particular strengths emerging from this literature include studies of land use, religious syncretism, textiles, and collateral themes: continuities and recognizable features of "Andean culture" (lo andino), gender relations, migration, and politics. Throughout, we will analyze the ways that history, ecology, and the broad notion of reciprocity (ayni) cross-cut each of these. The result will be a close and in-depth study of cultural practices within three Andean countries (Peru, Ecuador, and Bolivia), the majority populations of which continue to be indigenous (predominantly Quechua- and Aymara-speaking). These are countries within which recent political and social changes have produced far-reaching transformations. Prerequisite: one course in either Anthropology or Classics.

**ANTH 1120. Peoples and the Cultures of the Americas.**

Examines the diverse cultures and history of the Americas—especially Brazil, Peru, Mexico, and the Caribbean. Topics include the organization of labor, cultural and artistic practices, changing conventions of gender and family, international migration, national and local identities, indigenous rights, and protest and rebellion.

**ANTH 1121. From Coyote to Casinos: Native North American Peoples and Cultures.**

An anthropological overview on the history and cultures of Native North American peoples from the prehistoric times to the present. Where did Native North Americans come from? What were their traditional lives like? What was their relationship with newcomers of European extraction, including anthropologists? What challenges do they face today? Indigenous and anthropological insights will be brought to bear on these and other questions.

**ANTH 1122. American Indain Art and Artifacts.**

Drawing on the rich North American Indian collections of the Haffenreffer Museum of Anthropology, the goal of this course is to examine theoretical approaches to the artifacts of indigenous people and analytical strategies for their research and interpretation. Insights from anthropology, art history, American Indian perspectives, and conservation are explored. Meets at the museum.

**ANTH 1123. Native North Americans in the Twenty-first Century.**

An examination of the process of land alienation of Native Americans through the enactment of federal laws to settle the frontiers and protect the wilderness. Through the use of oral history, ethnographies, film, historical documents, and the public record, the course compares Native American and Euro-American perspectives on the ownership of land and rights to resources.

**ANTH 1124. United States Culture.**

The United States is often described as "multi-cultural". This course examines dominant cultural values such as equality, choice, privacy, and responsibility. It also investigates aspects of the social structure of the United States such as inequality, power, race/ethnicity, kinship, and gender. Individual lives illustrate the ways that people living in the United States negotiate cultural values and confront social institutions. Enrollment limited to 40. Instructor permission required. DVPS LILE

**ANTH 1125. Indigenous Archaeologies.**

This course in an introduction to Indigenous archaeology, sometimes defined as archaeology "by, for and with Indigenous peoples." These approaches combine the study of the past with contemporary social justice concerns. However, they are more than this. In addition to seeking to make archaeology more inclusive of and responsible to Indigenous peoples, they seek to contribute a more accurate understanding of archaeological record. They thus do not reject science, but attempt to broaden it through a consideration of Indigenous epistemologies. This course covers topics as the history of anthropological archaeology, Indigenous knowledge and science, decolonizing methodologies, representational practices and NAGPRA. DVPS LILE

**ANTH 1130. Peoples and Cultures of Southeast Asia.**

An introduction to the anthropological study of Southeast Asia. Emphasis is placed on understanding the diversity of cultures and societies through both space and time.

**ANTH 1131. Indian Issues in Anthropological Perspective.**

From its role as an emerging economic power, to characterization of outsourcing global media, political discourses, and worldwide popularity of Bollywood, India is undergoing rapid changes, global imagination, and importantly in how Indians think about themselves in an era of globalization. We cover anthropological issues of contemporary India, including Hinduism and Islam, caste, social structure and forms of social relations using ethnographic texts. We will focus on postcolonial India, particularly two decades since liberalization in 1991. We will consider how history, cultural practices and existing social norms continue to shape and change contemporary Indian society and its relation to the world.

**ANTH 1133. Ethnonationalism- The Asian Arena.**

Three Asian countries-China, Thailand, and Myanmar—are unique national arenas to examine and compare specific definitions, representations, and contentions among nationalistic discourse, ethnic legitimization, and ethnonationalism as they are played out in response to cultural politics, national ideology, European colonial expansion, religious identity, and ethnic identity. Nationalistic movements, ethnic nationalism, and transnational politics are explored.

**ANTH 1140. Andean Anthropology.**

The area studies paradigm continues to provide solid information about "culture areas," and the rich ethnography and archaeology of Andean societies is no exception. Particular strengths emerging from this literature include studies of land use, religious syncretism, textiles, and collateral themes: continuities and recognizable features of "Andean culture" (lo andino), gender relations, migration, and politics. Throughout, we will analyze the ways that history, ecology, and the broad notion of reciprocity (ayni) cross-cut each of these. The result will be a close and in-depth study of cultural practices within three Andean countries (Peru, Ecuador, and Bolivia), the majority populations of which continue to be indigenous (predominantly Quechua- and Aymara-speaking). These are countries within which recent political and social changes have produced far-reaching transformations. Prerequisite: one course in either Anthropology or Classics.

**ANTH 1120. Peoples and the Cultures of the Americas.**

Examines the diverse cultures and history of the Americas—especially Brazil, Peru, Mexico, and the Caribbean. Topics include the organization of labor, cultural and artistic practices, changing conventions of gender and family, international migration, national and local identities, indigenous rights, and protest and rebellion.

**ANTH 1121. From Coyote to Casinos: Native North American Peoples and Cultures.**

An anthropological overview on the history and cultures of Native North American peoples from the prehistoric times to the present. Where did Native North Americans come from? What were their traditional lives like? What was their relationship with newcomers of European extraction, including anthropologists? What challenges do they face today? Indigenous and anthropological insights will be brought to bear on these and other questions.

**ANTH 1122. American Indian Art and Artifacts.**

Drawing on the rich North American Indian collections of the Haffenreffer Museum of Anthropology, the goal of this course is to examine theoretical approaches to the artifacts of indigenous people and analytical strategies for their research and interpretation. Insights from anthropology, art history, American Indian perspectives, and conservation are explored. Meets at the museum.

**ANTH 1123. Native North Americans in the Twenty-first Century.**

An examination of the process of land alienation of Native Americans through the enactment of federal laws to settle the frontiers and protect the wilderness. Through the use of oral history, ethnographies, film, historical documents, and the public record, the course compares Native American and Euro-American perspectives on the ownership of land and rights to resources.

**ANTH 1124. United States Culture.**

The United States is often described as "multi-cultural". This course examines dominant cultural values such as equality, choice, privacy, and responsibility. It also investigates aspects of the social structure of the United States such as inequality, power, race/ethnicity, kinship, and gender. Individual lives illustrate the ways that people living in the United States negotiate cultural values and confront social institutions. Enrollment limited to 40. Instructor permission required. DVPS LILE

**ANTH 1125. Indigenous Archaeologies.**

This course in an introduction to Indigenous archaeology, sometimes defined as archaeology "by, for and with Indigenous peoples." These approaches combine the study of the past with contemporary social justice concerns. However, they are more than this. In addition to seeking to make archaeology more inclusive of and responsible to Indigenous peoples, they seek to contribute a more accurate understanding of archaeological record. They thus do not reject science, but attempt to broaden it through a consideration of Indigenous epistemologies. This course covers topics as the history of anthropological archaeology, Indigenous knowledge and science, decolonizing methodologies, representational practices and NAGPRA. DVPS LILE

**ANTH 1130. Peoples and Cultures of Southeast Asia.**

An introduction to the anthropological study of Southeast Asia. Emphasis is placed on understanding the diversity of cultures and societies through both space and time.

**ANTH 1131. Indian Issues in Anthropological Perspective.**

From its role as an emerging economic power, to characterization of outsourcing global media, political discourses, and worldwide popularity of Bollywood, India is undergoing rapid changes, global imagination, and importantly in how Indians think about themselves in an era of globalization. We cover anthropological issues of contemporary India, including Hinduism and Islam, caste, social structure and forms of social relations using ethnographic texts. We will focus on postcolonial India, particularly two decades since liberalization in 1991. We will consider how history, cultural practices and existing social norms continue to shape and change contemporary Indian society and its relation to the world.

**ANTH 1133. Ethnonationalism- The Asian Arena.**

Three Asian countries-China, Thailand, and Myanmar—are unique national arenas to examine and compare specific definitions, representations, and contentions among nationalistic discourse, ethnic legitimization, and ethnonationalism as they are played out in response to cultural politics, national ideology, European colonial expansion, religious identity, and ethnic identity. Nationalistic movements, ethnic nationalism, and transnational politics are explored.

**ANTH 1140. European Ethnography.**

Familiarizes students with the societies and cultures of Europe from an anthropological perspective. Historical material provides for the understanding of current cultural, linguistic, religious, and ethnic variation. Major emphasis is on the analysis of a range of contemporary communities from peasant to urban, from East to West, and from North to South.

**ANTH 1150. Middle East in Anthropological Perspective.**

A seminar focusing on anthropological methods of analyzing and interpreting Middle Eastern cultures and societies. Emphasizes the study of kinship, tribal structure, social organization and gender relations, ethnic groups relations, and urban-rural distinctions. Draws upon insights from these topics as a basis for understanding contemporary social, economic, and political dynamics in the region.

**ANTH 1151. Ethnographies of the Muslim Middle East.**

An introduction to ethnographic studies of Middle East, focus on: religion, language, modernity, gender, and political culture. Students will engage in critical examination which anthropologists sought to capture Middle Eastern life, and problems that have pervaded anthropological representation, methodologically and theoretically. You will learn, through the ways anthropologists approach the peoples, ideas, and cultures of the region in ways that complement and contradict the knowledge production of other disciplines, the processes we come to understand cultural difference, and ways this encounter sheds light on our selves and practices. Previous course in Anthropology/ Middle East studies is suggested. Enrollment limited to 25. DVPS LILE

**ANTH 1210. Culture and Cognition.**

Are there cultural differences in thought and perception? If so, what are these differences and to what are they attributable? Reviews the history of the controversy on "primitive thought," the influence of culture and environment on perception and concept formation, the development of cognitive operations, and differences in logical processes and decision making in other cultural contexts.

**ANTH 1211. Cross Cultural Perspectives on Children.**

Explores how the behavior and psychological functioning of children are shaped by culture and how different cultures tend to produce children with characteristic personalities, selves, thought patterns and behaviors. Every cultural community provides developmental pathways for children. These pathways are shaped by history and by the goals of parents, communities and children themselves. The course will focus on how human knowledge is transmitted through multiple cultural channels in both informal and formal contexts. This is a service-learning course in which students provide a needed service: Mentoring and tutoring Liberian young people in a literacy program. This will serve as a basis for conducting research
on this refugee population and the final paper will be the recording of oral histories from teenagers. Enrollment limited to 30.

ANTH 1212. The Anthropology of Play
Play enters all fields, from physics to human development, art to scientific experimentation. In all cultures, play figures centrally in rites of passage, child development, learning, and times of celebration. Central to this course is an understanding of the rules of play, its intentions in work, functions throughout human history, and role in formal education.

ANTH 1220. Comparative Sex Roles
Covers specific cross-cultural issues of gender, cultural roles, the status of women, and their structural position in society. Themes of gender representations in the field of economics, ritual, and politics underlie the concerns of the course. Though African and Asian communities are the primary focus, aspects of American society are drawn into consideration when relevant.

ANTH 1221. Anthropology of Masculinity
Contemporary anthropological and historical study of masculine identities and practices throughout the world, focusing on topics such as the cultural economies of masculinity, cultural regions and images of manhood, male friendship, machismo, embodied masculinity, violence, power, and sexual fault lines. Prerequisite: Prior course in Social Science or instructor's permission required.

ANTH 1222. Kinships Compared: Relations, Families, and Connections
In all cultures people see themselves as related more closely to some people than to others and they usually experience that relation in terms of some shared substance such as blood. Beyond these generalizations there is an enormous variety of ways in which people live in, build, and maintain connections with others - in nuclear and extended families, peer groups, friends, ethnic groups, and so on. This course is about kinship as an idea, an experience, and as an institution. In the midst of divorce and blended families, new reproductive technologies, and adoption we will investigate kinship and connection in our own lives, in a range of other cultures, and within the discipline of Anthropology.

ANTH 1223. Gender, Nature, the Body
This course is an interrogation of the ways in which gender difference comes to be conceived as "natural" in modern science, popular science, and in popular culture. What is the connection between the science of gender difference and the colonial encounter? What are some different ways of imagining gender difference? How are gender inequalities structured and perpetuated by science and political economy? Through careful reading of historical and anthropological texts, we will learn about various ways in which gender systems are constructed and resisted, how science is used to construct gender, but also how gender politics influence scientific outcomes and practices. Case studies that we will read about include: the colonial encounter and scientific taxonomy, the medicalization of childbirth and labor, historical understandings of male-female continuities, the emerging science of sex difference and sexual orientation, gender inequality and ecological exploitation.

ANTH 1224. Human Trafficking, Transnationalism, and the Law
Designed to give students an opportunity to engage in transnational research on social issues through an extended case study of a new generation of international norms that identify and combat "human trafficking." The course format combines seminar discussions, lectures, and small group exercises. Students will learn by doing. As we consider legal instruments, UN and U.S. documentary archives, anti-trafficking media such as films and websites, and the prosecution of criminal networks, we will experiment with alternative methodologies for analyzing them. We will study the relation of texts to the social and political contexts of their production and circulation. Enrollment limited to 30. DVPS LILE WRIT

ANTH 1227. Science, Activism, and Politics of Gender
How did much of the world agree that female genital cutting should be ended? This course explores grassroots and international campaigns in Africa and the West, effects of asylum and criminal laws, and international organizations’ attempts to create evidence-based, scientific governance to end cutting. We will focus on ethnographies that problematize these interventions by analyzing their histories, cultural politics, contradictory effects on local communities, and global political ramifications. By examining interventions against cutting, this course offers a methodological and conceptual blueprint for researching local-global production of human rights crises and efforts to resolve them. Enrollment limited to 20. Not open to first year students. LILE

ANTH 1229. Democracy and Difference: Political Anthropology, Citizenship and Multiculturalism
In seemingly endless contexts, the term "democracy" is employed toward a wide range of political and social goals. This course examines the question of cultural citizenship - the right to be different while remaining part of the national community - as observable in places where liberal democracy's focus on the individual citizen clashes with communal wishes for collective representations of difference. By reading case studies from multiple locales, this course examines the attempts of democratic regimes to govern varied populations through the lens of political anthropology. DVPS LILE WRIT

ANTH 1311. Kings, Courts, and Aristocracy
Explores the nature and variety of kingship, royal courts, and aristocracy through comparative evidence, with strong emphasis on historical data, architecture, and archaeology. Test cases will be examined in Mesoamerica, Europe, Africa, and Asia.

ANTH 1232. War and Society
Cross-cultural and historical perspectives on war and its larger social context. Course readings and lectures use political economic, cultural, and feminist approaches to understanding war and its effects on social life. Case studies will be drawn from several eras and areas of the globe, including the Rwandan genocide, Central American counterinsurgency wars of the 1960s, and the war in Iraq.

ANTH 1233. Ethnographies of Global Connection: Politics, Culture, and International Relations
Historically, IR and Anthropology examined interactions within and among bounded objects, whether sovereign states or small-scale societies. Increasingly, through, they explore flows, circulations and exchanges across borders, and their impact on different societies. Through case-studies, the course will analyze evolving understandings of "globalization" and "culture," and explore how effectively different genres of research and representation capture their complex interactions.

ANTH 1234. Anthropology and Utopia
Utopia: designs for good societies and efforts to create them; and Anthropology: observation and description of societies. A wide-ranging reading and discussion class that will address such questions as: Does Anthropological description contribute to the design of good societies? Have Anthropologists been looking for Utopia? What does Anthropology suggest is wrong with existing societies? Whose job is it to judge societies? How would Utopias be like to live in? How have people tried to build Utopias? Have they failed completely? Is failure inevitable? Is a better world possible? What would it look like? How would we get there?

ANTH 1236. Urban Life: Anthropology in and of the City
This course examines how anthropologists have worked in the city -- to understand dwelling and lived experience from the center to the margins of society; as well as how anthropologists have contributed to the study of the city -- conceptualizing the city itself in relation to its inhabitants, and working to understand how cities develop, decline, or are sustained. Anchored in key theory, classic texts, and contemporary ethnography, the course traces also the history, present, and possible futures of the discipline. Students learn the methods of urban ethnography, and gain hands-on experience through local field exercises and related writing assignments.
ANTH 1240. Religion and Culture.
Looking at religion as a mode of thought, we examine theories that attempt to explain the origins, world-wide manifestation, and vitality of myths, rituals, magic, witchcraft, and other ways of thinking and acting that are typically associated with (or against) the concept of religion. Collaterally, we examine the methodologies by which we hope to understand the meaning of these concepts.

ANTH 1241. Science and Culture.
This course is an introduction to methods and topics in the anthropology of science and technology, including: social inequalities in science, race, gender, post-coloniality, and the globalization of bio-technologies. The course will focus on ethnographies and films about science and culture, covering topics such as the social implications of genetic testing, bio-prospecting and the environment, the development of pharmaceuticals, and repercussions of nuclear technologies.

ANTH 1242. Bioethics and Culture.
This course is an introduction to the work of medical anthropologists who have engaged with social and ethical implications of medical practice and biotechnologies. In this class we look at bioethical problems as ways to understand larger social questions and look at the ways in which society as a whole influences bioethical questions and decisions. Particular emphasis will be on questions about the beginnings and ends of life, genetic testing, pharmaceuticals, psychiatry, health inequalities, and organ transplantation. Prerequisites for the course are: a previous course in medical anthropology (e.g. Culture and Health) or a previous course in science studies.

ANTH 1244. Religion and Secularism: Affinities and Antagonisms.
Global events in recent years seem to defy simple ideas of the confinements of religion to a wholly private, non-modern or otherworldly domain, in ways that compels scholars across a range of disciplines in the social sciences, critical theory and philosophy to rethink the category of secularism, and the relationship between religion and politics. Is secularism a failed ideal? In what ways are ideas of the secular being contested and reformulated in different global contexts? This course seeks to familiarize students with recent debates on secularism, working towards a more nuanced understanding of the relationship between religion and politics. DVPS LILE

ANTH 1250. Film and Anthropology: Identity and Images of Indian Societies.
The course examines representation of Indian society in film and anthropological literature. We compare how gender, national identity, religious practices, and historical events are portrayed in films and anthropological literature. We will explore the relationship between visual and textual, showing how film reflect and make comprehensible anthropological concepts of Indian culture, and creates different images of the society.

ANTH 1251. Violence and the Media.
The role of media in shaping perceptions of violent conflict. Analysis of constructions of the "violent other", "victims", and "suffering", the use of culture, ethnicity, and psychopathology as tropes for articulating the motivations of violent perpetrators. Multiple subject positions and political interests will be considered. Case studies include the Cold War, conflicts, insurgencies urban riots, the genocide, and terrorism. Pre-requisite: a previous course in Anthropology, or permission of the instructor.

ANTH 1252. Kill Assessment: An Investigation into Death, Genocide and Other Forms of Violence.
Is violence best understood as a set of "random acts" marginal to society? Or, do societies need violence to make culture systematic and functional? We will address two major issues throughout this course. First, we will discuss different types of violence: physical, material, structural and symbolic violence. Second, we will become familiar with ways that social groups turn violence into an aesthetic object and an artistic project. LILE

ANTH 1255. Anthropology of Disasters.
This course examines disasters from an anthropological perspective. We focus on how disasters have been defined and understood, and work more broadly to see what they tell us about human conditions, vulnerabilities, and capacities for resilience building, survival, and long-term sustainability. Drawing on and comparing case studies from around the world, we also examine the nature of destructive agents; degrees of impact and injury; rescue, relief, and humanitarian responses; and the often slow and uneven process of recovery and resilience building.

An exploration of intersections of indigenous peoples with the natural world; this semester with the avian world. Through a sustained focus on one class of living things, the hope is to gain access to a range of issues concerning the relationship between people and the environment.

ANTH 1300. Anthropology of Addictions and Recovery.
The purpose of this course is to consider the uses and misuses alcohol, tobacco and drugs, and approaches to recovery from addictions. We will read some of the major cross cultural, ethnographic, linguistic, and social-political works on addictions. Students will have the opportunity to conduct their own anthropological interviews regarding substance misuse and recovery as well as observe a local 12 step recovery meeting. Enrollment limited to 20. LILE

ANTH 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture.
Medicine is arguably the most humanistic of the hard sciences, one that strives to ensure the basic dignity of individuals. In our increasingly globalized world, access to medical care is recognized as a fundamental human right. However, there continues to be considerable debate over the "best" ways to provide medical services to economically and culturally diverse communities across the globe, given the complex ways that people prioritize and perpetuate their health. Drawing on a range of disciplines, this seminar explores the multifaceted relationships between biomedicine and cultural understandings of illness, both in the US and worldwide. Instructor permission required. Enrollment limited to 25 juniors and seniors.

ANTH 1310. International Health: Anthropological Perspectives.
This upper-level medical anthropology course focuses on the social and cultural complexity of health problems in developing nations, employing anthropological approaches to public health. International health issues such as HIV/AIDS, malaria, tuberculosis, leprosy, reproductive health, violence, and mental illness will be examined. The historical, political and socio-cultural dimensions of international health problems will be explored through reading ethnographic case studies. WRIT

ANTH 1320. Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress.
Examines international development from an ethnographic perspective, looking critically at issues of poverty and progress from local points of view. Course is organized around the premise that culture is central to understanding processes of development. Broad development themes such as public health, agriculture, democracy, and the environment will be explored through readings representing a wide range of regions and cultures.

ANTH 1321. Impact on Colonialism: Gender and Nationalism in India.
This course is designed to look into colonial and post-colonial identities within the disciplines of history of literary studies. We will adopt an anthropological approach to those subjects, taking the cultural anthropology and construction of gender as the guideline for the analysis. Topics will include: orientalism, and gender; nationalism and religion.

From child soldiers to starving refugees, Americans are inundated with media images of violent suffering in the developing world. Our politicians frequently present international humanitarian intervention as an unequivocal good, without examining the actual outcomes of aid initiatives. This course uses tools from anthropology to explore the motivations for global aid, along with the concrete--and often unexpected--effects it produces on the ground. Foregrounding an ethnographic approach, we seek to understand the enduring influence of the concept of "rights," the ways that local populations both welcome and resent humanitarian work, and the successes and failures of international charitable organizations. First-year students require an instructor override to register.
ANTH 1323. The Culture and Politics of Colonial Cities: Migration, Markets and the Diaspora.

Two colonial powers (British Empire and Portuguese) form the basis for this comparative approach to unravel and comprehend how colonial policies differed in two regions. Colonial cities have a special mystique, and studying them in the present unravels socio-historical and political connections make the present more meaningful. For post-colonialism, we address migration and Diaspora, the participation of groups under analysis in transnational economy and local and global markets. Focusing on the Diaspora, we seek to tie history and cultural development to the wider issue of Diaspora and the displacement of people, the search for opportunities, migration and the global markets. DVPS LILE

Economic activities take place within cultural contexts which define appropriate values and goals, and in societies varying in scale, technology, and organization. Looking cross-culturally, and at economic activities in societies such as the United States, this course examines the production, distribution, and consumption of material goods, analyzing these as essentially social activities - properly understood only when we take account of social relations and cultural values. Consequently, the course also investigates the extent to which the words commonly used to describe economic life, such as "market", "wealth", "price", "profit", "work", and "money", are culturally specific rather than universally applicable. At least one previous course in Anthropology or another social science is strongly recommended. WRIT

ANTH 1325. Business and Entrepreneurship in Global Perspective.

In a world of free trade, government downsizing, and the rapid movement of people and ideas, business and entrepreneurialism have become central to many peoples' economic livelihoods and social identities. Anthropologists have most often treated business and entrepreneurship as reflections of culture and social life, rather than sites of production in their own rights. Corporate workplaces, small businesses, and trade encounters are starting points for understanding myriad different social outcomes: novel forms of intercultural communication, new patterns of transnational labor migration, changing class configurations, and forums through which socially marginalized groups participate in society. DVPS LILE

ANTH 1326. The New Economic Anthropology.

This course introduces students to the new economic anthropology of capitalism and situates it within the historical development of economic anthropology since the late 19th century. The course begins by introducing students to basic notions of 'economy' as understood in the ancient Mediterranean up through to the present. The course covers early anthropological research into forms of personhood and sociocultural organization that contrasts sharply with the assumed universality of homo economicus. The course focuses on key debates within economic anthropology over the possibility of using 'western' economic categories for analysis and explores some of the alternative frameworks developed by anthropologists. LILE

ANTH 1330. Women in Socialist and Developing Countries.

A seminar, jointly taught by a sociologist and an anthropologist, exploring the changing role of women in the former socialist countries of Eastern Europe and developing countries in Africa and Asia. Includes women's position, ideologies, and choices within these societies, and the transitions that are taking place. Contributions to a better understanding of the role of women in our own society. LILE

ANTH 1400. Race, Culture, and Ethnic Politics.

A seminar addressing the subjects of race, culture, and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach.

ANTH 1410. Reconstructing Multiraciality.

An examination of, first, the racial and social history of interracial and interethnic relations in the U.S. and different parts of the world, then, the contemporary American situation and changing trends in these cross-group relationships. Exploratory and interdisciplinary-intended to open a dialogue on multiple issues involved, diachronically as well as synchronically.

ANTH 1411. Nations within States.

Examines the interactions between small-scale indigenous societies (often referred to as Fourth World Nations) and the modern states within which they now exist. The relationship is obviously asymmetrical, yet these ethnic or "racial" minorities have the support of world opinion and international organizations. The sociocultural, economic, and political structure of these nations within states is the focus of the course.

ANTH 1412. Anthropology of State Power and Powerlessness.

How do we conceptualize state power? Is Power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of state power through classic texts of anthropological and political theory including Foucault, Weber, Hobbes, Locke and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities. DVPS LILE

ANTH 1420. Ethnicity, Race, and Gender in the Americas.

The historical and contemporary ethnography of ethnicity, race, and gender in the Americas. Topics include racism, multiculturalism, affirmative action, immigration, nationalism, acculturation, cultural autonomy, slavery, colonialism, and genocide.

ANTH 1421. Ethnic American Folklore: Continuity and the Creative Process.

An investigation of the dynamics of cultural continuity and the creative process involved in ethnic American folklore from oral narratives, life history, to foodways, and the senses of place. How do these cultural forms intersect with ethnicity, gender, group activism, and transnational contacts and exchanges? What are the new cultural forms, communication milieus, and venues negotiated or contested in contemporary America?

ANTH 1422. The American Experience-Southeast Asian Refugees/Americans.

Explores the diaspora of the Cambodian, the Hmong, the Lao, and the Vietnamese American from their initial exodus from their war-torn countries to their strategies for reconstructing new lives. Topics include socioeconomic changes, changing family life, gender roles, life choices, and the growing American generation. Materials used include films, songs, and autobiographies written by the refugees/Americans themselves.

ANTH 1450. Living with Conflict.

Exploration into ways in which cultural groups perceive and approach situations of conflict and how these situations in turn shape cultural practices, beliefs, and norms within the group. Examples are taken from ethnographies of different parts of the world and include a discussion of customs that help mitigate conflict among members of the group as well as conflict between groups.

ANTH 1530. American Indian Archaeology.

Traces the development of North American Indian cultures through the comparative study of prehistoric archaeological remains. Topics include the origins of Native Americans, Native American hunting-gathering lifeways, and the rise of the Native American agricultural societies. Emphasizes analyses of subsistence modes, settlement patterns, and symbolic systems.

ANTH 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia.

A course survey of the pre- and protohistoric archaeology of the eastern half of Asia. Topics include the development and evolution of agricultural societies, the emergence of village and urban life, and the rise of states and kingdoms. The early states were often characterized and even reinforced by elaborate symbolic and religious systems expressed through ritual, art, and architecture-topics also covered by the course.

ANTH 1550. Ancient Environments.

This course teaches students how scientists investigate ancient environments and climate change and how these are related to ancient people and culture history. Students will learn about methods ranging from pollen and soil analysis to climate reconstruction and ecology. The class will look at a number of archaeological case studies in which climate or environment are believed to have been integral in past cultural developments. Case studies include the Levant, Mesopotamia, Polynesia,
the American Southwest, and the Maya area. Students will be evaluated on class participation, weekly writing assignments, and final research papers. Prerequisite: ANTH 0500 or instructor permission.

ANTH 1555. Environmental Anthropology. Environmental anthropology is the study of how people interact with environments, past and present. This course explores how humans have affected their environments over time and how environment shapes human culture, employing an interdisciplinary anthropological perspective to illuminate these reciprocal interactions. This course uses a variety of approaches to understand how people interact with environments, employing cultural, biological, linguistic, and archaeological methods. This course covers human adaptation to environmental change from earliest prehistory up to the present day and students will have the opportunity to explore the practical and interpretive dilemmas of environmental challenges of the 21st century and beyond. Enrollment limited to 20 sophomores, juniors, and seniors.

ANTH 1570. American Indian Archaeology. This course traces the development of North American Indians and culture through a comparative study of prehistoric archaeological remains. Some of the questions addressed will be: When and why did people first migrate into North America? Were these people responsible for the mass animal extinction at the end of the last Ice Age? What accounts for the similarities and differences in the politics and adaptations of Native Americans?

ANTH 1590. Archaeology of the Ancient Near East. A survey of archaeological sites in the ancient Near East from the Neolithic period to the early Roman Empire. Archaeology allows us to explore the development of agriculture, cities, and urban-based culture, as well as to make comparisons between cultures and examine issues of trade and commerce. We evaluate sites in relation to theoretical and methodological issues in anthropological archaeology.

ANTH 1600. Hunter-Gatherer Adaptations. Addresses the question: to what extent can the concept of the ecosystem, as developed in evolutionary biology, explain variability in human behavior? Examines the literature on contemporary hunting and gathering societies, both human and nonhuman, as well as relevant findings in archaeology and human biology. Background in general biology and anthropology is helpful, but not required.

ANTH 1620. Global Historical Archaeology. The course examines historical archaeology as a multidisciplinary approach to the study of the historic past. Draws in recent research from different parts of the world, including North America, South Africa, Australia, the Caribbean, and South America, to illustrate historical archaeology's contributions to interpreting peoples' everyday lives and the diversity of their experiences in the post-1500 era.

ANTH 1621. Material Culture Practicum. Combines theory with hands-on study of artifacts from historical archaeological contexts in North and Latin America. Students will gain skills and experience in artifact identification, dating, recording, analysis, and interpretation, and will conduct individual or team research projects on material things as products of everyday life and history. Enrollment limited to 15. LILE

ANTH 1623. Archaeology of Death. Examines death, burial, and memorials using comparative archaeological evidence from prehistory and historical periods. The course asks: What insight do material objects give us about the human condition? How do human remains illuminate the lives of people in the past? What can mortuary artifacts tell us about personal identities and social relations? What do gravestones and monuments reveal about beliefs and emotions? Current cultural and legal challenges to the excavation and study of the dead are also considered. DVPS LILE

ANTH 1624. Indians, Colonists, and Africans in New England. The course explores the colonial and capitalist transformation of New England's social and cultural landscapes following European contact. Using archaeology as critical evidence, we will examine claims about conquest, Indian Extinction, and class, gender and race relations by studying the daily lives and interactions of the area's diverse Native American, African American, and European peoples. DVPS LILE

ANTH 1625. Questions of Remembrance. Archaeological Perspectives on Slavery in the New World. Archaeology of slavery, and particularly that of enslaved African-American communities in what came to be the United States, has been one of the fastest growing areas of archaeological research in the last few decades. This course will look into both classic and current literature on the archaeology of Atlantic slavery in order to understand the development of this archaeological subfield, from an initial focus on the living conditions of slaves on plantation sites to later interests in the processes of consolidation of African-American ethnicities. What are current challenges faced by those investigating the material constitution of African Diaspora through time? DVPS LILE

ANTH 1630. The City, the Maroon and the Mass Grave. How has archaeology contributed to our understanding of the past in the former Spanish colonies? How has this knowledge been presented and made socially relevant in present-day Latin America? This course proposes a critical insight into the achievements and future challenges of historical archaeology in Spanish speaking America, exploring the diverging trajectories that the discipline has had in different countries of the region, and the way in which archaeological knowledge about the colonial, republican, and contemporary periods has been either ignored or assimilated into the development of specific politics of cultural heritage at the local level. LILE

ANTH 1640. Maize Gods and Feathered Serpents: Mexico and Central America in Antiquity. Mexico and Central America are the cradles of one of the world's most enduring cultural traditions. The modern identity of these ancient traditions and their influence is apparent the world over, particularly in the area of agricultural domesticates (corn, chocolate, and chilies). Their cities (Teotihuacan, Monte Alban, Chichen Itza, etc.) rank among the greatest of the ancient world. This course offers a survey of Pre-Columbian Mexico and Central America, from the early monumental centers of the Olmec to the great Aztec city of Tenochtitlan, and explores how anthropologists and archaeologists investigate Middle America's indigenous past.

ANTH 1650. Ancient Maya Writing. Nature and content of Mayan hieroglyphic writing, from 100 to 1600 CE. Methods of decipherment, introduction to textual study, and application to interpretations of Mayan language, imagery, world view, and society. Literacy and Mesoamerican background of script.

ANTH 1660. The Ancient Body: Past Ideas about Human Physicality. Course addresses the burgeoning literature on the human body, especially the meanings attached to it through time and across cultures. Anthropology, history, and archaeology offer the principal sources of evidence for this introduction to past ideas about the body.

ANTH 1670. Global Origins of Plant and Animal Domestication. A seminar providing the basic information on the prehistory of the Circum Arctic of Northern Fennoscandia, Russia, and North America. Not open to first year students.

ANTH 1700. Evolutionary Theory and Human Behavior. An introduction to the field of human behavioral ecology, the course provides an overview of the application of the theory of natural selection to the study of behavior in an ecological setting. Focus is on anthropological topics related to reproduction such as issues of mating and parenting, sex ratios and sex preferences, and timing of life histories events.

ANTH 1710. Biological Issues in Human Origins and Variability. This course examines the fossil record of human ancestors and evidence for cultural origins in relation to evolutionary theory in biology. We will review studies of living primates as well as modern genetic and DNA research for measures of contemporary human variability. Finally, we will explore forensic applications and case studies.

ANTH 1720. The Human Skeleton. More than simply a tissue within our bodies, the human skeleton is gateway into narratives of the past—from the evolution of our species to the biography of individual past lives. Through lecture and hands-on laboratory, students will learn the complete anatomy of the human skeleton, with an emphasis on the human skeleton in functional and evolutionary perspective. We will also explore forensic and
bioarchaeological approaches to the skeleton. By the course conclusion, students will be able to conduct basic skeletal analysis and will be prepared for more advanced studies of the skeleton from medical, forensic, archaeological, and evolutionary perspectives. Enrollment limited to 20. Not open to first year students. Instructor permission required. LILE

ANTH 1764. Campus Culture.
This course presents and anthropological perspective on American colleges and universities from the past to present. In particular, it will address the emerging relationships between curriculum, governance, funding sources, academic values, and campus life. Readings will include theoretical sources on higher education, historical and ethnographic accounts of particular institutions, and recent essays regarding the purpose, practices and criticism of contemporary colleges and universities. DVPS LILE

ANTH 1800. Sociolinguistics, Discourse and Dialogue.
An investigation of the study of language and language behavior. Centers on the study of variation in language as seen in the social and cultural context of language use. This course will feature practice in writing fictional and dramatic dialogue based on real-life discourse. Presupposes some familiarity with basic linguistics (ANTH 0800, CLPS 0030, or equivalent).

ANTH 1810. Language and Power.
This course considers how language and power relate to each other in social life. We first consider theoretical approaches to the politics of language use, such as Foucault on discursive formations, Bourdieu on language as social capital, and Bakhtin on the oppression inherent in standard languages. We then consider specific issues, including joking as linguistic resistance, language death and revitalization, the cochlear implant debate, and racializing discourses. We end with language use in the U.S. "culture wars," covering such topics as the Ebonics controversy, language and electoral politics, hate speech, and English language legislation.

ANTH 1820. Lost Languages: The Decipherment and Study of Ancient Writing Systems.
Humans make many marks, but it is writing that records, in tangible form, the sounds and meanings of language. Creating scripts is momentous; writing facilitates complex society and is a crucial means of cultural expression. This course addresses the nature of writing in past times. Topics include: the technology of script; its precursors and parallel notations; its emergence, use, and "death"; its change over time, especially in moments of cultural contact and colonialism; writing as a physical object or thing; code-breaking and decipherment, including scripts not yet deciphered; and the nature of non-writing or pseudo- or cryptoscripts.

ANTH 1870A. Reproductive Health and Sexuality.
No description available.

ANTH 1880. From Magic Mushrooms to Big Pharma: Anthropology of Drugs.
This course considers the social, political, and medical issues associated with illegal and pharmaceutical drugs. Some of the topics we consider are debates over the commercialization and criminalization of hallucinogenic plants such as marijuana, the politics of antiretroviral distribution, the ethics of medical and ethnic tourism, the legacies of colonialism and botanical migrations, "biopiracy" and indigenous knowledge, and critiques of modern food production, including the "locavore movement" and opposition to genetically modified foods. Through it all, we consider how the ways people talk and write about these issues affect concrete realities in daily life. Enrollment limited to 20 juniors and seniors. DVPS LILE

Looks at the way anthropological methods and theories have interlaced through history to understand the dominant concerns in present-day anthropology. What were the important issues that influenced the discipline’s history? Who were the significant, and not so well known, historic personalities who shaped anthropological practice and gave it its identity? Enrollment limited to 20.

ANTH 1901. Anthropology in/of the Museum.
This course provides an introduction to museums from an anthropological perspective. Topics include politics of representation and the construction of the "Other"; objects, identity, and meaning; collecting and cultural property; and collaboration, community engagement, and indigenous self-representation. Assignments involve work with the Haffenricher Museum of Anthropology’s exhibitions and collections. The course focuses on museums dedicated to natural and cultural history, but establishes theoretical and practical grounding for thinking about and working in other disciplines and other kinds of display institutions. It is suitable for both undergraduate and graduate students. There are no prerequisites; but familiarity with anthropology is presumed.

ANTH 1910A. Anthropological Approaches to World Issues.
Capstone seminar for Anthropology concentrators that explores how anthropology can challenge conventional or dominant wisdom about global social problems. Original research project required. Prerequisite: ANTH 1900

ANTH 1910B. Anthropology of Place.
The anthropology of place serves as a unifying theme for the seminar by bridging anthropology’s subdisciplines and articulating with other fields of knowledge. Through readings and discussion, students will explore how place permeates people’s everyday lives and their engagement with the world, and is implicit in the meanings they attach to specific locales, their struggles over them, and the longings they express for them in rapidly changing and reconfigured landscapes. Enrollment limited to 20.

ANTH 1910C. Campus Culture.
Colleges and universities are normative microcosms of the societies they serve. They create, partition, validate and communicate knowledge to rising generations. Their architectures, landscapes, daily routines, yearly cycles, and centennial celebrations are infused with symbolic meanings. Degree awarding ceremonies are among the most attended pilgrimages in our culture. Colleges and universities are gateways to society’s essential professions and portals to a succession of alumni/ae bound by tradition. We will look at these institutions, their values, symbols, communities, governance, financial sources, academic structures, tensions, and adaptive strategies through the seeing eye of anthropology. Enrollment limited to 20.

ANTH 1910D. Faces of Culture.
The seminar is designed to allow you as anthropology majors to question to debate and examine some of the assumptions of the discipline, and critically explore the multifaceted uses of the concept. We will contextualize the study of culture with the history of anthropology and across other disciplines in the humanities and the social sciences. Limited to 20. Prerequisite: ANTH1900

ANTH 1910E. Media and the Middle East.
Media anthropology is a reinvented field within the discipline, emerging from critical engagements with ethnographic film and the crisis of representation of the 1980s. We’ll explore the development of an anthropological approach to mass media studies by focusing on research conducted and theories derived from a particular region: the Middle East. Enrollment limited to 20 senior Anthropology concentrators. Prerequisite: ANTH 1621, 1900, 1940, or 1950.

ANTH 1910F. Social Construction.
No description available. Enrollment limited to 20.

ANTH 1910G. Senior Seminar: Politics and Symbols.
Examination of key role played by symbols, myth, and ritual in politics. We examine symbols, myths, and rituals are used to win support, to create political reality, and form political groups, whether in defense of the status quo or creating movements seeking to overthrow it. The 2012 U.S. presidential and congressional campaigns receive attention. Students, in part working in groups, will engage in original research both on the 2012 American elections and a wide variety of historical and contemporary political developments, from the Arab Spring to the Occupy Wall Street movement. Enrollment limited to 25. Prerequisites: ANTH 1621 or 1900; and either ANTH 1940 or 1950.

ANTH 1940. Ethnographic Research Methods.
To understand the different theoretical assumptions that shape research efforts; to examine how hypotheses and research questions are formulated; and to appreciate the ethical and scientific dimensions of research by hands-on experience in fieldwork projects. Prerequisite: One Anthropology course.
This course brings design thinking into conversation with anthropological research methods, examining the elements of a comprehensive perspective of context. It introduces students to design research methods, ethnographic methods, and how they work together. Students will learn how to use these methods to identify and engage in "deep hanging out" with the problem, gap or inefficiency in question. They will then move on to patient, contextualized opportunity identification for meaningful innovation. By the end of the course, students will have developed a process for effective context analysis. This course is relevant for designers of products, services, organizations, and experiences. Enrollments limited to 40. LILE

Training in archaeological lab and field techniques for archaeologists. Topics include the nature of field archaeology, tools of the trade, interdisciplinary field techniques, ethics, excavations methodological, survey and GIS, systematic vs. ad hoc excavation, artifact analysis, site and artifact preservation. Students gain experience as practicing archaeologists through the active investigation of local historical and archaeological sites in the College Hill area.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

A seminar investigating some themes in the history of anthropological theory. Starting with the delineations of the scope and nature of social science by Marx, Durkheim, and Weber, the seminar then considers various explorations of the concepts of structure, function, and agency, concluding with Bourdieu's reformulation of social anthropology for a new generation in the form of practice theory.

A seminar exploring fundamental theoretical and ethnographic currents in 20th-century cultural anthropology.

Contributes to anthropological understandings of globalism, political and urban anthropology, with a focus on one particular theoretical orientation that may guide research design and/or analysis. In addition to studying this particular philosophy through which they might understand culture, this course offers a model for the adoption of any given theoretical lens that might be taken up, critiqued, and otherwise put to use in cultural analysis.

A seminar on the methodological problems associated with field research in social and cultural anthropology. Designed to help students prepare for both summer and dissertation research.

The purpose of the seminar is to help graduate students conceptualize ethnographic research, formulate a research problem, develop a research design, consider its ethical implications, design appropriate methodologies and prepared the proposal for IRB approval. The methodologies will be discussed with a view to arriving at a critical understanding of the ethical, political and theoretical issues embedded in them and the way in which they fit into our conception of anthropological practice.

ANTH 2030. Advanced Field Methods.
A seminar for advanced graduate students returning from field research or preparing for dissertation field work. Case studies are used for a critical examination of research design and data analysis.

ANTH 2035. Professional Preparation for Anthropologists.
This course covers research ethics and politics, writing of proposals, theses, and articles, publishing, public speaking, CVs and resumes, and the job search.

ANTH 2040. Advanced Social Theory.
This seminar is for graduate students who have taken ANTH 2000 and ANTH 2010 or equivalent undergraduate introductory courses in anthropological theory. Topics to be explored in this seminar include contemporary theories of globalization, hybridity, the politics of identity, class, cultural citizenship, democracy, social suffering, structural violence, agency, human rights, militarization, the body, multisited ethnography, and writing culture.

ANTH 2050. Ethnography.
Each week this class will study classic and contemporary ethnographies - as well as studies from sociology, journalism, and history - that achieve ethnographic results, but will require discussion to determine what they "are". We will carefully examine the methods involved in research for the books and how the ethnographies were written. Ethnographies will be chosen for their importance in anthropology and other fields, and will cover a broad range of topical and geographic contexts.

ANTH 2100A. Contemporary Ethnography on Latin America and Beyond.
This graduate seminar addresses contentious and creative issues in anthropology by focusing on the science and art of ethnography. Readings feature new transnational ethnographic writers. Topics: alternative research framing, the relation of field research to writing, representing violence and porous borders in practice.

ANTH 2100B. People of the Andes.
No description available.

Focuses on debates over significant social and cultural issues in Africa. Historical and cultural continuities are premised as a way of understanding political, economic, and religious complexities in present-day Africa.

ANTH 2120. Critical Locations in the Anthropology of the United States.
This graduate seminar locates and explores the anthropology of the United States. Students first work to understand the social history of anthropology in the U.S., including its theoretical and methodological contributions, and the range of approaches and examples. The course is then organized thematically as students explore key moments along this trajectory, through a close reading of ethnographic work in various settings. The course places a particular emphasis on scholars, topics, and populations that have been historically understudied and sidelined within the larger inquiry, but that are nonetheless critical for the expanded contribution of anthropological work in this field.

ANTH 2130. Biopolitics.
This graduate course will review theoretical positions and anthropological debates concerning biopolitics and life itself, and theoretical frameworks that examine what it means to 'make live and let die.' Although biopolitics is taken as a central preoccupation and analytic for this course, it is also understood as one of many ways to conceptualize or theorize about life and its government. The course is organized around several themes related to anthropological and humanistic inquiry about the myriad ways life takes on political, cultural and social significance. Enrollment limited to 15.

ANTH 2200A. International Health.
This graduate seminar (upper-class undergraduates may seek permission from the instructor) focuses on the social and cultural complexity of health problems in developing nations, exploring anthropological approaches to public health. International health issues will be investigated using historical, ecological, epidemiological, political-economic, and ethnomedical perspectives, and the role of "applied" anthropology will be explored.

ANTH 2210. Analysis of Social Structure.
This course will discuss the analysis of kinship and the construction of the person cross culturally.

ANTH 2220. Anthropology of Politics.
A seminar focusing on the anthropological study of politics. After initial consideration of theoretical roots—from Hobbes and Locke through Evans-Pritchard and Fortes, the seminar turns to contemporary social theory and the application of anthropological approaches to modern state systems. Among the topics to be examined are nationalism, national identity, the political uses of religion, ethnic politics, the politics of naming, the anthropology of the state, the role of language in politics, commemoration and ritual, and demonization.
ANTH 2240. Anthropological Approaches to the Body.
This course is an in-depth exploration of theoretical and analytical approaches to the body in socio-cultural anthropology. Topics covered include: the body as site and sign of the social order; theories of embodiment and the cultivation of the self; bodily order and social ritual; the senses; the relationship between bodily epistemology and socio-political structures; the commodification of the body: technological intervention in the body; the visualization of the bodily interior; and state interventions and regulations of bodily processes.

ANTH 2250A. Psychoanalytic Gender.
This course critically examines the role of gender in development and maturation, or the psychological differentiation of males and females, in the context of their socio-cultural environment.

ANTH 2251. Anthropology of Gender and Sexuality.
In this course we will engage with writings from the social sciences on sex, gender, and sexuality. We will look at the categories that anthropologists have created to explain bodies, sexual choices, and subjectivities and historicize and interrogate them. We will do close readings of ethnographies to see how sex, sexuality, and gender are theorized and how these ideas are applied to a variety of cultural contexts and how people live their everyday lives. Enrollment limited to 15.

ANTH 2255. Gender, Liberalism, and Postcolonial Theory.
What makes gender useful to think with? What work is it charged with doing--in the "real" world and in scholarship? What is the explanatory and analytical potential of a category that has been appropriated to divergent ends? Drawing on multiple disciplines in the humanities and social sciences, this course operates at two registers throughout: it offers students a productive set of analytical tools for theorizing gender and sexuality in culture and society; and it constructs a genealogy of anthropological analysis of gender and sexuality from a postcolonial perspective, exploring how ethnography and postcolonial theory have challenged liberal feminism. Open to seniors and graduate students. S/NC.

ANTH 2260. Politics and Symbolism: At the Interface of Anthropology and History.
An examination of the theoretical roots of the symbolic analysis of politics and the application of these perspectives to both contemporary and historical studies of political life.

ANTH 2261. Globalisms: Empires and Social Movements.
This seminar explores globalisms in two of its contemporary forms, including empires and global networks of social movements. Focuses on theories of empire and on their implications for anti-war and anti-corporate movements in particular.

ANTH 2262. Social Analysis, Public Goods and Social Movements.
This seminar explores some of the political, ethical, and social issues and dilemmas involved in using social analysis to advance public interests.

ANTH 2263. Colonialism and Neocolonialism.
A seminar addressing the concepts of colonialism, postcolonialism, and nationalism. The nature of colonial "rule of law," the stages of the dissolution and formation of "African" native states, and the notion of "traditional" power are all examined in a comparative context using Francophone and Anglophone case studies in Africa.

ANTH 2264. Ethnicity, Race, and Nationalism.
Study of key issues debated by anthropologists regarding ethnicity, race, and nationalism, with examination of concepts such as identity, cultural citizenship, transnationalism-globalization, gender, home, and acculturation-hybrity.

ANTH 2270. Ethnography and Women's Literature of Non-Western Societies.
Interdisciplinary and cross-cultural exploration of representation in ethnographic and literary texts. Confronts the apparent analytical opposition of objectivity and subjectivity and addresses the challenge in the academy of "writing culture." Encourages connections between women writers in the Third World and American minority discourse to deepen understanding of global politics and the poetics of culture.

ANTH 2300. Anthropological Demography.
A seminar devoted to the investigation of the interface of anthropology (especially sociocultural anthropology) and demography. A wide variety of demographic topics-fertility, mortality, marriage, migration-are considered, and the links between anthropological and demographic writings on and approaches to these areas are examined.

ANTH 2301. Interdisciplinary Perspectives on Population.
Brown University's 10 year of excavations has created a lens through which to examine the complexities of the Nabataeans and their culture. The main information about the Nabataeans comes primarily from their extant monuments. There are also literary and epigraphic sources. This seminar will create a constellation of readable ideas, although we will still be left with many open questions about these people.

ANTH 2302. Field Methods for Anthropological Demography.
Concentrates on methods for collecting or producing data that bear on demographic issues and that are suitable for demographic analyses. Topics include: fertility histories, life histories, genealogies, household surveys, networks, and social units. Particular emphasis on the social contexts of data production, local meanings, and discovering appropriate categories and units of analysis.

ANTH 2303. Anthropology of Fertility and Reproduction.
A seminar examining the social significance and cultural meanings of human fertility and reproduction, including the social and cultural consequences of different fertility levels, the variety of people involved in decisions about reproduction, the allocation of responsibility for parenthood, and the political implications of contemporary debates about the meanings of biological and social reproduction.

ANTH 2304. Issues in Anthropology and Population.
This seminar is intended for graduate students and postdoctoral fellows interested in anthropological approaches to population issues and is normally taken as the second course in a two-course sequence that begins with ANTH 2300. The overarching theme of the seminar is the contributions that sociocultural anthropology can make to the understanding of population processes.

ANTH 2310A. Violence, Governance, and Transnationalism.
This seminar deals with contemporary anthropological approaches to violence, governance, and transnationalism. As faculty and graduate students, we have worked together to identify important ethnographic experiments that provide novel anthropological framings of major global issues. Our goal is to interrogate anthropological writing, explore its relation to field research, and trace anthropological appropriations of contemporary social theory from a variety of sources. Prerequisites: three previous courses in Anthropology.

ANTH 2310B. Violence, Governance, and Transnationalism.
Deals with contemporary anthropological approaches to intersection of violence, human rights, law, and transnationalism. Readings will focus on the development of a new generation of research in the anthropology of human rights and its implication for rethinking legal anthropology. Anthropology has moved beyond the "cultural relativism" paradigm on to new projects which analyze the appropriation and use of human rights discourse and international norms as political tools for a variety of national and local agendas. Anthropologists have produced ethnographies that focus on the institutional grounding of legal discourse and practice in community and neighborhood politics, social movements, and ethnic nationalist projects. They have studied the radical reworking of rights discourse in different parts of the world and debated the ways in which these technologies for legal redress in the face of violence are politically empowering and/or disempowering in particular historical and cultural circumstances.

ANTH 2315. Anthropology of State Power and Powerlessness.
How do we conceptualize state power? Is sovereign power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of power through classic texts of anthropology and political theory including Foucault, Deleuze,

**ANTH 2320. Ideology of Development**

An examination of different development theories and their relationship to field application. The analysis of project preparation and implementation is used to question the goals and objectives of Western and indigenous notions of progress and change within a social and economic context. Third World countries are utilized as case studies to address related issues, such as the meaning of development.

**ANTH 2321. Coming to Terms with India: Anthropology of Colonialism and Nationalism**

This course is designed to look into the impact of colonialism, nationalism and the postcolonial identities of the person in India. In addition to the primary of the anthropological focus, the seminar will also draw from cultural studies and history. Our engagement will be with topics of nationalism, religion, and caste and class formation during colonial and post-colonial rule. Additional topics using the anthropological approach will include orientalism and gender; the location of national minorities within the Indian democracy and the future of fundamentalism; post-colonialism and the emerging new person.

**ANTH 2400. Museum and Material Culture**

This seminar discusses anthropological approaches to material culture in museum contexts, by developing themes, selecting objects, and preparing a preliminary script for an exhibition in Manning Hall. This year, "Humans and Nature." (ANTH 2400 is followed by ANTH 2410. Students can enroll in each course independently). Instructor permission required.

**ANTH 2410. Exhibitions in Museums**

The goal of this seminar is to implement in Manning Hall an exhibition script developed in ANTH 2400, on "Humans and Nature" (see that course). Topics discussed and put into practice include: representation of cultures modern museum displays; thematic development; interpretation, handling, and mounting of objects in contextually rich and engaging museum environments; conservation; audience assessment.

**ANTH 2420. Museums in Their Communities**

This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed.

**ANTH 2450. Exchange Scholar Program**

**ANTH 2500A. Problems in Archaeology: Culture Contact and Colonialism**

Explores the theoretical discourses shaping anthropological approaches and defining archaeological projects on culture contact and colonialism. Attention will be given to examining colonial encounters between Europeans and indigenous peoples as ongoing processes rather than particular historical moments, and to looking at recent efforts at decolonizing archaeological practice.

**ANTH 2500B. Problems in Archaeology: The Archaeology of Empires**

Empires have been among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as considering the specific and unique contributions archaeology and art history can offer to the understanding of empire. A variety of case studies will be explored, with selections depending on student interest.

**ANTH 2500C. GIS and Remote Sensing in Archaeology**

This course will train advanced students in the laboratory methods needed for the successful application of GIS and remote sensing technologies in archaeology. We will conduct an exhaustive literature review of spatial research in archaeology to place GIS and remote sensing within a broader conceptual framework. Each student will design their own geodatabase that they will be able to build upon in future research.

**ANTH 2501. Principles of Archaeology**

Examines theoretical and methodological issues in anthropological archaeology. Attention is given to past concerns, current debates, and future directions of archaeology in the social sciences.

**ANTH 2510. Circumpolar Archaeology**

A specialized course dealing with advanced problems in Arctic archaeology. Although primarily oriented toward the northern specialist, the seminar is designed to present, by example, methodological and analytic problems that are applicable to most archaeological areas and to hunting, fishing, and gathering societies.

**ANTH 2520. Mesoamerican Archaeology and Ethnohistory**

Seminar focusing on current issues in the archaeology and history of Mesoamerica, including Mexico and Northern Central America. Draws on rich resources at Brown, including the John Carter Brown Library.

**ANTH 2530. Archaeology of Tribes and States**

Explores concepts of complexity and inequality and how these have been used to study the origins and development of complex society. Categories such as tribes, chiefdoms, the state, etc. are evaluated as conceptual tools for understanding the rise of civilizations and early state formation, as well as transformations in later historical contexts.

**ANTH 2540. Historical Archaeology: From Colony to City**

Examines historical archaeology as a complex field of inquiry that engages multiple sources of evidence and incorporates a wide range of theoretical and methodological approaches. The seminar will consider the range of evidence available to historical archaeologists, and draw on examples from colonies and cities around the world to explore how the richness and diversity of the evidence is used.

**ANTH 2541. Ethnohistory**

Seminar topic: "Comparative Ethnohistory of the Americas." Examines Indian/European encounters and interactions in North America and Latin America. Explores the conjunction of anthropology and history, combining both theoretical orientations from and methodology of the two disciplines, with particular emphasis on the problems posed by comparative analyses.

**ANTH 2550. Archaeological Research Methods, Theory and Practicum**

The seminar is designed to help the student develop good research and analytical skills in archaeology. By focusing on research design, analytic techniques, the relationship between theory and methodology, and the development of research proposal and/or reports, we shall examine how both scientific and humanistic theoretical concerns can be sources of meaningful archaeological questions, and how these questions can be transformed into viable research problems.

**ANTH 2560. Lived Bodies, Dead Bodies: The Archaeology of Human Remains**

Bioarchaeology is the study of human remains from archaeological contexts. We will survey the "state of the art" in bioarchaeology, while exploring its relevance and application to the archaeology of complex societies. We will survey a range of bioarchaeological methods and applications, including paleopathology, stable isotope analysis, population affinity/ancient DNA, perimortem trauma, and body modification. In turn, we will explore how bioarchaeology can be used to approach a wide range of archaeological problems relative to complex societies, including subsistence, economy, migration, urbanism, social inequality, conflict and warfare, and identity. Open to graduate students only. S/NC. LILE

**ANTH 2800. Linguistic Theory and Practice**

An introduction to theoretical and methodological issues in the study of language and social life. We begin by examining semiotic approaches to language. We turn to classical research on language as a structured system - covering such topics as phonology and grammatical categories - but we focus on the implications of such work for broader social scientific and humanistic research. We then consider areas of active contemporary research, including cognition and linguistic relativity, meaning and semantics, pronouns and deixis, deference and register, speech acts and performativity, interaction, verbal art and poetics, reported speech, performance, and linguistic ideology.

**ANTH 2810. Performance Theory**

Explores the concept of performance as used in several social science and humanities disciplines: linguistics, anthropology, folklore, ethnomusicology, and theater. Also addresses practical problems of conducting research on performance forms. Seminar.
ANTH 2900. Teaching Practicum.
No description available.

ANTH 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ANTH 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ANTH 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

ANTH XLIST. Courses of Interest to Students Concentrating in Anthropology.

Applied Mathematics

Chair
Bjorn Sandstede

Associate Chair
John Mallet-Paret

The Division of Applied Mathematics at Brown University is one of the most prominent departments at Brown, and is also one of the oldest and strongest of its type in the country. The Division of Applied Mathematics is a world renowned center of research activity in a wide spectrum of traditional and modern mathematics. It explores the connections between mathematics and its applications at both the research and educational levels. The principal areas of research activities are ordinary, functional, and partial differential equations; stochastic control theory; applied probability, statistics and stochastic systems theory; neuroscience and computational molecular biology; numerical analysis and scientific computation; and the mechanics of solids, materials science and fluids. The effort in virtually all research ranges from applied and algorithmic problems to the study of fundamental mathematical questions. The Division emphasizes applied mathematics as a unifying theme. To facilitate cooperation among faculty and students, some research programs are partly organized around interdepartmental research centers. These centers facilitate funding and cooperative research in order to maintain the highest level of research and education in the Division. It is this breadth and the discovery from mutual collaboration which marks the great strength and uniqueness of the Division of Applied Mathematics at Brown.

For additional information, please visit the department's website: http://www.dam.brown.edu/

Applied Mathematics Concentration Requirements

The concentration in Applied Mathematics allows students to investigate the mathematics of problems arising in the physical, life and social sciences as well as in engineering. The basic mathematical skills of Applied Mathematics come from a variety of sources, which depend on the problems of interest: the theory of ordinary and partial differential equations, matrix theory, statistical sciences, probability and decision theory, risk and insurance analysis, among others. Applied Mathematics appeals to people with a variety of different interests, ranging from those with a desire to obtain a good quantitative background for use in some future career, to those who are interested in the basic techniques and approaches in themselves. The standard Applied Mathematics concentration leads to either the A.B. or Sc.B. degree. Students may also choose to pursue a joint program with biology, computer science or economics. The undergraduate concentration guide is available here (http://www.dam.brown.edu/undergraduate/documents/UndergraduateGuide_051.pdf).

Both the A.B. and Sc.B. concentrations in Applied Mathematics require certain basic courses to be taken, but beyond this there is a great deal of flexibility as to which areas of application are pursued. Students are encouraged to take courses in applied mathematics, mathematics and one or more of the application areas in the natural sciences, social sciences or engineering. Whichever areas are chosen should be studied in some depth.

Standard program for the A.B. degree.

Five additional courses, of which four should be chosen from the 1000-level courses taught by the Division of Applied Mathematics.

Total Credits 10

1. Substitution of alternate courses for the specific requirements is subject to approval by the division.
2. Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
3. APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
4. Concentrators are urged to complete their introductory programming course before the end of their sophomore year.

Standard program for the Sc.B. degree.

Program

Eighteen approved semester courses in mathematics, applied mathematics, engineering, the natural or social sciences. These classes must include: 1

Students are required to take prepared for careers in medicine, public health, industry and academic research collaborations. Applied Math – Biology concentrators are in a senior capstone experience that pairs student and faculty in creative mathematical and statistical sciences, and their application in biology. The required coursework in this program aims at ensuring expertise in particular areas of biology. The students will focus on evolutionary biology has grown very rapidly in with the availability of vast amounts of genomic sequence data. Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

**Applied Mathematics-Biology Concentration Requirements**

The Applied Math - Biology concentration recognizes that mathematics is essential to address many modern biological problems in the post genomic era. Specifically, high throughput technologies have rendered vast new biological data sets that require novel analytical skills for the most basic analyses. These technologies are spawning a new "data-driven" paradigm in the biological sciences and the fields of bioinformatics and systems biology. The foundations of these new fields are inherently mathematical, with a focus on probability, statistical inference, and systems dynamics. These mathematical methods apply very broadly in many biological fields including some like population growth, spread of disease, that predate the genomics revolution. Nevertheless, the application of these methods in areas of biology from molecular genetics to evolutionary biology has grown very rapidly in with the availability of vast amounts of genomic sequence data. Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

**Standard program for the Sc.B. degree**

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

**Required Courses:**

*Students are required to take all of the following courses.*

Select one of the following sequences:

1. APMA 0350 & APMA 0360 Methods of Applied Mathematics I, II
2. APMA 0330 & APMA 0340 Methods of Applied Mathematics I, II
3. APMA 1650 Statistical Inference I
4. One (1) additional APMA approved 1000-level course.

or MATH 0090 Introductory Calculus, Part I (or equivalent placement)

or MATH 0100 Introductory Calculus, Part II (or equivalent placement)

or MATH 0170 Advanced Placement Calculus

or MATH 0520 Linear Algebra (or an approved applied math course)

or CHEM 0330 Equilibrium, Rate, and Structure

or PHYS 0030 Basic Physics

or PHYS 0050 Foundations of Mechanics

or PHYS 0040 Basic Physics

or PHYS 0060 Foundations of Electromagnetism and Modern Physics

**Additional Courses**

In addition to required courses listed above, students must take the following:

Two additional courses in applied math, biology, chemistry, math, or physics. At least one of these must be a directed research course that reflects the theme of this program, for example:

- APMA 1970 Independent Study
- BIOL 1950 Directed Research/Independent Study
- or BIOL 1960 Directed Research/Independent Study

Four biology courses agreed upon by the student and advisor, for example:

**Areas of Emphasis and Suggested Courses:**

A breadth of courses in multiple areas is suggested. For students with particular interests, the following areas of emphasis can be considered.

- **Biochemistry**
  - BIOL 0280 Introductory Biochemistry
  - CHEM 0350/0360 Organic Chemistry
  - CHEM 1230 Chemical Biology
  - CHEM 1240 Biochemistry
  - BIOL 1270 Advanced Biochemistry

- **Cells, Tissues, and Organs**
  - BIOL 0800 Principles of Physiology
  - BIOL 1100 Cell Physiology and Biophysics
  - BIOL 1190 Synaptic Transmission and Plasticity
  - and/or appropriate bioengineering courses, such as:
  - BIOL 1090 Polymer Science for Biomaterials
  - BIOL 1120 Biomaterials
  - BIOL 1140 Tissue Engineering
  - BIOL 1150 Stem Cell Engineering

- **Neurosciences**
  - Any Neurosciences courses (NEUR)
  - APMA 0410 Mathematical Methods in the Brain Sciences

- **Population Biology and Ecology**
  - BIOL 0410 Invertebrate Zoology
  - BIOL 0420 Principles of Ecology
  - BIOL 0430 The Evolution of Plant Diversity
  - BIOL 0480 Evolutionary Biology
  - BIOL 1410 Evolutionary Genetics
  - BIOL 1420 Experimental Design in Ecology
  - BIOL 1430 The Computational Theory of Molecular Evolution
  - Other courses with permission.

- **Genetics**
  - BIOL 0470 Genetics
  - BIOL 1410 Evolutionary Genetics

**Total Credits:** 17

1. It is recommended that some concentrators take organic chemistry or biochemistry.

**Applied Mathematics-Computer Science Concentration Requirements**

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators
must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

**Requirements for the Standard Track of the Sc.B. degree.**

**Prerequisites - two semesters of Calculus, for example**
- MATH 0090 Introductory Calculus, Part I
- MATH 0100 Introductory Calculus, Part II
- MATH 0170 Advanced Placement Calculus

**Concentration Requirements (17 courses)**

**Core-Math:**
- MATH 0180 Intermediate Calculus
- or MATH 0350 Honors Calculus
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science

**Core-Applied Mathematics:**
- APMA 0350 Methods of Applied Mathematics I, II
- APMA 0360 Methods of Applied Mathematics I, II
- APMA 1170 Introduction to Computational Linear Algebra
- or APMA 1180 Introduction to Numerical Solution of Differential Equations

**Core-Computer Science:**
Select one of the following Series:

**Series A**
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- & CSCI 0160 Introduction to Algorithms and Data Structures

**Series B**
- CSCI 0170 Computer Science: An Integrated Introduction
- & CSCI 0180 Computer Science: An Integrated Introduction

**Series C**
- CSCI 0190 Accelerated Introduction to Computer Science
- and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course)

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented:
- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0310 Introduction to Computer Systems (systems)
- or CSCI 0330 Introduction to Computer Systems
- CSCI 0450 Introduction to Probability and Computing (math)
- CSCI 0510 Models of Computation (math)

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650/1660.

A capstone course: a one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

**Requirements for the Professional Track of the Sc.B. degree.**

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

**Applied Mathematics-Economics Concentration Requirements**

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

**Standard program for the A.B. degree (Advanced Economics track) - through the class of 2015:**

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part I
- MATH 0520 Linear Algebra

**Course Requirements:**

**Applied Math Requirements**
- APMA 0350 Methods of Applied Mathematics I, II
- APMA 0360 Methods of Applied Mathematics I, II
- APMA 0350 & APMA 0360 Methods of Applied Mathematics I, II (a)

Select one of the following:
- APMA 0160 Introduction to Scientific Computing
### Standard program for the Sc.B. degree (Advanced Economics track) - through the class of 2015:

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course requirements:**

**Applied Mathematics requirements:**

(a) 1
- APMA 0350 Methods of Applied Mathematics I, II 2
- & APMA 0360 and Methods of Applied Mathematics I, II 2

Select one of the following: 1
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1210 Operations Research: Deterministic Models
- APMA 1650 Statistical Inference I

(b) 1
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1210 Operations Research: Deterministic Models
- APMA 1650 Statistical Inference I

### Standard program for the A.B. degree (Mathematical Finance track) - through the class of 2015:

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Requirements:**

**Applied Mathematics requirements:**

(a) 1
- APMA 0350 Methods of Applied Mathematics I, II 2
- & APMA 0360 and Methods of Applied Mathematics I, II 2

Select one of the following: 1
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1210 Operations Research: Deterministic Models
- APMA 1650 Statistical Inference I

(b) 1
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1210 Operations Research: Deterministic Models
- APMA 1650 Statistical Inference I

---

1 No course may be used to simultaneously satisfy (a) and (b).
2 APMA 0330 and APMA 0340 may be substituted with advisor approval.
3 Or ECON 1110 with permission.

ECON 1860  The Theory of General Equilibrium
ECON 1870  Game Theory and Applications to Economics

Total Credits 15

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

Standard Program for the A.B. degree (Advanced Economics track) - class of 2016 and beyond:

Prerequisites:
- MATH 0100  Introductory Calculus, Part II
- MATH 0520  Linear Algebra

Course Requirements:

Applied Mathematics Requirements

(a) 1
- APMA 0350  Methods of Applied Mathematics I, II 2
- & APMA 0360  and Methods of Applied Mathematics I, II 2

Select one of the following:
- APMA 0160  Introduction to Scientific Computing (preferred)
- CSCI 0040  Introduction to Scientific Computing and Problem Solving (preferred)
- CSCI 0150  Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170  Computer Science: An Integrated Introduction

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1650  Statistical Inference I

(b) 1

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1660  Statistical Inference II
- APMA 1670  Statistical Analysis of Time Series
- APMA 1680  Nonparametric Statistics
- APMA 1690  Computational Probability and Statistics
- APMA 1700  The Mathematics of Insurance
- MATH 1010  Analysis: Functions of One Variable

Economics Requirements:
- ECON 1130  Intermediate Microeconomics (Mathematical) Or 1
  ECON 1110 with permission.
- ECON 1210  Intermediate Macroeconomics
- ECON 1630  Econometrics I

Two 1000-level courses from the "mathematical-economics" group: 2
- ECON 1170  Welfare Economics
- ECON 1225  Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465  Market Design: Theory and Applications
- ECON 1470  Bargaining Theory and Applications
- ECON 1640  Econometrics II
- ECON 1650  Financial Econometrics
- ECON 1750  Investments II
- ECON 1759  Data, Statistics, Finance
- ECON 1810  Economics and Psychology
- ECON 1820  Behavioral Economics
- ECON 1850  Theory of Economic Growth
- ECON 1860  The Theory of General Equilibrium
- ECON 1870  Game Theory and Applications to Economics

One 1000-level course from the "data methods" group: 1
- ECON 1305  Economics of Education: Research
- ECON 1310  Labor Economics
- ECON 1360  Health Economics
- ECON 1390  Research Methods for Economists
- ECON 1410  Urban Economics
- ECON 1510  Economic Development
- ECON 1520  The Economic Analysis of Institutions
- ECON 1530  Health, Hunger and the Household in Developing Countries
- ECON 1640  Econometrics II
- ECON 1650  Financial Econometrics
- ECON 1759  Data, Statistics, Finance
- ECON 1765  Finance, Regulation, and the Economy: Research

One additional 1000-level economics course 1

Total Credits 13

1 No course may be used to simultaneously satisfy (a) and (b).
2 APMA 0330 and APMA 0340 may be substituted with advisor approval.

Standard program for the Sc.B. degree (Advanced Economics track) - class of 2016 and beyond:

- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Honors and Capstone Requirement

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain the approval of a faculty sponsor.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs.
Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics Graduate Program

The department of Applied Mathematics offers graduate programs leading to the Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/applied-mathematics

Courses

APMA 0070. Introduction to Applied Complex Variables. Applications of complex analysis that do not require calculus as a prerequisite. Topics include algebra of complex numbers, plane geometry by means of complex coordinates, complex exponentials, and logarithms and their relation to trigonometry, polynomials, and roots of polynomials, conformal mappings, rational functions and their applications, finite Fourier series and the FFT, iterations and fractals. Uses MATLAB, which has easy and comprehensive complex variable capabilities.

APMA 0090. Introduction to Mathematical Modeling. We will explore issues of mathematical modeling and analysis. Five to six self-contained topics will be discussed and developed. The course will include seminars in which modeling issues are discussed, lectures to provide mathematical background, and computational experiments. Required mathematical background is knowledge of one-variable calculus, and no prior computing experience will be assumed.

APMA 0100. Elementary Probability for Applications. This course serves as an introduction to probability and stochastic processes with applications to practical problems. It will cover basic probability and stochastic processes such as basic concepts of probability and conditional probability, simple random walk, Markov chains, continuous distributions, Brownian motion and option pricing. Enrollment limited to 20 first year students. FYS

APMA 0120. Mathematics of Finance. The current volatility in international financial markets makes it imperative for us to become competent in financial calculations early in our liberal arts and scientific career paths. This course is designed to prepare the student with those elements of mathematics of finance appropriate for the calculations necessary in financial transactions.

APMA 0160. Introduction to Scientific Computing. For student in any discipline that may involve numerical computations. Includes instruction for programming in MATLAB. Applications discussed include solution of linear equations (with vectors and matrices) and nonlinear equations (by bisection, iteration, and Newton’s method), interpolation, and curve-fitting, difference equations, iterated maps, numerical differentiation and integration, and differential equations. Prerequisite: MATH 0100 or its equivalent.

APMA 0180. Modeling the World with Mathematics: An Introduction for Non-Mathematicians. Mathematics is the foundation of our technological society and most of its powerful ideas are quite accessible. This course will explain some of these using historical texts and Excel. Topics include the predictive power of ‘differential equations’ from the planets to epidemics, oscillations and music, chaotic systems, randomness and the atomic bomb. Prerequisite: some knowledge of calculus.

APMA 0330. Methods of Applied Mathematics I, II. Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0340. Methods of Applied Mathematics I, II. Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0350. Methods of Applied Mathematics I, II. Covers the same material as APMA 0330, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0360. Methods of Applied Mathematics I, II. Covers the same material as APMA 0340, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0410. Mathematical Methods in the Brain Sciences. Basic mathematical methods commonly used in the neural and cognitive sciences. Topics include: introduction to probability and statistics, emphasizing hypothesis testing and modern nonparametric methods; introduction to differential equations and systems of differential equations, emphasizing qualitative behavior and simple phase-plane analysis. Examples from neuroscience, cognitive science, and other sciences. Prerequisite: MATH 0100 or equivalent.

APMA 1070. Quantitative Models of Biological Systems. Quantitative dynamic models help understand problems in biology and there has been rapid progress in recent years. The course provides an introduction to the concepts and techniques, with applications to population dynamics, infectious diseases, enzyme kinetics, aspects
of cellular biology. Additional topics covered will vary. Mathematical techniques will be discussed as they arise in the context of biological problems. Prerequisites: APMA 0330, 0340 or 0350, 0360, or written permission.

APMA 1080. Inference in Genomics and Molecular Biology. Sequencing of genomes has generated a massive quantity of fundamental biological data. We focus on drawing traditional and Bayesian statistical inferences from these data, including: alignment of biopolymer sequences; prediction of their structures, regulatory signals; significances in database searches; and functional genomics. Emphasis is on inferences in the discrete high dimensional spaces. Statistical topics: Bayesian inference, estimation, hypothesis testing and false discovery rates, statistical decision theory. Prerequisite: APMA 1650 or MATH 1610; BIOL 0200 recommended; Matlab or programming experience. Enrollment limited to 20.

APMA 1170. Introduction to Computational Linear Algebra. Focuses on fundamental algorithms in computational linear algebra with relevance to all science concentrators. Basic linear algebra and matrix decompositions (Cholesky, LU, QR, etc.), round-off errors and numerical analysis of errors and convergence. Iterative methods and conjugate gradient techniques. Computation of eigenvalues and eigenvectors, and an introduction to least squares methods.

APMA 1210. Operations Research: Deterministic Models. An introduction to the basic mathematical ideas and computational methods of optimizing allocation of effort or resources, with or without constraints. Linear programming, network models, dynamic programming, and integer programming.

APMA 1260. Introduction to the Mechanics of Solids and Fluids. An introduction to the dynamics of fluid flow and deforming elastic solids for students in the physical or mathematical sciences. Topics in fluid mechanics include statics, simple viscous flows, inviscid flows, potential flow, linear wave waves, and acoustics. Topics in solid mechanics include elastic/plastic deformation, strain and stress, simple elastostatics, and elastic waves with reference to seismology. Offered in alternate years.

APMA 1360. Topics in Chaotic Dynamics. Overview and introduction to dynamical systems. Local and global theory of maps. Attractors and limit sets. Lyapunov exponents and dimensions. Fractals: definition and examples. Lorenz attractor, Hamiltonian systems, homoclinic orbits and Smale horseshoe orbits. Chaos in finite dimensions and in PDEs. Can be used to fulfill the senior seminar requirement in applied mathematics. Prerequisites: differential equations and linear algebra.

APMA 1650. Statistical Inference I. APMA 1650 begins an integrated first course in mathematical statistics. The first half of APMA 1650 covers probability and the last half is statistics, integrated with its probabilistic foundation. Specific topics include probability spaces, discrete and continuous random variables, methods for parameter estimation, confidence intervals, and hypothesis testing. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350.

APMA 1660. Statistical Inference II. APMA 1660 is designed as a sequel to APMA 1650 to form one of the alternative tracks for an integrated year's course in mathematical statistics. The main topic is linear models in statistics. Specific topics include likelihood-ratio tests, nonparametric tests, introduction to statistical computing, matrix approach to simple-linear and multiple regression, analysis of variance, and design of experiments. Prerequisite: APMA 1650 or equivalent, basic linear algebra.

APMA 1670. Statistical Analysis of Time Series. Time series analysis is an important branch of mathematical statistics with many applications to signal processing, econometrics, geology, etc. The course emphasizes methods for analysis in the frequency domain, in particular, estimation of the spectrum of time-series, but time domain methods are also covered. Prerequisites: elementary probability and statistics on the level of APMA 1650-1660.

APMA 1680. Nonparametric Statistics. A systematic treatment of distribution-free alternatives to classical statistical tests. These nonparametric tests make minimum assumptions about distributions governing the generation of observations, yet are of nearly equal power to the classical alternatives. Prerequisite: APMA 1650 or equivalent. Offered in alternate years.

APMA 1690. Computational Probability and Statistics. Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, dimensionality reduction. Suggested prerequisite: calculus-based probability. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or equivalent placement.

APMA 1700. The Mathematics of Insurance. The course consists of two parts: the first treats life contingencies, i.e. the construction of models for individual life insurance contracts. The second treats the Collective Theory of Risk, which constructs mathematical models for the insurance company and its portfolio of policies as a whole. Suitable also for students proceeding to the Institute of Actuaries examinations. Prerequisites: Probability Theory to the level of APMA 1650 or MATH 1610.

APMA 1710. Information Theory. Information theory is the study of the fundamental limits of information transmission and storage. This course, intended primarily for advanced undergraduates and beginning graduate students, offers a broad introduction to information theory and its applications: Entropy and information, lossless data compression, communication in the presence of noise, channel capacity, channel coding, source-channel separation, lossy data compression. Prerequisite: one course in probability.

APMA 1720. Monte Carlo Simulation with Applications to Finance. The course will cover the basics of Monte Carlo and its applications to financial engineering: generating random variables and simulating stochastic processes; analysis of simulated data; variance reduction techniques; binomial trees and option pricing; Black-Scholes formula; portfolio optimization; interest rate models. The course will use MATLAB as the standard simulation tool. Prerequisites: APMA 1650 or MATH 1610

Banded, sparse, non-negative and circulant matrices. Prerequisite: APMA 0340 or 0360, or MATH 0520 or 0540, or permission of the instructor.

**APMA 1930A. Actuarial Mathematics.**
A seminar considering selected topics from two fields: (1) life contingencies—the study of the valuation of life insurance contracts; and (2) collective risk theory, which is concerned with the random process that generates claims for a portfolio of policies. Topics are chosen from *Actuarial Mathematics*, 2nd ed., by Bowers, Gerber, Hickman, Jones, and Nesbitt. Prerequisite: knowledge of probability theory to the level of APMA 1650 or MATH 1610. Particularly appropriate for students planning to take the examinations of the Society of Actuaries.

**APMA 1930B. Computational Probability and Statistics.**
Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from: random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, probabilistic grammars.

**APMA 1930C. Information Theory.**
Information theory is the mathematical study of the fundamental limits of information transmission (or coding) and storage (or compression). This course offers a broad introduction to information theory and its real-world applications. A subset of the following is covered: entropy and information; the asymptotic equipartition property; theoretical limits of lossless data compression and practical algorithms; communication in the presence of noise-channel coding, channel capacity; source-channel separation; Gaussian channels; Lossy data compression.

**APMA 1930D. Mixing and Transport in Dynamical Systems.**
Mixing and transport are important in several areas of applied science, including fluid mechanics, atmospheric science, chemistry, and particle dynamics. In many cases, mixing seems highly complicated and unpredictable. We use the modern theory of dynamical systems to understand and predict mixing and transport from the differential equations describing the physical process in question. Prerequisites: APMA 0330, 0340, or APMA 0350, 0360.

**APMA 1930E. Ocean Dynamics.**
Works through the popular book by Henry Stommel entitled *A View of the Sea*. Introduces the appropriate mathematics to match the physical concepts introduced in the book.

**APMA 1930G. The Mathematics of Sports.**
Topics to be discussed will range from the determination of who won the match, through biomechanics, free-fall of flexible bodies and aerodynamics, to the flight of ski jumpers and similar unnatural phenomena. Prerequisite: APMA 0340 or equivalent, or permission of the instructor.

**APMA 1930H. Scaling and Self-Similarity.**
The themes of scaling and self-similarity provide the simplest, and yet the most fruitful description of complicated forms in nature such as the branching of trees, the structure of human lungs, rugged natural landscapes, and turbulent fluid flows. This seminar is an investigation of some of these phenomena in a self-contained setting requiring little more mathematical background than high school algebra. Topics to be covered: Dimensional analysis; empirical laws in biology, geosciences, and physics and the interplay between scaling and function; an introduction to fractals; social networks and the "small world" phenomenon.

**APMA 1930I. Random Matrix Theory.**
In the past few years, random matrices have become extremely important in a variety of fields such as computer science, physics and statistics. They are also of basic importance in various areas of mathematics. This class will serve as an introduction to this area. The focus is on the basic matrix ensembles and their limiting distributions, but several applications will be considered. Prerequisites: MATH 0200 or 0350; and MATH 0520 or 0540; and APMA 0350, 0360, 1650, and 1660. APMA 1170 and MATH 1010 are recommended, but not required.

**APMA 1930J. Mathematics of Random Networks.**
An intro to the emerging field of random networks and a glimpse of some of the latest developments. Random networks arise in a variety of applications including statistics, communications, physics, biology and social networks. They are studied using methods from a variety of disciplines ranging from probability, graph theory and statistical physics to nonlinear dynamical systems. Describes elements of these theories and shows how they can be used to gain practical insight into various aspects of these networks including their structure, design, distributed control and self-organizing properties. Prerequisites: Advanced calculus, basic knowledge of probability. Enrollment limited to 40.

**APMA 1930L. Fast Methods in Scientific Computing.**
Description to be announced.

**APMA 1940A. Coding and Information Theory.**
In a host of applications, from satellite communication to compact disc technology, the storage, retrieval, and transmission of digital data relies upon the theory of coding and information for efficient and error-free performance. This course is about choosing representations that minimize the amount of data (compression) and the probability of an error in data handling (error-correcting codes). Prerequisite: A knowledge of basic probability theory at the level of APMA 1650 or MATH 1610.

**APMA 1940B. Information and Coding Theory.**
Originally developed by C.E. Shannon in the 1940s for describing bounds on information rates across telecommunication channels, information and coding theory is now employed in a large number of disciplines for modeling and analysis of problems that are statistical in nature. This course provides a general introduction to the field. Main topics include entropy, error correcting codes, source coding, data compression. Of special interest will be the connection to problems in pattern recognition. Includes a number of projects relevant to neuroscience, cognitive and linguistic sciences, and computer vision. Prerequisites: High school algebra, calculus, MATLAB or other computer experience helpful. Prior exposure to probability theory/statistics helpful.

**APMA 1940C. Introduction to Mathematics of Fluids.**
Equations that arise from the description of fluid motion are born in physics, yet are interesting from a more mathematical point of view as well. Selected topics from fluid dynamics introduce various problems and techniques in the analysis of partial differential equations. Possible topics include stability, existence and uniqueness of solutions, variational problems, and active scalar equations. No prior knowledge of fluid dynamics is necessary.

**APMA 1940D. Iterative Methods.**
Large, sparse systems of equations arise in many areas of mathematical application and in this course we explore the popular numerical solution techniques being used to efficiently solve these problems. Throughout the course we will study precondditioning strategies, Krylov subspace acceleration methods, and other projection methods. In particular, we will develop a working knowledge of the Conjugate Gradient and Minimum Residual (and Generalized Minimum Residual) algorithms. Multigrid and Domain Decomposition Methods will also be studied as well as parallel implementation, if time permits.

**APMA 1940E. Mathematical Biology.**
This course is designed for undergraduate students in mathematics who have an interest in the life sciences. No biological experience is necessary, as we begin by a review of the relevant topics. We then examine a number of case studies where mathematical tools have been successfully applied to biological systems. Mathematical subjects include differential equations, topology and geometry.

**APMA 1940F. Mathematics of Physical Plasmas.**
Plasmas can be big, as in the solar wind, or small, as in fluorescent bulbs. Both kinds are described by the same mathematics. Similar mathematics describes semiconductor materials, the movement of galaxies, and the re-entry of satellites. We consider how all of these physical systems describes semiconducting materials, the movement of galaxies, and the re-entry of satellites. We consider how all of these physical systems.

**APMA 1940G. Multigrid Methods.**
Multigrid methods are a very active area of research in Applied Mathematics. An introduction to these techniques will expose the student to cutting-edge mathematics and perhaps pique further interest in the field of scientific computation.
APMA 1940H. Numerical Linear Algebra.
The course will deal with advanced concepts in numerical linear algebra. Among the topics covered: Singular Value Decompositions (SVD) QR factorization, Conditioning and Stability and Iterative Methods.

APMA 1940I. The Mathematics of Finance.
The mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis placed on the evaluation of risk and its role in decision-making under uncertainty. Prerequisite: basic probability.

APMA 1940J. The Mathematics of Speculation.
The course will deal with the mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis will be placed on the evaluation of risk and its role in decision making under uncertainty. Prerequisite: basic probability.

APMA 1940K. Fluid Dynamics and Physical Oceanography.
Introduction to fluid dynamics as applied to the mathematical modeling and simulation of ocean dynamics and near-shore processes. Oceanography topics include: overview of atmospheric and thermal forcing of the oceans, ocean circulation, effects of topography and Earth’s rotation, wind-driven currents in upper ocean, coastal upwelling, the Gulf Stream, tidal flows, wave propagation, tsunamis.

APMA 1940L. Mathematical Models in Biophysics.
Introduction to reaction models for biomolecules, activation and formation of macro-molecules, stochastic simulation methods such as Langevin models and Brownian dynamics. Applications to blood flow, platelet aggregation, and interactions of cells with blood vessel walls.

APMA 1940M. The History of Mathematics.
The course will not be a systematic survey but will focus on specific topics in the history of mathematics such as Archimedes and integration. Oresme and graphing, Newton and infinitesimals, simple harmonic motion, the discovery of 'Fourier' series, the Monte Carlo method, reading and analyzing the original texts. A basic knowledge of calculus will be assumed.

APMA 1940N. Introduction to Mathematical Models in Computational Biology.
This course is designed to introduce students to the use of mathematical models in biology as well as some more recent topics in computational biology. Mathematical techniques will involve difference equations and dynamical systems theory, ordinary differential equations and some partial differential equations. These techniques will be applied in the study of many biological applications such as: (i) Difference Equations: population dynamics, red blood cell production, population genetics; (ii) Ordinary Differential Equations: predator-prey models, Lotka-Volterra model, modeling the evolution of the genome, heart beat model/cycle, transmission dynamics of HIV and gonorrhea; (iii) Partial Differential Equations: tumor growth, modeling evolution of the genome, pattern formation. Prerequisites: APMA 0330 and 0340.

APMA 1940O. Approaches to Problem Solving in Applied Mathematics.
The aim of the course is to illustrate through the examination of unsolved (but elementary) problems the ways in which professional applied mathematicians approach the solution of such questions. Ideas considered include: choosing the "simplest" nontrivial example; generalization; and specification. Ways to think outside convention. Some knowledge of probability and linear algebra helpful.

Suggested reading.
"How to solve it", G. Polya
"Nonplussed", Julian Havil

APMA 1940P. Biodynamics of Block Flow and Cell Locomotion.

APMA 1940Q. Filtering Theory.
Filtering (estimation of a state process” from noisy data) is an important area of modern statistics. It is of central importance in navigation, signal and image processing, control theory and other areas of engineering and science. Filtering is one of the exemplary areas where the application of modern mathematics and statistics leads to substantial advances in engineering. This course will provide a student with the working knowledge sufficient for cutting edge research in the field of nonlinear filtering and its practical applications. Topics will include: hidden Markov models, Kalman and Wiener filters, optimal nonlinear filtering, elements of Itô calculus and Wiener chaos, Zakai and Kushner equations, spectral separating filters and wavelet based filters, numerical implementation of filters. We will consider numerous applications of filtering to speech recognition, analysis of financial data, target tracking and image processing. No prior knowledge in the field is required but a good understanding of the basic Probability Theory (APMA1200 or APMA2630) is important.

APMA 1940R. Linear and Nonlinear Waves.
From sound and light waves to water waves and traffic jams, wave phenomena are everywhere around us. In this seminar, we will discuss linear and nonlinear waves as well as the propagation of wave packets. Among the tools we shall use and learn about are numerical simulations in Matlab and analytical techniques from ordinary and partial differential equations. We will also explore applications in nonlinear optics and to traffic flow problems. Prerequisites: MATH 0180 and either APMA 0330-0340 or APMA 0350-0360. No background in partial differential equations is required.

Description to be announced.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

APMA 2110. Real Analysis.
Provides the basis of real analysis which is fundamental to many of the other courses in the program: metric spaces, measure theory, and the theory of integration and differentiation.

Please note: for fall 2013, interested students must register for MATH 2210.

APMA 2120. Hilbert Spaces and Their Applications.
A continuation of APMA 2110: metric spaces, Banach spaces, Hilbert spaces, the spectrum of bounded operators on Banach and Hilbert spaces, compact operators, applications to integral and differential equations.

Please note: for spring 2014, interested students must register for MATH 2220.

Solution methods and basic theory for first and second order partial differential equations. Geometrical interpretation and solution of linear and nonlinear first order equations by characteristics; formation of caustics and propagation of discontinuities. Classification of second order equations and issues of well-posed problems. Green’s functions and maximum principles for elliptic systems. Characteristic methods and discontinuous solutions for hyperbolic systems.

Calculus of asymptotic expansions, evaluation of integrals. Solution of linear ordinary differential equations in the complex plane, WKB method, special functions.
Topics vary according to interest of instructor and class.

APMA 2210. Topics in Nonlinear Dynamical Systems.  
Topics to be covered in this course may vary depending on the audiences. One of the goals that is planned for this course is to discuss the boundary layers and the boundary value problems that appear and play a very important role in the kinetic theory of gases; in particular, in the theory of the Boltzmann equations. Students are encouraged to attend and participate in the kinetic theory program offered by the ICERM institute in the Fall 2011 semester. This course may be taken twice for credit.

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

APMA 2260. Introduction to Stochastic Control Theory.  
The course serves as an introduction to the theory of stochastic control and dynamic programming technique. Optimal stopping, total expected (discounted) cost problems, and long-run average cost problems will be discussed in discrete time setting. The last part of the course deals with continuous time deterministic control and game problems. The course requires some familiarity with the probability theory.

APMA 2410. Fluid Dynamics I.  
Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory: the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

APMA 2420. Fluid Dynamics II.  
Course covers concepts and techniques relevant to fluid dynamics research for both high and low Reynolds number flows together with an introduction to the dynamics of complex fluids. Topics covered include: boundary layers and secondary flows, perturbation methods, flow stability and transition phenomena, surface tension effects, mixing and dispersion, overview of suspension flows and non-Newtonian fluids. Prerequisite: APMA 2410, ENGN 2810 or equivalent.

Please note: for spring 2014, interested students must register for ENGN 2820.

APMA 2450. Exchange Scholar Program.

APMA 2470. Topics in Fluid Dynamics.  
Initial review of topics selected from flow stability, turbulence, turbulent mixing, surface tension effects, and thermal convection. Followed by focused and attention on the dynamics of dispersed two-phase flow and complex fluids.

APMA 2480. Topics in Fluid Dynamics.  
No description available.

Finite difference methods for solving time-dependent initial value problems of partial differential equations. Fundamental concepts of consistency, accuracy, stability and convergence of finite difference methods will be covered. Associated well-posedness theory for linear time-dependent PDEs will also be covered. Some knowledge of computer programming expected.

APMA 2560. Numerical Solution of Partial Differential Equations II.  
An introduction to weighted residual methods, specifically spectral, finite element and spectral element methods. Topics include a review of variational calculus, the Rayleigh-Ritz method, approximation properties of spectral end finite element methods, and solution techniques. Homework will include both theoretical and computational problems.

APMA 2570A. Numerical Solution of Partial Differential Equations III.  
We will cover spectral methods for partial differential equations. Algorithm formulation, analysis, and efficient implementation issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2570B. Numerical Solution of Partial Differential Equations III.  
We will cover finite element methods for ordinary differential equations and for elliptic, parabolic and hyperbolic partial differential equations. Algorithm development, analysis, and computer implementation issues will be addressed. In particular, we will discuss in depth the discontinuous Galerkin finite element method. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2580A. Computational Fluid Dynamics.  
An introduction to computational fluid dynamics with emphasis on compressible flows. We will cover finite difference, finite volume and finite element methods for compressible Euler and Navier-Stokes equations and for general hyperbolic conservation laws. Background material in hyperbolic partial differential equations will also be covered. Algorithm development, analysis, implementation and application issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2580B. Computational Fluid Dynamics.  
An introduction to computational fluid dynamics with emphasis on compressible flows. We will cover finite difference, finite volume and finite element methods for compressible Euler and Navier-Stokes equations and for general hyperbolic conservation laws. Background material in hyperbolic partial differential equations will also be covered. Algorithm development, analysis, implementation and application issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2610. Recent Applications of Probability and Statistics.  
This is a topics course, covering a selection of modern applications of probability and statistics in the computational, cognitive, engineering, and neural sciences. The course will be rigorous, but the emphasis will be on application. Topics will likely include: Markov chains and their applications to MCMC computing and hidden Markov models; Dependency graphs and Bayesian networks; parameter estimation and the EM algorithm; Nonparametric statistics ("learning theory"), including consistency, bias/variance tradeoff, and regularization; Gibbs distributions, maximum entropy, and their connections to large deviations. Each topic will be introduced with several lectures on the mathematical underpinnings, and concluded with a computer project, carried out by each student individually, demonstrating the mathematics and the utility of the approach.
A one-semester course that provides an introduction to probability theory based on measure theory. The course covers the following topics: probability spaces, random variables and measurable functions, independence and infinite product spaces, expectation and conditional expectation, weak convergence of measures, laws of large numbers and the Central Limit Theorem, discrete time martingale theory and applications.

A one-semester course in probability that provides an introduction to stochastic processes. The course covers the following subjects: Markov chains, Poisson process, birth and death processes, continuous-time martingales, optional sampling theorem, martingale convergence theorem, Brownian motion, introduction to stochastic calculus and Ito’s formula, stochastic differential equations, the Feynman-Kac formula, Girsanov’s theorem, the Black-Scholes formula, basics of Gaussian and stationary processes. Prerequisite: APMA 2630 or equivalent course.

APMA 2660. Stochastic Processes.  
Review of the theory of stochastic differential equations and reflected SDEs, and of the ergodic and stability theory of these processes. Introduction to the theory of weak convergence of probability measures and processes. Concentrates on applications to the probabilistic modeling, control, and approximation of modern communications and queuing networks; emphasizes the basic methods, which are fundamental tools throughout applications of probability.

APMA 2670. Mathematical Statistics I.  
This course presents advanced statistical inference methods. Topics include: foundations of statistical inference and comparison of classical, Bayesian, and minimax approaches, point and set estimation, hypothesis testing, linear regression, linear classification and principal component analysis, MRF, consistency and asymptotic normality of Maximum Likelihood and estimators, statistical inference from noisy or degraded data, and computational methods (E-M Algorithm, Markov Chain Monte Carlo, Bootstrap). Prerequisite: APMA 2630 or equivalent.

APMA 2680. Mathematical Statistics II.  
The course covers modern nonparametric statistical methods. Topics include: density estimation, multiple regression, adaptive smoothing, cross-validation, bootstrap, classification and regression trees, nonlinear discriminant analysis, projection pursuit, the ACE algorithm for time series prediction, support vector machines, and neural networks. The course will provide the mathematical underpinnings, but it will also touch upon applications in computer vision/speech recognition, and biological, neural, and cognitive sciences. Prerequisite: APMA 2670.

APMA 2720. Information Theory.  

APMA 2810A. Computational Biology.  
Provides an up-to-date presentation of the main problems and algorithms in bioinformatics. Emphasis is given to statistical/probabilistic methods for various molecular biology tasks, including: comparison of genomes of different species, finding genes and motifs, understanding transcription control mechanisms, analyzing microarray data for gene clustering, and predicting RNA structure.

APMA 2810B. Computational Molecular Biology.  
Provides an up-to-date presentation of problems and algorithms in bioinformatics, beginning with an introduction to biochemistry and molecular genetics. Topics include: proteins and nucleic acids, the genetic code, the central dogma, the genome, gene expression, metabolic transformations, and experimental methods (gel electrophoresis, X-ray crystallography, NMR). Also, algorithms for DNA sequence alignment, database search tools (BLAST), and DNA sequencing.

No description available.

APMA 2810D. Elements of High Performance Scientific Computing II.  
No description available.

APMA 2810E. Far Field Boundary Conditions for Hyperbolic Equations.  
No description available.

APMA 2810F. Introduction to Non-linear Optics.  
No description available.

APMA 2810G. Large Deviations.  
No description available.

APMA 2810H. Math of Finance.  
No description available.

APMA 2810I. Mathematical Models and Numerical Analysis in Computational Quantum Chemistry.  
We shall present on some models in the quantum chemistry field (Thomas Fermi and related, Hartree Fock, Kohn Sham) the basic tools of functional analysis for the study of their solutions. Then some of the discretization methods and iterative algorithms to solve these problems will be presented and analyzed. Some of the open problems that flourish in this field will also be presented all along the lectures.

APMA 2810J. Mathematical Techniques for Neural Modeling.  
No description available.

APMA 2810K. Methods of Algebraic Geometry in Control Theory I.  
Develops the ideas of algebraic geometry in the context of control theory. The first semester examines scalar linear systems and affine algebraic geometry while the second semester addresses multivariable linear systems and projective algebraic geometry.

APMA 2810L. Numerical Solution of Hyperbolic PDE’s.  
No description available.

APMA 2810M. Some Topics in Kinetic Theory.  
Nonlinear instabilities as well as boundary effects in a collisionless plasmas; Stable galaxy configurations; A nonlinear energy method in the Boltzmann theory will also be introduced. Self-contained solutions to specific concrete problems. Focus on ideas but not on technical aspects. Open problems and possible future research directions will then be discussed so that students can gain a broader perspective. Prerequisite: One semester of PDE (graduate level) is required.

APMA 2810N. Topics in Nonlinear PDEs.  
Aspects of the theory on nonlinear evolution equations, which includes kinetic theory, nonlinear wave equations, variational problems, and dynamical stability.

APMA 2810O. Stochastic Differential Equations.  
This course develops the theory and some applications of stochastic differential equations. Topics include: stochastic integral with respect to Brownian motion, existence and uniqueness for solutions of SDEs, Markov property of solutions, sample path properties, Girsanov’s Theorem, weak existence and uniqueness, and connections with partial differential equations. Possible additional topics include stochastic stability, reflected diffusions, numerical approximation, and stochastic control. Prerequisite: APMA 2630 and 2640.

APMA 2810P. Perturbation Methods.  
Basic concepts of asymptotic approximations with examples with examples such as evaluation of integrals and functions. Regular and singular perturbation problems for differential equations arising in fluid mechanics, wave propagation or nonlinear oscillators. Methods include matched asymptotic expansions and multiple scales. Methods and results will be discussed in the context of applications to physical problems.

APMA 2810Q. Discontinuous Galerkin Methods.  
In this seminar course we will cover the algorithm formulation, stability analysis and error estimates, and implementation and applications of discontinuous Galerkin finite element methods for solving hyperbolic conservation laws, convection diffusion equations, dispersive wave equations, and other linear and nonlinear partial differential equations. Prerequisite: APMA 2550.
APMA 2810R. Computational Biology Methods for Gene/Protein Networks and Structural Proteomics
The course presents computational and statistical methods for gene and protein networks and structural proteomics; it emphasizes: (1) Probabilistic models for gene regulatory networks via microarray, chromatin immunoprecipitation, and cis-regulatory data; (2) Signal transduction pathways via tandem mass spectrometry data; (3) Molecular Modeling for ligand-receptor coupling and docking. The course is recommended for graduate students.

APMA 2810S. Topics in Control
No description available.

APMA 2810T. Nonlinear Partial Differential Equations
This course introduces techniques useful for solving many nonlinear partial differential equations, with emphasis on elliptic problems. PDE from a variety of applications will be discussed. Contact the instructor about prerequisites.

APMA 2810U. Topics in Differential Equations
No description available.

APMA 2810V. Topics in Partial Differential Equations
The course will cover an introduction of the L_p theory of second order elliptic and parabolic equations, finite difference approximations of elliptic and parabolic equations, and some recent developments in the Navier-Stokes equations and quasi-geostrophic equations. Some knowledge of real analysis will be expected.

APMA 2810W. Advanced Topics in High Order Numerical Methods for Convection Dominated Problems
This is an advanced seminar course. We will cover several topics in high order numerical methods for convection dominated problems, including methods for solving Boltzmann type equations, methods for solving unsteady and steady Hamilton-Jacobi equations, and methods for solving moment models in semi-conductor device simulations. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

APMA 2810X. Introduction to the Theory of Large Deviations
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, PDE, weak convergence, etc.), and basic examples (e.g., Sanov’s and Cramer’s Theorems). We will then cover the Wentsel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control and Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

APMA 2810Y. Discrete high-D Inferences in Genomics
Genomics is revolutionizing biology and biomedicine and generated a mass of clearly relevant high-D data along with many important high-D processes. The course will begin with a review of the general framework, standard techniques (change-of-measure, PDE, weak convergence, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We will then cover the Wentsel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control and Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

APMA 2810Z. An Introduction to the Theory of Large Deviations
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We will then cover large deviations for diffusion processes and the Wentsel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

APMA 2811A. Directed Methods in Control and System Theory
Various general techniques have been developed for control and system problems. Many of the methods are indirect. For example, control problems are reduced to a problem involving a differential equation (such as the partial differential equation of Dynamic Programming) or to a system of differential equations (such as the canonical system of the Maximum Principle). Since these indirect methods are not always effective alternative approaches are necessary. In particular, direct methods are of interest. We deal with two general classes, namely: 1) Integration Methods; and, 2) Representation Methods. Integration methods deal with the integration of function space differential equations; Perhaps the most familiar is the so-called Gradient Method or curve of steepest descent approach. Representation methods utilize approximation in function spaces and include both deterministic and stochastic finite element methods. Our concentration will be on the theoretical development and less on specific numerical procedures. The material on representation methods for Levy processes is new.

APMA 2811B. Computational Methods for Signaling Pathways and Protein Interactions
This course will provide presentation of the biology and mathematical models/algorithms for a variety of topics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs and structural aspects of protein docking problems. Prerequisites: The course is recommended for graduate students. It will be self-contained; students will be able to fill in knowledge by reading material to be indicated by the instructor.

APMA 2811C. Stochastic Partial Differential Equations
SPDEs is an interdisciplinary area at the crossroads of stochastic processes and partial differential equations (PDEs). The topics of the course include: geneses of SPDEs in real life applications, mathematical foundations and analysis of SPDEs, numerical and computational aspects of SPDEs, applications of SPDEs to fluid dynamics, population biology, hidden Markov models, etc. Prerequisites: familiarity with stochastic calculus and PDEs (graduate level).

APMA 2811D. Asymptotic Problems For Differential Equations And Stochastic Processes.
Topics that will be covered include: WKB method: zeroth and first orders; turning points; Perturbation theory: regular perturbation, singular perturbation and boundary layers; Homogenization methods for ODE’s, elliptic and parabolic PDE’s; Homogenization for SDE’s, diffusion processes in periodic and random media; Averaging principle for ODE’s and SDE’s. Applications will be discussed in class and in homework problems.

APMA 2811E. A Posteriori Estimates for Finite Element Methods
The course gives an introduction to the the basic concepts of a posteriori estimates of finite element methods. After an overview of different techniques the main focus will be on residual based estimates where as a starting point the Laplace operator is analyzed. Effectivity and reliability of the error estimator will be proven. In a second part of the course, students will either study research articles and present them or implement the error estimates for some specific problem and present their numerical results. Recommended prerequisites: basic knowledge in finite elements, APMA 2550, 2560, 2570.

APMA 2811F. Numerical Solution of Ordinary Differential Equations: IVP Problems and PDE Related Issues
The purpose of the course is to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods). We shall also discuss efficient implementation strategies using Newton-type methods and hybrid techniques such as Rosenbruck methods. The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. Time permitting, we shall also discuss more specialized topics such as symplectic integration methods and parallel-in-time methods. A key component of the course shall be the discussion of problems and methods designed with the discretization of ODE systems originating from PDE’s in mind. Topics include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods. Part of the class will consist of student presentations on more advanced topics, summarizing properties and known results based on reading journal papers.
APMA 2811G. Topics in Averaging and Metastability with Applications.
Topics that will be covered include: the averaging principle for stochastic dynamical systems and in particular for Hamiltonian systems; metastability and stochastic resonance. We will also discuss applications in class and in homework problems. In particular we will consider metastability issues arising in chemistry and biology, e.g. in the dynamical behavior of proteins. The course will be largely self contained, but a course in graduate probability theory and/or stochastic calculus will definitely help.

APMA 2811H. Survival Analysis.

APMA 2811I. An Introduction to Turbulence Modeling.
Turbulence is the last mystery of classical physics. It surrounds us everywhere – in the air, in the ocean, in pipes carrying fluids and even in human body arteries. The course helps to understand what makes modeling the turbulence so difficult and challenging. The course covers the following issues: The nature of turbulence, characteristics of turbulence and classical constants of turbulence; Turbulent scales; Navier-Stokes equations, Reynolds stresses and Reynolds-Averaged Navier-Stokes (RANS) equations; RANS turbulence models: algebraic models, one-equation models, two-equation models; Low-Reynolds number turbulence models; Renormalization Group (RNG) turbulence model; Large-Eddy Simulation (LES); Students will be provided with user-friendly computer codes to run different benchmark cases. The final grade is based on two take home projects - computing or published papers analysis, optionally.

APMA 2811K. Computational/Statistical Methods for Signaling Pathways and Protein Interactions.
The course will cover the main mathematical/computational models/ algorithms for a variety of tasks in proteomics and structural proteomics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs, and (3) structural aspects of protein docking problems on the basis of NMR data. Open to graduate students only.

APMA 2811L. Topics in Homogenization: Theory and Computation.
Topics that will be covered include: Homogenization methods for ODE's, for elliptic and parabolic PDE's and for stochastic differential Equations (SDE's) in both periodic and random media; Averaging principle for ODE's and SDE's. Both theoretical and computational aspects will be studied. Applications will be discussed in class and in homework problems. Prerequisites: Some background in PDE's and probability will be helpful, even though the class will be largely self contained.

APMA 2811M. Dynamics and Stochastics.
This course seeks to lay the foundations of discrete and continuous deterministic and stochastic dynamical systems in a single integrated course, with illustrative examples provided from a variety of fields including biology, physics and engineering. Topics that will be covered include discrete one-dimensional maps and recursive distributional equations, ordinary and stochastic differential equations, deterministic and stochastic stability and Lyapunov functions, and stochastic resonance. Prerequisite: One graduate course in probability theory (based on measure theory).

APMA 2811P. Topics in Kinetic Theory.
Description to be announced.

APMA 2811Q. Calculus of Variations.
An introduction to modern techniques in the calculus of variations. Topics covered will include: existence of solutions and the direct method, Euler-Lagrange equations and necessary and sufficient conditions, one-dimensional problems, multidimensional nonconvex problems, relaxation and quasiconvexity, Young’s measures, and singular perturbations. The emphasis of the course will be equal parts theory and applications with numerous examples drawn from topics in nonlinear elasticity, pattern formation, wrinkling thin elastic sheets, martensitic phase transitions, minimal surfaces, differential geometry and optimal control.

APMA 2820A. A Tutorial on Particle Methods.
No description available.

APMA 2820B. Advanced Topics in Information Theory.
Explores classical and recent results in information theory. Topics chosen from: multi-terminal/network information theory; communication under channel uncertainty; side information problems (channel, source, and the duality between them); identification via channels; and multi-antenna fading channels. Prerequisite: APMA 1710 or basic knowledge of information theory.

APMA 2820C. Computational Electromagnetics.
No description available.

APMA 2820D. Conventional, Real and Quantum Computing with Applications to Factoring and Root Finding.
No description available.

APMA 2820E. Geophysical Fluid Dynamics.
No description available.

APMA 2820F. Information Theory and Networks.
No description available.

APMA 2820G. Information Theory, Statistics and Probability.
No description available.

APMA 2820H. Kinetic Theory.
We will focus on two main topics in mathematical study of the kinetic theory: (1) The new goal method to study the trend to Maxwellians; (2) various hydrodynamical (fluids) limits to Euler and Navier-Stokes equations. Main emphasis will be on the ideas behind proofs, but not on technical details.

APMA 2820I. Multiscale Methods and Computer Vision.
The course will address some basic multiscale computational methods such as: multigrid solvers for physical systems, including both geometric and algebraic multigrid, fast integral transforms of various kinds (including a fast Radon transform), and fast inverse integral transforms. Basic problems in computer vision such as global contour detection and their completion over gaps, image segmentation for textural images and perceptual grouping tasks in general will be explained in more details.

APMA 2820J. Numerical Linear Algebra.
Solving large systems of linear equations: The course will use the text of Treften and BAO that includes all the modern concepts of solving linear equations.

We discuss the construction and general theory of multistep and multistage methods for numerically solving systems of ODE’s, including stiff and nonlinear problems. Different notions to stability and error estimation and control. As time permits we shall discuss more advanced topics such as order reduction, general linear and additive methods, symplectic methods, and methods for DAE. Prerequisites: APMA 2190 and APMA 2550 or equivalent. Some programming experience is expected.

APMA 2820L. Random Processes in Mechanics.
No description available.

APMA 2820M. Singularities in Elliptic Problems and their Treatment by High-Order Finite Element Methods.
Singular solutions for elliptic problems (elasticity and heat transfer) are discussed. These may arise around corners in 2-D and along edges and vertices in 3-D domains. Derivation of singular solutions, characterized by eigenpairs and generalized stress/flux intensity factors (GSIF/GFIFs) are a major engineering importance (because of failure initiation and propagation). High-order FE methods are introduced, and special algorithms for extracting eigenpairs and GSIF/GFIFs are studied (Steklov, dual-function, ERR method, and others).

APMA 2820N. Topics in Scientific Computing.
No description available.

APMA 2820O. The Mathematics of Shape with Applications to Computer Vision.
Methods of representing shape, the geometry of the space of shapes, warping and matching of shapes, and some applications to problems in computer vision and medical imaging. Prerequisite: See instructor for prerequisites.
APMA 2820P. Foundations in Statistical Inference in Molecular Biology
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and functional genomics. Statistical topics: parameter estimation, hypothesis testing, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

APMA 2820Q. Topics in Kinetic Theory
This course will introduce current mathematical study for Boltzmann equation and Vlasov equation. We will study large time behavior and hydrodynamic limits for Boltzmann theory and instabilities in the Vlasov theory. Graduate PDE course is required.

APMA 2820R. Structure Theory of Control Systems
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

APMA 2820S. Topics in Differential Equations
A sequel to APMA 2210 concentrating on similar material.

APMA 2820T. Foundations in Statistical Inference in Molecular Biology
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment. RNA secondary structure prediction, database search, and tiled arrays. Statistical topics: parameter estimation, hypothesis testing, recursions, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

APMA 2820U. Structure Theory of Control Systems
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

APMA 2820V. Progress in the Theory of Shock Waves
Course begins with self-contained introduction to theory of “hyperbolic conservation laws”, that is quasilinear first order systems of partial differential equations whose solutions spontaneously develop singularities that propagate as shock waves. A number of recent developments will be discussed. Aim is to familiarize the students with current status of the theory as well as with the expanding areas of applications of the subject.

APMA 2820W. An Introduction to the Theory of Large Deviations
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentzel-Kramers-Brillouin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitivity control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

APMA 2820X. Boundary Conditions for Hyperbolic Systems: Numerical and Far Field

APMA 2820Y. Approaches to Problem Solving in Applied Mathematics
TBA

APMA 2820Z. Topics in Discontinuous Galerkin Methods.
We will cover discontinuous Galerkin methods for time-dependent and steady state problems. Stability and error estimates of different discontinuous Galerkin methods will be discussed. In particular, we will discuss in depth the local discontinuous Galerkin method. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

APMA 2821A. Parallel Scientific Computing: Algorithms and Tools
No description available.

APMA 2821B. To Be Determined.

APMA 2821C. Topics in Partial Differential Equations
The course will start by reviewing the theory of elliptic and parabolic equations in Holder spaces. Then we will discuss several topics in nonlinear elliptic and parabolic equations, for instance, the Navier-Stokes equation and Monge-Ampere type equations. This course is a sequel to APMA 2810V, but APMA 2810V is not a prerequisite.

APMA 2821D. Random Processes and Random Variables

APMA 2821E. Topics in Variational Methods
This course consists of two parts: a general introduction to variational methods in PDE, and a more focused foray into some special topics. For the former we will cover the direct method in the calculus of variations, various notions of convexity, Noether’s theorem, minimax methods, index theory, and gamma-convergence. For the latter we will focus on several specific problems of recent interest, with emphasis on the Ginzburg-Landau energy functional.

APMA 2821F. Computational Linear Algebra

APMA 2821G. High-Performance Discontinuous Galerkin Solvers
Addresses strategies and algorithms in devising efficient discontinuous Galerkin solvers for fluid flow equations such as Euler and Navier-Stokes. The course starts with an introduction to discontinuous Galerkin methods for elliptic and hyperbolic equations and then focuses on the following topics: 1) Serial and parallel implementations of various discontinuous Galerkin operators for curvilinear ele- ments in multiple space dimensions. 2) Explicit, semi-explicit and implicit time discretizations. 3) Multigrid (multi-level) solvers and preconditioners for systems arising from discontinuous Galerkin approximations of the partial differential equations.

APMA 2821H. Introduction to High Performance Computing: Tools and Algorithms
This course covers fundamental topics in High Performance Computing, with emphasis on Parallel Computing: basics in programming with C++; compilation and optimization; high performance scientific numerical libraries (LAPACK, BLAS, ScaLapack); MPI and OpenMP. The focus will be on load balancing, efficient design of communication and multilevel parallelism. We will use: 1) the new IBM computer of Brown University; 2) IBM BlueGene/P; 3) SGI UV 1000 cc-NUMA shared-memory system; 4) CRAY XT5; 5) Sun Constellation Linux Cluster. We will have lectures and hands-on tutorials. Grades are based on 5-6 home assignments/ mini-projects and a final project with presentation. Please visit the course website: http://www.dam.brown.edu/people/lgrinb/APMA2821/HPC_CLASS.html

APMA 2821I. Formulation and Approximation of Linear and Nonlinear Problems of Solid Mechanics.
Presents the formulation and approximation by the Finite Element Method (FEM) of linear and non-linear problems of Solid Mechanics. The formulation of problems is based on the Virtual Work Principle (VWP). Increasing complexity problems will be considered such as simple bar under traction, beams, plates, plane problems and solids with linear and hyperelastic materials. All problems are formulated using the same sequence of presentation which includes kinematics, strain measure, rigid body deformation, internal work, external work, VWP and constitutive equations. The approximation of the given problems is based on the High-order FEM. Examples will be presented using a Matlab code.

APMA 2821J. Some Topics in Kinetic Theory.
In this advanced topic course, we will go over several aspects of recent mathematical work on kinetic theory. Graduate level PDE is required.

APMA 2821K. Probabilistic and Statistical Models for Graphs and Networks.
Many modern data sets involve observations about a network of interacting components. Probabilistic and statistical models for graphs and networks play a central role in understanding these data sets. This is an area of active research across many disciplines. Students will read and discuss primary research papers and complete a final project.
APMA 2821L. Introduction to Malliavin Calculus.
The Malliavin calculus is a stochastic calculus for random variables on Gaussian probability spaces, in particular the classical Wiener space. It was originally introduced in the 1970s by the French mathematician Paul Malliavin as a probabilistic approach to the regularity theory of second-order deterministic partial differential equations. Since its introduction, Malliavin’s calculus has been extended beyond its original scope and has found applications in many branches of stochastic analysis, e.g., filtering and optimal control, mathematical finance, numerical methods for stochastic differential equations. This course will introduce, starting in a simple setting, the basic concepts and operations of the Malliavin calculus, which will then be applied to the study of regularity of stochastic differential equations and their associated partial differential equations. In addition, applications from optimal control and finance, including the Clark-Ocone formula and its connection with hedging, will be presented.

APMA 2821M. Some Mathematical Problems in Materials Science.
We will study a variety of mathematical models for problems in materials science. Mainly we will consider models of phase transformation, static and dynamic. Some of the topics to be treated are: (1) models of phase transformation; (2) gradient flows; (3) kinetic theories of domain growth; (4) stochastic models; (5) free boundary problems. A working familiarity with partial differential equations is required.

The course seeks to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods). The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. We also discuss more specialized topics such as symplectic integration methods, parallel-in-time methods, include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods.

APMA 2821O. Topics in Posteriori Error Estimations: Finite Element and Reduced Basis Methods.
The course will contain two related parts. An introduction of different types of a posteriori error estimations for various finite element methods, certified reduced basis method, where a posteriori error estimations play an important role. Emphasize both the theory and implementation. Related Matlab programs. Residual-type, local-problem type, and recovery-type error estimators for conforming, mixed, non-conforming, and discontinuous galerkin finite element methods for different types of equations. Reduced basis methods, offline-online procedure, greedy algorithm, error estimator, empirical interpolation method, and successive constraint method will be discussed. Goal-Oriented primal-dual approach for both FEM and RBM will be covered. Objective: To learn various theoretical and practical results of adaptive finite element methods and reduced basis methods.

APMA 2821P. Topics in the Atomatic-to-Continuum Coupling Methods for Material Science.
Atomic-to-continuum coupling methods (a/c methods) have been proposed to increase the computational efficiency of atomistic computations involving the interaction between local crystal defects with long-range elastic fields. This course provides an introduction to the fundamentals required to understand modeling and computer simulation of material behavior. This course will first briefly review material from continuum mechanics, materials science including crystals and defects and then move on to advanced topics in development and analysis of a/c coupling methods both in static and dynamic cases. I will also select topics from statistical mechanics and temporal multiscale accelerated molecular dynamics methods (hyperdynamics, parallel replica dynamics).

APMA 2821S. Stochastic Epidemic Models in Random Networks.
The focus of this course is to introduce and rigorously analyze some stochastic models of disease epidemics in random networks. Topics covered will include an introduction to branching processes, Reed-Frost epidemics and Erdos-Renyi random graphs, susceptible-infected-susceptible and susceptible-infected-removed models in random graphs, and small-world phenomena. Even though our focus will be on disease epidemics, the developed machinery is useful in the context of many diverse applications. Some familiarity with graduate level probability theory is desirable but not necessary. Probabilistic tools such as large deviation inequalities and coupling methods will be introduced in class, and the course will be essentially self-contained.

APMA 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

APMA 2980. Research in Applied Mathematics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

APMA 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Brown Institute for Brain Science
The Brown Institute for Brain Science (http://brown.edu/academics/brain-science) (BIBS) advances multidisciplinary research, technology development, and training in the brain sciences and works to establish Brown University as an internationally recognized leader in brain research. BIBS unites more than 100 faculty from a diverse group of departments at Brown, spanning basic and clinical departments, and physical and biological sciences. BIBS provides a mechanism to advance interdisciplinary research efforts among this broad group. BIBS provides essential support to obtain and administer multi-investigator grants for research, infrastructure, and training. The Institute actively seeks new training funds to support interdisciplinary education that transcends that available in individual academic departments.

As one of its core missions, the Institute is developing and supporting a series of interdisciplinary research centers that focus on established or emerging areas of excellence in brain research at Brown. Each center bridges the physical and life sciences, and encompasses basic and translational research, including clinical application. The Center for Vision Research (http://cvr.brown.edu/aboutcvr.html) was created in 2007. Initiatives in Neurotechnology and in Synaptic and Neurodegenerative Disease are underway. BIBS has also established an MRI Research Facility and an Behavioral Analysis Core Facility.

The existence of Brain Science as an overall organizing entity for a series of research centers and core facilities demonstrates the university’s ongoing support for brain science research at Brown. This commitment will help to attract top faculty and students to Brown, enable higher quality research and establish Brown as a worldwide leader in brain science.

Brain Science Graduate Program
The graduate program in Brain Science is a unique interdisciplinary program formed to tackle one of the greatest mysteries of man.

The program was designed to promote collaborative theoretical and experimental study of the brain from the molecular to the behavioral and cognitive level. It unites faculty who study the fundamental mechanisms of nervous-system function and those who seek to create devices with brain-like functions that can assist mankind. The faculty are also committed to translating fundamental knowledge for the diagnosis and treatment of the devastating effects of disease and trauma of the nervous system. Brown is a leader in related research and offers exceptional training and coursework for those interested in pursuing careers in brain science. The program sponsors a Master of Science (Sc.M.) degree as well as a Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/brain-science
Business, Entrepreneurship, Organizations (BEO)

The C.V. Starr Program in Business, Entrepreneurship, and Organizations is an interdisciplinary academic program that supports research, teaching and practice in the field of commerce. Its sponsoring departments of Economics and Sociology and the School of Engineering provide a unique scholarly foundation based upon economics, organizational studies, and entrepreneurship and technology management. Without a business school at Brown, the Business, Entrepreneurship and Organizations Program allows faculty and students a unique perspective on the critical issues facing businesses and organizations today.

An important component of BEO is a multidisciplinary, multi-track undergraduate concentration. This program:

- Provides students with a rigorous and synergistic program in the study of commercial activity grounded in Economics, Sociology and Engineering.
- Focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, globalization, and management and organizational theory.
- Connects vibrant practice-oriented co-curricular activities to the curriculum, including mentoring by entrepreneurs and other practitioners in the for-profit and not-for-profit sectors, domestic and international internships, the student-run Entrepreneurship Program, and its business plan competition.
- Is supported by interdisciplinary research that provides an academic grounding for the curriculum and keeps it innovative and fresh.

For more information, please visit the BEO website (http://coe.brown.edu).

Business, Entrepreneurship and Organizations Concentration Requirements

Business, Entrepreneurship and Organizations (BEO), formerly Commerce, Organizations and Entrepreneurship (COE) is a multidisciplinary concentration that provides a rigorous and synergistic program in the study of commercial activity grounded in economics, sociology and engineering. BEO focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, and management and organizational theory. Concentrators seek to understand the basic principles, approaches and vocabulary relevant to the study of entrepreneurship from the disciplines of economics, organizational sociology and engineering. Building on this multidisciplinary base, students develop specialized expertise in one of the three disciplinary approaches, with special emphasis on critical reasoning and quantitative research methods. In senior year capstone projects, students apply and integrate multi-disciplinary learning by working in groups on real world projects, including the creation of new ventures.

The three tracks of the concentration are as follows:

1. Business Economics
2. Organizational Studies
3. Entrepreneurship and Technology Management

Upon completion of all concentration requirements, students receive the Bachelor of Arts (A.B.) degree in Business, Entrepreneurship and Organizations.

Capstone: one-semester required  
BEO 1930A  BEO Capstone I: Organizational Studies Track  

Total Credits 14  

1  Or an optional two-semester capstone from the BEO 1930 and 1940 series  

Entrepreneurship and Technology Management Track  

Foundation Requirements  
ECON 0110  Principles of Economics  
ECON 1110  Intermediate Microeconomics  
SOC 1311  Micro-Organizational Theory: Social Behavior in Organizations  
SOC 1315  Macro-Organizational Theory: Organizations in Social Context  
ENGR 0030  Introduction to Engineering  
ENGR 1010  The Entrepreneurial Process: Innovation in Practice  

Math and Statistics Requirements  
MATH 0200  Intermediate Calculus (Physics/Engineering)  
or APMA 0330  Methods of Applied Mathematics I, II  
SOC 1100  Introductory Statistics for Social Research  
or APMA 0650  Essential Statistics  
or ECON 1620  Introduction to Econometrics  

Track Requirements  
One gateway course in Engineering or another physical science  
Five courses that develop expertise in a technical subfield  
Capstone: two-semesters required  
BEO 1930B  First Semester Capstone Course  
BEO 1940B  Second Semester Capstone Course  

Total Credits 16  

1  For specific gateway and subfield courses, refer to the BEO website.  
2  Technical subfields include Biotechnology/Biomaterials, Information Technology and Computer Engineering, Energy and the Environment, and others.  

Courses  

BEO 1930A. BEO Capstone I: Organizational Studies Track  
The first in a two-semester Capstone for BEO Organizational Studies track seniors, open to all BEO seniors. Capstone builds upon concepts covered in BEO courses, specifically concepts from SOC 1311 and 1315. Students will synthesize knowledge at several levels: across disciplines, across theoretical understanding and practical application, and across private and public sector experiences of entrepreneurship and innovation. Students will be organized into client mentored teams for social entrepreneurship and social innovation projects. BEO 1930A (fall) required; 1940A (spring) strongly advised for all Organizational Studies track seniors. Application required to match students to projects. Project team meetings required outside scheduled lectures. WRIT  

BEO 1930B. BEO Capstone I: Entrepreneurship and Technology Management Track  
The first in a two-semester Capstone required of BEO Tech track seniors. Student teams from Engineering, BEO and other technical and non-technical disciplines form simulated high tech start-up companies working on mentor-defined opportunities. Concepts reviewed in class include: product commercialization, intellectual property, marketing, product requirements documentation, team building, safety, environmental and  

Brown University
legal requirements. BEO Tech track concentrators should complete ENGN 1010 prior to course. Enrollment is limited. Students must complete formal application (BEO Tech track seniors automatically approved). Project team meetings required outside scheduled lectures. Non-BEO concentrators require instructor permission. WRIT

**BEO 1930C. BEO Capstone I: Business Economics Track.**

Designed for BEO Business Economics track seniors, this capstone is open to all BEO students, and builds upon BEO concepts in economics, finance, strategy, and markets. Students form teams to solve existing business problems, simulating groups of consultants. Projects range from recommending appropriate finance for new investments to project evaluation and pricing of new services. Students have client-mentors. Students apply analytical frameworks of BEO disciplines to hone writing, presentational, leadership and organizational skills. Application required to match students to projects. Project team meetings required outside scheduled lectures. WRIT

**BEO 1940A. BEO Capstone II: Organizational Studies Track.**

Continuation of Semester 1, BEO Capstone I: Organizational Studies Track (BEO 1930A). This course involves the completion of team projects begun in fall semester. WRIT

**BEO 1940B. BEO Capstone II: Entrepreneurship and Technology Management Track.**

Continuation of Semester 1, BEO Capstone I: Entrepreneurship and Technology Management Track (BEO 1930B). This course involves the completion of team projects begun in fall semester. Non-BEO concentrators require instructor permission. WRIT

---

**Chemistry**

**Chair**

Matthew B. Zimmt

The Department of Chemistry maintains pedagogical and research strengths in organic, inorganic, theoretical and experimental physical chemistry, analytical chemistry, chemical biology and nanochemistry. Faculty, post-doctoral fellows, graduate and undergraduate students collaboratively pursue interdisciplinary research within the department, enhanced by the partnerships with colleagues in the medicine, biology, geology, physics and engineering.

For additional information, please visit the department's website: http://www.brown.edu/academics/chemistry/

---

**Chemistry Concentration Requirements**

The Chemistry concentration offers courses and research opportunities that range from fundamental studies involving the characterization and preparation of synthetic and naturally occurring molecules, to interdisciplinary studies at the interfaces of chemistry with biology, medicine, physics, engineering, and nanoscience. As early as their first year, undergraduates are able to work one-on-one or in small groups with faculty members on cutting edge research projects. The Sc.B. degree provides a thorough foundation for further graduate study or for entry-level technical positions in each area. Students seeking the Sc.B. may either pursue the standard Chemistry concentration or one of the two optional tracks: Chemical Biology or Materials Chemistry. Students may also pursue the A.B. degree in Chemistry, which provides a core education in the discipline.

**Standard program for the A.B. degree**

**CHEM 1160**  Physical Chemistry Laboratory  
Two advanced science/math electives.  
Total Credits 9

1 Note that the physical chemistry courses (CHEM 1140, CHEM 1150, CHEM 1160) have mathematics and physics prerequisites.

2 At least one must be a chemistry course. BIOL 0280 is credited as an elective for the chemistry concentration.

**Standard program for the Sc.B. degree**

The Chemistry Department offers three tracks for the Sc.B. Chemistry Concentration – a Chemistry track, a Chemical Biology track and a Materials Chemistry track. These tracks are not separate concentrations – your degree will still be an Sc.B. in Chemistry. The Chemical Biology track is designed for students who have a strong interest in the interface of chemistry with biology. The Materials Chemistry track is designed for students who have a strong interest in the interface of chemistry with nanoscience and materials science.

**Concentrating in Chemistry – Three tracks**

The required/recommended courses for the three tracks are given below.

**Chemistry Track:**

- CHEM 0330  Equilibrium, Rate, and Structure  
- CHEM 0350  Organic Chemistry  
- CHEM 0360  Organic Chemistry  
- CHEM 0500  Inorganic Chemistry  
- CHEM 0970  Undergraduate Research  
- CHEM 0980  Undergraduate Research  
- CHEM 1140  Physical Chemistry: Quantum Chemistry  
- CHEM 1150  Physical Chemistry: Thermodynamics and Statistical Mechanics  
- CHEM 1160  Physical Chemistry Laboratory  
- MATH 0180 or equivalent  
- Two Physics courses  
- Seven electives (at least three must be in Chemistry)  
Total Credits 19

**Chemical Biology Track:**

- CHEM 0330  Equilibrium, Rate, and Structure  
- CHEM 0350  Organic Chemistry  
- CHEM 0360  Organic Chemistry  
- CHEM 0400  Biophysical and Bioinorganic Chemistry  
- CHEM 0970  Undergraduate Research  
- CHEM 0980  Undergraduate Research  
- CHEM 1140  Physical Chemistry: Quantum Chemistry  
- CHEM 1230  Chemical Biology  
- CHEM 1240  Biochemistry  
- BIOL 0280  Introductory Biochemistry  
- MATH 0180 or equivalent  
- Two Physics courses  
- Select three of the following:  
- BIOL 0470  Genetics  
- BIOL 0500  Cell and Molecular Biology  
- BIOL 0510  Introductory Microbiology  
- BIOL 0530  Principles of Immunology  
- BIOL 0800  Principles of Physiology  
- NEUR 1020  Principles of Neurobiology  
- Three other electives  
Total Credits 19

**Materials Chemistry Track:**

- CHEM 0330  Equilibrium, Rate, and Structure  
- CHEM 0350  Organic Chemistry  
- CHEM 0360  Organic Chemistry  
- CHEM 0500  Inorganic Chemistry  
- CHEM 0970  Undergraduate Research  
- CHEM 0980  Undergraduate Research  
- CHEM 1140  Physical Chemistry: Quantum Chemistry  
- CHEM 1230  Chemical Biology  
- CHEM 1240  Biochemistry  
- BIOL 0280  Introductory Biochemistry  
- MATH 0180 or equivalent  
- Two Physics courses  
- Select three of the following:  
- BIOL 0470  Genetics  
- BIOL 0500  Cell and Molecular Biology  
- BIOL 0510  Introductory Microbiology  
- BIOL 0530  Principles of Immunology  
- BIOL 0800  Principles of Physiology  
- NEUR 1020  Principles of Neurobiology  
- Three other electives  
Total Credits 19
Biochemistry & Molecular Biology Concentration Requirements

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

Standard program for the Sc.B. degree

Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits.

Three courses in mathematics, statistics and/or computer science, typically including MATH 0090, MATH 0100, or equivalent) 1

Two courses in physics, typically: 1

Current biochemistry courses offered at Brown University include:

- Introductory Biochemistry
- Advanced Biochemistry
- Chemical Biology
- Biochemistry
- Chemical Biology

Suggested Elective Courses:

Students are required to take six (6) elective courses: four (4) taken from the chart below and two (2) from any science or mathematics course relevant to biochemistry, cell and molecular biology from the suggested courses below:

**Biology Electives:**

- BIOL 0200 The Foundation of Living Systems
- BIOL 0470 Genetics
- BIOL 0500 Cell and Molecular Biology
- BIOL 0530 Principles of Immunology
- BIOL 0800 Principles of Physiology
- BIOL 1050 Biology of the Eukaryotic Cell
- BIOL 1090 Polymer Science for Biomaterials
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1110 Topics in Signal Transduction
- BIOL 1200 Protein Biophysics and Structure
- BIOL 1290 Cancer Biology
- BIOL 1540 Molecular Genetics
- BIOL 1560 Virology

**Neuroscience Electives:**

- NEUR 1020 Principles of Neurobiology
- NEUR 1670 Neuropharmacology and Synaptic Transmission

**Chemistry Electives:**

- CHEM 0500 Inorganic Chemistry
- CHEM 1140 Physical Chemistry: Quantum Chemistry
- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- CHEM 1450 Advanced Organic Chemistry

**Quantitative Science or Mathematics Electives:**

- PHYS 0040 Basic Physics
- PHYS 0060 Foundations of Electromagnetism and Modern Physics
- ENGR 0410 Advanced Inorganic Chemistry
- ENGR 1950/1960 Biophysical and Bioinorganic Chemistry
- CHEM 1160 Instrumental Analysis with Environmental Applications

In each of these cases, CHEM 0970/0980 should be carried out with a faculty member with an appointment in the Chemistry Department. Research with faculty advisors outside Chemistry may be allowed in some special cases. In this event, the student should a) prepare a proposal for the research to be carried out and b) identify a faculty member in the Chemistry Department who will serve as a second advisor and the second reader for the thesis. A thesis is required to be eligible for graduation with Honors.

CHEM 0330 Equilibrium, Rate, and Structure

CHEM 0350 Organic Chemistry

CHEM 0360 Organic Chemistry

CHEM 0500 Inorganic Chemistry

CHEM 0970 Undergraduate Research

CHEM 0980 Undergraduate Research

CHEM 1060 Advanced Inorganic Chemistry

CHEM 1140 Physical Chemistry: Quantum Chemistry

CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics

CHEM 1700 Nanoscale Materials: Synthesis and Applications

MATH 0180 or equivalent

Two Physics courses

BIOL 1090 Polymer Science for Biomaterials

Five electives, at least two must be chemistry courses.

Total Credits 19

1 BIOL 0280 is credited as an elective for the chemistry concentration.

2 For students with a more Engineering bent, the following substitutions can be made - ENGF 0030/ENGF 0410 can be substituted for PHYS; ENGF 0410 can be substituted for CHEM 1060; ENGF 0720 for CHEM 1150.

3 NOTE: MATH 0180 has additional prerequisites.

4 NOTE: Many of the BIOL courses have BIOL 0200 as a prerequisite.

Brown University
Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Total Credits 20

1 Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.
2 or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

Chemical Physics Concentration Requirements

Chemical Physics is an interdisciplinary field at the crossroads of chemistry and physics and is administered jointly by the two departments. The concentration provides students with a broad-based understanding in fundamental molecular sciences, as well as a background for graduate studies in physical chemistry, chemical physics, or molecular engineering. Concentrators are required to take twenty courses in chemistry, physics, and mathematics, although approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substitutes. Chemical Physics concentrators are also advised to take at least six courses in the humanities and social sciences. Chemical Physics concentrators at all levels (first-year through seniors) are actively involved in research with faculty members in both departments.

Standard program for the Sc.B. degree

Twenty-one semester courses in chemistry, physics, and mathematics, with a minimum of four semester courses in mathematics. Core courses are:

Select one of the following laboratory courses:

- CHEM 1160 Physical Chemistry Laboratory
- PHYS 0560 Experiments in Modern Physics
- PHYS 1560 Modern Physics Laboratory

Select one course in statistical mechanics:

- CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
- PHYS 1530 Thermodynamics and Statistical Mechanics
- MATH 0190 Advanced Placement Calculus (Physics/Engineering)
- MATH 0200 Intermediate Calculus (Physics/Engineering)
- MATH 0520 Linear Algebra

Seven courses, primarily at the 1000 or 2000 level, in chemistry or physics.

Select two semesters of independent study:

- CHEM 0970/0980 Undergraduate Research
- PHYS 1990 Senior Conference Course

Total Credits 21

Courses

**CHEM 0808A. First Year Seminar—Energy.**
An introductory study of the scientific foundation of energy, fundamental physical, chemical, and thermodynamic aspects of common (fossil, nuclear) as well as novel (fuel cells, solar, wind, etc.) energy sources. Concentrates on scientific principles, but includes discussion on resources and reserves, environmental impact, current usage, and future needs. For students of all disciplines who are interested in obtaining an understanding of scientific principles of energy. Enrollment limited to 20 first-year students. FYS LILE

**CHEM 0808B. Molecular Structures in Chemistry and Biology.**
This course will consist of a survey of historical developments and concepts of three dimensional structures of molecules. The course will conclude with a survey of the current state of the art of structure determination and 3D structure motifs for small molecules, nanomaterials and biological macromolecules. This freshman seminar will be strictly limited to a maximum of 20 students. FYS

**CHEM 0808C. Drug Discoveries in the Pharmaceutical Industry.** A Freshman seminar that provides a survey of past and current approaches that enable the discovery and development of therapeutic agents. Topics ranging from target validation to the development of therapeutics (small molecules, biologics, and stem cells) will be discussed. Enrollment limited to 20 first-year students. FYS

**CHEM 0808D. Chemical Ecology: Pheromones, Poisons and Chemical Messages.** This freshman seminar will explore how plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves, and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling. Enrollment limited to 20 first-year students. FYS

**CHEM 0808F. Kitchen Chemistry.** Have you ever wondered why olive oil is a liquid but butter is solid? Or why bread and cookies rise when baked? This Kitchen Chemistry course is an experimental approach to chemistry, as seen in cooking. We will examine topics such as trans fats, baking soda as a leavening agent in baking, ripening of fruit, artificial sweeteners, GMOs, and enzymatic and non-enzymatic browning of foods. Edible experiments will be used to discuss the science behind recipes. Enrollment limited to 14 first year students. FYS WRIT

**CHEM 0100. Introductory Chemistry.** Explores stoichiometry, atomic and molecular structure, chemical bonding, solutions, gases, chemical reactions, equilibria, thermochecmistry. Three hours of lecture, one conference per week, no laboratory section. S/N/C.
Focuses on understanding a number of environmental questions from the underlying laws and concepts of chemistry and physics. While some knowledge of math, physics and chemistry are useful, none is assumed. Concepts of chemistry and physics will be developed as needed.

Plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves against enemies and pathogens and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling.

CHEM 0330. Equilibrium, Rate, and Structure.
Explores the electronic structure of atoms and molecules, thermodynamics, solution equilibrium, electrochemistry, chemical kinetics, and reaction mechanisms. Three hours of lecture and five hours of prelaboratory and laboratory per week. Required background: CHEM 0100 or AP Chemistry 4 or CHEM Placement Test 8 or IBC Chemistry.

Students MUST register for all four components of this course (the common meeting, lecture, lab and conference) during the SAME registration session. Banner will not allow a student to register for one component without registering for the other three at the same time. Further, if one component of the course is dropped, all four components will be dropped. This course is offered in both Fall and Spring semesters.

If you previously completed CHEM 0330 laboratory but received a grade of no credit in the course, please register for lab section 11.

CHEM 0330L. Equilibrium, Rate, and Structure Lab.
Please see course description for CHEM 0330.

CHEM 0350. Organic Chemistry.
Sequel to CHEM 0330. Investigates the constitution and properties of the different classes of organic compounds, with considerable attention to reaction mechanisms. The laboratory work involves an introduction to microscale preparative and analytical techniques of organic chemistry and the preparation of representative organic compounds. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0330.

Students MUST register for a common meeting, a lecture section, a lab and a conference.

If you previously completed CHEM 0350 laboratory but received a grade of no credit in the course, please register for lab section 11.

CHEM 0350L. Organic Chemistry Lab.
Please see course description for CHEM 0350.

CHEM 0360. Organic Chemistry.
Sequel to CHEM 0350. Investigates the constitution and properties of organic compounds at a fundamental level with an introduction to physical organic, bioorganic, and synthetic organic chemistry. Laboratory work is concerned with the identification and characterization of organic compounds, including modern instrumental methods. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0350.

Students MUST register for a lecture section, a lab and a conference.

If you previously completed CHEM 0360 laboratory but received a grade of no credit in the course, please register for lab section 11.

CHEM 0360L. Organic Chemistry Lab.
Please see course description for CHEM 0360.

CHEM 0400. Biophysical and Bioinorganic Chemistry.
Examines aspects of physical and inorganic chemistry relevant to biochemistry: thermodynamics of hydrophobic and hydrophilic interactions, electrically charged membranes, coordination chemistry, active and passive transport, enzyme kinetics and mechanisms, metal-based drugs, and physical methods. Three hours of lecture and five hours of laboratory. Prerequisite: CHEM 0360 and MATH 0100 or 0170. Prerequisite or corequisite: PHYS 0040 or 0060.

Students MUST register for a lecture section and a lab.

CHEM 0500. Inorganic Chemistry.
Examines the chemistry of main group and transition metal elements with treatment of covalent bonding and molecular structure along with the methods of studying inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory attendance. Prerequisite: CHEM 0360.

Students MUST register for a lecture section and a lab.

CHEM 0970. Undergraduate Research.
Prerequisite: permission of the staff. Permission should be requested before the end of the preceding semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CHEM 0980. Undergraduate Research.
See Undergraduate Research (CHEM 0970) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CHEM 1060. Advanced Inorganic Chemistry.
Covers the physical and chemical properties of transition metal compounds as well as current research topics in inorganic chemistry. Laboratory is designed for the practice of modern inorganic chemistry through the synthesis and spectroscopic characterization of air-sensitive transition metal compounds. Prerequisite: CHEM 0500.

CHEM 1140. Physical Chemistry: Quantum Chemistry.
An introduction to the quantum theory of chemical systems. Elements of quantum mechanics; electronic structure of atoms and molecules; study of molecular structure and behavior by spectroscopy; chemical bonding and spectroscopy. Prerequisites: CHEM 0330, MATH 0180 or equivalent, PHYS 0040 or 0060 or equivalent. Recommended but not required: MATH 0520 or equivalent.

Examines the question: Where does chemical equilibrium come from? Focuses on macroscopic perspectives on chemical systems and the molecular origins of macroscopic behavior along with elements of statistical mechanics, the laws of thermodynamics, and the relationships between the two. Prerequisite: CHEM 1140 or written permission of the instructor.

CHEM 1160. Physical Chemistry Laboratory.
An introduction to modern instrumentation and experimental techniques as applied to physical chemistry. Experiments will emphasize application of the ideas of spectroscopy, kinetics, statistical mechanics, and thermodynamics to systems of chemical and biochemical interest. Required course for concentrators in chemistry. One to two afternoons of laboratory per week. Prerequisites: CHEM 1140 or permission of the instructor.

CHEM 1170. Environmental Chemistry.
A laboratory course using analytical methods to help in the study and description of several realistic environmental problems. Illustrates scientific methodology and measurement techniques as they apply to these important problems. A problem-solving course employing a kind of environmental chemical detective work. Two laboratory sessions per week. Prerequisites: MATH 0100 or the equivalent, or permission of the instructor. Enrollment limited to 8. Instructor permission required.

Introduction to computational tools used to analyze protein sequences and structures, DNA sequence analysis, RNA structure, biochemical pathways and the analysis of microarray data. Extensive use of programs such as AMBER, BLAST, P.SI.BLAST and a discussion of their limitations.

CHEM 1230. Chemical Biology.
This course covers topics at the interface of chemistry and biology and, specifically, the use of chemical tools to probe biological systems. Using examples from the recent literature, we will discuss using the central methods of chemistry, namely the ability to design and synthesize compounds with a particular set of properties, to analyze biological problems. Specific topics include molecular recognition of DNA, artificial enzymes, small molecule sensors, and in vivo imaging of proteins, nucleic acids, and cell-surface carbohydrates. Prerequisites: CHEM 0350, CHEM 0360, and BIOL 0280. If enrollment exceeds the limit, permission to enroll will be allotted in the order: 1) first year graduate students, 2) senior concentrators in Chemistry or Biochemistry 3) junior concentrators 4) other
students. Students who have registered or have permission to enroll must attend the first three classes or risk losing their places to someone on the waiting list.

CHEM 1240. Biochemistry.
Examines the chemical, mechanistic, and structural basis for enzymatic catalysis. Uses examples from the recent literature to examine how the experimental and conceptual tools of chemical synthesis, isotopic labeling, stereochemistry, enzymology, kinetics, and protein structure can be brought to bear to unravel the chemical and physical principles underlying the enormous catalytic acceleration and exquisite structural specificity of enzyme-catalyzed reactions. Prerequisites: Strong background in organic chemistry (CHEM 0350-0360, A or B performance preferable) plus at least one semester of Biochemistry (BIOL 0280, BIOL 1270). Enrollment limited to: 25 students, written permission required.

If enrollments exceed the limit of 25 students, permission to enroll for students who meet the course prerequisites will be allotted in the order: a) first year Chemistry graduate students, b) undergraduate senior concentrators in Chemistry, Biochemistry or Chemical Biology, c) junior concentrators in Chemistry, Biochemistry or Chemical Biology, d) other students. Students who have permission to enroll must attend the first three classes or risk losing their places to someone on the Course waiting list.

CHEM 1450. Advanced Organic Chemistry.
Lectures cover topics of current interest in organic reaction mechanisms, synthesis, and structure determination. Laboratory emphasizes spectroscopic and separation techniques and modern synthetic methods. Prerequisite: CHEM 0360. Students MUST register for a lecture section and a lab.

CHEM 1560A. Molecular Modeling.
No description available.

CHEM 1560B. Techniques in Inorganic Chemistry.
No description available.

CHEM 1560C. Advanced Spectroscopy.
No description available.

CHEM 1560D. Chemistry and Biology of Naturally Occurring Antibiotics.
Small molecules produced by organisms for chemical defense have long been exploited in medicine, biotechnology, and biological research. 1560D will examine the origins, uses, modes of action, and preparations of some of the most important and useful of these "antibiotic" molecules. Given the inter-disciplinary nature of this topic, this course is open to students with backgrounds in the biological and/or physical sciences. Familiarity with concepts of organic chemistry and biochemistry will be assumed.

CHEM 1560E. Biological Mass Spectrometry.
This seminar course will survey the instrumentation, methods, and applications of modern biological mass spectrometry. Through lecture and interactive discussions, we will explore the fundamentals of mass spectrometry. We will then proceed to cover a series of topics relevant to protein and peptides analysis. The seminar will conclude with an exploration of recent developments in instrumentation or applications of particular interest to the participants. Recommended pre-requisites: CHEM 0360, BIOL 0280, PHYS 0040. Enrollment limited to 20.

CHEM 1560F. Organic Structure Analysis.

CHEM 1560G. Nuclear Magnetic Resonance.
These special topics courses cover the basics of modern NMR spectroscopy. Topics to be included are as follows: modern Fourier transform methodology, modern NMR instrumentation, and a comprehensive discussion of one and two dimensional experiments that are routinely performed. Topics such as coherence transfer and pulsed field gradients will also be included. Experimental methods covered in detail include COSY, TOCSY, HSQC, HMBC, NOEY, ROSEY, EXSY and DOSY methodology. This course will not focus on structure determination or spectral interpretation but rather on experimental methodology.

CHEM 1560H. Chemical Glycobiology.
This course examines the chemistry and biology of carbohydrates in living systems. Topics to be covered may include - principles of carbohydrate recognition, enzymes involved in synthesis and modification of carbohydrates, carbohydrates in bacterial/viral and other cellular interactions, glycomics, carbohydrate synthesis. Prerequisites: CHEM 0360 and BIOL 0280. Instructor permission required. Attendance at the first class meeting is required for enrollment.

CHEM 1560L. Modern Natural Product Biosynthesis.
This course will cover the biosynthesis of the major classes of natural products - polyketides, non-ribosomal peptides, including beta-lactam antibiotics, terpenes, alkaloids and vitamins. The readings from original literature will cover the chemical logic and mechanisms of biosynthetic pathways and individual reactions, including isotopic labeling for whole-cell feeding experiments, stable isotopic NMR analysis, and mass spectrometry. Modern topics include genomics of natural product biosynthesis, genome mining, and pathway engineering. Prerequisites: CHEM 0350 and 0360. Recommended: CHEM 1230, 1240, or 1450. Enrollment limited to 25 juniors and seniors.

CHEM 1560M. Applied Materials Chemistry.
Materials chemistry is the study of the synthesis, structure, properties, and application of solid materials. Our technology-driven world is fueled by advances in materials chemistry with examples of application in areas such as microelectronics, polymers, and energy technology. This course will explain the application of materials chemistry through the materials properties and characterization, detailing how the crystalline and molecular structure of materials can be related to electronic, optical, thermal, and mechanical properties. WRIT

CHEM 1620A. Photoacoustics.
Prerequisite: CHEM 1140 or equivalent.

CHEM 1620B. Spectroscopy.
Prerequisite: CHEM 1140 or equivalent.

CHEM 1620C. Topics in Modern Physical Chemistry.
No description available.

CHEM 1660. Instrumental Analysis with Environmental Applications.
This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid
and many-body methods are described and discussions include the dependent quantum mechanical methods in chemical physics. Both few

Semester II: Lectures consider the theory and application of time-electronic structure, chemical bonding, and molecular spectroscopy.

Prerequisite: CHEM 1140 or equivalent.

Semester I: Time independent quantum mechanics and its application to atomic and molecular problems. The three laws of thermodynamics, the thermodynamic potentials, temperature scales, heat engines and refrigerators, entropy, kinetic theory, and transport phenomena. Applications to solids, fluids, and magnetic systems; Gibbs relations, first and second order phase transitions, thermal radiation, gas expansions.

Introduction to modern equilibrium statistical mechanics, including the classical and quantum descriptions of ideal gases, the molecular basis of thermodynamics, the concepts of ensembles and fluctuations, and the implications of quantum mechanical indistinguishability. Applications include chemical and phase equilibria, the transition-state theory of chemical reaction rates, and the theory of liquids.

CHEM 2210. Chemical Crystallography.
Introduces the principles of crystallography (plane groups, point groups, space groups, Bravais lattice, crystal classes), crystallographic methods (single-crystal, powder XRD, macromolecular), strategies for data collection, methods for data reduction, and structure interpretation; reviews modern crystal structure databases (CSD, ICSD) and search engines; reviews the historical development of crystallography and the scope, potential and application of X-ray analysis.

CHEM 2310. Advanced Inorganic Chemistry.
Comprehensive survey of topics in synthetic and mechanistic organometallic chemistry.

CHEM 2320. Physical Inorganic Chemistry.
The bonding and structures of inorganic compounds, including transition metal containing compounds and organometallics, and their spectroscopic properties are covered along with the group theoretical, quantum chemical, and physical methods employed. Prerequisites: CHEM 0500 and 1140 or equivalents or written permission. Recommended for seniors and first-year graduate students.

Detailed examination of organic reaction mechanisms, reactive intermediates, and the methods employed for their characterization (e.g., kinetics, free energy relationships, isotope effects, molecular orbital theory, spectroscopy, and product distributions). Topics may include concerted, free radical, elimination, and photochemical reactions, and the chemistry of radicals, carbocations, carbanions, and carbenes. Prerequisites: CHEM 0500, CHEM 1140.

CHEM 2420. Organic Reactions.
Study of organic reactions and reaction mechanisms. Discussion and analysis of organic transformations. Topics can include arrow pushing strategies and synthetic methods.

CHEM 2430. Synthetic Organic Chemistry.
Methods, strategies, and mechanisms. Topics may include the chemistry of anions, cations, and radicals, concerted reactions, conformational analysis, and stereochemistry.

CHEM 2770. Quantum Mechanics.
Semester I: Time independent quantum mechanics and its application to atomic and molecular problems. Discussions of modern theories of electronic structure, chemical bonding, and molecular spectroscopy. Prerequisite: CHEM 1140 or equivalent.

CHEM 2780. Quantum Mechanics.
Semester II: Lectures consider the theory and application of time-dependent quantum mechanical methods in chemical physics. Both few and many-body methods are described and discussions include the correlation function formulation of chemical dynamics. Numerical path integral methods for equilibrium and dynamical problems are introduced. Prerequisite: CHEM 2770.

CHEM 2810. Departmental Seminars.
No description available.

CHEM 2820. Departmental Seminars.
No description available.

CHEM 2870. Departmental Colloquia.
No description available. Open to graduate students only.

CHEM 2880. Departmental Colloquia.
No description available. Open to graduate students only.

CHEM 2920A. Chemistry and Physics of Amorphous Materials.
No description available.

CHEM 2920B. Organic Spectroscopic Methods.
No description available.

CHEM 2920C. Topics in Modern Spectroscopy.
No description available.

CHEM 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CHEM 2980. Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CHEM 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CHEM XLIST. Courses of Interest to Students wishing to Study Chemistry.

Classics

Chair

Jeri B. Debrohun

Like the discipline itself, which lies at the foundation of the humanities, Brown’s Department of Classics has a long and distinguished history, stretching from the founding of the University down to the current initiatives for academic enrichment. The department provides both specialized training for those who wish to enter graduate school in preparation for a career in scholarship, and a broad liberal education for those with more general interests. Courses are offered from beginning to advanced levels in Ancient Greek, Latin, and Sanskrit language and literature, and also in Modern Greek. Each semester the department offers a number of courses that require no knowledge of the ancient languages, in such areas as classical literature, mythology, ancient history, philosophy, and religion. For additional information, please visit the department’s website: http://www.brown.edu/academics/classics/

Classics Concentration Requirements

Classics focuses on the languages, literature, history, and culture of Greco-Roman antiquity. It provides specialized training for students intending to enter graduate school, and a broad liberal education for those with more general interests. Students may choose to study Ancient Greek, Latin, Sanskrit, or Modern Greek and gain knowledge in literature, mythology, ancient history, philosophy, and religion. Students may either pursue the standard Classics concentration - the most popular choice - or they may pursue one of the four optional tracks: Greek, Latin, Greek and Latin, or Sanskrit. Concentrators are strongly encouraged to integrate their studies in various fields of Classics by writing a senior thesis, by participating in an undergraduate seminar, or by undertaking a senior capstone project.

Classics Concentration Requirements

Classics focuses on the languages, literature, history, and culture of Greco-Roman antiquity. It provides specialized training for students intending to enter graduate school, and a broad liberal education for those with more general interests. Students may choose to study Ancient Greek, Latin, Sanskrit, or Modern Greek and gain knowledge in literature, mythology, ancient history, philosophy, and religion. Students may either pursue the standard Classics concentration - the most popular choice - or they may pursue one of the four optional tracks: Greek, Latin, Greek and Latin, or Sanskrit. Concentrators are strongly encouraged to integrate their studies in various fields of Classics by writing a senior thesis, by participating in an undergraduate seminar, or by undertaking a senior capstone project.

Classics Concentration Requirements

Classics focuses on the languages, literature, history, and culture of Greco-Roman antiquity. It provides specialized training for students intending to enter graduate school, and a broad liberal education for those with more general interests. Students may choose to study Ancient Greek, Latin, Sanskrit, or Modern Greek and gain knowledge in literature, mythology, ancient history, philosophy, and religion. Students may either pursue the standard Classics concentration - the most popular choice - or they may pursue one of the four optional tracks: Greek, Latin, Greek and Latin, or Sanskrit. Concentrators are strongly encouraged to integrate their studies in various fields of Classics by writing a senior thesis, by participating in an undergraduate seminar, or by undertaking a senior capstone project.
All tracks except "Greek and Latin" and "Sanskrit" require the satisfactory completion of eight courses as described below. Programs are flexible and students are encouraged to discuss their plans with the concentration advisor. The introductory courses in Greek and Latin may not usually be counted toward a concentration.

**Classics**

One course in Greek or Latin on the 1000-level or above. 1

Select one of the following series: 2

- **CLAS 1210** & **CLAS 1220**
  - The History of Greece from Archaic Times to the Death of Alexander
  - The History of Greece from Archaic Times to The Death of Alexander

- **CLAS 1310** & **CLAS 1320**
  - Roman History I: The Rise and Fall of an Imperial Republic
  - Roman History II: The Roman Empire and Its Impact

Five other courses in classics, including classical archaeology, Greek, Latin, Sanskrit, or related areas to be approved by the concentration advisor. 5

Total Credits 8

**Greek**

Four Greek courses on the 1000-level or above, at least one of which is to be: 4

- **GREK 1810** or **GREK 1820**
  - Early Greek Literature
  - Fifth Century Survey

- **CLAS 1210**
  - The History of Greece from Archaic Times to the Death of Alexander

- **CLAS 1220**
  - The History of Greece from Archaic Times to The Death of Alexander

Two additional courses in classics, including classical archaeology, Greek, Latin, or related areas to be approved by the concentration advisor. 2

Total Credits 8

**Latin**

Four Latin courses on the 1000-level or above, at least one of which is to be: 4

- **LATN 1810** or **LATN 1820**
  - Survey of Republican Literature
  - Survey of Roman Literature II: Empire

- **CLAS 1310**
  - Roman History I: The Rise and Fall of an Imperial Republic

- **CLAS 1320**
  - Roman History II: The Roman Empire and Its Impact

Two additional courses in classics, including classical archaeology, Greek, Latin, or related areas to be approved by the concentration advisor. 2

Total Credits 8

**Greek and Latin**

Four Latin courses on the 1000-level or above, at least one of which is to be: 4

- **LATN 1810** or **LATN 1820**
  - Survey of Republican Literature
  - Survey of Roman Literature II: Empire

Four Greek courses on the 1000-level or above, at least one of which is to be: 4

- **GREK 1810** or **GREK 1820**
  - Early Greek Literature
  - Fifth Century Survey

- **CLAS 1210**
  - The History of Greece from Archaic Times to the Death of Alexander

- **CLAS 1220**
  - The History of Greece from Archaic Times to The Death of Alexander

**Sanskrit**

Four 1000-level courses in Sanskrit. 4

The requirements for Classics, Greek, or Latin with the provision that courses in Sanskrit beyond the first four may count towards the "five other courses" required of concentrators in Classics, or the "two additional courses" required of concentrators in Greek and of concentrators in Latin. 8

Total Credits 12

1 Students interested in Sanskrit may compare the concentration in South Asian Studies - Ancient India.

**Honors**

Students may earn honors in the concentration by presenting a satisfactory thesis, for the preparation of which they will ordinarily enroll in the relevant 1970 and 1990 courses; these courses may not be used to satisfy the standard requirements for a concentration. In order to qualify for honors, students must maintain a B average overall.

**Classics Graduate Program**

The department of Classics offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/classics

**Courses**

**Classics**

**CLAS 0010. The Greeks.**

For centuries Western civilizations have seen the Greeks as their intellectual and spiritual ancestors. The ‘Greek miracle’ is explored by reviewing its major achievements and discoveries: poetry (heroic epic, tragedy, political comedy), philosophy, historical research, political analysis and institutions, science. All texts read in English. LILE WRIT

**CLAS 0020. The Romans.**

Statesmen exposed republican conspiracies; historians chronicled imperial intrigue; playwrights “Greeked-it-up” with toga parties; epic poets sang of Rome’s rise (and fall); moralizers bemoaned gladiators’ beauty habits; and a novelist recounted the adventures of a man turned into an ass.

This course tracks the development of literary culture at Rome from its beginnings to the end of the Empire, with an emphasis on the major genres, authors, and works of Roman literature. Intended for all students desiring an introduction to Roman literary culture and its masterpieces. All texts read in English; no previous experience in Roman history or Latin required. LILE WRIT

**CLAS 0150. Ancient Philosophy.**

Ancient Greek views about the prospects and limits of reason in the human being’s search for a good and valuable life. What the best life is; how, and how far, reason can provide for its realization; what social/political conditions it requires; how vulnerable it is (and should be) to uncontrolled happenings. Authors include Euripides, Thucydides, Plato, Aristotle, Epicurus, Lucretius, Augustine, and Dante.

**CLAS 0180. Indian Civilization through Its Literature.**

An examination of various historical, geographical, social, scientific, and literary aspects of Indian civilization through the reading of translations of original works of Indian culture such as the short story collection
Bṛhatkathālokasaṃgraha. Each topic that comes up in the story is explored in greater depth in supplementary material.

CLAS 0210A. Alexander the Great and Alexandria. No description available.

CLAS 0210B. Death in Ancient Greece. Examines how ancient Greeks understood, described, and experienced death. Making use of sources in translation, considers how death is anticipated, imagined, feared, and sometimes sought. Also contrasts classical ideas with current experiences in our own society in order to see whether and how our assumptions concerning death are culturally determined. Enrollment limited to 20 first year students. FYS LILE WRIT

CLAS 0210E. The Family in the Classical World. It has been said that the household, not the individual, was the core of classical society. Using primary sources, we examine such questions as parental (and patrilineal) authority, the status of women, the role of private property, extended kinship, the physical structure of houses, the experience of childhood, etc. Comparisons are drawn with other societies, including our own.

CLAS 0210F. The Meaning of History in the Ancient World. The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The course will (a) focus on the great historians Herodotus, Thucydides, Polybius, Livy, Sallust, and Tacitus, and examine what purposes they pursued in writing history; (b) investigate the origins and development of historical writing in Greece and Rome; (c) look briefly at forms of historical reflection and writing in other ancient civilizations. For first year students only.

CLAS 0210G. Themes in Ancient Science. The ideas of ancient scientists are apt to seem both oddly familiar and utterly strange. Examines the major developments in ancient physics, biology, medicine, mathematics, technology, anthropology, and astronomy. Pays particular attention to the tensions between observation and theory, science and society, and the reappearance of ancient notions in modern beliefs.

CLAS 0210H. Thucydides: History and Cultural Context. Thucydides’ history of the Peloponnesian War is a magnificent and profound study of the growth and deterioration of Athenian imperialism. We shall examine his history against the background of concurrent intellectual achievement in drama, philosophy, and rhetoric.

CLAS 0210I. How Women were Seen. Classical literature offers a wide array of representations of women, from loyal wives like Penelope to murderers like Medea, from powerful queens like Dido to helpless slaves like the women of Troy after the destruction of their city. Through a selection of poems and prose texts, almost all composed by men, we shall attempt to gain insight into the place of women in the ancient Greek and Roman imagination.

CLAS 0210J. Homer - The 'Big Bang' of Western Literature?. The history of Western Literature seems to begin with a ‘Big Bang’, the Iliad and the Odyssey. A primary goal of this First Year Seminar will be to become thoroughly familiar with the many fascinating and highly influential characteristics of the two epics and their plots by means of close reading (in English translation). At the same time, we will examine the key factors which made this ‘miraculous beginning’ possible. This includes a question that has received much attention in recent scholarship: the influence of literature from the Middle East. Looking in the other direction, Homer’s enormous and lasting influence on literature and art will also be discussed. Enrollment limited to 20 first year students. FYS WRIT

CLAS 0210L. Who Owns the Classical Past?. This course offers a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.). Enrollment limited to 20 first year students. FYS

CLAS 0210M. Seneca: A Philosopher in Politics. The Stoic philosopher Seneca led a life full of contradictions: a millionaire and a politician, a man who preached the importance of mind over matter but begged for return from exile, and a philosopher compromised by his relationship with the emperor Nero, his pupil and his murderer. At least his end was heroic: ordered to commit suicide in 65 AD, he modeled his death on that of Socrates, discoursing calmly about philosophy with his friends as the blood drained out of his veins. In this course we’ll read broadly in his writings and try to come up with some answers about this complex and fascinating figure and the philosophy of living for which he stood.

CLAS 0210O. Sport in the Ancient Greek World. Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education. Enrollment limited to 20 first year students.

CLAS 0210P. Dead and Loving It: The Cult of the Saints in the Eastern Mediterranean. This course introduces students to the literature, history, and religious life of the late ancient and medieval Mediterranean through the lens of a highly significant socio-cultural phenomenon: the Christian cult of the saints. Students will have the opportunity to engage with a variety of primary source texts in translation, while examining the subject from the perspectives of anthropology, religious studies, material culture, history and literary studies, to approach this rich topic through an interdisciplinary framework. Enrollment limited to 20 first year students. FYS

CLAS 0280. Latin in English/Latinate English. The influence of Latin not only on the English vocabulary but on English style. Topics include: word building from Latin (and some Greek), Latin words and phrases in English, English lexicography, translations into and from Latin, euphemism, the revolt against Latin elements (Saxonism). Students write essays exemplifying these types of writing.

CLAS 0300. Animals in the Greco-Roman World. Animals are an important part of any culture. This is especially true for the civilizations of the ancient world, which used animals not only for food and companionship but also for labor power, medicine and entertainment. In this class, we will explore the role of animals in the civilizations of the Greco-Roman world, looking at both practical uses and literary or artistic portrayals. We will focus on ancient beliefs about animals that now seem strange to us (kneelless elephants, self-castrating beavers, venomous mice, etc.), and we will try to explain how those beliefs came to be so widely held.

CLAS 0560. War and Society in the Ancient World. This course examines the sociology of war in premodern societies: we investigate how in each case warfare and military organization interacted with the background of the Rome of the emperor Augustus. Subjects for discussion include the relation of poetry and power, the connection between the imagination and historical reality, and the tension between intellectual freedom and the constraints of society.

CLAS 0580. Religion and Magic in Ancient Greece. Examines, in translation, the three masterpieces of Virgil, central poet of the golden age of Latin literature. In particular, considers his epic, the Aeneid, against the background of the Rome of the emperor Augustus. Topics include religion and gender; curses, spells, and charms; ancient atheism and agnosticism.

CLAS 0590. War and Society in the Ancient World. In a broad survey of ancient societies (from Egypt and Mesopotamia to late antiquity), but with a strong focus on the Greco-Roman world, this course examines the sociology of war in premodern societies: we investigate how in each case warfare and military organization interacted with social, economic, and political structures and how each society dealt with the challenges, gains, and costs of war. Readings in English.

CLAS 0600. The Worlds of Late Antiquity. A survey of Western culture in all its variety-social, political, economic, literary-in those centuries when the Roman Empire supposedly fell,
leaving in its wake the so-called Dark Ages. Emphasizes the dialectic of continuity and change that leads from Imperial Rome to the vast Empire of Charlemagne.

**CLAS 0620. Greek Tragedy.**
An investigation of many of the surviving plays of the Greek tragedians Aeschylus, Sophocles, and Euripides. Considers the diverse aspects of ancient drama: the context, both religious and sociopolitical; issues of theatrical production, the poetic texture of the plays; and the influence of classical drama on later drama and western thought. Additional readings may include Aristophanes' *Frogs* and *Thesmophoriazusae* and selections from Aristotle's *Poetics*, the earliest criticism of Greek tragedy. LILE WRIT

**CLAS 0620. The World of Byzantium.**
Caught between the East and West, the culture of Byzantium inherited the ancient worlds of Greece, Rome, and Jerusalem, nurturing many a modern ideology, conflict, and identity. Byzantium is explored through its history, texts, and art. We examine the foundation and history of Constantinople, Iconoclasm, the Crusades, medieval Christianity and Islam, Byzantine court life, concepts of gender, self, and sexuality.

**CLAS 0750. Gender and Sexuality in Classical Antiquity.**
This course will analyze women in classical Greek and Roman society and literature. Using gender as a critical tool, we will examine Greek and Roman women in various sources, from Homeric epics and public inscriptions to scathing Roman satire. These sources show how the Greeks and Romans defined normative gender categories and how they used these categories as a vehicle for social and political criticism. We will cover both social history and gender discourse, focusing especially on the body and sexuality as a site for power. The limitations imposed by the source materials, both literary and non-literary, will be a topic of discussion throughout, as well as the relation of these ideas to contemporary constructions of gender.

**CLAS 0760. Ancient Utopias/Imaginary Places.**
Literary depictions of idealized imaginary societies already had a long tradition when Thomas More produced his *Utopia* in 1516. This course explores the ancient Greco-Roman utopian tradition, examining both literary depictions of mythological or fantastic utopias (or dystopias), including representations of societies remote in time ("the Golden Age") or place (e.g., Homer’s *Phaeacia*), and works that critique contemporary values or attempt to describe idealized possible societies (e.g., Plato’s *Republic*). These Greco-Roman depictions in turn provided the foundation for the utopian (and dystopian) tradition as it continued through the Medieval age and into modernity, and we will also follow that tradition. DVPS LILE WRIT

**CLAS 0800. Religious and Philosophical Thought in Ancient India.**
The historical development of the main themes of ancient Indian religious and philosophical thought. Part I: The rise of monism in tension with polytheism, the efficacy of Vedic words and Vedic rites, and early Brahminic cosmology and psychology. Part II: The rise of the non-Brahminic traditions (Jainas, Ājīvikas, and Buddhists) challenging Vedic revelation and everything based upon it (mainly the rites and authority of brahmans). Part III: The ensuing ‘conversations’ among the competing traditions, conversations that developed new world-views and new methods for effecting human well-being in the cosmos.

**CLAS 0810A. Alexander the Great and the Alexander Tradition.**
This course focuses on a single historical figure, Alexander the Great, using him as a point of departure for exploring a wide range of problems and approaches that typify the field of Classical Studies. How knowledge of Alexander has been used and abused provides a fascinating case study in the formation and continuous reinterpretation of the western Classical tradition.

**CLAS 0820. Epics of India.**
An introduction to Indian epic literature with reading and analysis of one or more of India's grand and powerful epics, such as the Mahabharata, the *Rāmāyana*, the *Cilappatikāram*, and others.

**CLAS 0850. Mythology of India.**
Reviews major myths from religions of India in order to understand how the peoples of India imagined their relation to the divine world, to nature, and to other human beings. Considers connections between myths and religious practices, social structures, historical events, and psychological and aesthetic dimensions of Indian cultural life. Reading of mythic narratives will be accompanied by analysis from selected theoretical perspectives.

**CLAS 0855. The Bhagavad Gitā.**
This course will study and discuss the teachings of the Bhagavad Gītā in the context of its literary, theological, and philosophical origins in ancient India. We will read the text itself (in English, not Sanskrit), parts of the epic Mahābhārata in which the Gītā is situated, and collateral texts, such as Upanisads, Indian myths, Buddhist sermons, or even modern novels, that may shed light on why and how this text has exercised such far-reaching influence across the ages, inside India and beyond. DVPS

**CLAS 0900. Greek Mythology.**
Reviews major myths along with some lesser known variations, in order to understand how ancient Greeks imagined their relation to the divine world, to nature, and to other human beings. Considers connections between myth and cult or ritual, and also to the psychological, social, historical, and aesthetic aspects of classical myths. Examines adaptations of classical myths in later societies and comparative materials from other cultures.

**CLAS 0990. Concepts of the Self in Classical Indian Literature.**
Examination of the great Indian epic Mahābhārata and related mythology to introduce the context for the most ancient speculations of the Rgveda and the subtle teachings and dialogues about the self contained in the Bhagavadgītā and Upanishads. We will also examine the more systematic Indian philosophical texts and note their resonance in ancient and modern European conceptions of self.

**CLAS 1120A. Dreams, Love and Confession.**
The Middle Ages are notorious for their love of bizarre locales, hauntings, fear of demons, and superstitions. But the outlook of the medieval world also encouraged a love of hidden and of internal, spiritual space. This world-view attended to dreams, a complex anatomy of human love and confessions. In this course, we will examine the social and literary context of these three modes of communication in the classical and, especially, the medieval period. We will read classical and medieval poetry (Horace, Propertius, Ovid, Lucretius, Cambridge Songs, Alan de Lille, Bernardus Silvestris), late antique dream books (Aelius Aristides), medieval beastiaries and fables, vernacular Romances and lays, and the medieval confessional mode (Augustine, Guibert); we will also examine visual evidence, where possible.

**CLAS 1120B. Epic Poetry from Homer to Lucan.**
Traces the rich history and manifold varieties of the genre of epic poetry in the literatures of ancient Greece and Rome beginning with Homer’s *Iliad* and *Odyssey* (VII c. B.C.) and ending with Lucan’s *Civil War* (I. c. A.D.). Masterpieces such as Virgil’s *Aeneid* and Ovid’s *Metamorphoses* are included. Original sources read in translation. LILE WRIT

**CLAS 1120D. Myth and Origins of Science.**
Examinations of various explanations of the origin of the cosmos, of human beings, and human institutions, with readings from literary, philosophical, and scientific texts. What constitutes a scientific explanation and in what respects ancient science was similar to and different from our own? Authors include Hesiod, Aeschylus, Plato, Aristotle, Hippocratic medical writings and the Presocratic fragments. Read in English translation.

**CLAS 1120E. Slavery in the Ancient World.**
Examines the institution of slavery in the ancient world, from Mesopotamia and the Near East to the great slave societies of classical Greece and (especially) imperial Rome; comparison of ancient and modern slave systems; modern views of ancient slavery from Adam Smith to Hume to Marx to M.I. Finley. Readings in English.

**CLAS 1120G. The Idea of Self.**
Literature gestures us toward a certain kind of knowledge not quite psychological, not quite philosophical. We read widely in the classical and medieval traditions in order to gauge the peculiar nature of what this knowledge tells us about experience and the ways in which expressions of selfhood abide or are changed over time. Authors include Sappho, Catullus, Horace, Virgil, Lucan, Anselm, Heloise, Hildegard, Carmina Burana, Abelard. LILE WRIT
CLAS 1120H. The Invention of Literature: Literary Theory from Antiquity to the Renaissance.

Literature is a recent concept. We study the prehistory of its invention in Antiquity and the Middle Ages focusing on ideas about authorship, fiction, and practices of reading. The course is based on close reading of primary texts from classical Greco-roman and medieval Byzantine, Latin, and Arabic authors. Beyond theoretical discussions, primary readings include contemporary premodern literary texts.

CLAS 1120J. Essaying the Essay.

This course explores the personal essay as a vehicle for self-expression. Examining self-reflective essays from a variety of cultures and time periods—ancient, modern, East, and West—we trace the theme of friends as dialectical others against whom individuals define themselves. Our investigations will lead us to a provisional definition of the essay genre, keeping in mind its unique placement between fiction and non-fiction, and its relationship with non-Western forms such as the suibi and the xiaopin wen. First year students need instructor permission to enroll.

CLAS 1120K. Skeptical Traditions East and West.

The skeptical project begins and ends in doubt and the refusal to affirm any belief dogmatically. While these ideas are most frequently associated with the writings of Cicero and Sextus Empiricus, they also appear in early Buddhist and Daoist texts. The course examines several strands of skeptical philosophy as they appear in writings from ancient Greece, Rome, China, and India. It further explores literary enactments, appropriations, and critiques of skepticism evident in the skeptical revival of the European Renaissance and in Zen kōans.

CLAS 1120L. Archaeology of Feasting.

No description available.

CLAS 1120M. Plato.

A close reading of Plato’s major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. Students wishing to read the texts in the original Greek should make arrangements with the instructor.

CLAS 1120N. Games and Spectacles of Ancient Greece and Rome.

Will examine games and spectacles of the ancient Greek and Roman worlds, from the early Olympic contests to the popular chariot races of late antiquity. By using a variety of sources, including archaeological evidence, we will explore not only the historical development of sports in the classical world, but also its ongoing political, social, and cultural importance. By seeking to understand both participants and spectators, we also hope to connect the significance of games to other facets of Greco-Roman society, including women and religion. We will not only discuss the limitations of the primary sources, but also make relevant comparisons to the role of sports in contemporary society.

CLAS 1120Q. Seven Wonders of the Ancient World.

"Everyone has heard of the Seven Wonders of the World," wrote Philo of Byzantium two millennia ago, and it's still true today. But what is a "Wonder"? And why seven of them? Why make such a list anyway, then or now? This class will use ancient texts, explorers' accounts, and archaeological investigations to travel through several thousand years of history in the Mediterranean and Near Eastern world. We will consider how the Seven Wonders captured past imaginations; the aura of technological achievements; the intersections of history, memory, invention, and myth; and how members of one culture view another culture's monuments.

CLAS 1120R. Social Conflict and Political Factions in the Roman Republic.

Traces the evolution of social conflict and political factions at Rome from the foundation to the dissolution of the Republic (C5-C1 BCE). Roman armies secured a vast empire of territory, raw materials, and manpower governed by the senate and the people of Rome itself. The influx of resources, however, destabilized Rome's constitution and upset political power balances at the city of Rome. How did the Romans—elites and masses—compete amongst themselves for the bounty of empire abroad and confront their own internal conflicts at home? Was concord possible, or were the developments of empire inconsistent with the constitution of the Republic?

CLAS 1120T. Age of Augustus: Topography, Architecture, and Politics.

Augustus Caesar boasted that he had found Rome a city in brick, but left it in marble. This course explores the transformation of Rome from an unadorned village to the capital of an empire. Was Rome's first emperor trying to fashion himself a Hellenistic monarch on the model of Alexander and his successors? Was he simply operating within republican traditions, which had been established through centuries of aristocratic competition at Rome? Our source materials will include ancient works of art and architecture, literary accounts, maps, and critical urban theory.

CLAS 1120U. The American Presidency and the Western Tradition.

We are accustomed to engaging the American presidency as a public office best approached through the prism of government or political science, but this course studies the ways in which the presidents in thought and action are part of a larger continuum of humanistic expression in the western tradition. It is organized around five categories: memory, language, consolation, farewell, and self-reflection. Our work involves reading and viewing/listening to various materials, including videos and original documents. The words we study, both by and about presidents, will be compared to various masterworks of Greco-Roman antiquity and the western Middle Ages.

CLAS 1140. Classical Philosophy of India.

This course introduces the classical traditions of philosophy in India. After presenting a general overview of this discourse and its basic Brahminic, Buddhist, and Jain branches, the course will examine selected traditions and themes from both the several schools concerned entirely with gaining ultimate beatitude (the Highest Good) (the schools known as Sāmkhya, Yoga, Theravada Buddhism, Mahāyāna Buddhism, Jainism, and Vedānta) and the schools that concentrate on issues of logic, metaphysics, and language and hermeneutics (Nyāya, Vaiśeshika, and Pūrva Mīmāṃsā, respectively). DVPS

CLAS 1160. Classics of Indian Literature.

This course will introduce, in English translations, the most powerful examples of the literature of India. The course will introduce students to India’s unparalleled literary richness by reading selections of the best poetry, drama, and narrative literature of Indian civilization from any of its many languages (Sanskrit, Tamil, Hindi, Bengali, etc., and English), ancient and modern.

CLAS 1210. The History of Greece from Archaic Times to the Death of Alexander.

A detailed examination of the history of the Greeks-political, economic, and social-from Homer’s time to the establishment of the Hellenistic monarchies by the successors of Alexander the Great. The ancient sources are closely and critically studied (in translation).

CLAS 1220. The History of Greece from Archaic Times to The Death Of Alexander.

See The History Of Greece From Archaic Times To The Death Of Alexander (CLAS1210) for course description.

CLAS 1260. The Roman Reception of Greek Literature.

Reading a number of shorter poems and excerpts in both Greek and Latin, paying particular attention to how Roman writers respond to Greek examples. Readings include Catullus and Sappho, Horace and Pindar, Virgil and Theocritus, and others, with a view to the interactions of meter, genre, and language.

CLAS 1310. Roman History I: The Rise and Fall of an Imperial Republic.

The social and political history of Ancient Rome from its origins to the death of Augustus in 14 CE. Focuses on the social conflicts of the early Republic; the conquest of the Mediterranean and its repercussions; the breakdown of the Republic and the establishment of monarchy. Readings emphasize ancient sources in translation.

CLAS 1320. Roman History II: The Roman Empire and Its Impact.

The social and political history of the Roman Empire (14-565 CE). Focuses on expansion, administration, and Romanization of the empire; crisis of the 3rd century; militarization of society and monarchy; the struggle between paganism and Christianity; the end of the Empire in the West. Special attention given to the role of women, slaves, law, and historiography. Ancient sources in translation.
CLAS 1350. Comparative Grammar of Greek and Latin I.
An introduction to the histories of the Greek and Latin languages within the frame of their Indo-European antecedents. Addresses the sound systems of the two languages and applies our knowledge of them to a consideration of the semantics (etymology) of words in the languages. For those who know Greek and Latin well, though no specific prerequisites can be listed. Students of classics and linguistics are the main audiences addressed.

CLAS 1410. Roman Religion.
Explores the religions of Rome, from the animism of King Numa to the triumph of Christianity. Topics include: concepts of religion and the sacred; sacred law; ritual space and the function of ritual; festivals; divination; magistrates and priests; the imperial cult; death and the afterlife; mystery cults; astrology and magic.

CLAS 1420. The Culture of Death in Ancient Rome.
This course examines the way that death and dying were perceived and managed in ancient Roman culture. Primary source readings will include selections from philosophers, poets, inscriptions, and a variety of prose literature (consolations, epistoligraphy, historiography, novels). Secondary literature will focus on demography and social relations, the anthropology of funerary ritual, and material culture, which will be integrated systematically throughout the course, and which will include consideration of artistic representations and iconography, as well the archaeology of Roman mortuary practices.

CLAS 1750A. Caesar's Failure and Augustus' Success.
Both Caesar and Augustus reached sole power in the Roman empire by winning civil wars. Both initiated broad reform programs, but Caesar was soon assassinated, while Augustus lived for another 45 years. We will analyze their reforms and examine the causes and historical significance of Caesar's failure and Augustus's success.

CLAS 1750B. Justice.
An inquiry into notions and definitions of justice. Plato's Republic is the basic reading. Considers a wide variety of novels, poems, and plays as examples.

CLAS 1750C. Undergraduate Seminar: Emotions.
Were the emotions of the ancient Greeks and Romans identical to our own? When a Greek felt pity, or a Roman was angry, were the causes and the manifestations the same as ours? This senior seminar examines how Greeks and Romans defined the emotions, and checks their descriptions against literary texts. One year of either Greek or Latin required.

CLAS 1750D. Philosophy of Socrates.
In this class we will read and discuss various ancient portraits of Socrates (in Aristophanes' Clouds, Plato's Apology and Symposium, and Xenophon's Apology) and several Platonic dialogues representing Socrates in action discussing moral questions, including the Crito, Laches, Charmides, Lesser Hippias, Protagoras, and Gorgias. We will focus on questions about the historical Socrates (as distinct from the portraits), his avowals of ignorance, irony, methods of argument, and interest in definition, as well as the moral questions explored in the dialogues. All readings will be in English translation. Enrollment limited to 20.

CLAS 1750E. Writing History in the Ancient World.
The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history; investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations.

CLAS 1750H. Heroes and Heroism in Graeco - Roman Antiquity and Beyond.
Examines the concept of hero, an ancient Greek word, which had a wide variety of meanings and was employed to designate a series of diverse characters of myth. We will trace the evolution of this idea through a detailed analysis of its uses in Greek and Roman texts, and also contrast its ancient sense with present day conceptions of the hero and heroism. All readings will be in English. The course is open to all undergraduates, but preference will be given to juniors and seniors. Enrollment limited to 25.

CLAS 1750I. Highways and Byways in Antiquity.
This seminar will explore the construction and development of pathways of communication and contact in the ancient (primarily Mediterranean) world. Emphasis will be placed upon major routes (highways) and the state-level powers that instituted and controlled them, but also on more modest roads and paths and the communities they promoted. The scope of the course is thus quite extensive, embracing both terrestrial and maritime roadways, and all forms of activity that took place on and along them (trade, pilgrimage, 'strip development', imperial postal and spy systems, ports, etc.). Some previous study of antiquity is desirable. Please note: CLAS1750I is being team-taught by Susan Alcock and John Bodel.

CLAS 1750J. Ancient Revenge Dramas.
We shall study revenge tragedies composed in ancient Athens and Rome and also some composed during the Renaissance. We shall examine formal characteristics of the tragedies as well as the conceptual constellations (historical, political, social, theatrical, legal) under which they operated for the three periods; an important question will be whether and how this medium permits us to understand how law and the notion of justice operates in a given society.

CLAS 1750K. Madwomen and Lovers.
Ancient Greeks and Romans were fascinated by the figure of the distressed mythological heroine, and from the Classical period onward their literature showcases women tormented by love (often for a forbidden object), but able to give voice to their desires and dillemmas. We will look at examples from different types of ancient literature (especially drama and epic), focusing on the blend of victimization and self-expression in their portrayal, and on their sometimes surprising role in the literature of love, mythology, and national history.

CLAS 1750L. Erotic Desire in the Premodern Mediterranean.
Erotic desire may be a universal human phenomenon. How we explain, depict, express, or experience desire is, however, not a universal, uniform matter. The premmodern Mediterranean (from roughly the fifth century BCE to the fifteenth century CE) gives us a variety of forms of sexual experience and expression. We will study the history of these forms through texts, images, and objects: from Platonic love or eros to Roman tales of romance, from Judeo-Christian mysticism to Islamic literature, from sexual diets to erotic amulets. Enrollment limited to 25.

CLAS 1770. Ancient Law, Society and Jurisprudence.
After a brief survey of modern legal systems (USA, common and civil law systems), we return to Athens and Rome. Topics: sources of law, its evolution, (e.g., feuding societies); procedural law (e.g., how to bring cases); legal reasoning; rhetoric; substantive law (e.g., regarding marriage, religion, homicide). Different approaches are used: historical, comparativist, anthropological, case-law study.

CLAS 1930A. Introduction to Greek and Latin Meters.
We will survey the major metrical systems of Greek and Roman verse by reading a wide range of short poems and brief extracts. The main concerns will be, first, how to scan poems correctly, and second, how to evaluate metrical and rhythmical choices. Prerequisite: GREEK/LATN 0400, or demonstration of equivalent ability in Greek and Latin.

CLAS 1930B. Dying God.
The figure of the dying god (like Adonis, Osiris, or Attis), embodying both beauty and tragedy, has exerted a fascination from ancient times to the present day. His worship was sometimes central to the community, sometimes marginal, yet compelling in its "outsider" status. His myths invited meditations on love and death in various modes from comedy to epic. This course, through the great mythological texts of Greece and Rome as well as modern literature and art, will explore the figure in all its variety, along with Christian adaptations and recent interpretations. There will be writing assignments.

What was the material underpinning of Greek Society? How did the production and distribution of resources connected individuals and states an what ancient mentalities and ideologies governed this exchange? New scholarly approaches and new evidence have drastically changed how we understand the ancient economy in recent decades. This course will survey key issues in the ancient economy such as Mediterranean ecology, trade, the invention of coinage, taxation, consumption, agriculture, slavery,
and connectivity. In the process, we focus closely on the primary sources, in the form of literacy, archaeanal, numismatic, and epigraphic evidence, while also considering current scholarly methodologies and controversies.

CLAS 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CLAS 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CLAS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CLAS XLIST. Courses of Interest to Classics Concentrators.
Fall 2013
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Archaeology and the Ancient World
ARCH 0270 Troy Rocks! Archaeology of an Epic
ARCH 0535 Labor and Technology in the Roman World
ARCH 0770 Food and Drink in Classical Antiquity
ARCH 1680 Exploring Different Iron Ages: Of Chiefs, Princesses and Warriors

Philosophy
PHIL 0350 Ancient Philosophy

Religious Studies
RELS 0325 Judaism, Christianity and the Bible

Spring 2014
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Archaeology and the Ancient World
ARCH 0420 Archaeologies of the Greek Past
ARCH 2230 Material Networks: Migration and Trade in the Ancient West Mediterranean
ARCH 2295 State Formation in the Prehistoric Aegean

History
HIST 1000A History of Greece: From Alexander the Great to the Roman Conquest

RELS 0325 Judaism, Christianity and the Bible

Greek

GREK 0100. Essentials of the Greek Language.
A two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

GREK 0110. Introduction to Ancient Greek.
Intensive, one-semester introduction to Greek. No previous knowledge of Greek is required.

GREK 0200. Essentials of the Greek Language.
Second half of a two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

GREK 0300. Introduction to Greek Literature.
Introduction to Greek literature through intensive reading. Prerequisite: GREK 0200, GREK 0110, or the equivalent. We will work on grammar skills while reading extensively in the Histories of Herodotus, who is not only the “father of history” but also a great (and delightful) artist in prose.

GREK 0310. Grammar Review and Composition.
Half-credit course with attention to student's individual needs.

GREK 0400. Introduction to Greek Literature.
Prerequisite: GREK 0300 (or the equivalent). Review of grammar of the Attic dialect through rapid reading of texts by Lysias, Plato, or Xenophon. Emphasis on syntax and style.

GREK 1010. Introduction to Greek Drama.
Both for students who have recently finished GREK 0300 and 0400 and for those who have little or no experience of translating Greek drama. Begins with a brief review of Attic grammar with readings in Plato. Then turns to
Greek drama with students reading a play of one of the dramatists and focusing on philological analysis and meters.

GREEK 1050A. Aristophanes. Addresses students with at least an intermediate-level command of Ancient Greek, but previous knowledge of Aristophanic language and poetry is not required. We will read in the original language Aristophanes’ *Frogs*, and study different aspects (language, meter, historical background, theatrical performances, literary interpretations, etc.) of this play and of Aristophanic comedy generally. *Frogs*, composed towards the end of the Peloponnesian War, is one of Aristophanes’ most puzzling plays. It presents a fantasy (and comic?) vision of the afterlife and, indirectly, informs us about the literary criticism of the time.

GREEK 1060. Herodotus. What does it mean to be “the father of history”? We will read the last book of the *Histories* in Greek, supplemented with related texts (some in English translation), as we discuss how this illuminating, entertaining masterpiece spoke to its intended audience and to modern readers as well.

GREEK 1080. Attic Orators. No description available.

GREEK 1100. Advanced Homer: The *Odyssey*. It is hard to imagine a more joyful way to acquire excellent control of Homeric Greek than by reading, in its entirety (if possible), Homer’s wonderful and captivating work, the *Odyssey*. Though it can be a little time-consuming initially, students quickly become familiar with the syntax and the vocabulary, and find great pleasure in immersing themselves in this thrilling masterpiece.

GREEK 1110B. Plato, *Phaedrus*. We will read in Greek Plato’s dialogue *Phaedrus* on love and rhetoric. We will attempt to understand the dialogue as a unified whole, discussing such questions as the link between love and the art of persuasion, Plato’s denigration of writing, and the relationship between rhetoric and philosophy.

GREEK 1110C. Plato: *Statesman*. Reading of Plato’s *Statesman* in Greek and discussion of the questions: What is special about the Statesman’s expertise? How (if at all) does his expertise differ from that of the philosopher? How is the Statesman related to the philosopher-kings in Plato’s *Republic*? Discussion of Plato’s later philosophical method, a topic central of the *Statesman*.

GREEK 1110D. Plato: *Symposium*. Readings in Greek Plato’s *Symposium*, his beautiful dialogue about love and philosophy.

GREEK 1110E. Plutarch. Reading of selections from Plutarch’s works with attention to literary and historical background.

GREEK 1110F. Poetry of Gods and Heroes. Readings in early Greek hymns, creation myths (especially Hesiod’s *Theogony*), and short poems about human struggle and values.

GREEK 1110G. Selections from Greek Authors: Mysteries. We shall read documents pertaining to the Eleusinian Mysteries. In the first part of the course, we focus on orations (Andocides 6, “On the Mysteries”; Lysias 6, *Against Anocides for impiety*). In the second part, we read inscriptions (including ‘sacred laws’) pertaining to the Mysteries.

GREEK 1110H. The *Odyssey*. No description available.

GREEK 1110I. Selections from Greek Authors: *Thucydides*. No description available.

GREEK 1110J. Plato: *Theaetetus*. Theaetetus is in many ways Plato’s most modern dialogue. The central question is: what is it to know something? Is knowledge some sort of skill? Is it perception? True judgment? Some sort of account together with true judgment? We will read the dialogue in Greek and discuss Plato’s fascinating investigation of knowledge.

GREEK 1110K. Early Byzantine Literature. No description available.

GREEK 1110L. Aeschylus’ *Agamemnon*. No description available.

GREEK 1110M. Selections from Greek Authors: Plato, *Sophist*. No description available.

GREEK 1110N. Menander. Thanks to a series of remarkable discoveries over the last century, we can now read several comedies by Menander. In this course, we shall investigate the nature of New Comedy, its typical plot structures and characters, the conditions of its performance, and its relation to the Hellenistic world in which it was composed.

GREEK 1110O. Aristotle: *Nicomachean Ethics*. In this class we will read Books I, II, III, and X of Aristotle’s *Nicomachean Ethics* and discuss his treatment of the highest human good, moral virtue, the doctrine of the mean, and his theory of action.

GREEK 1110P. Sophocles. Close reading of one tragedy by Sophocles. Rapid survey of his other works.

GREEK 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances. Survey of desire in Greek writing, with an emphasis on post-classical texts. Exploration of Platonic love, Roman Greek literature on eros, friendship in late antique and medieval rhetoric and letter-writing, erotic epigrams from Imperial to Middle Byzantine times, depictions of the erotic in hagiographical texts, and, finally, the twelfth-century revival of romantic fiction. Four semesters of Greek required.

GREEK 1110R. Characters and Characterization in Greek Literature. We will read passages from a wide range of Greek literature, both verse (epic, drama, lyric, epigram) and prose (history, oratory, biography, the character sketch), as well as ancient criticism, with our attention focused on the representation of character, individuality, and self-hood, especially in relation to genre.

GREEK 1110S. Xenophon. The writings of Xenophon are among the most varied of any ancient author: they include Socratic dialogues, a continuation of Thucydides’ history, the story of the march upcountry of the 10,000 Greeks stranded in Persia, a biography, a hunting manual, and the earliest surviving historical novel. All are written in an elegant and highly accessible Attic prose. We will read selections from the dialogues, the *Anabasis*, and some other works.

GREEK 1110T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World. In a series of notorious dialogues, Plato delineated a distinction between two professions that were to define future intellectual history: philosophy and rhetoric, the science of thinking juxtaposed to the art of speaking. We will study the transformations of this distinction in four exceptional socio-cultural contexts: Classical Athens, Imperial Rome, Late Antiquity Alexandria, and Medieval Constantinople. We will discuss the basics and varieties of educational curricula (Aristotle’s Academy, Second Sophistic, Neoplatonism), the social position and self-definition of ancient intellectual figures, and the ever-fluid boundaries between content and form, thought and style; ultimately, between philosophy and literature.

GREEK 1110U. Survey of Post-Classical Greek (2nd-12th century CE). This course will study the development of post-classical Greek language and literature with an emphasis on three traditions—the Second Sophistic, late antique discourse (4th-5th centuries), and writing in medieval Constantinople (9th-12th centuries)—through a close reading of texts from
a variety of styles, authors, and genres. The selections will be tailored to the needs of the participants. Prior knowledge of Greek (an equivalent of 2 years) is required. Prerequisite: GREK 0400 or instructor permission. Enrollment limited to 20.

GREK 1100V. Greek Funeral Orations.
Survey of classical Greek funeral orations; authors to be covered include Thucydides, Plato, Demosthenes, and other fourth century prose writers. The emphasis of the course will be on Greek grammar and techniques of prose translation, though throughout the semester we will also be discussing the nature of ancient Greek commemorative discourses, particularly in classical Athens. Some background on Greek lament and other funerary genres will be provided, and short supplementary texts may range from Homeric excerpts to inscribed epitaphs. Students should already have four semesters of ancient Greek (completion of GREK 0400) or the equivalent.

GREK 1110W. Persia in the Greek Historians.
This course will explore Greek encounters with Persia in the 5th and 4th centuries. Following the epoch-making conflict between Greece and Persia, the Persian empire assumed a major place in the historical, literary, cultural, and artistic production of the Greek world. We will access this world primarily though the Greek historians, principally Xenophon, Herodotos, and Ctesias, including Herodotus’ histories, Xenophon’s Cyropaedia and Anabasis, and Ctesias’ Persika. While the focus of the course will be on reading these texts in Greek, we will also engage with modern scholarship on Persia and issues of cultural contact and exchange between these cultures. Recommended prerequisite: Three semesters of Ancient Greek.

GREK 1110X. Aristotle’s Politics.
Aristotle’s Politics is a landmark in the history of political thought: the first systematic study of political life. Thinkers from Aquinas to Agamben and Foucault have taken the Politics as the foundation of their own political theories. In this course, we will read Book 1 of the Politics in its entirety, as well as selections from Books 3, 5, 7 and 8. We will address stylistic, philosophical and philological questions raised by the text, as well as reflecting on larger interpretive questions.

GREK 1110Y. Greek Letter-Writing.
This class surveys the practice and theory of letter-writing in the Greek literary tradition, with an emphasis on post-classical and medieval epistolography. We look at fictional letters as well as real letters, the formation of letter-collections, and the creation of theories, canons, and models of letter-writing. Prerequisite: four semesters of Greek.

GREK 1111A. Lucian.
Improves students’ knowledge of ancient Greek by reading selections from the brilliant satirist Lucian. We will discuss the nature of his genius, the historical context in which he was writing, and the lasting influence of his wit.

GREK 1111B. Polybius.
We will read selections from Polybius’ Histories in Greek. Specific texts to be determined.

GREK 1140. Introduction to Greek Linguistics.
Examines changes that took place in Greek from the time of its separation from its parent language (Proto-Indo-European) to the dialects of Classical times (5th-4th C.B.C.). This course is also an introduction to the methodology of historical linguistics, concentrating on phonology. Proficiency in ancient Greek is required.

GREK 1150. Greek Prose Composition.
Survey of Greek grammar and an opportunity to reflect on problems of translation. Main goals: to improve the students’ command of prose syntax (both in reading and writing), and to develop a keen sensitivity towards issues of translation. A variety of texts written in Attic prose are read and analyzed in class. Students are expected to write two to three compositions a week in good Attic prose. Advanced knowledge of ancient Greek is a prerequisite for this course.

GREK 1260. Plato and Aristotle.
No description available.

GREK 1260A. Plato’s Protagoras.
Plato’s Protagoras is a literary and philosophical masterpiece representing a great gathering of intellectuals, including Socrates and the sophist Protagoras. The two men try to out-wit each other on such topics as political theory, literary criticism, and education. Major questions throughout the discussion are: What is the role of knowledge in a successful life, and how can we acquire knowledge that leads to success? We will read the dialogue in Greek. Prerequisite: two years of Greek (GREK 0400) or demonstrated equivalent ability.

GREK 1810. Early Greek Literature.
Surveys early Greek literature. Works studied include the Iliad, Odyssey, the Hesiodic poems, and archaic lyric and elegiac poetry. Emphasis on literary interpretation, the interpretive problems inherent in the study of archaic poetry, and the poetics of oral poetry. Extensive readings in the original.

GREK 1820. Fifth Century Survey.
We begin with Pindar and read poetry and prose literature composed throughout the fifth century, with attention to its historical development styles, and the intellectual ideas that drive it.

GREK 1910. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

GREK 1930A. Euripides.
The plays of Euripides and related works, subject to consultation with students.

GREK 1930B. Greek Epigraphy.
Practical (making and reading squeezes, identifying letters, locating inscriptions, etc.) and analytical aspects of epigraphy will be pursued. The major focus will be legal inscriptions from the Greek world.

GREK 1930C. Introduction to Greek Papyrology.
During the 20th century, papyrology has become the most important source for new literary texts, with three substantial discoveries in the last decade (Simonides, Empedokles, Poseidippos). Provides an introduction to the basic techniques of this comparatively young discipline: material evidence, decipherment, dating, interpretation, restoration, editing, etc. Focus on literary texts, but documentary papyri will also be examined.

GREK 1930D. Rapid Reading in Plutarch.
No description available.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

GREK 2000A. Aristophanes.
No description available.

GREK 2000B. Greek Epigraphy.
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g. regarding historical context) will be explored.

Rapid reading of selections from Plutarch’s Lives and from from his Moralia.

No description available.

GREK 2020A. Sophocles.
No description available.

GREK 2020B. Herodotus.
Books 3 to 5.

GREK 2020C. Pindar.
No description available.
GREEK 2020D. Thucydides.  
Books I and VIII: language, mode of thought, and methodology; how the work was composed, historical problems; supplementary sources: epigraphical, literary.  

GREEK 2050A. Demosthenes.  
No description available.  

GREEK 2050B. Documents: Religious Cults and Sacred Laws.  
In the first half of the course we shall read documents pertaining to the Eleusinian mysteries in Athens, including (a) two orations, Andocides 1 "On the Mysteries," and Lysias 6 "Against Andocides for impiety," (b) a variety of inscriptions published by Clinton (in Eleusis, The Inscriptions on Stone: Documents of the Sanctuary of the Two Goddesses and Public Documents of the Deme), and (c) the grand inscription of Adnania (ca. 92 B.C., not Eleusinian but related). In the second half of the course, we shall read inscribed sacred laws from Greece and Asia Minor, from the fifth to the first century B.C.  

GREEK 2070B. Seminar: Hellenistic Poetry.  
In this course, we will read extensive selections of Theocritus, Apollonius of Rhodes, and Callimachus, supplemented by readings in Herodas and Hellenistic epigrams. We shall investigate the nature of the Hellenistic aesthetic, the relation of Hellenistic to archaic and classical poetry, and the way Hellenistic poetry is a reflection of its time and place. Please note: GREK2070B is being team-taught by David Konstan and Pura Nieto Hernandez.  

GREEK 2100A. Homer.  
A close reading of the entire Odyssey, exploring all aspects of the poem, from its oral composition, language, and style to its background myths and social dimensions. Homer's text will be read in Greek, and extensive secondary sources in several languages will be used.  

GREEK 2100B. Literary Criticism in Greek Scholia.  
No description available.  

GREEK 2100C. Drama and the Polis.  
No description available.  

GREEK 2100D. Ancient Literary Criticism.  
Survey of ancient literary theory, with an emphasis on Greek sources. Topics to be covered include the representation of poets, the nature of inspiration, the elements of literary style, the moral and ethical uses (and dangers) of poetry, mimesis, the relationship between poetry and citizenship, literature and education, etc. We will read, in Greek, excerpts from (e.g.) Aristophanes' Frogs, Plato's writings on poetry, Aristotle's Poetics, Plutarch's How a young man should study poetry, and pseudo-Longinus' On the Sublime. Students will be evaluated on the basis of in-class presentations, two translation exams, and a seminar paper.  

GREEK 2110A. Thucydides.  
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g., regarding historical context) will be explored.  

GREEK 2110E. Aeschines and Demosthenes, "Crowning Speeches".  
GREEK 2110F. Greek Palaeography and Premodern Book Cultures.  
Introduction to pre-modern Greek book culture and the study of Greek literary scripts from classical antiquity to the Renaissance. Students become acquainted with the history of books, the context and agents of their production, and the transmission of Greek (classical as well as post-classical) literature. Training is provided in reading and dating different scripts and in editing ancient texts.  

GREEK 2110G. Political Trials: Treason and Accountability in Fourth Century Athens.  
In studying trials of treason and accountability, we shall examine the democratic ideologies and political factionalism that fueled the trials and also the legal armature that rendered them possible. Our sources for the most part are speeches written by the Attic orators (Demosthenes, Aeschines, Lycurgos, Deinarchos, and Hypereides) and include impeachment trials for treason by commission of adultery, for having the wrong dream in the Amphipreon, for leaving Athens in wartime; an accountability trial for treasonous conduct while serving on an embassy; and trials (including the prosecution of Demosthenes) for accepting bribes from Alexander's agent, Harpalos.  

GREEK 2120A. Graduate Seminar: Greek Autobiography: From Plato to the Middle Ages.  
An exploration of autobiographical narratives written in Greek from classical to Byzantine times, focusing on the relation between changing notions of the self and the development of autobiography as a literary genre. Authors examined: Plato, Demosthenes, Nicolaus of Damascus, Marcus Aurelius, Aelius Aristides, Lucian, Gregory of Nazianzus, Libanius, Synesius, Michael Psellos, Michael Attaleiates, and Anna Comnena.  

GREEK 2150. Plato's Theaetetus.  
See PHIL 2150I for course description.  

GREEK 2970. Preliminary Exam Preparation.  
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.  

GREEK 2980. Reading and Research.  
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.  

GREEK 2990. Thesis Preparation.  
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.  

Latin  
LATN 0100. Essentials of the Latin Language.  
An intensive two-semester approach to Latin with special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required.  

LATN 0110. Introduction to Latin.  
Intensive, one-semester introduction to Latin. No previous knowledge of Latin is required.  

LATN 0200. Essentials of the Latin Language.  
Second course in an intensive two-semester approach to Latin. Special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required.  

LATN 0300. Introduction to Latin Literature.  
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).  

LATN 0310. Grammar Review and Composition.  
Half-credit course with attention to student's individual needs.  

LATN 0400. Introduction to Latin Literature.  
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).
LATN 0510A. Latin Mystical Writing.
We read variously in Latin those authors (Cicero, Horace, Augustine, Anselm, Hildegard) who articulate the best traditions of mysticism in the West: a longing for transcendence, alienation, unity through participation with divinity and culture. Prerequisite: A knowledge of Latin at the intermediate level (one or two years).

LATN 0510B. Medieval Latin Lyric.
Open to students with two years of Latin.

LATN 1010. Latin Lyric: Catullus and Horace.
Introduction to Latin lyric poetry through the poems of its finest representatives, Catullus and Horace. Emphasis placed on careful reading of the poems, which will be considered individually, as parts of a collection, and as representatives of the poetry we call lyric. The primary objective of the course is to improve students' ability to read Latin lyric poetry fluently, in terms of meter, grammar, syntax, and literary-critical appreciation. We will also read and discuss a selection of seminal articles on ancient lyric, and students will get experience (and guidance) writing scholarly criticism.

LATN 1020A. De Oratore.
No description available.

LATN 1020B. Cicero, Verrines.

LATN 1020C. Cicero’s Republic.
As one of the only texts that articulates a "Roman" political philosophy, Cicero’s De Re Publica is indispensable for students with an interest in Roman history or classical political thought. In this class, we will address the text from both these perspectives; but we will also read it as a work of literature that remakes the genre conventions of the Platonic dialogue for a Roman readership. We will also address the complex relationship between the text of De Re Publica and the troubled times in which it was written.

LATN 1040A. Virgil: Eclogues and Georgics.
Virgil, most famous as the poet of the Aeneid, began his career with two smaller masterpieces: a collection of ten bucolic poems (Eclogues) modeled on the Idyls of the Hellenistic poet Theocritus, and a didactic work on agriculture in four books, the Georgics, which found its inspiration both in Hellenistic models and in more recent Roman antecedents (including Lucretius’ De Rerum Natura) and is viewed by many as the poet’s finest achievement. We will read selections from both works, concluding with the epyllion at the end of Georgics Four, which relates the tragic love story of Orpheus and Eurydice.

LATN 1040B. Virgil: Aeneid.
Close reading of selections from all twelve books of Virgil’s epic.

LATN 1050. Horace Satires, Epistles and ‘Ars Poetica’.
We will read selections from each of these collections of Horace’s hexameter poetry, in which we learn much about the poet’s life and education, his friendships with Vergil and others, his relationship with his patron Maecenas and eventually with Augustus, and his theories about the “Art of Poetry” as it should best be practiced and appreciated. We will also consider the place of Horace’s poems in the development of the satirical and epistolary genres at Rome as well as the influence of these works on the later poetic (and literary-critical) tradition.

LATN 1060A. Latin Prose: Further Readings in Roman Historiography.
No description available.

LATN 1060B. Sallust.
A study of the nature and themes of Roman historical writing through reading one of its major representatives: “Catholicarian Conspiracy” and selections from Sallust’s other works. Comparison with other authors writing on the same topic.

LATN 1060C. Sallust and Livy.
Two major Roman historians provide a basis for study of style, intent, veracity, and stature.

LATN 1060D. Sallust, Livy, and Tacitus.
Three major Roman historians provide a basis for study of style, intent, veracity, and stature.

LATN 1060E. Livy.
Close readings of Livy’s history of Rome, From the Foundation of the City. As we read selections from Books 1, 5, and 21, we will explore several historiographical aspects of Livy’s text. We will consider both the historical tradition Livy was adapting and the influence and intrusion of the Augustan regime upon Livy’s particular construction of the past. We may pay special attention to the roles played by myth, legend, and history. We will also discuss the text as literature and examine how the historian structures and crafts his work into individual books, sets of books, and a coherent multi-volume whole.

LATN 1060F. Ovid.
Reading of selections from Ovid’s poetry, with emphasis placed both on close reading and on the texts’ engagement with poetic issues (genre and intertextuality) and with the wider political and cultural issues of Augustan Rome.

LATN 1060G. Tacitus.
Will examine the literary and historical significance of Tacitus’ Annals. In addition to reading the entire Annals in English, we will focus on books 1 and 4 of the Latin text, translating 6-8 pages per week (time permitting, we will also practice some sight-translations from book 14). In an effort to understand Tacitus’ place in the ancient historiographical tradition, we will read several secondary sources, many of which respond to (or build on) Ronald Syme’s monumental work. Not open to first year students.

LATN 1060H. Conquest: Caesar and Tacitus.
Caesar’s account of the Gallic Wars reconstructs his conquests, defeats, and ultimate victory. We will consider the great general’s aims and objectives in launching such a major military campaign and in writing a history of these endeavors. Was he simply seeking greater glory for the Roman people? After the midterm, we will turn our critical attention to the life of another Julius: Cn. Iulius Agricola, the Imperial general largely responsible for Rome’s conquest of Britain. In this moral biography of his father-in-law, Tacitus mixes panegyric and invective to reveal the less savory aspects of imperialism: Rome’s rapacity, corruption, greed, and despotism.

LATN 1060I. Senecan Tragedy.
Close reading and thorough translation of two Senecan revenge tragedies, the Medea and Thyestes. Emphasis will be on translation of the Latin, but as time permits we will also be discussing the two plays in their mythological, cultural, historical, and performance contexts. Students should already have four semesters of Latin (LATN 0400) or the equivalent.

LATN 1110A. Apuleius.
No description available. WRIT

LATN 1110B. Augustine, Confessions.
We will read the Confessions in the light of Augustine’s use of ancient scriptural and pagan language, attending to the ways in which diction impinges on meaning in the autobiographical portions of the work. We will also read excerpts from some of the works written prior to it as a control and on our understanding of the Confessions.

LATN 1110C. Caesar: Bellum Gallicum.
No description available.

LATN 1110D. Civil War Literature.
Reading of Latin works that deal with the reality and experience of civil war, focusing primarily on the civil war of 49-48 B.C.E.: Caesar’s Civil War, Cicero’s letters of the time, Cicero’s Caesarian orations, and selections from Suetonius and Lucan. Additional readings in translation.

LATN 1110E. Comedy.
No description available.

LATN 1110F. Fortunatus.
Wide reading in the occasional poetry of the most prolific writer of the early Middle Ages, attending to diction, meter, imagery, allusion, and paying special attention to the (homo- and hetero-) erotic pieces written to the poet’s friends.

LATN 1110G. Latin Love Elegy.
Reading of representative selections from each of the Roman elegists: Tibullus, Propertius, and Ovid. Discussion also of the origins and development of love elegy at Rome and exploration of the themes and topoi that define the genre. Follows the poets’ negotiations with various
discourses and ideologies in Augustan Rome: literary, social, sexual, and political.

LATN 1110H. Literature at the Court of Charlemagne.
We will read widely in the Latin literature of the eighth and ninth centuries, paying attention to genre, meter, patronage, and the shifting uses put to poetry in the decades in which Charlemagne ruled.

LATN 1110L. Lucretius.
Lucretius’ De Rerum Natura, a long philosophical poem, is both a major source for Epicurean philosophical thought and an example of the ambitious Latin poetry of the late Roman Republic. We will read extensive selections from the poem in Latin. Our aim will be to make a detailed exploration of these sections through close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

LATN 1110J. Petronius.
Close reading of Petronius’s comic masterpiece, the Satyricon, with emphasis on questions of form, narrative technique, and literary intention.

LATN 1110K. Selections from Latin Authors: Ausonius.
We will read widely in the poetry of Ausonius, aiming for depth and breadth, but focusing especially on those poems that speak to the ways in which the poet transformed or transferred the classical Latin tradition to his successors.

LATN 1110L. Medieval Latin Lyric.
Close reading of a representative sampling of the personal poetry of the Latin Middle Ages, paying attention to what constitutes the lyric mode in the fourth through the twelfth centuries, developments in metrics, the effects of Christianity on vision and voice, the pressures of vernacular traditions, lyric rhetoric.

LATN 1110M. Plautus.
We shall read two or three plays of the comic genius of ancient Rome, with focus on Plautus’ language and cultural background.

LATN 1110N. Latin Comedy: Terence.
We shall read several plays of Terence. This course is ideal for freshman who have studied Latin for three or four years in high school and who are taking their first college course and for students returning to Latin after an interval without Latin.

LATN 1110O. Roman Satire.
Survey of the genre of Roman verse satire, with special attention to Horace and Juvenal and additional readings in Lucilius and Persius.

LATN 1110P. Lucan’s Civil War.
We shall read closely Books 1 and 2 plus further selections from all ten books of Lucan’s epic. Focus will be on translation of the Latin as well as consideration of the poem in its literary and historical context, Neronian Rome. Topics of discussion will include Lucan’s choice and treatment of his historical subject (the Civil War between Caesar and Pompey), his use of highly rhetorical (and often gruesome) language, and his relationship with the epic tradition and, more specifically, with his most significant epic predecessor, Vergil. We shall also read the entire poem in English translation.

LATN 1110R. Catilines: Cicero and Sallust.
Close readings of selections from Cicero’s Catilinarians and Sallust’s Bellum Catilinae. We will explore how two contemporary authors responded to the same historical event: the Catilinarian conspiracy. We will consider not only the differences of genre (political speech v. historical monograph), but also the ways in which each author’s involvement affected the content of his presentation. Additionally, we will examine Sallust’s and Cicero’s distinctive positions on Latin diction and stylistics. Prerequisite: Knowledge of elementary Latin grammar and intermediate Latin reading skills.

LATN 1110S. Catullus.
We will read all the extant poetry of Catullus with an emphasis on close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

LATN 1110X. Selections from Latin Authors: Ovid, Ars Amatoria.
This course will cover Ovid’s Ars Amatoria, Book One, as well as other selections from Ovid. Our aim will be a detailed exploration of this poetry through close reading of the Latin text and discussion of linguistic, literary, and cultural questions. Quizzes, exams, and a 7 to 10-page term paper will be required.

LATN 1110Y. Latin Epitography (Cicero, Pliny).
The personal correspondences of Cicero and of Pliny the Younger offer insight into the social and political workings of Rome in two critical periods: the final decades of the Republic and the decades just before the Empire reached its greatest extent. Selections from Cicero, composed for a private audience, expose the statesman’s inner hopes and anxieties regarding his family, his friends, and his state. Selections from Pliny, self-consciously published by the author himself, not only recount exciting moments in Roman history (such as the early persecution of Christians and Vesuvius’ eruption), but also play with the very genre of epitography.

LATN 1110Z. Dying in the Republic.
For those who witnessed the bloody violence and brutal butchering of the late Republic, death and dying were everywhere. What did these Romans believe happened to the dead? Was there an afterlife? This course explores two texts (Virgil and Cicero) that deal with visions from and of the spheres beyond the realm of the living. Discussion of supplementary material from other authors, religious studies, and material evidence further develop our notions of what it meant to die in the Republic.

LATN 1120A. Literary Culture in the Latin Middle Ages.
This course will survey the genres relevant to the Latin Middle Ages (beast poetry, hymns, sequences, tropes, miracle and passion plays, prosimetrum) and older forms in their medieval incarnations (epic, lyric, elegy, pastoral). We will also do some work in manuscript production, including the interplay of visual and textural modes. Work in selected medieval vernaculars is possible for students so inclined. We will focus on the tenth through the thirteenth centuries.

LATN 1120B. Poetry at the End of the Roman World.
Edward Gibbon thought the “fame of Ausonius condemned the taste of his age.” Study of the taste of Ausonius’ age, surveying Latin literature written during and after the so-called fall of Rome. Focus on some masterworks of Silver Latinity as a bridge to our period. Sampling of literature from the 4th, 5th, and 6th centuries. Authors include Prudentius, Ausonius, Paulinus of Nola, Sidonius, Avitus, and Fortunatus.

LATN 1120C. Survey of Late and Medieval Latin.
A study of the masterworks of the Latin language written between 350 C.E. and 1300 C.E., with special emphasis on the 4th, 8th, and 12th centuries. The historical development of Latin literature; changes in Latin grammar, syntax, and morphology; innovations in genre, prosody, and stylistics; and the relationship of writings (manuscripts) to art and music.

LATN 1120D. Alcuin.
Alcuin lived a life of wide variety and accomplishment, not least as an important member of Charlemagne’s inner circle and, like many at court, he wrote widely and in multiple genres. From his enormous output this course will focus on the large collections of poetry and letters. We will attend in both gatherings to theme, tone, style, and allusivity and, where appropriate, we will ponder alternate readings in a collection that has not been edited since the late nineteenth century.

LATN 1120E. Writing Lives in Late Antiquity: Jerome and Augustine.
This course will explore the development of new forms of biographical and autobiographical writing in Latin in the fourth and fifth centuries CE. We will focus on two monumental late ancient authors, Jerome and Augustine, and examine the way that these Christian intellectuals conceive of and express ideal lives in a newly Christian Empire. Texts will include selections of Jerome’s Lives of Paul the Monk and Hilarius, his letters, and Augustine’s Confessions.

LATN 1150. Latin Prose Composition.
Review of the basic tenets of Latin syntax, composition, and style. English to Latin translation exercises will shore up composition skills, as we study the stylistic traits of seven Roman authors: Cato, Caesar, Cicero, Sallust, Livy, Seneca, and Tacitus. The course will proceed chronologically according to author. Class time will be spent on translation exercises and review, as well as the identification of the stylistic and syntactic characteristics of the seven authors under study.
LATN 1250. Law and Literature.
No description available.

LATN 1810. Survey of Republican Literature.
Our purposes in this survey of Latin literature are to acquire a comprehensive historical perspective on Latin poetry and prose until the end of the Republic and a sense of its phases and the dynamics of its tradition; and to read different styles of Latin poetry and prose with confidence and ease.

LATN 1820. Survey of Roman Literature II: Empire.
This course will survey the major authors of Latin literature in chronological order from Virgil.

LATN 1930A. Cicero: De Oratore.
Close reading of Cicero's de Oratore.

LATN 1930B. Ammianus Marcellinus.
In brilliant if idiosyncratic language, Ammianus Marcellinus, last of the major Latin historians, records the exciting and fateful events of his own times, the fourth century A.D., including therein his personal and dramatic involvement in events. We will chiefly read his famous account of the deeds of the emperor Julian ("the Apostate"). The course is intended for advanced students.

LATN 1970. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

LATN 2000A. Senecan Tragedy.

LATN 2010A. Catullus in Horace.
No description available.

LATN 2010B. Horace's Epistles.
No description available.

LATN 2010C. Ovid, Metamorphosis.
No description available.

LATN 2010D. Seminar: Roman Comedy.
We start with a couple of plays of Menander and fragments of New Comedy; we then read representative comedies of Plautus and Terence in depth.

No description available.

LATN 2010F. Ovid: Tristia.
Close examination of the eleven poems that comprise the first book of Ovid's Tristia.

LATN 2010G. Roman Agricultural Writers.
No description available.

LATN 2010H. Varro.
Survey of the works of Rome's greatest scholar, the polymath M. Terentius Varro, with focus on De Re Rustica, De Lingua Latina, Antiquitates, and the Menippean satires.

LATN 2010I. Appendix Virgiliana.
We will survey the Latin poetry of the Julio-Claudian period, focusing on collections of pseudonymous texts that have come down under the names of Virgil and others and that include epic, lyric, epigrammatic, elegiac, and other types of poetry, ranging in theme from high-flown panegyrics to raunchy Priapea. Some of these exerted great influence on later writing; some are almost unknown. We will aim for a more nuanced view of Latin poetry and Roman culture between and around the better-studied poetic texts of the period.

LATN 2010J. Terence and Reception in Donatus.
No description available.

LATN 2020F. Seminar: Ammianus Marcellinus.
No description available.

LATN 2030A. The Age of Augustus.
No description available.

LATN 2030B. Seminar: Augustine and Virgil.
We will read widely in the early writings of Augustine (in English and in Latin), analyzing the ways in which he articulates and practices a specifically Christian mode of reading that, while taking cognizance of ancient practice, is new to the Western tradition—and heretofore unrecognized.

LATN 2030G. Augustine: Confessions.
A close reading of selected books of the Confessions against the backdrop of its pagan and Christian sources. Part of the seminar will be devoted to re-constructing the readerly and writerly spaces Augustine inhabits, how those spaces impinge on his engagement of his sources, and what sort of readerly competencies the imply.

LATN 2030H. Graduate Seminar: Caesar, Bellum Civile.
No description available.

LATN 2040. Seminar: Roman Literature.
No description available.

LATN 2060A. Late Latin Literature.
No description available.

LATN 2080B. Lucan.
No description available.

LATN 2080C. Late Latin Poetry.
We will read widely and quickly in a selection of poets (Prudentius, Claudian, Sidonius, etc.) but focus our work on the poetry of Fortunatus and Alcuin, paying attention especially to textual issues and the history of scholarship, such as it is, of select poems. Reading knowledge of French required. The seminar will convene for one week at the conference on late Latin poetry to be held in October 2011 on campus. Open to graduate students; advanced undergraduates may enroll with instructor permission.

LATN 2080D. Late Latin Poetry.
We will read selectively in the fourth (Asonius, Prudentius) and the sixth (Fortunatus) centuries, paying attention to the ancient Latinity informing the compositional habits of these poets, and focusing on the collective writing of a commentary on one book of Fortunatus' collection. There will be regular reports and some guest lecturers.

LATN 2080E. Seminar: Fortunatus and Alcuin.
We will read closely in the poetry of Fortunatus and Alcuin, paying attention to the ways in which both receive and exploit their classical inheritance, especially (the supposedly lost) Catullus. In addition to attending to the normal accoutrements of literary reading, we will focus on the role of ambiguity in both poet's projects, the conception and function of allusivity, and shifts in literary culture and their implications for how we historicize Latin poetry. A reading knowledge of French is required.

LATN 2090A. Elegy.
No description available.

LATN 2090B. Lucretius.
In this seminar, we will read Lucretius' De rerum natura entire, and discuss it both as a work of Epicurean philosophy and as one of the world's greatest works of didactic poetry and a masterpiece of Latin literature. Background texts will be assigned from time to time.

LATN 2090C. Ovid: Exile Poetry.
No description available.

LATN 2090D. Propertius.
We will concentrate especially on the elegist's third book, which has been viewed both as a work of closure (a farewell to the erotic themes dominant in the earlier books) and as transitional (as the poet moves toward the more overtly Callimachean stance and political themes that will characterize the fourth book). While our primary interest will be literary-critical, including especially the elegist's engagement with his Roman contemporaries, we will also engage seriously with textual criticism, employing Heyworth's Cynthia and the new Oxford commentary on Book 3 (in addition to the other major commentaries).

LATN 2090F. Tibullus.
No description available.

LATN 2090G. Epigrams.
No description available.
LATN 2110. Seminar: Roman Satire.
No description available.

LATN 2120A. Roman Epigraphy.
A practical introduction to the study of Latin inscriptions, with emphasis on the reading, editing, and interpretation of texts on stone. Class time will be divided between discussion of various categories of texts in the light of the 'epigraphic habit,' literacy, and the sociology of reading in antiquity and hands-on experience with editing inscriptions on stone.

LATN 2120B. Tacitus.
Close readings of selections from Tacitus's works, especially the Agricola, Dialogus, and Annales, with emphasis on style, form, and literary intent. Attention will be paid also to Tacitus's political career and the life of a senatorial historian in the age of Trajan.

LATN 2120C. Graduate Seminar: Apuleius.
No description available.

LATN 2120D. Petronius.
Detailed consideration of the Satyricon of Petronius, with special attention to the manuscript tradition, form, style, and literary intentions of the work. Prerequisite: advanced Latin reading ability.

LATN 2970. Preliminary Exam Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

LATN 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

LATN 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Modern Greek

MGRK 0100. Introduction to Modern Greek.
Designed for students with little or no prior knowledge of Modern Greek. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0200. Introduction to Modern Greek.
A continuation of MGRK 0100. New students may place into it, after special arrangement with the instructor. The course continues on an integrative skills approach and aims to develop language skills, within a framework of specific topics and functions. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0300. Intermediate Modern Greek.
Develops linguistic and cultural competence and may be taken by anyone who has completed MGRK 0200 or after consultation with the instructor and/or a placement exam. It focuses on further development of the four language skills as well as knowledge and understanding of various aspects of Greek society. It employs a variety of materials, including film, digital stories, internet based sources, music, art, and literature.

MGRK 0400. Intermediate Modern Greek.
A continuation of MGRK 0300. New students may place into it, after special arrangement with the instructor. It aims to enhance language skills within a variety of registers and themes; enable the students to master, use and understand effectively essential linguistic structures; examine a variety of expressive forms within an authentic cultural context.

MGRK 0500. Advanced Modern Greek.
May be taken by students who have completed the previous sequences or by anyone who places successfully into the course. The course places emphasis on the improvement of writing and oral skills, via presentations, collaborative projects, conversations and assignments based on topics and texts, drawn from a variety of sources and cultural forms of expression.

MGRK 0600. Advanced Modern Greek.
A continuation of MGRK 0500. Students who have not taken the previous sequence may take a placement test, after consultation with the instructor. The course aims to promote range, accuracy and fluency and enable students to develop ease and spontaneity with the language. Authentic materials drawn from a range of sources inform the content of the course and include films, literature, media, testimonies, music and internet based sources. The development of transcultural competence will be an essential component of the course.

MGRK 1910. Special Topics in Modern Greek.
No description available.

Sanskrit

SANS 0100. Elementary Sanskrit I.
This course introduces Sanskrit to students who have no prior knowledge of any language other than English. Students quickly learn to read the Devanāgarī script and study the basics of the sound-system of Sanskrit. The course rapidly surveys the basics of Sanskrit grammar while using adaptations of classical Indian myths and stories as reading exercises.

SANS 0200. Elementary Sanskrit II.
This course continues the survey of grammar and the reading exercises of SANS 100. The second half of this course reads selected passages of the Bhagavad Gītā and the beginning of the classic story of Nāla and Damayanti from the Mahābhārata. Prerequisite: SANS 0100.

SANS 0300. Sanskrit Epic Narrative.
Consolidates and extends the knowledge of Sanskrit grammar introduced in first year Sanskrit; acquaints students first-hand with basic themes of ancient Indian culture, and cultivates the reading and interpretive skills necessary to read epic and closely related Sanskrit narrative with comprehension and increased fluency. Prerequisite: SANS 0200.

SANS 0400. Classical Sanskrit Story Literature.
Introduces students to the more challenging Sanskrit of classical story literature and continues to extend the knowledge of Sanskrit grammar introduced in first year Sanskrit and developed in SANS 0300, as well as present basic Indian cultural themes. Prerequisite: SANS 0300.

SANS 1020. Early Sanskrit Philosophy and Religion.
Reading in Sanskrit of selections from the Upanishads, Bhagavad Gītā, Dharmasāstras, etc. Prerequisite: SANS 0200.

SANS 1080. The Critical Epistles of the Mahābhārata.
A guided tour of the structure of the Mahābhārata, “The Great Epic of India,” through the reading in Sanskrit of selected critical passages.

SANS 1100. Vedic Sanskrit.
Introduction to reading the Rig Veda and later Vedic literature, with particular attention to the grammar of Vedic Sanskrit.

SANS 1400. The Sanskrit Grammatical Tradition.
Introduction to the Sanskrit tradition of vyākārana (grammatical derivation and analysis) through reading Pāṇini’s Astādhyāyī and commentaries upon it.

SANS 1600. Sanskrit Belles Lettres.
Introduction to kāvya (classical Sanskrit belles lettres)—poetry, drama, and prose narrative—through the reading of authors of the Classical Period as well as works on aesthetics and commentaries upon them.

SANS 1800. Classical Schools of Indian Philosophy.
Introduction to the classical Brahminic darsanas (comprehensive, rationalized systems of philosophy and, or, theology dealing with Hermeneutics and Philosophy of Language, Logic, Metaphysics, and Ultimate Beatitude) and to corresponding Buddhist and Jain traditions through reading, in Sanskrit, of selected works. Prerequisite: SANS 0400.
In-depth study of major poetic, dramatic, epic, philosophical, religious, grammatical, medical, or astronomical texts. Topics depend on the interest of students.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor’s permission required.

SANS 2100. Theme, Language, and Meter in the Mahābhārata.
This seminar will undertake systematic studies of thematic, linguistic, and metric continua in the text of the written Sanskrit Mahābhārata. We shall alternate between the discussion of important scholarly works of interpretation of the epic, important methodological controversies, and selected case studies focused upon variations in epic language and meter and the tracing of the ‘threads’ of important epic themes across large stretches of the epic. Prerequisite: three or more years study of Sanskrit. Instructor permission required.

SANS 2120. The Development of Yoga and Sāṃkhya in Early Indian Thought.
This seminar will read selections from the old Sanskrit Upanisads, Dharma Literature, Mahābhārata, Purāṇas, and early dārsana literature (pre 500 CE) to trace the development of some of the characteristic themes of the cosmology and psychology of Yoga and the emergence of Sāṃkhya philosophy from them. Advanced knowledge of Sanskrit and permission of the instructor is required.

SANS 2970. Sanskrit Preliminary Exam Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

SANS 2980. Sanskrit Reading and Research.
Section numbers will vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

Cognitive, Linguistic and Psychological Sciences

Chair
William C. Heindel

Associate Chairperson
Kathryn T. Spoehr

The Department of Cognitive, Linguistic & Psychological Sciences is dedicated to the multidisciplinary study of mind, brain, behavior, and language, and was formed through the merger of the Department of Cognitive and Linguistic Sciences and the Department of Psychology. Both departments have had a long and distinguished history at Brown: the Department of Psychology was created in 1892, and the Department of Cognitive and Linguistic Sciences was created in 1986 by merging the Department of Linguistics with the faculty participating in the Center for Cognitive Science. The two departments have typically taken complementary approaches to common scientific questions. State-of-the-art research on these problems requires spanning several levels of analysis using a range of approaches and methodologies, and the integration of the departments aims to create an environment in which this intellectual synthesis will flourish.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/CLPS/

Cognitive Neuroscience Concentration Requirements

Cognitive neuroscience is the study of higher cognitive functions in humans and their underlying neural bases. It is an integrative area of study drawing primarily from cognitive science, psychology, neuroscience, and linguistics. There are two broad directions that can be taken in this concentration - one is behavioral/experimental and the other is computational/modeling. In both, the goal is to understand the nature of cognition from a neural perspective. The standard concentration for the Sc.B. degree requires courses on the foundations, systems level, and integrative aspects of cognitive neuroscience as well as laboratory and elective courses that fit within a particular theme or category such as general cognition, vision, language or computational/modeling. Concentrators must also complete a senior seminar course or an independent research course. Students may also participate in the work of the Brown Institute for Brain Science, an interdisciplinary program that unites ninety faculty from eleven departments.

Standard program for the ScB degree

Concentration Courses
A total of 16 courses are required for the concentration. Each student is required to pass 9 courses designed to introduce students to the foundations (5), systems level and integrative aspects (4) which uniquely define cognitive neuroscience; two laboratory courses; four elective courses; and either a senior seminar course CLPS 1900 or an independent research course. The laboratory and elective courses should fit within a particular theme or category such as general cognition, vision, language, or computational/modeling. The design of the concentration and selection of courses should be made in consultation with the faculty advisor.

Foundation Courses:

One senior seminar course CLPS 1900 or an independent research course. 1

Total Credits 16

---

1. Note: Students wishing to pursue a computational/modeling track are encouraged to take APMA 1650.
2. Please note that due to enrollment limits in some lab courses, priority may be given to concentrators in that department. Students should therefore be prepared to choose from the other laboratory options.
3. **May be used for only one laboratory credit**
4. Normally only one elective course that is below the 1000-level may count towards the elective courses required. An appropriate (but additional) laboratory course may be used in lieu of one of the four elective courses. Appropriate Topics course offerings (not listed above) may also count as electives with the approval of the concentration advisor.
5. Students are advised to take APMA 0330 (Methods of Applied Analysis I) and APMA 0340 (Methods of Applied Analysis II) as their two supporting science courses. Note that MATH 0100 is a prerequisite for these courses. See CLPS listings (above) for other computational/modeling courses. See CLPS topics listing for other computational/modeling courses.

**Honors**

Students who would like to pursue a degree with honors are normally expected to have half of their grades as A (or equivalent) within the concentration and are required to satisfactorily complete a written thesis and an oral presentation.

**Cognitive Science Concentration Requirements**

The field of Cognitive Science uses scientific methods of experimentation, computational modeling, and brain imaging to study mental abilities such as perception, action, memory, cognition, speech, and language, as well as the development and evolution of those processes. Students must become knowledgeable in four areas of emphasis: perception, cognition, language, and cognitive neuroscience, as well as a set of methods relevant to Cognitive Science research. Students then create their own focus area of study, potentially integrating coursework from the Cognitive, Linguistic, and Psychological Sciences department with a diverse subset...
of fields including Anthropology, Applied Math, Education, Neuroscience, and Philosophy. The A.B. program is primarily for students interested in studying human mental processes and acquiring a research orientation to the study of the mind. The Sc.B. program is designed for students who wish to develop a stronger background in Cognitive Science and requires students to engage in a specific research project in the focus area of their choosing. We recommend that prospective concentrators register for one of the gateway courses and at least one other core course in their first or second year.

### I. Standard program for the A.B. degree: 13 courses

II. Standard program for the Sc.B. degree: 18 Courses

Gateway:

CLPS 0020 Approaches to the Mind: Introduction to Cognitive Science (formerly COGS 0010) (or alternative, with permission of the Concentration Advisor)

Required Core Courses:

CORE IN COGNITION
CLPS 0200 Human Cognition (formerly COGS 0420)

CORE IN LINGUISTICS
CLPS 0300 Introduction to Linguistic Theory (formerly COGS 0410)

CORE IN PERCEPTION
CLPS 0500 Perception and Mind (formerly COGS/PSYC 0440)

Select one of the following:

CORE IN COGNITIVE NEUROSCIENCE
NEUR 0010 The Brain: An Introduction to Neuroscience

CLPS 0400 Mind and Brain: Introduction to Cognitive Neuroscience (formerly COGS 0720)

Required courses in skills and methodology:

One Experimental Laboratory course such as:

CLPS 0109 Research Methods in Psychology (formerly PSYC 1090)

CLPS 0600 Techniques in Physiological Psychology (formerly PSYC 1030)

CLPS 0610 Experimental Analysis of Animal Behavior and Cognition (formerly PSYC 1200)

CLPS 0620 Laboratory in Cognitive Processes (formerly COGS 1530)

CLPS 0630 Functional Magnetic Resonance Imaging: Theory and Practice (formerly PSYC 1840)

CLPS 0640 Visualizing Vision (formerly COGS 1440)

CLPS 0650 Laboratory in Developmental Psychology (formerly COGS 1810)

CLPS 0660 Laboratory in Psycholinguistics (formerly COGS 1450)

One Basic Computation Course such as:

APMA 0650 Computational Cognitive Science

CLPS 0610 Neural Modeling Laboratory (formerly COGS 1020)

CLPS 0620 Computational Cognitive Neuroscience (formerly COGS 1460)

CSCI 0040 Introduction to Scientific Computing and Problem Solving

CSCI 0150 Introduction to Object-Oriented Programming and Computer Science

CSCI 0250 Computer Science: An Integrated Introduction

CSCI 0260 Computer Science: An Integrated Introduction

One course in Statistical Analysis, such as:

CLPS 0800 Quantitative Methods in Psychology (formerly COGS/PSYC 0090)

APMA 0850 Statistical Inference I

Required Capstone:

CLPS 1900 Senior Seminar in Cognitive Science (formerly COGS 1950)

Electives

Choose four from the following:

ANTH 0800 Sound and Symbols: Introduction to Linguistic Anthropology

ANTH 1800 Sociolinguistics, Discourse and Dialogue

APMA 1360 Topics in Chaotic Dynamics

APMA 1650 Statistical Inference I

APMA 1660 Statistical Inference II

APMA 1670 Statistical Analysis of Time Series

APMA 1680 Nonparametric Statistics

APMA 1690 Computational Probability and Statistics

BIOL 0480 Evolutionary Biology

NEUR 0650 Biology of Hearing

CLPS 1200 Thinking (formerly COGS 1520)

CLPS 1210 Human Memory and Learning (formerly COGS 1560)

CLPS 1211 Human and Machine Learning (formerly COGS 1680)

CLPS 1220 Concepts and Categories (formerly COGS 1870)

CLPS 1240 Reasoning and Problem Solving (formerly COGS 1880)

CLPS 1241 Causal Reasoning (formerly COGS 1860C)
Linguistics Concentration Requirements

The concentration in linguistics is designed both for students interested in the discipline itself and for those wishing to use their understanding of linguistic structure to pursue other disciplines. Linguists are concerned with such issues as the commonalities of human languages, why languages change, how our linguistic abilities interact with our cognitive abilities, how language is learnable, and developing formal models of linguistic structure. Fields as diverse as anthropology, legal reasoning, language pathology, technical writing and editing, and Artificial Intelligence (AI) all rely heavily upon methods and models developed in linguistics. Required courses examine linguistic theory, phonology, syntax, and semantics, while electives may focus on computational, mathematical, or socio-linguistics, the philosophy of language, and biology and the evolution of language.

Requirements (10 courses)

</table>

A coherent program of at least four (4) additional courses in the life sciences (e.g., cognitive science, psychology, or biology), physical sciences, mathematics, and/or applied mathematics that supports the student’s area(s) of study.

Total Credits: 18

II. Degrees with Honors

Students interested in honors under either the A.B. or Sc.B. programs should identify a faculty honors sponsor and sign up with the concentration advisor during Semester 6. Although there is no minimum grade point average to enter the program, admission to the program is limited to students who have accumulated a strong academic record and is at the discretion of the department. It is expected that honors candidates will conduct a year-long research project under the direction of a faculty sponsor in the CLPS department culminating in a written thesis and oral examination at the end of Semester 8. Students doing honors work must enroll for CLPS 1970 or for two terms, typically in semesters 7 and 8.

IV. Independent Study

Independent Study is encouraged for the A.B. degree and required for the Sc.B. degree. Students should sign up for CLPS 1970 or CLPS 1980 with a faculty advisor who is a member of the CLPS Department. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8. CLPS1970 or CLPS1980 can count as electives for the concentration requirements.

Cognitive Science concentrators may use at most two credits of CLPS 1970 or CLPS 1980 towards their degree. Students in the A.B. program can use these two credits to satisfy electives. Students in the Sc.B. program must use one of these credits to satisfy the Independent Study requirement (Requirement B in Section II above), and may use the second to satisfy an elective or one of the four additional courses (Requirement C in Section II).

V. Comments

Both the A.B. and the Sc.B. programs in Cognitive Science reflect recent national trends in the field and the breadth of the course offerings and faculty research interests at Brown. A broadly trained cognitive scientist must possess certain methodological skills, including knowledge of computational methods and research methods (statistics and laboratory techniques), which are incorporated in our skills and methodology requirement. In addition, a cognitive scientist must be conversant in the four major focus areas studied in the field: perception, cognition, languages and cognitive neuroscience. Electives ensure that concentrators have the opportunity to investigate at least one particular area in depth. Finally, the concentration provides an integrative experience to all of its concentrators through the capstone senior seminar. The program is designed to provide the flexibility for each student to design a program that will meet her/his needs and interests.

The Sc.B. program is designed for students who wish to bring a stronger background in general science and a research orientation to their study of cognitive science. Sc.B. candidates must also acquire first-hand experience in doing cognitive science research through an independent study project.

Select one of the following courses in phonetics, phonology, syntax, or CLPS 1340 Introduction to Semantics (formerly COGS 1110)  
CLPS 1341 Lexical Semantics (formerly COGS 1120)  
CLPS 1342 Formal Semantics (formerly COGS 1130)  
CLPS 1320 The Production, Perception, and Analysis of Speech (formerly COGS 1230)  
CLPS 1381 Topics in Phonetics and Phonology: Intonational Phonology

Select one of the following courses in psycholinguistics:  
CLPS 1800 Language Processing (formerly COGS 1410)  
CLPS 1810 Syntactic Theory and Syntactic Processing (formerly COGS 1420)  
CLPS 1650 Child Language Acquisition (formerly COGS 1430)  
CLPS 1890 Laboratory in Psycholinguistics (formerly COGS 1450)  
CLPS 1820 Language and the Brain (formerly COGS 1480)  
CLPS 1385 Topics in Language Acquisition: Language Acquisition and Cognitive Development  
CLPS 1389 Topics in Language Processing (formerly COGS 1840)  

Electives (select five):  
CLPS 1340 Introduction to Semantics (formerly COGS 1110)  
CLPS 1341 Lexical Semantics (formerly COGS 1120)  
CLPS 1342 Formal Semantics (formerly COGS 1130)  
CLPS 1320 The Production, Perception, and Analysis of Speech (formerly COGS 1230)  
CLPS 1381 Topics in Phonetics and Phonology: Intonational Phonology

Total Credits 10

1. It is recommended that students take CLPS 1310 and CLPS 1330 before higher level courses.
2. Only 2 may be below 1000-level courses. The listings here are not exclusive of the possible electives; students should consult with the concentration advisor about the appropriateness of other courses.

Degrees with Honors (12 Courses)

Candidates for Honors in Linguistics will take a minimum of 10 courses for the concentration which will consist of all requirements for the standard program plus 2 additional courses in Linguistics or related disciplines.

One of these courses may be an independent study project upon which the thesis is based. Honors candidates should formalize their projects in consultation with their advisors by the end of Semester 6.

Although no specific grade-point average has been set for acceptance into the Honors Program, only students with a good record and an advisor willing to work with them will be allowed into the Honors Program.

Independent Study

Independent study is encouraged for the A.B. degree. Students should sign up for CLPS 1970 with a faculty advisor who is a member of the Department of Cognitive and Linguistic Sciences. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8.

Comments:

Foreign language courses will generally not count towards the concentration requirements, except those which focus on the structure or history of the language. Students are, however, advised to gain familiarity with a foreign language, and are encouraged to take at least one course which deals with the structure of a language other than English.

It is strongly recommended that students take CLPS 1310 and CLPS 1330 before Semester 7.

Psychology Concentration Requirements

Psychology encompasses a range of phenomena and levels of analysis in pursuit of three goals: to deepen understanding of cognitive and neural mechanisms of sensation, perception, learning, and emotion; to probe the biological and evolutionary foundations of animal behavior; and to clarify the social perception and assessment of individuals and groups.

The concentration offers an array of course options, including study in quantitative methods, laboratory techniques, and senior seminars on specialized topics. Students take upper-level courses in the field’s major sub-disciplines, including perception and cognition, behavioral neuroscience, and social psychology. The concentration in Psychology prepares students for careers in clinical psychology, business, policy-related research positions, law, and education.

Concentration Requirements

Introductory Psychology: Planning a concentration and choosing elective courses requires general knowledge about the topics psychologists study. Introductory Psychology (CLPS 0010) is required for the concentration. Students may satisfy the Introductory Psychology requirement by submitting AP (score of 4 or 5) or IB (score of 5 or above) test credit or by transferring Introductory Psychology course credits from other 4-year institutions.

Quantitative: Careers in Psychology and related fields require familiarity with statistics. Therefore, the Psychology concentration requires Quantitative Methods in Psychology (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. The department does not grant concentration credit for AP Statistics, regardless of score. Students who feel that CLPS 0900 is too elementary can complete for concentration credit.

Laboratory Course: Concentrators must take at least one laboratory course, which provides students with hands-on experience with research methods in a substantive area of psychology. Because the laboratory serves as the basis for independent research and is a prerequisite for the Honors program, concentrators should plan to take their lab before their concentration requirements, except those which focus on the structure or history of the language. Students are, however, advised to gain familiarity with a foreign language, and are encouraged to take at least one course which deals with the structure of a language other than English. It is strongly recommended that students take CLPS 1310 and CLPS 1330 before Semester 7.

Requirements for the A.B. degree

**CLPS 0010** Elementary Psychology: An Introduction to Mind and Behavior (formerly PSYC 0010) 1
**CLPS 0900** Quantitative Methods in Psychology (formerly COGS/PSYC 0900) 1
Two courses in Perception and Cognition 2 2
Two courses in Comparative/Physiological 2 2
Two courses in Social/Personality/Developmental 2 2
One advanced laboratory course from the following: 3 1
**CLPS 1090** Research Methods in Psychology (formerly PSYC 1090)
**CLPS 1092** Psychological Theory (formerly PSYC 1070)
**CLPS 1190** Techniques in Physiological Psychology (formerly PSYC 1030)
**CLPS 1191** Animal Behavior Laboratory (formerly PSYC 1450)
**CLPS 1192** Experimental Analysis of Animal Behavior and Cognition (formerly PSYC 1200)
**CLPS 1193** Laboratory in Genes and Behavior (formerly PSYC 1400)
**CLPS 1194** Sleep and Chronobiology Research (formerly PSYC 1060)
**CLPS 1290** Laboratory in Cognitive Processes (formerly COGS 1530)
**CLPS 1490** Functional Magnetic Resonance Imaging: Theory and Practice (formerly PSYC 1840)
**CLPS 1491** Neural Modeling Laboratory (formerly COGS 1020)
**CLPS 1492** Computational Cognitive Neuroscience (formerly COGS 1460)
**CLPS 1510** Psychology of Hearing (formerly PSYC 1190)
**CLPS 1690** Laboratory in Developmental Psychology (formerly COGS 1610)
**CLPS 1790** Personality and Clinical Assessment (formerly PSYC 1110)
**CLPS 1791** Laboratory in Social Cognition (formerly PSYC 1540)

An advanced seminar/critical readings course in CLPS, numbered above 1000 4 1
Two elective courses, with approval of the concentration advisor 5 2

Total Credits 12

1 Or advanced placement with a score of 4 or 5, or transfer credit. If placement for CLPS0010 is granted on the basis of AP or IB test scores, then another CLPS course (at any level) must be substituted.
2 The pre-approved courses in each area are listed on the concentration worksheets. A laboratory course or seminar (indicated on the worksheet) may be used to meet the area requirement only if it is the student's second lab course or second seminar. Independent study courses and laboratory courses outside of CLPS cannot be used to satisfy this requirement.
3 The worksheets (http://www.brown.edu/Departments/CLPS/undergrad/psychology) include up-to-date lists of labs. Independent study courses and laboratory courses outside of CLPS cannot be used to satisfy this requirement.
4 Consult one of the concentration advisors for lists of approved courses.
5 The electives should complement the student's major area of interest in Psychology. These courses can be taken outside of CLPS. Only courses that carry concentration credit in the home department can be used for this requirement. In addition, independent study and GISP courses will not fulfill this requirement.

Requirements for the Sc.B. degree

**CLPS 0010** Elementary Psychology: An Introduction to Mind and Behavior (formerly PSYC 0010) 1
**CLPS 0900** Quantitative Methods in Psychology (formerly COGS/PSYC 0900) 1
Two courses in Perception and Cognition 2 2
Two courses in Comparative/Physiological 2 2
Two courses in Social/Personality/Developmental 2 2
An advanced laboratory course from the following: 3 1
**CLPS 1090** Research Methods in Psychology (formerly PSYC 1090)
**CLPS 1092** Psychological Theory (formerly PSYC 1070)
**CLPS 1190** Techniques in Physiological Psychology (formerly PSYC 1030)
**CLPS 1191** Animal Behavior Laboratory (formerly PSYC 1450)
**CLPS 1192** Experimental Analysis of Animal Behavior and Cognition (formerly PSYC 1200)
**CLPS 1193** Laboratory in Genes and Behavior (formerly PSYC 1040)
**CLPS 1194** Sleep and Chronobiology Research (formerly PSYC 1060)
**CLPS 1290** Laboratory in Cognitive Processes (formerly COGS 1530)
**CLPS 1490** Functional Magnetic Resonance Imaging: Theory and Practice (formerly PSYC 1840)
**CLPS 1491** Neural Modeling Laboratory (formerly COGS 1020)
**CLPS 1492** Computational Cognitive Neuroscience (formerly COGS 1460)
**CLPS 1510** Psychology of Hearing (formerly PSYC 1190)
**CLPS 1690** Laboratory in Developmental Psychology (formerly COGS 1610)
**CLPS 1790** Personality and Clinical Assessment (formerly PSYC 1110)
**CLPS 1791** Laboratory in Social Cognition (formerly PSYC 1540)

An advanced seminar/critical readings course in CLPS, numbered above 1000 4 1
Six supporting science courses should be selected from the following areas: Applied Mathematics, Biology, Chemistry, Computer Sciences, Engineering, Mathematics, Neuroscience, or Physics 5 6
**CLPS 1980** Directed Research in Cognitive, Linguistic and Psychological Sciences (formerly PSYC 1990) 6 1

Total Credits 17
The following courses cannot be used to meet the requirement for outside science courses: independent study or GISPs, courses in science studies, or ENGN 0020, 0090, 0900, 1010. AP credit can substitute for only one of these courses.

6. CLPS1980 typically involves one semester of independent research under the direct supervision of a faculty advisor in CLPS. This includes data collection and/or analysis, and a final written report. Upon department approval, the faculty advisor may be from another department or unit if the research program is within the field of psychology and approved by the concentration advisor as such. The proposal form for CLPS1980 (http://www.brown.edu/Departments/CLPS/undergrad/psychology) must be submitted to the concentration advisor before the student can register for CLPS1980. Contact the Sc.B. Concentration Advisor for further details. CLPS1980 cannot be counted for the lab requirement. The CLPS Undergraduate Concentration Committee oversees the concentration and receives petitions regarding concentration requirements.

honors

detailed information about the psychology honors program is available on a dedicated page.

Cognitive, Linguistic and Psychological Sciences Graduate Program

The department of Cognitive, Linguistic, and Psychological Sciences is a unique multidisciplinary department that offers Doctor of Philosophy (Ph.D.) degrees in three fields: Cognitive Science, Linguistics, and Psychology. While the department offers transitional Master’s degrees en route to the Ph.D., it does not accept applicants into non-Ph.D. programs. For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academic/gradschool/programs/cognitive-linguistic-and-psychological-sciences

Courses

Cognitive, Linguistic and Psychological Sciences

CLPS 0010. Elementary Psychology: An Introduction to Mind and Behavior (formerly PSYC 0010)

A survey covering the roles of inherited and environmental determinants of human behavior. Topics include sensation, perception, learning, memory, motivation, emotion, neural processes, language, social development, personality assessment, obedience, interpersonal attraction, and the diagnosis, origins, and treatment of mental illness. Laboratory sections illustrate methodologies used to study these issues. Topic selection varies with instructor.

CLPS 0020. Approaches to the Mind: Introduction to Cognitive Science (formerly COGS 0010)

Cognitive science is the study of the mind from an interdisciplinary perspective. It focuses on such questions as how do we process information to recognize objects and faces, to know that a cup is not a bowl, to remember and learn, and to speak and understand? How can studying the brain inform us about the mind? This course will examine the above questions and discuss major themes in cognitive science including nature-nurture, categories and representations, and the nature of computations. WRIT

CLPS 0030. Introduction to Linguistic Theory (formerly COGS 0410)

The ability to speak and understand a language involves having mastered (quite unconsciously) an intricate and highly structured rule-governed system. Linguists seek to model that rule system. This course introduces the principles underlying phonology (the principles which govern how sounds are put together), syntax (the rule system governing sentence structure), and semantics (the system which relates sentences to meanings).

CLPS 0040. Mind and Brain: Introduction to Cognitive Neuroscience (formerly COGS 0720)

This course provides an introduction to the neuroscientific study of cognition. Topics surveyed in the course include the neural bases of perception, attention, memory, language, executive function, emotion, social cognition, and decision making. In covering these topics, the course will draw on evidence from brain imaging (fMRI, EEG, MEG), transcranial magnetic stimulation, electrophysiology, and neuropsychology. The course will also consider how knowledge about the brain constrains our understanding of the mind.

CLPS 0050A. Computing as Done in Brains and Computers (formerly COGS 0100A)

Brains and computers compute in different ways. We will discuss the software and hardware of brains and computers and with introduction to the way brains are organized, the way computers are organized, and why they are good at such different things. We will talk about our current research, the Ersatz Brain Project, an attempt to design a first-class second-class brain. Enrollment limited to 15 first year students. FYS

CLPS 0050B. The Two Visual Systems: Visual Perception and Control of Action (formerly COGS 0100C)

In a series of theoretical articles, Melvyn Goodale and his collaborators have proposed that separate, but interacting visual systems have evolved for the perception of objects on the one hand and the control of actions directed at those objects on the other hand. This seminar will cover the basic literature addressing this problem with studies involving human and animal studies. Enrollment limited to 20 first year students. FYS

CLPS 0050C. Intentionality and Theories of the Mind (formerly COGS 0100D)

The purpose of this seminar is to familiarize students with the topic of “theory of mind” – how we understand each other’s mental states. In particular, we will focus on how human beings understand other’s intensions and beliefs and come to act volitionally. Readings will span developmental, cognitive, social, and cross-cultural psychology as well as neuroscience and philosophy. Emphasis in assignments will be on evaluating and constructing scientific investigations. Reserved for First Year students. Enrollment limited to 20. FYS LILE

CLPS 0050D. Reading Science/Understanding Science (formerly COGS 0100E)

How is science presented in the modern media? How does this shape the way we think about and understand scientific ideas and the scientific process? Focusing on the brain sciences, we will critically read several award-winning scientific works written for non-specialized audiences, including books by Dawkins, Gould, Pinker, and Sapolsky. We will also consider critiques of these works, as well as related shorter articles intended for wider audiences (e.g., from Scientific American). Finally we will examine several examples of "bad neurojournalism" in an attempt to understand what makes good and bad science reporting. No prerequisites; enrollment limited to 20 first year students. FYS LILE
CLPS 0050E. Animal Minds (formerly PSYC 0190A).
This freshman seminar examines what we can learn about the mind of an animal through observations and manipulations of that animal’s behavior. Drawing on the work of biologists, ethologists and psychologists in the field and in the lab, we will critically evaluate the evidence that animals have minds and debate the thesis that their minds are qualitatively indistinguishable from our own. Enrollment limited to 20 first year students.

CLPS 0050F. Offa and Human Behavior (formerly PSYC 0190C).
In this first year seminar we will explore how our sense of smell is involved in a variety of psychological processes, including: emotion, learning, memory, language and social behavior. Topics such as olfaction in health, technology and marketing will also be critically examined. Students will acquire the basics of olfactory physiology and perception-cognition through course reading, projects and discussions. Enrollment limited to 20 first year students.

CLPS 0050G. Pidgins, Creoles, and the Emergence of Language.
Pidgins and creoles are language systems that arise in situations of contact between groups without a common language. Their study has informed models of language change and has inspired theorizing about the origins of language, in particular the role children play as agents of language creation and language change. In the last twenty years, however, the field has seen significant upheavals, as foundational assumptions have been challenged and in some cases overturned. This course will consider pidgins and creoles within their socio-historical context, with primary emphasis on what pidgins and creoles can tell us about language emergence and language change. Enrollment limited to 20 first year students. FYS LILE WRIT

CLPS 0050I. Art and Science of Learning.
The course will emphasize normal adult learning, in comparison with learning of special populations, nonhuman animals, and computers. Topics will include perceptual learning, memorization, search, conditioning in changing environments, and motor learning. The role of types and amount of practice, motivation, and talent in the development of expertise in art, music, dance, science, sports, and games will be examined. Readings will be based on laboratory experiments and case histories of experts in a range of fields. Enrollment limited to 20 first year students. FYS

CLPS 0050J. Psychology of Creativity.
This course is a first year seminar intended to introduce students to the lively word of creativity and the science thereof. Classic and contemporary readings will be discussed covering topics ranging from theory and assessment to applications in education, product design, organizational behavior, the arts, and science itself. Students will also be nudged to become more mindful of the role of creativity in their everyday lives. The course will emphasize class discussion and the production of tangible projects. Enrollment limited to 20 first year students. FYS

CLPS 0100. Learning and Conditioning (formerly PSYC 0900).
Presents classical and contemporary approaches to the study of the prediction and control of behavior. Emphasizes theories and data derived from studies of Pavlovian conditioning and instrumental learning with nonhuman animals, but also considers implications for human behavior (e.g., drug-dependent behaviors, eating disorders, behavior modification and psychopathologies). No prerequisites.

An examination of physiological and evolutionary mechanisms underlying species-specific behavior in both vertebrate and invertebrate animals. Topics include: evolution and mechanisms of sensory systems, modes of locomotion, orientation and navigation, communication, and cognitive capacities of animals.

CLPS 0120. Introduction to Sleep (formerly PSYC 0550).
Uses sleep as the focal point for describing complex behavioral phenomena. How is sleep measured and defined? How does sleep differ across species? What accounts for the timing of sleep? How does sleep change with age? What are the behavioral, physiological, and cognitive concomitants of different states of sleep? How can dreaming be understood? What can go wrong with sleep? Recommended prerequisite: CLPS 0010, CLPS 0020 or NEUR 0010; or an AP course in psychology or physiology.

CLPS 0200. Human Cognition (formerly COGS 0420).
Introduction to theoretical issues and empirical findings motivating controversies in human cognition. Basic issues in cognition - including attention, memory, categorization, reasoning, decision making and problem solving will be examined. Emphasis will be on experimental methods and formal theories.

CLPS 0210. Human Thinking and Problem-Solving (formerly COGS 0480).
An inter-disciplinary introduction to adult human thinking and reasoning. Covers logical thinking, computational models, reasoning and the scientific method, creativity, intelligence, visual thinking, problem solving in a group setting, and methods of teaching “thinking skills.” Students will learn about research findings on these topics and will practice methods for improving their own skills.

CLPS 0220. Making Decisions (formerly COGS 0500).
Life is full of decisions. Some decisions are made rationally, others could be improved. This course considers the psychology of human decision-making, the analysis of optimal decision-making, and implications for individual action and social policy. Topics include: chance and preference (e.g., how do consumers weigh attributes when making purchases?); the value of information (e.g., when should physicians order expensive diagnostic tests?); risky choice (e.g., is it rational to play the lottery?).

CLPS 0330. The Grammar of English.
English probably has greater international utility and importance today than any other human language. This no-requisites course takes seriously the idea that we should be able to describe its structure accurately. Challenging two hundred years of myths and mistakes, it attempts to offer students a rigorous basis for understanding sentence structure. Enrollment limited to 40.

CLPS 0400. Brain Damage and the Mind (formerly PSYC 0470).
Brain damage in human subjects can produce dramatic and highly selective impairments in cognitive functioning. This course provides an overview of the major neuropsychological disorders of perception, language, memory, thought, and action. Emphasizes the development of human information processing models for understanding the cognitive deficits observed in brain-damaged patients and the implications of neuropsychological findings for models of normal cognition.

CLPS 0410. Principles of Behavioral Neuroscience (formerly PSYC 0750).
A lecture course that covers the bodily systems that underlie motivated behavior. Topics include the autonomic nervous system, drugs and behavior, hormones and behavior, reproductive physiology/behavior, homeostasis, biological rhythms, emotions and stress, the neurobiology of mental disorders, and biological perspectives on learning and memory. Does not cover synaptic transmission or sensory processing and perception. Prerequisite: background in psychology, neuroscience, or linguistic/cognitive science including an introductory course (CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010).

CLPS 0500. Perception and Mind (formerly COGS/PSYC 0440).
How do the mind and the brain take physical energy such as light or sound and convert it into our perception of the world? This course examines the behavioral and biological bases of human and animal perceptual systems, including vision, audition, smell, taste, and touch. Particular emphasis is placed on high-level perception and how it relates to other cognitive systems.

Visual art can be viewed as an exploration of perceptual questions. This course considers the representation of space and time in painting and film from the viewpoint of the science of visual perception. Topics include Renaissance linear perspective, picture perception across cultures, color, form, shape, abstraction, how film editing constructs events, and why Godzilla looks phony. Slide lectures and visual exercises.

Visual illusions are vivid examples of the mistakes our visual systems make. This interdisciplinary course is designed for art and science students with interests in visual perception to explore how and why visual processing sometimes fails. Course work will include hands-on laboratory
CLPS 0600. Child Development (formerly PSYC 0810).
Children’s behavior and development from infancy through adolescence. Major topics include learning, perception, parent-child attachment, language, intelligence, motivation, emotional development, and peer relations. Major developmental theories, including psychoanalytic, ethological, social learning, and cognitive, are considered as organizers of these phenomena and as a source of testable hypotheses.

An examination of children’s thinking and cognitive development from infancy to middle childhood. Considers a range of topics including memory, reasoning, categorization, perception, and children’s understanding of concepts such as space, time, number, mind, and biology. Major theories of cognitive development are described and evaluated in light of the available psychological data. LILE

CLPS 0640. Developmental Psychopathology (formerly PSYC 0940).
A comprehensive introduction to child and adolescent psychological disorders. Focuses on risk, vulnerability, and protective factors in order to probe why some children develop significant psychological problems when others do not. Emphasis on how biological, psychological, and sociocultural factors interactively contribute to the development of psychopathology. Examines effective treatments, as well as educational and social policy implications. Prerequisite: CLPS 0010, 0200, or 0600.

CLPS 0700. Social Psychology (formerly PSYC 0210).
Examines the theories, findings, and methods of social psychology. Topics include: social cognition (person perception, attitudes), social influence (cultural sources of attitudes, conformity), and social relations (aggression, altruism, prejudice). Students become better informed consumers of empirical research and acquire a new framework for interpreting social behavior. Applications to historic and current events.

CLPS 0701. Personality (formerly PSYC 0300).
A survey of the major perspectives (psychoanalytic, behavioral, humanistic, etc.) within theories of personality. Particular emphasis is placed on the integration of research and theory.

CLPS 0800. Language and the Mind (formerly COGS 0450).
Explores fundamental issues in psycholinguistics: what is the nature of language; what are its biological underpinnings; how does the mind process speech, recognize words, parse sentences, comprehend discourse; what do effects of brain injuries on language reveal about the organization of language in the mind? Synthesis of results from multiple modes of analysis – linguistic, psychological, computational, and neurophysiological – are emphasized.

CLPS 0810. The Biology and Evolution of Language (formerly COGS 0320).
Human language is made possible by specialized anatomy and brains that can regulate speech production, complex syntax, and acquiring and using thousands of words. This course examines Darwin’s theory of evolution and the archaeological and fossil records of human evolution; studies of chimpanzee communication, culture, and language which provide insights on human evolution; the physiology of human speech; and recent studies of the brain bases of human language and thought.

CLPS 0900. Quantitative Methods in Psychology (formerly COGS/ PSYC 0090).
A survey of statistical methods used in the behavioral sciences. Topics include graphical data description, probability theory, confidence intervals, principles of hypothesis testing, analysis of variance, correlation, and regression, and techniques for categorical data. Emphasizes application of statistical methods to empirical data.

CLPS 1080A. Intentionality (formerly COGS 1860R).
The purpose of this seminar course is to familiarize students with the topic of “theory of mind” - how we understand other’s mental states. In particular, we will focus on how children develop an understanding of others intentions and beliefs. While the majority of the reading will be in developmental psychology, cognitive, social, clinical and comparative literatures will also be examined.
research on memory. There are four parts: 1) how neurons are connected and communicate, 2) fundamental issues in the psychology of memory, 3) memory localization in the brain, and 4) consolidation of memory into a permanent store. The course is designed to be accessible to students in a variety of disciplines, but requires background in psychology, cognitive science, or neuroscience. The class will include lecture, writing assignments, and presentations of primary research articles. Prerequisite: CLPS 0010, 0020, 0040, 0200, or NEUR 0010.

CLPS 1180A. Canine Behavior (formerly PSYC 1750B)
Topics include canine perception, cognition, vocalization and social behavior. The behavior of wolves and other wild canids is also explored to facilitate our understanding of the domestic dog. This is an advanced seminar for concentrators in Psychology. It is also intended for anyone interested in animal behavior, especially Biology and Neuroscience concentrators. Prerequisites: CLPS 0050E (PSYC 0190A), CLPS 1191 (PSYC 1450), or BIOL 0450. Not open to first year students.

CLPS 1180B. Biology of Communication (formerly PSYC 1750A)
The study of animal communication systems from mechanistic, developmental, ecological, and evolutionary perspectives. The uses of auditory, chemical, and visual cues for mediating intraspecific communication in both vertebrate and invertebrate animals. Recommended prerequisites: CLPS 0110 (PSYC 0500), CLPS 1192 (PSYC 1200), BIOL 0450, or equivalent.

CLPS 1190. Techniques in Physiological Psychology (formerly PSYC 1030)
Laboratory course in behavioral neuroscience for advanced students of psychology or neuroscience. The goal is to gain "hands on" research experience with a variety of experimental and behavioral assays used to assess the effects of genetic mutations on behavior. Over the course of the semester, students will examine the behavioral phenotype of three mouse models of human disease and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 (PSYC 0750) or NEUR 0010, and CLPS 0900 (PSYC/COGS 0090).

CLPS 1191. Animal Behavior Laboratory (formerly PSYC 1450)
This course is designed for students with a serious interest in animal behavior research. Topics include methods in lab and field research, enrichment programs for captive species and conditioning procedures for managing zoo and shelter animals. Prerequisites: CLPS 0900 (COGS/PSYC 0090). Enrollment limited to 12; not open to first year students.

CLPS 1192. Experimental Analysis of Animal Behavior and Cognition (formerly PSYC 1200)
A laboratory course on the prediction, control, and explanation of the behavior of animals in simple environments. Prerequisite: CLPS 0900 (PSYC/COGS 0090).

CLPS 1193. Laboratory in Genes and Behavior (formerly PSYC 1040)
Laboratory course in behavioral neuroscience designed to provide research experience in assessing effects of genetic alterations on behavior. Students examine the behavioral phenotype of a mouse model of human disease. Mice are tested on behavioral batteries to assess, for example, cognitive, affective, and sensorimotor behavior. Recent classes tested models of early life stress, Fragile X Mental Retardation, and Alzheimer’s Disease. Students will test the mice, analyze the data, and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 or NEUR 0010, and CLPS 0900 or instructor permission. Enrollment limited to 10; not open to first-year students. WRIT 3.

CLPS 1194. Sleep and Chronobiology Research (formerly PSYC 1060)
Part of a summer immersion in behavioral science research in human sleep and chronobiology. Instruction in human sleep and circadian rhythms, research techniques in basic physiology, laboratory skills, ethics of research, and basic CPR. Research seminars explore other techniques and career paths. Recommended prerequisite: CLPS 0100 is preferred; NEUR 0010 is also acceptable. Enrollment limited to 15. Course open only to students admitted to the Sleep and Chronobiology Research Apprenticeship. Must apply here: www.sleepforscience.org/academic/apprenticeship.php (http://www.sleepforscience.org/academic/apprenticeship.php)

CLPS 1194 has a commitment from May 27-August 22, 2013.

CLPS 1200. Thinking (formerly COGS 1520)
An investigation of conceptual structure, judgment, and inferential processes. The focus is on the relation between empirical evidence, theories, and models of cognitive process and structure. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1210. Human Memory and Learning (formerly COGS 1560)
How does human memory work and why are some things easier to learn and remember than others? This course covers experimental and behavioral studies of human memory including long- and short-term memory for text, pictures, spatial information, and autobiographical events. Emphasis on real-world situations, including education, in which memory and learning play a role. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1211. Human and Machine Learning (formerly COGS 1680)
How is human memory like a search engine? Is human knowledge like the internet? What can artificial intelligence and machine learning tell us about the mind? This seminar explores parallels between human cognition and contemporary research in computer science, emphasizing common problems. In addition to the above, topics include simplicity, randomness, coincidences, and causality.

CLPS 1220. Concepts and Categories (formerly COGS 1870)
Our knowledge of the world is organized into concepts and categories. What is the basis of this organization? What information is used to make category judgments? How do children acquire concepts and categories? How are our concepts related to the language we speak? This course will examine these questions from an interdisciplinary perspective, combining relevant work in cognitive and developmental psychology, philosophy, linguistics, and computational modeling. Recommended prerequisite: CLPS 0200 (COGS 0420).

CLPS 1230. Seminar in Decision Making (formerly COGS 1860Y)
No description available.

CLPS 1240. Reasoning and Problem Solving (formerly COGS 1880)
How do people reason about informal events in everyday life and more formal subject domains? What are the fallacies that people endorse and how can they be averted? What are some strategies for developing critical reasoning skills? A presentation of theories of human reasoning and problem solving and their applications to educational practice. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1241. Causal Reasoning (formerly COGS 1860C)
This seminar will concern the principles and processes by which people learn causal knowledge and engage in causal inference, including prediction, explanation, and counterfactual reasoning. Some emphasis will be on probabilistic models of causal inference and on the development of causal reasoning in young children. Enrollment limited to 20 juniors, seniors, and graduate students.

CLPS 1280A. Moral Reasoning (formerly COGS 1860C)
A review of research on how people make moral judgments. We will discuss and attempt to integrate diverse perspectives and research on cognition, action, and emotion from cognitive science, cognitive neuroscience, and philosophy.

CLPS 1290. Laboratory in Cognitive Processes (formerly COGS 1530)
Presents the experimental way of thinking by pursuing several topics in an interactive computer-based laboratory. Students run experiments as a class and, by the end of the course, run their own experiment. Focus is on experimental design, procedure, analysis, and reporting. Topics include attention, visual imagery, memory, and reasoning. Prerequisite: CLPS 0900 (COGS/PSYC 0090), and either CLPS 0200 (COGS 0420) or CLPS 0500 (COGS 0440); or permission of the instructor.

CLPS 1291. Computational Cognitive Science
Provides an introduction to computational modeling of cognition, summarizing traditional approaches and providing experience with state-of-the-art methods. Covers pattern recognition and connectionist networks as well as Bayesian probabilistic models, and illustrates how they have been applied in several key areas in cognitive science, including visual perception and attention, object and face recognition, learning and memory as well as decision-making and reasoning. Focuses on modeling
simple laboratory tasks from cognitive psychology. Connections to contemporary research will be emphasized highlighting how computational models may motivate the development of new hypotheses for experiment design in cognitive psychology. Prerequisite: comfort with basic linear algebra and at least one introductory course in Computer Science or programming, or instructor permission.

CLPS 1310. Introduction to Phonological Theory (formerly COGS 1210).
Examines some of the classic and current issues regarding sound structure in the world’s languages and introduces the theoretical tools needed to solve them. After an introduction to articulatory phonetics and phonemic analysis, it focuses on phonological analysis of different languages, and discusses rule-based and constraint-based approaches to phonology. Implications for language learning and language change are discussed. Prerequisite: CLPS 0030.

CLPS 1320. The Production, Perception, and Analysis of Speech (formerly COGS 1230).
An introduction to the basis of the acoustic analysis of speech, the anatomy and physiology of speech production, and the perception of speech. Discussion and demonstration of quantitative computer-implemented methods for speech analysis. Linguistic and cognitive theories are discussed in relation to the probable neural mechanisms and anatomy that make human speech possible. Lectures, discussion, and laboratory demonstrations.

CLPS 1330. Introduction to Syntax (formerly COGS 1310).
An in-depth investigation of natural language syntax, an intricate yet highly organized human cognitive system. Focuses primarily on the syntax of English as a means of illustrating the structured nature of a grammatical system, but the broader question at issue is the nature of the rule system in natural language syntax. Prerequisite: CLPS 0030 (COGS 0410).

CLPS 1340. Introduction to Semantics (formerly COGS 1110).
An introduction to a variety of issues in linguistic semantics and in the related philosophical literature. Topics include: the nature of semantic representations; the relationship between meaning and the world; truth-conditional and "logical" semantics; word-meaning; the interaction of semantics and pragmatics; presupposition; the interaction of semantics with syntax.

CLPS 1341. Lexical Semantics (formerly COGS 1120).
The representation of word meaning and generalizations about the way in which meanings are packaged into words. Topics include: "fuzzy" meanings, natural kind terms, how word meanings are decomposed. Special emphasis on how temporal properties are encoded, on the status of "thematic relations," and on how the fine-grained structure of word meanings impacts on the syntax. Recommended prerequisite: CLPS 0030 (COGS 0410).

CLPS 1342. Formal Semantics (formerly COGS 1130).
Model-theoretic approaches to the study of the semantics of natural languages. Develops the tools necessary for an understanding of "classical" formal semantics (the lambda calculus, intensional logic; Montague’s treatment of quantification, etc.); then applies these tools to the analysis of natural language semantics; and finally turns to recent developments in formal semantic theory. Prerequisite: some familiarity with syntax or semantics or basic set theory and logic.

CLPS 1350. Introduction to Mathematical Linguistics (formerly COGS 1720).
Introduction to basic concepts and goals of mathematical linguistics with emphasis on implications for theories of natural languages. Investigates the properties of regular, context-free, and context-sensitive languages; categorical grammar and combinators and the properties of natural language in light of the results on formal grammars. Recommended prerequisite: CLPS 0030 (COGS 0410) and/or a background in basic theory and logic; familiarity with syntax is recommended.

CLPS 1360. Introduction to corpus linguistics.
The study of Linguistics relies on language production data. Language corpora contain various sources of such data, often annotated to include additional information such as syntactic, semantic and phonological properties. Such databases often complement or even replace data sources used in other disciplines. This class aims to train students in the use of some of the tools that are commonly used to access and evaluate data in linguistic corpora. Prerequisite: CLPS 0030. Enrollment limited to 25.

CLPS 1381. Topics in Phonetics and Phonology: Intonational Phonology.
This course is an in-depth study of intonation—the manipulation of pitch and length to signify sentence-level meaning—in English as well as in other languages. This course will have two components, which will overlap considerably. In the laboratory skills component, you will learn how to collect, transcribe, measure, and analyze intonational data in Praat (a program for acoustic analysis), while in the theoretical component, you will read about and test the claims of various theories of intonation. With these skills, you will conduct independent research over the course of the semester. The course will also cover the interface between intonation and syntax/semantics, including the realization of focus in prosody.

CLPS 1382. Sounds of the World’s Languages.
This course will introduce you to phonetics: the study of the physical aspects of speech. You will learn how to produce, perceive, describe, and transcribe the sounds of the world’s languages. You will learn the fundamentals of acoustic and articulatory phonetics to better understand the properties of and mechanisms behind each speech sound. You will also gain practical skills in recording and measuring acoustic data, transcribing data in the International Phonetic Alphabet (IPA), and producing both familiar and foreign sounds in isolation as well as in real and hypothetical words. Prerequisite: CLPS 0030 or equivalent.

CLPS 1383A. The Boundary of Semantics and Pragmatics.
This course will examine some recent controversies regarding the question of just what is accounted for by grammatical apparatus as opposed to what can be accounted for by "Gricean" pragmatics (i.e., inferences that listeners draw that are not encoded in the grammar). Particular attention will be paid to some topics surrounding negation, including the distribution of "Negative Polarity Items". Prerequisite: CLPS 1330, 1340, or 1341. Enrollment limited to 40.

CLPS 1383B. Issues in Current Syntactic Theory.
This course explores alternatives to "standard" (transformational, "Minimalist" etc.) theories of syntax, especially alternatives that posit that the syntax can be simplified by a rich understanding of semantics. Topics include the analysis of Control, the distribution of pronouns and reflexives, and phenomena such as passive and wh-movement which are typically thought to require movement rules (and hence levels of representation). We will also examine the premises behind X-bar theory. Various constructions will be examined from the point of view of "Categorial Grammar" and related theories. Prerequisite: CLPS 1330.

CLPS 1385. Topics in Language Acquisition: Language Acquisition and Cognitive Development.
What is the relationship between how we think and how we speak? This course explores the concurrent development of children’s linguistic and cognitive abilities. Topics include the relationship between word meanings and concepts, the structure of the mental lexicon, pragmatic development, and the Whorfian hypothesis (whether speakers of different languages think differently). Students will read and discuss empirical and theoretical articles, and complete a set of writing assignments and problem sets. Prerequisite: CLPS 0610 or equivalent, or permission of the instructor. Appropriate for students interested in developmental/cognitive psychology, linguistics, and applied fields such as speech-language pathology.

CLPS 1387. Topics in Neurolinguistics.
No description available.

CLPS 1389. Topics in Language Processing (formerly COGS 1840).
Over the last decades psycholinguists have converged on a generally accepted framework for describing how humans process language at the sentence level. Much less is understood, however, about processing at the discourse level, where multiple sentences are understood to form a coherent whole. In this course we take an in-depth look at the question of discourse processing. We begin with a review of early models of discourse and narrative structure, turning next to findings from the sentence processing literature which implicate discourse structure. We consider both behavioral and neuro-imaging data in a critical analysis of past and current theories.
CLPS 1400. The Neural Bases of Cognition (formerly PSYC 1880). Research using animal models has informed and guided many of the recent advances in our understanding of the brain mechanisms underlying cognition. This seminar course will address topics related to animal models of human cognition. Students learn about how different aspects of the neural bases of cognition are modeled in animals by reviewing the primary research literature. The course is divided into three sections, each addressing one animal model in one cognitive domain. Selected papers will emphasize learning, memory, and attention, but may also address other aspects of cognition, for example decision-making, or cognitive impairment associated with neuropathology or aging. Prerequisite: CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 1190 (PSYC 1030), CLPS 1191 (PSYC 1450), CLPS 1192 (PSYC 1200), or NEUR 1600; or instructor permission. Enrollment limited to 20. Not open to first year students.

CLPS 1470. Mechanisms of Motivated Decision Making. How do we make decisions? This course considers the factors and mechanisms involved in motivated decision making, as informed by cognitive, neuroscientific, and computational modeling approaches. Readings will span a range of populations (e.g., healthy adults, adults with acquired brain damage, monkeys) and methods (e.g., behavioral, genetic, pharmacological and neuroimaging studies, electrophysiological recording). Computational models will be prominently featured as means for formalizing decision making theories across multiple levels of analysis, some focusing on high-level cognitive computations and others on neural mechanisms. Prerequisite: CLPS 0010, 0040, 1291, 1400, 1491, 1492, or NEUR 0010. Enrollment limited to 20. Not open to first year students.

CLPS 1480A. Cognitive Neuroscience of Emotion (formerly PSYC 1820). Topics discussed in this course include: visual attention, awareness, emotional perception, and emotional memory. Classes will be structured around the discussion of current papers in the literature. Active participation in class is required, including the presentation of papers from the literature. Enrollment limited to 20.

CLPS 1480B. Cognitive Aging and Dementia (formerly PSYC 1830). This seminar examines the cognitive changes associated with normal aging and age-related dementia (e.g., Alzheimer’s Disease). Topics covered will include changes in the neurocognitive systems mediating memory, perception, and attention. The course is primarily intended as an advanced seminar for junior and senior concentrators in Psychology, but is also intended for other students interested in aging and the neuropsychology of cognition. Recommended prerequisites: An introductory course in cognitive neuroscience (CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470)) or permission of the instructor. Preference will be given to senior concentrators in Psychology and related areas. Enrollment limited to 20.

CLPS 1480C. Cognitive Control Functions of the Prefrontal Cortex. The prefrontal cortex has long been known to support higher cognitive functions, including working memory, planning, reasoning, and decision making. This seminar offers an in-depth review of recent empirical and theoretical approaches to understanding prefrontal cortex function. This year the course will focus on prefrontal contributions to the cognitive control of declarative memory. Enrollment limited to 20.

CLPS 1480D. Cognitive Neuropsychiatry. Will provide a broad survey of the field of cognitive neuropsychiatry. The approach taken is based upon the knowledge of brain-behavior-cognition relationship and allows explaining psychiatric phenomena in terms of deficits in normal cognitive mechanisms, as well as drawing conclusions about normal cognitive functioning based on patterns of impaired and intact cognition observed in clinical populations. Topics surveyed include delusions, hallucinations, social-emotional symptoms of schizophrenia, thought and language disorders, conversion disorder, obsessive-compulsive disorder, bipolar disorder, major depression, Parkinson’s, and Alzheimer’s Disease. Prerequisite: CLPS 0040 or 0400, or instructor permission. Enrollment limited to 25 juniors, seniors and graduate students concentrating in Cognitive, Linguistic and Psychological Sciences. WRIT

CLPS 1490. Functional Magnetic Resonance Imaging: Theory and Practice (formerly PSYC 1840). This course will train students in the practice and use of functional magnetic resonance imaging (fMRI) as a cognitive neuroscience methodology. Topics covered include MRI physics, the physiological basis of the BOLD signal, experimental design, data collection, statistical analysis, and inference. A practical component of the course includes the opportunity to collect and analyze fMRI data at the Brown MRF. Prerequisites: CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 0900 (PSYC/COGS 0090), or instructor permission. Enrollment limited to 20.

CLPS 1491. Neural Modeling Laboratory (formerly COGS 1020). Numerical simulations of cognitively oriented nervous system models. Discussion of parallel, distributed, associative models: construction, simulation, implications, and use. Prerequisites: MATH 0090, 0100, or equivalent; knowledge of a computer language; some background in neuroscience or cognitive science is helpful.

CLPS 1492. Computational Cognitive Neuroscience (formerly COGS 1460). We explore neural network models that bridge the gap between biology and cognition. Begins with basic biological and computational properties of individual neurons and networks of neurons. Examines specialized functions of various brain systems (e.g., parietal cortex, frontal cortex, hippocampus, ganglia) and their involvement in various phenomena, including perception, attention, memory, language and higher-level cognition. Includes a lab component in which students get hands on experience with graphical neural network software, allowing deeper appreciation for how these systems work. Prerequisites: CLPS 0020 (COGS 0010) or CLPS 0200 (COGS 0420); and CLPS 0410 (PSYC 0750) or NEUR 0010.

CLPS 1500. Ecological Approach to Perception and Action (formerly COGS 1380). The ecological approach treats perceiving and acting as activities of agent-environment system rather than an isolated "mind," and offers an alternative to the prevailing computational/representational view. Topics include inferential and direct perception, perception of the 3D environment, visual control of action, dynamics of motor coordination, and self-organization of behavior. Lecture and discussion. Prerequisite (any one of the following): CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), CLPS 0500 (COGS/PSYC 0440), or CLPS 0510 (COGS 0110).

CLPS 1510. Psychology of Hearing (formerly PSYC 1190). How do we hear the world around us? In this course, we will examine basic phenomena underlying human auditory perception, focusing on topics such as masking, pitch perception, sound localization, and auditory scene analysis. We will discuss theories of hearing, experimental techniques to evaluate hearing, and the impact of age-related declines in hearing on human psychology. Open to juniors and seniors. Prerequisite: NEUR 0650 or equivalent, or instructor permission.

CLPS 1520. Computational Vision. An introduction to computational models of biological vision summarizing traditional approaches and providing experience with state-of-the-art methods. We will sample topics from low- and mid-level vision including fundamental aspects of image, stereo, motion, surface and color processing to high-level vision including object and action recognition as well as scene understanding. Connections to contemporary research in computer vision and computational neuroscience will be emphasized highlighting how computational models may motivate the development of new hypothesis for the design of experiments in visual perception. Prerequisite: comfort with basic linear algebra and at least one introductory course in Computer Science or programming, or instructor permission.

CLPS 1530. 3D Shape Perception (formerly COGS 1860B). Our ability to move in the environment, recognize and grasp objects, depends enormously on the capacity that the brain has in organizing the visual stimulation in the perceived 3D layout. 3D objects in the world project on the human retina flat images. How does the brain re-transform these flat images into a 3D representation? Enrollment limited to 40.
CLPS 1540. Human Factors (formerly COGS 1160). The application of knowledge of human characteristics to the design of equipment, facilities, and environments for human use. Research on attention, perception, learning, and decision making will be applied to problems in various areas including: aviation, highway safety, industrial safety, consumer products, human-computer interaction, and aging. Enrollment limited to 25.

CLPS 1550. The Psychology of Aversion (formerly PSYC 1520). Explores what is aversive to us and why. In particular, the ways in which sensory preception (e.g., smell, taste, vision), cognition, culture, personal experience, and neurobiology mediate our avoidance responses will be analyzed. The purpose of avoidance from an evolutionary perspective and how the emotion of disgust is uniquely human will be a theme throughout the course. Topics will range from neuropsychological disorders to our social behavior and morality. Additionally, why we are attracted to stimuli that “should” inspire avoidance (e.g., horror movies, roller coaster rides) will be examined. Students will acquire a broad knowledge of the psychology of aversion through course readings, discussions, projects and active participation. In addition to presentations and discussion, class time activities may include completing questionnaires, watching videos and assessing various sensory stimuli. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 20 students. Not open to first year students.

CLPS 1560. Visually-Guided Action and Cognitive Processes. One of the main purposes of encoding visual information is to perform visually-guided actions that directly interact with the external world. This seminar will shed light on the behavioral and underlying neural mechanisms involved in integrating perception and cognitive processes, and converting them into action. We will also explore how visuo-motor behavior can provide a useful tool to study a wide range of conscious and unconscious cognitive processes including the current locus of attention, the nature of language representation, spatial representation of number, and high-level decision-making. Prerequisite: CLPS 0010, CLPS 0020, or NEUR 0010. Enrollment limited to 40.

CLPS 1570. Perceptual Learning. This course will focus on perceptual learning and visual plasticity. The goal of this course is to understand the mechanisms of visual perceptual learning and visual and brain plasticity. Perceptual learning is defined as long-term performance improvement as a result of visual experiences. Enrollment limited to 20. Recommended prerequisites: CLPS 1291, 1500, and 1520.

CLPS 1571. Visual Consciousness. This course will focus on consciousness related to visual perception. The goal of this course is to understand the neural correlates of visual consciousness. 1) We will learn about basic neural mechanisms of visual processing and other brain functions. 2) We will discuss philosophical and neuroscientific models of visual consciousness. 3) We will examine the roles of attention, reward, and memory in visual consciousness. 4) We will evaluate recent neuroscientific experiments with animals and humans and their potential to advance the research of consciousness.

CLPS 1580A. Visually-Guided Action and Cognitive Processes. One of the main purposes of encoding visual information is to perform visually-guided actions to directly interact with the external world. This seminar will shed light on the behavioral and underlying neural mechanisms involved in integrating perception and cognitive processes, and converting them into action. We will also explore how visuo-motor behavior can provide a useful tool to study a wide range of conscious and unconscious cognitive processes including the current locus of attention, the nature of language representation, spatial representation of number, and high-level decision-making. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 40.

CLPS 1580B. Visual Attention. In daily life, most visual scenes are complex and crowded so that our visual system faces a daunting task of processing an enormous amount of information at a given moment. Thus, attentional mechanisms are crucial to select relevant objects/events and guide actions. In this seminar, we will understand behavioral and underlying neural mechanisms involved in visual attention and their interaction with visual cognition such as memory and learning and goal-directed actions. We will also study investigations of spared and impaired patterns of attention-based performances following brain injury. Prerequisite: CLPS 0010 or 0020.

CLPS 1590. Visualizing Vision (formerly COGS 1440). This course provides hands-on experience in studying vision using computer graphics combined with visual psychophysics. Students will gain a better understanding of how images are formed, how one employs properties of image formation in the experimental study of vision, and how the perception of complex images function in biological systems. Labs will rely on matlab and several computer graphics packages (e.g. Lightwave). Enrollment limited to 20.

CLPS 1600. History and Theories of Child Development (EDUC 1710). Interested students must register for EDUC 1710.

CLPS 1610. Cognitive Development (formerly COGS 1180). How do infants and preschoolers learn about the world? We will examine children’s understanding of the physical world, psychological kinds, biological entities, number, objects, and space. Students are expected to read and comment on both empirical and theoretical primary source articles, to participate in weekly discussions, and complete a set of writing assignments. Prerequisites: CLPS 0600 (PSYC0810), CLPS 0610 (COGS0630), or EDUC0800.

CLPS 1611. Cognitive Development in Infancy (formerly COGS 1620). The acquisition of knowledge during the first year of life. Special attention to the infant’s emerging concepts of space, objects, intermodal sensory connections, and speech as well as to such issues as the role of innate knowledge and the nature of the infant’s concepts and categories.

CLPS 1620. Developmental Cognitive Neuroscience (formerly COGS 1190). This course will examine fundamental topics in cognitive development from the point of view of the developing brain. Topics of interest will include developing abilities in perception, attention, action, object concepts, memory, learning, planning, language, and social cognition. Typical and atypical brain development will be considered. Prerequisite: One of CLPS 0600 (PSYC 0810), CLPS 0610 (COGS 0630), EDUC 0800, or permission of the instructor. Enrollment limited to 40.

CLPS 1621. The Developing Brain (formerly PSYC 1750C). Analysis of brain development, focusing on neural substrates of psychological processes in both animals and humans. Prerequisites: CLPS 0010 (PSYC 0010) or NEUR 0010. Not open to first year students or sophomores. Instructor permission required.

CLPS 1630. Perceptual Development. No description available.

CLPS 1640. Relationships and Human Development (formerly PSYC 1740). Explores formation and maintenance of relationships across childhood and early adulthood, as well as their importance for the development of social-cognitive competence. Topics include early caregiver-child relationships, peer relationships emerging in the school years, relationships with significant adults outside the family, family relationships and functioning, and marital relationships. Also considers approaches to intervention, particularly with respect to peer relationships. Instructor permission required. Enrollment limited to 20 senior or graduate-level Psychology concentrators.

CLPS 1650. Child Language Acquisition (formerly COGS 1430). All normally developing children acquire language, yet there is little agreement about how this takes place. This class explores the course of language acquisition from birth to babbling and first words to the use of complex syntax, discussing philosophical, theoretical, and methodological approaches to the problem. Includes practical experience analyzing child language data. Prerequisite: CLPS 0030 (COGS 0410) or CLPS 0800 (COGS 0450), or permission of the instructor.

CLPS 1670. Cross-Cultural Perspectives on Child Development (EDUC 1580). Interested students must register for EDUC 1580.

CLPS 1680A. Topics in Development: Social Learning. How do we learn from other people? If a child was raised in the absence of any social interaction, was it possible for them to understand what cognitive structures would he/she have and what cognitive structures would be absent? This course will focus...
on what (and more importantly) how children learn from others, including concepts like language, rituals, religion, and conventions that can only be learned from others as well as concepts like biology, and psychology that can be discovered through interaction with the world, but are aided by social construction. Emphasis will also be on "selective trust" - whether we learn from all informants equally. Prerequisite: CLPS 0600, 0610, or 0700. Enrollment limited to 20 juniors and seniors. WRIT

CLPS 1690. Laboratory in Developmental Psychology (formerly COGS 1610). Conceptual and methodological foundations of research design and analysis in developmental psychology, with particular reference to techniques commonly used in studying cognitive development. We will cover general principles of experimental design, measurement and assessment, and strategies of data analysis. Practical and ethical issues involved in conceiving, designing, executing, interpreting, and presenting research will be considered. Recommended prerequisites: CLPS 0610 (COGS 0630), and CLPS 0900 (COGS/PSYC 0090) or equivalent. Enrollment limited to 15.

CLPS 1700. Abnormal Psychology (formerly PSYC 1330). The study of anxiety, stress, and neurotic disorders, psychosomatic disorders, deviant social behavior, affective disorders, and schizophrenia. Considers theories of etiology (causes) and methods of therapeutic treatment, case studies, experimental research, and clinical research.

CLPS 1701. Controversial Issues in Mental Health Practice (formerly PSYC 1500). Examination of controversies involving scientific, clinical and social practices concerning mental health and illness. Topics include: classification and diagnosis, biases in psychiatric research and practice, specific conditions (e.g., gender identity disorder, ADHD, depression), treatment issues (e.g., ECT, medicating children with psychiatric drugs), screening for mental illness in public schools, and social-legal issues (e.g., insanity defense, duty to warn, involuntary treatment). Enrollment limited to 20.

CLPS 1710. Political Psychology (formerly PSYC 1730). This seminar explores topics at the intersection of psychology and political science. Topics include political attitudes, perceptions and behaviors. The psychology of ordinary individuals, political leaders, and groups will be studied in contexts where their interests do and do not coincide. As conflicts among these agents are particularly interesting, this course will stress psychological aspects of wars, oppression, and terrorism. Enrollment limited to 20.

CLPS 1720. Human Resilience (formerly PSYC 1410). This course explores answers to the question of what enables some individuals to escape the worst psychological consequences of extreme personal disruption caused by a range of human-made and natural disasters. It examines personal accounts, pertinent psychological research, theoretical discussions, and the creative works of catastrophe survivors. Enrollment limited to 20.

CLPS 1730. Psychology in Business and Economics. The goal of this course is to explore emerging themes at the intersection of psychological science, business, and behavioral economics. Psychologists are primarily interested in detecting limits to human rationality, whereas economics tends to proceed within the rational-actor model. In business, questions arise of how theoretical models and empirical findings related to the practice of managerial decision-making. Investigations of power and the psychological impact of money are relatively recent additions to the suite of research topics. New methodologies, such as neuro-imaging, have led to advances not represented in the traditional framework of organizational psychology. Enrollment limited to 20 junior and senior Psychology concentrators.

CLPS 1790. Personality and Clinical Assessment (formerly PSYC 1110). Examines methods used in the study of child and adult personality, including microanalysis of social interactions, observer report, self report, test data, and life outcome data. Standardized personality assessment instruments will be examined in the context of their reliability, predictive and construct validity. Students will design research projects using these methods, collect and analyze data, give oral presentations, and prepare a written report of their research. Prerequisites: CLPS 0701 (PSYC 0300), and CLPS 0900 (PSYC/COGS 0090) or equivalent. Enrollment limited to 27.

CLPS 1791. Laboratory in Social Cognition (formerly PSYC 1540). Examines principles of experimental design and analysis in the context of classic and contemporary research in social cognition. Students replicate and extend several studies on topics such as person perception, social stereotyping, or judgment and decision making. Students will participate in the design of these studies, gather their own data, analyze them, and report the findings in oral presentations and written reports. Prerequisites: CLPS 0010 (PSYC 0010), CLPS 0700 (PSYC 0210), and CLPS 0900 (PSYC/COGS 0090). Enrollment limited to 27.

CLPS 1800. Language Processing (formerly COGS 1410). Explores the nature of language processing with the goal of understanding how we produce and comprehend language. Topics include speech production and speech perception, lexical processing, and syntactic processing. Experimental investigations are studied in an attempt to understand the processes and mechanisms employed in the everyday use of language. Prerequisite: one of CLPS 0020 (COGS 0020), CLPS 0030 (COGS 0410), or CLPS 0800 (COGS 0450).

CLPS 1810. Syntactic Theory and Syntactic Processing (formerly COGS 1420). The interface between work in theoretical syntax and psycholinguistic research on syntactic processing. Consideration of how results in psycholinguistics support various models of human language processing. Recommended prerequisite: CLPS 1330 (COGS 1310).

CLPS 1820. Language and the Brain (formerly COGS 1480). This course will examine the neural systems underlying language processing. Major focus will be on effects of brain injury on speaking and understanding in left hemisphere-damaged patients who have aphasia, right hemisphere-damaged patients, and split-brain patients. Behavioral, electrophysiological and neuroimaging evidence will be investigated.

CLPS 1821. Neuroimaging and Language (formerly COGS 1840B). Examines neuroimaging approaches to language processing including fMRI, PET, TMS, and ERP. Consideration of the neural systems underlying speaking and understanding. Topics include neural basis of speech, lexical/semantic, and syntactic processing, mirror neurons and language, multisensory integration, meanings of words, literacy, and special populations. Recommended: either NEUR0010, CLPS 0020 (COGS0020) or CLPS 0800 (COGS0450) and one of the following: CLPS 0040 (COGS0720), CLPS 0400 (PSYC0470), CLPS 0410 (PSYC0750), CLPS 1820 (COGS1480), CLPS 1822 (COGS1500), NEUR1030, NEUR1680, or by permission.

CLPS 1822. Subcortical Brain Bases of Language and Thought (formerly COGS 1500). Recent studies indicate that the neural bases of human language and thought derive from a complex network of circuits within and connecting subcortical and cortical structures. Students prepare to evaluate published papers, noting the relationships that hold between data and theories. Relates neuropsychologic studies to current linguistic and cognitive theories and provides the background for independent research. Prerequisites: CLPS 0810 (COGS 0320), CLPS 1820 (COGS 1480), CLPS 1821 (PSYC 1100), or NEUR 0010.

CLPS 1880A. Speech Prosody (formerly COGS 1840C). The broad aim of this seminar is to discuss the various ways in which linguistic and paralinguistic meanings can be conveyed by the way that speakers produce their utterances. The topics will include the effect of pitch variation and phrasing on pragmatic meanings and discourse functions, turn-taking strategies, cue phrases and filled pauses, new-given information, or prosody of deceptive speech. Recommended prerequisite: CLPS 0030 (COGS 0410).

CLPS 1880B. Cognitive Neuroscience of Language Acquisition. The ability to acquire language is unique to humans. This class explores our language-specific biological endowments. Topics include: Genetics and evolution of language; the brain-basis of acquisition; effects of age
on language learning ability; effects of environmental differences (such as growing up blind or deaf) on acquisition; and language in special populations such as autism. Students will read and discuss empirical and theoretical articles, and complete writing assignments and problem sets. Prerequisite: CLPS 0060, 0610, 0800, or EDUC 0800, or instructor permission. Enrollment limited to 20. Not open to first year students. WRIT

CLPS 1890. Laboratory in Psycholinguistics (formerly COGS 1450).
An advanced course in methodological approaches to the study of psycholinguistics. Processes (e.g. with adult lexical access, sentence processing, corpus linguistics, etc.) Recommended prerequisites: CLPS 0800 (COGS 0450) and CLPS 0800 (COGS/PSYC 0090), or equivalent.

Introduction to laboratory techniques and the analysis of data relevant to physiologic and acoustic phonetics. Emphasis on the use and interpretation of waveform and spectrum analysis, electromyography, cereradiography, high-speed motion pictures, computer modeling of oral tract output, and experimental techniques involving the perception of synthetic and natural speech.

Examines general philosophical and theoretical issues that cut across cognitive science. Each student writes a substantial paper on a topic in cognitive science. Required of cognitive science concentrators. Enrollment limited to concentrators in the 7th semester or beyond, and, by permission, to others who have significant course background in cognitive science.

Independent study or directed research in cognitive science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

Required of all ScB concentrators and Honors students in psychology. Instructor permission required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Introduces students to the CLPS Department and the University; provides a brief history of the disciplines, philosophical foundations, and ethical treatment of human subjects; provides professional training, such as preparation of CV and research statement, practice in grant writing, and foundations in scientific writing and presentation; and supports students' early stages of developing a first-year project.

CLPS 2001. Graduate Proseminar II.
No description available. Open to graduate students only.

CLPS 2091. Graduate First Year Project Research (formerly PSYC 2000).
Please check Banner for the correct section number and CRN to use when registering for this course.

CLPS 2092. Graduate First Year Project Research (formerly PSYC 2010).
Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2095. Practicum in Teaching (formerly COGS/PSYC 2050).
Each student will assist a designated faculty member in teaching a course in cognitive science or related discipline. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2096. Directed Graduate Research (formerly COGS 2980/2981, PSYC 2030).
No description available. Instructor permission required.

CLPS 2100. Core Topics in Animal and Comparative Behavior (formerly PSYC 2190).
No description available.

CLPS 2132. Graduate Seminar in Learning (formerly PSYC 2320).
Advanced topics in animal and human learning. Topics vary from year to year: examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes.

CLPS 2180. Duration Discrimination (formerly PSYC 2320A).
No description available.

CLPS 2181. Advanced Topics in Animal and Human Learning (formerly PSYC 2320B).
Topics vary from year to year, examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes. Open to graduate students only.

CLPS 2200. Core Topics in Cognition (formerly COGS 2200A).
No description available.

CLPS 2210. Current Topics in Memory Research (formerly PSYC 2240).
A graduate seminar addressing selected topics in memory, including theories of normal and pathological memory, animal models of human memory, and the neural substrates of memory. Topics vary from year to year. Permission required for undergraduates.

CLPS 2400. Core Topics in the Neural Basis of Behavior (formerly PSYC 2270).
Seminar on comparative aspects of brain evolution and function, with implications for behavior. Open to graduate students only.

CLPS 2450. Exchange Scholar Program (formerly COGS 2450).

CLPS 2455. The Mind Asleep (formerly PSYC 2550).
Seminar on selected topics in sleep, incorporating the core disciplines of psychology (Behavioral Neuroscience, Sensation and Perception, Cognitive Processes, and Social). Discussion based classes will examine sleep and affect/mood, dreaming, sleep and learning and memory, sensation/perception processes during sleep, effects of sleep deprivation and sleep disorders.

CLPS 2500. Core Topics in Perception (formerly COGS 2200C, PSYC 2400).
No description available. Open to graduate students only.

CLPS 2510. Graduate Seminar in Vision (formerly PSYC 2210).
Selected topics in vision, including optics of the eye, anatomy of the visual system, photochemistry of vision, psychophysics of color, acuity, models of color vision, and light as a visual stimulus. Specific topics vary.

CLPS 2700. Core Topics in Social Psychology (formerly PSYC 2220).
A survey of classic and contemporary research in social psychology, including attitude formation and change, person and self perception, stereotyping, and intergroup relations. Open to graduate students only.

No description available.

CLPS 2800. Core Topics in Language (formerly COGS 2200B).
No description available. Open to graduate students only.

CLPS 2800D. Core Topics in Developmental Psychology.
This Core is an overview of issues in the study of cognitive and social development. The goals are to: (1) provide breadth by reviewing the major theoretical approaches, classic tasks, and paradigms for studying and understanding development (constructivist, nativist, biological, information processing, and systems approaches) and (2) provide depth by considering the strengths and shortcomings of each theory and the pros and cons of different research strategies for investigating the central questions of cognitive and social development (3) provide a background on goals of developmental studies (characterizing change, underlying change mechanisms, generality of change, and stability of behaviors across individuals and circumstances).

CLPS 2902. Quantitative Methods in Research (formerly PSYC 2060).
No description available.

CLPS 2906. Experimental Design (formerly PSYC 2060).
The course designed for students at the intermediate level or above and will cover t-tests, power analysis, correlation, simple and multiple linear.
regression, logistic regression, analysis or variance, non-parametric tests, randomization and bootstrapping, among others. Instructor permission required. Open to graduate students only.

CLPS 2908. Multivariate Statistical Techniques (formerly PSYC 2908).
This course covers the basic multivariate techniques currently used in psychology and related sciences: multiple regression, logistic regression, principal components and factor analysis, multivariate analysis of variance, discriminant function analysis, and log-linear analysis. Students will learn these techniques’ conceptual foundations, their proper selection for a given data set, and the interpretation of computer output from statistical analysis packages (primarily SPSS). Enrollment limited to 20 graduate students.

CLPS 2970. Preliminary Examination Preparation (formerly COGS/PSYC 2970).
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CLPS 2990. Thesis Preparation (formerly COGS/PSYC 2990).
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Linguistics
LING 0030. Introduction to Linguistic Theory (CLPS 0030).
Interested students must register for CLPS 0030.
LING 0050G. Pidgins, Creoles, and the Emergence of Language (CLPS 0050G).
Interested students must register for CLPS 0050G.
LING 0330. The Grammar of English (CLPS 0330).
Interested students must register for CLPS 0330.
LING 0800. Language and the Mind (CLPS 0800).
Interested students must register for CLPS 0800.
LING 0810. The Biology and Evolution of Language (CLPS 0810).
Interested students must register for CLPS 0810.
LING 1310. Introduction to Phonological Theory (CLPS 1310).
Interested students must register for CLPS 1310.
LING 1320. The Production, Perception, and Analysis of Speech (CLPS 1320).
Interested students must register for CLPS 1320.
LING 1330. Introduction to Syntax (CLPS 1330).
Interested students must register for CLPS 1330.
LING 1340. Introduction to Semantics (CLPS 1340).
Interested students must register for CLPS 1340.
LING 1341. Lexical Semantics (CLPS 1341).
Interested students must register for CLPS 1341.
LING 1342. Formal Semantics (CLPS 1342).
Interested students must register for CLPS 1342.
LING 1350. Introduction to Mathematical Linguistics (CLPS 1350).
Interested students must register for CLPS 1350.
LING 1360. Introduction to corpus linguistics (CLPS 1360).
Interested students must register for CLPS 1360.
LING 1381. Topics in Phonetics and Phonology: Intonational Phonology (CLPS 1381).
Interested students must register for CLPS 1381.
LING 1383A. The Boundary of Semantics and Pragmatics (CLPS 1383A).
Interested students must register for CLPS 1383A.
LING 1383B. Issues in Current Syntactic Theory (CLPS 1383B).
Interested students must register for CLPS 1383B.
LING 1385. Topics in Language Acquisition (CLPS 1385).
Interested students must register for CLPS 1385.
LING 1387. Topics in Neurolinguistics (CLPS 1387).
Interested students must register for CLPS 1387.
LING 1389. Topics in Language Processing (CLPS 1389).
Interested students must register for CLPS 1389.
LING 1650. Child Language Acquisition (CLPS 1650).
Interested students must register for CLPS 1650.
LING 1800. Language Processing (CLPS 1800).
Interested students must register for CLPS 1800.
LING 1810. Syntactic Theory and Syntactic Processing (CLPS 1810).
Interested students must register for CLPS 1810.
LING 1820. Language and the Brain (CLPS 1820).
Interested students must register for CLPS 1820.
LING 1821. Neuroimaging and Language (CLPS 1821).
Interested students must register for CLPS 1821.
LING 1822. Subcortical Brain Bases of Language and Thought (CLPS 1822).
Interested students must register for CLPS 1822.
LING 1880A. Speech Prosody (CLPS 1880A).
Interested students must register for CLPS 1880A.
LING 1890. Laboratory in Psycholinguistics (CLPS 1890).
Interested students must register for CLPS 1890.
Interested students must register for CLPS 1891.

Cogut Center for the Humanities

Director
Michael P. Steinberg
Brown University has long offered a unique focus and quality in the humanities, combining the preservation of knowledge with a spirit of innovation and adventure. The humanities today include ever-vital traditional disciplines such as history, philosophy, language and literary studies, and religious studies. They also include the newer disciplines of art history, musicology, the interpretive dimensions of social sciences such as anthropology and political science, and more recently, interdisciplinary initiatives such as media studies and gender and sexuality studies.

Named for Craig M. Cogut ’75 and Deborah Cogut in recognition of their generous support, the Cogut Center for the Humanities was launched in the fall of 2003 as the Brown Humanities Center to support collaborative research among scholars in the humanities. Today, through its fellowship, grant, and distinguished visitors programs, and regularly scheduled events, the Cogut Center strives to:

• Foster innovative work in the humanities and related disciplines
• Sustain and nurture international perspectives at Brown in an era of increasing globalization
• Explore the history and effects of the rapid growth of technologies of information and visualization
• Examine the public role of the humanities in the context of recent challenges and pressures
• Enrich relations between the humanities and the studio and performing arts
• Investigate the re-emergence of pressing issues of ethics and aesthetics
• Reinvent the concept of critique and the role of critical theory in the humanities

The Cogut Center is poised to build on the strengths of Brown University at a moment of unique institutional distinction and growth, and at a time of particular national and global urgency. The Cogut Center is providing multiple programs to bring Brown faculty and students into regular and innovative contact with each other, as well as with national and international scholars and scholarship. In fulfilling its mission to the University and to the field of humanities, the Cogut Center supports and enhances Brown’s stellar reputation in the humanities.
Courses

Interested students must register for UNIV 1200.

HMAN 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture (ANTH 1305).
Interested students must register for ANTH 1305.

For the past several decades (but especially since 2001), internationalists have been increasingly preoccupied by the perceived "return of religion." Religion is often proclaimed to pose the single greatest threat to a liberal legal/political order and, less often, to be the greatest hope for that order. We will explore genealogies of the three key terms at stake in this conundrum — "religion," "secularization," and "the international." We begin from the proposition that none of these terms refer to ahistorical essences, but have been subject to continual theoretical/practical contestation/reconfiguration. We focus on that contestation as it has emerged in "modernity." Enrollment limited to 20 juniors, seniors, and graduate students.

This course is built around the question of the animal as a difficulty posed to representation and thought at a time when animals have largely disappeared from humans’ living environment, but proliferate as strange protagonists, specters or figures of ambiguity in literature and philosophy. We will consider a range of texts and films that "cast" the animal critically, that is, as a body that strains or scrambles meaning (interruption, irony, illegibility, haunting) and forces us to reconsider the work of language and narrative (indeed, of the "human"). Authors include Kafka, Coetzee, Hofmannsthal, Kofman, Chevillard, Darrieussecq, Derrida, Agamben, de Fontenay, Herzog. Enrollment limited to 20 juniors and seniors.

This course introduces students to the 19th/early 20th century Arab thought - the "Nahda" (Arab Renaissance). Through primary and secondary English texts, we will explore questions raised by thinkers of this epoch pertaining to perceived civilizational crisis, and examine the diagnoses/proposals offered by them. The course underlines the changes and continuities in these concerns under the impact of dramatic socio-political events of the epoch. We will discuss the strengths/weaknesses of "Nahda" thought that continues to inform/preoccupy contemporary Arab debates on culture, democracy, gender and Islam. We will examine the significance of this legacy in today's Arab world. Enrollment limited to 20 juniors and seniors.

From antiquity to our day, therapeutic landscapes such as: mineral and thermal springs; shrines and churches built at sacred springs; volcanic ash mud baths; rocky landscapes emitting odorous gasses; and ponds filled with medicinal leeches, attract health pilgrims who search for healing. Storytelling transformed these into places of memory and pilgrimage. This seminar investigates places of bodily healing and miracle from a cultural studies perspective. The case studies will be drawn from the Mediterranean world and Western Asia (including Lourdes in France, Hierapolis in Southeastern Turkey and the Agiasma churches of Byzantine Istanbul). Enrollment limited to 20 juniors and seniors.

HMAN 1970E. The Precarious University.
The intensification of student protest-occupy movements across the country particularly in California, and the proliferation of the OWS movements across the world have rejuvenated social movements against cuts for the people and kickbacks for the wealthy. In this seminar, we will address the epistemic shifts and intellectual costs of these ongoing upheavals, particularly the fight against the U.S. university’s neoliberalization. We will imagine the kind of progressive university that is sustainable for the arts and humanities, and how the precarious work of artists and humanists is fundamental to 21st century global universities. Enrollment limited to 20 juniors and seniors.

Does pain and reflection on pain teach us something about ourselves, the world, our relation to it? This seminar approaches the question by examining the meaning of pain in Russian/Polian literature/literary theory of the 20th century. Our concern is with pain’s resistance to language and representation. The works analyzed offer a variety of responses to problem of pain as it appears in theology, experimental medicine, discussions of materialism, the philosophy of Schopenhauer, and above all, the giants of Russian literature, Dostoevsky and Tolstoy, in whom these debates are dramatized; they also form the ground on which Russian and Polish literature meet. Enrollment limited to 20 juniors and seniors.

HMAN 1970G. International Perspectives on NGOs, Public Health, and Health Care Inequalities.
Non-governmental and other non-state organizations play an expanding role in the provision of health care across much of the globe. Growth and internationalization of the non-governmental sector, contraction of post-socialist and advanced industrial welfare states, and sub-contracting of state-funded services have all contributed. The seminar focuses on this expansion, critically assessing texts on NGOs and health and drawing comprehensively from sources across disciplinary and interdisciplinary boundaries. We will address issues of human welfare, political citizenship and identity, replacement and displacement of states, new forms of health care inequalities, and the self, roles of non-profit sector workers around the globe. Enrollment limited to 20 juniors and seniors.

Comparison, which posits a likeness between the dissimilar, is always profoundly haunted by the question of its ground and judgment. This seminar will examine the comparative logic of capitalist modernity in the works of Marx, Weber, Adorno and Horkheimer, Foucault, Heidegger, and Benjamin. We will ask the following questions: How is equivalence established between nonequivalent objects? How are actual social relations quantified and measured, and is there an ethics to modern forms of comparability? How does language reflect and produce these operations? Or, to put it differently: What are the forms through which difference “haunts” us? We will pay special attention to figures of the double and the ghost in Hoffmann and Freud. Other topics to be covered include rationalization and the disenchantment of the world, the modern uncanny, "mediauras,” colonial comparison, and the ethics of incomensurability.

What happens when a particular ‘orthodoxy’ becomes able to impose itself on others? This course examines the imposition of post-Constantinian catholicism on Jews, Samaritans, other Christians (Arians, Miaphysites, etc.) and the remaining ancient Mediterranean populace (4th–7th centuries) to consider a larger cultural phenomenon. We’ll draw on ancient authors and legal sources (in translation), archaeological data, and contemporary studies. Half the course entails communal exploration of the late antique Mediterranean. Student research presentations, including studies of comparable situations from other cultural and historical contexts, comprise the second half. Useful prior coursework includes: RELS 410, RELS 410, RELS 410, CLAS 600, CLAS 600, CLAS 1250. Enrollment limited to 20 juniors and seniors.

Why do we take pleasure in small-scale objects? What is their history and what purposes do they serve? How do the technology and the aesthetics of the small contribute to human cognition? To find answers to these and other questions, the seminar explores the cultural, literary and cognitive significance of miniatures. We will explore productive relationships between three areas of research: imaginative texts produced during the eighteenth century, the period’s prolific but insufficiently studied production of small-scale versions of everyday objects, and recent developments in cognitive theory about the role of size-perception in the developing brain. Enrollment limited to 20 juniors and seniors.

For additional information please visit the Center’s website at: http://www.brown.edu/Departments/Humanities_Center/
In an arguably "post-secular" age, conflicts over the relationship between religion and law have moved to the forefront of international debate. In our multicultural/globalized world, such conflicts often provoke contestation over the very possibility of universal definitions of either "religion" or "law," let alone their proper relationship. Our interdisciplinary inquiries on these questions will include concrete legal disputes in domestic/international courts; theoretical debates over the construction of "religion" in fields such as anthropology, religious studies, and philosophy; and historiographical controversies about the relationship between "secularization" and sovereignty, particularly in light of the legacy of colonialism. Enrollment limited to 20 juniors, seniors, and graduate students.

Modern aesthetics emerged in the eighteenth century at the intersection of different disciplines, discourses, cultures, and European nations. Contributors to the new field came not only from academic philosophy but also from the arts, literature, history, theology, and other fields. Aesthetics was thus and remains primary among interdisciplinary disciplines. Readings for this course will be drawn from British, German, and French authors such as Shaftesbury, Du Bos, Addison, Hutcheson, Hume, Burke, Kames, Diderot, Mendelssohn, Lessing, Kant, Schiller, and Herder. Enrollment limited to 25 juniors and seniors.

Doomsday predictions/apocalyptic themes have become commonplace. Between "End of History" theses/Mayan Calendar predictions/ posthumanist theories/the Rapture, and environmental/financial collapse, it seems we are living in what many believe to be End Times. This course will examine some principal clusters of ideas around finitude: posthumanism/singularity, environmental collapse, patriot survivalism, and post-politics. We will look at a number of cultural products: traditional fiction/non-fiction, blogs/podcasts/films. It will be less important to establish whether the Mayan calendar calculations are accurate than seeing the connections between those claims and the claims of survivalists/Rapture theorists. Taken together, what do all these claims say about this moment in history? Enrollment limited to 25.

HMAN 1970N. The Israeli-Palestinian Conflict in the Global Scene.
Dominant narratives of Israeli/Palestinian conflict obscure influential forces taking place outside the boundaries of Israel/Palestine, stories we believe are unique/historically peculiar. We will see how groups have been inspired by/have inspired both peoples' struggles for survival/self-determination. We examine case studies revealing connectivity/reciprocity: Zionism's inspiration for Garvey's/U.S.-back-to-Africa movement; adoption of Fanonian/Maoist/Guevarian thought in Middle East; Black Panther Party's support for Palestinians/their endorsement of an Israeli Black Panther Party in the 1970s; South Africa/Latin America's economic/military ties to Israeli/Palestinian call for international Boycott/Divestment Sanctions; and examine how struggles for self-determination negotiate between seeking territorially bounded independence/globally networked liberation, in the region/beyond. Enrollment limited to 20 juniors and seniors.

Many of today's dissident movements adopt leaderless/self-managed practices presenting us with radically different notions of what it means to self-determine. We will situate these movements within historical struggles for autonomy. By "autonomy" we understand the quality or state of being self-governing/self-determining. By "self," we understand not the self-originating/self-determining/rational individual constructed by Enlightenment liberal humanism, but rather, a diversity of self-defined collectivities made up of social individuals. We will consider runaway slave societies (Western Hemisphere), Operaismo (Italy), Zapatistas (Mexico), Tahrir Square's protesters (Egypt), Occupy Movement (US), Shackdwellers (South Africa), refugee/migrant movements. Readings include Marx/ Cleave-linebaugh/Rediker/Negri/Tronti/Virno/Berardi/ Holloway/others, and documents from movements we engage. Enrollment limited to 20 juniors and seniors.

Pragmatism is a distinctive American school of thought that sees the goal of philosophy not as the apprehension of timeless truths but as a practical project of bettering individual lives and society as a whole. Pragmatists such as William James and John Dewey were devoted to deepening America's commitment to democracy. Both saw an important place for an unconventional sort of religion in democratic life. This course explores the pragmatist thought of James, Dewey, and others, looking especially at their views on religion and politics. We also will explore the influence of pragmatism on Barack Obama. Enrollment limited to 20 juniors and seniors.

Concepts are usually thought of as cognitive tools, constituents of thought used for categorization, inference, memory, learning, and decision-making. We shall think about them rather as effects of a language game of a special kind whose rules change across genres, media, and discursive regimes. Looking for these rules and analyzing them comparatively, we shall ask how concepts are formed, displayed, and performed, when do we need them and can we do without them. We shall read philosophers (Plato, Descartes, Kant, Heidegger, Wittgenstein, Foucault, Derrida, and Deleuze), intellectual historians (Koselleck, Skinner), literary works (Klest, Kafka, Musil), and look at some conceptual art. Enrollment limited to 20.

Cuba today is home to writers, musicians and artists who engage with new media and a global audience against the backdrop of a socialist revolution. This seminar will explore esthetic and political dimensions of contemporary Cuban culture with authors who will speak to us directly through a video link with Casa de las Américas in Havana. Knowledge of Spanish required.

HMAN 1970S. Ethics and the Humanities.
This seminar will engage with ethical issues in a broad range of humanities disciplines. We will survey historical and thematic perspectives on ethics, and will consider the ethical implications of authorship and possession of texts and objects; translation as an ethical problem; data and open access; the perspective of the human subject; public humanities, public intellectuals and community-based research; and ethical issues in popular culture. Enrollment limited to 20. Not open to first year students or sophomores.

We'll investigate how new media technologies shape musical practices (and vice versa). Topics will include DJ cultures, digital music distribution and related intellectual property issues, digital gameplay, music videos, popular music reception, online music lessons, and virtual communities. We'll give equal attention to production, circulation, and reception practices, as well as to their increasing convergence. Readings will include both contemporary and historical studies. The course will require critical engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media production and consumption practices. Enrollment limited to 20. Not open to first year students or sophomores.

HMAN 1970V. Pragmatic Medical Humanities.
The question, "What is medical humanities?" has flummoxed the very experts who ardently argue for its importance to medical education and the professional and personal growth of health care providers. The interdisciplinary nature of medical humanities, engaging in conversations with persons who possess different expertise, knowledge and approaches, provides opportunities for insight unavailable elsewhere. Students will investigate alternative meanings, interpretations and purposes embedded in the term "medical humanities." They will develop their own personal relationship to this term/field of study, and its utility as a tool for understanding and responding to the profound experiences of clinical medicine, illness and health. Enrollment limited to 20. Not open to first year students or sophomores. This is a half-credit course.

This seminar examines the role of disease, medicine, and health in the history of the Atlantic World. Our analysis will be centered on events that took place in Latin America, the Caribbean, and Sub-Saharan Africa, during the era of European colonial expansion (1490-1940). In these four and a half centuries, the West became the dominant force in global geopolitics and Western medicine emerged as the hegemonic form of healing worldwide. This seminar explores the complex relationship
between these two historical developments. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Y. Politics and Authority in Islamic Law and Society.** Few courses offer insight into the genesis of Islamic political theory in light of the social and historical circumstances of the medieval period. This seminar seeks to address major trends in political thought of classical Islam. In addition to reading secondary scholarship on social and political aspects of early Muslim society, we will also examine primary sources in translation (Prolegomenon, Book of Ordinances); literary genres, including official state epistles from the medieval period; and the work of Ibn Taymiyya. Finally we will address issues of authority, ethics and gender in contemporary analyses. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Z. Knowledge Networks and Information Economies in the Early Modern Period.** This course is designed to introduce students to major topics in the developing historical literature on the relationships between intellectual and economic history, and their implications for European culture, mainly in the first two centuries after Columbus and Da Gama. Enrollment limited to 20 juniors and seniors.

**HMAN 1971A. City Spaces, City Memories.** Since 9/11, New York City has become a site of collective memory, in which a variety of disciplines have asked how we can memorialize people and the buildings that house them. The city, however, has been a space of memory for much of the twentieth century. This course will discuss 20th and 21st century New York City to consider the ways people have located personal and the communal pasts in the city’s spaces, especially in its buildings. We will examine novels, journalism, memoirs, architectural criticism and photography, along with memorials and tourist attractions. Enrollment limited to 20 juniors and seniors.

**HMAN 1971B. Paris Archive: The Capital of the Nineteenth Century, 1848-1871.** We will take as our starting-point Walter Benjamin’s notes for his unfinished masterwork “The Arcades Project.” The Passagenwerke comprise a massive index of citations/observations on the nature/form of the city of Paris in every aspect of its cultural/political life in the 19th/20th centuries. We will read works from which he culled his aphorisms/ investigate the present status of each of his assertions/citations, with historical/contemporary readings. We will discuss the nature of historical/ archival interpretation and try to bring together artifacts – textual/visual/ sensorial - that might constitute a "Museum" of 19th Century Paris. Taught by Prof. Anthony Vidler. Graduate students encouraged to register. Enrollment limited to 20.

**HMAN 1970A. Accounting for Silence: Anthropology of Law and Narrativity.** Explores the role of law in redressing the past, specifically in cases of postwar compensation for the Second World War. We look at the convergence of two processes, the breaking of long-held silence by victims through various forms of testimony inside and outside the courtroom, and the legal process of redress. Cases for this course arise primarily from the Japanese use of wartime slave labor in East Asia. Since the 1990s, large number of Chinese and Korean war victims, such as former forced laborers and the so-called “comfort women” to name but a few, have filed lawsuits against the Japanese government and corporations. In the process, they give voice to their long silenced, traumatic experiences. Through anthropological approaches to law and testimonial practices, we shall examine such questions as: what kind of legal space is created through compensation lawsuits; what kind of “performance” is produced both inside and outside the courtroom; what kinds of power dynamics underlie the recouting of testimony; and, what does it mean to account for silence in pursuit of the politics of redress? Even though the course draws examples primarily from East Asia, students are encouraged to pursue their own choice of cases elsewhere in their final paper project. Limited to 20 graduate students.

**HMAN 2970B. And What About the Human?** This course will thread the question posed by radical anti-colonial thought: and what about the Human? Through the writings of Foucault, Arendt, Heidegger, Fanon, Wooler and Cesaire, as well as the novels of Lamming and Vera, we will examine the meaning of the “death of Man” in contemporary critical thought and theory, and the ways in which western anti-humanism thought claims to replace the figure of the human with discourse and language, while also contrasting the ways in which radical anti-colonial thought has constructed the figure of the human. Enrollment limited to 20.

**HMAN 2970C. Concepts of Space and Time in Media Discourses.** No description available. Enrollment limited to 20 graduate students.

**HMAN 2970D. Biological Issues in Cultural Theory.** Contemporary culture is increasingly preoccupied by biological themes and issues—genomes, brain images, biotechnology, the natural environment, etc.—and, not unrelatedly, by a wave of new biological determinisms: "gay genes," "God genes," mental "hardwiring," etc. At the same time, ongoing work in fields such as developmental biology, ethology, neuroscience and science studies increasingly challenges classic dualisms of nature/culture and mind/body along with traditional assumptions about the nature of biological entities and the operations of scientific knowledge. The seminar will focus on a selection of these issues and developments especially relevant to the interests of humanities scholars and students of culture and cultural theory. Enrollment limited to 20 graduate students.

**HMAN 2970E. Pain, Medicine and Society.** We take on the big question of pain as an interdisciplinary enterprise, drawing on the rich and varied faculty of Brown University and Alpert Medical School. We will examine acute/chronic/physical/psychic pain, the nature of suffering, and why some might find value/solace in pain and suffering. We will examine representations of pain in literature, art and music; look at the shifting conceptions of pain and suffering across cultural/ethnic/religious communities, and the actual/perceived barriers to effective treatment of pain. Most importantly, we will foster sensitivity and impart tools that will improve our understanding and treatment of individuals suffering from pain. Enrollment limited to 20 students in Medical Humanities and graduate Humanities fields. Honors undergraduates and PLMEs may enroll with instructor permission.

**HMAN 2970F. Nationalism, Colonialism, and International Law.** This seminar explores the internationalism of the past century in terms of its relationship to separatist nationalism, anti-colonialism, and religious radicalism. It takes as its point of departure the dramatic political, cultural, and intellectual transformations that followed in the wake of World War I. A guiding hypothesis of the seminar is that internationalism cannot be understood apart from its complex relationship to "identity" broadly conceived — identity of local/transnational groups as well as the identity of internationalists themselves. Readings will be drawn from law/cultural studies/politics/postcolonial theory. Enrollment limited to 20 graduate students. Advanced juniors/seniors by permission only.

**HMAN 2970G. Space and Capital.** This course examines various ways Western/non-Western societies have conceptualized space, with a specific focus on the tension between capitalist/common space. We adopt the map as a lens into this question, focusing on the cadastral survey’s rise in the Modern era and on its role in parceling space into strictly bounded, individual property. Throughout the semester, we undergo an enquiry into the map’s uncritical reception in the contemporary era, understanding this development as linked to the Scientific Revolution; the role of linear perspective; the Age of Discovery’s world-as-picture; as well as to the processes of primitive accumulation, colonialism, and the nation-state. Enrollment limited to 20.

**HMAN 2970J. Realism, Idealism, and Modernity (II).** This course continues discussion of realism and idealism as alternative responses to the challenges of modernity. We begin with Schelling’s System of Transcendental Idealism and selections from Hegel; subsequent authors include Nietzsche, a Neo-Hegelian such as F.H. Bradley, a Neo-Kantian such as Ernst Cassirer, a pragmatist such as John Dewey or C.I. Lewis, and more recent philosophers such as Rudolf Carnap, Thomas Kuhn, Jurgen Habermas, and others. We will especially consider how recent versions of conceptual relativism such as Kuhn’s draw on both the realist/idealist traditions to model the modern scientific outlook. Undergraduates with instructor permission. HMAN 2970H helpful but not required. Enrollment limited to 20.
HMAN 2970L. History and Theory of Catastrophes.
This seminar proposes a philosophical history of catastrophes (large-scale disasters) and uses it as a vantage point for questioning contemporary critiques of modernity/secularization. Starting from Biblical narratives of God-made disasters, we will follow God's role in the way north-western societies interpret/cope with catastrophes. Reading/viewing documentation of catastrophes from Defoe's Journal of the Plague 'Year to Cooper's/ Block's/Spike Lee's reports on Hurricane Katrina, we will examine the emergence of the state as a major actor responsible for preparing for catastrophes/mitigating their effects, but often also for their generation, and discuss the globalization of catastrophes and with catastrophes as special sites of globalization. Enrollment limited to 20.

HMAN 2970M. Race, Space, and Struggle.
This seminar will examine the stark realities of spatial racialization: ghettos, slave plantations, prisons, refugee camps, and border walls, situating the creation of these spaces as violent responses to broader social/economic crises. At the same time, this course will highlight the the always already existing practices of resistance by exploring how inhabitants these spaces responded to their marginalization. Because these spaces are also lived, our understanding of anti-racist struggle will encompass a broad array of everyday practices, the appropriation of space, artistic expressions of resistance, and everyday forms of cooperation/creativity, alongside more traditional forms of organized interventions. (Course prerequisites: none) Enrollment limited to 20.

Comparative Literature

Chair
Karen A. Newman

Comparative literature is the study of literature and other cultural expressions across linguistic and cultural boundaries. At Brown, the Department of Comparative Literature is distinct in its conviction that literary research and instruction must be international in character. The department performs a role similar to that of the study of international relations, but works with languages and artistic traditions, so as to understand cultures "from the inside." Both the department's undergraduate and graduate programs are held to be among the finest in the country.

For additional information, please visit the department's website: http://www.brown.edu/Departments/Comparative_Literature/

Comparative Literature Concentration Requirements

The concentration in Comparative Literature enables students to study literature in cross-cultural perspectives. The aim of the program is to encourage students to study a varied and illustrative range of literary topics rather than the total development of a single literary tradition. True to the spirit of Brown's New Curriculum, a concentration in Comparative Literature affords great academic freedom. For example: advanced courses in any literature department at Brown count for concentration credit; although English is commonly one of the languages that students apply to their Comparative Literature studies, basically any language--ancient or modern--supported at Brown may form part of a Comparative Literature concentration program. In essence, concentrators study a generous range of literary works--from Western cultures, both ancient and modern, to Chinese, Japanese, and Arabic--and develop a focused critical understanding of how cultures differ from one another. Comparative Literature differs from other literature concentrations largely through its international focus and its broad-gauged view of art and culture in which the study of languages is combined with the analysis of literature and literary theory. All students take a course in literary theory and have the opportunity to complete a senior essay.

There are three concentration tracks in Comparative Literature, as follows:

Track 1: Concentration in Comparative Literature with two languages

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
     • Antiquity
     • Middle Ages
     • Renaissance/Early Modern
     • Enlightenment
     • Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

Track 2: Concentration in Comparative Literature with three languages

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Complete the same requirement for your third language before Semester VII (the above proviso for students working in non-European languages also holds here).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
     • Antiquity
     • Middle Ages
     • Renaissance/Early Modern
     • Enlightenment
     • Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

Track 3: Concentration in Literary Translation

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- Comparative Literature 1710 (Comparative Literature 2720 strongly urged).
- ONE course or MORE in Linguistics, drawn from among these courses: Cognitive, Linguistic and Psychological Sciences 0410, Anthropology 0800, English 1210, Hispanic Studies 1210 or an acceptable substitute.
- FIVE or SIX advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
  • Antiquity
  • Middle Ages
  • Renaissance/Early Modern
  • Enlightenment
  • Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

• TWO workshops or MORE in Creative Writing
• A senior project to consist of:
  A substantial work in translation (length will vary depending upon language and genre);
  A critical introduction outlining the method used and specific problems encountered, and commenting on the history of the original work together with other translations, if any. For thesis, the student may register for COLT 1990, which will be taken in addition to the ten required courses listed above. Successful completion of the thesis constitutes Honors. (See Guidelines for Honors Theses).

For additional information, please visit the Comparative Literature website (http://www.brown.edu/Departments/Comparative_Literature/) or see the Concentration Advisor, Professor Stephanie Merrim.

Comparative Literature Graduate Program

The department of Comparative Literature offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. While doctoral students may also earn the Master of Arts (A.M.) degree en route to the Ph.D., the department does not admit students into a terminal Master's degree program.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/comparative-literature

Courses

COLT 0510A. Best-sellers.
Study of seven novels published within the last decade that have enjoyed broad success with reading publics in different places. What pleasures of thought and imagination do we derive from these books, and how can we express clearly our responses? What is the appeal of these best-sellers first to their home audience, then to readers in other social environments and cultures? How may we reshape our own horizons of thought in order to appreciate them? Students will be encouraged to develop their skills of literary analysis, interpretation, and critical discussion. Two lectures and one discussion section per week. Several short papers, quizzes, and a final exam.

COLT 0510B. Caribbean Re-writes.
Through close readings of canonical European texts and rewritings of them in the twentieth-century Caribbean, we explore the literary possibilities and political implications of writing the old in a new language. Readings include Columbus's diaries alongside Carpenter's The Harp and the Shadow (Cuba); Shakespeare's Tempest with that of Aimé Césaire (Martinique); and Jane Eyre and Wuthering Heights alongside novels by Jean Rhys (Dominica) and Maryse Condé (Guadeloupe).

COLT 0510C. The World of Lyric Poetry.
Lyric poetry is the prime mode for conveying emotion in many cultures, from ancient times to the present day. This course will survey the variety of forms and themes from the earliest texts from Greece, Rome, China and Japan, then the glories of the Renaissance and the Tang Dynasty, then move to the challenges for lyric expression in the modern world. Enrollment limited to 20 first year students. FYS

COLT 0510D. Poetry and Music.
Explores the collaboration between poets and composers in the twentieth century. It will primarily focus on Modern Greek composers (Hadjidakis, Theodorakis, Lagos and others) and their collaboration with numerous poets (Garcia Lorca, Gatsos, Eluard, Elytis, Neruda, Ritsos and others). These works will also be examined in depth from a literary and theoretical perspective. Enrollment limited to 20 first year students. FYS

COLT 0510F. Che Guevara, The Man and the Myths.
We will read Guevara's political and philosophical writings alongside the literary, visual and filmic representations that have made him one of the twentieth century's most iconic figures and a symbol for vastly diverging interests. From a cultural studies perspective, we will compare the development of Guevara's theories to posthumous uses of his work and image, particularly in and in relation to present-day Cuba. Enrollment limited to 20 first year students. Instructor permission required. FYS

COLT 0510G. "The Grand Tour; or a Room with a View": Italy in the Imagination of Others.
Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this "grand tour." We will read texts (both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, as well as view films (such as "A Room With a View:): all in order to determine the ways in which Italy "means" for the cultural imagination of Western civilization. For first year students only. FYS

COLT 0510I. Virgil and Milton.
We will read the Aeneid and Paradise Lost with interpretative patience. The study of fate, character, and poetics will be wedded to investigations of beauty, wonder, and nationhood. Enrollment limited to 20 first year students. FYS

COLT 0510K. The 1001 Nights.
Explores the origins, performance, reception, adaptation, and translation of the 1001 Nights, one of the most beloved and influential story collections in world literature. We will spend the semester in the company of genies, princes, liars, slaves, mass murderers, orientalists, and Walt Disney, and will consider the Nights in the context of its various literary, artistic, and cinematic afterlives.

COLT 0510L. What is Tragedy?.
Introduction to tragedy. Readings may include Sophocles, Shakespeare, Hegel, Chekhov, Chan-wook Park, and Jia Zhangke. Enrollment limited to 20 first year students. FYS

COLT 0510M. Early Modern Selves: From Soliloquy to Self-Portrait.
We will study the early modern self through its manifestation in the soliloquy (Shakespeare), philosophical treatise (Descartes), early modern poetry, and self-portraiture (Rembrandt). After examining Hamlet's "To be or not to be" speech and other Shakespearean soliloquies as moments in which characters represent themselves in speech, we will turn to Descartes' view of man's essence as his thinking nature. We will then read metaphysical poetry to understand the influence of religion on the early modern self. Readings include Hamlet, Richard II and III, Taming of the Shrew, Discourse on Method, Meditations, and poetry by John Donne.

COLT 0610A. The Far Side of the Old World: Perspectives on Chinese Culture.
A survey of traditional Chinese culture focusing on the major literary and artistic achievements of six major periods in Chinese history, including philosophical texts, poetry, various forms of the fine arts, and vernacular fiction and drama. A broad range of primary materials will give the student greater insight and appreciation of Chinese culture in general and also provide a foundation for further study of East Asia in other disciplines.

COLT 0610C. Banned Books.
An examination of literary censorship in which we read various texts forbidden for putatively violating social, religious, and political norms in particular historical and cultural contexts. We also analyze the secondary literature surrounding the banning of these ostensibly "dangerous" texts in order to theorize questions and assumptions about the power of art and the ironies generated by these debates.

COLT 0610D. Rites of Passage.
Examines a seemingly universal theme—coming of age—by focusing on texts from disparate periods and cultures. Proposes that notions of
"growing up" are profoundly inflected by issues of class, gender and race, and that the literary representation of these matters changes drastically over time. Texts from the Middle Ages to the present; authors drawn from Chrétien de Troyes, Quevedo, Prévost, Balzac, Brontë, Twain, Faulkner, Vesaas, Rhy, Satrapi and Foer. Enrollment limited to 20 first year students. FYS

COLT 0610E. Crisis and Identity in Mexico, 1519-1968. Examines four moments of crisis or critical moments for the forging of Mexican identity: the Conquest, the hegemonic 17th century, the Mexican Revolution, the "Mex-hippies" of the 1960s. We especially explore how key historical, essayistic, and literary writings have dealt with Mexico's past and present, with trauma and transformation. Excellent preparation for study in Mexico. In English. No prerequisites. WRIT

COLT 0610G. Literature and the American Presidency. We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a dictional source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film. Enrollment limited to 20 first year students. FYS LILE

COLT 0610H. Renaissance Epic. Explores Renaissance attempts to renew, parody, and question the classical epic tradition. The study of poetics, narrative, and imagination will be wedded to investigations of beauty, wonder, and nationhood. Authors will include Ariosto, Tasso, Ercilla, Spenser, Camões, du Bartas, and Milton.

COLT 0610I. Introduction to Cultural Studies. We live in a cultural saturated with information. The messages we register, the meanings we deduce, and the knowledge upon which we ground our actions and choices require critical examination if we are to engage as thoughtful actors in our personal and civic lives. This class will encourage students to reflect on their initial impressions of and reactions to various media and will give them critical tools to examine how formal and thematic strategies work to shape and elicit our sympathies, our desires, our fears, and our beliefs. Focusing primarily on visual and written texts drawn from popular culture--video, print, film, and Web sources--students will practice their analytical skills by evaluating these texts in classroom discussions, several short writing assignments, and one longer essay. Reading the work of several cultural theorists, students will learn to analyze persuasive argumentation through an attention to rhetorical and framing devices and to recognize and decipher visual cues, enabling them to interpret texts and images and to produce coherent critical positions of their own. This class will prepare participants for college courses that require them to process knowledge and not simply acquire information.

COLT 0610K. Unruly Crossings: Queerness, Race and Globalization (MCM 0901A). Interested students must register for MCM 0901A.

COLT 0610L. Murder Ink: Narratives of Crime, Discovery, and Identity. Examines the narrative of detection, beginning with the great dramatic whodunit (and mystery of identity) *Oedipus Rex*. Literary texts which follow a trail of knowledge, whether to establish a fact (who killed Laius?) or reveal an identity (who is Oedipus?) follow in Sophocles' footsteps. We read Sophocles' intellectual children. Readings include: *Hamlet*, *The Murders in the Rue Morgue*, *The Woman in White*, and other classic novels and plays. We also analyse seminal films of the genre, including *Laura* and *Vertigo*. Will include the twentieth-century detective story, with particular attention to women writers and the genre of the female private eye.

COLT 0610M. The Israeli-Palestinian Conflict: Contested Narratives (UNIV 0980). Interested students must register for UNIV 0980.

COLT 0610N. Being There: Bearing Witness in Modern Times (ENGL 0710F). Interested students must register for ENGL 0710F.

COLT 0610O. The Death of the Subject in Twentieth and Twenty-first Century Literature. Examines the condition of the subject in Western novels and plays written after 1945. Traditional markers of identity in works of literature are being eroded by globalization, split families, the invasion of science in genetics, and increased mobility. Signs of this crisis include loss of agency and individuality, various pathologies including schizophrenia, and the replacement of humans with clones. We will investigate the intricacies of the derailment of the subject and how literary form is affected in novels by Beckett, Coetzee, W. G. Sebald, Kazuo Ishiguro, Michel Houellebecq, Chuck Palahniuk, and in plays byaryl Churchill.

COLT 0710A. Women’s Words: Writing in Medieval Europe and Japan. An introduction to women poets, dramatists, and prose writers from medieval court cultures, with an emphasis on what these authors show us about their educational, social, moral/spiritual environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? Readings may include works by Christine de Pizan, Dhuoda, Heloise, Hildegard of Bingen, Hrotsvitha, Julian of Norwich, Margery Kempe, Marie de France, Murasaki Shikibu, Sei Shonagon, and Trolata plus shorter texts written by both men and women. Instructor permission required. DVPS

COLT 0710C. Introduction to Scandinavian Literature. An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Kierkegaard, Ibsen, Strindberg, Munch, Hamsun, Josephson, Södergran, Lagerkvist, Vesaas, Cronqvist, August and Vinterberg, as well as children’s books by Astrid Lindgren and Tove Jansson.

COLT 0710D. Inventing the Renaissance. The invention of the Renaissance as a cultural formation and as a part of the western cultural imaginary. We will consider the so-called "discovery of man," humanism and the recovery of the classical past, the production of scriptural identity or the "bibliographic ego," courtiership, the formation of the early modern state and the discovery of the "new world" through readings of major English and continental writers of the period.

COLT 0710E. Japanese Literature and Society: Historical Survey of Japanese Literature. A reading of the major literary monuments, from early waika to Genji to the fiction of Oe Kenzaburō. Surveys Japanese literary production from the 8th century to the present, examining the formation of literary genres, aesthetic values, and reading habits of successive eras in the context of political, social, and cultural development. No prerequisites.

COLT 0710F. Latin America: The French Connection. Raises questions of intertextuality between French and Latin American literature, focusing on how each represents the other. Beginning in the late nineteenth century, questions aesthetic categories of the real, the surreal and the marvelous/magical real; and literary responses to World War II and the Dirty War, the 1968 student protests in Paris and Mexico City, feminist movements, and globalization.

COLT 0710H. Mexican letras, 1519-1968. The course approaches the history of ideas in Mexico by examining four critical moments/moments of crisis in the country's development. We focus on the issues and burdens of the past as conceptualized in historical, essayistic, and literary writings of the Conquest, the Baroque, the Mexican Revolution, and the iconoclastic 1960s. In English.

COLT 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America. An interdisciplinary journey-combining history, literature, art, film, architecture, cartography-through representations of the many worlds that comprised the colonial Hispanic New World. We traverse the paradisiacal Antilles, the U.S. Southwest, Tenochtitlan/Mexico City, Lima, Potosi. We read European, indigenous, and Creole writers, including: Columbus, Las Casas, Bernal Diaz, Aztec poets, Guaman Poma, Sor Juana. In English. Excellent preparation for study abroad in Latin America. Enrollment limited to 20 first year students. FYS WRIT

COLT 0710L. Storytelling: Verbal Art as Performance. This course offers a comparative selection of oral and written folktales from oral, Chinese, African, North American, and European traditions in translation in order to study the formation and reception of storytelling in different socio-cultural contexts (Western and non-Western, contemporary and traditional). We will consider storytelling and associated performance
and historical forces that have influenced these texts, including the rise of translation and films from across the Arab world; it foregoes an intense contemporary Arabic Literature, this course includes a variety of readings to represent itself. Said's argument has become even more relevant in suggesting that Orientalist attitudes towards the Middle East have produced In his seminal work Orientalism, Edward Said paraphrases Marx, and suggests that Orientalist attitudes towards the Middle East has produced a discourse in which the East must always be spoken for, and not allowed to represent itself. Said's argument has become even more relevant in the past decade, given the growing interest in the Middle East as a region in the US, coupled with a dearth of spaces where voices from the region can offer their own narratives. Designed as an introductory course to contemporary Arabic Literature, this course includes a variety of readings in translation and films from across the Arab world; itforegrounds an intense exploration of one national literature for a more varied survey of the textual output of several countries. We will attempt to situate each literature within its national context and within the larger pan-Arab, regional and international context while being sensitive to the political, geographical, and historical forces that have influenced these texts, including the rise of Arab nationalism and the independence struggles of the mid-twentieth century, and immigration. We will also examine—and hopefully question—some of the discursive themes and conceptual frames that have been traditionally used to think about contemporary Arabic literature. Enrollment limited to 20. LILE

COLT 0710W. Cultures of Colonialism: Palestine/Israel. Examines the history and literary production of the Israeli-Palestinian colonial encounter from 1948 to the present. Aims to delineate the deep links between domestic culture and colonialism in Israel-Palestine by raising questions about statehood, dispossession, and exclusion in the imaginaries of both peoples and by examining novels in relation to the ethnic and political imperatives of settler-colonial dynamics. Authors include: David Grossman, Emile Habibi, Jabra I. Jabra, Sahar Khalilfah, Kanafani, Amos Oz, and A. B. Yehoshua. Sophomore seminar. Enrollment limited to 20 sophomores.

COLT 0810A. Ancient Greek Myth in Modern Poetry. Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek. Considers how poets since 1800 have approached, rewritten, or subverted the classical version of myths, such as those of Euripides, Helen, Orpheus, Persephone, Penelope, and Ulysses. Emphasizes the challenges posed by the past, issues of cultural and political context, and questions of gender. Readings in English.

COLT 0810C. Arthurian Tales and Romances of the Middle Ages. Why did stories of King Arthur, his knights, and their ladies fascinate writers and audiences throughout Europe? What can Arthurian quests, marvels, and love adventures tell us about successive pre-modern societies that shaped them? What are our responses to their cultural beliefs and forms of playful make-believe? Readings (in modern translation) of medieval Latin, French, English, Welsh, and German texts.

COLT 0810D. City (B)Lights. Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works will be brought to the foreground.

COLT 0810E. Confession, Autobiography, Testimony. Does writing a life give it coherence and veracity, or create a fiction? What is the relationship between first-person narrative and truth, and between authorship and authority? How does the form of a first-person text—a religious confession, a personal journal, a political denunciation, a collective memoir—affect the telling? Must the reader of such an account be “you” to the teller’s “I”, and how does the intimacy of this relationship shape the experience of reading? In this course, we test the limits of self-narration against ethical and physical limits, reading first-person narratives that purport to be non-fictional. We will read accounts of different experiences—social and sexual transgression, suffering and perpetrating violence, slavery—and explore both the possibilities and duplicities of writing as “I”.

COLT 0810G. Equity: Law, Literature, and Philosophy. Justice, rigorously applied, yields injustice. This paradox has haunted Western aspirations toward legal and political justice from antiquity to the Renaissance. It necessitated the formulation of a complementary principle, equity, whose job it was to correct or supplement the law in cases where the strict application of it would lead to unfairness. We will read Sophocles, Shakespeare, Dickens, Kafka, and others.
COLT 0810H. How Not to Be a Hero.
Shakespeare wrote two great and intense plays about ancient characters who were irredeemable failures: Coriolanus and Timon of Athens. What can failure teach us when no good comes of it? What kind of strength may a language of failure possess? We will also read the ancient sources themselves (Livy, Lucian, Plutarch), and modern adaptations of these stories (Bertolt Brecht, T. S. Eliot, Günter Grass, Wyndham Lewis).

COLT 0810I. Tales and Talemakers of the Non-Western World.
Examines many forms of storytelling in Asia, from the Epic of Gilgamesh and the Arabian Nights Entertainments to works of history and fiction in China and Japan. The material is intended to follow the evolution of non-western narratives from mythological, historical and fictional sources in a variety of cultural contexts. Topics will include myth and ritual, the problem of epic, tales of love and the fantastic, etc.

COLT 0810J. The Colonial and Postcolonial Marvelous.
A celebration and critique of the marvelous in South American and related literatures (U.S., Caribbean). We follow the marvelous from European exotizing of the New World during the colonial period to its postcolonial incarnations in ‘magical realism’ and beyond. We attend particularly to the politics and marketing of the marvelous, in writers including Borges, Chamoiseau, Columbus, García Márquez, Fuguet. Reading in English or Spanish. DVPS WRIT

COLT 0810M. Uncanny Tales: Narratives of Repetition and Interruption.
Close readings of short narratives with special attention to how formal and thematic elements interact to produce the effects of uncertainty, anxiety and incoherence peculiar to “the uncanny.” Topics include: the representation of the self in images of the arts; the representation of speech; instabilities of identity and spatial and temporal boundaries; doubles, monsters, and automata. Texts selected from: Walpole, Shelley, Hoffmann, Kleist, Poe, Dostoevsky, Freud, Wilde and Kafka.

COLT 0810O. Civilization and Its Discontents.
Investigates the age-old tension between order and chaos as a central dynamic in the making and interpretation of literature. Texts will be drawn from drama, fiction and poetry from Antiquity to the present. Authors include Sophocles, Shakespeare, Racine, Beckett, Prevost, Bronte, Faulkner, Morrison, Blake, Whitman, Dickinson, and Rich.

COLT 0810P. Moderns and Primitives.
Modernism has been called a ‘Renaissance of the Archaic’. We will read from the major works of Anglo-American modernism (Eliot, Joyce, Lawrence, Pound), focusing on their attitudes toward the primitive and the archaic. In addition, we will examine anthropological theories from the Victorian period to Durkheim, explore primitivism in modernist music and painting, and read about recent controversies surrounding modernism and primitivism.

COLT 0810U. Lovers, Slaves, Kings and Knaves: Major Plays in Western Literature.
This course will introduce students to representative tragedies and comedies, focusing in particular upon their development as literary genres; continuities and variations of character, plot, and theme; stage and performance conventions; and the classical tradition. Readings will include Aeschylus, Sophocles, Euripides, Aristophanes, Shakespeare, Racine, Eilde, Ibsen, and Vogel.

COLT 0810W. Caribbean Fiction.
Through fiction and film originally in Spanish, French or English and theories of the postcolonial and postmodern, we explore how images of the Caribbean have been constructed and complicated: as lands of abundance, scenes of historical violence and natural disaster, destinations for colonial and modern-day tourists. Readings include Carpentier, Benítez Rojo, Santos Febres, Chamoiseau, Condé, Kincaid, Brathwaite.

COLT 0810X. European Renaissances.
Just what is the European renaissance and when and how did it happen and who decided? Let’s look at the renaissances of Petrarch, Boccaccio, and Giotto, of Erasmus, and Thomas More and Holbein, of Machiavelli and Castiglione and Raphael. Are these renaissances intellectual, aesthetic, visual, rhetorical? Did they happen in the fourteenth century, the fifteenth, the sixteenth? Or in the eighteenth when they were first clearly described?

COLT 0810Z. Myth and Literature.
Authors throughout the ages have been fascinated by ancient mythology and have incorporated elements of it into their texts, often modifying commenting on or even destroying the original myth in the process. This course will investigate the values, dangers and limitations of myth-making/using in literature. Primary texts will include major works by Milton, Goethe, Kleist, Racine and Kafka. Texts will be supplemented by secondary readings and multimedia elements. Students will learn to question and engage critically with the historical, cultural, literary and scientific frontiers that separate myth and reality. Assignments will include two short papers and a final paper.

Interested students must register for ENGL 0700F.

COLT 0811B. Believers, Agnostics, and Atheists in Contemporary Fiction (JUDS 0050A).
Interested students must register for JUDS 0050A.

COLT 0811C. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).
Interested students must register for POBS 0810.

COLT 0811D. The Bible as Literature (JUDS 0830).
Interested students must register for JUDS 0830.

COLT 0811E. Media and/as Ethnicity (MCM 0900W).
Interested students must register for MCM 0900W.

COLT 0811F. Writing War (ENGL 0710C).
Interested students must register for ENGL 0710C.

COLT 0811G. Literature, Trauma, and War (ENGL 0500L).
Interested students must register for ENGL 0500L.

COLT 0811H. How Not to Be a Hero.
Shakespeare wrote two great and intense plays about ancient characters who were irredeemable failures: Coriolanus and Timon of Athens. What can failure teach us when no good comes of it? What kind of strength may a language of failure possess? We will also read the ancient sources themselves (Livy, Lucian, Plutarch), and modern adaptations of these stories (Bertolt Brecht, T. S. Eliot, Günter Grass, Wyndham Lewis).

COLT 0811I. Classical Mythology and the Western Tradition.
Reads classical texts that expound the fundamental mythological stories and elements of the Western tradition, then will read selected texts from the Renaissance through the twelfth century that utilize these myths. Ancient texts covered will include the Epic of Gilgamesh, Hesiod’s Theogony and Works and Days, Ovid’s Metamorphoses, and plays by Aeschylus, Sophocles, and Euripides. Later texts will include Shakespeare’s Venus and Adonis and Rape of Lucrece, Milton’s “Lycidas,” and lyric poetry by Keats, Shelley, Browning, Swinburne, Rilke, Auden, and Yeats. This course is suitable for anyone wishing to understand the classical background to Western literature. LILE

COLT 0811K. Literature, Trauma, and War (ENGL 0910F).
Interested students must register for ENGL 0910F.

COLT 0811L. Catastrophic Communities (ENGL 0710K).
Interested students must register for ENGL 0710K.

COLT 0811M. Planes, Trains, and Automobiles: Travel and Transport in Modern Literature and the Arts.
This course studies how new modes of transportation and the experiences they enabled stood as symbols of both the fears and joys of rapid modernization in 19th- and 20th-century literature, film, and visual art. How did the speeding locomotive, the plane’s aerial view, and the personal freedom of the automobile transform the ways people traversed space, experienced time, traded, and came into contact with one another? In formal terms, how did these experiences inspire innovations in the media we examine by Whitman, Kipling, Baudelaire, Marinetti, Brecht, Woolf, Huxley, Stein, Ruttman, Wegman, Picabia, Duchamp and others? No prerequisites.

COLT 0811N. Poetics of Madness: Aspects of Literary Insanity.
Surveys a wide range of literary texts aiming primarily to trace the long process of transition from pre-modern to modern conceptions of madness, and to codify the symbolic logic and discursive modalities underlying its respective representations. Spanning several centuries of artistic preoccupation with the alienated mind, these texts will serve as guides in an intense exploration of the relationship between insanity and literature, as it has been shaped by a set of social impulses, cultural assumptions, or scientific developments. Authors include Euripides, Shakespeare, Cervantes, Hoffmann, Flaubert, Nerval, Maupassant, Gogol, Dostoievsky, Stevenson, James, Woolf, Breton, and Kazantzakis.
COLT 0811O. Desire and Sexuality in Arabic Literature
Explores representations of desire and sexuality in classical and modern Arabic literature. We will also look at visual and literary texts from the European orientalist tradition. Themes include religion and gender relations, homosexuality, marriage and the family, and the legacy of medieval Arabic poetic, folkloric, legal, and medical engagements with the body. Readings by Salih, Darwish, Djebbar and others.

COLT 0811P. Stigma
Some people must navigate through life with damaged or spoiled identities, or with identities that are liable at any moment to be exposed as damaged or spoiled. To understand more deeply the diverse forms of stigmatizing and stigmatized behavior, we will read classic works of social science (Du Bois, Goffman, Cobb and Sennett, Chow) in conjunction with significant works of fiction (Hawthorne, Eliot, Hardy, Fontane, Hughes, Faulkner).

COLT 0811Q. Mediterranean Cities
Athens, Istanbul, Alexandria: three iconic cities of the Levant that will serve as points of reference in a focused exploration of East Mediterranean history and culture. Reads and discusses a number of texts that span several decades and a wide range of styles and genres – from realism to postmodernism and from autobiography to thriller – but exhibit a common interest in the urban landscape and its relationship to basic aspects of human existence: identity and ideology, memory and desire, isolation and connection, hope and fear, life and death. Authors include Theotokas, Seferis, Taktis, Durrell, Mahfouz, Khurrat, Tanpinar, Shafak, Altun.

COLT 0811R. Comedy in Arabic Literature
Modern Arabic literature is often thought of as a literature of resistance, defined by its relation to a history of conflict. But there is an equally deep tradition in Arabic with its roots in the comic, the grotesque, and the absurd. This course will serve as an introduction to ancient and contemporary theories of comedy, as well as an investigation of comic texts and films in Arabic. We will pay special attention to the relations between the Russian and Arabic comic traditions. With readings by Gogol, Bakhtin, al-Hakim, Habibi, Cossery, and others.

COLT 0811T. Statelessness and Global Media: Citizens, Foreigners, Aliens (MCM 0901K)
Interested students must register for MCM 0901K.

COLT 1210. Introduction to the Theory of Literature
An historical introduction to problems of literary theory from the classical to the postmodern. Issues to be examined include mimesis, rhetoric, hermeneutics, history, psychoanalysis, formalism and ideological criticism (questions of race, gender, sexuality, postcolonialism). Primarily for advanced undergraduates. Lectures, discussions; several short papers.

COLT 1310B. Classics of Indian Literature (CLAS 1160)
Interested students must register for CLAS 1160.

COLT 1310C. Twentieth-Century Western Theatre and Performance (TAPS 1250)
Interested students must register for TAPS 1250.

COLT 1310D. Between Gods and Beasts: The Renaissance Ovid (ENGL 1360S)
Interested students must register for ENGL 1360S.

COLT 1410A. All the World’s a Stage: Seventeenth-Century Drama
Readings of representative English and continental plays of the 17th century including Shakespeare, Jonson, Corneille, Molière, Tasso, Calderon, and others. How do dramatists represent and negotiate opposites between art and nature, imagination and reason, myth and history, freedom and fate through dramatic form and metaphor? Why is the stage such a powerful metaphor for the world?

COLT 1410B. Chinese Opera: Aesthetics and Politics of the Performing Body
Explores traditional Chinese drama, which has always been a music theater, from the perspective of contemporary cultural theory, and in a comparative and interdisciplinary context. Analyzing classical plays in relation to their staging in today’s regional operas, this course will first examine the dialectics of “prettiness and artistry” in traditional Chinese theater aesthetics and its implications in gender politics. It will then move on to investigate issues of cross-dressing and erotic desire in Chinese drama of the late imperial period in comparison with that of early modern England. Lastly, the ramifications of Chinese opera as a national imagination in modern cultural politics, as embodied in the playM. Butterfly, the film Farewell My Concubine, and the Beijing opera version of Turandot, will be addressed.

COLT 1410C. Chinese Theatre in the Mao Years
This course focuses on two major issues: policing traditional theater and "model revolutionary drama" as "a new proletarian culture." The course will begin with a study of Mao Zedong’s ideas on literature and art in the light of contemporary cultural theory. It will then look at examples of the "new opera" and "new history play," examining them in relation to a complex of censorship issues concerning the exercise of political power in administering human life and the body, literature and drama as political representation, and the hermeneutics of censorship.

COLT 1410D. Dramatic Literature and Theoretical Practice in Eighteenth-Century England
An introduction to the dramatic literature of 18th-century England in the context of contemporary theatrical conventions and innovations. Plays read alongside treatises on acting techniques, stage design, and contemporary theatrical pamphlet-debates. The sociopolitical contexts of the London patent theaters and the coexistent "illegitimate" entertainments are explored, as well as the influential effects of Continental theatrical theory and innovation.

COLT 1410E. Japanese Theatre: from Dengaku to De Sade
Surveys traditional Japanese theatre from the lofty medieval Nō drama to the more popular genres of Jōruri (puppet theatre) and Kabuki in the Edo period (1600-1868). Through playscripts, related secondary criticism, videotapes, and films, we will examine the function of spectacle and theatre, the problem of representation or mimesis, the notion of audience, and the relation of text to performance. Concludes with more recent examples of Japanese drama and performance.

COLT 1410F. Medieval Drama
How drama developed in northwestern Europe between the tenth and early sixteenth century—from liturgical tropes and miracle plays to mystery cycles and morality plays, from popular feasts and minstrel performances to fool’s plays, farces, and other secular comedies. Emphasis on the cultural context and social functions of dramatic games and performances in premodern Europe.

COLT 1410K. European Early Modern Drama
An introduction to early modern drama in the French, Italian, Spanish, and English traditions. The goal is to explore a wide range of imaginative impulses in the Renaissance and Baroque periods. Readings will include plays by Corneille, Racine, Calderón, Lope de Vega, Shakespeare, Machiavelli, and Molière.

COLT 1410L. Philosophy and Tragedy
Explores the intersection of philosophy and tragedy in western literature. Readings include Aeschylus, Sophocles, Seneca, Plato, Aristotle, Racine, Calderón, Descartes, Pascal, Kant, Schelling, Hölderlin, Hegel, Nietzsche, and Heidegger.

COLT 1410M. Shakespeare and Philosophy
Explores the relationship between Shakespeare and philosophy. Readings include philosophers who have written about Shakespeare (Hegel, Nietzsche, Cavell, and others), as well as philosophers who may illuminate interpretive problems in Shakespeare (Plato, Seneca, Spinoza, and others).

COLT 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan
Contrasting the demands of the text versus the screen, we will read eight to ten works of modern Japanese literature and view the film versions of each in order to discuss the problem of translation from one medium to another. Possible works for inclusion are Rashomon, Harp of Burma, Woman in the Dunes, and The Makioka Sisters. Finally, we will consider manga (the graphic novel) and its adaptation into anime.

COLT 1410O. Shakespeare and
Canon formation and disciplinary divisions have deformed the way in which we read Shakespeare. Frequently presented as a post-romantic singular “author,” cut off from the sources, texts and genres on which he drew and the collaborators with whom he worked, Shakespeare looks,
reads and performs differently in relation to the rich contexts in which the plays were produced and through which they are produced today. We will read plays and other materials with attention to formal and historical questions including genre, the Shakespearean text, gender, sexuality, status, degree, and nation.

COLT 1410P. Shakespeare. We will read a number of Shakespeare’s plays from The Comedy of Errors to The Winter’s Tale in relation to the sources, analogues, and genres (classical, continental and English) on which he drew. We will consider both formal and historical questions. Issues to be addressed include genre, the Shakespearean text, gender, sexuality, status, degree, and nation. Some attention to what has come to be called “global” Shakespeare. Written work to include a midterm and two papers.

COLT 1410R. Hamlet: Translation, Adaptation, Appropriation. Shakespeare’s Hamlet is perhaps the most widely read, performed, adapted, parodied and imitated literary text of the western tradition. In this course we will begin by reading/re-reading the play before going on to consider a number of appropriations of Shakespeare, both in the west and non-west, in order to address social and aesthetic issues including questions of meaning and interpretation, intertextuality and cultural relativism. Prerequisite: Previous study of Shakespeare. Enrollment limited to 20.

COLT 1410S. Classical Tragedy. This course will read the great Greek tragedies of Aeschylus, Sophocles, and Euripides, and some Senecan tragedy. We will then read Renaissance and later tragedies that use the classical world as a setting, such as Antony and Cleopatra, Julius Caesar, and tragedies that rewrite classical themes, including O’Neill’s Mourning Becomes Electra.

COLT 1410T. Tragedy from Sophocles to The Wire. Explores tragedy from Athens to Baltimore. Readings will include Sophocles, Shakespeare, Hegel, Chekhov, Jia Zhangke, and the deindustrialized American city. Open to juniors and seniors. Instructor permission required.

COLT 1410V. Russian Theatre and Drama (TAPS 1430). Interested students must register for TAPS 1430.

COLT 1410W. mujeres ARRIBA! Feminist Playwrights in Spanish Theater (TAPS 1281R). Interested students must register for TAPS 1281R.

COLT 1410X. Drama and Debt. Explores the representation of debt in drama. The way we talk about debt is difficult to disentangle from the way we talk about other social obligations. For this reason the category of debt can illuminate profound human questions in a work of art. Secondary readings include David Graeber, Marc Shell, and Richard Seaord. Works of art may include Sophocles, Shakespeare, Hegel, Chekhov, Jia Zhangke, and Chan-Wook Park, Marx, Trotsky, and the deindustrialized American city. Open to juniors and seniors. Instructor permission required.

COLT 1410Y. Shakespeare and Embodiment (ENGL 1360Z). Interested students must register for ENGL 1360Z.

COLT 1420A. The Tale of Genji and its Legacy. The Tale of Genji (circa 1000 CE), authored by Murasaki Shikibu, a woman of the Heian court, has been canonized over the centuries as the greatest work of Japanese literature. No work in the Japanese tradition has exerted as much literary influence as this mammoth work of prose fiction detailing the private lives of Genji, the brilliant son of the emperor, those with whom he consorts, and his descendants. We will read Genji in its entirety, along with antecedent works, other texts of the period, works influenced by Murasaki’s opus, other historical materials, and secondary commentary. There are no prerequisites for this course and it is open to all undergraduates.

COLT 1420B. A Mirror for the Romantic: The Tale of Genji and The Story of the Stone. In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court, and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: CO 71, RS 83 or 88, or permission of the instructor.

COLT 1420F. Fantastic and Existentialist Literatures of Argentina, Uruguay and Brazil. Jorge Luis Borges proclaimed that South American writers can “wield all themes” without superstition, with irreverence. This course examines the ways in which 20th century writers from Argentina, Uruguay and Brazil appropriated European fantastic and existentialist fictions, taking them in new directions. Readings, in English or original languages, include Borges, Cortázar, Onetti, Lispector. Prerequisite: previous college literature course(s).

COLT 1420G. Fictions of the Caribbean. The Caribbean has inspired conflicting cultural and political claims, and a wealth of visual images. We will rethink the formation, representation and self-presentation of the Caribbean countries, steering our explorations through postcolonial and postmodern theory to questions of appropriation, language and identity. Readings from Columbus and Shakespeare to Dantical, Santos Febres and Kincaid; essays by Glissant, James Benítez Rojo and others.

COLT 1420K. Masterworks of Chinese Fiction. Focuses on three acknowledged classics of Chinese fiction—Three Kingdoms, The Journey to the West, and The Dream of the Red Chamber—works which demonstrate the range of the genre as they represent historical, fantastical, and sociopsychological subjects. Topics include the role of fiction in Chinese society, the masterworks as mirrors of Chinese culture from the 14th through 18th centuries, and the comparative theory of the novel.

COLT 1420L. Modern Japanese Fiction. Narrative fiction from the Meiji Period (1868-1912) to the present in the context of modern Japanese cultural and intellectual history. In addition to more canonical writers such as Natsume Sōseki and Mori Ōgai, examines the legacy of women writers such as Higuchi Ichiyō and Enchi Fumiko; proletarian writers such as Hayama Yoshiki, Kobayashi Takiji, and Hayashi Fumiko; and more contemporary mass-audience writers such as Yoshimoto Banana and Yamada Eimi.

COLT 1420N. Postcolonial Faulkner. How is it that Faulkner became one of the most influential North American authors in the Third World? To answer this, we read Faulkner’s “The Bear” against two of his citational novels, Absalom, Absalom! and The Sound and the Fury. We then turn toward a number of Faulknerian novels from the Arab world and Latin America. We discuss theoretical texts that describe the legacies of various colonialisms.

COLT 1420O. Proust, Joyce and Faulkner. A reading of three major Modernist authors, with a focus on the following issues: role of the artist, representation of consciousness, weight of the past. Texts include substantial portions of Proust’s Recherche, Joyce’s Portrait and Ulysses, Faulkner’s Sound and the Fury, Light in August and Absalom, Absalom! Prior background in these authors desirable, especially Ulysses. Senior seminar. Reserved for: Seniors. Preference given to concentrators in Comparative Literature, English, Modern Culture and Media. Instructor’s permission required.

COLT 1420Q. The Bildungsroman. Readings of novels in the Bildungsroman tradition and the theoretical questions of the genre: the historicity and constitution of the self; problems of the representation of a life; the category of the unity of a life as a factor of identity; notions of progress, development and completion. Considerations of the successes and failures of this model. Readings to be selected from Rousseau, Chateaubriand, Sterne, Goethe, Novalis, Flaubert, Musil, Kerouac.

COLT 1420S. The Captivity Narrative. Because the captivity narrative implies both a feminized subject and a writing subject, it provides a link among political, social, and literary phenomena common to all modern Western cultures. Examines various novels consumed by members of such cultures (including gothic romances, Bildungsromanen, boys books, girls books, ethnographic journeys, and prison diaries) as versions of the captivity narrative.

COLT 1420T. The Fiction of Relationship. Explores the manifold ways in which narrative literature sheds light on the relationships that we have in life, both knowingly and unknowingly. The novel form, with its possibilities of multiple voices and perspectives,
captures the interplay between self and other that marks all lives. Authors include Lacos, Melville, Bronte, Kafka, Woolf, Faulkner, Borges, Burroughs, Vesaas, Morrison, and Coetzee.

COLT 1420U. The South: Literatures of the U.S. South and South America.
For Jorge Luis Borges, in his story of the same title, the South is a spectral region, hovering between imagination and reality. The literatures of the U.S. South and South America enact his notion of the South. We examine the remarkable similarities between the two literatures-similarities that result from literary influence and from social, cultural, and historical circumstances. Prerequisites: previous upper-level literature course(s) relevant to your studies at Brown. Instructor permission is required and will be given after second class.

COLT 1420V. Visionary Fictions.
Visionary and apocalyptic writing, subversive of modes of perception and understanding as well as of political doctrines and systems, from Blake and Novalis to mid-nineteenth century French writers (Nerval, Rimbaud, Lautréamont), Surrealism and William Burroughs’ Naked Lunch.

COLT 1420X. The European Novel From Goethe to Proust.
Readings of major European novels of the 19th century as literary reflections on philosophical questions such as aesthetic and ethical judgment, subjectivity, mimesis, memory and the novel itself as a genre. Authors include Goethe, Stendhal, Balzac, Dickens, Flaubert and Proust. Selections from Kant, Hegel, Marx, Lukács and Benjamin.

COLT 1420Y. Gigantic Fictions.
What is the relation between literary gigantism and mimesis? How do ‘gigantic fictions’ threaten to break their literary bounds? What holds these mammoth narratives together? We will address these questions and others through a close reading of three works: Murasaki Shikibu’s The Tale of Genji, Tolstoy’s War and Peace and James Joyce’s Ulysses.

COLT 1421F. Esthers of the Diaspora: Female Jewish Voices from Latin America (POBS 1500H).
Interested students must register for POBS 1500H.

COLT 1421G. Dickens and Others (ENGL 1511G).
Interested students must register for ENGL 1511G.

COLT 1421I. The Paternalistic Thriller and Other Studies in Colonial Fiction.
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T. E. Lawrence, E. M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1421K. Faulkner (ENGL 1710G).
Interested students must register for ENGL 1710G.

COLT 1421L. “Terrible Beauty”: Literature and the Terrorist Imaginary (ENGL 1760L).
Interested students must register for ENGL 1760L.

Interested students must register for ENGL 1761T.

COLT 1421N. Kafka’s Writing (GRMN 1340M).
Interested students must register for GRMN 1340M.

COLT 1421O. W. G. Sebald and Some Interlocutors (ENGL 1761Q).
Interested students must register for ENGL 1761Q.

COLT 1421Q. Word and Image: Ekphrasis, the Iconic Narrative, and the Graphic Novel.
An examination of the tradition of illustrated narratives from the pre-modern to the modern periods: the ancient Indian epic the Ramayana, the early eleventh-century Japanese Genji Monogatari, the medieval English Canterbury Tales, the late eighteenth century Marriage of Heaven and Hell, as well as the contemporary graphic novel Persepolis and examples of Japanese manga. Discussion will focus on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Instructor permission required.

COLT 1421R. The European Novel from Richardson to Goethe.
This course studies the rise of the novel in eighteenth-century England, France, and Germany, focusing on the development of epistolary fiction, but with side-glances at the picaresque and sentimental tradition. Texts to be read include Richardson’s Pamela, Fielding’s Shameless and Joseph Andrews, Rousseau’s Julie, Lacos’s Les liaisons dangereuses, perhaps Bernardin de Saint-Pierre’s Paul et Virginie, perhaps Sade’s Justine, and definitely Goethe’s Sorrows of Young Werther. LILE

COLT 1421S. The Poetics of Confession (ENGL 1561J).
Interested students must register for ENGL 1561J.

COLT 1421T. Mediterranean Fictions.
Sun-drenched, seductive, and bewildering, the Mediterranean has always been a focal point of contact, interaction, and conflict. And more than that: a cradle of civilizations; a timeless repository of memories and aspirations; a porous, protean world; a sea of many horizons, histories, and identities. We will embark on an intensive exploration of some of the basic aspects of Mediterranean culture by means of discussing a wide range of texts on Greece, Turkey, Italy, France, Algeria, Tunisia, and Spain. Writers include Sefiner’s, Kavantzas, Papadimantis, Galanaki, Camus, Proust, Lampedusa, and Pamuk. All readings in English translation.

COLT 1421U. Words Like Daggers: The Epistolary Novel.
Letters as novels, novels in letters: this course traces the development of the epistolary novel, as it was cultivated in Europe from the seventeenth to the eighteenth centuries. Through focused discussions of seminal, as much as fascinating, specimens of the genre, we will study the major impact that epistolary fiction had on the stylistic and conceptual evolution of the novel in general, also exploring its interactions with a range of established or shifting social structures, gender roles, discursive practices, and modes of consciousness. Authors include Montesquieu, Lacos, Goethe, Hölderlin, Stoker, Flaubert, and Camus. All readings in English translation.

COLT 1421W. Blast from the Past: The Historical Novel.
Focuses on a popular literary genre known as the historical novel. We will discuss its defining characteristics, cultural meanings, and basic differences from other types of fiction. We will also explore larger theoretical issues that are intricately related to the development and scope of the genre: the representation of the past and its relationship to the present; the creative integration of the gaps between factual history and lived experience; and finally the complex interaction between authenticity and fictionality, exemplarity and specificity, temporality and detachment. Authors include Flaubert, Yourcenard, Kadaré, Pamuk, Calvino, Lampedusa, Roidis, and Galanaki.

COLT 1421X. Fairy Tales and Culture (FREN 1330A).
Interested students must register for FREN 1330A.

COLT 1430A. Ancient Greek Myth in Modern Poetry.
Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek poets. Considers how the classical version of myths, such as those of Helen, Oedipus, Persephone, Penelope, and Ulysses, are approached, rewritten, or subverted in poetry since 1800. Emphasizes the challenges posed by the past, issues of cultural and political context, and questions of gender. Readings in English.

A historical study of various poetic forms of waka or Japanese poetry from the 8th-century anthology, the Man’yōshū, to the advent of modern verse, including jōyōshi or free verse, in the latter part of the 19th century. Focuses on the relationship of poetry to religion, the political implications of waka, and the dominant aesthetic governing poetic conventions in different periods.

COLT 1430D. Critical Approaches to Chinese Poetry.
Examination of works of Chinese poetry of several forms and periods in the context of Chinese poetic criticism. Knowledge of Chinese not required, but provisions for working with original texts will be made for students of Chinese language.
COLT 1430H. Poetry, Art, and Beauty.
What does it mean to be beautiful in poetry and art? How is beauty defined from Plato to the blog? What is aesthetics in relation to beautiful practice? A workshop in the reading of lyric poetry and visual art from cave painting to modernism. The three written exercises on text, image, and aesthetics, with creative practice in translation. No final examination. Texts include Sappho, Plato, Aristotle, Catullus, Horace, Petrarch, Goethe, Kant, Wordsworth, Baudelaire, Rilke, Benjamin, Stevens, Derrida, and Danto.

LILE

COLT 1430I. Poetry of Europe: Montale, Celan, Hill.
The fifty years between the Second World War and the formation of the European Union was a period in which the meaning of “Europe” was placed under great strain. The class will examine the strains and debates about Europe within the lyric poetry of several literary traditions. It will take the form of close historical, formal, and critical readings of three books of poems in their entirety: Montale's *The Storm and Others* (1956), Celan’s *No-One’s Rose* (1963), and Hill's *Canaan* (1997). Enrollment limited to 25.

COLT 1430J. Readings in Poetry and Poetics.
Concentrated readings of Hölderlin, Shelley, Baudelaire, and Yeats in conjunction with theoretical texts by Heidegger, Derrida, De Man, and Benjamin. Texts include poetry, essays, novels, and dramas of the poets in a critical and philosophical context. Focuses on the relationship between figurative and expository language, the limits of commentary, and the concept of criticism as repetition and translation. French or German required. Frequent writing and oral presentations.

We will read a number of famous short poems from antiquity in conjunction with the major English writers who later translated, imitated, and reworked them. We will pay special attention to the question of creative innovation. We will read Horace, Theocritus, Virgil, Dryden, Pope, Tennyson, and others.

COLT 1430L. Voices of Romanticism.
Readings of lyric poetry in the European Romantic tradition. Focus on problems of lyric subjectivity and representation, and the rhetoric of “voice.” Emphasis on formal features of poetry. The course will be based on close reading and frequent writing assignments. Readings from Wordsworth, Shelley, Keats, Goethe, Novalis, Hugo, Nerval, Lamartine, Baudelaire and others. Knowledge of French or German required, or by permission.

Readings in German, French and American poetry of the nineteenth century. Texts selected from: Hölderlin, Mörike, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments.

COLT 1430O. The Poetry of Childhood.
Selected readings from among Rousseau, Blake, Hölderlin, Wordsworth, Baudelaire, Rimbaud, Nietzsche, Freud, Yeats, Char.

COLT 1430Q. Poetry and the Sublime (GRMN 1440C).
Interested students must register for GRMN 1440C.

COLT 1430S. Latin American Death Trip (LITR 1230K).
Interested students must register for LITR 1230K.

COLT 1430T. Leaves of Words: Japanese Poetry and Poetics.
A historical study of various forms of waka (Japanese poetry) from the 8th century anthology the *Man'yōshū* to the advent of modern verse in the latter part of the 19th century. We will examine the significance and functions of poetry historically as well as the relationship of poetry to religion and society, the political implications of waka, and the dominant aesthetic governing poetic conventions in different periods.

Rhythm, intonation and their written forms measure poetic matter. This workshop introduces prosody through exercises in through practice: the line; metrical and stanzaic form; rhyme; music and performance; free verse; language writing; and the task of translation (form). Even monkeys, Darwin wrote, express strong feelings in different tones. Enrollment limited to 20.

COLT 1430X. The Poetry of Decolonization.
What is the role of poetry in the struggle for decolonization? How does this poetry re-imagine the native landscape and retell the story of the nation? This course will be centrally concerned with poets from the Americas, Ireland, and the Middle East. We will ask how these poets propose to speak for a wider community, what sorts of solidarities they imagine, and what room they leave for critique. With readings by Whitman, Neruda, Yeats, Heaney, and Darwin; critical readings by Said, Butler, and Hoffman.

COLT 1430Y. Forms of Life.
Do poetic forms and forms of life bear a resemblance? How do Ovid, Rilke, and Vicky Hearm form the animal and the human? How is love formed in Petrarch, Shakespeare, and Berryman? What is city life in Catullus, Baudelaire, or John Ashberry? What is nature for Vergil, Wordsworth, Robert Frost or Mary Oliver? What makes poems formal objects? Are they also forms of nature, thought, being? Weekly writing workshop in criticism. Enrollment limited to 20.

COLT 1430Z. The Platonism of Shakespeare’s Sonnets.
It is well-known that Shakespeare’s Sonnets exhibit a variety of Platonic concerns, including the erotic desire for the beautiful, the problem of being and seeming, and the relationship between madness and poetry. This course will attempt an explicit engagement with those Platonic themes by reading the Sonnets together with Plato’s dialogues, particularly the Symposium and Phaedrus. Enrollment limited to 20.

COLT 1440B. Killer Love: Passion and Crime in Fiction and Film.
Discusses textual and cinematic representations of criminal passion and its ambiguous relationship to religious, moral, and social norms. We will focus on extreme forms of intimacy both as a thematic choice of cultural production and as a symbolic medium of communication. Why is it that art so often explores unsanctioned emotions and deviant behaviors? What is at stake when narratives capitalize on violent manifestations of desire? In what ways is the semantics of excessive love related to conceptions of subjectivity, sociability, and sexuality? What role does it play in the creative process itself?

COLT 1440C. Photography and Human Rights (MCM 1503R).
Interested students must register for MCM 1503R.

COLT 1440D. The Arab Revolutions in Word and Image.
The social and political upheavals collectively known as the Arab Spring have been accompanied by revolutionary developments in cultural modes of expression. This course explores the rhetoric and symbolism of the Arab revolutions through the lens of contemporary Arabic literature, film, television, graphic art, radio, social media, and the press. Knowledge of Arabic required.

COLT 1440E. Potential History – Thinking Through Violence.
The past cannot be changed, except in this sense: it can be shown to be incomplete; the closures it seemingly imposed can be reopened. The course would offer readings of novels, historical narratives and photographs dealing with moments of constitutive violence (in times of war, partition, segregation, and forced migration), in order to reconstruct dormant potentialities that resurfaced and transformed the present horizon of our political imagination, and reshape a still indeterminate future. Benjamin, Arendt, Dabashi and Croq, among others, will help us explore new ways of thinking through history’s dormant or murmuring potentials and using the work of imagination.

COLT 1440F. 1948 Photo Album: From Palestine To Israel.
Why do we name the “Israeli-Palestinian conflict” as we do? The purpose of this course is to use photographs – alongside historical and literary documents—to question the framework of a “national conflict” and study its emergence as a given, unquestioned and axiomatic scheme for any historical narrative of that period. Reading archival material and post-colonial and photography theories, each week we shall study one photograph taken in 1948, reconstructing the photography event as well as its myriad relations among the protagonists involved and its after life as an archived image, to include photographed persons, photographers, editors, journalists, politicians, and more.

COLT 1440G. Islam and Liberalism.
The social and political upheavals collectively known as the Arab Spring have provoked a new installment in the centuries-old debate about
the relationship of Islam to liberal thought. This course explores the philosophical and political genealogies of that debate through the lens of contemporary literature, film, television, graphic art, radio, social media, and the press. Knowledge of Arabic encouraged but not required.

COLT 1610B. Irony

COLT 1610C. Japanese Aesthetics and Poetics
Focuses on the historical development of aesthetic values and their relation to social culture, religion, and national identity in Japan from the Nara period to the 20th century, with particular emphasis on the literary arts. Readings from Fujiwara Teika, Zeami Motokiyo, Sen no Rikyū, Okakura Tenshin, and others. A background in critical theory/philosophy and in East Asian studies helpful.

COLT 1610D. Theory of Lyric Poetry.
Through readings of recent critical discussions of the lyric genre, we will explore general methodological problems of literary theory. Discussions include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry and history; the function of reading; and the problematic “objectivity” of criticism. Readings from Hölderlin, Shelley, Baudelaire, Yeats, Jakobson, Benveniste, Riffaterre, Jauss, Johnson, De Man.

COLT 1610E. Aesthetics and Politics (ENGL 1900E).
Interested students must register for ENGL 1900E.

COLT 1610F. New Theories for a Baroque Stage (TAPS 1280N).
Interested students must register for TAPS 1280N.

COLT 1610G. Mikhail Bakhtin (RUSS 1895).
Interested students must register for RUSS 1895.

COLT 1610I. Getting Emotional: Passionate Theories (ENGL 1560W).
Interested students must register for ENGL 1560W.

COLT 1610J. Holocaust Literature (JUDS 1820).
Interested students must register for JUDS 1820.

COLT 1610K. Literature and Multilingualism (GRMN 1340N).
Interested students must register for GRMN 1340N.

COLT 1710A. Introduction to Literary Translation: Translation as Art.
Includes discussion of the history and theory of translation, but mainly involves practice in translating poetry or imaginative prose. Conducted as a workshop.

COLT 1710B. Advanced Translation (LITR 1010F).
Interested students must register for LITR 1010F.

A consideration of various genres of women’s writing from 700 to 1450 C.E. focusing on such issues as literary conventions, the relationship to the vernacular, the role of religion in education, and questions of gender and social class. Writers may include Berthhyth, Murasaki Shikibu, Sei Shônagon, Hêloïse, Marie de France, the countess de Dia, Ladu Nijo, Julian of Norwich, Christine de Pisan, and various anonymous women.

COLT 1810B. Aesthetics in the Colonial Frame.
Draws together works from a wide range of contexts and genres—Enlightenment philosophy, romantic travel literature, Arabic novels and poems—to compose a conversation about aesthetics in the colonial context of Egypt. Senior Seminar.

COLT 1810C. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works are foregrounded.

COLT 1810E. Dwellers Amid the Clouds: the Literature of the Court.
A survey of three court traditions—Heian Japan, medieval Iceland, and early modern England—in which the relationship between the literary genres and the specific social context from which they emerge is highlighted in the form of particular literary conventions. Topics include the question of patronage, the function of particular literature as shibboleth, the idea of spectacle and play, the politics of literature, and the trope of irony as courtly emblem.

COLT 1810F. Enlightenment and Anti-Enlightenment in Eighteenth-Century Germany.
Some of the most intractable questions of contemporary philosophy were vigorously debated in eighteenth-century Germany. What are the limit of reason? Does its supposed neutrality and universality mask its own set of prejudices? Are there any universally valid claims in truth or ethics? How, why, should Christian, Jew, and Muslim tolerate their differences? We will read literary and philosophical works by Hamann, Herder, Jacobi, Kant, Lessing, and Mendelssohn.

COLT 1810G. Fiction and History.
How the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors considered include Grass, Doctorow, Delillo, García-Márquez, Allende, Dantical and Agualusa. Theoretical texts by White, LaCapra, Benjamin, Ricoeur, and Chartier. Films such as The Official Story and Europa, Europa will be viewed and incorporated into the discussions. Conducted in English. Prerequisite: two previous courses in literature. Enrollment limited to 30. Instructor permission required.

COLT 1810H. Tales of Two Cities: Havana - Miami, San Juan - New York.
In this course we will compare representations of Havana and San Juan in contemporary fiction and film to literary inscriptions of Cuban Miami and Puerto Rican New York. We will explore mapping the city as mapping identity and city-writing as reconstruction and creation, viewing through the eyes of children, tourists, and urban detectives. Authors include Antonio José Ponte, Roberto G. Fernández, Mayra Santos Febres and Ernesto Quíñones. Good preparation for study abroad on the Brown-in-Cuba program. Not open to first year students. DVPS LILE

COLT 1810I. Gates of Asia.
An exploration of the growth of European knowledge of Asia from the rise of the Mongol empire through the Great Game and its aftermath. Primary sources include three kinds of accounts provided by travelers who set their hearts on Asian exploration: personal narratives, official reports and dispatches, and scholarly studies of the exotic cultures. Enrollment limited to 20.

COLT 1810J. History and Aesthetic Form.
In this course we will examine the co-articulation of theories of history with theories of language and aesthetics. Focus will be on the interdependence between an emerging interest in history and the origin of language, and approaches to literary history, genre definition, and general aesthetic categories. Readings to be selected from Vice, Rousseau, Herder, Lessing, Schiller, Negel, Novalis, Lukacs, Adorno, Derrida and De Man.

COLT 1810L. Housing Problems.
Examines architectural figures and problems of containment and construction in a variety of literary and theoretical texts. We will consider how images of buildings structure texts and outline spaces for subjectivity. Themes include the gothic, haunted houses, foundations, ruins, walls, and doors. Texts selected from Descartes, Derrida, Goethe, Hegel, Austen, Coleridge, Poe, Baudelaire, Melville, Hawthorne, Kafka, Tschumi and Borges.

An examination of the tradition of illustrated narratives in several premodern cultures: the early 11th-century Japanese Genji Monogatari, the medieval English Canterbury Tales, and the ancient Indian epic the Māhābhārata. Discussion focuses on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Seminar.
COLT 1810N. Freud: Writer and Reader
A broad survey of Freud's writings, with particular emphasis on psychoanalysis' relevance to literary theory and cultural analysis. Readings include Freud's major works, as well as secondary sources focused on applications to literary studies.

COLT 1810O. Latin American Literature in Dialogue with France
Complicates the question of influence in Latin American literary and intellectual self-fashioning, specifically with regard to France. Explores the productivity and perplexity of this relationship through romanticism and articulations of the real (as realism, surrealism and magical realism). Approaching the twenty-first century, considers Latin American perspectives on French theories of feminism, postmodernism and globalization.

COLT 1810P. Literature and Medicine
The purpose of this course is to examine a number of central issues in medicine-disease, pain, trauma, madness, the image of the physician—from the distinct perspectives of the sciences and the arts. Literary texts will be drawn from authors such as Sophocles, Hawthorne, Buchner, Strinberg, Gilman, Tolstoy, Kafka, Anderson, Hemingway, Ionesco, and K. Harrison; theorists will include Foucault, Sontag, Scarry and others. Senior seminar. Reserved for: Seniors. Preference given to concentrators in Comparative Literature, English, Modern Culture and Media. Instructor permission required. Enrollment limited to 25.

COLT 1810Q. Literature and Money in the Age of Paper
Focuses on the complex and highly ambivalent relationship between literature and money in nineteenth-century European literature. Works by Poe, Balzac, Dickens, Baudelaire, Stevenson, Hardy, and Zola. Relevant philosophical writing by Smith, Marx, Nietzsche, and Derrida.

COLT 1810S. Literature and the City
Literature's obsession with the modern city, in 19th- and 20th-century American, English, and French fiction and poetry, in writers such as Blake, Whitman, Balzac, Dickens, Baudelaire, Rimbaud, Eliot, Williams, Bellow, Morrison. Opportunities for work in other literatures and genres, e.g., in Germany, Brecht.

COLT 1810T. Literature and the Culture of Capitalism
This course will examine the literary responses to capitalism in terms of five organizing tropes: regionalism, urbanization, consumerism, aestheticism, and modernism. Our investigation will begin sometime in the early 19th-century with the moment that consolidated conditions favorable for industrialization and conclude in the first decade of the 20th-century with literary modernism and the collapse of the cultural myths of progressive enlightenment and democracy. Readings include texts by Wordsworth, Maltheus, Sue, Mayhew, Marx, H. Rider Haggard, Stowe, Carroll, Zola, Wilde, Stoker, Freud. Three papers and a final essay.

COLT 1810U. Angela's Ashes and What Went Before: Irish Immigration and Literary Creation
Readings in the major works of Joyce, Beckett and Farrell, without forgetting Jonathan Swift and William Butler Yeats.

COLT 1810V. Marx and Modern Literature
A contrastive and integrative study of the range of Marx's writings and works by writers such as Shakespeare, Dickens, Baudelaire, Flaubert, Woolf, and Stevens. Examines Marx's leading concepts in philosophy, history, economics, ideology, and aesthetics in relation to the particularities of literary forms. One or two short papers and a longer final study of a literary work chosen from the student's major field. Enrollment limited to 30.

COLT 1810X. Mirror for the Romantic: The Tale of the Genji and The Story of the Stone
In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cyonsure of the medieval Japanese court and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: COLT 0710, RELS 0040 (0098) or 0100 (0006), or permission of the instructor. DVPS

COLT 1810Y. Modern Japanese Women Writers
An examination of women's writing from the Meiji Period (1868-1912) to the present. Readings include works from such writers as Higuchi Ichiyo, Miyamoto Yuriko, Enchi Fumiko, and Taushima Yoko. Topics include the relation of 'woman' to the modern, the legacy/construction of the past, the implications of joryū bungaku (women's literature), and the problem of resistance and subversion.

COLT 1810Z. Nietzsche
Intensive and extensive reading of Nietzsche and some of the reception that has made him so prominent in contemporary literary and cultural theory. Topics include Nietzsche's aesthetics, theory of history, the concept of the eternal return, European decadence, misogyny and anti-semitism. Texts will be selected from Nietzsche, Heidegger, Horkheimer and Adorno, Deleuze, Derrida, Irigaray, de Man, Kolman, Lacoue-Labarthe, Foucault, Hamacher, Ronell, etc.

COLT 1811B. Postcolonial Theory and Fiction
There is hardly a place in the contemporary world which has not somehow been touched by the histories and consequences of colonialism. What does it mean, then, to speak about the postcolonial? Should the postcolonial be seen as a new periodization in the study of world literatures, a recent trend in critical theory, or another type of minority discourse involving previously colonized peoples?

COLT 1811D. Reading Revolution, Representations of Cuba, 1959-The Present
Considers the cultural and ideological impact of the Cuban revolution inside and outside Cuba. Starting in the 1960s, reads Latin American "boom" novels, European theorists and U.S. civil rights activists. Moving to today, addresses post-Soviet Cuba's literary production and the impact of new technologies on culture, as well as political change under Raúl Castro. Fiction, film and essays by Castro, Sartre, García Márquez, Reinaldo Arenas, Antonio José Ponte, Fernando Pérez and others. Excellent preparation for the Brown-in-Cuba program. DVPS

COLT 1811F. "Tenth Muse" Phenomenon
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

COLT 1811H. The Idea of Beauty
What does it mean to be beautiful in classical and European literature? How is beauty defined by thinkers from Plato to Benjamin? Readings from the classical, medieval, Renaissance, and modern periods are brought into question by works concerning the problems of aesthetics. Works by Plato, Aristotle, Horace, Augustine, Dante, Petrarch, Shakespeare, Racine, Tolstoy and others in addition to readings from the history of aesthetics from Kant through the present.

COLT 1811I. The Nordic Legacy: Ibsen, Strindberg, Munch and Bergman
This course examines the work of four major Scandinavian artists. As key figures in the development of modern theater, painting and film, these four figures share a number of common concerns: challenging the pieties of bourgeois mores; reconceiving the relations between the sexes; moving from the social to the metaphysical; undermining the unitary view of the self; and forging an artistic "language" through which the in-dwelling power of the psyche can be revealed.

COLT 1811J. The Paternalistic Thiller and other Studies in Colonial Fiction
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T.E. Lawrence, E.M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1811L. Travel and Tourism through the Ages
The travel diary, whether prompted by pleasure, pilgrimage, official duty, scientific exploration, or profit, emerges as a prominent genre in virtually all times and cultures. Readings include literary accounts of actual travels, such as the autobiographical "slave narratives" recounting involuntary displacement - typified by The Life of Olaudah Equiano - and purely
COLT 1811N. Persons and Portraits: Self in Early Modern Europe. Challenges the presumed supremacy of the "modern subject," the sovereign rational mind personified by Descartes. Rival theories of self in Machiavelli, Luther, Montaigne, Hobbes, Pascal, and Spinoza are explored alongside the richly embodied "persons" pictured in painting (Titian, Rembrandt, Velázquez), conduct literature (Castiglione, La Rochefoucauld), drama (Milton, Molière, Calderón), psychological fiction (La Fayette), and satiric prose (La Bruyère).

COLT 1811O. Modernism: From Paris to Athens, 1900s - 1950s. The course examines Modernism as it developed in major European cities. Apart from focusing on major venues of modernism (Zurich, Berlin, Paris) it centers on marginal geographical spaces with specific emphasis on Athens, Greece. It further explores the rise of such movements as Cubism, Futurism, Dadaism and Surrealism and proceeds to explore the reaction of Greek modernists to these movements.

COLT 1811Q. Poisonous or Prophetic?. Wright's Native Son, Burrough's Naked Lunch, Derrida's Specters of Marx, and Rimbaud.

COLT 1811S. Philosophy and Literature of German Romanticism. A fateful collaboration between philosophy and literature was centered in Germany roughly between 1788 (Schiller's 'Gods of Greece') and 1807 (Hegel's Phenomenology of Spirit). A survey of the major literature of this period, organized thematically, will serve as an introduction to this complex phenomenon. Authors include (in translation) Fichte, Goethe, Hölderlin, Novalis, Schelling, Schiller, and Tieck.

COLT 1811T. Levantine Cities: Alexandria, Istanbul, Athens. Explores the literary and filmic imagination of three Eastern Mediterranean cities, Alexandria, Istanbul, and Athens. It examines the history, culture and politics of these cities and the ways in which they emerge in literature, film, poetry and travelogues. How is the city defined in these works? How are social tensions addressed, such as those between Greeks and Turks and Arabs or between Christians, Muslims and Jews? How are thematic and historical issues resolved, such as those involving antiquity and modernity, tradition and modernization, colonialism and nationalism, religion and secularism? How are these cities defined in the works of western writers? Enrollment limited to 30. DVPS

COLT 1811U. Literature and the Arts. Readings in the apparitions and articulations of the arts in fiction, philosophy, criticism and poetry. Focus on the interaction between language and other media, the figure of the artist, problems of expression and performance. Readings from Diderot, Hegel, Balzac, Hoffmann, Baudelaire, Poe, Nietzsche, Wagner and Mann.

COLT 1811W. Visual Obsessions: Japanese Film, Fiction, and Modernity. The pervasiveness of visual obsessions in contemporary Japanese culture prompts us to rethink the impact of modernity in terms of visuality. Through the examination of a wide range of filmic, literary, and visual art forms produced in Japan from the 1920s to the 2000s, this course explores the question of visuality as a historically and technologically conditioned way of seeing. The issues to be considered in this class include: the construction of "Japanese" aesthetics, orientalism, ocularcentrism, the problems of interiority and the subject, the relation between habit and the everyday, and cultural nationalism. This course will introduce important theoretical concepts on vision, modernity, and art history to the class, and the instructor will ask students to interrogate these concepts through the close examination of specific Japanese texts and films discussed in class. Writers, filmmakers, and visual artists include: Tanizaki Jun'ichirō, Edogawa Rampo, Abé Kôbô, Karatani Kôjin, Ozu Yasujirō, Kurosawa Akira, Ichikawa Kon, Suzuki Seijun, and Murakami Takashi.

COLT 1811X. Marx and his Critics. This course will focus on a close study of the work of Karl Marx and its legacy for critical theory. The first part of the course will be dedicated to a reading of Marx's most important texts, with special emphasis given to his theories of economy, of ideology, alienation and fetishism. The second part will be dedicated to a reading of some of Marx's most important readers: Lukacs, Gramsci, Althusser, Zizek and Derrida. Instructor's permission required.

COLT 1811Y. Genius and Melancholia in the Renaissance. Explores Renaissance accounts of genius, genial inspiration, and melancholia, and their accompanying ideas of intellect and immortality. Primary materials include Dürer, Montaigne, Rabelais, Ficino, Ariosto, Erasmus, Saint Teresa, and Luther. Secondary or contemporary texts include Warburg, Panofsky, Saxl, Klibansky, Wind, Benjamin, Kirkegaard, and Sebald.

COLT 1811Z. Literature and the American Presidency. We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a dictional source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film.

COLT 1812A. Literatures of Immigration. Why do people migrate? How do literary genres, including poetry, fiction, autobiography and memoir, characterize immigrant experiences? How is the experience of "coming from somewhere else" similar and different for each subsequent generation of immigrants? How does literature indicate the impacts of migration on the culture, politics and economics of the countries of immigration and emigration? How do literatures of migration imagine the past, present and future of networks and communities of immigrants? Focusing on nineteenth-century literature texts and the socio-historical context of mass migration, the first half of the course examines literatures of immigration in the United States; the second half of the course explores literatures of immigration beyond the U.S., and the course concludes with an inquiry into immigration in our presently globalizing age.

COLT 1812B. Aesthetics and Politics (ENGL 1900E). Interested students must register for ENGL 1900E.

COLT 1812C. The Ethics of Romanticism (ENGL 1560Y). Interested students must register for ENGL 1560Y.

COLT 1812F. Violence and Representation. Traces diverse genealogies from which to theorize violence and its relation to aesthetics. We will identify a disciplinary philology for "violence" as a signifier within visual culture, art practice and literature, historicize key transitions in varied invocations of violence in representation; study texts (photography, film, novel, installation) that create a space where violence can be discussed as both everyday and extraordinary. Some issues to be considered: representability in moments of historical crisis (war, colonialism, genocide); the efficacy of genres and artistic movements in representing violence (tragedy, surrealism, theater of cruelty); and the violence of representation (surveillance, spectatorship, voyeurism).

COLT 1812H. "Women's Literary Make-up": Mirrors, Maquillage and the Tenth Muse. Focuses on the problem of creative inspiration for women writers and how the pursuit of aesthetic perfection, both somatic and literary as well as their interrelation, becomes a recurring motif in women's writing from various traditions. Readings will include fiction and poetry from the English, Japanese, and Arab traditions, both modern and pre-modern. This is an undergraduate seminar open to juniors and seniors. Prerequisite: coursework in literature and at least one course in gender studies/ women's studies. Instructor permission required.

COLT 1812L. Collective Struggles and Cultural Politics in the Global South. Traces the historical and ideological mapping of the North-South axis and the regional mythologies informed by racism, empire and nationalism. We will examine the ways in which imagined geographical hierarchies continue to shape cultural and political struggles and the vectors of globalization. Along with readings on imperial histories, liberal and neoliberal political economies, and postcolonialism this class seeks to establish connections between resistant narratives and collective struggles in the Global South. We will discuss political philosophies of Marx, Gramsci, Arendt, Fanon, Harvey and Schwarz, as well as the works of Achebe, Hurston, Kincaid, Rushdie, Sembène, and Wright. First year students require instructor permission.
COLT 1812J. Poetry and Ethics. Interested students must register for CLAS 1930B.

COLT 1812K. European Intellectual and Cultural History: Exploring the Modern, 1880-1914 (HIST 1220).

COLT 1812L. European Intellectual History: Exploding the Modern (HIST 1230).

COLT 1812M. Erotic Desire in the Premodern Mediterranean (CLAS 1750L). Interested students must register for CLAS 1750L.

COLT 1812N. Culture and Anarchy (ENGL 1511I). Interested students must register for ENGL 1511I.

COLT 1812O. Lying, Cheating, and Stealing (ENGL 1760V). Interested students must register for ENGL 1760V.

COLT 1812P. Essaying the Essay (CLAS 1120J). Interested students must register for CLAS 1120J.

COLT 1812Q. Violence and the Multiple Responses of Medieval France. Interested students must register for ENGL 1511L.

COLT 1812R. On Being Bored (ENGL 1511L). Interested students must register for ENGL 1511L.

COLT 1812S. War, Anti-War, Postwar: Culture and Contestation in the Americas. Interested students must register for ENGL 1900R.

COLT 1812T. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B).

COLT 1812U. Queer Relations: Aesthetics and Sexuality (ENGL 1900R). Interested students must register for ENGL 1900R.

COLT 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas. Interested students must register for ENGL 1900R.

COLT 1812X. Literature and History: Russian Historical Imagination in the European Context (RUSS 1600).

COLT 1812Y. Central Europe: An Idea and its Literature (SLAV 1790). Interested students must register for SLAV 1790.

COLT 1813A. Dying God (CLAS 1930B). Interested students must register for CLAS 1930B.

COLT 1813B. Erotic Desire in the Premodern Mediterranean (CLAS 1750L). Interested students must register for CLAS 1750L.

COLT 1813D. Issues in World Literature (ENGL 1761Y). Interested students must register for ENGL 1761Y.

COLT 1813E. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B).

COLT 1813F. Communication Culture and Literary Politics (MCM 1503Q). Interested students must register for MCM 1503Q.

COLT 1813H. God, Sex and Grammar: Literary Ethics in Medieval Europe. Interested students must register for MCM 1503Q.

COLT 1813J. Berlin: Dissonance, Division, Revision. Interested students must register for MCM 1503Q.

COLT 1813K. The Problem of the Vernacular. Interested students must register for MCM 1503Q.

COLT 1813L. Rethinking the Archive/Rethinking Revolution. Interested students must register for MCM 1503Q.

COLT 1813M. Making a List. Interested students must register for MCM 1503Q.

COLT 1813N. Early Modern Women’s Writing. Interested students must register for MCM 1503Q.
enacted in the often edgy texts of women writing on the cusp of modernity. We study writers from England, France, Latin America, North America, and Spain, focusing on self-fashioning, gender and sexuality, love and marriage, imagined worlds, religion, eccentricity, and writing and fame. Authors include Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana Inés de la Cruz, Mme de Lafayette, María de Zayas. Enrollment limited to 30. Texts and class in English.

COLT 2520B. Dark and Cloudy Words: Metaphor and Poetry.
An examination of the philosophical significance of metaphor and its literary function in poetry ranging from makurakotobata in the Man'yoshū to kenningar in Skaldic poetry, to the use of the trope in a number of modern poets. Critical writings include works by Aristotle, Ki no Tsurayuki, Shelley, Christine Brooke-Rose, Max Black, Donald Davidson, Paul Ricoeur, and Jacques Derrida.

COLT 2520C. Irony: Language and Failure.
A study in the trope of irony and the ways in which it complicates the possibility of understanding. Focus on Socratie irony, the dialogue, and Romantic irony. We will also consider the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Quintillian, Diderot, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

COLT 2520D. The Literature of the Americas.
Forsaking the dominant Eurocentrism in comparative literary studies, this seminar will search for the common links between the diverse literatures of North and Latin America, approached in relation to one another rather than to "Old World" models. Authors to be considered include Margaret Atwood, Julio Cortázar, Carlos Fuentes, William Faulkner, Gabriel García-Márquez, Clarice Lispector, Machado de Assis, Toni Morrison and João Guimarães Rosa.

COLT 2520E. Dialectics of Word and Image.
Explores how proximities and interactions of text and image construct and complicate meaning. It brings together a constellation of theoretical and historical readings that have bearing on particular problems generated at the nexus of word and image. Readings by Horace, Abd al-Qahir Jurjani, Lévi-Strauss, Riceoer, Derrida, Mitchell and others will anchor a cross-disciplinary investigation of European and non-European paradigms of the relationship between text and image in various literary and visual cultures since late antiquity. We will examine specific examples of the interaction between word and image in several Islamic manuscripts.

COLT 2520F. Theories of the Lyric.
Through readings of recent critical discussions of the lyric genre, we will explore more general methodological problems of literary theory. Questions to be raised include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry, history and politics; the function of reading; and the problematic "objectivity" of criticism. Readings from Jakobson, Benveniste, Jauss, Johnson, De Man, Lacoue-Labarthe, Agamben and Badiou. Focus on poets Baudelaire, Shelley, Yeats, Hölderlin, Celan.

COLT 2520G. Rethinking the Bildungsroman.
Studies the history and theoretical complications of the idea of the Bildungsroman and "Bildung". The first meetings will unpack the notion of aesthetic education through close readings of Schiller's aesthetics and Goethe's novel Wilhelm Meister. We'll then go on to examine some classic 19th-century German, French, and English novels (Père Goriot, Middlemarch, L'education sentimentale), plus one or two less well-known novels such as Der grüne Heinrich, and one or two 20th century novels such as Der Zauberberg. Secondary readings will engage a variety of theoretical issues and approaches (deconstructive, feminist, Foucauldian, postcolonial).

COLT 2520H. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2520J. After Postmodernism: New Fictional Modes (ENGL 2760X).
Interested students must register for ENGL 2760X.

COLT 2540C. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2540D. After Postmodernism: New Fictional Modes (ENGL 2760X).
Interested students must register for ENGL 2760X.

COLT 2540E. Political Romanticism (GRMN 2320E).
Interested students must register for GRMN 2320E.

COLT 2540F. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2540G. Modernism in the Age of Comparison.
Though modernism is often considered a uniquely European and American phenomenon, we will read literary and theoretical texts from Mexico City, Beirut, and Beijing. Among the questions we will ask are these: Where and when did modernism happen? What is the relation of modernism to politics? What is the role of translation in modernism's
COLT 2540H. Freud and Lacan (ENGL 2900T). Interested students must register for ENGL 2900T.

COLT 2650A. Comparative Literature and Its Others. Is there such a thing as comparative literacy? This course examines the history and practices of Comparative Literature as a major discipline, including its self-conceptualizations, its relations with national literatures and with other disciplines, and its evolving methods of reading. Texts include literary as well as theoretical ones.

COLT 2650C. Romantic Theory: theirs and ours. Recent criticism will serve as the point of departure for looking into the relation of literary criticism to its Romantic history. Emphasis on how "Romantic" problems inform contemporary criticism on such topics as periodization, literature and history, theory of symbol and allegory, and the relation between literature and philosophy. Texts will be selected from Benjamin, M.H. Abrams, de Man, McGann, Lacoue-Labarthe and Nancy, Chase, et. al.; Fichte, Schelling, Coleridge, Wordsworth, Schlegel, Novalis.

COLT 2650D. Theory of Comparative Literature. Designed to introduce students to some of the central theoretical issues that define the discipline of Comparative Literature through the study of twelve central texts in the field. We will begin with Erich Auerbach's foundational text Mimesis, and end with Gayatri Spivak's Death of a Disciplinarian. The seminar will combine the authors to be read and analyzed will be Bakhtin, Lukacs, Barthes, Derrida, DeMan, Jameson, Greenblatt and others. Open to graduate students, and to undergraduates by permission of the instructor.

COLT 2650F. Irony. A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focus on the epistemological implications of irony and the role it plays in the philosophical tradition and in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

COLT 2650G. Literary Readings in Aesthetic Theory. The seminar will examine not just the major themes but also the rhetorical complexities of a number of powerful texts in the history of aesthetic theory. Authors to be considered include Plato, Aristotle, Longinus, Burke, Kant, Hegel, Nietzsche, Heidegger, Benjamin, Adorno. Literary texts will be considered in conjunction with these texts, sometimes by way of famous arguments or exchanges (e.g., Heidegger and Mário di Mônico).

COLT 2650H. On the Sublime (GRMN 2660A). Interested students must register for GRMN 2660A.

COLT 2650I. Late Heidegger: Art, Poetry, Technology (GRMN 2660J). Interested students must register for GRMN 2660J.

COLT 2650K. Deleuze, Rancière, Literature, Film: The Logic of Connection (ENGL 2900S). Interested students must register for ENGL 2900S.

COLT 2650L. Inheriting (in) Modernity (GRMN 2660S). Interested students must register for GRMN 2660S.

COLT 2720A. Advanced Practicum in Literary Translation. Readings in theory of translation, and in monuments of literary translation from Renaissance times to the present, will be assigned to students needing further background in these areas. Students will each complete two projects: (1) by mid-semester, a critical treatment of a published translation or a comparison of such translations; (2) for the final seminar presentation and paper, the student's own translation into English from some literary text in a language familiar to the student.

COLT 2720B. Theory and Practice of Literary Translation. Readings in the history and theory of translation from the Renaissance to the present, along with selected major examples of literature in English translation. Students will write two papers: (1) an analysis of a theoretical issue in translation with close attention to the historical context of that issue; and (2) either a discussion of an important translation as a criticism of the original work; or a critical comparison of several translations of an original work; or an annotated translation into English of a literary text from a language familiar to the student.

COLT 2720C. Literary Translation. Study and practice of translation as art and a potent form of literary criticism. Translation is an act of interpretation, which informs the language of the translator and the text as a whole: context, intent, and language. Discussion will include the impact of cultural difference, tone and time on translation, and the role of analytical as well as intuitive understanding of the original in the translator's endeavor.

COLT 2820B. Fiction and History. Focuses on how the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors to be considered include E.L. Doctorow, Gabriel Garcia-Marquez, Günter Grass, José Saramago Isabel Allende, Lidia Jorge, Cooper. Attention will also be paid to theoretical texts by Hayden White, Dominick LaCapra, Walter Benjamin, Linda Hutcheon, and Roger Chartier.

COLT 2820D. The "Tenth Muse" Phenomenon. The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

COLT 2820E. What was Enlightenment?. Emphasizes two of the Enlightenment’s most durable artists: Mozart and Jane Austen-situating them in the context of other writers of their times (such as Kant, Casanova, and Adam Smith) and modern appropriations of their work (in criticism and performance). Sub-themes are desire, reason, education, and forms of otherness. Class hours include viewing time.

COLT 2820F. Latin America and Theory. Explores the engagement of Latin American literature and criticism with non-Latin American bodies of literary and cultural theory (including poststructuralism, postcolonialism, postmodernism and cultural studies), addressing tensions between the autochthonous production of theoretical frameworks and their import from other contexts. Readings include the Latin American Subaltern Studies group, Revista de Crítica Cultural, Rama, Garcia Canclini, Sarfo, Richard and current new media theorists. Open to graduate students and qualified seniors.

COLT 2820H. The Politics and Aesthetics of Masochism. Masochism is defined as a, aesthetized positive, consensual investment in power relations. As such, it directly engages the relationship between politics and aesthetic forms, but as a sexualized relationship, Masochism articulates relations of gender in ways that seem to challenge traditional structures. Readings include novels and films, as well as theoretical engagements with masochism.

COLT 2820I. Literature and the State of Exception. This course takes as its point of departure Walter Benjamin’s famous diagnosis of modernity as a paradoxical condition under which the exception has become the rule. We will consider the aesthetic and political implications of such a state of exception in nineteenth-century literature. Authors include Baudelaire, DeQuincey, Arnold, Melville, Whitman, Benjamin, Derrida, Nancy and Agamben.

COLT 2820L. Moderns and Primitives. Major writers, artists, and theorists of European modernism put a new emphasis on the status of primitive society and archaic pre-history. We will consider the works of Durkheim, Eliot, Joyce, Picasso, and others with reference to the anthropology and ethnography of their period, and to subsequent post-colonial critique and controversy.

COLT 2820M. Discourses of the Senses. A comparative study of a variety of discourses dealing with the relation among the senses, the arts, and the problems of comparativity, interdisciplinarity, and intermediality. Topics will include ekphrasis, synaesthesia, mysticism and the theory of correspondence, the Gesamtkunstwerk, and the limits between media. Readings from Condillac, Lessing, Kant, Swedenborg, the German Romantics,
Baudelaire, Wagner, Balzac, Lacoue-Labarthe, Nancy, Panofsky, Tschumi and others.

COLT 2820N. City (B)Lights
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images. American cities and literary works are foregrounded.

COLT 2820O. Jacques Derrida's of Grammatology
This course is an introduction to the thought of the French philosopher Jacques Derrida. We will focus on his most important work, his "Grammatology", though a series of some of his essays will also be part of the readings. Other readings will include the works of authors crucial to Derrida's thought and to an understanding of the "Grammatology": Heidegger, Nietzsche, Freud, Saussure, Rousseau and Levi-Strauss.

COLT 2820P. Aesthetics and the Eighteenth Century Subject
The debates about taste, judgment, beauty, sentiment, and sensation in the eighteenth century gave rise to the discourse of aesthetics as we know it today, but they also exerted a powerful influence on how knowledge, virtue, and subjectivity were imagined in the post-enlightenment period. In this course, we will examine some of the founding texts of aesthetic theory from the era (including Locke, Smith, Burke, Lessing, and Kant), and then turn to consider how aesthetic questions informed and were taken up by Goethe's narrative of subject-formation in his Bildungsroman, Wilhelm Meister's Apprenticeship. In English.

COLT 2820Q. Culture and Politics in Cuba and the Caribbean
Complicating standard narratives about intellectuals and the Cuban Revolution, explores writings whose relationship to the state is neither affirmative nor oppositional. Focusing on journals and on recent work in cultural theory, history, anthropology, and political science, addresses the evolution and potential of civil society; articulations of marginality; revisions of socialism and the Soviet legacy; and the mobility of theory. Spanish required.

COLT 2820R. Postcolonial Melancholia
Figures of loss and defeat proliferate widely in the accounts of colonization, national liberation, and decolonization in South Asia, Africa, the Arab world, and the Americas. We will attend to the particularity of loss by juxtaposing readings in literature and postcolonial theory with readings on mourning and melancholia, drawn from a range of disciplines.

COLT 2820S. Poetry after Kant
 Begins with the intensive study of a selection of writings by Immanuel Kant focused especially on force and conflict in politics and aesthetics. This study, along with relevant readings from more recent work, will provide the basis for an approach to this topic in nineteenth-century poetry. Readings of Kant (Critique of Judgment, "Toward Eternal Peace," The Conflict of the Faculties), Walter Benjamin, Jacques Derrida, and Giorgio Agamben and will lead to several "case studies" of nineteenth-century poetry, including works by Friedrich Hölderlin, Charles Baudelaire, and Matthew Arnold.

COLT 2820T. Universals
Explores the status of universals in classical, Hellenistic, Scholastic, and Renaissance metaphysics. Also explores the literary implications of this philosophical problem. Readings include Plato, Aristotle, Chrysipus, Augustine, Cicero, Seneca, Abelard, Avicenna, Aquinas, Scottus, Ficino, Cusanus, Pico, and Suárez.

COLT 2820U. Literature and Judgment
Investigates the intersections between acts of literature and acts of judgment, between language and the law. How is literature to be judged, when is it "good" or "bad"? Does literature lie, and if so, does it matter? Does it hide a crime? And, in turn: does literature provide its own particular kind of judgment, one that may make evident the very fictional status of the law? Readings span from the Bible to contemporary post-colonial readings (Rousseau, Tolstoy, Zola, Freud, Kafka, Arendt, Benjamin, Henry James, Primo Levi, Coetzee, Sadegh Hedayat).

COLT 2820V. Nietzsche, Foucault, Latour (ENGL 2900K)
Interested students must register for ENGL 2900K.

COLT 2820W. Ethical Turns (ENGL 2900N)
Interested students must register for ENGL 2900N.

COLT 2820X. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B)
Interested students must register for ENGL 2561B.

COLT 2821A. Representing London circa 1600 (ENGL 2360T)
Interested students must register for ENGL 2360T.

COLT 2821C. From Hegel to Nietzsche: Literature as/and Philosophy (GRMN 2660O)
Interested students must register for GRMN 2660O.

COLT 2821D. Cultural Capitals: Early Modern London and Paris. We will consider the problem of cultural capital in the two most important western capitals of the seventeenth century, early modern London and Paris. What was the impact of changing demographic, spatial and economic practices on literary representation? How do cities function as capitals and as sites of conflicting political, economic, religious and cultural communities? How was urban space represented? What did metropolitan readers read? How did urbanization change notions of status, gender, and sexuality in the early modern city and how were those changes manifested in cultural production?

COLT 2821E. Metaphor.
Explores the role of metaphor in literary writing, the mind and public policy. Reads philosophical and literary analyses of metaphor alongside poetry, fiction and cognitive science research on metaphor’s centrality to human thought processes. Moves from these readings to a consideration of war metaphors in political speech in the Americas, including the "War on Drugs," the “War on Terror” and Argentina’s "Dirty War." Authors include Aristotle, de Man, Sonntag, Plath, Eluard, García Márquez, Lakoff, Pinker and Feitlowitz. Open only to graduate students.

COLT 2821F. "This is what you were born for": Optimism and Futurity (ENGL 2561F)
Interested students must register for ENGL 2561F.

COLT 2821G. Precarity, Vulnerability, Sovereignty: Worldliness and the work of Hannah Arendt.
On the 50th anniversary of Eichmann in Jerusalem, this seminar asks: How did Hannah Arendt’s experience as a Jewish refugee from Hitler’s Germany shape her democratic theory? Do her democratic theory and suggestive category worldliness provide a distinctive way to look at post-Holocaust diasporic conditions? We review main categories of political philosophy such as state, sovereignty, nation, violence, vulnerability and power, also using Butler, Kafka and more.

COLT 2830C. Literature and the Arts
An investigation of the discourse of the arts in the modern European tradition. Topics include the relation between the Ancients and the Moderns, evaluations of the possibilities and limitations of differing media, the role of language in discussions of the “other” arts, and conceptions of synaesthesia and correspondence. Texts selected from Perrault, Winckelmann, Lessing, Diderot, Rousseau, Kant, Hegel, Hoffman, Baudelaire, and others.

COLT 2830F. Walter Benjamin and Modern Theory.
An intensive reading of selected essays by Walter Benjamin on language, literature, aesthetics, and politics will be paired up with the study of the interpretation and impact of this work on contemporary work in literary theory and philosophy. In addition to Benjamin, we will also read Jacques Derrida, Philippe Lacoue-Labarthe, Samuel Weber, Giorgio Agamben, and Peter Fenves. German and/or French helpful but not required. Open to graduate students only.

COLT 2830G. The Problem of Mimesis in Modern Literary and Cultural Theory (MCM 2310F)
Interested students must register for MCM 2310F.

Across a range of disciplines, "cultural translation" today stands for the dynamic interactions among cultures. Derived from cultural anthropology and linguistic translation, the metaphor of translation (already a metaphor:
trans•latere, to bear across) is used increasingly to analyze how cultures are transmitted through the operations of colonial expansion, diaspora and immigration. Though cultural globalization is assumed to be a 20th century phenomenon, the result of an expansion and acceleration in the movement and exchange of ideas, commodities and capital, this seminar considers a longer historical frame for understanding cultural competition. Theoretical texts including Schleiermacher, Jakobson, Benjamin, Derrida, Spivak, and a “case study,” Shakespeare.

COLT 2830I. Histories of the Early Modern Body.
This seminar considers the production of knowledge about the body in the early modern period. The institution of science and how the emerging “science” of the body was visualized; discourses of the erotic, the scientific and the religious; the body in varied cultural performances including the blason, devotional texts, erotica, drama etc. Texts include theoretical work on gender and sexuality. Open to graduate students only.

COLT 2830J. Ontology of Life: Reading Heidegger’s Being and Time with Derrida (GRMN 2660K).
Interested students must register for GRMN 2660K.

COLT 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

COLT 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis.

Center for Computation and Visualization
The Center for Computation and Visualization (CCV) strives to build and foster an environment that enables teaching, learning, research, and creative undertakings that involve and rely on the use and development of advanced computing and visualization technology. CCV provides high-performance computing, highly reliable research data storage, visualization resources, physical and virtual server hosting, high-performance backup and archival services, as well as outstanding collaborative scientific support to empower computational research, scholarship, creativity, and innovation for the entire Brown community.

The computing platform, which follows the "condominium" model, comprises a 400+ node IBM iDataPlex system, including a subset of 88 GPU’s for accelerated computing, providing approximately 80 Teraflops of peak performance. All parallel applications messaging and I/O are connected to a 400-terabyte GFPS file system using 40 Gigabit per second connectivity. The storage system is integrated with a 2 Petabyte Tivoli TSM backup/archival system. CCV also maintains a high-end visualization lab with large-scale immersive visualization capabilities and develops custom visualization solutions for specific projects in partnerships with our user community.

For additional information please visit the center’s website at: http://www.ccv.brown.edu/.

Center for Computational Molecular Biology
The mission of the Center for Computational Molecular Biology (CCMB) is to make breakthrough discoveries in the life sciences through the development and application of novel computational, mathematical, and statistical techniques. Research in the Center aims to exploit the opportunities from technological advances in genomics and proteomics. The specific areas of research being conducted by our Faculty can be viewed from their profile pages on the Faculty (http://www.brown.edu/research/projects/computational-molecular-biology/about-ccmb/faculty/ccmb-faculty) page.

We are actively recruiting new graduate students and Postdoctoral Fellows.

Information on the PhD Program in Computational Molecular Biology (http://brown.edu/research/projects/computational-molecular-biology/graduate)
Information on the IGERT Program in Reverse Ecology (http://brown.edu/Research/IGERT-reverse-ecology)
Information on Postdoctoral Fellows & Research Staff (http://brown.edu/research/projects/computational-molecular-biology/about/postdocs-research/postdocs-research-staff)

Computational Biology Concentration Requirements
Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience and visualization. The program educates the student liberally in these fields, building on a foundation of coursework that may then focus via several possible tracks. The program offers four tracks: computational genomics, biological sciences, molecular modeling and applied mathematics and statistical genomics. The program requires a senior capstone experience that pairs students and faculty in creative research collaborations.

Standard program for the Sc.B. degree
Prerequisites
MATH 0100 or MATH 0170
BIOL 0200
CHEM 0330
BIOL 0470
BIOL 0280
CHEM 0505 or CHEM 0500
CSCI 0150 or CSCI 0170 or CSCI 0180 or CSCI 0190 or CSCI 0190
CSCI 0160
CSCI 0170
CSCI 0180
CSCI 0190
CSCI 0220
APMA 1650

General Core Course Requirements
APMA 1650

Computational Biology Core Course Requirements
CSCI 1810 Computational Molecular Biology (prerequisites: CSCI 0160, or CSCI 0180, or CSCI 0190 and CSCI 0220)
APMA 1080

Capstone Experience
1
Biology, or CSCI 0190 and CSCI 0220)
APMA 1080

Six courses in one of the following four tracks: 6
Computational Genomics Track: 2
Three of the following:
CSCI 1230
CSCI 1270
CSCI 1410
CSCI 1550
CSCI 1570

Design and Analysis of Algorithms

Additional Information

Biological Sciences track

At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology. Select two courses from the following:

- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Molecular Modeling Track:

At least three courses from the following:

- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- or BIOL 1270 Advanced Biochemistry
- BIOL 0530 Principles of Immunology
- BIOL 1260 Physiological Pharmacology
- BIOL 1540 Molecular Genetics

Two courses from the following:

- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Applied Mathematics and Statistical Genomics Track:

At least three courses from the following:

- APMA 1660 Statistical Inference II
- APMA 1690 Computational Probability and Statistics
- CSCI 1410 Introduction to Artificial Intelligence
- APMA 0340 Methods of Applied Mathematics I, II
- APMA 0330 Methods of Applied Mathematics I, II

At least three of the following:

- BIOL 1430 The Computational Theory of Molecular Evolution
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1070 Quantitative Models of Biological Systems

Total Credits: 19

1 Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. A minimum of one semester of independent study is required, although many students may conduct a full year of independent study.

2 This track is designed for students whose interests lie in the development of algorithms and high-quality software (tools and systems) for biological applications.

3 This track is designed for students whose interests lean more towards biological questions.

4 This track is designed for students who wish to gain competence in the field of molecular modeling and drug design.

5 This track is designed for students whose interest focuses on extracting information from genomic and molecular biology data, and modeling the dynamics of these systems. Substitution of more advanced courses with consent of advisor is permitted.

Honors:

To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

Computational Biology Graduate Program

The doctoral program is interdepartmental and the result of a collaboration between the four academic units that comprise the CCMB: Applied Mathematics, Computer Science, Ecology & Evolutionary Biology, and Molecular Biology, Cell Biology & Biochemistry.

Our PhD program assumes the following prerequisites: mathematics through intermediate calculus, linear algebra and discrete mathematics, demonstrated programming skill, and at least one undergraduate course in chemistry and in molecular biology. Exceptional strengths in one area may compensate for limited background in other areas, but some proficiency across the disciplines must be evident for admission.

The application process to the CCMB graduate program is run through the Graduate School (http://www.brown.edu/academics/gradschool).

Computer Science

Chair

Roberto Tamassia

Vice Chair and Director of Undergraduate Studies

Thomas W. Doepner Jr

Director of Graduate Studies

Shriram Krishnamurthi

Since our inception in 1979, the Computer Science Department at Brown has forged a path of innovative information technology research and teaching at both the undergraduate and graduate levels. From our modest beginnings as an interest group within the Divisions of Applied Mathematics and Engineering in the 1960s to its current stature as one of the nation’s leading computer science programs, the Computer Science Department has continuously produced prominent contributors in the field. Computer Science combines the intellectual challenge of a new discipline with the excitement of an innovative and rapidly expanding technology. The department resides in Brown’s Center for Information Technology; this striking building houses many of the university’s computing activities, as well as the department’s instructional computing facilities and research labs. Faculty, staff and students are provided state-of-the-art computing facilities managed by the department’s own technical staff.

For additional information, please visit the department’s website: http://www.cs.brown.edu/

Computer Science Concentration Requirements

Computer science is now a critical tool for pursuing an ever-broadening range of topics, from outer space to the workings of the human mind. In most areas of science and in many liberal arts fields, cutting-edge work depends increasingly on computational approaches. The undergraduate program at Brown is designed to combine breadth in practical and theoretical computer science with depth in specialized areas. These areas...
Requirements for the Standard Track of the Sc.B. degree

Prerequisites (1 or 2 courses)
Two semesters of Calculus, for example:
MATH 0090  Introductory Calculus, Part I
& MATH 0100  and Introductory Calculus, Part II
or MATH 0170  Advanced Placement Calculus

Concentration Requirements (15 courses)

Core-Computer Science:
Select one of the following introductory course Series: 2

Series A
CSCI 0150 & CSCI 0160  Introduction to Object-Oriented Programming and
Computer Science and Introduction to Algorithms and Data
Structures

Series B
CSCI 0170 & CSCI 0180  Computer Science: An Integrated Introduction
and Computer Science: An Integrated Introduction

Series C
CSCI 0190  Accelerated Introduction to Computer Science
and an additional CS course not otherwise used to satisfy a
concentration requirement; this course may be CSCI 0180, an
intermediate-level course, or an advanced course

Select three of the following intermediate-level courses, one of which
must be math-oriented and one systems-oriented: 3
CSCI 0220  Introduction to Discrete Structures and Probability
(math)
CSCI 0320  Introduction to Software Engineering (systems)
CSCI 0330  Introduction to Computer Systems (systems)
or CSCI 0310  Introduction to Computer Systems
CSCI 0450  Introduction to Probability and Computing (math)
CSCI 0510  Models of Computation (math)

Additional Computer Science Courses: 1
Select one theoretical computer science course: 2
CSCI 1490  Introduction to Combinatorial Optimization
CSCI 1510  Introduction to Cryptography and Computer
Security
CSCI 1550  Probability and Computing: Randomized Algorithms
and Probabilistic Analysis
CSCI 1570  Design and Analysis of Algorithms
CSCI 1590  Introduction to Computational Complexity
CSCI 1760  Introduction to Multiprocessor Synchronization
CSCI 1950H  Computational Topology
CSCI 1950J  Introduction to Computational Geometry
CSCI 1820  Algorithmic Foundations of Computational Biology

Select one artificial intelligence course: 2
CSCI 1410  Introduction to Artificial Intelligence
CSCI 1430  Introduction to Computer Vision
CSCI 1460  Introduction to Computational Linguistics
CSCI 1480  Building Intelligent Robots
CSCI 1490  Introduction to Combinatorial Optimization
CSCI 1580  Information Retrieval and Web Search
CSCI 1950F  Introduction to Machine Learning

Select one computer science systems course: 2
CSCI 1230  Introduction to Computer Graphics
CSCI 1260  Introductory Compiler Construction
CSCI 1270  Database Management Systems
CSCI 1290  Computational Photography
CSCI 1320  Creating Modern Web Applications
CSCI 1340  - Innovating Game Development
CSCI 1380  Distributed Computer Systems
CSCI 1600  Introduction to Embedded and Real-Time Software
CSCI 1610  Building High-Performance Servers
CSCI 1660  Introduction to Computer Systems Security
CSCI 1670  Operating Systems
CSCI 1680  Computer Networks
CSCI 1730  Introduction to Programming Languages
CSCI 1900  Software System Design

Four additional advanced computer science courses 4

A capstone course 3
Math: Two semesters of Mathematics or Applied Mathematics beyond
MATH 0100/0170. One of these courses must be a linear algebra
course

MATH 0520  Linear Algebra
MATH 0540  Honors Linear Algebra
CSCI 0530  Directions: The Matrix in Computer Science

Total Credits 15

1. Normally these advanced courses must be at the 1000-level or higher,
   though an intermediate-level course not used to satisfy a core requirement
   may be used.
   • These courses must include two pairs of courses with each pair forming
     a coherent theme. A list of pre-approved pairs may be found at the
     approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/
     approvedpairs.html). You are not restricted to pairs on this list, but any pair
     not on the list must be approved by the director of undergraduate studies.
   • Five of the eight courses must be computer science courses.
   • Among the eight courses may be approved 1000-level courses in
     Mathematics, Applied Mathematics, Biology, Engineering, Economics, Music,
     Cognitive, Linguistic, and Psychological Sciences, Neuroscience, and other
     departments that cover material relevant to the student’s concentration.

2. No course may be used to satisfy more than one area requirement.

3. Capstone: a one-semester course, normally taken in the student’s
   last undergraduate year, in which the student (or group of students)
   use a significant portion of their undergraduate education, broadly
   interpreted, in studying some current topic in depth, to produce a
   culminating artifact such as a paper or software project.

Requirements for the Professional Track of the Sc.B. degree

The requirements for the professional track include all those of the
standard track, as well as the following:

Students must complete two two-to-four-month full-time professional
experiences, doing work that is related to their concentration programs.
Such work is normally done within an industrial organization, but may also
be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write
and upload to ASK a reflective essay about the experience addressing the
following prompts, to be approved by the student’s concentration advisor:

• Which courses were put to use in your summer’s work? Which topics, in
  particular, were important?
• In retrospect, which courses should you have taken before embarking
  on your summer experience? What are the topics from these courses
  that would have helped you over the summer if you had been more
  familiar with them?
• Are there topics you should have been familiar with in preparation for
  your summer experience, but are not taught at Brown? What are these
  topics?
• What did you learn from the experience that probably could not have
  been picked up from course work?
Requirements for the Professional Track of the A.B. degree

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

Standard Program for the Sc.B. degree

Prerequisites (3 courses):
- MATH 0100 Introductory Calculus, Part I
- MATH 0150 Linear Algebra
- MATH 0170 Advanced Placement Calculus

Required Courses (17 courses):
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160 and Introduction to Algorithms and Data Structures
- CSCI 0170 Computer Science: An Integrated Introduction
- CSCI 0180 and Computer Science: An Integrated Introduction
- CSCI 0190 Accelerated Introduction to Computer Science
- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- CSCI 0310 or CSCI 0310 Introduction to Computer Systems
- CSCI 0450 Introduction to Probability and Computing (math)
- CSCI 0510 Models of Computation (math)
- CSCI 0530 Directions: The Matrix in Computer Science (math)
- ECON 0110 Principles of Economics

Select one of the following Series:

Series A
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160 and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170 Computer Science: An Integrated Introduction
- CSCI 0180 and Computer Science: An Integrated Introduction

Series C
- CSCI 0190 Accelerated Introduction to Computer Science
- and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CSCI course, or a 1000 level course)

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:
- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- CSCI 0310 or CSCI 0310 Introduction to Computer Systems
- CSCI 0450 Introduction to Probability and Computing (math)
- CSCI 0510 Models of Computation (math)
- CSCI 0530 Directions: The Matrix in Computer Science (math)

Four additional courses in computer science or related areas are required.

Total Credits: 9

1 Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Requirements for the Standard Track of the A.B. degree

Prerequisites
Two semesters of Calculus, for example:
- MATH 0090 and MATH 0100
- MATH 0170 Advanced Placement Calculus

Concentration Requirements (9 courses)
Core Computer Science:
Select one of the following series:

Series A
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160 and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170 Computer Science: An Integrated Introduction
- CSCI 0180 and Computer Science: An Integrated Introduction

Series C
- CSCI 0190 Accelerated Introduction to Computer Science

and an additional CSCI course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CSCI course, or a 1000 level course)

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:
- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- or CSCI 0310 Introduction to Computer Systems
- CSCI 0450 Introduction to Probability and Computing (math)
- CSCI 0510 Models of Computation (math)
- CSCI 0530 Directions: The Matrix in Computer Science (math)

Four additional courses in computer science or related areas are required.

Total Credits: 9
Standard Program for the A.B. degree:

Prerequisites (3 courses):
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science
- ECON 0110 Principles of Economics

Required Courses (13 courses):
- CSCI 0450 Introduction to Probability and Computing
- or APMA 1650 Statistical Inference I
- Select one of the following series: 2
  
  **Series A**
  - CSCI 0510 Models of Computation (math)
  - or CSCI 0310
  - MATH 0100
  - or any graduate Economics course

A pair of CS courses with a coherent theme. 1

An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements.

ECON 1130 Intermediate Microeconomics (Mathematical) 2
ECON 1210 Intermediate Macroeconomics
ECON 1630 Econometrics I

Three courses from the "mathematical economics" group:
- ECON 1630 Econometrics I
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics
- and any graduate Economics course

Two additional 1000-level Economics courses 2

Capstone Course in either Computer Science or Economics 3

Total Credits 17

1 A list of pre-approved pairs may be found at the approved-pairs web page (http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies.

2 Or ECON 1110, with permission.

3 A one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

Requirements for the Standard Track of the Sc.B. degree.

Prerequisites - two semesters of Calculus, for example

- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.
Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (http://www.cs.brown.edu/ugrad/concentrations/professional.track.html) of the ScB program in Mathematics-Computer Science.

Requirements for the Standard Track of the Sc.B. degree.

Select one of the following series:

Series A

- CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

Series B

- CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction

Series C

- CSCI 0190 Accelerated Introduction to Computer Science and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level CS course

- CSCI 0320 Introduction to Software Engineering
- CSCI 0330 Introduction to Computer Systems
- CSCI 0220 Introduction to Discrete Structures and Probability
- CSCI 0450 or CSCI 0510 Introduction to Probability and Computing or Models of Computation

Three 1000-level Mathematics courses

Three advanced courses in Computer Science

Three additional courses different from any of the above chosen from Mathematics, Computer Science, Applied Mathematics, or related areas

A capstone course in Computer Science or Mathematics

Total Credits

1 These courses must be at the 1000-level or higher. The three courses must include a pair of courses with a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

2 These must be approved by a concentration advisor.

3 A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Computer Science Graduate Program

The department of Computer Science offers two graduate degrees in computer science. The Master of Science (Sc.M.) degree for those who wish to improve their professional competence in computer science or to prepare for further graduate study, and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/computer-science

Concurrent ScB (NUS) and ScM in Computational Biology (Brown University)

The School of Computing at National University of Singapore and The Department of Computer Science at Brown have established a concurrent Bachelor’s and Master’s degree program in Computational Biology. After having first completed four years of undergraduate study at National University of Singapore (NUS), qualified students will attend Brown University to complete their fifth and final year of study in computational biology. After the successful completion of requirements set forth by both universities, the students will simultaneously earn both their Sc.B. and Sc.M. degrees. The Sc.B will be awarded by the National University of Singapore, while the Sc.M. is awarded by Brown University.

Courses

CSCI 0020. The Digital World.

Removes the mystery surrounding computers and the ever-growing digital world. Introduces a range of topics including the World Wide Web and many aspects of multimedia, along with the underlying digital technology and its relevance to our society. Other topics include artificial intelligence,
IT security, ethics and economics of computing as well as the effects of
its pervasiveness in today's world. Introductory programming and analytic
skills are developed through HTML, Photoshop, Access and Python
assignments. CSCI 0020 is a good introduction to a wide range of CS
topics that have broad relevance in our society. No prerequisites. LILE

CSCI 0040. Introduction to Scientific Computing and Problem
Solving.
An introduction to computer programming and software design in a high-
level language. Emphasizes fundamental techniques and strategies for
solving scientific problems with computers. Illustrates abstract concepts
with a wide range of exemplary applications from engineering, the
sciences, and the humanities. Intended for students who want a single
application-oriented programming course. This course is not intended for
computer science concentrators. No prerequisites.

CSCI 0080. An Overview of Computer Science.
Introduces non-CS concentrators to the academic discipline of computer
science and its relevance to other fields and modern life more generally.
The target audience is students who are interested in learning more about
what computer science is about and the ideas it has to offer tomorrow's
citizens and scholars. Topics include the basics of computation and
programming, a taste of theoretical computer science and algorithms,
and an introduction to computing architectures and artificial intelligence.
Although students will learn to read and understand short programs, the
course will not teach or require advanced programming skills. LILE

CSCI 0081. TA Apprenticeship: Full Credit.
Being an undergraduate TA is a learning experience: one not only gets
a deeper understanding of the course material, but gains management
and social skills that are invaluable for one's future. Students taking this
course must first be selected as an undergraduate TA for a Computer
Science course, a course the student has taken and done well in. Students
will work with the course's instructor on a variety of course-related topics,
including preparation of material and development of assignments.
Whether CSCI 0081 or its half-credit version (CSCI 0082) is taken is up to
the professor of the course being TA'd. Instructor permission required.

CSCI 0082. TA Apprenticeship: Half Credit.
Being an undergraduate TA is a learning experience: one not only gets
a deeper understanding of the course material, but gains management
and social skills that are invaluable for one's future. Students taking this
course must first be selected as an undergraduate TA for a Computer
Science course, a course the student has taken and done well in. Students
will work with the course's instructor on a variety of course-related topics,
including preparation of material and development of assignments.
Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to
the professor of the course being TA'd. Instructor permission required.

CSCI 0150. Introduction to Object-Oriented Programming and
Computer Science.
Emphasizes object-oriented design and programming in Java, an
effective modern technique for producing modular, reusable, internet-
aware programs. Also introduces interactive computer graphics, user
interface design and some fundamental data structures and algorithms.
A sequence of successively more complex graphics programs, including
Tetris, helps provide a serious introduction to the field intended for both
potential concentrators and those who may take only a single course. No
prerequisites.

CSCI 0160. Introduction to Algorithms and Data Structures.
Introduces fundamental techniques for problem solving by computer
that are relevant to most areas of computer science, both theoretical
and applied. Algorithms and data structures for sorting, searching,
graph problems, and geometric problems are covered. Programming
assignments conform with the object-oriented methodology introduced in
CSCI 0150. Prerequisite: CSCI 0150 or written permission.

CSCI 0170. Computer Science: An Integrated Introduction.
This is an introductory sequence that helps students begin to
develop the skills, knowledge, and confidence to solve computational
problems elegantly, correctly, efficiently, and with ease. The sequence
is unique in teaching both the functional and imperative programming
paradigms—the first through the languages Scheme and ML in CSCI0170;
the second through Java in CSCI0180. The sequence requires no
previous programming experience. Indeed, few high school students are
exposed to functional programming; hence even students with previous
programming experience often find this sequence an invaluable part of
their education.
Although students are taught to use programming languages as tools,
the goal of CSCI0170/0180 is not merely to teach programming. On
the contrary, the goal is to convey to students that computer science is
much more than programming! All of the following fundamental computer
science techniques are integrated into the course material: algorithms,
data structures, analysis, problem solving, abstract reasoning, and
abstraction to study introductory operating system and compiler concepts.
Whether students wish to take CSCI 0190
must begin in CSCI 0170 and complete additional work in that course.
CSCI 0190 will branch off from CSCI 0170 after approximately one
month. Students will be permitted to enroll by permission of the instructor.
Please see http://cs.brown.edu/courses/csci0190/2012/ for
tests, debugger reuse, the software lifecycle, tools and project
management. Prerequisite: CSCI 0150 or CSCI 0180 or CSCI 0190.

CSCI 0310. Introduction to Computer Systems.
Basic principles of computer organization. Begins with machine
representation of data types and logic design, then explores architecture
and operations of computer systems, including I/O, pipelining, and
memory hierarchies. Uses assembly language as an intermediate
abstraction to study introductory operating system and compiler concepts.
Prerequisite: CSCI 0150 or CSCI 0180 or CSCI 0190.

CSCI 0320. Introduction to Software Engineering.
Advanced programming techniques including Java, threads, web-
applications, user interfaces and XML. Covers software design including
object-oriented design, systems design, web application design and user
interface design. Software engineering including modeling, analysis,
testing, debugger reuse, the software lifecycle, tools and project
management. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. CSCI
220 is recommended.

CSCI 0330. Introduction to Computer Systems.
High-level computer architecture and systems programming. The course
covers the organization of computer systems (in terms of storage units,
caches, processors, and I/O controllers) and teaches students assembly-
language programming and C-language programming. Extensive
programming exercises introduce students to systems-level programming
on Linux systems, as well as to multi-threaded programming with POSIX
threads. Students will learn the basics of how compilers work and will be
introduced to the functions of operating systems. Prerequisite: CSCI 0150,
0180, or 0190.
CSCI 0450. Introduction to Probability and Computing.
Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major roles in machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of statistical inference. Enrollment limited to 45.

CSCI 0510. Models of Computation.
The course introduces basic models of computation including languages, finite-state automata and Turing machines. Proves fundamental limits on computation (incomputability, the halting problem). Provides the tools to compare the hardness of computational problems (reductions). Introduces computational complexity classes (P, NP, PSPACE and others). Prerequisite: CSCI 0220 or 0450.

CSCI 0530. Directions: The Matrix in Computer Science.
Introduces vectors, matrices and their role in computer science in three components: (1) concepts, theorems, and proofs, (2) procedures and programs, (3) applications and working with data. Weekly lab sessions where students apply concepts to a real task with real data. Example labs: transformations in 2-d graphics, error-correcting codes, image compression using wavelets, synthesizing a new perspective in a photo, face recognition, news story categorization, cancer diagnosis using machine learning, matching airplanes to destinations, Google’s PageRank method. Other topics as time allows. Skills in programming and prior exposure to reading and writing mathematical proofs required.

CSCI 0931. Introduction to Computation for the Humanities and Social Sciences.
Introduces students to the use of computation for solving problems in the social sciences and the humanities. We will investigate a series of real-world problems taken from the news, from books such as Freakonomics, and from current research. Topics covered include data gathering, randomization, analysis, web-based interfaces, security, algorithms, and scripting. Enrollment limited to 25. Instructor permission required. To be added to the class waitlist, please sign up here: https://docs.google.com/a/brown.edu/spreadsheet/viewform?formkey=dG5GT3hid21YRHRiNFVSZE9EMHFIeFE6MQ#gid=0
Note: you must use your Brown login. Requests for access for other email addresses will be ignored.

Fundamental concepts in 2D and 3D computer graphics, e.g., 2D raster graphics techniques, simple image processing, and user interface design. Focuses on geometric transformations, and 3D modeling, viewing and rendering. A sequence of assignments in C++ culminates in a simple modeler and ray tracer. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Concurrent prerequisites: CSCI 0310 or CSCI 0330, and one of CSCI 0530, MATH 0520 and MATH 0540. Strong programming ability is required.

CSCI 1234 is a half-credit course intended to be taken concurrently with CSCI 1230 and provides students with a greater understanding of the material by having them extend each of 1230’s assignments to greater depth.

CSCI 1250. Introduction to Computer Animation.
Introduction to 3D computer animation production including story writing, production planning, modeling, shading, animation, lighting, and compositing. Students work independently to learn basic skills, then in groups to create a polished short animation. Emphasis is on in-class critique of ongoing work, which is essential for learning the cycle of evaluating work, determining improvements, and implementing them for further evaluation. Students should attend first class to receive instructor’s written permission.

CSCI 1260. Introductory Compiler Construction.
Lexical analysis, syntactic analysis, semantic analysis, code generation, code optimization, translator writing systems. Prerequisites: CSCI 0220 and 0320; 0510 is recommended.

CSCI 1270. Database Management Systems.
Introduction to database structure, organization, languages, and implementation. Relational model, query languages, query processing, query optimization, normalization, file structures, concurrency control and recovery algorithms, and distributed databases. Coverage of modern applications such as the Web, but with emphasis on Database Management Systems internals. Prerequisites: CSCI 0180, CSCI 0190, or CSCI 0190. One of CSCI 0330 or CSCI 0320 is strongly recommended.

CSCI 1280. Intermediate 3D Computer Animation.
Continues work begun in CSCI 1250 with deeper exploration of technical and artistic aspects of 3D computer animation including more sophisticated shading and lighting methods and character modeling, rigging, animation, and dynamics. After a series of individual exercises, students pursue an independent topic and then, working alone or in pairs, create a polished demonstration. Emphasis is on in-class critique of ongoing work. Prerequisite: CSCI 1250. Students may contact the instructor in December for permission.

CSCI 1290. Computational Photography.
Describes the convergence of computer graphics and computer vision with photography. Its goal is to overcome the limitations of traditional photography using computational techniques to enhance the way we capture, manipulate, and interact with visual media. Topics covered: cameras, human visual perception, image processing and manipulation, image based lighting and rendering, high dynamic range, single view reconstruction, photo quality assessment, non photorealistic rendering, the use of Internet-scale data, and more. Students are encouraged to capture and process their own data. Prerequisites: previous programming experience, basic linear algebra, calculus, and probability; previous knowledge of computer graphics or computer vision. Strongly recommended: CSCI 1230, CSCI 1430, ENGN 1610.

Covers the fundamental concepts, principles, and abstractions that underlie the design and engineering of computer systems. Topics include computer systems organization, modularity, virtualization, communications, atomicity, fault tolerance, security, and performance. Combined lectures and presentation and discussion of case studies. Several hands-on labs and written assignments, as well as a semester-long project that is incrementally worked on throughout the semester. Prerequisites: CSCI 0160, 0180, or 0190, or permission of the instructor.

The course covers all aspects of web application development, including the initial concept, user-centric design, development methodologies, front and back end development, databases, security, testing, load testing, accessibility, and deployment. There will be a substantial team project. The course is designed for students with a programming background (equiv CSCI 0320/CSCI 0330) who want to learn how to build web applications, and for students with a background in web design, including HTML and Javascript, who are interested in learning how to extend design techniques to incorporate the technologies needed in modern web applications. Project teams will consist of students with both backgrounds.

CSCI 1340. Innovating Game Development.
What technologies will shape the next generation of videos? This project-centered course focuses on computational innovations for game development. Students examine innovative game technology through case studies of existing games and talks by industrial and academic game professionals. In teams, students propose and implement a project demonstrating a novel technology for gaming. Recommended: strong computational or engineering background.

explores the visual and human-computer interaction design process for scientific applications in Brown’s immersive virtual reality Cave. Joint with RID. Computer Science and design students learn how to work together effectively; study the process of design; learn about scientific problems;
create designs applications; critique, evaluate, realize and iterate designs; and demonstrate final projects. Instructor permission required.

**CSCI 1380. Distributed Computer Systems.**
Explores the fundamental principles and practice underlying networked information systems. The course covers basic distributed computing mechanisms (e.g., naming, replication, security, etc.) and enabling middleware technologies. We then discuss how these mechanisms and technologies fit together to realize distributed databases and file systems, web-based and mobile information systems. Prerequisite: CSCI 0320.

**CSCI 1410. Introduction to Artificial Intelligence.**
Theoretical and practical approaches to designing intelligent systems. Example tasks range from game playing to hardware verification. Core topics include knowledge representation, search and optimization, and automated reasoning. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190; and either CSCI 0220 or CSCI 0450.

**CSCI 1420. Introduction to Machine Learning.**
How can artificial systems learn from examples, and discover information buried in massive datasets? We explore the theory and practice of statistical machine learning, focusing on computational methods for supervised and unsupervised data analysis. Specific topics include Bayesian and maximum likelihood parameter estimation, regularization and sparsity-promoting priors, kernel methods, the expectation maximization algorithm, and models for data with temporal or hierarchical structure. Applications to regression, categorization, clustering, and dimensionality reduction problems are illustrated by examples from vision, language, bioinformatics, and information retrieval. Prerequisites: CSCI 0040 or 0150 or 0180 or 0190; and CSCI 0450 or APMA 1650 or MATH 1610; and CSCI 0530 or MATH 0520 or 0540; or instructor permission.

**CSCI 1430. Introduction to Computer Vision.**
How can we program computers to understand the visual world? This course treats vision as inference from noisy and uncertain data and emphasizes probabilistic and statistical approaches. Topics may include perception of 3D scene structure from stereo, motion, and shading; segmentation and grouping; texture analysis; learning, object recognition; tracking and motion estimation. Strongly recommended: basic linear algebra, calculus, and probability.

**CSCI 1450. Introduction to Probability and Computing.**
Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major role in machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of statistical inference.

**CSCI 1460. Introduction to Computational Linguistics.**
Introduction to computational linguistics (also known as natural-language processing) including the related mathematics and several programming projects. Particular topics include: language modeling (as used in e.g., speech recognition, machine translation), machine translation, part-of-speech labeling, syntactic parsing, and pronoun resolution. Mathematical techniques include basic probability, noisy channel models, the EM (Expectation-Maximization) algorithm, hidden Markov models, probabilistic context-free grammars, and the forward-backward algorithm. Not open to first year students.

**CSCI 1480. Building Intelligent Robots.**
How do robots function autonomously in dynamic, unpredictable environments? This course focuses on programming mobile robots, such as the iRobot Roomba, to perceive and act autonomously in real-world environments. The course covers basic paradigms such as sensor fusion, control and robot perception are examined and compared with robotic notions in science fiction. Prerequisite: CSCI 0150, CSCI 0170 or CSCI 0190. Recommended: CSCI 1410 or CSCI 1230. Enrollment limited to 20.

**CSCI 1490. Introduction to Combinatorial Optimization.**
This course covers the algorithmic aspects of optimizing decisions in fully observable, non-changing environments. Students are introduced to state-of-the-art optimization methods such as linear programming, integer programming, local search, and constraint programming. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0510; and CSCI 0530 or MATH 0520 or MATH 0540.

**CSCI 1510. Introduction to Cryptography and Computer Security.**
This course studies the tools for guaranteeing safe communication and computation in an adversarial setting. We develop notions of security and give provably secure constructions for such cryptographic objects as cryptosystems, signature schemes and pseudorandom generators. We also review the principles for secure system design. Prerequisites: CSCI 0220 and CSCI 0510.

**CSCI 1550. Probability and Computing: Randomized Algorithms and Probabilistic Analysis.**
This course introduces students to applications of probabilistic and statistical methods to the design and analysis of algorithms, in particular randomized algorithms and probabilistic analysis of algorithms. The course covers basic probabilistic techniques such as tail bounds, martingales, coupling, etc., and presents applications of randomized and probabilistic analysis techniques in areas such as graph algorithms, data structures, communication, and Monte Carlo simulations. No prior knowledge of probability theory is assumed. CSCI 1570 recommended but not required.

**CSCI 1570. Design and Analysis of Algorithms.**
A single algorithmic improvement can have a greater impact on our ability to solve a problem than ten years of incremental improvements in CPU speed. We study techniques for designing and analyzing algorithms. Typical problem areas addressed include numerical computing, hashing, searching, dynamic programming, graph algorithms, network flow, and string parsing and matching. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190, and one of CSCI 0220 or CSCI 0450.

**CSCI 1580. Information Retrieval and Web Search.**
Covers traditional material as well as recent advances in information retrieval (IR), the study of indexing, processing, and querying of textual data. The focus will be on newer techniques geared to hypertext documents available on the World Wide Web. Topics include efficient text indexing; Boolean and vector space retrieval models; evaluation and interface issues; Web crawling, link-based algorithms, and Web metadata; text/Web clustering; classification; text mining.

**CSCI 1590. Introduction to Computational Complexity.**
Introduction to serial and parallel models of computation; time and space complexity classes on these models; the circuit model of computation and its relation to serial and parallel time complexity; space-time tradeoffs on serial computers; area-time tradeoffs on the VLSI computational model; interactive and probabilistically checkable proofs; the definition of NP in terms of probabilistically checkable proofs; hardness of approximations to solutions to NP-hard problems. Prerequisite: CSCI 0510.

**CSCI 1600. Introduction to Embedded and Real-Time Software.**
Comprehensive introduction to the design and implementation of software for programmable embedded computing systems, those enclosed in devices such as cellular phones, game consoles, and car engines. Includes the overall embedded real-time software design and development processes, as well as aspects of embedded hardware and real-time, small-footprint operating systems. Major project component. Prerequisites: CSCI 0320 or 0360.

**CSCI 1610. Building High-Performance Servers.**
In depth study of modern server design. Considers architectures for building high-performance, robust, scalable, and secure network servers. We will consider all aspects of "mission-critical" servers. Topics include multithreaded and asynchronous programming techniques, database access, performance profiling, security, and redundancy. Teams will build significant projects. Prerequisite: CSCI 0320 or 0360. CSCI 1670 or 1680 is recommended.

**CSCI 1660. Introduction to Computer Systems Security.**
This course teaches principles of computer security from an applied viewpoint and provides hands-on experience on security threats and countermeasures. Topics include code execution vulnerabilities (buffer
overflow, sandboxing, mobile code), malware (trojans, viruses, and worms), access control (users, roles, policies), cryptosystems (hashing, signatures, certificates), network security (firewalls, TLS, intrusion detection, VPN), and human and social issues. Prerequisites: one of CSCI 0160 or CSCI 0180 or CSCI 0190; and CSCI 0320 or 0330.

**CSCI 1670. Operating Systems.**
Covers not just the principles of operating systems but the intricacies of how they work. Topics include multithreaded programming, managing threads and interrupts, managing storage, processor scheduling, operating-system structure, virtualization, security, and the design of file systems (both local and distributed). Extensive examples are taken from actual systems, including Linux and Windows. Students are expected to complete both problem sets and programming assignments (in C). Prerequisite: CSCI 0320 or 0330.

**CSCI 1680. Computer Networks.**
Covers the technologies supporting the Internet, from Ethernet and WiFi through the routing protocols that govern the flow of traffic and the web technologies that are generating most of it. A major concern is understanding the protocols used on the Internet: what the issues are, how they work, their shortcomings, and what improvements are on the horizon. Prerequisite: CSCI 0330 or consent of instructor.

**CSCI 1690. Operating Systems Laboratory.**
Half-credit course intended to be taken with CSCI 1670. Students individually write a simple operating system in C. Serves to reinforce the concepts learned in 1670 and provides valuable experience in systems programming. Corequisite: CSCI 1670.

**CSCI 1729. Programming Languages Lab.**
Half-credit course intended to be taken concurrently with CSCI 1730. Students individually implement a full programming language chosen by the course. Reinforces the concepts learned in CSCI 1730 and provides valuable experience in implementing programming languages. Corequisite: CSCI 1730.

**CSCI 1730. Introduction to Programming Languages.**
Explores the principles of modern programming languages by implementation. Examines linguistic features, especially control operators such as first-class functions, exceptions, and continuations. Studies data and their types, including polymorphism, type inference, and type soundness. Examines compiler and run-time system topics: continuation-passing style and garbage collection. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. Preferred: CSCI 0220, either CSCI 0320 or CSCI 0330, and CSCI 0510.

**CSCI 1760. Introduction to Multiprocessor Synchronization.**
This course examines the theory and practice of multiprocessor synchronization. Subjects covered include multiprocessor architecture, mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, load balancing, concurrent data structures, and transactional synchronization.

**CSCI 1780. Parallel and Distributed Programming.**
Covers the practical aspects involved in designing, writing, tuning, and debugging software designed to run on parallel and distributed systems. Topics might include client-server computation, threads, networks of workstations, message passing, shared memory, partitioning strategies, load balancing, algorithms, remote procedure call, and synchronization techniques. Prerequisites: CSCI 0220 and either CSCI 0320 or CSCI 0330, and CSCI 0510 recommended.

**CSCI 1800. Cybersecurity and International Relations.**
The global Internet shortens distances, makes businesses more efficient and facilitates greater social interaction. At the same time, it exposes vital national resources to exploitation and makes it easier for the international criminal element to prey on innocent Internet users. Cybersecurity is concerned with making the Internet a more secure and trustworthy environment. In this course we study this topic from the technological and policy points of view. The goal is to facilitate communication across the divide that normally characterizes the technological and policy communities. Enrollment limited to 30. LIELE WRIT

**CSCI 1810. Computational Molecular Biology.**
Processing molecular biology data (DNA, RNA, proteins) has become central to biological research and a challenge for science research. Important objectives are molecular sequence analysis, recognition of genes and regulatory elements, molecular evolution, protein structure, comparative genomics. This course models the underlying biology in the terms of computer science and presents the most significant algorithms of molecular computational biology. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190, and CSCI 0220, or consent of instructor.

**CSCI 1820. Algorithmic Foundations of Computational Biology.**
The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP’s variation. The course is open to computer and mathematical sciences students as well as biological and medical students.

**CSCI 1900. Software System Design.**
Students identify, design, and implement significant software applications and learn and practice techniques of project management, requirements, specification, analysis, design, coding, documentation, testing, maintenance, and communication. Prerequisite: CSCI 0320.

**CSCI 1950A. Computational Modeling and Algorithmic Thinking.**
In this course you will learn how to apply tools from statistics and computer science to build computational models of physical and biological systems. Example applications include modeling and then simulating the behavior of a collection of genes, the spread of disease in a population, a single neuron in isolation or the complex of neurons comprising the primate visual cortex.

**CSCI 1950B. Computational Topology and Discrete Geometry.**
This course will investigate (through a mixture of lectures and student presentations of recent papers) topics in computational topology, including Morse theory and discrete differential geometry. Other possible topics are knot polynomials, simplicial homology, and geometric probability theory. Some mathematical sophistication and programming skills required. No prerequisites.

**CSCI 1950C. Advanced Programming for Digital Art & Literature.**
This workshop will explore advanced tools and techniques for the creation of innovative and expressive works of digital art. Lectures will address the application of best practices from the software design community to the context of artistic practice. In the first section of the course, students will exercise their aesthetic, conceptual, and technical skills on a set of ‘mini-projects’ exploring the analysis, generation and presentation of computationally-enhanced literary texts. Assignments will include web-text mining, feature extraction, grammars, generative algorithms, and statistical techniques. During the second half of the course, students will focus on a larger work of their own design, participating in regular critiques through the development cycle. Though assignments will focus on digital literature, a wide range of artistic media will be explored, including sound, image, video, 3D and installation. Collaboration is encouraged. Instructor permission required. Enrollment limited to 18.

**CSCI 1950E. Human-Robot Interaction Seminar.**
Covers current research in Human-Robot Interaction. Course topics span the mechanical, computational, and empirical aspects of developing robot technology to improve human productivity and quality of life. Course participation includes presentation and analysis of research publications in Human-Robot Interaction and implementation of a group project. Prerequisites: CSCI 1410, 1480, or instructor permission.

**CSCI 1950F. Introduction to Machine Learning.**
How can artificial systems learn from examples, and discover information buried in massive datasets? This course explores the theory and practice of statistical machine learning. Topics include parameter estimation, probabilistic graphical models, approximate inference, and kernel and nonparametric methods. Applications to regression, categorization, and clustering problems are illustrated by examples from vision, language, communications, and bioinformatics. Prerequisites: CSCI 0160, 0180, or 0190, and comfort with basic probability, linear algebra, and calculus.

**Summer only:** Students taking this course during the summer semester must also enroll in the summer version of MATH 0350.
We will study various algorithmic problems that arise in the study of topological phenomena, such as winding number, turning number, knot polynomials, topology of covering spaces (especially Riemann surfaces), and discrete Morse theory. The mathematical topics will be briefly introduced before we move to computations, but some a priori mathematical sophistication will make the course more valuable to the student. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950I. Introduction to Computational Geometry.
Geometric algorithms in two and three dimensions. Algorithmic and geometric fundamentals. Point location, convex hulls, proximity (Voronoi diagrams, Delaunay triangulations), intersections, the geometry of rectangles. Prerequisites: CSCI 0160, 0170, or 0190; and CSCI 0220.

CSCI 1950J. Introduction to Computational Geometry.
A project-centered course focused on technological, paradigm, and design innovations for game development. As teams, students will propose and implement a project demonstrating a novel technology for gaming. Examines the current state and future of game development through a seminar of speakers active in game development and research. A strong computer science or engineering background is recommended.

We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 1950L. 2D Game Engines.
2D Game Engines covers core techniques used in the development 2D game engines. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950M. Programming for the Humanities and Social Sciences.
A principled introduction to programming for students whose primary interest lies in the humanities and social sciences. Students will propose a substantial project related to their concentrations. They will learn sufficient programming skills to carry out the project, presenting it at the end of the course. The course is a continuation of CSCI 0931. Prerequisite: CSCI 0931. Instructor permission required.

CSCI 1950N. Compiler Practice.
This class covers the practice of compiler writing, including lexical analysis, parsing, semantic analysis, code generation, and code optimization. Students design and implement a full compiler modularly for a modern functional language using a modern intermediate representation and modular backend. Instructor permission required.

CSCI 1950O. Advanced Animation Production.
Students will apply knowledge and skills gained in previous animation courses to produce high quality short animated film as a group. Production will follow the industry standard pipeline that includes modeling, texturing, lighting, animating, rendering, and post production. Interested students will perform preproduction story and concept design prior to beginning of course. Prerequisite: CSCI 1250. Enrollment limited to 15. Instructor permission required.

CSCI 1950P. Topics in 3D Game Engine Development.
Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the QI framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisites: CSCI 1230 and one of CSCI 0320 or CSCI 1950N. Enrollment limited to 25.

CSCI 1950Q. Topics in Data Science.
Data is the new soil of business and (soon) at the core of essentially all domains from material science to healthcare. Mastering big data not only requires skills in a variety of disciplines from distributed systems over statistics to machine learning, but also requires an understanding of a complex ecosystem of tools and platforms. This seminar will try to shed some light into the complex space of data science covering aspects from data management, distributed algorithms, virtualization, data mining, machine learning, and statistics. We will discuss how these techniques complement each other to make sense of data at massive scale. Prerequisites: CSCI 0320 and 1270, or equivalents, or instructor permission.

CSCI 1950R. Software Foundations.
Software Foundations will be a project-based course focusing on the challenges and techniques involved in proving non-trivial properties about real-world systems. We will base our exploration around formal development in a proof environment. Roughly half of the course will be a guided tutorial of proof techniques using one or more theorem provers; in the remainder, students will apply this knowledge to existing systems. No prior experience with theorem provers or proof assistants is necessary, but familiarity with and aptitude for functional programming will be a huge bonus. Prerequisite: CSCI 1730 or equivalent; mathematical maturity.

CSCI 1950S. Logic for Hackers.
The course will focus on proving properties about systems and programs. We will study the distinction between programs and specifications, and check for whether the former obey the latter. We will work with tools that have extensive automation such as model constructors, model checkers, and proof assistants. Programs and projects will apply to real-world systems. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Preferred but not required: CSCI 0220 and CSCI 0510, or instructor’s permission.

CSCI 1950T. Computational Methods for Biology.
This course will introduce algorithms from machine learning and combinatorial optimization with a focus on their application to biological data. Topics will include problems in phylogenetic inference, population genetics, and biological interaction networks.

Independent study in various branches of Computer Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Important current topics in computer graphics. Course includes reading and discussing current research papers, multiple assignments and preliminary projects in which students implement recent papers, and a demanding final integrative project done in small groups. Prerequisite: CSCI 0320 or CSCI 0360, and CSCI 1230.

CSCI 2270. Topics in Database Management.
In-depth treatment of advanced issues in database management systems. Topics vary from year to year and may include distributed databases, mobile data management, data stream processing and web-based data management. Prerequisite: CSCI 1270.

CSCI 2310. Human Factors and User Interface Design.
Covers current research issues involving the implementation, evaluation and design of user interfaces, while also providing a basic background in the fundamentals of user interface evaluation, programming, tools, and techniques. A possible topic is programming and designing device-independent interfaces. Previous topics have included the development of pervasive internet-based interfaces and software visualization. Prerequisite: Consent of instructor.

CSCI 2330. Programming Environments.
Programming tools; control and data integration; software understanding and debugging; environments for parallel and distributed programming; reverse engineering; configuration management and version control and
debugging. Emphasis on current research areas. Prerequisite: consent of instructor.

CSCI 2340. Software Engineering. Topics in the design, specification, construction and validation of programs. Focus will be on tools to support each of these stages. Course will pay special attention to the concerns raised by the properties of modern software systems including distribution, security, component-based decomposition and implicit control. Recommended: CSCI 1900 or other upper-level systems coursework.

CSCI 2370. Interdisciplinary Scientific Visualization. The solution of scientific problems using computer graphics and visualization. Working in small multidisciplinary groups, students identify scientific problems, propose solutions involving computational modeling and visualization, design and implement the solutions, apply them to the problems, and evaluate their success. Examples include interactive software systems, immersive CAVE applications, or new applications of existing visualization methods. Prerequisites: all: programming experience; CS students: graphics experience; others: problem ideas. Instructor permission required.

CSCI 2410. Statistical Models in Natural-Language Understanding. Various topics in computer understanding of natural language, primarily from a statistical point of view. Topics include: hidden Markov models, word-tagging models, probabilistic context-free grammars, syntactic disambiguation, semantic word clustering, word-sense disambiguation, machine translation and lexical semantics. Prerequisite: CSCI 1410.

CSCI 2430. Topics in Machine Learning. Machine learning from the artificial intelligence perspective, with emphasis on empirical validation of learning algorithms. Different learning problems are considered, including concept learning, clustering, speed-up learning, and behavior learning. For each problem a variety of solutions are investigated, including those from symbolic AI, neural and genetic algorithms, and standard statistical methods. Prerequisite: CSCI 1410 or familiarity with basic logic and probability theory.

CSCI 2440. Game-Theoretic Artificial Intelligence. This course surveys recent developments in an emerging area known as game-theoretic artificial intelligence (AI), which incorporates fundamental principles of game theory into AI. Research in this area is motivated by game-theoretic applications, such as auction design and voting, as well as AI application areas, such as multiagent systems. Students will conduct theoretical, empirical, and experimental investigations, asking fundamental questions such as: can the behavior of computational learning agents converge to game-theoretic equilibria? Prerequisite: Consent of instructor.

CSCI 2500A. Advanced Algorithms. Typically, an algorithm solves one problem, whereas a well-designed data structure can help implement algorithms for a wide variety of problems. We will study the design, analysis and implementation of advanced data structures. Focus is on data structures that are fast, both theoretically and empirically. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2500B. Optimization Algorithms for Planar Graphs. Planar graphs arise in applications such as road map navigation and logistics, graph drawing and image processing. We will study graph algorithms and data structures that exploit planarity. Our focus will be on recent research results in optimization. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2510. Approximation Algorithms. Approximation Algorithms deal with NP-hard combinatorial optimization problems by efficiently constructing a suboptimal solution with some specified quality guarantees. We study techniques such as linear programming and semidefinite programming relaxations, and apply them to problems such as facility location, scheduling, bin packing, maximum satisfiability or vertex cover. Prerequisite - one of the following: CSCI 1510, 1550, 1810, 1950J, 1950L, any graduate-level course on algorithms (including 2500A, 2500B, 2580).

CSCI 2520. Computational Geometry. Algorithms and data structures for fundamental geometric problems in two and three dimensions. Topics include point location, range searching, convex hull, intersection, Voronoi diagrams, and graph drawing. Applications to computer graphics, circuit layout, information visualization, and computer-aided design are also discussed. Prerequisite: CSCI 1570 or instructor permission.

CSCI 2530. Design and Analysis of Communication Networks. A theory seminar focusing on algorithmic and combinatorial issues related to the design and analysis of communication networks for parallel and distributed systems. Topics include packet routing, circuit switching, distributed shared memory, fault tolerance, and more. Prerequisites: CSCI 1550, 1570, or equivalent.

CSCI 2531. Internet and Web Algorithms. This advanced graduate course/seminar focuses on the mathematical foundations of algorithms for handling large amounts of data over networks. We’ll read and discuss recent papers in information retrieval, search engines, link analysis, probabilistic modeling of the web and social networks, and more. Recommended: CSCI 1550 and CSCI 1570, or equivalent courses.

CSCI 2540. Advanced Probabilistic Methods in Computer Science. Advanced topics in applications of probabilistic methods in design and analysis of algorithms, in particular to randomized algorithms and probabilistic analysis of algorithms. Topics include the Markov chains Monte Carlo method, martingales, entropy as a measure for information and randomness, and more. Prerequisite: CSCI 1550. Recommended but not required: CSCI 1570.

CSCI 2550. Parallel Computation: Models, Algorithms, Limits. The theoretical foundations of parallel algorithms. Analysis of the most important models of parallel computation, such as directed-acyclic computation graphs, shared memory and networks, and standard data-exchange schemes (common address space and message-passing). Algorithmic techniques with numerous examples are cast mostly in the data-parallel framework. Finally, limitations to parallelizability (P-completeness) are analyzed. The content of the course is likely to change as technology evolves.

CSCI 2560. Advanced Complexity. Advanced topics in computational complexity, such as: the polynomial hierarchy, interactive proofs, pseudorandomness, derandomization, probabilistically checkable proofs.

CSCI 2570. Introduction to Nanocomputing. Nanoscale technologies employing materials whose smallest dimension is on the order of a few nanometers are expected to replace lithography in the design of chips. We give an introduction to computational nanotechnologies and explore problems presented by their stochastic nature. Nanotechnologies based on the use of DNA and semiconducting materials will be explored. Prerequisite: CSCI 0510.

CSCI 2580. Solving Hard Problems in Combinatorial Optimization: Theory and Systems. The theory of combinatorial optimization and how it is embodied in practical systems. Explores issues encountered in implementing such systems. Emphasizes the wide variety of techniques and methodologies available, including integer programming, local search, constraint programming, and approximation algorithms. Problems addressed may include: scheduling, coloring, traveling salesman tours, and resource allocation. Prerequisites: CSCI 0320 and basic knowledge of linear algebra.

CSCI 2590. Advanced Topics in Cryptology. Seminar-style course on advanced topics in cryptography. Example topics are zero-knowledge proofs, multi-party computation, extractors in cryptography, universal compositability, anonymous credentials and ecash, interplay of cryptography and game theory. May be repeated for credit. Prerequisite: CSCI 1510 or permission of the instructor.

CSCI 2730. Programming Language Theory. Theoretical models for the semantics of programming languages and the verification of programs. Topics include operational semantics, denotational semantics, type theory and static analyses. Recommended prerequisite: CSCI 1730. Instructor permission required.

CSCI 2750. Topics in Parallel and Distributed Computing. CSCI 2750 is a graduate seminar that will consider an advanced topic (to be determined) in distributed computing. May be repeated for credit.
CSCI 2950. Medical Bioinformatics.
Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required.

CSCI 2890. Comprehensive Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CSCI 2950C. Topics in Computational Biology.
This course will investigate active and emerging research areas in computational biology. Topics include cancer genomics; genome rearrangements and assembly; and protein and regulatory interaction networks. The course will be a mixture of lectures and student presentations of recent conference and journal papers.

CSCI 2950D. Sensor Data Management.
Sensor networks combine sensing, computing, actuation, and communication in a single infrastructure that allows us to observe and respond to phenomena in the physical and cyber world. The sensors range from tiny "smart dusts" to dime-sized RFID tags and large-scale weather sensors. This course will cover the state-of-the art in designing and building sensor networks, focusing on issues that revolve around data and resource management. No prerequisites.

CSCI 2950E. Stochastic Optimization.
This advanced graduate course/seminar will focus on optimization under uncertainty, or optimization problems where some of the constraints include random (stochastic) components. Most practical optimization problems are stochastic (subject to future market conditions, weather, faults, etc.), and there has been substantial research (both theoretical and experimental) in efficient solution for such problems. We'll read and discuss some of the recent works in this area.

CSCI 2950F. Implementing Web-Based Software Systems.
Explores widely-distributed systems that take advantage of resources throughout the Internet. The systems leverage their large size and geographic diversity to provide bandwidth scalability, rapid responses, fault-tolerance, high-availability and diverse data collection. Topics include overlay networks, peer-to-peer systems, content distribution networks, distributed file systems and wide-scale measurement systems.

CSCI 2950G. Large-Scale Networked Systems.
Many of the problems we are facing in the design of today's Internet-scale distributed systems are combinatorial optimization problems and many of the solutions are subtle. This course will cover the state-of-the art in combinatorial optimization and present a few of the key problems and solution techniques. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 2950H. Advanced Cryptography.
Explores recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 2950I. Computer Science, Algorithms and Economics.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

In this graduate seminar we will learn about models of human cognition and perception, and explore potential implications of the models on how computers and humans can interact effectively when performing scientific analyses. Participants will be responsible for reading assigned materials, taking turns guiding discussions of the readings, and preparing a final paper and presentation. It is recommended that participants have some background in at least one of the areas of study.

CSCI 2950K. Special Topics in Computational Linguistics.
Every year will cover a different topic in computational linguistics, from a statistical point of view, including parsing, machine translation, conference, summarization, etc. Prerequisites: CSCI 1460 or permission of the instructor.

CSCI 2950M. Computer Science, Algorithms and Economics.
Course investigates the interplay of economic theory and computer science. It is suitable for advanced senior undergraduates and for graduate students. We will study topics such as: algorithms for selfish routing; competitive combinatorial auctions; Multicast cost sharing and cooperative games; graphical models for games; and related topics. This course will be organized around the presentation of recent research papers. Prerequisite: CSCI 1570 or equivalent.

CSCI 2950N. Special Topics in Autonomous Robotics.
No description available.

CSCI 2950O. Topics in Brain-Computer Interfaces.
Introduces the mathematical and computational foundations of brain-computer interfaces. Statistical learning, Bayesian inference, dimensionality reduction, information theory, and other topics are presented in the context of brain interfaces based on neural implants and EEG recordings. Prerequisites: Basic knowledge of probability, statistics and linear algebra (e.g., CSCI 1550, APMA 1650, APMA 1690, or APMA 2640). Enrollment limited to 20 students.

CSCI 2950P. Special Topics in Machine Learning.
This seminar course explores current research topics in statistical machine learning. Focus varies by year, and may include Bayesian nonparametrics; models for spatial, temporal, or structured data; and variational or Monte Carlo approximations. Course meetings combine lectures with presentation and discussion of classical and contemporary research papers. Students will apply some this material to a project, ideally drawn from their own research interests.

CSCI 2950Q. Special Topics in Advanced Algorithms.
We will study an advanced topic in the design and analysis of algorithms. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2950S. Advanced Practical Combinatorial Algorithms.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 2950T. Topics in Distributed Databases and Systems.
This course explores data and resource management issues that arise in the design, implementation, and deployment of distributed computing systems by covering the state of the art in research and industry. Typical topics include cloud computing and sensor networks. Recommended: CSCI 0320 or equivalent.

CSCI 2950U. Special Topics on Networking and Distributed Systems.
Explores current research topics in networking, distributed and operating systems. Specific topics may include wireless and sensor networking, Internet-scale distributed systems, cloud computing, as well as the core problems, concepts, and techniques underlying these systems. The course has two components: reading and discussion of current and classical research papers, and a research project related to the topic but ideally drawn from students' own research interests. This is a graduate-level course, undergrads can join with the consent of the instructor.

CSCI 2950W. Online Algorithms.
Decisions must often be made before the entire data is available. Online algorithms solve problems in which commitments must be made as the data is arriving. Choosing which items to evict from a cache before knowing future requests, which advertisers to consider for displaying ads alongside the result of a search, or which most representative data to store when computing statistics about a huge stream of information. We will discuss the worst-case model, which hinges against the worst possible future data, and some stochastic and game-theoretic models.
CSCI 2950X. Topics in Programming Languages and Systems.
Examines contemporary research topics in software construction from
the perspectives of programming languages, software engineering and
computer-aided verification. The primary goals are to understand which
topics apply to which problems and to convert that theory into tools.
Topics include security, modularity, and new paradigms in software
composition. Prerequisite: CSCI 1730 or written permission of the
instructor.

CSCI 2950Y. Theorem Proving.
This course explores computer-assisted theorem proving with the Coq
Proof Assistant. The course will teach students to formally specify software
and model mathematical theories. We will then study techniques for
mechanically proving theorems about these Coq. Prerequisites: CSCI
1730 or CSCI 0170 and permission of the instructor.

CSCI 2950Z. Robot Learning and Autonomy.
This seminar course will cover current research topics related
to perceiving and acting in the real world. These topics will be
pursued through independent reading, class discussion, and project
implementations. Papers covered will be drawn from robotics, computer
vision, animation, machine learning, and neuroscience. Special emphasis
will be given to developing autonomous control from human performance.
No prerequisites.

CSCI 2951A. Robots for Education.
This seminar will explore the potential for robotics to engage future
generations of scientists and engineers, with a particular focus on
broadening participation in computing across society. Academic papers
describing existing models, systems, courses, and evaluation for teaching
robotics at undergraduate and secondary levels will be covered through
students presentations. A group project will be conducted to find viable
and accessible "off-the-shelf" technology solutions suited to teaching
robotics without requiring a technical background. Instructor permission
required.

CSCI 2951B. Data-Driven Vision and Graphics.
Investigates current research topics in image-based graphics and
vision. We will examine data sources, features, and algorithms useful
for understanding and manipulating visual data. We will pay special
attention to methods that harness large-scale or Internet-derived data.
Vision topics such as scene understanding and object detection will
be linked to graphics applications such as photo editing and image-
based rendering. These topics will be pursued through independent
reading, class discussion and presentations, and state-of-the-art projects.
Strong mathematical skills and previous imaging (vision or computational
photography) courses are essential.

CSCI 2951C. Autonomous Agents and Computational Market Design.
An important area of research in artificial intelligence is how to effectively
automate decision making in time-critical, information-rich environments.
Electronic markets are a prime example of such environments. In this
course students will create their own simulated electronic market as well
as autonomous agents that trade in their market simulation. Application
domains will include supply chain management, the Dutch flower auctions,
and ad auctions, such as those run by Google and Facebook. Enrollment
limited to 40 graduate students.

CSCI 2951E. Topics in Computer Systems Security.
This course explores advanced topics and highlights current research
in computer security from a systems perspective. Topics include
vulnerabilities and defenses for automotive, computing, medical, and
industrial control devices, intrusion detection, botnets, secure network
protocols, web spam, tracking of web users, JavaScript sandboxing,
attacks and defenses for web applications, and security and privacy
issues in cloud computing. Research papers and industry reports will
be presented and discussed. Also, hands-on experiments and system
demonstrations will be performed. CSCI 1660 or equivalent background
is essential. Enrollment limited to 12. Instructor permission required.

CSCI 2951F. Learning and Sequential Decision Making.
The course explores automated decision making from a computer-science
perspective. It examines efficient algorithms, where they exist, for single
agent and multiagent planning as well as approaches to learning near-
optimal decisions from experience. Topics will include Markov decision
processes, stochastic and repeated games, partially observable Markov
decision processes, and reinforcement learning. Of particular interest
will be issues of generalization, exploration, and representation. Each
student will be expected to present a published research paper and will
participate in a group programming project. Prerequisite: a graduate-level
computer science course and some exposure to reinforcement learning
from a previous computer-science class or seminar.

CSCI 2951K. Topics in Grounded Language for Robotics.
We will study the problem of endowing robots with the ability to interact
with humans using natural language. The course will cover foundational
material in artificial intelligence, computational linguistics, and robotics,
as well as a survey of recent conference and journal papers. A collaborative
final project will provide an opportunity to more deeply engage with the
material and provide a jumping-off point for future research. Familiarity
with computational linguistics or robotics is helpful. Background in
machine learning and artificial intelligence also be useful. We hope that
students with diverse backgrounds can learn from each other in this
multi-disciplinary research area. Prerequisite: CSCI 1420, 1460, 1480, or
1950F; or instructor permission.

CSCI 2955. The Design and Analysis of Trading Agents.
The Dutch Flower Auctions (DFA) clear over 100,000 auctions per day,
each lasting on average between 3 and 5 seconds! This semester,
we'll study the mechanism through which the DFA distribute 2/3 of
the world's flowers, focusing on both the sellers' and buyers' decision-making
processes. More generally, we'll research ways to automate and optimize
decision-making in time-critical, information-rich environments, like the
DFA. Undergraduate students require instructor permission, and should
have already completed CSCI 0190, or CSCI 0150 and CSCI 0160,
or CSCI 0170 and CSCI 0180.

CSCI 2956A. Design of Agents for Bidding in Sponsored Search
Auctions. This course investigates the new field of sponsored search auctions.
Although students will be exposed to the field from the point of view
of both the search engine and the advertiser, the course's focus is on
advertiser's bidding algorithms. The students will implement novel bidding
agents, and the course will culminate in a competition among the students' agents.
Undergraduate students who obtained permission from the
instructor or completed CSCI 0910, or CSCI 0150 and CSCI 0160,
or CSCI 0170 and CSCI 0180 can register for the course. CSCI 1410 is a co-
requirement.

CSCI 2956B. Multiplicative-Weights/Packing-Covering Method for
Approximating Linear and Semidefinite Programs.
We will study the method called, variously, multiplicative weights and
packing-covering. We will in particular investigate the use of this
method for finding approximately optimal solutions to linear programs
and semidefinite programs. Prerequisite: A graduate-level course on
algorithms. Enrollment limited to 10. Instructor permission required.

CSCI 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct
section number and CRN to use when registering for this course.

CSCI 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are
paying the registration fee to continue active enrollment while preparing a
thesis.

CSCI XLIST. Courses of Interest to Concentrators in Computer
Science.

Development Studies

Development Studies is an interdisciplinary concentration whose main
mission is to provide students with the knowledge, critical perspectives
and skills they need to reflexively engage with the issues and problems of
international development, especially as they relate to the Global South.
Drawing on a range of disciplines, from anthropology to economics, from
comparative literature to engineering, concentrators design their own
programs, combining courses that offer local and historical knowledge with
those that explore transnational dimensions of development. During the
senior year, all concentrators complete a capstone experience tailored to
their interests in some aspect of international development and for which they benefit from extensive faculty support.

For additional information, please visit the program’s website: http://www.watsoninstitute.org/ds/

Development Studies Concentration

Requirements

Development Studies examines the interaction of social, economic and political development in contemporary societies and is therefore, necessarily an interdisciplinary enterprise. Development Studies concentrators develop the skills and knowledge best suited to their chosen geographical area of interest, emphasizing what is historically and culturally distinctive about the region and how its development reflects general processes of socio-economic change. While the concentration produces graduates with expertise in the study of development, most concentrators combine their course work with first-hand experience in the developing world. Course selection should balance analytic training in at least three social science disciplines to achieve an interdisciplinary approach to these processes of change.

Requirements

Concentrators in Development Studies must complete a total of 11 courses based on the following general guidelines. Any course may be substituted by a similar course approved by the Deputy Director.

**CORE**

- DEVL 1000/1871D Seminar in Development Studies 4
- DEVL 1500 Methods in Development Research
- DEVL 1980 Thesis Writing in Development Studies
- ECON 0510 Development and the International Economy

**Disciplinary Courses**

The courses must focus on different regions. Substitutions approved by the Deputy Director.

- ANTH 1229 Democracy and Difference: Political Anthropology, Citizenship and Multiculturalism
- ANTH 1310 International Health: Anthropological Perspectives
- ANTH 1320 Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress
- ECON 1210 Intermediate Macroeconomics
- ECON 1500 Current Global Macroeconomic Challenges
- ECON 1540 International Trade
- ECON 1550 International Finance
- ECON 1560 Economic Growth
- ECON 1850 Theory of Economic Growth
- POLS 1240 Politics, Markets and States in Developing Countries
- POLS 1450 Development in Theory and Practice
- POLS 1460 International Political Economy
- SOC 0150 Economic Development and Social Change
- SOC 1600 Comparative Development
- SOC 1620 Globalization and Social Conflict

**Advanced Seminar**

An advanced senior seminar at the 1800-level or above, and related to development. If the course does not focus on the developing world, students may write a paper that expounds a linkage with development.

For example:

- HMAN 1970G International Perspectives on NGOs, Public Health, and Health Care Inequalities

**Elective Courses**

At least TWO of the three electives must focus on different regions of the developing world. Students should choose from the list of pre-approved electives, with substitutions approved by the Program Advisor.

For example:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AFRI 1020D</td>
<td>Race, Rights, Rebellion</td>
</tr>
<tr>
<td>ENVS 1355</td>
<td>Environmental Issues in Development Economics</td>
</tr>
<tr>
<td>HIST 1620</td>
<td>Colonial Latin America</td>
</tr>
</tbody>
</table>

**Language**

Advanced competency (600 level) or above.

**Senior Capstone**

- DEVL 1990 Senior Thesis Preparation 1

Students may complete a conventional senior thesis; a group project (would not qualify for honors); or a multimedia project. Must incorporate language skills.

**Total Credits**

11

Since study abroad is a potentially important part of the concentration, the possibility of spending part or all of the junior year in a developing world country should be discussed with concentration advisors and the Office of International Programs at the earliest possible time.

**Courses**

**DEVL 1000. Seminar in Development Studies.**

Provides an interdisciplinary introduction to Development Studies. Students will read classic and contemporary texts that present development issues and theories from the perspectives of anthropology, economics, history, political science, and sociology. Efforts to connect theoretical debates to understanding contemporary problems will be encouraged. Reserved for sophomore and junior Development Studies concentrators. If not a DS concentrator, please contact the instructor to obtain an override.

**DEVL 1500. Methods in Development Research.**

An introduction to the various techniques of research in Development Studies, with a focus on qualitative and field methods. Open to all Development Studies concentrators.

**DEVL 1600. Tools for Development: From Theory to Practice.**

Course gives students a platform to define their roles in the field of development, through hands-on skills building, case studies, and conversations with development practitioners and guest lecturers. This course will prepare students to volunteer for small, grassroots development organizations abroad or in the U.S. in a summer experience following the course. Throughout the semester, students will prepare for their summer experiences by working with their host organizations to design their role descriptions, planning their summer travel and living arrangements, gaining appropriate cultural competency, etc. Prerequisite: DEVL 1000 or SOC 1871D (may be taken concurrently). Enrollment limited to 15 Development Studies concentrators. Instructor permission required.

**DEVL 1801. Participatory Development.**

This course Development Studies seminar will provide students with the opportunity to think critically about power relations within various contexts of development; more specifically, in relation to the condition of how development projects work in practice. The course will take a multilevel approach to the analysis of developmental interactions. We’ll look at the power relations between the global south and the global north. We will examine crucial issues having to do with local communities, gender, the state/citizen paradigm and interaction between NGOs and communities. We will connect PD to other concepts, such as empowerment, civic engagement and inequality. WRIT

**DEVL 1980. Thesis Writing in Development Studies.**

An integrative seminar designed for concentrators working on senior theses. Others with comparable backgrounds may enroll with written permission. Begins with a review of theoretical and methodological literature on development studies. Written and oral presentations of thesis
research will be the central focus of the latter part of the course. Reserved for Development Studies seniors.

**DEVL 1990. Senior Thesis Preparation.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Reserved for Development Studies seniors.

**DEVL 2000. Theory and Research in Development I.**
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

**DEVL 2010. Theory and Research in Development II.**
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

**DEVL 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**Lefschetz Center for Dynamical Systems**

The Lefschetz Center for Dynamical Systems was established by Solomon Lefschetz and J. P. LaSalle at Brown University in the fall of 1964 to carry out a program of basic research and advanced study in the theory and applications of differential equations, dynamical systems, stochastic processes and systems theory. Within its areas, it is one of the leading centers in the world. Areas of application include theoretical mechanics, oceanography, nonlinear optics, plasma physics, stochastic control, and communication theory. Permanent members of the center serve on faculties of the Division of Applied Mathematics, the Division of Engineering, and the Department of Mathematics.

The center attracts distinguished visiting scientists and promising young scientists from the United States and abroad, and has an extensive postdoctoral program.

Members of the center have been supported in their research efforts by the Air Force Office of Scientific Research, the United States Army Research Office, the Office of Naval Research, the National Science Foundation and NASA. The center was dedicated to the memory of Solomon Lefschetz in August, 1974.

For additional information please visit the Center’s website at: http://www.dam.brown.edu/lcds/.

---

**Early Cultures**

The Program in Early Cultures (until recently called the Program in Ancient Studies) was founded in the late 1970s, when faculty in various academic units sought new ways to foster collaboration and promote the study of ancient civilizations among Brown’s students. It is a Program of rich collaboration, critical exploration, and truly interdisciplinary scholarship that seeks to bring together all those at Brown (faculty, graduate students, undergraduates, and staff) who are interested in the cultures, religions, and histories of ancient civilizations. Geographically, the “ancient world” represented at Brown comprises early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds as well as the Pre-Columbian Mesoamerican civilizations.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Early_Cultures/

---

**Early Cultures Concentration Requirements**

The Program in Early Cultures is an interdisciplinary concentration that integrates the cultures, religions, and histories of ancient civilizations. Geographically, the “ancient world” includes early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds, and the Pre-Columbian Mesoamerican civilizations. Students in Early Cultures gain in-depth knowledge of the history, religions, languages, and literatures of two or more ancient civilizations. In consultation with a concentration advisor, students design their own areas of study. Examples of possible topics include: cultural contacts between Greece and Egypt/ West Asia; animal sacrifice in Greece and Israel; comparative legal studies: Israel, Hatti, and Mesopotamia; gender roles in Rome and Egypt; Wisdom literature in Egypt, Israel, and Mesopotamia; and the historiography of the exact sciences in India and Greece.

Faculty from a variety of academic units (Anthropology, Classics, Comparative Literature, Egyptology, History, History of Art and Architecture, the Joukowsky Institute for Archaeology and the Ancient World, Judaic Studies, Philosophy, Religious Studies) offer courses relevant to Early Cultures.

**Concentration patterns:**

1. Ancient History (standard and honors)
2. Ancient Religions (standard and honors)
3. Languages and Literatures of Greece, Rome, North Africa, pre-Islamic West and South Asia (honors only)

**General Requirements**

Each nonhonors concentrator will choose to focus on either ancient history or ancient religions and will complete the Concentrators Seminar (ERLY 1000) in both the junior and the senior years, and eight other courses, four in each of two civilizations, or eight in a variety of civilizations.

**Honors Requirements:**

1. Ancient History or Ancient Religions (total of up to 12 courses)
   a. The Concentrators Seminar (ERLY 1000) in both the junior and senior years
   b. Two courses on the history or religions of two civilizations (four courses)
   c. Two courses in one ancient language
   d. Two related courses
   e. The honors thesis (one or two courses)

2. a. Languages and Literatures of Greece, Rome, North Africa, pre-Islamic West and South Asia (total of up to 12 courses)
   i. The Concentrators’ Seminar (two courses)
   ii. Two 1000-level courses requiring knowledge of Greek or Latin; and two courses requiring knowledge of Egyptian, Hebrew, Aramaic, Akkadian, Sanskrit, or Phoenician (Four courses: two of each of two languages)
   iii. Two courses in the literature or culture associated with each of the two languages (For one of these languages, the two courses must be at the advanced level)
   iv. The honors thesis (one or two courses)
   b. Languages and Literatures of North Africa and pre-Islamic West, South, or East Asia (total of up to 12 courses)
      i. The Concentrator’s Seminar (two courses)
      ii. Two courses requiring knowledge of two different North African, West or South Asian languages: Egyptian, Hebrew, Aramaic, Akkadian, Phoenician, Sanskrit or...
Interested students must register for AWAS 1700.

ERLY 1700. Astronomy, Divination and Politics in the Ancient World

Interested students must register for EGYT 1420.

ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420)

Interested students must register for EGYT 1410.

and "animal" and challenge the presumed superiority of the "human." Disciplines (archaeology, religious studies, history, philosophy, art, and literature), we will investigate the problematic boundary between "man" and "animal" and challenge the presumed superiority of the "human". WRIT LILE

ERLY 1410. Ancient Egyptian Literature (EGYT 1410).

Interested students must register for EGYT 1410.

ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420).

Interested students must register for EGYT 1420.

ERLY 1500. Ancient Babylonian Magic and Medicine (AWAS 1500).

Interested students must register for AWAS 1500.

ERLY 1700. Astronomy, Divination and Politics in the Ancient World (AWAS 1700).

Interested students must register for AWAS 1700.

Courses

Interested students must register for AWAS 0300.

ERLY 0680. Judaism, Christianity, and the Bible (JUDS 0680).

Interested students must register for JUDS 0680.

ERLY 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).

Interested students must register for CLAS 0990.

ERLY 1000A. Writing History in the Ancient World.

The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history, investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations. Instructor permission required.

ERLY 1000B. Geography, Ethnography, and Perceptions of the World in Antiquity.

Curious about the shape and limits of the earth and the variety of cultures, ancient Greeks and Romans explored and described the world, drew maps, and interpreted the customs of others in fascinating ways. We will discuss relevant texts (Homer, Herodotus, Strabo, Tacitus, etc., in translation) and compare the Graeco-Roman world with that of other ancient civilizations (China, Mesopotamia, Aztecs).

ERLY 1000C. Epic and History in the Ancient and Medieval Worlds.

This seminar will focus on the question of preservation, transformation, and distortion of historical memory in epic poetry from various parts of the ancient (Mesopotamian, Hittite, Greek, and Roman) and medieval (German, French, Hispanic, and Slavic) worlds. Additional issues to be discussed include orality and literacy, cultural memory, and the social function of poetry in changing conditions. Texts in translation.

ERLY 1000D. Highways and Byways in Antiquity.

No description available.

ERLY 1000E. The Gift in Antiquity (RELS 1880A).

Interested students must register for RELS 1880A.

ERLY 1120G. The Idea of Self (CLAS 1120G).

Interested students must register for CLAS 1120G.

From the blood-soaked amphitheaters of the Roman Empire to tattooing and other forms of body modification, this course will explore how people, ancient and modern, view animals and what looking at animals reveals about what it means to be human. Examining evidence from a variety of disciplines (archaeology, religious studies, history, philosophy, art, and literature), we will investigate the problematic boundary between "man" and "animal" and challenge the presumed superiority of the "human". WRIT LILE

ERLY 1410. Ancient Egyptian Literature (EGYT 1410).

Interested students must register for EGYT 1410.

ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420).

Interested students must register for GREK 2110F.

East Asian Studies

Chair

Janine T. Anderson Sawada

The 21st century has turned to Asia as a center of international trade, culture, and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vitally important corner of the world, whose civilizations reach back several millennia and whose cultural and economic ties extend throughout the globe. A vibrant community of teachers and undergraduates who work closely together in the spirit of free inquiry, the Department of East Asian Studies embodies Brown’s unique mission “to serve the community, the nation and the world.”

The Department offers several tiers of instruction in Chinese, Japanese, and Korean, with courses designed to accommodate students ranging from those who have never taken a class in the language before, to those hoping to hone their abilities at the highest levels. East Asian Studies also offers Brown students the opportunity to explore the visual, textual and religious cultures of East Asia through introductory and advanced courses on literature, film, pilgrimage and translation, among others.

For additional information, please visit the department’s website: http://www.brown.edu/academics/east-asian-studies/

East Asian Studies Concentration Requirements

East Asian Studies is a multidisciplinary concentration designed for students wishing to attain reasonable fluency in Chinese, Japanese, or Korean with specialized exposure to selected East Asian subjects. It serves students with two types of interests: those who aim to pursue active professional careers related to the East Asian region; and those who want to pursue graduate study in the humanities or social sciences with particular emphasis on China, Japan or Korea. Students in East Asian Studies will gain language proficiency and familiarity with East Asia through advanced courses in a variety of disciplines. Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters. The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean.

The Language Requirement

The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean. For the purposes of the concentration, proficiency is determined to be consistent with successful completion of the Department’s third-year course sequence in Chinese, Japanese, or Korean (0500-0600), or its equivalent. Native speakers of these languages may, for example, demonstrate competency such that language courses may be unnecessary. Department language instructors may also determine that course work completed at one of the language-intensive study abroad programs attended by our undergraduates is comparable to courses offered at Brown.

Note that we do not equate completion of third-year Chinese, Japanese, or Korean with fluency in these languages. Rather, we believe that students who have demonstrated the skills associated with third-year Chinese, Japanese, or Korean have acquired a foundational understanding of the
languages’ grammar, vocabularies, and conversational patterns, such that they are able to make themselves understood in everyday situations, and to understand both spoken and written communication. For the purposes of the concentration, language courses through the third-year are treated as an accompanying requirement.

**Language Prerequisites (demonstrating proficiency through the third-year or 0600 level in one of the three languages below)**

**Chinese**

**Electives**

The concentration requires that students complete a total of eight electives tied to their course of study, which may be defined in linguistic, chronological, thematic, or cultural terms. Students should choose their courses with the following requirements in mind.

- At least three of the eight electives must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement.
- At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration’s language requirement. A concentrator studying Korean, for example, would choose at least one course that focuses on China, Taiwan, or Japan.
- At least one of the eight elective courses must be an advanced research seminar, taken in the senior year.

As is common for interdisciplinary concentrations, a wide range of courses, including many taught by faculty in other departments, may be counted toward the concentration. These include courses offered by East Asian Studies faculty, faculty with courtesy appointments in the Department, and courses with a significant focus on East Asia offered in such disciplines as Archeology, Anthropology, Economics, International Relations, and others.

1. China-centric
2. Japan-centric
3. Korea-centric
4. East Asia-centric

Advanced Research Seminars

At least one of the eight elective courses must be an advanced research seminar, taken in the senior year. The research seminar will normally provide students with the opportunity to develop a project or paper focusing on one or more of their areas of inquiry within the concentration. Students are strongly encouraged to find ways to incorporate the use of Chinese, Japanese or Korean language materials in their research and learning in these courses. Courses falling into this category include the East Asian Studies 1950 series as well as designated seminars offered by faculty in such departments as History, Religious Studies, and Comparative Literature among others. The Department will provide a list of pre-approved advanced seminars every semester. Students wishing to add courses to that list must submit their requests in writing to the Director of Undergraduate Studies at the start of the semester.

East 1950Q: Early Chinese Poetry 1
East 1950U: South Korean Cinema: From Golden Age to Korean Wave 1
East 1950X: Queer Japan: Culture, History and Sexuality 1

Double Concentrations

Students who are interested in developing a double concentration, including East Asian Studies as one of the two concentrations, should bear in mind that normally no more than two courses may be double-counted toward satisfying the course requirements of either of the two concentration programs involved.

Study Abroad

Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters during their undergraduate years. Course credits earned abroad are generally transferable to Brown. However, a maximum of three courses taken abroad, of genuine intellectual substance and significantly related to East Asian Studies, may be considered for concentration credit.

Summary of requirements:

- Language study through the level of 0600 or the equivalent of Chinese, Japanese, or Korean
- Eight elective courses
  - At least three of the eight must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement
  - At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration’s language requirement. A concentrator studying Korean, for example, would choose at least one course that focuses on China, Taiwan, or Japan.
  - At least one of the eight must be an advanced research seminar, taken in the senior year.
- East 1930 - East 1940 (Senior Thesis seminar) for Honors candidates only

Courses

Chinese

Chin 0100. Basic Chinese.
A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of course work in Chin 0200 covers the entire year and is recorded as the final grade for both semesters.

Chin 0150. Advanced Beginning Chinese.
A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in Chin 0250 covers the entire year and is recorded as the final grade for both semesters.

Chin 0200. Basic Chinese.
A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the second half of a year-long course. Students must have taken Chin 0100 to receive credit for this course. The final grade for this course will become the final grade for Chin 0100. If Chin 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

Chin 0250. Advanced Beginning Chinese.
A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the second half of a year-long course. Students must have taken Chin 0150 to receive credit for this course. The final grade for this course will become the final grade for Chin 0150. If Chin 0150 was taken for credit then this course must be taken for credit; if taken as an
audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

CHIN 0300. Intermediate Chinese.
An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

CHIN 0400. Intermediate Chinese.
An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0300 or permission of instructor.

CHIN 0500. Advanced Modern Chinese I.
An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0250 or CHIN 0400 or permission of instructor.

CHIN 0600. Advanced Modern Chinese I.
An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0500 or permission of instructor.

CHIN 0700. Advanced Modern Chinese II.
This course is designed to enhance the Chinese proficiency of those who have taken Advanced Modern Chinese I (CHIN 0600) or the equivalent. All four language skills are emphasized through selected authentic materials. At the end of the year, students should be able to express their ideas with sophistication and nuance. Drills on complex sentence patterns will be conducted when necessary. Prerequisite: CHIN 0600 or permission of instructor.

CHIN 0800. Advanced Modern Chinese II.
See Advanced Modern Chinese II (CHIN 0700) for course description. Prerequisite: CHIN 0700 or permission of instructor.

CHIN 0910A. Academic Chinese I.
This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Through reading and discussing literature, newspaper and magazine articles, and academic writings, students will gain a better understanding of traditional and modern China. Prerequisite: CHIN 0600 or permission of the instructor.

CHIN 0910B. Introduction to Classical Chinese.
A course aiming to provide the basics of reading Classical Chinese, its grammar, syntax, vocabulary, and word usage. As much as possible, we will use modern Chinese to explicate and discuss classical texts. Readings are original passages from texts dating from the Eastern Zhou to Former Han, 770 BCE to 25 AD, that introduce students to the cultural world of early China. Prerequisite: CHIN 0600 or permission of the instructor.

CHIN 0910C. Introduction to Modern Chinese Prose.
Students will pursue their ability to appreciate and use various Chinese writing styles by reading and analyzing modern Chinese prose classics. Classes include lecture, discussion and group or individual presentations. By the end of the semester, students will be familiar with the development of modern Chinese prose, understand the language and meaning of each text, be comfortable with different writing styles and techniques, and have a deeper understanding of Chinese thought, society, and culture via the writers and their masterpieces. Conducted in Mandarin Chinese; designed for students with advanced language skills. Prerequisites: CHIN 0800 or the equivalent.

CHIN 0920A. Advanced Reading and Writing in Chinese.
This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Masterpieces by statesmen, economists, historians, scientists, literary critics, and sociologists will be analyzed and discussed. Focus will be on the training of both analytical ability and writing skills. Prerequisite: CHIN 0800 or permission of the instructor.

CHIN 0920B. Classical Chinese.
This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century CE. Prerequisite: CHIN 0910B. Instructor permission required.

In order to develop advanced reading proficiency and formal oral and writing communication skills, students will listen to and read current news reports and commentaries from various Chinese media sources, such as TV broadcasts, newspapers, magazines, and websites. Through reading and discussion, students will gain a better understanding of a wide range of current issues in a rapidly changing China, including: economics, politics, education, and popular culture. General knowledge of Chinese newspapers, Chinese journalistic writing styles and basic vocabulary and grammatical structures used in the press will also be introduced throughout the course. Class format varies from lecture, discussion, and debate, to interviews and group or individual presentations. Prerequisites: CHIN0800 or the equivalent. Enrollment limited to 18.

CHIN 0920D. Business Chinese.
Business Chinese focuses on practical language skills that are most useful in business interactions in Chinese-speaking communities. Classroom activities are largely based on authentic documents and correspondence as well as a textbook. Through intensive practice in the listening, speaking, reading and writing of the Chinese language for business purposes, this course aims at enhancing students' linguistic knowledge in a business context. Classes are conducted in Chinese. Prerequisite: CHIN 0600 or instructor permission. Enrollment limited to 18.

CHIN 1040. Modern Chinese Literature.
Introduces students to the most representative writers in 20th century China. Emphasizes textual and historical analyses. Major issues include Westernization, nationalism, revolution, class, gender, and literary innovations. Designed primarily as a literature course, rather than language class, and conducted entirely in Mandarin Chinese. Prerequisite: CHIN 0800. Instructor permission required.

CHIN 1910. Independent Study.
Reading materials for research in Chinese. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CHIN 2450. Exchange Scholar Program.

East Asian Studies

Interested students must register for RELS 0040.

EAST 0100. Introduction to Buddhism (RELS 0100).
Interested students must register for RELS 0100.

Interested students must register for ARCH 0160.

This course is an introduction to Japanese culture and aesthetics as represented in pre-modern literature, drama, visual arts, tea practices, and martial arts. Recurring themes include Japanese attitudes toward the natural world; religious elements in traditional conceptions of beauty; and the function of ritual and mindfulness in artistic cultivation. The course is designed for students who have no previous exposure to Japanese studies at the college level; no prerequisites.

Interested students must register for RELS 0190.

EAST 0290E. Engaged Buddhism (RELS 0290E).
Interested students must register for RELS 0290E.
EAST 0410. Introduction to East Asian Civilization: China (HIST 0410). Interested students must register for HIST 0410.

EAST 0420. Introduction to East Asian Civilization: Japan (HIST 0420). Interested students must register for HIST 0420.

EAST 0610A. The Far Side of the Old World: Perspectives on Chinese Culture (COLT 0610A). Interested students must register for COLT 0610A.

EAST 0710U. Leaves of Words: A Survey of Japanese Literature (COLT 0710U). Interested students must register for COLT 0710U.

EAST 0910D. Two Virgins in the Attic: Advanced Japanese Readings in Canonical and Popular Literature (JAPN0910D). Interested students must register for JAPN 0910D.

EAST 0950A. Turning Japanese: Constructing Nation, Race and Culture in Modern Japan. This first year seminar focuses on Japan’s experiences with historical processes and concepts which have transformed the modern world. These include the creation of the nation as the fundamental structure for social and political organization, as well as the evolution and implications of beliefs and practices associated with race, culture and tradition. Participants will work with primary sources and scholarly analysis from diverse disciplinary perspectives. Enrollment limited to 20 first year students. FYS WRIT

EAST 0950B. The Floating World. An exploration of selected literary, artistic, and religious works with an eye to understanding Japanese culture and thought of the early modern period (1600-1868). Materials include merchant tracts, samurai codes, Buddhist sermons, Confucian disquisitions, woodblock prints, drama, and fiction. No prerequisites. Enrollment limited to 20 first year students. FYS

EAST 0950C. Reading China: Texts and Contexts. An introduction to Chinese lit., focusing on its translation and circulation outside of China from the 17th c. to the present. A variety of texts are examined, considering the various ways translation shapes Western conceptions of China. Begins by discussing how Chinese lit. has been construed as particularly difficult to translate, explores ways in which the translation and circulation of early Chinese classics was animated by interests in ancient Chinese wisdom, and considers the recent emergence of a global notion of Chinese literature and culture. Concludes by comparing histories: translations of Chinese drama into European languages and their adaptation within China. Enrollment limited to 20 first year students. FYS

EAST 0971C. China in the Literature of Travel (HIST 0971C). Interested students must register for HIST 0971C.

EAST 0980A. Taiwan: Crossroads of World History (HIST 0980A). Interested students must register for HIST 0980A.

EAST 1010. From Basho to Banana: Four Centuries of Japanese Literature. This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them—Edo merchant culture, modernism, the avant-garde, mass culture and postmodernism, among others. Writers covered will include Ibara Saikaku, Jippensha Ikuu, Higuchi Ichiyo, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites.

EAST 1012. Expanding the Canon: A Survey of 20th Century Japanese Literature. An introduction to major and minor works of Japanese literature produced during the Japanese Empire as well as in post-WWII Japan. Covered writers include canonical novelists such as Tanizaki Junichiro, Kawabata Yasunari, and Oe Kenzaburo, as well as writers lesser known outside of Japan today, including women, queers, revolutionaries and colonial/ resident Koreans. DVPS LILE

EAST 1050. The Chinese Novel. The purpose of this course is to help us see how the Chinese novel took shape from popular sources, such as storytelling and drama, how the novel drew on history as well as legend, and how its authors and editors express a distinct world view. The class will cover the “masterworks” of the Chinese novel. Through intensive reading, students can explore notions of the hero and heroism, moral action and, more broadly, history and literature from a comparative perspective. All readings are in English translation. Limited to 20 freshmen and sophomores, or by instructor permission.

EAST 1070. China Modern: An Introduction to the Literature of Twentieth-Century China. A general introduction to modern and contemporary Chinese literature from the May Fourth Movement to contemporary Taiwan and the People’s Republic of China. Emphasizes reading of literary works in relation to topics such as cultural tradition, modernity, nationalism, revolution, class, gender, region, cultural commodification, and literary innovations. Readings in English. No previous knowledge of Chinese required.

EAST 1100. Korean Culture and Film. This course aims to introduce and explore various aspects of Korean history, culture and society. Students are expected to develop a comprehensive understanding of Korean culture by examining contemporary films that pertain to issues such as national identity, history, international relations, religion, Korean life style, and family life. Enrollment limited to 20.

EAST 1120K. Skeptical Traditions East and West (CLAS 1120K). Interested students must register for CLAS 1120K.

EAST 1110. Women’s Literature in Japan and Korea. This course focuses on Japanese and Korean women’s literature from the modern period, giving particular attention to the historical issues and the narrative strategies that play out in celebrated works of women’s fiction. The goal of the class is to deepen our understanding of the universal and particular aspects of women’s writing in Japan and Korea and at the same time to learn an idiom with which to talk about literary form. Previous coursework in East Asian Studies or Literary Studies is suggested but not required. Instructor permission required.

EAST 1200. Pop, Political and Patrician: Culture in Japan and the Koreas. This course introduces students to the modern cultures of Japan and Korea through an examination of events, artifacts, and cultural practices. The over-arching goal of the class is two-fold: to create an alternative narrative to the dominant Orientalized vision of East Asian culture and to deepen our knowledge of the overlapping cultural histories of Japan and Korea. With a broad understanding of culture as a general process of artistic and intellectual development, as a body of material artifacts, and as a social practice of ordinary life, we shall focus our attention on the implications of studying culture in relation to popular media and political activism in particular. Topics covered will include: colonial fiction, the recreation of tradition, art and atrocity, the proletarian arts, postwar children’s culture, the globalisation of popular music, myth in the DPRK, shojō print culture, and East Asian activism.

EAST 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context (MCM 1202E). Interested students must register for MCM 1202E.

EAST 1270. China Through the Lens: History, Cinema, and Critical Discourse. This is a critical introduction to the history of mainland Chinese film. It focuses on three dimensions of cinematic practice: the historical context of film productions, the specific context/form of each film, and the critical reception of Chinese films in film studies. Important themes such as nation, visual modernity, cinematic narrative, and commercialism will be studied across the three dimensions.

EAST 1370. Performances in the Asias (TAPS 1270). Interested students must register for TAPS 1270.

EAST 1380. Peasant Rebellion and Popular Religion in China (HIST 1380). Interested students must register for HIST 1380.
EAST 1400. The Floating World: Early Modern Japanese Culture. This course treats major trends in Japanese thought and culture of the Tokugawa period (1600-1868), including debates among Confucian scholars; merchant culture; samurai ethics; the popularization of Buddhism; and the rise of nativism in the late period. Emphasis is on reading and analysis of primary texts in translation. Required: a course in East Asian culture or religion. Recommended but not required: RELS 0120. Enrollment limited to 20.

EAST 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan (COLT 1410N). Interested students must register for COLT 1410N.

EAST 1415A. Classical Daoist Thought (RELS 1415A). Interested students must register for RELS 1415A.

EAST 1420. The Confucian Mind. This course explores the Neo-Confucian tradition, a pervasive influence in the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.

EAST 1430. Classics of East Asian Buddhism (RELS 1430). Interested students must register for RELS 1430.

EAST 1430C. Classical Japanese Poetry (COLT 1430C). Interested students must register for COLT 1430C.

EAST 1430T. Leaves of Words: Japanese Poetry and Poetics (COLT 1430T). Interested students must register for COLT 1430T.

EAST 1510A. China's Late Empires (HIST 1510A). Interested students must register for HIST 1510A.

EAST 1520B. Twentieth Century China (HIST 1520B). Interested students must register for HIST 1520B.

EAST 1530. Modern Korea (HIST 1530). Interested students must register for HIST 1530.

EAST 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540). Interested students must register for ANTH 1540.

EAST 1811L. Travel and Tourism through the Ages (COLT 1811L). Interested students must register for COLT 1811L.

EAST 1880A. Lao Tzu and Huai-nan Tzu. This seminar will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the Huai-nan Tzu and will discuss the historical and philosophical origins of Lao Tzu's Tao te ching, heretofore acknowledged as the foundational text of the Taoist tradition.

EAST 1880C. Zen Meditation in China, Korea, and Japan. An intensive study of the origin and development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Both kôan and silent illumination styles will be studied in depth. Weekly seminars will study representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students MUST register for the lecture section and a lab. Prerequisites: RELS 0100, RELS 0500, UNIV 0540; or instructor’s permission.

EAST 1880D. Early Daoist Syncretism: Zhuang Zi and Huainan Zi. The final phase of the classical Daoist tradition has been called "syncretist" by Graham, "Huang-Lao" by Lin. It is the version of Daoism carried into the Han dynasty and the one that transmitted the tradition's earlier works. Casting a broad net we will examine a variety of works from this critical phase including the "Techniques of the Mind" texts in the Guanzi collection, the so-called "Huang-Lao" silk manuscripts from the Han tomb at Mawangdui, certain chapters of the Lushi chunqin, and selections from the Zhuangzi and Huainanzi. We will examine the ways in which cosmology, self-cultivation, and political thought coalesce in these works.

EAST 1910. Independent Study. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1930. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1940. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1950B. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives. This seminar course is designed to critically re-evaluate (re)presentations of Chinese women, gender, and feminism in historical, literary, and academic discourses. It examines a diverse body of texts produced through different historical periods and in different geopolitical locations. It emphasizes gender as both a historical construct(s) among competing discourses and as a material process of individual embodiment and disembodiment. The goal of the course is to help advanced students understand Chinese history from a distinctly gendered perspective, to recognize women's roles in history and writing, and to develop a reflective, cross-cultural approach to gender, politics, and the self.

EAST 1950D. Crime, Justice and Punishment in Modern Japan. This seminar explores the practices and ideologies associated with the pursuit of justice, state-sanctioned punishment for wrongdoing, and social order in modern Japan (late 19th century to the present). In order to bring these practices and ideologies to light, we will examine precedent-setting criminal and civil trials within their historical contexts, and draw as well on both popular culture (film and fiction) and the rich scholarship on law and legal history in Japan. The course is intended for advanced undergraduates comfortable with the seminar format and workload. There are no specific prerequisites for admission to the seminar, but all things being equal, preference will be given to students with a background in the study of Japan and/or Japanese history. Enrollment limited to 20. Instructor permission required.

EAST 1950F. The Karma of Words. This course is an opportunity for students to further their understanding of East Asian Buddhist attitudes and values by investigating characteristic themes in literature as a whole, rather than by studying formal scriptures and doctrinal tracts. Participants will explore tensions between the religious and poetic impulses and learn to recognize Buddhist symbols in Chinese and Japanese poetry, fiction and plays. Recommended: a course in Asian religions. WRIT

EAST 1950G. Market Economy, Popular Culture, and Mass Media in Contemporary China. Course focuses on mainland Chinese cultural and media production since the mid 1980's, when China began transforming itself culturally and economically into a capitalist society with socialist characteristics. Traditional values, socialist legacy, commercial forces, and globalization have all played significant roles in the ongoing transformation. The goal of the course is to examine the complex interactions among diverse historical forces in a rapidly changing China. Course taught in Mandarin Chinese.

EAST 1950H. Japanese Short Fiction, Film and Anime: Reading and Translation. In this seminar/workshop students will read and discuss a broad range of narrative arts from the modern period, as well as practice the art of
translating them in dialogue with canonical works of translation theory. Pre-requisites: JAPN 0600 or equivalent. Instructor permission required.

EAST 1950I. Revolution and Culture, East Asia and Beyond. This seminar investigates cultural practices enacted with the aim of social change. Topics include the Soviet avant-garde, race and the American cultural front, gender and proletarian literature in Japan and colonial Korea, as well as issues of propaganda and struggle in the DPRK and China. Instructor permission required.

EAST 1950J. The Chinese Story, Its Authors and Readers. A study of the Chinese story in its social and historical context. The seminar will survey the broad story stereotypes and consider their earlier sources in the classical tale, storytelling, drama, and ritual. All readings are in English translation.

EAST 1950K. Losing Yourself in Love in Pre-Modern Chinese Poetry, Fiction and Drama. A seminar focused on larger-than-life loves in Chinese drama, fiction, and poetry. The course will explore how passion, feeling, and subjectivity was increasingly viewed as essential to human nature and society from the 15th century onward.

EAST 1950N. The Love Letter, Fiction and Desire. A study of the art of the love letter in China of the 16th to 18th centuries. The circulation of letter-writing manuals fueled the rise of letter fiction in China, as it did in Europe in the same period. The seminar will explore how descriptive writing for writing letter, an element of the plot, and an end in itself, in comparative and theoretical perspectives. All readings are in English. Enrollment limited to 20.

EAST 1950O. The Art of Dissent. This seminar investigates the relationship between activism and art in early modern and 20th century Japan and Korea. Historical topics to be discussed in relation to works of fiction, biography, poetry, film and graphic art include the Freedom and People’s Rights Movement, Japanese anarchism, pre-WWI communism, feminism, the Kwangju Uprising and the Minjung Munhak Movement.

EAST 1950P. Attachement to Objects in Chinese Literature. A seminar investigating interactions between objects and literary composition in China of the 12th to 16th century, exploring 3 core issues: 1st, what do writers about objects reveal about notions of literary art and artifice? 2nd, in what ways are material artifacts endowed with aesthetic and personal meaning? 3rd, what literary and extra-literary factors shaped exchanges of poetry and gift-giving as linked forms of social intercourse? Readings in English translation. Instructor permission required.

EAST 1950Q. Early Chinese Poetry. A survey of the evolution of major forms of Chinese lyric poetry beginning with the Shijing (Book of Songs), the breakthrough to 5-character verse in the Han Dynasty, landscape (shanshui) and field and garden (tianyuan) poetry of the 6 Dynasties, and the flowering of the shi form during the Tang Dynasty. Readings will be in Chinese, discussions in English. Previous study of classical Chinese or permission of the instructor required.

EAST 1950S. The History, Philosophy, and Practice of Rinzaï Zen Buddhism. Follows origins of Chan Buddhism in China from the legend of Bodhidharma through the Five Houses of Chan and its great flourishing during the Song dynasty to its arrival and developments in Japan and eventual transplanting to the West. Scope includes Daöist foundations, the Buddha-Daöist essays of Seng Zhao, Bodhidharma, the East Mountain Chan of Daoxin and Hongren, Huineng and Shenhui, Huangbo, Linji, Dahui and the development of koan, Kanzan Egan in Japan, Ikkyu, Bankei, Hakuin, and Sasaki Joshu. Practices of each of these teachers will be studied in meditation labs. Prerequisites: coursework in Buddhism at Brown; permission of instructor. Enrollment limited to 20.

EAST 1950U. South Korean Cinema: From Golden Age to Korean Wave. This seminar explores the cinema of South Korea, proceeding chronologically and thematically, interrogating the key problematics of gender and genre. We will think about cinema’s role—as a medium for visual storytelling and as a site for producing cultural norms and values—in assessing the consequences of historical events and in helping to construct official histories. Across films from Korean cinema’s “golden age” (1950’s and 60’s) to post-authoritarian realist cinema to the contemporary era of globalized, transnational genre films, we will map the questions, themes, and debates on the formation and effects of South Korea’s cinematic imaginary of nation. Enrollment limited to 20 juniors and seniors.

EAST 1950V. Contemporary Film and Media Cultures in East Asia. This course visits postwar film and television cultures in East Asia as a part of a larger narrative of contemporary media production and consumption. How can thinking about films’ relationship with other media enhance our understanding of contemporary popular culture? How does it help us re-imagine narrative issues such as textuality, production, and representation? How does understanding the rich contexts of audience interaction with media affect our approaches to reading and meaning-making? To explore these questions, we will consider postwar Chinese and Japanese films, popular fiction, literature, television dramas, as well as manga/anime.

EAST 1950X. Queer Japan: Culture, History and Sexuality. This seminar investigates cultural practices enacted by Japanese gays and lesbians, or otherwise related to same-sex attraction. How have sexual identities traditionally been constructed in Japan, and how has the modern period transformed them? How has same-sex sexuality become figured in the Japanese art, literature and popular culture of the 20th century; and how have the forces of a global LGBT culture interacted with the specific experiences of a same-sex community in Japan? This class explores questions about queer history, writing and cultural practice by looking at particular moments in the Japanese past and present.

EAST 1972Z. Minority Peoples of China (HIST 1972Z). Interested students must register for HIST 1972Z.

EAST 1973M. Outside the Mainstream (HIST 1973M). Interested students must register for HIST 1973M.

EAST 1990. Senior Reading and Research: Selected Topics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 2450. Exchange Scholar Program.

RELIS 0100 Introduction to Buddhism
Japanese

JAPN 0100. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. No prerequisites. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0200 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0250 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

JAPN 0200. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. This is the second half of a year-long course. Students must have taken JAPN 0100 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0100. If JAPN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the second half of a year-long course. Students must have taken JAPN 0150 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0150. If JAPN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Further practice of patterns and structures of the language. Readings are introduced on aspects of Japanese culture and societv to develop reading and writing skills, enhance vocabulary, and provide points of departure for conversation in Japanese. Prerequisite: JAPN 0200 or equivalent. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

See Intermediate Japanese (JAPN 0300) for course description. Prerequisite: JAPN 0300 or equivalent. Enrollment limited to 18.

Continued practice in reading, writing, and speaking. Emphasizes the development of reading proficiency and speaking in cultural contexts. Students read actual articles and selections from Japanese newspapers. Course includes translation, with writing and discussion in Japanese. Films and video tapes are shown as supplementary materials. Prerequisite: JAPN 0400 or equivalent.

See Advanced Japanese (JAPN 0500) for course description.

Reading of articles from Japan’s press with discussion in Japanese. Focuses on explanations and drills on the fine points in grammar and vocabulary as well as on the practice of writing in various styles. Movies and video tapes are used as supplementary materials. Prerequisite: JAPN 0600 or equivalent.

See Advanced Readings in Japanese (JAPN 0700) for course description.

JAPN 0910A. Classical Japanese.
This is an introductory course to pre-modern Japanese. It will explore the lifestyle and philosophy of samurai in 17th century Japan through reading the book, Gorin no Sho. The book comprises Miyamoto Musashi’s thoughts on swordplay, winning, and mind training. The course includes reading background information in English and viewing films and dramas. Enrollment limited to 20.

The goal of this course is to develop the ability to use Japanese source materials for research in social sciences. Course covers lifestyles in two contrasting cities, Tokyo and Kyoto. Topics include topography, environmental issues, houses, urban life-styles, and natural habitation. We will ask questions: why houses are so compact in cities; why crows and boars pick on garbage, etc. Information sources are films, videos, and websites in addition to textbooks. Prerequisite: JAPN 0600 or equivalent. Enrollment limited to 20.

JAPN 0910C. Japanese Linguistics.
This course will provide a structural overview of the Japanese language. Students will learn how to develop skills for analyzing the language through looking at sounds, meaning, and grammar. Topics include linguistic analysis of various sentence structures that students often find difficult to use, learning to choose words and sentences in appropriate situations, looking at the relation between language and culture.

A traditional Japanese readings course with content both canonical and unconventional. It allows students with three years of Japanese to read from a diverse selection of 20th century Japanese novels, short stories and graphic novels. Our main focus will be on understanding the original Japanese, but some translation into English will be involved as well. In addition to selections from well-known modernists such as Natsume Soseki, Tanizaki Jun’ichi and Mishima Yukio, readings may also include works by Edogawa Rampo, Inagaki Taro, Yoshiya Nobuko, Yamaji Ebin, Hoshi Shin’ichi, Murakami Ryu, and others to be determined by student interest. All readings in Japanese. Prerequisite: JAPN 0600 or instructor permission.

JAPN 0920A. Business Japanese.
Designed to teach post-advanced level Japanese language, with the focus on effective oral and written communication in business situations, this course emphasizes vocabulary building in the areas of business and economics, use of formal expressions, business writing, and conversation and presentation skills, as well as familiarizing students with Japanese corporate culture, protocol, and interpersonal relationships. Prerequisite: JAPN 0700 or equivalent. Enrollment limited to 20. Instructor permission required.

JAPN 0920B. Modern Japanese Poetry.
This course is an introduction to modern Japanese poetry, which includes pre-war and post-war poetic forms. We will explore issues of modernity and identity as well as poetries through a close examination of several poems each week. We will work on translations of the poems as part
Korean

KREA 0100. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. No prerequisite. Enrollment limited to 18. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in KREA 0200 covers the entire year and is recorded as the final grade for both semesters.

KREA 0200. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. Enrollment limited to 18. This is the second half of a year-long course. Students must have taken KREA 0100 to receive credit for this course. The final grade for this course will become the final grade for KREA 0100. If KREA 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

KREA 0300. Intermediate Korean.
An intermediate course in Korean designed to further communicative competence in spoken Korean and to provide additional reading practice in stylistically higher level materials that are progressively integrated into the given dialogues. Discussions on various aspects of Korean culture and society. Four classroom hours per week. Prerequisite: KREA 0200 or instructor permission.

See Intermediate Korean (KREA 0300) for course description. Prerequisite: KREA 0100-0200 or equivalent.

KREA 0500. Advanced Korean.
Aims to help students develop an advanced level of communicative competence, with special focus on enhancing their reading comprehension, essay writing, and discourse (discussion and presentation) skills. Authentic reading materials from a variety of sources will be used to introduce various topics and issues pertaining to Korean society and culture, thus students' cultural understanding will also be enhanced. Prerequisite: KREA 0400 or equivalent or permission of instructor.

KREA 0600. Advanced Korean.
See Advanced Korean (KREA 0500) for course description. Prerequisite: KREA 0500 or equivalent or permission of instructor.

KREA 0920A. Korean Culture and Society.
Develops oral proficiency in Korean language through a variety of readings on Korean culture and society. By reading about and discussing important aspects and core issues of Korea, students enhance their speaking competence and cultural understanding. Prerequisites: KREA 0300 and 0400 or permission of instructor. Enrollment limited to: 15.

KREA 0920B. Business Korean.
For students who are interested in Korean culture in general and business culture in particular, and in improving their Korean language skills in a business context. The course not only focuses on business and economy-related words and expressions, but also on developing learners' confidence in business writing, conversation and presentations in Korean. Enrollment limited to 15. Prerequisite: KREA 0400 or instructor's permission.

KREA 1910. Independent Study.
Reading materials for research in Korean. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Economics

Chair
Roberto Serrano
Economics is a social scientific discipline that both studies economic activity in its narrower sense and develops methodologies for studying decision-making in a broader set of domains. Economic activity narrowly construed is that subset of people's activities primarily concerned with the production and consumption of goods and services, the allocation of resources, goods and asset markets, the money supply, and taxation. More broadly, economics provides a theory of rational choice that has been useful in fields ranging from the study of politics and healthcare to theoretical biology. In recent years, economists have been expanding their study of choice to also include the interaction of cognitive limitations, decision heuristics, and psychological and social influences with the rational aspects of choice.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Economics/

Economics Concentration Requirements
Economics is the study of how individuals, businesses, and governments allocate resources to satisfy their objectives. The study of economics helps students understand markets, firms, financial organizations, and public debate about economic policy, including taxation, government expenditure, trade, globalization, health, and welfare. The concentration in Economics prepares students for graduate study in fields such as business and law, for graduate study leading to teaching and research in economics, and can be a stepping stone to employment in business, finance, non-profit, and government organizations. Students may choose either the standard or the professional track.

Students are required to begin with ECON 0110, an introductory course that stresses the economic problems of our society, and the vocabulary and principles of economic analysis. Intermediate level courses in microeconomics (ECON 1130), macroeconomics (ECON 1210), and econometrics (ECON 1620) round out the list of foundation courses for the concentration. Economics students must also fulfill a calculus requirement.

The economics department sponsors a number of alternative concentration options. The most popular is the standard economics concentration, described below. Three additional concentration options are administered jointly with other departments and are described separately under their respective titles. They are the concentrations in applied mathematics–economics, in mathematical economics, and in computer science–economics. The first two are especially recommended for students interested in graduate study in economics.
The department offers many of the required courses in an interdepartmental concentration called Business, Entrepreneurship and Organizations (BEO). BEO is jointly run by the departments of economics and sociology, and the school of engineering. BEO has three possible “tracks,” of which the business economics track is most closely related to economics. Please contact the BEO administrator for more details, including information about advising in that concentration.

**Standard Economics Concentration (through the Class of 2015)**

### Mathematics Course Requirements (select one of the following): 1 1
- MATH 0060 Analytic Geometry and Calculus 1
- MATH 0070 Calculus with Applications to Social Science 1
- MATH 0090 Introductory Calculus, Part I

A higher-level math course.

### Economics Course Requirements:
- ECON 0110 Principles of Economics 1
- ECON 1110 Intermediate Microeconomics 1
- or ECON 1130 Intermediate Microeconomics (Mathematical) 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1620 Introduction to Econometrics 1
- or ECON 1630 Econometrics I 1

at least five additional 1000-level Economics courses 5

**Total Credits** 10

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than MATH 0090, without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

**Standard Economics Concentration (for students in the Class of 2016 and beyond)**

### Mathematics Course Requirements: 1
- MATH 0100 Introductory Calculus, Part II
- or a higher-level math course.

### Economics Course Requirements:
- ECON 0110 Principles of Economics 1
- ECON 1110 Intermediate Microeconomics 1
- or ECON 1130 Intermediate Microeconomics (Mathematical) 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1620 Introduction to Econometrics 1
- ECON 1629 Applied Research Methods for Economists 1
- or ECON 1630 Econometrics I 1

At least five other 1000-level Economics courses. 5

**Total Credits** 11

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than MATH 0100, without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

All concentrators in economics programs are encouraged to consult their concentration advisors regularly. Economics concentrators who wish to study abroad should consult first with the department transfer credit advisor.

---

### Honors

Students who wish to enroll in the honors program in economics should consult the department’s undergraduate guide (available on its web site) to obtain a complete description of the requirements. See the description of Capstone Projects there, as well. Courses taken to prepare an honors thesis are in addition to the regular concentration requirements.

**Professional Track**

The requirements for the professional track include all those of the standard track, as well as the following:

- Students must complete two to four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
- On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:
  - Which courses were put to use in your summer’s work? Which topics, in particular, were important?
  - In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
  - Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
  - What did you learn from the experience that probably could not have been picked up from course work?
  - Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
  - Would you recommend your summer experience to other Brown students? Explain.

---

### Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for careers in finance, or for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

---

### Standard program for the A.B. degree (Advanced Economics track) - through the class of 2015:

#### Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

#### Course Requirements:

##### Applied Math Requirements

(a) 1
- APMA 0350 Methods of Applied Mathematics I, II 2
- APMA 0360 Methods of Applied Mathematics I, II 2

Select one of the following:
- APMA 0160 Introduction to Scientific Computing
- CSCI 0040 Introduction to Scientific Computing and Problem Solving
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science

Select one of the following:

- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV
- APMA 1660 Statistical Inference II
- APMA 1670 Statistical Analysis of Time Series
- APMA 1680 Nonparametric Statistics
- APMA 1690 Computational Probability and Statistics
- APMA 1700 The Mathematics of Insurance
- APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)

MATH 1010 Analysis: Functions of One Variable

Economics Requirements:

- ECON 1130 Intermediate Microeconomics (Mathematical) ² 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Select two 1000-level courses from the "financial economics" group: ³ 2

- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select one 1000-level course from the "mathematical economics" group: ¹ 1

- ECON 1170 Welfare Economics
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics

Total Credits 12

¹ APMA 0330 and APMA 0340 may be substituted with advisor approval.
² Or ECON 1110 with permission.
³ No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

Standard program for the Sc.B. degree (Mathematical Finance track) - through the class of 2015:

Prerequisites:

- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

Course requirements:

Applied Mathematics requirements:

(a) APMA 0350 Methods of Applied Mathematics I, II 2
   & APMA 0360 and Methods of Applied Mathematics I, II 1

Select one of the following:

- APMA 0160 Introduction to Scientific Computing
- CSCI 0040 Introduction to Object-Oriented Programming and Problem Solving
- CSCI 0150 Introduction to Computer Science: An Integrated Introduction
- CSCI 0170 Computer Science

Select one of the following:

- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV
- APMA 1660 Statistical Inference II
- APMA 1670 Statistical Analysis of Time Series
- APMA 1680 Nonparametric Statistics
- APMA 1690 Computational Probability and Statistics
- APMA 1700 The Mathematics of Insurance
- APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)

MATH 1010 Analysis: Functions of One Variable

Economics requirements:

- ECON 1130 Intermediate Microeconomics (Mathematical) ² 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Select three 1000-level courses from the "financial economics" group: ³ 3

- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select two 1000-level courses from the "mathematical economics" group: ² 2

- ECON 1170 Welfare Economics
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications

Economics Requirements:

ECON 1130  Intermediate Microeconomics (Mathematical) Or 1
   ECON 1110 with permission
ECON 1210  Intermediate Macroeconomics 1
ECON 1630  Econometrics I 1
Select two 1000-level courses from the "financial economics" group: 2
   ECON 1650  Financial Econometrics
   ECON 1710  Investments I
   ECON 1720  Corporate Finance
   ECON 1750  Investments II
   ECON 1759  Data, Statistics, Finance
   ECON 1760  Financial Institutions
   ECON 1765  Finance, Regulation, and the Economy: Research
   ECON 1770  Fixed Income Securities
   ECON 1780  Corporate Strategy
   ECON 1790  Corporate Governance and Management
Select one 1000-level course from the "mathematical economics" group: 1
   ECON 1170  Welfare Economics
   ECON 1225  Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
   ECON 1465  Market Design: Theory and Applications
   ECON 1470  Bargaining Theory and Applications
   ECON 1640  Econometrics II
   ECON 1650  Financial Econometrics
   ECON 1750  Investments II
   ECON 1759  Data, Statistics, Finance
   ECON 1810  Economics and Psychology
   ECON 1820  Behavioral Economics
   ECON 1850  Theory of Economic Growth
   ECON 1860  The Theory of General Equilibrium
   ECON 1870  Game Theory and Applications to Economics
Select one 1000-level course from the "data methods" group: 2
   ECON 1305  Economics of Education: Research
   ECON 1310  Labor Economics
   ECON 1360  Health Economics
   ECON 1390  Research Methods for Economists
   ECON 1410  Urban Economics
   ECON 1460  Econometrics II
   ECON 1650  Financial Econometrics
   ECON 1710  Investments I
   ECON 1720  Corporate Finance
   ECON 1750  Investments II
   ECON 1759  Data, Statistics, Finance
   ECON 1760  Financial Institutions
   ECON 1765  Finance, Regulation, and the Economy: Research
   ECON 1770  Fixed Income Securities
   ECON 1780  Corporate Strategy
   ECON 1790  Corporate Governance and Management
Select one 1000-level course from the "data methods" group: 2
   ECON 1305  Economics of Education: Research
   ECON 1310  Labor Economics
   ECON 1360  Health Economics
   ECON 1390  Research Methods for Economists
   ECON 1410  Urban Economics
   ECON 1460  Econometrics II
   ECON 1650  Financial Econometrics
   ECON 1710  Investments I
   ECON 1720  Corporate Finance
   ECON 1750  Investments II
   ECON 1759  Data, Statistics, Finance
   ECON 1760  Financial Institutions
   ECON 1765  Finance, Regulation, and the Economy: Research
   ECON 1770  Fixed Income Securities
   ECON 1780  Corporate Strategy
   ECON 1790  Corporate Governance and Management
and beyond:

Standard program for the Sc.B. degree (Mathematical Finance track) - class of 2016 and beyond:

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course Requirements:**

**Applied Mathematics requirements:**
(a)  
- APMA 0350 Methods of Applied Mathematics I, II  
- & APMA 0360 Methods of Applied Mathematics I, II
(b)  
- Select one of the following:  
  - APMA 0160 Introduction to Scientific Computing (preferred)  
  - CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)  
  - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science  
  - CSCI 0170 Computer Science: An Integrated Introduction  
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1650 Statistical Inference I

- Select two of the following:  
  - APMA 1180 Introduction to Numerical Solution of Differential Equations  
  - APMA 1330 Methods of Applied Mathematics III, IV  
  - APMA 1660 Statistical Inference II  
  - APMA 1670 Statistical Analysis of Time Series  
  - APMA 1680 Nonparametric Statistics  
  - APMA 1690 Computational Probability and Statistics  
  - APMA 1700 The Mathematics of Insurance  
  - APMA 1720 Monte Carlo Simulation with Applications to Finance (preferred)  
  - MATH 1010 Analysis: Functions of One Variable

**Economics Requirements:**
- ECON 1130 Intermediate Microeconomics (Mathematical) Or ECON 1110 with permission
- ECON 1210 Intermediate Macroeconomics
- ECON 1630 Econometrics I

- Select three 1000-level courses from the "financial economics" group:  
  - ECON 1650 Financial Econometrics  
  - ECON 1710 Investments I  
  - ECON 1720 Corporate Finance  
  - ECON 1750 Investments II  
  - ECON 1759 Data, Statistics, Finance  
  - ECON 1760 Financial Institutions

- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select two 1000-level courses from the "mathematical economics" group:  

- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics

- ECON 1305 Economics of Education: Research
- ECON 1310 Labor Economics
- ECON 1360 Health Economics
- ECON 1390 Research Methods for Economists
- ECON 1410 Urban Economics
- ECON 1510 Economic Development
- ECON 1520 The Economic Analysis of Institutions
- ECON 1530 Health, Hunger and the Household in Developing Countries
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1759 Data, Statistics, Finance
- ECON 1765 Finance, Regulation, and the Economy: Research

**Total Credits**

1. APMA 0330 and APMA 0340 may be substituted with advisor approval.
2. No course may be used to simultaneously satisfy the "financial economics," the "mathematical economics," or the "data methods" requirements.

**Honors and Capstone Requirement**

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain the approval of a faculty sponsor.

**Professional Track**

The requirements for the professional track include all those of the standard track, as well as the following:

- Students must complete two to four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
- On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:
Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

On completion of each professional experience, the student must write
be at a university under the supervision of a faculty member.
Such work is normally done within an industrial organization, but may also
experiences, doing work that is related to their concentration programs.
Students must complete two two-to-four-month full-time professional
track, as well as the following:

The requirements for the professional track include all those of the
thesis in their senior year. Students should consult the listed honors

- In retrospect, which courses should you have taken before embarking
on your summer experience? What are the topics from these courses
that would have helped you over the summer if you had been more
familiar with them?
- Are there topics you should have been familiar with in preparation
for your summer experience, but are not taught at Brown? What are these
topics?
- What did you learn from the experience that probably could not have
been picked up from course work?
- Is the sort of work you did over the summer something you would like to
continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown
students? Explain.

Mathematics-Economics Concentration Requirements
The Mathematical Economics concentration is designed to give a
background in economic theory plus the mathematical tools needed to
analyze and develop additional theoretical constructions. The emphasis is
on the abstract theory itself.

Standard Mathematics-Economics Concentration (through the class of 2015):

Economics

ECON 1130 Intermediate Microeconomics (Mathematical) 1
ECON 1210 Intermediate Macroeconomics
ECON 1630 Econometrics I

Three courses from the "mathematical-economics" group:

ECON 1170 Welfare Economics
ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and
Stabilization Policies
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics
or any graduate Economics course

Total Credits 13

1 Or ECON 1110, with permission.

Honors
Students who meet stated requirements are eligible to write an honors
thesis in their senior year. Students should consult the listed honors
requirements of whichever of the two departments their primary thesis
advisor belongs to, at the respective departments' websites.

Professional Track
The requirements for the professional track include all those of the
standard track, as well as the following:
Students must complete two two-to-four-month full-time professional
experiences, doing work that is related to their concentration programs.
Such work is normally done within an industrial organization, but may also
be at a university under the supervision of a faculty member.
On completion of each professional experience, the student must write
and upload to ASK a reflective essay about the experience addressing the
following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in
particular, were important?

Three courses from the "mathematical-economics" group:

ECON 1630
ECON 1640
ECON 1120
ECON 1130

At least three other 1000-level courses, at least two must be chosen
from the following "mathematical-economics" group:

ECON 1170 Welfare Economics
ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and
Stabilization Policies
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

Mathematics

At least two calculus courses through MATH 0180 or its equivalent. 2
MATH 0520 Linear Algebra
or MATH 0540 Honors Linear Algebra
Select one of the following Options: 3

Option A
MATH 1610 Probability
MATH 1620 Mathematical Statistics

One course from the "advanced mathematics" group, as follows:

MATH 1010 Analysis: Functions of One Variable
MATH 1110 Ordinary Differential Equations
MATH 1120 Partial Differential Equations
MATH 1130 Functions of Several Variables
MATH 1140 Functions Of Several Variables

1 2

- 1 -
Concentration (class of 2016 and beyond):

Standard Mathematics-Economics

Analysis - one of the following:
- Probability Theory - one of the following:
  - Calculus: MATH 0180 or higher
  - Mathematics
  - Two additional 1000-level economics courses

Two courses from the "advanced mathematics" group, as follows:

- APMA 1650 Statistical Inference I
- MATH 1010 Analysis: Functions of One Variable
- MATH 1130 Functions of Several Variables
- MATH 1140 Functions Of Several Variables

Total Credits: 12

Economics

- ECON 1130 Intermediate Microeconomics (Mathematical) Or ECON 1110 with permission
- ECON 1210 Intermediate Macroeconomics
- ECON 1630 Econometrics I

Two courses from the "mathematical-economics" group:
- ECON 1630 Econometrics I
- ECON 1225 Welfare Economics
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics

One course from the "data methods" group: ¹
- ECON 1305 Economics of Education: Research
- ECON 1310 Labor Economics
- ECON 1360 Health Economics
- ECON 1390 Research Methods for Economists
- ECON 1410 Urban Economics
- ECON 1510 Economic Development
- ECON 1520 The Economic Analysis of Institutions
- ECON 1530 Health, Hunger and the Household in Developing Countries
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1759 Data, Statistics, Finance
- ECON 1765 Finance, Regulation, and the Economy: Research

Two additional 1000-level economics courses ²

Total Credits: 14

¹ No course may be "double-counted" to satisfy both the mathematical-economics and data methods requirement.

Honors and Capstone Requirement:

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain approval of a faculty sponsor.

Professional Track (applies irrespective of graduation year):

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two to four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Economics Graduate Program

The department of Economics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

The department also offers a one-year Master of Arts (A.M.) program. However, applicants to the A.M. program should apply to the Ph.D. program, and are evaluated using the same criteria as applicants to the Ph.D. program. Students in the A.M. program are not funded by Brown. A.M. students who take the core examination and pass it will continue in the Ph.D. program and receive funding. In addition, Ph.D. students can earn the A.M. on the way to the Ph.D. or can receive the A.M. if they choose not to complete the Ph.D. program. The A.M. requires passing eight courses in the areas of Microeconomics, Macroeconomics, and Econometrics.

For more information on admission and program requirements, please visit the following website:
Courses

ECON 0110. Principles of Economics.
Extensive coverage of economic issues, institutions, and vocabulary, plus an introduction to economic analysis and its application to current social problems. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session).

ECON 0180A. Economics on a Broad Canvas.
Where economics fits into the broader pattern of the social sciences, history, and philosophy. Topics include: the world economy from prehistory to the present; the history and varieties of economic thought; comparative economic systems; challenges facing less developed countries; positive and normative perspectives on income inequality and redistribution; and the economy and the quality of life, including the environment. Enrollment limited to 20 first year students. FYS

Introduction to the economic aspects of the major welfare programs provided by government in American Society: Social Security, Health Care and Insurance, Education, Environmental Control. The focus of the course will be on the benefits and costs of each program and proposals for altering the scope of the public sector. Enrollment limited to 20 first year students. FYS

ECON 0180C. Punishment and Inequality in America.
This seminar will use social theory and social science evidence to understand how punishment works as a mechanism to produce inequality in American society. The institution of incarceration as a generator of social stigma is examined in this light. Zero-tolerance policing practices and racial profiling are discussed from this point of view as well. Questions about authority, legitimacy, deviancy, power and social cognition will guide the discussion. Enrollment limited to 20 first year students. FYS WRIT

We will explore the ethical and economic foundation of Human Rights and its relationship to the Cosmopolitanism View. In particular, we will explore the question of whether people should have not just human rights to liberty, life and security, but also to a basic level of economic subsistence. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 20.

A course designed primarily for students who do not plan to concentrate in economics but who seek a basic understanding of the economics of less developed countries, including savings and investment, health and education, agriculture and employment, and interactions with the world economy, including trade, international capital flows, aid, and migration. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 100.

Basic accounting theory and practice. Accounting procedures for various forms of business organizations.

We will examine what role economic theory plays and/or ought to play in political theory and on our conception of politics more broadly. Topics include particular political philosophies and economic concepts such as rationality and efficiency. Prerequisite: ECON 0110 or advanced placement.

This is a seminar that focuses on issues of ethics that arise in the context of business and economics. Learning occurs primarily through guided student discussions in class. Other economics courses, especially ECON 0110, 1110, 1340 and 1790 are highly recommended.

ECON 1110. Intermediate Microeconomics.
Tools for use in microeconomic analysis, with some public policy applications. Theory of consumer demand, theories of the firm, market behavior, welfare economics, and general equilibrium. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1130. Intermediate Microeconomics (Mathematical).
Microeconomic theory: Theories of the consumer and firm, competitive equilibrium, factor markets, imperfect competition, game theory, welfare economics, general equilibrium. May not be taken in addition to ECON 1110. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1160. Managerial Economics.

ECON 1170. Welfare Economics.
A survey of theories of economic optimality. Topics include efficiency and competition, externalities, social welfare functions, majority voting, the Arrow impossibility theorem, compensation criteria and an introduction to the problems of mechanism design and implementation. Prerequisites: ECON 1110 or 1130.

ECON 1185. The Welfare State.
The course will include analyses of Health Care, Social Security, Medicare, Medicaid, Immigration Control, and Environmental Control. The focus will be on the extent to which the programs meet their goals without straining the federal budget. Both existing and alternative programs will be evaluated in terms of costs, benefits, as well as their present and future demands on tax revenue and user fees. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620. Enrollment limited to 30 senior concentrators in Economics, Mathematical Economics, Applied Math-Economics, Computer Science Economics, and BEO.

ECON 1210. Intermediate Macroeconomics.
The economy as a whole: Level and growth of national income, inflation, unemployment, role of government policy. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1220. Monetary and Fiscal Policy.
Relation of monetary and fiscal policy to inflation, aggregate employment, and to the financing of the public sector. The political economy of monetary and fiscal policy. Contemporary and historical applications, including the economic expansion of the 1990s and the subsequent recession in the United States, the prolonged economic slump in Japan, the economic crisis in Argentina. Prerequisite: ECON 1210.

The course is concerned with macroeconomic policy in the United States, with special focus on the recent economic crisis. The main objective of the course is to introduce students to the type of models and methods used in current research in macroeconomics both in the scholarly literature but also in the practice of central banks and major policy institutions. Events of the financial crisis and the economic recession of 2007-2009 will serve to illustrate the challenges confronted by macroeconomic analysis. Prerequisites: ECON 1110 or 1130; and MATH 0090, 0100, 0170, 0180, 0190, 0200, or 0350; or advanced placement. Enrollment limited to 30.

ECON 1275. History of Economic Thought.
Seminar explores economic thought from the classical Greek philosophers to mid-twentieth-century economists, including John Maynard Keynes and F. A. Hayek. It is not a course in economic history. Rather, the course deals with the content of economic writings such as Adam Smith's Wealth of Nations and Karl Marx's Capital. This course seeks to provide you with an overview of the history of economic ideas as well as undertake an in-depth exploration of six of major figures in the history of economics: Adam Smith, Thorstein Veblen, Alfred Marshall, Karl Marx, F. A. Hayek, and John
Maynard Keynes. Prerequisites: ECON 1110 or 1130; 1210; and 1620 or 1630. Enrollment limited to 30. WRIT

ECON 1300. Education, the Economy and School Reform (EDUC 1150). Interested students must register for EDUC 1150.

ECON 1301. Economics of Education I. This course teaches students how to use microeconomics to analyze a broad array of education policy issues. The departure of this course from ECON 1110 is the emphasis on studying microeconomics in applied settings, and in particular, using microeconomic concepts to think about, analyze, and solve policy questions in education. Prerequisite: ECON 1110 or 1130.

ECON 1305. Economics of Education: Research. This course will cover academic research in the Economics of Education. Topics include production of student achievement, measuring student achievement, funding of public education, and school choice and school vouchers. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 25 juniors, seniors, and graduate students. WRIT

ECON 1310. Labor Economics. Labor supply, human capital, income inequality, discrimination, immigration, unemployment. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 100.

ECON 1355. Environmental Issues in Development Economics (ENVS 1355). Interested students must register for ENVS 1355.

ECON 1360. Health Economics. This course introduces students to the issues, theory and practice of health economics in the US. Topics include the economic determinants of health, the market for medical care, the market for health insurance and the role of the government in health care. Course work includes data analyses using the program STATA. Prerequisites: ECON 1110 or 1130; and ECON 1620, 1630, or APMA 1650 or other statistics background. Enrollment limited to 24.

ECON 1370. Race and Inequality in the United States. We examine racial inequality in the United States, focusing on economic, political, social and historical aspects. Topics include urban poverty, employment discrimination, crime and the criminal justice system, affirmative action, immigration, and low wage labor markets. Black/white relations in the US are the principle but not exclusive concern. Prerequisite: ECON 1110 or 1130. Enrollment limited to 25.

ECON 1375. Inequality of Opportunity in the US. This course examines empirical evidence on inequality of opportunity in the US. We cover recent work in economics that measures the importance of parents, schools, health care, neighborhoods, income, and race in determining children’s long-term labor market success, and implications of these findings for US public policy. We will also place the empirical work in historical and philosophical context and cover a variety of statistical issues. Prerequisites: ECON 1110 or 1130; and ECON 1620, 1629, or 1630. Enrollment limited to 30 seniors.

ECON 1380. Economics and the Law. Examines the economic basis for legal decisions. Cost-benefit analysis, social costs, the Coase Theorem, and the assignment of property rights. The economics of property and contracts, tort law, and criminal law. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1390. Research Methods for Economists. This course is designed to prepare students to undertake empirical research in economics. Students thinking of writing an honors thesis or conducting independent research are especially urged to take it during their junior year. We will answer such questions as what does an empirical research paper look like? How do we formulate a hypothesis to test? How can we use data to test our hypothesis? Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630.

ECON 1410. Urban Economics. The first part of the course covers the set of conceptual and mathematical models widely used to understand economic activity both between and within cities. The second part of the course examines various urban policy issues including urban transportation, housing, urban poverty, segregation and crime. The course makes extensive use of empirical evidence taken primarily from the United States. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 100.

ECON 1420. Urbanization in China. Examines urbanization processes and urban public policy in China. Also draws on historical and recent experience in the U.S. Policy areas including policies affecting urbanization, migration, and industrial location; policies affecting housing, land use, and urban reform; and policies affecting fiscal decentralization and infrastructure investments such as transportation. Prerequisites: ECON 1110 or ECON 1130. Open to juniors and seniors. DVPS

ECON 1430. Population Economics. An introduction to the economic approach to demography. Applies the theoretical and empirical frameworks of economics to topics such as fertility, migration (both domestic and international), investments in health and human capital, life-cycle labor supply, intergenerational transmission of economic status, the distribution of income and wealth, and the interaction of population growth with the standard of living. Prerequisite: ECON 1110 or 1130.

ECON 1440. Economic Theories of Firms. Examines theories of why firms exist, their internal organizations and employment relations, ownership and control, efficiency versus conflict approaches, and alternative organizational forms (e.g., employee ownership). Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1450. Economic Organizations and Economic Systems. Positive and normative study of the organizations that comprise and the institutional structures that characterize a modern mixed market economy. Theoretical efficiency and potential limitations of private enterprises and markets including (a) why some market actors are organizations (e.g., companies), (b) effort elicitation problems in organizations, (c) the problem of cooperation in traditional versus behavioral economics, and (d) alternative kinds of organization (including proprietorships, corporations, nonprofits, government agencies). Roles of government, and problems of government failure, including the collective action problem of democracy. State-market balance and contemporary controversies over the economic system in light of the 2008 financial crisis. Enrollment limited to 100 juniors and seniors. Prerequisite: ECON 1110 or 1130.

ECON 1460. Industrial Organization. A study of industry structure and firm conduct and its economic/antitrust implications. Theoretical and empirical examinations of strategic firm interactions in oligopolistic markets, dominant firm behaviors, and entry deterrence by incumbents. Also economics of innovation: research and development activities and government patent policies. Prerequisite: ECON 1110 or 1130. Some knowledge of calculus required. Enrollment limited to 100.

ECON 1465. Market Design: Theory and Applications. This course studies the design of organized markets, focusing on efficient organization and the incentives created by market rules. The analysis relies on a mix of documenting the rules of real-world markets, game theoretic analysis, empirical analysis, and experimental work. Applications include: online auction markets (e.g., eBay, Amazon); ad auctions (e.g., Google); matching markets, including matching students to schools, matching workers to jobs (e.g., medical residents to hospitals, lawyers to clerkship positions), matching kidney donors to recipients, and online dating. Prerequisites: ECON 1110 or 1130; and MATH 0080, 0070, 0090, 0100, 0170, 0180, 0190, 0200, 0350, or advanced placement; or instructor permission. Enrollment limited to 25 juniors, seniors, and graduate students.

ECON 1470. Bargaining Theory and Applications. Bargaining theory is emerging as an important area within the general rubric of game theory. Emphasis is on providing a relatively elementary
version of the theory in order to make it accessible to a large number of students. Covers introductory concepts in game theory, strategic and axiomatic theories of bargaining and their connections, applications to competitive markets, strikes, etc. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1480. Public Economics.
An analysis of the role of government in the allocation of resources. Topics include welfare economics (a review), problems of social choice, the evaluation of public expenditures, and taxation. Prerequisite: ECON 1110 or 1130.

The course looks at the economics of social security reform with particular focus on possible policy responses to the increasing fraction of the population that is elderly in OECD countries. Among the topics that will be considered are pay as you go funding, defined benefits versus defined concentrations, privatization, labor market effects of pensions, retirement decisions, labor supply by couples, and macroeconomic effects. Prerequisite: ECON 1110 or 1130. Enrollment limited to 30. Not open to first-year students.

ECON 1500. Current Global Macroeconomic Challenges.
Analysis of current economic challenges in the U.S. and China. Topics include fiscal and monetary policies, international trade, capital flows and exchange rate policy, and policies for long-run growth. Emphasis on macroeconomic policies in China and the U.S., including their global impact. Prerequisites: ECON 1210. Also recommended: ECON 1550 and 1850. Enrollment limited to 100.

ECON 1510. Economic Development.
The economic problems of less developed countries and the theory of economic development, with emphasis on the roles played by agriculture, industry, and foreign trade. Also: education, health, employment, and migration; capital accumulation; income distribution; institutional aspects; the role of price distortions; trade policies; social discount rates, investment criteria, and the general issue of state intervention. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 100.

ECON 1520. The Economic Analysis of Institutions.
This course deals with the economic analysis of institutions, with a focus on developing countries. The first section covers institutions in traditional agrarian societies. Topics include consumption smoothing and the organization of land, labor and credit markets. The second section focuses on the role of the community in facilitating economic activity. Institutions include cooperatives, networks, marriage and the family. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630; or equivalent. Enrollment limited to 45.

ECON 1530. Health, Hunger and the Household in Developing Countries.
Microeconomic analysis of household behavior in low income societies emphasizing the economic determinants of health and nutrition and the evaluation of policy. The relationship among health, nutrition, fertility, savings, schooling, labor productivity, wage determination, and gender-based inequality. Emphasizes theoretically-based empirical research. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1540. International Trade.
Theory of comparative advantage, trade, and income distribution. Welfare analysis of trade: gains from trade, evaluation of the effects of trade policy instruments-tariffs, quotas, and subsidies. Trade under imperfect competition. Strategic trade policy. Trade, labor markets, preferential trade agreements, and the world trading systems. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1550. International Finance.
The balance of payments; identification and measurement of surpluses and deficits; international monetary standards; the role of gold and paper money; government policies; free versus fixed exchange rates; international capital movements; war and inflation; the International Monetary Fund. Prerequisite: ECON 1210. Enrollment limited to 100.

ECON 1560. Economic Growth.
A theoretical and empirical examination of economic growth and income differences among countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200 or 0350; or advanced placement. Enrollment limited to 100.

Recent histories, institutional structures, and performance of industrialized economies of the U.S., Europe and Asia. The Marxian critique of capitalism; the theory of centrally planned economies; the Soviet economy; and problems of reform and transition. Workers' self-management as an alternative industrial order. Prerequisite: EC 111 or 113.

ECON 1590. The Economy of China since 1949.
This course examines the organization, structure, and performance of the economy of mainland China, with a focus on urban and regional development. The course analyzes the changing economic system including the roles of planning and markets and government economic strategy and policies. The pre-reform period (1949-78) receives attention in its own right, but especially as it influences developments in the market-oriented reform period since 1978. Topics covered include rural and urban development, industrialization and FDI, housing and land markets, rural-urban migration, income inequality and growth, and the evolving spatial structure of cities. Both analytical and descriptive methods are used. Prerequisite: ECON 1110 or 1130. ECON 1210 and 1410 are helpful but not required. Enrollment limited to 100.

ECON 1600. Economics of the Middle East.
A survey of the economies of the Middle East. Examines various aspects of the economic realities of the region, including economic and human development, water and food security, the economics and politics of oil, population growth and labor mobility, education, the role of the state, economic reform, the political economy of conflict and peace, and the prospects for regional integration. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1620. Introduction to Econometrics.
Probability and statistical inference. Estimation and hypothesis testing. Simple and multiple regression analysis. Applications emphasized. Prerequisite: ECON 0110 or advanced placement, and ECON 1110 or 1130. Weekly one-hour computer conference required.

This class will cover the basics of applied research in economics. We will cover how we use economic theory to formulate a hypothesis to test and how we use data to test our hypothesis. As part of the coursework, students will be exposed to topics across multiple fields of applied economic research (e.g. health, labor, political economy, urban economics, development, etc) that can be explored in greater detail in more advanced classes. Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650.

ECON 1630. Econometrics I.
Advanced introduction to econometrics with applications in finance and economics. How to formulate and test economic questions of interest. The multivariate linear regression model is treated in detail, including tests of the model’s underlying assumptions. Other topics include: asymptotic analysis, instrumental variable estimation, and likelihood analysis. Convergence concepts and matrix algebra are used extensively. Prerequisites: ECON 0110 or advanced placement; and ECON 1110 or 1130; and APMA 1650, MATH 1620, or ECON 1620; or equivalent.

ECON 1640. Econometrics II.
Continuation of ECON 1630 with an emphasis on econometric modeling and applications. Includes applied topics from labor, finance, and macroeconomics. Prerequisite: ECON 1630. Enrollment limited to 100.

Financial time series, for example, asset returns, options and interest rates, possess a number of stylized features that are analyzed using a specific set of econometric models. This course deals with an introduction to such models. It discusses time series models for analyzing asset
returns and interest rates, (GARCH) models to explain volatility, models to explain extreme events which are used for the Value at Risk and models for options prices. Prerequisite: ECON 1630 or instructor permission. Enrollment limited to 100.

**ECON 1710. Investments I.**
The function and operation of asset markets; the determinants of the prices of stocks, bonds, options, and futures; the relations between risk, return, and investment management; the capital asset pricing model, normative portfolio management, and market efficiency. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650.

**ECON 1720. Corporate Finance.**
A study of theories of decision-making within corporations, with empirical evidence as background. Topics include capital budgeting, risk, securities issuance, capital structure, dividend policy, compensation policy, mergers and acquisitions, real options, financial engineering, securitization. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650.

**ECON 1730. Economics of Creativity, Entrepreneurship & Innovation.**
In this advanced and reading intensive seminar, students will study forces that drive the process of innovation. These forces consist of creativity and creative destruction; the innovator’s dilemma; incentives to innovate, competitive advantage; industry evolution; venture capital, and intellectual property. This course is ideal for those who are interested in pursuing investment banking, investment management, strategic consulting, nonprofit management, public policy, venture capital/private equity, and entrepreneurship.

**ECON 1750. Investments II.**
Individual securities: forwards, futures, options and basic derivatives, pricing conditions. Financial markets: main empirical features, equity premium and risk-free rate puzzles, consumption based asset pricing models, stock market participation, international diversification, and topics in behavioral finance. Prerequisites: ECON 1110 or 1130; ECON 1620 or 1630 or APMA 1650; ECON 1710. Enrollment limited to 100.

**ECON 1759. Data, Statistics, Finance.**
An experimental course that prepares students for research of the type conducted in academic finance, hedge funds, and some advanced consulting firms and I-Banks. Nothing like this is offered at any other university as far as the instructor knows. Students that do well in this course should have a head start in academic finance PhD programs, as well as in MBA programs, quantitatively oriented investment funds, finance companies, and consulting firms. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650. CSC/0040 or equivalent also recommended as background. Enrollment limited to 20. S/N only.

**ECON 1760. Financial Institutions.**
This course analyzes the role of financial institutions in allocating resources, managing risk, and exerting corporate governance over firms. After studying interest rate determination, the risk and term structure of interest rates, derivatives, and the role of central banks, it takes an international perspective in examining the emergence, operation, and regulation of financial institutions, especially banks. Prerequisites: ECON 1110 or 1130; and 1210. Enrollment limited to 100.

**ECON 1765. Finance, Regulation, and the Economy: Research.**
Analyzes the role of financial markets and institutions in allocating resources and exerting governance over firms, how regulation shapes finance, and how finance influences the enactment and impact of financial regulation. The class will use: economic theory to develop a solid conceptual framework for understanding how finance affects economic growth, income distribution, and stability; empirical evidence to assess theory; and history to put the role of finance into a long-term framework. Current events will be continuously used to keep the class relevant. Prerequisites: ECON 1110 or 1130; and ECON 1210; and ECON 1630; and ECON 1720 or 1760. Enrollment limited to 30 senior concentrators in Economics, BEQ, Applied Math-Economics, Computer Science-Economics, and Math-Economics.

**ECON 1770. Fixed Income Securities.**
The fixed income market is much larger than the stock market in the U.S. Topics covered in this course include basic fixed income securities, term structure, hedging interest rate risk, investment strategies, fixed income derivatives, mortgage-backed securities and asset-backed securities. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650; and ECON 1710 or 1720. Enrollment limited to 100.

**ECON 1780. Corporate Strategy.**
This course teaches analysis of strategic decisions facing an organization. We cover traditional strategy topics such as capabilities and sustainability as well as modern game theory models of competition. A central integrating idea is anticipating the response of other actors in the economy and recognizing that often an organization’s profits depend on the actions of other firms. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630; and ECON 1720.

**ECON 1790. Corporate Governance and Management.**
A corporation’s economic success depends on access to human capital and other resources, effective management of these resources, and a governance system that ensures effective decision making. The course offers policy prescriptions in economic incentives and regulatory rules that attempt to align management with investors. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650; and ECON 1720; and ECON 0710. Enrollment limited to 40.

**ECON 1800. Politics and Finance.**
This course examines how legislation and regulation influences the structure of financial markets and how players in these markets intervene in the political process to create or modify legislative and, regulatory outcomes. Particular emphasis will be placed on the environment in the United States. International comparisons will also be present. Prerequisites: ECON 1110 or 1130; and ECON 1770. Enrollment limited to 30.

**ECON 1810. Economics and Psychology.**
This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as "Bayesian statisticians". Special emphasis will be put on the implications of "psychologically richer" models on market behavior. Prerequisite: ECON 1110 or 1130; and MATH 0100 or 0170 or 0180 or 0190 or 0200 or 0350 or advanced placement; and ECON 1620 or 1630 or APMA 1650 or MATH 1610. Enrollment limited to 100.

**ECON 1820. Behavioral Economics.**
This course provides a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality, happiness and neuroeconomics. For each area of study we begin with the standard model of rational decision making, and discuss what behavior this model can explain. We then discuss the experimental evidence that indicates that the standard model is missing something important, and the models that have sprung up to account for these violations. Finally, we will look at the implications of these new models for our understanding of how the economy operates. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, 0350, or advanced placement.

**ECON 1850. Theory of Economic Growth.**
Analysis of the fundamental elements that determine economic growth. It examines the role of technological progress, population growth, income inequality, and government policy in the determination of (a) the pattern of economic development within a country, and (b) sustainable differences in per capita income and growth rates across countries. Prerequisites: ECON 1210 and either APMA 0330, 0350 (or equivalent), MATH 0180, 0200, or 0350 (or equivalent). Enrollment limited to 100.

**ECON 1860. The Theory of General Equilibrium.**
Existence and efficiency of equilibria for a competitive economy; comparative statistics; time and uncertainty. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

**ECON 1870. Game Theory and Applications to Economics.**
Study of the elements of the theory of games. Non-cooperative games. Repeated games. Cooperative games. Applications include bargaining and oligopoly theory. Prerequisites: ECON 1110 or 1130; and MATH 0100,
or 0170, or 0180, or 0190, or 0200, 0350, or advanced placement; and ECON 1620 or 1630 or APMA 1650, or MATH 1610. Enrollment limited to 100.

ECON 1880. Introduction to Two-Sided Matching Markets.
First, we will discuss the several elements that characterize a two-sided matching market and will model several of these markets under the game-theoretic approach. Then, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets. Prerequisites: ECON 1110 or 1130; and ECON 1870.

The purpose of this seminar is to bring to the undergraduates concentrating in economics, applied math-economics, mathematical economics and computer science-economics a taste of the first-rate research that is being done in the economics department at Brown. Prerequisites: ECON 1110 or 1130; ECON 1210; ECON 1620 or APMA 1650 or MATH 1610 or 1620; ECON 1629 or 1630. Enrollment limited to 30.

Students intending to write an honors thesis in economics must register for this class. The goal is to help students with the process of identifying and defining feasible topics, investigating relevant background literature, framing hypotheses, and planning the structure of their thesis. Each student must find a thesis advisor with interests related to their topic and plan to enroll in ECON 1970 during the final semester of senior year.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

An opportunity for seniors in economics to pursue a research project in the areas of applied economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

An opportunity for seniors in economics to pursue a research project in the areas of Applied Economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

Techniques of mathematical analysis useful in economic theory and econometrics. Linear algebra, constrained maximization, difference and differential equations, calculus of variations.

This course provides students with skills needed to integrate economic theory, econometric methods, and data management in the analysis of economic problems. Provides a hands-on perspective including assignments designed to derive testable propositions from simple economic models, illustrate the loading, cleaning and merging of complex survey data, and provide experience in the selection and interpretation of basic econometric methods.

ECON 2030. Introduction to Econometrics I.
The probabilistic and statistical basis of inference in econometrics.

ECON 2040. Econometric Methods.
Applications of mathematical statistics in economics. The nature of economic observations, cross-section and time series analysis, the analysis of variance and regression analysis, problems of estimation.

ECON 2050. Microeconomics I.
Decision theory: consumer’s and producer’s theory; general competitive equilibrium and welfare economics: the Arrow-Debreu-McKenzie model; social choice and implementation.

ECON 2060. Microeconomics II.
Economics of imperfection: expected utility, risk and risk aversion, optimization under uncertainty, moral hazard, and self-selection problems. Economics of imperfect competition: monopoly; price discrimination; monopolistic competition; market structure in single shot, repeated and stage games; and vertical differentiation.

ECON 2070. Macroeconomics I.
Consumption and saving, under both certainty and uncertainty; theory of economic growth; real business cycles; investment; and asset pricing.

ECON 2080. Macroeconomics II.
Money, inflation, economic fluctuations and nominal rigidities, monetary and fiscal policy, investment, unemployment, and search and coordination failure.

ECON 2090. Topics in Microeconomics: Decision Theory and Evidence.
Decision theory is the use of axiomatic techniques to understand the observable implications of models of choice. It is central to the incorporation of psychological insights into economics, and provides a vital link between theory and experimental economics. This course covers standard economic models of choice in different domains - choice under risk, choice under uncertainty and intertemporal choice. It looks at key topics from behavioral economics: choice with incomplete information, reference dependent preferences, temptation and self control, the Allais paradox, ambiguity aversion and neuroeconomics. In each case it relates the predictions of theory to experimental data on behavior.

ECON 2130. Topics in Monetary Economics.
Business cycle analysis with an emphasis on heterogeneous-agent economics and the interaction between business cycles and economic growth.

ECON 2160. Risk, Uncertainty, and Information.
Advanced topics in the theories of risk, uncertainty and information, including the following: Decision making under uncertainty: expected and non-expected utility, measures of risk aversion, stochastic dominance. Models with a small number of agents: optimal risk-sharing, the principal-agent paradigm, contracts. Models with a large number of agents: asymmetric information in centralized and decentralized markets. Implementation theory.

ECON 2180. Game Theory.

ECON 2190. General Equilibrium Theory.
No description available.

ECON 2190A. Cooperative Game Theory.
No description available.

ECON 2190B. General Equilibrium Theory.
No description available.

ECON 2190C. Topics in Economic Theory.
No description available.

ECON 2190D. Topics on Game Theory.
First, we will discuss the several elements that characterize a two-sided matching market and the concept of setwise-stability versus core. Then, we will model several of these markets (one-to-one, many-to-one and many-to-many, in the discrete and continuous cases) under the game-theoretic approach and will define for all of them the stability concept, establishing its relationship with the core and the competitive equilibrium concepts. Afterwards, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects! of the one-to-one matching markets.

ECON 2190E. Topics in Economics: Economics and Psychology.
This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about
uncertainty as "Bayesian statisticians". Special emphasis will be put on the implications of "psychologically richer" models on market behavior.

**ECON 2210. Political Economy I.**
An introduction to political economy, focusing especially on the political economy of institutions and development. Its purpose is to give a good command of the basic tools of the area and to introduce at least some of the frontier research topics. The readings will be approximately evenly divided between theoretical and empirical approaches.

**ECON 2320. Economics of Labor and Population.**
This course examines identification issues in empirical microeconomics. Focus on the sensible application of econometric methods to empirical problems in economics and policy research -- particularly labor and population economics. The course examines issues that arise when analyzing non-experimental data and provides a guide for tools that are useful for applied research. The course also emphasizes how a basic understanding of theory and institutions can help inform the analysis. By the end of the course, students should have a firm grasp of the types of research designs and methods that can lead to convincing analysis and be comfortable working with large-scale data sets.

**ECON 2330. Topics in Labor Economics.**
The course introduces students to procedures used to extract evidence from data and to perform rigorous causal inference in order to evaluate public policy on issues such as schooling, the return to education and returns on late intervention programs. Econometric methods, such as Instrumental Variable, Matching, Control Functions, Self Selection Models and Discrete Choice as well as Panel Data Methods, are discussed in detail.

**ECON 2360. Economics of Health and Population.**
An introduction to current research in the economics of health and population. Focuses on studies of empirically-tractable and tested models of individual, household, and firm behaviors and how these behaviors interact through markets and other institutions. Among the subjects considered are the economics of fertility and marriage, the operation of the health services sector, and the implications of population aging.

**ECON 2370. Inequality: Theory and Evidence.**
This course uses economic theory to study the problems of inequality. The emphasis is two-fold: (1) to explain persistent resource disparities between individuals or social groups; and, (2) to assess the welfare effects of various equality-promoting policies. Topics include racial stereotypes, residential segregation, distributive justice, incentive effects of preferential policies, dysfunctional identity, and endogenous inequality due to the structure of production and exchange.

**ECON 2410. Urbanization.**
The first part of the course covers social interactions, productivity spillovers, systems of cities models, urban growth, and rural-urban migration. The second part of the course covers topics such as durable housing, land market regulation and exclusion, and local political economy. Besides covering basic theoretical models, emphasis is placed on working through recent empirical papers on both the USA and developing countries. Prerequisites: ECON 2050 and 2060.

**ECON 2420. The Structure of Cities.**
This course covers standard urban land use theory, urban transportation, sorting across political jurisdictions, hedonics, housing, segregation and crime. Empirical examples are taken primarily from the United States. After taking the course, students will have an understanding of standard urban theory and of empirical evidence on various important applied urban topics. In addition, students will gain practical experience in manipulating spatial data sets and simulating urban models.

**ECON 2450. Exchange Scholar Program.**
**ECON 2470. Industrial Organization.**
Monopolistic competition, market structure and entry, nonprice competition, economics of information.

**ECON 2480. Public Economics.**
Theoretical and empirical analysis of the role of government in private economies. Topics include welfare economics, public goods, externalities, income redistribution, tax revenues, public choice, and fiscal federalism.

**ECON 2510. Economic Development I.**
This course covers issues related to labor, land, and natural resource markets in developing countries, in partial and general equilibrium settings. Topics covered include: The agricultural household model, under complete and incomplete market assumptions; household and individual labor supply, migration, self-employment, and the informal sector; rental market frictions and sharecropping arrangements; and environmental externalities (e.g., pollution, water usage, etc.), and sustainable development.

**ECON 2520. Economic Development II.**
This course deals with the economic analysis of institutions, with a particular focus on community-based institutions in developing countries. Institutions covered in this course includes cooperatives, ROSCAS, networks, marriage and the family.

**ECON 2530. Behavioral and Experimental Economics.**
An introduction to the methodology of experimental economics with an emphasis on experiments designed to illuminate problems in organizational design and emergence of institutions, and experiments investigating the operation of social and social-psychological elements of preference such as altruism, inequality aversion, reciprocity, trust, concern for relative standing, envy, and willingness to punish norm violators. Experiments studied will include ones based on the prisoners' dilemma, dictator game, ultimatum game, and especially the voluntary contribution mechanism (public goods game) and the trust game.

**ECON 2580. International Trade.**
General equilibrium analysis of the theory of international trade and trade policy under perfect competition; trade under imperfect competition; strategic trade policy; trade and growth; and the political economy of trade policy determination. Empirical analysis of trade theories and policy. Additional topics include the theory of preferential trading areas, trade and labor, and the analytics of trade policy reform.

**ECON 2590. Topics in International Economics.**
Advanced theoretical and empirical research topics in international economics emphasizing positive and normative analysis of trade, trade policy and international trading agreements, policy reform and stabilization, exchange rate determination, sovereign debt and currency crises and optimum currency areas.

**ECON 2610. Applied Econometrics.**
Topics in applied econometrics. Both cross-sectional and time series issues will be discussed. Special emphasis will be placed on the link between econometric theory and empirical work.

**ECON 2630. Econometric Theory.**
Standard and generalized linear models, simultaneous equations, maximum likelihood, Bayesian inference, panel data, nonlinear models, asymptotic theory, discrete choice, and limited dependent variable models.

**ECON 2640. Microeconometrics.**
Topics in microeconometrics treated from a modern Bayesian perspective. Limited and qualitative dependent variables, selectivity bias, duration models, panel data.

**ECON 2660. Macroeconometrics and Financial Econometrics.**
Method of Moments (GMM) and Empirical Likelihood (EL). Kernel methods for density and regression estimation. Optimal instruments and local EL. Applications to non-linear time series models, Euler equations and asset pricing.

**ECON 2820. Discrete Dynamical Systems and Application to Intertemporal Economics.**
This course will focus on the qualitative analysis of discrete dynamical systems and their application for Intertemporal Economics.

**ECON 2830. Dynamic Optimization and Economic Growth.**
The role of human capital, income distribution, population growth, technological progress, and international trade in the determination of differences in growth performance across countries. Inequality and economic growth. Technological progress and wage inequality. The transition from stagnation to sustained growth. Evolution and growth.
ECON 2840. Empirical Analysis of Economic Growth. Examines economic growth, focusing on the effects of technological change, fertility, income inequality, and government policy. ECON 2830 is strongly recommended.

ECON 2850. Theory of Innovation-Based Growth. Issues concerning innovation-based growth theory, including scale effects and effects of research and development versus capital accumulation. Interactions between growth and phenomena such as fluctuations, unemployment, natural resources, competition, regulation, patent policy, and international trade.

ECON 2890A. Topics in Macroeconomics, Development and Trade. This is a graduate class that covers selected topics at the intersection of macroeconomics, economic development and trade, for students in the second year of the PhD and above. The leading theme of the class is the determinants of the observed cross-country differences in income per capita and growth rates, with a focus on the long run. We start by reviewing theories where factor markets function perfectly and only aggregates matter. We then move to non-aggregative theories, placing special emphasis on theories of financial frictions. We spend some time studying the stochastic growth model with partially uninsurable idiosyncratic risk.

ECON 2920A. Advanced Econometrics - Microeconometrics from a Semiparametric Perspective. This course is concerned with a rigorous, state-of-the-art introduction to Micro-econometrics. In particular, we will review many of the more recent contributions in Microeconometric Theory. While the focus of this course is theoretical, we will also be concerned with applications and the applicability of these methods. More specifically, we will consider nonparametric regression and density estimation methods, as well as methods and models for binary and categorical dependent variables, for limited dependent variables in general, and for models of selection. We will also discuss more general nonparametric IV models. Prerequisites are: Introductory Econometrics (at the level of the Wooldridge (2002).

ECON 2920B. Topics in Game Theory. No description available.

ECON 2950. Workshop in Econometrics. No description available.

ECON 2960. Workshop in Macroeconomics and Related Topics. No description available.

ECON 2971. Race and Inequality Seminar. This is a workshop primarily for graduate students and faculty in the Department of Economics where original research on issues of race and inequality are presented by external visitors, along with Brown faculty and graduate students. No course credit.

ECON 2980. Reading and Research. Individual research projects. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ECON 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Education

Chair
Kenneth K. Wong

The Department of Education focuses its scholarly and teaching efforts on the study of human learning and development, the history of education, teaching, school reform, and education policy; students study education from a variety of disciplinary perspectives, including anthropology, economics, history, political science, psychology, and sociology. The Department offers a wide range of courses designed for students seeking an understanding of the many facets of education from multidisciplinary perspectives.

For additional information, please visit the department's website: http://www.brown.edu/academics/education/

Education Studies Concentration Requirements

Education Studies offers a broad liberal arts background coupled with a focus on the study of human learning and development, the history of education, teaching, school reform, and education policy. Concentrators choose a focus in either History/Policy (advised by Luther Spoehr) or Human Development (advised by Jin Li). History/Policy provides the historical underpinnings and intellectual skills for students to think critically about education issues in a number of settings. Concentrators in Human Development learn about psychological, social, and cultural processes in a variety of contexts, including schools, families, peer groups, and neighborhoods, particularly in urban settings. Additionally, the department offers teacher certification programs in elementary and secondary education.

Education Studies concentrators design a program that includes ten courses, of which at least eight are taken in the Education Department at Brown University. Within Education Studies, concentrators choose one of the two tracks, each designed to enable students to develop critical and creative skills for addressing issues surrounding children, schools, and education.

Course Requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1100</td>
<td>Introduction to Qualitative Research Methods</td>
<td>1</td>
</tr>
<tr>
<td>or EDUC 1110</td>
<td>Introductory Statistics for Education Research and Policy Analysis</td>
<td>2</td>
</tr>
</tbody>
</table>

At least five Education courses in the chosen area of emphasis.

At least two Education courses outside the chosen area of emphasis.

Two additional, related courses.

Total Credits: 10

Honors

Concentrators seeking to graduate with honors must meet all requirements for the concentration, including a grade-point average established by the Department, and state their plans in writing by the end of their sixth semester. Finally, they must successfully complete EDUC 1990 -EDUC 1991 (Research and Writing in Education) in which they write a 60–70 page thesis under the guidance of a thesis advisor.

Undergraduate Teacher Education Program

Note: The Undergraduate Teacher Education Program is not a concentration. It consists of a series of courses which will prepare students for secondary teacher certification.

The Department of Education, in cooperation with other departments, offers a program of study in teacher education leading to certification in secondary school teaching: the Undergraduate Teacher Education Program (UTEP). This program is offered in English, History/Social Studies, Science (Biology, Chemistry, or Engineering/Physics), and leads to state certification for public school teaching in these fields.

The Undergraduate Teacher Education Program consists of three components: courses in educational theory, courses in the teaching field, and student teaching. These are designed to complement and enhance the liberal education derived from concentration courses and electives.

Students who are interested in completing the Undergraduate Teacher Education Program must confer with the Education Department as early as possible in order to plan a coherent program. The program includes a methods course, offered during the summer in conjunction with teaching at Brown Summer High School, between Semesters VI and VII.

Courses in the teaching field
Because the program emphasizes the importance of knowledge in the teaching field, students are required to complete an academic concentration in the subject which they are preparing to teach or a closely related field. This does not mean that a student must elect a standard concentration in the field. However, such a student must, as part of or in addition to his/her chosen concentration, elect a substantive number of courses in his/her teaching field. Students considering the program should consult with advisors both in the academic department and in the Education Department to design an appropriate program of study that meets Rhode Island state certification requirements and those of many other states. All of the required courses in education must be taken at Brown. None can be transferred for credit from other institutions. Requirements of the program include:

An Education elective.

Education Graduate Program

The department of Education Studies offers graduate programs leading to the Master of Arts in Teaching (M.A.T.) in both Elementary Education and Secondary Education, as well as a Master of Arts (A.M.) in Urban Education Policy.

The two M.A.T. programs are Certification eligible for Rhode Island state teacher certification in elementary (grades 1-6) or secondary education (grades 7-12). Rhode Island is a member of the Interstate Certification Compact (ICC) (http://www.ride.rI.gov/EducatorQuality/Certification/Reciprocity.aspx), which has reciprocal agreements with 44 states.

For more information on M.A.T. admission, program requirements, and state certification requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/education-master-arts-teaching

For more information on the A.M. in Urban Education Policy admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/education-urban-education-policy

Courses

EDUC 0400. The Campus on Fire: American Colleges and Universities in the 1960’s.
Ole Miss, Berkeley, Columbia, and Kent State: just a few of the campus battlegrounds where conflicts over civil rights, the Vietnam War, and other major issues were fought in the 1960’s. Students consult primary and secondary sources about higher education’s role in these conflicts, and why the consequences of its involvement still linger today. Enrollment limited to 20 first year students. FYS WRT

EDUC 0410A. New Faces, New Challenges: Immigrant Students in U.S. Schools.
What challenges do immigrant students face in adapting to a new system of education? By comparing and contrasting the perspectives education stakeholders—students, teachers, administrators, and parents—this course examines a number of key contributions to the study of the immigrant experience in education, as well as a selection of memoirs and films about the pathways these newcomers take in navigating school and (trans)forming their developing identities. Enrollment limited to 20 first year students. FYS

Introduces perspectives on education based in history, economics, sociology, and political science. Students engage foundational texts in each of these fields, using the insights gained to examine controversial issues in American education policy, including policies to address ethnic disparities in student achievement, test-based accountability, class-size reduction, and school choice. Enrollment limited to 20 first year students. FYS

EDUC 0410C. The Literature of Children and Young Adults.
This course considers the literary, dramatic, and visual qualities of the literature of young readers since the 18th century, with a dominant, but not exclusive, focus on literature in English. Topics covered will include dominant themes in visual and textual aspects of these literatures, as well as their history and relationship to societal economics and valuations of children, schooling, and moral codes. Enrollment limited to 20 first year students. FYS

EDUC 0410D. Brown v. Board of Education.
Using sources in history, education, and law this course will explore the landmark Supreme Court case of Brown v. Board of Education which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in Brown and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of Brown and analyze its impact on the civil rights movement, schooling, law, and politics in the late twentieth century and consider its implications for the future. Enrollment limited to 20 first year students. FYS DVPS WRT

EDUC 0410E. Empowering Youth: Insights from Research on Urban Adolescents.
Together, we consider the design, analysis, and interpretation of research on youth in urban settings. In doing so, we examine the roles of power, privilege, and multiculturalism in research. In the experiential component of the course, students engage in fieldwork in a local school or community-based youth organization. As part of their fieldwork, students design and undertake a research project, thereby bridging theory with practice. Reserved for First Year students. Enrollment limited to 20 first year students. Instructor permission required. FYS DVPS WRT

EDUC 0410F. The Mind, Brain, and Education.
What do the brain and body have to do with learning? How can research findings from the brain and biological sciences inform educational practices? This first-year seminar will involve discussion of current research from multiple disciplines (e.g., education, neuroscience, neurobiology, psychology) on topics such as brain development, stress, sleep, rhythms, and emotion/motivation. Mini-lectures will provide students with a basic appreciation of the brain and basic bioregulatory systems. Students will gain an understanding of methods for studying brain/behavior interactions and explore implications of new biological/brain findings for learning and education during the preschool, elementary, middle-school, and high-school years. Enrollment limited to 20 first year students. FYS

EDUC 0450. The University: Defining Ideals and Ideas.
The course examines the concept of the university and the college in America, their foundations and development, and society’s expectations of them and their leaders. Philosophical and religious heritage, ethical and moral issues, and major themes, changes, pressures, and their role of presidents embedded in the landscape and contributions of the university and its shape and future will be addressed.

EDUC 0800. Introduction to Human Development and Education.
Introduces the study of human development and education from infancy through young adulthood. Provides a broad overview of scientific understanding of how children develop and how research is generated in the field. Major topics include biological foundations, mind, cognition, language, emotion, social skills, and moral understanding based on
EDUC 0800. Public Policy and Public School Reform.
Will examine and assess the strategies and policies fashioned-particularly at the state and district level-to address the complex and intractable issues facing public schools.

EDUC 0850. History of Intercollegiate Athletics.
This team-taught course traces the changing place of intercollegiate athletics on the American college campus over the past 150 years. Topics examined include, among others, the historical relationship between academic and athletic pursuits; commercialization and professionalization; the role of the NCAA and of the media; the cult of the coach; and the significance of race, gender, and class. Emphasis on critical reading, active participation in discussion, and developing research and writing skills. The course will meet twice weekly, sometimes as a whole and sometimes in smaller groups, to discuss readings, films, and guest presentations. Enrollment limited to 30.

EDUC 0900. Fieldwork and Seminar in Secondary Education.
Combines study of current educational issues with extensive fieldwork that allows the student to observe how these issues translate themselves into reality on a daily basis. Each student reads and discusses recent writing about educational history, theory, and practice, and observes a class in a local school for 32 hours. The final paper synthesizes reading and observations.

EDUC 1010. The Craft of Teaching.
What is the "craft of teaching"? A wide variety of texts are used to investigate the complexity of teaching and learning. Considering current problems as well as reform initiatives, we examine teaching and learning in America from the perspectives of history, public policy, critical theory, sociology, and the arts. Weekly journals and reading critiques; final portfolio presented to the class.

EDUC 1020. The History of American Education.
This course is an introduction to the history of American education with an emphasis on K-12 public schooling. Using primary and secondary sources, we will explore the development of public schools and school systems, debates over aims and curriculum, conflicts over school governance and funding, and struggles for equity and inclusion over time. We will analyze the relationship between schooling, capitalism, and democracy. Finally, in exploring how different generations have defined and tried to solve educational dilemmas, we'll consider how this history might help us approach education today.

EDUC 1030. Comparative Education.
National systems of formal education, over the past two centuries, have proliferated massively. International organizations, governmental and nongovernmental, have long promoted the universal provision of mass education as central goals in the modern way of life. At the same time, the way children are raised, and the kinds of adults they become, varies considerably. Comparative education seeks to explore this interplay of variety and uniformity. Enrollment limited to 40.

EDUC 1040. Sociology of Education.
The eclectic sociological imagination is turned upon that crucial modern institution: education. Considers formal education as a contemporary institution and schools as organizations both in comparative perspective and in more microscopic ways. Asks what schools and schooling means to society and to children from different social and economic circumstances. Enrollment limited to 50.

EDUC 1050. History of African-American Education.
This course will examine the history of African-American education with particular emphasis on the twentieth century. We will explore African-Americans’ experiences with schooling under slavery and segregation, the struggle for desegregation and equity North and South, and the place of education in African-Americans’ quest for equal rights. We will also consider how the African-American experience with public schooling makes us rethink major narratives of American education, democracy, and equality of opportunity and how an historical understanding of these issues may help us engage contemporary debates.

EDUC 1060. Politics and Public Education.
Who exercises power in public education? This course examines the key institutions (e.g. school districts, states, Congress, and the courts) and actors (e.g. parents, teachers, interest groups, and the general public) shaping American K-12 education in order to understand recent policy trends and their consequences for students. Major policies discussed include school finance, textbook adoption, school accountability, and school choice. Particular attention is given to the federal No Child Left Behind Act of 2001 and debates over its reauthorization. Previous coursework in American politics or public policy is suggested but not required.

EDUC 1070A. Student Teaching: English.
S/NC.

EDUC 1070B. Student Teaching: History and Social Studies.
S/NC.

EDUC 1070C. Student Teaching: Science.
S/NC.

EDUC 1080A. Analysis of Teaching: English.
S/NC.

EDUC 1080B. Analysis of Teaching: History and Social Studies.
S/NC.

EDUC 1080C. Analysis of Teaching: Science.
S/NC.

EDUC 1090. Adolescent Literature.
This course will present a general overview of the historical, socio-cultural, academic, and political issues that provide context for the use and availability of adolescent literature today. Particular attention is paid to issues of reading engagement for striving adolescent readers, issues of access to literacy through adolescent literature, ways that adolescent literature can be paired with the classics, and issues of censorship in American public school classrooms and public libraries. Several special guests from public schools, non-profit organizations, and libraries will join us literally and virtually to add to our perspectives on the debates surrounding adolescent literature. Not open to first-year students.

EDUC 1100. Introduction to Qualitative Research Methods.
Designed for sophomores or juniors concentrating in education studies, but also open to other undergraduates interested in qualitative research methods. Through readings, class exercises and discussions, and written assignments, examines issues related to the nature of the qualitative research methods that are commonly used in education, psychology, anthropology, and sociology. Enrollment limited to 20.

Introduction to the key ideas underlying statistical and quantitative reasoning. A hands-on pedagogical approach utilizing examples from education research and public policy analysis. Topics include the fundamentals of probability, descriptive and summary statistics, statistical inference, bivariate and multivariate regression, correlation, and analysis of variance. Computer-based data analysis reinforces statistical concepts. Enrollment limited to 24.

EDUC 1130. Economics of Education I.
How do we attract good teachers to public schools? What are the economic returns to early-childhood intervention programs? These are just two examples of important education policy questions. This course introduces key concepts of microeconomic theory and uses them to analyze these and other policy questions. Organized around a structured sequence of readings. First year students require instructor permission.

EDUC 1150. Education, the Economy and School Reform.
Changes in the economy have had dramatic negative consequences for those without a college degree. This seminar explores the impact of these changes on workplace organization and the demand for skills, on what is taught in schools, and on school reform. Prerequisites: Education and PP concentrators, EDUC 1130 and EDUC 1110 (or equivalent); Economics concentrators, ECON 1110 or ECON 1130, and ECON 1620. Enrollment limited to 20.
EDUC 1160. Evaluating the Impact of Social Programs.
Does a GED improve the earnings of dropouts? Do stricter gun laws prevent violent crime? Such "causal" questions lie at the heart of public policy decisions. This course examines both the difficulties involved in answering causal policy questions, and research designs that can overcome these difficulties. Prerequisite: EDUC 1110, POLS 1600, ECON 1630, SOC 1100 or equivalent. Enrollment limited to 32.

EDUC 1180. Education for Liberation.
Does education challenge inequality, or (re)produce it? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions at different levels—the classroom, the school, the community, the nation, and the global society. We first examine the proposition that education can be a tool of oppression, and then consider how communities have organized struggles to demand and define a liberatory education. Rather than evaluate any technical school "reform" efforts, we consider attempts at revolutionary alternatives to dehumanizing educational conditions and institutions. Enrollment limited to 25. S/N/C

Examines a century of efforts to improve schooling in the U.S., from John Dewey to Theodore Sizer and E.D. Hirsch, from "social efficiency" to charter schools and No Child Left Behind. How have these movements been affected by the historical contexts in which they operated? Have they produced any lasting results? How, if at all, should current reform movements be informed by the experiences of the past? Enrollment limited to 40.

EDUC 1220. The Anthropology of Education.
Designed to introduce students to the many forms of "education" across the life-span and in different cultures, this course will call on students to step beyond their own schooling. Of particular importance will be the uses of materials, experts, space and time in different educational settings. Film and print materials will allow students to rethink the idea of "learner" and "teacher" in terms of varying needs, goals, and situations.

EDUC 1230. Urban Teachers and Educational Change in Historical Perspective.
Will explore the history of American teachers in the urban context from the rise of the common schools in the mid-nineteenth century to the present. Through the analysis of rich primary and secondary sources, students will examine the ways in which teachers have experienced and, in turn, shaped the schools. Focusing on public elementary and secondary school teachers of the nation's urban centers, this historical inquiry draws from the history of education, labor history, and the history of identity.

EDUC 1260. Emotion, Cognition, Education.
Provides an understanding of the role of emotions in influencing cognitive and social development. Reviews selected topics in the growing area of emotions and social cognition. Discussions focus on critical reviews of the literature and the application of the literature to education. Basic knowledge of the area is not assumed, so students in various areas are invited to participate.

EDUC 1270. Adolescent Psychology.
Provides systematic treatment of the psychological, biological, and sociocultural nature of the adolescent. Both an individual and a collective perspective on the nature of the adolescent and adolescence are used to provide an analytical and comprehensive understanding of the complex environment and psyche of the adolescent. Readings include theoretical and empirical papers from such areas as psychology, sociology, anthropology, and education.

EDUC 1280. International Perspectives on Informal Education.
Internationally, informal learning figures centrally from early childhood through the lifespan. Voluntarily chosen areas of expertise, societally necessary tasks, and interpersonal relationships lead individuals, corporations, and communities to undertake informal education. Central to this course is examination of major means and conditions of such learning in international contexts through four primary themes - play, everyday science, social entrepreneurship, and community collaborations.

EDUC 1290. From Theory to Practice in Engaged Scholarship: Creating Community Based Learning Courses.
This course will explore theories of community-based learning and engaged scholarship within the context of higher education. The course is designed to provide students with an understanding of the possibilities in the teaching and learning exchange to address significant social concerns. Enrollment limited to 20.

EDUC 1430. The Psychology of Race, Class, and Gender.
Focuses on the social construction of race, class, and gender and how this construction influences an individual's perception of self and other individuals. Topics include identity development, achievement, motivation, and sociopolitical development. Enrollment limited to 30. WRIT

EDUC 1450. The Psychology of Teaching and Learning.
Seeks both to demystify the process of teaching and to illuminate its complexities. Assists students with such questions as: What shall I teach? How shall I teach it? Will my students respond? What if I have a discipline problem? Focuses on the teaching-learning process and student behavior, as well as research, theory, and illustrations concerned with classroom applications of psychological principles and ideas. Prerequisites: EDUC 0800 or EDUC 1710. Enrollment limited to 50.

EDUC 1560. Philosophy of Education: Educational Thought and Practice.
Consideration of different philosophies of education (classical, progressive, radical, feminist, multicultural). This iterative inquiry-based collaboration locates knowledge constructively and relationally, emphasizing classroom discussion and presentation, careful reading and writing (including on-line), school-site observation, and midterm and final projects on our philosophies and praxes of education. Enrollment limited to 20. DVPS LILE WRIT

EDUC 1580. Cross-Cultural Perspectives on Child Development.
Focus on role of culture in child development, infancy to young adulthood. Reviews contemporary theories and empirical research to examine various age periods and domains of development. Major topics: infant care, parenting, socialization, gender roles, cognition, moral development, affect, adolescence, and education and schooling in formal and informal settings. Enrollment limited to 50.

Combines intensive study of primary and secondary sources from American history and literature between 1845 and 1980 with extensive consideration of how to teach these topics to secondary school students. Topics include the Cold War, McCarthyism, consumer society, civil rights, the women's movement, Vietnam, and Watergate, often studied through unconventional sources such as popular music, movies, television shows, and fiction. Recommended prerequisite: HIST 0520 or equivalent. Enrollment limited to 20. Instructor permission required.

Despite expending significant energy on education reform in this country and globally, most efforts fail to achieve their lofty ambitions, due to their reliance on "silver bullet" strategies and/or poor execution. This course will focus on management approaches to improving school system performance, enabling students to (a) explore key education reform strategies; (b) adopt a senior management mindset through weekly discussion of case studies; and (c) broaden their perspective through use of domestic and global school system examples. The course is appropriate for juniors, seniors and graduate students, who bring an interest in education and a commitment to active classroom discussion. Enrollment limited to 24.

EDUC 1650. Policy Implementation in Education.
This course offers an "analytical foundation" for students interested in public policy implementation, with particular emphasis on education. Drawing on social science research, the course examines strengths and limitations of several frameworks, including the "policy typology" school of thought, the rational actor paradigm, the institutional analysis, the bargain model, the organizational-bureaucratic model, and the "consumer choice" perspective. Enrollment limited to 20. WRIT
EDUC 1690. Literacy, Community, and the Arts: Theory into Practice. An exploration of ways to improve student literacy skills through the performing arts in area schools. Students read about the theory and practice of literacy and the arts, research national and local initiatives, engage in arts activities, and spend time in area classrooms working with local teachers and artists to draft curriculum materials to be used in summer and school-year programs. Enrollment limited to 20.

EDUC 1700. The Asian American Experience in Higher Education. This course is an inter-disciplinary exploration of Asian Americans in higher education and the impact of their participation on the broader academic landscape. It considers the historical roots of Asian American collective identity; the evolution of Asian American Studies programs; consequences of the model minority myth; and the psychosocial and structural barriers to participation and academic achievement across different Asian American groups as compared to other racial/ethnic minority groups. Enrollment limited to 20. DVPS LILE

EDUC 1710. History and Theories of Child Development. An examination of child development from a historical and theoretical perspective, including key historical figures such as Darwin, Hall, Baldwin, Binet, Freud, Watson, Piaget, Vygotsky, Gesell, McGraw, Bowlby, and Bayley. Explores theoretical conceptualizations of children and adolescents and investigates the representations of children in popular culture, governmental legislation, education, and public policy.

EDUC 1720. Urban Schools in Historical Perspective. Why did urban schools, widely viewed as the best in the nation in the early twentieth century, become "a problem" to be solved by its end? How have urban schools been shaped by social, economic, and political transformations in cities and by other public policies? How have urban schools changed over time? This course will ask these and other questions to explore how historical perspective can help us better understand urban schools today. We will analyze the impact of changes in demographics, urban renewal and suburban development, the political economy of cities, educational expectations, and demands for equity. Enrollment limited to 20.

EDUC 1730. American Higher Education in Historical Context. A study of 350 years of American higher education. The first part traces the growth and development of American higher education from premodern college to the modern research university. The second part examines issues facing higher education today and places them in historical context. Particular attention is given to: the evolution of curriculum; professionalism; student life; and the often competing priorities of teaching, research and service.

EDUC 1740. Academic Freedom on Trial: A Century of Campus Controversies. Inside and outside the classroom—for professors, students, administrators, and others—academic freedom has been contested by forces external and internal to the university. This course focuses on challenges to and changes in the definition and application of "academic freedom" from the end of the 19th century to the present day, with particular attention to academic freedom during times of crisis, especially wartime, and includes consideration of current issues such as speech codes, corporate and government funding of research, and the place of religion on campus. Enrollment limited to 40. WRIT

EDUC 1750. Contemporary Social Problems: Views from Human Development and Education. Explores social problems in terms of contemporary theories and research in human development and education. The class chooses issues for discussion and researches their mechanisms and possible solutions. Demands basic knowledge of theory and research in psychology, sociology, or anthropology, and background in educational issues. Prerequisite: EDUC 0800, 1270, or 1710; or any other two social science courses.

EDUC 1850. Moral Development and Education. Examines contending approaches to moral development and its fostering in the home, school and peer group. Topics include philosophical underpinnings of moral theory, cognitive and behavioral dynamics of moral growth, values climate of contemporary American society, the role of schooling, and variations attributable to culture and gender. Prerequisites: EDUC 0800, 1270, or 1710, or CLPS 0610 (COGS 0630), or CLPS 0600 (PSYC 0810). Enrollment limited to 30. WRIT

EDUC 1860. Social Context of Learning and Development. Focuses on the social environment that contributes to the development of children's minds, language, self-understanding, relations with others, affect, and attitudes toward learning. Examines the period from birth through young adulthood. Topics include children's social interactions, parental expectations and socialization practices, and the influences of family, peers, school, and media. Prerequisites: EDUC 0800, EDUC 1270, EDUC 1430, EDUC 1580, EDUC 1710, CLPS 0610 (COGS 0630), or equivalents. Enrollment limited to 30.

EDUC 1970. Independent Study. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 1990. Independent Reading and Research. Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 1991. Independent Reading and Research. Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 2060A. Methods of Teaching: English. S/NC.

EDUC 2060B. Methods of Teaching: History and Social Studies. S/NC.

EDUC 2060C. Methods of Teaching: Science. S/NC.

EDUC 2070A. Student Teaching: English. S/NC.

EDUC 2070B. Student Teaching: History and Social Studies. S/NC.

EDUC 2070C. Student Teaching: Science. S/NC.

EDUC 2080A. Analysis of Teaching: English. No credit course.

EDUC 2080B. Analysis of Teaching: History and Social Studies. No credit course.

EDUC 2080C. Analysis of Teaching: Science. No credit course.

EDUC 2090. Literacy Across the Curriculum. Focuses on three major areas of pedagogy: literacy across the curriculum, special education, and teaching English Language Learners. Topics include: current theory and practice in the three areas, legal requirements for special education, planning for differentiated instruction, assessment and diagnosis of student skill levels, measuring and reporting student achievement, adapting content for ELLS, selecting and working with texts, and effective vocabulary instruction. Open to MAT students only. S/NC.

EDUC 2110. Summer Practicum and Analysis. Introduces MAT students to elementary school students through work in a unique summer enrichment program for inner city Providence children: Summer Prep readings and seminar meetings focus on arts education; introductions to the teaching of literacy, math and science; curriculum and lesson planning; creating a community of learners; issues of diversity; and physical education. S/NC.

EDUC 2120. Practicum and Seminar in Elementary Education. Students participate in an elementary classroom for 2 1/2 days a week for 12 weeks, participating in all aspects of the school day. Students assume responsibility for individualized instruction, small groups and some daily routines. Examines topics in child development; race, class, ethnic and linguistic diversity; assessment; teaching and learning as well as topics arising from the experiences in classrooms. S/NC.
EDUC 2130. Issues and Trends in Education. Introduces students to a range of topics that define the current debates in education; the competing purposes of state sponsored education; the standards movement; diversity issues and educational outcomes; the reading wars; standardized testing; multicultural and bilingual education; school choice; teacher unions and teacher professionalism. Students read about these issues from multiple perspectives and form their own views of the debates. Open to undergraduate enrollment.

EDUC 2140. Methods and Materials of Math, Science, and Technology. Using a developmental approach, students are introduced to the major concepts and teaching methods used in elementary math and science classrooms. S/NC.

EDUC 2150. Language and Literacy in the Elementary School Classroom. An introduction to Comprehensive Literacy instruction in reading and writing, including strategies for teaching interactive read alouds; shared reading and shared writing; phonics and word work; independent reading workshop; guided reading; writer’s notebooks; writing workshop; and children’s literature via an author study. S/NC.

EDUC 2270. Student Teaching. Provides no fewer than 180 hours of student teaching and observation-equivalent to six semester hours of credit in institutions operating on a semester-hour basis and fulfills the supervised student teaching requirements for elementary school teaching certification in Rhode Island and in ICC member states. S/NC.

EDUC 2280. Seminar: Principles of Learning and Teaching. A critical analysis of the activity of teaching, restricted to and required of students taking EDUC 2270. The course requires curriculum and lesson planning, reflective analyses of student learning and classroom teaching, and places learning and teaching in context with attention to issues of diversity of schools and their student bodies. S/NC.

EDUC 2300. Structures and Systems in Urban Education. The aim of this course is to prepare future education policy leaders to understand, have the tools to investigate and be effective in the context of the many organizations that affect the well-being and ultimate success of urban students. Throughout the course, the city of Providence, along with nearby cities, will be a major "text."

EDUC 2310. Introduction to Educational Research. Intensive six-week course designed to prepare future leaders in urban education policy with a fundamental understanding of basic concepts, techniques and strategies of social science research. The goal is for students to acquire skills and knowledge that enable them to inform the design, implementation and ultimate use of applied research in a policy setting and to appreciate its limitations.

EDUC 2320. Quantitative Research Methods and Data Analysis. The goal of this course is to provide students in the Urban Education Policy course with a foundation and understanding of basic statistical analyses so that they will be able to design and carry out their own research and will be able to use data to inform education policy and practice.

EDUC 2330. Urban Politics and School Governance. This course is a requirement for students of the MA in Urban Education Policy program. It deals with the political science and public policy central question of: How can public institutions be redesigned to improve accountability? Particular attention will be given to the governance and politics in urban public school systems.

EDUC 2340. Human Development and Urban Education. In this course we will learn relevant theories and research in the academic field of Human Development to urban education practice and policy from preschools to high schools. Special emphasis will be placed in areas where there is research convergence and that are relevant to urban populations and settings. Recommended prerequisites: EDUC 0800 or EDUC 1710 or EDUC 1750.

EDUC 2350. Economics of Education II. Introduces students to the main economic theories and related applied work that inform education policy analysis. In so doing, the course combines economic theory, econometric studies, and education and institutional literature in an examination of current issues in U.S. education, particularly those issues that are most relevant to urban education. The course begins with examinations of key concepts and theories from microeconomics, labor economics, and public economics that are most relevant for studying questions in education. After laying this theoretical foundation the course then examines how these theories can illuminate and aid policy analysis around key topics in U.S. education. Open to graduate students only.

EDUC 2360. Policy Analysis and Program Evaluation for Education. Informed education policymaking requires reliable information about the causal effects of government programs and other factors shaping educational outcomes. This course offers an overview of education policy analysis with an emphasis on econometric strategies for measuring program impacts. It aims to make students critical consumers of policy evaluations and to equip them with tools to conduct their own research. Topics covered include the political context for policy research, social experiments, alternative strategies for making causal inferences, and cost-benefit analysis. Prerequisites: EDUC 1110, POLS 1600, SOC 1100, or written permission of the instructor.

EDUC 2370. Internship. Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2380. Internship. Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2450. Exchange Scholar Program.

EDUC 2490. Studies in Education. Independent study; must be arranged in advance. Section numbers vary by instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC XLIST. Courses of Interest to Concentrators in Education. The Education Alliance for Equity and Excellence in the Nation’s Schools

The Education Alliance brings decades of research-based experience to helping educators with their district and school improvement efforts, with special attention to under-performing districts and schools and issues of equity and diversity. The focus is on identifying the needs of students from historically underrepresented groups in order to address achievement gaps that correlate with such factors as race, economic status, English language proficiency, and gender. The Education Alliance works collaboratively with district and school leaders and staff to align research and policy directions within local contexts so that our strategies and recommendations are practical and meaningful. The Education Alliance offers flexible and differentiated professional services to meet various improvement needs, such as Technical Assistance & Consultation, Professional Learning, and Research & Evaluation.

The Education Alliance operates The New England Equity Assistance Center (NEEAC), a program that helps states, districts, and public schools plan and implement policies and practices that promote access to high-quality education for all students. This is one of ten regional centers funded by the U.S. Department of Education under Title IV of the 1964 Civil Rights Act to provide training and technical assistance on education issues related to race, gender, and national origin. At the request of state or district officials, partnerships are formed with schools to find solutions to a variety of equity problems. This work aims to close persistent
achievement gaps, to promote safe schools, and to help all students reach high standards.

The Executive Director of The Education Alliance is Dr. Maria Pacheco. For additional information please visit: www.brown.edu/education-alliance

Egyptology and Ancient Western Asian Studies

Chair

John M. Steele

The Department of Egyptology and Ancient Western Asian Studies is a new department designed to explore what is sometimes called the birthplace of Western civilization. It builds on the strengths of Brown’s former Department of Egyptology, widening the intellectual focus from ancient Egypt to all of Ancient Western Asia, also known as the Ancient Near East, where and when societies first began exhibiting more complex forms of organization such as writing. As a field of higher learning, Egyptology and Ancient Western Asian Studies is represented at most of the world’s great universities. Its establishment at Brown, beginning the 2005-06 academic year, is a product of Brown’s Plan for Academic Enrichment, a commitment to higher learning in the humanities and the sciences.

For additional information, please visit the department’s website: http://www.brown.edu/academics/egyptology/

Egyptology and Ancient Western Asian Studies Concentration Requirements

The concentration in Egyptology and Ancient Western Asian Studies offers students a choice of two tracks: Ancient Western Asian Studies or Egyptology. The department promotes collaborations with other academic units at Brown devoted to the study of antiquity including Archaeology, Classics, Judaic Studies, and Religious Studies. Egyptology and Ancient Western Asian Studies also collaborates with Brown’s Joukowsky Institute for Archaeology and the Ancient World.

Ancient Western Asian Studies Track

Also known as the Near East or Middle East, Western Asia includes present-day Iraq, Syria, Turkey, and other neighboring states, a broad geographic area that was connected in antiquity with the wider world—the Mediterranean, North Africa, the Arabian Peninsula, Central Asia, and the Asian subcontinent. Students will be exposed to the critical study of the ancient cultures of this region (ca. 3400 B.C.E.–100 C.E.) using the tools of archaeology, epigraphy, and historical inquiry. A variety of interdisciplinary, comparative, and theoretical approaches will be introduced to give students the tools and methods to explore this region’s ancient languages and literatures, political and socio-economic modes of organization, art and architecture, religious traditions and other systems of knowledge, such as early science.

The Ancient Western Asian Studies (AWAS) track requires a total of at least ten (10) courses that are determined in the following way:

Introductory courses:

- AWAS 0800 Introduction to the Ancient Near East
- or ARCH 0370 Archaeology of Mesopotamia
- or ARCH 1600 Archaeologies of the Near East
- AWAS 0200 Introduction to Akkadian
- AWAS 0210 Intermediate Akkadian

Foundational Courses (at least one course from each of the following three areas):

- History and Culture of Ancient Western Asia: 1
  - AWAS 1100 Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (WRIT)

Depth Courses:

- Egyptology Track
  - AWAS 2310B Assyriology I (WRIT)
  - AWAS 2310C Assyriology II (WRIT)
  - AWAS 1500 Ancient Babylonian Magic and Medicine
  - AWAS 2600 Topics in Cuneiform Studies
  - Ancient Scholarship in Western Asia: 1
    - AWAS 1600 Astronomy Before the Telescope
    - AWAS 1650 Time in the Ancient World (WRIT)
    - AWAS 1700 Astronomy, Divination and Politics in the Ancient World (WRIT)
    - AWAS 1750 Divination in Ancient Mesopotamia (WRIT)
  - AWAS 2310A Ancient Scientific Texts: Akkadian

Archaeology of Ancient Western Asia: 1

Depth Requirement: At least two additional courses offered in AWAS or ARCH dealing with ancient Western Asia. These courses must be approved by the undergraduate concentration advisor.

Breadth Requirement: At least one course offered in EGYT or ARCH on the archaeology, art, history, culture, or language of ancient Egypt.

Elective: At least one elective course on the ancient world broadly defined. Usually this course will be offered in Ancient Western Asian Studies, Anthropology, Archaeology, Classics, Comparative Literature, East Asian Studies, Egyptology, History, History of Art and Architecture, Judaic Studies, Philosophy, or Religious Studies. The elective course must be approved by the undergraduate concentration advisor.

Total Credits 10

1 This list contains possible offerings but should not be considered exhaustive.

Egyptology Track

The Egyptology track requires a total of at least ten courses. Six of these must be taken by all concentrators, but the remaining four can be chosen from a fairly broad range of courses, to suit individual interests.

Introductory Courses:

- EGYT 1310 Introduction to Classical Hieroglyphic Egyptian
  - & EGYT 1320 Writing and Language (Middle Egyptian I)
  - and Introduction to Classical Hieroglyphic
  - Egyptian Writing and Language (Middle Egyptian II)

- EGYT 1430 History of Egypt I
  - & EGYT 1440 History of Egypt II 1

Depth Courses:

- EGYT 0150 Introduction to Egyptian Archaeology and Art 1

- EGYT 1420 Ancient Egyptian Religion and Magic
  - or ARCH 1625 Temples and Tombs: Egyptian Religion and Culture

Breadth Course - Any course covering the ancient Near East or Mediterranean world outside Egypt, such as:

- AWAS 0800 Introduction to the Ancient Near East
  - or ARCH 1600 Archaeologies of the Near East

- EGYT 1410 Ancient Egyptian Literature 2
Elective Course: Any course germane to ancient Egypt or the ancient Near East or Mediterranean world. Alternative and elective courses must be approved by the undergraduate concentration advisor. Such courses will normally be offered by Egyptology and Ancient Western Asian Studies, the Joukowsky Institute for Archaeology and the Ancient World, Religious Studies, Classics, Judaic Studies, Anthropology, History of Art and Architecture, History, or Philosophy. Concentrators are welcome to take most courses offered by Egyptology and Ancient Western Asian Studies (EGYT and AWAS), Archaeology (ARCH), or related departments, though some may require the instructor’s approval. Concentrators should consult with the concentration advisor to discuss the courses most suitable to their interests.

Total Credits 10
1 Required for all students pursuing the Egyptology track.
2 Or an EGYT or ARCH course in material culture.

Capstone
All students pursuing either the Ancient Western Asian Studies or Egyptology tracks are required to complete a capstone project. The project can take many forms, but the common feature shared among all possible projects will be a public presentation. Typically in the final semester before graduating, the concentrator will give this capstone presentation before faculty, fellow students, and other interested audiences. If the concentrator is writing an undergraduate honors thesis, the procedure for which is detailed below, this work should provide the content for the capstone presentation. Students not writing an honors thesis will base their presentation on a research project more in depth than a class project, though the topic may stem from a course project or paper. The format of the presentation may vary; suggestions range from an illustrated lecture to a video or an installation presented with discussion. Both the content and the format of the capstone project should be discussed with and agreed upon by the concentration advisor no later than the end of the first semester of the senior year.

Honors
It is possible for students to receive the A.B. in Ancient Western Asian Studies or Egyptology with departmental honors. To do so students will need to write a senior honors thesis according to the criteria and procedure outlined below.

Eligibility and Approval
At the beginning of the second semester of the junior year, the student should begin thinking about potential topics and consult with the department’s concentration advisor. Students seeking to graduate with honors will have received strong grades in concentration courses. In practice this means a preponderance of grades of A in concentration courses. Students who are considering graduating with honors are strongly encouraged to take concentration courses for a letter grade. If the concentration advisor agrees that a senior honors thesis may be undertaken, the student must obtain (1) the agreement of two faculty members (at least one from the department) to serve as readers as well as (2) the approval of the department chair. If all parties agree that an honors thesis may be undertaken, the student must submit a working bibliography to the potential readers by the end of the semester (due 5/15).

Procedure
1. In the first semester of the senior year, the student will register for Individual Study Project. Note that this course is in addition to the ten courses required for the concentration. The student will submit a working title and outline, as well as a one-page abstract of the intended project by the end of the first month of the semester (due 9/30). The student will then work with the readers to prepare a detailed outline of the thesis with accompanying bibliography. Both readers must approve the thesis plan, and the student must then submit a partial draft (at least one major section) before the end of the Fall semester (due 12/15).
2. In the second semester of the senior year, the student will register for Individual Study Project. Note that this course is in addition to the ten courses required for the concentration. This stage will normally involve meetings with the first reader twice a month, and with the second reader monthly, to discuss the on-going research and writing of the thesis.
3. A complete draft of the thesis must be submitted to the honors committee by 3/15. As a rule of thumb, the thesis should be not more than 100 pages in length, including bibliography.
4. Three bound copies of the final version of the honors thesis must be deposited by 4/15.
5. During a half-hour session during the final exam period, the student will give a capstone presentation defending the thesis in front of the thesis committee as well as any other faculty and students who wish to attend.

Egyptology and Ancient Western Asian Studies Graduate Program
The Department of Egyptology and Ancient Western Asian Studies offers two tracks leading to one Doctor of Philosophy (Ph.D.) degree: Egyptology and Ancient Western Asian Studies. The department offers a Master of Arts (A.M.) degree as an option after two years of study, but does not admit applicants into the non-Ph.D. program.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/egyptology-and-ancient-western-asian-studies

Courses

Ancient Western Asian Studies

AWAS 0200. Introduction to Akkadian.
This course is an intensive introduction to the writing system, grammar and vocabulary of Akkadian, the language of ancient Mesopotamia (modern Iraq). Akkadian is the earliest known Semitic language (related to Arabic and Hebrew), first written over four thousand years ago, and the language of some of the oldest written myths, historical documents, omens, magical formulas and even love poems in the world. Students will learn the classic Old Babylonian dialect (ca. 1800 BCE), and read selections from texts in the original language. No prerequisites.

AWAS 0210. Intermediate Akkadian.
This course is the second semester of an intensive, yearlong introduction to the Akkadian (Babylonian/Assyrian) language. Students will deepen their knowledge of the cuneiform writing system and continue to develop their grasp of Akkadian grammar. Readings from Mesopotamian texts in the original language will include, among others, selections from the Laws of Hammurapi, Assyrian historical texts (such as the accounts of Sennacherib’s siege of Jerusalem), and the story of the Flood from the Standard Babylonian Epic of Gilgamesh. Prerequisite: Introduction to Akkadian (AWAS0200) or permission of the instructor.

From the Hanging Gardens of Babylon to the Tower of Babel to Babylon 5, the city of Babylon in ancient Iraq holds an important place in contemporary culture. But how much of what is commonly known of Babylon is true? In this course we will explore the ancient city of Babylon through its texts and archaeological remains and investigate the ways Babylon has been viewed over the past two thousand years. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

This seminar explores the relationship between monsters and civilization, considering what exactly it is that monsters do for us; why we create, deploy, and ultimately destroy them; and what they tell us about the peoples among whom they sprang up and roamed. Emphasized is the developing civilization in Mesopotamia, and the place and functioning of monsters and demons in the visual arts and literary contexts, as well as in

Brown University 305
the worldview, of the early cities of that region. Enrollment limited to 20 first year students. FYS

Images tell stories that carry us to imaginary worlds. A story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity public monuments displayed visual narratives that animated public spaces, enthralled audiences and delivered state ideologies. This course involves reading narrative imagery from the Middle East and East Mediterranean including magical hunt scenes in prehistoric caves, political tales on Mesopotamian relief sculpture, visions of paradise in Egyptian tombs, Aegean frescoes and Assyrian reliefs of exotic landscapes. Using contemporary perspectives on art, we will explore the material power and everyday significance of pictorial representations as intimate spectacles. Enrollment limited to 20 first year students. FYS LILE WRIT

AWAS 0800. Introduction to the Ancient Near East.
This course offers an introduction to the study of the political, social and cultural history of the ancient Near East, from prehistory to the end of the Iron age (ca. 330 BC). Both literary sources and archaeological evidence are examined as relevant. Near East is understood here in its widest geographic extent, including primarily the Mesopotamian lowlands, Iranian and Syro-Anatolian highlands, as well as the Levantine coast. The course not only offers a foundational survey of the historical developments in the region, but also addresses the broader methodological and historiographic problems involved in Near Eastern studies. State formation and the development of complex societies, cult practices and cuneiform literary traditions, art, architecture and material culture, issues of landscape and settlement systems, agricultural production, regional and interregional trade, and craft production will constitute the central issues in the course. WRIT

AWAS 1100. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia.
Creation, the Flood, the Tower of Babel—well-known myths such as these have their origins in ancient Mesopotamia, the land between the Tigris and Euphrates Rivers. Using both ancient texts in translation and archaeology, this course will explore categories of Mesopotamian culture labeled "myth" and "religion" (roughly 3300-300 BCE), critically examining the ancient evidence as well as various modern interpretations. Topics will include myths of creation and the flood, prophecy and divination, death and the afterlife, ritual, kingship, combat myths and apocalypses, the nature and expression of ancient religious experience, and representations of the divine. There are no prerequisites. WRIT

The course will focus on the cultural and religious-historical interpretation of physical displacements among sacred places, including urban processions, visits to temples and journeys to sacred places within the context of the Ancient Near Eastern religions. We will attempt to sketch a map of the holy centers and cultic itineraries, focusing on case studies from Babylonia, Assyria and Syria from the third to the first millennium BC as well as comparative case studies from surrounding cultures. These topics will be explored with an emphasis on how written and archaeological sources can be interpreted with the help of theoretical literature. WRIT

AWAS 1300. The Age of Empires: The Ancient Near East in the First Millennium BC.
The first millennium BC saw a series of empires vying for control of the Near East: the Assyrians, the Babylonians, the Persians, and the Greeks of Alexander the Great and his successors. The course will explore the political, social and cultural history of Mesopotamia and the Ancient Near East under these empires, using evidence drawn from archaeology and ancient texts (in translation).

AWAS 1400. Introduction to Sumerian.
Over five thousand years ago the first cities emerged in southern Iraq, and around that same time writing was invented, most likely to record the language we now call Sumerian. Even after it was no longer spoken, Sumerian became a powerful conduit for the region’s cultural heritage, preserving its literature and religious traditions for millennia. In this course students will learn the fundamentals of Sumerian grammar, develop a basic working vocabulary, and explore the cuneiform script through weekly readings in original texts. Selections will come from royal inscriptions, court cases, myths, magical incantations, and even ancient schoolwork. No prerequisites. Enrollment limited to 20.

AWAS 1500. Ancient Babylonian Magic and Medicine.
A survey of ancient magic and medicine focusing on Mesopotamia (present-day Iraq, ca. 2500-300 BCE), with an emphasis on beliefs about the body, health, illness, and the causes of disease, such as witchcraft or angry gods. Topics will include the training of healers, exorcists, and herbalists; concepts of contagion and plague, modalities of treatment, incantations, prayers, and empirical remedies like prescriptions; ancient perceptions of problems like sexual dysfunction, the perils of pregnancy, tooth decay, epilepsy, and mental illness. Readings will be drawn from ancient texts (in translation), archaeology, and parallels with ancient Egypt, Greece, Rome, and the Bible. No prerequisites. Not open to first year students. WRIT

AWAS 1600. Astronomy Before the Telescope.
This course provides an introduction to the history of astronomy from ancient times down to the invention of the telescope, focusing on the development of astronomy in Babylon, Greece, China, the medieval Islamic world, and Europe. The course will cover topics such as the invention of the zodiac, cosmological models, early astronomical instruments, and the development of astronomical theories. We will also explore the reasons people practiced astronomy in the past. No prior knowledge of astronomy is necessary for this course.

AWAS 1650. Time in the Ancient World.
Time plays many roles in civic and everyday life: calendars provide a way of regulating activities ranging from gathering taxes to knowing when to perform religious rituals. This course will provide an introduction to the way time was measured, used, regulated and conceived in the ancient world. We will cover topics such as the calendars used in Mesopotamia, Egypt, Greece and China, sundials and other instruments used for measuring time in the ancient world, and the way time is used in scientific and non-scientific texts. WRIT

AWAS 1700. Astronomy, Divination and Politics in the Ancient World.
This course will explore the relationship between astronomy, divination and politics in the ancient world. The sky provided ancient cultures with many possibilities for observing occurrences that could be interpreted as omens. In many cultures, celestial omens were directed towards the king and his government. As a result, interpreting and controlling celestial omens became an important political activity. In this course, we will explore how and why astronomical events were used politically in ancient Mesopotamia, the Greco-Roman world, and ancient and medieval China. No prior knowledge of astronomy is necessary for this course. WRIT

AWAS 1750. Divination in Ancient Mesopotamia.
The interpretation of natural events as portents of good or bad outcomes played an important role in religious, political, scholarly and everyday life in ancient Mesopotamia. In this course we will study Mesopotamian omen literature from textual, scientific, philosophical and cultural viewpoints in order to understand how divination operated and what it was used for. WRIT

AWAS 2120. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler. Prerequisite: AWAS 0200. Open to graduate students only.

AWAS 2130. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler.

AWAS 2310A. Ancient Scientific Texts: Akkadian.
Readings and analysis of a major scientific text in Akkadian. Prerequisite: AWAS 0200 or 0210. Open to graduate students only.

AWAS 2310B. Assyriology I.
The kings of Babylonia and Assyria took every opportunity to boast about their military victories, successful hunts, the completion of new cities, and the building and decoration of temples and palaces. But is theirs the only possible version of Mesopotamian history? This course examines episodes in the history of Babylonia and Assyria (ca. 2400-500BCE) by looking at the political and social relationships among kings, political elites,

**Egyptology**

**EGYT 1200. Archaeology of Ancient Egypt.**
A general survey of the archaeology of ancient Egypt in prehistoric and Pharaonic times. Covers such areas as the development of private and royal funerary monuments, private and royal dwellings, and temples. Attention is also paid to the principles of Egyptian art and architecture and, where appropriate, to archaeological connections with the surrounding cultures. Offered in alternate years.

**EGYT 1210. Archaeology of Ancient Egypt.**
See Archaeology of Ancient Egypt (EGO120) for description.

**EGYT 1310. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I).**
Much of this two-semester sequence is spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology—essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. No prerequisites.

**EGYT 1320. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II).**
Continuation of a two-semester sequence spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology - essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. Prerequisite: EGYT 1310.

**EGYT 1330. Selections from Middle Egyptian Hieroglyphic Texts.**
Readings from the various genres of classical Egyptian literature, including stories and other literary texts, historical inscriptions, and religious compositions. Students will be expected to translate and discuss assigned texts. Prerequisite: EGYT 1310, 1320.

**EGYT 1340. Selections from Middle Egyptian Hieratic Texts.**
Introduction to the hieratic script and readings from a variety of hieratic documents, including literary compositions, letters, and religious texts. Students will be expected to translate and discuss assigned texts. Prerequisite: EG 131, 132 (EGYT 1310, 1320).

**EGYT 1410. Ancient Egyptian Literature.**
A survey of one of the most intriguing aspects of ancient Egyptian culture. Readings (in translation) of many of the most significant literary documents that survive from Egypt. Presentation of a reasonable amount of historical perspective. Class discussions concerning the nature, purpose, quality, and effectiveness of the works read. Two term papers. No prerequisites. Offered in alternate years. WRIT

**EGYT 1420. Ancient Egyptian Religion and Magic.**
An overview of ancient Egyptian religion from both a synchronic and diachronic perspective. Examines such topics as the Egyptian pantheon, cosmology, cosmogony, religious anthropology, personal religion, magic, and funerary beliefs. Introduces the different genres of Egyptian religious texts in translation. Also treats the archaeological evidence which contributes to our understanding of Egyptian religion, including temple and tomb architecture and decoration. Midterm and final exams; one research paper. WRIT

**EGYT 1430. History of Egypt I.**
A survey of the history and society of ancient Egypt from prehistoric times to the end of the Eighteenth Dynasty (ca. 3000-1300 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history. WRIT

**EGYT 1440. History of Egypt II.**
A survey of the history and society of ancient Egypt from the Ramsesside Period to the Roman conquest (ca. 1300-30 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history.
Continuation of EGYT 1430, 1440 (not prerequisites). Covers the Third Intermediate and Late Periods (ca. 1000-332 B.C.E.), from the end of the New Kingdom to Alexander’s conquest. Characterized by internal conflict and long intervals of foreign domination, this era, is often described as a period of decline, but closer study shows it to be eventful and rich in documentation. Offered in alternate years.

The course will cover Egypt’s 25th Dynasty (728-657 BC), when rulers of Nubia, located in the region of modern Sudan, added Egypt to their territories. Using a wide range of textual and archaeological evidence, students will learn about the history of famous ‘black pharaohs’ such as Taharqa and study some of Africa’s most impressive archaeological remains. This fascinating period is not well understood and has often been afflicted in the past by racist, colonialist scholarship; using primary sources and recent theory on ethnic identity, this class will re-examine the complex and changing relationship between Egypt and Nubia.

EGYT 1460. History of Egypt IV. The Age of Cleopatra.
Continuation of EGYT 1430, 1440, and 1450 (not prerequisites). A survey of the history and society of ancient Egypt from Alexander’s conquest to the Arab Conquest, ca. 332 B.C.E.-A.D. 600. Covers the Ptolemaic (323-30), Roman (30 B.C.E.-ca. A.D. 300), and Byzantine (ca. A.D. 300-640) periods. Focal point and pivot is the Ptolemaic period, from Alexander the Great to Cleopatra (332-30 B.C.E.). Offered in alternate years.

EGYT 1465. Daily Life in Ancient Egypt.
Ancient Egypt is remembered for its grand temples and enduring tombs. Histories too often favor these examples of grandeur, forgetting the daily lives of non-royal ancient Egyptians. This class will investigate the daily lives of these underrepresented ancient Egyptians - craftsmen, servants, women, children - and address concerns such as illness, status, economy, magic and death. Additionally, we will look at the individual and discuss sexuality, love, style and fashion, religious practice, and the family. Class format will include lectures and discussions, presentations, and tours through virtual temples which will enable us to reconstruct the daily lives of Ancient Egyptians.

EGYT 1470. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods.
The history of Egypt may be famous for the tombs, pyramids and mummies of the Pharaonic periods. This course, however, offers a vision of a different Egypt, a later Egypt; one that evolved from the traditions of the past but was infused by Christianity, Islam, Arabic, and the emergence of one of the world’s great cities: Cairo. Students will experience the heritage of Egypt that is contained in the mosque of al-Azhar, the monasteries of the Egyptian desert, and the pageantry and ritual of a new set of ruling elites. At the same time they will understand the complexities of this land which Egyptians refer to as Umm al-Duniya “Mother of the World”.

EGYT 1480. Egypt in the Global World.
From the 4th to the 2nd millennium BC we see Ancient Egypt as part of a wider world in the Eastern Mediterranean. Egypt had diplomatic and trade contacts with the major powers and smaller political entities of this period as well as armed conflicts. These contacts left an abundance of material evidence in Egypt in the archaeological and epigraphical records such as foreign luxury items and pottery, and depictions of foreigners in Egyptian tombs and temples. The course will shed light on the varying intensity and character of the relationship between Egypt and her neighbors in the Levant, Nubia and Libya and wider Eastern Mediterranean world.

EGYT 1490. Calendars and Chronology in Ancient Egypt and the Ancient World.
Time is the dimension of history. Chronology studies how we know when events happened. Chronology is much more important to “BC history” than to “AD history.” History books state that the great Ramses II ruled around the thirteenth century B.C.E. But how do we know this? The focus of this class is on the answers to such questions through the study of the foundations of the history of Egypt specifically and of the ancient world in general. Some prior knowledge of Egyptian language or civilization might be handy but is by no means required.

EGYT 1500. Ancient Egyptian Art and Architecture.
Ancient Egyptian art and architecture had a remarkably long history, and much that was produced is amazingly well preserved. This course will focus on the inception and development of these material expressions of high culture through detailed studies of monumental buildings and decorated private tombs, as well as the sculpture, painting, and minor arts from the Predynastic period through the end of the Middle Kingdom (c. 3700-1790 BC). Enrollment limited to 20.

EGYT 1510. Ancient Egyptian Art II.
Considers the art of ancient Egypt’s New Kingdom or Empire Period (1500-1100 B.C.E.). The relief carving and painting of Theban temples and tombs are studied in detail, and the developments leading to the revolutionary Amarna style of art is carefully analyzed. Decorative arts, Tutankhamun’s treasures, and recent exciting discoveries are all surveyed.

EGYT 1520. The Archaeology of Ancient Egyptian Household and Settlement.
Survey of the primary settlement remains from the Pharaonic Period of ancient Egypt, addressing the practices and problems in settlement and household archaeology. Not open to first year students.

EGYT 1550. Ethnic Identity in Graeco-Roman Egypt.
Egypt under Greek and Roman rule (from c. 332 BC) was a diverse place, its population including Egyptians, Greeks, Jews, Romans, Nubians, Arabs, and even Indians. This course will explore the sometimes controversial subject of ethnic identity and its manifestations in the material and textual record from Graeco-Roman Egypt, through a series of case studies involving individual people and communities. Topics will include multilingualism, ethnic conflict and discrimination, legal systems, and gender, using evidence from contemporary texts on papyrus as well as recent archaeological excavations and field survey projects.

EGYT 1910. Senior Seminar.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 1920. Senior Seminar.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 2210. Introduction to Coptic.
Coptic, the last stage of the ancient Egyptian language, was written with essentially Greek alphabetic characters. An introduction to Sahidic, which is perhaps the best represented of the Coptic dialects. Sahidic grammar is explained, and some texts, mainly of a biblical and patristic nature, are read. Open to undergraduates with the consent of the instructor. No prerequisites, but a knowledge of Middle Egyptian or Greek would be helpful.

EGYT 2310. History of the Ancient Egyptian Language.
Diachronic survey of ancient Egyptian from Old Egyptian through Coptic, covering changes in phonology and grammar and analyzing the processes through which these changes took place. Course requirements are short research papers to be presented in class and a final examination. Previous course work in at least one stage of the Egyptian language required; knowledge of Late Egyptian, Demotic (grammar) or Coptic preferable. Prerequisites: EGYT 1310 and EGYT 1320, plus either EGYT 2210, EGYT 2410 or EGYT 2610.

EGYT 2410. Late Egyptian.
Introduction to the grammar of the third historical phase of ancient Egyptian and readings from its various genres, including literary texts, letters, historical inscriptions, and tomb-robbing papyri. Students will be expected to translate and discuss assigned texts. Prerequisites: EGYT 1310, 1320.

EGYT 2420. Nubian Texts.
Translation and discussion of texts from the period of Nubian rule in Egypt. Open to students concentrating in Egyptology. Prerequisites: EGYT 1310, 1320, 1330 and 2410, or instructor permission.
EGYT 2510. Social Life in Ancient Egypt.
This course will provide a valuable opportunity to link theory and data innovatively. Taking the lifestyle as its structure, it covers Egyptian life from conception to death and the afterlife, drawing together a range of data sources, such as material culture, iconography, textual data, and human remains. WRIT

EGYT 2610. Introduction to Demotic.
This course begins with discussions and exercises in the grammar and peculiar script of this late stage of the Egyptian language, followed by readings of actual ancient texts, including The Instructions of Onkhheashonkhy, The Petition of Petiese, and The Story of Setne Khaemwas. Knowledge of Demotic remains essential for a proper understanding of Egypt during the Saite, Persian, Ptolemaic, and Roman periods. Open to undergraduates with consent of instructor. Prerequisites: EGYT 2410 or 2210.

EGYT 2810. Old Egyptian.
Introduction to the grammar of the first historical phase of ancient Egyptian and readings from its two primary genres, the Pyramid Texts and autobiographical inscriptions. Students will be expected to translate and discuss assigned texts. Prerequisites: EG 131, 132 (EGYT 1310, 1320).

EGYT 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

EGYT 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

EGYT XLIST. Courses of Interest to Concentrators in Egyptology.
Fall 2013
The following courses may be of interest to Egyptology concentrators. Please see the sponsoring department for the time and location of each course.

CLAS 1120Q Seven Wonders of the Ancient World

English
Chair
Philip Gould

Our department fosters the open understanding of literatures and cultures in English. We promote original work on new questions of history, criticism, theory, and analysis. We invite practices of reading and writing that challenge the ongoing creation of knowledge in our fields. English is among the largest undergraduate concentrations at Brown, and graduates of our Ph.D. program are recognized for their scholarship across the globe. Our nonfiction writing program opens up the useful diversity of styles and modes of writing. For additional information, please visit the department’s website: http://www.brown.edu/academics/english/

English Concentration Requirements
English concentrators analyze language and form in the ongoing history of literatures in English, learning how literature shapes and is shaped by the world. We promote original work on new questions of history, criticism, and theory. And we invite practices of reading and writing that challenge the creation of knowledge in our fields. The curriculum includes courses from the range of literatures in English and in addition to the regular concentration offers a “track” in Nonfiction Writing, which attends to critical writing, the research paper, journalism, creative writing, and nonfiction writing. One of the largest humanities concentrations at Brown, English provides a strong foundation for a liberal education and for careers in many sectors of the changing spectrum of employment: the media, teaching, finance, government, corporate research and administration. English concentrators routinely go on to law, medical, and professional schools as well as to graduate education in literature and the arts.

About the Concentration
Through the study of literature in English, concentrators develop skills in critical reading, thinking, and writing in preparation for a wide range of professions and careers including teaching, writing, publishing, media, medicine, law, and business. The concentration requirements aim to provide students with a coherent sense of the history of English literature from Anglo-Saxon times to the present. English concentrators have considerable latitude to choose the specific courses that will meet the requirements and we expect these choices to be informed by consistent consultation with a faculty advisor. Writing skills are an especially important focus of the English concentration. Through a variety of exercises from the short analytical essay to the longer research paper English concentrators are given a range of opportunities to sharpen their writing. We encourage students interested in concentrating in English to come into the department offices at 70 Brown Street and speak with a concentration advisor. Students in English courses who are considering an English concentration are welcome to make an appointment to speak with their instructor.

Concentration programs must be approved by a concentration advisor. To declare a concentration, students who have not previously filed a paper concentration form must fill out an online Concentration form via ASK and enter their plan of study indicating the requirements that each course fulfills. Students who declared their English Concentration in 2010-2011 or earlier may choose to fulfill the requirements for the previous version of the concentration (for details please see the English Department website).

Concentration Requirements (10 courses at the level of 0300 or above):
1. Two courses in Area I: Medieval and Early Modern Literatures: 2
2. Two courses in Area II: Enlightenment and the Rise of National Literatures: 2
3. Two courses in Area III: Modern and Contemporary Literatures: 2
4. One theory course: 1
5. Three electives: 3

Total Credits: 10

1 Five courses must be 1000-level courses. With advisor approval, two of the ten required courses may be taken in departments other than English.
2 As many as two 1000-level courses dealing primarily with the practice of writing, rather than the interpretation of literature, may be counted as electives.

All substitutions and/or exceptions must be approved by the concentration advisor in consultation with the Director of Undergraduate Studies. A substitution or exception is not approved until specified in writing in the student’s concentration file housed in the English Department.
English Concentration -- Nonfiction Writing Track (11 courses at the level of 0300 or above)

The English concentration also includes a Nonfiction Writing Track. The requirements are the same as 1 through 4 above plus one English literature course emphasizing the genre of nonfiction writing and three 1000-level Nonfiction Writing courses for a total of eleven courses.

Honors in English

Requirements are the same as those for the regular concentration, with the following additions:

Honors candidates must complete at least three upper-level seminars or comparable small courses and complete ENGL 1991 and ENGL 1992. Honors candidates must also earn more A’s than B’s in courses taken as part of the English concentration (or receive the equivalent faculty evaluation on a Course Performance Report for courses taken S/NC).

Applicants for Honors must have two letters of recommendation submitted to the Honors Advisor, a writing sample, and a one-page description of their proposed topic signed by the faculty member who has agreed to serve as the director of their thesis.

Honors in Nonfiction Writing

Requirements are the same as those for the Nonfiction Writing Track. Eligible Honors applicants must have completed three upper-level seminars, two of which must be nonfiction writing seminars. Honors candidates must successfully complete ENGL 1993 and ENGL 1994. Honors candidates must also earn more A’s than B’s in courses taken as part of the English concentration (or receive equivalent faculty evaluation in a Course Performance for courses taken S/NC).

Applicants for Honors in Nonfiction Writing must have two letters of recommendation submitted to the Nonfiction Honors Advisor, a writing sample, and a one-page description of their proposed topic signed by the faculty member who has agreed to serve as the director of the thesis.

English Graduate Program

The department of English offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/english

Courses

ENGL 0100. Introduction of Modernism.

Designed to introduce students to literary modernism, this course will approach modernism as a formative social, historical and artistic moment. Students will both read modernist literary works and explore the culture of modernism. Questions asked will be: what is the interaction between the visual arts and literature? How can we think about the relationship between modernism and political movements of the early-twentieth century, especially Fascism? And, finally, how can we track the influences and echoes of modernism throughout the twentieth century? Authors include T.S. Eliot, Virginia Woolf, James Joyce and Katherine Mansfield.

ENGL 0110. Critical Reading and Writing I: The Academic Essay.

An introduction to university-level writing. Students produce and revise multiple drafts of essays, practice essential skills of paragraph organization, and develop techniques of critical analysis and research. Readings from a wide range of texts in literature, the media, and academic disciplines. Assignments move from personal response papers to formal academic essays. Fall 2013 sections 01, 02, 03, 08, 09, and 12; and spring 2014 section 01 are reserved for first year students. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0130. Critical Reading and Writing II: The Research Essay.

For the confident writer. Offers students who have mastered the fundamentals of the critical essay an opportunity to acquire the skills to write a research essay, including formulation of a research problem, use of primary evidence, and techniques of documentation. Topics are drawn from literature, history, the social sciences, the arts, and the sciences. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0160. Journalistic Writing.

An introduction to journalistic writing that focuses on techniques of investigation, reporting, and feature writing. Uses readings, visiting journalists, and field experience to address ethical and cultural debates involving the profession of journalism. Writing assignments range from news coverage of current events to investigative feature articles. Writing sample required. Class list will be reduced to 17 after writing samples are reviewed during the first week of class. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0180. Introduction to Creative Nonfiction.

Designed to familiarize students with the techniques and narrative structures of creative nonfiction. Reading and writing focus on personal essays, memoir, science writing, travel writing, and other related subgenres. May serve as preparation for ENGL 1180. Writing sample may be required. Fall 2013 sections 02 and 04; and spring 2014 sections 01, 03, and 05 are reserved for first-year students. Spring 2014 section 06 is reserved for first year students and sophomores. Enrollment limited. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0200V. Shakespeare Rewrites Shakespeare.

How did Shakespeare’s drama develop thematically, rhetorically, and historically over the span of his literary career? This course offers students a representative introduction to Shakespeare’s work, paying particular attention to how later plays reinvent linguistic, historical, and theatrical materials worked out in earlier plays. Plays include Othello and The Winter’s Tale; Romeo and Juliet and Two Gentlemen of Verona; and Titus Andronicus and Hamlet. Requirements include critical essays, an in-class presentation, and a final examination.

ENGL 0201B. Rebels with a Cause: The Figure of the Rebel from Marlowe to Milton.

Examines representations of the rebel in early modern literature as a figure who is fundamental to definitions of social order. To what extent is the rebel integral to the social, political, and sexual structures s/he challenges? What do God and Satan, king and traitor, Puritan and sodomite have in common? Readings include Marlowe, Kyd, Shakespeare, Middleton, Webster, Marvell, Hobbes, and Milton. Enrollment limited to 17 undergraduate students. Instructor permission required.

ENGL 0201C. Birds, Beasts, and Bots: American Literature between the Wild and the Wired.

19th- and 20th-century American writers have often contemplated the relation of human beings to nature and machinery. This course examines the diverse ways American writers of this period have represented human interactions with natural elements (animals, wilderness) and artificial components (robots, factories, cities). We will focus especially on the question of whether human life is characterized in these texts as increasingly natural or programmed. Readings include works by Thoreau, Dickinson, Crane, London, Sinclair, Stevens, Eliot, Bradbury, Dick, and Dillard. Enrollment limited to 17 undergraduate students.

ENGL 0201D. Feeling Queerly.

Explores “queerness” in all of its connotations in American and European literature from the late nineteenth to the mid-twentieth century. Analyzes the ways that a range of embodied feelings and emotional states (like shame, disgust, envy, embarrassment, and passivity) shapes formal aspects of literary works and effectively hinders speech, action, and self-expression. Authors include Melville, Woolf, Stein, Beckett, Baldwin, Crane, Genet. Enrollment limited to 17 undergraduate students.

ENGL 0201E. World Wide: Globalization from Shakespeare to Rushdie.

Explores the idea of globalization and its resonances with 17th and 18th century conceptions of a global network. How did early modern authors
treat the ideas of cosmopolitanism, competing loyalties between home and the world, conflicts between self and other? How do contemporary authors take up or respond to these issues? Readings include Shakespeare, Milton, Dryden, Swift, Kant, Amitav Ghosh, and Salman Rushdie. Enrollment limited to 17 undergraduate students.

ENGL 0201F. Ravishing Verse: The Lyric and Spiritual Crisis. This seminar explores the tension between the language of the spiritual and the language of the sensual in lyric poetry. How does a poet’s inner struggle over questions of belief engage the individual with the larger community? How does this struggle confront the lyric tradition? Poetry and prose readings will include Spenser, Donne, Herbert, Marvell, Milton, Hopkins, Mahon, and Longley. Enrollment limited to 17 undergraduate students.

ENGL 0201G. Killing them Softly: Satire and Stereotype in African-American Literature. Examines the possibilities and limitations of satire within the field of 20th-century African-American literature. We will consider the ways in which the satirical form is deployed by writers seeking to examine questions of authenticity, community, and stereotypical representation. Authors include Schuyler, Ellison, Killens, Reed, Beatty, and Everett. Screenings of works by Spike Lee and Dave Chappelle. Enrollment limited to 17 undergraduate students.

ENGL 0201H. Green Shakespeare: Literature, Ecology, and the Nonhuman. How did Renaissance writers conceive of nature, human autonomy, and the nonhuman agencies of the environment? What ecological futures might they invite us to imagine? This course seeks to address these and other questions by exploring the strange and paradoxical writings of some of English literature’s earliest ecological thinkers. Readings will include a variety of materials from plays (The Tempest, Titus Andronicus, The Winter’s Tale) to poetry (Donne, Milton, Marvell), history, and theory (eco-criticism, animal studies, science studies). Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201J. Shakespeare’s Secret Agents. Whether it’s women playing men or kings playing paupers, Shakespeare’s characters frequently use the art of disguise to right wrongs and wield authority in critical situations. But how far is “too far”? For a disguised maiden pursuing her true love’s hand in marriage, or for an undercover ruler seeking to unify his fractured country? When do their well-intentioned deceptions blur into reality, and at what personal and political cost? Using a combination of historical and critical approaches, this course will explore how secret identities test the boundaries between public good and private deception across Shakespeare’s dramatic genres.

ENGL 0201K. Mad in America. Examines the figure of madness in nineteenth and twentieth century American literature. Mad characters and mad writers raise questions about the vexed relation between self and society, desire and excess, form and disorder, and liberty and the institution. Authors include Poe, Brown, Melville, Gilman, Nabokov, Kesey, Plath, and films by Forman, Kubrick. Enrollment limited to 17. WRIT

ENGL 0201L. Literary Resistance: The Politics of the American Novel. An examination of novels and other works of literary prose from American protest novels concerned with the struggle of groups defined in terms of race or class to postmodern narratives characterized by formalist attempts to transcend the unbridgeable gap between politics and writing. Authors may include Stowe, Sinclair, Hammett, Agee, Ellison, Pynchon, and Reed. Enrollment limited to 17. WRIT

ENGL 0201M. No Futures: Extinction and the Nation in American Literature. American literature often narrates the achievement of national identity as an organic process that will be realized in the future. Yet many authors obsess over broken blood lineages, atavism, lost property, and various forms of extinction. This course examines this tension, and asks why the disruption of "futurity" provokes such persistent aesthetic reflections. Readings include Whitman, Hawthorne, Cather, Faulkner, McCarthy. Enrollment limited to 17. WRIT

ENGL 0201N. Reading Against the Grain in Nineteenth-Century Literature. Examines literature that leads the reader to identify and empathize with what the text says, yet also to be suspicious and distrustful about what the text leaves unsaid. How do we reconcile these two conflicting ways of reading? We will explore how nineteenth-century works use this tension to express anxieties of industrial modernity. Works include Coleridge, James, Hardy, Dickens, Melville, Freud, Hitchcock. Enrollment limited to 17. WRIT

ENGL 0201O. Kids on the Run: Literary Outcasts and Outsiders. How do we grow, and when do we “grow up”? This seminar focuses on uneasy transitions from childhood into adulthood in literature. From paupers to punks, we will rethink alienation, gender and normalcy through changing conceptions of adolescence across two centuries. Authors will include Dickens, Bellow, Nabokov, Welsh, Clowes, Haddon and Aria. Screenings of The 400 Blows, Ratcatcher and Dogtooth. Enrollment limited to 17. WRIT

ENGL 0201P. Disabling Desire: The Erotics of Impairment in Literature and Film. By alternately demonizing, sentimentalizing, and fetishizing the disabled body throughout modern history, has Western society misrepresented the erotic desires of the physically impaired? Could these desires, if represented, in turn disable “normal” desire? Authors include Milton, Shakespeare, Tennessee Williams, and Ursula LeGuin. Screenings include John Cameron Mitchell’s Hedwig and the Angry Inch and Mark and Michael Polish’s Twin Falls Idaho. Enrollment limited to 17. WRIT

ENGL 0201Q. American Hybrids: Poetry After Modernism. What formal possibilities were available to poets working after the experimental period of High Modernism? How do their departures from the Modernist definition of the lyric encourage us to re-think the idea of “the poetic”? This course will examine late modern texts that blur the lines between poetry, fiction, and non-fiction. Texts include Berryman, Plath, Merrill, Ashbery, Howe, contemporary writers. Enrollment limited to 17. WRIT

ENGL 0201R. Weird Sisters and Fairy Queens: Women in Shakespearean Drama. How does Shakespeare write women? To what extent do his plays destabilize or reify conventional assumptions about gender? And how do modern productions and adaptations interpret (or even re-write) his female characters? Texts will include Taming, Midsummer, Hamlet, Macbeth, and several modern adaptations. Film screenings likely to include Hamlet 2000, Midsummer Nights Dream. 10 Things I Hate About You. Enrollment limited to 17. WRIT

ENGL 0201S. Dragon Ladies, Curry and Kung Fu: Readings in Asian American Film and Literature. Tracing the contours of Asian America through literature, slam poetry, and pop culture, we will examine how racism has defined East and South Asian American bodies, sexualities, and identities in terms of invisibility, illegitimacy, homelessness, and exoticism—and how artists have responded. Readings include Kingston, Lahi, Kogawa, Hwang, Fanon, Said, and the films, Better Luck Tomorrow and The Namesake. Enrollment limited to 17. WRIT

ENGL 0201T. Strangers in a Strange Land: traveling bodies, traveling tales. What role does the traveler play in the western imagination? How do we grow, and when do we “grow up”? This seminar focuses on uneasy transitions from childhood into adulthood in literature. From paupers to punks, we will rethink alienation, gender and normalcy through changing conceptions of adolescence across two centuries. Authors will include Dickens, Bellow, Nabokov, Welsh, Clowes, Haddon and Aria. Screenings of The 400 Blows, Ratcatcher and Dogtooth. Enrollment limited to 17. WRIT
time business. However, this class will be more than mere work, will be an inspiration and a delight.

**ENGL 0201V. Queering Modernism.**
What role does modernist literature play in queer history? How might queer sexuality inflect modes of poetic and narrative expression? Reading American and Western European literature from the 1920s on, this course explores the literary shifts that we have come to call "the modernist turn" and mines poems and novels for bodies, identities and emotions that push against the forms that contain them. Along the way, we will complicate and challenge the descriptive capacity of the terms "queer" and "modern." Enrollment limited to 18.

**ENGL 0201W. Criminal Elements: The Detective Novel and American Literature, 1920-2000.**
For American authors, the crime novel has provided a critique of capitalism, a vision of queer desire, a record of racial violence and an experiment in modernist form. This course uses the detective genre to examine major movements in American literary and political history, ranging from prohibition to postmodernism. Authors: Hammett, Chandler, Highsmith, Himes, Nabokov, Auster. Films: *Rear Window, Chinatown.* Enrollment limited to 17. WRIT

**ENGL 0201Y. The Great American Campus Novel.**
Attracting some of the finest authors of 20th-century American literature, the "campus novel" presents a vision of university life, by turns comic and tragic, that also critiques society beyond its walls. The course explores how the genre is bound up with questions posed by liberalization, the Cold War, and popular culture. Authors include Fitzgerald, Nabokov, DeLillo, Roth, Bellow, Chabon, and Eugenides. Enrollment limited to 17. WRIT

**ENGL 0201Z. Dark Matter: Black Literature in the 20th Century.**
We live in the "afterlife of slavery," an age in which Black lives remain terrorized by slavery's specter. Reading works by Cornelius Eady, Dionne Brand, Toni Morrison, Ralph Ellison, Richard Wright, and others, this course examines how 20th century African-American writing and thinking about blackness struggle within and against a world haunted by the afterlife of slavery. Enrollment limited to 17. DVPS WRIT

**ENGL 0202A. Poetry and Things: From Romanticism to the Contemporary.**
Poetry often deals with the private human self, but it also depicts inanimate objects that spring to life in the background. We will study poetic backdrops from the Romantic lyric to the contemporary avant-garde, exploring the aesthetic, social, and ecological modes through which poets have envisioned the nonhuman world. Authors include Wordsworth, Keats, Byron, Poe, Thoreau, Dickinson, Stein, and Beckett. Enrollment limited to 17. LILE WRIT

**ENGL 0300B. The Romance of Travel.**
Considers the role of the strange, new, and fantastic in travel accounts of the Medieval period and Renaissance. If travel writers offered their stories as "windows to the world," we will treat them as representations that expose, reinforce, and subvert the author's cultural, political, and social attitudes. Works by Marco Polo, Chaucer, Columbus, Raleigh, Shakespeare, Defoe, and Swift. Enrollment limited to 30.

**ENGL 0300C. English Drama 1350-1700.**
This course presents great plays not written by Shakespeare, from the mystery plays of the late Middle Ages through Restoration drama. We will address these questions: What kinds of plays spoke to what kinds of audiences? How do changes in theatrical style relate to social change? How do genre, convention, staging, and acting style shape a dramatic text? Enrollment limited to 30.

**ENGL 0300E. Three Great Poets: Shakespeare, Donne, Milton.**
We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. Enrollment limited to 30.

**ENGL 0300F. Beowulf to Aphra Behn: The Earliest British Literatures.**
Major texts and a few surprises from literatures composed in Old English, Old Irish, Anglo-Norman, Middle English, and Early Modern English. We will read texts in their historical and cultural contexts. Texts include anonymously authored narratives like *Beowulf* and Sir Gawain and the Green Knight, selected *Canterbury Tales* by Chaucer, and texts by Sir Thomas Malory, Spenser, Shakespeare, and Aphra Behn. Enrollment limited to 30.

**ENGL 0300G. Angels and Demons, Heavens and Hells: The Otherworld from the Middle Ages to the Early Modern Era.**
Wonder about what happens after death is among the most fascinating and gripping subjects of human inquiry. We will explore concepts of heaven, hell, purgatory, Satan, angels, ghosts, the soul, virtue and vice, the poetry of salvation, and the power of melancholy. Texts will include Old and Middle English Otherworld narratives, and writings by Dante, Milton, Browne, Marlowe, and others. Enrollment limited to 30.

**ENGL 0300H. New Selves, New Worlds.**
How did pre-modern and early modern writers imagine the self? How were these notions of the self transformed when individuals traveled to unfamiliar places? How do these new selves imagine certain fundamental questions, such as the power one has to control one's emotions, social environment, and ultimate fate. Authors may include Chaucer, Shakespeare, and Milton. Enrollment limited to 50.

**ENGL 0300I. The Arrival of English: Medieval, Renaissance, Early Modern.**
In these literary periods, something arrives in England, whether it is the Anglo Saxon invaders, Christianity, French medieval romance, or the continental example of Renaissance. Readings include *Beowulf,* *Wanderer,* *Dream of the Rood,* Chaucer's *Canterbury Tales,* Spenser's *Shepherd's Calendar* and *Faerie Queene,* and Milton's *Paradise Lost.* Enrollment limited to 30. LILE WRIT

**ENGL 0300J. Altered States.**
A course about rapture, ecstasy, mysticism, transport, travel, metamorphosis, and magic in pre- and early modern poetry, plays, and prose, including: Ovid (*Metamorphoses*); Shakespeare (*A Midsummer Night's Dream*; *Othello*); Marlowe (*Dr. Faustus*); Mandeville's *Travels*; Bacon's *The New Atlantis;* The Book of Margery Kempe; and ecstatic sacred and erotic poems by Donne, Crashaw, Rochester, and Behn. Enrollment limited to 30.

**ENGL 0300K. Love and Hate: Medieval to Early Modern.**
In this course we trace permutations of love and hate, in sexual, familial, and more broadly social contexts. How, for instance, do Gawain's forms of attachment compare to Hamlet's? How can we compare portrayals of what is loathsome in *Beowulf* and *Paradise Lost*? What happens to love and hate when these texts are adapted for the screen? Enrollment limited to 30. LILE

**ENGL 0310A. Introduction to Shakespeare.**
This course will explore issues of concern to Shakespeare's audiences from his time to ours—love, war, race, sex, good and evil—through a representative selection of plays. Lectures will discuss historical contexts, theatrical conditions, and critical strategies. Designed for students beginning college-level study of Shakespeare. Two lectures and one discussion meeting weekly. Students should register for ENGL 0310A S01 and may be assigned to conference sections by the instructor during the first week of class. LILE WRIT

**ENGL 0310C. Matters of Romance.**
Narratives (1100-1500) of men, women, and elves seeking identity on the road, in bed, and at court. Readings (in modern English) include Arthurian romances, *Havelok,* lais by Marie de France, and Chaucer's "Wife of Bath's Tale." Primarily for freshmen and sophomores. Students should register for ENGL 0310C S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0310D. Violence, Sacrifice, and Medieval Narrative.**
This course will introduce students to medieval prose and poetry that centralize the problematic nature of violent conflict and its attendant horrors. We will study literature from medieval England, Wales, Ireland, and Iceland, including *Beowulf,* two Old Icelandic sagas and Eddic poetry, Irish and Welsh texts, and part of Malory's *Morte Darthur.* Topics will include sacrifice, religion, chivalry, horror, and contemporary critical approaches. Open to undergraduates only.
ENGL 0360A. Elizabeth I: The Queen and the Poets
Queen Elizabeth I, a poet herself, adorned her aging body as the symbolic object of desire for a circle of ambitious male poets. Considers the poetic means by which Sidney, Spenser, and Shakespeare overcome the obvious obstacles to desire presented by her uncertain health and imperious temperament and court their Virgin Queen.

ENGL 0360D. Objects of Beauty in Renaissance Culture.
What made a poem or a play as beautiful in 16th-century England as a hat or the right pair of shoes? Literary history and aesthetics from Wyatt, Surrey, and More, through Sidney, Shakespeare, Jonson, and Donne.

ENGL 0360E. The Medieval King Arthur.
Where did stories of King Arthur come from and how did they develop in the Middle Ages? We will read the earliest narratives of King Arthur and his companions, in histories and romances from Celtic, Anglo- Norman, and Middle English sources, to examine Arthur’s varying personae of warrior, king, lover, thief. Enrollment limited to 20 first-year students.

ENGL 0360F. Shakespeare's Present Tense.
Shakespeare in Love suggests how Shakespeare was clued in to elite and popular cultures. Current adaptations like O and 10 THINGS I HATE ABOUT YOU demonstrate how Shakespeare provides anachronistic clues to issues of the present. This course will trace such clues by examining the cultural origins and ongoing adaptations of Romeo and Juliet, Hamlet, Othello, Twelfth Night, Henry V, and the sonnets. Enrollment limited to 20 first-year students. FYS

ENGL 0360G. The Green Renaissance.
Modern ecological crises suggest that nature is a powerful agent, but that such views were prevalent in the Renaissance, when empirical science was transforming nature into an object, needs investigation. How did Renaissance poets and dramatists figure their own relationship to the natural world? We will seek answers by reading Shakespeare, Donne, Milton, and Marvel, among other writers. Enrollment limited to 20 first-year students. FYS WRIT

ENGL 0500A. Literature and the Fantastic.
Considers the changing ways Renaissance, Romantic, Victorian, and late-nineteenth-century authors incorporate non-realistic and fantastic themes and elements in literature. Special attention to the relationship between realism and fantasy in different genres. Readings include stories (gothic, ghost, and adventure), fairy tales, short novels, plays, and poems. Shakespeare, Swift, Brothers Grimm, Blake, Wordsworth, Coleridge, Keats, Tennyson, Robert Browning, Christina Rossetti, Stoker, Lewis Carroll, Dickens, Henry James. Enrollment limited to 30. LILE

ENGL 0500B. Introduction to British and American Romanticism.
An exploration of "Romanticism" in literature written and read on both sides of the Atlantic between 1775 and 1865. Poetry, fiction, and essays by writers such as Blake, Wollstonecraft, Wordsworth, Coleridge, Byron, Percy Shelley, Mary Shelley, Keats, Thoreau, Emerson, Fuller, Hawthorne. Enrollment limited to 30.

ENGL 0500C. Inventing America.
Even before there was a United States, American authors argued over just what distinguished "America" from other communities. For what, they wondered, did or should America stand? Examines the rhetorical battles waged in some key pre-Civil War American literary texts over the meaning and/or meanings of America. Authors studied may include Bradstreet, Franklin, Douglass, and Melville. Enrollment limited to 30.

ENGL 0500E. Foundations of the Novel.
Introduces students to the first stages of novel writing in England and to historical and theoretical issues relating to the novel’s "rise" to the dominant genre of the modern era. Eighteenth-century works of fiction are long; however, texts selected for this course are less long. They include Defoe’s Moll Flanders, Richardson’s Pamela and Fielding’s Joseph Andrews. Enrollment limited to 30.

ENGL 0500F. Devils, Demons, and Do Gooders.
Who hasn’t struggled with the problem of good and evil? Who hasn’t wondered what lurks in the dark recesses of the soul? We will investigate how Milton, Mary Shelley, Melville, Poe, and Hawthorne, among others, grapple with these fundamental questions of judgment. Enrollment limited to 30.

ENGL 0500G. Literature and Revolutions, 1640-1840.
Key developments in British and American literature understood in relation to the historical and cultural forces that produced the English Revolution, the American Revolution, the French Revolution, and the Industrial Revolution. Readings in major writers such as Milton, Paine, Blake, Wollstonecraft, Emerson, Barrett Browning, and Dickens, and in some of their non-canonical contemporaries. Focus on the emergence of a transatlantic literary culture. Enrollment limited to 30. WRIT

ENGL 0500H. Mariners, Renegades, and Castaways: American Fiction and the Romance of the Sea.
Examines one of the most distinctive of literary genres: the sea novel. Ostensibly stories of mystery and adventure, these texts are also meticulous accounts of working life at sea. Reads a number of well-known and lesser known American tales of the sea, including Poe's The Adventures of A. Gordon Pym, Melville's Moby-Dick, London's The Sea-Wolf, and Crane’s "The Open Boat." Enrollment limited to 30.

ENGL 0500I. The Literature and Politics of Friendship.
Considers changing concepts of friendship as a key to major developments in British and American literature from the Renaissance through the 19th century. Special attention given to the ways the literary history of friendship intersects with leading political questions of the day. Shakespeare, Donne, Milton, Defoe, Wordsworth, Keats, Percy and Mary Shelley, Dickens, Poe, Melville, and Henry James. Enrollment limited to 30.

ENGL 0500J. The Literature of Identity.
This course will explore various conceptions of personal identity, with an emphasis on Romanticism. We'll read Anglo-American philosophical and literary texts (mostly poetry) from the Renaissance through the 19th century. 20th-century, taking some excursions into contemporary theory (queer, feminist, post-structuralist). Writers will include Shakespeare, Montaigne, Locke, Hume, Rousseau, Wordsworth, Keats, Emerson, Browning, and Wilde. Enrollment limited to 30.

ENGL 0500K. The Transatlantic Novel: Robinson Crusoe to Connecticut Yankee.
How does the "American" novel change if we read it across national borders? This course reads novels written in/about America with this question in mind, focusing on such topics as slavery, exploration, seduction, and cosmopolitan ideals. Readings range from Aphra Behn to Mark Twain. Enrollment limited to 30. Students should register for ENGL0500K S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0500L. Literature, Trauma, and War.
This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war—glorifying it, and representing its horrors. We’ll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Enrollment limited to 30. Open to undergraduates only.

This course will trace the rise of the novel as a literary genre with a particular focus on the history of the English novel. We will consider the problem of genre as a literary concept, the emergence of the novel in relation to other prose forms, the question of "realism" and its others, and the critical possibilities of a transnational approach to a global literary form. Enrollment limited to 30.

ENGL 0500N. The Romantic Imagination.
The idea of the imagination's creative power acquired great literary, philosophical, and political significance over the course of the eighteenth century. This course begins with extracts from Milton and from eighteenth-century theories of the "sublime," studies Romantic-era poetry and prose (1789-1824), and closes with a look at later writers such as Matthew Arnold and George Eliot. Enrollment limited to 30.

ENGL 0510A. Literature and Print Culture.
The cultural impact of widely circulating printed material -- books of poetry, essays, and fiction but also newspapers, stock certificates, and advertisements -- makes the period 1660-1740 the first technologically enabled information age. The production and consumption of published texts changed the world for the restored monarch and his licentious
court, for the rising bourgeoisie, and for the newly literate classes. We will follow several controversies, experiments, and innovations of the print revolution in works as apparently diverse as Milton’s epic poetry, Manley’s erotic secret histories, and the ads in The Spectator. Other canonical and non-canonical writers include Rochester, Behn, Dryden, Swift, Manley, Haywood, and Defoe.

ENGL 0510B. The Gothic.

The course will investigate the origins and development of Gothic literature from its invention during the eighteenth century to its postmodern forms. We will consider conventional figures (monsters, distressed heroines, moldering castles), common themes (fear, horror, the supernatural, the irrational, the transgressive), and the cultural work they do. Readings include Walpole, Lewis, Radcliffe, Shelley, James, and King.

ENGL 0510C. The Victorian Novel.

Considers the Victorian novel with an emphasis on its many forms, including the social-problem novel, bildungsroman, sensation novel, detective novel, and multiplot novel. Topics covered include the nature of realism, serial publication, epistle, the “new woman,” industrialization, the “condition of England,” science and technology, and the role of the artist. Novels by Charlotte Brontë, Charles Dickens, Elizabeth Gaskell, George Eliot, Wilkie Collins, Thomas Hardy, Anthony Trollope. Students should register for ENGL 0510C S01 and may be assigned to conference sections by the instructor during the first week of class. Banner registrations after classes begin require instructor approval.

ENGL 0510D. Mark Twain’s America.

A course for all kinds of readers of Twain and his contemporaries. Close readings of fiction and essays that focus on race, slavery, capitalism, and the development of “modern” literature. Works include Puddinhead Wilson, Huck Finn, and Connecticut Yankee.

ENGL 0510E. British Romanticism.

Readings in British Romantic writing, canonical and noncanonical, emphasizing how historical and political change, philosophical disposition, and subjective consciousness become articulated in verse and prose. Literary representations of and responses to the French Revolution, the Industrial Revolution, the struggle against black slavery. Blake, Wollstonecraft, Olaudah Equiano, William Wordsworth, Dorothy Wordsworth, Coleridge, Percy Shelley, Mary Shelley, Byron, Keats, Clare. LILE

ENGL 0510H. Victorian Self and Society.

This multi-genre course is an introduction to literature and culture of the Victorian period, looking at the changing ideas of society and the individual’s place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, the “great stink” of London, women’s suffrage and the condition of women, and the Great Exhibition of 1851. Readings will include Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll.

ENGL 0510K. Fictions and Frauds: Literature and the Historical Imagination.

How does fiction reinvent history? What makes autobiography "true"? Readings focus on the slave narrative, Hawthorne, historical novels, and Jack Kerouac’s “On the Road.” Limited to undergraduates.

ENGL 0510L. The Simple Art of Murder.

A survey of the history of criminal enterprise in American literature. Authors to be considered include Poe, Melville, Hawthorne, Twain, Chandler, Wright, Petry, Highsmith, Millar, Harris, and Mosley. Students who have taken ENGL 0560D may not register for this course. Students should register for ENGL 0510L S01 and may be assigned to conference sections by the instructor during the first week of class. Instructor permission required.

ENGL 0510M. Madness and Enlightenment: Literature 1660-1800.

The term "enlightenment" has been used to emphasize the power of reason in the development of intellectual freedom, democracy, capitalism, class mobility, and other aspects of 18th-century experience. However, the period’s major writers were fascinated by unreason, by aberrant states of mind from love melancholy to outright madness. Readings include Swift’s Tale of a Tub, Pope’s Dunciad, Johnson’s Rasselas, Sterne’s Tristram Shandy, Boswell’s Hypochondriack, and Godwin’s Caleb Williams.

ENGL 0510N. Victorian Modernity: Literature 1880-1900.

"Modernity" in the fin-de-siècle period meant progress, the “march of the intellect,” technological innovation, urban growth, female emancipation, but it also meant fears of degeneration, moral decline, the rise of the crowd, and the degradation of the individual. This course considers how these contradictions come to a climax in the literature, art, and culture of the 1880s and 1890s. Authors include G. B. Shaw, Oscar Wilde, Thomas Hardy, Charles Algemon Swinburne, H. G. Wells, Olive Schreiner, George Egerton.

ENGL 0510O. American Fiction and the Sea.

This class examines one of the most distinctive of literary genres: the sea tale. These narratives are interested not only in how we know what we know, but in the ways we imagine what we don’t know. Novels and films to be discussed will include Moby-Dick; Lord Jim; Aigüere, the Wrath of God; Apocalypse Now; The Witness.

ENGL 0510P. Fiction from Dickens to James.

An introduction to nineteenth-century fiction in English by eight major authors—four British and four American. Emphasis will be placed on the careful reading and interpretation of the novels and short stories in historical context. Issues to be addressed include the rise of the mass media, transatlantic literary relations, literature and ethics, and aestheticism. Works by Dickens, Poe, Eliot, Melville, Stevenson, Twain, Wilde, and James. Students should register for ENGL 0510P S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0510Q. American Renaissance.

This course examines major and lesser known writers of nineteenth-century America, emphasizing the works of Emerson, Melville, and Catharine Sedgwick. The focus is on Romantic literature and culture, with particular emphasis on the following subjects: Nature and transcendence; capitalism and its discontents; utopianism and reform; slavery and anti-slavery; the problem of history and national culture; and transatlantic relations. Readings include Transcendentalist essays, slave narratives, romance novels, autobiography, fiction, and lyric and epic poetry. Improved student writing is a main goal of the course.

ENGL 0510R. American Civil War.

An introduction to the literature of the American Civil War: Whitman, Lincoln, Melville, Stowe, and other autobiographical and military narratives. The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of “the South.” Explores the sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Faulkner.

ENGL 0560A. Hawthorne and James.

An introduction to a pair of writers whose work continues to shape our understanding of American literature and American identity. Focusing on much of their most important work, our aim will be to understand how their conceptions of the relationship between writing and history both complicate and complement each other. Limited to 20 first-year students. FYS LILE WRIT

ENGL 0560B. Lincoln, Whitman, and The Civil War.

An introduction to the literature of the American Civil War: Whitman, Lincoln, Melville, Stowe, and other autobiographical and military narratives.

ENGL 0560C. Literature of The American South.

The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of “the South.” Explores the sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Faulkner.

ENGL 0560D. The Simple Art of Murder.

A survey of the role of criminal enterprise in American literary history. Authors to be considered include Poe, Hawthorne, Harper, Chandler,
Acott, Twain, Hammett, Highsmith, and Wright. Limited to 20 first-year students. FYS

**ENGL 0560E. Inventing America.**
One of the distinguishing features of American literature may be its seemingly constant struggle with the idea of America itself. For what, these authors wonder, does/should America stand? We will examine the rhetorical battles waged in some major works over the meaning and/or meanings of America's national identity. Authors may include Franklin, Hawthorne, and Fitzgerald. Limited to 20 first-year students. Instructor permission required. FYS LILE WRIT

**ENGL 0560F. Man and Machine.**
Examines the fascination with "human" machines and "mechanical" humans in the 18th, 19th, and 20th centuries. What hopes and fears are associated with human machines? How has the automation challenged fundamental concepts such as "subjectivity," "intelligence," "consciousness," and "progress"? Authors include Henry David Thoreau, Henry Adams, Thomas Carlyle, Mary Shelley, H.G. Wells, E.M. Forster, William Gibson. Enrollment limited to 20 first-year students.

**ENGL 0560G. The Transatlantic American Novel.**
This course reads American literature across national boundaries, focusing on the novel genre and the question of "American" identity as a problem in itself. The course takes up this problem in a wide array of novels spanning the period between the late eighteenth and twentieth centuries. Writers include Crevecoeur, Susanna Rowson, Poe, Melville, Twain, and Nella Larsen. Limited to 20 first-year students.

**ENGL 0700A. Introduction to African American Literature, 1742-1920.**
Surveys African American writing from the beginnings to the Harlem Renaissance, reading both poetry and prose (primarily slave narratives, speeches, essays, and fiction). Attention to how African American authors have shaped a literature out of available cultural and aesthetic resources. Enrollment limited to 30.

**ENGL 0700B. Introduction to African American Literature, 1920-Present.**
All genres of literature from the Harlem Renaissance to the present, tracing the development of an African American literary tradition. Enrollment limited to 30.

**ENGL 0700C. Twentieth-Century American Fiction.**
Through detailed readings of a variety of novels from almost every decade, this class explores the various ways fiction responded to what has been called the American century. Our main emphasis will be on the relationship between aesthetic and national representation. Writers to include Wharton, Fitzgerald, Faulkner, Ellison, Kingston, and Delillo. Enrollment limited to 30. Students will be assigned to conference sections by the instructors during the first week of class.

**ENGL 0700D. Inventing Asian American Literature.**
Through a focus on works by Asian Americans, this course examines how the concept of literature has evolved across the twentieth century. We address how different genres and literary modes shape the way readers view experiences depicted in literary works, paying attention to how works "theorize" their own interpretation. We also take up the issue of how canons get formed. Enrollment limited to 30. DVPS LILE WRIT

**ENGL 0700E. Postcolonial Literature.**
Examines fiction, drama, poetry, travel writing, and cultural theory by contemporary writers from former colonies of the British Empire. We study works by Anglophone African, Caribbean, and South Asian writers. Issues include: nationalism and globalization; cultural identity and diaspora; individual interiority and collective aspirations; literary form and the very idea of "postcolonial" literature. Authors include: J. M. Coetzee, Amitav Ghosh, V. S. Naipaul, Michael Ondaatje, Caryl Phillips, Derek Walcott, Zoé Wicomb. Enrollment limited to 30. DVPS

**ENGL 0700F. Introduction to Modernism: Past, Future, Exile, Home.**
An introduction to European Modernism with an emphasis on British Literature. We will address ideas of personal and national history through literary and aesthetic innovations of the first half of the 20th century, as well as the relationship—literary, cultural, historical and psychological—between constructions of home and abroad. Texts include James, Conrad, Forster, Joyce, Proust, Woolf, Faulkner, Waugh, and Freud, as well as films by Sergei Eisenstein and Fritz Lang. Enrollment limited to 30.

Students should register for ENGL 0700F S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0700G. American Fiction and Mass Culture.**
How have American fiction writers responded to the growing national influence of mass culture industries such as recorded music, film, and television? This course will consider this question by assessing both how writers have imagined the impact of mass culture on American life and how the style of literary writing has evolved in relation to popular media. Authors include F. Scott Fitzgerald, Nathanael West, Toni Morrison, Colson Whitehead, and Don DeLillo. Enrollment limited to 30.

**ENGL 0700H. Cultures and Countercultures: The American Novel after World War II.**
A study of the postwar American novel in the context of the intellectual history of the 1950s, 1960s, and 1970s. We will read the postwar novel in relation to the affluent society, the vital center, the lonely crowd, the power elite, the one-dimensional man, the post-industrial society. Authors to be considered include Baldwin, Bellow, Ellison, Highsmith, McCarthy, O'Connor, Petry, Pynchon, and Roth. Two lectures and one discussion meeting weekly. Enrollment limited to 30. Students should register for ENGL 0700H S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0700J. Contemporary British Fiction.**
This course is an introduction to the study of 20th century literature in English. We consider central terms of and approaches to literary criticism by reading some of the most important British writers of the last fifty years. We will also take into account theories of culture, ideology and nationhood, and attempt to bring into focus a Britain defined as much by its ways of looking as by historical and geopolitical situation. Readings include Kingsley Amis, Greene, McEwan, Zadie Smith, Spark, Keitelman, Banville, Naipaul and Sebald. Enrollment limited to 30.

**ENGL 0700K. 20th-Century Literatures in English.**
This course offers a broad introduction to a range of literatures written in English, tracing shifts in the formal conventions of fiction and poetry. We examine ongoing debates about what literature is and what social role it plays. We consider how these debates respond to historical changes such as industrialization, the collapse of global empires, and movements for social equality. Writers include Dreiser, Woolf, Eliot, Hughes, Toomer, Cather, Morrison, Hwang, Rushdie. Enrollment limited to 30. Students should register for ENGL 0700K S01 and will be assigned to conference sections by the instructors during the first week of class. DVPS LILE WRIT

**ENGL 0700L. Make It New: American Literature 1900-1945.**
Introductory survey of a major—perhaps the major—period of American literature. Genres include poems, plays, short stories, and novels, as well as film. Writers include Willa Cather, Raymond Chandler, T. S. Eliot, William Faulkner, F. Scott Fitzgerald, Robert Frost, Ernest Hemingway, Eugene O'Neill, Gertrude Stein, and Wallace Stevens; filmmakers include Charlie Chaplin and Orson Welles. Enrollment limited to 30.

**ENGL 0710A. City Novels.**
This course examines 20th and 21st century novels to consider how these narratives envision the city, its possibilities and limits. How does the city shape how we think, wander, grow up, see and know each other? How does the city divide people? How does the novel imagine ways to bridge those divisions? Readings by Woolf, Chandler, Wright, Cisneros, Smith, Calvino, Adiga, Whitehead.

**ENGL 0710B. African American Literature and the Legacy of Slavery.**
Traces the relationship between the African American literary tradition and slavery from the antebellum slave narrative to the flowering of historical novels about slavery at the end of the twentieth century. Positions these texts within specific literary, historical, and political frameworks. Authors may include Frederick Douglass, Harriet Jacobs, Charles Chesnutt, Octavia Butler, and Toni Morrison. DVPS

**ENGL 0710C. Writing War.**
Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Hemingway, Woolf, Rebecca West, Graham Greene, Pat Barker, Tim O'Brien, Georges Perec.
ENGL 0710D. The Dead and the Living.
Explores ethical, historical, and personal dilemmas in modernism through the relation between the dead and the living. What claims do the dead have on the living? How do the living shape the lives of the dead?
Readings in literature, psychoanalysis, and philosophy, including James, Woolf, Benjamin, Freud, Joyce, Sebald, and Barnes. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class.

ENGL 0710E. African and Caribbean Tales of Transition.
This course concentrates on the “Bildungsroman” – the novel of education – in contemporary fiction by Anglophone African and Caribbean authors. Issues include the following: cultural, generational, and other differences; experience, memory and narrative; reality and fantasy. Particular attention to the interplay of form and content, as well as the relationship between literature and the real world “out there.” Authors include: Peter Abrahams, Ngozi Adichie, Erna Brodber, Jamaica Kincaid, George Lamming, Ezekiel Mpahliele.

ENGL 0710F. Being There: Bearing Witness in Modern Times.
What is the significance of one who says, “I was there”? This course explores the ethical, historical and psychological dimensions of witnessing in an era when traumatic events are increasingly relayed secondhand or recorded in sound and image. Texts include Forster, Woolf, Camus, Freud, Celan, Coetzee; films by Hitchcock and Kurosawa; and readings in law and psychology. WRIT

ENGL 0710G. History, Literature and the Caribbean Novel (AFRI 0950).
Interested students must register for AFRI 0950.

ENGL 0710H. Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre (AFRI 0990).
Interested students must register for AFRI 0990.

ENGL 0710I. Global South Asia.
This course provides an introduction to contemporary fiction by South Asia and its diaspora. We will read novels written in North America, the Caribbean, Australia, Africa, the United Kingdom, and of course South Asia, paying particular attention to issues of identity, ethnicity, and transnational circulation. Authors include Adiga, Hanif, Lahiri, Meeran, Mistry, Naipaul, Roy, Rushdie, Selvadurai, and Sinha. DVPS

ENGL 0710J. Introduction to Asian American Literature.
This course is intended to familiarize students with key issues that have shaped the study of Asian American writings and to provide a sense of the historical conditions out of which those works have emerged. As a literature course, it will focus on textual analysis—on how particular texts give representational shape to the social, historical and psychological experiences they depict. Readings consist primarily of works that have a canonical status within Asian American literary studies but also include newer works that suggest new directions in the field. It also strives to provide some coverage of the major ethnic groups. DVPS

ENGL 0710K. Catastrophic Communities.
What becomes of communities and individuals in a catastrophe? This course considers the different literary, social and ethical formations that arise or are destroyed in disaster, and examines what it means to be both an individual and part of a collective in times of unprecedented upheaval. Readings by Blanchot, Camus, Sebald, Duras, Freud, Arendt, Jaspers, Orwell, and Eggers. WRIT

ENGL 0710L. Ishiguro, Amongst Others.
