This bulletin is intended to provide only general information concerning Brown University and is not in any manner contractually binding. The information contained herein is subject to revision and change at any time.

EQUAL OPPORTUNITY AND NONDISCRIMINATION
Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, or sexual orientation in the administration of its educational policies, admission policies, scholarship and loan programs, or other school-administered programs.

CORRESPONDENCE
The general mailing address for the University is Brown University, Providence, Rhode Island 02912. Correspondence sent to that address may be expected to reach the proper department, but, in order to avoid delay, information and inquiries concerning the items below should be addressed as noted. Addresses for other offices are available on the World Wide Web at www.brown.edu.

ITEM            ADDRESS TO
Matters directly in charge of or concerning the general interests of

The Corporation  President, Box 1860
The University    President, Box 1860
The College       Dean of the College, Box 1828
The Graduate School Dean of the Graduate School, Box 1867
The Warren Alpert School of Medicine Dean of Medicine and Biological Sciences, Box G
Alumnae and Alumni Director of Alumni Relations, Box 1859

Inquiries from applicants for Admission
For undergraduate study, the College Admission Office, Box 1876
For graduate study, the Graduate School Admission Office, Box 1867
For study in the Warren Alpert Medical School of Brown University Medical School Office of Admissions and Financial Aid, Box G-A212

Inquiries regarding the University Bulletin Registrar, Box K

Foreword

Brown University is a leading Ivy League institution and the only major research university in the nation where undergraduates are the architects of their own course of study. Brown is distinguished by its unique undergraduate academic program, a world-class faculty, outstanding graduate and medical students, and a tradition of innovative and rigorous multidisciplinary study.

The University’s mission—to serve the community, the nation, and the world by educating and preparing students (in the words of the College charter) to “discharge the offices of life with usefulness and reputation”—is fulfilled through a strong partnership of students and teachers.

The seventh oldest university in America, Brown was established in 1764 as Rhode Island College in the town of Warren, Rhode Island, and enrolled its first students in 1765. In 1770 the College moved to its present location, and in 1804 it was renamed Brown University to honor a $5,000 donation from local merchant Nicholas Brown. Today the University’s main campus covers nearly 140 acres on a historic residential hill overlooking downtown Providence, a vibrant city of some 170,000 people and the capital of Rhode Island.

Brown draws men and women from all over the United States and many other countries. Distinguished by their academic excellence, creativity, self-direction, leadership, and faculty known for its prize-winning multidisciplinary scholarship and dedication to teaching. By providing a rich undergraduate experience together with strong graduate and medical programs, the University fosters internal and external discovery at every level of the academic enterprise.

Brown is internationally known for its dynamic undergraduate curriculum, implemented by faculty vote in 1969. Undergraduates must pass 30 courses and complete the requirements for a concentration, or major, in order to receive a bachelor’s degree. The curriculum does not require distribution or core courses outside the concentration. More than 2,000 undergraduate courses support just under 80 concentrations, many of them interdisciplinary, and a wide variety of independent studies.

At the heart of the Brown curriculum are three basic principles: that students are active participants in learning; that acquiring analytical and critical skills is as important as mastering factual knowledge; and that learning requires opportunities for experimentation and cross-disciplinary synthesis.

The Graduate School at Brown is a national leader in the creation and dissemination of new knowledge. In 2003, Brown celebrated the centennial of the Graduate Department, formally established in 1903 to confer advanced degrees.

The Warren Alpert Medical School, which awarded its first M.D. degrees in 1975, is renowned for innovation in medical education and for its programs in family medicine and primary care. The Warren Alpert Medical School now enrolls some 400 students, most of whom are accepted through Brown’s unique Program in Liberal Medical Education (PLME), which combines undergraduate study with professional studies in medicine.

Beginning in 2002, fortified by vigorous leadership, prudent planning, and new ideas, the University launched an exciting program for academic enrichment to enlarge its faculty by 100 members over the next five to ten years, improve support for graduate students, and invest in libraries, information technology, and academic facilities. As part of this extensive program of improvements, the University instituted a need-blind undergraduate admission process to ensure all worthy applicants access to the University, regardless of their ability to pay.

Brown University is accredited by the New England Association of Schools and Colleges. In addition, the Warren Alpert Medical School is accredited by the Liaison Committee on Medical Education. The School of Engineering has received accreditation from the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for its bachelor of science programs in civil, chemical, electrical, materials, and mechanical engineering.

Academic Freedom

Consonant with Brown’s tradition concerning academic freedom, the faculty and Corporation, in 1966, adopted the following statement of principles:

Academic freedom is essential to the function of education and to the pursuit of scholarship in universities.

Therefore, Brown University, mindful of its historic commitment to scholarship and to the free exchange of ideas, affirms that faculty and students alike shall enjoy full freedom in their teaching, learning, and research.

Brown University also affirms that faculty and students shall have freedom of religious belief, of speech, of press, of association and assembly, of political activity inside and outside the University, the right to petition the authorities, public and university, to invite speakers of their choice to the campus, and that students and faculty as such should not be required to take any oath not required of other citizens. The time, place, and manner of exercising these rights on campus shall be subject to reasonable regulation only to prevent interference with the normal functions of the University.

Nondiscrimination Policy

Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, sexual orientation, gender identity or gender expression, in administration of its educational policies, admissions policies, scholarship and loan programs, or other school-administered programs.

The Family Educational Rights and Privacy Act of 1974

The Family Educational Rights and Privacy Act of 1974 (P.L. 93–380) extends to a student the right of access to his or her education records maintained at the University. Education records are those records maintained by or for Brown University that directly relate to an individual who is or has been in attendance (enrolled) at Brown University and for whom Brown maintains educational records. Information and notification as to the type of record; the accessibility of and policies for maintaining, reviewing and expunging the record; and the procedure for inspecting, reviewing, obtaining copies of, or challenging the record are established and promulgated by the appropriate executive officers. Further information may be obtained on the Office of the Registrar’s website (http://www.brown.edu/Administration/Registrar/guidelines/records/info_rights.html).
Leadership

The Corporation

Officers

• Christina H. Paxson, President
• Thomas J. Tisch, Chancellor
• Jerome C. Vascellaro, Vice Chancellor
• Donald C. Hood, Secretary
• Alison S. Ressler, Treasurer

Board of Fellows

• Mark S. Blumenkranz
• Richard A. Friedman
• Laura Geller
• Theresia Gouw
• Donald C. Hood
• Robin A. Lenhardt

Vikram Behera
Clinical Instructor in Medicine
Solmaz Behtash
Clinical Assistant Professor of Family Medicine
M. David Beitie
Clinical Assistant Professor of Obstetrics and Gynecology
Michael D. Beland
Associate Professor of Diagnostic Imaging
Michael J. Belanger
Clinical Assistant Professor of Orthopaedics
Peter A. Belenky
Assistant Professor of Molecular Microbiology and Immunology
Helena Sofia Bello Apaolaza
Teaching Associate in Hispanic Studies
Elisabeth G. Bell
Visiting Scholar in Literary Arts
Christina Bellanti
Clinical Assistant Professor of Psychiatry and Human Behavior
Anna Belegurova
Visiting Assistant Professor of History
Irene Belsky
Clinical Assistant Professor of Family Medicine
G. Jesse Bender
Assistant Professor of Pediatrics
Judith L. Bender
Professor of Biology
Kristen Benito
Assistant Professor of Psychiatry and Human Behavior (Research)
Rick Benjamin
Visiting Scholar in Environmental Studies
Jabbar R. Bennett
Clinical Assistant Professor of Medicine
Richard J. Bennett
Associate Professor of Medical Science
Reda Bensmaia
University Professor Emeritus of French Studies and Comparative Literature
Judith D. Bentkover
Adjunct Professor of Health Services, Policy and Practice
Adia Benton
Assistant Professor of Anthropology
Jacques Benun
Clinical Associate Professor of Pediatrics
Scott E. Benzuly
Clinical Assistant Professor of Surgery (Anesthesiology)
Nathan Barry Beraha
Clinical Assistant Professor of Pediatrics
Lionel Bercovitch
Professor of Dermatology
Stephen Berenson
Clinical Professor of Theatre Arts and Performance Studies
J. Roderic Beresford
Professor of Engineering
Alexander Berezin
Clinical Assistant Professor of Surgery (Anesthesiology)
Geoffrey H. Berg
Clinical Instructor in Medicine
Jacob R. Berger
Assistant Professor of Neurology (Clinical)
Amauld Berge
Clinical Assistant Professor of Psychiatry and Human Behavior
Kristina Berglund
Clinical Instructor in Medicine
Seth F. Berkley
Adjunct Professor of Medicine
Linda J. Berman
Clinical Assistant Professor of Family Medicine
Nathaniel A. Berman
Rahel Varnhagen Professor of International Affairs, Law, and Modern Culture (Research)

Amir B. Bernaba
Clinical Instructor in Emergency Medicine

Douglas B. Bernon
Clinical Assistant Professor of Psychiatry and Human Behavior

Scott David Berns
Clinical Professor of Health Services, Policy and Practice; Clinical Professor of Pediatrics

Wesley H. Bernskoetter
Manning Assistant Professor of Chemistry

Paul Bernstein
Clinical Instructor in Neurosurgery

Susan Bernstein
Professor of Comparative Literature; Professor of German Studies

David M. Berson
Sidney A. Fox and Dorothea Doctors Fox Professor of Ophthalmology and Visual Science

Arthur A. Bert
Clinical Professor of Surgery (Anesthesiology)

John J. Bert
Clinical Assistant Professor of Obstetrics and Gynecology

Richard G. Bertini
Clinical Assistant Professor Emeritus of Orthopaedics

Jonathan M. Bertman
Clinical Assistant Professor of Family Medicine

Mark D. Bertness
Robert P. Brown Professor of Biology

Richard W. Besdine
David S. Greer, M.D., Professor of Geriatric Medicine

Laurel D. Bestock
Assistant Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior (Research)

Jack R. Bevivino
Clinical Assistant Professor of Surgery

Timothy R. T. Bewes
Professor of English

Christina A. Beyer
Clinical Instructor in Medicine

Michael A. Bharier
Clinical Assistant Professor of Dermatology

Harikrashna Bhatt
Assistant Professor of Medicine (Clinical)

Reena A. Bhatt
Clinical Assistant Professor of Surgery (Plastic Surgery)

Piero Biancani
Professor Emeritus of Medicine (Research)

David Bica
Clinical Assistant Professor of Family Medicine

Robert Bickford
Professor Emerita of History of Art and Architecture

L. Cinnamon Bidwell
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Lucien J. E. Bienenstock
Associate Professor of Applied Mathematics and Neuroscience

Thomas J. Biersteker
Adjunct Professor of International Studies

Rosemarie Bigsby
Clinical Professor of Pediatrics; Clinical Professor of Psychiatry and Human Behavior

Bahar Bilgen
Assistant Professor of Orthopaedics (Research)

Courtney C. Bilodeau
Assistant Professor of Medicine (Clinical)

William D. Binder
Assistant Professor of Emergency Medicine (Clinical)

Carsten Binnig
Visiting Associate Professor of Computer Science

Brian E. Bintz
Adjunct Instructor in Pathology and Laboratory Medicine

Ariel Birmbaum
Assistant Professor of Medicine (Clinical)

Christine Anne Biron
Esther Elizabeth Brintzenhoff Professor of Medical Science

Daniel J. Bisaccio
Lecturer in Education

Frederic E. Bisshopp
Professor Emeritus of Applied Mathematics

Navaneel Biswas
Clinical Instructor in Medicine

Hisham Bizri
Professor of Literary Arts

Daniel C. I. Bjorkegren
Adjunct Professor of Computer Science

Brad D. Blankenhorn
Assistant Professor of Orthopaedics

Karen Blackmer
Clinical Assistant Professor of Family Medicine

Brian S. Blais
Adjunct Professor of Brain and Neural Systems

Dawna A. Blake
Clinical Assistant Professor of Medicine

Karyn K. Blane
Clinical Assistant Professor of Psychiatry and Human Behavior

Andrew S. Blazar
Clinical Associate Professor of Medicine

Cynthia Bliss
Clinical Instructor in Pediatrics

Joseph M. Bliss
Associate Professor of Pediatrics

Stanley Hoyt Block
Clinical Associate Professor of Pediatrics

Erika L. Bloom
Assistant Professor of Psychiatry and Human Behavior (Research)

Donald S. Blough
Professor Emeritus of Psychology

Andrew S. Blum
Associate Professor of Neurology
Roger B. Blumberg  
Adjunct Lecturer in Computer Science  
Janet A. Blume  
Associate Professor of Engineering  
Sheila E. Blumstein  
Albert D. Mead Professor of Cognitive, Linguistic and Psychological Sciences  
Michael F. Blundin  
Assistant Professor of Medicine (Clinical)  
Mark M. Blyth  
Professor of Political Science  
Pamela Boachie-Johnson  
Assistant Professor of Psychiatry and Human Behavior (Clinical)  
Beth C. Bock  
Professor of Behavioral and Social Sciences (Research); Professor of Psychiatry and Human Behavior (Research)  
John P. Bodel  
W. Duncan MacMillan II Professor of Classics  
Deborah Boedeker  
Professor Emerita of Classics  
Alan L. Boegehold  
Professor Emeritus of Classics  
John R. Boekamp  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Kim Boekelheide  
Professor of Medical Science  
Daniela Boerescu  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Julie Boersers  
Associate Professor of Pediatrics (Clinical); Associate Professor of Psychiatry and Human Behavior (Clinical)  
Theodore Bogosian  
Visiting Assistant Professor of Humanities  
Barrymore A. Bogues  
Lyn Crost Professor of Social Sciences  
Christina L. Boisseau  
Assistant Professor of Psychiatry and Human Behavior (Research)  
Robert J. Boland  
Adjunct Professor of Psychiatry and Human Behavior  
Dale S. Bond  
Associate Professor of Psychiatry and Human Behavior (Research)  
Sheila Bonde  
Professor of Archaeology and the Ancient World; Professor of History of Art and Architecture  
Charlotte M. Boney  
Professor of Pediatrics  
Alice E. Bonitati  
Associate Professor of Medicine (Clinical)  
M. Christopher Borden  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Octavio Augusto Borges  
Clinical Instructor in Surgery (Ophthalmology)  
Jeffrey Borkan  
Professor of Family Medicine  
Christopher T. Born  
Intrepid Heroes Professor of Orthopedic Surgery  
Belinda Borrelli  
Professor of Psychiatry and Human Behavior (Research)  
Brian E. Borsari  
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)  
David A. Borton  
Assistant Professor of Engineering  
Michel-Andre R. Bossy  
Professor Emeritus of French Studies  
Andrew G. Bostom  
Associate Professor of Medicine  
Leslie A. Bostrom  
Professor of Visual Art  
Paul J. Botelho  
Clinical Assistant Professor of Surgery (Ophthalmology)  
Richard A. Boucher  
Senior Fellow in International Studies  
Ghada Bourjeily  
Associate Professor of Medicine  
David B. Bouslough  
Clinical Assistant Professor of Emergency Medicine  
Lawrence P. Bowen  
Clinical Assistant Professor of Surgery (Plastic Surgery)  
Wayne D. Bowen  
Upjohn Professor of Pharmacology  
Allan Francis Bower  
Royce Family Professor of Teaching Excellence  
Lisa D. Bowie  
Clinical Assistant Professor of Family Medicine  
Kathleen Cote Bowling  
Clinical Associate Professor of Obstetrics and Gynecology  
Jerrold L. Boxerman  
Associate Professor of Diagnostic Imaging  
Kathleen A. Boyd  
Teaching Associate in Music  
Lisa D. Boyle  
Clinical Assistant Professor of Obstetrics and Gynecology  
Michelle A. Boyle  
Clinical Assistant Professor of Family Medicine  
Elizabeth Brainerd  
Professor of Medical Science  
Jordan N. Branch  
Assistant Professor of Political Science  
Nancy H. Brand  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Peter C. Brasch  
Clinical Assistant Professor of Surgery (Ophthalmology)  
Jeffrey P. Bratberg  
Adjunct Associate Professor of Medicine  
Joseph M. Braun  
Assistant Professor of Epidemiology  
Lundy Braun  
Professor of Africana Studies; Professor of Medical Science  
Alexander Braverman  
Professor of Mathematics  
Lynae Brayboy  
Assistant Professor of Obstetrics and Gynecology (Research)  
James A. Braddock  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Barrett W. Bready  
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology  
Paul Breiding  
Clinical Assistant Professor of Medicine  
Andrew S. Brem  
Professor Emeritus of Pediatrics
Debra L. Brendel
Clinical Assistant Professor of Obstetrics and Gynecology

Dror Brenner
Lecturer in Economics

Patricia Bresky
Clinical Assistant Professor of Psychiatry and Human Behavior

Tracy Breton
Visiting Professor of English

Corey L. Brettschneider
Professor of Political Science

Kenneth S. Breuer
Professor of Engineering

Clyde L. Briant
Otis Everett Randall University Professor of Engineering

Steven C. Brin
Clinical Assistant Professor of Medicine

James M. Brindle
Assistant Professor of Radiation Oncology

Willoughby B. Britton
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research); Adjunct Assistant Professor of Humanities

Justin Broackes
Professor of Philosophy

Dan W. Brock
Professor Emeritus of Philosophy

Jeffrey F. Brock
Professor of Mathematics

Cheryl Brodsky
Clinical Assistant Professor of Obstetrics and Gynecology

Jeffrey M. Brody
Associate Professor of Diagnostic Imaging (Clinical)

Julia G. Brody
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Deirdre Brogan
Clinical Assistant Professor of Psychiatry and Human Behavior

Cynthia J. Brokaw
Professor of History

Fred A. Broscio
Clinical Assistant Professor of Obstetrics and Gynecology

Laurent Brossay
Charles A. and Helen B. Stuart Professor of Medical Science

E. Christine Brousseau
Assistant Professor of Obstetrics and Gynecology

Andrew Browder
Professor Emeritus of Mathematics

Daniel C. Brown
Clinical Assistant Professor of Family Medicine

Edward M. Brown
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Joanna D. Brown
Clinical Assistant Professor of Family Medicine

Larry K. Brown
Professor of Psychiatry and Human Behavior

Linda L. Brown
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics

Richard A. Brown
Professor of Psychiatry and Human Behavior

Steven A. Brown
Clinical Assistant Professor of Surgery (Oral & Maxillofacial Surgery)

Walter A. Brown
Clinical Professor of Psychiatry and Human Behavior

William D. Brown
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)

Palmira Brummett
Visiting Professor of History

Nicholas P. Bruno
Clinical Assistant Professor of Dermatology

Elizabeth Johnson Bryan
Associate Professor of English

Richard G. Bryan
Clinical Assistant Professor of Surgery (Ophthalmology)

Margaret Bublitz
Assistant Professor of Psychiatry and Human Behavior (Research)

Gary Bubly
Clinical Associate Professor of Emergency Medicine; Clinical Associate Professor of Medicine

David Buchta
Lecturer in Classics

Jennifer Buckley
Clinical Assistant Professor of Family Medicine

Maria L. Buckley
Clinical Assistant Professor of Psychiatry and Human Behavior

George B. Buczek
Clinical Associate Professor of Surgery (Anesthesiology)

Mari Jo Buhle
Professor Emerita of American Studies

Stephen L. Buka
Professor of Epidemiology

Christopher Bull
Senior Lecturer in Engineering

David Bullard
Assistant Professor of Emergency Medicine (Clinical)

Richard D. Bungiro
Senior Lecturer in Molecular Microbiology and Immunology

Andrew E. Burchard
Clinical Assistant Professor of Surgery (Otolaryngology)

Michael D. Burgard
Clinical Assistant Professor of Psychiatry and Human Behavior

Frederick W. Burgess
Clinical Professor of Surgery (Anesthesiology)

Katrina Burgess
Adjunct Associate Professor of International Studies

Robert T. Burke
Associate Professor of Pediatrics (Clinical)

Jeffrey M. Burock
Clinical Assistant Professor of Psychiatry and Human Behavior

Stuart Burrows
Associate Professor of English

Douglas M. Burtt
Clinical Assistant Professor of Medicine

Rebecca D. Burwell
Professor of Cognitive, Linguistic and Psychological Sciences

Andrea K. Busby
Clinical Assistant Professor of Psychiatry and Human Behavior

Andrew M. Busch
Assistant Professor of Psychiatry and Human Behavior (Research)

Nowell A. Busch
Visiting Lecturer in Language Studies

Stephen S. Bush
Manning Assistant Professor of Religious Studies
Amy Turner Bushnell
Adjunct Associate Professor of History
John E. Buster
Professor of Obstetrics and Gynecology
James Butera
Clinical Associate Professor of Medicine
Melissa A. Buttaro
Clinical Assistant Professor of Psychiatry and Human Behavior
William M. Buttnet
Clinical Assistant Professor of Family Medicine
Claudia S. R. Cabrera
Adjunct Assistant Professor of Medicine
Blake Cady
Professor Emeritus of Surgery
Deborah Cahill
Clinical Assistant Professor of Surgery (Anesthesiology)
Jonathan F. Cahill
Assistant Professor of Neurology (Clinical)
Terrence F. Cahill
Clinical Associate Professor of Obstetrics and Gynecology
Joseph M. Caiati
Clinical Assistant Professor of Surgery (Anesthesiology)
Rachael L. Caiati
Assistant Professor of Diagnostic Imaging (Clinical)
Steven G. Calabresi
Visiting Professor of Political Theory
Anthony Angelo Caldamone
Professor of Pediatrics; Professor of Surgery (Urology)
Angela Caliendo
Professor of Medicine
Nicholas A. Califano
Clinical Associate Professor of Medicine
Joseph F. Callaghan
Clinical Assistant Professor Emeritus of Surgery (Urology)
Charles M. Callahan
Assistant Professor of Emergency Medicine (Clinical)
Joseph M. Calo
Professor Emeritus of Engineering
Vangelis Calotychos
Visiting Associate Professor of Comparative Literature
Carlos Camargo
Adjunct Professor of Pediatrics
April Cambre
Clinical Assistant Professor of Psychiatry and Human Behavior
Melani C. Cammett
Professor of Political Science
Karen T. Cammuso
Clinical Assistant Professor of Psychiatry and Human Behavior
Christopher A. Campagnari
Clinical Assistant Professor of Family Medicine
Christopher P. Campanile
Clinical Associate Professor of Family Medicine
Andrew G. Campbell
Associate Professor of Medical Science
David E. Cane
Vernon K. Kriible Professor of Chemistry
Anthony J. Cannistra
Clinical Assistant Professor of Medicine
Lauralyn B. Cannistra
Clinical Associate Professor of Medicine
Weibiao Cao
Associate Professor of Medicine (Research); Associate Professor of Pathology and Laboratory Medicine (Research)
Carmine J. Capalbo
Clinical Associate Professor Emeritus of Surgery
Christy Capone
Assistant Professor of Psychiatry and Human Behavior
Geoffrey Capraro
Assistant Professor of Emergency Medicine
Cassandra L. Carberry
Assistant Professor of Obstetrics and Gynecology (Clinical)
David A. Carcieri
Clinical Assistant Professor of Obstetrics and Gynecology
Esteban V. Cardemil
Adjunct Associate Professor of Psychiatry and Human Behavior
Zoe G. Cardon
Professor of Earth, Environmental, and Planetary Sciences (MBL)
Chelsy Caren
Assistant Professor of Obstetrics and Gynecology (Clinical)
Claude Carey
Professor Emerita of Slavic Languages
Kate B. Carey
Professor of Behavioral and Social Sciences
Michael Carey
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior
Gerardo P. Carino
Assistant Professor of Medicine (Clinical)
Lynn Carlson
Adjunct Lecturer in Earth, Environmental, and Planetary Sciences
Robert A. Carnevale
Clinical Associate Professor of Medicine
Kathleen Carney-Godley
Clinical Assistant Professor of Dermatology
Mark Carol
Adjunct Assistant Professor of Radiation Oncology
Colleen M. Caron
Clinical Assistant Professor of Epidemiology
Charles C. J. Carpenter
Professor of Medicine
Linda L. Carpenter
Professor of Psychiatry and Human Behavior
Stephen R. Carr
Professor of Obstetrics and Gynecology
Antonio Carreno
Professor Emeritus of Hispanic Studies
Brion P. Carroll
Clinical Assistant Professor of Health Services, Policy and Practice
Mary A. Caruskadon
Professor of Psychiatry and Human Behavior
Sandra A. Carter
Adjunct Professor of Obstetrics and Gynecology
David P. Carter
Clinical Associate Professor of Family Medicine
E. Jane Carter
Associate Professor of Medicine
Rebecca L. Carter
Assistant Professor of Anthropology and Urban Studies
Joseph E. Caruolo
Clinical Assistant Professor Emeritus of Surgery
Angelina C. A. Carvalho
Professor Emerita of Medicine
John F. Cherry
Joukowsky Family Professor of Archaeology

Michael K. Chin
Clinical Assistant Professor of Family Medicine

Tamara Chin
Associate Professor of Comparative Literature

Eunyoung Cho
Associate Professor of Dermatology

John Songpae Cho
Visiting Lecturer in East Asian Studies

Adam Chodobski
Associate Professor of Emergency Medicine

Bryan Y. Choi
Assistant Professor of Emergency Medicine

Bum-Rak Choi
Associate Professor of Medicine (Research)

Hyunjung Choi
Teaching Associate in Music

Kue Chung Choi
Clinical Assistant Professor of Obstetrics and Gynecology

Esther Choo
Assistant Professor of Emergency Medicine; Assistant Professor of Health Services, Policy and Practice

Pradeep Chopra
Assistant Professor of Medicine (Clinical)

Nitsan Chorev
Harmon Family Professor of Sociology and International Studies

Wayne Kw Chou
Assistant Professor of Chemistry (Research)

Gaurav Choudhary
Associate Professor of Medicine

David P. Christensen
Professor of Philosophy

Fredric V. Christian
Clinical Assistant Professor of Medicine

Mirena Christoff
Senior Lecturer in Language Studies

Paul Christopher
Assistant Professor of Psychiatry and Human Behavior

David J. Chronley
Clinical Assistant Professor of Pediatrics

Antony Chu
Assistant Professor of Medicine

Ming-Yu Wang Chu
Professor Emerita of Medicine (Research)

Shih-Hsi Chu
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology (Research)

Rosalind Y. Chua
Teaching Associate in Music

Cheng-Chieh Chuang
Clinical Assistant Professor of Family Medicine

Howard P. Chudacoff
George L. Littlefield Professor of American History

Thomas H. Chun
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Wendy Hui Kyong Chun
Professor of History of Art and Architecture; Professor of Modern Culture and Media

Chun-Shiang Chung
Assistant Professor of Surgery (Research)

Russell M. Church
Edgar L. Marston Professor of Psychology

Lydia R. Ciarallo
Assistant Professor of Emergency Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)

Deus Cielo
Assistant Professor of Neurosurgery (Clinical)

Sybil Cineas
Associate Professor of Medicine (Clinical); Associate Professor of Pediatrics (Clinical)

William Cioffi Jr
J. Murray Beardsley Professor of Surgery

Mark Cladis
Brooke Russell Astor Professor of Humanities

Wayne C. Clairborne
Clinical Associate Professor of Obstetrics and Gynecology

Melissa A. Clark
Professor of Epidemiology; Professor of Obstetrics and Gynecology

Jennifer G. Clarke
Associate Professor of Medicine; Associate Professor of Obstetrics and Gynecology

Michael Clarkson
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)

Michelle Clayton
Associate Professor of Comparative Literature; Associate Professor of Hispanic Studies

Colleen A. Cleary
Clinical Assistant Professor of Family Medicine

Steven C. Clemens
Associate Professor of Earth, Environmental, and Planetary Sciences (Research)

Jeffrey D. Clement
Clinical Assistant Professor of Medicine

Richard Clements
Assistant Professor of Surgery (Research)

James G. Clifton
Assistant Professor of Medical Science (Research)

Rodney J. Clifton
Rush C. Hawkins University Professor Emeritus of Engineering

David R. Cloutier
Clinical Assistant Professor of Surgery

Brian Clyne
Associate Professor of Emergency Medicine

Radicilani Clytus
Assistant Professor of English and American Studies

Roger Cobb
Professor of Political Science

Thomas B. Coburn
Visiting Scholar in Religious Studies

Mia Coetzer
Assistant Professor of Medicine (Research)

Charlotte Coffin
Visiting Associate Professor of Comparative Literature

Daniel T. Coghill
Visiting Associate Professor of Comparative Literature

Gail E. Cohee
Adjunct Assistant Professor of Gender Studies

Andrew Cohen
Professor of Medicine

Evan Cohen
Clinical Assistant Professor of Medicine
Ronald A. Cohen  
Adjunct Professor of Psychiatry and Human Behavior

Steven Ira Cohen  
Clinical Assistant Professor of Surgery

Steven Irvin Cohen  
Clinical Assistant Professor of Surgery (Urology)

Wendy Cohen  
Clinical Assistant Professor of Family Medicine

Uriel Cohen Priva  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences

Jamieson V. Cohn  
Assistant Professor of Emergency Medicine (Clinical)

Anthony G. Cokes  
Professor of Modern Culture and Media

Mauro Colavita  
Clinical Assistant Professor of Obstetrics and Gynecology

Suzanne Marie Colby  
Professor of Behavioral and Social Sciences (Research); Professor of Psychiatry and Human Behavior (Research)

Arlene M. Cole  
Adjunct Lecturer in Music

Brian J. Cole  
Professor of Mathematics

Annette W. Coleman  
Stephen T Olney Professor Emerita of Natural History

Jeffrey Coleman  
Assistant Professor of Medicine (Research)

John R. Coleman  
Professor Emeritus of Biology

Reid W. Coleman  
Clinical Associate Professor of Medicine

Jeffrey D. Colgan  
Richard Holbrooke Assistant Professor of Political Science and International Studies

Bradley J. Collins  
Clinical Assistant Professor of Medicine

Raymond F. Collins  
Visiting Scholar in Religious Studies

Maria C. Colon-Gonzalez  
Clinical Instructor in Family Medicine

Douglas J. Colson  
Clinical Instructor in Surgery (Otolaryngology)

Curt Columbus  
Clinical Professor of Theatre Arts and Performance Studies

Kelly R. Colvin  
Visiting Assistant Professor of History

Ruth Melanie Colwill  
Professor of Cognitive, Linguistic and Psychological Sciences

Jack D. Combs  
Lecturer in Public Policy

Jonathan P. Conant  
Associate Professor of History

Jeannine M. Connolly  
Clinical Assistant Professor of Obstetrics and Gynecology

Michael Connolly  
Assistant Professor of Surgery (Trauma)

Francis Connor Jr  
Clinical Associate Professor of Surgery (Oral & Maxillofacial Surgery)

Barry William Connors  
L. Herbert Ballou University Professor of Neuroscience

Selby Conrad  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elsa Erika Constantine  
Clinical Assistant Professor of Emergency Medicine; Clinical Assistant Professor of Pediatrics

Herbert P. Constantine  
Professor Emeritus of Health Services, Policy and Practice

Maria Constantinou  
Clinical Assistant Professor of Medicine

John M. Conte  
Clinical Assistant Professor of Medicine

Maureen H. Conte  
Adjunct Associate Professor of Earth, Environmental, and Planetary Sciences

Harold J. Cook  
John F. Nickoll Professor of History

Linda J. Cook  
Professor of Political Science; Professor of Slavic Studies

Valerie A. Cooley  
Lecturer in Public Policy

Kathryn Coolidge  
Clinical Instructor in Medicine

David B. Cooper  
Professor Emeritus of Engineering

George Cooper  
Clinical Associate Professor Emeritus of Surgery

Leon N. Cooper  
Thomas J. Watson, Sr. Professor of Science (Research)

Reid F. Cooper  
Professor of Earth, Environmental, and Planetary Sciences

Robert Coover  
T.B. Stowell University Professor Emeritus of Literary Arts

Robert Douglas Cope  
Associate Professor of History

Joan K. Copjec  
Professor of Modern Culture and Media

A. Michael Coppa  
Clinical Instructor in Obstetrics and Gynecology

Denise Coppa  
Clinical Assistant Professor of Pediatrics

Paul Coppack  
Visiting Scholar in Philosophy

Alfredo Cordova  
Clinical Assistant Professor of Psychiatry and Human Behavior

William M. Corrao  
Clinical Professor of Medicine

Giselle A. Corre  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ruth Melanie Colwill  
Professor of Cognitive, Linguistic and Psychological Sciences

Jack D. Combs  
Lecturer in Public Policy

Jonathan P. Conant  
Associate Professor of History

Jeannine M. Connolly  
Clinical Assistant Professor of Obstetrics and Gynecology

Michael Connolly  
Assistant Professor of Surgery (Trauma)

Francis Connor Jr  
Clinical Associate Professor of Surgery (Oral & Maxillofacial Surgery)

Barry William Connors  
L. Herbert Ballou University Professor of Neuroscience

Selby Conrad  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elsa Erika Constantine  
Clinical Assistant Professor of Emergency Medicine; Clinical Assistant Professor of Pediatrics

Herbert P. Constantine  
Professor Emeritus of Health Services, Policy and Practice

Maria Constantinou  
Clinical Assistant Professor of Medicine

John M. Conte  
Clinical Assistant Professor of Medicine

Maureen H. Conte  
Adjunct Associate Professor of Earth, Environmental, and Planetary Sciences

Harold J. Cook  
John F. Nickoll Professor of History

Linda J. Cook  
Professor of Political Science; Professor of Slavic Studies

Valerie A. Cooley  
Lecturer in Public Policy

Kathryn Coolidge  
Clinical Instructor in Medicine

David B. Cooper  
Professor Emeritus of Engineering

George Cooper  
Clinical Associate Professor Emeritus of Surgery

Leon N. Cooper  
Thomas J. Watson, Sr. Professor of Science (Research)

Reid F. Cooper  
Professor of Earth, Environmental, and Planetary Sciences

Robert Coover  
T.B. Stowell University Professor Emeritus of Literary Arts

Robert Douglas Cope  
Associate Professor of History

Joan K. Copjec  
Professor of Modern Culture and Media

A. Michael Coppa  
Clinical Instructor in Obstetrics and Gynecology

Denise Coppa  
Clinical Assistant Professor of Pediatrics

Paul Coppack  
Visiting Scholar in Philosophy

Alfredo Cordova  
Clinical Assistant Professor of Psychiatry and Human Behavior

William M. Corrao  
Clinical Professor of Medicine

Giselle A. Corre  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ruth Melanie Colwill  
Professor of Cognitive, Linguistic and Psychological Sciences

Jack D. Combs  
Lecturer in Public Policy
Richard A. Cottiero
Clinical Associate Professor of Medicine

Kareen L. K. Coulombe
Assistant Professor of Engineering

Donald R. Coustan
Professor of Obstetrics and Gynecology

Shiavax Cowasji
Clinical Assistant Professor of Medicine

Hugh P. Cowdin Jr
Clinical Assistant Professor of Surgery (Anesthesiology)

Mara G. Coyle
Professor of Pediatrics (Clinical)

Thomas F. Crain
Assistant Professor of Medicine (Clinical)

Robert Crausman
Clinical Professor of Medicine

Constance M. Crawford
Adjunct Lecturer in Theatre Arts and Performance Studies

Norbert J. Craybas
Clinical Assistant Professor of Surgery

Suzannah Creech
Assistant Professor of Psychiatry and Human Behavior (Research)

Robbert J. Creton
Associate Professor of Medical Science (Research)

Rebecca J. Crichton
Clinical Assistant Professor of Obstetrics and Gynecology

Frederick Crisafulli
Clinical Associate Professor of Medicine

Gene Crisafulli
Teaching Associate in Music

Henry F. Lippitt Professor of Orthopedics

Patricia A. Cristofaro
Assistant Professor of Medicine (Clinical)

John J. Cronan
Charles and Elfriede Collis-Francis Weeden Gibson Professor of Diagnostic Imaging in the Warren Alpert Medical School

Beth Cronin
Assistant Professor of Obstetrics and Gynecology (Clinical)

William C. Crossgrove
Professor Emeritus of German Studies and Comparative Literature

James P. Crowley
Professor Emeritus of Medicine

Laina E. Crowthers
Clinical Assistant Professor of Obstetrics and Gynecology

Scott J. Cruikshank
Assistant Professor of Neuroscience (Research)

Antonio P. Cruz
Clinical Assistant Professor of Dermatology

Larry Culpepper
Adjunct Professor of Family Medicine

Catherine A. Cummings
Clinical Associate Professor of Emergency Medicine

Danielle A. Cummings
Clinical Instructor in Surgery (Oral & Maxillofacial Surgery)

Francis J. Cummings
Adjunct Associate Professor of Medicine

Michael L. Cummings
Clinical Instructor in Pediatrics

Stephen Cummings
Clinical Assistant Professor of Family Medicine

Cheston B. Cunha
Assistant Professor of Medicine (Clinical)

Oscar M. Curet
Visiting Scholar in Engineering

David Curley
Assistant Professor of Emergency Medicine

Bruce H. Curran
Clinical Associate Professor of Radiation Oncology

Robert E. Curran
Clinical Assistant Professor of Surgery (Ophthalmology)

Alicia Curtin
Assistant Professor of Family Medicine (Clinical)

L. Perry Curtis
Professor Emeritus of History

Lewis Perry Curtis Jr
Professor Emeritus of History

Anne Cushing-Brescia
Clinical Assistant Professor of Medicine

Marlene Cutlar
Clinical Assistant Professor of Surgery

David Cutts
Professor of Physics

Susan Cu-Uvin
Professor of Health Services, Policy and Practice; Professor of Medicine; Professor of Obstetrics and Gynecology

Michele G. Cyr
Professor of Medicine

John K. Czerwein
Clinical Assistant Professor of Orthopaedics

Constantine Michael Dafermos
Alumni-Alumnae University Professor of Applied Mathematics

Issa J. Dahabreh
Assistant Professor of Health Services, Policy and Practice (Research)

Albert E. Dahlberg
Professor Emeritus of Medical Science

Lori Dalbello
Assistant Professor of Medicine (Research)

Kristy L. Dalrymple Gaudiano
Assistant Professor of Psychiatry and Human Behavior (Research)

Colleen A. Dalton
Assistant Professor of Earth, Environmental, and Planetary Sciences

Suzanne C. Dambeck
Clinical Instructor in Obstetrics and Gynecology

Olivia R. D'Ambrosio
Teaching Associate in Theatre Arts and Performance Studies

Daniel J. D'Amico
Visiting Professor of Political Science

Robert A. D'Andrea
Adjunct Lecturer in Economics

Susan E. D'Andrea
Assistant Professor of Orthopaedics (Research)
Anh-Tai Vinh Dang
Clinical Instructor in Obstetrics and Gynecology

Henry D’Angelo
Clinical Assistant Professor of Family Medicine

Michelle M. Daniel
Assistant Professor of Emergency Medicine (Clinical)

Jerry Delmar Daniels
Associate Professor of Engineering

Kwame Dapaah-Afriyie
Clinical Associate Professor of Medicine

Eric M. Darling
Manning Assistant Professor of Molecular Pharmacology, Physiology, and Biotechnology

Manuel F. Dasilva
Assistant Professor of Orthopaedics

Georgios D. Daskalopoulos
Professor of Mathematics

Anthony Davids
Professor Emeritus of Psychology

Kristopher Davignon
Clinical Assistant Professor of Surgery (Anesthesiology)

Jennifer D. Davis
Associate Professor of Psychiatry and Human Behavior (Clinical)

Lawrence M. Davis
Assistant Professor of Diagnostic Imaging (Clinical)

Philip J. Davis
Professor Emeritus of Applied Mathematics

Robert Paul Davis
Professor Emeritus of Medical Science

Stephen W. Davis
Clinical Associate Professor of Family Medicine

Susan Day
Associate Professor of Pediatrics (Clinical)

T. Eugene Day
Adjunct Assistant Professor of Emergency Medicine

Alexandra M. Deaconescu
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Cornelia Dean
Distinguished Visiting Lecturer in Environmental Studies

Mark R. Dean
Stephen Robert Assistant Professor of Economics

Thomas L. Dean
Adjunct Professor of Computer Science

Lynne DeBenedette
Senior Lecturer in Slavic Studies

Carol L. DeBoer-Langworthy
Lecturer in English

Jeri B. Debrohun
Associate Professor of Classics

Geoffroy DeClippel
Associate Professor of Economics

Linda Deegan
Professor of Ecology and Evolutionary Biology (MBL)

Silvia Degli Esposti
Associate Professor of Medicine (Clinical)

Catherine Degood
Adjunct Assistant Professor of Family Medicine

Christopher L. de Graffenried
Assistant Professor of Molecular Microbiology and Immunology (Research)

Laura Deihl
Clinical Assistant Professor of Psychiatry and Human Behavior

Carol Lowery Delaney
Visiting Scholar in Religious Studies

Sarah Delaney
Associate Professor of Chemistry

Sara Delaporta
Clinical Instructor in Family Medicine

Ronald A. DeLellis
Professor Emeritus of Pathology and Laboratory Medicine

Paul V. Del Guercio
Clinical Assistant Professor of Family Medicine

Francine A. D’Elia
Clinical Assistant Professor of Psychiatry and Human Behavior

Ian P. Dell’Antonio
Professor of Physics

Thomas D. Della Torre
Clinical Assistant Professor of Family Medicine

Alison DeLong
Associate Professor of Biology

Anthony M. DeLuise
Clinical Assistant Professor of Family Medicine

Kathryn E. Demos
Assistant Professor of Psychiatry and Human Behavior (Research)

Timothy Denison
Adjunct Assistant Professor of Engineering

Penelope Hill Denneny
Professor of Pediatrics

Jane Mackenzie Dennison
Clinical Assistant Professor of Pediatrics

Lisa R. Denny
Clinical Assistant Professor of Family Medicine

David Denofrio
Adjunct Associate Professor of Medicine

Thomas D. Denucci
Clinical Assistant Professor of Medicine

Nicola F. Denzey
Visiting Associate Professor of Religious Studies

Sean C. L. Deoni
Assistant Professor of Engineering

Monique E. DePaepe
Professor of Pathology and Laboratory Medicine

Vera A. De Palo
Associate Professor of Medicine

Judith Depue
Clinical Professor of Psychiatry and Human Behavior

Leo Depuydt
Professor of Egyptology and Assyriology

Zoltan Derdak
Assistant Professor of Medicine (Research)

Diane Dermarderosian
Assistant Professor of Pediatrics (Clinical)

Angela DeRobertis
Clinical Assistant Professor of Radiation Oncology

Mary Derosa
Clinical Assistant Professor of Obstetrics and Gynecology

D’Arcy C. Dersham
Teaching Associate in Theatre Arts and Performance Studies

Allan Mark Deutsch
Clinical Associate Professor Emeritus of Diagnostic Imaging

Theresa J. Devine
Lecturer in Public Policy
Paula Deyoung
Clinical Instructor in Obstetrics and Gynecology

Nilish Dhingra
Visiting Scientist in Physics

Giulio G. Diamante
Clinical Assistant Professor of Surgery (Ophthalmology)

Joseph Anthony Diaz
Associate Professor of Medicine

Alexander Diaz De Villalvilla
Assistant Professor of Medicine (Clinical)

Christy Dibble
Clinical Assistant Professor of Medicine

Joseph DiBenedetto
Clinical Assistant Professor of Medicine

Lisa Di Carlo
Lecturer in Sociology

Margaret A. DiCarlo
Clinical Assistant Professor of Psychiatry and Human Behavior

James H. Dickerson
Adjunct Associate Professor of Physics

Daniel P. Dickstein
Associate Professor of Diagnostic Imaging; Associate Professor of Pediatrics; Associate Professor of Psychiatry and Human Behavior

Susan Dickstein
Associate Professor of Pediatrics; Associate Professor of Psychiatry and Human Behavior

Elizabeth R. Didie
Clinical Associate Professor of Psychiatry and Human Behavior

Gerald J. Diebold
Professor of Chemistry

Dinusha W. Dietrich
Clinical Assistant Professor of Pediatrics

Wendell S. Dietrich
Professor Emeritus of Religious Studies and Judaic Studies

Amy Bach Dilello
Clinical Assistant Professor of Psychiatry and Human Behavior

Ann Dill
Associate Professor Emerita of Sociology

Joseph Dimase
Clinical Assistant Professor Emeritus of Medicine

Qifan Ding
Visiting Lecturer in East Asian Studies

John Diorio
Clinical Assistant Professor of Obstetrics and Gynecology

Thomas Dipetillo
Associate Professor of Radiation Oncology

Francesco Di Pili
Tamarkin Assistant Professor

Paul A. Disilvestro
Associate Professor of Obstetrics and Gynecology

Stephen Dizio
Clinical Assistant Professor of Psychiatry and Human Behavior

Beata E. Dizoglio
Clinical Assistant Professor of Obstetrics and Gynecology

Richard A. Dobbins
Professor Emeritus of Engineering

Curtis Doberstein
Associate Professor of Neurosurgery (Clinical)

Tyler Dobrowsky
Teaching Associate in Theatre Arts and Performance Studies

Vladimir Dobrushkin
Visiting Professor of Applied Mathematics

Robert J. Dobrzynski Jr
Clinical Assistant Professor of Medicine

Kimberly A. Dodd
Assistant Professor of Medicine

Thomas W. Doepner Jr
Associate Professor of Computer Science (Research)

Jimmie D. Doll
Josse H. and Louisa D. Sharp Metcalf Professor Emeritus of Chemistry

Lisa Ruth Domagalski
Clinical Assistant Professor of Obstetrics and Gynecology

Peter Dombrowski
Adjunct Professor of International Studies

Fulvio Domini
Professor of Cognitive, Linguistic and Psychological Sciences

Wai-Sun Don
Visiting Professor of Applied Mathematics

John E. Donahue
Associate Professor of Neurology; Associate Professor of Pathology and Laboratory Medicine

John P. Donahue
Clinical Assistant Professor of Surgery (Ophthalmology)

Abigail Donaldson
Assistant Professor of Pediatrics

David Donaldson
Clinical Assistant Professor of Medicine

Deidre L. Donaldson
Adjunct Assistant Professor of Psychiatry and Human Behavior

Walter E. Donat
Clinical Associate Professor of Medicine

Linda L. Donegan
Assistant Professor of Diagnostic Imaging (Clinical)

Hongjie Dong
Associate Professor of Applied Mathematics

Xiaoqun Dong
Adjunct Assistant Professor of Medicine

John P. Donoghue
Henry Merritt Wriston Professor of Neuroscience

Elizabeth Donsky
Adjunct Instructor in Visual Art

Alexei A. Doohovskoy
Teaching Associate in Music

Miquel Dorca
Visiting Lecturer in Physics

Gary S. Dorfman
Professor Emeritus of Diagnostic Imaging

David M. Dosa
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine

Edmund T. Dosremedios
Clinical Assistant Professor of Orthopaedics

Beshara B. Doumani
Joukowsky Family Professor of Modern Middle East History

Jeffrey Dover
Adjunct Associate Professor of Dermatology

Robert M. Dowben
Adjunct Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology

Joseph L. Dowling Jr
Clinical Associate Professor Emeritus of Surgery

Hilary Doyle
Adjunct Instructor in Visual Art
Thomas J. Doyle
Assistant Professor of Medicine (Clinical)

James Dreier
Professor of Philosophy

Thomas Drew
Clinical Associate Professor of Medicine

Viren A. D'Sa
Associate Professor of Pediatrics (Clinical)

Fenghai Duan
Assistant Professor of Biostatistics (Research)

Kristina M. Duarte
Assistant Professor of Family Medicine (Clinical)

Catherine E. Dube
Adjunct Associate Professor of Behavioral and Social Sciences

Gregory J. Dubel
Assistant Professor of Diagnostic Imaging (Clinical)

Patrycja Dubielecka-Szczerba
Assistant Professor of Medicine (Research)

Joseph F. Ducharme
Clinical Assistant Professor of Surgery (Ophthalmology)

Samuel Dudley
Ruth and Paul Levinger Professor of Cardiology

Brian E. Duff
Clinical Associate Professor of Surgery (Otolaryngology)

Christine M. Duffy
Assistant Professor of Medicine

Susan Duffy
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Raymond G. Dufresne
Professor of Dermatology

Luba Dumenco
Lecturer in Pathology and Laboratory Medicine

Nancy R. Dunbar
Senior Lecturer Emerita in Theatre Arts and Performance Studies

Annamarie Duncan
Assistant Professor of Surgery (Clinical)

Casey Dunn
Associate Professor of Biology

Shira I. Dunsiiger
Assistant Professor of Behavioral and Social Sciences (Research)

George J. DuPont
Clinical Assistant Professor of Surgery (Oral & Maxillofacial Surgery)

Paul G. Dupuis
IBM Professor of Applied Mathematics

Damian E. Dupuy
Professor of Diagnostic Imaging

Frank Durand
Professor Emeritus of Hispanic Studies

Laura Green Durand
Professor Emeritus of French Studies

Kevin M. Dushay
Assistant Professor of Medicine (Clinical)

Richard L. Dvorin
Clinical Assistant Professor of Pediatrics

Lance D. Dworin
Professor of Medicine

Candace L. Dyer
Clinical Assistant Professor of Surgery

Robert K. Dyer
Clinical Assistant Professor of Dermatology

Anani Dodzieny
Associate Professor of Africana Studies; Associate Professor of Portuguese and Brazilian Studies

Mary Frances Dzurinko
Clinical Assistant Professor of Surgery

J. Donald Easton
Professor Emeritus of Neurology

Charles B. Eaton
Professor of Epidemiology; Professor of Family Medicine

Jonathan W. Eaton
William R. Rhodes ’57 Professor of International Economics

Craig P. Eber
Associate Professor of Orthopaedics

Sue E. Eckert
Senior Fellow in International Studies

Robert Eden
Clinical Assistant Professor of Pediatrics

Timothy H. Edgar
Visiting Fellow in International Studies

Laura M. Edmonds
Assistant Professor of Medicine (Clinical)

David Edmonson
Assistant Professor of Obstetrics and Gynecology (Clinical); Assistant Professor of Surgery (Clinical)

Lee Edstrom
Professor of Surgery

Erika J. Edwards
Associate Professor of Ecology and Evolutionary Biology

Joely V. Edwards
Clinical Assistant Professor of Family Medicine

Wendy Edwards
Professor of Visual Art

James F. Egan
Professor of English

Renee Ross Eger
Clinical Assistant Professor of Obstetrics and Gynecology

Gauti B. Eggertsson
Associate Professor of Economics

Thomas K. Egglin
Associate Professor of Diagnostic Imaging

David Eglman
Clinical Professor of Family Medicine

Erik T. Ehn
Professor of Theatre Arts and Performance Studies

Michael G. Ehrlich
Vincent Zecchino, MD Professor of Orthopaedic Surgery

Afschin Ehsan
Assistant Professor of Surgery (Clinical)

Charles Eli
Clinical Associate Professor of Medicine

Jane L. Eisen
Professor of Psychiatry and Human Behavior

Yul D. Ejes
Clinical Associate Professor of Medicine

Charles Elbaum
Professor Emeritus of Physics

Rabih El-Bizri
Assistant Professor of Medicine (Clinical)

Salaheldin Elhamamsy
Clinical Instructor in Medicine

Courtney Beard Elias
Adjunct Instructor in Psychiatry and Human Behavior
Jack A. Elias
Frank L. Day Professor of Biology

Heinrich Elinzano
Assistant Professor of Neurology

Peter M. Eller
Clinical Assistant Professor of Medicine

Claudia Elliott
Senior Lecturer in International Studies

Gregory C. Elliott
Professor of Sociology

Richard Akers Ellis
Professor Emeritus of Biology

Kristin E. Ellison
Associate Professor of Medicine

Pamela I. Ellsworth
Professor of Surgery (Urology)

Fadya El Rayess
Assistant Professor of Family Medicine (Clinical)

Martin Elson
Clinical Assistant Professor of Surgery

Michelle E. Embree-Ku
Adjunct Instructor in Pathology and Laboratory Medicine

Nina R. Emery
Assistant Professor of Philosophy

Rinchen-Tzo Emgushov
Clinical Instructor in Medicine

John Emigh
Professor Emeritus of Theatre Arts and Performance Studies and English

Robert P. Emten
Senior Lecturer in American Studies

Christine M. Emmick
Clinical Assistant Professor of Surgery

Timothy M. Empkie
Clinical Associate Professor of Family Medicine

Joseph J. England
Clinical Assistant Professor of Family Medicine

Christian Enss
Visiting Professor of Physics

Esther Entin
Clinical Associate Professor of Family Medicine

Yoash R. Enzer
Clinical Associate Professor of Dermatology; Clinical Associate Professor of Surgery

Jeanette I. Epstein
Adjunct Lecturer in Education

Lynn C. Epstein
Clinical Professor Emerita of Psychiatry and Human Behavior

Mel H. Epstein
Professor Emeritus of Neurosurgery

Nathan B. Epstein
Professor Emeritus of Psychiatry and Human Behavior

Gary P. Epstein-Lubow
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Psychiatry and Human Behavior

Yusuf Ergodgu
Visiting Scientist in Chemistry

Allan Erickson
Associate Professor Emeritus of Medicine

Shannon Marie Erisman
Clinical Assistant Professor of Psychiatry and Human Behavior

Matthew A. Esposito
Assistant Professor of Obstetrics and Gynecology (Clinical)

Cynthia Esteban
Clinical Assistant Professor of Pediatrics

David Estlund
Lombardo Family Professor of the Humanities

Elkin O. Estrada
Clinical Assistant Professor of Medicine

Peter J. Estrup
Professor Emeritus of Chemistry and Dean Emeritus of the Graduate School and Research

David Ettensohn
Clinical Associate Professor of Psychiatry and Human Behavior

Peter B. Evans
Senior Fellow in International Studies

Svetlana Evdokimova
Professor of Slavic Studies and Comparative Literature

Brian K. Evenson
Professor of Literary Arts

Paul Fadale
Professor of Orthopaedics

Mark J. Fagan
Professor of Medicine

Elaine B. Fain
Clinical Assistant Professor of Medicine

William G. Fairbrother
Associate Professor of Biology

Miled Faiza
Lecturer in Language Studies

M. Khurram Faizan
Associate Professor of Pediatrics (Clinical)

Peder J. Estrup
Clinical Associate Professor of Family Medicine

Justin R. Fallon
Clinical Associate Professor of Obstetrics and Gynecology

Frank Faltus
Professor Emeritus of Medical Science; Professor of Psychiatry and Human Behavior

Jack A. Fanning
Assistant Professor of Economics

Katherine E. Faricy-Anderson
Assistant Professor of Medicine

Ashraf M. Farid
Clinical Instructor in Surgery

Joseph Farina
Clinical Assistant Professor of Medicine

Elisabeth K. Farnum
Clinical Assistant Professor of Family Medicine

David S. Farrell
Clinical Associate Professor of Dermatology

Susan Fasoli
Instructor in Neurology (Research)

Caleb I. Fassett
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Loren D. Fast
Associate Professor of Medicine (Research)

Paja L. Faudree
Assistant Professor of Anthropology
Carol J. Faulkner
Assistant Professor of Psychiatry and Human Behavior (Clinical)
Anne Fausto-Sterling
Nancy Duke Lewis Professor Emerita of Biology
Nicolas Lux Fawzi
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology
Peter Fay
Clinical Assistant Professor of Surgery (Ophthalmology)
Deidre M. Fearon
Associate Professor of Emergency Medicine (Clinical); Associate Professor of Pediatrics (Clinical)
Jeffrey Feden
Assistant Professor of Emergency Medicine
Seth Feder
Clinical Assistant Professor of Dermatology
Corey R. Fehnel
Assistant Professor of Neurology; Assistant Professor of Neurosurgery
Leslie Ann Feil
Clinical Assistant Professor of Psychiatry and Human Behavior
Lloyd R. Felt
Associate Professor of Pediatrics
Martin E. Felder
Clinical Professor Emeritus of Surgery
Michael F. Felder
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Pediatrics
Allan Maurice Feldman
Professor Emeritus of Economics
Dmitri Feldman
Associate Professor of Physics
Martin P. Feldman
Clinical Instructor Emeritus in Surgery
Melvin L. Feldman
Adjunct Professor Emeritus of Urban Studies
Michael Feldman
Clinical Assistant Professor of Orthopaedics
Walter S. Feldman
John Hay Professor Emeritus of Bibliography and Professor Emeritus of Visual Art
Edward R. Feller
Clinical Professor of Health Services, Policy and Practice; Clinical Professor of Medicine
Pedro F. Felzenszwalb
Associate Professor of Computer Science; Associate Professor of Engineering
Jun Feng
Assistant Professor of Surgery (Research)
Zhanlian Feng
Adjunct Assistant Professor of Health Services, Policy and Practice
Mary L. Fennell
Professor of Health Services, Policy and Practice; Professor of Sociology
Mary Anne Fenton
Clinical Associate Professor of Medicine
John R. Ferguson
Visiting Assistant Professor of Music
Gustavo E. Fernandez
Senior Research Associate in Engineering
Daniel D. Ferrante
Visiting Scientist in Physics
Roquinaldo Ferreira
Vasca da Gama Associate Professor of Early Modern Portuguese History
Marcolino Ferretti
Clinical Assistant Professor of Pediatrics
Fred F. Ferri
Clinical Professor of Health Services, Policy and Practice
Sarah J. Fessler
Clinical Assistant Professor of Family Medicine
Elena Kristie Festa
Lecturer in Cognitive, Linguistic and Psychological Sciences
Richard A. Fey
Adjunct Lecturer in Economics
Masako Ueda Fidler
Professor of Slavic Studies
Vlastimil Fidler
Visiting Associate Professor of Chemistry
Thaila L. Field
Professor of Literary Arts
Anna Filip
Assistant Professor of Family Medicine (Clinical)
John W. Finigan
Clinical Instructor in Pediatrics
Lois Finkel
Teaching Associate in Music
Arkadiy Finn
Assistant Professor of Medicine (Clinical)
Michael A. Fiori
Clinical Assistant Professor of Psychiatry and Human Behavior
Simon Fiorucci
Assistant Professor of Physics (Research)
Bruce E. Fischer
Clinical Instructor in Medicine
Karen M. Fischer
Professor of Earth, Environmental, and Planetary Sciences
Staci A. Fischer
Associate Professor of Medicine
Sumner Fishbein
Clinical Assistant Professor of Surgery (Ophthalmology)
Linford D. Fisher
Assistant Professor of History
Whitney Charles Fisher
Assistant Professor of Emergency Medicine (Clinical)
Richard Fishman
Professor of Visual Art
Kathryn Fisler
Adjunct Associate Professor of Computer Science
James L. Fitzgerald
St. Purander Das Distinguished Professor of Classics
Walter D. Fitzhugh
Clinical Assistant Professor of Psychiatry and Human Behavior
Patricia Jeanne Flanagan
Professor of Pediatrics
Timothy P. Flanagan
Professor of Health Services, Policy and Practice
B. Allen Flaxman
Clinical Professor Emeritus of Dermatology
Braden C. Fleming
Lucy Lippitt Professor of Orthopedics
Wendell H. Fleming
University Professor Emeritus, Professor Emeritus of Applied Mathematics and Mathematics
Kathryn Fleming-Ives
Adjunct Assistant Professor of Psychiatry and Human Behavior
Steven Charles Flood  
Clinical Assistant Professor of Family Medicine

Paul R. Florin  
Adjunct Professor of Epidemiology

Ellen Flynn  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Psychiatry and Human Behavior

Mary M. Flynn  
Associate Professor of Medicine (Clinical)

Pamela S. P. Foa  
Senior Fellow in Gender Studies

John L. Foggie  
Associate Professor of Emergency Medicine (Clinical)

Stephen Merriam Foley  
Associate Professor of Comparative Literature; Associate Professor of English

Michael J. Follick  
Clinical Professor of Health Services, Policy and Practice

Tsz-Ho Fong  
Tamarkin Assistant Professor of Mathematics

Rodrigo L. C. Fonseca  
Assistant Professor of Computer Science

Lynne A. Fontaine  
Adjunct Associate Professor of Pediatrics

Elizabeth Ann Forbes  
Clinical Assistant Professor of Pediatrics

Michelle M. Forcier  
Associate Professor of Pediatrics (Clinical)

Sara R. Ford  
Associate Professor of Pediatrics (Clinical)

Edwin N. Forman  
Professor Emeritus of Pediatrics

Laura Forman  
Clinical Instructor in Emergency Medicine

Charles W. Fornara  
Professor Emeritus of Classics

Donald W. Forsyth  
James Manning Professor of Earth, Environmental, and Planetary Science

Glenn G. Fort  
Clinical Associate Professor of Medicine

David J. Fortunato  
Clinical Associate Professor of Medicine

Andrew D. Foster  
Professor of Economics

Rachel L. Fowler  
Assistant Professor of Emergency Medicine

Gregory A. Fox  
Clinical Assistant Professor of Pediatrics

Sarah D. Fox  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Baylor Fox-Kemper  
Assistant Professor of Earth, Environmental, and Planetary Sciences

A. Raymond Frackleton  
Adjunct Associate Professor of Medicine (Research); Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)

Laura L. Frakey  
Clinical Assistant Professor of Psychiatry and Human Behavior

Julio Cesar Franca Pereira  
Visiting Scholar in Portuguese and Brazilian Studies

Caren L. Francione  
Clinical Assistant Professor of Psychiatry and Human Behavior

Greta Francis  
Associate Professor of Psychiatry and Human Behavior

Christian Franck  
Assistant Professor of Engineering

Jennifer A. Franck  
Lecturer in Engineering

Caroline B. Frank  
Visiting Assistant Professor of American Studies

Heather M. Frank  
Clinical Assistant Professor of Psychiatry and Human Behavior

Mascha Frank  
Assistant Professor of Psychiatry and Human Behavior (Research)

Michael J. Frank  
Associate Professor of Cognitive, Linguistic and Psychological Sciences

Steven Frank  
Clinical Assistant Professor of Family Medicine

Rachel S. Franklin  
Assistant Professor of Population Studies (Research)

Lucia Paolicielli Fratantaro  
Clinical Assistant Professor of Pediatrics

Arthur Frazzano  
Clinical Associate Professor of Family Medicine

Lisa M. Freda  
Clinical Assistant Professor of Psychiatry and Human Behavior

Hannah Freed-Thall  
Assistant Professor of Comparative Literature

Jennifer B. Freeman  
Associate Professor of Psychiatry and Human Behavior (Research)

Nancy J. Freeman  
Clinical Associate Professor of Medicine

Walter F. Freiberger  
Professor Emeritus of Applied Mathematics

Richard N. Freiman  
Associate Professor of Medical Science

Lambert B. Freund  
Professor Emeritus of Engineering

Scott A. Frickel  
Associate Professor of Sociology

David L. Fried  
Clinical Assistant Professor of Medicine

Herbert M. Fried  
Professor Emeritus of Physics

Rachel M. Friedberg  
Senior Lecturer in Economics

Jennifer F. Friedman  
Associate Professor of Pediatrics

Joseph H. Friedman  
Professor of Neurology

Michael A. Friedman  
Clinical Assistant Professor of Neurology; Clinical Assistant Professor of Psychiatry and Human Behavior

Peter D. Friedmann  
Professor of Health Services, Policy and Practice; Professor of Medicine

Karen Friend  
Adjunct Associate Professor of Psychiatry and Human Behavior

Gary N. Frishman  
Professor of Obstetrics and Gynecology

Gregory K. Fritz  
Professor of Psychiatry and Human Behavior

John A. Froehlich  
Clinical Assistant Professor of Orthopaedics
Lina M. Fruzzetti  
Professor of Anthropology

Cara Fuchs  
Instructor in Psychiatry and Human Behavior (Research)

Helen Fuchs  
Assistant Professor of Medicine (Research)

Bradley K. Fugate  
Teaching Associate in Music

Ana Tuya Fulton  
Assistant Professor of Medicine (Clinical)

John P. Fulton  
Clinical Associate Professor of Behavioral and Social Sciences

Christopher M. Furey  
Assistant Professor of Family Medicine (Clinical)

Karen L. Furie  
Samuel I. Kennison, M.D., and Bertha S. Kennison Professor of Clinical Neuroscience

Martin Furman  
Clinical Associate Professor of Psychiatry and Human Behavior

Mary Elizabeth Fussell  
Associate Professor of Population Studies (Research)

Yves M. Gabellini  
Visiting Scientist in Physics

Joseph R. Gaeta  
Clinical Assistant Professor Emeritus of Medicine

Alan D. Gaines  
Clinical Assistant Professor of Pediatrics

Sarah A. Gaines  
Assistant Professor of Emergency Medicine (Clinical)

Mark A. Gaipa  
Senior Research Associate in Modern Culture and Media

John Gaitanis  
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)

Melissa M. Gaitanis  
Assistant Professor of Medicine (Clinical)

Richard J. Gaiteskell  
Hazard Professor of Physics

Omar Galarraja  
Assistant Professor of Health Services, Policy and Practice

Harris M. Galkin  
Clinical Assistant Professor of Obstetrics and Gynecology

Ezra L. Galler  
Clinical Assistant Professor of Surgery (Ophthalmology)

Anthony L. Gallo  
Clinical Assistant Professor of Psychiatry and Human Behavior

Katharina M. Galor  
Visiting Assistant Professor of Judaic Studies holding the Hirshfeld Presidential Fellowship.

Oded Galor  
Herbert H. Goldberger Professor of Economics

Elizabeth A. Gamble  
Clinical Assistant Professor of Obstetrics and Gynecology

Forrest Gander  
Adele Kellenberg Seaver ’49 Professor of Creative Writing

Leela Gandhi  
John Hawkes Professor of the Humanities and English

Michele R. Gange  
Clinical Assistant Professor of Obstetrics and Gynecology

Lisa Ganley-Leal  
Assistant Professor of Pediatrics (Research)

Kim M. Gans  
Professor of Behavioral and Social Sciences

Theresa C. Ganz  
Assistant Professor of Visual Art

Huajian Gao  
Walter H. Annenberg Professor of Engineering

Abbe L. Garcia  
Assistant Professor of Psychiatry and Human Behavior (Research)

Manuel Garcia-Toca  
Assistant Professor of Surgery

Martin F. Gardiner  
Research Associate in Education

Marcus Gardley  
Assistant Professor of Theatre Arts and Performance Studies

Adrian Gardner  
Adjunct Assistant Professor of Medicine

Rebekah L. Gardner  
Assistant Professor of Medicine

Ilana F. Gareen  
Assistant Professor of Epidemiology (Research)

Veenu Garewal  
Clinical Instructor in Medicine

Ashish Garg  
Assistant Professor of Chemistry (Research)

Andrew B. Garland  
Teaching Associate in Music

Ana C. Garnecho  
Assistant Professor of Pediatrics (Clinical)

Aris C. Garro  
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics

Eric J. Gartman  
Assistant Professor of Medicine

Generoso G. Gascon  
Professor Emeritus of Pediatrics

Ronnesia B. Gaskins  
Adjunct Assistant Professor of Behavioral and Social Sciences

Mason C. Gasper  
Assistant Professor of Neurology (Clinical)

Jennifer S. Gass  
Associate Professor of Obstetrics and Gynecology; Associate Professor of Surgery

Stephen M. Gatesy  
Professor of Biology

Constantine A. Gatsonis  
Henry Ledyard Goddard University Professor of Biostatistics

Brandon A. Gaudiano  
Assistant Professor of Psychiatry and Human Behavior (Research)

Arthur I. Geltzer  
Clinical Associate Professor of Surgery (Ophthalmology)

Stuart Geman  
James Manning Professor of Applied Mathematics

Becky L. Genberg  
Assistant Professor of Health Services, Policy and Practice (Research)

Mycchal Gandron  
Teaching Associate in Music

Bethany J. Gentlesco  
Associate Professor of Medicine (Clinical)

Olakunle George  
Associate Professor of Africana Studies; Associate Professor of English

Paul George  
Assistant Professor of Family Medicine
Rebecca E. Gerber
Assistant Professor of Diagnostic Imaging (Clinical)

Susan A. Gerbi
George D. Eggleston Professor of Biochemistry

Thomas Germain
Clinical Assistant Professor of Emergency Medicine

Jonathan Gershon
Clinical Assistant Professor of Psychiatry and Human Behavior

Mohammad Hassan Ghaed
Visiting Scholar in Engineering

Medeva Ghee
Assistant Professor of the Practice of Behavioral and Social Sciences

Frantz J. Gibbs
Associate Professor of Emergency Medicine (Clinical)

Anne Giblin
Professor of Ecology and Evolutionary Biology (MBL)

Sharon E. Gibson
Clinical Associate Professor of Surgery (Otolaryngology)

Basilis Gidas
Professor of Applied Mathematics

Donald B. Giddon
Clinical Professor Emeritus of Behavioral and Social Sciences

Arnoldas Giedrimas
Assistant Professor of Medicine (Clinical)

Jeanette G. Giedrimas
Assistant Professor of Medicine

David R. Gifford
Clinical Associate Professor of Health Services, Policy and Practice;
Clinical Associate Professor of Medicine

Holly C. Gil
Assistant Professor of Diagnostic Imaging (Clinical)

James M. Gilchrist
Adjunct Professor of Neurology

Bruno J. Gilletti
Professor Emeritus of Geological Sciences

Vikash Gilja
Visiting Scientist in Engineering

Carol Gill
Teaching Associate in Theatre Arts and Performance Studies

Mary Louise G. Gill
David Benedict Professor of Classics and Philosophy

Peter S. Gill
Clinical Assistant Professor of Surgery

Fizza S. Gillani
Assistant Professor of Medicine (Research)

Malini C. Gillen
Clinical Assistant Professor of Pediatrics

Richard G. Gillerman
Clinical Assistant Professor of Surgery (Anesthesiology)

Gregory Gillette
Clinical Assistant Professor of Psychiatry and Human Behavior

Ronald M. Gilman
Clinical Assistant Professor of Medicine

Irving T. Gilson
Clinical Instructor in Medicine

Michael F. Gilson
Clinical Associate Professor of Medicine

Jonathan David Gittin
Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Annie Gjelsvik
Assistant Professor of Epidemiology

Abbott Gleason
Professor Emeritus of History

Arvin S. Glicksman
Professor Emeritus of Medical Science

Maurice Glicksman
University Professor Emeritus and Professor Emeritus of Engineering and
Physics

Stephen E. Glinick
Clinical Associate Professor of Dermatology

Mary Gluck
Professor of History; Professor of Judaic Studies

Moses Goddard
Associate Professor of Molecular Pharmacology, Physiology and
Biology (Research)

Maria Esperanza Godoy Luque
Teaching Associate in Hispanic Studies

Erik K. Godwin
Lecturer in Public Policy

Reginald Y. Goh
Associate Professor of Medicine

Jessica Gokee La Rose
Adjunct Assistant Professor of Psychiatry and Human Behavior

Adam J. Golaski
Visiting Lecturer in English

Richard L. Gold
Associate Professor of Diagnostic Imaging (Clinical)

Amy P. Goldberg
Associate Professor of Pediatrics (Clinical)

Arnold C. Goldberg
Adjunct Associate Professor of Family Medicine

Elizabeth M. Goldberg
Assistant Professor of Emergency Medicine

Laura B. Goldberg
Assistant Professor of Medicine

Richard J. Goldberg
Professor of Psychiatry and Human Behavior

Robert J. Goldberg
Adjunct Professor of Epidemiology

William Arthur Golden
Clinical Assistant Professor of Medicine

Amy Goldfarb
Clinical Instructor in Medicine

Daniel M. Golding
Assistant Professor of Diagnostic Imaging (Clinical)

Eric Goldlust
Assistant Professor of Emergency Medicine

Debra L. Goldman
Clinical Assistant Professor of Obstetrics and Gynecology

Roberta E. Goldman
Clinical Professor of Family Medicine

Calvin Goldscheider
Professor Emeritus of Sociology and Ungerleider Professor Emeritus of
Judaic Studies

Frances K. Goldscheider
University Professor Emerita and Professor Emerita of Sociology

Claude Franklin Goldsmith
Assistant Professor of Engineering

Lisa J. Goldstein
Clinical Assistant Professor of Pathology and Laboratory Medicine

Michael G. Goldstein
Adjunct Professor of Psychiatry and Human Behavior
Brown University

Sidney Goldstein
Professor Emeritus of Sociology
Dragan Golijanin
Associate Professor of Surgery (Urology)
Sanda A. Golopentia
Professor Emerita of French Studies
Natalia Golova
Assistant Professor of Pediatrics (Clinical)
Vladimir Golstein
Associate Professor of Slavic Studies
Spencer Goulub
Professor of Comparative Literature; Professor of Slavic Studies;
Professor of Theatre Arts and Performance Studies
Marta Gomez-Chiarri
Visiting Professor of Computational Molecular Biology
Rujun Gong
Associate Professor of Medicine (Research)
Assawin Gongvatana
Adjunct Professor of Psychiatry and Human Behavior
Katherine R. Goodman
Professor Emerita of German Studies
Thomas G. Goodwillie
Professor of Mathematics
Matthew S. Goodwin
Adjunct Professor of Psychiatry and Human Behavior
Dana A. Gooley
Associate Professor of Music
Geetha GOPALAKRISHNAN
Associate Professor of Medicine
Pamina Gorbach
Adjunct Professor of Medicine
Alan L. Gordon
Clinical Associate Professor of Psychiatry and Human Behavior
Catherine M. Gordon
Professor of Pediatrics
Leslie B. Gordon
Associate Professor of Pediatrics (Research)
Norman M. Gordon
Clinical Associate Professor of Neurology
Paul C. Gordon
Associate Professor of Medicine (Clinical)
Amy A. Gorin
Adjunct Associate Professor of Psychiatry and Human Behavior
Arlene E. Gorton
Professor Emerita of Education
George E. Goslow Jr
Professor Emeritus of Biology
Carin A. Got
Clinical Instructor in Surgery (Anesthesiology)
David M. Gottsegen
Clinical Assistant Professor of Psychiatry and Human Behavior
Amy S. Gottlieb
Associate Professor of Medicine (Clinical); Associate Professor of Obstetrics and Gynecology (Clinical)
Sigal Gottlieb
Visiting Professor of Applied Mathematics
Michael Gottsegen
Visiting Scholar in Religious Studies
Philip Gould
Nicholas Brown Professor of Oratory and Belles Lettres
Richard Allan Gould
Professor Emeritus of Anthropology
Alexander H. Gourevitch
Assistant Professor of Political Science
Peter A. Gourevitch
Senior Fellow in International Studies
Barbara Gourlay
Lecturer in Language Studies
Pedro Luis Gozalo
Associate Professor of Health Services, Policy and Practice (Research)
Janet Grace
Professor of Psychiatry and Human Behavior (Clinical)
Mark Gradstein
Visiting Professor of Economics
Michael Grady
Assistant Professor in the Practice of Education
Steven N. Graff
Clinical Assistant Professor of Orthopaedics
Rod A. Gragg
Clinical Associate Professor of Psychiatry and Human Behavior
Enzo Granato
Adjunct Professor of Physics
David J. Grand
Associate Professor of Diagnostic Imaging
Susan W. Graseck
Senior Fellow in International Studies
Stephen Richards Graubard
Professor Emeritus of History
Stefan Gravenstein
Adjunct Professor of Health Services, Policy and Practice; Adjunct Professor of Medicine
Theresa A. Graves
Assistant Professor of Surgery (Clinical)
Robyn A. Gray
Clinical Assistant Professor of Obstetrics and Gynecology
Andrew Green
Associate Professor of Orthopaedics
James N. Green
Carlos Manuel de Cespedes Professor of Modern Latin American History
Traci C. Green
Assistant Professor of Emergency Medicine (Research); Assistant Professor of Epidemiology (Research)
Benjamin D. Greenberg
Professor of Psychiatry and Human Behavior
David M. Greenberg
Clinical Assistant Professor of Surgery
Paul B. Greenberg
Clinical Professor of Surgery (Ophthalmology)
David J. Greenblatt
Adjunct Professor of Medicine
Samuel H. Greenblatt
Professor Emeritus of Neurosurgery
A. Gerson Greenburg
Professor Emeritus of Surgery
Jack Greene
Adjunct Professor of History
Ian David Greener
Instructor in Medicine (Research)
Neil R. Greenspan
Clinical Associate Professor of Medicine
Amy R. Greenwald
Associate Professor of Computer Science
David S. Greer
Professor Emeritus of Health Services, Policy and Practice
James Edward Greer  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kristin Lynch Gregg  
Clinical Assistant Professor of Emergency Medicine

Stephen H. Gregory  
Associate Professor of Medicine (Research)

Steven T. Gregory  
Associate Professor of Medical Science (Research)

Ulf Grenander  
Professor Emeritus of Applied Mathematics

Angela Grenander-Raufi  
Clinical Assistant Professor of Pediatrics

Nicole L. Grenier  
Clinical Assistant Professor of Dermatology

Mark W. Greve  
Clinical Assistant Professor of Emergency Medicine

Jerome B. Grieder  
Professor Emeritus of East Asian Studies and History

Fred F. Griffith  
Clinical Instructor in Neurology

Rogers C. Griffith  
Associate Professor of Pathology and Laboratory Medicine

Robert T. Griffith Jr  
Clinical Associate Professor of Pediatrics

Iulia C. Grillo  
Clinical Assistant Professor of Medicine

Jan C. Groblewski  
Assistant Professor of Pediatrics (Clinical); Assistant Professor of Surgery (Clinical); (Otolaryngology)

L. Peter Gromet  
Professor Emeritus of Geological Sciences

Stephen D. Groskin  
Clinical Assistant Professor of Family Medicine

Nicholas Grumbach  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Pediatrics

Philip A. Gruppuso  
Professor of Pediatrics; Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Yingjie Guan  
Assistant Professor of Orthopaedics (Research)

Pradeep R. Guduru  
Assistant Professor of Orthopaedics

James R. Rice Professor of Engineering

Sarah A. Guédiche  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences (Research)

Nicholas Guérina  
Clinical Assistant Professor of Pediatrics

Daniel Guevara  
Clinical Assistant Professor of Medicine

Frederick G. Guggenheim  
Clinical Professor of Psychiatry and Human Behavior

Barbara J. Guillette  
Clinical Instructor in Surgery (Otolaryngology)

Thomas J. Guilmette  
Adjunct Associate Professor of Psychiatry and Human Behavior

E. Joanna Guldi  
Hans Rothfels Assistant Professor of History

Fusun Gundogdu  
Associate Professor of Pathology and Laboratory Medicine

Liang Guo  
Visiting Scientist in Engineering

Yan Guo  
Professor of Applied Mathematics

Gaurav Gupta  
Clinical Assistant Professor of Surgery (Ophthalmology)

Geetika Gupta  
Assistant Professor of Medicine (Clinical)

Preeti Gupta  
Assistant Professor of Neurology (Clinical)

Matthew Guterl  
Professor of Africana Studies and American Studies

Tracey Guthrie  
Associate Professor of Psychiatry and Human Behavior (Clinical)

Joshua D. Gutman  
Clinical Associate Professor of Family Medicine

Rodi Gutman  
Assistant Professor of Biostatistics

Matthew C. Gutmann  
Professor of Anthropology

Paul D. Guyer  
Jonathan Nelson Professor of Philosophy

Johnny Guzman  
Associate Professor of Applied Mathematics

Chad J. Gwaltney  
Assistant Professor of Behavioral and Social Sciences (Research)

Hyunjoo Ha  
Visiting Lecturer in East Asian Studies

Richard Alan Haas  
Associate Professor of Diagnostic Imaging; Associate Professor of Neurosurgery (Clinical)

Mardallah G. Habr  
Associate Professor of Medicine (Clinical)

Jason B. Hack  
Associate Professor of Emergency Medicine

James E. Haddow  
Professor of Pathology and Laboratory Medicine (Research)

Wendy S. Hadley  
Assistant Professor of Psychiatry and Human Behavior (Research)

Sarah E. Hagain  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Suhdung Hahn  
Clinical Assistant Professor of Medicine

Chi-Ming Hai  
Professor of Medical Science

Aditi V. Hajimis  
Clinical Assistant Professor of Psychiatry and Human Behavior

Sheila A. Haley  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Harald A. Hall  
Adjunct Assistant Professor of Medicine

Howard A. Hall  
Clinical Assistant Professor Emeritus of Obstetrics and Gynecology

Sherine F. Hamdy  
Kutayba Alghanim Assistant Professor of Social Science

Geoffrey R. Hamilton  
Clinical Assistant Professor of Medicine

Teresa Hamilton  
Clinical Assistant Professor of Family Medicine

Françoise N. Hamlin  
Associate Professor of Africana Studies and History
Brittany Star Hampton
Associate Professor of Obstetrics and Gynecology

Suh-Reen Han
Visiting Scholar in English

Allen S. Hance
Adjunct Assistant Professor of Environmental Studies

Sajeev Handa
Clinical Assistant Professor of Medicine

Todd E. Handel
Clinical Assistant Professor of Orthopaedics

Nhu T. Hang
Clinical Assistant Professor of Family Medicine

Robert Gale Noyes Assistant Professor of Humanities

L. Corey Hanley
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Roger T. Hanlon
Professor of Ecology and Evolutionary Biology (MBL)

Cynthia M. Hanna
Clinical Assistant Professor of Obstetrics and Gynecology

Katrine Hansen
Associate Professor of Pathology and Laboratory Medicine

Gita V. Harappanahally
Assistant Professor of Neurology (Clinical); Assistant Professor of Pediatrics (Clinical)

Edward Hardy
Visiting Lecturer in English

Erica J. Hardy
Assistant Professor of Medicine (Clinical)

George E. Hardy
Clinical Assistant Professor of Pediatrics

Zeev Harel
Professor of Pediatrics

Vincent M. Harisaran
Assistant Professor of Surgery (Clinical)(Urology)

I. M. Harjito
Teaching Associate in Music

Karen M. Harnett
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Thomas J. Haronian
Clinical Associate Professor of Emergency Medicine

Daniel Harp
Teaching Associate in Music

Michael S. Harper
University Professor Emeritus of Literary Arts

James S. Harper III
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Colin Harrington
Associate Professor of Medicine (Clinical); Associate Professor of Psychiatry and Human Behavior (Clinical)

David T. Harrington
Professor of Surgery

Elizabeth O. Harrington
Professor of Medicine (Research)

Adam D. Harris
Assistant Professor of Medicine

Bruno Harris
Professor Emeritus of Mathematics

Timothy J. G. Harris
Munro, Goodwin, Wilkinson Professor of European History

Abigail D. Harrison
Assistant Professor of Behavioral and Social Sciences (Research)

Douglas J. Harrison
Assistant Professor of Pediatrics

Emily C. Harrison
Clinical Assistant Professor of Family Medicine

Magdalena Harrison
Visiting Lecturer in Slavic Languages

Matthew T. Harrison
Assistant Professor of Applied Mathematics

Terry E. Harrison-Goldman
Clinical Assistant Professor of Psychiatry and Human Behavior

Pamela A. Harrop
Clinical Assistant Professor of Medicine

Anne C. Hart
Professor of Neuroscience

Chantelle N. Hart
Adjunct Associate Professor of Psychiatry and Human Behavior

Jo-Anne Hart
Adjunct Professor of International Studies

Katherine Hart
Clinical Instructor in Pediatrics

Stephanie Hartelle
Clinical Assistant Professor of Psychiatry and Human Behavior

Susan Ashbrook Harvey
Royce Family Professor of Teaching Excellence and Professor of Religious Studies and Willard Prescott and Annie McClelland Smith Professor of History and Religion

Joseph I. Harwell
Clinical Associate Professor of Medicine; Clinical Associate Professor of Pediatrics

Sadaf Hashmi
Clinical Assistant Professor of Psychiatry and Human Behavior

Alia O. Hassan
Visiting Lecturer in Language Studies

Ghinwa Hassan
Clinical Assistant Professor of Family Medicine

Justine Hastings
Associate Professor of Economics

Meredith K. Hastings
Joukowsky Family Assistant Professor of Earth, Environmental, and Planetary Sciences

Kathryn Hatch
Clinical Assistant Professor of Surgery (Ophthalmology)

Beverly Haviland
Senior Lecturer in American Studies

Kathleen Hawes
Adjunct Assistant Professor of Pediatrics

Risa Weisberg Hawkins
Associate Professor of Family Medicine (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Edward Hawrot
Alva O. Way University Professor of Medical Science

Tawfik F. Hawwa
Clinical Associate Professor of Obstetrics and Gynecology

Roman A. Hayda
Associate Professor of Orthopaedics

Brian C. Hayden
Adjunct Professor of Cognitive, Linguistic and Psychological Sciences

Kenneth Haynes
Professor of Classics; Professor of Comparative Literature
James H. Hays
Manning Assistant Professor of Computer Science

Anthony Richard Hayward
Adjunct Professor of Pediatrics

Barrett Hazeltine
Professor Emeritus of Engineering

Chuan Hua He
Assistant Professor of Molecular Microbiology and Immunology (Research)

James W. Head III
Louis and Elizabeth Scherck Distinguished Professor of the Geological Sciences

Eugene H. Healey
Clinical Assistant Professor Emeritus of Surgery

Terrance T. Healey
Assistant Professor of Diagnostic Imaging

Dwight B. Heath
Professor Emeritus of Anthropology

Richard Heck
Professor of Philosophy

Daithi J. Heffeman
Assistant Professor of Surgery

Robert C. Heffron
Clinical Assistant Professor of Family Medicine

William C. Heidel
Professor of Cognitive, Linguistic and Psychological Sciences

Ulrich Heintz
Professor of Physics

Dwayne Heitmiller
Clinical Assistant Professor of Psychiatry and Human Behavior

Stephen L. Helfand
Professor of Biology

Patrick G. Heller
Professor of Sociology and International Studies

David L. Henann
Assistant Professor of Engineering

Lara Henderson
Adjunct Instructor in Visual Art

Karen Heninger
Teaching Associate in Music

Paget Henry
Professor of Africana Studies and Sociology

Jaroslaw T. Hepel
Assistant Professor of Radiation Oncology

Christine V. Herbert
Clinical Assistant Professor of Medicine

Timothy D. Herbert
Henry L. Doherty Professor of Oceanography

David Herec
Clinical Assistant Professor of Medicine

Thaddeus W. Herliczek
Assistant Professor of Diagnostic Imaging

Maurice P. Herlihy
Professor of Computer Science

Brendan Hermaly
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Arnold Herman
Clinical Associate Professor of Surgery

Debra S. Herman
Clinical Assistant Professor of Psychiatry and Human Behavior

John F. Hermance
Professor Emeritus of Geological Sciences

Lynn Hernandez
Assistant Professor of Behavioral and Social Sciences (Research)

Melvin Hershkowitz
Clinical Assistant Professor Emeritus of Medicine

Rachel Herz
Adjunct Assistant Professor of Psychiatry and Human Behavior

Kathleen M. Hess
Senior Lecturer in Chemistry

Lynn Hess
Clinical Assistant Professor of Psychiatry and Human Behavior

Paul C. Hess
Professor Emeritus of Geological Sciences

Jan Sickmann Hesthaven
Adjunct Professor of Applied Mathematics (Research)

Timothy C. Hett
Lecturer in Theatre Arts and Performance Studies

Linda Heuman
Visiting Scholar in Religious Studies

Peter Heywood
Professor of Biology

Lauri A. Hicks
Adjunct Assistant Professor of Medicine

Pamela C. High
Professor of Pediatrics (Clinical)

Ellen B. Hight
Clinical Assistant Professor of Family Medicine

Nathaniel G. Hilger
Assistant Professor of Economics

Christopher S. Hill
William Herbert Perry Faunce Professor of Philosophy

Constance R. Hiller
Clinical Instructor in Pediatrics

Mary M. Hillstrom
Assistant Professor of Diagnostic Imaging (Clinical)

Nadine T. Himelfarb
Clinical Instructor in Emergency Medicine

Susan Himes
Clinical Assistant Professor of Psychiatry and Human Behavior

Sachiko Hiramatsu
Visiting Lecturer in East Asian Studies

Laurence M. Hirshberg
Clinical Assistant Professor of Psychiatry and Human Behavior

James G. Hirth
Professor of Earth, Environmental, and Planetary Sciences

Kathleen C. Hittner
Clinical Professor of Surgery (Anesthesiology)

Douglas C. Hixson
Professor Emeritus of Medicine (Research)

Lynn T. Ho
Clinical Assistant Professor of Family Medicine

John Hobbie
Professor of Ecology and Evolutionary Biology (MBL)

Leigh R. Hochberg
Associate Professor of Engineering

Bettina B. Hoeppner
Adjunct Assistant Professor of Behavioral and Social Sciences

Diane Hoffman-Kim
Associate Professor of Medical Science and Engineering

Jeffrey Hoffstein
Professor of Mathematics
Robert J. Hofmann
Clinical Assistant Professor of Surgery (Ophthalmology)

Dawn B. Hogan
Assistant Professor of Family Medicine (Clinical)

Dennis Hogan
Robert E. Turner Distinguished Professor of Population Studies, Emeritus

Joseph W. Hogan
Professor of Biostatistics

Leigh Anne Holstein
Clinical Assistant Professor of Psychiatry and Human Behavior

Horacio B. Hojman
Clinical Associate Professor of Psychiatry and Human Behavior

Jamie Hollenbeck
Clinical Assistant Professor of Psychiatry and Human Behavior

Karen A. Holler
Clinical Assistant Professor of Psychiatry and Human Behavior

William H. Hollinshead III
Clinical Assistant Professor of Epidemiology

Peter Amberg Hollmann
Clinical Assistant Professor of Family Medicine

Marida C. Hollos
Professor of Anthropology

Michael Holloway
Assistant Professor of Pediatrics (Research)

R. Ross Holloway
Elisha Benjamin Andrews Professor Emeritus and Professor Emeritus of Central Mediterranean Archaeology

Justin A. Holmer
Associate Professor of Mathematics

Andrew W. Holowinsky
Associate Professor Emeritus of Molecular Biology, Cell Biology and Biochemistry

Jesse M. Holstein
Teaching Associate in Music

Bonnie H. Honig
Professor of Modern Culture and Media; Professor of Political Science

Cathleen S. Hood
Clinical Assistant Professor of Family Medicine

Melinda Hooton
Associate Professor of Medicine (Clinical)

Elizabeth M. Hoover
Assistant Professor of American Studies

Robert W. Hopkins
Professor Emeritus of Medical Science

Terrence P. Hopmann
Professor Emeritus of Political Science

Frederic G. Hoppin Jr
Professor Emeritus of Medicine

John F. X. Horan
Clinical Assistant Professor of Family Medicine

Marko Horb
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Andrew R. Hordes
Clinical Associate Professor of Medicine

Jeffrey D. Horowitz
Clinical Instructor in Medicine

Karyn J. Horowitz
Clinical Assistant Professor of Psychiatry and Human Behavior

Patricia L. Houlik
Adjunct Lecturer in Education

E. Andres Houseman
Adjunct Associate Professor of Epidemiology

Peter Howitt
Professor Emeritus of Economics

James P. Hoye
Clinical Assistant Professor of Family Medicine

Kelly L. Hoye
Clinical Assistant Professor of Family Medicine

Yongsong Huang
Professor of Earth, Environmental, and Planetary Sciences

Yunfei Huang
Assistant Professor of Radiation Oncology

Jia-Lin Huang Hsieh
Visiting Lecturer in East Asian Studies

Julie A. Huber
Associate Professor of Ecology and Evolutionary Biology (MBL)

Evelyn Hu-Dehart
Professor of American Studies; Professor of History

Nathan Hudepohl
Assistant Professor of Emergency Medicine

Neha Hudepohl
Assistant Professor of Psychiatry and Human Behavior (Clinical)

David Hughes
Adjunct Assistant Professor of Pediatrics

John F. Hughes
Professor of Computer Science
Kirsten L. Hull
Clinical Assistant Professor of Psychiatry and Human Behavior
Michael Jan Hulstyn
Associate Professor of Orthopaedics
Anne L. Hume
Adjunct Professor of Family Medicine
Aeron Hunt
Visiting Assistant Professor of English
Jeffrey I. Hunt
Professor of Psychiatry and Human Behavior
Vincent R. Hunt
Professor Emeritus of Family Medicine
Heather L. Hunter
Clinical Assistant Professor of Psychiatry and Human Behavior
Linda A. Hunter
Assistant Professor of Obstetrics and Gynecology (Clinical)
Robert H. Hurt
Professor of Engineering
Brett Hurteau
Clinical Assistant Professor of Family Medicine
Reema Husain
Clinical Assistant Professor of Psychiatry and Human Behavior
John Hustad
Adjunct Assistant Professor of Behavioral and Social Sciences
Paul Huwe
Visiting Scientist in Physics
Quyen Huynh
Adjunct Professor of Brain and Neural Systems (Research)
Kathleen Hwang
Assistant Professor of Pathology and Laboratory Medicine; Assistant Professor of Surgery (Urology)
Harry Iannotti
Clinical Assistant Professor of Surgery (Urology)
Edward A. Iannuccilli
Clinical Professor Emeritus of Medicine
Jason D. Iannuccilli
Assistant Professor of Diagnostic Imaging
Molly Ierulli
Visiting Assistant Professor of Comparative Literature; Adjunct Assistant Professor of Comparative Literature
Sadia Iftikhar
Clinical Assistant Professor of Medicine
Lynn E. Iler
Clinical Assistant Professor of Dermatology
John Imbrie
Professor Emeritus of Geological Sciences
Catherine Imbriglio
Senior Lecturer in English
James Ingraham
Clinical Assistant Professor of Psychiatry and Human Behavior
Nathan Intrator
Adjunct Professor of Brain and Neural Systems (Research)
Julianne Ip
Clinical Associate Professor of Family Medicine
Joshua Irizarry
Visiting Scholar in Anthropology
Ellie Irons
Adjunct Instructor in Visual Art
Ahmad Ismail
Assistant Professor of Medicine (Clinical)
Janet Isserlis
Lecturer in American Studies

Sorin Istrail
Julie Nguyen Brown Professor of Computational and Mathematical Science
Jose Itzigsohn
Professor of Sociology
Justin Izzo
Assistant Professor of French Studies
Barbara W. Jablow
Clinical Assistant Professor of Family Medicine
Brian W. Jack
Adjunct Associate Professor of Family Medicine
Benjamin T. Jackson
Professor Emeritus of Surgery
Cynthia L. Jackson
Associate Professor of Pathology and Laboratory Medicine
Donald C. Jackson
Professor Emeritus of Medical Science
Francine Jackson
Research Associate in Physics
Ivor M. D. Jackson
Professor Emeritus of Medicine
Kristina M. Jackson
Associate Professor of Behavioral and Social Sciences (Research)
Margot Jackson
Assistant Professor of Sociology
Yuko Imoto Jackson
Senior Lecturer in East Asian Studies
Courtney J. Jacobs
Adjunct Instructor in Applied Mathematics
Elizabeth S. Jacobs
Assistant Professor of Emergency Medicine (Clinical)
Nancy J. Jacobs
Associate Professor of History and Africana Studies
David C. Jacobson
Professor of Judaic Studies
Pauline I. Jacobson
Professor of Cognitive, Linguistic and Psychological Sciences
Marc A. Jaffe
Clinical Assistant Professor of Obstetrics and Gynecology
Daniel Jaffe
Clinical Instructor in Surgery (Urology)
Amanda M. Jamieson
Assistant Professor of Molecular Microbiology and Immunology
Barbara N. Jandasek
Assistant Professor of Psychiatry and Human Behavior (Research)
Robert H. Janigian Jr
Clinical Assistant Professor of Surgery (Ophthalmology)
Christine Marie Janis
Professor of Biology
Matthew D. Jankowich
Assistant Professor of Medicine
John H. Jannotti
Adjunct Assistant Professor of Computer Science
Jane Jaquette
Adjunct Professor of International Studies
Beata Jarosiewicz
Associate Professor of Neuroscience (Research)
Alexander Jaworski
Assistant Professor of Neuroscience
Bryan S. Jay
Clinical Assistant Professor of Diagnostic Imaging
Brown University

Gregory D. Jay
Professor of Emergency Medicine; Professor of Medicine; Professor of Engineering (Research)

Robert Ravenelle Jay
Professor Emeritus of Anthropology

Mahesh V. Jayaraman
Associate Professor of Diagnostic Imaging; Associate Professor of Neurosurgery

Chathuraka T. Jayasuriya
Instructor in Orthopaedics (Research)

Thomas W. Jean
Assistant Professor of Medicine (Clinical)

Elissa Jelalian
Associate Professor of Pediatrics; Associate Professor of Psychiatry and Human Behavior

Nathaniel J. Jellinek
Clinical Assistant Professor of Dermatology

Melissa A. Jenkins
Clinical Assistant Professor of Psychiatry and Human Behavior

Odest C. Jenkins
Associate Professor of Computer Science; Associate Professor of Engineering

Ernestine G. Jennings
Assistant Professor of Psychiatry and Human Behavior (Research)

Kathryne Jennings
Teaching Associate in Music

Carole A. Jenny
Professor of Pediatrics

Ilse M. Jenouri
Clinical Associate Professor of Emergency Medicine

Carol J. Jensen
Clinical Assistant Professor of Psychiatry and Human Behavior

Daeyeol Jeon
Visiting Associate Professor of Mathematics

Euy-Myoung Jeong
Assistant Professor of Medicine (Research)

Jennifer Jeremiah
Associate Professor of Medicine (Clinical)

Beth A. Jerseky
Assistant Professor of Psychiatry and Human Behavior (Research)

Antal Jevicki
Professor of Physics

Suriya Jayapalan
Assistant Professor of Neurology

Sharon Mullane Jezard
Clinical Assistant Professor of Family Medicine

Yongwen Jiang
Clinical Assistant Professor of Epidemiology

Yuxi Jiang
Visiting Scholar in Applied Mathematics

Tong Jiao
Senior Research Associate in Engineering

Linda Jiorle-Nagy
Teaching Associate in Music

Louis Frederick Jodry
Senior Lecturer in Music

Gerwald Jogl
Associate Professor of Biology

Conrad E. Johanson
Professor Emeritus of Neurosurgery

Benjamin Johnson
Clinical Assistant Professor of Psychiatry and Human Behavior

Christine Johnson
Adjunct Assistant Professor of Family Medicine

Eileen G. Johnson
Clinical Assistant Professor of Psychiatry and Human Behavior

Gary D. Johnson
Associate Professor of Neurology (Clinical)

Jennifer E. Johnson
Associate Professor of Psychiatry and Human Behavior (Research)

Julie M. Johnson
Assistant Professor of Obstetrics and Gynecology (Clinical)

Lenworth N. Johnson
Professor of Surgery (Ophthalmology)

Mark A. Johnson
Associate Professor of Biology

Michael P. Johnson
Clinical Assistant Professor of Medicine

Robert G. M. Johnston
Clinical Assistant Professor of Psychiatry and Human Behavior

Ferdinand Jones
Professor Emeritus of Psychology

Richard Norman Jones
Associate Professor of Psychiatry and Human Behavior

Thomas O. Jones
Clinical Professor of Theatre Arts and Performance Studies

Hannes Jonsson
Adjunct Professor of Chemistry

Plakyl J. Joseph
Clinical Assistant Professor of Medicine

David Josephson
Professor of Music

DJuro Josic
Adjunct Professor of Medicine (Research)

Annamarie Jurczak
Clinical Assistant Professor of Obstetrics and Gynecology

David Kadmon
Clinical Assistant Professor of Family Medicine

Carl Kaestle
University Professor Emeritus of Education, History and Public Policy

Samuel Kagan
Clinical Assistant Professor of Family Medicine

Christopher W. Kahler
Professor of Behavioral and Social Sciences

Charles B. Kahn
Clinical Professor Emeritus of Medicine

Coppelia Kahn
Professor Emerita of English

Sewell I. Kahn
Clinical Assistant Professor Emeritus of Medicine

Leway Kallani
Clinical Instructor in Medicine

S. Paul Kajenczki
Clinical Assistant Professor of Family Medicine

Ariel B. Kalinowski
Visiting Scholar in Literary Arts
Eva Kallin  
Associate Professor Emerita of Mathematics

Brett D. Kalmowitz  
Clinical Assistant Professor of Medicine

Achyut Kamat  
Clinical Associate Professor of Emergency Medicine

Shuba Kamath  
Assistant Professor of Pediatrics (Clinical)

Elena Kamenetsky  
Clinical Assistant Professor Emerita of Neurology

Jane N. Kamensky  
Mary Ann Lippitt Professor of American History

Michael S. Kaminer  
Adjunct Assistant Professor of Dermatology

Agnes B. Kane  
Professor of Medical Science

Joshua Kane  
Clinical Assistant Professor of Psychiatry and Human Behavior

Min-Jong Kang  
Adjunct Assistant Professor of Molecular Microbiology and Immunology

Rami Kantor  
Associate Professor of Medicine

Barbara T. Kao  
Clinical Assistant Professor of Pediatrics

Hung-Teh Kao  
Associate Professor of Psychiatry and Human Behavior (Research)

David Kaplan  
Clinical Assistant Professor of Emergency Medicine

Stephen R. Kaplan  
Clinical Professor Emeritus of Medicine

Gazmend Kapllani  
Visiting Scholar in Literary Arts

Nicolaos Kapouleas  
Professor of Mathematics

Sture Karl Fredrik Karlsson  
Professor Emeritus of Engineering

George E. Karniadakis  
Charles Pitts Robinson and John Palmer Barstow Professor of Applied Mathematics

Caroline Anne Karp  
Senior Lecturer in Environmental Studies

May Kassem  
Assistant Professor of Diagnostic Imaging (Clinical)

Julie Katarinic  
Assistant Professor of Orthopaedics

Robert W. Kates  
University Professor Emeritus; Director Emeritus of the Alan Shaw Feinstein World Hunger Program

Daniel J. Katz  
Lecturer in Mathematics

David E. Katz  
Clinical Assistant Professor of Medicine

Emily R. Katz  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

E. Tamar Katz  
Associate Professor of English; Associate Professor of Urban Studies

Gary M. Katzman  
Clinical Assistant Professor of Medicine

Julie Kauer  
Professor of Medical Science; Professor of Neuroscience

Donald G. Kaufman  
Clinical Assistant Professor Emeritus of Medicine

Joel M. Kaufman  
Clinical Associate Professor of Neurology

Matthew Kaufman  
Visiting Scientist in Engineering

Craig Kaufmann  
Clinical Assistant Professor of Psychiatry and Human Behavior

Karl T. Kelsey  
Professor of Epidemiology; Professor of Pathology and Laboratory Medicine

Kathleen Kemp  
Assistant Professor of Psychiatry and Human Behavior (Research)

Sadiaa Kendi  
Assistant Professor of Emergency Medicine

Kathleen Kendra  
Clinical Assistant Professor of Psychiatry and Human Behavior

George A. Kenna  
Assistant Professor of Psychiatry and Human Behavior (Research)

Christine A. Kennedy  
Clinical Assistant Professor of Family Medicine

Michael D. Kennedy  
Professor of Sociology

Richard W. Kenyon  
William R. Kenan, Jr. University Professor of Mathematics

Richard I. Kerbel  
Adjunct Lecturer in Public Policy

Karen L. Kerman  
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)
Arthur B. Kern
Clinical Professor Emeritus of Dermatology
Eric Scott Kerns
Assistant Professor of Medicine (Clinical)
Catherine Kerr
Assistant Professor of Family Medicine (Research); Assistant Professor of Medicine (Research)
David I. Kertzer
Paul R. Dupee, Jr. University Professor of Social Science
Youenn Yves J. Kervennic
Senior Lecturer in French Studies
Martin J. Kerzer
Clinical Assistant Professor of Family Medicine
Haneesh Kesari
Assistant Professor of Engineering
Noubar Kessimian
Associate Professor of Pathology and Laboratory Medicine (Clinical)
Martin Keszler
Professor of Pediatrics
Nancy Khalnek
William A. Dyer, Jr. Assistant Professor of Humanities
Hanan I. Khalil
Assistant Professor of Diagnostic Imaging (Clinical)
Jacques Khalil
Associate Professor of English
Amir A. Khan
Clinical Assistant Professor of Psychiatry and Human Behavior
Muhib Alam Khan
Assistant Professor of Neurology
Pervez A. Khatib
Clinical Assistant Professor of Family Medicine
Razib Khaund
Clinical Assistant Professor of Medicine
Elias Khawam
Clinical Instructor in Medicine
Nabil Y. Khoury
Clinical Associate Professor of Obstetrics and Gynecology
Humera Khurshid
Assistant Professor of Medicine (Clinical)
Nancy E. Kidd
Teaching Associate in Music
Stephen E. Kidd
Assistant Professor of Classics
Douglas P. Kiel
Adjunct Professor of Epidemiology
Susan M. Kiene
Adjunct Assistant Professor of Behavioral and Social Sciences
Louise Sadler Kiessling
Professor Emerita of Pediatrics
Melissa Klevman
Teaching Associate in Theatre Arts and Performance Studies
Daniel Kim
Associate Professor of English
Eunhee Kim
Assistant Professor of Biostatistics
Eunsuk Kim
Assistant Professor of Chemistry
Hyun K. Kim
Clinical Assistant Professor of Epidemiology
Jaegwon Kim
William Herbert Perry Faunce Professor of Philosophy Emeritus
Jin Ho Kim
Senior Research Associate in Engineering
Kerr Kim
Clinical Assistant Professor of Psychiatry and Human Behavior
Kyu Kwang Kim
Assistant Professor of Obstetrics and Gynecology (Research)
Kyun-Suk Kim
Professor of Engineering
Michael Hyun-Ook Kim
Professor of Medicine (Clinical)
Miran Kim
Assistant Professor of Medicine (Research)
Seunghyun Kim
Associate Professor of Engineering (Research)
Brian Andrew Kimble
Clinical Associate Professor of Medicine
Katherine C. Kimbrell
Clinical Instructor in Emergency Medicine
Benjamin B. Kimia
Professor of Engineering
Max T. Kinateder
Visiting Scholar in Cognitive, Linguistic and Psychological Sciences
Boyd P. King
Clinical Associate Professor Emeritus of Medicine
Mariah D. King
Visiting Assistant Professor of Environmental Studies
Angus I. Kingon
Barrett Hazeltine University Professor of Entrepreneurship and Organizational Studies
Timothy Kinsella
Professor of Radiation Oncology
Stephen A. Kinzer
Visiting Fellow in International Studies
Elizabeth D. Kirke
Professor Emerita of English
Malcolm M. Kirk
Clinical Assistant Professor of Medicine
Jennifer E. Kittler
Clinical Assistant Professor of Psychiatry and Human Behavior
David L. Kitzes
Clinical Associate Professor of Medicine
Frank Kleibergen
Professor of Economics
Erika Klein
Clinical Assistant Professor of Obstetrics and Gynecology
Michael D. Klein
Clinical Assistant Professor of Family Medicine
Philip Klein
Professor of Computer Science
Robert B. Klein
Sylvia Kay Hassenfeld Professor of Pediatrics
Marc Patrick Brag Klemp
Visiting Assistant Professor of Population Studies
Jack H. Klie
Clinical Assistant Professor of Medicine
Julius William Kling
Professor Emeritus of Psychology
Petra Klinge
Associate Professor of Neurosurgery
James R. Klinger
Professor of Medicine
Adam Klipfel
Clinical Assistant Professor of Surgery

Cindy E. Klipfel
Clinical Assistant Professor of Pediatrics

Margaret G. Klitzke
Clinical Assistant Professor of Psychiatry and Human Behavior

Caroline J. Klivans
Adjunct Assistant Professor of Applied Mathematics, and Computer Science

Eva Klonowski
Clinical Assistant Professor of Family Medicine

Thomas W. Kniesche
Associate Professor of German Studies

Brian G. Knight
Professor of Economics

George B. Knight
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Robert E. Knisley
Clinical Associate Professor Emeritus of Medicine

Bettina Maria Knoll
Assistant Professor of Medicine (Clinical)

Paul M. Knopf
Charles A. and Helen B. Stuart Professor Emeritus of Medical Science

Valerie S. Knopik
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Leo Kobayashi
Associate Professor of Emergency Medicine

Susan L. Koellicker
Assistant Professor of Diagnostic Imaging (Clinical)

Robert Kohn
Professor of Psychiatry and Human Behavior

Daphne Koinis-Mitchell
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Emmanouil Kojic
Associate Professor of Medicine

Aravind Kokkirala
Instructor in Medicine (Clinical)

Paul Kolesnikow
Teaching Associate in Music

Uma Kolli
Clinical Assistant Professor of Family Medicine

R. James Koness
Clinical Assistant Professor of Surgery

Venkata Rajesh Konjeti
Clinical Instructor in Medicine

David Konstan
John Rowe Workman Distinguished Professor Emeritus of Classics and Professor Emeritus of Comparative Literature

Matthew A. Kopp
Clinical Associate Professor of Emergency Medicine

Gideon Koren
Professor of Medicine

Andrei Korotkov
Senior Research Associate in Physics

Kenneth S. Korr
Associate Professor of Medicine

Kristie J. Koski
Assistant Professor of Chemistry

Michael P. Koster
Assistant Professor of Pediatrics (Clinical)

J. Michael Kosterlitz
Harrison E. Farnsworth Professor of Physics

Renu O. Kothari
Clinical Assistant Professor of Psychiatry and Human Behavior

Ashok K. Koul
Senior Lecturer in Language Studies

Savvas M. Koushiappas
Assistant Professor of Physics

Nicola M. Kouttab
Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)

Liliya Koyfman
Clinical Assistant Professor of Psychiatry and Human Behavior

Altug Koymen
Clinical Assistant Professor of Obstetrics and Gynecology

Margaret K. Kozel
Clinical Assistant Professor of Family Medicine

Ross S. Kraemer
Professor Emerita of Religious Studies

Matthew A. Kraft
Assistant Professor of Education

Thomas A. Krahn
Clinical Assistant Professor of Medicine

Naomi R. Kramer
Clinical Assistant Professor of Medicine

Peter D. Kramer
Clinical Professor of Psychiatry and Human Behavior

Tim Klas Kraska
Assistant Professor of Computer Science

Sharon R. Krause
Professor of Political Science

Virginia A. Krause
Associate Professor of French Studies

Dennis S. Krauss
Clinical Assistant Professor of Medicine

Shepard Krech III
Professor Emeritus of Anthropology

Jill A. Kreiling
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Robin A. Kremsdorf
Assistant Professor of Pediatrics (Clinical)

Andrea Kretzschmar
Clinical Assistant Professor of Psychiatry and Human Behavior

Shriram Krishnamurthi
Professor of Computer Science

Kay Dian Kriz
Professor Emerita of History of Art and Architecture

Peter K. Kriz
Assistant Professor of Orthopaedics (Clinical); Assistant Professor of Pediatrics (Clinical)

George Kroumpouzos
Clinical Associate Professor of Dermatology

Joachim Israel Krueger
Professor of Cognitive, Linguistic and Psychological Sciences

Brandon H. Krupp
Clinical Associate Professor of Psychiatry and Human Behavior

Magdalena Krzyztopol
Clinical Associate Professor of Surgery (Ophthalmology)

Donna A. Kucharski
Clinical Assistant Professor of Surgery (Anesthesiology)
Indrek Kulaots
Lecturer in Engineering
Sharvan K. Kumar
Professor of Engineering
Varun Kumar
Clinical Assistant Professor of Pediatrics
Caroline C. Kuo
Assistant Professor of Behavioral and Social Sciences (Research)
Sylvia Kuo
Lecturer in Economics
Marina Kuperman-Beade
Clinical Assistant Professor of Dermatology
Arlet G. Kurkchubasche
Associate Professor of Pediatrics; Associate Professor of Surgery (Pediatric Surgery)
Jayne A. Kurkjian
Clinical Assistant Professor of Psychiatry and Human Behavior
G. Alan Kurose
Clinical Assistant Professor of Health Services, Policy and Practice
Kathleen Mary Kurowski
Assistant Professor of Cognitive, Linguistic and Psychological Sciences (Research)
Jonathan David Kurtis
Professor of Pathology and Laboratory Medicine
Harold J. Kushner
Professor Emeritus of Applied Mathematics and Engineering and L. Herbert Ballou University Professor Emeritus
James A. Kuzner
Assistant Professor of English
Awewura Kwara
Associate Professor of Medicine
Musik Kwon
Visiting Scholar in Computer Science
Angela Jo Goss Lacombe
Clinical Assistant Professor of Psychiatry and Human Behavior
Rosalind E. Ladd
Visiting Scholar in Philosophy
John V. Ladetto
Clinical Assistant Professor of Medicine
Donna M. Lafontaine
Clinical Associate Professor of Obstetrics and Gynecology
W. Curt Lafrance
Assistant Professor of Neurology; Assistant Professor of Psychiatry and Human Behavior
Linda L. LaGasse
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)
Ricardo Lagos Escobar
Professor-at-Large in International Studies
David H. Laidlaw
Professor of Computer Science
Chandan N. Lakhiani
Assistant Professor of Pediatrics (Clinical)
Ashley Lakin
Assistant Professor of Family Medicine (Clinical)
Linda Laliberté-Cote
Clinical Assistant Professor of Health Services, Policy and Practice
Edward V. Lally
Professor of Medicine
Michelle A. Lally
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine
Kenneth R. Lamantia
Clinical Assistant Professor of Surgery (Anesthesiology)
Kirstin E. Lamb
Adjunct Instructor in Visual Art
Jennifer L. Lambe
Assistant Professor of History
Robert H. Lambe
Clinical Assistant Professor of Family Medicine
Jennifer F. Lambert
Clinical Assistant Professor of Psychiatry and Human Behavior
Robert E. Lambiase
Associate Professor of Diagnostic Imaging
Jon K. Lambrecht
Clinical Assistant Professor of Medicine
Chad E. Lamendola
Clinical Assistant Professor of Family Medicine
Anthony Lancaster
Herbert H Goldberger Professor Emeritus of Economics
Carol Landau
Clinical Professor of Medicine; Clinical Professor of Psychiatry and Human Behavior
Alan Landman
Associate Professor of Mathematics
George P. Landow
Professor Emeritus of English
Shoshana M. Landow
Clinical Assistant Professor of Dermatology
Greg Landsberg
Thomas J. Watson, Sr. Professor of Science
Arthur Landy
University Professor Emeritus of Medical Science
Thomas P. Lang
Clinical Assistant Professor of Surgery (Ophthalmology)
Elizabeth Lange
Clinical Associate Professor of Pediatrics
Thilo Sascha Lange
Adjunct Associate Professor of Molecular Biology, Cell Biology and Biochemistry (Research)
Robert E. Lanou Jr
Professor Emeritus of Physics
Candace S. Lapidus
Clinical Assistant Professor of Pediatrics
Kerry L. Laplante
Adjunct Associate Professor of Medicine
Elizabeth A. Laposata
Clinical Associate Professor of Pathology and Laboratory Medicine
Abbot Laptok
Professor of Pediatrics
Rebecca Laptok
Assistant Professor of Pediatrics (Clinical); Assistant Professor of Psychiatry and Human Behavior (Clinical)
Jerome M. Larkin
Assistant Professor of Medicine (Clinical)
Charles Larmore
W. Duncan MacMillan Family Professor of the Humanities
Erica N. Larschan
Richard and Edna Salomon Assistant Professor of Molecular Biology, Cell Biology and Biochemistry
Lawrence E. Larson
Rush C. Hawkins University Professor of Engineering
Lucia Larson
Associate Professor of Medicine
Margaret Larney
Adjunct Associate Professor of Medicine

John C. Lathrop
Clinical Associate Professor Emeritus of Obstetrics and Gynecology

Syed A. Latif
Professor of Pathology and Laboratory Medicine (Clinical)

David Lattimore
Professor Emeritus of East Asian Studies

Joseph Lau
Professor of Health Services, Policy and Practice

Bernd Lauenberg
Adjunct Instructor in Family Medicine

Joseph R. Lauro
Assistant Professor of Emergency Medicine (Clinical)

Joseph J. Laviola
Adjunct Associate Professor of Computer Science

Nabil M. Lawandy
Professor of Engineering (Research)

Ronald G. Lawler
Professor Emeritus of Chemistry

Alexis Lawrence
Assistant Professor of Emergency Medicine (Clinical)

Charles Lawrence
Professor of Applied Mathematics

Kira T. Lawrence
Adjunct Associate Professor of Earth, Environmental, and Planetary Sciences

W. Dwayne Lawrence
Professor of Pathology and Laboratory Medicine

Michael Barton Laws
Assistant Professor of Health Services, Policy and Practice (Research)

Jodi L. Layton
Assistant Professor of Medicine

Bruce A. Lazarus
Clinical Assistant Professor of Family Medicine

Elizabeth Lazarus
Associate Professor of Diagnostic Imaging

Tricia M. Leahy
Assistant Professor of Psychiatry and Human Behavior (Research)

Monique K. Lebourgeois
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Beatrice E. Lechner
Assistant Professor of Pediatrics

Catherine Lee
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Chang-Min Lee
Assistant Professor of Molecular Microbiology and Immunology (Research)

Christina S. Lee
Adjunct Associate Professor of Behavioral and Social Sciences

Chun Geun Lee
Professor of Molecular Microbiology and Immunology

George Lee
Clinical Assistant Professor of Medicine

Hana Lee
Assistant Professor of Biostatistics (Research)

Han-Kyu Lee
Instructor in Neurology (Research)

Heather Lee
Visiting Scholar in American Studies

Irene M. Lee
Clinical Assistant Professor of Surgery (Ophthalmology)

Joonhee Lee
Senior Research Associate in Engineering

Jung-Eun Lee
Assistant Professor of Earth, Environmental, and Planetary Sciences

Lawrence W. Lee
Clinical Assistant Professor of Family Medicine

Michael H. Lee
Assistant Professor of Emergency Medicine

Robert George Lee
Associate Professor of American Studies

Sung-Hee Rhim Lee
Clinical Assistant Professor of Obstetrics and Gynecology

Sung-Woo Lee
Assistant Professor of Radiation Oncology

Yun J. Lee
Clinical Assistant Professor of Pediatrics

Michelle J. Lefebvre
Clinical Instructor in Pediatrics

Craig T. Lefort
Assistant Professor of Surgery (Research)

Robert Legare
Associate Professor of Medicine (Clinical); Associate Professor of Obstetrics and Gynecology (Clinical)

Mark P. Legolvan
Assistant Professor of Pathology and Laboratory Medicine

Sarah R. Leibel
Visiting Lecturer in Education

Jessaca B. Leinaweaver
Associate Professor of Anthropology

Philip E. Leis
Professor Emeritus of Anthropology

Kimberly A. Leite-Morris
Adjunct Assistant Professor of Behavioral and Social Sciences

Mary D. Lekas
Clinical Professor Emerita of Surgery

Natalie E. Leland
Adjunct Assistant Professor of Health Services, Policy and Practice

Neal S. Leleiko
Professor of Pediatrics

Carole Lengyel
Clinical Assistant Professor of Pediatrics

Kara Lynne Leonard
Clinical Assistant Professor Emerita of Surgery

Louis A. Leone
Professor Emeritus of Medicine

Michael J. Lepore
Adjunct Assistant Professor of Health Services, Policy and Practice

Leonard H. Lesko
Professor Emeritus of Egyptology and Assyriology

Andrew Burgess Leslie
Assistant Professor of Ecology and Evolutionary Biology

Heather M. Leslie
Peggy and Henry D. Sharpe Assistant Professor of Environmental Studies

Barry M. Lester
Professor of Pediatrics; Professor of Psychiatry and Human Behavior

Mary Leuchak
Visiting Lecturer in Language Studies

Emily A. Leveen
Instructor in Medicine (Clinical)
Frank S. Levin
Professor Emeritus of Physics

William A. Levin
Clinical Associate Professor of Medicine

Adam Levine
Assistant Professor of Emergency Medicine

Daniel J. Levine
Clinical Associate Professor of Medicine

Laura Levine
Clinical Assistant Professor of Psychiatry and Human Behavior

Scott M. Levine
Assistant Professor of Diagnostic Imaging (Clinical)

Todd P. Levine
Assistant Professor of Psychiatry and Human Behavior (Research)

Andrew T. Levinson
Assistant Professor of Medicine (Clinical)

Paul David Levinson
Associate Professor of Medicine

Jonathan A. Leviss
Clinical Assistant Professor of Health Services, Policy and Practice

Anthony D. Levitas
Senior Fellow in International Studies

Alexander Levitsky
Professor of Slavic Studies

Carol S. Levitt
Adjunct Assistant Professor of Family Medicine

Dore J. Levy
Professor of Comparative Literature; Professor of East Asian Studies

Jennifer S. Levy
Clinical Assistant Professor of Family Medicine

Mitchell M. Levy
Professor of Medicine

Sarah Simone Levy
Clinical Instructor in Surgery (Ophthalmology)

William J. Lewander
Professor of Emergency Medicine

Carol T. Lewis
Associate Professor of Pediatrics (Clinical)

David C. Lewis
Professor Emeritus of Behavioral and Social Sciences

Thomas A. Lewis
Associate Professor of Religious Studies

Fucai Li
Visiting Scholar in Applied Mathematics

Jin Li
Professor of Education

Ji Su Li
Associate Professor of Medicine (Research)

Li Li
Visiting Scholar in Earth, Environmental, and Planetary Sciences

Ming Li
Assistant Professor of Medicine (Research)

Weiyan Li
Assistant Professor of Medicine (Research)

Wen-Qing Li
Assistant Professor of Dermatology

Xingjie Li
Prager Assistant Professor of Applied Mathematics

Xuejin Li
Assistant Professor of Applied Mathematics (Research)

Zhe Li
Visiting Scientist in Chemistry

Zhuqing Li
Adjunct Associate Professor of East Asian Studies

Olin Dehui Liang
Instructor in Orthopaedics (Research)

Yan Liang
Professor of Earth, Environmental, and Planetary Sciences

Norman Peter Libbey
Clinical Associate Professor of Pathology and Laboratory Medicine

Jonah M. Licht
Clinical Assistant Professor of Medicine

Rashmi Shetty Licht
Clinical Assistant Professor of Surgery (Urology)

Warren E. Licht
Clinical Assistant Professor of Medicine

Stephen Lichtenbaum
Roland George Dwight Richardson University Professor of Mathematics

Kristin N. Lichtenberg
Clinical Assistant Professor of Family Medicine

David P. Lichtenstein
Clinical Assistant Professor of Psychiatry and Human Behavior

Diana Elliott Lidofsky
Clinical Assistant Professor of Psychiatry and Human Behavior

Sheldon Lidofsky
Clinical Assistant Professor of Medicine

Paul B. Lieberman
Associate Professor of Psychiatry and Human Behavior (Clinical)

Philip Lieberman
George Hazard Crooker University Professor Emeritus

Otto Liebmann
Assistant Professor of Emergency Medicine

Stacey P. Lievense
Clinical Assistant Professor of Obstetrics and Gynecology

Joseph T. Lifrak
Clinical Assistant Professor of Family Medicine

Jason Lillis
Assistant Professor of Psychiatry and Human Behavior (Research)

Richard K. Lim
Clinical Instructor in Medicine

Yow-Pin Lim
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Richard S. Limbird Jr
Clinical Assistant Professor of Orthopaedics

James G. Linakis
Professor of Emergency Medicine; Professor of Pediatrics

Evelyn Lincoln
Professor of History of Art and Architecture; Professor of Italian Studies

Jared Lindahl
Visiting Scholar in Humanities

Monica Linden
Lecturer in Neuroscience

David G. Lindquist
Assistant Professor of Emergency Medicine (Clinical)

David P. Lindstrom
Professor of Sociology

Xinsheng Sean Ling
Professor of Physics

Crystal D. Linkletter
Adjunct Assistant Professor of Biostatistics
James Lippincott  
Clinical Assistant Professor of Family Medicine

Melanie J. Lippman  
Assistant Professor of Emergency Medicine (Clinical)

Diane Lipscombe  
Professor of Neuroscience

Lewis P. Lipsitt  
Professor Emeritus of Psychology

Julie A. Lirot  
Visiting Scholar in Hispanic Studies

Robert Burr Litchfield  
Professor Emeritus of History

Nancy T. Littell  
Clinical Assistant Professor of Medicine

Michael L. Littman  
Professor of Computer Science

Fenghong Liu  
Assistant Professor of Radiation Oncology

Feng-Li Liu  
Visiting Scholar in Chemistry

Hong Liu  
Assistant Professor of Medicine (Research)

Joseph T. C. Liu  
Professor of Engineering

Man Liu  
Assistant Professor of Medicine (Research)

Paul Liu  
Professor of Surgery (Plastic Surgery)

Richard Liu  
Assistant Professor of Psychiatry and Human Behavior (Research)

Simin Liu  
Professor of Epidemiology; Professor of Medicine

Tao Liu  
Assistant Professor of Biostatistics (Research)

Xiaodong Liu  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Zhihong Liu  
Adjunct Professor of Medicine

David J. Livingston  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Roaald J. Liado  
Clinical Assistant Professor of Family Medicine

Albert C. Lo  
Associate Professor of Epidemiology; Associate Professor of Neurology

Debra J. Lobato  
Professor of Pediatrics (Clinical); Professor of Psychiatry and Human Behavior (Clinical)

Richard M. Locke  
Professor of Political Science and International Studies

Gregory R. Lockhart  
Associate Professor of Emergency Medicine (Clinical); Associate Professor of Pediatrics (Clinical)

John Logan  
Professor of Sociology

Joanne L. Lomas-Neira  
Assistant Professor of Surgery (Research)

Kristin Lombardi  
Assistant Professor of Pediatrics (Clinical)

Michele M. Lomme  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Thomas Lonardo  
Adjunct Lecturer in Economics

Cynthia L. Loncar  
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Richard Long  
Adjunct Associate Professor of Family Medicine

Richard H. Longabaugh  
Professor Emeritus of Psychiatry and Human Behavior (Research)

John R. Lonks  
Associate Professor of Medicine

Salvatore J. Loporchio  
Clinical Assistant Professor of Surgery (Ophthalmology)

Peem Lorvidhaya  
Clinical Assistant Professor of Medicine

Phyllis T. Losikoff  
Assistant Professor of Pediatrics (Clinical)

Eric B. Loucks  
Assistant Professor of Epidemiology

Maranatha E. Lougheed  
Clinical Assistant Professor of Family Medicine

Sydney Louis  
Professor Emeritus of Neurology

Ana P. Lourenco  
Assistant Professor of Diagnostic Imaging

Glenn C. Loury  
Merton P. Stoltz Professor of Social Sciences

Frederick R. Love  
Professor Emeritus of German Studies

Christine M. Low  
Assistant Professor of Pediatrics (Clinical); Assistant Professor of Psychiatry and Human Behavior (Clinical)

David Lowe  
Professor of Physics

Elizabeth A. Lowenhaupt  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Abraham F. Lowenthal  
Adjunct Professor of International Studies

Bing Lu  
Adjunct Associate Professor of Family Medicine

Qing Lu  
Associate Professor of Medicine (Research)

Steven D. Lubar  
Professor of American Studies; Professor of History; Professor of History of Art and Architecture

Jonathan D. Lubin  
Professor Emeritus of Mathematics and Engineering

Stephanie Lubkowski  
Visiting Lecturer in Music

John R. Lucas  
Lecturer Emeritus in Theatre, Speech and Dance

Phillip R. Lucas  
Clinical Associate Professor of Orthopaedics

Arnold M. Ludwig  
Adjunct Professor of Psychiatry and Human Behavior

Melissa Ludwig  
Clinical Assistant Professor of Psychiatry and Human Behavior

Stephanie N. Lueckel  
Assistant Professor of Surgery (Clinical)

Katarina Lukatela  
Clinical Assistant Professor of Psychiatry and Human Behavior
Humphrey J. Maris  
Professor Emeritus of Physics

Hon Fong Louie Mark  
Clinical Professor Emerita of Pediatrics

David Mark Welch  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Donald J. Marsh  
Frank L. Day Professor Emeritus of Biology

Richard L. Marsh  
Adjunct Professor of Ecology and Evolutionary Biology

Robert M. Marsh  
Professor Emeritus of Sociology

Brandon David Lewis Marshall  
Assistant Professor of Epidemiology

John Marshall  
Professor of Medical Science

Lowry Marshall  
Professor Emerita of Theatre Arts and Performance Studies

Robert J. Marshall  
Clinical Associate Professor of Health Services, Policy and Practice

Carmen J. Marisit  
Adjunct Assistant Professor of Epidemiology

John Bradley Marston  
Professor of Physics

Carla M. Martin  
Clinical Assistant Professor of Family Medicine

Courtney J. Martin  
Assistant Professor of History of Art and Architecture

Douglas W. Martin  
Assistant Professor of Medicine (Clinical)

Edward W. Martin  
Clinical Associate Professor of Medicine

Margary D. Martin  
Visiting Assistant Professor of Education

Rosemarie Ann Martin  
Assistant Professor of Behavioral and Social Sciences (Research)

Saul A. Martin  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Mario I. Martinez  
Clinical Assistant Professor of Pediatrics

Monica M. Martinez  
Assistant Professor of American Studies

Ronald L. Martinez  
Professor of Italian Studies

Daniel Toby Marwil  
Clinical Instructor in Pediatrics

Andrew Maslow  
Clinical Professor of Surgery (Anesthesiology)

Carole Maso  
Professor of Literary Arts

Katherine A. Mason  
Assistant Professor of Anthropology

Paul Mason  
Teaching Associate in Music

Lauren Massingham  
Assistant Professor of Pediatrics

Nadine R. Mastroleo  
Assistant Professor of Behavioral and Social Sciences (Research)

Cara A. Mathews  
Assistant Professor of Obstetrics and Gynecology

Donnah Mathews  
Assistant Professor of Medicine (Clinical)

Robert C. Mathiesen  
Professor Emeritus of Slavic Languages

Edith Mathiowitz  
Professor of Engineering; Professor of Medical Science

Christopher M. Matkovic  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kristen A. Matteson  
Associate Professor of Obstetrics and Gynecology

Robley K. Matthews  
Professor Emeritus of Geological Sciences

Anastasios Matzavinos Toumasis  
Assistant Professor of Applied Mathematics

Jennifer L. Maude  
Clinical Instructor in Medicine

Kate E. Mavrich  
Assistant Professor of Medicine (Clinical)

Martin R. Maxey  
Professor of Applied Mathematics

Kenneth Hugh Mayer  
Adjunct Professor of Epidemiology; Adjunct Professor of Medicine

Keith Mayerson  
Adjunct Instructor in Visual Art

William W. Mayo-Smith  
Professor of Diagnostic Imaging

Sarah Mayson  
Assistant Professor of Medicine (Clinical)

Jeffrey M. Mazer  
Assistant Professor of Medicine

Peter J. Mazzaglia  
Associate Professor of Surgery (Clinical)

Aldo Mazzucchelli  
Adjunct Assistant Professor of Hispanic Studies

Jeanne McCaffery  
Associate Professor of Psychiatry and Human Behavior (Research)

Kathleen M. McCarten  
Professor Emerita of Diagnostic Imaging (Clinical)

James R. McCartney  
Associate Professor Emeritus of Psychiatry and Human Behavior

Thomas McCauley  
Clinical Assistant Professor of Surgery (Ophthalmology)

James L. McClain  
Professor of History

Katherine Donovan Mc Cleary  
Clinical Assistant Professor of Family Medicine

Adam M. McCloskey  
Assistant Professor of Economics

Steven G. McCoy  
Clinical Assistant Professor of Medicine

Donald E. McClure  
Professor Emeritus of Applied Mathematics

David W. McConville  
Clinical Assistant Professor of Psychiatry and Human Behavior

F. Dennis McCool  
Professor of Medicine

Charles E. McCoy  
Clinical Associate Professor of Medicine

Rose McDermott  
David and Marianna Fisher University Professor of International Relations
Brown University

Charles J. McDonald
Professor Emeritus of Medical Science
Emily McDonald
Instructor in Pediatrics (Research)
Stefan McDonough
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology
Rebecca R. McEachern
Clinical Assistant Professor of Pediatrics
Brian McElney
Clinical Professor of Theatre Arts and Performance Studies
Matthew Richards McGarrell
Senior Lecturer in Music
Kelly Ann McGarry
Associate Professor of Medicine
Michael P. McGarty
Lecturer in Theatre Arts and Performance Studies
Stephen T. McGarvey
Professor of Epidemiology
John E. McGee
Assistant Professor of Psychiatry and Human Behavior
Brian M. McGillen
Assistant Professor of Medicine (Clinical)
Karen L. McGoldrick
Clinical Assistant Professor of Obstetrics and Gynecology
John McGonigle
Clinical Instructor in Family Medicine
Edward D. McGookin
Clinical Associate Professor of Family Medicine; Clinical Associate Professor of Pediatrics
Elisabeth C. McGowan
Assistant Professor of Pediatrics
Andrew P. McGrath
Clinical Instructor in Pediatrics
Ashlee Carter McGrath
Instructor in Psychiatry and Human Behavior (Research)
Alyson J. McGregor
Assistant Professor of Emergency Medicine
Patrick J. McGuigan
Adjunct Lecturer in Public Policy
Patrick J. McHugh
Lecturer in Engineering
James T. McIwain
Sidney A. Fox and Dorothea Doctors Fox Professor Emeritus of Ophthalmology and Visual Science
Kevin M. McKay
Clinical Assistant Professor of Psychiatry and Human Behavior
George R. McKendall
Associate Professor of Medicine
Michael McKeown
Professor of Medical Science
Kevin McLaughlin
George Hazard Crocker University Professor of English
Nicole McLaughlin
Assistant Professor of Psychiatry and Human Behavior (Research)
Suzanne McLaughlin
Assistant Professor of Pediatrics and Medicine
Megan D. McMahon
Clinical Assistant Professor of Obstetrics and Gynecology
Paul N. McMillan
Clinical Associate Professor Emeritus of Pathology and Laboratory Medicine
Joseph M. McNamara
Assistant Professor of Pediatrics (Clinical)
Megan J. McNamara
Clinical Assistant Professor of Emergency Medicine
Lynn McNicoll
Associate Professor of Medicine (Clinical)
Laura H. McPeake
Assistant Professor of Emergency Medicine (Clinical)
William H. McQuade
Adjunct Assistant Professor of Family Medicine
Elizabeth L. McQuaid
Professor of Psychiatry and Human Behavior (Research)
Robert G. McRae
Clinical Assistant Professor of Surgery (Otolaryngology)
Kathleen McSharry
Adjunct Associate Professor of English
Richard K. Mead
Clinical Associate Professor Emeritus of Medicine
Richard Alan Meckel
Professor of American Studies
Antone A. Medeiros
Professor Emeritus of Medicine
Carroll A. Medeiros
Clinical Assistant Professor of Obstetrics and Gynecology
Damian Medici
Assistant Professor of Medicine; Assistant Professor of Orthopaedics
Ildiko Medve
Clinical Assistant Professor of Medicine
Anthony E. Mega
Associate Professor of Medicine (Clinical); Associate Professor of Surgery (Clinical)(Urology)
Joseph Vincent Meharg
Adjunct Assistant Professor of Medicine
Neil R. Mehrotra
Assistant Professor of Economics
Niharika D. Mehta
Assistant Professor of Medicine (Clinical)
Barbara J. Meier
Senior Lecturer in Computer Science
Joseph Stoddard Meisel
Adjunct Assistant Professor of History
Francisco Amado Mejia Ortiz
Adjunct Professor of Medicine
Jerry Mellilo
Professor of Ecology and Evolutionary Biology (MBL)
Michelle L. Melion
Assistant Professor of Neurology
Michael J. Mello
Professor of Emergency Medicine; Professor of Health Services, Policy and Practice
A. Sattar N. Memon
Clinical Associate Professor Emeritus of Medicine
Lisa M. Menard-Manlove
Clinical Assistant Professor of Family Medicine
Ulrike Mende
Associate Professor of Medicine
Manuela M. Mendes
Clinical Assistant Professor of Family Medicine
Kristina C. Mendicino
Assistant Professor of German Studies
Govind Menon
Professor of Applied Mathematics
Journal S. Mercer
Adjunct Professor of Pediatrics
Roland C. Merchant
Associate Professor of Emergency Medicine; Associate Professor of Epidemiology
Derek Merck
Assistant Professor of Diagnostic Imaging (Research); Assistant Professor of Engineering (Research)
Lisa Merck
Assistant Professor of Diagnostic Imaging; Assistant Professor of Emergency Medicine
Robert D. Meringolo
Clinical Associate Professor of Medicine
Leonard A. Mermel
Professor of Medicine
Stephen T. Mernoff
Associate Professor of Neurology (Clinical)
Priscilla Merriam
Assistant Professor of Medicine (Clinical)
Stephanie Merrim
Professor of Comparative Literature; Professor of Hispanic Studies
Christopher H. Merritt
Assistant Professor of Emergency Medicine
Brian Mertes
Clinical Professor of Theatre Arts and Performance Studies
John A. Mertus
Assistant Professor of Cognitive, Linguistic and Psychological Sciences (Research)
Geralyn M. L. Messerlian
Professor of Pathology and Laboratory Medicine
Dino Messina
Assistant Professor of Medicine (Clinical)
Jane Metrik
Assistant Professor of Behavioral and Social Sciences (Research)
Keith A. Metzer
Adjunct Associate Professor of Ecology and Evolutionary Biology
Markus Meuwly
Adjunct Professor of Chemistry
David R. Meyer
Professor Emeritus of Sociology and Urban Studies
Stylianos G. Michalopoulos
Assistant Professor of Economics
Dominique S. Michaud
Professor of Epidemiology
Jacqueline Michaud
Clinical Instructor in Medicine
Ian Michelow
Assistant Professor of Pediatrics
Ralph P. Miech
Associate Professor Emeritus of Medical Science
Michael E. Migliorl
Clinical Professor of Surgery (Ophthalmology)
Stephen J. Migliorl
Assistant Professor of Surgery (Clinical)
Lisa M. Mignone
Assistant Professor of Classics
Maria D. Mileno
Associate Professor of Medicine
Alison Miller
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
Edward A. Miller
Adjunct Associate Professor of Health Services, Policy and Practice
Eric Bradley Miller
Clinical Assistant Professor of Surgery (Urology)
Ivan W. Miller
Professor of Psychiatry and Human Behavior
Janice S. Miller
Clinical Assistant Professor of Family Medicine
Kenneth Raymond Miller
Professor of Biology
Kennon S. Miller
Assistant Professor of Surgery (Clinical)(Urology)
Kiri M. Miller
Associate Professor of Music
Linda B. Miller
Adjunct Professor of International Studies
Margaret Miller
Associate Professor of Medicine
Marsha Miller
Clinical Assistant Professor of Family Medicine
Nicholas L. Miller
Frank Stanton Assistant Professor of Nuclear Security and Policy
Susan Miller
Professor of Health Services, Policy and Practice (Research)
Ralph E. Miliken
Assistant Professor of Earth, Environmental, and Planetary Sciences
Richard P. Millman
Professor of Medicine and Pediatrics
David R. Mills
Assistant Professor of Medicine (Research)
Taro Minami
Assistant Professor of Medicine (Research)
Patricia Allison Minugh
Assistant Professor of Behavioral and Social Sciences
Howard M. Mintz
Clinical Instructor in Pediatrics
Patricia Allison Minugh
Clinical Assistant Professor of Behavioral and Social Sciences
Robert Miranda Jr
Associate Professor of Psychiatry and Human Behavior (Research)
John P. Miskovsky
Clinical Assistant Professor of Medicine
Cristina L. Mitchell
Clinical Assistant Professor of Family Medicine
Howard M. Mintz
Clinical Instructor in Pediatrics
Vesna Mitrovic
Associate Professor of Physics
John Modell
Professor Emeritus of Education and Sociology
Poonam Modha
Clinical Assistant Professor of Psychiatry and Human Behavior
Susan L. Moffitt
Mary Teft and John Hazen White, Sr. Assistant Professor of Political Science and Public Policy
Leslie C. Mohlman  
Clinical Instructor in Pediatrics  
Ethan Moitra  
Assistant Professor of Psychiatry and Human Behavior (Research)  
Anthony Molho  
Professor Emeritus of History  
Joyce E. Monac  
Clinical Assistant Professor of Pediatrics  
Barbara Monahan  
Senior Lecturer Emerita in Slavic Languages  
Jack M. Monchik  
Clinical Professor of Surgery (Endocrine Surgery)  
Keith O. Monchik  
Clinical Assistant Professor of Family Medicine  
Brian Montague  
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Medicine  
Terri L. Montague  
Assistant Professor of Medicine  
Alain J. Montegut  
Adjunct Assistant Professor of Family Medicine  
George Monteiro  
Professor Emeritus of English  
Lois A. Monteiro  
Professor Emerita of Behavioral and Social Sciences  
James E. Monti  
Clinical Associate Professor of Emergency Medicine  
Peter M. Monti  
Donald G. Millar Distinguished Professor of Alcohol and Addiction Studies  
Christine Montross  
Assistant Professor of Psychiatry and Human Behavior  
Carmen V. Monzon  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Psychiatry and Human Behavior  
Christopher I. Moore  
Associate Professor of Neuroscience  
Douglas C. Moore  
Clinical Assistant Professor of Orthopaedics  
Kym Moore  
Assistant Professor of Theatre Arts and Performance Studies  
Richard G. Moore  
Professor of Obstetrics and Gynecology  
Robert K. Moore  
Visiting Scholar in Cognitive, Linguistic and Psychological Sciences  
Vincent Mor  
Florence Pierce Grant University Professor  
John H. Moran  
Clinical Associate Professor of Pediatrics  
Doriana F. Morar  
Clinical Assistant Professor of Psychiatry and Human Behavior  
Christopher J. Morath  
Adjunct Assistant Professor of Physics  
Sarah Morchen  
Clinical Instructor in Family Medicine  
Rebecca Sherrill More  
Visiting Scholar in History  
James L. Morgan  
Professor of Cognitive, Linguistic and Psychological Sciences  
Jeffrey R. Morgan  
Professor of Engineering; Professor of Medical Science  
Thomas F. Morgan  
Clinical Assistant Professor of Neurology  
Richard V. Morgera  
Clinical Assistant Professor of Family Medicine  
William J. Morocco  
Clinical Instructor in Pediatrics  
James A. Morone Jr  
John Hazen White Professor of Public Policy  
David J. Morris  
Professor Emeritus of Pathology and Laboratory Medicine  
Paul E. Morrissey  
Associate Professor of Surgery  
Eric M. Morrow  
Assistant Professor of Biology; Assistant Professor of Psychiatry and Human Behavior  
Kathleen M. Morrow  
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)  
Douglas H. Morse  
Hermon Bumpus Professor Emeritus of Biology  
Theodore F. Morse  
Professor Emeritus of Engineering  
John Rollin Morton  
Clinical Assistant Professor of Family Medicine  
James R. Moses  
Lecturer in Music  
Paula F. Moskowitz  
Clinical Assistant Professor of Dermatology  
Steven F. Moss  
Professor of Medicine  
Albert S. Most  
Professor of Medicine  
Ourida Mostefai  
Visiting Professor of Comparative Literature and French Studies  
Samir G. Moubayed  
Clinical Associate Professor Emeritus of Obstetrics and Gynecology  
Bernard A. Moule  
Clinical Assistant Professor of Surgery (Urology)  
Anthony Moulton  
Clinical Professor of Surgery (Cardiothoracic Surgery)  
Jonathan S. Movson  
Assistant Professor of Diagnostic Imaging (Clinical)  
Kimberly L. Mowry  
Robin Chermers Neustein Professor of Biomedicine  
Jennie J. Muglia  
Associate Professor of Dermatology (Clinical)  
Elias I. Muhanna  
Manning Assistant Professor of Comparative Literature  
Nadia Mujahid  
Assistant Professor of Medicine (Clinical)  
Jon A. Mukand  
Clinical Assistant Professor of Orthopaedics  
Jeffrey M. Muller  
Professor of History of Art and Architecture  
David Mumford  
Professor Emeritus of Applied Mathematics  
Jeremy R. Mumford  
Lecturer in History  
Joseph L. Mundy  
Professor of Engineering (Research)  
Kaivan Munshi  
Adjunct Professor of Population Studies  
Christopher S. Muratore  
Associate Professor of Pediatrics; Associate Professor of Surgery
Brian L. Murphy  
Clinical Associate Professor of Diagnostic Imaging

Donald R. Murphy  
Clinical Assistant Professor of Family Medicine

James G. Murphy  
Adjunct Associate Professor of Psychiatry and Human Behavior

John A. Murphy  
Clinical Assistant Professor Emeritus of Obstetrics and Gynecology

John B. Murphy  
Professor of Family Medicine; Professor of Medicine

Judy I. Murphy  
Assistant Professor of Medicine (Clinical)

Marjorie A. Murphy  
Professor of Surgery (Clinical)(Ophthalmology)

Timothy P. Murphy  
Professor of Diagnostic Imaging

Anne L. Murray  
Clinical Assistant Professor of Obstetrics and Gynecology

David W. Murray  
Lecturer in Environmental Studies

Rolland D. Murray  
Associate Professor of English

Jayasimha N. Murthy  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Sandra J. Musial  
Clinical Assistant Professor of Pediatrics

John F. Musard  
Professor of Earth, Environmental, and Planetary Sciences; Professor of Environmental Studies

Preetika Muthukrishnan  
Clinical Instructor in Medicine

Ann W. Mwangi  
Adjunct Assistant Professor of Biostatistics

Tracey L. Myatt  
Clinical Assistant Professor of Pediatrics

Deborah L. Myers  
Professor of Obstetrics and Gynecology

James R. Myers  
Clinical Associate Professor of Medicine

Wade Myers  
Professor of Psychiatry and Human Behavior

Eleftherios E. Mylonakis  
Dean’s Professor of Medical Science

Paul T. Myoda  
Associate Professor of Visual Art

Drayton Nabers  
Associate Professor of English

Jennifer Judd Nadeau  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ahmed Nadeem  
Clinical Assistant Professor of Medicine

Srinnerath S. Nagavaranu  
Assistant Professor of Economics and Environmental Studies

Yu Jin Nah  
Clinical Instructor in Medicine

Paul E. Nahm  
Dorot Assistant Professor of Judaic Studies

Dinesh G. Nair  
Adjunct Instructor in Neurology

Mohsen Namjoo  
Visiting Lecturer in Middle East Studies

Aman Nanda  
Associate Professor of Medicine

Anthony M. Napoli  
Associate Professor of Emergency Medicine

Meenakshi Narain  
Professor of Physics

Srinivas Narayanaswamy  
Clinical Instructor in Medicine

Justin M. Nash  
Professor of Family Medicine; Professor of Psychiatry and Human Behavior

Marjorie Nasin  
Clinical Assistant Professor of Pediatrics

Jack Nassau  
Clinical Associate Professor of Psychiatry and Human Behavior

Andrew T. Nathanson  
Clinical Professor of Emergency Medicine

Rebecca A. Nedostup  
Associate Professor of History

Christopher Neill  
Associate Professor of Ecology and Evolutionary Biology (MBL)

Marguerite A. Neill  
Associate Professor of Medicine

Ezequiel Neimark  
Associate Professor of Pediatrics (Clinical)

Peter Gale Nelson  
Senior Lecturer in Literary Arts

Ron J. Nelson  
Professor Emeritus of Music

Lina R. Nemchenok  
Clinical Instructor in Medicine

Saeed Nemr  
Clinical Instructor in Medicine

Nicola Neretti  
Clinical Instructor in Medicine

Drayton Nabers  
Associate Professor of English

Jennifer Judd Nadeau  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ahmed Nadeem  
Clinical Assistant Professor of Medicine

Srinnerath S. Nagavaranu  
Assistant Professor of Economics and Environmental Studies

Yu Jin Nah  
Clinical Instructor in Medicine

Paul E. Nahm  
Dorot Assistant Professor of Judaic Studies

Dinesh G. Nair  
Adjunct Instructor in Neurology

Mohsen Namjoo  
Visiting Lecturer in Middle East Studies

Aman Nanda  
Associate Professor of Medicine

Anthony M. Napoli  
Associate Professor of Emergency Medicine

Meenakshi Narain  
Professor of Physics

Srinivas Narayanaswamy  
Clinical Instructor in Medicine

Justin M. Nash  
Professor of Family Medicine; Professor of Psychiatry and Human Behavior

Marjorie Nasin  
Clinical Assistant Professor of Pediatrics

Jack Nassau  
Clinical Associate Professor of Psychiatry and Human Behavior

Andrew T. Nathanson  
Clinical Professor of Emergency Medicine

Rebecca A. Nedostup  
Associate Professor of History

Christopher Neill  
Associate Professor of Ecology and Evolutionary Biology (MBL)

Marguerite A. Neill  
Associate Professor of Medicine

Ezequiel Neimark  
Associate Professor of Pediatrics (Clinical)

Peter Gale Nelson  
Senior Lecturer in Literary Arts

Ron J. Nelson  
Professor Emeritus of Music

Lina R. Nemchenok  
Clinical Instructor in Medicine

Saeed Nemr  
Clinical Instructor in Medicine

Nicola Neretti  
Clinical Instructor in Medicine

Drayton Nabers  
Associate Professor of English

Jennifer Judd Nadeau  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ahmed Nadeem  
Clinical Assistant Professor of Medicine

Srinnerath S. Nagavaranu  
Assistant Professor of Economics and Environmental Studies

Yu Jin Nah  
Clinical Instructor in Medicine

Paul E. Nahm  
Dorot Assistant Professor of Judaic Studies

Dinesh G. Nair  
Adjunct Instructor in Neurology

Mohsen Namjoo  
Visiting Lecturer in Middle East Studies
Thomas Ng
Associate Professor of Surgery (Cardiothoracic Surgery)

Thanh Chi Nguyen
Adjunct Lecturer in Economics

Van Nguyen
Assistant Professor of Diagnostic Imaging (Clinical)

Guy R. Nicastri
Clinical Associate Professor of Family Medicine; Clinical Associate Professor of Surgery

Linda Nici
Professor of Medicine (Clinical)

Douglas R. Nickel
Andrea V. Rosenthal Professor of History of Art and Architecture

Heather M. Niemeier
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Pura Nieto Hernandez
Senior Lecturer in Classics

Peter T. Nigri
Clinical Assistant Professor of Surgery (Otolaryngology)

Eduardo A. Nilini
Professor of Medicine (Research); Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Ted D. Nirenberg
Associate Professor of Emergency Medicine (Research); Associate Professor of Psychiatry and Human Behavior (Research)

John D. Nisbet II
Clinical Assistant Professor of Obstetrics and Gynecology

Christian Parcher Nixon
Assistant Professor of Pathology and Laboratory Medicine

Arthur W. Noel
Clinical Assistant Professor of Diagnostic Imaging

Patricia A. Nolan
Adjunct Associate Professor of Health Services, Policy and Practice

Andrli Norets
Associate Professor of Economics

Maureen Nosal
Adjunct Lecturer in Education

Melissa Brooks Nothnagle
Associate Professor of Family Medicine

Richard B. Noto
Professor of Diagnostic Imaging (Clinical)

Adel M. Nour
Assistant Professor of Molecular Microbiology and Immunology (Research)

Judith Nudelman
Clinical Associate Professor of Family Medicine

Nicole R. Nugent
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Tara E. Nummedal
Associate Professor of History; Associate Professor of Italian Studies

Amy S. Nunn
Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Medicine (Research)

Arto V. Numniko
L. Herbert Ballou University Professor of Engineering

Elena Oancea
Assistant Professor of Medical Science

Dina N. Obeid
Visiting Scientist in Physics

John W. O’Bell
Assistant Professor of Medicine (Clinical)

Martin K. Obeng
Teaching Associate in Music

Lindsay Oberman
Assistant Professor of Psychiatry and Human Behavior (Research)

Barbara M. O’Brien
Associate Professor of Obstetrics and Gynecology

Erin M. O’Brien
Clinical Assistant Professor of Psychiatry and Human Behavior

James A. O’Brien
Assistant Professor of Obstetrics and Gynecology (Clinical)

Jill A. O’Brien
Clinical Instructor in Medicine

Xian Marie O’Brien
Instructor in Surgery (Research)

Monica H. O’Connell
Visiting Scholar in Public Humanities

Bonnie O’Connor
Professor Emerita of Pediatrics (Clinical)

Katja Odening
Adjunct Assistant Professor of Medicine

Patricia M. Ogera
Clinical Assistant Professor of Pathology and Laboratory Medicine

William Oh
Sylvia Kay Hassenfeld Professor Emeritus of Pediatrics

Kathleen A. O’Heelan
Clinical Assistant Professor of Family Medicine

Richard K. Ohnmacht
Clinical Associate Professor of Pediatrics

Ikenna Okereke
Assistant Professor of Surgery (Cardiothoracic Surgery)

Michal Oklot
Associate Professor of Slavic Studies

Anthony J. Oldcorn
Professor Emeritus of Italian Studies

Rudolf Oldenbourg
Professor of Physics (MBL)

Nicklas B. E. Oldenburg
Clinical Associate Professor of Radiation Oncology

G. Richard Olds
Adjunct Professor of Medicine

Alvaro Olivares
Clinical Assistant Professor of Psychiatry and Human Behavior

Graham J. Oliver
Professor of Classics

Karen Oliver
Clinical Associate Professor of Psychiatry and Human Behavior

Susan P. Oliverio
Assistant Professor of Medicine (Clinical)

Adam Oliszewski
Assistant Professor of Medicine

Segun Dele Olubanwo
Visiting Scholar in Chemistry

Saul Olyan
Samuel Ungerleider, Jr. Professor of Judaic Studies

Warren Ong
Clinical Assistant Professor of Psychiatry and Human Behavior
Faculty

Steven M. Opal
Professor of Medicine

Don Operario
Associate Professor of Behavioral and Social Sciences

Adi Ophir
Visiting Professor of Humanities and Middle East Studies

Lindsay M. Orchowski
Assistant Professor of Psychiatry and Human Behavior (Research)

Jose Carlos Orihuela Paredes
Craig M. Cogut Visiting Associate Professor of Latin American and Caribbean Studies

Marion E. Orr
Frederick Lippitt Professor of Public Policy

Jay M. Orr
Clinical Associate Professor Emeritus of Pediatrics

Julio C. Ortega
Professor of Hispanic Studies

Roberto Ortiz
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Pathology and Laboratory Medicine

Jose R. Ortiz Castillo
Visiting Lecturer in Hispanic Studies

Itohan I. Osayimwese
Assistant Professor of History of Art and Architecture

Brenda Marie Osbey
Visiting Professor of Africana Studies

Edward P. Osborn
Assistant Professor of Visual Art

Roanne Osborne-Gaskin
Clinical Assistant Professor of Family Medicine

Mahasin Osman
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Wendy A. Osbey
Clinical Assistant Professor of Psychiatry and Human Behavior

Emily F. Oster
Visiting Associate Professor of Economics

Thomas P. O’Toole
Professor of Medicine

Brian R. Ott
Professor of Neurology

Frank L. Overt
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Adetokunbo A. Oyelere
Clinical Assistant Professor Emeritus of Pathology and Laboratory Medicine

Ilker Ozden
Clinical Assistant Professor Emeritus of Pathology and Laboratory Medicine

James F. Padbury
William and Mary Oh - William and Elsa Zopfi Professor of Pediatrics for Perinatal Research

Robert C. Padden
Professor Emeritus of History and Portuguese and Brazilian Studies

Rafael E. Padilla
Clinical Assistant Professor of Surgery (Anesthesiology)

Nitin P. Padture
Professor of Engineering

Maria Pagano
Adjunct Associate Professor of Psychiatry and Human Behavior

Lyman A. Page
Clinical Professor Emeritus of Pediatrics

Rebecca Page
Associate Professor of Biology

Talbot Page
Professor Emeritus of Economics and Environmental Studies

Kelly Pagdas
Associate Professor of Obstetrics and Gynecology

David C. Paine
Professor of Engineering

Anjali Palav
Clinical Assistant Professor of Psychiatry and Human Behavior

Frank Paletta
Clinical Assistant Professor of Surgery (Oral & Maxillofacial Surgery)

Adam D. Pallant
Clinical Assistant Professor of Surgery (Oral & Maxillofacial Surgery)

Kathleen M. Palm
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Rohan Palmer
Clinical Assistant Professor of Psychiatry and Human Behavior (Research)

G. Tayhas R. Palmore
Professor of Chemistry; Professor of Engineering

Glenn E. Palomaki
Associate Professor of Pathology and Laboratory Medicine (Research)

Mark A. Palumbo
Associate Professor of Orthopaedics

Bai-Chuan Pan
Professor Emeritus of Medicine (Research)

Rongjiang Pan
Clinical Assistant Professor of Pathology and Laboratory Medicine

Heather Panaro
Clinical Assistant Professor of Surgery (Anesthesiology)

Stephen V. Panaro
Clinical Assistant Professor of Surgery (Anesthesiology)

Gopal Pandurangan
Clinical Assistant Professor of Surgery (Otolaryngology)

Altin Pani
Clinical Instructor in Surgery (Ophthalmology)

Efstratios Papaioannou
Associate Professor of Classics

George D. Papandonatos
Associate Professor of Biostatistics (Research)

Rebecca K. Papas
Clinical Assistant Professor of Psychiatry and Human Behavior (Research)

John P. Papay
Assistant Professor of Economics; Assistant Professor of Education

Martin R. Papazian
Clinical Assistant Professor of Surgery (Otolaryngology)

Stephanie Parade
Assistant Professor of Psychiatry and Human Behavior (Research)
Brown University

Michael A. Paradiso
Sidney A. Fox and Dorothea Doctors Fox Professor of Ophthalmology and Visual Science
Laura C. Parajon
Adjunct Instructor in Family Medicine
Keykavous Parang
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology
Maritza Victoria Paredes Gonzales
Craig M. Cogut Visiting Assistant Professor of Latin American and Caribbean Studies
Gyan Pareek
Associate Professor of Surgery (Urology)
Alfred F. Parisi
Professor Emeritus of Medicine
Tae Woo Park
Assistant Professor of Medicine; Assistant Professor of Psychiatry and Human Behavior
William Keun Chan Park
Assistant Professor of Diagnostic Imaging (Research)
Andrea Parker
Clinical Instructor in Surgery
Donna R. Parker
Associate Professor of Epidemiology (Research); Associate Professor of Family Medicine (Research)
Robert K. Parker
Clinical Instructor in Surgery
Stephen Parman
Assistant Professor of Earth, Environmental, and Planetary Sciences
Edgar M. Parmentier
Professor of Earth, Environmental, and Planetary Sciences
Robert A. Partridge
Adjunct Associate Professor of Emergency Medicine
George Pasquarello
Clinical Assistant Professor of Family Medicine
Dhiren Patel
Clinical Instructor in Family Medicine
Dipan C. Patel
Clinical Instructor in Surgery
Robert L. Patrick
Associate Professor of Medical Science
David R. Patterson
Professor of Ecology and Evolutionary Biology (MBL)
James T. Patterson
Ford Foundation Professor Emeritus and Professor Emeritus of History
Robert B. Patterson
Clinical Professor of Surgery
William R. Patterson III
Senior Lecturer in Engineering
Mark Raymond Paulos
Clinical Assistant Professor of Medicine
Christina Paxson
Professor of Economics and Public Policy
E. Scott Paxton
Assistant Professor of Orthopaedics
Gillian E. Pearis
Clinical Assistant Professor of Psychiatry and Human Behavior
Deborah N. Pearlman
Assistant Professor of Epidemiology (Research)
Teri B. Pearlstein
Associate Professor of Medicine; Associate Professor of Psychiatry and Human Behavior
David W. Pearson
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior
Robert A. Pelcovits
Professor of Physics
Andrew Pennock
Lecturer in Public Policy
Frank A. Penna
Clinical Associate Professor of Obstetrics and Gynecology
Michael A. Pepi
Clinical Assistant Professor of Obstetrics and Gynecology
Vincent Pera Jr
Clinical Assistant Professor of Medicine
Kimberly J. Perez
Assistant Professor of Medicine
Elliot M. Perlman
Clinical Associate Professor of Surgery (Ophthalmology)
Marc A. Perlman
Associate Professor of Music
Adrienne J. Perry
Clinical Assistant Professor of Obstetrics and Gynecology
Keisha-Khan Y. Perry
Associate Professor of Africana Studies
Samuel E. Perry
Assistant Professor of East Asian Studies
Francis J. Pescosolido
Clinical Associate Professor of Psychiatry and Human Behavior
Georges Peter
Professor Emeritus of Pediatrics
Andrew A. Peterson
Assistant Professor of Engineering
Heidi H. Peterson
Clinical Assistant Professor of Family Medicine
Wolfgang Peti
Associate Professor of Chemistry; Associate Professor of Medical Science
Anthony R. Petito
Clinical Assistant Professor of Surgery
Robert A. Petteruti
Adjunct Lecturer in Engineering
Catherine Pettit
Assistant Professor of Emergency Medicine
John A. Pezzullo
Associate Professor of Diagnostic Imaging (Clinical)
Nathan K. Pflueger
Tamarkin Assistant Professor of Mathematics
Suzanne Phelan
Adjunct Associate Professor of Psychiatry and Human Behavior
Noah S. Philip
Assistant Professor of Psychiatry and Human Behavior
Binu Philips
Assistant Professor of Medicine (Clinical)
Bruce A. Phillips
Clinical Assistant Professor of Family Medicine
Katharine A. Phillips
Professor of Psychiatry and Human Behavior
Martin R. Phillips
Clinical Assistant Professor of Surgery
Paul Schuyler Phillips
Senior Lecturer in Music
Maureen Phipps
Chace-Joukowsky Professor of Obstetrics and Gynecology
Chanika Phornphutkul  
Associate Professor of Pediatrics

Marcelle L. Piccolello  
Assistant Professor of Diagnostic Imaging (Clinical)

Dawn M. Picotte  
Clinical Assistant Professor of Psychiatry and Human Behavior

Carle M. Pieters  
Professor of Earth, Environmental, and Planetary Sciences (Research)

M. Halit Pinar  
Professor of Pathology and Laboratory Medicine

Paulo Sergio Pinheiro  
Adjunct Professor of International Studies

Megan Pinkston-Camp  
Assistant Professor of Psychiatry and Human Behavior (Research)

Anthony Pinto  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Bernadine M. Pinto  
Professor of Behavioral and Social Sciences (Research); Professor of Psychiatry and Human Behavior (Research)

Stefan R. Piperov  
Assistant Professor of Physics (Research)

Jill Catherine Pipher  
Elisha Benjamin Andrews Professor of Mathematics

Paul A. Pirraglia  
Associate Professor of Medicine

Irene Piryatinsky  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Latha R. Pisharodi  
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Martha A. Pizzarello  
Clinical Assistant Professor of Obstetrics and Gynecology

Peter A. Pizzarello  
Clinical Assistant Professor of Family Medicine

Matthew J. Plante  
Clinical Assistant Professor of Family Medicine

Wendy A. Plante  
Clinical Associate Professor of Psychiatry and Human Behavior

Kevin M. Plouffe  
Teaching Associate in Music

Barry A. Plummer  
Clinical Associate Professor of Psychiatry and Human Behavior

Alan D. Podis  
Clinical Assistant Professor of Surgery (Urology)

Jeffrey S. Poland  
Visiting Professor of History

Dimitra Politi  
Visiting Assistant Professor of Economics

Ethan Pollock  
Associate Professor of History; Associate Professor of Slavic Studies

Richard Polonsky  
Research Fellow in Environmental Studies

David S. Pomerantz  
Clinical Assistant Professor of Dermatology

Michael A. Pomerantz  
Clinical Assistant Professor of Medicine

Samuel H. Poon  
Clinical Assistant Professor of Medicine

Carol Jean Poore  
Professor Emerita of German Studies

Athena Poppas  
Associate Professor of Medicine

Aurora E. Pop-Vicas  
Assistant Professor of Medicine

Stephen Porder  
Associate Professor of Ecology and Evolutionary Biology

Gisela I. Porras  
Clinical Assistant Professor of Pediatrics

David C. Portelli  
Clinical Associate Professor of Emergency Medicine

Paul S. Porter  
Assistant Professor of Emergency Medicine (Clinical)

Barbara Porton  
Assistant Professor of Psychiatry and Human Behavior (Research)

Roy M. Poses  
Clinical Associate Professor of Medicine

Michael T. Poshkus  
Assistant Professor of Medicine (Clinical)

Rock Positano  
Adjunct Assistant Professor of Orthopaedics

Donn A. Posner  
Clinical Associate Professor of Psychiatry and Human Behavior

Anton Post  
Professor of Ecology and Evolutionary Biology (MBL)

Daniel F. Potter  
Adjunct Assistant Professor of Computer Science

N. Stevenson Potter  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Ornella Judith Potter  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ronald Matthew Potvin  
Adjunct Instructor in Public Humanities

Colleen A. Powers  
Clinical Instructor in Pediatrics

Donya A. Powers  
Clinical Associate Professor of Family Medicine

Marylin M. Powers  
Clinical Assistant Professor of Obstetrics and Gynecology

Thomas R. Powers  
Professor of Engineering; Professor of Physics

Raymond O. Powrie  
Professor of Medicine; Professor of Obstetrics and Gynecology

Warren L. Prell  
Henry L. Doherty Professor of Oceanography

Jane Preotle  
Assistant Professor of Emergency Medicine (Clinical)

Amanda B. Pressman  
Assistant Professor of Medicine (Clinical)

David E. Preston  
Adjunct Lecturer in Public Policy

Robert W. Preucel  
Professor of Anthropology

Ann Back Price  
Clinical Assistant Professor of Psychiatry and Human Behavior

Katharine A. Price  
Clinical Instructor in Medicine

Lawrence H. Price  
Professor of Psychiatry and Human Behavior

Cedric J. Pribe  
Assistant Professor of Pediatrics (Clinical)

Jennifer M. Primack  
Assistant Professor of Psychiatry and Human Behavior (Research)
Ethan A. Prince  
Assistant Professor of Diagnostic Imaging

David Pritchard  
Visiting Scholar in Classics

Barry M. Prizant  
Adjunct Professor of Theatre Arts and Performance Studies

Lawrence Proano  
Clinical Associate Professor of Emergency Medicine

Kittichai Promrat  
Associate Professor of Medicine

Sherri Provencal  
Clinical Assistant Professor of Psychiatry and Human Behavior

Joseph Michael Pucci  
Professor of Classics; Professor of Comparative Literature

Albert J. Puerini  
Clinical Assistant Professor of Family Medicine

Mathew Pulicken  
Assistant Professor of Neurology (Clinical)

M. Yakub A. Puthawala  
Clinical Associate Professor of Radiation Oncology

Michael C. J. Putnam  
Professor Emeritus of Classics

Louis Putterman  
Professor of Economics

Zhongjun Qu  
Visiting Scholar in Economics

C. Brandon Qualls  
Clinical Assistant Professor of Psychiatry and Human Behavior

M. Rahul Quddus  
Professor of Pathology and Laboratory Medicine

Henry Querfurth  
Associate Professor of Neurology

Matthew I. Quesenberry  
Assistant Professor of Medicine

Peter J. Quesenberry  
Paul Calabresi, M.D. Professor of Oncology

Dianne P. Quigley  
Adjunct Assistant Professor of Environmental Studies (Research)

Kali Michelle Quinn  
Adjunct Lecturer in Theatre Arts and Performance Studies

Jose Bernardo Q. Quintos  
Associate Professor of Pediatrics (Clinical)

Abrar Qureshi  
Professor of Dermatology

Kurt A. Raaflaub  
Professor Emeritus of Classics

Joseph S. Rabatin  
Associate Professor of Medicine (Clinical)

Melinda Alliker Rabb  
Professor of English

Carolyn S. Rabin  
Assistant Professor of Psychiatry and Human Behavior (Research)

Steve Rabson  
Professor Emeritus of East Asian Studies

Gregory Rachu  
Clinical Instructor in Family Medicine

Dale F. Radka  
Clinical Assistant Professor of Psychiatry and Human Behavior

Keith W. L. Rafal  
Clinical Assistant Professor of Family Medicine

Susan D. Raffa  
Clinical Assistant Professor of Psychiatry and Human Behavior

Aishah Rahman  
Professor Emerita of Literary Arts

Md Momotazur Rahman  
Assistant Professor of Health Services, Policy and Practice (Research)

Herbert Rakatansky  
Clinical Professor Emeritus of Medicine

William Rakowski  
Professor of Behavioral and Social Sciences

Sohini Ramachandran  
Assistant Professor of Biology

Christine M. Ramalho  
Clinical Assistant Professor of Surgery (Oral & Maxillofacial Surgery)

Kavita Ramanan  
Professor of Applied Mathematics

Richard M. Rambuss  
Professor of English

Donald A. Ramos  
Clinical Assistant Professor of Obstetrics and Gynecology

Bharat Ramratnam  
Associate Professor of Medicine

Susan Ramsey  
Associate Professor of Medicine (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Kenneth R. Ramsley  
Visiting Investigator in Engineering

Aadia I. Rana  
Assistant Professor of Medicine

David M. Rand  
Stephen T. Olney Professor of Natural History

Lawrence A. Rand  
Visiting Lecturer in Economics

Rebecca W. Randall  
Clinical Assistant Professor of Obstetrics and Gynecology

Megan L. Ranney  
Assistant Professor of Emergency Medicine; Assistant Professor of Health Services, Policy and Practice

Nirupama Rao  
Meera and Vikram Gandhi Fellow in International Studies

Benjamin J. Raphael  
Associate Professor of Computer Science

Charles R. Rardin  
Associate Professor of Obstetrics and Gynecology

Wasim Rashid  
Clinical Assistant Professor of Psychiatry and Human Behavior

Steven A. Rasmussen  
Mary E. Zucker Professor of Psychiatry and Human Behavior

Edward Rastetter  
Professor of Ecology and Evolutionary Biology (MBL)

Lucile A. Rathier  
Clinical Assistant Professor of Psychiatry and Human Behavior

Neha P. Raukar  
Assistant Professor of Emergency Medicine

Stephanie Ravillon  
Lecturer in French Studies

Thangam Ravindranathan  
Associate Professor of French Studies

Roger D. Raymond  
Clinical Assistant Professor of Medicine

Christine E. Rayner  
Clinical Assistant Professor of Psychiatry and Human Behavior
James R. Rayner  
Clinical Assistant Professor of Emergency Medicine

Hollie A. Raynor  
Adjunct Associate Professor of Psychiatry and Human Behavior

Jonathan Readey  
Lecturer in English

John L. Reagan  
Assistant Professor of Medicine

Shannon Reckinger  
Visiting Scientist in Geological Sciences

Patricia R. Recupero  
Clinical Professor of Psychiatry and Human Behavior

Sherief Reda  
Associate Professor of Engineering

Madhavi K. Reddy  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Marc Redfield  
Professor of Comparative Literature; Professor of English

Joseph D. Reed  
Professor of Classics and Comparative Literature

Robert A. Reenan  
Professor of Biology

Wendy J. Regan  
Clinical Assistant Professor of Family Medicine

Frances Regas  
Clinical Assistant Professor of Surgery (Anesthesiology)

Vishram B. Rege  
Clinical Associate Professor Emeritus of Medicine

Anthony M. Reginato  
Assistant Professor of Medicine

Bernard M. Reginster  
Professor of Philosophy

Richard A. Regnante  
Clinical Instructor in Medicine

Ravit Reichman  
Associate Professor of English

Jonathan S. Reichner  
Professor of Surgery (Research)

Lawrence E. Reinstein  
Adjunct Professor of Radiation Oncology

Shmuel Reis  
Adjunct Professor of Family Medicine

Steven P. Reiss  
Professor of Computer Science

Amy G. Remensnyder  
Professor of History

Eric M. Renault  
C.V. Starr Professor of Commerce, Organizations and Entrepreneurship

Richard D. Rende  
Associate Professor of Psychiatry and Human Behavior (Research)

Joseph F. Renzulli  
Assistant Professor of Surgery (Urology)

Barbara M. Reo  
Lecturer in Theatre Arts and Performance Studies

Yana K. Reshetnyak  
Adjunct Professor of Radiation Oncology

Murray Resnick  
Professor of Pathology and Laboratory Medicine

Susan K. Resnick  
Visiting Lecturer in English

Linda J. Resnik  
Associate Professor of Health Services, Policy and Practice (Research)

Carolyn H. Revercomb  
Clinical Assistant Professor of Pathology and Laboratory Medicine

Lionel G. N. Reveret  
Visiting Assistant Professor of Computer Science (Research)

Joel W. Revill  
Adjunct Assistant Professor of History

Robert Reynolds  
Adjunct Instructor in Visual Art

Thomas Reznik  
Assistant Professor of Medicine (Clinical)

William R. Rhodes  
Professor at Large

Geoffrey W. Ribbens  
Professor Emeritus of Hispanic Studies

Iole Ribizzi-Akhtar  
Clinical Assistant Professor of Medicine

Anthony R. Ricci  
Clinical Instructor in Medicine

Ronald R. H. Ricco  
Clinical Assistant Professor of Family Medicine

Jana Rice  
Clinical Assistant Professor of Diagnostic Imaging

Louis B. Rice  
Joukowsky Family Professor of Medicine

Harlan G. Rich  
Associate Professor of Medicine

Jeremy J. Rich  
Assistant Professor of Ecology and Evolutionary Biology

Josiah D. Rich  
Professor of Epidemiology; Professor of Medicine

Norman Robert Rich  
Professor Emeritus of History

Joan L. Richards  
Professor of History

Peter Damian Richardson  
Professor of Engineering

Katherine Richman  
Assistant Professor of Medicine

Marc H. Richman  
Professor Emeritus of Engineering

Gerhard Richter  
Professor of Comparative Literature; Professor of German Studies

Kenneth C. Rickler  
Clinical Associate Professor of Neurology; Clinical Associate Professor of Psychiatry and Human Behavior

Mark S. Riedlen  
Associate Professor of Diagnostic Imaging (Clinical)

Renee Ridzon  
Adjunct Assistant Professor of Medicine

John Riedel  
Clinical Assistant Professor of Emergency Medicine

Anne L. Rieger  
Visiting Scholar in Chemistry

Lukas B. Rieppel  
Assistant Professor of History

Jeffrey S. Riepe  
Assistant Professor of Pediatrics (Clinical)

Abdalla Rifai  
Associate Professor Emeritus of Pathology and Laboratory Medicine
Timothy B. Riker
Visiting Lecturer in Language Studies
Raymond S. Riley
Clinical Professor Emeritus of Medicine
Mark A. Ringiewicz
Clinical Assistant Professor of Family Medicine
William M. Risen Jr
Professor Emeritus of Chemistry
Patricia M. Risica
Assistant Professor of Epidemiology (Research)
Benjamin A. Rissing
Visiting Assistant Professor of Sociology
Dianne C. Ritchie
Adjunct Assistant Professor of Family Medicine
Dale A. Ritter
Senior Lecturer in Biology
Massimo Riva
Royce Family Professor of Teaching Excellence and Professor of Italian Studies
Mark J. Rivard
Adjunct Professor of Radiation Oncology
David Rivera
Clinical Instructor in Surgery (Ophthalmology)
Jorge Rivera
Clinical Assistant Professor of Surgery (Ophthalmology)
Tina Rizack
Assistant Professor of Medicine (Clinical); Assistant Professor of Obstetrics and Gynecology (Clinical)
Syed A. Rizvi
Associate Professor of Neurology (Clinical)
Christie J. Rizzo
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)
Philip R. Rizzuto
Clinical Associate Professor of Surgery (Ophthalmology)
Brandy Roane
Adjunct Assistant Professor of Psychiatry and Human Behavior
Barbara H. Roberts
Clinical Associate Professor of Medicine
Debra L. Roberts
Clinical Assistant Professor of Family Medicine
J. Timmons Roberts
Ittleson Professor of Environmental Studies
Thomas Roberts
Professor of Ecology and Evolutionary Biology
Alexander P. Robertson
Clinical Assistant Professor of Orthopaedics
James F. Robertson
Clinical Assistant Professor of Medicine
Henry J. Robidoux
Clinical Associate Professor Emeritus of Surgery
Leslie Robinson-Bostom
Professor of Dermatology
Katina M. Robison
Assistant Professor of Obstetrics and Gynecology
Marcia B. Robitaille
Clinical Assistant Professor of Emergency Medicine
Seth E. Rockman
Associate Professor of History
Randy Rockney
Professor of Family Medicine; Professor of Pediatrics
Karim Roder
Assistant Professor of Medicine (Research)
Daniel A. Rodriguez
Assistant Professor of History
Edgardo Rodriguez
Clinical Assistant Professor of Family Medicine
Marina Rodriguez
Clinical Instructor in Medicine
Pablo Rodriguez
Clinical Associate Professor of Obstetrics and Gynecology
Ralph E. Rodriguez
Associate Professor of American Studies; Associate Professor of English
Jamison E. Rogers
Assistant Professor of Psychiatry and Human Behavior (Clinical)
William H. Rogers
Adjunct Professor of Health Services, Policy and Practice
Jeffrey M. Rogg
Associate Professor of Diagnostic Imaging
Donald Gerard Rohr
Professor Emeritus of History
Thomas E. Rohrer
Adjunct Associate Professor of Dermatology
Damaris J. Rohsenow
Professor of Behavioral and Social Sciences (Research)
Rachel Rojanski
Senior Lecturer in Judaic Studies and Adjunct Professor of History
Felipe Rojas Silva
Assistant Professor of Archaeology and the Ancient World; Assistant Professor of Egyptology and Assyriology
Thomas D. Romeo
Clinical Assistant Professor Emeritus of Health Services, Policy and Practice
Jeremy Ronkin
Teaching Associate in Music
Ellen Frances Rooney
Professor of Modern Culture and Media and English
Christopher Rose
Visiting Professor of Engineering
Gary Rose
Adjunct Professor of Health Services, Policy and Practice
Patricia L. Rose
Professor of Africana Studies
Henry Rosemont
Visiting Scholar in Religious Studies
Karen J. Rosen
Clinical Assistant Professor of Psychiatry and Human Behavior
Michael I. Rosen
Professor Emeritus of Mathematics
Philip Rosen
Professor of Modern Culture and Media
Rochelle K. Rosen
Assistant Professor of Behavioral and Social Sciences (Research)
Wilma S. F. Rosen
Clinical Assistant Professor Emerita of Psychiatry and Human Behavior
Michael C. Rosenberg
Clinical Assistant Professor of Family Medicine
Nancy E. Rosenberg
Teaching Associate in Music
Noah K. Rosenberg
Assistant Professor of Emergency Medicine (Clinical)
Mindy S. Rosenbloom
Clinical Assistant Professor of Psychiatry and Human Behavior
Karen Rosene Montella
Professor of Medicine

Cynthia Rosengard
Associate Professor of Behavioral and Social Sciences (Research);
Associate Professor of Medicine (Research)

Jacob Karl Rosenstein
Assistant Professor of Engineering

Andrew Rosenzweig
Clinical Assistant Professor of Psychiatry and Human Behavior

Christoph Rose-Petruck
Professor of Chemistry

David M. Rosler
Senior Research Associate in Engineering

Albert M. Ross
Clinical Associate Professor of Pediatrics

Fred A. Rotenberg
Assistant Professor of Surgery (Clinical)(Anesthesiology)

Harold D. Roth
Professor of Religious Studies and East Asian Studies

Julie L. Roth
Assistant Professor of Neurology

Leslie A. Roth
Assistant Professor of Surgery

Steven C. Roth
Clinical Assistant Professor of Family Medicine

Frank G. Rothman
Professor Emeritus of Biology

Lynn Rothschild
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry

Marcos Boris Rotman
Professor Emeritus of Medical Science

Kathleen M. Rotondo
Associate Professor of Pediatrics (Clinical)

Steven C. Rougas
Assistant Professor of Emergency Medicine

Sharon I. Rounds
Professor of Medicine; Professor of Pathology and Laboratory Medicine

Stephen N. Rous
Clinical Professor of Surgery (Urology)

Dwight J. Rouse
Professor of Obstetrics and Gynecology

Joseph W. Ruhl
Professor of Music

G. Dean Roye
Assistant Professor of Surgery (Clinical)

Boris L. Rozovsky
Ford Foundation Professor of Applied Mathematics

Amity Ruber
Assistant Professor of Family Medicine (Clinical)

Patricia E. Rubertone
Professor of Anthropology

Lowell J. Rubin
Clinical Assistant Professor of Psychiatry and Human Behavior

David H. Rubinstein
Teaching Associate in Music

Fedor M. Rudakov
Adjunct Assistant Professor of Chemistry

Susan A. Rudders
Assistant Professor of Pediatrics

Marilyn Rueschemeyer
Adjunct Professor of International Studies

Jessica Ruffolo
Clinical Assistant Professor of Psychiatry and Human Behavior

Richard J. Ruggieri
Clinical Assistant Professor of Medicine

Charles M. Ruhl
Clinical Assistant Professor of Surgery (Otolaryngology)

Renee B. Rulin
Clinical Assistant Professor of Family Medicine

James M. Russell
Associate Professor of Earth, Environmental, and Planetary Sciences

Lorna B. Russell
Assistant Professor of Medicine (Clinical)

Geoffrey R. Russom
Professor Emeritus of English

Sandra Russo-Rodriguez
Lecturer in Chemistry

Malcolm J. Rutherford
Professor Emeritus of Geological Sciences

Matthew T. Rutz
Assistant Professor of Egyptology and Assyriology

J. Mark Ryan
Clinical Assistant Professor of Medicine

Vanessa L. Ryan
Assistant Professor of English

Beth A. Ryder
Assistant Professor of Surgery

Krysta H. Ryzewski
Visiting Scholar in Archaeology and the Ancient World

Alberto Saal
Associate Professor of Earth, Environmental, and Planetary Sciences

Hani M. Sabbour
Clinical Assistant Professor of Medicine

Charles Sabel
Senior Fellow in International Studies

Amal Sachedina
Aga Khan Visiting Assistant Professor of Islamic Humanities

George M. Sachs
Associate Professor of Neurology (Clinical)

Henry T. Sachs
Clinical Assistant Professor of Psychiatry and Human Behavior

Kenneth S. Sacks
Professor of Classics; Professor of History

Ara Sadaniantz
Clinical Associate Professor of Medicine

Noha Sadek
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Gregory Sadovnikoff
Clinical Assistant Professor of Family Medicine

Grazyna B. Sadowska
Instructor in Pediatrics (Research)

Neil F. Safier
Associate Professor of History

Howard Safran
Professor of Medicine

Christoph Anthony Sahar
Clinical Assistant Professor of Family Medicine

Pierre Saint-Amand
Francis Wayland Professor of French Studies

Caitlin Saint-Aubin
Clinical Assistant Professor of Obstetrics and Gynecology
Bachir Sakr  
Assistant Professor of Obstetrics and Gynecology (Clinical)  
Jessica R. Salak  
Clinical Assistant Professor of Obstetrics and Gynecology  
Farah Saleh  
Visiting Scholar in Gender Studies  
Amy Lynn Salisbury  
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)  
Matthew T. Salisbury  
Clinical Assistant Professor of Family Medicine  
Robert A. Salk  
Clinical Assistant Professor of Obstetrics and Gynecology  
Philip Salko  
Clinical Assistant Professor of Family Medicine  
Stephen P. Salloway  
Professor of Neurology; Professor of Psychiatry and Human Behavior  
Elena Salmoirago-Blotcher  
Assistant Professor of Medicine (Research)  
Arthur R. Salomon  
Associate Professor of Biology; Associate Professor of Chemistry  
Jason Salter  
Clinical Assistant Professor of Family Medicine  
David A. Sam  
Clinical Assistant Professor of Family Medicine  
Juan Sanchez-Esteban  
Associate Professor of Pediatrics  
Jennifer A. Sanders  
Assistant Professor of Pediatrics (Research)  
Bjorn Sandstede  
Professor of Applied Mathematics  
Jerome Sanes  
Professor of Neuroscience  
Ronald Sanfilippo  
Teaching Associate in Music  
Benjamin L. Sapers  
Assistant Professor of Medicine (Clinical)  
Sajid Saraf  
Assistant Professor of Medicine (Clinical)  
Matthew Dana Sarasin  
Clinical Instructor in Emergency Medicine  
Assaf Sarid  
Visiting Scholar in Economics  
Yuka SASAKI  
Associate Professor of Cognitive, Linguistic and Psychological Sciences (Research)  
Michael L. Satlow  
Professor of Judaic Studies and Religious Studies  
Anja Sautmann  
Assistant Professor of Economics  
John E. Savage  
An Wang Professor of Computer Science  
Peter K. Saval  
Assistant Professor of Comparative Literature  
Daniel L. Savitt  
Associate Professor of Emergency Medicine  
David A. Savitz  
Professor of Epidemiology; Professor of Obstetrics and Gynecology  
Janine T. Anderson Sawada  
Professor of Religious Studies and East Asian Studies  
Dov Sax  
Associate Professor of Ecology and Evolutionary Biology and Environmental Studies  
Syeda M. Sayeed  
Clinical Instructor in Medicine  
Zabe R. Sayeed  
Assistant Professor of Psychiatry and Human Behavior (Clinical)  
Adele C. Scafuro  
Professor of Classics  
Albert Scappaticci  
Assistant Professor of Diagnostic Imaging (Clinical)  
Thomas J. Scaramella  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior  
Monica J. Schaberg  
Clinical Assistant Professor Emerita of Pediatrics  
Frank John Schaberg Jr  
Associate Professor Emeritus of Surgery (Clinical)  
Jay S. Schachne  
Clinical Assistant Professor of Medicine  
Kate J. Schapira  
Lecturer in English  
Janell G. Schartel  
Associate Professor of Psychiatry and Human Behavior  
Joshua B. Schechter  
Associate Professor of Philosophy  
Steven Schechter  
Clinical Assistant Professor of Surgery (Colo-Rectal Surgery)  
Margaret Scheffler  
Assistant Professor of Pediatrics (Clinical)  
Jacquelyn Youssef Schell  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)  
Susanne Schennach  
Professor of Economics  
Barbara Schepps  
Professor Emerita of Diagnostic Imaging (Clinical)  
Andrew K. Scherer  
Assistant Professor of Anthropology  
Thomas G. Schestag  
Associate Professor of German Studies  
Stephen F. Schiff  
Associate Professor of Surgery (Clinical)(Urology)  
Fred Jay Schiffman  
Sigal Family Professor of Humanistic Medicine  
Jonathan R. Schiller  
Assistant Professor of Orthopaedics  
Wendy J. Schiller  
Associate Professor of Political Science; Associate Professor of Public Policy  
Lauren K. Schlanger  
Clinical Instructor in Medicine  
Mark Schleinitz  
Associate Professor of Medicine  
Karen B. Schloss  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences (Research)  
Christopher H. Schmid  
Professor of Biostatistics  
Scott T. Schmidt  
Clinical Assistant Professor of Surgery (Plastic Surgery)  
Richard Schmitt  
Professor Emeritus of Philosophy
Franklin Schneider  
Clinical Instructor in Medicine

Heidi Schneider  
Clinical Assistant Professor of Family Medicine

Rebecca Schneider  
Professor of History of Art and Architecture; Professor of Theatre Arts and Performance Studies

Ronald Schneider  
Clinical Assistant Professor of Dermatology

Heidi Schneider  
Clinical Assistant Professor of Family Medicine

Rebecca Schneider  
Professor of History of Art and Architecture; Professor of Theatre Arts and Performance Studies

Ronald Schneider  
Clinical Assistant Professor of Dermatology

Robert Scholes  
Andrew W. Mellon Professor Emeritus of Humanities

Christoph Schorl  
Assistant Professor of Biology (Research)

Teresa L. Schraeder  
Adjunct Assistant Professor of Family Medicine

Andrew M. Schrank  
Olive C. Watson Professor of Sociology and International Studies

David Schreiber  
Clinical Instructor in Medicine

Nidia A. Schuhmacher  
Senior Lecturer in Hispanic Studies

Gretchen Schultz  
Professor of French Studies

Peter H. Schultz  
Professor Emeritus of Geological Sciences

Anne M. Schulz  
Visiting Scholar in History of Art and Architecture

Mark Barry Schupack  
Professor Emeritus of Economics

Eric B. Schwam  
Clinical Assistant Professor of Emergency Medicine

Carl Schwartz  
Assistant Professor of Surgery (Clinical)(Anesthesiology)

James M. Schwartz  
Clinical Assistant Professor of Family Medicine

Jason Schwartz  
Visiting Associate Professor of Literary Arts

Richard E. Schwartz  
Chancellor’s Professor

Robert Schwartz  
Professor Emeritus of Pediatrics

Stanley Schwartz  
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Stuart T. Schwartz  
Clinical Associate Professor of Medicine

Jack L. Schwartzwald  
Clinical Assistant Professor of Medicine

Robert H. Schwengel  
Clinical Assistant Professor of Medicine

Frank Sciuto  
Adjunct Lecturer in Economics

Francis H. Scala  
Clinical Professor Emeritus of Diagnostic Imaging

David R. Scott  
Visiting Professor of Earth, Environmental, and Planetary Sciences

H. Denman Scott  
Professor Emeritus of Health Services, Policy and Practice

Jeffrey R. Scott  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Mark F. Scott  
Clinical Assistant Professor of Obstetrics and Gynecology

Nicole E. Scott  
Assistant Professor of Medicine; Assistant Professor of Pediatrics

Stephen M. Scott  
Clinical Assistant Professor of Medicine

Lori Scott-Sheldon  
Associate Professor of Behavioral and Social Sciences (Research);  
Associate Professor of Psychiatry and Human Behavior (Research)

Ivona Sediva  
Assistant Professor of Pediatrics

John M. Sedivy  
Hermon C. Bumpus Professor of Biology

George M. Seidel  
Professor Emeritus of Physics

Ronald Seifer  
Professor of Psychiatry and Human Behavior

Lewis C. Seifert  
Professor of French Studies

Todd Seigel  
Assistant Professor of Emergency Medicine

Umut Selamet  
Clinical Instructor in Medicine

Robert O. Self  
Royce Family Professor in Teaching Excellence

Gregg J. Selke  
Clinical Assistant Professor of Psychiatry and Human Behavior

Peter Sell  
Clinical Assistant Professor of Family Medicine

Frank W. Sellke  
Karl E. Karlson, MD and Gloria A. Karlson Professor of Cardiothoracic Surgery

Jason K. Sello  
Associate Professor of Chemistry

Theresa Senn  
Associate Professor of Psychiatry and Human Behavior (Research)

Thomas E. Sepe  
Clinical Associate Professor of Medicine

George Bwanika Seremba  
Visiting Fellow in Literary Arts

Tricia R. Serio  
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry

Amy S. Serrano  
Adjunct Lecturer in Economics and Public Policy

Roberto Serrano  
Harrison S. Kravis University Professor of Economics

Thomas R. Serre  
Manning Assistant Professor of Cognitive, Linguistic, and Psychological;  
Sciences

Jigme M. Sethi  
Associate Professor of Medicine

Kurush Sethna  
Clinical Assistant Professor of Medicine

Christopher Takakazu Seto  
Associate Professor of Chemistry

Robert J. Settipane  
Clinical Assistant Professor of Pediatrics

Russell Settipane  
Clinical Associate Professor of Medicine

Linda C. Shafer  
Clinical Assistant Professor of Psychiatry and Human Behavior

Catherine E. Shafts  
Clinical Instructor in Family Medicine
Nishit Shah
Assistant Professor of Surgery
Samir A. Shah
Clinical Professor of Medicine
Bahram Shah-Hosseini
Clinical Assistant Professor of Obstetrics and Gynecology
Reza Shah-Hosseini
Clinical Associate Professor Emeritus of Obstetrics and Gynecology
Thomas K. Shahinian
Clinical Associate Professor of Surgery
Linda B. Shalon
Associate Professor of Pediatrics (Clinical)
Robert M. Shalvoy
Assistant Professor of Orthopaedics
Peter R. Shank
Professor Emeritus of Medical Science
Bradley A. Shapiro
Clinical Assistant Professor of Diagnostic Imaging
Gerald M. Shapiro
Professor Emeritus of Music
Jason M. Shapiro
Assistant Professor of Pediatrics (Clinical)
Jesse M. Shapiro
Visiting Professor of Economics
Barry L. Sharaf
Associate Professor of Medicine
Uzma Sharif
Assistant Professor of Neurology (Clinical)
Katherine M. Sharkey
Assistant Professor of Medicine; Assistant Professor of Psychiatry and Human Behavior
Kapil Sharma
Clinical Instructor in Medicine
Satish C. Sharma
Professor of Medicine
Surendra Sharma
Professor of Pathology and Laboratory Medicine (Research); Professor of Pediatrics (Research)
Jane R. Sharp
Clinical Assistant Professor of Obstetrics and Gynecology
Gaius Shaver
Professor of Ecology and Evolutionary Biology (MBL)
Brandon W. Shaw
Adjunct Lecturer in Theatre Arts and Performance Studies
Judith Gibbs Shaw
Clinical Assistant Professor of Pediatrics
Sunil K. Shaw
Assistant Professor of Pediatrics (Research)
Laura Shawhughes
Clinical Instructor in Medicine
Nicole L. Shay
Clinical Assistant Professor of Psychiatry and Human Behavior
Lisa B. Shea
Clinical Associate Professor of Psychiatry and Human Behavior
M. Tracie Shea
Professor of Psychiatry and Human Behavior
Eric H. Shed
Lecturer in Education
Thomas Sheeran
Assistant Professor of Psychiatry and Human Behavior (Research)
Michael F. Sheff
Associate Professor Emeritus of Pathology and Laboratory Medicine (Research)
David Sheinberg
Professor of Neuroscience
Stephen J. Sheinkopf
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)
Brian W. Sheldon
Professor of Engineering
Douglas G. Shemin
Associate Professor of Medicine
Edmond D. Shenassa
Adjunct Associate Professor of Epidemiology
Vivek Shenoy
Adjunct Professor of Engineering
Stephanie A. Shephard-Umaschi
Assistant Professor of Psychiatry and Human Behavior (Research)
Charles Shepherdson
Visiting Scholar in Gender Studies
Bryan E. Shepp
Professor Emeritus of Psychology and Cognitive and Linguistic Sciences
Consuelo Sherba
Teaching Associate in Music
Charles B. Sherman
Clinical Associate Professor of Medicine
Angela M. Sherwin
Assistant Professor of the Practice for Health Services, Policy and Practice
Eytan Sheshinski
Visiting Professor of Economics
Yeuan-Ming Sheu
Visiting Scientist in Physics
Guitao Shi
Visiting Scientist in Earth, Environmental, and Planetary Sciences
Naoko Shibusawa
Associate Professor of American Studies; Associate Professor of History
Renee R. Shield
Clinical Professor of Health Services, Policy and Practice
Susan Short
Professor of Sociology
Harel Z. Shouval
Adjunct Associate Professor of Brain and Neural Systems
Chi-Wang Shu
Stowell University Professor of Applied Mathematics
Priscilla Shube
Clinical Assistant Professor of Family Medicine
Anita Shukla
Assistant Professor of Engineering
Nicholas J. Sibrava
Assistant Professor of Psychiatry and Human Behavior (Research)
Afreen Siddiqui
Clinical Assistant Professor of Surgery (Anesthesiology)
Michael L. Siegel
Visiting Scholar in Gender Studies
Nicole Siegert
Assistant Professor of Family Medicine (Clinical)
Santina L. Siena
Clinical Assistant Professor of Obstetrics and Gynecology
Mark Sigman
Krishnamurthi Family Professor of Urology
Matthew S. Siket
Assistant Professor of Emergency Medicine
William M. Sikov  
Clinical Associate Professor of Medicine

Henry A. Silva  
Adjunct Lecturer in Economics

Brian Silver  
Associate Professor of Neurology

Hilary Silver  
Professor of Public Policy; Professor of Urban Studies and Sociology

Michael A. Silver  
Clinical Assistant Professor of Psychiatry and Human Behavior

Rebecca B. Silver  
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Fredric Joel Silverblatt  
Professor Emeritus of Medicine

Harvey Fox Silverman  
Professor of Engineering

John Michael Silverman  
Professor Emeritus of Modern Culture and Media

Joseph H. Silverman  
Royce Family Professor of Teaching Excellence and Professor of Mathematics

Jared A. Silverstein  
Assistant Professor of Pediatrics (Clinical)

Joanne M. Silvia  
Clinical Assistant Professor of Family Medicine

Leonor Simas-Almeida  
Senior Lecturer in Portuguese and Brazilian Studies

Louis R. Simeone  
Clinical Assistant Professor of Orthopaedics

John Simeral  
Assistant Professor of Engineering (Research)

Andrea Megela Simmons  
Professor of Cognitive, Linguistic and Psychological Sciences

James A. Simmons  
Professor of Biology

Rachel Ann Simmons  
Clinical Assistant Professor of Psychiatry and Human Behavior

Sheri Simmons  
Assistant Professor of Ecology and Evolutionary Biology (MBL)

Warren Simmons  
Adjunct Professor of Education

William S. Simmons  
Professor of Anthropology

Meera Varma Simoes  
Clinical Assistant Professor of Obstetrics and Gynecology

Peter R. Simon  
Clinical Associate Professor of Epidemiology

Rochelle Simon  
Assistant Professor of Pathology and Laboratory Medicine

Marc P. Simpao  
Instructor in Medicine (Clinical)

Don B. Singer  
Professor Emeritus of Pathology and Laboratory Medicine

Arun Singh  
Clinical Professor of Surgery

Bhrigupati Singh  
Assistant Professor of Anthropology

Kamaljeet Singh  
Assistant Professor of Pathology and Laboratory Medicine

Prema Singh  
Mahatma Gandhi Assistant Professor of Political Science and International Studies

Rakesh K. Singh  
Assistant Professor of Obstetrics and Gynecology (Research)

Einar Siqueland  
Professor Emeritus of Psychology

Alan D. Sirot  
Professor of Psychiatry and Human Behavior (Clinical)

Lawrence Sirovich  
Professor Emeritus of Applied Mathematics

Latha Sivaprasad  
Clinical Associate Professor of Medicine

Antun Skanata  
Visiting Scientist in Physics

Margie Skeer  
Adjunct Assistant Professor of Behavioral and Social Sciences

Mitchel Sklar  
Clinical Assistant Professor of Medicine

Luisa Skoble  
Clinical Assistant Professor of Psychiatry and Human Behavior

Gail Skowron  
Adjunct Professor of Medicine

Caroline Skudlarek-Prete  
Clinical Assistant Professor of Obstetrics and Gynecology

Boris Skurkovich  
Clinical Professor of Pediatrics

S. Frederick Slafsky  
Clinical Assistant Professor Emeritus of Surgery

Jeffrey M. Slaiby  
Assistance Professor of Surgery (Clinical)

John G. Slattery  
Clinical Assistant Professor of Family Medicine

Jennifer A. Slattery-Bownds  
Lecturer in Public Policy

Steven A. Sloman  
Professor of Cognitive, Linguistic and Psychological Sciences

Cheryl L. Slomkowski  
Assistant Professor of Psychiatry and Human Behavior (Research)

Jessica Slusarski  
Clinical Assistant Professor of Pediatrics

Martin Smick  
Adjunct Instructor in Visual Art

Karen Smigel  
Clinical Assistant Professor of Family Medicine

Michael A. Smit  
Assistant Professor of Pediatrics

Caldwell W. Smith  
Clinical Associate Professor of Surgery (Ophthalmology)

Daniel J. Smith  
Professor of Anthropology

Deborah Salem Smith  
Teaching Associate in Theatre Arts and Performance Studies

Jessica L. Smith  
Associate Professor of Emergency Medicine (Clinical)

Joel Smith  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Katherine F. Smith  
Assistant Professor of Ecology and Evolutionary Biology

Kerry Smith  
Associate Professor of History
Peter S. Smith  
Professor Emeritus of Pediatrics
Richard M. Smith  
Clinical Assistant Professor of Psychiatry and Human Behavior
Robert A. Smith  
Clinical Instructor Emeritus in Health Services, Policy and Practice
Robert J. Smith  
Professor of Medicine
Sara W. Smith  
Adjunct Lecturer in Portuguese and Brazilian Studies
Stephen R. Smith  
Professor Emeritus of Family Medicine
Victoria P. Smith  
Senior Lecturer in Hispanic Studies
Herbert J. Smokler  
Clinical Assistant Professor of Psychiatry and Human Behavior
Romina P. Smulever  
Clinical Assistant Professor of Psychiatry and Human Behavior
Susan Smulyan  
Professor of American Studies
Lory Snady-McCoy  
Clinical Associate Professor of Surgery (Ophthalmology)
Linda K. Snelling  
Professor of Pediatrics (Clinical); Professor of Surgery (Clinical)
Zachary Sng  
Associate Professor of Comparative Literature; Associate Professor of German Studies
Amy L. Snyder  
Assistant Professor of Obstetrics and Gynecology (Clinical)
Laura A. Snyder  
Lecturer in Education
Paul E. Snyder  
Clinical Assistant Professor of Dermatology
Peter Snyder  
Professor of Neurology (Research)
Richard O. Snyder  
Professor of Political Science
Gregory M. Soares  
Associate Professor of Diagnostic Imaging
David M. Sobel  
Professor of Cognitive, Linguistic and Psychological Sciences
Patricia I. Sobral  
Senior Lecturer in Portuguese and Brazilian Studies
Silvia Sobral  
Senior Lecturer in Hispanic Studies
Clarence H. Soderberg Jr  
Clinical Associate Professor Emeritus of Surgery
Neel R. Sodha  
Assistant Professor of Surgery
Mitchell Sogin  
Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)
Jane Sokolosky  
Senior Lecturer in German Studies
Patricia M. Solga  
Clinical Assistant Professor of Orthopaedics
Jon S. Solis  
Clinical Assistant Professor of Dermatology
Joel B. Solomon  
Clinical Assistant Professor of Psychiatry and Human Behavior
John J. Solomon  
Clinical Assistant Professor of Family Medicine
Anna Solomon-Greenbaum  
Visiting Lecturer in English
Sukanya Somasundar  
Clinical Assistant Professor of Family Medicine
Joo-Hyun Song  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences
Julie H. Song  
Associate Professor of Diagnostic Imaging (Clinical)
Jay A. Sorgman  
Clinical Assistant Professor of Medicine
Ernest Sosa  
Professor Emeritus of Philosophy
Maria Belen Souto Garcia  
Teaching Associate in Hispanic Studies
Jennifer M. Souza  
Clinical Assistant Professor of Family Medicine
Mark Spaller  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology
Dana Sparkawk  
Clinical Assistant Professor of Emergency Medicine
Shirley A. Spater  
Clinical Associate Professor of Surgery (Oral & Maxillofacial Surgery)
Carrie E. Spearin  
Visiting Assistant Professor of Sociology
Jeremy Spector  
Clinical Assistant Professor of Medicine
Thomas J. Speer  
Assistant Professor of Physics (Research)
Joel S. Spellun  
Clinical Assistant Professor of Medicine
Megan B. Spencer  
Clinical Assistant Professor of Psychiatry and Human Behavior
Patricia K. Spencer  
Clinical Associate Professor of Diagnostic Imaging
Kenneth F. Sperber  
Clinical Assistant Professor of Family Medicine
Nicolea S. Spillane  
Assistant Professor of Behavioral and Social Sciences (Research)
Anthony Spirito  
Professor of Psychiatry and Human Behavior
Kathryn T. Spoehr  
Professor of Cognitive, Linguistic and Psychological Sciences; Professor of Public Policy
Luther Spoehr  
Senior Lecturer in Education
Marcus B. Spradlin  
Associate Professor of Physics
Emily B. Spreull  
Clinical Assistant Professor of Psychiatry and Human Behavior
Timothy P. Spreull  
Clinical Assistant Professor of Obstetrics and Gynecology
Daniel D. Squires  
Assistant Professor of Behavioral and Social Sciences (Research)
Jensy Stafford  
Assistant Professor of Family Medicine (Clinical); Assistant Professor of Medicine (Clinical)
Barbara Stallings  
Professor of International Studies (Research)
Michael L. Stanchina  
Clinical Assistant Professor of Medicine
Donald L. Stanford
Adjunct Professor of Computer Science

Christina Stanley
Clinical Assistant Professor of Pathology and Laboratory Medicine

Lawrence K. Stanley
Senior Lecturer in English

Cassandra A. Stanton
Adjunct Assistant Professor of Psychiatry and Human Behavior

Laura Stanton
Clinical Assistant Professor of Psychiatry and Human Behavior

Barton L. St. Armand
Professor Emeritus of English and American Studies

Pamela Steadman-Wood
Clinical Assistant Professor of Psychiatry and Human Behavior

Brett S. Stecker
Clinical Assistant Professor of Family Medicine

Dale W. Steele
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

John M. Steele
Professor of Egyptology and Assyriology

Tracy L. Steffes
Associate Professor of Education; Associate Professor of History

Barry S. Stein
Professor Emeritus of Surgery

Daniel A. Stein
Clinical Professor of Theatre Arts and Performance Studies

Derek M. Stein
Associate Professor of Physics

Lynda Stein
Adjunct Professor of Psychiatry and Human Behavior

Michael D. Stein
Professor of Health Services, Policy and Practice; Professor of Medicine

Steven H. Stein
Clinical Assistant Professor of Family Medicine

Mark F. Steinbach
Lecturer in Music

Meredith Steinbach
Professor of Literary Arts

Michael P. Steinberg
Professor Emeritus of History

Solomon Steiner
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology

Edward S. Steinfield
Dean’s Professor of China Studies

Margaret M. Steinhoff
Professor of Pathology and Laboratory Medicine

Gregory J. Steinmetz
Clinical Assistant Professor of Family Medicine

Andrew H. Stephen
Assistant Professor of Surgery (Trauma)

Bonnie E. Stephens
Adjunct Assistant Professor of Pediatrics

Edward S. Sternick
Professor Emeritus of Radiation Oncology

Christine Stevens
Teaching Associate in Theatre Arts and Performance Studies

Angela Stewart
Clinical Assistant Professor of Psychiatry and Human Behavior

Babette Taylor Stewart
Lecturer Emerita in Medical Science

Michael H. Stewart
Lecturer in English

Suzanne Stewart-Steinberg
Professor of Italian Studies and Comparative Literature

Gregory Stiener
Clinical Assistant Professor of Psychiatry and Human Behavior

Taylor J. Stilson
Teaching Associate in Music

Philip H. Stockwell
Assistant Professor of Medicine (Clinical)

Kristen C. Stone
Assistant Professor of Psychiatry and Human Behavior (Research)

William M. Stone
Clinical Associate Professor of Neurology

Barbara S. Stonestreet
Professor of Pediatrics

Edward G. Stopa
Professor of Neurosurgery; Professor of Pathology and Laboratory Medicine

Robert L. Stout
Adjunct Professor of Psychiatry and Human Behavior

Stanley K. Stowers
Professor Emeritus of Religious Studies

Julie A. Strandberg
Senior Lecturer in Theatre Arts and Performance Studies

Richard Mark Stratton
Newport Rogers Professor of Chemistry

Walter A. Strauss
L. Herbert Ballou University Professor of Mathematics

Rochelle S. Strenger
Clinical Associate Professor of Medicine

Laura Stroud
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Gregory L. Stuart
Adjunct Professor of Psychiatry and Human Behavior

Ashley R. Stuckey
Assistant Professor of Obstetrics and Gynecology

Edward J. Stulik
Clinical Assistant Professor of Medicine

Newell Maynard Stults
Professor Emeritus of Political Science

Chau-Hsing Su
Professor Emeritus of Applied Mathematics

Mark C. Suchman
Professor of Sociology

Erika A. Sudderth
Visiting Scholar in Computer Science

Erik B. Sudderth
Assistant Professor of Computer Science

J. William Suggs
Professor Emeritus of Chemistry

Edward Suh
Clinical Instructor in Surgery (Anesthesiology)

Elizabeth Loring Sullivan
Clinical Professor of Obstetrics and Gynecology

Francis M. Sullivan
Clinical Associate Professor of Emergency Medicine

Frank W. Sullivan
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior
James C. Sullivan  
Clinical Assistant Professor of Medicine
James K. Sullivan  
Clinical Assistant Professor of Psychiatry and Human Behavior
Mary C. Sullivan  
Adjunct Professor of Pediatrics
Patrick Sullivan  
Instructor in Emergency Medicine (Clinical)
Patrick K. Sullivan  
Associate Professor of Surgery
Rachel A. Sullivan  
Instructor in Surgery (Clinical)
Stephen R. Sullivan  
Assistant Professor of Pediatrics; Assistant Professor of Surgery (Plastic Surgery)
Eleanor M. Summerhill  
Associate Professor of Medicine
Margaret A. Sun  
Clinical Assistant Professor of Family Medicine
Shouheng Sun  
Professor of Chemistry; Professor of Engineering
Xiang Sun  
Visiting Scientist in Chemistry
Selim Suner  
Professor of Emergency Medicine; Professor of Engineering; Professor of Surgery
C. James Sung  
Professor of Pathology and Laboratory Medicine
Vivian W. Sung  
Associate Professor of Obstetrics and Gynecology
Yesim Sungu-Eryilmaz  
Adjunct Lecturer in Urban Studies
Ghulam M. Surti  
Clinical Assistant Professor of Psychiatry and Human Behavior
Jacques G. Susset  
Clinical Professor Emeritus of Surgery (Urology)
Elizabeth M. Sutton  
Assistant Professor of Emergency Medicine (Clinical)
Eric Suuberg  
Professor of Engineering
Shailender Swaminathan  
Assistant Professor of Health Services, Policy and Practice (Research)
Sharon M. Swartz  
Professor of Biology; Professor of Engineering
Lisa Michelle Swartz Topor  
Assistant Professor of Pediatrics (Clinical)
Joseph D. Sweeney  
Professor of Medicine; Professor of Pathology and Laboratory Medicine
Lynn A. Sweeney  
Assistant Professor of Emergency Medicine (Clinical)
Patrick J. Sweeney  
Professor Emeritus of Obstetrics and Gynecology
Lawrence H. Sweet  
Adjunct Professor of Psychiatry and Human Behavior
Jeanne W. Swen  
Clinical Instructor in Family Medicine
Leigh Cole Swensen  
Professor of Literary Arts
David W. Swenson  
Assistant Professor of Diagnostic Imaging (Clinical)
Rebecca R. Swenson  
Assistant Professor of Psychiatry and Human Behavior (Research)
Robert M. Swift  
Professor of Psychiatry and Human Behavior
Alison Swigart  
Clinical Assistant Professor of Psychiatry and Human Behavior
Patrick Sylvain  
Visiting Lecturer in Language Studies
Jeffrey B. Syme  
Clinical Assistant Professor of Family Medicine
Joanna Szymynger-Chodob ska  
Assistant Professor of Emergency Medicine (Research)
Sergei Tabachnikov  
Visiting Professor of Mathematics
Ramin Tabaddor  
Clinical Assistant Professor of Family Medicine
Angela M. Taber  
Assistant Professor of Medicine
Pedro F. Tactacan  
Clinical Assistant Professor of Psychiatry and Human Behavior
Hiroshi Tajima  
Lecturer in East Asian Studies
Kathy M. Takayama  
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry
Ross Taliano  
Assistant Professor of Pathology and Laboratory Medicine
C. James Sung  
Professor of Pathology and Laboratory Medicine
Vivian W. Sung  
Associate Professor of Obstetrics and Gynecology
Yesim Sungu-Eryilmaz  
Adjunct Lecturer in Urban Studies
Ghulam M. Surti  
Clinical Assistant Professor of Psychiatry and Human Behavior
Jacques G. Susset  
Clinical Professor Emeritus of Surgery (Urology)
Elizabeth M. Sutton  
Assistant Professor of Emergency Medicine (Clinical)
Eric Suuberg  
Professor of Engineering
Shailender Swaminathan  
Assistant Professor of Health Services, Policy and Practice (Research)
Sharon M. Swartz  
Professor of Biology; Professor of Engineering
Lisa Michelle Swartz Topor  
Assistant Professor of Pediatrics (Clinical)
Joseph D. Sweeney  
Professor of Medicine; Professor of Pathology and Laboratory Medicine
Lynn A. Sweeney  
Assistant Professor of Emergency Medicine (Clinical)
Patrick J. Sweeney  
Professor Emeritus of Obstetrics and Gynecology
Lawrence H. Sweet  
Adjunct Professor of Psychiatry and Human Behavior
Jeanne W. Swen  
Clinical Instructor in Family Medicine
Leigh Cole Swensen  
Professor of Literary Arts
David W. Swenson  
Assistant Professor of Diagnostic Imaging (Clinical)
Rebecca R. Swenson  
Assistant Professor of Psychiatry and Human Behavior (Research)
Robert M. Swift  
Professor of Psychiatry and Human Behavior
Alison Swigart  
Clinical Assistant Professor of Psychiatry and Human Behavior
Patrick Sylvain  
Visiting Lecturer in Language Studies
Jeffrey B. Syme  
Clinical Assistant Professor of Family Medicine
Joanna Szymynger-Chodob ska  
Assistant Professor of Emergency Medicine (Research)
Sergei Tabachnikov  
Visiting Professor of Mathematics
Ramin Tabaddor  
Clinical Assistant Professor of Family Medicine
Angela M. Taber  
Assistant Professor of Medicine
Pedro F. Tactacan  
Clinical Assistant Professor of Psychiatry and Human Behavior
Hiroshi Tajima  
Lecturer in East Asian Studies
Kathy M. Takayama  
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry
Ross Taliano  
Assistant Professor of Pathology and Laboratory Medicine
C. James Sung  
Professor of Pathology and Laboratory Medicine
Vivian W. Sung  
Associate Professor of Obstetrics and Gynecology
Yesim Sungu-Eryilmaz  
Adjunct Lecturer in Urban Studies
Ghulam M. Surti  
Clinical Assistant Professor of Psychiatry and Human Behavior
Jacques G. Susset  
Clinical Professor Emeritus of Surgery (Urology)
Elizabeth M. Sutton  
Assistant Professor of Emergency Medicine (Clinical)
Eric Suuberg  
Professor of Engineering
Shailender Swaminathan  
Assistant Professor of Health Services, Policy and Practice (Research)
Sharon M. Swartz  
Professor of Biology; Professor of Engineering
Lisa Michelle Swartz Topor  
Assistant Professor of Pediatrics (Clinical)
Joseph D. Sweeney  
Professor of Medicine; Professor of Pathology and Laboratory Medicine
Lynn A. Sweeney  
Assistant Professor of Emergency Medicine (Clinical)
Patrick J. Sweeney  
Professor Emeritus of Obstetrics and Gynecology
Lawrence H. Sweet  
Adjunct Professor of Psychiatry and Human Behavior
Jeanne W. Swen  
Clinical Instructor in Family Medicine
Leigh Cole Swensen  
Professor of Literary Arts
David W. Swenson  
Assistant Professor of Diagnostic Imaging (Clinical)
Rebecca R. Swenson  
Assistant Professor of Psychiatry and Human Behavior (Research)
Karen T. Tashima  
Professor of Medicine

Marc Tatar  
Professor of Biology

Charlene A. Tate  
Assistant Professor of Neurology (Clinical)

Katherine Tate  
Professor of Political Science

Gabriel Taubin  
Associate Professor of Computer Science; Associate Professor of Engineering

Joao M. Tavares  
Clinical Assistant Professor of Medicine

Tracey Taveira  
Adjunct Associate Professor of Medicine

Elisabeth B. Taylor  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elizabeth Taylor  
Senior Lecturer in English

Helena Taylor  
Assistant Professor of Pediatrics; Assistant Professor of Surgery (Plastic Surgery)

Julie S. Taylor  
Professor of Family Medicine

Lynn E. Taylor  
Assistant Professor of Medicine

Marshall A. Taylor  
Clinical Assistant Professor Emeritus of Obstetrics and Gynecology

Kurt Teichert  
Senior Lecturer in Environmental Studies

Gladys H. Telang  
Associate Professor of Dermatology

Albert Edward Telfeian  
Assistant Professor of Neurosurgery (Clinical)

Adam Teller  
Associate Professor of History; Associate Professor of Judaic Studies

Stefanie A. Tellex  
Assistant Professor of Computer Science; Assistant Professor of Engineering

Tahir Tellioglu  
Clinical Assistant Professor of Psychiatry and Human Behavior

Joan M. Teno  
Professor of Health Services, Policy and Practice; Professor of Medicine

Dmitry Terentyev  
Assistant Professor of Medicine (Research)

Joseph Terlato  
Clinical Assistant Professor of Medicine

Elmo Terry-Morgan  
Associate Professor of Africana Studies and Theatre Arts and Performance Studies

Tracy O'Leary Tevyaw  
Clinical Associate Professor of Psychiatry and Human Behavior

Jennifer Tidey  
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Alexandra M. Tien  
Clinical Assistant Professor of Family Medicine

David Robbins Tien  
Clinical Associate Professor of Surgery (Ophthalmology)

Peter L. Tilkemeier  
Adjunct Professor of Medicine

Alvaro M. Tinajero  
Clinical Assistant Professor of Epidemiology

Jeff T. Titon  
Professor Emeritus of Music

King W. To  
Clinical Professor of Surgery (Ophthalmology)

Cristina Toba  
Clinical Assistant Professor of Psychiatry and Human Behavior

John F. Todaro  
Clinical Assistant Professor of Psychiatry and Human Behavior

Lyudmil Todorov  
Clinical Assistant Professor of Family Medicine

Elizabeth Toll  
Clinical Associate Professor of Medicine; Clinical Associate Professor of Pediatrics

Khachig Tololyan  
Visiting Professor of Modern Culture and Media

Marina Tolou-Shams  
Associate Professor of Psychiatry and Human Behavior (Research)

John O. Tomasi  
Romeo Elton Professor of Natural Theology

Edward S. Tomassi  
Teaching Associate in Music

David R. Tomlinson  
Clinical Assistant Professor of Family Medicine
Iris L. Tong  
Assistant Professor of Medicine

Shuping Tong  
Professor of Medicine (Research)

Beth A. Toolan  
Clinical Assistant Professor of Pediatrics

Gerald J. Toomer  
Professor Emeritus of History of Mathematics and Classics

Philip A. Torgan  
Clinical Associate Professor Emeritus of Medicine

Christina Tortolani  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Alison Tovar  
Adjunct Assistant Professor of Behavioral and Social Sciences

Gregory J. Towne  
Assistant Professor of Surgery (Clinical)(Anesthesiology)

Nicholas William Townsend  
Professor Emeritus of Anthropology

Molly M. Tracy  
Assistant Professor of Neurology (Clinical)

Thomas F. Tracy Jr  
Professor of Surgery and Pediatrics

Peter G. Trafton  
Professor of Orthopaedics

Christine L. Trask  
Clinical Assistant Professor of Psychiatry and Human Behavior

Diana O. Treaba  
Assistant Professor of Pathology and Laboratory Medicine

Mark Treat  
Assistant Professor of the Practice of Health Services, Policy and Practice

Serguei R. Treil  
Professor of Mathematics

Geoffrey Tremont  
Associate Professor of Psychiatry and Human Behavior

Elizabeth W. Triche  
Assistant Professor of Epidemiology

Andrew S. Triebwasser  
Associate Professor of Surgery (Clinical)(Anesthesiology)

M. Howard Triedman  
Clinical Associate Professor Emeritus of Neurology

Thomas Trikalinos  
Associate Professor of Health Services, Policy and Practice

Katherine Trimble  
Adjunct Lecturer in Sociology

Anubhav Tripathi  
Professor of Engineering; Professor of Molecular Pharmacology, Physiology and Biotechnology

Amal N. Trivedi  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine

Caroline A. Troise  
Clinical Assistant Professor of Medicine

Wilson A. Truccolo-Filho  
Pablo J. Salame '88 Goldman Sachs Assistant Professor of Computational Neuroscience

Margaret Tryforos  
Assistant Professor of Family Medicine (Clinical)

Devin Tsai  
Clinical Instructor in Emergency Medicine

Hsin-I Tseng  
Yi-Tang Tseng  
Associate Professor of Pediatrics (Research)

William G. Tsiaras  
Clinical Professor of Surgery (Ophthalmology)

Robert J. Tubbs  
Assistant Professor of Emergency Medicine

Joseph R. Tucci  
Adjunct Professor of Medicine

Christopher Joshua Tucker  
Assistant Professor of Music

Gregory S. Tucker  
Professor of Physics

Julia A. Tullis  
Professor Emerita of Geological Sciences

Terry E. Tullis  
Professor Emeritus of Geological Sciences

Glenn A. Tung  
Professor of Diagnostic Imaging

Allan R. Tunkel  
Professor of Medicine

Nilufer Nermin Turan Dural  
Visiting Professor of Medicine

Frances Turcotte-Benedict  
Assistant Professor of Emergency Medicine

Matthew A. Turner  
Professor of Economics

Jean E. Twomey  
Assistant Professor of Pediatrics (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Barbara Tylenda  
Clinical Associate Professor of Psychiatry and Human Behavior

Denise A. Tyler  
Assistant Professor of Health Services, Policy and Practice (Research)

Elizabeth T. Tyler  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Health Services, Policy and Practice

John H. Tyler  
Professor of Economics; Professor of Education; Professor of Public Policy

Audrey R. Tyrka  
Associate Professor of Psychiatry and Human Behavior

Holly Tytell  
Clinical Assistant Professor of Psychiatry and Human Behavior

Golfo Tzilos  
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Lisa A. Uebelacker  
Associate Professor of Psychiatry and Human Behavior (Research)

Kenneth Uhnak  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Jody Ann Underwood  
Clinical Assistant Professor of Psychiatry and Human Behavior

William S. Unger  
Clinical Assistant Professor of Psychiatry and Human Behavior

Jessica L. Unick  
Assistant Professor of Psychiatry and Human Behavior (Research)

Randall L. Updegrove  
Clinical Assistant Professor of Orthopaedics

Eliezer Upfal  
Professor of Computer Science
Jonathan D. Uri  
Clinical Assistant Professor of Surgery (Anesthesiology)

Anny Usheva  
Adjunct Associate Professor of Surgery (Cardiothoracic Surgery)

Wilson F. Utter  
Clinical Associate Professor Emeritus of Pediatrics

Alper Uzun  
Assistant Professor of Pediatrics (Research)

Daniel Vaca  
Assistant Professor of Religious Studies

Constantine Vafidis  
Clinical Instructor in Family Medicine

Jamshed Vakharia  
Clinical Assistant Professor of Surgery

Jonathan Valente  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Luiz Fernando Valente  
Professor of Comparative Literature; Professor of Portuguese and Brazilian Studies

Paul A. Valiant  
Assistant Professor of Computer Science

James M. Valles Jr  
Professor of Physics

Andries van Dam  
Thomas J. Watson Jr. University Professor of Technology and Education

Jacob Vandenbergh  
Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Medicine (Research)

Herman H. Vandenburgh  
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology

Robert Vanderslice  
Clinical Assistant Professor of Epidemiology

Axel van de Walle  
Associate Professor of Engineering

Peter van Dommelen  
Joukowsky Family Professor of Archaeology and Professor of Anthropology

Eliza van Reen  
Assistant Professor of Psychiatry and Human Behavior (Research)

Andre van Tonder  
Visiting Scientist in Physics

Marcia W. Vanneste  
Assistant Professor of Pediatrics (Clinical)

Leah K. Vanwey  
Associate Professor of Sociology

Mercedes Vaquero  
Professor of Hispanic Studies

Ashutosh Varshney  
Sol Goldman Charitable Trust Professor in International Studies and Social Sciences

Charles A. Vaslet  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Sreekala Vasudevan  
Clinical Instructor in Medicine

Rosalind M. Vaz  
Professor Emerita of Pediatrics (Clinical)

Nico Vehse  
Assistant Professor of Pediatrics

Robert Y. Velasco  
Assistant Professor of Medicine (Clinical)

Corey E. Ventetuolo  
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Medicine

Daniele Venturi  
Assistant Professor of Applied Mathematics (Research)

Wendy Verhoek-Oftedahl  
Adjunct Assistant Professor of Epidemiology

Armand D. Versaci  
Clinical Professor Emeritus of Surgery

Alice-Lee Vestner  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Michael P. Vezeridis  
Professor of Surgery

Todd D. Viccione  
Clinical Instructor in Medicine

Nelson H. Vieira  
University Professor of Portuguese and Brazilian Studies and Professor of Judaic Studies

Marguerite B. Vigliani  
Clinical Associate Professor of Obstetrics and Gynecology

Rendueles Villalba II  
Clinical Associate Professor of Psychiatry and Human Behavior

Eddie Villanueva  
Adjunct Instructor in Visual Art

Nery R. Villanueva  
Visiting Assistant Professor of Hispanic Studies

Anna L. Villavicencio  
Clinical Assistant Professor of Psychiatry and Human Behavior

William W. Vint  
Teaching Associate in Music

Meera Sushila Viswanathan  
Associate Professor of Comparative Literature; Associate Professor of East Asian Studies

John S. Vitelli  
Clinical Assistant Professor of Medicine

Trina Vithayathil  
Visiting Assistant Professor of Population Studies

Sivamainthan Vithiananthan  
Associate Professor of Surgery (Clinical)

Gwenn M. Vittimberga  
Clinical Assistant Professor of Dermatology

Patrick M. Vivier  
Royce Family Associate Professor of Teaching Excellence and Associate Professor of Health Services, Policy and Practice

Petia Vlahovska  
Associate Professor of Engineering

Benjamin S. Vogel  
Clinical Assistant Professor of Obstetrics and Gynecology

Lidia A. Vognar  
Assistant Professor of Medicine (Clinical)

Betty R. Vohr  
Professor of Pediatrics

Rajiv Vohra  
Ford Foundation Professor of Economics

Anastasia Volovich  
Associate Professor of Physics

Annette E. von Dem Bussche  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Michael Vorenberg  
Associate Professor of History

Matthew D. Vrees  
Clinical Assistant Professor of Surgery
Roxanne Vrees  
Assistant Professor of Obstetrics and Gynecology  
Jonathan K. Waage  
Professor Emeritus of Biology  
Rajan Wadhawan  
Adjunct Assistant Professor of Pediatrics  
Safa F. Wagdi  
Clinical Assistant Professor of Surgery (Ophthalmology)  
Hedy S. Wald  
Clinical Associate Professor of Family Medicine  
Bernard K. Waldrop  
Brooke Russell Astor Emeritus Professor of the Humanities  
Rosmarie Waldrop  
Visiting Scholar in Literary Arts  
Homer F. Walker  
Visiting Professor of Applied Mathematics  
W. Scott Walker  
Clinical Assistant Professor of Obstetrics and Gynecology  
Barry W. Wall  
Clinical Professor of Psychiatry and Human Behavior  
Michael T. Wallach  
Associate Professor of Diagnostic Imaging (Clinical); Associate Professor of Pediatrics (Clinical)  
Edward G. Walsh  
Assistant Professor of Neuroscience (Research)  
Eric Ferguson Walsh  
Clinical Assistant Professor of Orthopaedics  
Jennifer Walsh  
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research)  
Joseph B. Walsh  
Visiting Scholar in Earth, Environmental, and Planetary Sciences  
Anne S. Walters  
Clinical Associate Professor of Psychiatry and Human Behavior  
Jack R. Wands  
Jeffrey and Kimberley Greenberg - Artemis and Martha Joukowsky Professor of Gastroenterology  
Hui Wang  
Associate Professor of Applied Mathematics  
Hye-Sook Wang  
Associate Professor of East Asian Studies  
Lai-Sheng Wang  
Professor of Chemistry  
Lingzhen Wang  
Associate Professor of East Asian Studies  
Li-Qiong Wang  
Lecturer in Chemistry  
Xiaotian Wang  
Assistant Professor of Surgery (Research)(Plastic Surgery)  
Yang Wang  
Senior Lecturer in East Asian Studies  
Yihong Wang  
Assistant Professor of Pathology and Laboratory Medicine  
Christine A. Wanke  
Adjunct Professor of Medicine  
Harold R. Ward  
Professor Emeritus of Chemistry and Environmental Studies  
Nicholas S. Ward  
Associate Professor of Medicine  
Robert P. Ward  
Visiting Lecturer in English  
Kay B. Warren  
Charles C. Tillinghast, Jr. ’32 Professor of International Studies  
Otis U. Warren  
Assistant Professor of Emergency Medicine (Clinical)  
William H. Warren Jr  
Chancellor’s Professor  
Sarita S. Warrier  
Assistant Professor of Medicine  
Marvin S. Wasser  
Clinical Assistant Professor of Pediatrics  
Takeo Watanabe  
Fred M. Seed Professor of Cognitive and Linguistic Sciences  
Anthony J. Watson  
Adjunct Assistant Professor of History  
Delma-Jean Watts  
Assistant Professor of Pediatrics (Clinical)  
David E. Wazer  
Professor of Radiation Oncology  
Banice M. Webber  
Clinical Associate Professor of Radiation Oncology  
Thompson Webb III  
Professor Emeritus of Geological Sciences  
Peter M. Weber  
Professor of Chemistry  
Peter Wegner  
Professor Emeritus of Computer Science  
Lei Wei  
Associate Professor of Orthopaedics (Research)  
Wei Wei  
Visiting Scholar in Gender Studies  
Marilyn Weigner  
Clinical Associate Professor of Medicine  
Barbara J. Weil  
Clinical Assistant Professor of Medicine  
David N. Weil  
James and Meryl Tisch Professor of Economics  
Jerome H. Weiner  
Professor Emeritus of Engineering and Physics  
Daniel M. Weinreich  
Associate Professor of Ecology and Evolutionary Biology  
Ann C. Weinstein  
Adjunct Lecturer in German Studies  
Arnold Louis Weinstein  
Edna and Richard Salomon Distinguished Professor of Comparative Literature  
Deborah F. Weinstein  
Lecturer in Gender Studies  
Lauren M. Weinstock  
Assistant Professor of Psychiatry and Human Behavior (Research)  
Martin A. Weinstock  
Professor of Dermatology; Professor of Epidemiology  
Marjorie E. Weishaar  
Clinical Professor of Psychiatry and Human Behavior  
Arnold-Peter Weiss  
Professor of Orthopaedics  
Rebecca B. Weitz-Shapiro  
Stanley J. Bernstein ’65 P’02 Assistant Professor of Political Science  
Elizabeth A. Welch  
Clinical Assistant Professor of Dermatology  
Jennifer Greene Welch  
Assistant Professor of Pediatrics
Leslie Welch  
Associate Professor of Cognitive, Linguistic and Psychological Sciences

Raymond H. Welch  
Clinical Assistant Professor of Dermatology

Gregory A. Wellenius  
Associate Professor of Epidemiology

Ryan J. Welter  
Clinical Assistant Professor of Family Medicine

Joel K. Weltman  
Clinical Professor Emeritus of Medicine

Jane Wen  
Clinical Instructor in Medicine

Linda C. Wendell  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Katharine D. Wenstrom  
Professor of Obstetrics and Gynecology

John Wermer  
Professor Emeritus of Mathematics

Erika Werner  
Assistant Professor of Obstetrics and Gynecology

Lee V. Wesner  
Clinical Assistant Professor of Surgery (Anesthesiology)

Gary M. Wessel  
Professor of Biology

Conrad W. Wesslehoft Jr  
Professor Emeritus of Surgery (Clinical)

Holly K. Westervelt  
Associate Professor of Psychiatry and Human Behavior (Clinical)

Peter Jocelyn Westervelt  
Professor Emeritus of Physics

Robert J. Westlake  
Professor Emeritus of Psychiatry and Human Behavior

Judith B. Westrick  
Clinical Instructor in Pediatrics

Terrie T. Wette  
Professor of Health Services, Policy and Practice

Patrick Weyer  
Clinical Assistant Professor of Medicine

Gary G. Wharton  
Clinical Assistant Professor of Obstetrics and Gynecology

Kristi A. Wharton  
Professor of Biology

Carol A. Wheeler  
Associate Professor of Obstetrics and Gynecology (Clinical)

Elizabeth Wheeler  
Clinical Assistant Professor of Psychiatry and Human Behavior

William M. Whelihan  
Clinical Associate Professor of Psychiatry and Human Behavior

Jordan White  
Assistant Professor of Family Medicine (Clinical)

Michael White  
Professor of Sociology

Russell E. White  
Clinical Associate Professor of Surgery

Tara L. White  
Assistant Professor of Behavioral and Social Sciences (Research)

Laura Brave Whiteley  
Assistant Professor of Psychiatry and Human Behavior (Research)

Timothy J. Whitfield  
Assistant Professor of Ecology and Evolutionary Biology (Research)

Esther K. Whitfield  
Associate Professor of Comparative Literature; Associate Professor of Hispanic Studies

Hilary Whitlatch  
Assistant Professor of Medicine

Annie J. Wiert  
Senior Lecturer in French Studies

John Edgar Wideman  
Asa Messer Professor Emeritus of Africana Studies and Literary Arts

Doreen L. Wiggins  
Clinical Assistant Professor of Obstetrics and Gynecology; Clinical Assistant Professor of Surgery

Faith Wilding  
Visiting Scholar in Gender Studies

Caroline S. Wilkel  
Clinical Assistant Professor of Dermatology

Joanne E. Wilkinson  
Adjunct Assistant Professor of Family Medicine

David M. Williams  
Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Psychiatry and Human Behavior

Kenneth Williams  
Associate Professor of Emergency Medicine (Clinical)

Lea Everard Williams  
Professor Emeritus of History

Robert R. Williams  
Clinical Associate Professor of Obstetrics and Gynecology

Christina Williamson  
Visiting Scholar in Archaeology and the Ancient World

Paul Gregory Willard  
Professor of Chemistry

Andre Willis  
Assistant Professor of Religious Studies

Matthew D. Willis  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

David R. Wills  
Professor of French Studies

Hale E. Wills  
Assistant Professor of Surgery

Ira B. Wilson  
Professor of Health Services, Policy and Practice; Professor of Medicine

Jeffrey M. Wilson  
Clinical Assistant Professor of Family Medicine

Julie M. Wilson  
Clinical Assistant Professor of Psychiatry and Human Behavior

Lionel Wilson  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Ulrica Wilson  
Visiting Assistant Professor of Mathematics

Janet L. Wilterdink  
Clinical Associate Professor of Neurology

Inge Crosman Wimmers  
Professor Emerita of French Studies

Edward Wing  
Professor of Medical Science
David C. Yoburn
Clinical Associate Professor of Medicine

Don C. Yoo
Associate Professor of Diagnostic Imaging (Clinical)

Carolyn Te Young
Clinical Assistant Professor of Pathology and Laboratory Medicine

Mark Young
Clinical Assistant Professor of Family Medicine

Matthew E. Young
Clinical Assistant Professor of Psychiatry and Human Behavior

Richard A. Yund
Professor Emeritus of Geological Sciences

Najam A. Zaidi
Clinical Assistant Professor of Medicine

Hanady Zainah
Clinical Instructor in Medicine

Anna Zaletayeva
Clinical Assistant Professor of Family Medicine

Vazira F-Y Zamindar
Associate Professor of History

Dominick Zangari
Clinical Assistant Professor of Surgery (Ophthalmology)

Raymond P. Zarlengo
Clinical Assistant Professor of Pediatrics

Alexander Zaslavsky
Professor of Engineering; Professor of Physics

Vladislav Zayas
Clinical Assistant Professor of Neurology

Stanley B. Zdonik Jr
Professor of Computer Science

Kimberly A. Zeller
Clinical Assistant Professor of Family Medicine

Catherine Zerner
Professor Emerita of History of Art and Architecture

Mark Zervas
Adjunct Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Natalie A. Zervas
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Cuxian Zhang
Associate Professor of Pathology and Laboratory Medicine

Jingjun Zhang
Visiting Scholar in Applied Mathematics

Peng Zhang
Assistant Professor of Medicine (Research)

Rui Zhang
Visiting Scientist in Applied Mathematics

Shengping Zhang
Visiting Scholar in Cognitive, Linguistic and Psychological Sciences

Songhua Zhang
Assistant Professor of Medicine (Research)

Zheng Zhang
Assistant Professor of Biostatistics (Research)

Yan Zhen
Visiting Scholar in Sociology

Anatoly Zhiltkovich
Professor of Medical Science

Anyu Zhou
Assistant Professor of Medicine (Research)

Haofei Zhou
Visiting Scientist in Engineering

Yang Zhou
Assistant Professor of Molecular Microbiology and Immunology (Research)

Shougang Zhuang
Professor of Medicine (Research)

Rashid Zia
Associate Professor of Engineering; Associate Professor of Physics

Panagiotis Ziaxas
Instructor in Medicine (Research)

James W. Ziegler
Associate Professor of Pediatrics (Clinical)

Beth Anne Zielinski-Habershaw
Senior Lecturer in Molecular Pharmacology, Physiology and Biotechnology

Richard J. Zienowicz
Associate Professor of Surgery (Plastic Surgery)

Sally Zierler
Professor Emerita of Epidemiology

Stanley Zimmering
Professor Emeritus of Biology

Anita L. Zimmerman
Professor of Medical Science

Mark Zimmerman
Professor of Psychiatry and Human Behavior

Bernard Zimmermann III
Adjunct Associate Professor of Medicine

Matthew B. Zimmt
Professor of Chemistry

Brian Zink
Frances Weeden Gibson-Edward A. Inannuccilli, MD, Professor of Emergency Medicine

Stephen H. Zinner
Adjunct Professor of Medicine

David Amato Zinno
Teaching Associate in Music

Associate Professor of American Studies and Urban Studies

Jeanne Ziter
Clinical Assistant Professor of Pediatrics

Caron Zlotnick
Professor of Medicine; Professor of Obstetrics and Gynecology; Professor of Psychiatry and Human Behavior

Maria Veronica Zubillaga Gabaldon
Cogut Visiting Professor of Latin American and Caribbean Studies; Fellow in Security Challenges in the Americas at the Center for Latin American and Caribbean Studies

Janet Zweig
Adjunct Assistant Professor of Public Humanities

William H. Zywiaik
Adjunct Associate Professor of Psychiatry and Human Behavior
General Regulations

General academic requirements

Undergraduate degrees:
Information regarding general academic degree requirements are listed under ‘The College’ section of the University Bulletin as well as on the respective websites of the Office of the Registrar (http://brown.edu/Administration/Registrar/guidelines/undergrad_progs) and the Dean of the College (http://brown.edu/Administration/Dean_of_the_College/degree).

Advanced degrees:
Information regarding Advanced degree requirements for specific academic programs are listed on the Graduate School (http://www.brown.edu/academics/degree-granting) website. Information regarding general and overall guidelines for advanced degrees are also listed on the Office of the Registrar (http://www.brown.edu/Administration/Registrar/guidelines/advanced_progs) website.

Enrollment and course registration

Instructions about enrollment will be sent via e-mail prior to the opening of each semester to all students. To complete enrollment, all requirements of the pertinent administrative offices of the University must be met, including registration for courses, payment of accounts, and arrangements for housing as appropriate. Fees will be charged for failure to meet established deadlines. All students must complete enrollment in order to be eligible to remain at the University.

Students are urged to note carefully the instructions provided at registration in order to assure eligibility for enrollment, proper registration in courses, and to avoid unnecessary payment of Late Registration and Change of Course fees. All registration materials and/or processes are considered official university documents. Any falsification of signatures or other tampering with such forms/processes constitutes a violation of the Academic Code.

All registration-related deadlines for each semester are listed in the ‘Academic Calendar’ section of the Bulletin and also on the Office of the Registrar website as well as answers to common registration-related questions.

For the full text on the Academic Regulations and Instructions for Registration, see the Registrar’s Office web site at:
http://www.brown.edu/Administration/Registrar/guidelines/index.html

For a tutorial on registration, see:
https://wiki.brown.edu/confluence/display/CISDOC/Screeencasts

To access the most up-to-date course information including credit bearing summer session offerings (*The course information in the PDF versions of the University Bulletin and Course Announcement Bulletin is current as of September 2014), see:
http://selfservice.brown.edu/menu and select ‘Brown Course Search’

Course Credit

The semester course is the unit of credit. This is defined as a course taken for the duration of one semester and, for purposes of evaluation, may be considered the approximate equivalent of four semester hours.

Course Numbering

Courses numbered 0001-0999 are strictly for Undergraduate credit (Graduate students may enroll in such courses with the permission of the instructor and the Graduate School.)

Courses numbered between 1000-1999 are for both Undergraduate and Graduate credit depending on the level of the student’s degree program.

Courses numbered between 2000-2999 are for Graduate credit (Undergraduate students may in enroll in such courses and may be applied towards their Undergraduate degree requirements by permission of the instructor.)

Courses numbered above 3000 are strictly for credit in the Alpert Medical School. Certain MD level courses may be taken for credit for Undergraduate students enrolled in the PLME program, but such courses do not count towards quantity, concentration, or Latin honors requirements for the Baccalaureate degree.

Maximum Course Load and Auditing

No student enrolled in The College or the Graduate School may enroll for more than five Brown credits in a semester. A degree candidate paying full tuition (4 or more enrollment units per semester) and is enrolled in less than five academic credits may be permitted to audit (see below section on auditing) additional course(s). At no time may a student be registered for more than 5 credits/courses including audits.

Enrollment Without Academic Credit

Auditing. An auditor is a student who is registered in a course without earning academic credit upon successful completion under the following conditions: (1) the student must be properly registered for it; (2) the student must pay the usual course fee except as indicated in the next paragraph; (3) the student is entitled to all instruction in the course, including conferences, the criticism of papers, tests, and examinations.

Any student registered on a full-time basis may be permitted to audit additional courses in any semester without charge. The total number of course registrations, including audits, may not exceed five credits.

Non-degree or student paying less than four enrollment units of tuition may choose to audit if they so choose, but the student does so with the understanding that they will pay the equivalent rate as if registered for academic credit.

With the concurrence of the instructor, the fact that a course has been audited shall be entered on the permanent record of any student electing this privilege. The status of a course in which a student has registered may not be changed from audit to credit after the fourth week of classes or from credit to audit after midsemester.

Vagabonding. A “vagabond” is a student who, with the permission of the instructor involved, visits a given course occasionally or regularly without payment of fee. It is understood that such a student shall be entitled to participate in classes and activities, including discussions, conferences, and papers, only at the pleasure of the instructor.

Attendance, Grading, Examinations

Attendance

It is in the interest of every student to attend all sessions of the classes in which registered, and each student has an obligation to contribute to the academic performance of all by full participation in the work of each class; however, within such limits as are necessary for the general welfare, a student benefits also from exercising discretion and assuming responsibility for his or her educational progress.

Accordingly, unless the instructor imposes attendance requirements, students are not limited with respect to the number of absences from a course. When, in the instructor’s opinion, a student is abusing the privilege of voluntary attendance, the appropriate dean’s office should be notified so that appropriate action may be taken.

A student is always fully responsible for any course work missed because of absences and will be assigned failing grades in final examinations missed without excuse from the dean’s office.

No student organization shall make any appointment for undergraduates which conflicts with college exercises unless permission has been obtained from the dean.

Grading System

At the end of each semester final grades are given in semester courses. In all courses, except those designated by the instructor as Mandatory Satisfactory/No Credit, a student may, in consultation with the advisor, elect to be graded on a basis of either Satisfactory/No Credit or A, B, C/
No Credit. A student must for every course taken indicate by the end of the fourth week of the semester which basis for grading is elected. Any student regularly enrolled in a course, no matter whether for A, B, C/No Credit or for Satisfactory/No Credit, may need to notify the Registrar's Office, in order to reactivate the first part of the year course during a later academic year, he or she for the first semester will become a No Credit. If the student completes the second half of the year course will be completed in the second semester of the same academic year in which the first half was taken. If the second half of the year course covers the work of the entire year and is recorded as the final grade for both semesters. It is normally expected that the second half of a year course will be completed in the second semester of the same academic year in which the first half was taken. If the second half of the year course is not completed at the end of that academic year, the grade for the first semester will become a No Credit. If the student completes the second part of the course during a later academic year, he or she may need to notify the Registrar’s Office, in order to reactivate the first part of the course.

In registering for the second half of a year course, students must register for credit if the first half was taken for credit. Similarly, if registered for audit in the first half, the second half of the course registration must also be as an audit. Exceptions must be approved by both the academic department and the Committee on Academic Standing.

Repeating Courses: Unless a course is explicitly approved by either the College Curriculum Committee or the Graduate Council as being able to be repeated for credit. Once course credit has been earned with an initial passing grade A,B,C, or Satisfactory (S) or through Transfer Credit it cannot be officially registered for again for in an effort to improve one's initial grade.

Grade Requirements for Advanced Degrees: A minimum grade of either Satisfactory or C in a 1000 or 2000 level course carries credit toward all advanced degrees. Individual departments may, subject to the approval of the Graduate Council, set higher grade requirements.

Advanced degree candidates may be required to register in courses primarily for undergraduates (numbered 1–999): these courses do not carry advanced degree credit. On occasion, however, and with approval of the student's department and the dean, a student may register for such a course with extra work for advanced degree credit. This course then has the same standing as a 1000-level course and an EX is noted on the transcript. This provision for extra work does not apply to courses of the level of 1–999 taken for graduate credit by students in MD program.

Course Performance Reports: Students, regardless of grade option selected, may request the instructor to complete a Course Performance Report. This request should be by the deadline specified in the Academic Calendar for the semester in which the course is being completed. The instructor may decline to complete such a form if it is believed he or she has inadequate information to do so. Particular consideration should be given to requests from students for whom the course is part of their concentration program or the course is taken on the S/NC basis. Copies of Course Performance Reports will be made available to: (1) the student, (2) the dean’s office, and (3) the student’s concentration advisor. While not part of the official record, Course Performance Reports may be sent out of the University at the student’s request along with an official Brown University academic transcript. In such cases, the student must provide copies of such CPRs to be enclosed at the time the transcript is initially requested.

Concentration Evaluations: Undergraduate students may request a written evaluation of performance in concentration, which will consist of the student’s own statement and an evaluation prepared by an appropriate faculty member. The following points may be included in such an evaluation: any special characteristics of the concentration program; information not on the student’s official transcript, such as the interest and motivation of the student, the probable capacity for more advanced work, the ability, and to conduct research, and so forth; and a comment describing the bases on which the evaluation was prepared. If the student elects to have a concentration evaluation prepared, the student’s statement and request for departmental evaluation should be submitted to the concentration advisor by the end of the first week of the student’s final semester. There is no specific form for concentration evaluations; faculty may use whatever format they choose.

Transcripts: Requests for transcripts must be made either in writing by completing a Transcript Order Form, or electronically. For further information please visit the Office of the Registrar’s website (http://www.brown.edu/Administration/Registrar). Transcripts will be issued only if all financial obligations to the University have been met.

An official transcript consists of a copy of the permanent record listing courses passed and grades received. A statement is added to all transcripts explaining the grading system and indicating that the student may elect to include other material with the official transcript. The student should choose this material in consultation with his or her advisor. The University will mail this material in one envelope along with the official transcript.

Examinations

A final, written examination (at the end of each semester) shall be given in each course numbered under 2000 unless the instructor of a particular course decides to use some other mode of final evaluation. If the written examination is not to be used, the mode of final examination which is to be used shall be made known to the students in the course no later
than midterm and, in addition, the department and the registrar shall be informed.

Final Examination Schedule: A pre-defined period at the close of each semester is provided for final examinations for those courses for which such an examination is scheduled. Two examination periods are scheduled for each day. The examination group is determined by, in most cases, the offering time associated with the course (indicated by the figure in parentheses) and also as displayed on Banner Web. The schedule for 2014-2015 is as follows:

Semester I, 2014-2015

<table>

Exam Excuses: The Office of the Dean of the College is solely responsible for determining whether a student’s absence from a final examination is excused. To ensure equitable treatment of all students, students are excused from exams only for family or medical emergencies or for religious reasons. Please note that students’ travel plans are never an excuse for missing a final exam. Faculty wishing to grant a student an exam excuse may contact the appropriate academic deans authorized to grant exam excuses. In emergency situations, students who are unable to contact their professors must contact the Office of the Dean of the College, which will determine whether or not an exam excuse is warranted. Course instructors are notified of exam excuses granted by the Dean of the College Office.

Consistent with Brown’s policy on nondiscrimination, students who are unable to take a final examination due to religious observance may arrange to take their final at an alternate time. Consultation is required with the course instructor, the Chaplain’s Office, and the Office of the Registrar, and the arrangements must be made by mid-semester. Students may obtain more information and an application for rescheduling a final due to religious observance from the Registrar’s Office.

Make-up exams for approved exam excuses are administered by the Registrar in the second week of the subsequent fall or spring term. The Registrar’s Office informs students by email of the date, time, and location of make-up exams.

Placement and Achievement Tests in Foreign Languages. Placement tests in the foreign languages are given during Orientation Program in the fall and during the first week of classes in each semester. All students, before taking college courses in a foreign language in which they have presented entrance credit, must take either a placement test at Brown University or, preferably, a College Board Language Achievement Test in secondary school. Students with outstanding performance on these tests, or on the Advanced Placement Tests of the College Entrance Examination Board, may be admitted to advanced courses without the usual course prerequisites.

Student Code of Conduct

Academic Code Violations

All cases of academic dishonesty among undergraduates, graduate, or medical students, as defined in the Academic Code at Brown University, shall be referred to the dean of the College, Graduate School, or Medical School, or his or her designated representative. A student accused of such an offense shall be notified in writing as soon as possible of the specific charge or charges against him or her before his or her case is considered. The student shall be given the opportunity of a hearing before the designated representative of the dean of the College, Graduate School, or Medical School, and two members of the faculty, at which all relevant facts may be presented. A student shall have the right to appeal any decision to the dean of the College, Graduate School, or Medical School within five business days after receipt of the official letter outlining the case and the decision reached. For definitions of offenses against the Academic Code, procedures, policies, and a list of penalties, see the pamphlet issued by the Office of the Dean of the College, Principles of the Brown University Community: The Academic Code and Non-Academic Disciplinary System.

Nonacademic Discipline

Brown strives to sustain a learning environment that supports individual exploration. Central to this effort are the four primary Principles of the Brown University Community: individual integrity, respect for others, respect for University resources, and respect for the values of teaching, learning and scholarship. Our community believes that adherence to these principles supports the overall academic mission of the University. Violations of these principles will be handled through the procedures governing the Academic Code and the Non-Academic Disciplinary Procedures. These procedures are designed to address behaviors that impede the educational activity of the University or that infringe upon the rights of others.

Non-academic disciplinary cases are administered by the Office of Student Life, the Peer Community Standards Board, and the University Disciplinary Council. Specific hearing procedures can be found online at www.brown.edu/randr. Printed copies of the Non-Academic Disciplinary Procedures are available from the Office of Student Life.
### Academic Calendar

#### Summer 2014

The College

Admission

In order to receive information about admission to the undergraduate college, please visit our website to register online: www.brown.edu/Admission. Requests for applications for admission to undergraduate study should be addressed to:

College Admission Office
Brown University
Box 1876
Providence, Rhode Island 02912
(401) 863-2378

The application deadline for the regular admission process is January 1 of the year of desired entrance to Brown. An early plan is available for students who wish to receive December notification. Early Decision candidates must apply as early in the fall of the senior year of high school as possible but in any case by November 1.

Subject Requirements

Brown’s commitment to fostering a liberal education assumes that a candidate for admission will profit most from pursuing a comprehensive college preparatory program. A strong background in English (both literature and writing), foreign languages, mathematics, science, and history will enable students to benefit from the intellectual opportunities offered by Brown University. Brown considers the programs listed below to be a desirable secondary school preparation.

**English**—four years with significant emphasis on writing, continued through the senior year;

**Mathematics**—at least three years of college preparatory mathematics, preferably continued through the senior year;

**Foreign Language**—at least three years, preferably continued through the senior year;

**Laboratory Science**—at least two years of laboratory science above the freshman-year level. Prospective science or engineering students should take both physics and chemistry, and as advanced a level of mathematics as possible;

**History**—at least two years, including American History;

**The Arts**—at least one year of study in music or art;

**Elective Subjects**—at least one year of elective academic subjects;

**Information Technology**—facility with computers is recommended for all applicants.

Exceptions may be made. The Board of Admission encourages the growth of innovative programs and welcomes applications from students of varying educational backgrounds who have shown outstanding intellectual promise. Exceptionally able students who are well-prepared to enter college before completion of secondary school may also be admitted, although such cases are unusual.

College Entrance Examination Board Tests

Each applicant must take the Scholastic Assessment Test (SAT Reasoning Test) and any two SAT Subject Tests of the College Entrance Examination Board no later than January of the senior year. Scores for the examinations administered through the American College Testing Program (the ACT) may be submitted in lieu of those of the College Board; the ACT with the Writing Test will serve as a substitute for the SAT requirements. It is the responsibility of each candidate to take the appropriate tests and to see that they are officially reported to the Board of Admission at The College by January 1 (or the January administration of the tests). A final decision on the application cannot be made until official scores have been received.

Advanced Placement Examinations

Brown participates in the Advanced Placement Program of the College Entrance Examination Board. The program’s aims are “to give able students challenging educational experiences in school, and to increase for these able students the opportunity to take advanced work in college.” Students enrolled in secondary schools participating in this program may take the appropriate examinations given in May and have the scores sent to the Office of the Dean of the College. Course credit and/or placement is determined by the appropriate academic department of Brown University, which may review the examination booklets and other materials. Policies on credit and/or placement vary from department to department. Students will be notified of such credit upon matriculation at Brown. Subjects in which course credit may be granted include American history, art history, biology, economics, European history, French, German, Latin, mathematics, physics, and Spanish.

Advanced Placement credits may not be applied to the minimum 30 courses needed to earn a Brown degree.

Advanced Standing for Work Done Prior to Entrance

Freshmen who have taken college courses at an accredited institution prior to matriculation at Brown may be considered for some advanced standing. Further, freshmen who have received certification under various international educational systems may also be considered for systems advanced standing. Questions concerning course credit and advanced standing should be addressed to the Office of the Dean of the College.

Course Credit and Advanced Standing

By the end of their fifth semester, students must declare to the Office of the Dean of the College whether or not they wish to use their A.P. and/or international examination credit to accelerate their graduation. To use credit for acceleration, students may request one semester of Advanced Standing (and enrollment credit) for 3–6 course credits or two semesters of Advanced Standing (and enrollment credit) for 7–10 course credits. Students not requesting Advanced Standing (and enrollment credit) from the registrar by this deadline may not do so subsequently, except by petitioning the Committee on Academic Standing.

Transfer Admission from Other Colleges

Only a limited number of transfer students can be accepted each year. A maximum of two years of study elsewhere is transferable; extension (in most cases) and correspondence courses are not transferable, nor are courses outside the realm of defined academic disciplines (nursing, radio electronics and/or broadcasting, or business administration, to name a few). Students who wish to be considered as transfer candidates should write or call The College Admission Office for additional information, application forms, and procedures.

Special and Visiting Students

Each year, a number of students enrolled at other colleges spend a semester or a year as “visitors” at Brown to pursue course work (toward credit at their own college) not offered at their own institution. Other students are accepted on a non-matriculated basis for a limited number of courses and are classified as special students.

Resumed Education Program

The Resumed Undergraduate Education program at Brown University enables a person who has interrupted his or her formal education for five or more years, or who is twenty-five years or older, to enroll as a full- or part-time student. Students who have not pursued post-high school education for some applicants have begun college work already; others have interrupted their education after completing high school. The Board of Admission for Resumed Education goes beyond the traditional bases of secondary school grades and college board scores in maturity, commitment, and future potential.

Interested people should write to:

The Resumed Undergraduate Education Program
The College Admission Office, Box 1876
Brown University, Providence, Rhode Island 02912
or call (401) 863-2378.
Requirements for Baccalaureate Degrees

Baccalaureate Degree Programs

At Brown, two baccalaureate degrees are awarded—the Bachelor of Arts (A.B.) and the Bachelor of Science (Sc.B.). The degree awarded is determined by a student’s chosen concentration program. All Brown undergraduates must complete the requirements for either an A.B. or a Sc.B. in order to earn the baccalaureate degree at Brown.

The Sc.B. degree recognizes a science concentration that demonstrates both breadth and depth in science beyond the minimum required for the A.B. degree in the same field. An Sc.B. program normally follows these guidelines:

1. The concentration program, with the exception of Engineering, shall require no more than ten courses in any one department. The total number of concentration courses required shall not exceed twenty (twenty-one for Engineering).
2. At least one semester course of independent study, research, or design in the concentration discipline must be included.
3. Additional electives must be chosen to meet the quantity requirement for all baccalaureate degrees. In cases where the student may successfully complete the Sc.B. degree on the basis of one concentration as well as an additional concentration associated with an A.B. degree, only one degree (Bachelor of Science) is awarded upon graduation. *See below for requirements associated with combined degrees.*

Degrees with Distinction

Baccalaureate degrees may be awarded with distinction (magna cum laude) to those students whose percentage of quality grades -- grades of "A" or "S with Distinction" -- in courses taken at Brown puts them in the top 20% of the entire undergraduate graduating class. The Registrar will provide an opportunity for students to indicate that they do not wish to be considered for a degree with distinction.

Quantity and Progress Requirements

In order to graduate with a Brown baccalaureate degree, a student must successfully complete at least 30 courses (equivalent to 120 semester hours), 15 of which must be taken at Brown. A maximum of 4 summer courses may be applied toward this requirement. Approved study at another institution may also count toward the 30-course degree requirement.

The standard semester course load at Brown is four courses. Full-time students are permitted to enroll in a maximum of five courses in a given semester; students may take three courses in a semester as long as doing so will not bring them below the level of good academic standing. A student may not enroll in fewer than three courses in any semester without written permission from a designated academic dean. Resumed undergraduate education students may study on either a part-time or full-time basis.

Residence Requirement

With the exception of students admitted to the Resumed Undergraduate Education (RUE) Program, every candidate for a baccalaureate degree must be in residence at Brown for at least four semesters as a full-time student. Credits from Brown Exchange programs, Brown Approved Alternative Study Abroad programs, and the Brown Summer School do not apply to the residency requirement. Students in the RUE Program must be in residence for the equivalent of four full-time semesters. RUE students may study on either a part-time or full-time basis. Every student must spend sufficient time in concentration studies to permit faculty evaluation of his or her concentration.

Writing Requirement

In order to earn a baccalaureate degree, all students must demonstrate the ability to write well. Learning to write well is a developmental process that occurs over time; Brown students are therefore expected to work on their writing across the four years, in their general studies and the concentration. Students may begin to fulfill this expectation by taking one or more WRIT designated courses, which require students to draft and revise writing assignments based on feedback about their prose. When they declare their concentration, students explain what writing they have completed at Brown and the writing they intend to do in the concentration. The University provides an online portfolio in which students may save examples of their best work each year. This evidence allows students to demonstrate their abilities not only to Brown advisors but also to future colleagues and employers.

All students are expected to communicate effectively in writing in all of their courses. If an instructor is concerned about a student's ability to write competently, he or she may contact the Associate Dean of the College for Writing, who will help the student identify a course in which the student may work on writing. Some students may be urged to complete a writing course when they first study at Brown; such cases are determined on the basis of materials students submit when applying for admission to Brown or during the summer prior to matriculation. Students with identified writing concerns who do not complete such a course satisfactorily and/or are judged by the dean to be incompetent in writing will be refused registration by the Committee on Academic Standing until they demonstrate that they can meet University standards for written communication.

Concentration Requirement

An academic concentration is the focal point for a student's undergraduate educational experience at Brown. It is an in-depth study centering on a discipline or disciplines, a problem or a theme, or a broad question. Concentrations aid intellectual development by encouraging conceptual and methodological study on a sophisticated level. A concentration may coincide in some ways with specific prerequisite training for professional goals, but professional training is not the central aspect of the concentration process. Rather, the concentration is designed to foster students' command of an area of knowledge and ability to use a concentration's concepts and methods in a coherent manner.

Brown offers standard concentrations that lead to either the Sc.B. or the A.B. degree. In keeping with the philosophy of the open curriculum, students may design an independent concentration if standard concentration offerings do not match their interests. Independent concentration proposals are sponsored by at least one faculty member and must be reviewed and approved by a subcommittee of the College Curriculum Council.

A listing of departmental and interdepartmental concentration programs that are currently available may be found at: http://www.brown.edu/academics/college/concentrations/. The programs have been approved and are subject to periodic review by the College Curriculum Council. Guidelines for preparing an independent concentration proposal are on the Dean of the College website.

All students must request, in writing, admission to a concentration program no later than the middle of their fourth semester, before pre-registering for semester five (usually spring semester of sophomore year). The written proposal should outline the student's major objectives in choosing the concentration, while also listing the specific courses to be taken. This proposal functions as a kind of contract, and is signed jointly by the student and the concentration advisor for the relevant department or program. Once the contract has been signed, the departmental concentration advisor becomes the student's advisor for the remainder of his or her time at Brown.

Students may complete as many as three concentrations during a regular four-year program; Brown does not offer minors. A student who satisfactorily completes more than one concentration program may have that fact indicated on his or her permanent record. In order to accomplish this, the student must have filed a declaration form for each concentration by the end of the pre-registration period in the student's seventh semester. Sponsorship and authorization of each concentration program shall follow the usual procedures.

No student will be permitted to register for his or her fifth semester unless a declaration of concentration has been filed. Students failing to complete registration on time because of the failure to file a concentration declaration will be subject to the same action taken by the University for all cases of late registration (see Financial Information (p. 645)).
Honors in the Concentration: Students whose work in the field of concentration has demonstrated superior quality and culminated in an honors thesis of distinction are awarded departmental honors at Commencement. The designation “Honors” is included on the student’s transcript and diploma. No distinctions are made among quality levels of honors work. Students considering honors work should consult their departmental, interdepartmental, or independent concentration advisor.

Recommendations for honors are due in early May preceding Commencement. Brown does not grant honors retroactively. Therefore, students who consider taking a grade of Incomplete in a thesis project should understand that they will not receive honors unless the thesis is completed in time to be evaluated by faculty readers and a recommendation submitted before graduation.

Enrollment Requirement
By decision of the Corporation, prior to the awarding of a baccalaureate degree each student is required to accumulate eight semesters, or 32 units, of enrollment credit. The eight-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.)

Requirements for Combined Degree Programs
Combined A.B./Sc.B. Degree
Students who wish to earn a combined A.B. and Sc.B. degree may do so in a five-year program in which work for both degrees proceeds concurrently. Students who elect this five-year plan will usually arrange their programs of study so that they may change to either degree candidacy alone prior to the fourth year.

Requirements for this degree program are as follows:
• Declaration of intent. A formal application approved by the appropriate dean must be filed with the Registrar no later than the student’s fifth semester of study.
• Satisfactory completion of the Sc.B. requirements for a standard concentration program in the life sciences, physical sciences or mathematics, or an approved independent Sc.B. program spanning one or more of these areas.
• Satisfactory completion of the A.B. requirements for a standard or independent concentration in the humanities or social sciences.
• A minimum of 38 courses passed. Transfer credits are awarded according to the University’s standard rules and regulations.
• At least three years in residence.
• Ten semesters, or 40 units, of enrollment credit. At least six of the ten semesters must be completed in residence at Brown. The ten-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.) (Note: The Brown Corporation has enacted a provision allowing students in the five-year A.B.-Sc.B. program who complete all academic requirements in nine semesters to terminate their studies at that point, provided the Committee on Academic Standing (CAS) approves the breadth and quality of the student’s program. In that case, the enrollment requirement will be reduced to nine semesters. This provision is subject to review by the Corporation’s Academic Council.)

Concurrent Program Leading to a Baccalaureate Degree and a Master’s Degree
Subject to the prior approval of the department involved, the Graduate Council, and the Committee on Academic Standing, exceptionally capable students may be permitted, in their junior year, to enter a graduate program of study leading to the earning of both baccalaureate and master’s degrees at the end of eight or nine semesters. Students who are granted this permission complete a minimum of 34 courses within eight or nine semesters. Specific requirements for both degrees must be met, although some courses may be used for credit toward both degrees. Normally, no more than two courses counted toward the undergraduate concentration may be used to fulfill the requirements of the graduate degree. The program includes at least two 2000-level courses, not including any 2000-level courses counted for the independent project or thesis.

In cases where the requirements for an advanced degree are partially completed by students in meeting the requirements for a baccalaureate degree, graduate credit for such work may be allowed upon formal admission to the Graduate School. The Graduate Council shall, in consultation with the department involved, determine the remaining requirements to be satisfied for the advanced degree.

The Committee on Academic Standing follows certain guidelines in considering requests for admission to this combined degree program. Interested students should obtain a copy of these guidelines at the Office of the Registrar prior to filing an application.

Integrated Five-Year Baccalaureate–Master’s Degree Program
With the approval of the Graduate Council, academic departments may establish integrated programs leading to the successive awarding of the bachelor’s and the master’s degrees. In such programs, a student may offer up to two courses taken during undergraduate study at Brown in partial fulfillment of the requirements for the master’s degree. In all cases, the equivalent of at least six semester courses must be taken in-residence at Brown University.

A student must apply for admission to an integrated program no later than the end of the third week of his or her penultimate semester of undergraduate study. Admission to the Graduate School for the fifth year must be decided on in the regular way. Students interested in this program should consult with the Associate Dean for Academic Affairs in the Graduate School.

Brown-Rhode Island School of Design Dual Degree Program
In this five-year program, students complete a baccalaureate degree at Brown and a Bachelor of Fine Arts (B.F.A.) degree at RISD. The Brown degree earned by students in the program will ordinarily be an A.B. degree. Earning a Bachelor of Science degree is not prohibited, but doing so is difficult because Sc.B. programs are more credit heavy than A.B. programs. For this reason, permission to pursue an Sc.B. in this program is granted on a case-by-case basis. The RISD degree will in all cases be a bachelor of fine arts (B.F.A.) degree. Other degrees offered at RISD ordinarily take five years and thus are excluded from the program.

To gain admission to the program, students must apply to and be admitted by both schools. Because of the program’s strict requirements, only students applying to enter as first-year students are eligible. Approximately 15 students matriculate in the program each year. Once admitted to the program, students must complete 156 credit hours, at least 60 of which (15 courses) must be taken at Brown. This requirement does not include courses earned on Brown sponsored exchange or approved study abroad programs nor Brown summer session courses.
Program in Liberal Medical Education

Each year, Brown's Program in Liberal Medical Education (PLME) matriculates approximately fifty first-year students who will pursue an undergraduate degree and professional studies in medicine in a single eight-year program. As undergraduates, PLME students may choose to work toward an A.B. or Sc.B. degree in the sciences, or toward an A.B. in the humanities, social sciences, or behavioral sciences. The undergraduate experience is designed to prepare students for the last four years of the program, which constitute the medical school years and culminate in the MD degree.

To apply to the PLME program, students submit the standard Brown application. Candidates considered admissible by the College Admission Office are reviewed by the PLME Advisory Board. Applicants not admitted to PLME are still considered candidates to the College for the Bachelor of Arts or Bachelor of Science degree.

Academic Advising Programs

A strong network of advisors and mentors helps students engage fully and successfully with Brown's open learning environment. Brown's advising programs are designed to facilitate these relationships and provide students with maximum opportunity to formulate and achieve their educational objectives. Students are expected to take the initiative in seeking out and working with advisors to make the best use of their time at Brown.

To ensure that students have the guidance and support they need to make informed choices, the University assigns each first-year student two advising partners: an academic advisor. The academic advisor provides a long-term institutional perspective on educational options while generally informing, sometimes encouraging, and occasionally challenging students. The student Meiklejohn provides an experienced perspective on the ins and outs of course registration, course reputations, prerequisites, and the like.

As first-year students transition to the sophomore year, they are encouraged to stay with their first-year advisors so that they can benefit from the continuity and depth of a two-year advising relationship. Most do stay with the same advisor, although some select a different faculty member or administrator. The efforts of assigned sophomore advisors are augmented by Randall Advisors and Sophomore Deans in the Dean of the College Office. These advising resources constitute the foundation of "sophomore advising" at Brown and help students navigate the critical second year of undergraduate study.

Students declare a concentration in their fourth semester of study. Concentration advisors help with this process by explaining the dimensions of their academic disciplines, reading and providing feedback on students' concentration declaration essays, and advising students during their final two years at Brown. Faculty of individual departments and programs that administer concentrations often serve as informal advisors to their concentrators.

Students in all four years can interact informally with advisors over coffee or tea in Advising Central, located on the second floor of J. Walter Wilson. Academic deans and Faculty Advising Fellows hold office hours in Advising Central every weekday afternoon. Faculty Advising Fellows (FAFs) are experienced academic advisors who are interested in students' lives both in and outside the classroom. By directing students to Brown's many programs and resources, FAFs can help first years, sophomores, juniors, and seniors make the most of their college experience.

A broad network of academic, co-curricular, and personal counseling complements the work of assigned advisors and faculty fellows. Throughout the year, deans in the College and in the Office of Student Life provide one-on-one consultation to all students who request it. Additional support is available from the Tutoring Program, the Curricular Resource Center, the Sarah Doyle Women's Center, the Third World Center, the Career Development Center, the professional staff in University Health Services, and the chaplains. Peer advising groups include Brown's Meiklejohn advising program, residential peer leaders, minority peer counselors, Career Center peer counselors, pre-med peer counselors, and athlete peer advisors.

Academic Support Services

A number of programs support undergraduates' academic success and help them take full advantage of the curriculum.

- The Office of Co-Curricular Advising and Tutoring organizes academic coaching, group tutoring, and individualized tutoring. Group tutoring is offered for select courses in chemistry, economics, math, and physics. Individual tutoring is available by application.
- The Curricular Resource Center provides advising, facilitation and reference materials for students wishing to design their own courses (ISPs and GISPs), to craft independent concentrations, and to explore options for time away from Brown.
- Disability Support Services coordinates and facilitates services for students, faculty, and staff with physical, psychological, and learning disabilities.
- The Math Resource Center assists students in introductory mathematics courses.
- The Science Center offers academic support, tutoring, science-related activities, and a network of faculty and peer advisors familiar with Brown's science curricula. Through various events and workshops, the Center works to increase the Brown community's understanding of science.
- The Writing Center provides individual and group writing support to any member of the Brown community. Writing Center staff members help students with all stages of the writing process, from finding a topic through drafting, revising, and final editing. Writing Center associates also offer workshops for groups of students on various writing topics.

Academic Standing

The Brown Faculty and Corporation set the minimum standards students must meet in order to earn the baccalaureate degree. Undergraduate students are normally expected to take 4 courses each semester for a total of 32 courses in 8 semesters and will ordinarily complete 8 courses in every 2 consecutive semesters. Students must complete a minimum of 30 courses in 8 semesters. (Successful completion means a course completed with a grade of A, B, C, or S.)

To remain in good academic standing, Brown students must satisfactorily complete at least three courses by the end of the first semester; seven courses by the end of the second semester; eleven courses by the end of the third, fifteen by the end of the fourth, eighteen by the end of the fifth, twenty-two by the end of the sixth, twenty-six by the end of the seventh, and thirty courses to graduate after eight semesters. In addition, students making satisfactory academic progress will complete a minimum of seven courses in any two consecutive semesters. Academic standing is determined only on the basis of courses completed at Brown. Transfer credit, Advanced Placement (A.P.) credit, and summer credit earned away from Brown do not figure in the determination of academic standing.

Undergraduates who, in the judgment of the Committee on Academic Standing, have unsatisfactory scholastic records may be placed in one of three categories—Academic Warning, Serious Warning, or Academic Suspension—which include a permanent transcript notation. The Committee's judgment will depend on the extent of a student's academic deficiency as defined by rules approved by the Faculty on February 5, 1991:

Academic Warning cautions a student that his or her record is below the standard for graduation.

Serious Warning notifies a student that, unless the record improves, he or she will be subject to academic suspension at the end of the semester.

Academic Suspension may be ordered when the Committee finds that a student's academic record falls more than two credits below the number expected for the student's semester level.

Students on Academic Warning and Serious Warning are required to obtain special academic advising from an assigned dean.

Guidelines for Study Elsewhere

Students who wish to transfer credit for study completed at other four-year institutions may do so with prior approval of the appropriate departments.
and the Committee on Academic Standing (CAS). The rules governing transfer credit for study away from Brown are complex. One set of rules governs study abroad; another applies to study away in the U.S. Yet another set of rules applies to summer study transfer credits. This section describes the policies and procedures that are most commonly called into play when matriculated students wish to have credits from elsewhere added to their Brown transcript.

Students may receive up to eight course credits for work undertaken during one academic year. In a semester credit hour system, one Brown course is considered the equivalent of one quarter-hour course. In a quarter credit hour system, one Brown course is considered the equivalent of six quarter hours. For that reason, the number of course credits received for study away from Brown may not be equal to the number of courses taken. For example, a student taking three four-semester-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of three Brown course credits. However, a student taking three four-quarter-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of two Brown course credits. It is the student’s responsibility to clarify in advance any concerns regarding the amount of transfer credit that may be awarded.

In order to be considered for transfer credit, courses must be completed with a grade of C or better, and an official transcript must be received by Brown’s Office of the Registrar from the host institution. This transcript will be retained by the University. All transfer credit must receive faculty and Committee on Academic Standing approval. Students should also keep all records from their work away, including: course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from an academic department at Brown.

The Brown transcript will indicate the name of the host institution, the time period during which the student studied there, as well as the courses taken and/or unassigned credits at Brown. In the case of Brown sponsored exchange and approved study abroad programs during the academic year, all course work is reflected with the actual course title and a grade of ‘S.’ Students applying to graduate and professional schools are often asked to provide official transcripts from all institutions at which they have been enrolled. In such cases, the student will need to request copies of their transcripts from the study-away institution.

Study Away in the U.S.

Students planning to study elsewhere in the United States should obtain an instruction sheet and a preliminary transfer credit approval form from the Dean of the College website. Students should then work out a program and present it to their concentration advisor and/or other appropriate faculty members for approval. When the preliminary transfer credit form is returned to the study away dean, that dean will approve it on a tentative basis for the University. All transfer credit must receive faculty and Committee on Academic Standing approval. Students should also keep all records from their work away, including: course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from an academic department at Brown.

Study Away during the Summer

Two avenues of study are available to undergraduate students interested in summer work. They may take courses in Brown’s Summer School, or apply for transfer credit from other summer programs—either domestic or international—that meet certain conditions. Whether studying in the U.S. or abroad, students must study at accredited, degree granting, four-year institutions. Extension division courses are generally not allowed. Students should obtain preliminary approval for summer study away from Brown by the Committee on Academic Standing and appropriate faculty members.

Students may count as many as four summer courses from all sources (or their equivalent, if summer courses carrying fewer than 4 credits were transferred to Brown) toward the baccalaureate degree. No more than the equivalent of two Brown courses will be transcripted for any given summer of enrollment. Summer transfer credit may not be used to advance a student’s date of graduation, nor will it figure in the determination of academic standing. Students interested in summer study elsewhere should consult staff in the Dean of the College office or the Office of International Programs (OIP), as appropriate.

International Study

Brown’s Office of International Programs (OIP) coordinates all study abroad undertaken by Brown students either on Brown sponsored programs or on Brown approved programs. At present, Brown sponsors programs in France, Spain, Cuba, Czech Republic, Italy, Germany, Denmark, Sweden, The United Kingdom, Tanzania, Japan, Barbados, Brazil, India. Students interested in study abroad should check with OIP as far in advance of any intended study as possible. Brown students of any nationality are not allowed to study abroad in countries where there is a travel ban by the U.S. State Department.

The College Curriculum Council (CCC) has established the following guidelines for study abroad by Brown students:

To receive credit for international study, students must spend at least one semester enrolled in an international institution of higher learning, subject to the same rules and regulations as the host institution’s regular students. There are two exceptions: where the language of study is one in which sufficient proficiency is unlikely to be achieved by the average Brown undergraduate, but the student should study the language while in the country; and where the usual assessment procedures may not be appropriate, in which case special arrangements may have to be made. Students may not study on itinerant programs (i.e., those which travel through many sites rather than being based in one primary site). Nor may they study at institutions created for overseas study for Americans, with special exceptions: for study of a specific area and/or field research unavailable at Brown or better pursued at an international site OR in sites where “the average Brown student” cannot study alongside local students because of the language, e.g., Keio, Denmark, Sweden, Czech Republic. Exceptions include Syracuse-in-Florence, for art history students; ICCS in Rome for classics students; programs that provide a structured “field studies” curriculum appropriate for students in such fields as development studies, environmental studies, ecology, geological studies, etc.; and programs providing for studies pursued at Brown but often not found in regular university programs overseas, such as studio art or theater arts. Prerequisites for such programs will be stated and must include previous course work pertinent to the intended study abroad.

International Study and Brown Curriculum

International study should complement the student’s program of study at Brown. This should be ascertained by the Office of International Programs (OIP) in consultation with the CCC subcommittee on International Study, the Committee on Academic Standing (CAS), and regional advisory committees.

Non-Brown programs

Brown’s Office of International Programs works closely with key academic departments to develop a list of programs approved for international study. This list includes all Brown-sponsored programs and programs administered by institutions other than Brown in each region. All such programs should conform to the above guidelines for international study. Students do not need CAS approval for study on these programs. The list will be reviewed every two years, and any new Brown-sponsored programs are added immediately.

For Programs Not on the List

Students may petition for approval to study on other programs but should be sure to check the international study guidelines to see if the proposed program meets the criteria. Grounds for exceptions include: the desire to study in a country where there is no approved program; or the desire to study at an institution known for excellence in a specific field. Students must submit a written rationale, a tentative list of courses, and a supporting statement by a faculty member who is familiar with the program or who has expertise in the field of study being pursued. The proposal will be evaluated by the appropriate regional committee; CAS will make the final decision.

OIP reports annually on petition actions to the CCC subcommittee on international study.

Students planning to study abroad must be in good academic standing. They must be able to demonstrate competency in a foreign language, if one is involved in the international study opportunity. Brown program
Curricular Programs

Diverse Perspectives in Liberal Learning

Brown’s open curriculum challenges students to open their perspective on the world by embracing new experiences, new ways of thinking, and new people. One way students can address this expectation is through challenging coursework. Diverse Perspectives in Liberal Learning courses offer students the means not only to understand the complex dynamics of social inequity, exclusion, and difference but also to do something with what they learn.

Through content, methodology, or pedagogy, DPLL courses seek to:
- Expose and critique the diverse historical and cultural forces that shape the construction of knowledge in all disciplines;
- Teach the arts of critical reflection: questioning thoughtfully, listening openly, and speaking cogently about differing points of view;
- Develop responsible citizens by examining the ways that power and privilege affect human lives and providing pathways to meaningful change.

Some DPLL courses may, through their content, focus on questions of race, nationality, ethnicity, sexuality, religion, gender, age, disability, or socio-economic status. Others may employ creative methods to investigate how knowledge is constructed and received in different contexts. Still others may feature community-based activities, encouraging students to become agents of change both locally and globally.

A complete list of each semester’s DPLL courses may be viewed in the Brown Course Search by choosing “Diverse Perspectives in LL” in the Curricular Programs field.

First Year Seminars

First-year seminars ensure close contact between first-year students and faculty members while simultaneously offering a rigorous introduction to the concepts and methods of a particular subject area or department. Seminars have few if any prerequisites and are offered in all areas of the curriculum, from anthropology to physics to literary arts. Students receive regular feedback on the work they produce for the seminars, and seminar faculty often serve as informal mentors for their students long after the class has ended.

A complete list of each semester’s seminars may be viewed in the Brown Course Search by choosing “First-Year Seminars” in the Curricular Programs field. Registration for first-year seminars takes place during the summer prior to students’ matriculation to Brown. Depending on availability, first-year students may also add seminars to their course schedules during pre-registration and shopping periods.

Liberal Learning

The Liberal Learning course list was created to assist students in planning a course of study consistent with the goals of a liberal education. These courses, which are an established part of the Brown curriculum, emphasize synthesis rather than survey and focus on methods, concepts, and values. Reflecting Brown’s conviction that liberal education requires active student involvement, Liberal Learning courses entail extensive student participation through papers, projects, reports, and class discussion.

A complete list of each semester’s LILE courses may be viewed in the Brown Course Search by choosing “Liberal Learning” in the Curricular Programs field.

Writing-Designated Courses

Brown students are expected to work on writing in their general studies and in the concentration. Students may begin to fulfill this expectation by taking at least one course that carries the WRIT designation. WRIT courses are offered across the curriculum and help students develop the ability to write well in styles appropriate to different academic disciplines.

A complete list of each semester’s WRIT courses may be viewed in the Brown Course Search by choosing “Writing-Designated Courses” in the Curricular Programs field.

The Summer Session

Brown’s Summer Session offers courses on campus and at international sites during the summer. Summer classes meet for six weeks; exams and final work are completed during the seventh week of the program. Brown students take summer courses to enhance their degree work or to maintain their progress toward degree completion. Summer Session courses are open to all Brown students and to students from other institutions by application.

Governed by Faculty Rules, Brown’s Summer Session maintains guidelines that are similar to those followed during the academic year. The courses are equivalent to academic year offerings, are approved by the College Curriculum Council, and, as of summer 2000, count toward official determination of academic standing.

Brown undergraduates may complete up to two courses in any given summer, and may apply a total of four summer courses toward their bachelor’s degree. Brown Summer Session courses at the 1000-level may count toward graduate degrees. A special Corporation rule allows undergraduates who have completed four Summer Session courses at Brown to request one semester of enrollment credit (Note: This provision does not extend to students enrolled in the Five Year Brown-RISD Dual Degree Program). Undergraduate fees for summer courses are set annually by the Corporation at a rate lower than the per-course fee during the academic year.

For more information, contact Brown’s Office of Continuing Education, Box T, Providence, RI 02912 (401) 863-7900, or visit www.brown.edu/ce.

Each year’s Summer Session calendar is posted on the Brown Registrar’s web site, www.brown.edu/Administration/Registrar/, as well as at the site above.

The Graduate School

The Graduate School oversees graduate education at Brown University, which prepares students for distinguished careers in research, teaching, and as experts in the public and private sectors. Master’s students are trained to assess information and trends in their fields and to create original works. Doctoral students perform research at the highest level, advancing knowledge in their fields.

The rigors of research, analysis, debate, performance, and publication prepare our graduates to help solve local, national, and international problems.

Brown University offers more than 70 graduate programs through the Graduate School. Brown has a friendly scale and collaborative culture. With nearly 2,000 graduate students and more than 700 full-time faculty members, Brown offers exceptionally close mentoring in its doctoral and terminal master’s programs.

The Graduate School website (http://www.brown.edu/academics/gradschool) serves as the primary source of information on doctoral programs (http://www.brown.edu/academics/gradschool/phd-programs) and master’s programs (http://www.brown.edu/academics/gradschool/masters-programs) including a distinct page (also contained with this Bulletin) for each program in terms of application and completion requirements. The Graduate School website also explains the general application (http://www.brown.edu/academics/gradschool/application-information) process as well as provides the link to the online application.

Information on general rules and regulations are detailed on the Graduate School (http://www.brown.edu/academics/gradschool/academics/rules-regulations) site. The Graduate School Handbook, dissertation guidelines, and master’s thesis guidelines can all be found in that section. Additional regulations with regards to overall requirements and tuition regulations can also be found on the Office of the Registrar’s website.
The Division of Biology and Medicine

The Division of Biology and Medicine is home to five academic departments, fourteen clinical departments, and is affiliated with seven diverse teaching hospitals (http://brown.edu/academics/medical/about/hospitals) in and around Providence. At the Division’s core is the Warren Alpert Medical School and the five academic departments in Biology (which includes study at the undergraduate and graduate levels).

For more information on Brown’s many research centers, institutes, programs, and other initiatives in the health and life sciences found within the Division of Biology and Medicine, please visit http://biomed.brown.edu/research/cip.

For further summary information on the academic units within the Division, please follow the below links:

The Warren Alpert Medical School of Brown University

Dean
Jack A. Elias

Admissions

Students interested in the study of medicine at the Warren Alpert Medical School of Brown University may apply through a variety of admission routes designed to create a highly qualified and diverse medical student body.

The majority of the 120 matriculants in the first-year class apply through the American College Application Service (AMCAS). Approximately (40%) of the first-year class enroll from Brown’s eight-year combined Bachelor’s-medical degree Program in Liberal Medical Education. These students are joined by students entering through special programs at institutions with which the medical school has formed linkages (postbaccalaureate and early identification). These admission routes are described below.

AMCAS Admission

Qualified students or graduates of accredited colleges or universities in the United States or Canada may apply to Alpert Medical School (AMS) through the AMCAS route. Individuals must first complete and submit the electronic AMCAS application, found on the website of the American Association of Medical Colleges (https://www.aamc.org), and indicate that they wish to apply to the Warren Alpert Medical School of Brown University. Applicants must also complete a web-based secondary application (forwarded by AMS Office of Admissions) and submit an application fee to be considered an eligible candidate for admission.

The AMCAS applicant pool for the most recent entering class (MD 2016) was competitive, with over 3300 applicants vying for 57 seats (of 120). The applicant pool was impressive in geographic scope and size, including residents of 49 states, the District of Columbia, the Commonwealth of Puerto Rico, and a number of foreign countries (predominantly Canada, China, and South Korea).

Additional information and related admission requirements may be found at http://www.brown.edu/academics/medical/admission. The Office of Admissions may be contacted by email (MedSchool_Admissions@brown.edu) or telephone (401) 863-2149. Letters and other correspondence should be mailed to the Office of Admissions, Box G-M, Brown University, Providence, RI 02912-9706.

Program in Liberal Medical Education (PLME)

The Program in Liberal Medical Education is an eight-year continuum of liberal arts and medical education leading to both the bachelor’s and M.D. degrees. The PLME is open to high school graduates who have applied to and are simultaneously admitted to Brown for their undergraduate studies.

The PLME seeks highly qualified and strongly motivated high school students who are committed to a career in medicine at an early age and who also wish to pursue another area of academic interest to an advanced level of scholarship within the framework of a broad liberal education.

From a large (approximately 2,000) and highly qualified applicant pool, roughly 50 students matriculate annually. For additional information regarding the PLME, access the website at http://www.brown.edu/academics/medical/plme/or contact the College Admission Office, Brown University, Prospect Street, Providence, RI 02912-9706; (401) 863-2378.

Postbaccalaureate Linkage Programs

The Postbaccalaureate (PB) Linkages are cooperative ventures between Alpert Medical School and the Premedical PB Programs at Bryn Mawr College, Columbia University, Johns Hopkins University, and Goucher College. Postbaccalaureate students enrolled in these programs may be offered admission to the medical school during the spring semester of their first year of study, thus allowing them to enter the medical school in the next class.

Selection occurs by a nomination process in which the premedical advisor selects candidates meeting established eligibility criteria (e.g., age, postbac grade point average). The number of PB students in each medical school class depends upon the number of places available as well as the caliber of the applicant pool. PB students nominated for admission must apply to AMCAS and complete an AMS secondary application. The MCAT is not required for admission. Timelines for this process are distributed to PB Program Directors on a yearly basis. Completed applications are reviewed by a subcommittee of the Admissions Committee, which selects nominees for interviews. The interviews follow the same protocol as that for AMCAS applicants and the same evaluation form is used.

The Early Identification Program (EIP)

The Early Identification Program (EIP) provides selected students at cooperating institutions with a place at Alpert Medical School upon continued academic progress and college graduation. This route provides opportunities for a medical career to two groups:

- Rhode Island residents enrolled at Providence College, Rhode Island College, and the University of Rhode Island; and
- Students enrolled at Tougaloo College, a historically black, liberal arts institution in Mississippi.

Eligible students are identified by their premedical advisor in the sophomore year of college, participate in selected PLME activities, and enroll in medical school after receiving the bachelor’s degree. Generally, up to two students may be admitted annually from each school. For more information and application procedures, please contact the premedical advisor at the participating institutions. For more information access the website at http://www.brown.edu/academics/medical/admission/special-programs/special-programs. Brown University admissions/special-programs/special-programs://www.brown.edu/academics/medical/admission/special-programs/special-programs

Definition of Rhode Island Residency for Medical School Admission

An individual is considered a Rhode Island resident if he or she graduated from a Rhode Island high school and if the individual’s parent(s) have lived in Rhode Island for the previous two calendar years, as documented by federal tax returns. For dependent students, the custodial parent(s) must claim the student as a dependent on his or her federal tax returns for the prior two years. Individuals who are independent (i.e., not living with parents and filing individual federal tax returns for the previous two years) must have at least one parent residing in Rhode Island for the previous two years, as documented by federal tax returns.

Selection Factors

Students admitted to Alpert Medical School must attain competence in the sciences basic to medicine at a sufficient level to provide adequate preparation for medical school. Applicants are expected to demonstrate competence by successfully completing the following premedical course requirements at a college or university in the United States or Canada: one semester of organic chemistry; and two semesters of physics, inorganic
chemistry, and social and behavioral sciences. The Medical College Admission Test (MCAT) is required for AMCAS route applicants. All applicants are selected on the basis of academic achievement, faculty evaluations, evidence of maturity, motivation, leadership, integrity, and compassion. For the PLME, Brown seeks highly qualified and strongly motivated students who wish to pursue an area of academic interest to an advanced level of scholarship within the framework of a liberal premedical education.

In order to be eligible for consideration, candidates must present a minimum cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken as a matriculated student at an undergraduate college. Applicants who have attended graduate school must achieve a cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken in graduate school. Applicants must have completed requirements for the baccalaureate degree before matriculating into the medical school. All applicants must be capable of meeting the competency requirements expected of all graduates. Technological compensation can be made for some disabilities in certain competency requirements. Candidates accepted for admission who will need special accommodations cannot be admitted unless those supportive services are available, as determined by the Dean of Medicine and Biological Sciences. The processes for assessing whether applicants will be able to meet the competency requirements for the M.D. degree are described in Technical/Standards for Medicine, listed below.

In keeping with the mission of Brown University, the office of admissions recognizes the importance of diversity to the success of the medical school. Dimensions of diversity include, but are not limited to race, ethnicity, religious affiliation, gender identity, sexual orientation, veteran status, age, socioeconomic status and geographic background. Multicultural perspectives enrich educational understanding, improve outreach to the community, enhance trust and communication, and facilitate development of culturally appropriate clinical and research programs.

Technical Standards for Medicine

Process for Assessing Whether Applicants Meet Technical Standards for Medicine:

1. No inquiry will be made on the application forms concerning disability. Brown's policies regarding technical abilities and skills necessary to meet the competency requirements are included with the letter of admission, and students are asked at that time to contact the Associate Dean for Medical Education if they have any concerns about their ability to meet these standards.
2. Applicants who are identified as having a disability through volunteered information, supporting credentials, or interviews will have an assessment of their ability to meet competency requirements only after a determination is made of their admissibility to the medical program.
3. Those applicants with disabilities deemed admissible to the Medical School will be requested to have submitted on their behalf appropriate documentation in regard to the disability from a qualified health professional. The health professional will be asked to provide an opinion on the candidate’s ability to meet the competency requirements for the M.D. degree. The applicant may also be requested to respond to that question.
4. The responses will be submitted to a committee appointed by the Dean of Medicine and Biological Sciences. This committee may ask for a review of the supporting documentation by appropriate members of the faculty in regard to the applicant's meeting the competency requirements. The committee will ascertain what accommodations, if any, the medical program would need to make in order that the applicant might be able to meet the competency requirements, and assess the feasibility of any needed accommodations.
5. The committee will review the information received to determine if the applicant will be able to meet the competency requirements, with reasonable accommodations on the part of the medical program, if necessary.
6. The committee will recommend to the Dean of Medicine and Biological Sciences acceptance of applicants who can meet the competency requirements or will recommend nonacceptance if they cannot.

Process for Assessing Student’s Ability to Continue in the Medical School Should Disability Occur After Matriculation at Brown University:

1. A student who develops a disability after matriculation at Brown University may be identified to the Medical Student Affairs Office through a variety of sources, e.g., reporting of accident or illness by peers, family, friends, or faculty and subsequent follow-up with health professionals managing the care.
2. If the degree to which the student has become disabled raises questions related to meeting the competency requirements after a review by the Associate Dean for Medical Education, a meeting of an ad hoc committee will be set up to discuss the situation. The student will be asked to meet with the committee members, unless the disability is so severe that the student needs to be represented by another individual. In some cases, it might be more appropriate to have a health professional, not directly involved in the care, serve as a consultant to the committee on the issues surrounding the disability.
3. The ad hoc committee will develop a recommendation as to the student’s ability to successfully pursue a medical education based on his or her ability to meet the competency requirements of the medical program. These educational accommodations will be discussed with the appropriate course directors to be certain that there is agreement on how the student will be managed. If facilities accommodations are recommended, the committee will discuss these with the appropriate individuals to be certain that the needs for the disabled student can be provided. The committee’s recommendations will be discussed with the student or his or her representative in the event that the student cannot attend.
4. When the recommendation is that the disabled student can meet the medical program’s competency requirements, the committee will develop a report on any educational program accommodations that, if made, will still meet the competency requirements.
5. Should the decision of the committee be to recommend to the dean that the student be dropped from enrollment in the medical program, due process appeals mechanism will be in effect, and the Student Affairs Office will work with the individual as appropriate on potential alternative career options. For students in the Program in Liberal Medical Education continuum, being dropped from the program due to inability to meet competency requirements for medical education does not necessitate the withdrawal of the student from the undergraduate college if that phase of the student’s education has not been completed.

Advanced Scholarship

Medical students who wish to earn an advanced degree (M.A., Sc.M., M.P.H., Ph.D.), must meet the requirements of the Graduate School. Numerous academic departments at Brown offer graduate programs. All graduate studies are carried out under the supervision of a faculty member of a graduate program at Brown University and are subject to the specific requirements of that program in addition to the general guidelines given below. Students should discuss their interests and goals with a director of a graduate program in planning any study that might lead to an advanced graduate degree.

Educational Programs

Program in Liberal Medical Education

The Program in Liberal Medical Education (PLME) offers a unique opportunity to combine undergraduate education and professional studies in medicine into an eight-year program. The PLME is not an accelerated medical program. Rather, it encourages students to take advantage of the breadth of a liberal arts education, to
take charge of their education, and to become active learners. At Brown, creative students need not sacrifice the benefits of a rich liberal arts education in order to gain admission to medical school.

The PLME provides great flexibility in curriculum planning. During the early years, students take courses related to their chosen concentration and to obtain a broad liberal education. In addition, students take courses designed to meet the competencies required for admission to Alpert Medical School. This begins with courses in the natural, social and behavioral sciences, and mathematics, which provide a foundation for later medical science and clinical courses.

Students may choose to work towards an A.B. or Sc.B. degree in the sciences, or to fulfill the requirements for an A.B. in the humanities, social sciences or behavioral sciences. Several interdisciplinary concentrations such as Public Policy and International Relations are also available. The expected duration of the program is eight years. The last four years of the program culminate in the M.D. degree.

Brown’s entire faculty is available to PLME students. This access to faculty throughout the University fosters collaborative teaching and research among scholars and students from widely divergent disciplines. Although the program is characterized by the unique breadth of educational opportunities available to students, it has great strength in the conventional biomedical sciences accompanied by in depth research opportunities as well.

The Medical Curriculum

The Alpert Medical School curriculum has been designed and implemented with the intention of creating an integrated, contemporary, compassionate, and flexible program of learning for our students. Our approach to medical education is predicated on the vision that tomorrow’s physician must be a lifelong learner who is scientifically and clinically enlightened, patient and service-centered, and who understands the economic underpinnings of the US health care system. Our goal is to train physicians who will provide informed and compassionate care while at the same time serving as leaders and change agents for the health care system. To achieve the latter goal, we aim to train physicians who will be leaders at all levels.

These educational goals are pursued through a curriculum with the following structure. During Years 1 and 2, students enroll in four sequential semesters of Integrated Medical Sciences (IMS-I through -IV) and Doctoring-I through -IV. The elective Scholarly Concentrations Program is introduced to students during Year 1. Year 3 allows students to explore core disciplines and related specialties through the completion of required clerkships in medicine, surgery, pediatrics, obstetrics & gynecology, psychiatry, and family medicine. The transition from the third year to the fourth year takes place in May, after which time students have the opportunity to develop a program of elective rotations aimed at finalizing a career choice, and obtaining and preparing for a residency in their chosen field.

Alpert Medical School continues to employ a competency-based curriculum that was officially launched in 1996 for the graduating MD Class of 2000. The rationale behind the competency-based curriculum stems from the need to define the outcomes of the educational process: what are the desirable qualities of a medical school graduate, and what constitutes the essential knowledge base that will enable a graduate to make a successful transition to his or her chosen medical field?

All students are expected to gain competency in the Nine Abilities (see below) and knowledge base by graduation. Each course within the core curriculum of the Medical School identifies which abilities and parts of the knowledge base it addresses. Students may also meet the competency requirements through individualized study, group independent study projects (GISPs), or alternative courses that might be arranged as part of collaborative learning opportunities.

Nine Abilities:

1. Effective communication
2. Basic clinical skills
3. Using basic science in the practice of medicine
4. Diagnosis, prevention, and treatment
5. Lifelong learning
6. Professionalism
7. Community health promotion and advocacy
8. Moral reasoning and clinical ethics
9. Clinical decision making

For additional information regarding Alpert Medical School please visit the website at: http://brown.edu/academics/medical/

Courses

Biology

BIOL 3001. Clerkship in Medicine.
Twelve weeks.

BIOL 3010. Systemic Pathology.
First-semester systemic pathology course building on the general principles of disease introduced in general pathology IMS-1. Objectives include learning the classification of systemic disease according to basic pathological mechanisms, describing and explaining the functional and structural changes produced by the most common diseases, and enhancing the ability to diagnose and treat patients. Runs in parallel with pathophysiology BIOL 3500: covers four organ system segments: cardiovascular, renal, and pulmonary and supporting structures.

BIOL 3015. Individualized Clerkship in Medicine.

BIOL 3020. Nephrology.
No description available.

BIOL 3025. Longitudinal in Renal Disease.
No description available.

BIOL 3030. Clinical Nephrology.
No description available.

BIOL 3035. Clinical Nephrology.
No description available.

BIOL 3037. Longitudinal in Nephrology.
No description available.

BIOL 3040. Clinical Dermatology.
No description available.

BIOL 3045. Longitudinal in Dermatology.

No description available.

BIOL 3430. Longitudinal in Gastroenterology.
No description available.

BIOL 3460. College Health Longitudinal.
No description available.

BIOL 3470. Issues Concerning Deaf Patients in Healthcare.
Students will gain understanding of the basics of communication with and among the Deaf, including ASL, lip-reading, current technologies, and the use of interpreters.

No description available.

BIOL 3490. Cardiology.
No description available.

BIOL 3500. Cardiovascular Medicine - Outpatient and Inpatient Practice.
No description available.

BIOL 3505. Medical and Interventional Pain Management.

BIOL 3510. Clinical Reasoning and Human Errors in Medicine.
No description available.

BIOL 3533. Advanced Clinical Mentorship in Cardiology.

BIOL 3557. Advanced Clinical Mentorship in Comprehensive HIV Care.

BIOL 3559. Advanced Clinical Mentorship in Hematology/Oncology.

BIOL 3562. Advanced Clinical Mentorship in Internal Medicine.

BIOL 3564. Advanced Clinical Mentorship in Functional Neurosurgery.

BIOL 3566. Advanced Clinical Mentorship in Orthopedic Surgery.

BIOL 3577. Advanced Clinical Mentorship in OB/Gyn.

BIOL 3583. Advanced Clinical Mentorship in Family Medicine.
BIOL 3890. Culture, Patient, Advocacy and the Community.
This course focuses on the knowledge, skills, and attitudes required for effective patient advocacy with an emphasis on the role of culture in developing advocacy partnerships with patients, families, peers and community service providers. Specifically, it examines the relationships between race, ethnicity, social factors, economic factors and health status indicators. The course will provide opportunities to build self-awareness, to develop greater insight into the social and community contexts of healthcare and patient advocacy, and to refine physician-patient communication skills.

Eight weeks.

BIOL 3910. Introduction to Surgical Oncology.
No description available.

BIOL 3920. Surgery of the Alimentary Tract.
No description available.

BIOL 3930. Physical Medicine and Rehabilitation.

No description available.

BIOI 6501. Medical Chinese Elective.
Students will attain a working knowledge of Chinese relevant to medical practice in order to better communicate with and serve Chinese-speaking patients. Open to students who a proficient in the Mandarin dialect of Chinese.

BIOI 6502. Medical Spanish.
The course is designed for students to gain beginning-level competence in Medical Spanish that will enable them to communicate more effectively with Spanish-speaking patients and their families. Specifically, the students will develop critical Spanish lexicon and language skills for conducting the medical interview. Perquisite: Background in Spanish. Grading: S/NC

BIOI 6503. Poverty, Health and Law.
No description available.

BIOI 6504. Health Care in America.
No description available.

BIOI 6505. Introduction to Multidisciplinary Fetal Medicine.
An 8-session elective seminar for 2nd year medical school students. Emphasis is placed on the multidisciplinary approach to medical problems. The course concentrates on those conditions for which fetal and/or neonatal intervention may be indicated, from gene therapy to fetal surgical intervention.

No description available.

BIOI 6507. Elective in Mindfulness Training.
No description available.

BIOI 6508. Gender and Sexuality in Healthcare: Caring for All Patients.
The goal of the course is to provide medical students with the knowledge needed to effectively and competently work with a growingly diverse patient (and colleague) population. Contemporary medical school curricula are lacking in the instruction and discussion of patients of all genders and sexualities. This elective will address this need. The course will consist of eight 2-hour sessions, with guest speakers lecturing for the first hour and small group discussion happening for the second hour. Students are required to keep a journal of their experiences as their final assignment for the class. The class will be graded S/NC.
The topics range from LGBTQ Teenagers to Institutionalized Homophobia to Hormone Therapy, led by experts in each field.

BIOI 6509. Introduction to Surgery.
No description available.

BIOI 6510. Topics in Medicine - An International Perspective at University of Rostock, Germany.

BIOI 6512. Modern Genetics: Ethics, Policy, and the Doctor-Patient Relationship.
No description available.

BIOI 6513. (Play)writing and Medicine.
No description available.

This elective seminar for 1st and 2nd year medical school and PLME students will introduce them to the world of complementary and alternative forms of healing (CAM) and place it into a framework of an Integrative medicine.

BIOI 6515. Humanities as Medical Instruments.

BIOI 6516. Race, Health Disparities, and Biomedical Interpretations.

BIOI 6517. Diseases, Doctors and Divas.

BIOI 6518. Design and Health.

BIOI 6519. Leadership in the Health Professions.

BIOI 6520. Artists and Scientists as Partners.

BIOI 6521. Advanced Spanish.

BIOI 6550. Medical Students Outreach to Mothers to Be (MOMS).
No description available.

BIOI 6551. The Bionic Human Elective.
No description available.

BIOI 6552. Wilderness Medicine Preclinical Elective.
The Wilderness Medicine elective is designed to instill the basic survival skills training necessary for environments outside the hospital, both urban and wild. It combines didactic lectures on such topics as toxicology and travel medicine with field skills sessions & workshops (e.g. suturing, splinting). These sessions also include mock medical scenarios, such as near drownings, for the students to handle. It includes off-campus consultation with experts to review their medical emergency procedures. A final project consisting of writing about a popular wilderness myth and its voracity is required.

Biology Concentration Requirements

The Biology concentration invites students to study, in depth and in breadth, the science of life and living matter. Whether pursuing the A.B. or Sc.B. in biology, students can expect to learn broadly in the discipline through a selection of courses in three areas: cell and molecular biology, structure and function, and organismal biology. In addition, students pursuing the Sc.B complete a thematic track through which they gain an in-depth understanding of a particular subfield (such as, immunopathology, Ecology and Evolutionary Biology; Physiology/Biotechnology; Cell and Molecular Biology; Physical Sciences; Marine Biology). The concentration also emphasizes practical skills and experimental design. Concentrators are required to take at least 3 courses with a laboratory or fieldwork component. Within all of these requirements, students have a high degree of flexibility and choice. Broad research opportunities are also available across several departments within the basic sciences as well.

Standard program for the A.B. Biology

The concentration program for the A.B. in Biology consists of four prerequisite courses in math, chemistry, and a statistics course as well as ten courses in biological sciences, including at least one course in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology.

Prerequisites: ¹

<table>

Director of Undergraduate Affairs

Marjorie E. Thompson

The Undergraduate Program in Biology offers courses at all levels of biological organization: molecular, cellular, organismal and population, and concentration programs with varying degrees of multidisciplinary or specialty foci.

There is a vast range of collaborative opportunities for independent study and research under the mentorship of the faculty. Faculty maintain research programs at the cutting edge of their fields including biochemistry, biophysics, cell biology, developmental biology, ecology, evolution, genetics, immunology, molecular biology, neurobiology, physiology, anatomy, artificial organs, microbiology, virology, experimental pathology, and pharmacology. The close administrative relationship with the Alpert Medical School offers additional opportunities for blending fundamental biology and clinical sciences in research projects at the Brown-affiliated hospitals.

The Office of Biology Undergraduate Education is a full service academic resource center, serving a key role for students of the life sciences here. The Office provides individualized advising for students at all levels; oversees student-faculty research collaborations, holds special events and maintains a variety of programs that support and enrich student life.

For further information, please visit: http://biology.brown.edu/bug/
BIOL 0470 Genetics
BIOL 0500 Cell and Molecular Biology
BIOL 0510 Introductory Microbiology
BIOL 0530 Principles of Immunology
BIOL 1050 Biology of the Eukaryotic Cell
BIOL 1100 Cell Physiology and Biophysics
BIOL 1310 Developmental Biology
NEUR 1020 Principles of Neurobiology

**Area 2 (Structure/Function)**
- BIOL 0320 Vertebrate Embryology
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0440 Plant Physiology
- BIOL 0800 Principles of Physiology
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1880 Comparative Biology of the Vertebrates
- NEUR 0010 The Brain: An Introduction to Neuroscience

**Area 3 (Organismal Biology)**
- BIOL 0370 Experimental Evolution: Seeing Darwin in Real Time
- BIOL 0380 The Ecology and Evolution of Infectious Disease
- BIOL 0390 Vertebrate Evolution and Diversity
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0410 Invertebrate Zoology
- BIOL 0415 Microbes in the Environment
- BIOL 0420 Principles of Ecology
- BIOL 0430 The Evolution of Plant Diversity
- BIOL 0475 Conservation Medicine
- BIOL 0480 Evolutionary Biology
- BIOL 1800 Animal Locomotion
- BIOL 1880 Comparative Biology of the Vertebrates
- ENVS 0455 Coastal Ecology and Conservation
- ENVS 0490 Environmental Science in a Changing World

Six additional courses chosen from BIOL and/or NEUR offerings for concentrators. At least two at the advanced (1000-2000) level. The Core may include up to two related sciences, with advisor approval.

**Total Credits**: 10

---

1 AP scores of 4 or above may substitute Math courses.
2 At least two biology and/or neuroscience courses must be at the advanced level (between 1000-2999). EXCLUSIONS: BIOL 0920 series courses & BIOL 1920 series courses. *Courses numbered below BIOL 0100 do not carry concentration credit. At least three of the biology and/or neuroscience courses must include laboratory or fieldwork. BIOL 1950/BIOL 1960, (Directed Research) may be included, but is not required. If a lab project, this can count for ONE of the three lab course requirements, and one advanced course.
3 No substitutions per above Area list. If a course is listed in more than one area, it may be used to fulfill one of those, the other must be fulfilled by a different course.
4 Biology courses for concentration credit include those numbered greater than 0100 with some exceptions noted within the course descriptions. Courses numbered over 3000 do not count towards Undergraduate requirements either quantity or for concentration.

**Honors**: Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/BIOL 1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Office of Biology Undergraduate Education (Arnold, Room 124) or at the Research Projects Collection, found at http://biology.brown.edu/bug/honors.

**Standard Program for the Sc.B. Biology**

The concentration program for the Sc.B. in Biology consists of seven prerequisite courses in math, chemistry, and physics as well as thirteen to fourteen courses in biological sciences, including courses in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology, and the three-course Track. The biological sciences requirement also requires research (BIOL 1950/BIOL 1960), which should reflect the advanced cluster.

**Prerequisites:**
1. MATH 0090 Introductory Calculus, Part I (or placement)
2. MATH 0100 Introductory Calculus, Part II
   - or MATH 0170 Advanced Placement Calculus
3. CHEM 0330 Equilibrium, Rate, and Structure
4. CHEM 0350 Organic Chemistry
5. CHEM 0360 Organic Chemistry
6. PHYS 0030 Basic Physics (or equivalent)
7. PHYS 0040 Basic Physics (or equivalent)

**Core Courses:**
1. BIOL 0200 The Foundation of Living Systems (or placement)
2. BIOL 0280 Introductory Biochemistry
3. BIOL 0470 Genetics
4. BIOL 0500 Cell and Molecular Biology
5. BIOL 0510 Introductory Microbiology
6. BIOL 0530 Principles of Immunology
7. BIOL 1100 Cell Physiology and Biophysics
8. BIOL 1310 Developmental Biology
9. NEUR 0010 The Brain: An Introduction to Neuroscience

**Area 1 (Cell/Molecular Biology)**
- BIOL 0280 Introductory Biochemistry
- BIOL 0470 Genetics
- BIOL 0500 Cell and Molecular Biology
- BIOL 0510 Introductory Microbiology
- BIOL 0530 Principles of Immunology
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1310 Developmental Biology
- NEUR 0010 The Brain: An Introduction to Neuroscience

**Area 2 (Structure/Function)**
- BIOL 0320 Vertebrate Embryology
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0440 Plant Physiology
- BIOL 0800 Principles of Physiology
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1310 Developmental Biology
- NEUR 0010 The Brain: An Introduction to Neuroscience

**Area 3 (Organismal Biology)**
- BIOL 0370 Experimental Evolution: Seeing Darwin in Real Time
- BIOL 0380 The Ecology and Evolution of Infectious Disease
- BIOL 0390 Vertebrate Evolution and Diversity
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0410 Invertebrate Zoology
- BIOL 0415 Microbes in the Environment
- BIOL 0420 Principles of Ecology
- BIOL 0430 The Evolution of Plant Diversity
- BIOL 0475 Conservation Medicine
- BIOL 0480 Evolutionary Biology
- BIOL 1800 Animal Locomotion
- BIOL 1880 Comparative Biology of the Vertebrates
- ENVS 0455 Coastal Ecology and Conservation
- ENVS 0490 Environmental Science in a Changing World
Five additional courses chosen from BIOL and/or NEUR offerings for concentrators. Alternatively, students may include up to two related (non-BIOL/NEUR) sciences suitable for science concentrators.

RESEARCH:
Typically, two courses in Track is advanced level research (BIOL 1950, 1960).

TRACK:
The Track consists of three additional biological sciences courses (not including BIOL 1950/1960 research) that form a Track. Tracks include: Immuno/Pathobiology; Evolutionary Biology; Physiology and Biotechnology; Neurobiology; Physical Sciences; Marine Biology; Cell and Molecular Biology.

Total Credits: 13-14

1. AP scores of 4 or 5 may substitute Math courses.
2. At least two biology and/or neuroscience courses numbered at the 1000 or 2000 level. "Courses numbered below BIOL 0100 do not carry concentration credit. At least three of the biology and/or neuroscience courses must include laboratory or fieldwork. No substitutions per above Area lists. If a course is listed in more than one area, it may be used to fulfill one of those; the other must be fulfilled by a different course.
3. Biology courses for concentration credit include those numbered greater than 0100 with some exceptions noted within the course descriptions. Courses numbered over 3000 do not count towards Undergraduate requirements either quantity or for concentration.
5. If substantial research is carried out away from Brown, it must be approved by an appropriate Brown BioMed faculty member but does not carry course credit toward the Core program.
6. At least two, and preferably all three, must be above 1000-level. Courses used for the cluster, must be approved by an advisor and/or Dean Thompson.

Honors: Honors in biology requires a thesis and presentation based on a research project (usually conducted via BIOL 1950/1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Office of Biology Undergraduate Education (Arnold, Room 124) or at the Research Projects Collection, found at http://biology.brown.edu/bug/honors.

Stipulations for Biology Programs:
1. For double concentrations, no more than two courses may overlap (i.e., be used to meet requirements of both) programs, prerequisites excepted.
2. No more than two semesters of directed research may be used as concentration credits. Each does count as an individual core towards the program, but only carry one lab credit towards the three required.
3. A limited number of transfer or study abroad courses may be used within the program, subject to approval of advisor, and Dean Thompson.

Health & Human Biology Concentration Requirements
Health and Human Biology is an interdisciplinary concentration whose goals are to provide a rigorous foundation in the biological sciences with substantive course work in humanities and social sciences within a subfield of Human Health and Disease. The program includes: background courses, a biology core courses, a set of theme courses, and a Senior Capstone activity. Background courses provide the essential foundations in chemistry, mathematics, methods, and basic biology. These support the Biology core comprised of a flexible menu of intermediate and advanced courses. A required portion of the Biology core is Genetics, which is considered a cornerstone of human biology and its interface with other fields. The Biology core underscores the related coursework within the Health and Disease Theme. The Theme courses are social science and humanities courses that form a cohesive, thoughtful grouping. Theme groupings must be approved by the advisor. A required senior capstone course or activity builds on the program's focus.

Program Requirements

REQUIRED BACKGROUND:
Four (4) courses including:
- MATH 0090 Introductory Calculus, Part I (or equivalent placement)
- CHEM 0330 Equilibrium, Rate, and Structure
- BIOL 0200 The Foundation of Living Systems
- Statistics course chosen with advisor’s help.

CORE PROGRAM:
In addition to the stated background in Chemistry, Math, Biology and Statistics, five (5) Biology plus four (4) coherently-grouped Theme courses, plus a Senior-Year Capstone course or project. (See description of Capstone at link below this table).

BIOL:
Five (5) courses, including:
- Genetics, which can be fulfilled in the following ways:
  - BIOL 0470 Genetics
  - OR-
  - BIOL 0480 Evolutionary Biology
    & BIOL 0500 and Cell and Molecular Biology
  - OR-
  - BIOL 0480 Evolutionary Biology
    & BIOL 0510 and Introductory Microbiology

Select one course in structure/function/development such as:
- BIOL 0320 Vertebrate Embryology
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0800 Principles of Physiology
- BIOL 1310 Developmental Biology
- BIOL 1800 Animal Locomotion
- BIOL 1880 Comparative Biology of the Vertebrates
- NEUR 0010 The Brain: An Introduction to Neuroscience

One course in organismal/population biology such as:
- BIOL 0370 Experimental Evolution: Seeing Darwin in Real Time (Experimental Evolution)
- BIOL 0380 The Ecology and Evolution of Infectious Disease
- BIOL 0390 Vertebrate Evolution and Diversity
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0410 Invertebrate Zoology
- BIOL 0415 Microbes in the Environment
- BIOL 0420 Principles of Ecology
- BIOL 0475 Conservation Medicine
- BIOL 0480 Evolutionary Biology
- BIOL 1470 Conservation Biology
- BIOL 1880 Comparative Biology of the Vertebrates
- ENVS 0490 Environmental Science in a Changing World

c) Two Biology or Neuroscience courses that relate to and support the chosen theme course grouping. At least one must be at the advanced level.

THEME: (see examples below)
Four (4) appropriate and cohesively grouped courses from non-biology and non-neuroscience offerings.
The unifying theme in this program is Human Health and Disease. With advisor’s assistance, a subfocus is chosen from departments such as: CLPS, PHP, EDUC; GNSS, SOC, ANTH, HIST, SCSO, ETHN, ENV, AFRI, PPAI, BIOL 0920 series of topics courses; BIOL 1920 series of topics courses; BIOL 1070; others by approval or suggestion of the advisor. Approved courses must be suitable for concentrators, and at least one must be advanced (>1000 level in the discipline).

**SENIOR CAPSTONE ACTIVITY**

1) The Capstone activity must be approved by the concentration advisor and span all or part of the Senior year.

2) Honors in Human Biology is based on approved Capstone Research that yields a thesis and oral presentation, plus quality grades (see more information about Honors at the Biology website).

---

**CAPSTONE:** See description of Capstone at http://biology.brown.edu/bug/human-biology. May be fulfilled by an independent activity such as an approved relevant advanced course, or seminar, or Directed Research (e.g., BIOL 1950/BIOL 1960, or an independent study in another Department if approved or an appropriate internship accompanied by a scholarly analysis mentored by a Brown faculty member.

**THEME:** Examples of thematic subfoci that may describe a course grouping include (but are not necessarily limited to):

- Health Behavior (Brain & Behavior)
- Health Systems Structure and Policy
- Culture and Health
- Environmental Health
- Global/International Health
- Women’s/Children’s Health
- Disability/Ethics
- Social context
- Race and ethnic disparities in disease

**HONORS:** See more information about Honors at http://biology.brown.edu/bug/honors.

---

**Applied Mathematics-Biology Concentration Requirements**

The Applied Math - Biology concentration recognizes that mathematics is essential to address many modern biological problems in the post genomic era. Specifically, high throughput techniques have generated vast new biological data sets that require novel analytical skills for the most basic analyses. These technologies are spawning a new "data-driven" paradigm in the biological sciences and the fields of bioinformatics and systems biology. The foundations of these new fields are inherently mathematical, with a focus on probability, statistical inference, and systems dynamics. These mathematical methods apply very broadly in many biological fields including some like population growth, spread of disease, that predate the genomics revolution. Nevertheless, the application of these methods in areas of biology from molecular genetics to evolutionary biology has grown very rapidly in with the availability of vast amounts of genomic sequence data. Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

**Standard program for the Sc.B. degree**

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

**Required Courses:**

Students are required to take all of the following courses.

Select one of the following sequences:

- APMA 0350 & APMA 0360 Methods of Applied Mathematics I, II
- APMA 0330 & APMA 0340 Methods of Applied Mathematics I, II
- APMA 1650 Statistical Inference I
- One (1) APMA approved 1000-level course.
- MATH 0090 Introductory Calculus, Part I (or equivalent placement)
- MATH 0100 Introductory Calculus, Part II (or equivalent placement)
- MATH 0170 Advanced Placement Calculus
- MATH 0180 Intermediate Calculus
- MATH 0520 Linear Algebra (or an approved applied math course)
- CHEM 0330 Equilibrium, Rate, and Structure
- PHYS 0030 Basic Physics
- or PHYS 0050 Foundations of Mechanics
- PHYS 0040 Basic Physics
- or PHYS 0060 Foundations of Electromagnetism and Modern Physics

**Additional Courses**

In addition to required courses listed above, students must take the following:

Two additional courses in applied math, biology, chemistry, math, or physics. At least one of these must be a directed research course that reflects the theme of this program, for example:

- APMA 1970 Independent Study
- BIOL 1950 Directed Research/Independent Study
- or BIOL 1960 Directed Research/Independent Study

Four biology courses agreed upon by the student and advisor, for example:

**Areas of Emphasis and Suggested Courses:**

A breadth of courses in multiple areas is suggested. For students with particular interests, the following areas of emphasis can be considered.

**Biochemistry**

- BIOL 0280 Introductory Biochemistry
- CHEM 0350/0360 Organic Chemistry
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- BIOL 1270 Advanced Biochemistry

**Cells, Tissues, and Organs**

- BIOL 0800 Principles of Physiology
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1190 Synaptic Transmission and Plasticity
- and/or appropriate bioengineering courses, such as:
- BIOL 1090 Polymer Science for Biomaterials
- BIOL 1120 Biomaterials
- BIOL 1140 Tissue Engineering
- BIOL 1150 Stem Cell Engineering

**Neurosciences**

- Any Neurosciences courses (NEUR)
- APMA 0410 Mathematical Methods in the Brain Sciences

**Population Biology and Ecology**

- BIOL 0410 Invertebrate Zoology
Biochemistry & Molecular Biology Concentration Requirements

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation of mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

Standard program for the Sc.B. degree

Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits.

Three courses in mathematics, statistics and/or computer science, typically including MATH 0090, MATH 0100, or equivalent) 1

Two courses in physics, typically: 1

PHYS 0030 Basic Physics
or PHYS 0050 Foundations of Mechanics
or ENGN 0030 Introduction to Engineering

PHYS 0040 Basic Physics
or PHYS 0060 Foundations of Electromagnetism and Modern Physics
or ENGN 0040 Dynamics and Vibrations

Three courses in physical and organic chemistry: 3

CHEM 0330 Equilibrium, Rate, and Structure
CHEM 0350/0360 Organic Chemistry

One course in biophysical or related chemistry: 1

CHEM 0400 Biophysical and Bioinorganic Chemistry
or CHEM 0500 Inorganic Chemistry
or CHEM 1660 Instrumental Analysis with Environmental Applications

GEOL 1660 Instrumental Analysis with Environmental Applications

Three courses in biochemistry: 3

BIOL 0280 Introductory Biochemistry
BIOL 1270 Advanced Biochemistry
CHEM 1230 Chemical Biology

or CHEM 1240 Biochemistry

Select two semester courses of independent research approved by a concentration advisor:

BIOL 1950/1960 Directed Research/Independent Study

CHEM 0970/0980 Undergraduate Research

Suggested Elective Courses:

Students are required to take six (6) elective courses: four (4) taken from the chart below and two (2) from any science or mathematics course relevant to biochemistry, cell and molecular biology from the suggested courses below:

Biology Electives:

BIOL 0200 The Foundation of Living Systems
BIOL 0470 Genetics
BIOL 0500 Cell and Molecular Biology
BIOL 0530 Principles of Immunology
BIOL 0800 Principles of Physiology
BIOL 1050 Biology of the Eukaryotic Cell
BIOL 1090 Polymer Science for Biomaterials
BIOL 1100 Cell Physiology and Biophysics
BIOL 1110 Topics in Signal Transduction
BIOL 1200 Protein Biophysics and Structure
BIOL 1150 Stem Cell Engineering
BIOL 1260 Physiological Pharmacology
BIOL 1290 Cancer Biology
BIOL 1540 Molecular Genetics
BIOL 1560 Virology

Neuroscience Electives: 2

NEUR 1020 Principles of Neurobiology
NEUR 1670 Neuropharmacology and Synaptic Transmission

Chemistry Electives:

CHEM 0500 Inorganic Chemistry
CHEM 1140 Physical Chemistry: Quantum Chemistry
CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
CHEM 1230 Chemical Biology
CHEM 1240 Biochemistry
CHEM 1450 Advanced Organic Chemistry

Quantitative Science or Mathematics Electives: 2

Select two electives from any quantitative science or mathematics course relevant to biochemistry, cell and molecular biology from the following list and approved by a concentration advisor:

Total Credits 20

1 Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.

2 or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

Honors Requirements for Biochemistry

All ScB Biochemistry concentrators are candidates for Honors; no separate application is necessary.

The requirements for Honors in Biochemistry are:

* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.
* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent. Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (http://www.brown.edu/academics/chemistry/undergraduate).
Biomedical Engineering Concentration Requirements

Biomedical Engineering is an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. It is administered jointly by the School of Engineering and the Division of Biology and Medicine. The educational objectives of the biomedical engineering program are to graduate students who will: 1) Be employed in careers of useful service to society, including scientific and technical areas within medicine, industry, and health care delivery; 2) Demonstrate the ability to apply the basic principles of engineering and science, as well as problem solving skills and critical thinking, to a broad spectrum of biomedical engineering problems; 3) Demonstrate their ability to work in teams, and to effectively communicate and understand the broad social, ethical, economic and environmental consequences of their lifelong education.

1. Advanced students can replace one math course with CHEM 0360.

2. Advanced students (premads) can replace with BIOL 0470, BIOL 0530, or other biology courses.

Biophysics Concentration Requirements

Biophysics is that it is a quantitative science that requires a significant level of competence in physics, chemistry, mathematics, and biology. These areas therefore form the required background coursework for this program, and serve as a springboard to an advanced focus, developed in consultation with a concentration advisor. Advanced foci may include structure-function relations of macromolecules, biomechanics of cell mechanisms of membrane transport, sensory signal transduction, for examples. The program also requires a capstone research project that reflects this focus and may be drawn from collaborative research opportunities offered by faculty in biology, chemistry, or physics departments.

Additional detailed information about the field of Biophysics may be found at: http://www.biophysics.org/AboutUs/Biophysics/tabid/517/Default.aspx.

Pharmacology
BIOL 1260 Physiological Pharmacology

Biotechnology
BIOL 1090 Polymer Science for Biomaterials
BIOL 1120 Biomaterials
BIOL 1140 Tissue Engineering

Select six additional intermediate or advanced level courses, chosen from biology (e.g., biochemistry, genetics, physiology, physics, chemistry, and/or computer sciences and mathematics). Examples include:

Biological Sciences track

Chemistry
CHEM 1230 Chemical Biology
CHEM 1450 Advanced Organic Chemistry
A course from the CHEM 1560 series.

At least three courses from the following:
CHEM 0330 Equilibrium, Rate, and Structure
BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent)
BIOL 0280 Introductory Biochemistry
or BIOL 0500 Cell and Molecular Biology
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science (no prerequisite)
CSCI 0160 Introduction to Algorithms and Data Structures (prerequisite CSCI 0150)
or CSCI 0170 Computer Science: An Integrated Introduction
CSCI 0180 Computer Science: An Integrated Introduction (prerequisite CSCI 0170)
or CSCI 0190 Accelerated Introduction to Computer Science
CSCI 0220 Introduction to Discrete Structures and Probability

Prerequisites
MATH 0100 Introductory Calculus, Part II (or equivalent) 1
or MATH 0170 Advanced Placement Calculus
BIOL 0200 The Foundation of Living Systems (or equivalent) 1

Computational Biology Concentration Requirements

Computational Biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience and visualization. The program educates the student liberally in these fields, building on a foundation of coursework that may then focus via several possible tracks. The program offers four tracks: computational genomics, biological sciences, molecular modeling and applied mathematics and statistical genomics. The program requires a senior capstone experience that pairs students and faculty in creative research collaborations.

Standard program for the Sc.B. degree

Prerequisites
MATH 0100 Introductory Calculus, Part II (or equivalent) 1
or MATH 0170 Advanced Placement Calculus
BIOL 0200 The Foundation of Living Systems (or equivalent) 1

General Core Course Requirements
CHEM 0330 Equilibrium, Rate, and Structure 1
BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent) 1
BIOL 0280 Introductory Biochemistry 1
or BIOL 0500 Cell and Molecular Biology 1
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science (no prerequisite) 1
CSCI 0160 Introduction to Algorithms and Data Structures (prerequisite CSCI 0150) 1
or CSCI 0170 Computer Science: An Integrated Introduction 1
CSCI 0180 Computer Science: An Integrated Introduction (prerequisite CSCI 0170) 1
or CSCI 0190 Accelerated Introduction to Computer Science 1
CSCI 0220 Introduction to Discrete Structures and Probability 1
APMA 1650 Statistical Inference I 1

Computational Biology Core Course Requirements
CSCI 1810 Computational Molecular Biology (prerequisites: (CSCI 0160, or CSCI 0180, or CSCI 0190) and CSCI 0220) 1
APMA 1080 Inference in Genomics and Molecular Biology 1

Capstone Experience 1
BIOL 1950/1960 Directed Research/Independent Study 1
CSCI 1970 Individual Independent Study 1

Six courses in one of the following four tracks: 6

Computational Genomics Track: 2
Three of the following:
CSCI 1230 Introduction to Computer Graphics
CSCI 1270 Database Management Systems
CSCI 1410 Applied Artificial Intelligence
CSCI 1550 Probability and Computing: Randomized Algorithms and Probabilistic Analysis
CSCI 1570 Design and Analysis of Algorithms
or other Computer Science courses approved by the concentration advisor

Three of the following:
CSCI 0310 Introduction to Computer Systems
CSCI 0320 Introduction to Software Engineering
CSCI 1820 Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

Biological Sciences track 3
At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.
Select two courses from the following:
CSCI 1820 Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

Molecular Modeling Track: 4
CHEM 1220 Computational Tools in Biochemistry and Chemical Biology

At least three courses from the following:
Chem 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
Chem 1230 Chemical Biology
or Chem 1240 Biochemistry
or Biol 1270 Advanced Biochemistry
Biol 0530 Principles of Immunology
Biol 1260 Physiological Pharmacology
Biol 1540 Molecular Genetics
Two courses from the following:
Csci 1820 Algorithmic Foundations of Computational Biology
Php 2620 Statistical Methods in Bioinformatics, I
Apma 1660Statistical Inference II
Biol 1430 The Computational Theory of Molecular Evolution

**Applied Mathematics and Statistical Genomics Track:**

- Csci 1820 Algorithmic Foundations of Computational Biology
- Php 2620 Statistical Methods in Bioinformatics, I
- Apma 1070 Quantitative Models of Biological Systems

Total Credits: 19

1 Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. A minimum of one semester of independent study is required, although many students may conduct a full year of independent study.

2 This track is designed for students whose interests lie in the development of algorithms and high-quality software (tools and systems) for biological applications.

3 This track is designed for students whose interests lean more towards biological questions.

4 This track is designed for students who wish to gain competence in the field of molecular modeling and drug design.

5 This track is designed for students whose interest focuses on extracting information from genomic and molecular biology data, and modeling the dynamics of these systems. Substitution of more advanced courses with consent of advisor is permitted.

**Honors:**

To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

**Marine Biology Concentration Requirements**

Marine biology encompasses the study of living organisms in the ocean or other marine or brackish bodies of water. Because marine organisms play an important role in sustaining life on earth, and because of the diverse habitats studied by marine biologists, concentrators must study broadly in the basic sciences and become familiar with the varied research techniques in the field. Consequently, students begin their learning with foundational courses in biology, mathematics, chemistry, and physics. Subsequent coursework in the concentration exposes students to a range of topics in biology (e.g., Invertebrate Zoology, Ecology, Physiology, Conservation) and courses in other sciences, including geological sciences, computer science, and engineering. Students are encouraged to spend a summer or semester conducting research at a field station. The field experience is a key feature of this program and provides scholarly interaction with leaders in the field so that students are mentored at the cutting edge.

**Note:** This concentration program is being phased out for Class of 2017 students and greater in favor of a track program within the Sc.B. in Biology.

**Standard program for the Sc.B. degree**

An approved course in statistics

Bio 1950/1960 Directed Research/Independent Study (conducted at Brown or an approved marine lab or field station.) 1

Total Credits: 17
Courses

Introduces the basic principles of human nutrition, and the application of these principles to the specific needs of humans, and the role of nutrition in chronic diseases. Provides an overview of the nutrients and their use by the human body. Also examines the role of nutrients in specific functions and disease states of the body. Not for biology concentration credit. 
Enrollment limited to 100. LILE

BIOL 0040. Nutrition for Fitness and Physical Activity. 
Reviews the role of nutrition in physical activity and health. It is designed to provide the student with the information and skills needed to translate nutrition and physical activity recommendations into guidelines for both the athlete for maximal performance and the non-athlete to improve both health and well-being. Students will learn the role of the environment, nutrition in physical activity and how food choices can influence both athletic performance and long-term health through the effect on risk factors for chronic diseases. Prerequisite: BIOL 0030. Enrollment limited to 20. Instructor permission required.

BIOL 0060. Introduction to Human Physiology. 
An introduction to human physiology aimed primarily at undergraduates who are not concentrating in biology. Topics include basic cardiovascular, respiratory, kidney, gastrointestinal, endocrine, and neuromuscular function, as well as aspects of reproduction and exercise physiology. Not for biology concentration credit. BIOL 0060 should not be taken following BIOL 0800 or the equivalent.

BIOL 0080. Biotechnology Management. 
An examination of the pharmaceutical, biotechnology, and medical product industries: what they are, how they function, whence they originate, and various perspectives on why some succeed and others fail. Pathways from lab-bench to marketplace are described as are the pervasive influences of the FDA, patent office, and courts. Extensive reading; emphasis on oral presentation. Primarily intended for students planning a career in biomedical industry. Not for biology concentration credit. Students MUST register for the lecture section and the conference. Enrollment limited to 20.

BIOL 0140A. Topics in Science Communications: Science Journalism Practicum. 
Participants will understand how to read scientific research papers to interpret their findings and communicate these to a broader lay audience; analyze and understand best practices in science writing and the challenges of covering science for mass media; interview; fair and balanced coverage in reporting; give and receive peer feedback. Not for concentration credit in Biological Sciences programs. Enrollment limited to 10. Instructor permission required. S/NC

BIOL 0140B. Communicating Science: Biological Illustration. 
This Sophomore Seminar is an immersion practicum that conjoins art and science. Employing a series of techniques, students will learn the protocols of scientific rendering in an intensive hands-on approach. Field trips will include the RISD Nature Lab, the Brown Greenhouse, and John Hay collection of biomedical and botanical folios. Media will include graphite/ carbon dust; pen and ink (stipple, line); coquille board; scratchboard, colored pencil, watercolor and polymer clay. Course will be driven by project presentations focused on communicating science through illustration. Not for concentration credit in Biological Sciences programs. Instructor permission required; enrollment 10 students. 1/2 credit. SYS

BIOL 0140C. Communicating Science: Animating Science. 
Taught by RISD/Brown professors with the Science Ctr and Creative Mind Initiative, this course explores the pedagogy of using visual media to convey scientific concepts. The goal is to assess the quality of existing material and design new material that fill an educational need and makes science engaging and accessible. Lectures, labs, discussions, critiques and speakers. Teams collaborate on a series of short exercises leading to the creation of videos/animations explaining scientific concepts. Projects evaluated on accuracy, clarity, explanation, educational value, viewer engagement and creativity. Not for concentration credit in Biological Sciences programs. Enrollment limited to 12; instructor permission.

BIOL 0150A. Techniques and Analyses using DNA-Based Biotechnology. 
Students will study and practice a range of methods used in molecular biology while examining the ways in which those tools are used in research and in the development of medical treatments. This experience, combined with the reading and discussion of selected papers from the primary literature, fosters development of a skill set critically important for the modern day biology student. Expected background: high school Biology course. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0150B. Statistical Computing for Biology. 
Modern biological research is a data rich endeavor, necessitating strong quantitative and computational skills to interpret the results of experimental and observational studies. In this course we will explore the application of statistics and modeling in biological research and environmental science. Topics covered will include basic probability, experimental design, sampling, hypothesis testing and mathematical models for prediction. No prior statistics knowledge is assumed. Enrollment limited to 10 first year and sophomore students. Instructor permission, based on a portfolio review. This is a half-credit course. S/NC

BIOL 0150C. Methods for Extraction and Analyzing Secondary Metabolites of Medicinal Plants. 
Plant secondary metabolites are currently the subject of much research interest when investigating new target compounds for potential medicine from natural products. New leads for drugs and phytomedicines from plants and plant parts have been increasing at a rapid rate especially by the pharmaceutical industry. Many plants have been selected and collected for their specific secondary compounds and healing powers by ethnobotanists in the field. The final step is the extraction, analyzing and identification of these plant specimens. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0150D. Techniques in Regenerative Medicine: Cells, Scaffolds and Staining. 
Regenerative Medicine, also known as Tissue Engineering, is the process of creating living, functional tissues to repair or replace native tissue or organ functions that have been lost due to disease or congenital defects. As such, it is a prominent scientific discipline that can either “stand alone” or complement material-based research efforts in the areas of device design, drug delivery, diagnostics and pharmaceuticals. Students will develop proficiencies in basic cell culture techniques, early stage tissue regeneration strategies and histochemical characterization of mammalian cell constructs. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC. FYS

BIOL 0170. Biotechnology in Medicine. 
Introduces undergraduates to the main technological advances currently dominating the practice of medicine. Provides an overview of the objectives, techniques, and problems related to the application of biomedical technology to the diagnosis and treatment of disease and the contemporary health care industry. Topics include: pharmaceutical development and formulation; organ replacement by prosthetic and transplantation; medical imaging; tissue engineering, therapeutic cloning, regenerative medicine; stem cells; societal, economic, and ethical issues. This course does carry Biology concentration credit.

BIOL 0180. The Biology of AIDS. 
AIDS represents an example of the vulnerability of humans to new infectious agents. We will review some human infectious diseases including small pox yellow fever and influenza, and then explore AIDS/ HIV. First characterized in 1981, AIDS became the leading cause of death in U.S. males aged 25-44 within a decade. We will examine what factors make HIV such a potent pathogen. The course is intended for students beginning in biology. Expected: BIOL 0200, or equivalent placement. This course does carry Biology concentration credit.
BIOl 0190E. Botanical Roots of Modern Medicine.
This course will explore a variety of medicinal plants found throughout the world, the diverse cultures that use them in their daily lives and the scientific underpinnings of their medicinal uses. In conjunction with readings, students will gain a hands-on approach in lab, observing, identifying and growing these plants. Enrollment limited to: 20. Students MUST register for the lecture section and the lab. FYS

BIOl 0190F. Darwinian Medicine.
Explores evolutionary explanations of why we get sick, and how this can shape, or misshape, our interpretations of medicine. Draws on evolutionary genetics, population biology, molecular biology and physiology. This course will build on evolutionary biology and then focus on disease processes such as infection, aging, cancer, allergy, diabetes, and obesity. Enrollment limited to 20 first year students. FYS

BIOl 0190H. Plants, Food, and People.
Examines the selection, breeding, cultivation and uses of food plants. Discusses the effects on agriculture of pathogens, climate change, and loss of biodiversity. Considers whether enough food can be produced for a world population of potentially 10 billion, while sustaining biodiversity and environmental quality. Course will include two papers and assistance from Writing Fellows; feedback from first paper will be available when writing second paper. Enrollment limited to 50. LILE

We will examine how the pace and shape of scientific progress is affected by the social/cultural context and the "personality" of the individual. We will look into how the interplay between society and the individual affects how scientific theories arise, are presented, are debated and are accepted. The course will initially focus on Charles Darwin and his theory of Natural Selection using the biography of Adrian Desmond and James Moore, "Darwin: The Life of a Tormented Evolutionist." Enrollment limited to 20 first year students. FYS

BIOl 0190Q. Climate Change and Species Extinction.
In this course students will go beyond the headlines and delve into the science to explore the impact of climate change on species extinction. Students will explore the integration of science and technology through traditional textbooks, primary literature, open source databases, simulations, and discussions. Students will investigate the impact of climate change on species distribution, ecology, and behavior through interactive, inquiry-based, collaborative classroom investigations. Students will learn to integrate information from a variety of sources and disciplines and share their ideas through classroom discussion, written assignments, and oral presentations. Enrollment limited to 20 first year students. FYS WRT

BIOl 0190R. Phage Hunters, Part I.
A research-based lab class for freshmen; both semesters are required in the sequence. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over Winter Recess, and annotated in the spring. One hour of lecture discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, HS chemistry. Instructor permission required. Admitance based on review of applications in the first class. Limited to 20 freshmen. FYS

BIOl 0190S. Phage Hunters, Part II.
A research-based laboratory/class for freshmen; both semesters are required. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over Winter Recess, and annotated in the spring. One hour of lecture discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, HS chemistry, and permission of the instructor. Students are expected to take fall and spring courses in the sequence. Enrollment limited to 20 first-year students. Instructor permission. FYS

BIOl 0190T. Bioinformatics: A Practical Introduction.
The amount of biological sequence data has grown at an exponential pace and spurred the development of computational tools that allow biologists to use this information. Students will become familiar with useful bioinformatics tools used by researchers. The course will introduce concepts of information transfer in biological molecules, storage in public databases, and how to use tools to access this information and organize it meaningfully. We will explore tools for studying whole genomes, including high-throughput sequencing data to assemble genomes and mapping subsets. Students will gain hands-on experience using these tools. Expected: AP credit or equivalent placement for BIOL 0200. FYS

This course presents an integrated account of development, structure and function in plants, especially seed plants. Enrollment limited to 20 first year students. FYS WRIT

BIOl 0200. The Foundation of Living Systems.
A broad overview of biological systems, emphasizing patterns and processes that form the basis of life. Explores essentials of biochemistry, molecular, and cellular biology and their relationship to the larger issues of ecology, evolution, and development. Examines current research trends in biology and their influence on culture. Appropriate for all students interested in biology. Serves as a gateway course to much of the intermediate and advanced curriculum. Placement tests are offered (contact Jody_Hall@brown.edu); AP scores of 4 or 5 are equivalent to BIOl 0200, and place a student out of this course. Students will be assigned to a lab section during the second week of class. LILE

BIOl 0210. Diversity of Life.
This course will explore biological diversity – the number of taxa, and the functions, and processes that support life – from the perspectives of ecology and evolutionary biology. It will draw on examples and case studies from the geological record, functional morphology, the evolution of organ systems in vertebrates, genomics, behavior and sexual selection in birds and invertebrates. Overarching themes will emphasize that taxonomic diversity is an emergent property of complex life on Earth, and the importance of diversity of biological functions and processes in generating and maintaining taxonomic diversity. Class Restriction: Freshmen and sophomores; others by instructor permission.

BIOl 0280. Introductory Biochemistry.
Lectures and recitation sections explore the mechanisms involved in the principles of macromolecular structure and function, the organization and regulation of pathways for intermediary metabolism, and the transfer of information from genes to proteins. It is expected that students have taken CHEM 0350 or are taking it concurrently.

BIOl 0300. Endocrinology.
A basic examination of endocrinology with emphasis on hormone biosynthesis, mechanism of action, physiological roles, and endocrine pathology. Topics include: mechanism of action of steroid, amine, and peptide hormones; neuroendocrinology; reproductive endocrinology; and endocrinology of metabolism and calcium homeostasis. It is expected that students have taken BIOL 0200 (or equivalent) and CHEM 0350.

Introduction to the developmental anatomy of vertebrate embryos, including humans, in an evolutionary context, through lecture, discussion and microscope slide study. Gametogenesis through germ layers and their organ system derivatives. Expected: BIOL 0200, or equivalent placement, or AP Biology score of 4 or 5. Limited to 18 freshmen and 18 sophomores. Students MUST register for the lecture section and the lab.

It is generally difficult to rigorously study evolution by natural selection because it acts across thousands of generations and in varying environments. Studying laboratory populations of short-lived organisms overcomes both challenges. This course will survey the field of experimental evolution, develop and apply ecological and evolutionary theory, and interpret and synthesize the peer-reviewed literature. Students will evolve bacteria to increased environmental stress resistance in complementary labs. Evaluation will be based on participation, student-led discussion, weekly written assignments, a midterm and final. Expected:
BIOL 0200 or equivalent. Enrollment limited to 25 first-year students and sophomores. Instructor permission required. LILE

BIOL 0380. The Ecology and Evolution of Infectious Disease. We will survey the diverse biology of microbes responsible for human infectious diseases, develop and apply ecological and evolutionary theory to infectious microbes, and provide practical experience interpreting and synthesizing the peer-reviewed scientific literature. The discovery of infectious microbes, the role of genetic novelty, population structure and transmission mode, and the influence of clinical therapies and host immune response will be considered. Evaluation will be based on preparation, participation, weekly student presentations, brief weekly written assignments, a midterm and a final. Expected: BIOL 0200 or equivalent. Enrollment limited to 25 first year students and sophomores. Instructor permission required. LILE

BIOL 0390. Vertebrate Evolution and Diversity. An overview of vertebrate evolution that not only covers historical events, but also introduces various scientific concepts and modes of thought. Topics include past and present biodiversity, convergent evolution, biogeography, competition, continental drift, climatic change over time, the notion of evolution as progress, and a whole-animal approach to understanding evolutionary events. Enrollment limited to 50. WRIT

BIOL 0400. Biological Design: Structural Architecture of Organisms. Many questions about the workings of living creatures can be answered by joining math, physics, and biology. We will identify basic physical science concepts that help biologists understand the structure and function of animals, plants, and microorganisms, and use these to study how the physical world constrains and facilitates the evolution of the extraordinary design and diversity of organisms. For first and second year students; others by permission. Recommended background: BIOL 0200, or equivalent. Enrollment limited to 40. Instructor permission required. WRIT

BIOL 0410. Invertebrate Zoology. A survey of invertebrate animals emphasizing evolutionary patterns and ecological relationships. Functional morphology, physiology, reproduction, development, and behavior of invertebrates will be examined. Laboratory exercises and two separate day-long field trips provide firsthand experience with the animals. Expected: BIOL 0200 or equivalent. Enrollment limited to 44. Students MUST register for the lecture section and a lab.

BIOL 0415. Microbes in the Environment. Course examines the diversity of microbial life in the environment. Surveys key services that microbes perform on land and sea, including biodegradation of contaminants in the environment and ecosystem processes related to climate change. Examines biological interactions of symbioses, quorum sensing, and antibiotic production in a ecological context. Explores the genomic mechanisms explaining phylogeny and life history strategies in microbes. Demonstrate knowledge of the diversity of microbes in the environment and benefits in an ecological and evolutionary context. Lecture based, two fieldtrips to expand appreciation for microbial ecology. BIOL 0200 or equivalent placement; CHEM 0330. Enrollment limited to 20 sophomores. WRIT

BIOL 0420. Principles of Ecology. The principles, concepts, and controversies involved in the study of the distribution and abundance of plant and animal populations and their integration into natural communities. Emphasizes interactions among organisms and the hierarchical nature of ecological processes affecting individuals, populations, and communities. Expected: BIOL 0200 (or equivalent) and MATH 0090. Lectures and weekly discussion.

BIOL 0430. The Evolution of Plant Diversity. Examines the evolutionary history of plants from a phylogenetic perspective. Introduces the science of phylogenetics - how to infer phylogenies and how to use them to understand organismal evolution. Highlights major trends in plant evolution over the past 400 million years. Lectures survey major plant lineages, with special focus on flowering plants. Weekly labs, field trips, and assignments stress basic plant anatomy and morphology, identification, and learning the local flora. Expected: BIOL 0200 (or equivalent placement). WRIT

BIOL 0440. Plant Organism. This course focuses on what plants do and how they do it. Introduces the biology of plants, their growth and development, structural features, and their cellular and organismal responses to key stimuli. Examines physiological, reproductive and developmental strategies throughout the plant life cycle and in relation to environmental challenges. Discusses the significance of various plant model systems for genetic research and understanding of mechanisms controlling plant growth and development. Prerequisites: BIOL 0200 (or equivalent placement). Students MUST register for the lecture section and a lab.

BIOL 0470. Genetics. Genetic phenomena at the molecular, cellular, organismal, and population levels. Topics include transmission of genes and chromosomes, mutation, structure and regulation of the expression of the genetic material, elements of genetic engineering, and evolutionary genetics. One laboratory session and one discussion session per week. (Students should not plan to take BIOL 0470 after 1540.) Expected: BIOL 0200 (or equivalent placement). Students will be assigned to Lab sections the first week of class.

BIOL 0475. Conservation Medicine. How have fruit bats contributed to the emergence of Nipah virus in Malaysia? Is an infectious cancer going to drive the Tasmanian Devil to extinction? Will a warmer world be a sicker world? We will consider these and additional topics at the intersection of global change biology and infectious disease emergence in this course. The course should be of interest to pre-med, general biology and environmental studies concentrators looking for an interdisciplinary learning classroom experience. Conservation Medicine will satisfy the "Area 3" organismal biology concentration requirement for Biology and Human Biology. Expected background: BIOL 0200 or equivalent placement. Enrollment limited to 25 sophomores and juniors. Instructor permission required.

BIOL 0480. Evolutionary Biology. A broad introduction to the patterns and processes of evolution at diverse levels of biological organization. Topics covered include natural selection, adaptation, speciation, systematics, macroevolution, mass extinction events, and human evolution. Weekly discussion sections involve debates on original research papers. Occasional problem sets involve computer exercises with population genetics and phylogeny reconstruction. Expected: BIOL 0200 (or equivalent placement).

BIOL 0495. Statistical Analysis of Biological Data. A first course in probability distributions and the use of statistical methods for biological data. Topics covered will include describing data, statistical inference (hypothesis tests and confidence intervals), analyzing associations, and methods for categorical data (contingency tables and odds ratios). Methods will be applied to data drawn from areas of biological inquiry. For statistics or related science credit in Biology programs. Expected background: BIOL 0200 or equivalent, math equivalent to MATH 0100. This course is for related science credit only in biological Sciences concentration programs. Enrollment limited to 40 undergraduates.

BIOL 0500. Cell and Molecular Biology. This course examines the structure and function of the basic unit of an organism, the cell. An experimental approach is used to examine cellular functions, ranging from gene transcription, cell division and protein secretion, to cell motility, and signal transduction. Relevance to health and disease will be considered. Expected: BIOL 0200 (or equivalent placement).

BIOL 0510. Introductory Microbiology. Introduces role of microbes in our understanding of biology at the cellular and molecular level. Focuses on microbial significance for infectious disease, public health, genetics, biotechnology, and biogeochemical cycles. Laboratory involves basic microbiological techniques and selection and manipulation of microbes and their genes. Expected: BIOL 0200 (or equivalent placement); CHEM 0330. Students MUST register for the lecture section and the lab. Enrollment limited to 108.

BIOL 0530. Principles of Immunology. Introduction to experimental and theoretical foundations of immunology. Focuses on concepts, landmark experiments and recent advances. Topics
BIOL 0800. Principles of Physiology. Introduction to the function and integration of organ systems with an emphasis on human physiology. Includes basic concepts in cell and organ system physiology as well as fundamentals of modern trends in physiological science. Emphasizes the application of physical and chemical principles to organ function at both the cellular and systemic levels. Expected: BIOL 0200 or equivalent.

BIOL 0860. Diet and Chronic Disease. This course addresses the relationship of food to the development and treatment of chronic diseases. Chronic diseases discussed are obesity, dyslipidemia/heart disease, diabetes mellitus, cancers and osteoporosis. Dietary recommendations for these diseases are critically assessed. Geared toward students interested in nutrition, medicine, and public health. Prerequisites: BIOL 0030 and 0800, plus permission of the instructor. Enrollment limited to 20.

BIOL 0920A. Controversies in Medicine. Why and how do controversies in medicine emerge at specific moments in time? Why do scientists come to different conclusions based on the same data? Does it matter how we interpret controversies? This sophomore-level seminar critically analyzes contemporary controversies in medicine and public health. Using a case study approach, we will examine the social and political assumptions that inform important controversies. Questions related to the relationship between science, media, activism, and health inequality will be woven into the case studies. Enrollment limited to 20. Instructor permission required. (For theme, not biology, credit in Health and Human Health and Biology only.)

BIOL 0940A. Viral Epidemics. This sophomore seminar will examine epidemics (outbreaks) of viral infections from a historical perspective. We will also cover current literature and up to the minute news accounts of infectious disease related outbreaks occurring around the globe. The major focus will be on virus related diseases but any microbial outbreak in the news will be explored. The seminar will cover basic aspects of microbial pathogenesis so students can gain an appreciation of microbial host interactions. Essential writing skills will also be developed. Enrollment limited to 20 sophomore students. WRIT

BIOL 0940B. Sophomore Seminars in Biology: Life in a Shell. This Sophomore seminar is an examination of broad themes in whole animal physiology with an emphasis on environmental adaptations. The foundation of the course will be the instructor’s recent book “Life in a Shell: A Physiologist’s View of Turtle.” A consideration of this iconic animal’s novel biological traits will lead into comparisons with our own biology and that of other animals. Topics: respiration, circulation, metabolic rate, buoyancy control, overwintering, migration, reproduction, and bone structure and function. Relevant original research papers will be used. Mandatory S/NC; enrollment of 20 students; override required. Expected: BIOL 0200 or equivalent placement credit.

BIOL 0940C. Sophomore Seminar: Insect Biology. Focuses on characteristics that make insects unique and why more insect species have been described than all other organisms combined; the opportunity to investigate diversity and adaptation; their abundance, small size, and short lifespans; their importance as agents of biocontrol pollination, agricultural pests, and disease vectors. Expected: BIOL 0200 or equivalent. Enrollment limited to 12 sophomores only. Students MUST register for lecture AND lab.

BIOL 0960. Independent Study in Science Writing. Incorporates a nontechnical science journalism component into the BioMed curriculum. A series of four to six specific assignments are recommended, based on topics derived from another biology course taken previously by the student, whose instructor has agreed to serve as a BIOL 0960 sponsor. Assignments may include, for example, investigative or analytical reviews, or feature articles on ethical or social impacts of new discoveries. The student and instructor schedule meetings to discuss topics and due dates, review rough drafts, and evaluate completed work. Not for concentration credit in the biological sciences programs. Written permission must be obtained from Dean M. Thompson prior to registering. Section numbers vary by instructor. Half credit.

BIOL 1050. Biology of the Eukaryotic Cell. Examines organelles and macromolecular complexes of eukaryotic cells with respect to structural and functional roles in major cellular activities. Emphasizes experimental basis for knowledge in modern cell biology using original literature, and discusses validity of current concepts. For advanced undergraduates and beginning graduate students. Complementary to BIOL 1270 and 1540. Prerequisites: BIOL 0280, 0470, 0500, or instructor permission. Graduate students register for BIOL 2050.

BIOL 1070. Biotechnology and Global Health. This course examines contemporary biotechnologies used to combat the predominant, worldwide problems in human health. Global health will be addressed from the scientific and engineering perspectives while integrating public health policy, health systems and economics, medical and research ethics, and technology regulation and management. This course is intended for graduate and advanced undergraduate students in biology, engineering, or related fields who have an interest in global health initiatives. Expected background: BIOL 0200 and BIOL 0800, or equivalents. Preference will be granted to graduate students in the Biotechnology and Biomedical Engineering programs. Only for related course credit in Biology, and for theme course credit in Health and Human Biology programs. Enrollment limited to 20. Instructor permission required.

BIOL 1090. Polymer Science for Biomaterials. Basic principles of polymer science and its application in medicine. Topics include basic polymerization chemistry, kinetics of polymerization and depolymerization with emphasis on bioerodible polymers, characterization of polymers by physical methods, bulk and surface properties, behavior of polymers in solutions, crystallization, gelation, and liquid crystals. Hands-on experience with polymer characterization. Expected: CHEM 0350. Enrollment limited to 40.

BIOL 1100. Cell Physiology and Biophysics. Current topics in cell physiology, with an emphasis on membrane-mediated interactions between cells and their environment. Topics may include: ion channel structure, function and regulation; intracellular regulatory molecules; mechanisms of sensory transduction; membrane receptors and second messenger systems; vesicle secretion; and cytoskeletal regulation of cell function. Lectures, discussion, and student presentations of the current literature. Expected: BIOL 0800 or NEUR 0010. Instructor permission required. Registration overrides will not be given out until after the first one or two classes. Enrollment limited to 30, and admission is based on seniority -- graduate students, seniors, then juniors (realistically, first and second-year undergrads have almost no chance of admission). A signup sheet will be passed around on the first day of class.

BIOL 1110. Topics in Signal Transduction. Signal transduction is one of the most rapidly developing fields in biomedical sciences. Defects in signaling pathways can be responsible for diseases such as cancer, diabetes, cardiovascular disorders and psychoses. This course offers students an overview of the molecular pathways that allow cells to receive and process signals from their external environment, with an emphasis on the emerging state-of-the-art techniques used in their study. Expected background: BIOL 0200, 0280, 0470, or 0500. Enrollment limited to 20 juniors and seniors. Instructor permission required.

BIOL 1120. Biomaterials. A biomaterial is defined as a material suitable for use in medical implants that come in direct contact with patients’ tissues. These include polymers, metals, and ceramics, and materials obtained from biological sources or through recombinant biotechnology. Goal: to provide comprehensive coverage of biomaterial science and technology. Emphasizes the transition from replacement to repair strategies. For advanced undergraduates and graduate students. Prerequisite: BIOL 0900 or instructor permission.
BIOL 1140. Tissue Engineering.  
Tissue engineering is an interdisciplinary field that incorporates progress in cellular and molecular biology, materials science, and engineering, to advance the goal of replacing or regenerating compromised tissue function. Using an integrative approach, we will examine tissue design and development, manipulation of the tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Expected: CHEM 0330, plus BIOL 0500 or 0800. Enrollment limited to 20. Instructor permission required.

BIOL 1150. Stem Cell Engineering  
Stem cell engineering focuses on using adult, embryonic, and induced stem cells to repair damaged or diseased tissues. This course will examine the role of stem cells in development, tissue homeostasis, and wound healing, as well as how they are being applied in regenerative medicine. A lecture and discussion format for major topic areas. Students will receive hands-on training in how to isolate, culture, and differentiate adult stem cells in a laboratory setting. Expected: CHEM 0330 and BIOL 0500 or an equivalent course in cell biology or physiology. Cell culture experience highly recommended. Enrollment limited to 20. Instructor permission required.

BIOL 1160. Principles of Exercise Physiology.  
Application of the basic principles of physiology to the study of the response mechanisms of the human body during exercise. Topics include muscle and neural control, energy metabolism, cardiovascular and respiratory effects, endocrinology, principles of training, and special topics (e.g., diving, high altitude, and microgravity). Student presentations based on scientific articles are included. Expected: BIOL 0800 or written permission of the instructor.

BIOL 1180. Comparative Animal Physiology.  
Comparative approach to the function and regulation of animal systems with an emphasis on vertebrates. Topics include circulation, gas exchange, neuromuscular function, excretion, acid-base and ion regulation, and temperature regulation. Considers the unity and diversity of physiological processes in animals differing both in phylogeny and environmental adaptation. Original papers are discussed. Expected: BIOL 0800 or equivalent.

BIOL 1190. Synaptic Transmission and Plasticity.  
Synapses are the means by which the nervous system communicates. In this seminar-style course, we will explore the molecular and physiological underpinnings of synaptic transmission. We will then examine ways in which synapses can modulate their strength during development, learning, and other adaptive processes. Expected: BIOL 0800 or NEUR 1020. Enrollment limited to 20. Instructor’s permission required. WRIT

BIOL 1200. Protein Biophysics and Structure.  
Structural biology is the science to determine 3-dimensional structures of biomacromolecules (i.e., proteins, RNA, and DNA). These structures enable biologists to understand and explore their function. Since proteins, RNA, and DNA are the primary molecules of life, structural biology enables us to understand and influence these molecular machineries which form the basis of all biological processes. Throughout the class, the students will see examples of biologically important proteins and protein complexes that will allow them to correlate structure and biological function. Prerequisite: BIOL 0280.

BIOL 1210. Synthetic Biological Systems.  
A multidisciplinary course that combines science and engineering providing a solid foundation in a cutting edge field of biological engineering. Synthetic biology is a mixture of biology, chemistry, engineering, genetic engineering and biophysics. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts, that fit together to form more complex systems. Expected: at least four courses beyond BIOL 0200, CHEM 0330, PHYS 0300, ENGN 0300, MATH 0900, or CSCI 0040.

BIOL 1220. Synthetic Biological Systems in Theory and Practice.  
A multidisciplinary laboratory, lecture, and discussion based course that combines several areas of science and engineering providing a foundation in the cutting edge field of synthetic biological engineering. The field of synthetic biology is centered around trying to make biology easier to engineer. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts that fit together making complex systems. This course will combine classes, guest lectures and discussion lab visits to give students the best possible tools for understanding and applying research in synthetic biology. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level, and permission of the instructor.

BIOL 1260. Physiological Pharmacology.  
Covers the physiology of human disease (e.g., Heart failure and arrhythmia; cancer signaling pathways with a focus on breast cancer; neurological disorders such as schizophrenia and Parkinson’s disease) and discusses the pharmacology of the drugs used to treat disease. A group of the most commonly prescribed drugs is discussed in terms of their fundamental modes of action and clinical importance. Expected: BIOL 0800.

BIOL 1270. Advanced Biochemistry.  
An advanced course in biochemistry, biochemical methods, and reading of the primary literature, featuring systematic coverage of the biochemistry of the central dogma, including DNA (replication, repair, recombination), RNA (regulation and mechanism of transcription, processing, turnover), and proteins structure, synthesis, modification, degradation, mechanisms of action, function). Expected: BIOL 0280, CHEM 0350, 0360. Graduate students register for BIOL 2270.

Provides a conceptual understanding of molecular events underlying development of human cancer. Focused on genetic changes leading to malignant transformation of cells. Covers cell cycle control, DNA damage, mutagenesis, cancer predisposition syndromes, oncogenic viruses, tumor immunology, metastasis, cancer chemotherapy and drug resistance. Lecture plus discussion of primary literature. Prerequisites: BIOL 0280, 0470 or 0500.

BIOL 1300. Biomolecular Interactions: Health, Disease and Drug Design.  
Interactions between the molecules of life-proteins, RNA, DNA, membrane components-underlie all functions necessary for life. This course focuses on how nature controls these interactions, how these interactions can go awry in disease, and how we can learn the rules of these interactions to design drugs to treat disease. Students will review the physical basis of molecular interactions, learn classic and state-of-the-art high-resolution and high-throughput tools used to measure interaction, and survey the experimental and computational strategies to harness these interactions using a case study in rational drug design. Prerequisite: Introductory Biochemistry (BIOL 0280). Enrollment limited to 20; instructor permission.

BIOL 1310. Developmental Biology.  
Covers the molecular and cellular events of development from fertilized egg to adult. Genetic basis of body form, cell fate specification and differentiation, processes controlling morphogenesis, growth, stem cells and regeneration will be examined. Differential gene regulation, intercellular signaling and their evolutionary conservation will be central to discussion of mechanisms governing developmental processes. Additional topics: developmental plasticity, impact of epigenetic and environmental factors, and basis of disease gleaned from developmental biology research. Live embryos will complement and reinforce concepts covered in class. Enrollment limited to 36. Expected: BIOL 0200 (or equivalent), and one course in genetics, cell biology or embryology.

This course is an advanced, seminar-based course. Primary literature is emphasized to complement the format of extensive student seminar presentations. It is essential that students have a strong background in biology in order to gain the most from this course. The emphasis of the course is student seminar presentation and extensive discussion on the material. This is often the first opportunity for students to present/discuss science in a seminar format. Expected background: a course in Cell Biology (e.g. BIOL 0500 or 1050), and two additional Biology courses above the introductory (BIOL 0200) level. Enrollment limited to 20.
BIOL 1410. Evolutionary Genetics. This course will focus on selected topics in molecular population genetics, molecular evolution, and comparative genomics. Classic and current primary literature at the interface of evolution and genetics will be discussed in a seminar format. The laboratory involves wet-lab exercises (allozymes, PCR-RFLP, sequencing), plus computer labs using DNA analysis packages. Students will prepare a final grant proposal on specific research interests. Expected: BIOL 0470 or 0480. Students MUST register for the lecture section and the lab. Enrollment limited to 20.

BIOL 1420. Experimental Design in Ecology. An overview and discussion of the basic principles used to design lab and field experiments in ecology and environmental science. Topics include: replication and statistical power, appropriate use of factorial designs, nonparametric methods, post hoc tests, natural versus manipulative experiments, experimental artifacts and impact study design. Discussions based on primary literature and a new text. Expected: BIOL 0420.

BIOL 1425. Phylogenic Biology. This course is the study of the evolutionary relationships between organisms, and the use of evolutionary relationships to understand other aspects of organism biology. This course will provide a detailed picture of the statistical, mathematical, and computational tools for building phylogenies and using them to study evolution. Enrollment is by instructor permission. Students will present scientific papers in class and complete a final project consisting of their own phylogenetic analysis. Expected Background: Evolutionary Biology and quantitative methods (such as statistics, computation, or math). Open to juniors, seniors, and graduate students. Enrollment limited to 16.

BIOL 1430. The Computational Theory of Molecular Evolution. This course employs intellectual traditions from computer science and biology to investigate the properties and principles of DNA sequence evolution. The roles of mutation, natural selection, population size and subdivision, and genetic recombination are explored. Lectures complemented by web-based computer exercises. Expected: either an introduction to evolution (BIOL 0200, 0480) or to computer science (CSCI 0150, 0160, 0170).

BIOL 1440. Marine Biology. An examination of current topics in the ecology of marine organisms and communities. Current literature and ideas are analyzed in a seminar format (3hr/week). A class research project provides hands-on experience with designing and interpreting experimental field work. Prerequisites: BIOL 0410 and 0420. Instructor’s permission required.

BIOL 1445. Human Population Genomics. An introduction to human genomics and the evolutionary forces that shape observed genetic variation across humans today. Topics will include the relationship among humans and other primates, human population genetics and genomics, and examples of the concomitant evolution of both cultural traits and domesticated organisms. Assignments include a class presentation and reviewing papers on a selected topic. Expected background: BIOL 0470 or 0480, and BIOL 0495, PHP 2500, or equivalent. Enrollment limited to 25. Instructor permission required.

BIOL 1470. Conservation Biology. Conservation Biology is the scientific study of the phenomena that affect the maintenance, loss, and restoration of biological diversity. Topics covered include: 1) the impacts of global warming, species invasions, and habitat destruction on biodiversity, 2) strategies developed to combat these threats, and 3) a consideration of key economic and ethical tradeoffs. Special attention will be paid to current debate and controversy within this rapidly emerging field of study. Readings will include the primary literature. A term-paper will be required. Prerequisite: BIOL 0420 or instructor permission. Enrollment limited to 30.

BIOL 1475. Biogeography. Will provide an overview of the field of biogeography—the study of geography of living organisms. Class meetings will be split between lectures and discussions. Each discussion will expose students to foundational papers, which set the context for the field’s development, and more recent papers, which show where the field is headed. Each student will conduct a short (but time consuming) original research project on some topic in biogeography. Prerequisites: BIOL 0420 and 0480. Expected: one taxonomy-based course (e.g., BIOL 0410, 0430, or 0460). Enrollment limited to 15 juniors, seniors, and graduate students. Instructor permission required.

BIOL 1480. Terrestrial Biogeochemistry and the Functioning of Ecosystems. Three fundamental multidisciplinary questions will be addressed: How do ecosystems work? What limits the growth of life on Earth? How are humans altering the framework in which all life exists? Earth is basically a closed chemical system, and the reactions that support life are fueled by sunlight. But added to this chemistry and physics is the tremendous influence of life. Life created an oxygen atmosphere; the evolution of biological nitrogen fixation exponentially increased how many organisms could exist, and the soils that support human food production developed only by biologically-mediated processes. Throughout Earth’s 4.5 billion-year history changes in Earth’s basic biogeochemical processes have been fairly slow. Under our inattentive stewardship, we have almost instantaneously altered all of the major element cycles. We will focus heavily on what these changes mean for life on Earth. Instructor permission required.

BIOL 1485. Climate Change Health and Ecology. Explore the linkages between climate change and health. Students will come to appreciate the topic through the foundations of the primary disciplines relevant to the field including global health, environmental change, disease ecology, and others. Climate-health linkages will be learned through weekly case studies addressed collectively through student-centered lectures, discussion of the primary literature, groups activities and guest lectures from campus faculty on topics ranging from climate migration to infectious disease range shifts. Expected background: BIOL 0475, or BIOL 1470, or PHP 1070, or PHP 1920, or equivalent experience with instructor’s permission. Enrollment limited to 12 juniors and seniors.

BIOL 1500. Plant Physiological Ecology. An in-depth look at plant ecological strategy, focusing on the anatomical and physiological adaptations of plants to particular environments. Additional topics include plant-animal interactions, historical biogeography, and community assembly processes. A comparative, phylogenetic approach is emphasized. Lectures present a broad overview of topics, and discussions focus on current outstanding problems. Lab exercises provide hands-on experience in designing experiments, measuring plant performance, and scientific writing. Required laboratory hours to be arranged by the instructor. Expected: BIOL 0430 or BIOL 0440. Enrollment limited to 15.

BIOL 1520. Innate Immunity. Innate immunity is the initial response to microbes that prevents infection of the host. It acts within minutes to hours, allowing the development of the adaptive response in vertebrates. It is the sole mechanism of defense in invertebrates such as insects. The components and mechanisms dictating this response are explored. Prerequisite: BIOL 0530. Enrollment limited to 30. Graduate students must obtain instructor permission.

BIOL 1540. Molecular Genetics. Covers advanced genetic and molecular methods and their use in analysis of complex biological phenomena such as development, signaling, behavior, and disease. Discusses how these techniques are applied in various organisms, with emphasis on the major Eukaryotic genetic model systems (Drosophila, nematodes, mouse, yeast, Arabidopsis) and on human genetics. Uses primary literature to analyze the design of forward- and reverse–genetic approaches to discover novel gene function. For advanced undergraduates and beginning graduate students. Prerequisite for undergraduates: BIOL 0470 or instructor permission. Expected background: any of BIOL 0280, 0500, 1050, or 1310. Graduate students must register for BIOL 2540.

BIOL 1550. Biology of Emerging Microbial Diseases. Emerging diseases influence the health of human populations in less developed countries and are expected to have similar effects worldwide. Rising incidence of “new” diseases underscores the need for knowledge of infection mechanisms and their outcomes. Focuses on biochemical, genetic, cellular and immunological events of emerging pathogens and host responses. Expected: BIOL 0470 or BIOL 0530.
BIOL 1560. Virology.
Emphasizes the understanding of molecular mechanisms of viral pathogenesis. Begins with a general introduction to the field of virology and then focuses on the molecular biology of specific viruses that are associated with human disease. Lectures based on current literature. Prerequisite: BIOL 0280, 0470, or 0530, or instructor permission.

BIOL 1600. Development of Vaccines to Infectious Diseases.
Provides background on steps involved in vaccine development, from conceptualization to production to immunization. Considers infectious diseases and their associated vaccines in the context of community health. Appropriate for any student wanting to gain an understanding of vaccine science, and also provides a foundation for other advanced courses in immunology and infectious disease, biomedical research, or medical/graduate studies. Activities include an in-class presentation and a research paper on a topic chosen by the student. Expected: BIOL 0200 or equivalent placement; BIOL 530, and at least one additional biology course.

How and why do animals run, jump, swim and fly? Physiology, anatomy, ecology, and evolutionary history all influence, and are influenced by, the way animals move around. We will integrate analyses from many levels of biological organization - from molecular motors, through bone-muscle systems, to biogeography - with methods and approaches from mechanics, fluid dynamics, and robotics. Expected: BIOL 0800 and PHYS 0030. Instructor permission required. WRIT

BIOL 1820. Environmental Health and Disease.
Fundamental concepts relating to the adverse effects of chemicals on human health. Topics include dose-response relationships, absorption, distribution, metabolism, excretion, mechanisms of toxicity, and the effects of selected environmental toxicants on organ systems. Many of these concepts will be reinforced through the use of a case-study approach where a pertinent environmental issue is incorporated into the ongoing lectures. Expected: BIOL 0500 and BIOL 0800, plus either ENVS 0490 or BIOL 0420. Advanced students have priority.

BIOL 1850. Environmental and Genetic Toxicology.
Human disease is produced by complex interactions between inherited genetic predisposition and environmental exposures. These interactions will be explored at the molecular, cellular, and systemic levels. Prototype diseases will include hereditary disorders of hemoglobin, hypercholesterolemia, birth defects, and cancer. Expected: Cell Biology.

BIOL 1870. Techniques in Pathobiology.
A methodology course featuring laboratory and lecture instruction in established and leading-edge technologies. Examples: flow cytometry (multi-parameter analysis, cell sorting, DNA analysis, apoptosis analysis); molecular biology (PCR, in situ hybridization, southern blotting, cytogenetics, gene cloning, bioinformatics); digital imaging (image acquisition, processing and analysis); light microscopy (confocal, immunohistochemistry); transmission electron microscopy (immuno/lectin/ enzyme cytochemistry); scanning electron microscopy (including x-ray microanalysis).

BIOL 1880. Comparative Biology of the Vertebrates.
The biology, structure, and evolutionary history of the vertebrates considered phylogenetically, emphasizing evolution of the major body systems. Stresses an evolutionary approach to the correlation of structure and function with environment and mode of life. Labs include dissection of several different vertebrates and comparative osteological material. Emphasis of course is on critical thinking rather than memorization of material. Recommended: BIOL 0320 or 0800. First year students must obtain instructor permission to register. Enrollment limited to 32. Students MUST register for the lecture section and the lab.

BIOL 1890. Human Histology.
This course will provide an in-depth treatment of the "stuff we are made of" and the wonderful logic of its organization. This course focuses first on the biology of the four basic tissues (epithelium, connective tissue, muscle and nerve) and second, how they contribute to the functional anatomy of all organs and systems. For Pfizer students only.

BIOL 1920B. Health Inequality in Historical Perspective.
Seminar takes a historical perspective to explore causes of health inequality in the US. Draws on studies from the 19th century-present. Examine socio–political and economic context of health/disease, focusing on how race, class, and gender shape the experience of health, disease causality, and public health responses. Includes health consequences of immigration, incarceration, race-based medicine, the Chicago heatwave, and Katrina. BIOL 0200 and in Africana Studies and/or science-technology courses preferred. Not for biology concentration credit. Suitable as related science or theme course for HBB. Enrollment restricted to 20, third-year students. Override required. Application for entrance distributed on first day of class.

BIOL 1920C. Social Contexts of Disease.
What shapes our understandings of disease, and what makes a disease real? How might we explain the demise of formerly prevalent diseases and the arrival of others? How do politics, technologies, and institutions affect conceptions of disease and structure their treatment? Will examine the impact of social context on patients' experiences of disease, including clinical, scientific, and public health approaches. Will consider disease in relation to social relationships, power of the state to regulate disease, and cultural care of the body. Enrollment limited to 20 students; instructor permission required; serves as Capstone in Health and Human Biology. Not for concentration credit.

BIOL 1920D. Race, Difference and Biomedical Research: Historical Considerations.
Course examines the debate over race, health, and genetics in historical context. An overarching goal is to understand how the social world informs the scientific questions, the design of research studies, and the interpretation of findings. How have the theories and practices of biomedical science and technology produced knowledge of "race" and racial difference historically? How does race relate to gender and class? What are the implications for understanding health inequality? Previous course work in biomedical science, history of science, science and technology studies, and Africana Studies preferred. For advanced undergraduate and graduate students. Instructor permission required. Enrollment limited to 20. WRIT

BIOL 1940O. Vertebrate Paleobiology in the Context of Changing Global Environments.
The earth as we know it today has not been a stable place for the organisms that inhabit it. Not only have continents shifted in position, resulting in changing global temperatures (with encroaching and retreating ice ages), but the composition of atmospheric gases has also fluctuated. This seminar will look at the pattern of vertebrate evolution in the context of how certain key events may have been influenced by changes in the global environment. Expected background: BIOL 0390 or 1880. Limited to 10 students. Instructor permission required.

BIOL 1941A. Plants in a Changing Planet.
Plants are the foundation of Earth's ecosystems and essential to human survival and civilization. This seminar will examine the physiological, ecological, and evolutionary responses of plants to rapid environmental change, and the consequences for agriculture and the structure and function of natural systems. Expected background: at least one of the following courses - BIOL 0420, 0430, 0440, 0480, or ENVS 0490.

Directed research/independent study in biological sciences: basic science, social studies of biomedical science, and clinically-oriented projects, mentored by individual faculty members in the Division of Biology and Medicine. Sites include campus and hospital based facilities. Information on specific opportunities with BioMed faculty is found in an online research database maintained at biology.brown.edu/bug/pages/research.html.

Basic science projects are suited for Biological Sciences programs; clinical, behavioral, and human subject-based projects for Health/Human Biology programs, along with opportunities for projects dealing with social studies of biological science and health. Projects can serve as the basis for Honors theses, or to fulfill research requirements in a Bio-Med concentration program; non-concentrators are also welcome. The Honors process is described here: Biology.brown.edu/bug/honors
(Note: Faculty from outside the Division may supervise projects, with advisor’s approval, for bio-med program concentrators, but should do so using their Department’s own Independent Study course number.)

REGISTRATION requires an agreement and research plan between faculty mentor and student, including a formal, written proposal. The proposal (available at the site biology.brown.edu/biomed/biology_research) must be submitted to Dean Marjorie Thompson (Rm. 124 Arnold) for review and approval, then an override for registration is issued to the student.

Most students do not preregister, but add this course at the start of the semester of the planned project. Required: A completed proposal form, sponsor’s and concentration advisor’s approval.

No more than two (2) semesters of BIOL 1950/1960 may be used toward a concentration program in the biological sciences.

Please see description for BIOL 1950.

BIOL 1970A. Stem Cell Biology.
This senior seminar course will provide an interactive forum by which up to twenty seniors (and qualified juniors with permission) will explore the biology of stem cells from their humble beginnings in the embryo to their potential use in regenerative medicine. The potency and regulation of embryonic and adult stem cell populations derived from diverse organisms will be contrasted with laboratory-derived human stem-like cells for biomedical applications. Critical reading of classical and modern literature in the field of stem cell biology will form the basis of student-led presentations, papers and ethical forums. Expected background: biochemistry, genetics and/or cell biology.

BIOL XLIST. Courses of Interest to Biology Concentrators.
Fall 2014
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Environmental Studies
ENVS 0455 Coastal Ecology and Conservation
ENVS 0490 Environmental Science in a Changing World

Biology (Graduate)

Associate Dean of Biology
Edward Hawrot

Associate Dean of Graduate and Postdoctoral Studies
Elizabeth O. Harrington

Graduate Biological Sciences Education

The Division of Biology and Medicine offers multiple programs of advanced graduate study leading to the degrees of A.M., Sc.M., and Ph.D. These programs are thematically based: Biotechnology; Molecular Biology, Cell Biology, and Biochemistry; Molecular Pharmacology and Physiology; Pathobiology; Ecology and Evolutionary Biology; Computational Biology; Neuroscience; and Biomedical Engineering.

The research network at Brown features advanced facilities situated on campus and at partner institutions which encourages discovery and innovation with state-of-the-art equipment and resources, including: Genomics Core (http://www.brown.edu/Research/CGP/core/equipment) and Proteomics Facility (http://biomed.brown.edu/epsrc_proteomics), Bioimaging facility (http://www.brown.edu/Facilities/Leduc_Bioimaging_Facility), Mouse Transgenic and Knockout Core (http://www.brown.edu/Departments/Molecular_Biology/transgenic), Animal Care Facilities (http://biomed.brown.edu/anare), Plant Environmental Center (http://www.brown.edu/Departments/EEB/greenhouse), Water Flume (http://www.brown.edu/Departments/EEB/research/morphylog.htm), RI Biobank (http://biomed.brown.edu/rhode-island-biobank), Molecular Pathology Core (http://biomed.brown.edu/Research/SRP/coreD.shtml). More information about the Division’s Research Facilities can be found here: http://biomed.brown.edu/research/facilities.

Students entering graduate programs generally have appropriate preparatory course work as well as significant research experience. Courses are chosen with the advice of program counselors, and may include, in addition to divisional offerings, courses offered by other university departments. As a part of the doctoral training most students will be required to participate in the teaching of one or more courses related to the program.

For further information on Graduate Study in the Biological Sciences at Brown, please visit the Office of Graduate and Postdoctoral Studies website: http://biomed.brown.edu/grad-postdoc/

Biotechnology Graduate Program

Brown University offers Master of Science (Sc.M.), Master of Arts (A.M.) and Doctor of Philosophy (Ph.D.) degrees in Biotechnology. The graduate program is designed for students with degrees in basic sciences such as biology, chemistry, biophysics, physics, mathematics, or material sciences that seek additional education and training in the biological sciences. The program is particularly directed towards students without an engineering degree.

Topics of research include: nanomedicine; neurotechnology; functional imaging; cardiovascular research; stem cell technology; biomaterials for cell and tissue growth; nanotechnology; drug and gene delivery, pharmaceutical technology; cancer; tissue engineering and drug discovery.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biotechnology-0

Ecology and Evolutionary Biology Graduate Program

The graduate program in Ecology and Evolutionary Biology is intended for highly qualified students who plan to pursue a career that includes research or teaching in ecology and/or evolutionary biology. Individual programs are designed to meet each student’s needs and interests while providing a strong background in ecology, evolutionary biology and related disciplines. All students are expected to attain proficiency in ecological and evolutionary theory, quantitative research methods, statistical analysis, writing, and oral presentation. Depending on the student’s interests, they may be expected to demonstrate proficiency in other areas such as functional morphology or genetics and genomics. This proficiency may be attained through coursework, seminars, independent reading, and laboratory and field programs. The Ecology and Evolutionary Biology program offers a Doctor of Philosophy (Ph.D.) degree as well as a 5th year Master of Science (Sc.M.) degree for students who would like to continue the research they started as an undergraduate.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-ecology-and-evolutionary-biology

Pathobiology Graduate Program

The graduate program in Pathobiology is an interdisciplinary and interdepartmental program devoted to biomedical research into the mechanisms of human diseases. The program offers a Doctor of Philosophy (Ph.D.) degree as well as a 5th year Master of Arts (A.M.) degree and a two year Master of Science (Sc.M) degree. The four major research and teaching thematic areas are: I) Toxicology & Environmental Pathology, II) Immunology & Infectious Diseases, III) Aging, and IV) Cancer biology. Training may be obtained in the areas of immunopathology, pulmonary pathology, chemical pathology, environmental and viral carcinogenesis, cancer biology, toxicologic pathology, extracellular matrix biology, hepatology, aging, and infectious diseases.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-pathobiology
Molecular Biology, Cell Biology, and Biochemistry Graduate Program

The graduate program in Molecular Biology, Cell biology, and Biochemistry (MCB) is intended for highly qualified students who plan to pursue a career which includes research in biology or medical sciences. The MCB Program offers a Doctor of Philosophy (Ph.D.) degree as well as 5th-Year Master of Arts (A.M.) and Master of Science (Sc.M.) degrees. The program is interdisciplinary, focusing on molecular and cellular aspects of developmental biology, genetics, genomics and gene expression, signal transduction, oncogenesis, immunology, protein biochemistry, structural biology, proteomics, cell surface receptors, molecular modeling, DNA/RNA-protein interactions, epigenetics, and virology.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomedical-molecular-biology-cell-biology-and-biochemistry

Molecular Pharmacology and Physiology Graduate Program

The graduate program in Molecular Pharmacology and Physiology offers advanced training appropriate for academic and research careers in the fields of biology and medical sciences that include molecular and structural pharmacology; neuropharmacology; cellular, comparative, and organ systems physiology; and chemical biology. Programs of study and research are developed individually in consultation with the student's advisor and advisory committee and are designed to ensure expertise in the student's principal field. The Molecular Pharmacology & Physiology Program offers a Doctor of Philosophy (Ph.D.) degree, as well as a 5th-Year Master of Science (Sc.M.) degree for students who would like to continue the research they started as an undergraduate.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomedical-molecular-pharmacology-and-physiology

Biomedical Engineering Graduate Program

The Biomedical Engineering (BME) program provides cutting-edge, interdisciplinary, graduate-level education at the interface of engineering, biology, and medicine. The program features an interdisciplinary approach in four complementary research areas: I) Neuroengineering, II) Biosensors and Bioplatforms, III) Mechanobiology, and IV) Tissue Engineering/Regenerative Medicine. Research in these areas is advancing the understanding of fundamental problems in engineering, biology, and medicine, while developing new therapies to improve the quality of life for people with medical problems. The program is distinguished by its quantitative rigor and strong collaborative connections between academic science, clinical medicine, and industry. The BME graduate program is designed for students with backgrounds in engineering, physics, or mathematics that seek additional education and training in the biological sciences.

The Biomedical Engineering program offers both the Master of Science (Sc.M) degree and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomedical-engineering

Courses

This course covers various aspects of structural and functional biology from primary to quaternary structure and deals with the 3D structure of proteins and nucleic acids and 3D structure determination. Course will be a mixture of lecture and class discussion/presentations. Students typically have taken an advanced undergraduate-level course in biology or biochemistry. Advanced undergraduates with permission. Enrollment limited to 20 students.

BIOL 2000C. Molecular Recognition and Signaling in Self and Non-self Interactions.

This course will cover cell signaling mechanisms that allow discrimination between self and non-self interactions in various biological contexts. Self/non-self signaling pathways from several model systems will be examined and their relevance to development and defense will be considered. Topics will include signaling in intra- and inter-species reproductive interactions, signaling in the establishment of symbioses, signaling upon predator attack, signaling in pathogen interactions, and co-evolution of pathogenic and resistance effectors. After one introductory lecture/discussion session led by the instructors, the remaining class meetings will be student led. Graduate course; open to senior undergraduates with appropriate prior coursework. Instructor permission required.

BIOL 2000D. Current Topics in Molecular, Cellular, Developmental Biology Biochemistry

Protein synthesis is a fundamental cellular process mediated by ribosomes. This course will focus on progress in understanding; ribosome structure and function, ribosome biogenesis and export, quality control, ribosome degradation, and interface of ribosomes with other cellular pathways. Students will present research publications on a given topic and lead a discussion examining the experimental approach and findings of each publication. Enrollment limited to 20. Intended for graduates and advanced undergraduates with instructor permission.

A technological revolution in genomics has exponentially increased our ability to gather biological data. A host of new methods and types of analysis has arisen to accommodate this dramatic shift in data collection. The broad scope of inquiry has ushered in an era of "system-wide" approaches and brute-force strategies where rare signals can be detected and studied. In this seminar we will cover papers that embody this new approach. Enrollment limited to 20 graduate students. Advanced undergraduates with appropriate course preparation and permission from instructor.

BIOL 2000F. From Kinases to Chromatin: How Cells Respond to Their Environment

This course introduces various aspects of molecular biology and biochemistry involved in cellular signaling pathways that regulate disease. Topics include kinases, apoptosis, cancer, epigenetics, stem cells, and transcription. Advanced undergraduates with instructor permission.

BIOL 2010. Quantitative Approaches to Biology

Graduate level introduction to quantitative and computational methods in modern biology. Topics include Programming, Modeling, Algorithms, Bioinformatics, Applied Statistics, Structural Biology, Molecular Dynamics, Enzyme Kinetics, and Population and Quantitative Human Genetics. Preference is given to graduate students in Molecular Biology, Cell Biology and Biochemistry and Molecular Pharmacology, Physiology, and Biotechnology. Limited to 20 students. Instructor permission required.

BIOL 2030. Foundations for Advanced Study in the Life Sciences.

A double-credit graduate course on multidisciplinary experimental approaches to biological questions. Focusing on primary literature, lectures and discussions cover the mechanisms and regulation of basic cellular processes involving nucleic acids (synthesis, structure, maintenance and transcription) and proteins (synthesis, maturation, function) and their integration into more complex circuits (signaling, organelle biogenesis and inheritance, cell cycle control). Discussion section is required. Required for PhD students in the MCB Graduate Program; all others must obtain instructor permission. Enrollment is limited to graduate students.

BIOL 2050. Biology of the Eukaryotic Cell.

(Undergraduate students should register for BIOL 1050.)
BIOL 2060. Ultrastructure/Bioimaging.
This course examines microscopy and image analysis in the life sciences. Theoretical and practical aspects of microscopy will be discussed. Students will obtain hands-on experience with electron microscopy, light microscopy, fluorescence microscopy, and confocal microscopy. Students will learn to display images in 3D. For graduate students and advanced undergraduates. Instructor permission required.

BIOL 2110. Drug and Gene Delivery.
Topics in drug delivery systems including history of the field, advantages of controlled release technology, stabilization and release of proteins, fabrication methods, regulatory considerations, economic aspects, patents and intellectual property rights, and more. Prepares students for research in industry and academia, and offers information for consultants in the field. Expected: BIOL 1090, 1120; CHEM 0350, 0360.

BIOL 2130. Techniques in Molecular and Cell Science.
This course provides hands-on laboratory training in state-of-the-art techniques in molecular and cellular sciences, and reinforces this training with didactic lectures that stress key principles, the quantitative approach and the most exciting applications of these technologies in the context of current research. Areas covered include cell culture, tissue engineering, DNA cloning, gene therapy, quantitative assays, microscopy and image analysis. Enrollment is limited to 12; written permission required. Permission will be granted after the first class. Students MUST register for the lecture section and a lab.

BIOL 2135. Pharmacokinetics and Drug Design.
Consists of the absorption, distribution, metabolism, and elimination of drugs. These factors, including dosage, determine the concentration of drugs at its sites of action, and intensity of effects. Will examine models describing the relationship between plasma drug concentrations and therapeutic drug effect. Will acquire biologic sampling techniques, analytic methods for measurement of drugs and metabolites, and procedures facilitating data used in designing drugs and dosage regimens. Prerequisite: BIOL 0800 or equivalent. Enrollment limited to 20. Preference given to graduate students in Biotechnology and BME, especially Masters students. Graduate students (PhD and ScM) from other programs enroll if permission of instructor is granted.

BIOL 2140. Principles in Experimental Surgery.
An introduction to the principles and practice of surgery, sterile technique, anesthesia, and laboratory animal care. Intended to provide highly supervised, hands-on experience in techniques for humane handling and surgical management of experimental animal subjects. Emphasizes surgical technique, anesthesia technique, and laboratory animal medicine. Prerequisite: BIOL 0800. Limited to five (5) Graduate students only. Instructor permission required. Students MUST register for the lecture section and the lab.

BIOL 2145. Molecular Targets of Drug Discovery
This course emphasizes the role of cell physiology in the identification of drug targets and the development of novel drugs. Specific protein drug targets such as G-protein coupled receptors will be examined in detail from identifying a target to development of drugs for that target and the physiological consequences. Prerequisite: BIOL 0800. Enrollment limited to 20. Preference is given to graduate students in Biotechnology and BME, especially Masters students. Graduate students from other programs may enroll if permission of the instructor is granted.

Focused on the effective dissemination of scientific information. Through practical examples of activities common to the profession (writing a grant proposal, presenting research work orally, and preparing a critical review of a submitted scientific manuscript), students will develop the skills necessary to effectively communicate scientific ideas, experiments and results. Each of the activities will be dissected into key sets that will be individually developed with the aid of interactive discussions and peer review. Enrollment limited to 12 graduate students.

BIOL 2156. Special Topics in Biotechnology Writing.
This course is open to Biotechnology Masters students not involved in lab-based research. Students choose from a list of topics and faculty mentors in the field of biotechnology. Teams conduct in-depth research and writing, with the goal of producing a final report and presentation equivalent to a professional consultant's report. Students meet weekly with mentor to monitor progress. Prerequisite: BIOL 0280 and 1120; CHEM 0350/0360 or equivalent. Enrollment limited to 20 students. Instructor permission required. Course is offered in both, Semester 1 and 2, and may be repeated once for credit.

This course will cover principles and practical applications of important analytical tools used in the field of Biotechnology. Topics covered include spectroscopy, chromatography, and physical and chemical methods of characterization of a variety of molecules used for therapeutic applications. The molecules will range in size from traditional drugs with molecular weights of less than 1000, peptides and proteins as well as SIRNA and industrial polymers. This course is suitable for students intending on pursuing a career in biomedical research in academia or industry. Prerequisites: BIOL 0280, BIOL 1120, CHEM 0350/0360, or equivalent course. Enrollment limited to 20 Masters students in Biotechnology and BME.

BIOL 2167. In Vitro Models for Disease.
This course will use case studies to examine high burden diseases, their pathophysiology, treatment, and the models used to study the disease. Literature will be used to discuss the current models for the disease and the associated limitations of each of these models. The course will also cover the use of animals in research and how new in vitro models could be used to decrease their use. This course is intended for graduate students in biology, engineering, or related fields. Prerequisites: BIOL 0200 and 0800, or equivalent. Enrollment limited to 20 graduate students.

BIOL 2170. Molecular Pharmacology and Physiology.
Fundamental concepts in pharmacology and physiology from the cellular to molecular level to organ systems. Required of first-year graduate students in Molecular Pharmacology and Physiology.

BIOL 2180. Experiential Learning Industry, ELI.
Experiential Learning in Industry is restricted to biomedical engineering (BME) Sc.M. and biotechnology (Biotech) Sc.M. students; permission also required. The course is an extended in-depth learning experience in an industry environment related to the discipline of BME and Biotech. Industry environments include: medical device, pharmaceutical or biotechnology and industries that provide BME and Biotech relevant services to the aforementioned companies including patent law, licensing, regulatory and consulting. Students will pursue Experiential Learning in Industry during one summer plus one semester or during two semesters for which they will receive credit towards their degree. This course is restricted to BME and Biotech Masters students only. Students must have successfully completed the first year of the BME Masters Program. Slots are limited so permission is required.

BIOL 2190. MPPB Professional Development Seminar.
Professional development seminar required of all first year graduate students in the Molecular Pharmacology and Physiology Graduate Program, and open to graduate students in other programs. Topics include grants and funding, effective oral presentation skills, alternative careers in science, and others. All students will be required to present a research seminar during the scheduled class time.

Instructor permission required for graduate students outside the Molecular Pharmacology and Physiology Graduate Program. Not intended for undergraduate students.

BIOL 2200A. Molecular Biology and Chemistry.
A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission. Enrollment limited to 20.

BIOL 2200B. Post–Transcriptional Regulations of Gene Expression.
Enrollment limited to 20.

BIOL 2200D. Current Topics in Biochemistry: Biochemical Genomics.
A critical evaluation of current research in biochemistry and molecular biology focusing on the mechanism and regulation of transcription. Intensive reading, critical analysis, and discussion of the relevant literature in the context of student presentations in seminars. Advanced
undergraduates with permission of the instructor. Enrollment limited to 20 students. Instructor permission required.

**BIOL 2210A. Molecular Mechanisms in Site–Specific Recombination and DNA Transposition.**
Enrollment limited to 20.

**BIOL 2210C. Current Topics in Molecular Biology: Cellular Quality Control Mechanisms.**
Protein synthesis is a fundamental cellular process that is dependent upon the rapid and accurate synthesis of ten to twenty thousand ribosomes per generation to carry out the equally rapid and accurate synthesis of protein. Progress in understanding Ribosome structure and function, Ribosome evolution, Ribosome biogenesis and coordination of cell growth with cell division will be explored using the current literature with weekly student seminars and a final research proposal.

**BIOL 2230. Biomedical Engineering and Biotechnology Seminar.**
Required of all first- and second-year graduate students in the Biomedical Engineering and Biotechnology Seminar graduate program, and open to others. Concepts of drug delivery and tissue engineering, implantation biology, and cellular therapy, as well as the research projects directed by program faculty. Students present research seminars and participate in presentations by outside speakers. Includes Journal Club activities. Open to graduate students only.

**BIOL 2240. Biomedical Engineering and Biotechnology Seminar.**
See Biomedical Engineering and Biotechnology Seminar (BIOL 2230) for course description.

**BIOL 2260. Physiological Pharmacology.**
The objective of this course is to present drugs in the context of the diseases they are used to treat. A list of the Common medically prescribed drugs will be discussed in terms of their fundamental modes of action and clinical importance. Pertinent background biochemistry, physiology, and pathology is provided, e.g., the electrophysiology of the heart is discussed as a background to anti-arrhythmic drugs. Course is relevant for students interested in medicine journalism, law, government, precollege teaching, biomedical research, and pharmacy. Expected: background in physiology. For graduate students ONLY register for BIOL 2260 (enrollment limit 15); all others BIOL 1260.

**BIOL 2270. Advanced Biochemistry.**
(Undergraduate students should register for BIOL 1270.)

**BIOL 2290A. Mechanisms of Virus Entry, Replication, and Pathogenesis.**
This course will focus on the interactions between viruses and host cells that contribute to invasion, manipulation of viral and cellular gene expression, and manipulation of the host’s response to infection. We will address interactions between viruses infecting humans, as well as those of plants, fungi, and bacteria. Students will be evaluated on their ability to critically analyze data in published manuscripts, including presentations of primary papers, classroom discussion, and completion of a research proposal. Expected: at least two of the following: BIOL 1050, 1270, 1520, 1540, 1560. Advanced undergraduates with permission of the instructor.

**BIOL 2290B. Mechanisms of Protein Synthesis and Impact on Human Disease.**
This course will examine mechanisms central to the regulation of protein synthesis in both prokaryotes and eukaryotes. Targeting protein synthesis through ribosomes is a proven drug target commonly used to treat many infectious diseases. The regulation of protein synthesis in eukaryotes is critical for myriad human conditions including aging and cancer, including the recently discovered role of microRNAs. This course will explore the common and unique mechanisms of regulation of protein synthesis between prokaryotes and eukaryotes and the importance of understanding these mechanisms for human health. For graduate students and advanced undergraduates with permission.

**BIOL 2290C. Neuronal Signaling meets the RNA World.**
The concept of one gene, one protein is nowhere more violated than in protein encoding genes expressed in the nervous system. We will cover a variety of post-transcriptional processing events which serve to generate protein diversity in the nervous system including alternative splicing, trans-splicing, and RNA editing. We will also address non-coding RNAs and their roles, in particular, in regulating nervous system function.

Since it is clear that nervous system complexity is not a function of gene number across large phylogenetic distances, the course will be aimed at instilling a greater understanding of how the regulation of shared "toolkit" genes results in organismal complexity. Advanced undergraduates with permission of the instructor.

**BIOL 2290D. Small RNA Regulation of Germ Cells and Development.**
Enrollment limited to 20.

**BIOL 2290E. Signal Transduction.**
This seminar course will provide a broad introduction to basic mechanisms of cell signaling from the extracellular environment to the nucleus of a cell, and to the mechanisms that regulate signal transmission. Topics of discussion will include: processing and modification of signaling molecules; signal recognition/ligand binding; co-receptors and receptor trafficking; intracellular relays; transduction to the nucleus; regulation of signal intensity and duration; feedback controls. Signal transduction pathways from several model systems will be examined and their relevance to development and disease will be considered. Senior undergraduates with permission of the instructors. Enrollment limited to 20.

**BIOL 2310. Developmental Biology.**
Covers the molecular and cellular events of development from fertilized egg to adult. Genetic basis of body form, cell fate specification and differentiation, processes controlling morphogenesis, growth, stem cells and regeneration are examined. Differential gene regulation, intercellular signaling and evolutionary conversation are central to discussion of mechanisms governing developmental processes. Additional topics: developmental plasticity, impact of epigenetic and environmental factors, and basis of disease gleaned from developmental biology research. Live embryos complement and reinforce concepts covered in class. Expected: BIOL0200 (or equivalent), and one course in genetics, embryology, cell biology or molecular biology. Enrollment limited to 36. (Undergraduate students register for BIOL 1310.)

**BIOL 2320E. Genetic Control of Cell Fate Decisions.**
A cell’s fate is acquired in a process whereby largely uncommitted progenitor cells are instructed down a commitment path that ultimately results in a specific cell type with distinct molecular and physiological properties. This process is critical for the establishment of all cell types and tissues and is poised to be a critical topic in cell-based therapeutic strategies. We will investigate the intrinsic and extrinsic mechanisms that manifest at the genetic level to impart cell fate decisions on progenitors. Advanced undergraduates with permission of the instructor.

**BIOL 2340. Neurogenetics and Disease.**
Genetic mutations provide a powerful approach to dissect complex biologic problems. We will focus on fascinating discoveries from "forward genetic" studies – moving from nervous system phenotype to genetic mutation discovery. There will be an emphasis of neurologic disease phenotypes and the use of novel genmic methods to elucidate the central molecular and cellular causes for these conditions. The course will emphasize the use of “reverse genetics” – engineered mutations in model systems – to dissect nervous system function and disease mechanisms. Disorders to be covered include autism, intellectual disability, schizophrenia, epilepsy. Enrollment limited to 20. Instructor permission required.

**BIOL 2350. The Biology of Aging.**
Studying the mechanisms underlying the process of aging promises to be one of the next frontiers in biomedical science. Understanding the biology of aging is important for the long-term possibility of increasing life span, and for the immediate benefits it will have on age-related diseases. As demographics of industrialized countries have changed, age-related diseases such as cancer/cardiovascular/stroke, osteoporosis/arthritis/Alzheimer’s have assumed epidemic proportions. Understanding the aging process is a pre-requisite for designing interventions for treatment. Focus is on examining the biology of aging through the examination of a molecular/cellular/genetic and demographic nature. Suggested prerequisites: BIOL 0200, 0280, 0470, 0800. Enrollment limited to 20. Advanced undergraduates with permission of instructor.
BIOL 2430. Topics in Ecology and Evolutionary Biology. Current literature in ecology, behavior, and evolutionary biology is discussed in seminar format. Topics and instructors change each semester. Representative topics have included: structuring of communities, biomechanics, coevolution, quantitative genetics, life history strategies, and units of selection. Expected: courses in advanced ecology and genetics.

BIOL 2440. Topics in Ecology and Evolutionary Biology. See Topics In Ecology And Evolutionary Biology (BIOL 2430) for course description.

BIOL 2450. Exchange Scholar Program.

BIOL 2540. Molecular Genetics. (Undergraduate students should register for BIOL 1540.)

BIOL 2640A. Viral Immunology. Viral Immunology is an advanced topics course in Microbiology and Immunology which will be focused on viral immunology. Weekly meetings will cover different issues concerning defense against viral infections and pathology related to viral infection, with focus on viral-host interactions. Topics will be selected to present either important basic concepts in the context of immune responses and/or major challenges in controlling viral infections. Recent advances in understanding virus-host interactions, host responses to viruses, cytokine regulation of immune responses or cytokine-mediated pathology during viral infections will be emphasized.

BIOL 2640B. Microbial Pathogenesis. Examines microbial pathogens and the underlying mechanisms by which infectious organisms cause diseases. Bacterial, fungal, protozoal and viral pathogens will be studied using tools of modern biology. Also examined are the host's immune responses to infection and disease. Areas covered include mechanisms of pathogen internationalization and survival, immune responses, signal transduction and pathophysiology. Expected: BIOL 0510, 0530, or 1550.

BIOL 2640C. The Immune System. Introduction to the experimental and theoretical foundations of immunology and the function of the mammalian immune system. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; and regulation of immune responses through cellular interactions. Application of concepts to medically significant issues (vaccines, transplantation, hypersensitivity, autoimmunity, cancer, immunodeficiency) is discussed. Interpretative analysis of experimental data is emphasized. Activities include written assignments that analyze a hypothetical immune system and a final paper addressing an immunological topic of the student's choosing. For Pfizer students only.

BIOL 2850. Introduction to Research in Pathobiology. Introduces incoming pathobiology graduate students with research opportunities in the laboratories of program faculty. Consists of seminars with individual faculty members in the graduate program in pathobiology. Required background reading of recent papers lead to a discussion of current research in the faculty member's laboratory. Additional discussions include safety and ethical issues in research. Open only to first-year graduate students in the program in pathobiology.

BIOL 2860. Molecular Mechanisms of Disease. This course is designed for Pathobiology Graduate Program students and requires an understanding of modern biochemistry and cell and molecular biology. Topics include cell injury and adaptation, inflammation, wound healing, thrombosis and vascular disease, carcinogenesis and environmental toxicology. Wilson's disease will be a focus of discussion throughout the course. Both research articles and a text will be used. Practical sessions will be scheduled to introduce various laboratory tools, including microscopy. The course will emphasize the development of presentation skills and research design, in the context of the tools and knowledge base critical to modern interdisciplinary research into mechanisms of disease. Undergraduates require instructor permission.

BIOL 2970. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

BIOL 2980. Graduate Independent Study. Independent study projects at the graduate level. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

BIOL 2985. Graduate Seminar. Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

BIOL 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

BIOL 2995. Thesis. Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

Neuroscience

Chair
Barry William Connors

Neuroscience is the scientific study of the nervous system, including its development, functions, and pathologies. It is an interdisciplinary field that encompasses neurobiology (anatomy, physiology, biochemistry, molecular biology, genetics), elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. The Department of Neuroscience offers an undergraduate concentration leading to the Sc.B. degree and a graduate program leading to the Ph.D. degree. These programs include courses offered by the department and by several allied departments. The Department of Neuroscience has modern facilities for conducting research in a broad range of areas from molecular mechanisms to behavior and undergraduate students are encouraged to pursue research projects.

For additional information, please visit: http://neuroscience.brown.edu/

Neuroscience Concentration Requirements

Neuroscience is an interdisciplinary field that seeks to understand the functions and diseases of the nervous system. It draws on knowledge from neurobiology as well as elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. Through the Neuroscience concentration, students develop foundational knowledge through courses in biology, chemistry, and mathematics as well as three core courses in neuroscience. They are also required to develop facility with research methodologies (through courses in statistics and laboratory methods) before moving into specific topics in the field (e.g., visual physiology, neurochemistry and behavior, and synaptic transmission and plasticity). Members of the Neuroscience faculty are affiliated with the Brown Institute for Brain Science, a multidisciplinary program that promotes collaborative research about the brain. Prospective concentrators should contact Heather_Shalvey@brown.edu in order to have a faculty advisor assigned to them.

Standard program for the Sc.B. degree

The concentration combines a general science background with a number of specific courses devoted to the cellular, molecular, and integrative functions of the nervous system. The concentration allows considerable flexibility for students to tailor a program to their individual interests. Elective courses focus on a variety of areas including molecular mechanisms, cellular function, sensory and motor systems, neuropharmacology, learning and memory, animal behavior, cognitive function, bioengineering, theoretical neuroscience and computer modeling.

The concentration in neuroscience leads to an Sc.B. degree. The following background courses, or their equivalent, are required for the degree:

Background Courses:
MATH 0090 Introductory Calculus, Part I
NEUR 1030. Neural Systems.
This lecture course examines key principles that underlie the function of neural systems ranging in complexity from peripheral receptors to central mechanisms of behavioral control. Prerequisite: NEUR 0010 or the equivalent. First year students require instructor approval.

NEUR 1040. Introduction to Neurogenetics.
Recent advances in molecular biology and molecular genetics have allowed researchers to test specific hypotheses concerning the genetic control of behavior and neurological disease. This course will familiarize you with the relatively new and exciting field of neurogenetics. We will cover basic topics, new ideas, and unsolved problems in neurogenetics primarily through the two assigned texts. However, neurogenetics is essentially a “frontier” area in neuroscience, and the best way to approach this topic is by scientific literature, which will be covered in some lectures.

NEUR 1044. Neural Dynamics.
Neurons and systems of neurons vary in their activity patterns on millisecond to second time scales, commonly referred to as “neural dynamics.” This course addresses mechanisms underlying this flexibility and its potential meaning for information processing in the brain. The course integrates biophysical, single neuron and human studies. Examples topics include the impact of attention on neural firing rates, oscillations and sensory representation in neocortex, and the origins and potential meaning of the dynamics during sleep. Students will be introduced to computational modeling as a method to gain insight into dynamics, but no prior mathematics or programming background is required.

NEUR 1440. Neural Dynamics.
Neurons and systems of neurons vary in their activity patterns on millisecond to second time scales, commonly referred to as “neural dynamics.” This course addresses mechanisms underlying this flexibility and its potential meaning for information processing in the brain. The course integrates biophysical, single neuron and human studies. Examples topics include the impact of attention on neural firing rates, oscillations and sensory representation in neocortex, and the origins and potential meaning of the dynamics during sleep. Students will be introduced to computational modeling as a method to gain insight into dynamics, but no prior mathematics or programming background is required.

NEUR 1540. Neurobiology of Learning and Memory.
Exploration of learning and memory from the molecular to the behavioral level. Topics will include declarative and procedural memory formation and storage, associative and non-associative learning, cellular and molecular mechanisms for learning, and disorders affecting learning and memory. Examples will be drawn from numerous brain areas and a variety of model systems, including humans. Students will gain experience interpreting experiments from primary literature. Prerequisite: NEUR 1020.

NEUR 1600. Experimental Neurobiology.
Intensive laboratory experience in neuroscience appropriate for students with basic background in Neurobiology. Learn and employ the classical neurophysiological techniques of extracellular recording, intracellular recording and receptive field mapping using a variety of animal species. Experiments will include recording of sensory signals in the cockroach leg; frog sciatric nerve and sciatric nerve/muscle preparation; intracellular recording of neurons in Aplysia; receptive field mapping in frog tectum; visual field mapping in the frog tectum. Instruction on and practice of effective science writing is another component to this course. Labs are supplemented by informal lectures. Enrollment limited to 18. WRIT

NEUR 1650. Structure of the Nervous System.
Combined lecture and laboratory course on the anatomy of the central nervous system. Lectures survey the circuitry of the major neural systems for sensation, movement, cognition, and emotion. Laboratory exercises (Mon. 10:30-12:30) include brain dissections, microscopy of neural tissue, and discussion of clinical cases. Prerequisites: NEUR 0010, 1020, and 1030. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 15, 2014. Instructor permission required.

NEUR 1660. Neural Basis of Cognition.
Lecture course. Emphasizes the systems approach to neuroscience and examines several neural systems that mediate perception, action,
higher visual and motor processing, learning, memory, attention, emotion, consciousness and sleep. The course focuses on experiments involving behavioral electrophysiology and discusses mechanisms mediating neural activity that mediates cognition. Prerequisites: NEUR 0010 and NEUR 1030, or instructor permission.

NEUR 1670. Neuropharmacology and Synaptic Transmission. Synaptic transmission will be studied from a biochemical and pharmacological point of view. We will explore the factors regulating neurotransmitter synthesis, storage, release, receptor interaction, and termination of action. Proposed mechanisms of psychoactive drugs and biochemical theories of psychiatric disorders will be examined. Prerequisites: NEUR 0010 and BIOL 0200 or the equivalent.

NEUR 1680. Computational Neuroscience. A lecture and computing lab course providing an introduction to quantitative analysis of neural activity and encoding, as well as modeling of neurons and neural systems. Emphasizes Matlab-based computer simulation. Prerequisites: NEUR 0010, 1020 or 1030; APMA 0410 or 1650, or equivalent. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 5, 2013. Instructor permission required.

NEUR 1740. The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders. The goal of this course is to illustrate what basic science can teach us about neurological disorders and how these pathologies illuminate the functioning of the normal nervous system. Consideration will be given to monoallelic diseases (e.g. Fragile X Syndrome, Duchenne Muscular Dystrophy and Tuberous Sclerosis) as well as genetically complex disorders, such as Autism, Schizophrenia and Alzheimer’s Disease. Emphasis will be on the cellular and molecular basis of these disorders and how insights at these levels might lead to the development of therapies. Prerequisites: NEUR 1020. BIOL 0470 suggested.

The brain, too, dances. Its rhythms are the result of millions of neurons coordinating each other’s activity. This course will explore how these rhythms are generated, how they relate to our perception and cognition, and how they can be used to better understand and diagnose psychiatric and neurological disorders. Our readings in this seminar will range from historical reviews of brain rhythms to modern primary literature employing cutting-edge experimental neuroscience techniques. Prerequisite: NEUR 0010 or the equivalent.

NEUR 1930A. Cognitive Neuroscience: Motor Learning. This critical reading course will investigate the behavioral and neural mechanisms of motor learning. Readings will focus on work done with neuroimaging, neural recording and neuropsychological approaches that have addressed how the brain organizes and controls different forms of motor learning including simple conditional, practice-related changes and sensory-motor associations. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.

NEUR 1930B. From Neurophysiology to Perception. This seminar will use readings from the research literature to explore the neural basis of perception. There will be an emphasis on vision, though other sensory modalities may be discussed. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.

NEUR 1930C. Development of the Nervous System. The course will explore core concepts of developmental biology in the context of the developing nervous system. Topics will include: neuronal specification, cell migration, axon guidance, synapse formation, and neural plasticity. Students will gain experience with the primary literature and learn about cellular and molecular mechanisms of brain development and the tools and model organisms used to study them. Sign up sheet available in Sidney Frank Hall, Rm. 315, beginning on November 4, 2014.

NEUR 1930D. Cells and Circuits of the Nervous System. Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Appropriate for graduates and undergraduates with strong neuroscience background. Offered alternate years. Previously offered as NEUR 2150.

NEUR 1930E. Great Controversies in Neurobiology. This upper-level course examines some of the great controversies in the history of neurobiology. Reading material is drawn primarily from the primary scientific literature, so students are expected to already be familiar with reading scientific papers. Each theme will focus on a particular controversy, examining experimental evidence supporting both sides of the issue. Prerequisites: NEUR 0010 and NEUR 1020. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 17, 2012. Instructor permission required.

NEUR 1930F. Brain Interfaces for Humans. Seminar course will cover developing and existing neurotechnology to restore lost human neurological functions. It will cover stimulation technologies to restore hearing, vision and touch, recording technologies to return function for persons with paralysis. The course will also cover devices to modulate brain function (e.g. deep brain stimulators). We will discuss early brain technologies, the present state neural sensors and decoders and future technology developments (e.g. brain-machine hybrids, human augmentation), as well as ethical implications. A final paper will be required. Instructor permission required. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030; 1 year of physics, calculus. Enrollment restricted to 20 Neuroscience Concentrators and Graduate Students. Sign-up sheet in Sidney Frank Hall, room 315 beginning April 16, 2013.

NEUR 1930G. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development. The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructors permission required. Enrollment limited to 15. Sign-up Sheet in Sidney Frank Hall 315 beginning April 16, 2013.

NEUR 1930I. Neural Correlates of Consciousness. This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up required by Google Docs. Strongly Recommended: NEUR 1030. Enrollment limited to 15. Instructor permission required.

NEUR 1930N. Region of Interest: An In-Depth Analysis of One Brain Area. In-depth exploration of one region of the brain. Topics will include: cell types and properties; synaptic properties; plasticity; connections to other brain areas; sub-divisions within the area; the region's role in sensation and perception; the region's role in action and behavior; the region's role in learning and memory; and diseases and disorders. Students will gain a deeper understanding of concepts and principles that apply throughout the brain. Students will gain experience with primary literature and learn about techniques for studying the area. Possible topic for Spring 2015: The Basal Ganglia. Sign-up sheet in SFH, Room 315 beginning April 15, 2014.

NEUR 1940B. Neuroethology. Neuroethology is concerned with the neural systems serving such naturally occurring behaviors as orientation in the environment, finding food, predator detection, social communication, circadian and seasonal rhythms, and locomotion and tracking. This seminar will examine selected examples of the neuroethological approach to analysis of brain function, which sometime leads to conclusions different from those of laboratory-based experiments on traditional animal models. Sign-up sheet in Sidney Frank Hall, room 315 beginning November 5, 2013. Instructor permission required.

NEUR 1940C. Topics in Visual Physiology. Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Appropriate for graduate
students and undergraduates with a strong neuroscience background. Offered in alternate years. (Previously offered as NEUR 2120.)

**NEUR 1940D. Higher Cortical Function.**
This reading course examines a series of high-level neurocognitive deficits from the perspectives of popular science and basic neuroscience. Prerequisite: NEUR 1030. Instructor permission required. Sign-up sheet in Sidney Frank Hall, Room 318 beginning November 4th.

**NEUR 1940E. Molecular Neurobiology: Genes, Circuits and Behavior.**
In this seminar course, we will discuss primary research articles, both recent and classical, covering topics ranging from the generation of neuronal diversity to the control of behavior by specific neural circuits. Instructor permission required; enrollment limited to 15. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 4, 2014.

**NEUR 1940G. Drugs and the Brain.**
This is a seminar course devoted to the reading and analyzing of original research articles dealing with the interaction between drugs and the brain. This will include drugs used to analyze normal brain function, as well as drugs of abuse and drugs used for therapeutic purposes. This course is intended for undergraduate and graduate students with a strong background in neuropharmacology. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required.

**NEUR 1940I. Neural Correlates of Consciousness.**
This course will consider the neurosciences of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required.

**NEUR 1970. Independent Study.**
Laboratory-oriented research in neuroscience, supervised by staff members. A student, under the guidance of a neuroscience faculty member, proposes a topic for research, develops the procedures for its investigation, and writes a report of the results of his or her study. Independent study may replace only one required course in the neuroscience concentration. Prerequisites include NEUR 0010, 1020 and 1030. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Permission must be obtained from the Neuroscience Department.

**NEUR 2010. Graduate Proseminar in Neuroscience.**
A study of selected topics in experimental and theoretical neuroscience. Presented by neuroscience faculty, students, and outside speakers. A required course for all students in the neuroscience graduate program.

**NEUR 2020. Graduate Proseminar in Neuroscience.**
See Graduate Pro-Seminar In Neuroscience (NEUR 2010) for course description.

**NEUR 2030. Advanced Molecular and Cellular Neurobiology I.**
Focuses on molecular and cellular approaches used to study the CNS at the level of single molecules, individual cells and single synapses by concentrating on fundamental mechanisms of CNS information transfer, integration, and storage. Topics include biophysics of single channels, neural transmission and synaptic function. Enrollment limited to graduate students.

**NEUR 2040. Advanced Molecular and Cellular Neurobiology II.**
This course continues the investigation of molecular and cellular approaches used to study the CNS from the level of individual genes to the control of behavior. Topics include patterning of the nervous system, generation of neuronal diversity, axonal guidance, synapse formation, the control of behavior by specific neural circuits and neurodegenerative diseases. Enrollment is limited to graduate students.

**NEUR 2050. Advanced Systems Neuroscience.**
Focuses on systems approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major sensory, regulatory, and motor systems. Enrollment limited to graduate students.

**NEUR 2060. Advanced Systems Neuroscience.**
Focuses on cognitive approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major cognitive systems, including perception, decisions, learning and memory, emotion and reward, language, and higher cortical function. Instructor permission required.

**NEUR 2110. Statistical Neuroscience.**
A lecture and computing lab course for senior undergraduate and graduate students with background in either systems neuroscience or applied math/ biomedical engineering on the statistical analysis and modeling of neural data, with hands-on Matlab/Octave/Python-based applications to real and simulated data. Topics will include signal processing, hypothesis testing and statistical inference, modeling of multivariate time series and stochastic processes in neuroscience and neuroengineering, neural point processes, time and spectral domain analyses, and state-space models. Example datasets include neuronal spike trains, local field potentials, ECoG/EEG, and fMRI. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 4, 2014. Instructor permission required.

**NEUR 2120. Topics in Visual Physiology.**
Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Primarily for graduate students with a strong background in neuroscience and a working knowledge of the anatomy and physiology of the mammalian visual system. Offered in alternate years. Instructor permission required.

**NEUR 2150. Cells and Circuits of the Nervous System.**
Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Primarily for graduate students with a background in basic neurobiology, or undergraduates with permission. Offered alternate years.

**NEUR 2160. Neurochemistry and Behavior.**
Examines behavior from a neurochemical perspective via readings and discussions based on original research articles. Intended primarily for graduate students with a strong background in neurochemistry and neuropharmacology and advanced undergraduates with an appropriate background. Offered alternate years. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 4, 2014.

**NEUR 2920. Behavior: A Genetic and Molecular Perspective.**
Many of the cellular and molecular mechanisms that underlie behavior are conserved across species. This seminar course draws on work in invertebrate and vertebrate species to examine the genes and molecules that have been implicated in diverse behaviors. Topics to be discussed include circadian rhythms, pair bonding, migration, and aggression. Each week, students will read two to three papers from the primary literature and actively participate in class discussion. Prerequisites: NEUR 0010 and NEUR 1020 (undergraduate students) or NEUR 2030 (graduate students). Enrollment limited to 13. Instructor permission required.

**NEUR 2930C. Historical Foundations of the Neurosciences.**
Two year sequence starting Fall 2010; students register for one year at a time. The first year (2010-2011) will examine the history of basic neuroscientific concepts from the late Greeks (Galen) to the later 19th century, up to Cajal (neuron doctrine) and Sherrington (reflexes and integration). Since the seminar meets only monthly, it must be taken in the Fall and Spring semesters to receive a semester’s credit. For credit, a substantial paper (approximately 15 pages) is required at the end of the Spring semester. Primarily for graduate students in neuroscience, cognitive science, and psychology. Others may be admitted after discussion with the instructor. Auditors are welcome if they share in the rotating duty of presenting seminars. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 20, 2010.

**NEUR 2930E. Bench to Bedside: Unraveling Diseases of the Nervous System.**
Enrollment restricted to graduate students.
NEUR 2930F. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.
The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructor permission required. Enrollment limited to 15 Graduate students. Sign-up sheet in Sidney Frank Hall 318 beginning April 22nd.

NEUR 2940A. Advanced Molecular Neurobiology.
No description available.

NEUR 2940G. Historical Foundations of the Neurosciences II.
Continuation of a two year sequence focusing on the conceptual foundations in the history of neuroscience, from the late nineteenth century to the present. Primarily for graduate students in neuroscience, cognitive science, and psychology, but senior undergraduates may be admitted with written permission from the instructor. Seminar meets monthly, and must be taken for the full year to receive one semester credit.

NEUR 2940H. Ethics and Skills Workshop.
The ethics and skills workshops will be lead by faculty trainers in the Neuroscience Graduate Program. We will cover the following or similar topics over a two year period: Plagiarism, scientific accuracy, data ownership, expectations of advisory committees and mentors, authorship disagreements, and conflicts among lab members. Enrollment restricted to graduate students.

NEUR 2940I. Neural Correlates of Consciousness.
Will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead the discussions. Primarily for graduate students. Senior undergraduates neuroscience concentrators and others may be admitted after discussion with the instructor. Instructor permission required. S/NC

NEUR 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

NEUR 2980. Graduate Independent Study.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

NEUR 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
The School of Engineering

Dean
Lawrence E. Larson
Brown University’s School of Engineering educates future leaders in the fundamentals of engineering in an environment of world-class research. We stress an interdisciplinary approach and a broad understanding of underlying global issues. Collaborations across the campus and beyond strengthen our development of technological advances that address challenges of vital importance to us all.

Along with our associations with the other scholarly disciplines – biology, medicine, physics, chemistry, computer science, the humanities and the social sciences – our co-operations bring unique solutions to challenging problems. The School focuses on unique and innovative clustering of faculty; in terms of research groups, engineers of all types team together with non-engineers to tackle some of the biggest problems facing engineering and science today. Our talents and expertise lie in the interdisciplinary domain where the seemingly diverse disciplines converge.

The School of Engineering offers courses and programs leading to the Bachelor of Science (Sc.B. - seven of the eight programs are ABET accredited), the Bachelor of Arts (A.B.), the Master of Science (Sc.M), The Master of Science in Innovation Management and Entrepreneurship (Sc.MIME), and the Doctor a Philosophy (Ph.D.).

The Barus and Holley Building houses both the School of Engineering and the Department of Physics. The building contains additional engineering laboratories as well as offices for faculty and graduate students.

For additional information please visit the School’s website at: http://brown.edu/academics/engineering

Engineering Concentration Requirements

The concentration in Engineering equips students with a solid foundation for productive careers in engineering, to advance the knowledge base for future technologies, and to merge teaching, scholarship, and practice in the pursuit of solutions to human needs. The concentration offers one standard A.B. program, and seven ABET-accredited Sc.B. degree programs: biomedical, chemical and biochemical, civil through May 2016, computer, electrical, materials, and mechanical engineering. (Note: Students interested in structural engineering entering in the class of 2017 and beyond may pursue a Structures track within the ABET-accredited Mechanical Engineering program. The Civil track has been discontinued for all new students entering after Fall 2012.) Unaccredited Sc.B degree programs in Environmental engineering and Engineering Physics are also offered.

Standard program for the A.B. degree

Candidates for the Bachelor of Arts (A.B.) degree with a concentration in Engineering must complete at least eight approved Engineering courses. The eight courses must include, and at least two 1000-level Engineering courses. Of these 1000-level courses, one must be a design or independent study course and the other an in-classroom experience. The set of Engineering courses must be chosen with careful attention to the pre-requisites of the 1000-level courses. Please note that not all engineering courses can be used to satisfy the engineering course requirement for the A.B. degree. For example, the following courses cannot be used to satisfy the engineering course requirement for the A.B. degree: ENGN 0020, ENGN 0090, ENGN 0900, ENGN 0930A, ENGN 0930C, ENGN 1010. For this reason, it is essential that the set of courses must be developed through consultation with the concentration advisor.

The A.B. program also requires preparation in Mathematics equivalent to MATH 0200 and APMA 0330, as well as at least one college-level science course from the general areas of chemistry, life sciences, physics, or geological sciences. Remedial courses, such as CHEM 0100, cannot be used to satisfy this requirement. A programming course is also recommended, but not required. The entire program is subject to approval by the Engineering AB Concentration Advisor and the Engineering Concentration Chair.

Standard programs for the Sc.B. degree

Standard programs for the Sc.B. degree include seven ABET-accredited degree programs: biomedical engineering, and the following tracks in Engineering: chemical and biochemical, civil (through 2016), computer, electrical, materials, and mechanical engineering. In addition, unaccredited programs in Environmental Engineering, and Engineering and Physics, are offered. Students may also petition the concentration committee to pursue a ‘special’ engineering Sc.B degree of their own design. Students with a special concentration will receive an Sc.B degree in engineering, but a specific area of specialization will not be noted on their transcript. These programs are described in detail in the booklet, Engineering Undergraduate Programs (available online at http://brown.edu/academics/engineering/undergraduate-study/program-guide).

Students without one year of secondary school level preparation in calculus should take MATH 0090, MATH 0100 in their first year. These students need to be familiar with multivariable calculus for ENGN 0510, which is often taken during the first semester of the sophomore year. Such students are urged to acquire the necessary math background through self-study, by taking a summer course, or by deferring until additional mathematics has been taken. In addition, all students must successfully complete a minimum of four courses in the humanities and/or social sciences.

The program of each student must be approved by the Engineering Concentration Committee, which issues more detailed guidelines and program suggestions.

Chemical and Biochemical Track: ABET Accredited

1. Core Courses:
   - ENGN 0030 Introduction to Engineering 1
   - ENGN 0040 Dynamics and Vibrations 1
   - ENGN 0410 Materials Science 1
   - ENGN 0510 Electricity and Magnetism 1
   - ENGN 0520 Electrical Circuits and Signals 1
   - ENGN 0720 Thermodynamics 1
   - ENGN 0810 Fluid Mechanics 1
   - CHEM 0330 Equilibrium, Rate, and Structure 1
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1

2. An Upper-level Sequence:
   - ENGN 1110 Transport and Biotransport Processes 1
   - ENGN 1120 Chemical and Biochemical Reactor Design 1
   - ENGN 1130 Phase and Chemical Equilibria 1
   - ENGN 1140 Chemical Process Design 1
   - ENGN 1710 Heat and Mass Transfer 1
   - CHEM 0350 Organic Chemistry 1

One additional elective Chemistry course with a significant laboratory component 2

3. One approved, upper-level elective course in the natural sciences, to be selected from the four specific areas of chemistry, physics, life sciences, and materials science. 3

Total Credits 21
Students interested in Environmental Problems and Planning are directed to the ABET-accredited program in Chemical and Biochemical Engineering. Students entering in the class of 2017 with interest in Structural Engineering will be able to concentrate in this discipline through a Structures track within the ABET-accredited Mechanical Engineering program.

Important Announcement: Civil Engineering as a standalone ABET accredited program will continue through May, 2016, and will be available to all students currently enrolled at Brown, including those who arrived as Freshmen in the Fall of 2012 (the class of 2016).

Civil Engineering Track (Available to students entering Brown on or before the Fall of 2012): ABET Accredited

**Important Announcement:** Civil Engineering as a standalone ABET accredited program will continue through May, 2016, and will be available to all students currently enrolled at Brown, including those who arrived as Freshmen in the Fall of 2012 (the class of 2016).

Students interested in Environmental Problems and Planning are directed to the ABET-accredited program in Chemical and Biochemical Engineering.

1. Core courses:
   - ENGN 0030 Introduction to Engineering
   - ENGN 0040 Dynamics and Vibrations
   - ENGN 0310 Mechanics of Solids and Structures
   - ENGN 0410 Materials Science
   - ENGN 0510 Electricity and Magnetism
   - ENGN 0520 Electrical Circuits and Signals
   - ENGN 0720 Thermodynamics
   - ENGN 0810 Fluid Mechanics
   - CHEM 0330 Equilibrium, Rate, and Structure
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering)
   - MATH 0200 Intermediate Calculus (Physics/Engineering)
   - APMA 0330 Methods of Applied Mathematics I, II
   - APMA 0340 Methods of Applied Mathematics I, II
   - CSCI 0040 Introduction to Scientific Computing and Problem Solving

2. An advanced sciences course GEOL 1580 Quantitative Elements of Physical Hydrology

3. Seven additional courses (six credits), depending on the area of interest:
   - ENGN 1120 Phase and Chemical Equilibria
   - ENGN 1300 Structural Analysis
   - ENGN 1380 Design of Civil Engineering Structures
   - ENGN 1930D Large Scale Engineering Design Project
   - ENGN 1930 Soil Mechanics and Principles of Foundation Engineering
   - ENGN 1930D Large Scale Engineering Design Project

Total Credits: 21

Attention is called to the following courses as particularly relevant technical electives: ENGN 1110, ENGN 1380 ENGN 1710, ENGN 1740, and ENGN 1860.

Computer Engineering Track: ABET Accredited

The concentration shares much of the core with the other engineering programs, but is structured to include more courses in computer science, and a somewhat different emphasis in mathematics.

1. Core Courses:
   - ENGN 0030 Introduction to Engineering
   - ENGN 0040 Dynamics and Vibrations
   - ENGN 0510 Electricity and Magnetism
   - ENGN 0520 Electrical Circuits and Signals
   - Select one of the following Series:
     - MATH 0190 Advanced Placement Calculus (Physics/Engineering)
     - MATH 0200 Advanced Placement Calculus (Physics/Engineering)
   - APMA 0330 Methods of Applied Mathematics I, II
   - Select one of the following:
     - CSCI 0040 Introduction to Scientific Computing and Problem Solving
     - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
     - CSCI 0160 Introduction to Scientific Computing and Problem Solving

2. Advanced Core:
   - MATH 0520 Linear Algebra
   - or CSCI 1570 Design and Analysis of Algorithms
   - CSCI 0310 Introduction to Computer Systems
   - ENGN 1570 Linear System Analysis
   - ENGN 1630 Digital Electronics Systems Design

3. Specialty Courses:
   - ENGN 1620 Analysis and Design of Electronic Circuits
   - ENGN 1640 Design of Computing Systems
   - Select one of the following:
     - ENGN 1580 Communication Systems
     - ENGN 1600 Design and Implementation of Very Large-Scale Integrated Systems
     - ENGN 1650 Embedded Microprocessor Design
     - ENGN 1680 Design and Fabrication of Semiconductor Devices
     - ENGN 2530 Digital Signal Processing
     - ENGN 2910A Advanced Computer Architecture
1. Core Courses:

- ENGN 0030 Introduction to Engineering 1
- ENGN 0040 Dynamics and Vibrations 1
- ENGN 0410 Materials Science 1
- ENGN 0510 Electricity and Magnetism 1
- ENGN 0520 Electrical Circuits and Signals 1
- ENGN 0720 Thermodynamics 1
- ENGN 0310 Mechanics of Solids and Structures 1
- ENGN 0810 Fluid Mechanics 1
- CHEM 0330 Equilibrium, Rate, and Structure 1
- MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
- MATH 0200 Intermediate Calculus (Physics/Engineering) 1
- APMA 0330 Methods of Applied Mathematics I, II 1
- APMA 0340 Methods of Applied Mathematics I, II 1
- CSCI 0040 Introduction to Computer Graphics 1
- CSCI 1760 Software System Design 1
- CSCI 1730 Design and Analysis of Algorithms 1
- CSCI 1680 Computer Networks 1
- CSCI 1670 Operating Systems 1
- CSCI 1570 Introduction to Programming Languages 1
- CSCI 1410 Applied Artificial Intelligence 1
- CSCI 1480 Building Intelligent Robots 1
- CSCI 1230 Introduction to Software Engineering 1
- CSCI 1270 Database Management Systems 1
- CSCI 1380 Distributed Computer Systems 1
- CSCI 0320 Applied Artiflcial Intelligence 1
- CSCI 0040 Introduction to Computer Graphics 1
- CSCI 0320 Introduction to Software Engineering 1
- ENGN 0310 Mechanics of Solids and Structures 1
- ENGN 0810 Fluid Mechanics 1
- ENGN 0510 Electricity and Magnetism 1
- MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
- MATH 0200 Intermediate Calculus (Physics/Engineering) 1
- APMA 0330 Methods of Applied Mathematics I, II 1
- CSCI 0040 Introduction to Computer Graphics 1

2. Four courses from the following:

- ENGN 0150 Linear System Analysis 4
- ENGN 1620 Analysis and Design of Electronic Circuits 4
- ENGN 1630 Digital Electronics Systems Design 4
- ENGN 1000 Projects in Engineering Design 4
- ENGN 1650 Embedded Microprocessor Design 4
- ENGN 1970 Independent Studies in Engineering 4
- ENGN 1971 Independent Studies in Engineering 4

3. The student shall choose the other three courses to satisfy requirements of a selected specialty area: Bioengineering, Biomedical Engineering, or Electrical Engineering.

Total Credits 1

1 Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.brown.edu/academics/engineering/content/program-guide).

Environmental Engineering Track

1. Core Courses:

- ENGN 0030 Introduction to Engineering 1
- ENGN 0040 Dynamics and Vibrations 1
- ENGN 0410 Materials Science 1
- ENGN 0510 Electricity and Magnetism 1
- ENGN 0720 Thermodynamics 1
- ENGN 0810 Fluid Mechanics 1
- CHEM 0330 Equilibrium, Rate, and Structure 1
- ENVS 0490 Environmental Science in a Changing World 1
- BIOL 0200 The Foundation of Living Systems 1
- MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
- MATH 0200 Intermediate Calculus (Physics/Engineering) 1
- APMA 0330 Methods of Applied Mathematics I, II 1

2. Approved required course on Statistical methods 1

3. Approved required Earth Science course 1

1 Capstone Course/Independent Study: ENGN 1970/ENGN 1971, an independent study relevant to the specialty selected by the student. The independent study project should provide students with exposure to current research topics. In order to assure satisfactory progress and to earn honors, students enrolled will meet at least bi-weekly with their advisors and give two oral reports to the group during the semester. A final written report will also be required. In addition, students will meet as a group with faculty to share ideas and help nurture an environment of collaborative research.
4. Approved required Biology course related to environmental sciences 1
5. Approved Engineering capstone design course (e.g. ENGN 1000 or equivalent) 1
6. Five upper level courses (at least four must be ENGN) 1,2 5

Total Credits 21

1 At least five courses from numbers 2-6 must be at the 1000 level or above.
2 Consult the School of Engineering Undergraduate Program booklet regarding specific details of specific focuses in the Environmental Engineering track: http://www.brown.edu/academics/engineering/sites/brown.edu.academics.engineering/files/uploads/EUP%20Year12_13FINAL.pdf

Materials Engineering Track: ABET Accredited

Six upper level courses to satisfy requirements of a selected specialty area: Aerospace Applications, Biomechanics, Energy Conversion and Fluid and Thermal Systems, Engineering Mechanics, or Mechanical Systems: Dynamics, Materials and Design. 1

Total Credits 21

1 Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.engin.brown.edu/undergrad/guide/index.html).

Engineering and Physics Concentration Requirements

The Sc.B. degree program in Engineering-Physics, sponsored jointly by the Division of Engineering and the Department of Physics, provides students with an in-depth understanding of the fundamental principles underlying modern technology. Specifically, it gives those who are interested in applied technical problems a strong background in physics and mathematics beyond that given in the standard engineering program. Students take a significant part of the usual engineering and physics programs, obtain substantial laboratory experience, and take several upper-level courses focusing on applied physics. The program allows students to take either the standard physics or engineering programs during their first two years and then switch to this combined program.

The total number of physical science courses required for the program is 19. (We assume that a student begins his or her mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 or equivalent are encouraged but not required to take an additional upper-level mathematics course.)

The courses are as follows:

Select one of the following Series:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 0050 &amp; PHYS 0060</td>
<td>Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics</td>
<td>2</td>
</tr>
<tr>
<td>PHYS 0070 &amp; PHYS 0160</td>
<td>Analytical Mechanics and Introduction to Relativity and Quantum Physics</td>
<td>2</td>
</tr>
<tr>
<td>ENGN 0030 &amp; ENGN 0040</td>
<td>Introduction to Engineering and Dynamics and Vibrations</td>
<td>2</td>
</tr>
</tbody>
</table>

Select one of the following Series:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0170 &amp; MATH 0180</td>
<td>Advanced Placement Calculus and Intermediate Calculus</td>
<td>2</td>
</tr>
</tbody>
</table>

MATH 0190  Advanced Placement Calculus (Physics/ & MATH 0200 Engineering)
& Intermediate Calculus (Physics/Engineering)

Select three additional higher-level math, applied math, or mathematical physics (PHYS 0720) courses.

CSCI 0040  Introduction to Scientific Computing and Problem Solving (or higher-level programming course such as CSCI 0150.)

Select one of the following Series:

- PHYS 0470  Electricity and Magnetism
  & PHYS 1510  and Advanced Electromagnetic Theory
- ENGN 0510  Electricity and Magnetism
  & ENGN 1560  and Applied Electromagnetics
- PHYS 0500  Advanced Classical Mechanics
  or ENGN 1370  Advanced Engineering Mechanics
- PHYS 1410  Quantum Mechanics A
- PHYS 1420  Quantum Mechanics B
- PHYS 1530  Thermodynamics and Statistical Mechanics
  or ENGN 0720  Thermodynamics
- ENGN 1620  Analysis and Design of Electronic Circuits

Select one of the following:

- ENGN 0310  Mechanics of Solids and Structures
- ENGN 0810  Fluid Mechanics
- CHEM 0330  Equilibrium, Rate, and Structure
- A physics course on continuum mechanics.

Select one of the following:

- ENGN 1690  Photonics and Applications
- ENGN 0410  Materials Science
- PHYS 0560  Experiments in Modern Physics

Select one of the following:

- PHYS 1560  Modern Physics Laboratory
- ENGN 1590  Introduction to Semiconductors and Semiconductor Electronics
    An approved 2000-level engineering or physics course.

A thesis under the supervision of a physics or engineering faculty member:

- PHYS 1990  Senior Conference Course
  or ENGN 1970  Independent Studies in Engineering
  or ENGN 1971  Independent Study in Engineering

In addition, students must take four courses in the humanities and social sciences. They are encouraged to consider taking courses dealing with the philosophical, ethical, or political aspects of science and technology.

To accommodate the diverse preparation of individual students, variations of the above sequences and their prerequisites are possible by permission of the appropriate concentration advisor and the instructors involved.

It is required that each student's degree program be submitted for prior approval (typically in semester four) and scrutinized for compliance (in semester seven) by one faculty member from the Department of Physics and one faculty member from the Division of Engineering.

Biomedical Engineering Concentration Requirements

Biomedical Engineering is an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. It is administered jointly by the School of Engineering and the Division of Biology and Medicine. The educational objectives of the biomedical engineering program are to graduate students who will: 1) Be employed in careers of useful service to society, including scientific and technical areas within medicine, industry, and health care delivery; 2) Demonstrate the ability to apply the basic principles of engineering and science, as well as problem solving skills and critical thinking, to a broad spectrum of biomedical engineering problems; 3) Demonstrate their ability to work in teams, and to effectively communicate and understand the broad social, ethical, economic and environmental consequences of their lifelong education.

Standard program for the Sc.B. degree

Foundational Courses (all required)

- ENGN 0030  Introduction to Engineering
- ENGN 0040  Dynamics and Vibrations
- MATH 0190  Advanced Placement Calculus (Physics/Engineering)
- or MATH 0170  Advanced Placement Calculus
- MATH 0200  Intermediate Calculus (Physics/Engineering)
- or MATH 0180  Intermediate Calculus
- BIOL 0200  The Foundation of Living Systems
- or NEUR 0010  The Brain: An Introduction to Neuroscience
- APMA 0330  Methods of Applied Mathematics I, II
- CHEM 0330  Equilibrium, Rate, and Structure
- CHEM 0350  Organic Chemistry
- APMA 0650  Essential Statistics
- or APMA 1650  Statistical Inference I
- ENGN 0510  Electricity and Magnetism
- ENGN 0720  Thermodynamics
- ENGN 0810  Fluid Mechanics
- ENGN 1230  Instrumentation Design
- BIOL 0800  Principles of Physiology

Upper Level Bioengineering Courses (all required)

- ENGN 1110  Transport and Biotransport Processes
- ENGN 1210  Biomechanics
- ENGN 1490  Biomaterials

Three Additional Upper Level Bioengineering Courses

Select at least one of the following:

- BIOL 1140  Tissue Engineering
- BIOL 1150  Stem Cell Engineering
- ENGN 1220  Neuroengineering
- ENGN 1400  Analytical Methods in Biomaterials
- ENGN 1930B  Photonics and Biophotonics
- ENGN 1930R  Molecular and Cell Biology for Engineers

Select at most two of the following:

- BIOL 1220  Synthetic Biological Systems in Theory and Practice
- BIOL 1800  Animal Locomotion
- BIOL 2110  Drug and Gene Delivery
- BIOL 2130  Techniques in Molecular and Cell Science

Other courses with approval of concentration advisor

Capstone Design course (required):

- ENGN 1930L  Biomedical Engineering Design, Research and Modeling

Independent Research (one recommended):

Select one of the following:

- BIOL 1950/1960  Directed Research/Independent Study

Total Credits

1  Advanced students can replace one math course with CHEM 0360.
2  Advanced students (premeds) can replace with BIOL 0470, BIOL 0530, or other biology courses.
Engineering Graduate Program

The School of Engineering directly offers graduate programs leading to the Master of Science (Sc.M.) degree; the Master of Science in Innovation Management and Entrepreneurship (Sc.MIME); and the Doctor of Philosophy (Ph.D.) degree.

In addition, the School of Engineering in collaboration with the Division of Biology and Medicine offers an interdisciplinary graduate program leading to the Master of Science (Sc.M.) and Doctor of Philosophy (Ph.D.) in Biomedical Engineering.

For more information on admission and program requirements for the Sc.M. or Ph.D. in Engineering, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/engineering

For more information on admission and program requirements for the Program in Innovation Management and Entrepreneurship Engineering (PRIME), please visit the following website:

For more information on admission and program requirements for Biomedical Engineering, please visit the following website:

Courses

This course will address the impact that technology has on society, the central role of technology on many political issues, and the need for all educated individuals to understand basic technology and reach an informed opinion on a particular topic of national or international interest. The course will begin with a brief history of technology.

ENGN 0030. Introduction to Engineering.
An introduction to various engineering disciplines, thought processes, and issues. Topics include computing in engineering, engineering design, optimization, and estimation. Case studies in engineering are used to illustrate engineering fields and scientific principles, including in-depth studies of statics and optics. Laboratories and design projects are included. Prerequisite: one of the following: APMA 0330, 0340, 0350, 0360, MATH 0100, 0170, 0180, 0190, 0200, 0350, 0520, 0540, which may be taken concurrently.

Students MUST register for the course lecture (M01) and one of the sections during the SAME registration session. Banner will not allow a student to register for one component without registering for the other at the same time. Further, if you drop one component of the course on Banner, both components will be dropped.

ENGN 0040. Dynamics and Vibrations.
Study of the kinematics and dynamics of particles and rigid bodies. Principles of motion of mechanical systems. Concepts of inertia, work, kinetic energy, linear momentum, angular momentum, and impact. Applications to engineering systems, satellite orbits, harmonic vibrations of one and two degree of freedom systems. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030. Corequisite: MATH 0200 or 0180.

ENGN 0090. Management of Industrial and Nonprofit Organizations.
Exposes students to the concepts and techniques of management. Topics include marketing, strategy, finance, operations, organizational structure, and human relations. Guest lecturers describe aspects of actual organizations. Lectures and discussions.

ENGN 0120A. Crossing the Consumer Chasm by Design.
Technologies have shaped human life since tools were sticks and flints to today’s hydrocarbon powered, silicon managed era. Some spread throughout society; bread, cell phones, airlines, but most never do; personal jet packs, Apple Newton, freeze dried ice cream. Space Tourism, the Segway, electric cars: Can we predict which ones will cross the chasm to broad application? Can we help them to by combining design, engineering, marketing, communications, education, art, and business strategies? Student teams identify potential new products, conceptualize, package, and define their business mode. By plotting their course across the chasm, we confront the cross-disciplinary barriers to realizing benefits from technology.

Enrollment limited to 18 first year students. Instructor permission required. FYS WRIT

ENGN 0120B. Crossing the Space Chasm Through Engineering Design.
Five decades of human activity in space has provided the world community with benefits including instant global communications and positioning, human and robotic exploration of the moon, planets and sun, and a perspective of earth which continues to inform and influence our relationship with our environment.

Unlike other technical revolutions of the 20th century space has not transitioned to a commercial, consumer market commodity. Rather it's users and applications remain primarily large and institutional.

To experience the challenges of engineering design and of changing an industrial paradigm, we will work in one or several groups to identify a use of space, and a plan for its implementation, that could help transition space from its status as a niche technology. Through the process of design, we will confront the technical, economic, societal and political barriers to obtaining increased benefits from technologies in general, and space in particular, and to making new technologies beneficial to a wider range of users. Enrollment limited to 18 first year students. Instructor permission required. FYS WRIT

ENGN 0120C. Power: From Early Engines to the Nuclear-Powered Artificial Heart.
Mechanical and electrical power have been source of major changes in civilization in last 250 years. This course starts from introduction to animal muscle power and harnessing nature to steam and later sources of power and applications, examining not only the technologies but also the people who developed them and the social and political impacts, ranging up to the nuclear-powered artificial heart. Enrollment limited to 20 first year students. FYS

ENGN 0120D. Strategies for Creative Process: Design Topics.
There is no one simple methodology for creative thinking. Creative thinking is a critical response to the world around us - to our curiosities and interests, to the questions our observations generate, to the ways we frame problems, and to the strategies we develop for translating what we imagine into objects and experiences. Working as artist/designers, making things within a studio environment, we will examine various approaches for the development and refinement of our creative processes as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 15 first year students. FYS

ENGN 0130. The Engineer’s Burden: Why Changing the World is Difficult.
We will examine the assertion that most of the changes that have improved people’s lives are essentially technological and then we will look at the difficulties in creating sustainable and beneficial change. Topics of interest include unintended consequences, failure to consider local culture, and engineering ethics. Many, but not all, of the examples will have a third world context. The engineering focus will be on infrastructure—housing, water and sanitation, transportation, and also mobile devices as used in health care and banking.

ENGN 0230. Surveying.
Theory and practice of plane surveying; use of the tape, level, transit, stadia, and plane table; triangulation and topography. Lectures, field work, and drafting. Recommended for students interested in civil engineering. Hours arranged. Time required, about 10 hours. Audit only.

ENGN 0260. Mechanical Technology.
A basic machine shop course that, with the help of an instructor, teaches students how to fabricate a few simple objects using hand tools and some basic machines. This course is designed to introduce the student to the machining process and environment. Audit only.
Mechanical behavior of materials and analysis of stress and deformation in engineering structures and continuous media. Topics include concepts of stress and strain; the elastic, plastic, and time-dependent response of materials; principles of structural analysis and application to simple bar structures, beam theory, instability and buckling, torsion of shafts; general three-dimensional states of stress; Mohr’s circle; stress concentrations. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030.

ENGN 0410. Materials Science.
Relationship between the structure of matter and its engineering properties. Topics: primary and secondary bonding; crystal structure; atomic transport in solids; defects in crystals; mechanical behavior of materials; phase diagrams and their utilization; heat treatment of metals and alloys; electrical, optical, and magnetic properties of materials; strengthening mechanisms in solids and relationships between microstructure and properties; corrosion and oxidation. Lectures, recitations, laboratory.

ENGN 0510. Electricity and Magnetism.
Fundamental laws of electricity and magnetism and their role in engineering applications. Concepts of charge, current, potential, electric field, magnetic field, resistance, capacitance, and inductance. Electric and magnetic properties of materials. Electromagnetic wave propagation. Lectures, recitation, and laboratory. Prerequisites: ENGN 0030 or PHYS 0070; ENGN 0040 or PHYS 0160 (previously 0080); MATH 0180 or 0200; and APMA 0330 or 0350 (may be taken concurrently).

ENGN 0520. Electrical Circuits and Signals.
An introduction to electrical circuits and signals. Emphasizes the analysis and design of systems described by ordinary linear differential equations. The frequency domain is introduced, including the effects of sampling and windowing in computer simulations. Other topics include transient analysis, Fourier series, and Laplace transform. Laboratories apply concepts to real problems in audio and controls. Lectures, recitation, and laboratory. Prerequisite: MATH 0180 or MATH 0200, courses may be taken concurrent to ENGN 0520.

ENGN 0720. Thermodynamics.
An introduction to macroscopic thermodynamics and some of its engineering applications. Presents basic concepts related to equilibrium, and the zeroth, first and second laws for both closed and open systems. Examples include analysis of engines, turbines, and other engineering cycles, phase equilibrium and separation processes, chemical reactions, surface phenomena, magnetic and dielectric materials. Lectures, recitations, and laboratory. Prerequisites: ENGN 0030 or ENGN 0040. Recommended: ENGN 0410 or CHEM 0330.

ENGN 0900. Managerial Decision Making.
Ways of making effective decisions in managerial situations, especially situations with a significant technological component; decision analysis; time value of money; competitive situations; forecasting; planning and scheduling; manufacturing strategy; corporate culture. Lectures and discussions. Prerequisite: ENGN 0090 or MATH 0100.

ENGN 0930A. Appropriate Technology.
Our goal for this course is that you leave it with the ability to think and act rationally and concretely on issues of technology and the human condition. We will provide background on useful technologies (e.g., wind, solar, hydro), techniques to fabricate them, and an opportunity to explore the obstacles to their implementation.

ENGN 0930C. DesignStudio.
DESIGNSTUDIO is a course open to students interested in learning through making. Working in a studio environment, we will iteratively design, build, and test projects, as we imaginatively frame design problems, and develop novel strategies for addressing those problems. We will explore design thinking, creative collaboration, exploratory play, ideation, iteration, woodworking, prototyping, CNC milling and laser cutting – in addition to other strategies that enhance our creative processes - as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 16. Instructor permission required.

ENGN 0931. Internet of Everything.
The Internet can be visualized as Internet of information, Internet of people, Internet of places and most importantly the Internet of "things." Internet of Everything includes these four paradigms. In this class, we will learn about how these four ideas can come together to make a difference in the world. We will study the underlying infrastructure that supports Internet, the TCP/IP model, addressing and routing. Experiments and projects in the class would include a tree on the Internet communicating with the sprinkler system only when it is thirsty. Privacy and ethical issues will also be addressed.

ENGN 1000. Projects in Engineering Design.
Projects in design for concentrators in chemical, electrical, materials, and mechanical engineering. Students generally work in teams on projects that are defined through discussions with the instructor. An assembled product or detailed design description is the goal of the semester’s effort. Prerequisite: completion of engineering core program. Written permission required.

Entrepreneurship is innovation in practice; transforming ideas into opportunities, and, through a deliberate process, opportunities into commercial realities. These entrepreneurial activities can take place in two contexts: the creation of new organizations; and within existing organizations. This course will present an entrepreneurial framework for these entrepreneurial processes, supported by case studies that illustrate essential elements. Successful entrepreneurs and expert practitioners will be introduced who will highlight practical approaches to entrepreneurial success. Enrollment limited to 35. WRIT

ENGN 1110. Transport and Biotransport Processes.
Aim: To develop a fundamental understanding of mass transport in chemical and biological systems. The course includes: mechanism of transport, biochemical interactions and separations; mass transport in reacting systems; absorption; membrane and transvascular transport; electrophoretic separations; pharmacokinetics and drug transport; equilibrium stage processes; distillation and extraction. Other features: design concepts; modern experimental and computing techniques; laboratory exercises.

ENGN 1120. Chemical and Biochemical Reactor Design.
Stoichiometry, thermodynamics, mechanisms, and rate expressions of homogeneous and heterogeneous chemical and biochemical systems. Basic concepts in homogeneous chemical and bioreactor design and ideal reactor models. Chemostats and enzymatic reactors. Optimization. Temperature and energy effects in reactors. Introduction to heterogeneous chemical and bioreactor design. Prerequisite: ENGN 0720 or physical chemistry. Offered in alternate years.

ENGN 1130. Phase and Chemical Equilibria.
Application of the first and second laws of thermodynamics and conservation of mass to the analysis of chemical and environmental processes, phase and chemical equilibria and partitioning of species in multiphase, nonreactive and reactive systems. Thermodynamic properties of fluid mixtures-correlation and estimation. Applications and examples drawn from chemical processing and environmental problems. Prerequisite: ENGN 0720.

ENGN 1140. Chemical Process Design.
Chemical process synthesis, flow charting, and evaluation of design alternatives. Process equipment sizing as determined by rate phenomena, economics, and thermodynamic limitations. Introduction to optimization theory. Applications of these principles to case studies. Prerequisites: ENGN 1110, 1130; ENGN 1120 (may be taken concurrently).

ENGN 1210. Biomechanics.

ENGN 1220. Neuroengineering
Course Goals: To develop an advanced understanding of how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be harnessed to design devices to assist people with neurologic disease or injury. Fundamental topics in neuronal and neural signal generation, recording methods, and stimulation methods. Clinical/Translational topics include multiple clinically available and emerging neurotechnologies. Prerequisites: NEUR 0100 and ENGN 0510; or instructor permission, which may be provided after discussion with course faculty.

ENGN 1230. Instrumentation Design
Sensors for pressure, temperature, blood flow, muscle and neural activity. Amplifiers, filters, and A/D-D/A converters. The use of computers in monitoring and controlling physiological processes. Feedback controllers for temperature, flow rate, and experimental stimuli. Intended as a design course primarily for biomedical engineers. Lab times to be arranged. WRIT

ENGN 1300. Structural Analysis
A unified study of truss, beam, frame, plate, and shell structures. Emphasis on principles of virtual work and numerical methods of elastic structural analysis by matrix methods. Includes calculation of deflections and reactions in beam structures, beam vibrations, and column buckling. Theorems of plastic limit analysis. Plate bending. Membrane stresses and local bending effects in axially symmetric shells. Prerequisite: ENGN 0310.

ENGN 1310. Planning and Design of Systems
No description available.

ENGN 1340. Water Supply and Wastewater Treatment
The hydrological cycle, surface water hydrology, ground water hydrology. Emphasis on the formulation of mathematical models of various flow problems and their solution by analytical or numerical means. Typical problems: open channel and river flows; flood routing; ground water flow in aquifers and into wells. Topics in wastewater treatment plant design: mixing, residence time, aeration, and, bacteriological and chemical treatment processes. Prerequisite: ENGN 0810. Enrollment limited to 40.

ENGN 1360. Soil Mechanics and Principles of Foundation Engineering
Classification and identification of geological materials; mechanical and physical properties and methods of testing. Elements of the analysis of stress and strain in rock and soil masses; theories of failure, theory of seepage, Problems of building foundations; consolidation and settlement; stability of earth slopes and embankments. Includes geotechnical laboratory. Prerequisite: ENGN 0310.

ENGN 1370. Advanced Engineering Mechanics
A unified study of the dynamics of particles, rigid bodies, and deformable continua. Generalized coordinates and Lagrange's equations; variational principles; stability of equilibrium; vibrations of discrete systems and of elastic continua, and wave propagation. Prerequisites: ENGN 0040, APMA 0340, or equivalent.

ENGN 1380. Design of Civil Engineering Structures
This course provides an introduction to the design of steel and reinforced concrete structures using ultimate strength methods. Lectures will cover key concepts of design theory, building codes, and standards using examples from real structures. Students will apply concepts through computer labs, homework problems, and a design project. Lectures plus lab. Prerequisite: ENGN 1300.

ENGN 1400. Analytical Methods in Biomaterials
Analytical methods and instrumentation currently used to characterize biomaterials. Specific methods/instrumentation covered include: molecular scale analysis (NMR, FTIR, UV-VIs spectroscopy); surface analysis (AFM, SEM, XPS, contact angle goniometry, ellipsometry, quartz crystal microbalance, electrochemistry, grazing angle IR); bulk analysis (DSC, mechanical testing) and biological analysis (bioassays, florescence and confocal microscopy). Prerequisites: CHEM 0330, CHEM 0350, ENGN 0040 and BIOL 0200. Enrollment limited to 40.

ENGN 1410. Physical Chemistry of Solids
Application of physical chemistry and solid state chemistry to the structure and properties of engineering solids as used in solid state devices, ceramics, and metallurgy. Equilibrium and free energy of heterogeneous systems, thermodynamics of solutions, chemical kinetics, diffusion, catalysis and corrosion, solid state transformations. Case studies taken from industrial practice. Prerequisites: ENGN 0410, 0720.

ENGN 1420. Kinetics Processes in Materials Science and Engineering
This course introduces the basic principles and formulations that describe kinetic processes in materials science and engineering. These are divided into the following principle types of mechanisms: solid state diffusion, reactions at surfaces and interfaces, and phase transformations. The final section of the course applies these principles to several relevant materials processing systems. Prerequisites: ENGN 0410, 0720, 1410 or equivalent.

ENGN 1440. Mechanical Properties of Materials
 Begins with basic concepts of mechanical properties common to all materials, with some emphasis on dislocation theory. Particular attention is given to the relationship between mechanical properties and microstructures. The different types of mechanical tests that are used in each of these fields are analyzed. Lectures plus laboratories. Prerequisite: ENGN 0410.

ENGN 1450. Properties and Processing of Electronic Materials
Focuses on the science of electronic materials, the materials at the heart of modern microelectronics and optoelectronics. Addresses fundamental issues controlling their properties, processing, and reliability. Topics include band structure of semiconductors, basic devices structures (junctions and transistors), sputter deposition, molecular beam epitaxy, chemical vapor deposition, ion implantation, oxidation, and issues affecting reliability. Materials challenges that must be resolved for future generations of electronic devices.

ENGN 1470. Structure and Properties of Nonmetallic Materials
A study of the structure and properties of nonmetallic materials such as glasses, polymers, elastomers, and ceramics. The crystal structure of ceramics and polymers, and the noncrystalline networks and chains of glasses, polymers, and elastomers and the generation of microstructures and macrostructures are considered. The mechanical, chemical, electrical, magnetic, and optical properties and their dependence on structure are developed. Laboratory. Prerequisite: ENGN 0410.

ENGN 1480. Metallic Materials
The microstructure of metals, microstructural evolution during processing, and the relationships between the microstructure and the physical properties of the material. Crystallography and X-ray diffraction. Crystalline defects, dislocations, grain boundaries, and their effects on mechanical and other properties. Solid state diffusion and solid state phase transformations. Oxidation and corrosion. Laboratory. Prerequisite: ENGN 0410, 1410.

ENGN 1490. Biomaterials
Biomaterials science, the study of the application of materials to problems in biology and medicine, is characterized by medical needs, basic research, and advanced technological development. Topics covered in this course include materials used in bone and joint replacement, the cardiovascular system, artificial organs, skin and nerve regeneration, implantable electrodes and electronic devices, drug delivery, and ophthalmology.

ENGN 1510. Nanoengineering and Nanomedicine
Students in this course will develop a fundamental understanding of nanoengineering and its applications in medicine. We will discuss nanomaterials synthesis, fabrication, and characterization. Applications of nanoeengineered materials in medicine, including nanotechnology-based drug delivery systems, nano-based imaging and diagnostics, and nanotechnology-based tissue engineering approaches will be explored in depth. Host response to nanomaterials and nanotoxicology will also be discussed. Research methods in nanoeengineering and nanomedicine will be emphasized (critical analysis of scientific literature, effective oral and written communication). This course is meant for graduate students and advanced engineering undergraduates. The following courses are
recommended prerequisites (and/or permission of the professor): ENGN 1490 (Biomaterials) ENGN 1110 (Transport & Biotransport Processes).

ENGN 1520. Cardiovascular Engineering. In this course, students will learn quantitative physiological function of the heart and vascular system, including cardiac biomechanics and vascular flow dynamics, through lectures and discussion of current scientific literature. A systems approach will integrate molecular biophysics, cell biology, tissue architecture, and organ-level function into a quantitative understanding of health and disease. Discussion topics will include pre-clinical regenerative therapies, stem cell ethics, and clinical trials. Prerequisite: ENGN 1570. APMA 1650 or MATH 1610 helpful but not required.

ENGN 1560. Applied Electromagnetics. Developing a good understanding of the principles of electromagnetics and applying them to contemporary EM topics, through examples in today's applications: Antenna (from iPhone, to insects, and to RFID); Display optics (from LCD to Peacock feather); Guided waves (from microwave circuits to microwave oven); Diffractions and Interferences (from optical lithography limit to antireflection in solar cell and photodetector); and EM and optical properties of materials and nanostructures. Prerequisite: ENGN 0510 or PHY 0470, or equivalent.

ENGN 1570. Linear System Analysis. Analysis of discrete and continuous electrical signals and systems in both time and frequency domains. Modulation, sampling, spectral analysis, analog and digital filtering. Fourier, Laplace and z-transforms, the state-space approach, stability of linear systems. Prerequisite: ENGN 0520.

ENGN 1580. Communication Systems. Analysis and design of modern digital communication systems. Includes: sampling theorem; entropy measure of signal information content; pulse code modulation; amplitude and single sideband modulation; review of probability theory; stochastic processes and their use in communication systems; detection of signals buried in noise; communication channel capacity; coding principles; communication networks. Laboratory projects. Prerequisite: ENGN 1570. APMA 1650 or MATH 1610 helpful but not required.

ENGN 1590. Introduction to Semiconductors and Semiconductor Electronics. An introduction to the physics of fundamental electronic processes that underlie the operation of semiconductor devices on a microscopic scale. Basic electronic properties of semiconductors and effects at interfaces heterogeneous media, such as pn junctions and heterostructure barriers and quantum wells. These junctions, barriers and wells are used as building blocks for devices, focusing on bipolar and field-effect transistors. Modern trends in micro- and opto-electronic devices are discussed. A brief fabrication laboratory to introduce pn junction fabrication technology. Prerequisites: ENGN 0410 and 0510.

ENGN 1600. Design and Implementation of Very Large-Scale Integrated Systems. VLSI (Very Large Scale Integration) CMOS (Complementary Metal Oxide Semiconductor) technology is the main driver of our digital revolution. The goal of the course is to learn how to design and implement VLSI digital circuits and optimize them with respect to different objectives such as area, speed, and power dissipation. Design and analysis will be carried out using computer-aided tools. Prerequisite: ENGN 1630, or instructor permission.

ENGN 1610. Image Understanding. Image processing is a technology experiencing explosive growth; it is central to medical image analysis and transmission, industrial inspection, image enhancement, indexing into pictorial and video databases, e.g., WWW, and to robotic vision, face recognition, and image compression. This senior-level undergraduate course covers theoretical underpinnings of this field and includes a series of practical MATLAB image processing projects. ENGN 1570 is recommended but not required.

ENGN 1620. Analysis and Design of Electronic Circuits. Elementary device physics and circuit characteristics of semiconductor diodes, bipolar junction transistors (BJTs), and field effect transistors (FETs). Analysis and design of practical circuits using discrete semiconductor devices. Constraint on and techniques for linear integrated circuit (IC) design and the use of linear ICs as circuit building blocks. Laboratory. Prerequisites: ENGN 0510, 0520 or equivalent.

ENGN 1630. Digital Electronics Systems Design. Fundamentals of digital logic design including: Boolean algebra, gates, truth tables, logic families, flip-flops, finite state machines, memory, and timing. More advanced topics include A-D conversion, binary arithmetic, CPU organization, programmable logic (CPLDs and FPGAs), and VHDL. Extensive laboratory requirement. Not open to first year students; permission required for sophomores.

ENGN 1640. Design of Computing Systems. This course introduces the main concepts and techniques for designing computing systems. Topics covered include assembly language, instruction set design, pipelining, superscalar and VLIW processor design, memory subsystem design, and I/O interfacing. Laboratory topics include programmable logic devices, hardware definition languages, and implementation of a bootable version of the pipelined MIPS processor. Laboratory emphasizes design optimizations with respect to speed and design area. Prerequisite: ENGN 1630 or passing of a quiz on basic digital logic concepts, or instructor permission.

ENGN 1650. Embedded Microprocessor Design. This is a combined lecture and design project course offering experience in the open-ended design of an electronic product or system employing an embedded microprocessor by small-group design teams. Activity includes product specification, circuit design, programming, printed circuit layout, construction, packaging, and economic assessment. Teams are expected to produce functional products. Lecture topics will be adjusted to reflect the chosen design problems. Emphasis is placed on the criteria for choosing processors and on the interfaces and programming requirements of the system. Primarily for senior concentrators. Experience with C programming is helpful but not required. Prerequisite: ENGN 1630 or permission of the instructor.

ENGN 1680. Design and Fabrication of Semiconductor Devices. Contemporary practice in the design and fabrication of semiconductor devices. The realization of basic electronic device functions on the semiconductor platform is a central theme in a coordinated lecture and laboratory course. Topics include microcircuit photolithography; layout and design scaling rules for integrated circuits; and techniques in semiconductor and thin film processing as they apply to ULSI circuit manufacturing. Prerequisite: ENGN 1590 or permission.

ENGN 1690. Photonics and Applications. Science and engineering principles of photonics and optoelectronics, that provide foundation to a broad range of technologies from internet to lighting, from lasers to DVD, from satellite images to computer display, from solar cells to single molecule detection. Topical content: light as waves in media, on surface, and through holes; interference and waveguiding; light generation by spontaneous emission or by stimulation; LED, Laser, Photodetector, Optical amplifier and modulator, etc. Prerequisite: ENGN 0510 or equivalent.

ENGN 1700. Jet Engines and Aerospace Propulsion. Dynamics and thermodynamics of compressible internal flows with applications to jet engines for both power and propulsion, rocket engines and other propulsion systems. Thermodynamic analyses of engine cycles with and without afterburners. Fluid dynamics of high Mach number systems. Structural and Materials considerations for engine design. Team projects for analysis and design of novel jet engine concepts. Prerequisite: ENGN 0720 and 0810.

Combustion chambers, fuels, flames. Internal and external pollution. Integration of design and practical constraints. Patents and proprietary aspects. Lectures, laboratory, and computer-aided design projects with oral and written reports. Prerequisites: ENGN 0720 and 0810.

**ENGN 1740. Computer Aided Visualization and Design.**
Provides instruction in the application of computers to the design methods in engineering. Hands-on experience in use of CAD/CAE software packages for geometric modeling, visualization, and drafting. Emphasis on applications to solids and structural problems. Independent design projects are carried out. Course counts as an ABET upper-level design course for mechanical and civil engineering concentrators. Prerequisite: ENGN 0310.

**ENGN 1750. Advanced Mechanics of Solids.**

**ENGN 1760. Design of Space Systems.**
Working in design groups, students conceive a space mission and design all of the elements necessary for its execution including launch and orbit / trajectory, space and ground systems, including analysis of structure, thermal, radio link, power and mass budgets, attitude control and dynamics. Each group builds a hardware project to demonstrate a core element of their mission design. Prerequisites: Engineering core curriculum or equivalent.

**ENGN 1860. Advanced Fluid Mechanics.**
Aims to give mechanical engineering students a deeper and more thorough grounding in principles and basic applications. Topics include review of the conservation principles; inviscid flow; viscous flow, including aerodynamics lubrication theory; laminar boundary layers; wave motions and wave drag. Lectures, assignments, computational projects, and laboratory. Prerequisites: ENGN 0720 and 0810.

**ENGN 1900. Construction of the Entrepreneurial Enterprise Framework: Frm Decision Making to Opportunity Creation.**
Students examine and engage with the decision making process in the modern enterprise, including investment, negotiation, and opportunity creation. This is done in an entrepreneurial context. Teams research and present orally and in writing on major class themes. Case studies, Socratic discussion models, readings, guest lectures, rhetoric and writing fellows support for videotaped oral and written business plans are utilized. Enrollment limited to 35.

**ENGN 1930A. 3D Photography.**
By 3D photography we refer to a number of processes that use cameras and lights to capture the shape and appearance of 3D objects. In this course we will first study and build basic 3D techniques and systems, and then cover several closely related methods based on signal processing techniques, constrained energy minimization, and the solution of diffusion differential equations to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Applications include computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality.

**ENGN 1930B. Photonics and Biophotonics.**
Biophotonics deals with interactions between light and biological matter that combine lasers, photonics, nanotechnology, and biotechnology. The course will introduce the biology/photonics interface and discuss topics like photobiology, biosensors, bioimaging techniques, light activated therapy, microarray technology, tissue engineering with light, and bionanophotons. Prerequisites: science and engineering background.

**ENGN 1930D. Large Scale Engineering Design Project.**
Provides a major design experience for civil, mechanical, and, with approval, environmental engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in the engineering concentrations. Intended for students in their senior year.

**ENGN 1930F. Entrepreneurship and Good Work: Engineering Dreams.**
In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of ‘good work’. Using a combination of relevant case studies, readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one’s working years. Enrollment limited to 24. Written permission required.

**ENGN 1930G. Entrepreneurship I.**
Teams of students from Engineering, COE and other technical and non-technical disciplines form simulated high tech startup companies working on mentor-defined opportunities, from conception to commercialization. Intellectual property, marketing, definition of a product requirements document, human factors (including team building), safety and environmental concerns, and legal concerns are emphasized. Students in the COE Technology Management Track should complete ENGN 1010 prior to this course. Enrollment in the course is limited and students must fill out a formal application (though COE tech track seniors are automatically approved). The course meets TR from 2:30-3:50, and other outside meeting hours will be arranged. WRIT

**ENGN 1930H. Entrepreneurship II.**
Please see ENGN 1930G for course description. Enrollment limited to 24. WRIT

**ENGN 1930I. Ethics and Professionalism.**
Issues of ethics and professionalism for the engineer and for members of other professions. The principal objectives are to examine the responsibility a person accepts when practicing his or her profession and to provide opportunities for students to explore the ethical aspects of their profession, become comfortable and confident discussing and using value systems, and practice effective expression of ideas in oral and written form.

**ENGN 1930K. High-Performance Sensors and Multimedia.**
Design, construction, and programming of embedded systems with system-on-chip processors, and audio/visual sensors for real-time applications. Design and implementation of distributed audio/visual applications. Hands-on project oriented hardware/software course.

**ENGN 1930L. Biomedical Engineering Design, Research and Modeling.**
This course introduces students to design, modeling and analysis of biological systems. The first portion of the course focuses on linear systems. Research projects in design will be analyzed. The course also introduces students to the Matlab programming language, which allows them to implement the design models discussed in class. For seniors only.

**ENGN 1930M. Industrial Design.**
Brown engineering and RISD industrial design faculty lead product development teams through a design cycle. Engineers explore industrial design, designers gain some insight into engineering, and both groups can apply their skills to challenging problems. Frequent presentations, field trips, critiques, and labs. Preference given to seniors. Prerequisites: completion of engineering core. Enrollment limited to 15 students.

**ENGN 1930N. Introduction to Magnetic Resonance Imaging and Neuroimaging.**
Magnetic resonance imaging (MRI) is a powerful tool for investigating the biological structure and functional dynamics across an incredibly broad spatial and temporal scale. This course will provide an understanding of the basic physical principles of magnetic resonance; including signal generation, detection and contrast mechanisms; as well as image acquisition techniques and reconstruction methods. This course is aimed at undergraduate and graduate students from a variety of disciplines, including: Engineering, Computer Science, Applied Mathematics, Physics, Cognitive Science and Neuroscience as well as medical students and residents. Students should have a basic understanding of matrix mathematics and familiarity with the concepts of magnetism and waves.

**ENGN 1930O. MicroElectroMechanical Systems (MEMS).**
Integrated design and analysis of MicroElectroMechanical Systems (MEMS), which are highly integrated micron-scale devices used in many applications: sensors, energy (engines), optics, bioengineering, chemical processing, etc. Provides an introduction to the science and art of design, fabrication, performance, and use of MEMS in all disciplines of engineering.
ENGN 1930P. Solid Biomechanics.
Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

ENGN 1930R. Molecular and Cell Biology for Engineers.
Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

ENGN 1930S. Land Use and Built Environment: An Entrepreneurial View
Through the use of readings, group discussions, students presentations and guest lectures, students examine and challenge the analytical and structural frameworks which underlie support public and private land and use the urban and suburban built environments. Students build an understanding and theory of how social, political, governmental and economic forces interact with society’s present and future physical space needs.

ENGN 1930T. Vehicle Design.
No description available.

ENGN 1930U. Renewable Energy Technologies.
Analysis of the thermodynamics, physics, engineering and policy issues associated with renewable and non-renewable energy technologies with applications appropriate to both the developed and the developing world. Specific technologies that will be studied include Fossil fuels, Wind, Solar, Hydro, Biomass and Nuclear. Energy consumption technologies, such as power generation and transportation will also be studied. Some technical background, such as ENGN 0030, 0040 and 0720, is strongly recommended.

ENGN 1930W. The Art and Science of Light.
This studio course explores artificial light from both artistic and scientific perspectives. Laboratory demonstrations on optics and new light emitting materials will be counterbalanced by presentations on the historical and contemporary integration of these materials within the fields of architecture, industrial design, and sculpture. Students will be asked to reimagine the light bulb by developing artistic design alternatives to conventional lighting. Extensive outside work is expected. Written permission required.

Taught via Socratic method, this course will use case studies that explore essential elements of the entrepreneurial process: Defining Entrepreneurship; Recognizing Opportunities and Developing Business Models; Assembling The Team; Raising Financial Resources; Managing Uncertainty; Managing the Growing Venture; and Realizing Value. Guests will include successful entrepreneurs and expert practitioners who will highlight practical approaches to entrepreneurial success.

Please note that beginning with the very first class, students MUST read the session’s case study and supplemental readings, to be ready for participation in discussions. For the first day’s assignment, please contact Professor Warshay directly at Daniel_Warshay@brown.edu. Enrollment limited to 35. WRIT

ENGN 1930Y. Social Enterprises.
This course will combine reading, discussion, field work, and guest talks by practitioners and theorists to delve into the workings of a variety of social enterprise models. Prerequisites: Social Entrepreneurship (ENGN1930Q) or comparable experience and an existing relationship with a social enterprise.

ENGN 1930Z. Robot Design.

ENGN 1931A. Photovoltaics Engineering.
This seminar course will provide an overview of the operation, design, characterization, and manufacturing of photovoltaic solar cells and panels. The course will span a range from the fundamental physics of solar cell operation to highly applied, industrially relevant engineering topics. Recommended prerequisites: Good knowledge of basic physics and electromagnetism concepts; proficiency in ENGN 0510 or PHYS 0470; This course is designed for undergraduate and graduate students in Physics, Chemistry and Engineering interested in the field of alternative energy with a focus in photovoltaics. Enrollment limited to 20.

ENGN 1931D. Design of Mechanical Assemblies.
An introduction to the design and development of mechanical assemblies suitable for production over a range of volumes, from prototypes to high volume manufacture. The course is intended to present an overview of basic machine components and manufacturing processes from the perspective of a design engineer in a contemporary industrial setting. The objective of which being to provide students the background necessary to create mechanical assemblies from blank-page concepts through to production ready designs. Coursework will include both theoretical and experimental exercises as well as two group projects working on a mechanical assembly produced via high volume manufacture. Prerequisite: ENGN 0310, 1740. Enrollment limited to 20.

ENGN 1931E. Writing Science.
This seminar focuses on communicating scientific and technical information to a lay audience in ways that engage and inform. The focus is on writing about new findings, scientific disputes and policy debates, along with producing profiles, feature articles, op-eds and blog posts. Students who complete this seminar will learn how to turn a collection of facts into a story, ways of explaining complex topics in simple terms, and how to differentiate between crucial technical details and clutter. Proficiency in English is assumed. Permission from the instructor is required. Preference will be given to seniors and graduate students. Enrollment limited to 15. WRIT

ENGN 1931F. Introduction to Power Engineering.
An introduction to the generation, distribution and use of electrical energy in three-phase balanced systems. Topics include: properties of magnetic fields and materials; magnetic reluctance circuits; phasors and the properties of balanced three-phase voltage and current lines; generators; transformers and transmission lines; induction motors; brushless DC motors; power semiconductor switches; and the properties of solar photovoltaic sources and microinverters. Laboratory project. Prerequisites: ENGN 0510 and 0520.

The course will explore where the majority of "useful" energy originates today. Main fossil energy sources (e.g., coal, crude oil, gas, shale oil, tar sands) and their chemical characteristics will be considered. Environmental aspects of fuel production (mining, drilling), fuel conversion technologies, both for delivering heat and power, and why there are limitations on the conversion to the latter. Calculations of "carbon footprint" will be illustrated. Common examples of emissions control technologies, including carbon capture and sequestration, will be presented. Policy and social implications of these energy issues will be discussed. Prerequisites: CHEM 0330 and ENGN 0720.

Independent Study in Engineering. Instructor permission required after submitting online proposal (http://brown.edu/academics/engineering/content/independent-study). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.
ENGN 1971. Independent Study in Engineering. Independent Study in Engineering. Instructor permission required after submitting online proposal (http://brown.edu/academics/engineering/content/independent-study). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

ENGN 2020. Mathematical Methods in Engineering and Physics II. An introduction to methods of mathematical analysis in physical science and engineering. The first semester course includes linear algebra and tensor analysis; analytic functions of a complex variable; integration in the complex plane; potential theory. The second semester course includes probability theory; eigenvalue problems; calculus of variations and extremum principles; wave propagation; other partial differential equations of evolution.

ENGN 2110. Business Engineering Fundamentals I. The course examines core concepts in distinct areas through three modules: (1) intellectual property and business law, (2) technical marketing, and (3) finance. All aspects of intellectual property will be treated, models on how to analyze markets will be discussed, culminating in a finance module which utilizes accounting fundamentals and models to perform financial analysis.

ENGN 2120. Business Engineering Fundamentals II. The course examines core concepts in distinct areas through three modules: (1) organizations, leadership, and human capital, (2) implementing radical technology change, and (3) engineering ethics. Organization, leadership and human capital focuses on the attributes of effective leadership and the tactical operation of start-up companies, implementing radical technological change centers on disruptive technologies and their adaptation in the marketplace, and ethics treats the issues that arise in small start-up organizations with an emphasis on the interface of ethics and environmental, health and safety issues.

ENGN 2130. Innovation and Technology Management I. Examines core concepts through four modules: (1) Industry Dynamics of Technological Innovation, (2) Formulating Technological Innovation Strategy, (3) Implementing Technological Innovation Strategy, and (4) Early Commercialization and Deployment. Industry Dynamics of Innovation will explore some of the drivers of technology innovation. Implementing Technological Innovation Strategy explores execution issues concerning the flow of technology and innovation from concept to physical product or service. Early Commercialization and Deployment will focus on more salient strategic and operational issues related to commercial readiness and roll-out of a technology-based product or service. Emphasis will be on technology-oriented entrepreneurial enterprises, but exploration will also include larger more established organizations.

ENGN 2140. Innovation and Technology Management II. Explores concepts relevant to the management of operations in industrial enterprises with an emphasis on technology-oriented firms. Topics fall into three basic modules: (1) Capacity Planning, (2) Industrial Engineering, and (3) Materials & Resource Engineering. Capacity Planning will focus on capacity considerations in manufacturing and service organizations. Industrial Engineering will examine optimizing plant and process layouts. Materials & Resource Engineering will cover various aspects of planning and scheduling material, labor, and work center capacity. Inventory management techniques will also be introduced and examined as well as concepts such as materials requirements planning and aggregate planning.

ENGN 2150. Technology Entrepreneurship and Commercialization I. ENGN 2150 and the spring ENGN 2160 form a sequence that develops the skills for technology-based entrepreneurship. It teaches creation of viable high-growth-potential new ventures from emerging science and technology. It is from emerging S&T that a high percentage of new jobs are created, both by existing large companies and through the formation of new companies. You will examine S&T for new opportunities, create novel product or service concepts from these sources and determine whether these concepts truly represent new business opportunities. Pedagogy is a combination of lectures and "experiential learning", with work undertaken as a two-semester project. Enrollment limited to 30 graduate students in the IMEE program.

ENGN 2160. Technology Entrepreneurship and Commercialization II. ENGN 2160 and the prerequisite fall course 2150 form a course sequence that develops the knowledge of, and embeds the skills for, technology-based entrepreneurship. While 2150 has helped you to examine science and technology sources, and create a portfolio of opportunities from these, this course continues by developing selected opportunities into a compelling business case for the creation of a high growth potential new venture. Once again, learning is by a combination of lectures and "experiential learning", with work undertaken as a guided two-semester project. Prerequisite: ENGN 2150. Enrollment limited to 30 graduate students in the IMEE program.

ENGN 2180. Globalization Immersion Experience and Entrepreneurship Laboratory. In this course, students will gain a better understanding of the political, social and cultural dynamics that influence entrepreneurial enterprises in different world regions. Meetings will be arranged with high technology companies and their venture arms, academic incubators, investment professionals, legal professionals, government officials, entrepreneurs, and other university faculty and students. The semester becomes a global entrepreneurship and innovation "laboratory" where students experience and take part in guest lectures from experts working in other countries. Classroom discussions, student presentations, papers and readings will be used to assist and further understand the globalization dynamic and its relationship to entrepreneurship. Prerequisite: ENGN 2110. Enrollment limited to graduate students in the PRIME program.

ENGN 2280. Topics in Continuum Mechanics. Devoted to one or more advanced topics in continuum mechanics not covered in detail by the regular courses. Examples are: nonlinear viscoelastic constitutive equations, strain gradient and micropolar theories of elasticity, coupled mechanical and thermal or electromagnetic phenomena, and continuum thermodynamics.

ENGN 2290. Plasticity. Theory of the inelastic behavior of materials with negligible time effects. Experimental background for metals and fundamental postulates for plastic stress-strain relations. Variational principles for incremental elastic-
plastic problems, uniqueness. Upper and lower bound theorems of limit analysis and shakedown. Slip line theory. Representative problems in structural analysis, metal forming, indentation, strain and stress concentrations at notches, and ductile failure.

**ENGN 2320. Experimental Mechanics.**
The design and evaluation of experiments in solid mechanics. Considers methods for experimental stress analysis and for the mechanical testing of materials. Topics covered include photoelasticity, creep and relaxation tests, high-speed testing, stress wave propagation, fatigue, and fracture. Techniques, instrumentation, and recording systems for the static and dynamic measurement of mechanical parameters such as forces, displacements, velocities, accelerations, and strains.

**ENGN 2340. Computational Methods in Structural Mechanics.**

**ENGN 2370A. Thin Films.**
No description available.

**ENGN 2370B. Topics in Solid and Structural Mechanics.**
Devoted to one or more advanced topics in solid and structural mechanics not covered in detail by the regular courses, such as: numerical methods in sold mechanics, theory of optimal design, shell structures and instability, or other topics of interest to the staff or visitors.

**ENGN 2380. Fracture Mechanics.**

**ENGN 2400. Electron Microscopy in Materials Science.**
Theory of electron optics and principles of transmission electron microscopy, including dynamical theory of electron diffraction and image contrast. Applications to materials analysis including defect, boundary, and phase analysis. Analytical electron microscopy including convergent beam diffraction, energy dispersive x-ray analysis, and energy loss spectroscopy. Intensive laboratory exercises.

**ENGN 2410. Thermodynamics of Materials.**

**ENGN 2420. Kinetic Processes and Mechanisms in Materials Science.**
Continuum and atomistic descriptions of diffusion in solids. Reactions involving surfaces and interfaces, including evaporation, adsorption, grain growth, and coarsening. Phase transformation kinetics, including nucleation, growth, solidification, spinodal decomposition, and martensitic transformations. Analysis of systems with multiple kinetic mechanisms (typical examples include oxidation, crystal growth, and sintering). Prerequisite: background in basic thermodynamics. Recommended: ENGN 1410 or 2410 or equivalent.

**ENGN 2430. Deformation Behavior of Materials.**
Linear elasticity as applied to isotropic and anisotropic materials; yield criteria including Von Mises, Tresca, Mohr-Coulomb, and Hill. Plastic deformation and slip. Dislocation theory. Mechanisms of hardening. Microstructural models of ductile, intergranular, and cleavage fracture. Toughening mechanisms. Creep. Fatigue. Prerequisites: ENGN 0410 and ENGN 1440 or equivalent.

**ENGN 2440. Strength of Solids.**
Mechanical behavior of solids as interpreted through atomistic mechanisms. Theory and characteristics of dislocations in continuous and crystalline media. Intrinsic and extrinsic stacking faults, extended dislocations, point defects, nodes and networks, disclinations, crystal boundaries. Applications of dislocation theory to single and polycrystal plasticity, work-hardening, stress-corrosion, creep, fatigue, hardening mechanisms, etc.

**ENGN 2490A. Crystal Structures and Crystallography.**
The study and experimental analysis of solid structures from crystallography and crystal chemistry viewpoints. Electronic structure of the atom as related to core level chemical analysis techniques in material science, atomic arrangements in solids, form crystallography, crystal symmetry and symmetry of finite objects, and experimental techniques in x-ray diffraction.

**ENGN 2490B. To Be Determined.**

**ENGN 2500. Medical Image Analysis.**
Explosive growth in medical image analysis has enabled noninvasive methods to diagnose and treat diseases. The course will first discuss the fundamentals of formation of medical images such as CT, MRI, ultrasound, and nuclear imaging; then consider clinical constraints and discuss methods in image guided therapy/surgery; techniques to detect, delineate, measure, and visualize medical organs and structures.

**ENGN 2501. Digital Geometry Processing.**
Three-dimensional geometric models are fundamental for applications in computer vision, computer graphics, medical imaging, computer aided design, visualization, multimedia, and many other related fields. This course includes the study of basic data structures and algorithms for representing, creating, manipulating, animating, editing, and analyzing digital geometry models, such as point clouds and polygon meshes, as well as state-of-the-art material from the current scientific literature. This is a project oriented course with several programming assignments and a final project. Students are expected to have successfully completed an introductory computer graphics/vision course or have an equivalent background. Instructor permission required. Open to seniors and graduate students.

**ENGN 2502. 3D Photography.**
In 3D Photography, cameras and lights are used to capture the shape and appearance of 3D objects represented as graphical models for applications such as computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality. This course covers 3D capture techniques and systems, surface representations and data structures, as well as methods to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Instructor permission required.

**ENGN 2520. Pattern Recognition and Machine Learning.**
This course covers fundamental topics in pattern recognition and machine learning. We will consider applications in computer vision, signal processing, speech recognition and information retrieval. Topics include: decision theory, parametric and non-parametric learning, dimensionality reduction, graphical models, exact and approximate inference, semi-supervised learning, generalization bounds and support vector machines. Prerequisites: basic probability, linear algebra, calculus and some programming experience.

**ENGN 2530. Digital Signal Processing.**
An introduction to the basics of linear, shift invariant systems and signals. Quantization and sampling issues are introduced. Discrete time and DFT properties, fast DFT algorithms, and spectral analysis are discussed. IIR and FIR digital filter design is a focus; stochastic and deterministic signals are introduced. MATLAB exercises are a significant part of the course.

**ENGN 2540. Speech Processing.**
The basics for speech production and hearing are introduced. PDEs and simplified vocal-tract models are derived. LPC, DFT filterbank and time varying signal processing for speech recognition analysis are discussed in mathematical detail. Dynamic programming, vector quantization, hidden Markov modeling, and neural-network pattern recognition for speech are introduced. Offered every other year.
ENGN 2560. Computer Vision.
An interdisciplinary exploration of the fundamentals of engineering computer vision systems (e.g., medical imaging, satellite photo interpretation, industrial inspection, robotics, etc.). Classical machine vision paradigms in relation to perceptual theories, physiology of the visual context, and mathematical frameworks. Selections from Gestalt psychology, Gibsonian approach primate visual pathways, edge-detection, segmentation, orientation-selectivity, relaxation-labeling, shading, texture, stereo, shape, object-recognition.

The study of stochastic processes and a number of applications central to electrical engineering. Analysis of continuous and discrete time Gaussian and second order stochastic processes. Stochastic calculus. Innovations and spectral representations. Markov random fields. Applications to Kalman filtering, the detection of signals in the presence of noise, and two-dimensional image processing. MATLAB projects. Prerequisite: an undergraduate level course in probability or statistics.

ENGN 2600. Electronic Processes in Semiconductors.
Electronic processes primarily in semiconductors with tetrahedral bonding (Si, Ge, GaAs compounds). Topics include phonon spectra, band structure, impurity states, electron and hole distributions, optical properties, electron plasma, scattering processes, excess and hot carriers, semiconductor-metal transitions, one-and two-dimensional electron gas, and amorphous semiconductors. Prerequisite: ENGN 1590 and Intro Quantum Mechanic or equivalent.

Current and proposed semiconductor devices: bipolar transistors (silicon and heterojunction); field effect transistors (MOSFETs, heterostructure, and submicron FETs); hot-electron and quantum-effect devices; and photonic devices (LEDs, semiconductor lasers, and photodetectors). Prerequisites: ENGN 1590 or equivalent introductory device course; some quantum mechanics helpful but not required.

ENGN 2620. Solid State Quantum and Optoelectronics.
Incorporates the study of interaction of radiation with matter emphasizing lasers, nonlinear optics, and semiconductor quantum electronics. Q-switching and mode-locking, electro- and acousto-optic interactions, harmonic generation and parametric processes, self-focusing and phase modulation, stimulated Raman and Brillouin scattering, ultrashort pulse generation, nonlinear processes of conduction electrons in semiconductors, bulk and surface polaritons. Prerequisite: ENGN 2600 or equivalent.

ENGN 2630. Electro-Optical Properties of Materials and Biomolecules.
Fundamental ideas and principles relevant to the understanding of the electrical and optical properties of materials and bio-molecules are emphasized. The mathematics is deliberately kept to a minimum. Topics include metals, semiconductors dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, photosynthesis and redox proteins. Prerequisites: ENGN 0510 and PHYS 0470.

ENGN 2640. Classical Theoretical Physics II (PHYS 2040).
Interested students must register for PHYS 2040.

ENGN 2660. Physics and Technology of Semiconductor Heterostructures.
Covers, largely from an experimental point of view, topics of current interest in semiconductor heterostructure physics and technology; magentotransport in two-dimensional electron gas; integer and fractional quantum Hall effects; resonant tunneling and superlattice transport; optical and transport properties of quantum wires and dots; heterostructure-based devices; other topics of student interest. Prerequisites: PHYS 1410 or equivalent quantum mechanics and ENGN 1590 or introductory device course helpful but not required.

ENGN 2730. Advanced Thermodynamics I.
Fundamental principles of macroscopic equilibrium; thermodynamic stability; Gibbs relations and chemical thermodynamics; applications to various systems, including fluids, solids, and magnetic and dielectric materials. Fundamental principles of macroscopic nonequilibrium thermodynamics (irreversible processes). Entropy production; Curie's principle; Onsager-Casimir reciprocal relations; applications to transport and relaxation phenomena in continuous systems.

ENGN 2740. Advanced Thermodynamics II.
Introduction to the statistical mechanics of equilibrium phenomena for classical and quantum-mechanical systems. Ensemble theory; fluctuations; statistical interpretation of the laws of thermodynamics; applications to ideal gases, chemical equilibrium, simple crystals, magnetic and dielectric materials, radiation, and condensation phenomena.

ENGN 2760. Heat and Mass Transfer.

ENGN 2810. Fluid Mechanics I.
Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

ENGN 2820. Fluid Mechanics II.
Introduction to concepts basic to current fluid mechanics research: hydrodynamic stability, the concept of average fluid mechanics, introduction to turbulence and to multiphase flow, wave motion, and topics in inviscid and compressible flow.

ENGN 2880A. Chemical Reaction Engineering.
Elements of chemical rate processes; steady-state and transient behavior of continuous-flow chemical reactors; uniqueness, multiplicity, and stability in chemical reactor systems and individual catalyst particles; heterogeneous chemical reactor analysis focusing packed beds (continuum and discrete models) and fluidized beds (deterministic and stochastic models).

ENGN 2910A. Advanced Computer Architecture.
This class focuses on advanced computer architecture concepts, including super-scalar processor design, out-of-order execution, branch prediction, multi-core processors, memory hierarchy consistency, GPU architectures, and architecture of large-scale systems such as data centers and supercomputers. Class work expected to include HWs, Labs, and projects. Prerequisite: ENGN 1640 or permission of instructor.

ENGN 2910B. Advanced Process in Materials: Thin Film Processing and Characterization.
No description available.

ENGN 2910C. Advanced Processing of Materials.
This course will present a detailed consideration of processing of specific types of materials. In this particular offering, electronic materials will be the focus of the discussion. Detailed state of the art methods of processing will be described and the relationship between processing and the resulting properties will be discussed.

ENGN 2910D. Engineering and Design I.
No description available.

ENGN 2910E. Nano and Micro Mechanics of Solid Interfaces.
Heterostructures and liquid crystals, electrokinetic phenomena, rheology.

ENGN 2910F. Nano and Micro Mechanics of Solid Interfaces.
Heterostructures and liquid crystals, electrokinetic phenomena, rheology.

ENGN 2910G. Complex Fluids.
This course covers the topics: Mechanics of intermolecular forces and surface forces; Adhesion and friction of hydrophobic and hydrophilic surface complexes; Mechanics aspect of chemical etching and chemical reactions on solid surfaces; Interface energetics and kinetics with anisotropic elasticity and diffusion equations; Micromechanics of grain
developing countries. Lectures, assignments, a group design project and a laboratory will acquaint students with the state-of-the-art in biosensors and applied microfluidics. The course is relevant to physicists, chemists, biologists and engineers.

ENGN 2910N. Molecular and Cellular Biomechanics.
Mechanics and statistical mechanics applied to biological systems. Topics will include semiflexible polymers (DNA, microtubules, actin, flagella), membranes, and molecular motors. We will cover fundamentals including Brownian motion, random walks, diffusion, the fluctuation-dissipation theorem, and electrostatics of ions in solutions.

Random numbers in molecular simulations. Monte Carlo methods applied to equilibrium systems. Kinetic Monte Carlo methods. Molecular dynamics with simple potentials - equilibrium properties in various ensembles (ENV,NVT,NPT,NoT) and non-equilibrium properties. Simulations with three-body potentials and EAM potentials. Molecular statics. Introduction to quantum mechanical methods. Application to the above methods to defect interactions in solids, structure of surfaces, crystal growth and structure of nanostructures.

ENGN 2910P. Nano-system Design.
The goal of this course is to provide a broad understanding of the many fields that are involved in electronic nanotechnology. The material will focus on considering how new basic devices intended to replace silicon-based transistors, such as single-molecule organic switches and nanotube electron conduits, will impact VLSI, computer architecture, and how we may design systems to take advantage of the opportunities they offer. Class will include a mix of lectures and discussion on assigned reading of recent publications. Students will be responsible for leading and participating in these discussions. A course project will also be required. Prerequisites: ENGN 1640 and 1600 are helpful, but not required.

ENGN 2910S. Cancer Nanotechnology.
This course will integrate engineering and biomedical approaches to diagnosing and treating cancer, particularly using nanotechnology and BioMEMS. Topics will include the extracellular matrix and 3D cell culture, cancer cell invasion in microfluidic devices, heterotypic interactions, cancer stem cells and the epithelial-mesenchymal transition, angiogenesis and drug targeting, circulating tumor cells and biomarker detection, as well as molecular imaging and theranostics. Recommended coursework includes ENGN 1110 (Transport and Biotransport), ENGN 1210 (Biomechanics) and ENGN 1490 (Biomaterials) or equivalents.

ENGN 2910T. Physics of Materials.
No description available.

ENGN 2910U. Quantum, Statistical and Continuum Mechanics.
No description available.

No description available.

ENGN 2910W. Synthesis of VLSI Systems.
Promotes understanding of the algorithms used in designing many of today's CAD tools used for VLSI. Topics include synthesis of two-level and multi-level logic, logic testability and automatic test pattern generation, technology mapping, and sequential synthesis. Also introduces efficient manipulation algorithms for logic functions (based on Binary Decision Diagrams). Prerequisite: ENGN 1630. ENGN 1600 is helpful.

ENGN 2910X. Video Processing.
This special topic course will address the rapidly evolving technologies involved in representing and processing video data, including compression, tracking and 3-D modeling. The course will involve projects to implement live and file-based video processing algorithms as well as periodic quizzes. Projects will be carried out primarily in C++.

ENGN 2910Z. Small Wonders: The Science, Technology, and Human Health Impacts of Nanomaterials.
Survey course focusing on nanomaterials as enabling components in emerging nanotechnologies. Covers scaling laws for physicochemical properties, synthesis routes, manipulation and characterization tools, and example applications in sensors, composites, advanced energy devices, and nanomedicine. Impacts of nanomaterials on environment and health,
including the interactions between nanoscale structures and biological molecules, cells, and whole organisms. Undergraduate enrollment by permission.

ENGN 2911A. Nanoelectronics.
Review and analysis of novel and exotic electronic devices, and proposals for extending scaling into the nanometer regime. Contemporary research and development in areas such as nonclassical CMOS; single-electron and nanocrystal memories; 1D nanotube and nanowire transistors, qubits, quantum dots, spin transistors, molecular electronics; and the realization of such elements in arrays and biologically inspired networks.

ENGN 2911B. Electrical and Optical Properties of Materials and Biomolecules.
Fundamental ideas and basic principles relevant to the understanding of the electrical and optical properties of solid-state materials and biomolecules are emphasized. Topics, including metals, semiconductors, dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, and redox proteins, are selected in order to explain the operation of devices having current or future applications in engineering.

Testing of digital integrated circuits has historically focused on the detection and diagnosis of manufacturing defects. However, in the past few years, testing for security has become an important hot topic. This class will cover testing fundamentals along with new approaches for the detection of hardware Trojans (malicious circuitry inserted into a design by an adversary). Related topics in hardware security and authentication, including physically unclonable functions, will also be discussed. Prerequisite: ENGN 1630 or equivalent or permission of instructor.

ENGN 2911D. Engineering and Design II.
No description available.

Course will cover fundamental concepts and methods in continuum, atomistic and statistical modeling of nanoscale and hierarchical materials in engineering and biology. Various systems and phenomena, including thin films, nanocrystalline materials, fracture, hierarchical tissue structures of bone and gecko, cell adhesion and endocytosis, carbon nanotubes and biomolecular assembly, are selected to stimulate discussions at the forefront of solid mechanics research.

ENGN 2911F. Topics in Emerging and Breakthrough Technologies.
No description available.

This class investigates the physical principles and algorithmic methodologies that are used in physically designing and implementing state-of-the-art digital circuits and high-performance processors. We’ll also survey the main available design implementation tools in the market and examine new directions for innovative solutions.

No description available.

ENGN 2911J. Computational Electromagnetics.
This course will introduce numerical techniques for solving practical and theoretical problems in optical science. Using MatLab and Mathematica, students will develop a toolkit for physical optics and build an intuition for wave propagation (e.g., transfer matrices), Fourier optics (beam propagation methods, normal mode analysis), light emission/absorption (surface- and cavity-enhanced lifetimes) as well as general finite difference schemes (frequency and time domain). Prerequisites: ENGN 0510 or PHYS 0470; APMA 0330 or APMA 0350; MATH 0520 or MATH 0540; or equivalent courses.

ENGN 2911K. Biological Impacts of Nanomaterials.
This course will emphasize advancements nanomaterials have made in several fields. In doing so, this course will cover fundamentals of nanomaterial synthesis and biological responses of nanomaterials if ingested, inhaled, or implanted. Biological concepts (immune response, cellular toxicity, etc.) will be combined with engineering concepts (manufacturing and property control) to understand the relationship between manufacturing and biological impacts of nanomaterials.

ENGN 2911L. Environmental Technologies and Human Health.
No description available.

ENGN 2911X. Reconfigurable Computing.
Driven by recent innovations in Field-Programmable Gate Arrays (FPGAs), reconfigurable computing offers unique ways to accelerate key algorithms. FPGAs offer a programmable logic fabric that provides the necessary hardware and communication assets to exploit parallelism opportunities arising in various algorithms. By mapping algorithms directly into programmable logic, FPGAs accelerators can deliver 10X-100X performance increases over generic processors for a large range of application domains. The class will describe FPGA architectures, reconfigurable systems, languages (SystemC) and design tools. The class will show a class of algorithmic techniques (e.g., dynamic programming) that are particularly attractive targets for reconfigurable computing. Mapping specific algorithms from different domains will also be described. These include computer vision, image and signal processing, network security, and bioinformatics algorithms. The class requires basic hardware and programming languages knowledge.

ENGN 2911Y. Verification, Test, Synthesis.
This course will provide an overview of algorithms and techniques in electronic design automation relating to the synthesis, verification, and test of digital integrated circuits. Some topics covered will include synthesis of two-level and multi-level circuits, logic minimization, representations of combinational and sequential circuits for design automation, ordered binary decision diagrams, equivalence checking, verification coverage, assertions, and automatic test pattern generation. Classic techniques and recent state-of-the-art research advances will both be discussed.

ENGN 2911Z. Principles of Nano-Optics.
The goal of this course is to help students build an intuition for light-matter interactions at the nanoscale, especially when optically active elements are located near complex surfaces. The course will begin with a review of the theoretical foundations of macroscopic electrodynamics, but will continue on to discuss specific experimental techniques for investigating microscopic behavior. Topics will include near-field optical microscopy, quantum dots and single molecule spectroscopy, surface plasmon polaritons, local density of states, and photonic crystals.

ENGN 2912A. Toxicity of Nanoparticles.
This course will emphasize advancements nanoparticles have made in several medical fields such as preventing, diagnosing, and treating various diseases. This course will integrate fundamental knowledge of toxicity into such applications. In particular, the course will cover current results in terms of nanoparticle applications and potential toxicity. Toxicity in such organs as the lungs, blood, kidneys, liver etc. will be emphasized. Biological concepts will be combined with engineering concepts to understand the relationship between manufacturing and nanoparticle toxicity.

ENGN 2912B. Scientific Programming in C++.
Introduction to the C++ language with examples from topics in numerical analysis, differential equations and finite elements. As a prerequisite, one programming knowledge, e.g., MATLAB projects. The course will cover the main C++ elements: data types; pointers; references; conditional expressions; streams; templates; Standard Template Library(STL); design and debugging techniques.

ENGN 2912C. Future Directions in Computing: From Bio and Quantum to Nano and 3D.
Silicon-based electronics is the foundation of computing devices. The computer industry is reaching an important milestone, where physical limits arising from using optical lithography manufacturing techniques can stop the evolution of computational power as predicted by Moore’s law. In this class, we explore some of the alternatives that can be used for future computing devices. Topics covered include: quantum computing, bio-based computing, spin-based computing, nanotube-based computing, computing with light and 3D chips.

ENGN 2912D. Networks and Network-on-Chip Design.
Network-on-Chip communication fabrics are a very recent approach to multi-core system-on-chip design. This class will cover state-of-the-
art research in the design and test of network-on-chip communication hardware and will compare these on-chip communication networks to more traditional networks. Additional aspects of system-of-chip design and test will also be explored. Prerequisites: ENGN 1630 and ENGN 1640 or equivalent experience in digital design.

ENGN 2912E. Low Power VLSI System Design.
This course deals with the design of digital systems for low power dissipation. Issues that will be addressed include CMOS power dissipation, analysis and design tools used for lower power digital circuits, design methodologies for low power CMOS circuits, low power architecture designs, and a discussion on future challenges in low power digital design. Prerequisites: familiarity with basic MOSFET structure and computer architecture principles; some circuit analysis helpful.

ENGN 2912F. Soft Matter.
This course is a special topics graduate course on soft matter, treating polymers, liquid crystals, surfactants, and colloids. The different topics will be unified by a common approach using statistical mechanics.

ENGN 2912H. Interfacial Phenomena.
This course is an introduction to mechanics of material interfaces. Particular cases considered are liquid surfaces (surface tension, contact line slip, electro-wetting, etc), lipid membranes, and thin elastic plates and shells. The course will cover detailed analyses of statics and dynamics of these interface. Classical and modern research papers related to these topics will form the motivation for the discussion. A unified treatment of these apparently disparate interfaces is presented to conclude the course. Prerequisites: ENGN 2010, 2020, 2210, or 2810.

ENGN 2912I. Selected Topics in Physics of Locomotion (PHYS 2610E).
Interested students must register for PHYS 2610E.

ENGN 2912L. Topics in Bioelectronics.
Seminar course covering subjects related to interactions between electronic and biological systems. Material includes energy harvesting, low-power electronic circuit design, biosensors and signal integrity, neuromorphic hardware, low-power wireless communications, and electrochemical methods. Emphasis on critical reading, technical analysis, presentation, and discussion. Design project.

ENGN 2920A. Complex Fluids: Particles and Interfaces.
Introduces disperse systems (colloidal suspensions, emulsions, surfactant solutions, blood) with special attention to the thermodynamics and mechanics of interfaces. The course will bridge the physico-chemical and mechanical perspectives in the study of these materials. The intended audience is graduate students in Engineering, Physics, Chemistry, and Applied Mathematics. Prerequisite: We will sometimes use material from ENGN 2010/2020, such as differential equations, Fourier and Laplace transforms, elementary differential geometry, basic probability, vector calculus. Knowledge of basic solid/fluid mechanics will be helpful.

This course introduces the students to the mechanics aspects of battery materials and some of the current research problems. It will consist of a series of lectures by experts from academia and industry, which will cover the state of the art in lithium ion batteries, the role of mechanics in advancing the field, experimental studies, continuum modeling, ab initio modeling and practical design issues. There will be approximately one lecture each week (150 min); each lecture will focus on a specific aspect of battery materials, giving an in-depth treatment of scientific problems, the current state of understanding and future challenges.

ENGN 2920D. Environmental Technologies and Human Health.
This course explores interdisciplinary approaches to environmental safety and health drawing from Brown University faculty and other affiliated experts. Topics include history of environmental regulation and waste management; origin and chemistry of pollutants; biological impacts of exposure and risk assessment; pollutant dispersion, transport and bioaccumulation; and remediation technologies. Emphasis is placed on how scientific research impacts regulatory and engineering decisions regarding cleanup and management of contaminated sites. The target audience is graduate students and advanced undergraduates (permission required) with prior coursework or research in engineering, biology, or environmental studies. Enrollment limited to 30.

This class describes the fundamentals of statistical mechanics with a focus on both traditional analytic methods and modern atomistic simulations methods. The class is divided in two parts. (i) Techniques used to calculate interactions at the atomic level are first covered, from simple interatomic potentials to quantum mechanical first-principles methods. (ii) Simulations techniques to sample atomic degrees of freedom for obtaining macroscopic quantities are then discussed, such as Monte Carlo and Molecular Dynamics. The tools presented in class are illustrated with ongoing examples that illustrate how these methods work in concert. Enrollment limited to 40 graduate students.

ENGN 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ENGN 2980. Special Projects, Reading, Research and Design.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ENGN 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
The School of Public Health

Dean
Terrie T. Wettle

Department Chair - Behavioral and Social Sciences
Christopher W. Kahler

Department Chair - Biostatistics
Constantine A. Gatsonis

Department Chair - Epidemiology
Stephen L. Buka

Department Chair - Health Services, Policy & Practice
Ira B. Wilson

The Brown University School of Public Health offers graduate programs and comprehensive course work leading to the Master of Public Health (M.P.H.); the ScM, AM and PhD in Biostatistics; the ScM and AM in Behavioral and Social Sciences Intervention; the PhD in Behavioral and Social Health Sciences; the ScM in Clinical and Translational Research; the ScM and PhD in Epidemiology; and the PhD in Health Services Research. The School of Public Health also offers undergraduate concentrations in Public Health, Community Health (through 2015 graduating class), as well as an approved track of Statistics in the Independent Concentration rubric.

The School's faculty-to-student ratio gives students a great deal of interaction with instructors who are accessible, approachable, and encouraging of student involvement in critical projects.

For additional information regarding the School of Public Health and its programs of study and areas or research visit:
http://publichealth.brown.edu/

Community Health Concentration Requirements

Community Health is an interdisciplinary concentration through which students examine a variety of issues, including population health and disease, health policy, cross-cultural and international aspects of health, the organizational and social structures through which health services are delivered and received, and the public health system. Courses in the concentration allow students to explore the ways in which the social, political, behavioral and biological sciences contribute to the understanding of patterns of population distributions of health and disease. The concentration also provides students with courses in basic research methods and statistics necessary for problem solving and critical thinking in the emerging emphasis on evidence-based health care and public health.

The requirements listed below are specific to the AB Community Health concentrators in the class of 2015 and earlier. Students in the class of 2016 and beyond, please visit http://bulletin.brown.edu/the-college/concentrations/pubh/ for the AB Public Health concentration requirements. Students interested in the combination AB Community Health/MPH degree should visit http://brown.edu/academics/public-health/abmph-required-courses for a list of those requirements.

Required Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Total Credits 12

Honors. An Honors track is available for students who qualify. Honors track students are also required to enroll in PHP 1980 in both semesters of their senior year to conduct research and write the honors thesis.

Inquiries: Sarah Hemond (Sarah_Hemond@brown.edu).

Public Health Concentration Requirements

Public Health (formerly Community Health) is an interdisciplinary concentration through which students examine a variety of issues, including population health and disease, health policy, cross-cultural and international aspects of health, the organizational and social structures through which health services are delivered and received, and the public health system. Courses in the concentration allow students to explore the ways in which the social, political, behavioral and biological sciences contribute to the understanding of patterns of population distributions of health and disease. The concentration also provides students with courses in basic research methods and statistics necessary for problem solving and critical thinking in the emerging emphasis on evidence-based health care and public health.

The requirements listed below are for AB Public Health concentrators in the class of 2016 and beyond. AB Community Health concentrators, in the classes of 2014 and 2015 should refer to http://bulletin.brown.edu/the-college/concentrations/comh, for degree requirements.

Total Credits 12
ECON 1360  Health Economics

**Social and Behavioral Science for Prevention Electives (Students must select one of the following):**

- PHP 1010  Doctors and Patients- Clinical Communication in Medicine
- PHP 1400  HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs
- PHP 1540  Alcohol Use and Misuse
- PHP 1600  Obesity in the 21st Century: Causes, Consequences and Countermeasures
- PHP 1680N  Tobacco, Smoking, and the Evil Empire
- PHP 1680T  Translation, Diffusion and Cultural Relevance of Health Promotion Interventions
- PHP 1740  Principles of Health Behavior and Health Promotion Interventions
- PHP 1920  Social Determinants of Health
- PHP 2310  Physical Activity and Public Health
- PHP 2320  Environmental and Policy Influences on the Obesity Epidemic
- PHP 2330  Behavioral and Social Approaches to HIV Prevention
- PHP 2340  Behavioral and Social Science Theory for Health Promotion
- PHP 2360  Designing and Evaluating Public Health Interventions
- PHP 2380  Health Communication

**Approved Electives (Students must select four electives; no more than two (2) can be Human Biology/Physiology courses):**

The four electives may be selected from the approved courses from the areas listed above or the approved general electives listed below.

- PHP 0030  Health of Hispaniola
- PHP 0040  Addiction: The Causes, Cures and Consequences of Substance Abuse in Modern Society
- PHP 1680I  Pathology to Power: Disability, Health and Community
- PHP 1680K  Introduction to Conducting Clinical Research
- PHP 1680M  The Epidemiology of Violence and its Consequences
- ANTH 0300  Culture and Health
- ANTH 1020  AIDS in Global Perspective
- ANTH 1242  Bioethics and Culture
- ANTH 1300  Anthropology of Addictions and Recovery
- ANTH 1310  International Health: Anthropological Perspectives
- BIOL 0030  Principles of Nutrition (Human Biology/Physiology course)
- BIOL 0040  Nutrition for Fitness and Physical Activity
- BIOL 0180  The Biology of AIDS
- BIOL 0190E  Botanical Roots of Modern Medicine
- BIOL 0200  The Foundation of Living Systems (Human Biology/Physiology course)
- BIOL 0470  Genetics (Human Biology/Physiology course)
- BIOL 0475  Conservation Medicine
- BIOL 0530  Principles of Immunology (Human Biology/Physiology course)
- BIOL 0800  Principles of Physiology (Human Biology/Physiology course)
- BIOL 0860  Diet and Chronic Disease
- BIOL 0920A  Controversies in Medicine (Human Biology/Physiology course)
- BIOL 1920B  Health Inequality in Historical Perspective
- BIOL 1920C  Social Contexts of Disease

**Total Credits: 12**

**Honors:** An Honors track is available for students who qualify. Honors track students are also required to enroll in PHP 1980 in both semesters of their senior year to conduct research and write the honors thesis. Please visit http://brown.edu/academics/public-health/honors-track for details.

Inquiries: Prof. William Rakowski at William_Rakowski@brown.edu

---

**Master of Public Health Graduate Program**

The Master of Public Health (M.P.H.) degree is dedicated to developing skilled professionals who are committed to improving the health of communities by translating rigorous scientific research into sound, evidence-based public health policy and practice.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-public-health

---

**Biostatistics Graduate Program**

The graduate program in Biostatistics offers comprehensive course work leading to a Master of Science (Sc.M.); a Master of Arts (A.M.); and the Doctor of Philosophy (Ph.D.) degrees. The graduate programs in Biostatistics are designed to provide training in theory, methodology, and practice of statistics in biology, public health, and medical science. The program provides comprehensive training in theory and methods of biostatistics, but is highly interdisciplinary and requires students to acquire expertise in a field of application. The Ph.D. program is intended to enable graduates to pursue independent programs of research; the Sc.M. and A.M. programs provide training for application of advanced methodology in professional and academic settings.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biostatistics
Behavioral and Social Health Sciences Graduate Program

The interdisciplinary Doctoral program (PhD) in Behavioral and Social Health Sciences (BSSH) trains graduate students to employ behavioral and social science theory and methods to understand contemporary health problems and develop interventions to improve the health of individuals and groups. The program puts substantive focus on diet, physical activity and obesity; alcohol and other drug abuse; smoking and tobacco use; HIV risk behaviors; and health disparities and culture.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/behavioral-and-social-health-sciences

Behavioral Social Sciences Intervention Graduate Program

The interdisciplinary Master of Science (Sc.M.) and Master of Arts (A.M.) program in Behavioral and Social Sciences Intervention (BSSI) trains graduate students who are interested in analyzing the complex behavioral and social determinants of public health, and in developing interventions to change behaviors and improve social contexts related to public health.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-behavioral-and-social-sciences-intervention

Clinical and Translational Research Graduate Program

The goal of the Master of Science (Sc.M.) degree program in Clinical and Translational Research is to train clinicians and basic scientists to extend basic scientific research into the clinical arena, ultimately leading to improvements in individual and population health. By translating basic research into improved clinical outcomes, researchers and clinicians are able to provide new treatments to patients more efficiently and quickly.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-clinical-and-translational-research

Epidemiology Graduate Program

The graduate program in Epidemiology offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. Using sophisticated study designs, statistical analyses, field investigations, and laboratory techniques, epidemiology students investigate the multiple causes of a disease, disease distribution (geographic, ecological, and social), methods of transmission, and measures for control and prevention.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/epidemiology-0

Health Services Research Graduate Program

The graduate program in Health Services Research offers comprehensive course work leading to the Doctor of Philosophy (Ph.D.) degree. The program seeks to develop scientists experienced in the use of state-of-the-art experimental and non-experimental research methods to investigate how people obtain access to health care, the components and impacts of health care costs, and what happens to patients as a result of care. Health services research aims to identify the most effective ways to organize, manage, finance, and deliver high quality care to benefit population health.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-health-services-research

Courses

PHP 0030. Health of Hispaniola.
Two developing countries, Dominican Republic and Haiti, have widely differing health outcomes despite centuries of shared experience on the Caribbean Island of Hispaniola. This course will examine the history, politics, economics, culture, international relations, demography, and geography, as well as epidemiology and health services, to demonstrate that multiple factors, both recent and long-standing, determine the present health of these populations. Enrolment limited to 20 first year students. Instructor permission required. FYS WRIT

PHP 0040. Addiction: The Causes, Cures and Consequences of Substance Abuse in Modern Society.
Addiction has been recognized by the psychological and medical community as a chronic, physical disease, affecting the body in ways which mirror the mechanisms of other neurological disorders. However, despite definitive research suggesting the genetic and physical roots of addiction disorders, the disease of addiction still faces significant prejudice from laws and societies seeking to place blame upon addicts themselves. Stigmas and misconceptions that cast addicts as morally corrupt, deviants lacking in will power still pervade cultural and political discourse, creating and maintaining powerful stigmas that prohibit addicts and their families from seeking care. Enrolment limited to 20 first year students. FYS WRIT

PHP 0050. Pain and the Human Condition: Exploring the Science, Medicine, and Culture of Pain.
Pain is a universal human experience, yet it is highly subjective. For most, pain represents an occasionally unpleasant, self-limited experience. However, for others, chronic pain persists beyond the recovery from an injury or as a result of a chronic health condition. Persons with chronic pain often describe their pain as permeating every aspect of their lives. While an active area of research, pain remains a significant challenge to the individual seeking treatment, the health care provider and society. This multidisciplinary course introduces students to scientific, medical, and public health aspects of pain and explores personal narratives and cultural meanings of pain. Enrolment limited to 20 first year students. FYS WRIT

PHP 0100. First year seminar: Statistics is everywhere.
Statistics is the universal language behind data-enabled decision making. Examples include Google’s page ranking, Amazon’s customer recommendations, weather prediction, medical care and political campaign strategy. This seminar will expose students to a variety of problems encountered in the media, in science and in life for which solutions require analysis of and drawing inferences from data. We will introduce basic concepts of randomness, probability, variation, statistical significance, accuracy, bias and precision. The course will discuss statistical problems from reading assignments and material identified by the students. We will use simulation to illustrate basic concepts, though previous programming experience is not required. FYS

PHP 0310. Health Care in the United States.
Introduction to the health care delivery system. An overview of the U.S. health care financing, delivery and regulatory system. Considers the interaction between paying for and providing and assuring the quality of health services; changes in one component of the system inevitably affect the others. Addresses the balance between employer funded health insurance, publicly funded health insurance and the consequences of not being insured. Seven discussion sections arranged during the semester. Open to undergraduates only. LILE

PHP 0320. Introduction to Public Health.
An introductory overview of the U.S. Public Health System with an emphasis on the core functions of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. Presents a comprehensive overview of the environmental and behavior factors associated with health promotion and disease prevention. LILE
PHP 0600. Primetime Bioethics - Ethics in the Media. This course is geared toward students interested in Biomedical Ethics. Students will watch an assigned medical show, read a related article, and participate in a class discussion. A final project will involve groups of students creating their own “episode” with an ethical dilemma and solution in order to demonstrate what they have learned in a creative and novel way. This is a discussion-based course, with one or two students leading the discussion each week, after meeting briefly with (or emailing) the instructor in order to identify the important topics and ensure that they feel confident in leading the discussion.

PHP 0850. Fundamentals of Epidemiology. As the cornerstone of public health, a strong foundation in epidemiology provides students with the ability to investigate, clarify and criticize claims of disease causation. This course provides students with a foundation in basic epidemiologic concepts and methods. Key measures of disease occurrence and effects used in epidemiology will be discussed; strengths and weaknesses of alternative epidemiologic study designs will be examined. Interpreting epidemiologic evidence to inform public health policy and practice will be emphasized throughout the course. Open to Public Health concentrators and others by permission; Class limit 80.

PHP 1010. Doctors and Patients- Clinical Communication in Medicine. Communication is central to medical practice and interpersonal relationships between patients and physicians can often be powerful curative agents. This course reviews theory and research on physician-patient communication. In addition to lectures, readings, and discussions, students will have opportunities to observe physicians in clinical settings. Appropriate for students interested in communication sciences, health psychology, health education, pre-med and other clinical training, and medical anthropology. Enrollment limited to 20. NOTE: Most classes will be held on Mondays and Wednesdays. The remaining class time will be fulfilled through shadowing placements customized and scheduled when students and doctors are available.

PHP 1070. The Biobehavioral Disease in Developing Countries. Defines and critically examines environmental, epidemiologic, demographic, biomedical, and anthropological perspectives on health and disease in developing countries. Emphasis on changes in the underlying causes of morbidity and mortality during economic development. Focuses on the biosocial ecology of diseases. Required major term paper worth 50% of final grade is scholarly centerpiece of course. Weekly discussion sections and small group research projects supplement the two exams and term paper. Guest lecturers cover different diseases and public health perspectives. Enrollment limited to 65. DPLL LILE WRIT

PHP 1100. Comparative Health Care Systems. Focuses on principles of national health system organization and cross-national comparative analysis. Emphasizes application of comparative models to the analysis of health and health-related systems among nations at varying levels of economic development and health care reform. Addresses research questions related to population health and systems’ performance. Questionnaire completion required for Freshman and Sophomore students. Enrollment limited to 30. DPLL

PHP 1320. Survey Research in Health Care. An introduction to the methodology of survey research as it is conducted by social scientists and epidemiologists. Provides an overview of all aspects of study design and instrument development as well as an introduction to statistical analysis of survey data. Prerequisite: PHP 0320. Students should fulfill the department’s statistics requirement prior to taking, or concurrently with, this course.

PHP 1400. HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs. The course is intended to challenge students from different disciplines to develop strategies to address the challenges of establishing and sustaining HIV/AIDS care and treatment programs in Africa. The course will begin with a general introduction to HIV/AIDS to provide a foundation wherein students will obtain a basic scientific and sociological understanding of the disease. Discussion topics on: the impact of AIDS, introducing antiretroviral therapy in Africa, monitoring and evaluating ARV therapy scale up and developing a country wide plan for a national laboratory system to support HIV/AIDS care and treatment will be facilitated through the use of case studies. Enrollment limited to 25 juniors and seniors. Graduate students with permission of instructor. DPLL

PHP 1500. Global Health Nutrition. The course focuses on nutritional status influences on population health of low and middle income countries. It covers both 1) undernutrition, including protein-calorie malnutrition and specific micronutrient deficiencies; and 2) overnutrition, including obesity. It covers morbidity and mortality associated with under- and overnutrition. Nutritional aspects of maternal and child health and the association of nutritional exposures early in life and later adult health are emphasized Specific areas include nutritional status measurement, including body size and composition, dietary intake and physical activity, as well as household, community, and national, socioeconomic and political factors. Prerequisite: PHP 1070, 2120, 2150, or BIOL 0030. DPLL

PHP 1501. Essentials of Data Analysis. This course covers the basic concepts of statistics and the statistical methods most commonly used in the social sciences and public health with an emphasis on application of methods to real data. The first half of the course introduces descriptive statistics and the inferential statistical methods of confidence intervals and significance tests, applied to means and proportions. The second half introduces bivariate and multivariate methods, emphasizing contingency table analysis, regression, and analysis of variance. This is designed to be a first course in Statistics, so know previous knowledge of the subject is expected. There are no prerequisites.

PHP 1530. Case Studies in Public Health: The Role of Governments, Communities and Professions. This course provides an integrated knowledge of the public health’s development, policy, practice and infrastructure and its relationship to medical care, social services and the environment. The matrix approach juxtaposes public health content (e.g., infectious disease) and public health tools (e.g., behavioral theory, policy/advocacy/epidemiology/quality improvement/program planning) using case studies. It aims to strengthen students’ capacity to apply a population-based viewpoint to public health practice. Prerequisite: PHP 0320. Enrollment limited to 40.

PHP 1540. Alcohol Use and Misuse. Reviews the epidemiology of alcohol use, abuse, and dependence and examines its neurobiological and behavioral underpinnings. Covers etiology including physiological, genetic, psychological and social cultural influences, and prevention, brief intervention and treatment considerations. Course background in psychology, sociology, or community health is recommended. Recommended prerequisites: PHP 0320 and CLPS 0010. Enrollment limited to 20 juniors, seniors, and graduate students.

PHP 1600. Obesity in the 21st Century: Causes, Consequences and Countermeasures. The scope of obesity knowledge is too large to cover during one single course, therefore we will focus primarily on obesity-related health outcomes, assessment of obesity, obesity epidemiology, social and behavioral correlates of obesity, obesity and stigma, policy and interventions across population groups. The readings for this course are multi-disciplinary in nature and integrate epidemiological, biological, sociological, political and philosophical perspectives. This course is specific to the United States and mostly all readings will reflect this contextual focus. Enrollment limited to 30. DPLL

PHP 1680L. Pathology to Power: Disability, Health and Community. This course offers a comprehensive view of health and community concerns experienced by people with disabilities. Guest speakers, and hands on field research involving interactions with people with disabilities will facilitate the students gaining a multi-layered understanding of the issues faced by people with disabilities and their families. DPLL LILE
PHP 1680J. The Race To Inner Space: Conflating Science, Politics, and Economics To Promote Brain Health.

Provides an understanding of how funds are raised and spent for disease-targeted research; Provides hands-on experience and exposure to public and private decisionmakers influencing healthcare policy related to diseases of the brain; Provides an understanding of issues, challenges, and opportunities related to neurological and psychiatric illness parity with other illnesses; Identifies lessons learned from health care research funding policy successes and failures; and, Identifies directions for future brain health policy research related to the measurement of program effectiveness and comparative effectiveness, economic benefit. Permission of primary instructor (J. Bentkover) required. Enrollment limited to 24 juniors, seniors, and graduate students.

PHP 1680K. Introduction to Conducting Clinical Research.

This course is intended to help students become familiar with the design and implementation of clinical research, including ethical and logistical processes related to collecting data and interpretation of published medical literature. In addition to weekly sessions, the course requires 4-6 hours weekly in the Emergency Department at Rhode Island Hospital enrolling patients in clinical trials. As students will be directly exposed to patient and clinical care, the course is limited to 12 students for the semester. Interested students should contact the course director to be considered for enrollment. Not open to first year students. Instructor permission required.

PHP 1680M. The Epidemiology of Violence and its Consequences.

Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Intended as a junior/senior level course. Prerequisite: PHP 2120 or equivalent. Enrollment limited to 10.

PHP 1680N. Tobacco, Smoking, and the Evil Empire.

Reviews the epidemiology of smoking and nicotine addiction and briefly examines its neurobiological and behavioral underpinnings. Covers prevention efforts and state-of-the-art treatment interventions with an emphasis on policy implications. Course background in psychology, sociology, or community health is recommended. Suggested prerequisites: PHP 0320 and CLPS 0010. Restricted to juniors, seniors, and graduate students.

PHP 1680S. Bioethics at the Bedside.

This course explores a variety of topics in biomedical ethics. Each class will begin with a vignette, short film, or speaker, followed by a short lecture. A large portion of class time will then be devoted to class discussion/debate. The course has four parts: introduction to medical ethics in which we consider what value we assign to individuals within various ethical constructs; discussion of bioethical issues at the beginning and end of life; examination of the duty of physicians; and selection of additional topics exploring ethical issues that arise from the social, economic, and cultural differences between physician and patient. Enrollment limited to 30.

PHP 1680T. Translation, Diffusion and Cultural Relevance of Health Promotion Interventions.

Intended to help students become familiar with three key aspects of disease prevention/health promotion programs: (1) how findings from “basic” behavioral and social science (BSS) research are tested for effectiveness in real-life settings (translation); (2) how programs with demonstrated effectiveness, in one or more local settings, are introduced and adopted more broadly (diffusion); and (3) how cultural relevance is involved in both translation and diffusion. Translation and Diffusion will comprise the two main sections of the semester. Cultural relevance will be a theme integrated into each part of the course. Appropriate for BSSI, MPH, and advanced undergraduate students with coursework in public/community health. Open to juniors and seniors only. DPLL

PHP 1700. Current Topics in Environmental Health.

This course is designed to introduce students to the field of environmental health, and demonstrate how environmental health is integrated into various aspects of our lives, both directly and indirectly. Topics to be covered include: toxic metals, vector-borne disease, food safety, water quality, radiation, pesticides, air quality, hazardous waste, risk assessment, and the role of the community in environmental health. Several topics will be presented by guest speakers so that students can learn from the expertise of professionals in the field. Enrollment limited to 40.

PHP 1740. Principles of Health Behavior and Health Promotion Interventions.

Examines health behavior decision-making and elements for design of health promotion interventions. Covers theories of health behavior (focusing on primary and secondary prevention), principles of intervention design, and reading of research literature. Emphasizes psychological, social, and proximate environmental influences on individuals’ health-related behaviors. Restricted to juniors, seniors, and graduate students. Prerequisite: PHP 0320 or equivalent. Enrollment limited to 25.

This seminar, open by invitation only to participants in the TRI-Lab program, will investigate a range of topics related to the healthy development of children from pregnancy through school entry, including the prevalence and determinants of major health and developmental concerns of infants and young children as well as key state and federal programs designed to address them. Readings, lectures, discussions, and in-class exercises will be used to foster collaborative inquiry by students, faculty, and community participants. Students will develop projects aimed at advancing or refining solutions to key healthy early childhood development challenges in Rhode Island.

The Healthy Food Access Lab will investigate community-based approaches to increasing access to healthy food and reducing obesity and overweight and food insecurity and hunger. It will provide students with an integrative scholarship experience that combines in-class and field-based learning opportunities with the development of applied, community-based research projects addressing a range of healthy food access challenges facing Providence and Rhode Island.

PHP 1854. The Epidemiology and Control of Infectious Diseases.

The objective of this course is to introduce students to key methods and concepts in the epidemiological study and control of infectious diseases. By the end of this course, students will have a solid foundation in the distribution, transmission, and pathogenesis of major infectious diseases that affect human populations. We will discuss methods to design and evaluate public health strategies to prevent or eliminate infectious diseases, including: outbreak investigation, disease surveillance, infection control, screening, and vaccination. Student-led presentations/discussion sessions, skill debates, ethical issues, and larger societal implications for the prevention and control of infectious diseases in the 21st century. This course is open to all undergraduate students who have successfully completed PHP 0320 (Introduction to Public Health) and to graduate students who have completed or are concurrently enrolled in either PHP 2120 (Introduction to Methods in Epidemiology Research) or PHP 2150 (Foundations in Epidemiologic Research Methods).

PHP 1910. Community Health Senior Seminar.

Disparities in health and health care have been documented in the U.S. and globally. Students will develop a needs assessment relevant to health disparities at the local or global level; systematically review, synthesize, and critique a body of literature; use knowledge and tools from previous public health classes to pose a research question, and then find, create, and manipulate data to perform appropriate analysis; interpret and present study results; and learn to work collaboratively towards a specific public health research goal. Prerequisite: PHP 0310, 0320, and 1320. Open to Senior Community Health concentrators only.

The course provides an overview of social determinants of health. Examples of topics include health effects of educational attainment, social integration, neighborhood socioeconomic characteristics, racial discrimination, gender, income inequality, childhood socioeconomic circumstances, parental neglect, and job strain. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Open to graduate students and advanced undergraduates. DPLL
PHP 1960. Epidemiology of Chronic Disease.
This course is aimed at providing students with an introduction to the epidemiology of chronic disease. The topics in this course will review major chronic diseases; review descriptive data on population differences and time trends in incidence, prevalence and mortality; summarize mechanisms of pathogenesis; discuss major risk factors and address methodological issues in establishing causality; address potential opportunities for disease prevention and control. Students will be expected to present a selected topic on a current topic, providing opportunities to discuss cutting-edge research areas in the field.

A special project may be arranged in consultation with an individual faculty sponsor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Two semesters of PHP 1980, Honors Thesis Preparation, will be devoted to the development and implementation of an Honors project, and of the writing of the Honors Thesis for the Community Health Concentration.

Provides an introduction to the concepts and scope of public health nutrition with a focus mainly on the U.S. Students will gain an understanding of the science behind national dietary recommendations and learn about dietary assessment methods, determinants of food intake, and interventions to improve diet. The course will emphasize ways in which environment and policy can influence nutritional status of diverse populations. It will also focus on controversial topics in nutrition and will employ hands-on activities such as self-dietary assessment, debates, op-eds, and individual presentations of nutrition topics of interest. Enrollment limited to 25 juniors, seniors, and graduate students. DPPL

Provides a theoretical and practical basis for measurement in health care, introduces measurement theory, scale development, and criteria to be considered when choosing measures in clinical practice and research. Practical exercises include questionnaire development and a written research protocol for the development and validation of a new measure. Prerequisites: PHP 2120, 2130.

PHP 2020. Disability Over the Life Course.
An overview of the epidemiology of physical and cognitive disability in America, associated patterns of medical and social service use, and current as well as "ideal" population-specific systems of formal and family care. Also explores medical, social, and psychological needs associated with the stage of life in which disability is experienced. Prerequisites for advanced undergraduates are PHP 0310 or SOC 1550, and introductory statistics.

PHP 2030. Clinical Trials Methodology.
We will examine the modern clinical trial as a methodology for evaluating interventions related to treatment, rehabilitation, prevention and diagnosis. Topics include the history and rationale for clinical trials, ethical issues, study design, protocol development, sample size considerations, quality assurance, statistical analysis, systematic reviews and meta-analysis, and reporting of results. Extensively illustrated with examples from various fields of health care research. Recommended prerequisites: introductory epidemiology and statistics. Pre-requisites: PHP 2120, and either PHP 2508, 2510, or 2520. Open to graduate students only.

Emphasizes the theory of sampling and survey methods and their application to public health research. Topics include: survey design and planning; principles of sampling and survey terminology; questionnaire construction; protection of human subjects; data collection (including interviewing and data coding procedures); and application, presentation, and evaluation of results. Suggested prerequisites: PHP 2120, and PHP 2508 or 2510. Open to graduate students only.

PHP 2060. Qualitative Methods in Health Research.
Introduces qualitative approaches to data collection and analysis in health research. Methods covered include: participant observation, key-informant interviews, focus groups, innovative data collection strategies, and non-obtrusive measures. Students will use applied projects to develop skills in: qualitative data collection and management, interviewing, transcript analysis using computerized software, triangulation between qualitative and quantitative data, and report preparation for qualitative studies. Enrollment limited to 15 graduate students.

PHP 2070. Public Health/Community Service Internship.
The course is an introduction to the history, organization, resources, concepts and issues of public health and health care. Students will be matched according to their interests in a related practical experience in a health-related organization, with the expectation that they complete a project or produce a product of public health utility. This gives students an opportunity to critically apply knowledge and skills learned in didactic sessions. Instructor permission required.

PHP 2075. MPH Analytic Internship.
The primary objective of this course is to gain hands-on experience in using data to address public health questions. Concepts from previous courses will be re-enforced as students work through the steps of addressing a public health question. Both data analysis and data interpretation will be emphasized in the context of a public health question. STATA 8.0 will be used to analyze data. Prerequisites: PHP 2120, and either PHP 2500 or 2510. Open to graduate students in the MPH program only.

Uses case study strategies to: identify key ethical principles, values, legal authorities and regulation relevant to public health practice and research; evaluate public health research designs in terms of ethical and legal principles; conduct ethical analyses of public health interventions by identifying potential ethical and legal concerns and conflicts; and employ strategies for working effectively with special populations, including the design of culturally appropriate interventions. Open to graduate students only.

Addresses methodologic and operational issues associated with developing research studies in epidemiology (including clinical trials). Students prepare protocols for research studies in human populations with attention to ethical guidelines and regulations. Students critique completed proposals, are exposed to existing systems for submission and review of funding applications, as well as controversial issues such as conflict of interest. Prerequisite: PHP 2120. Enrollment limited to 10 graduate students. For Summer enrollment, students must be accepted to the Clinical and Translational Research Institute. S/NC

Epidemiology quantifies patterns and determinants of human population health, with a goal of reducing the burden of disease, injury, and disability. An intensive first course in epidemiological methods, students learn core principles of study design and data analysis through critiques of published epidemiological studies as well as hands on practice through weekly exercises and assignments. This is a graduate-level course aimed at masters and PhD students. The course is not open to first year students or sophomores but may be available for advanced undergraduates with the instructor’s permission.

This course provides basic principles of human biology and its applications to public health. Examples of biology topics include the cardiovascular system, endocrine system, immune system, nervous system, genetics, cancer, cardiovascular disease, HIV/AIDS, and depression. Examples of applied topics include strengths and weaknesses of using biomarkers, accuracy and precision of biological measurements, quality assurance and quality control methods for using biomarkers for public health research. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

The overall objective of this course is to provide students with a strong foundation in epidemiologic research methods. This is the first of a two- or four-course sequence in epidemiologic methods aimed at students who expect to eventually conduct their own epidemiologic research. There will be a strong quantitative focus in this course. By the end of the foundations course, students should be sufficiently familiar with epidemiologic research
methods to begin to apply these methods to their own work. Prerequisite: PHP 2507 or 2510 (either may be taken concurrently); the typical student will also have some introductory knowledge of epidemiology.

**PHP 2170. Injury As A Public Health Problem.**
Injury causes significant morbidity and mortality in the U.S. and across the globe. However, injuries – both violent and non-violent – are eminently preventable. The overarching objective of this course is to enable students to understand the epidemiology of injury and violence, as well as strategies to improve public health through injury prevention. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students. DPLL

**PHP 2180. Interpretation and Application of Epidemiology.**
This advanced graduate seminar extends methodologic training in epidemiology and integrates it with subject matter knowledge to enhance inferences about epidemiologic research and its application to policy. Students will build on a foundation of methods training through Intermediate Epidemiology (PHP 2200) with selected advanced methods topics such as meta-analysis, imputation, and the tools of clinical epidemiology. Each week, a new methodologic topic will be introduced and we will develop a specific application of epidemiology to causal inference and policy. Prerequisite: PHP 2200. Open to graduate students only.

**PHP 2200. Intermediate Methods in Epidemiologic Research.**
This course introduces students to selected advanced methods topics such as meta-analysis, imputation, and the tools of clinical epidemiology. Each week, a new methodologic topic will be introduced and we will develop a specific application of epidemiology to causal inference and policy. Prerequisite: PHP 2200. Open to graduate students only.

**PHP 2205. Epidemiology of Vascular Disease.**
The study of vascular disease is one of the most important areas of epidemiology. Prerequisite: PHP 2200 or instructor permission. Enrollment limited to 25 students.

**PHP 2210. Epidemiology of Chronic Disease.**
A survey of central issues in selected health conditions that have major disabling consequences. The focus is on epidemiologic and biologic features of these conditions and their social and biologic determinants such as smoking, poverty, occupational exposures, nutrition, and heredity. Methodological areas include classification, screening, lead time bias, time trends, etc. Seminar format. Students present reviews of selected topics. Open to graduate and advanced undergraduate students.

**PHP 2215. Epidemiology and Control of Infectious Diseases.**
This course will introduce students to the field of infectious disease epidemiology. Topics will include a history of infectious diseases, epidemiologic study of infectious diseases. While we will study the treatment and prevention of HIV in great detail, emphasizing the current state of knowledge and critiquing the most recent literature, this course aims to use HIV as an example to better understand the variety and complexity of methodological issues in global and domestic infectious disease epidemiology today. Enrollment limited to 25 graduate students. Prerequisite: PHP 2120 or PHP 2505 or PHP 2510; or permission of the instructor.

**PHP 2220A. Epidemiology of Violence and Its Consequences.**
Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Prerequisites: PHP 2120 or knowledge of elementary epidemiologic methods. Enrollment limited to 10.

**PHP 2220B. Nutritional Epidemiology.**
Although epidemiology is logically equipped to address the dietary causes of disease, the complex nature of diet has posed an unusually difficult challenge to this discipline. This course will focus on the methodological challenges that epidemiologists face in studying dietary factors as determinants of chronic diseases. Dietary assessment methods, biomarkers, and anthropometric measures will be reviewed. Substantive material and up-to-date issues will be used as examples. The course will consist of lectures and exercises to develop basic skills to allow students to have a strong grounding in this field. Open to graduate students only.

**PHP 2220C. Perinatal Epidemiology.**
Provides an overview of topics related to reproduction, maternal and fetal outcomes of pregnancy, and longer term consequences of adverse pregnancy outcomes. Methodological issues unique to reproductive and perinatal epidemiology are discussed, as well as general epidemiologic methods as applied to topics in reproductive and perinatal epidemiology. Students are expected to actively participate in class discussions, lead discussions related to selected topics by providing an overview of the biology, descriptive epidemiology, and known risk factors of the topic, along with a detailed critique of recently published articles on the topic. Open to graduate students only.

**PHP 2220E. Topics in Environmental and Occupational Epidemiology.**
This course introduces students to the epidemiologic study of historical and contemporary environmental/occupational agents, focusing on study design, biases, and methodological tools used to evaluate and extend the evidence linking exposures to human disease. The course will discuss applications, strengths, and limitations of different study designs and their use in studying specific environmental agents. Didactic lectures and student-led discussions will be used to provide students with a basic understanding of and the tools to apply/extend their knowledge of specific environmental agents (cell phones and endocrine disruptors) and special topics (children’s neurodevelopment and epigenetics). Prerequisite: PHP 2120 or equivalent.

**PHP 2220G. Methodological and Practical Issues in Global Health Research.**
This seminar-style course will develop critical thinking and writing about global health research among graduate students interested in population health. Reading and writing assignments are on key conceptual, methodological and practical issues. It is interdisciplinary in nature but will reflect public health and epidemiologic perspectives on measures of population health, health disparities, interactions of effects on health, and implementation research. It is suitable for graduate students in the public health sciences, social sciences, pathobiology and public policy. Prior training in epidemiologic methods and global health, or their equivalents, are expected. Recommended prerequisite: PHP 2120. Open to graduate and medical students only.

**PHP 2220H. Methodological Issues in the Epidemiology, Treatment and Prevention of HIV.**
The purpose of this graduate-level seminar is to use HIV as an example to introduce students to a variety of methodological issues in the epidemiologic study of infectious diseases. While we will study the treatment and prevention of HIV in great detail, emphasizing the current state of knowledge and critiquing the most recent literature, this course aims to use HIV as an example to better understand the variety and complexity of methodological issues in global and domestic infectious disease epidemiology today. Enrollment limited to 25 graduate students. Prerequisite: PHP 2120 or 2510; and PHP 2508 or 2511; or instructor permission.

**PHP 2222. Genetics, Human Population and Diseases.**
The purpose of this course is: 1) to introduce students to genetics, genomics and various designs of genetic studies of human diseases, and 2) to discuss selected topics in challenges and advances in human genetic studies. Some prior knowledge with genetics or epidemiology is preferred. This course may be most appropriate for second-year MPH, ScM, or PhD students, as well as first-year graduate students and advanced undergraduate students with previous exposure to introductory epidemiology and biostatistics. Prerequisite: introductory-level statistical analysis and epidemiology (such as PHP 2200 or PHP 2507), or PHP 2510 or knowledge of elementary epidemiologic methods. Enrollment limited to 10.

**PHP 2223. Epidemiology of Infectious Diseases.**
This course will introduce students to the field of infectious disease epidemiology. Topics will include a history of infectious diseases, epidemiology and control of infectious diseases, analytic methods, study design, outbreak investigations, and epidemic modeling. Prerequisite: PHP 2120 or PHP 2150 and PHP 2507 or 2510, or with permission of instructor. Enrollment limited to 25 students.

**PHP 2240. Methods of Environmental Epidemiology.**
In this course, students will understand, implement, and interpret the design and analysis tools commonly used in environmental epidemiology. Topics to be discussed include cohort, time-series, case-crossover, and panel study designs, modeling of flexible dose-effect relationships, consequences of measurement error and missing data, and analyses of effects of exposures with unknown latencies. Although these methods will be presented in the context of estimating the health effects of environmental exposures, many of these methods are readily applied to other fields. Prerequisite: PHP 2200 or instructor permission. Open to graduate students only.
PHP 2250. Advanced Quantitative Methods in Epidemiologic Research.
This course provides students with conceptual and quantitative tools based on counterfactual theory to make causal inference using data obtained from observational studies. Causal diagrams will be used to provide alternative definitions of and inform correcting for common biases. Non- , semi-, and fully parametric methods for addressing these biases will be discussed. These methods include standard regression, instrumental variables, propensity scores, inverse probability weighting, and marginal structural models. Settings when such methods may not be appropriate will be emphasized. Prerequisite: PHP 2200 and 2511; or PHP 2200 and 2508; or instructor permission. Enrollment limited to 25 graduate students.

This course provides students with fundamental principles of behavioral and social research methodology for understanding the determinants of public health problems, and for executing and testing public health interventions. We will focus on experimental methods, observational studies, and qualitative approaches. We will develop skills in understanding and interpreting data—both quantitative and qualitative. Throughout the course we will emphasize ethical, cultural, and professional issues for designing public health interventions. Prior coursework in research methodology and quantitative methods is recommended but not required. Open to graduate students and advanced undergraduates. Enrollment limited to 15.

This course examines physical activity and health with an emphasis on the development of behavioral interventions to increase physical activity. Students gain knowledge of the impact of physical activity on health outcomes as well as differences in physical activity among subpopulations. They are introduced to behavioral theories, intervention design approaches, measurement issues, and methods that are relevant to physical activity. Through seminar discussions, a group project, and presentations, students engage with the material and gain skills in the development and evaluation of behavioral interventions. Students with an interest in behavioral interventions and physical activity will benefit from taking the course. Recommended prerequisites: PHP 1740, 2320, or 2360. Enrollment limited to 20. Open to graduate students and seniors concentrating in Community Health.

This course examines environmental influences on the obesity epidemic with an emphasis on the impact of the built environment and policy on physical activity. Through seminar discussions, literature reviews, policy briefs, and presentations, students will engage with the material and gain skills in the development of policy and environmental change strategies to impact physical inactivity and poor diet. Students with an interest in environmental change and policy to prevent obesity and increase physical activity will benefit from taking this course. Enrollment limited to 25.

PHP 2325. Place Matters: Exploring Community-Level Contexts on Health Behaviors, Outcomes and Disparities.
There is growing recognition among researchers, public health practitioners and policymakers that place matters for health behaviors and health outcomes. But what is place, and why does it matter? As with many health-related outcomes, the prevalence of ill health is unequally distributed across populations with certain features playing significant roles on health. In this course, we will explore the features of community environments and the associations with health behaviors (e.g. physical activity, preventive care, alcohol, sexual behaviors) and health outcomes (e.g. obesity, cardiovascular disease and mental health). This course is specific to the US. Enrollment limited to 25.

PHP 2330. Behavioral and Social Approaches to HIV Prevention.
This course examines concepts, approaches, and empirical findings from behavioral and social research to prevent HIV transmission. Students will become familiar with behavioral theories, social epidemiological principles, intervention design, and debates within the field of HIV prevention. A particular focus of this course is on the linkages between science and HIV prevention practice/policy. Students will conduct weekly readings, engage actively in seminar discussions, and participate in small-group presentations and research activities. Prior coursework in public health research methodology is recommended. Prerequisites: Graduate student or senior public health concentrator. Enrollment limited to 25 graduate and medical students. DPLL

PHP 2340. Behavioral and Social Science Theory for Health Promotion.
This course will help students become familiar with behavioral and social science theories commonly used for planning disease prevention/health promotion interventions. In addition to review of specific theories, topics to be discussed include: how theories are developed and tested; challenges and potential pitfalls in using theory for intervention planning; and creation of causal diagrams based on concepts from theories. Undergraduates need permission of instructor; priority will be for Community Health concentrators. Enrollment limited to 25.

PHP 2350. Economics of Medical Therapies: Health Policy and Practice.
Introduces methods and applications of decision analysis, cost-effectiveness analysis, and benefit-cost analysis in public health policy and practice, including health care technology assessment, medical decision making, and health resource allocation. Examines technical features of these methods, problems associated with implementing them, and advantages and pitfalls in their application in setting public health policy. Open to juniors, seniors, and graduate students.

PHP 2360. Designing and Evaluating Public Health Interventions.
Aims to develop skills in designing and evaluating public health interventions. Levels of intervention include the individual; families or small groups; organizations such as schools, worksites, health care settings; communities; social marketing and health communications; policy and environmental changes. Will identify personal and environmental factors that affect public health and discuss needs assessment, formative research, cultural sensitivity, behavior change theories, intervention mapping, process and impact/outcome evaluation and dissemination. Students will critique intervention studies and gain experience in developing a hypothetical behavior change intervention. Graduate students and AB-MPH undergraduates only. DPLL

PHP 2370. Etiology of Substance Use Disorders.
This course will help students become familiar with behavioral, genetic, neurobiological, and cultural factors related to the onset and course of substance use disorders. In addition to review of specific theories, empirical evidence supporting models will be covered as will the integration of evidence across models. Priority will be given to postdoctoral fellows.

PHP 2371. Psychosocial and Pharmacologic Treatment of Substance Use Disorders.
Intended to provide an overview of the history of the treatment of substance use disorders; assessment methods designed to determine prescription in substance use treatment; and the current most common types of psychosocial and pharmacologic treatments for substance use. Enrollment limited to 20 graduate and medical students. Instructor permission required.

This class will explore Health Communication, with a focus on behavioral and social science interventions delivered through health communication programs. The course is structured so that basic building blocks (i.e., definitions of health communication, public health context for health communications interventions, theories of health communication and health behavior change) are presented sequentially early in the semester. Students will synthesize knowledge and demonstrate their understanding of the role of health communication through a final research project. Seniors with concentration in Community Health may enroll with instructor’s permission. Enrollment limited to 20 graduate and medical students. DPLL

PHP 2390. Quantitative Methods for Behavioral and Social Sciences Intervention Research.
This course provides broad coverage of the quantitative methods used in behavioral intervention research ranging from descriptive data analysis to longitudinal methods. Students will learn to conduct, interpret, and write up a range of statistical procedures including basic psychometrics, t-tests and ANOVAs, correlations, and multiple regression. Students also
Reviews the development of the health care delivery, financing and regulatory control systems in the U.S. and reviews the literature on the relationship between health system structure and the services used and health outcomes that populations experience. A case-study approach is used to understand the inter-relationship between financing, delivery and regulatory components of the health system and their implication for public health by drawing on epidemiological, economic, political and sociological principals. Prerequisites: Graduate standing or PHP 0310 or PHP 0070 (not available to first year students or sophomores). Instructor permission required.

PHP 2410E. Medicare: A Data Based Policy Examination.
This course will explore the role of Medicare as America’s health insurer for the elderly and disabled through the use of real Medicare insurance claims data, examining how Medicare policy changes in financing and regulation have affected the delivery and receipt of medical services. At the end of the course students will: 1) know the history of important Medicare policy changes; 2) be able to construct aggregated patient case mix acuity adjusted measures of provider quality using insurance claims data; 3) be able to conduct policy analyses using Medicare claims data that are sensitive to standardized coding schemes. Enrollment limited to 15 graduate students. Prerequisite: PHP 2120, 2508, or 2510. Instructor permission required.

PHP 2415. Introduction to Evidence-based Medicine.
Unbiased assessments of the scientific literature by means of research synthesis methods are critical for formulating public health policy, counseling patients or prioritizing future research. We focus on the methods and uses of systematic reviews and meta-analyses and their applications in medicine and health policy. After course completion, and with some direction, students will be able to undertake a basic systematic review or meta-analysis. Enrollment limited to 15. Prerequisites: PHP 2120, 2150, or 2460; and PHP 2507/08 or 2510/11 (2508 and 2511 may be taken concurrently); and clinical background or training in basic concepts in medicine (must discuss with instructor).

PHP 2430. Analysis of Population Based Datasets.
Epidemiologic, health services, and social research often conducts "secondary analysis" of existing population-based datasets. Benefits include their representative sampling frames allowing generalizability to larger populations, timeliness, and lower cost. In addition, computer technology makes it possible to link some databases providing richer sources of information. Therefore, there are several technical and methodological concerns when conducting "secondary analysis." Students will download, link, and analyze several data sets to understand the advantages of these data for health policy analysis as well as understand and apply different analytic methods. Familiarity with statistical analysis software is required. Prerequisites: PHP 2120, and either PHP 2508 (may be taken concurrently) or 2510. Open to graduate and medical students only.

PHP 2440. Introduction to Pharmacoepidemiology.
The course will focus on substantive topics in pharmacoepidemiology, including relevant principles of pharmacology, inference from spontaneous case reports, study design considerations, premarketing pharmacoepidemiology, common data sources for pharmacoepidemiologic studies, drug utilization review, adherence, and the development, implementation, and assessment of therapeutic risk management policies. The course will also focus on issues in pharmacovigilance, including the legal and historical basis of pharmacovigilance, evaluation of individual adverse drug events, signal detection, active safety surveillance, and medication errors. A clinical background is not required. Prerequisites are PHP2120 and PHP2510 (or PHP2507) or permission of the instructor.

PHP 2450. Measuring and Improving the Quality of Health Care.
The quality of health care in the United States is in urgent need of improvement. This course will focus on the science of measuring and improving the quality of health care. Topics will include quality assessment, patient safety, medical errors, public reporting, financial incentives, organizational change, and health care disparities. Students will engage in a team-based quality improvement project. Open to graduate and medical students only.

PHP 2451. Exchange Scholar Program.

PHP 2455. Seminar on modern methods for HSR and CER (I).
This graduate course will cover a number of methods topics in health services and comparative effectiveness research. This is the first semester of a 2-semester course, focusing on analysis of primary data. Prior exposure to theory is assumed; emphasis is on application. Example topics include predictive modeling, imputation for missing data, estimation of intervention effects (propensity scores; instrumental variables; difference in differences), pragmatic trials, competing risks analysis. For each methods topic the class will (1) briefly review theory; (2) critically appraise 1-5 applied papers; (3) conduct a practical exercise using a faculty-procured dataset.

PHP 2460. Research Methods in Clinical, Translational and Health Services Research.
This course will take an applied approach to understanding research methods used in health research. Students will explore concepts, gain knowledge and develop skills in the following areas: 1. Developing and refining research questions; 2. Designing research projects and appropriately implementing research methodologies; 3. Understanding the strengths and weaknesses of different study designs in addressing specific research questions, including an understanding of threats to validity; 4. Identifying Data Sources, including primary and secondary sources; 5. Understanding research ethics, including IRB processes and HIPAA regulations. Students must be accepted to the Clinical and Translational Research Summer Institute to enroll.

PHP 2470. Topics in Clinical, Translational and Health Services Research.
Through a combination of mini-courses and seminars, students will explore concepts, gain knowledge and develop skills in a variety of public health areas. To receive a half credit for this course, students will be required to successfully complete 70 units. Units must be pre-determined by the course instructor and the unit instructor. Units are generally based on the number of in-person contact hours and the number of outside of class/homework hours required for a mini-course or seminar. Students must receive special permission from the instructor or be accepted to the Clinical and Translational Research Summer Institute to enroll.

PHP 2480. Selected Topics in Global Health Economics.
This course will survey selected topics in global health economics. It is designed to introduce students to specific issues, theory and practice of health economics at the global level. The first part of the course will survey research papers on econometric methods in global health including: field experiments, instrumental variables, propensity score matching and regression discontinuity. The second part will discuss current topics such as: conditional economic incentives for providers and consumers, social health insurance, public goods, and externalities. Prerequisites: PHP 2511 and ECON 1110, or equivalent. Enrollment limited to 8 graduate students. Instructor permission required.

This course will cover applications of epidemiologic methods to the study of medical interventions (drugs, vaccines, devices, and procedures), focusing on advanced methods. We will use formal frameworks of causal inference. The course will focus on substantive topics in pharmacoepidemiology, including design and analytic strategies to overcome the limitations of common data sources. Other topics include the assessment of therapeutic risk management policies. Although a clinical background will be useful, it is not required. Prerequisites: PHP 2120, or PHP 2150 and 2200; and PHP 2507, 2510, or 2520; and PHP 2508 or 2511; or instructor permission. Enrollment limited to 20.
PHP 2500. Introduction to Biostatistics.
The first in a two-course series designed for students who seek to develop skills in biostatistical reasoning and data analysis. Offers an introduction to basic concepts and methods of statistics as applied to diverse problems in the health sciences. Methods for exploring and presenting data; direct and indirect standardization; probability; hypothesis testing; interval estimation; inference for means and proportions; simple linear regression, etc. Statistical computing is fully integrated into the course. Not open to freshmen or sophomores.

PHP 2501. Introduction to Multivariate Regression.
The first in a series of two-half semester courses on regression methods, designed for students who seek to develop biostatistical reasoning and data analysis skills. This course provides an introduction to multiple linear and logistic regression models as applied to diverse problems in the health sciences. PHP 2500 or equivalent is a prerequisite.

PHP 2502. Regression Analysis Discrete and Event Time Data.
The second course in the sequence on Introductory Biostatistics methods. This course will focus on regression methods (multiple linear regress, ANOVA, ANCOVA) and their natural extensions such as Logistic and Poisson regression in applications to diverse problems in the health sciences. Additionally, this course will cover regression methods for time to event data such as Cox regression for survival data. PHP 2500 or equivalent is a prerequisite.

PHP 2507. Biostatistics and Applied Data Analysis I.
The objective of the year long, two-course sequence is for students to develop the knowledge, skills and perspectives necessary to analyze data in order to answer a public health questions. The year long sequence will focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, data analysis, data interpretation and the presentation of results. Through lectures, labs and small group discussions, this fall semester course will focus on identifying public health data sets, refining research questions, univariate and bivariate analyses and presentation of initial results. Prerequisite: understanding of basic math concepts and terms; basic functional knowledge of stata. Enrollment limited to 50 MPH, CTR, and BSSI students. Instructor permission required.

PHP 2508. BioStatistics and Data Analysis II.
Biostatistics and Applied Data Analysis II is the second course in a year-long, two-course sequence designed to develop the skills and knowledge to use data to address public health questions. The courses are specifically for students in the Brown MPH program, and the training programs in Clinical and Translational Research. The sequence is completed in one academic year, not split across two years. The course will focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, analysis, interpretation and presentation of results. Prerequisite: PHP 2507. Enrollment limited to 48. Instructor permission required.

PHP 2510. Principles of Biostatistics and Data Analysis.
Intensive first course in biostatistical methodology, focusing on problems arising in public health, life sciences, and biomedical disciplines. Summarizing and representing data; basic probability; fundamentals of inference; hypothesis testing; likelihood methods. Inference for means and proportions; linear regression and analysis of variance; basics of experimental design; nonparametrics; logistic regression. Open to advanced undergraduates with permission from the instructor.

Applied multivariate statistics, presenting a unified treatment of modern regression models for discrete and continuous data. Topics include multiple linear and nonlinear regression for continuous response data, analysis of variance and covariance, logistic regression, Poisson regression, and Cox regression. Prerequisite: APMA 1650 or PHP 2510. Open to advanced undergraduates with permission from the instructor.

PHP 2520. Statistical Inference I.
First of two courses that provide a comprehensive introduction to the theory of modern statistical inference. PHP 2520 presents a survey of fundamental ideas and methods, including sufficiency, likelihood based inference, hypothesis testing, asymptotic theory, and Bayesian inference. Measure theory not required. Open to advanced undergraduates with permission from the instructor.

PHP 2530. Bayesian Statistical Methods.
Surveys the state of the art in Bayesian methods and their applications. Discussion of the fundamentals followed by more advanced topics including hierarchical models, Markov Chain Monte Carlo, and other methods for sampling from the posterior distribution, robustness, and sensitivity analysis, and approaches to model selection and diagnostics. Features nontrivial applications of Bayesian methods from diverse scientific fields, with emphasis on biomedical research. Prerequisites: APMA 1650, PHP 2510, PHP 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

PHP 2540. Advanced Methods for Multivariate Analysis.
Survey of modern statistical methods for analysis of multivariate and high-dimensional data. Topics include inference for multivariate normally distributed data, methods for data reduction, classification and clustering, multiple comparisons for high-dimensional data, analysis of multidimensional contingency tables, and functional data analysis. Applications to diverse areas of scientific research, such as genomics, biomarker evaluation, and neuroscience will be featured. Prerequisites: APMA 1650 and 1660; or PHP 2520. Open to advanced undergraduates with permission from the instructor.

PHP 2550. Practical Data Analysis.
Covers practical skills required for successful analysis of scientific data including statistical programming, data management, exploratory data analysis, model fitting and checking, simulation, missing data and proper interpretation and presentation of results. Tools will be developed through a series of case studies based on different types of data requiring a variety of statistical methods. The R programming environment will be emphasized, although students may use other packages. Upon completion of the course, students should be able to manipulate, program, analyze, display and present data and statistical models so that they are comprehensible for the non-statistical expert scientific collaborator. Students should have courses in probability and statistical inference at the level of Math 1810 and PHP 2510 as well as regression analysis at the level of PHP 2511. Some familiarity with the R programming language or some other statistical programming language or some other statistical programming language is advisable.

PHP 2580. Statistical Inference II.
This sequence of two courses provides a comprehensive introduction to the theory of modern inference. PHP 2580 covers such topics as non-parametric statistics, quasi-likelihood, resampling techniques, statistical learning, and methods for high-dimensional Bioinformatics data. Prerequisite: PHP 2520. Open to advanced undergraduates with permission from the instructor.

PHP 2601. Linear and Generalized Linear Models.
This course will focus on the theory and applications of linear models for continuous responses. Linear models deal with continuously distributed outcomes and assume that the outcomes are linear combinations of observed predictor variables and unknown parameters, to which independently distributed errors are added. Topics include matrix algebra, multivariate normal theory, estimation and inference for linear models, and model diagnostics. Prerequisites: APMA 1650 or 1660, or taking PHP 2520 concurrently.

Note: The course will cover fundamental and advanced topics in linear models, and concepts related to the generalized linear models will not be covered during the course.

PHP 2602. Analysis of Lifetime Data.
Comprehensive overview of methods for inference from censored event time data, with emphasis on nonparametric and semiparametric approaches. Topics include nonparametric hazard estimation, semiparametric proportional hazards models, frailty models, multiple event processes, with application to biomedical and public health data. Computational approaches using statistical software are emphasized. Prerequisites: PHP 2510 and 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.
PHP 2603. Analysis of Longitudinal Data.
Comprehensive coverage of methods for drawing inference from longitudinal observations. Theoretical and practical aspects of modeling, with emphasis on regression methods. Topics include: multilevel and marginal models; estimation methods; study design; handling dropout and nonresponse; methods for observational data (e.g. time-dependent confounding, endogeneity, selection bias). SAS and S-Plus software are used. Prerequisite: Statistical inference (APMA 1650-1660 at minimum), regression (PHP 2511), working knowledge of matrix algebra (e.g. MATH 0520). Open to advanced undergraduates with permission from the instructor.

PHP 2604. Statistical Methods for Spatial Data.
This course covers a variety of topics for spatial data, including data visualization, Bayesian hierarchical models, spatial models, as well as the computation techniques and statistical software to implement these models. Examples of applications will include, but are not limited to, spatial modeling of data from epidemiology, environmental studies and social sciences. Prerequisites: APMA 1650-1660 or PHP 2510-2511, and MATH 0520; some experience with scientific computing.

PHP 2610. Causal Inference and Missing Data.
Systematic overview of modern statistical methods for handling incomplete data and for drawing causal inferences from "broken experiments" and observational studies. Topics include modeling approaches, propensity score adjustment, instrumental variables, inverse weighting methods and sensitivity analysis. Case studies used throughout to illustrate ideas and concepts. Prerequisite: MATH 1610 or PHP 2511. Open to advanced undergraduates with permission from the instructor.

PHP 2620. Statistical Methods in Bioinformatics, I.
Introduction to statistical concepts and methods used in selected areas of bioinformatics. Organized in three modules, covering statistical methodology for: (a) analysis of microarray data, with emphasis on application in gene expression experiments, (b) proteomics studies, (c) analysis of biological sequences. Brief review and succinct discussion of biological subject matter will be provided for each area. Available software will be introduced. Intro level statistics (PHP 2507/2508 or PHP 2510/2511) recommended. Other students should contact instructor. Intro to software R and Bioconductor tools provided in lab. Open to advanced undergraduates with permission from the instructor.

This course is designed to cover essential elements of preparing for a career in research in biostatistics. The course will cover: methods of statistical research, with a focus on problem solving in real applications; key elements of communicating research, including writing for academic publication, writing and collaborating on grant proposals, and preparing and delivering oral presentations; and professional and research ethics, with emphasis on ethics of statistical practice in multidisciplinary collaborations. Enrollment limited to 15 graduate students in Biostatistics. Students must be in research phase of program of study.

PHP 2680. Advanced Topics in Biostatistics.
Introduction to applications of statistics and the way statisticians collaborate in interdisciplinary research. Guest lecturers from industry, government and academia will describe how statisticians fit into their environment. Techniques for effective collaboration and oral and written presentation of work including interviewing, writing proposals, giving talks, working with a team and consulting as an individual will be taught. Designed for graduate students (Masters or PhD) who would like to learn how to collaborate on projects with non-statisticians. Permission of the instructor is required to enroll for the course.

PHP 2690B. Introduction to Bayesian Inference: Hierarchical Models and Spatial Analysis.
Intended as a first introduction to Bayesian inference. Relevant theoretical background will be reviewed, and the Bayesian paradigm will be introduced, including choice of prior distributions and calculation of posterior distributions. Main emphasis will be on how to use Bayesian thinking to develop models for data with complex structure. Hierarchical models, meta-analysis, Bayesian design and shrinkage estimation will be covered. The benefits of hierarchical modeling will be applied to spatial data analysis as a special topic. Students will be introduced to Bayesian computing and WinBUGS, which is a necessary skill for many modern analyses. Prerequisites: PHP 2510 and 2511, or equivalent. Additional exposure to statistical inference, statistical computing, and a course in calculus would be useful. Open to graduate students only.

PHP 2950. Doctoral Seminar in Public Health.
The purpose of this seminar is to facilitate discussions of current scientific literature in epidemiology, biostatistics, health services, behavioral and health sciences, and public health in general. The main goal is to expose students to current methodological issues and controversies, in an effort to integrate knowledge across disciplines. This seminar is only open to doctoral students in Epidemiology, Behavioral and Social Health Sciences, Biostatistics and Health Services Research.

PHP 2980. Graduate Independent Study and Thesis Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

PHP 2985. MPH Independent Study for Thesis Preparation and Research.
This optional half credit course may be taken up to two times during preparation for the MPH degree. It provides MPH students with self-directed thesis research and preparation time under the guidance of a thesis advisor. Prior to taking this course the student and advisor must reach agreement as to what constitutes satisfactory completion of the course (e.g., completion of a satisfactory literature review, attainment of specific thesis benchmarks, or completion of the thesis). Please check Banner for the correct section number and CRN to use when registering for this course.

PHP 2990. Thesis Preparation.
No description available.

PHP XLIST. Courses of Interest to Concentrators in Community Health.
Professional Studies

The Brown University School of Professional Studies offers programs including:

- Executive and Professional
- IE Brown Executive MBA
- Executive Master of Healthcare Leadership
- The Choices Program
- Undergraduate Summer Session for academic credit
- Non-credit Pre-College programs

For further information visit: www.brown.edu/professional

Executive Masters Program

Executive Master of Healthcare Leadership

The Brown University Executive Master of Healthcare Leadership prepares visionary leaders to transform healthcare. This 16-month intensive degree program is designed for clinicians, executives, and senior administrators who have significant responsibility in the healthcare industry; including those from health care delivery, public health, drug and product manufacturing, health care consulting, health management systems, insurance, patient advocacy, and from legal, policy and regulatory settings. It is a blend of on-campus and online learning that allows participants to work full time while pursuing an advanced degree.

The faculty and participants in the program have a depth of experience in the healthcare industry and are fully engaged in addressing the gaps and constraints of the current system. The course of study is tailored to this industry and leadership development is purposefully considered in the healthcare context.

Course of Study

- Creating the Learning Healthcare Organization
- Data-Driven Decision Making: The structure, conduct, review, and evaluation of research
- Financial Decisions in the Changing Healthcare Landscape
- Healthcare Policy: Yesterday, today, and tomorrow
- Information-empowered Patient Care: Electronic health records, health information technology, and medical information systems
- Management and Marketing Skills for Transforming Healthcare
- Navigating the Regulatory Maze
- Strategic Planning and Value Creation in Integrated Healthcare
- The Critical Challenge

For further information including admission criteria and tuition and fees please visit: http://www.brown.edu/ce/executive/healthcare-leadership/

Courses

In this course, participants explore the meaning of value creation in healthcare organizations—how it relates to high performance, how it varies and is measured in different healthcare segments, and how it is embodied in the structure and performance of their own organizations. A holistic High Performance Model of enterprise value creation is presented, including strategic planning, process improvement, and resource and organizational alignment. The model is discussed from the perspectives of a variety of healthcare organizations—with the goal of applying the model to create value for the participants’ own organizations.

In this course, students appraise past and current political, legal, technological, and economic U.S. healthcare policy developments. Students critically examine the implementation of alternative methods of health services delivery and financing within multiple global healthcare systems. Participants question assumptions, think creatively, and consider integrated patient care solutions to prepare for change and new paradigms within the global healthcare sector.

In this course, students develop the management, marketing, and leadership skills needed to guide organizational change and refine their personal leadership style to lead in today’s rapidly-changing health care landscape. Particular focus is placed on negotiation, conflict management, collaboration, and team building skills. Participants create a robust plan for their continuous development as a leader. Students also learn how to harness the power of social media to develop their brand and their organization’s influence in the marketplace.

This course will provide an overview of the methods and applications of therapy economics, biostatistics and epidemiology in healthcare sector decision-making. Specific topics include: the application of therapy economics and economic evaluation to treatments, pharmacoeconomics and technology assessment; the assessment and interpretation of published epidemiological studies: institutional oversight of epidemiological research programs; the four key steps of statistical analysis (identification of scientific programs or problems of interest, collection of the required data, analysis and summary of data, and generation of a conclusion).

EMHL 2040. Navigating the Regulatory Maze.
This course explores the culture of decision making as well as the structure and role of key US and international regulatory bodies. Students explore how health care is regulated with an eye towards understanding how existing regulations improve quality, enhance access, and control cost. The topics of risk management, public health, and product/drug regulation are emphasized.

This course will provide an overview of the major aspects of information technology (IT) as they relate to both the causes of and the solutions to current problems in healthcare. Issues of standardization, integration, communication and patient engagement will be stressed, and the types of strategic planning for and governance of information systems will be explored. During the course students will be presented with real problems in the field of HIT and explore possible solutions.

In this course, students explore the quality improvement drivers, principles, systems, and tools that help create a healthcare learning organization. Students discover how quality improvement creates value, how to demonstrate the value of quality improvement to their colleagues, and how to ultimately develop a culture of learning within their organization. Students compare the learning needs of healthcare organizations to those in other industries. Students design and implement a quality improvement project within their own organization, and develop a "learning organization roadmap" for their organization.

This course focuses on the area of financial management as applied to international health organizations. The course emphasizes the application of principles and concepts of international health financial management to global health providers that represent innovative new structures and organizations, such as Accountable Care Organizations (ACOs) that offer integrated patient care. Students will gain competencies in the application of financial analysis tools and techniques internationally and in the interpretation of data for sound decision-making through case assignments and a class project to analyze the financial results of high performing healthcare organizations serving global markets.

EMHL 2080. The Critical Challenge: Capstone Project.
In this project, supervised by Executive Master of Healthcare Leadership (EMHL) faculty, students identify a critical challenge within healthcare and then work collaboratively to integrate knowledge from various perspectives and healthcare sectors and to apply relevant skills to develop possible solutions to their challenge. Students draw upon knowledge and skills from
coursework with particular emphasis on collaborating across healthcare sectors, considering ethical implications, communicating effectively and developing creative and viable solutions. Upon completion of this project, students will be able to successfully integrate knowledge of healthcare policy, strategic planning, regulation, management, marketing, healthcare research, quality improvement, finance and information technology to address a critical challenge within healthcare. Project outcomes should prove applicable to professional practice. This course spans two semesters.

IE Brown Executive MBA

Beginning in March 2015, The School of Professional Studies and the IE Business school in Madrid, Spain will offer a 15 month joint Executive MBA degree program to Senior managers, professionals, and entrepreneurs with significant work experience.

Combining IE’s strength in interdisciplinary management education and Brown’s excellence in the humanities, social, biological and physical sciences, the two schools have created the new IE Brown Executive MBA to develop informed, globally-minded, and innovative leaders.

The program provides senior managers with the opportunity to develop and broaden their management and leadership skills in an intensive, international environment. The program brings together faculty from the IE and Brown, integrating leading management thinking with wider perspectives from the humanities, social sciences, engineering, and life sciences.

For more information on the program and admissions process please visit http://brown.edu/professional/executive/iembros/index.php.
Africana Studies

The concentration in Africana Studies critically examines the artistic, historical, literary, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Central to the work of students and faculty in the concentration is the close collaboration of artists, scholars, and writers in examining relationships between academic and artistic knowledge about the world and human experience. Our commitment to rigorous scholarship and robust student and community development is grounded in a truly global understanding of the reach and implications of the Africana World.

For additional information, please visit the department’s website: http://brown.edu/Departments/Africana_Studies/

Africana Studies Concentration

Requirements

The concentration in Africana Studies critically examines the artistic, historical, literary, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Central to the work of students and faculty in the concentration is the close collaboration of artists, scholars, and writers in examining relationships between academic and artistic knowledge about the world and human experience. Concentrators work closely with faculty members in developing new knowledge about the world and human existence through the critical and comprehensive study of the peoples and cultures of Africa and the African Diaspora. Concentrators are encouraged to study abroad in Africa, the Caribbean, and/or Latin America and to acquire language competency in a language other than English spoken in Africa and the diaspora.

In order to develop requisite competency, Africana Studies concentrators must complete eight (8) semester-long courses offered by or cross-listed with the Department. Concentrators may also petition the Department to accept other appropriate courses.

Of these courses, the following two Africana Studies courses are required:

- AFRI 0090 An Introduction to Africana Studies (Fall ONLY)
- AFRI 1360 Africana Studies: Knowledge, Texts and Methodology—Senior Capstone Seminar (Spring ONLY)

The Department strongly encourages foreign study in Africa, the Caribbean, and Latin America, during the student’s junior year. While the department actively supports programs in South Africa, Tanzania, Ethiopia, Brazil, and the English-Speaking Caribbean, concentrators must complete at least six (6) courses in residence at Brown.

The department also encourages the acquisition of language competencies, in addition to English, which are spoken in Africa and the Diaspora. Since no continental African language is currently offered at Brown, concentrators who study abroad and acquire certified competency in any African language are welcome to petition the department for competency credit.

Honors

Africana Studies’ concentrators with outstanding records may be admitted to the department’s Honors Program. Prior to the end of the concentrator’s junior year and while working in consultation with a faculty advisor, the student must prepare a work plan. This plan, not to exceed three (3) typewritten pages, must be approved and signed by the faculty advisor who is to direct the Honor’s thesis. At the onset of the senior year, the Honor’s candidate is expected to have become familiar with the secondary works in the field. Secondary readings should be extensive and be incorporated into the work plan. The Honor’s candidate is also expected to complete a research paper of distinguished quality while enrolled in a 1000-level seminar. Participation in the Africana Studies senior-level capstone seminar AFRI 1360 is required.

For students completing graduation requirements by the end of Semester I (Fall), projects must be submitted by December 1st. For students completing graduation requirements by Semester II (Spring), the project should be submitted by April 20th. By the end of the fourth (4th) week of the concentrator’s seventh (7th) semester, a written proposal approved by the advisor and a secondary reader must be submitted to the concentration advisor. A progress report, prepared and signed by the student and countersigned by the faculty advisor must be presented to the concentration advisor.

Africana Studies Graduate Program

The department of Africana Studies offers a graduate program leading to the Ph.D. in Africana Studies.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/africana-studies-0

Courses

AFRI 0043. Music of Africa (MUSC 0043).
Interested students must register for MUSC 0043.

AFRI 0090. An Introduction to Africana Studies.
This course introduces students to the vibrant and contested field of Africana Studies by critically exploring and analyzing the links and disjunctures in the cultural, political, and intellectual practices and experiences of people of African descent throughout the African diaspora. Beginning with a critical overview of the history, theoretical orientations, and multiple methodological strategies of the discipline, the course is divided into three thematic units that examine intellectuals, politics, and movements; identity construction and formation; and literary, cultural, and aesthetic theories and practices in the African diaspora. DPLL LILE WRIT

AFRI 0100A. Playwriting I (TAPS 0100).
Interested students must register for TAPS 0100.

AFRI 0110B. The Last Professors.
Addresses the profound effects of contemporary economic, political, and social changes on the role and function of the university in the 21st century. A primary concern of the seminar is to critically analyze how and in what ways the transformations in the broader society challenge, constrain, and, at times, frustrate critical intellectual activity. The seminar will draw on a broad and diverse set of readings ranging from classic statements by Cardinal Newman and W.E.B. DuBois to contemporary critical analyses by Henry Giroux and Adolph Reed, Jr. Enrollment limited to 20 first year students. FYS

AFRI 0110C. Autobiography of the Civil Rights Movement.
Most of the rich written history of the civil rights movement originates from first-hand accounts documented in oral histories and autobiographies. This interdisciplinary course plots the milestones of the civil rights movement through the lens of several autobiographies. The aim is to critique autobiography as a historical document as well as use it to tell the stories of the civil rights movement. We will compare and contrast different texts, analyze content and map a history of the era. Students will work with a writing fellow to develop one critical paper and one autobiographical paper. Enrollment limited to 20 first year students. FYS WRIT

AFRI 0120. Philosophy of Race and Gender.
Prejudice of many kinds, such as racism and sexism is so embedded in our modern social institutions, and so traditional and pervasive that we often fail to notice it. Furthermore, race and gender have been used repeatedly to explain differences. This course is a rigorous examination of
the philosophical meanings of race and gender, from a variety of historical, anthropological and feminist perspectives.

AFRI 0155. People Without History: Archaeology of Atlantic Africa and the Diaspora (ARCH 0155).
Interested students must register for ARCH 0155.

AFRI 0160. Twentieth-Century Africa.
An introduction to recent African history, the course combines chronological and topical approaches. It is organized around the major epochs of colonialism, decolonization and post-colonial independence, but within those periods, we will concentrate on themes such as health, environment, development, the state and artistic expression. Readings draw heavily on primary sources. Three exams and two projects, including group work.

AFRI 0170. Afro-American History and Society Before 1800.
Focuses on the history of Africans and persons of African descent in the part of North America that now constitutes the U.S. Centers on the 18th century, but gives some attention to the 17th and 19th centuries as well. Most of the readings are devoted to the English colonies, but some concern themselves with Dutch, French, and Spanish settlements. DPLL

AFRI 0190. Caribbean History and Society Before 1800.
Examines some of the themes important in the multiracial societies of the Caribbean from the 17th through the early years of the 19th century. Explores Creole societies, plantation economies, ethnicity, maroon societies, class and racial divisions, acculturation, syncretic religions, and patterns of slave resistance. Danish, Dutch, English, French, and Spanish settlements are studied. DPLL

AFRI 0200. Modern Caribbean History and Society.
This course will critically examine five themes in modern Caribbean history and society: What is the Caribbean? Nationalism, religion, economic development, and popular culture. These themes will be discussed with reference to the different geographical, racial, cultural and political spaces, which comprise the Caribbean. DPLL

AFRI 0210. Afro Latin Americans and Blackness in the Americas.
This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present-day. Emphasis is on a multidisciplinary engagement with issues and the exposure of students to the critical discussion of national images and realities about blackness and Africa-descended institutions and practices. The role of racial issues in national and transnational encounters and the consequences of migration of people and ideas within the hemisphere are explored. DPLL

AFRI 0220. From Emancipation to Obama: Journeys in African American History.
This course explores African American History through the lens of black freedom struggles. The struggles take all forms, between black and white from local to national levels, within and between black communities, and between men and women. This course assumes some familiarity with basic U.S. History and will utilize a variety of primary sources from autobiographical material to visual art and music as well as the usual monographs and articles. Aside from reading, students will be required to work with a writing fellow on 2 papers. There are also 2 exams. DPLL LILE

AFRI 0280. Race, Slavery, Modernity and Knowledge.
This course will review some of the central texts that constitute the different meanings of modernity and discuss how these texts became part of our framework for thinking about modernity, the human self and its different representations. The course will also engage texts that make attempts to complicate the meanings of modernity through a set of engagements with the issues of slavery, colonialism and race. Some key words in the course are: modernity, knowledge production, double-consciousness, class and racial divisions, acculturation, syncretic religions, and race. DPLL

AFRI 0330. Mande Dance, Music and Culture (TAPS 0330).
Interested students must register for TAPS 0330.

AFRI 0510T. American History and the Literary Imagination (ENGL 0510T).
Interested students must register for ENGL 0510T.

AFRI 0560. Psychology of the Black Experience.
This course is designed to facilitate understanding of African American psychological experiences. We begin by critically reviewing historical approaches to the psychological study of Black people. We then shift to an examination of the themes, and research currently being generated by those involved in the quest for scholarly self-definition and for redefinition of the psychological fabric of the Black experience.

AFRI 0570. 20th Century Black Feminist Thought and Practice in the U.S.
This course will explore the ways that black women in the U.S. have experienced racial and gendered discrimination as well as what sorts of strategies (e.g., political, intellectual, narrative, and creative) black women have devised in response. We will be especially concerned with elements of African-American feminist thought and its articulation in writings, music, literature and practice/activism in the 20th century U.S. Enrollment limited to 80.

AFRI 0580. Black Theology.
"In this era of Black Power... theology cannot afford to be silent." This lecture course will plunge the depths of James H. Cone's statement by critically interrogating the cultural, political, and theoretical dimensions of the development and evolution of Black Theology. The course will consider the nature and task of theology with particular reference to its contested role in American public life, the complex relation between theology, race, and radical politics, and the connections and disjunctions between Black Theology and the fields of history, literature, and philosophy. DPLL LILE

AFRI 0600. Race, Gender, and Urban Politics.
This course will introduce students to the methods and practice of studying black urban life with a primary focus on US cities. We will critically examine the urban cultural studies debates concerned with race, gender, class and sexuality. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics include tourism, immigration, poverty, popular culture, gentrification, violence, and criminalization. WRIT

AFRI 0620. African-American Life in the City.
This course examines the social and cultural history of black urban communities by examining the foundation of black communities in Chicago, New York and Los Angeles. We will examine how migration and the intersections of race, class, culture and gender shape life in urban places, reveal the structural forces that define black urban communities, and explore urban American-African expressive forms. Enrollment limited to 45. WRIT

AFRI 0630. Drama and War in Africa: New Voices.
This course is an historical, political and topical examination of the subject of War on the African continent as seen through the lens of artistic response. Class discussions will be based on the different Stage, Screen and Radio Dramas that will serve as course materials. We will analyze reflections by African artists and scholars on the violent conflicts that have characterized the region's recent history, as well as closely related international perspectives, such as those evident in Hotel Rwanda and The Last King of Scotland. We will also explore how political actors have used performative techniques, and will specifically examine the ways that other members of society (especially women and children) deal with such crises. Canonical African dramatists like Fugard, Ngugi, Soyinka and Ousmane will be referred to, but emphasis will be laid upon the New Voices emerging from a range of African nations, including Rwanda, Uganda, Congo, Senegal, Sudan and South Africa, that have engaged with the subject of war.

Using an interdisciplinary methodology this course will examine three current issues in African societies: War, Violence and Sovereignty; the Politics of Gender in the African postcolony and the meanings of History, Trauma and Public Memory in some African societies. We will undertake this examination by "thinking about Africa differently," that is by thinking about these three issues outside of the dominant set of images, tropes and ideas that have conventionally constructed a particular version of Africa. DPLL LILE

AFRI 0650. Eighteenth-Century Art-Imagining the Global Eighteenth-Century (HIAA 0650).
Interested students must register for HIAA 0650.
AFRI 0700. Freedom Films.
"Freedom Films" is a First Year Seminar which will focus on historical documentary films related to the Southern Civil Rights Movement of the 1960s. We will analyze how these films reflect, change, and inform our views of the traditional Civil Rights Movement and how some offer contrasting narratives of that movement. We will also examine how and in what ways the films accurately and adequately reflect the historical realities of the Southern Civil Rights Movement based on readings and research. Enrollment limited to 20 first year students. DPLL FYS.

AFRI 0700E. Postcolonial Literature (ENGL 0700E).
Interested students must register for ENGL 0700E.

AFRI 0710A. Racial and Gender Politics in Contemporary Brazil.
Brazil is commonly understood as an example of a "racially democratic" nation, but as scholars have recently shown, racism permeates all aspects of Brazilian society. This course traces the development of the theorization of race, racial identity and race relations in contemporary Brazil. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics will include colonialism and enslavement, nationalism, social activism and popular culture. We will also consider how Brazilian social relations differ from or conform to other racialized patterns in other nation-states in the Americas. Particular attention will be placed on the interrelationship between race, gender, class, and nation. WRIT

AFRI 0710B. Ethics of Black Power.
In his now classic text Blood in My Eye, George Jackson writes “All revolution should be love inspired”. This course will plumb the depths of Jackson’s remark by critically interrogating the ethical dimensions of the Black Power concept and the cultural, ideological, and political interventions influenced by the conceptual revolution. We will assess the ethical parameters of the various ideological tendencies that influenced the conceptual formulation and political articulation of Black Power including Black Nationalism, Feminism, Liberalism, Marxism-Leninism-Maoism and Pan-Africanism.

AFRI 0710E. Postcolonial Tales of Transition (ENGL 0710E).
Interested students must register for ENGL 0710E.

AFRI 0760A. Rastafarianism.
This course explores the philosophy, history, politics, and theology of Rastafari, one of the Caribbean’s most influential and misunderstood liberation movements. DPLL

AFRI 0760B. Raggae, Rastafari and Revolution.
Bob Marley in the song Revolution declares, "Revolution Reveals." Beginning from this frame this course will examine the history of Rastafari since it was formed in the late 1930s as an Afro-Caribbean religious practice. It will examine how the emergence of reggae music in Jamaica in the late 1960s mixed and then became one central ingredient of what has been called "conscious music" in the period of the flowering of anti-colonial and black radicalism in the 20th century. The course will explore how reggae music became a form of subaltern language rereading questions of nation and history in the Caribbean and Africa.

AFRI 0800B. African American Literature and the Legacy of Slavery (ENGL 0810B).
Interested students must register for ENGL 0810B.

Interested students must register for RELS 0820.

AFRI 0850. The Politics of Gender in the Caribbean Novel.
This course will examine 20th Century Caribbean Literature as a genre, which poses challenges to colonialism and raises profound questions of sovereignty. It will examine how Contemporary Caribbean Literature contributes to the world of literature in general. DPLL LILE

AFRI 0880. Hip Hop Music and Cultures.
This course will explore both the history of the emergence of Hip Hop and the heated debates that surround it: aesthetics, censorship, sexism, violence, musical theft, originality, authenticity, the politics of cross-racial exchanges, urban black nihilism, and corporate influences on culture. These debates will be framed by our consideration of urban black life, African-American cultural formations, gender, representation, technology, commodification, pleasure and politics. Enrollment limited to 200. DPLL

AFRI 0890. Narratives of Power.
Close readings and critical examination of some of the most influential discussions of power in the past two centuries. Seeks to develop an appreciation of the complexity and elusiveness of discourses of power.

AFRI 0900L. African American Media Visibility: Image, Culture, Crisis (MCM 0901L).
Interested student must register for MCM 0901L.

AFRI 0901A. Unruled Crossings: Queerness, Race and Globalization (MCM 0901A).
Interested students must register for MCM 0901A.

This course examines the ways in which literature is influenced by major historical events with special reference to the literatures of the Caribbean. Students will undertake a critical examination of the fictional representation of Europe’s encounter with Africa and Asia in the Americas.

AFRI 0980. Feia Anukalpo Kuti and the Social, Cultural, Political, and Aesthetic Implications of AfroBeat.
Feia! The social, cultural, political and aesthetic implications of Afrobeat. This course will examine how all of the above converge in the development and evolution of Afrobeat, with a particular focus on the impact of "colonialism" on African society and culture. Interested students should have an interest in cross-cultural analysis, music appreciation, and the willingness to explore and investigate West African/Nigerian/Yoruba society and culture.

An interdisciplinary approach to the study of plays that address the identities and issues of black gay men and lesbians and offers various perspectives from within and without the black gay and lesbian artistic communities. Focuses on analysis of unpublished titles. Also includes published works by Baraka, Bullins, Corbitt, Gibson, Holmes, West, and Pomo Afro Hormos. Some evening screenings of videotapes. Enrollment limited to 40. WRIT DPLL

AFRI 1010C. Race, Gender, Ethics and Environmental Justice.
African Americans, Gender, Ethics and Environmental Justice examines the role of African Americans in the larger environmental history conversation. It utilizes a gendered lens to investigate how African American interpreted their natural surroundings and contributed to the development of 20th century American environmental consciousness. This course is reading and writing intensive. WRIT

AFRI 1020A. Black Cultural Studies.
No description available.

AFRI 1020B. Freedom in Africana Political Thought.
This course will be a comparative analysis of freedom as a central value in political thought. It will do this by comparing the knowledge and practices of freedom to slaves in the Haitian Revolution, the ideas of freedom in the Civil Rights Movement, and then finally, the conceptions of freedom in South Africa. Enrollment limited to 30. DPLL LILE

AFRI 1020C. The Afro-Luso-Brazilian Triangle.
Examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. Enrollment limited to 40. DPLL

AFRI 1020D. Race, Rights, Rebellion.
Provides an in-depth examination of different kinds of social movements. Emphasis will be placed on the theoretical and methodological distinctions among the various kinds of social protests and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, key concepts will include power, resistance, subaltern, hegemony, identity politics and consciousness.

AFRI 1020E. Race, Rights, Rebellion.
AFRI 1050A. Advanced RPM Playwriting. Third level of RPM Playwriting; for students that have successfully completed RPM Playwriting and Intermediate RPM Playwriting (workshop). Instructor permission.

AFRI 1050B. Africana Feminism. No description available.

AFRI 1050D. Intermediate RPM Playwriting. Second level of RPM Playwriting; for students that want to continue developing their RPM plays or want to begin a new project (workshop).

AFRI 1050E. RPM Playwriting. Research-to-Performance Method (RPM) Playwriting guides students through the process of developing new plays that are informed by scholarly research (workshop). DPLL

AFRI 1050G. Narrating the Radical Self. How black women in the United States and elsewhere have written about their lives in autobiographies will be the focus of this course. We will discuss black women’s use of autobiographical writing to document their own individual experiences in political movements as well as to provide key insights into how black people throughout the black diaspora have organized in recent history. Enrollment limited to 20.

AFRI 1050H. Introduction to Post-Colonial African and African Diasporic Theatre. This class will explore plays/theatrical works and ideologies of a selected group of playwrights from Africa, the Caribbean, and the United States. Exploring Culture, Creativity and Theatre practices, the course will focus on the ways in which these artists have syncretically responded to varied forms of colonization and creolization. This class will also pay attention to the Post Colonial Social and historical context that continues to impact and influence these modes of artistic production.

AFRI 1050K. Special Topics in RPM Playwriting: Playwriting Strategies From Contemporary Black Theatre. A study of Aristotle’s Poetics in relation to Dubois’ four principles of black theatre and Audre Lorde’s essay “The Master’s Tools.” What makes black theatre “black”? We will analyze plays from the 20th Century African-American canon as sites of aesthetic resistance to “normative” American Theatre; and write our own one-act plays based upon our discoveries. Prerequisite: Course is restricted to students who have taken any Africana Studies RPM Playwriting course, Theatre Arts Introduction to Playwriting, Literary Arts Intermediate or Advanced playwriting courses, or has playwriting experience. DPLL LILE

AFRI 1050L. RPM Playwriting: Advanced and Staging. AFRI 1050M. Roots of African American Fiction: Oral Narrative through Richard Wright. This course will employ a variety of narrative forms – oral folktaleis, WPA narratives, slave narratives, short stories by European and American writers – will also investigate the multiple traditions of African American fiction.

AFRI 1050P. Art and Civic Engagement: Creativity/Reality. The primary objective of this course is to learn about and reflect upon public art and communities. This course will use selected public art and artists’ ideologies as a framework for exploring culture, creativity, politics and practices and focus on the ways in which these public art works and artists’ responses to varied forms of internal and external operators and stimuli successfully and unsuccessfully give voice to aspects of the environment, history, culture, social justice, health, politics and the imagination. This course will also pay attention to arts organizations, government agencies, history, power relations, human resources as well as leadership and the political that continues to influence public modes of artistic production. DPLL LILE

AFRI 1050Q. New Narratives in African American History: The Art and Craft of Poetic and Creative Non-Fiction. This seminar examines various examples of creative and poetic non-fiction, pertaining to race and the African American experience. While touching upon historic examples and precedent, emphasis will be on contemporary works, including the genres of poetry, drama, the narrative, the memoir, the travelogue and the personal essay. The course will explore what these works offer to the knowledge, popularization and perception of black history and to the shaping of cultural dialogue on blackness and race. Enrollment limited to 25. DPLL WRIT

AFRI 1050R. The History of Afro Futurism and Black Science Fiction. Any class called The History Of Afro Futurism and Black Science Fiction automatically begs the question – “Well, what isn’t futuristic about being Black in America?” The entire history of Black America can be seen as a fundamentally futurological and science fictional enterprise – a perpetual biding on hope and struggling for change endeavor that frequently employs far flung visions of tomorrow and other more oblique speculative stratagems in pursuit of outcomes barely foreseeable in the near-present. Enrollment limited to 25.

AFRI 1060A. Africa Since 1950. This seminar offers a survey of post-colonial African history, while probing the challenges of writing post-colonial history. Readings and discussions will focus on histories that bridge the colonial and post-colonial periods. How robust are these periods? What can historians draw from post-colonial theory? How can historical narratives account for both the colonial legacy and post-colonial dynamism. Enrollment limited to 20; instructor permission required. Students with a background in African history or contemporary African social science will be given priority. Interested students should email the professor at Nancy_Jacobs@brown.edu. DPLL WRIT

AFRI 1060C. Contemporary African Philosophy. An examination of some of the most influential work on problems of identity and being, theology and theodicy, time and history, method and evaluation, race and racism, postcoloniality and liberation in contemporary African philosophy. Readings include the work of Anthony Appiah, Frantz Fanon, Kwame Gyekye, Pauline Hountondji, D. A. Masolo, John Mbiti, Kwame Nkrumah, Léopold Senghor, Tseng Seregeratheran, among others.

AFRI 1060D. Harlem Renaissance. Explores the literature, music, and art of the so-called Harlem Renaissance, within the context of broader transformations in African American and African culture and politics in the decade of the 1920s. Readings include books by Langston Hughes, Zora Neale Hurston, Nella Larsen, Alain Locke, Wallace Thurman, and Claude McKay; contemporary essays, reviews and manifestoes; and recent critical studies. DPLL

AFRI 1060E. West African Writers and Political Kingdom. Do West African writers have a role to play in the changing political landscape of their countries? An examination of the ways and means through which a select group of West African writers have dealt with issues that relate to the role of the state in the management of individual and group relations, the politics of gender, civil and military relations, and the construction of new forms of civil society. Enrollment limited to 20. DPLL

AFRI 1060F. Philosophy and Race. This advanced seminar in Africana philosophy will examine critical texts and thinkers that articulate the problems, methods, and techniques for interrogating the interrelationships between the discourses of philosophy and modern conceptions of race. The seminar will move to consider contemporary engagements in this area by drawing on readings and thinkers from analytical, continental, feminist, marxist, and pragmatist philosophical traditions.

AFRI 1060G. Black Radical Tradition. This advanced seminar in Africana philosophy will explore the contours of insurgent forms of Africana social and political philosophy. With a temporal focus on the twentieth century, we will concern ourselves with explicating the dominant themes, theoretical orientations, and methodological understandings that in/form constructions and articulations of the varieties of Africana feminism/womanism, black nationalism, Marxism-Leninism-Maoism, Pan-Africanism, and radical democracy. Enrollment limited to 20.

AFRI 1060H. Racial Frontier in South African History. This seminar will focus on racial categories in South Africa. We will explore dynamic categories of race from the 17th through 20th centuries. Topics include the relationship of race and class; racial violence; the transmission of culture and knowledge across racial boundaries; intimate relations over racial boundaries; segregation; and race and nation. We will give attention to critiquing the ways that historians have represented race and the ways
that conceptions of the category have evolved within the discipline, but
the emphasis will be on recent scholarship. Students will be expected
to participate actively in the seminar, to write one book review, and one
research paper. Enrollment limited to 20.

AFRI 1060L. Africana Philosophy of Religion.
Who, or rather, what is God to the oppressed? This advanced seminar
in Africana philosophy will examine the various theories, methods, and
arguments that engage perennial questions that arise when contemplating
God. The seminar will focus on questions of philosophical method and
theological exposition while also being critically attuned to modes of social
and cultural analysis and critique, particularly those perspectives inspired
by forms of critical theory, feminist theory, and Marxist theory. Limited
enrollment.

AFRI 1060K. African Literature After Achebe: Emerging African
Writers.
In this course we will analyze how contemporary, emerging and
marginally-read African writers contest the traditional and widely-held
interpretations, understanding and assumptions of African literature.
We will read and think about African literature in the contemporary post-
colonial and post apartheid moment in Africa. Authors discussed include
Dambudzo Marechera, Zoe Wicomb and Binyavanga Wainaina, among
others. DPLL LILE

AFRI 1060L. Varieties of American Philosophical Experience.
In contrast to Pragmatist and European-oriented views of American
philosophy, this course will emphasize the colonial dimensions and
features of American philosophy that emerged out of the colonial soil of
early America. Out of this soil sprang extended debates between Native
Americans, Euro-Americans and African Americans over the legitimacy
of the hegemony that Euro-Americans were establishing over increasing
portions of North America. This course views American philosophy as
having within it two opposing traditions that have been engaged in ongoing
angry dialogues: the dominant or Prosperean tradition of Euro-Americans
and the subjugated or Caliban tradition of Native Americans and African
Americans.

AFRI 1060M. African Environmental History.
This seminar will be devoted to the study of the environment and power
in the history of sub-Saharan Africa. The goals for this class are that you
learn more about the history of Africa, about the ways that relations
with the environment shaped its human history, about the construction
of environmental knowledge and its repercussions, and about historical
research.

This course also has an applied dimension. Eight African environmental
professionals visiting Brown through the Watson Scholars of the
Environment (WISE) program will also participate in the class. In their
final course project, students will conduct research of use to the WISE fellows
on historical cases related to their training at Brown. (For more information
see http://www.watsoninstitute.org/ge/watson_scholars/).

This course qualifies as a capstone seminar in the history
department. Enrollment limited to 20 students. Instructors permission
required. Interested students should email the instructor at
Nancy_jacobs@brown.edu with a description of their interests and
background.

AFRI 1060Q. The New Science of Race: Racial Biomedicine in the
21st Century.
This course draws on film, news media, scientific discourse, and social
theory to engage biomedicine’s most controversial investigations of race
and the social scientific questions they have provoked. The course asks:
How is contemporary science imagining, constructing, and producing
knowledge about race? What are the social, political, and cultural
implications of this knowledge? Students will be introduced to important
science studies methods that we will apply to historical and contemporary
research agendas. No prior knowledge of science or racial theory is
required. Enrollment preference will be given to juniors and seniors.
Limited to 20. DPLL

AFRI 1060R. Comparative Africana Literatures and Criticism.
Caribbean, African American and African literature has been called
engaged literature with explicit commitments to memory, history and ways
to think about the political. This course will explore a set of writers, their
novels, critical essays and their practices of criticism. It will examine anti-
colonial, post-colonial writers as well as African American writers who in
the words of Toni Morrison, “rip that veil drawn over proceedings to terrible
to relate.” We will in this course read the works of George Lamming,
Patrick Chamoiseau, Toni Morrison, Richard Wright, Edwidge Danticat,
Yvonne Vera, Zoe Wicomb and Njabulo Ndebele.

AFRI 1060S. Race, Science, and Society: Genomics and Beyond
(SCSO 1200).
Interested students must register for SCSO 1200.

AFRI 1060T. South Africa since 1990.
South Africa transformed after 1990, but the past remains powerful. This
seminar explores the endurance and erosion of the apartheid legacy, as
expressed in historical and fictional narratives. We begin with transition
to majority rule and continue with the administrations of Mandela, Mbeki,
and Zuma, connecting the formative histories of these leaders with the
changing dynamic of politics. We end with narratives about the ways that
ordinary people experienced new times. The syllabus includes scholarly
works in history and politics, biography, fiction and film. Two short writing
assignments and a major research paper. Enrollment limited to 20 juniors
and seniors. DPLL WRIT

AFRI 1060V. Black Transnationalism.
This seminar will explore the complex dynamics of black transnationalism
during the long 20th century, focusing on the circulation of ideas and
practices by Africans and African-descended communities and how they
were contested and reconfigured as they flowed back and forth. Particular
attention will be paid to some less-examined archives, interpretations and
perspectives; ideas of black women activist-scholars; aesthetic practices,
sonic regimes and religion; insights and experiences of those who lived
diaspora. Seminar readings and discussions will introduce and "trouble"
some key theoretical issues in the notion of black transnationalism, e.g.
diaspora, Pan-Africanism, globality, translocalism, identity, articulation, and
solidarity. Enrollment limited to 20.

AFRI 1070. RPM: Traditional and Contemporary Elements of
Intertribal Indigenous Theater in America.
Utilizes Rites and Reason Theater’s research-to- performance method of
developing new play scripts to examine the development and relationship
of the colonial Euro-American art form, theatre, to its existence within the
Indigenous intertribal (Native American Indian) communities in America.
DPLL

From the publication of The Souls of Black Folk in 1903 until his death
in Ghana sixty years later, W. E. B. Du Bois remained one of America’s
most penetrating analysts of what he called "the color line." Students read
and discuss a selection of Du Bois’s writings from his career as journalist,
essayist, sociologist, historian, poet, political leader, and pioneering Pan-
Africanist. Prerequisite: one course in AC, AF or US History. DPLL

Lecture course that examines the extended history of the mass civil
rights movement in the U.S. Starting at World War II, we consider the
roles of the courts, the federal and state governments, organizations,
local communities, individuals and various activist strategies in the
ongoing struggle for African American equality, focusing on African
American agency, particularly in the South, but also in Boston, Mass.
Sources include photographs, documentaries, movies, letters, speeches,
autobiographies, and secondary readings. Requirements: Weekly
readings, documentary viewings, 4 short papers, 2 exams. DPLL

AFRI 1110. Voices Beneath the Veil.
Thirty plays, written by Afro-American playwrights and presented on the
American stage between 1858 and the 1990s, are examined as cultural
and historical documents of Afro-American realities. Supplementary
readings from the humanities and social sciences provide critical
framework for in-class discussions and student papers. Instructor
permission required. WRIT DPLL

AFRI 1110L. Aspects of Contemporary Prose Practice (LITR 1110L).
Interested students must register for LITR 1110L.
**AFRI 1111. African Issues in Anthropological Perspective (ANTH 1110).** Interested students must register for ANTH 1110.

**AFRI 1120. African American Folk Traditions and Cultural Expression.** A research, development, and performance workshop designed to explore, examine, and articulate various folk traditions and cultural expressions of African Americans. Readings include slave narratives, folktales, and the works of Hughes, Hurston, Bass, and Baraka. Topics covered are music as the African American language of choice; Africanisms in Afro-American culture; and race, color, class, and culture. Instructor permission required.

**AFRI 1140. Women, the State and Violence.** Examines the role of black women in 20th-century political movements, including with the turn-of-the-century antilynching campaigns, the southern civil rights movement, the black liberation movement, and contemporary educational activism for human rights. Central concerns include history of American radicalism and analyses of antiracist experiences, and the politics stemming from African American women's leadership. Prerequisites: AF 150 and/or AF 125. DPLL

**AFRI 1150. Afro-Caribbean Philosophy.** An introduction to the field of Afro-Caribbean philosophy. The first half focuses on the history of the field, identifying its African background and surveying some of its major schools, such as the Afro-Christians, the poeticians, the historicists, and existentialists. The second half consists of a more intensive comparative focus on the ontologies and epistemologies of two of these schools. DPLL LILE

**AFRI 1150F. Home and Abroad (LITR 1150F).** Interested students must register for LITR 1150F.

**AFRI 1160. Public Health in Africa: History, Politics, and Practice.** Examines the ways in which medical knowledge has been produced in sub-Saharan Africa. Treats all medical discourses and practices—including biomedicine and "indigenous" and pluralist medicines-as culturally-based systems of knowledge production. Explores the political economy of health and disease and the role of medicine and medical practices (hygiene, epidemiology, demography) in producing and maintaining power in both the colonial and postcolonial periods.

**AFRI 1170. African American Women’s History.** Recovers black women’s history and renegotiates American history. Throughout the seminar, discussions will analyze the various tensions that complicate black women’s lives, from accommodation to resistance, or gender issues versus racial issues, or the class tensions that pervade the African American community. Through the series of readings loosely hinged around themes and concepts, students will gain knowledge and understanding of the rich social, intellectual, political and economic networks and activities that African American women undertook on a daily basis in order to survive, progress and uplift. The course encourages the development of a broader and more comprehensive grasp of the complexities American, racial and gender histories. Must have taken at least one Women's History course and one U.S. history course. Enrollment limited to 20. DPLL LILE WRIT

**AFRI 1180. Visual Cultures of the Afro-Americas.** This course will examine how the visual modalities of power operate to ascribe, authenticate, and contest meaning within the Afro-Americas, understood here to include Afro-Caribbean, Afro-Latin American and African-American cultures. We will query the complex histories and technologies that constitute the social life of vision in the Afro-Americas, while cognizant of the fact that the field of visuality cannot be understood from single point of view. We will consider images made of and images made by peoples of African descent throughout the Americas as we attend to the reception, interpretation and reproduction of images, as well fields of invisibility. Enrollment limited to 20 juniors and seniors.

**AFRI 1190. Haiti, “A New World, A Free World”: History, Art, Politics and Revolution.** This course will examine the dual Haitian Revolution as a pivotal moment in the making of the modern world. It will review the various historical interpretations of the Haitian events, examine how these events contribute to or trouble our ideas about modern politics and notions of freedom as well as our conceptions of revolution. The course will engage in these issues by working through three archives: Vodou Religion; The Art of the Revolution and the conventional historiography about the revolution, and will be tied to the hosting of a joint Brown/RISD exhibition on Haitian Art. Enrollment limited to 15 juniors and seniors concentrating in Africana Studies, Visual Art, or History; and 15 RISD students.

**AFRI 1200D. African Cinema (MCM 1200D).** Interested students must register for MCM 1200D.

**AFRI 1210. Afro-Brazilians and the Brazilian Polity.** Explores the history and present-day conditions of Afro-Brazilians, looking specifically at the uses of Africana in contemporary Brazil, political and cultural movements among Afro-Brazilians, domestic politics and its external dimensions, and Brazilian race relations within a global comparative framework. Texts from a variety of disciplines. A reading knowledge of Portuguese is not required but students so advantaged should inform the instructor. DPLL

**AFRI 1250. Women in the Civil Rights Movement.** This seminar focuses on women in the civil rights movements, spanning the years of 1955-1968. This course examines issues of gender, race, sexuality, social protest, nonviolent civil disobedience and self-defense during the height of activism against apartheid in the United States and for civil rights.

**AFRI 1260. The Organizing Tradition of the Southern Civil Rights Movement.** This seminar aims to fill in some of the gaps of the official canon by emphasizing that the modern (1954-1966) southern civil rights movement was not as it mainly portrayed, a movement of mass protest in public spaces led by charismatic leaders; but rather, a movement of grassroots community organizing - quiet day-to-day work. Enrollment limited to 40.

**AFRI 1280. Writing About Race in the Post Civil Rights Era.** This seminar is an explanation of the transformation of racial policies, relations and rhetorics since the end of the civil rights era in the United States. We will examine the complex ways race has remained central to US society and yet has dramatically shifted- examining terms such as: color-blind society, integration; political race, racialized (and gendered) community formation. Enrollment limited to 20. WRIT

**AFRI 1281. Africana Dance in the US (TAPS 1281U).** Interested students must register for TAPS 1281U.

**AFRI 1360. Africana Studies: Knowledge, Texts and Methodology.** This course will explore the issues of Africana Studies as a discipline by engaging in a series of critical readings of the central texts, which laid the protocols of the discipline. The course will also raise issues of knowledge production and methodologies. This course is a senior capstone seminar. Open to all senior Africana Studies concentrators; others by instructor permission only. Enrollment limited to 25. DPLL LILE

**AFRI 1400. The Black Experience and Russian Culture (RUSS 1400).** Interested students must register for RUSS 1400.

**AFRI 1410. Africans and the West: Studies in the History of Ideas.** This course will examine the political thought of a selection of African thinkers from the period of slavery to the 20th century. It will examine the political thought of thinkers like, Franz Fanon, Ida B. Wells, Cugoano, CLR James, W.E.B. DuBois and Rastafari. The course will be an exploration of black radical intellectual tradition and its different meanings. DPLL

**AFRI 1440. Theorizing the Black Diaspora.** This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community.

**AFRI 1470. Southern African History.** This course examines major themes of the history of southern Africa from the earliest times until 1994, with a heavy emphasis on historiographical debates. Our discussions of the South African past will always be informed by a consideration of the approach of the scholars who have interpreted and presented it as history. Our major questions concern the origins of historical change and the creation of racial groups. We will probe the significance of race in South African history but also the limitations of its
explanatory power. Readings are arranged at three levels. First, we will be reading primary sources, to gain experience in working with the evidence that informs historical work. Second, we will be working through a concise textbook that summarizes the major themes of South African history. Third, we will be reading specialized scholarly books and articles, chosen to illustrate recent discussions about the interpretation of South Africa’s past. The course will meet twice a week for lecture and discussion groups will meet once a week.

AFRI 1500. Incarceration, Education, and Political Literacy. This seminar (w/out audits) in politics and social justice is open to juniors/ seniors. Captivity has become a critical political-social phenomenon in U.S. democracy, given that the United States has over two million people in prison/jails/INS detention centers. This two-part, one-year long course examines and maps (using cyber technology) captivity and criminality in the United States, focusing on race, gender, politics and literacy. Students are strongly urged to take both semesters; the second semester course as practicum, with training in cyber-technology and community-based learning/literacy, is open only to those who complete the fall course (PI I) and the grade option for the second part of the course will be S/NC. Pre-Semester writing assignment required; see syllabus on WebCT for details.

AFRI 1540. Black Popular Cultures. This course is an historical and topical examination of the development of black popular cultures. We will explore the debates about popular culture and specifically examine the ways that race (as well as gender, sexuality and class) shape these debates. In addition we will explore specific black popular cultural practices (music, dance, film, radio, theater, etc.) as well as the larger contexts for their production and reception. Instructor permission required.

AFRI 1561R. Touring the Empire: Travel Literature and the Idea of America (ENGL 1561R). Interested students must register for ENGL 1561R.

AFRI 1580. Contemporary African Women’s Literature. The aim of the course is to introduce students to novels like Head’s A Question of Power, El Saadawi’s God Dies by the Nile, Aodochie’s Half of a Yellow Sun and other major prose works by contemporary African women writers. It will present the African woman as a writer, her environment and her commitments. The emphasis is on the writing of continental African women, but will include works of other women writers. For a brief but necessary historical background to the course, it will be introduced with selections from Margaret Busby’s Daughters of Africa. Enrollment limited to 25. DPLL LILE

AFRI 1600. History, Nation, Popular Culture and Caribbean Politics. Examines Jamaican popular music as an ideological site of resistance to Creole nationalist versions of Caribbean history and politics. It grapples with the meanings of race, history, and nation-state as contested notions in Jamaican/Caribbean society tracing an alternative genealogy of Caribbean history and politics. DPLL

AFRI 1620. Black New Orleans: A Research Seminar. Examines the development of a unique African American cultural and political identity in New Orleans. The seminar focuses on the development of the Faubourg Tremé, the oldest free black community in the United States, and covers the period from 1718 until 1899. Topics include: slavery and resistance; relations between enslaved and free blacks; social and political agitation; and the resulting early development of the nation’s Civil Rights movement and legislation. There is discussion also of the formation and continued tradition of artists’ and artisans’ guilds; Creole language (e.g., Creole slave songs, proverbs); NOLA relationship to the Caribbean and Latin America. Enrollment limited to 20. DPLL

AFRI 1630. Modernist Africana Poetry of the Americas. Focus on origins of Modernism among Africana authors of the Americas, with emphasis on the poetry, poetics and poetry movements of Brazil and Latin America, the Caribbean and US from 1888 through the first half of the 20th century. Begins with an overview of innovations wrought by Rubén Darío of Nicaragua, arguably the first modernist poet, and continues with the Harlem Renaissance of the 1910's and 20's; the Brazilian writers at the center of the Week of Modern Art of 1922; Caribbean writers of the Negrismo and Négritude movements; concludes with the work of such US and Anglophone Caribbean poets as Gwendolyn Brooks, Robert Hayden and Martin Carter. Enrollment limited to 20. DPLL

AFRI 1640. Development, Dependency, and Decline in Africa, 1950-2025. This course on the history of Africa begins as European empire unraveled after the Second World War and ends with a look toward the future. Development was high on the international and national agenda in the mid-twentieth century, but the most conspicuous outcome of the following decades was dependency and decline. Yet the story is more mixed than has been presented in American headlines; it was not one of pre-determined and constant failure. More than ever, at the beginning of this new millennium, conditions across the continent have diverged. What are current signs for future development or continuing crisis? WRIT

AFRI 1700C. Science and Technology Policy in the Global South (SCSO 1700C). Interested students must register for SCSO 1700C.

AFRI 1700Y. Cross-Knowledge: Contemporary Indigenous Knowledges and the Sciences (SCSO 1700Y). Interested students must register for SCSO 1700Y.

AFRI 1710A. Political Visions and Community Formations. This course aims to consider the depths of connection between forms of racialized, gender, class and sexual oppression via a vies the creation and maintenance of community and intimate social bonds among the oppressed. We will read sociologists, historians and others who have worked on this intersection and musicians and writers such as: Morrison, Bambara, Baldwin, Hill-Collins, Hansberry, soul and neosoul artists. Instructor permission required. Enrollment limited to 20.

AFRI 1710E. War Machines: Violence and Social Forms in West Africa (FREN 1710E). Interested students must register for FREN 1710E.

AFRI 1710H. Black Internationalism and African American Literature (ENGL 1710H). Interested students must register for ENGL 1710H.

AFRI 1710I. Harlem Renaissance: The Politics of Culture (ENGL 1710I). Interested students must register for ENGL 1710I.

AFRI 1710J. African Literature in Globalization Time (ENGL 1710J). Interested students must register for ENGL 1710J.

AFRI 1710P. The Literature and Culture of Black Power Reconsidered (ENGL 1710P). Interested students must register for ENGL 1710P.

AFRI 1750. Eastern African History. A lecture course examining the history of Eastern Africa from earliest times until 1963. The area includes the Great Lakes region, the Horn of Africa, Madagascar, and the East African Coast. The major topics are: precolonial interactions, the development of states and stateless societies, contact with other Indian Ocean people, the slave trade, colonial rule, and independence movements. DPLL

AFRI 1760B. Contemporary African American Literature and the End(s) of Identity (ENGL 1760B). Interested students must register for ENGL 1760B.

AFRI 1760T. The Texts of Africa (ENGL 1760T). Interested students must register for ENGL 1760T.

AFRI 1800. Race, Empire and Modernity. Taking Cicero’s notion of empire as “ways of life”, this course will survey the history of empires as forms of rule. It will explore how race has been deployed in the various types of empire. The course will pay particular attention to empires in modernity since 1492. The course will think about the various technologies of rule and their discourses of power. DPLL

AFRI 1820. Contemporary African Political Philosophy. This course examines some contemporary responses to the human condition in Africa. Topics will include Democracy, human rights, instability, social justice, identity, community and solidarity. These topics will be
approached through the works of Canonical figures such as Leopold Senghor, K. Nikrumah, Frantz Fanon, Steve Biko and the recent analytical (T. Kiros), Hermeneutical (T. Serequeberhan), Existential (L. Gordon) Historicism and poeticsim (P. Henry) and Postcolonial Misolocation (M. Diawara). DPLL LILE

AFRI 1850. The Civil Rights Movement: History and Legacy. Explores the origins, conduct and complex legacy of the Civil Rights Movement. Topics include: historical roots of the movement; the campaign against legal segregation; the birth of S.N.C.C.; Black Power; the impact of the Cold War, Vietnam and the coming of African independence; and the movement’s impact on other political struggles, including movements among women, Latinos, and Native Americans. DPLL LILE

AFRI 1890G. Contemporary Art of Africa and the Diaspora (AFRI 1890G). Interested students must register for HIAA 1890G.

AFRI 1900. Narratives of Slavery (AMST 1900C). Interested students must register for AMST 1900C.

AFRI 1900A. Senior Seminar in Science and Society (SCSO 1900). Interested students must register for SCSO 1900.

AFRI 1900T. The Postcolonial and the Postmodern (ENGL 1900T). Interested students must register for ENGL 1900T.

AFRI 1905D. African American Musical Theatre (MUSC 1905D). Interested students must register for MUSC 1905D.

AFRI 1920A. Imperialism and Public Health in Africa: Past and Present (BIOL 1920A). Interested students must register for BIOL 1920A.

AFRI 1920B. Health Inequality in Historical Perspective (BIOL 1920B). Interested students must register for BIOL 1920B.

AFRI 1920D. Race, Difference and Biomedical Research: Historical Considerations (BIOL 1920D). Interested students must register for BIOL 1920D.

AFRI 1950. Philosophy, Literature and the Caribbean Novel. This is a thematic course on the philosophical and literary themes which emerge from the Caribbean novel and writing in general. DPLL LILE

AFRI 1955. History and Memory in Africana Literature. Focusses on the close reading of nine works by writers of African descent - encompassing a variety of eras, forms and genres, stretching from the slave narrative to more contemporary settings. The thrust is to examine how each writer wrestles with issues of history and memory, with particular attention to the sometimes explicit, sometimes implicit interest in ideas and modes of expression that are rooted in African culture. Enrollment limited to 20 sophomores, juniors, and seniors; preference given to Africana Studies and English concentrators.

AFRI 1970. Independent Reading and Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

AFRI 1971J. From Emancipation To Obama (HIST 1971X). Interested students must register for HIST 1971X.

AFRI 1979D. African Slavery and Its Afterlife (HIST 1979D). Interested students must register for HIST 1979D.

AFRI 2001. Theories of Africana Thought: Intellectual History and Critical Theory. This course will be a close reading of the various ideas, theories and practices of the thinkers, writers, artists and activists whose work and practices have constituted an Africana intellectual tradition. In conducting this review we will examine questions around the formation and the history of thought and intellectual traditions in general. We will also think about the various fields of knowledge which have shaped Africana thought. The course therefore will spend some time working through the different meanings of intellectual work and critical thought and theory. Enrollment limited to 12 graduate students.

AFRI 2002. Theories of Africana Thought: Literary and Expressive Cultures. A preoccupation of Africana Studies involves the central yet highly contested role of the notion of what constitutes black culture in the modern world. To what degree can we claim aesthetic and other distinctions between black cultures in the Diaspora and other modern western cultural practices and expressive forms? What role did enslavement, forced migration and segregation play in shaping Africana culture in the modern west? These cultural debates which played a central role in literary, musical, philosophical, aesthetic, historical and sociological analyses of the culture of people of African descent frame this course. Enrollment limited to 12 graduate students.

AFRI 2100. Race and the Modern World. Race and the Modern World is a team taught interdisciplinary graduate seminar that critically examines the intersections of ideas, institutions, ideologies, and practices that have defined race and processes of racialization in the modern era. The seminar will closely examine the theoretical and methodological issues in the critical study of race; the politics and political theories of race; the imbrications of discourses of race, culture, and public life; the political economy of race; and the intellectual history of the discourse of race with an emphasis on the university as a key site in the production of racial knowledge. Enrollment limited to 20.

AFRI 2101. Africana Studies and Interdisciplinarity. This graduate seminar brings together various methodological and theoretical approaches to interpreting Africana life, culture, thought, and politics. Placing special emphasis on emergent scholarship that shapes and reshapes the discipline of Africana Studies, we examine a selection of humanistic and social scientific studies of various local, national, and international contexts. Texts demonstrate the ways in which innovative interdisciplinary methods are crucial for understanding the complexity of the Africana world. We will give attention to the strategies scholars utilize to formulate their research questions, design their methodologies, and create new ideas that contribute to the advancement of Africana Studies scholarship. Enrollment limited to 20.

AFRI 2102. Interdisciplinary Methods and Africana Studies. This graduate seminar focuses on interdisciplinary methodology and Africana Studies. The seminar explores how students and scholars in Africana Studies use interdisciplinary methods developed in the social sciences and the humanities in novel and innovative ways. Students will critically examine key methodological issues in Africana Studies and how and in what ways these issues are similar to and differ from such disciplines as economics, history, sociology, and literature. Prerequisite: a prior undergraduate or graduate level methods in Humanities or Social Sciences. Enrollment limited to 20.

AFRI 2104. Theorizing the Black Diaspora. This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community. Enrollment limited to 20.

AFRI 2110. Anthropological Theories in Africa (ANTH 2110). Interested students must register for ANTH 2110.

AFRI 2450. Exchange Scholar Program.

AFRI 2501. Race and Race Making in America, Part II. This is the second half of a graduate seminar-style class focused on the histories of race and race-making in the United States and, to a lesser extent, the Americas. The assigned readings are current, and cut across a wide range of methodologies and disciplines. The goal of the class – parts I and II – is to facilitate the completion of a well-written, publishable essay on a topic related to race and race-making.

AFRI 2600L. Seminar: Afro-Theism (RELS 2600L). Interested students must register for RELS 2600L.
AFRI 2630A. Theories of Decolonization (FREN 2630A). Interested students must register for FREN 2630A.

AFRI 2760U. Reading the Black Masses in Literature and Critical Practice (ENGL 2760U). Interested students must register for ENGL 2760U.

AFRI 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z). Interested students must register for ENGL 2760Z.

AFRI 2761C. Black Internationalism and Its Discontents (ENGL 2761C). Interested students must register for ENGL 2761C.

AFRI 2970. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

AFRI 2970C. Rethinking the Civil Rights Movement (HIST 2970C). Interested students must register for HIST 2970C.

AFRI 2980. Graduate Level Independent Reading and Research. A program of intensive reading and research. Section numbers may vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

AFRI 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis.

American Studies

Chair
Matthew Guterl

The Department of American Studies at Brown remains committed to the interdisciplinary study of the American experience, drawing on a range of methodologies and practices to understand American society and cultures. As one of the oldest departments of American Studies, Brown’s program has an almost seventy year history of activist teaching faculty fully engaged in research; prize-winning and productive graduate students who now teach their own students around the world; and curious and exciting undergraduates who use their educations in a wide range of fields from medicine to law; from social work to library science. In 2005, in collaboration with the Center for Public Humanities (http://www.brown.edu/academics/public-humanities), that administers the degree program, American Studies began an A.M. in Public Humanities, based on our revitalized undergraduate curriculum that fosters a publicly engaged scholarship and the John Nicholas Brown Center’s mission to support and strengthen the work of arts and cultural organizations that strive to preserve, interpret, and make the humanities, meaningful and accessible. Faculty and students have together pioneered new avenues in transnational research, exploring the role of the United States in the world and the importance of the world in the United States, and expanded our research and teaching into digital scholarship.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/AmCiv/

American Studies Concentration Requirements

The concentration in American Studies seeks to understand American society and cultures as emerging from historical and contemporary processes at work in local, national, and global contexts. Concentrators study four broad themes: social structure and the practices of identity, space and place, production and consumption of culture, and science, technology, and everyday life. The concentration is predicated on the ideal of scholarly engagement with the public, so students take junior seminars that engage some aspect of the public humanities such as public policy, memorialization, community studies or civic engagement. Study abroad is supported and encouraged.

A concentrator in American Studies will be able to:
- Analyze texts, contexts, and data from multiple disciplinary and historical perspectives
- Synthesize research as verbal, visual and/or digital presentations
- Explore the theory and/or practice of the engagement of scholarship with a broader public
- Understand how American society and cultures have been and are being shaped by global flows of people, goods and ideas
- Experiment with new media as critical tools for scholarship

Concentrators have gone on to a vast variety of careers, including law, public humanities, politics, public service, academics, business, creative arts, and medicine.

Each concentrator will take 10 courses including a Junior Seminar as one of four seminars. Courses are organized by the four themes and four approaches that define America Studies at Brown. Each concentrator will use this framework to create an individual focus in consultation with the Concentration Advisor. The focus is the flexible core of the concentration. Here each student builds a coherent and dynamic interdisciplinary structure of related courses that develops his or her compelling interest in some aspect of American experience. The four themes and four approaches provide the foundation on which each student builds a unique concentration in American Studies.

All seniors in the class of 2013 forward will be required to do a capstone electronic portfolio. Some concentrators may elect to do an Honors Thesis. Study abroad is supported and encouraged.

Four Themes and Four Approaches

American Studies at Brown is concerned with four broad themes:
- Social Structures and the Practices of Identity: How do communities and individuals come to define themselves, and how do others define them, in terms of, among other categories, nation, region, class, race, ethnicity, gender, sex, religion, age and sexuality? How do organizations and institutions function socially and culturally? What are the roles of social movements, economic structures, politics and government?
- Space and Place: How is space organized, and how do people make place? This includes the study of natural and built environments; local, regional, national and transnational communities; and international and inter-regional flows of people, goods, and ideas.
- Production and Consumption of Culture: How do people represent their experiences and ideas as culture? How is culture transmitted, appropriated and consumed? What is the role of artists and the expressive arts, including literature, visual arts and performance?
- Science, Technology, and Everyday Life: How does work and the deployment of science and technology shape American culture? How do everyday social practices of work, leisure and consumption provide agency for people?

How we study

American Studies at Brown emphasizes four intersecting approaches that are critical tools for understanding these themes:
- Cultural and Social Analysis: Reading and analyzing different kinds of texts, including literary, visual, aural, oral, material objects and landscapes. Examining ethnic and racial groups, institutions, organizations and social movements.
- Global/International Contextualization: Comprehending the United States as a society and culture that has been shaped by the historical and contemporary flows of people, goods and ideas from around the world and in turn, learning about the various ways in which America has shaped the world.
- New Media Understandings: Understanding the creation of new forms of discourse, new ways of knowing and new modes of social
organization made possible by succeeding media revolutions. Using new media as a critical tool for scholarship.

- Publicly Engaged Scholarship: Connecting the theory and the practice of publicly-engaged research, understanding and presentation, from community-based scholarship to ethnography, oral history, and museum exhibits. Civic engagement might include structured and reflective participation in a local community or communities or the application of general theoretical knowledge to understanding social issues.

American Studies Graduate Program

The Department of American Studies offers graduate programs leading to the Master of Arts (A.M.) in American Studies, and the Doctor of Philosophy (Ph.D.) in American Studies. For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/ammerican-studies

In collaboration with the JNBC, who administers the degree program, the department of American Studies also offers the Master of Arts (A.M.) in Public Humanities.

For more information regarding admission and Public Humanities program requirements please visit: http://www.brown.edu/academics/gradschool/programs/public-humanities

Courses

AMST 0150B. Boston: A City Through Time.
This interdisciplinary seminar for first year students will examine the City of Boston from its seventeenth-century origins to the present day. Among the topics covered will be architecture, city planning, physical expansion, political leadership, urban renewal, historical preservation, park development, racial and ethnic tensions, and suburban sprawl. Includes a Boston tour. Enrollment limited to 20 first year students. FYS

AMST 0150D. The West in the American Imagination.
No region has such a purchase on Americans' collective imagination as the West. No region is so drenched in misrepresentation and mythology. In this seminar, we will use fiction, film, and works of history to explore the American West as both historical reality and wellspring of collective myth. Enrollment limited to 20 first year students. FYS

AMST 0150F. What Does A Woman Want?.
This course is an introduction to psychoanalysis and its vexed and productive relationships to women and feminism. Freud asked his famous question: "What does a woman want?" after years of clinical practice and theoretical speculation. Woman's desire remained a mystery to him, but the attempt to solve it has given rise to a rethinking of human sexuality, of gender, of social structures, and of creativity. We will read foundational texts by Freud and by feminist disciples and critics of psychoanalytic theories. The literary texts will be read as critiques of theoretical positions, as well as examples of particular historical constructions of gender. The course is broadly interdisciplinary and explores the boundaries and intersections of different disciplinary practices and frameworks. Enrollment limited to 20 first year students. FYS

AMST 0150I. Race, Sex, and Biology: A Cultural History of Differences.
Are your race, gender, and sexual orientation biologically pre-determined? This course traces the history and cultural implications of theories of racial and sexual differences. We examine three "scientific" theories -- Darwinism, eugenics, and genetics -- in popular culture, public policies, and social movements, and consider how these social constructs both empowered and disempowered women, homosexuals, and racial minorities. Enrollment limited to 20 first year students. FYS WRIT

AMST 0150J. The Boy Problem.
Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation's ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 first year students. FYS

AMST 0150K. Culture, Communities, and Change.
Studying varied organizations such as museums, community arts groups, rock bands, and dance companies, this seminar works on three levels. Students consider the role of cultural production in local, national, and international economies and lives; think about methods for studying creative communities; and write the "biographies" of Providence cultural organizations. Issues of tourism, representation, hierarchy, urban space, and social change as well as questions about who puts culture to work and the role of cultural workers will be addressed. We will consider public humanities, engaged scholarship and community organizing as methods as we explore the Providence cultural scene. Enrollment limited to 17 first year students. FYS WRIT

AMST 0150L. Object Histories: The Material Culture of Early America (HIST 0970A).
Interested students must register for HIST 0970A.

AMST 0190A. Selling Love, Selling Sex: Romance in Popular Culture.
Where do our beliefs about love and romance come from? Is it true that "sex sells"? This course examines representations of love in advertising and popular culture from the 1920s, 1950s, 1980s and the present. We'll compare texts such as Ladie's Home Journal, I Love Lucy, and Dynasty to Maxine, Desperate Housewives, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190B. Histories of Memory/Memories of History.
This course examines the role of historical narratives in popular culture and politics, using memoir, films, newspapers, political cartoons, and scholarship to think about how such narratives build and break local, national, and transnational communities, serve and interrupt different kinds of political agendas, and reform the way we orient ourselves to the way we live and to those with whom we live. How is the past made? By whom? Topics will include the Holocaust, the Vietnam War, Columbus, memorials, and holidays. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190C. American (Mass)culinities: Sexuality, Race and Aesthetics.
This course explores masculinity in American popular cultures since 1945. Starting with theories of homosociality, racial and gender formation at the turn of the century, to modern and post-modern cultural productions that visualize or narrativize "masculinity" including novels, films, and video, Through frameworks of psychoanalytic theory, queer theory and critical race theory we think about masculinity as narrative, as a set of discourses, an epistemology, an aesthetic and privileged form of Americana. How do we understand the politics of race and sexuality through images of male bodies? What it means to decouple masculinity and men? What are the relationships between gender/genre? Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190D. Popular Music and the City.
This course will examine the relationship between popular music and its sociocultural context by concentrating on three urban music forms: blues, soul, and hip hop. Readings will focus on: (1) concepts such as audiences, the music industry, cultural infrastructure, and race; (2) processes such as urbanization, demographic change, and the politicization of popular music. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190E. It's the End of the World As We Know It: Zombie and Apocalypse Narratives in American Pop Culture.
Zombie narratives originated as part of racist colonial ideologies prevalent in Haiti and the Caribbean, and have since become a means of social and political critique. This course charts how the zombie has been re-appropriated and redeployed in American culture. Taking an interdisciplinary approach, we examine zombie and apocalypse narratives in film, literature, comics, and video games. Enrollment limited to 17 first year students and sophomores. WRIT

Beyond the lure of the "exotic" food, cultural festivals, and distinctive architecture of Chinatowns, Little Tokyos, Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are at once historical remnants of an exclusionary past and the current embodiment of the diversity of ethnic communities. This class seeks to understand such spaces by considering the people involved — those within and outside of the community — and the complex relationships among community groups. Texts will include histories, maps, works by urban planners, and a field trip to Boston's Chinatown. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States.

This course traces nativist anti-immigrant movements and violence in the United States. Starting in the colonial period and ending with contemporary issues, the course demonstrates how anti-immigrant movements occur across place and time and serve to police the boundaries of U.S. citizenship. The course relies on fiction, documentary films and other historical texts to highlight continuing violent conflicts. We focus on the use of "vigilante" violence and put contemporary discussions of immigration in a new frame. Enrollment limited to 17 first year students and sophomores. WRIT

From fembots to fightclubs, this course explores our obsession with revisions of the American Dream. We examine film and literary translations of three recycled stories—Rags-to-Riches, the Open Road, and Domestic Bliss—to better understand how we narrate the "American" experience and consider how these nationalizing narratives construct race, class, and gender. Films and texts include "Stepford Wives," "Easy Rider," and "Wall Street." Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190I. Re-Thinking Political Aesthetics: Beauty, Modernity, and Justice in the Americas.

The United States and the Americas have always been spaces of intertwined artistic, political, and religious expression. Yet, in the growing field of political aesthetics, works of European modernism are prized while examples from the Americas are rarely mentioned. This course examines the philosophical texts used to frame the field of political aesthetics, as well as food in the colonial diet of New Spain, painting during the Civil War, photography and the New Negro movement, jazz and the Beat generation, and other case studies of American expression that engage, complicate and re-construct the relationship between art and politics. WRIT

AMST 0190J. Four-Color Creatures: Race, Gender, and Monstrosity in American Comic Books and Popular Culture.

This course explores the relationship between race, gender, and monstrosity in American popular culture, particularly in comic books and graphic novels. Utilizing the concept of the monster as a metaphor, we examine the intersection of these discourses to interrogate how monstrosity informs our collective understanding of the other and affects the representation of race and gender in contemporary print ephemera and visual culture. To compliment our understanding of these materials, we engage with scholarship in the emerging fields of Monster Studies and Comic Studies to highlight the way that these artifacts embody larger trends within American society. WRIT

What Americans call the "Vietnam War," the Vietnamese remember as the "War of Resistance against the United States for National Salvation." This class seeks to explore multiple American and Vietnamese perspectives on a prolonged conflict that profoundly shaped the nations' political, social, and cultural landscapes. We focus on differences and similarities in Vietnamese and American interpretations of the origins, conduct and denouement of the war. We examine war memories through memoirs, monuments, movies, documentaries, magazines, and newspapers, as well as in foreign and domestic policies. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190S. Los Angeles Plays Itself: Culture and Critique in the City of Angels.

Explores the history of culture produced in and about Los Angeles during the last century, examining representations of the city in literature, film, television, music, and theory. Texts ranging from detective novels to teen dramas to hip-hop songs will reveal the ongoing conversations and conflicts among Los Angeles's diverse inhabitants that have shaped its physical, cultural, and social landscapes. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190T. Talking Social Reform: From Populism and Progressivism to Obama and McCain.

This course argues that two broad "languages" of social reform, coming out of the Populist and Progressive Movements of the late nineteenth century, have shaped the ways in which Americans understand politics. Students consider how the possibilities for contemporary reform and change have been informed by these languages. We will examine political texts discussing the New Deal, the eugenics movement, the Cold War, liberalism, and the New Left, among others. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190U. Sports Mediated: Athletics and the Production of Culture in 20th Century America.

When we watch sports, we’re watching more than a game. Newspapers, radio, television, and the internet produce athletic spectacles within certain cultural boundaries determined by profits, as well as by race, gender and class. The course questions how sports media played a generative role in late twentieth century American culture through three case studies: Michael Jordan’s rise to sports stardom; the emergence of skateboarding as an “alternative” sport; and controversies surrounding transgender and transsexual athletes. Non-sports fans are welcome and encouraged! Enrollment limited to 17 first year students and sophomores. Instructor permission required. WRIT

AMST 0190V. Reading the City: Literary Tourism in New York, Los Angeles, Santo Domingo and Manila.

What shapes our conception of a city we haven’t visited? Is it the novels we read or the films we watch? How do our ideas change when we tour or live there? This course investigates New York, Los Angeles, Santo Domingo, and Manila through the various social, political and sexual experiences portrayed in novels, creative nonfiction, poetry, and film. Mindful of our own role as reader-tourists, we will compare depictions of reading, visiting, touring, and living in cities especially with regards to issues of identity and its transformation. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190W. Displaying Activism Then and Now: Making an Exhibition for Social Justice.

We will investigate the possibilities for activism and social relevance through museum exhibitions. We will create an exhibition at the John Hay Library that displays historical and contemporary activism, based on student choices of possible movements including queer rights, animal rights, and environmental concerns. Students choose objects, write labels, and act as curators for the exhibit. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy.

Today’s women workers migrate at a historically unprecedented rate. This class looks at Third World women who migrate for work in global cities. We examine their experiences through the intersectional lens of gender, race, class, and nationality. We also question the social, political, and economic forces that drive migration and draw women workers to specific destinations. Finally, we will look at the multiple inequalities these workers confront and the ways in which they negotiate and challenge them. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190Y. Dead or Alive?: The American West in Popular Culture.

This course traces the imagined Western frontier as seen in television, film, photographs, museum exhibits, art, tourism, amusement parks, performance, video games, and science fiction. It explores these imagined spaces through the lenses of popular and visual culture, placing the West within the larger social, cultural, economic, and political histories of the US. Both real and imagined, these images defined and consolidated
the identities of Westerners and those who wanted to be Westerners. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191G. TV on History: Representations of the American Past on Commercial Television.
This course explores commercial television's influence on our understanding of the American past and the way that this sense of history, in turn, helps audiences to form cultural and political identities. We will discuss foundational methods for critical analysis of television as we use this inquiry to examine some of the guiding themes of American Studies. This class, which has a significant viewing component, traces the evolution of history-based programming in many genres and considers the message and impact of programs such as Ken Burns' Civil War, Roots, Colonial House, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

From waiting periods to mandatory ultrasounds, a record number of provisions aimed at restricting women's access to abortion were enacted in 24 U.S. states in 2011. Dubbed the "war on women" by numerous observers, these legislative battles evidence the difficulty in determining reproduction's "proper" place in governmental politics. But is there more to this battle than abortion? Beginning with Roe v. Wade, this course explores how welfare, labor, citizenship, the family, religion, and activism alter mainstream conceptions of reproductive politics. Using a variety of sources, including films and websites, we will consider what an expansive reproductive freedom might entail. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191I. Identities on the Move: South Asian Americans In Popular Culture.
Interdisciplinary course looks at the migration, representation and cultural productions of the South Asian diaspora in the United States. We'll examine how category of "South Asian" was created as well as the ramifications of such a label: what does it mean to be South Asian in the United States? Through the examination of academic texts, as well as literature, television and film, we'll explore how South Asian Americans navigate the United States while at the same time, maintaining (or, in some cases, disrupting) connections to countries in the South Asian subcontinent. Enrollment limited to 17. WRIT

In this course students will look critically at cabaret, documentary film, theatre, dance, popular music, and museum exhibitions, rethinking the ways that Black performances have been configured in debates about American identity in the 20th Century. Rather than try to understand Black performance, and performers, in reductive aesthetic and political frameworks, students will read and write about them as heterogeneous and complex. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191K. New Jack(ed) Cinema: Negotiating Race, Criminality, and Place in the Hollywood Film.
This interdisciplinary course engages critically with film to examine issues of race and criminality, and to better understand our collective, spatial, and personal identities. We study a sub-genre of films, from the 1990s, and investigate how these films interact and intersect with other cultural texts and narratives of race, criminality, sexuality, gender, and the American dream. Films studied include "Colors"; "New Jack City"; "Clockers"; "Boyz 'n the Hood"; and "Menace II Society"; while readings come from film studies, sociology, history, memoir, and policy studies. Enrollment limited to 17 first-year students and sophomores. WRIT

AMST 0191L. Are You Creative?: The Rise of a Modern Virtue.
Are you creative, or, even, a "creative"? Do you plan to be an entrepreneur, a writer, or an artist? Today, "creativity" is championed by education activists, fringe artists, and corporate CEOs alike. This course gives a critical perspective by tracing the biography of an idea through various fields. We will look everywhere for signs of creativity and focus on the relationship between creativity, work, and economic development, taking of Providence, RI, the "Creative Capital" as an example. We will talk to people involved in various aspects of the city's creative strategy to observe the effects of this powerful idea. Enrollment limited to 17 first year students and sophomores. WRIT

This course examines how our understanding of one of the most mediated armed conflicts of the twentieth century has changed. Why has "Vietnam" become a metaphor for imperial wars and how has it figured in cultural production within and beyond the United States? Considering photographs, films, and personal narratives beginning during the war and continuing into the present, we recognize the fictive and flexible nature of history and how even the worst experiences are made available for collective memory and mass consumption. The course works to decenter the United States and takes into account long-range ramifications and multiple voices. Enrollment limited to 17 first year students and sophomores. WRIT

What does it mean to be Korean American? This course explores the historical and contemporary experiences of people of Korean descent in the United States. In the broader context of U.S.-Korean relations and through the lenses of race, ethnicity, class, and gender, this course will examine the connections and differences in the lives of diverse Korean populations. The composition of these populations ranges from adoptees, military wives, and entrepreneurs to secondary migrants from Latin America. Throughout the semester, students will be familiarized with the central themes in immigration and ethnic studies such as diaspora, transnationalism, and community formation. Enrollment limited to 17 first years and sophomores.

AMST 0191O. Revolting Bodies: Aesthetics, Representation, and Popular Culture.
Our understanding of ourselves and others are formed by visual images and bodily feelings that are social in origin. They make us feel (un)comfortable, sublime, ridiculous, grotesque. In this course we will examine how the materiality of the body grounds our metaphors about identity and subject formation. This course moves between cultural studies, queer theory, disability studies, science fiction, drama and film asking how representations structure they way we "know" and "see" bodies. Ultimately we will explore how revolting bodies--bodies that disgust, repulse, signal their difference--can become bodies in revolt--bodies that resist and imagine new possibilities. WRIT

Beyond the "exotic" dishes, cultural festivals, and distinct architecture of Chinatowns, Little Tokyos, Little Manilas/Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are both historical remnants of racial oppression and the current home of diverse ethnic communities. Using field trips, films, first person accounts and scholarly explorations, this class examines such spaces by considering the people involved—tourists and residents—and how their complex relationship created urban and suburban ethnic spaces. Students will workshop and revise papers as well as gain a grounding in approaches to Asian American studies, urban studies, and to the study of public spaces. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191Q. Disbelieving the Evidence: Popular Opposition to 20th Century Public Health Initiatives.
Why do Americans reject programs that make them healthier? Many of the most effective public health initiatives in the 20th century encountered deep resistance. This course explores three initiatives (vaccination, fluoride, and black lung) that continue to generate skepticism or outright opposition. Students will practice several different styles of writing intended for different audiences, including an op-ed and a Wikipedia entry. This writing-designated course will appeal to students of public health, politics, and those interested in the social impact of medical research, as well as those wanting practice in science writing. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191R. Fat, Messy, and Late: Unregulated Bodies in American Capitalism.
This course examines disorganized bodies in 19th and 20th century US history and how slenderness, neatness, and timeliness became virtues. Through these lenses we study capitalism working upon individual bodies;
the way these "moral virtues" generate forms of self-regulation; and the way these forms of self-regulation perpetuate the status quo. We draw upon history, sociology, anthropology, and critical theory, starting each section in the 19th century and moving to the present. Using our personal experiences, we examine how belief systems become internalized. This interdisciplinary course welcomes community health and biology concentrators as well as humanities and social science concentrators. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191S. Visualizing the Middle East: From National Geographic to the Arab Spring.
American visual media remains flooded with images, inspiring and hopeful, or horrifying and terrifying, of the peoples and places of the Near East. By examining National Geographic photography, Hollywood cinema, televised news programs, and images and videos encountered online, we examine how visual culture has both reflected and actively helped shape the relationship between the U.S. and the Near East. Students will experiment with a diverse methods of visual analysis, work with a class Tumblr site, and write and revise a series of essays. Enrollment limited to 17 first year students and sophomores. WRIT

How do we think about our own place in history? This writing-intensive seminar examines how individual Americans have explored the relationship between their identity and historical events, and introduces the legitimacy of using individual experiences to understand history. Themes include the gendering of domestic and public space, the formation of identity within families, class alignments, societal expectations of gender/sexuality, how American exceptionalism manifests itself at the individual level, and narrative (un)reliability. Our discussions center on autobiographies, memoirs, and films from authors such as Audre Lorde, Harry Crews, Malcolm X, Alison Bechdel, Tobias Wolff, and Nick Flynn. WRIT

AMST 0191U. Imagining the American Mind.
How are theories about our minds and brains represented in American culture? This course uses literature and film, psychology, neuroscience, philosophy, history and sociology to investigate how we imagine our minds, and the consequences of those representations for our ideas about race and gender, for our social lives and responsibilities, for our means to communicate to one another and, even, to know ourselves. Writing in different formats, students bridge the gap between the humanities and the human sciences. Concentrators in biology and neuroscience consider the cultural history of their research while humanities/social science students explore how culture ties to science. WRIT

AMST 0191V. American Capitalism and Its Critics.
In the wake of the Great Recession, many Americans have become disenchanted with capitalism, wondering whether the market economy harms more than it helps. This course introduces students to writers, artists, and activists from the past who shared that feeling and in plays, essays, films, and photographs protested the rise of capitalism in the United States. We will explore issues of power, poverty, profit, and equality through in-class discussions and four writing assignments. Students interested in history, art, literature, and economics will learn more about class, capitalism, and the history of American politics. WRIT

AMST 1010. Introduction to American Studies: American Icons. Why do certain American photos, novels, and films become ‘iconic?’ What does the very word ‘icon’ mean? Studying a collection of American images, texts, places, and practices, this course investigates the key themes of American Studies. DPLL LILE

AMST 1250A. American Folk Art.
Examines material expressions of folk culture in America from the 18th century to the present. Focuses on the study of regionally idiosyncratic artifacts decorated beyond necessity and emphasizes the importance of the cultural context in which they were made and used. Visits to local burying grounds and museum collections during class and a Saturday field trip. Concludes with an original research project and final paper.

AMST 1250B. Gravestones and Burying Grounds.
Students examine gravestones and burying grounds as material evidence of American cultural history. Themes include the forms of written language and visual imagery in colonial New England, changing roles of women and minorities in society, historical craft practices, implications of stylistic change, attitudes towards death and bereavement, and the material evidence of discrete cultural traditions. Includes field trips.

AMST 1250E. The Neoclassical Ideal in America, 1775-1840.
This course examines the art, architecture, and domestic furnishing of America in the early national period. It focuses on visual culture as a reflection of the nation’s self image as a democratic and enlightened society. Includes class visits to local burying grounds and museum collections, and a Saturday Boston field trip.

AMST 1250F. Topics in Material Culture: Houses and Their Furnishings in Early America.
Old houses and the objects used to furnish them are interpreted as material evidence of domestic life in colonial and early national America. Through slide lectures and field trips, this class examines Providence’s historic buildings, museum collections, and public archives as primary documents in the study of cultural history. WRIT

AMST 1510. Museum Collecting and Collections.
This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits, and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments.

AMST 1520. Technology and Material Culture in America: The Urban Built Environment.
A slide-illustrated lecture course that examines the development of the urban landscape. Covers American building practices and the effects of human-made structures on our culture. Examines technological and behavioral aspects of architectural design and urban development. Topics include housing, factories, commercial buildings, city plans, transportation networks, water systems, bridges, parks, and waterfronts. A companion course to AMST 1530.

Examines the cultural significance of the automobile. Examines American building practices and the effects of human-made structures on our culture. Examines technological and behavioral aspects of architectural design and urban development. Topics include housing, factories, commercial buildings, city plans, transportation networks, water systems, bridges, parks, and waterfronts. A companion course to AMST 1530.

A survey of the skills required for public humanities work. Presentations from local and national practitioners in a diverse range of public humanities topics: historic preservation, oral history, exhibition development, archival and curatorial skills, radio and television documentaries, public art, local history, and more. Enrollment limited to 50.

This 8-week summer course begins with four weeks in Hong Kong, exploring the ways that private individuals, institutions, and government have preserved the city’s cultural heritage, examining the conflict and negotiation of economic and political interests in urban renewal and heritage conservation and preservation. The second four weeks are in Providence, where students will explore the history and present-day philosophy and politics of preserving sites and stories from Colonial times to the present, exploring historical archaeology, historic preservation, museum exhibition, and oral history. This is a double credit course. Enrollment limited to nine Brown students and nine from Hong Kong. S/NC

AMST 1570. Site- Specific Writing in Brown’s Historical Spaces.
Using on-site writing techniques, students will write, workshop, and direct research-based site-specific short plays to be performed by local actors in historic Providence mansions. Class discussion will explore the history (class includes a walking tour), performance texts, and types of site-specific work. Students will emerge having written and directed a
research-based work in a National Historical Landmark. Enrollment limited to 13. S/NC

AMST 1600A. Global Macho: Race, Gender, and Action Movies. Carefully sifting through an oft-overlooked but globally popular genre - the muscle-bound action - this class asks: what sort of work does an action movie do? What is the role of women in this genre? How should we scrutinize these supposedly empty trifles of the global popular? How should we think critically about movies that feature - often without apology - a deep, dangerous obsession with masculinity, patriarchy, war, and lawlessness, with violence outside of civil society. In short, from Hollywood to Hong Kong to Rio to Paris to Mexico City, what makes the action movie genre tick? DPLL, WRIT

AMST 1610A. American Advertising: History and Consequences. Traces the history of American advertising, particularly in the 20th century, to understand the role advertising plays in our culture. Topics include the rise of national advertising, the economics of the advertising industry, the relation of advertising to consumption, the depiction of advertising in fiction and film, and broadcast advertising. LILE

AMST 1610C. American Popular Culture. This interdisciplinary course examines the history of popular culture in the industrialized United States, drawing on methodologies from different fields, and using a variety of evidence, including minstrel song sheets, amusement parks, television, and romance novels. We look at the audience, the producers and the texts presented by American popular culture both domestically and internationally. LILE WRIT

AMST 1610F. Asian America Since 1945. Since the end of WWII the Asian American community has undergone radical transformations. This course will examine the shifting political and cultural status of Asians in America, the demographic revolution in Asian America ushered in with the Immigration Reform Act of 1964, Asian Americans and globalization of the US economy, and Asian Americans in contemporary US race relations. DPLL

AMST 1610G. Asian American History. This course focuses on Asian America as a historical subject and on Asian Americans as makers of their own histories. It is loosely chronological but principally organized around the emergence of an Asian American historical voice. Films, personal accounts, and historical analyses will be read. Many of the texts feature photographs, which we will engage primarily as historical documents. Examining the material realities they represent or suggest, we will also probe their political, economic and cultural dimensions. As weapon, commodity and heirloom, photography has been integral to shaping Asian Americans’ visibility and therefore their social position in the United States. DPLL

AMST 1610H. Asian Immigration to the Americas. Asian America is an extremely diverse community including fifth generation Californians and yesterday’s arrivals: Hmong from Laos, Indians from Guyana, Japanese from Brazil, native born Americans, immigrants, refugees, adoptees, doctors, garment workers, physicists, poets, and storekeepers. The patterns of migration and settlement from Asia to the Americas-U.S. and Canada, the Caribbean and Latin America-over the past two hundred years are examined.

AMST 1610I. Beyond Chinatown: Asian Communities in the United States. From Manila villages in 18th-century Louisiana, to Punjabi-Mexican families in early 20th-century California, to today’s “little Saigons” and Asianam cyberspace, Asian Americans have built a diverse array of communities in the U.S. The historical circumstances, social forces, and political movements that have shaped these communities are examined. Particular attention paid to the dynamics of race, ethnicity, class, gender, and sexuality in the development of these communities.

AMST 1610J. Body and Soul: Health and Sexuality, 1860-1920. Examines the history of women/gender in relation to discourses about sexuality (both physical and mental) in the era of the Civil War through the progressive era. It samples a variety of ideas and movements, including efforts to regulate sexuality and initiatives to advance women into the medical and "helping" professions. Specialization is given to issues of class, race and ethnicity. DPLL

AMST 1610L. Child Welfare in Twentieth-Century America. Examines the evolution of child welfare in the United States from its origins in the late 19th century through its purported crisis in the late 20th. Specifically, will trace the history of policies and programs aimed at providing support for dependent children, and at dealing with deviant or delinquent children. Emphasis will be on understanding the social, cultural, and political contexts in which child welfare was formed and transformed during this century. DPLL

AMST 1610M. Globalization of Children and Youth. Discusses how historical, social, economic, cultural, educational, and political contexts in which children and youth are raised engages issues of globalization, including immigration, adoption, and the parents' and children's interactions with global flows of money, goods, images, and ideas. LILE

AMST 1610N. Citizenship, Race, and National Belonging in the Americas. What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, this course compares the racial and social experience of the U.S. Latinos with that of the populations in various countries in the hemisphere. AMST 1610O. Citizenship: Race, Gender and National Belonging. In what ways do gender and class differences affect this relationship? Focusing on these questions, this course compares the racial and social experience of the U.S. Latinos with that of the populations in various countries in the hemisphere.

AMST 1610P. Class, Culture, and Politics. Surveys the working class and radical movements that have challenged the ruling economic, political, and cultural systems. Major topics include the railroad uprising of 1877, the Knights of Labor, sexual utopianism and spiritualism, black nationalism, the Socialist and Communist parties, women’s and gay liberation, and the modern ecology movement. Emphasizes cultures. Prerequisite: At least one semester of a college-level course in U.S. history or literature. LILE

AMST 1610Q. History of Sexuality in the United States. This course introduces students to the history of sexuality in America from the colonial era to the present. This is not only a history of gay and lesbian communities. Rather it builds on those histories to create a portrait of how Americans, gay and straight, lived sexual lives in relationship to disciplines of knowledge, cultural and political institutions, and popular culture. AMST 1610S. Immigration to the United States from the Sixteenth Century to the Present. Explores 500 years of immigration to what is now the U.S. Organization is both chronological and topical. We will reconstruct and compare the major waves of immigration, consider causal theories of migration, examine U.S. immigration policy over time, debate the economic impact of immigration, and discuss the institutions and strategies that immigrants have designed to facilitate adaptation.

AMST 1610U. Introduction to Latino Studies. A survey of the ways that aspects of the histories and cultures of the U.S. and Latin America have contributed to shape public policy issues and to differentiate the experiences of U.S. Latinos. Among the questions guiding class discussions: What are the implications of grouping nationally, racially, and socially heterogeneous populations under one term, such as Hispanic or Latino? To what extent do “ethnic labels” foster alliances among different ethnic or racial groups? DPLL LILE

AMST 1610V. Introduction to Latino Studies II: Culture and Identity. Explores the ways in which gender roles and intergenerational expectations-diversified by race, class, national identity, and citizenship status-shape the varied identities and cultural experiences of Latinos and Latinas in different decades of the post-World War II period in the U.S.
AMST 1610W. Latino Immigration in the 20th Century.
The purpose of this course is to examine the political, economic, cultural and social impact of Latina/o immigration in the 20th Century and on Latina/o identity formation. We examine the intimate and personal history of the United States in relation to Latin America, Central America, the Caribbean, and Mexico that established interdependent relationships between nations and its people.

AMST 1610X. Latino Popular Music and Culture.
This course explores the various forms of popular culture associated with U.S. Latino communities. It focuses on the production, dissemination, and consumption of mass mediated cultural forms, primarily music, television, film and journalism, but it also examines other cultural expressions such as vernacular art, food, festivals, and folklore. Prerequisite: At least one semester of college-level course in U.S. history or literature.

AMST 1610Y. Latinos and Film.
Examines the way Latinos have been constructed-and misrepresented-in Hollywood film from the silent era to the present, and compares these images with contemporary Latino-made films that counteract Hollywood stereotypes with more accurate and complex images of their own histories and cultures. Readings introduce students to film criticism from a Latino perspective. Weekly screenings in and outside class.

AMST 1610Z. American Popular Culture.
Popular culture is part of everyday life, but also an important site to examine how American identities have been both shaped and reflected through film, television, music, performance, and fashion. We trace American popular culture from the nineteenth century to the present, paying particular attention to the development of different media, and looking at the production and reception of popular culture, as well as the cultural texts themselves. WRIT

AMST 1611A. Making America: Twentieth-Century U.S. Immigrant/ethnic Literature.
Examines the literature of first and second generation immigrant/ethnic writers from 1900 to the 1970’s. Attempts to place the individual works (primarily novels) in their literary and sociocultural contexts, examining them as conscious works of literature written within and against American and imported literary traditions and as creative contributions to an ongoing national discourse on immigration and ethnicity. DPLL

AMST 1611C. Pacific Rim in American History.
This course is a comparative study of Filipino, Chinese, Japanese, Korean and Indian settlement in the United States. It begins in the 1700s when Filipino seamen first settled in what is now Louisiana and Texas and concludes with the end of World War II. Attention will be given to immigration from Asia and its relationship to the development of the capitalist world system, the role that Asian American labor played in class and racial formation in America the political economies of Asian American communities, and the various social movements and legislative efforts to exclude Asians from American society and Asian resistance to exclusion.

AMST 1611E. Popular Culture in the United States.
Focusing on popular culture since industrialization, the course will examine particular forms (broadcasting, romance novels, amusement parks, sports) we will as look at the producers of, and the audiences for, those forms. Requirements include three papers based on outside readings and a final.

AMST 1611F. Race, Gender, and Community in Latina Autobiography.
Examines how Latinas chronicle their identities in transitions vis-à-vis markers of race and gender. Through autobiography, memoir, literary criticism, and theoretical readings emphasizing the negotiations of self, place and community via social and geographical locations including family, region, and the nation. Engages in critical interpretation of the socio-cultural and political worldviews of Latina self-discovery and self-authorship.

AMST 1611G. Race, Ethnicity, Religion and Community.
This course examines the intersection of religion and community for communities of color in the United States. A survey of these communities is guided by the desire to discover the collective stories and memories that socialize social and ethnic identities, and serve as a source of personal and political transformation. Out point of entry for understanding the sacred is at "ground level" perspective.

AMST 1611H. Religion and Society in the United States.
Offers a sociological perspective on theories of the relationship between religion and societies that will help us understand and analyze current religious practices and trends, both inside and outside of religious institutions. Students will conduct several observations in religious institutions and create religious rituals of their own.

AMST 1611J. Sex, Love, Race: Miscegenation, Mixed Race and Interracial Relations.
This class will explore the conditions and consequences for crossing racial boundaries in North America. We will take a multidisciplinary approach, exploring literary, anthropological, and historical writings along with several feature and documentary film treatments of the subject.

Examines the evolution of U.S. child welfare from its origins in the late 19th century through its purported crisis in the late 20th century. Traces the history of policies and programs aimed at: providing support for dependent children; improving infant and child survival and health; protecting children from exploitation and abuse; and dealing with deviant and delinquent children.

AMST 1611M. Trauma and the Shame of the Unspeakable: The Holocaust, Slavery, and Childhood Sexual Abuse.
The problem of representing traumatic experience has been raised by philosophers, artists, and survivors. This course compares three historical situations by reading histories, memoirs, fictions, poems; viewing photographs and film; and analyzing the material cultural artifacts such as memorials. Readings will include Freud, Harriet Jacobs, La Capra, Primo Levi, Toni Morrison and "Maus" by Art Spiegelman.

AMST 1611O. Early American Film.
American film-making from its origins as a technological amusement to the period of classic Hollywood cinema. Particular attention given to representations of gender, race, and ethnicity with comparisons to the evolution of European film. The Birth of a Nation (1915) by D. W. Griffith will be a key text in dialogue with African-American director Oscar Micheaux’s Within Our Gates (1920).

AMST 1611Q. The Asian American Case: Race, Immigration and the Law.
The central historical themes are exclusion, citizenship rights, and equal protection. The experience of Chinese and Japanese Americans dominates the historiography but we will use that scholarship to help us think about a wider range of issues across time.

AMST 1611R. Bourgeois Blues: Class Conflict in African American and Caribbean Literature and Film.
This course investigates class differentiation and its effects in African-diaspora novels, autobiographies, and films (such as The Good Negress, Brothers and Keepers, Crick Crack Monkey, and "Sugar Cane Alley"). Alongside these literary works and films, we will read a wide range of critical/theoretical essays on class and class conflict and the intersection between class and race, gender, sexuality, and nationality.

AMST 1611U. History of American Technology.
This course examines the invention, introduction and use of new machines and communication technologies. Special attention paid to labor, business, systems, with a focus on infrastructure, manufacturing, and information technologies.

AMST 1611V. Color Me Cool: A Survey of Contemporary Graphic Novels.
Surveys a variety of comic books and graphic novels, both mainstream and independent. The emphasis, however, will be on the independent graphic novel. Students will also read history and criticism to understand better the context from which the books emerge and to grasp more firmly their visual and textual aesthetics. Must attend first three lectures to be eligible for enrollment.

AMST 1611W. Asian Americans and Popular Culture.
From the Fu Manchu to Lucy Liu, Asian Americans have long been the objects of loathing, terror and desire, in American popular culture. This
course looks Asian Americans in popular literature, music, theater, film and
television as subjects, producers and consumers.

**AMST 1611X. Narratives of Liberation.**
The theme of human liberation has appeared in literary works from
around the world and across centuries. This course will examine a variety of
narratives that foreground the attainment of physical, spiritual, and
political freedom for individuals and groups. Beginning with the Book of
Exodus and traveling through African American slave narratives, British
proto-feminist novels, Latin American testimonios, and contemporary
films, we will examine how a wide range of writers and filmmakers have
conceptualized the goal and the process of liberation in their works.
Requirements for the course will include two papers/projects and a final
exam.

**AMST 1611Z. The Century of Immigration.**
Examines in depth the period of immigration that stretched from the
1820s through the 1920s and witnessed the migration of over 36 million
Europeans, Asians, Canadians, and Latin Americans to the United States.
Explores causal theories of migration and settlement, examines the role
of family, religion, work, politics, cultural production, and entertainment in
immigrant/ethnic communities, and traces the development and impact of
federal immigration policy.

**AMST 1612A. Chicago and America.**
This course explores the history of Chicago, but also uses the city as a
way to think about issues in American history. Sources include novels,
memoirs, popular histories, film, and music.

**AMST 1612B. Celluloid America.**
The American motion picture developed as a unique art form in the
late 19th century and its enduring cultural and social significance is
irrefutable. In this course, we will explore US history using cinema to
explore the cultural values represented within and shaped by the medium.
Topics include the invention of the moving image, the rise and fall of the
Hollywood studio system, and the emergence and evolution of film
genre and styles (i.e. westerns, film noir, musicals, etc.) as a means of
economically appealing to the masses and cultivating viewership
domestically and abroad.

**AMST 1612C. Growing Up in America.**
This course will consider American narratives of adolescence and coming
of age from the nineteenth century to the present. We will examine
the archetypal aspects of coming to grips with maturity and the world,
class and gender roles, and the invention of “adolescence” as a new
psychological category. International perspectives will be provided by
reading some British and Japanese works. Authors covered will include
Dickens, Melville, Twain, Alcott, Kerouac, Hemingway, Baldwin, Mishima
and Tan, among others. Lectures, class discussions and student reports.
S/NC

**AMST 1612D. Cities of Sound: Place and History in American Pop
Music.**
This course investigates the relationship between popular music and
cities. We will look at a number of case studies from the history of music in the
twentieth century. We will try to tease out the ways that certain places produce or influence certain sounds and the ways that musicians reflect
on the places they come from in their music. Accordingly, we will consider both the social and cultural history of particular cities and regions—New
Orleans, Memphis, Chicago, New York, Washington DC, and others—and aesthetic and cultural analyses of various forms of music—including blues, jazz, punk, hip-hop, and others.

**AMST 1612G. Henry James Goes to the Movies.**
This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - Washington
Square, The Turn of the Screw, The Portrait of a Lady, and The Golden
Bowl - and study the narrative and visual choices as interpretations of
James’s texts. Critical readings on the art of fiction and the art of film will also be introduced.

**AMST 1612K. Immigrant America and Its Children.**
With a focus on the experiences of the immigrant second generation, this course seeks to expose students to the recent social science literature on
contemporary immigration to the United States, including discussions on
its origins, adaptation patterns, and long-term effects on American
society. We will closely examine patterns of assimilation and adaptation
for the children of immigrants, address the challenges they confront when
trying to straddle two cultures, describe their ethnic identity formation,
and interrogate the effects of their increasing presence on U.S. schools
and society in general. The experiences of the second generation will
be examined in various institutions including the family, labor market,
schools, and community, and we situate these institutions in both national
and transnational spheres. The course will consist of lectures by the
instructor combined with class discussion of assigned texts. This course
will also provide students with an analytic framework to address questions
of multiculturalism. The course will also help students develop a better
understanding of the dynamics of race, class, gender, and sexuality in
society.

**AMST 1612L. Eating Cultures: Food and Society.**
This course will look at various ways to understand the complex role of
food in society. We will look at issues of food production and consumption, and
how our relationship to food contributes to the political and social
structures that we live with. Our approach will be historical and pay special
attention to the ways in which communities of color and immigrants have
shaped, and have been shaped by, the food they cultivate, harvest, consume, and market. Field trips and readings explore how food creates
ways for people to form bonds of belonging while also creating bonds of
control and regimes of inequality. Enrollment limited to 20.

**AMST 1612M. Children of Immigrants.**
Gives an overview of the experiences of the children of contemporary
immigrants in the United States. It looks at their experiences in key social
institutions including schools, the family and ethnic community. The course
will examine the integration of immigrant children and how factors of race,
class, and gender shape their experiences. To address the integration of
immigrant children, the course will look at their process of assimilation, maintenance of transnational ties, and lastly the formation of youth identity.

**AMST 1612N. Political Theatre of the Americas (TAPS 1610).**
Interested students must register for TAPS 1610.

**AMST 1612O. 21st Century American Drama (TAPS 1650).**
Interested students must register for TAPS 1650.

**AMST 1612P. First Nations: the People and Cultures of Native North
America to 1800 (HIST 1805).**
Interested students must register for HIST 1805.

**AMST 1612Q. Women / Writing / Power.**
An introduction to American women’s writing and to the development of
feminist literary practice and theory. This course will cover a broad
historical range from the colonial poets Anne Bradstreet and Phillis
Wheatley to contemporary writers Toni Morrison, a Nobel Laureate, and
Marilyne Robinson, a Pulitzer Prize winner. Attention to the effects of
racial, class, and cultural differences will inform this course that will focus
on gender and literature. LILE

**AMST 1612R. Race, Inequality, and the American City since 1945.**
This course will explore the dynamics of race and class in American cities
during the post-World War II period. The readings and discussions will
focus on suburbanization, the decline of central cities, conflict over the use
and definition of urban space, urban governance, spatial fortification, and
populor dissent. The cities examined will include Buenos Aires, Chicago,
Detroit, Liverpool, Los Angeles, New York City, São Paulo, and St. Louis.

**AMST 1612S. Introduction to American Indian Studies (ETHN 1890H).**
Interested students must register for ETHN 1890H.

**AMST 1612T. Slackers and Hipsters: Urban Fictions, 1850-Present.**
Slackers and Hipsters surveys the cult of the cool and disaffected in
literature and film over two centuries. Beginning with Melville’s “Bartleby
the Scrivner,” but also sampling works as varied as Chatterjee’s English
August and Kunkel’s Indecision, we’ll examine both the aesthetic and
political implications of the “slacker” in his/her ironic, apathetic, and
peculiarly alienated view of the world.

**AMST 1612U. Religion, Politics, and Culture in America, 1865 -
Present (HIST 1801).**
Interested students must register for HIST 1801.
AMST 1612V. History of Religion in America, 1600-1865 (HIST 1800). Interested students must register for HIST 1800.

AMST 1612W. Rethinking Women’s Bodies and Rights: Transnational Reproductive Politics. This course examines the issues and debates surrounding women’s reproduction in the United States and beyond. It pays special attention to how knowledge and technology travel across national/cultural boundaries and how women’s reproductive functions are deeply connected to international politics and events abroad. Topics include: birth control, eugenics, population control, abortion, prostitution, reproductive hazards, genetic counseling, new reproductive technologies, midwifery, breastfeeding, and menstruation. Students will analyze historical and contemporary materials concerning women’s reproductive roles, as well as read scholarly studies on reproductive issues in various parts of the world.

AMST 1612X. Performances in the Asia (TAPS 1270). Interested students must register for TAPS 1270.

AMST 1612Y. Twentieth-Century Western Theatre and Performance (TAPS 1250). Interested students must register for TAPS 1250.

AMST 1612Z. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805). Interested students must register for HIST 1805.

AMST 1613A. Science in the Marketplace (HIST 1783). Interested students should register for HIST 1783.

AMST 1613B. Environmental History (HIST 1790). Interested students must register for HIST 1790.

AMST 1700B. Death and Dying in America. No description available. Open to juniors and seniors concentrating in American Studies.

AMST 1700C. Slavery in American History, Culture and Memory. Nearly four centuries have passed since the first enslaved Africans arrived in what is today the United States. More than 140 years have passed since American slavery was abolished. Yet slavery remains a palpable presence in the United States. In this interdisciplinary course, we will examine slavery as a problem in American history, culture, and memory, exploring the institution and its legacies in such arenas as history, literature, cinema, visual arts, and heritage tourism. Open to juniors and seniors concentrating in American Studies.

AMST 1700F. American Publics. Americans worry about the quality of their civic life and fear its decline. This junior seminar examines an important concept, the public sphere, in its popular and political dimensions as well as looking at the challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media--print, broadcasting, the internet--and offers a range of possible final projects. Not open to first year students or sophomores. Enrollment limited to 20. WRIT

AMST 1700G. Public Memory: Narratives of 9/11. This junior seminar will focus on narratives concerned with the events of 9/11 and their aftermath: documentary, testimony, stories, memoirs, novels, graphic novels and feature films. We will also study and visit some of the memorials and museums that have been proposed or created in connection to 9/11 and consider them in the context of public memory and public art. Course work will require a project or research paper that engages the question of the role of the humanities in the creation of the public memory of catastrophic events. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1700I. Community Engagement with Health and the Environment. This junior seminar explores how local community organizations are taking up issues of health and the environment in culturally relevant contexts. We will examine issues of environmental justice, health disparities and the basic tenets of community based participatory research. We will then partner with a local community organization and, depending on need, assist in the design, implementation, and/or evaluation of a program designed to improve the local environment and/or health status of the community. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1700J. The Teen Age: Youth, Society and Culture in Early Cold War America. An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 20 junior and senior American Studies concentrators. Others by permission of the instructor. WRIT

AMST 1800. Honors Seminar. This seminar is for second-semester junior American Studies concentrators who are interested in writing an honors thesis in their senior year. The outcome of this course will be a proposal for the honors thesis along with a bibliography and a research plan and schedule. Topics covered will be the research methods associated with different disciplines; how to make the thesis interdisciplinary; integrating public projects and new media into a thesis. Open to juniors concentrating in American Studies. Enrollment limited to 20. S/NC

AMST 1900A. The Problem of Class in America. Class is everywhere in American life, but rarely discussed explicitly. This course will investigate why this is. How does class operate in American life? Why is it so often obscured? What are the cultural, political and historical forces that have made it such a contested category? We will approach class from a variety of disciplines, including history, cultural studies, and sociology; study the ways class interacts with race and gender; and consider the prospects of class in America in the context of the twenty-first century’s widening inequality and globalized economy.

AMST 1900B. America and the Asian Pacific: A Cultural History. From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DPLL LILE

AMST 1900C. Narratives of Slavery. This course analyzes circum-Atlantic accounts of racial slavery in various forms, including the slave narrative, iconography, historiography, film, and performance. In so doing, it interrogates how factors such as form and/or genre, race, gender, power, and geography influence narrative and knowledge production regrading slavery. Key themes the course addresses include racial slavery as civil and social death, ancient and modern/colonial genealogies of slavery, gendered experiences of bondage, regionalism in U.S. historiography of slavery, and the un/spoken and un/representable nature of atrocity. The course also examines contemporary narratives that underscore the significance that racial slavery brings to bear upon the present. DPLL WRIT

AMST 1900D. America as a Trans-Pacific Culture. From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DPLL LILE

AMST 1900E. Essaying Culture. This course is interested in the essay as form, particularly its encounters with culture. As a verb, essay means "to make an often tentative or experimental effort to perform." We will explore through reading and our own writing the poetic, gnomic, and often desultory moves the essay makes as it seeks to understand its cultural objects. Like the novel, the essay is an omnivorous form. It consists of fragments, poetry, personal reflection, lists, rational argument, and much more as it winds its way to understanding. We will be reading a range of essays, as well as theories of the form.

AMST 1900F. Transnational Popular Culture. This course looks at popular culture as a transnational phenomenon. Taking up issues of cultural imperialism, globalization, domestication, and the economics of the culture industry, the course considers the history of cultural flows, from nineteenth century topics such as Chinese opera in the U.S. and Wild West shows in Europe to twenty-first century fast food, anime, sports, Disney, and music. We will consider both the consumers and producers of popular culture in Europe, South America, Asia and...
Africa, as well as those in the United States. Enrollment limited to 20 juniors and seniors. LILE

AMST 1900I. Latina/o Cultural Theory.
Advanced seminar designed to familiarize students with past and present debates in Latino/a Studies. Knowledge of these critical conversations will aid students in making their own contributions to the field as they write their theses and dissertations. We will read such folks as Jose Limon, Mary Pat Brady, Frances Aparicio, and Gustavo Perez Firmat, to name but a few. Enrollment limited to 20 juniors and seniors.

AMST 1900J. Race, Immigration and Citizenship.
"Who can become an American?" is a central question in American society. This seminar examines the construction of national identity, citizenship as a legal and cultural status, and the struggle for equal protection of the law. The experience of excluded Asian and Latino immigrants are key to understanding this historical and ongoing process. Enrollment limited to 20 juniors and seniors.

AMST 1900K. China in the American Imagination.
Since Columbus, China has occupied a special place in the way America has been imagined and in the ways Americans have imagined their place in the world. This seminar will explore the relationship between China and America from Columbus to the present. While politics and diplomacy play an important role, the emphasis will be on trade, immigration and culture. Enrollment limited to 20 juniors and seniors.

AMST 1900L. Cold War Culture The American Culture in the Cold War.
This seminar will explore domestic politics, social movements, family life, sexuality, gender roles and relations, intellectual currents, and popular culture in the United States during the Cold War years. Special topics include adolescence, "conformity", and the rise of television. Sources include historical monographs, memoir, film, and fiction. Enrollment limited to 20 juniors and seniors.

AMST 1900M. Transpacific Asian American Studies (ETHN 1900J).
Interested students should register for ETHN 1900J.

AMST 1900N. Ethnicity, Identity and Culture in 20th Century New York City.
Explores the processes by which 20th-century New Yorkers created a self-consciously modern, urban, and ethnic American culture. Focuses on literary and artistic representations of life in 20th-century New York as manifested in works by five ethnic groups of New Yorkers that immigrated or migrated to the city after 1800: Jews, African Americans, Italians, Chinese, and Puerto Ricans. Enrollment limited to 20 juniors and seniors.

AMST 1900O. Filipino American Cultures.
Examines the situation of Filipinos in the U.S. Drawing from social history, cultural studies, literature, and visual culture, the readings focus on the Filipino experience in the U.S. through a study of self-representations in various forms such as literature and visual culture. Readings include Campomanes, Rafael, Bulosan, Linmark, and San Juan. Enrollment limited to 20 juniors and seniors.

AMST 1900Q. From Perry to Pokemon: Japan in the United States, the United States in Japan.
This course traces the cultural interactions between Japan and the United States beginning with Matthew Perry in 1854 voyage. Topics include Japanese scrolls depicting Perry's arrival; paintings, architecture and musical forms that traveled between the two countries; the U.S. occupation of Japan after World War II; the popularity of anime and other Japanese films in the U.S. and the importance of American popular culture in post-war Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900R. Gender, Race, and Class in the United States.
Focuses on the emergent feminist scholarship that both empirically and theoretically analyzes how the intersection of race, class, gender, sexual preference, and age shapes the lives of women, men, and transgendersed people in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900S. Green Cities: Parks and Designed Landscapes in Urban America.
Examines the cultural meaning and public use of greenspace in American towns and cities. Covers city parks and metropolitan park systems; the landscaping of riverfronts, streets, cemeteries, and company property; and the contributions of landscape architects such as Frederick Law Olmstead and Warren Manning to the field of urban planning. Begins in the 17th century with the creation of Boston Common and ends by reviewing the latest greenway plans for Providence. Enrollment limited to 20 juniors and seniors.

Between 1854 and 1965, Asian immigrants to the United States and other countries in the Americas were barred from immigration and citizenship. Circuit of ideas and political movements evolved to resist exclusion, disenfranchisement, and discrimination. We will examine: Chinese Americans and the Chinese revolution, the Ghadar movement among Indians of the Diaspora, and the Japanese American left and Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900V. Immigrants, Exiles, Refugees, and Citizens in the Americas.
Focuses on populations who leave their homelands within the Americas. Examines the meaning of categories "refugee," "exile," "citizen," and "immigrant" in the postwar period. Explores the experience and reasons of people who leave their homelands. the relations between their countries of origin and their new society, and their access to rights in both countries. Questions the extent of population movements in the Americas as redefining conceptions of citizenship, rights, nation, and national identity in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900W. Latina/o Literature: The Shifting Boundaries of Identity.
Focuses on the relationship between national identity and ethnic identity in narratives by and about Mexican American, Puerto Rican, Cuban, Dominican and Central and South American women in the U.S. Texts by and about women from other ethnic and minority groups. Readings from Gloria Anzaldua, Judith Ortiz Cofer, Dolores Prida, Cristina Garcia, Julia Alvarez, among others. Enrollment limited to 20 juniors and seniors.

AMST 1900X. Latina/o Religions: Encounters of Contestations and Transformations.
The purpose of this seminar is to survey and review the literature in the new and emerging field of Latina/o Religions. We seek to define the Latina/o religious experience and identify its unique qualities and expressions in relation to other religious movements and expressions in the Americas. Enrollment limited to 20 juniors and seniors.

AMST 1900Y. Latino New York.
The Latino population of NYC in the present generation has generated new lines of inquiry for the study of diasporas in contemporary urban settings. This course undertakes an analysis of this experience from diverse interdisciplinary perspectives, with a focus on cultural expressions and representations and with a view toward new ethnographic and historical approaches. Enrollment limited to 20 juniors and seniors.

AMST 1900Z. Latinos and Film.
Analyzes the way Latino ethnicities have been constructed-and misrepresented-in Hollywood films from the silent era to the present, and examines contemporary work by Latino directors, producers, screenwriters, and actors who produce films that counteract the negative stereotypes of Hollywood films with more accurate, complex, and positive images of their own histories and cultures. Weekly screenings both in and out of class and readings that introduce a new body of film criticism from a Latino perspective. Enrollment limited to 20 juniors and seniors.

AMST 1901A. Latinos in Black and White: Race, Ethnicity and Identity in the Americas.
This seminar looks critically at traditional models of "race relations" in the Americas, the historical development and expressions of "blackness," "brownness" and "whiteness" at regional, national and international levels, and their contemporary articulations and ramifications. A primary focus will be the social and political dimensions of "ethnicity" and "race" in relations between Caribbeans and African Americans in New York City. Enrollment limited to 20 juniors and seniors.

AMST 1901C. Making America: The Immigrant Experience in Literature.
Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution.
to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurs. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors.

AMST 1901D. Motherhood in Black and White.
Focuses on American motherhood with respect to race: under slavery; at the turn of the 20th century; and in contemporary society. Texts include fiction, film, history, feminist and psychoanalytic theory, e.g. "Uncle Tom's Cabin," "Incidents in the Life of a Slave Girl," "Imitation of Life," and "The Reproduction of Mothering." Enrollment limited to 20. Instructor permission required. DPLL WRIT

This is a research seminar designed to explore questions relating to the cultural construction of Asians as a racial group in the United States. The seminar will interrogate the ideas of race, ideology, Orientalism and popular culture. The seminar will then analyze various moments in the formation of dominant images of Asians in American Culture. Enrollment limited to 20 juniors and seniors.

AMST 1901G. Race and Art in America.
How do art and space function as a critical practice, a tool of resistance, and a form of self-determination in racialized 20th-century America? This course will introduce students to ways of looking at and analyzing examples of visual, performance, and mixed-media artwork by African American, Asian American, and Chicano artists who resist, challenge, deform, and subvert traditional concepts of art. Enrollment limited to 20 juniors and seniors.

AMST 1901H. Race and Poststructuralism.
Poststructuralism continues to be a major preoccupation in the discourse of the academic left, but relatively few courses consider how poststructuralist interrogations of subjectivity and history can help us to think about race in a U.S. context. This seminar begins with an overview of key poststructuralist concepts, then moves to poststructuralist texts which take up race as a primary object, and finally takes up the collision between poststructuralist thought and racial identity politics. Enrollment limited to 20 juniors and seniors.

AMST 1901I. Race and Sexuality in Contemporary U.S. Film.
This course aims at producing cultural criticism about the representation of race and sexuality in U.S. films of the 1980s-90s. By examining the circulation of images and ideas about bodies in Hollywood and "independent" production, we consider how cultural norms are constructed. Texts include films, popular film criticism (print and televisual), film theory, and industrial history. Enrollment limited to 20 juniors and seniors.

From 1870 to 1943, Chinese were defined by their "race" as ineligible for citizenship and immigration. Similar prohibitions against Japanese, Filipinos, and Indians followed in the early 20th century. This seminar will investigate Asian American struggles against exclusion and how they shaped American definitions of citizenship, race, and constitutional rights. Enrollment limited to 20 juniors and seniors.

AMST 1901K. Racial Formation in North America.
No description available. Enrollment limited to 20 juniors and seniors.

AMST 1901L. Reading Latina/o History through Fiction.
Examining the imaginative act of writing, the course studies the fictional portrayal of historical subjects, facts, and events. Focuses on how non-fiction is fictionalized in contemporary Latina and Latino novels. How do "Latino" facts--molded by struggles for civil and human rights and U.S. foreign intervention--speak? How does novelist orient readers toward an understanding of social reality? Enrollment limited to 20 juniors and seniors.

AMST 1901M. Researching the History of Children and Childhood.
Explores how to research and interpret the ways that race, class, gender, and region have shaped the social organization, cultural meaning, and experiences of American children and childhood. Focus is on the possibilities and challenges posed by various types of evidence: visual and literary representations, memoirs, child rearing advice, toys and play, children's literature, clothing, and protective and restrictive laws. Enrollment limited to 20 juniors and seniors.

AMST 1901O. Rivers in the Industrial City.
Rivers promote industrial development and serve as important resources and cultural amenities for communities that have a substantial manufacturing base. This interdisciplinary seminar looks at the use and abuse of rivers in American industrial cities from the 18th century to the present. Enrollment limited to 20 juniors and seniors.

Surveys Hollywood representations of dominant masculinity with the aim of interrogating these representations. Considers how such representations have changed over time and how changes may be read in relation to contemporary social, economic, and political pressures. In addition, considers how these texts interact with theoretical issues of representation, identification, and spectatorship. Enrollment limited to 20 juniors and seniors.

AMST 1901Q. Social Movements of the 1960s.
This course examines U.S. social movements from 1954 through 1974, concentrating on the 1960s. Drawing on primary and secondary sources, we examine such topics as the Civil Rights Movement and the emergence of Black Nationalism, the antiwar movement, the relationship between the New Left and second-wave feminism, and the movement for gay liberation. The course also pays attention to how the 'sixties' are represented in contemporary culture. Enrollment limited to 20 juniors and seniors.

AMST 1901S. Society and Identity: A Comparative Approach to the Colonial Americas.
Compares New Spain, the British North American mainland, and the Caribbean from initial colonization in the 16th century to 18th-century wars of independence. Focuses on the complex interplay of class, gender, race, and ethnicity that defined social formations and shaped identities. Reading biographies of ordinary people as well as synthetic histories, engages the past on different levels and connects individual identity and action to broader historical processes. Enrollment limited to 20 juniors and seniors.
are some of the topics to be covered. Enrollment limited to 20 juniors and seniors.

AMST 1901Z. The Old/New Immigration.
By comparing and contrasting the migration and adaptation experiences of Russian Jews and Southern Italians, explores in depth the massive immigration from eastern and southern Europe that took place between 1880 and 1924. Topics include: the causes and countoures of emigration, settlement patterns, adaptation and assimilation, ideologies of left and right, immigration as a gendered experience, immigrant writers and intellectuals, nativism and restriction, and the "new immigration" and national memory. Enrollment limited to 20 juniors and seniors.

AMST 1902A. The Politics of Asian American Culture.
From Bret Harte’s “Heathen Chinee” to Bill Clinton’s John Huang, Asian Americans have been represented as aliens in American culture. The task of Asian American cultural production has been to create a space for an Asian American citizenship. This course looks at autobiography, fiction, drama, film, and cultural criticism to understand how Asian American culture makers have sought to combat imposed stereotypes, subvert structural hegemony, and undermine self-imposed orthodoxies. Enrollment limited to 20 juniors and seniors.

Confronts the notion of Latinos as “foreign” by demonstrating historical depth and geographical breadth of the Hispanic/Latino experience in what is now U.S. territory from colonial Florida, California, and the Southwest, to early 20th-century Puerto Rican and Cuban communities in New York. Explores contrasting Hispanic and Anglo views of the presence of Hispanics via such diverse sources as historical chronicles and autobiographies, Hollywood films, romance novels, and popular music. Enrollment limited to 20 juniors and seniors.

AMST 1902H. Topics in Asian American History and Culture: Diasporas and Transnationalisms.
This seminar reviews the theoretical literatures on diaspora and transnationalism. We then place Asian migrations to the Americas (North America, Hawaii, the West Indies, Central and Latin America) in the context of migrations out of and within Asia in the 19th and 20th centuries. Finally, we consider transnationalism as an analytical framework for understanding the process of Asian-American community formation. Enrollment limited to 20 juniors and seniors.

What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, the racial and social experience of U.S. Latinos are compared with that of the populations in various countries in the hemisphere. Theoretical readings and empirical examples. Enrollment limited to 20 juniors and seniors.

AMST 1902N. Uncovering the Story of Latina/o Identity: Movement, Space and Culture.
This course examines the multiple ways of knowing and understanding Latina/o cultural identity and expression in the Americas. The story of a Latina/o cultural identity is mapped out as place and sentiment in both historical and contemporary periods. We utilize theory and method from both the social sciences and the humanities to uncover and better understand the story of Latina/o identity and ourselves. Enrollment limited to 20 juniors and seniors.

AMST 1902Q. Chicano Studies Seminar.
Explores the culture and politics of Mexican people in the United States leading up to and through the 1960s and 1970s, and the post-nationalist period that continues to the present. Our approach will be interdisciplinary, including readings and films that explore the history, sexuality, art, music, labor, and gendered identities of this diverse community. Prerequisite: Introduction to America/Ethnic Studies recommended. Enrollment limited to 20 juniors and seniors.

AMST 1902T. Henry James and The American Scene.

AMST 1902Y. The Black Female Body in American Culture.
This course on gender and representation will use the black female body as an example of the ways in which images, both verbal and visual, of women of color are utilized within American culture. Through literature, film, visual art, and popular culture, we will consider the legacy of slavery, the persistence of stereotypes, sexual violence, and black women’s resistance. Enrollment limited to 20 juniors and seniors.

AMST 1902Z. Radio: From Hams to Podcasts.
This course examines the history of radio broadcasting and asks if a consideration of radio’s historic flexibility can predict the future of this interesting medium. Readings will focus on the exciting new field of radio studies, emphasizing economics, structures, and listeners. Topics include radio’s ability to cross borders, create racial and gender categories, and change programming possibilities. Enrollment limited to 20 juniors and seniors.

AMST 1903E. City of the American Century: The Culture and Politics of Urbanism in Postwar New York City.
This seminar will investigate the life, history and culture of New York City from World War II to the fiscal crisis of the mid 1970’s, with a particular interest in transformations in the built environment of the city and region. We will primarily focus on the cultural representations, intellectual visions, and political struggles that arose around these transformations, but will also consider their effects on everyday life. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies.

AMST 1903F. Topics in Asian American History: Migration, Race and Citizenship.
This seminar will explore the relationship between Asian Americans and the US State in three historical moments: the era of exclusion, WWII internment, and the post-civil rights era. We will look at citizenship as a cultural signifier that organizes race, gender, sexuality and class as well as a legal status. Enrollment limited to 20 juniors and seniors.

AMST 1903G. Oral History and Community Memory.
Students in this seminar will conduct oral history interviews and archival research to create an audio and visual history of one Providence neighborhood. Collected materials will be prepared for public presentation as a walking tour and web site. Enrollment limited to 20 juniors, seniors, and graduate students.

AMST 1903H. Space and Place: Geographies of the Black Atlantic.
Is the map on an iPhone representative of the space beneath our feet? Does a ‘map’ have to represent geographic space or can it represent something else? For centuries people have sought to make sense of the geographies of their everyday lives as well as environments out of their purview. In this course, we will engage with a number of approaches to space and place including historical, cultural, ethnographic, literary, geographic, and artistic, focusing on African diasporas and the Black
AMST 1903I. Museum Histories. 
Museums collect and display art and artifacts not only to preserve culture heritage, but also to educate, engage, and entertain. This course examines the history of museums— of art, history, anthropology, natural history, science and technology— to understand their changing goals and their changing place in American society. It also considers the changes within museums, in the work of curation, conservation, education, and social engagement. Students will read museum history and theory, engage with museum archives and other primary sources, and produce a research paper or a digital or public project.

AMST 1903J. Anthropology and Art. 
Art is a historic topic of inquiry in anthropology. From the early days of collecting and displaying ethnographic relics in cabinets of curiosities to the bustling movements of art and artists in global art markets, anthropologists have sought to understand social life through art, and art through social life. Through readings, discussions, films, digital materials, and artworks, we will learn about artists, art worlds, art practice, and how anthropologists have studied the arts. Course assignments include critical responses to course material, a final research project, and participation in Providence arts events.

AMST 1903P. Please, Please Me. 
This seminar will investigate theories of pleasure and its representation in a range of fictional texts. What is it that makes a text pleasing and for whom? How do we talk about pleasure and explain it to others? I am especially interested in the representation of pleasure from the 1970s on. Enrollment limited to 20 juniors and seniors.

AMST 1903Q. Out of Place: Regional Boundaries and their Transgression in Novels, Photography, Public Humanities.
This class explores the meaning of “region” in contemporary American culture. Focusing primarily on the West, we’ll examine the construction and transgression of geographical and ideological regional boundaries. Questions considered include: What does crossing boundaries tell us about the stability and meaning of region? What role do race, gender, and nationality play in moving across regional lines? What do shifting regional identities tell us about the possibilities and problems in ways of transforming identity? Sources include fiction, essays, websites, and photography. We use skills and ideas built over the semester to consider the ways museums and other public sites construct regional boundaries. Enrollment limited to 20 juniors and seniors, with priority given to American Studies concentrators.

AMST 1903R. Big Business, the Bomb, and Smokey Bear: Cold War Origins of Today’s Environmental Movement.
Beginning with the psychological, cultural, and environmental changes brought by the Atomic Bomb, this seminar traces Americans’ growing environmental awareness and concern with corporate power. We will look at classics like Aldo Leopold’s Sand County Almanac and Rachel Carson’s Silent Spring, as well as films, poetry, popular texts, and histories complicating traditional notions of the origins and conduct of the contemporary environmental movement. Students will have the opportunity to explore an aspect of environmentalism or the environment in depth through a semester writing project. Enrollment limited to 20 juniors and seniors.

AMST 1903T. The Materiality of History: Material Culture Theory and Practice.
Focusing on Native American, early American, and contemporary US material culture, this course develops critical methods for analyzing historic materials, not as silent monuments to the past, but as legible research materials for scholarly work. Who studies “things”, and with what methods? From the invisible to the living to the monument, what are the limits of “thingness”? What is the role of commodification and American consumerism? Through selected readings and site visits, we will identify “best practices” for integrating artifacts, collectibles, and every day things with documentary research in narrating and exhibiting the past. Enrollment limited to 20 juniors and seniors.

AMST 1903V. Asian and Latino Immigration.
This seminar examines the ways in which the histories of Asian and Latino immigration parallel and intersect each other throughout US history. Capitalist development and labor migrations; wars and refugees; immigration policies and changing racial formations will be among the topics we explore. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies and Ethnic Studies. DPLL

AMST 1903W. The Boy Problem: Male Adolescence as Social Pathology.
Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation’s ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 juniors and seniors.

AMST 1903X. Style and the Man: Masculinity in Fashion and U.S. History.
This class will examine the role clothes have played in constructing notions of masculinity and manhood from the mid-19th century to the present. We will take seriously the oft-heard comment, “the clothes make the man,” by studying the sartorial circumstances around the formation of men’s fashion. These circumstances include class, ethnicity, race, gender, sexuality, and generation. Our study will be episodic and privilege New York and Los Angeles, though other locations will be considered comparatively. Enrollment limited to 20 juniors and seniors concentrating in American Studies.

AMST 1903Y. American Publics.
Americans worry about the quality of their civic life and fear its decline. We examine the public sphere’s popular and political dimensions as well as challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet. Taught simultaneously with the same course at the University of Melbourne, Australia, students will be linked digitally for discussion and collaborative writing. Enrollment limited to 20 juniors and seniors.

AMST 1903Z. Shrine, House or Home: Rethinking the House Museum Paradigm.
This seminar will examine historic house museums within the context of American culture from the founding of Mount Vernon in 1853 to their present decline in popularity and relevance. Utilizing sources from a variety of disciplines including literature, women’s and family history, and museum and preservation theory and practice, students will re-examine the prevailing historic house museum paradigm and develop interpretation plans for house museums in the Providence area. Enrollment limited to 20. If oversubscribed, priority is given to students in the Public Humanities Programs and Department of American Civilizations. No prerequisites.

AMST 1904A. Memories, Memorials, Collections and Commemorations.
To understand how American culture thinks about the past, we will explore a range of texts including museum exhibits, historical society collections, memorials, and civic celebrations. These sites and objects, the material culture of memory, help us understand the construction of national, community and personal identity. Students will also undertake practical projects in memorialization and commemoration, among them designing the program for a new memorial to the Rhode Island slave trade. Enrollment limited to 20 juniors and seniors.

AMST 1904B. Henry James Goes to the Movies.
This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - Washington Square, The Turn of the Screw, The Portrait of a Lady, and The Golden Bowl - and study the narrative and visual choices as interpretations of James’s texts. Critical readings on the art of fiction and the art of film will also be included. Enrollment limited to 20. WRIT

AMST 1904C. The Pacific Rim in American History.
Investigates the circuits of people, goods and ideas between Asia and the Americas. Although these flows have been at work for the past half
millennium, this course will focus principally on three historical moments: the trading world of the 17th and 18th centuries; colonialisms and their critics in the late 19th and early 20th centuries; and the "American Century" in the late 20th century. Enrollment limited to 20 juniors and seniors.

AMST 1904D. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative.
In 1893, Historian Fredrick Jackson Turner declared "the closing of the American frontier," touching off an argument among historians about the meaning and significance of European expansion and settlement in the area west of the Mississippi River. Historians, filmmakers, television producers and photographers have continued the debate in their writings, images, and drama that will be the subject of this class. We will consider the various ways The West has "ended" in popular culture and academia, and consider how these narratives shape our present perceptions of the region and the people and cultures that inhabit and border it. Enrollment limited to 20 juniors and seniors.

Interested students must register for HIST 1970N.

AMST 1904F. The American Experience: The Southeast Asian Refugees/Americans.
Explores the complexity of the American experience, the displacements and diasporas of the Vietnamese, the Cambodians, the Hmong, the Lao, and the Iu Mien in America through multiplicity of perspectives and interdisciplinary approach. Special emphases are on the reinvention of new lives in New World, the American-born generation, how the American-ness and the sense of "home" are constructed, defined, and contested through literary and cinematic works, self-representations, and cultural productions written and produced by these new American themselves. Enrollment limited to 20. DPOLL

AMST 1904G. Museums, Identities, Nationhood.
Will explore the national museum as a cultural institution in a range of contrasting contexts, revealing how these museums have been used to create a sense of national self, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, postcolonialism and multiculturalism which have come to the fore in national politics in recent decades. Enrollment limited to 20 juniors, seniors, and graduate students.

AMST 1904H. The Teen Age: Youth, Society and Culture in Early Cold War America.
An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 20 juniors and seniors.

AMST 1904I. ArtPlace.
This course surveys the many ways in which contemporary artists respond to, remake, and intervene in places, and teaches students to articulate their own creative responses to place. We will be working intensively in Providence’s Jewelry District, collaborating with the nonprofit Artists in Context to create a public artwork, and developing each person’s creative practice in response to the narrative and aesthetic prompts of this contested space. The course will culminate in a final exhibition of student projects curated by the students themselves. Enrollment limited to 14. LILE

AMST 1904J. The Asian American Movement: Communities, Politics and Culture.
In 1969 students at S.F. State College invented a new social category: they called it Asian America. This seminar begins with an examination of the Asian American Movement, its origins and aspirations, its ideological cross currents, its failures and enduring legacies. But the central question we will ask is, what relevance does the Asian American Movement have for struggles for social justice today? Enrollment limited to 20 juniors and seniors.

AMST 1904L. Cultural Heritage, Curation and Creativity.
The course examines current theories and practices in cultural heritage work from various international perspectives and places them in dialogue with practices, theories and critical perspectives from the contemporary arts. It offers students the opportunity to participate in a practical and creative cultural heritage project, realizing a curated experience/event/experience within the urban environment of Providence. Questions of material and form; the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Following readings in cultural heritage theory, curatorial studies and critical theory, the course will engage students both intellectually and practically through individual and group curatorial projects. Enrollment limited to 14 juniors and seniors. LILE

AMST 1904M. Charles Chaplin and the Urban Public Health Movement.
Examines the science, politics, and programs of the 19th and early 20th century urban public health movement. Scope will be national but the focus will be on Providence, particularly during the tenure of Charles Chaplin as Superintendent of Health. Will result in the mounting of an exhibit illustrating and explaining one of facet of the movement. Enrollment limited to 20 juniors and seniors.

AMST 1904N. The Korean War in Color (ENGL 1761V).
Interested students must register for ENGL 1761V.

AMST 1904O. Native American Environmental Health Movements (ETHN 1890J).
Interested students must register for ETHN 1890J.

AMST 1904P. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).
Interested students must register for ENGL 1900R.

AMST 1904Q. Engendering Empire (ETHN 1890K).
Interested students must register for ETHN 1890K.

This course explores the challenges to narrative modes, institutional patterns, and models for studies in material culture that are posed by emerging digital media practices. This course will focus on the example of the collections and resources of the Haffenreffer Museum of Anthropology. Readings in brain science and anthropology that focus on the cognitive and social mechanics of cultural capital formation to project development techniques in simulation and prototyping that derive from movie production, interaction design, game development and architecture. Students from a broad spectrum of arts and science backgrounds, including specifically those from museum curation and computer science, are welcome. Enrollment limited to 15. LILE

AMST 1904S. Ethnic American Folklore: Continuity and the Creative Process.
The course investigates how folklore and the oral culture of diverse cultural groups have transformed within their texts and in their creative representations and meanings. It looks into the dynamics of cultural continuity and the creative process involved, from oral narratives, foodscape, family lore, the senses of place, and the senses of home. At the juncture of the oral, the written, the popular, and the high tech, what are the new cultural forms, new cultural products, communication milieu and venues negotiated and contested. Anthropological field research methods and training will be a major emphasis of the course. Enrollment limited to 20.

Debates about women and work seem to be everywhere in American culture, dominated by the question of whether professional women can "have it all." Simultaneously, women—especially women of color—continue to be concentrated in the lowest-level, most poorly-paid jobs. And as more families depend on women's income, the contradictions between waged work and unwaged family work grow more acute. Controversies about women and their labor—waged and unwaged—have a long history in the U.S. This course will explore current debates from historical, sociological, and theoretical perspectives, with particular attention to the impact of race and class. Enrollment limited to 20 sophomores, juniors, seniors.

AMST 1904U. Museum Collecting and Collections.
This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits,
and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments.

**AMST 1904V. Decolonizing Minds: A People’s History of the World.** This seminar will explore the knowledge-production and military-financial infrastructures that maintain empires, as well as the means through which people have either resisted or embraced empire. While some attention will be made to the 19th and early 20th century colonial context, the bulk of the course will focus on the Cold War liberal era to the neoliberal regime that continues today. Possible topics include: popular culture and ideology, the Cold War university, area studies, international anti-war networks, transnational labor activism, the anti-colonial radical tradition, and the Arab Spring/Occupy Movements. Weekly readings; evaluation based on participation and analytical essays. Enrollment limited to 20. DPLL

**AMST 1904W. Native American Environmental Health Movements (ETHN 1890J)**
Interested students must register for ETHN 1890J.

**AMST 1904X. Imagining And Depicting China In America.** Geographically remote and less-obviously intertwined politically and culturally, China’s distance has fostered an active imaginary, producing rich visual and textual resources. This seminar examines narrative and visual culture over the long period Americans have been fascinated with China and the Chinese, from the 18th century to the present. Visual primary sources are our principal "texts" and include paintings, cartoons, decorative arts, photography, films, fiction, news articles, and government documents. The goal of the course is to interrogate how we envision China and the Chinese today, placing that vision within a critical historical perspective. Enrollment limited to 20. DPLL

**AMST 1904Y. Lincoln, Whitman, and The Civil War (ENGL 1561O).** Interested students must register for ENGL 1561O.

**AMST 1904Z. Old Media New Artists: Innovation and Contingency in African American Culture.** What are the defining characteristics of newness in twentieth-century African American culture? How have black creative artists repurposed their respective disciplines in accordance with and against the shifting proclivities of African American social politics? Through an interdisciplinary focus that considers music, literature, visual arts, and interactive media, this seminar proposes several alternative epistemological frameworks for recognizing the emerging artistry of our time. Enrollment limited to 20 juniors and seniors.

**AMST 1905A. Crises in American Capitalism.** We are now in the midst of what is commonly called the Great Recession—the biggest economic crisis since the Great Depression. This course investigates these two crises in American capitalism: how they were caused, resisted, represented, and remembered. Students will be asked to interrogate the meanings of these economic crises, and to consider their various political and cultural uses. Assigned texts will include history, fiction, journalism, film, memoir, and photography. Enrollment limited to 20 sophomores, juniors, and seniors.

**AMST 1905B. Media and Modern Childhood (GNSS 1960S).** Interested students must register for GNSS 1960S.

**AMST 1905C. Mainstream Journalism in America (through the prism of The New York Times).** Jefferson is supposed to have said that if he were forced to choose between a free government and a free press he would choose a free press, because without it a free government would not survive. It is certainly true that newspapers, and later the electronic media, have had major impacts on American politics and society. Now these media are in a period of convulsive change; their business model is broken and no one can fix it. This course will consider the growth, evolution, influence and future of these media, particularly The New York Times. Enrollment limited to 20.

**AMST 1905D. African American Musical Theatre (MUSC 1905D).** Interested students must register for MUSC 1905D.

**AMST 1905E. American Poetry II: Modernism (ENGL 1711A).** Interested students must register for ENGL 1711A.

**AMST 1905G. Literature and the Problem of Poverty (ENGL 1710K).** Interested students must register for ENGL 1710K.

**AMST 1905H. Global Queer Performance (TAPS 1420).** Interested students must register for TAPS 1420.

**AMST 1905I. Touring the Empire: Travel Literature and the Idea of America (ENGL 1561R).** Interested students must register for ENGL 1561R.

**AMST 1905J. American Poetry I: Puritans through the Nineteenth Century (ENGL 1511O).** Interested students must register for ENGL 1511O.

**AMST 1905K. Asian Americans and the Struggle for Social Justice.** In 1868, in the largest strike that America had ever seen, ten thousand Chinese workers struck Central Pacific Railroad. One hundred years later, Asian Americans, now stereotyped as the “model minority,” are rendered invisible in current struggles for social justice. Yet as railroad workers, laundrymen, farmworkers, draft resisters, sewing women and nurses, Asian Americans have left us a rich legacy of legal, social and political activism. This course will examine the roles that Asian Americans have played in struggles over immigration and citizenship, civil liberties, and labor. DPLL

**AMST 1905L. Transpacific Popular Culture.** General Tso’s Chicken is as American as apple pie; half the 8-year olds in the country seem to be taking Taekwondo; and K-Pop is huge in Mexico City. Asian/Pacific cultural productions have become ubiquitous in everyday North America. In this seminar we will use food, martial arts and new media, three spaces of cultural production where Asian Americans have a ubiquitous presence, as lenses through which to examine questions of immigration and labor, cultural authenticity and appropriation, identity formation and place making in a globalized cultural economy. DPLL

**AMST 1970. Independent Reading and Research.** Required of all honors candidates in the senior year. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

**AMST 2010. Introduction to Interdisciplinary Methods.** Introduction to interdisciplinary studies required of all first-year graduate students in American Studies. Graduate students from other departments may enroll with permission of the instructor.

**AMST 2020E. Introduction to Interdisciplinary American Studies.** This graduate-level course offers an introduction to the discipline of American Studies through a close reading of four important texts representing different methodologies and theories within the discipline. We will also read a series of seminal articles focused on transnationalism, highlighting the significance of border-crossings to the American experience throughout the semester. The goal of the course is to familiarize students with pedagogical approaches within American Studies, through active seminar discussions, fieldtrips within the community, and work with material and visual media as well as secondary texts.

**AMST 2220A. Digital Scholarship.** This course examines how the social sciences and humanities changed as a result of the information revolution. We will look at changes in museums, publishing, knowledge production, and pedagogy. Students learn digital tools and use them to create new media projects experimenting with public scholarship, digital humanities research, archival tools, and/or classroom possibilities. Digital novices welcome. Enrollment limited to 20.

**AMST 2220R. Culture, Politics and the Metropolitan-Built Environment.** This interdisciplinary readings seminar will provide graduate students with an introduction to recent scholarly work on 20th century and contemporary cities and suburbs. Readings will be drawn from cultural, political, social, and intellectual history, American Studies, political science, sociology, and ethnography. They will investigate the interconnections between urban and suburban development and the role of ideology, class, gender, and globalization in shaping planning, architecture, culture, policy, politics, and social movements. This class is open to students in American Studies, History, Sociology, Political Science, Anthropology, and other disciplines.
who find themselves interested in multi-disciplinary approaches to the study of cities and suburbs.

AMST 2220C. Aesthetics Theory and Visual Culture: From Disinterest to Disgust.
This course traces the legacy of Enlightenment aesthetic discourses into the present. The canonical aesthetic theory of Kant and Hegel will ground an exploration of Marxist cultural theorists from the Frankfurt school and the British school of cultural studies whose work decenters the modern subject forged by Enlightenment projects. With an expanded realm of legitimate objects of study that contribute new methodologies for the study of visual discourses, we will then study the work of scholars who engage the contributions of critical race theory, gender and sexuality studies, and queer theory in visual culture.

AMST 2220D. Museums in Their Communities.
This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc.) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed. Open to graduate students only.

AMST 2220E. American Orientalism and Asian American Literary Criticism (ENGL 2760Y).
Interested students must register for ENGL 2760Y.

AMST 2220G. Old Media New Artists: Innovation and Contingency in African American Culture.
What are the defining characteristics of newness in twentieth-century African American culture? How have black creative artists repurposed their respective disciplines in accordance with and against the shifting proclivities of African American social politics? Through an interdisciplinary focus that considers music, literature, visual arts, and interactive media, this seminar proposes several alternative epistemological frameworks for recognizing the emerging artistry of our time. Enrollment is limited to 20 graduate students.

AMST 2450. Exchange Scholar Program.

AMST 2500. Museum Interpretation of the American Experience.
A seminar examining methods of museum interpretation, the ways that museums convey information to the public with exhibits, tours, demonstrations, films, video tapes, slide shows, interactive computer programs, publications, and other techniques. We will visit museums that have an historical or anthropological focus and read theoretical and critical writings on the public interpretation of American material culture.

AMST 2510. Industrial Archaeology.
No description available. S/NC

Examines the methodological and theoretical underpinnings of current and past American studies scholarship. Enrollment limited to graduate students with preference given to American Studies graduate students. S/NC

AMST 2550A. Asian American Political Movements to 1970.
This research seminar will examine political movements in Asian immigrant communities in the United States and the Caribbean before the emergence of “Asian America” in the late 1960s.

AMST 2550B. The Japanese in the Americas.
A research seminar on the comparative historical experience of Japanese in Hawaii, mainland U.S., Brazil, and Peru. Open to undergraduates with permission of instructor.

AMST 2550C. Advanced Seminar on Asian American History.
Advanced seminar on Asian-American history, diaspora studies and globalization.

This seminar presents and analyzes contemporary institutional initiatives and policies relating to culture, including public art, tourism, historic preservation, and museums. It demonstrates how political, social, cultural advocacy, and media organizations from the local to international level shape policies designed to protect and present cultural sites and activities in society. Enrollment limited to 10 graduate students.

AMST 2650. Introduction to Public Humanities.
This class, a foundational course for the MA in Public Humanities with preference given to American Studies graduate students, will address the theoretical bases of the public humanities, including topics of history and memory, museums and memorials, the roles of expertise and experience, community cultural development, and material culture. Enrollment limited to 20 graduate students.

AMST 2651. The Responsive Museum.
This course considers the many kinds of experiences available to people in art museums. Although art museums have tended to embrace the values of art history, visitors use them in surprising, personally meaningful, powerful ways. Among the topics we will activate: building community, stimulating creativity, evoking memory and associations, learning about the self and others, healing, and crossing cultural boundaries. Enrollment limited to 15 graduate students.

AMST 2652. Community Documentary and Storytelling.
This class focuses on ways that documentary methodologies and storytelling help individuals articulate and negotiate issues of race, ethnicity, gender and social class in local and regional communities. Through readings, discussions, and presentations by guest speakers, students will examine written, digital, visual, video/film, and oral presentations and performances as ways to express community stories. We will also consider how such projects can facilitate civic engagement. The class will involve participation in a community documentary project. Enrollment limited to 15 graduate students.

The course offers an opportunity for RISD and Brown students to work together to understand the growing interdisciplinary field of public art. We will explore the potential of working in the public realm as artists and/or arts administrators. Topics include: pivotal events and artworks that formed the history of public art from the early 20th century to the present; approaches to site-specificity; ideas of community and audience; current debates around defining the public and public space; temporary vs. permanent works; controversies in public art; memorials, monuments, and anti-monuments; case studies; public art administration models, among others. It is both a seminar and a studio; students work individually and together on research, presentations, proposals and public projects. Contact the instructor Janet Zweig (janeztweig@earthlink.net). Enrollment limited to 12 seniors and graduate students. Instructor permission required.

AMST 2654. Designing Heritages: From Archaeological Sensibilities to Relational Heritages.
Do you believe in the past? This course takes as its starting assumption that pasts are not temporally distant from today. They are contemporary experiences whose structure and mediation impact how we live in our shared world. This course will explore the intellectual history of archaeological thought and the development of heritage theory. While simultaneously exploring practical design skills, it will provide context to contemporary synergies between art, archaeology, and heritage studies through interdisciplinary studies of architecture, art history, cultural criticism, heritage studies and archaeological theory. Enrollment limited to 18 seniors and graduate students.

Cultural policy is the aggregate of governmental activities in the arts, humanities, and heritage. This seminar explores its history and public/private context and offers practical insights about how to influence cultural policy design, especially methods to achieve public consensus through planning. Students discuss contemporary issues, examine policy planning principles, and learn practical methods through case study to develop policy recommendations. Enrollment limited to 20 seniors and graduate students.

AMST 2657. Museum Interpretation Practices.
Examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop an interpretive practice through a series of workshops, exercises, site visits...
and critical discussions. Enrollment limited to 14; seven seniors and graduate students, along with seven RISD students.

**AMST 2658. Releasing the Imagination in Public Humanities Practice.** Designed to stimulate and nourish creative approaches to work in museums and other venues of public humanities practice. Students will be invited into a series of creative adventures drawing on essential skills of close looking, deep listening, persuasive writing, and creative production. Essays from Maxine Greene's "Landscapes of Learning" and "Releasing the Imagination," as well as an array of personal essays, exhibition catalogues, fiction, and research from the fields of education, sociology, and psychology. Enrollment limited to 15 graduate students; undergraduates may be admitted with instructor permission.

**AMST 2659. "Paradigm Dramas" Revisited: American Studies in Historical Perspective.** The course offers an in-depth exploration of the radical roots and continual transformations of the academic discipline of American Studies within particular historical contexts, beginning in the early 20th century into the present. We will read seminal texts responsible for the formation of defining moments in the discipline's history, including the "myth & symbol school," "American exceptionalism," multiculturalism, post-nationalism and transnational American Studies. Students will produce reviews of current texts and reflect on future possibilities for a mature and globalized American Studies. Enrollment limited to 20 graduate students.

**AMST 2660. Projects in Public Humanities.** Devoted to one or more advanced projects in Public Humanities not covered in detail by the regular courses. Projects in public humanities provide practical, hands-on project and group project management experience that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty advisor to project completion. Written permission and topic description required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. This course is repeatable for credit. Prerequisite: AMCV 2650 or demonstrated ability of equivalent experience. Instructor permission required.

**AMST 2670. Practicum in Public Humanities.** Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester's or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

**AMST 2680. Practicum in Public Humanities.** Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester's or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

**AMST 2690. Management of Cultural Institutions.** This course explores public humanities institutions as an organizational system that interacts with broader community systems. Students will emerge with an understanding of the realities of the managerial, governance and financial structures of public humanities institutions and how those structures interact with mission, programming and audience. The course is designed to help those who work on the program side of public humanities and cultural institutions--as educators, librarians, curators, interpreters, exhibit designers, public programming coordinators, grand makers, etc.--engage more strategically with those aspects of their institutions that encompass planning, organizational behavior, revenue generation, finance, marketing, and governance.

**AMST 2691. Poetry in Service to Schools and the Community.** Poetry in service to the community honors a connection between poetry and wisdom, assumes that poetry is a wisdom medium (vehicle, vessel, conveyance) toward more enlightened thinking and practice. In this way, it is also an ideal medium for extending our study and practice beyond Brown, conducting workshops in schools, community centers, youth detention facilities and elsewhere. The class emphasizes community building, in teaching pairs and classes and workshops throughout Providence, in Renga and workshop groups. Poetry is the connective tissue; building relationships is at the heart of the practice. Students will write and teach. Enrollment limited to 16.

**AMST 2693. Community Arts with Young People.** Blurring the boundaries between artist and audience, practitioners of community arts have engaged underrepresented audiences who have traditionally relegated to more passive forms of participation, including young people with little access to arts education. This class provides students the opportunity to research and/or to conduct their own community arts projects with young people in Providence. Students will develop a deeper and more critical understanding of theorizing and implementing community arts projects with youth; will examine how to create pedagogic conditions with youth through the arts and humanities, as well as ways to systematically observe, document, and analyze these pedagogies. Enrollment limited to 15.

**AMST 2695. Museum as Idea.** What should museums be in the 21st ce? Are museums of today relevant to cultural historical, scientific, artistic, political and educational purposes? How can they provide more meaningful encounters with objects to inspire curiosity and to honor their creators? How can museums relate to their diverse communities today? Must they own objects to be museums? Growing from the historical basis for museum theory, We'll suggest alternative directions, create platforms for new perspectives. We'll rely on readings, discussion, and meetings with museum leaders, and on independent creative research. All will be challenged to invent their own concept of "museum". Enrollment limited to 12.

**AMST 2697. Museum Interpretation Practices.** This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15.

**AMST 2699. Digital Storytelling.** Digital storytelling takes the traditional craft and attributes of telling stories and merges it with diverse digital media. The digital media becomes integral to how and why stories are told. The course will explore digital storytelling in its many forms, including narrated film shorts, movement capture, locative media, digital timelines, DJing, electronic novels, audio documentaries, narrative computer games, podcasting, and blogging among others. The purpose of the course is to introduce students to a breadth of digital tools that will expand their capability to engage diverse publics in the construction and dissemination of knowledge in the arts and humanities. Enrollment limited to 15.

**AMST 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z).** Interested students must register for ENGL 2760Z.

**AMST 2920. Independent Reading and Research.** Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2921. Independent Reading and Research.** Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2922. Independent Reading and Research.** Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC
AMST 2923. Independent Reading and Research
Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

AMST 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Annenberg Institute for School Reform

The Annenberg Institute for School Reform (AISR) is a national policy research and reform-support organization, located at Brown University, that collaborates with school districts and communities to improve the conditions and outcomes of urban schools. AISR focuses on three crucial issues in education reform today: school transformation, college and career readiness, and expanded learning time. This work is grounded in a vision of a "smart education system" -- a high-functioning district collaborating with community partners to provide a comprehensive web of opportunities and supports for its students, inside and outside the school.

Established in 1993 by education reform leader Theodore (Ted) Sizer, the founder and chair of the then-Brown University-based Coalition for Essential Schools, the organization was renamed shortly thereafter to honor philanthropist, former diplomat and publisher Walter H. Annenberg, following the Annenberg Foundation's $50-million donation to endow AISR. A University Corporation-appointed Board of Overseers, chaired by Brown's president, governs AISR. Dr. Warren Simmons is AISR's executive director.

In 2000, AISR formed a national task force to examine the education-reform role of urban school districts, and concluded that their redesign is essential to the achievement of equity and school improvement. Through its District Redesign & Leadership (DR&L) practice, AISR currently collaborates with urban districts to build capacity to strengthen their schools and students -- with active participation of the community and other partners -- and develops an array of tools to support them.

In 2006, AISR formed the Community Organizing & Engagement (CO&E) practice by incorporating the Community Involvement Program, formerly based at New York University, and opening a New York City office. CO&E supports community organizing for education reform by helping youth, parent, and community groups to develop sufficient power to improve the quality of education in low-performing urban school districts.

AISR's Research and Policy staff engage in a range of projects to inform both AISR's own work and the fields of district-level reform and community organizing for school reform. This includes original research, documentation and evaluation of reform efforts, analyses of current education policies, and the development of tools to share lessons and best practices.

In collaboration with Brown's Education Department, AISR established a Master's Program in Urban Policy (UEP) in 2006. The tightly focused, 12-month academic curriculum, integrated with a nine-month internship, is designed to impart a set of core skills and competencies necessary for successful careers in urban education policy. To date, degrees have been conferred on 75 graduates. In 2012, AISR's Board of Overseers established the Ruth J. Simmons Urban Education Policy Scholarship, a permanent annual award for UEP Master's degree candidates who honors the University's retired president and former AISR Board chair.

AISR also serves as a bridge from Brown to Providence and the state, providing support for the Providence Public School District, the R.I. Department of Education, the Central Falls School District, and the Providence Mayor's Children & Youth Cabinet. In 2008-09, AISR supported the Governor’s Urban Task Force, a key factor in Rhode Island's successful Race to the Top application. Furthermore, in partnership with the Rhode Island Foundation, AISR sponsored a series of six forums in 2011-13 focused on "Building a 21st Century Education System" in the Ocean State.

Additional information can be found at: http://www.annenberginstitute.org/

Anthropology

Chair
Daniel J. Smith
The Department of Anthropology at Brown is a vibrant, award-winning group of scholars in the subfields of cultural anthropology, archaeology, and anthropological linguistics. Our research and teaching cover a wide range of the field, with special strengths in anthropological demography, political anthropology, medical anthropology, language and culture, ethnicity, gender, ancient writing and representation, early urbanism, historical and forensic archaeology, and Latin American studies.

As a discipline, Anthropology works at the crossroads of the social sciences and the humanities, and it works to understand human experience in all of its fullness. Unlike other departments, Anthropology does not restrict itself to a single aspect of human social life, such as the political or the aesthetic. Conversations in our classrooms and seminar rooms attempt to put behavior in the broadest contexts of meaning, power, institutions, and history. They cast a global net, ranging from discussions of the transnational process of foreign aid between Japan and Latin America to the hieroglyphic system of the ancient Mayan people to the relationship between Islamic ethics and organ transplant in Egypt. In a world of increasing specialization and fragmentation of knowledge, Anthropology provides an opportunity to look at the big picture and find it in the locally meaningful. In a world of manifold crises, it provides opportunities for applying the knowledge it produces, and in a world of increasingly global connection, the discipline provides many roadmaps.

For additional information, please visit the department's website: http://www.brown.edu/Departments/Anthropology/

Anthropology Concentration

Requirements

Anthropology is the study of human beings from all times and all places, offering holistic, comparative, international, and humanistic perspective. In studying and interpreting the vast range of similarities and differences in human societies and cultures, anthropologists also seek to understand how people themselves make sense of the world in which they live. The Department of Anthropology at Brown is a vibrant, award-winning group of scholars working primarily in the subfields of cultural anthropology, archaeology, and anthropological linguistics. The concentration provides students with a broad introduction to the discipline and includes the major subdisciplines of the field: sociocultural anthropology, archaeology, anthropological linguistics, and biological anthropology.

Concentrators should select their courses in anthropology in consultation with the concentration advisor. At least nine courses in anthropology are required, including:

Select one of the following sociocultural/linguistic anthropology classes: 1

ANTH 0100 Introduction to Cultural Anthropology
ANTH 0200 Culture and Human Behavior
ANTH 0300 Culture and Health
ANTH 0800 Sound and Symbols: Introduction to Linguistic Anthropology

Select one of the following biological anthropology/archaeology classes: 1

ANTH 0310 Human Evolution
ANTH 0500 Past Forward: Discovering Anthropological Archaeology

Select one of the following, normally taken in junior or sophomore year: 1

ANTH 1900 History of Anthropology: Anthropological Theories and Methods
ANTH 1940 Ethnographic Research Methods

1 Required courses must be completed with a grade of B or better.
ANTH 1950 Archaeological Field Work
ANTH 1621 Material Culture Practicum
A course from the ANTH 1910 Series ( Normally taken in senior year) 1
Five additional Anthropology courses. 5
Total Credits 9

1 Of the required courses, at least five courses counted toward the concentration must be offered at the 1000-level or above and one course must be on a particular world area.

Honors
Candidates for honors should apply to the concentration advisor by the end of his or her 6th semester, but no later than the 4th week of the 7th semester. An application consists of a brief statement addressing the focus of a proposed thesis and the names and signatures of two faculty members from the Department of Anthropology who have agreed to serve as the student's honors committee—one as honors thesis advisor, the other as a reader. Candidates for honors are required to:
1. Fulfill the standard concentration requirements.
2. Take two additional courses, usually, which may be used for thesis preparation.
3. Have a majority of A's in the concentration.
4. Submit an approved honors thesis.

Field Work
Concentrators interested in archaeology are urged to obtain training in field archaeology by participating in Brown-sponsored field research, or by participating in an archaeological field school elsewhere.

Anthropology Graduate Program
The department of Anthropology offers a Doctor of Philosophy (Ph.D.) program as well as a Master of Arts (A.M.) program.
For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/anthropology

Courses
ANTH 0001. Anthropology of Stuff.
Our lives are surrounded by objects we make, gift, sell and buy. What can these objects tell us about who we are as humans? This course will introduce students to material anthropology, exploring what objects can tell us about culture, society and experience. We will talk about gifts, commodities, counterfeits, and copyrights. Students will learn how people make objects, how objects make people, and how the circulation of objects has connected people historically and in the present. Students will also have the opportunity to learn some ethnographic methods to talk about the meaning of objects in the world around them.

ANTH 0066A. Politics of Race and Culture.
Addressing the subjects of race, culture and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach. FYS

ANTH 0066B. Mythscapes.
An experimental seminar that will combine classroom discussion with visits to field sites within walking distance of the Brown campus. The aim will be to acquaint students with some fundamentals of symbolic analysis and to apply these fundamentals to interpreting the moral and historical messages suffused in the landscapes around us. Readings will include sources on the anthropological interpretation of myth combined with historical sources on Brown and its neighboring communities and institutions. Students will acquire a deeper sense of the mythic qualities of this place and some analytical tools for understanding mythscapes elsewhere. Enrollment limited to 20 first year students. FYS DPLL

ANTH 0066C. Population and Culture.
This seminar for first year students examines the relationship between individuals and population and the impact of culture on population. How do the lives and actions of individuals cumulate to the characteristics of a population? How do the characteristics of a population affect the lives of the people in it? For first year students only. FYS

ANTH 0066D. Who Owns the Past?
Examines the role of the past in the present. Using examples from the U.S. and other parts of the world, we will look at how archaeological evidence is implicated in contemporary cultural and political issues. Students will learn that the past is not just the focus of archaeologists' interest and scientific inquiries, but is also a subject romanticized by antiquarians, mobilized in nation-building, marketed for profit, re-enacted as entertainment, consumed by tourists, and glorified in commemoration. Understanding these different and competing valuations, claims, and uses of the archaeological past will provide an introduction to why the past matters in the present and to the future. Enrollment limited to 20 first year students. FYS DPLL

ANTH 0066E. Colonial Cities.
This course attempts to understand the nature of colonialism in Africa and India. Comparative methodological approach to the study of colonial cities introduces the students to a multiple and interlocking idea and symbols used by colonial power to create in their images, cities which reflect their own image. For first year students only. DPLL FYS

ANTH 0066F. Families and Households.
This course explores the diversity of families and households, both between cultures and within cultures; changes in family forms over time, changing expectations of family over the life course, the diverse meanings, metaphors, and values of “family”; and current controversies about what families are and what they should be. Enrollment limited to 20 first year students. Instructor permission required. FYS

ANTH 0066G. Explorers and Cultural Encounters.
Looks at famous land and sea expeditions, including Marco Polo, Cheng Ho, James Cook, Samuel Hearne, Elisha Kane, Ernest Shackleton and others. Whether the voyage was inspired by a specific intellectual inquiry, mapping, exploration of a new land, establishing a new trade route, friendly alliance, or a colonial expansion, these expeditions changed the views people had about the world, peoples, and places. FYS

ANTH 0066H. Human Trafficking.
We will retrace the development and impact of the 2000 UN Protocol to Prevent, Suppress, and Punish Human Trafficking, especially women and children. This set of norms was created as a supplement to the UN Convention against International Organized Crime. This course will deal with the protocol as both a legal as a living document, with a history and ongoing political relevance. FYS LILE

ANTH 0066J. So You Want to Change the World?
Examines from an anthropological perspective efforts to address global poverty that are typically labeled as "development." The enterprise of development is considered critically, both with regard to the intentions and purposes that underlie the actions of wealthy countries, donor organizations, and expatriate development workers and with regard to the outcomes for the people who are the intended beneficiaries. Privileging the perspectives of ordinary people in developing countries, but also looking carefully at the institutions involved in development, the course relies heavily on ethnographic case studies that will draw students into the complexity of one of the greatest contemporary global problems: social inequality. Enrollment limited to 20 first year students. FYS DPLL LILE

ANTH 0066K. International Perspectives of Women’s Agency and Society.
This course is designed to address the postcolonial identities and the cross-cultural issues of women through anthropology and women’s writings. Identifying select cases from Africa and Asia. We will analyze the cross-cultural issues and meaning of gender, the cultural construction of gender, the significant ideology that defines the paradigm through which we come to understand a woman’s domain, agency and empowerment, and the modes of behavior in the spheres of everyday life. S/NC only. Reserved for First Year students. Enrollment limited to 20. FYS LILE DPLL
ANTH 0066L. Beyond World Music: Singing and Language.
An introduction to music and language in cultural context. Drawing on case studies from around the world, we consider how music and language are intimately connected. Topics covered include canibals' singing in colonial Brazil, music and electoral politics in Texas, working class culture and country music, singing and society in the Amazon, whistle speech and songwriting in indigenous Mexico, Apache identity and popular music, modernity and classical Indian music, music and mass advertising in the United States, and the politics of Zulu music production in South Africa. Reserved for First Year students. Enrollment limited to 20. FYS

ANTH 0066M. Holy Wars.
No description available.

ANTH 0066N. Peoples and Cultures of Greater Mexico.
This course will focus on the cultural area known as Greater Mexico, incorporating Mexicans resident south of the Rio Grande, as well as the approximately 25 million Mexicans living permanently or for at a time in the United States. Specific topics to be covered in the class include: urban peasants and rural proletarians, recent challenges to gender conventions, national and international migration, nationalism and the changing meanings of the Conquest and colonial periods, land and indigenous rights, everyday violence, machismo, popular culture, and protest and rebellion. Limited to first-year students. DPLL FYS LILE

ANTH 0066O. How to do Things With Gifts: Charity, Corruption and Friendship Across Cultures.
In all human societies, people exchange goods and services. From Adam Smith onwards, economists have emphasized the central importance of the "free" market, where self-interested individuals strike bargains, and simultaneously expand humanity's "common stock." Yet costly practices-expensive weddings, charitable donations, corporate hospitality-still flourish, which appear designed to build human relationships rather than generate hard profits. And in today's global economy, personal gifts remain an essential part of doing business in places like China, Japan, Nigeria and Saudi Arabia. Where mainstream economic analysis sees inefficiency or corruption, this course explores classic and contemporary alternative understandings of gift-giving's cultural significance. FYS

ANTH 0066P. Transnational Lives: Anthropology of Migration and Mobilities.
In an era characterized by globalization, by the increasing and rapid flows of ideologies, information, money, goods, and people across national borders, how do individuals, families, and communities grapple with the new forms of existence brought forth by migration? This course will go beyond macro-economic explanations of why migration happens to explore what migration does; the demographic practices that include parenting, health, gender roles, marriage, politics, and anthropological research itself. We will consider three overlapping issues: the everyday practices of transnational living in a variety of cross-cultural settings; the theory and methodology anthropologists use to better understand local experiences of migration; and the ways in which migration has been effectively politicized. Enrollment limited to 20 first year students. FYS LIRE WRIT

ANTH 0066Q. Crisis of Identities in the Global Order.
The seminar is intended to engage first-year students in discussion and analysis of one of the perplexing questions of the modern age. Why, with globalization and an attendant world-view shaped by the technological revolutions of communication that appeal to commonalities, we find more emphasis on local differences, more conflicts related to identities determined by opposition to "the other"? A concordant question will be: how do different disciplines address the concept of identity? Enrollment limited to 20 first year students. FYS

ANTH 0066R. Child and Youth Cultures.
This first year seminar addresses childhood from two linked but distinctive theoretical perspectives. First, what is childhood? Rather than assuming it is a universal category, we will explore how childhood has been constructed differently through history and across cultures, in opposition to infancy, youth, and adulthood. Second, who are children? In contrast to conventional representations of young people as passive objects of socialization, we will review anthropological conceptions of children and youth as social actors with respect to identity formation, cultural expression, and political economy. Enrollment limited to 20 first year students. DPLL FYS WRIT

ANTH 0066S. Contemporary Egypt in Revolution.
On January 25, 2011 protestors in Egypt amassed in Tahrir Square in Cairo with basic demands: Bread, Freedom, Social Equality, and Human Dignity. After hundreds of peaceful protestors were killed at the hands of riot police and hired thugs, eighteen days later, President Husni Mubarak resigned. Yet since then, hundreds more have been killed, Egypt's revolution continues, and the basic demands are as crucial today as they were at its inception. We will read contemporary Egypt from the perspectives of anthropologists and social historians, and discuss the value of social theory and analysis for understanding current political turmoil. Enrollment limited to 20 first year students. DPLL FYS. S/NC

ANTH 0066T. Postcolonial Matters: Material Culture between Colonialism and Globalization.
This course is about things - "stuff" - as it is about people past and present and their entanglements in and through colonial situations. It explores colonialism past and present through the combined lenses of postcolonial theory and material culture - the emphasis is thus not so much on literary and figurative representations of colonial conflicts and engagements but rather on the material surroundings of people living those colonial worlds. In other words, this course is about what people did and about the things they used to construct their daily lives in colonial situations across the globe and through time. Enrollment limited to 20 first year students. FYS

ANTH 0066U. An Archaeology of Native American Art.
This seminar is an introduction to the art and material culture of the indigenous peoples of North America. The regional coverage includes the continental United States and Canada, focusing on the peoples of Northeast, Midwest, Southwest, Plains, Pacific Northwest, and the Arctic and Subarctic. Topics addressed include art and artifact, function and symbol, innovation and tradition, and museums and representational practices, ethics and repatriation. Special attention will be given to the changing relations between museums and contemporary Native peoples. The seminar will make extensive use of the archaeological and ethnographic collections of the Haffenreffer Museum of Anthropology. FYS LILE

ANTH 0066V. The Anthropology of Children and Childhood.
This first year seminar explores childhood and children from an anthropological perspective. First, we will examine the concept of childhood both historically and cross-culturally. Second, we look at the development pathways that cultural communities provide for the children. These pathways are shaped by cultural ecology and history and by the goals of parents, communities and children themselves. Finally, we will review anthropological conceptions of children as social actors who shape their cultures and lives. FYS

ANTH 0100. Introduction to Cultural Anthropology.
This course provides an introduction to cultural anthropology, surveying its defining questions, methods, and findings. We will examine the history and utility of anthropology's hallmark method, ethnography, the long-term immersion of the researcher in the culture under study. We will compare cultural anthropology's findings and comportment in other cultures to its conclusions and conduct in our own. No prerequisites. WRIT DPLL LILE

ANTH 0110. Inequality and Development and Health, Humanitarianism and Human Rights.
This course offers students an opportunity to examine and analyze a range of contemporary global social problems from an anthropological perspective. Course materials will focus on two major -- often intersecting -- sets of issues: inequality and development and health, humanitarianism and human rights. LILE

Colonialism and Empires have marked human history over many millennia, wreaking havoc among many societies across the globe. Drawing on material and archaeological evidence to adopt an explicitly long-term perspective, this course will survey a wide range of very different empires and colonial situations from the prehistoric Ancient Near East through the Classical Mediterranean and Roman Europe to the Spanish
and English ‘discoveries’ of the New World and the Dutch and British colonization of South Africa. DPLL LILE FYS

ANTH 0125. Violence and the State.
This course allows students the opportunity to interrogate the relationship between violence and the state. Students will be introduced to a variety of analytical frames through which to understand both the concept of violence and that of the state from an anthropological perspective. Through diverse case studies we will consider topics such as what it means to see and be seen by the state, the rationalization of “exceptional” violence, and domination through symbolic violence. The course has no prerequisites, but a foundational course in the social sciences is recommended.

ANTH 0130. Myths Alive.
Myth is an important part of the architecture that sustains human culture and society. This course begins w/an account of the principal theoretical positions that’ve shaped anthropological understandings of myths as a living and guiding force in human communities in ancient times and in the present day. We’ll examine the expressions of myth in senses of place, social harmony, inequality, conflict, religious experience, and radical social change in a wide variety of historical and ethnographic settings including Native America, West Africa, and colonial dislocations. We’ll draw upon objects from Brown’s Haffenreffer Museum to recognize them as materialized representations from mythical worlds. DPLL LILE

ANTH 0200. Culture and Human Behavior.
The goal is to challenge our beliefs about some taken for granted assumptions about human behavior and psyche by examining cultures with different conceptions of self and cognition. We will examine the issues of the role of nature and nurture in development, the nature of intelligence, coming of age, the association of psychological characteristics with gender and the naturalness of emotions. DPLL LILE

ANTH 0250. Gold: The Culture of a “Barbarous Relic”.
An object of obsession for millennia, gold has recently witnessed a polarizing cultural politics. In congressional testimony former Fed Chair Ben Bernanke labeled it a “barbarous relic.” Meanwhile a growing minority clamor for a return to the gold standard. Whether among medieval alchemists or modern financial wizards, whether in the eyes of Egyptian Pharaohs or Indian peasants, gold’s special qualities have shaped cultural practice. This course explores the shiny yellow metal’s cultural history, from its emergence as an object of desire, to the contemporary rejection of its role as the store of wealth resulting in its demotion to just another commodity. DPLL LILE

ANTH 0300. Culture and Health.
An introduction to the field of Medical Anthropology. Lecture reading and discussion will examine the social context of health and illness, looking at the diverse ways in which humans use cultural resources to cope with disease and develop medical systems. The course will provide an introduction to the overall theoretical frameworks that guide anthropological approaches to studying human health related behavior. Medical anthropology offers a unique and revealing perspective on the cultural diversity that characterizes human experiences of sexuality, disease, aging, mental illness, disability, inequality and death. DPLL LILE WRIT

ANTH 0301. Gender and Politics.
The course focuses on ideologies of gender and sexuality cross-culturally and how they influence peoples’ involvement in political processes. We begin with a broad working definition of politics-power dynamics and arrangements whereby groups are affected by one another. The course looks at the circumstances under which peoples’ gender and sexual identities are mobilized into social movements, and the conditions and social consequences of public visibility. Our broader aim is to understand ways in which gendered inequalities produce—and are produced by—forms of political exclusion, as well as innovative ways in which people transform existing structures of power. DPLL LILE

ANTH 0302. Anthropology of Gender and Globalization.
We live in a global world in which the movements of people, goods, and ideas cause productive frictions, transforming the prevailing formations of gender and sexuality. This course examines the intersections of gender and globalization by looking at how globalization shapes cultural constructions and political configurations of gender, and exploring how an ethnographic focus on gender sheds light on various aspects of globalization. Topics covered include anthropological theory of gender and sexuality, gender and global capital, gender and the (colonial) state, and gender and global politics (including gender activism, human rights, and development). Open to undergraduates only. DPLL LILE

ANTH 0310. Human Evolution.
Examination of theory and evidence on human evolution in the past, present and future. Topics include evolution and adaptation, biocultural adaptation, fossil evidence, behavioral evolution in primates, human genetic variation and contemporary human biological variation. WRIT

Explores the complex issues of growing up as an ethnic, bicultural, or a multicultural person and how these dual or multiple identities affect or interact with individual behavior, priorities, the sense of self, and how individual identity is formulated and defined. Cross-cultural and interdisciplinary approaches combining anthropology, comparative human development, interethic communication, life history, and literary works are used. Instructor permission required. DPLL LILE

ANTH 0450. Two Billion Cars: Humans, Markets, Cultures, and the Automobile.
The global car population is predicted to reach two billion by the year 2020. The social, political, health, and environmental consequences are immense. These, as well as the cultural and political economic explanations for the car population explosion, will be explored in this class, as will alternative futures for transit.

ANTH 0500. Past Forward: Discovering Anthropological Archaeology.
This course offers a broad journey through the human past, from material culture crafted by our evolutionary ancestors to the remnants of the recent historic past. To facilitate this journey, the class explores the methods, concepts, and theories that anthropologists employ in the study of past peoples, places, and things. Case studies stretch across the globe. As a hands-on endeavor, archaeology focuses on tangible evidence. In this course, small-group discussion, laboratory, and field exercises will complement lectures, leading to an understanding of how anthropologists study the past and how that knowledge affects the present. LILE

ANTH 0510. Who Owns the Past?
This class examines the relationship between the Western world and African indigenous cultures, heritage, and ideas of the past. By looking at the history of science in reference to the treatment of Africans and African material culture, we will question who owns the rights to an indigenous past.

The figure of the pirate is an all-time favorite in Western imagination. It has inspired some of the most popular narratives of the past, solidly grounded in classic literature and contemporary visual culture. Focusing on the mid-17th century, the golden age of piracy in the Atlantic World, this course will use historical and archaeological date to investigate the way in which the image of the pirate has been constructed in the West, as an embodiment of cultural, legal, moral and sexual transgression, and as an object of both fascination and fear which is still current in the contemporary, global world. DPLL LILE

ANTH 0520. Classic Mayan Civilization.
Examines the history, culture, and society of the Classic Maya, with special emphasis on Preclassic precursors, dynasties, environmental adaptation, imagery, architecture, urban form, and the Maya Collapse.

ANTH 0680. Anthropology of Food.
An exploration of the human experience of food and nutrition from evolutionary, archaeological, and cross-cultural perspectives. The course will review the various approaches employed by anthropologists and archaeologists to understand diet and subsistence in the past and present. Starting with the evolutionary roots of the human diet in Plio-Pleistocene Africa, we will trace patterns of human subsistence to the present, including the social and health implications of the agricultural revolution. We will then explore modern foodways in cross-cultural perspective, focusing on the interplay of ecology, politics, technology, and cultural beliefs. LILE WRIT
ANTH 0800. Sound and Symbols: Introduction to Linguistic Anthropology

This introduction to the study of language and culture considers how language not only reflects social reality but also creates it. We'll examine specific cases of broad current relevance, in the process learning how an analytical anthropological approach to language use lays bare its often hidden power. We'll consider how language creates and reinforces social inequality and difference, how language promotes and resists globalization, and how language is used creatively in performance, literature, film, advertising, and mass media. We will also consider how language does important social work in specific contexts, such as classrooms, courtrooms, medical settings, and political campaigns. DPLL LILE

ANTH 1020. AIDS in Global Perspective

Communities around the world are affected in different ways by the HIV-AIDS pandemic. This course is concerned with cross-cultural variation in knowledge, perception, and treatment of AIDS in a global context. Twenty-five years into the global epidemic, how does social and cultural variation influence the continued spread or management of the disease? In addition to reading significant anthropological works related to the meaning of AIDS in cultural context, the course will address major public health initiatives related to the global AIDS pandemic, and offer an anthropological critique of their design, implementation and success. Enrollment limited to 40. DPLL LILE

ANTH 1100. Circumpolar Ethnography

An examination of the traditional and modern lifeways of native peoples across the Arctic and subarctic from European Lapland through Siberia, Alaska, Canada, and Greenland. Topics covered are society; ethnic relations; religion (Shamanism); art; and politics, including issues of land claims and home rule. DPLL

ANTH 1110. African Issues in Anthropological Perspective

In this course we engage with anthropological literature and films on the diverse ethnicities, cultures, and "traditions" of sub-Saharan Africa. We trace the histories and the processes of cultural, social, and political change, beginning with colonialism and ending with the contemporary period. We will deconstruct and debunk dominant Western ideas of Africa that present it as primitive and characterized by poverty, AIDS, famine, and violence. We will learn about how Africans see and represent themselves through reading ethnographies, engaging with African popular culture, and watching documentary films. DPLL LILE

ANTH 1111. Anthropology of China

This course introduces students to contemporary Chinese culture and society, with a focus on the rapid changes that have taken place during the post-Mao reform era in the People's Republic of China (1978- present). Emphasis will be placed on the importance of historical and global context in developing an understanding of contemporary Chinese culture. Readings and lectures will draw primarily upon recent ethnographic work conducted in the PRC, but readings from the disciplines of history, political science, public health, and contemporary Chinese literature (in translation) will also be incorporated. Topics: family life, urbanization, housing, migration, gender, heath/disease, labor, globalization, and cybculture. LILE

ANTH 1119. Andean Anthropology

The area study paradigm continues to provide solid information about "culture areas," and the rich ethnography and archaeology of Andean societies is no exception. Particular strengths emerging from this literature include studies of land use, religious syncretism, textiles, and collateral themes: continuities and recognizable features of "Andean culture" (lo andino), gender relations, migration, and politics. Throughout, we will analyze the ways that history, ecology, and the broad notion of reciprocity (ayni) cross-cut each of these. The result will be a close and in-depth study of cultural practices within three Andean countries (Peru, Ecuador, and Bolivia), the majority populations of which continue to be indigenous (predominantly Quechua- and Aymara-speaking). These are countries within which recent political and social changes have produced far-reaching transformations. Prerequisite: one course in either Anthropology or Classics. LILE

ANTH 1120. Peoples and the Cultures of the Americas

Examines the diverse cultures and history of the Americas - especially Brazil, Peru, Mexico, and the Caribbean. Topics include the organization of labor, cultural and artistic practices, changing conventions of gender and family, international migration, national and local identities, indigenous rights, and protest and rebellion. LILE DPLL

ANTH 1121. From Coyote to Casinos: Native North American Peoples and Cultures

An anthropological overview on the history and cultures of Native North American peoples from the prehistoric times to the present. Where did Native North Americans come from? What were their traditional lives like? What was their relationship with newcomers of European extraction, including anthropologists? What challenges do they face today? Indigenous and anthropological insights will be brought to bear on these and other questions. DPLL LILE

ANTH 1122. American Indian Art and Artifacts

Drawing on the rich North American Indian collections of the Haffenreffer Museum of Anthropology, the goal of this course is to examine theoretical approaches to the artifacts of indigenous people and analytical strategies for their research and interpretation. Insights from anthropology, art history, American Indian perspectives, and conservation are explored. Meets at the museum.

ANTH 1123. Native North Americans in the Twenty-first Century

An examination of the process of land alienation of Native Americans through the enactment of federal laws to settle the frontiers and protect the wilderness. Through the use of oral history, ethnographies, film, historical documents, and the public record, the course compares Native American and Euro-American perspectives on the ownership of land and rights to resources.

ANTH 1124. United States Culture

The United States is often described as "multi-cultural". This course examines dominant cultural values such as equality, choice, privacy, and responsibility. It also investigates aspects of the social structure of the United States such as inequality, power, race/ethnicity, kinship, and gender. Individual lives illustrate the ways that people living in the United States negotiate cultural values and confront social institutions. Enrollment limited to 40. Instructor permission required. DPLL LILE

ANTH 1126. Archeological Ethnographies: Heritage and Community in the Mediterranean

Archaeologists study objects and (socio-cultural) anthropologists investigate culture is how stereotype and conventions have long had it. As material culture studies have increasingly blurred these boundaries, the distinction is entirely meaningless when it comes to archaeological heritage. Taking its cue from material culture studies, this course explore how local communities experience the material remains from the past and (re)incorporate them into their contemporary lives. DPLL LILE

ANTH 1130. Peoples and Cultures of Southeast Asia

An introduction to the anthropological study of Southeast Asia. Emphasis is placed on understanding the diversity of cultures and societies through both space and time. DPLL LILE

ANTH 1131. Indian Issues in Anthropological Perspective

From its role as an emerging economic power, to characterization of outsourcing global media, political discourses, and worldwide popularity of Bollywood, India is undergoing rapid changes, global imagination, and importantly in how Indians think about themselves in an era of globalization. We cover anthropological issues of contemporary India, including Hinduism and Islam, caste, social structure and forms of social relations using ethnographic texts. We will focus on postcolonial India, particularly two decades since liberalization in 1991. We will consider how history, cultural practices and existing social norms continue to shape and change contemporary Indian society and its relation to the world.

ANTH 1133. Ethnonationalism- The Asian Arena

Three Asian countries-China, Thailand, and Myanmar-are unique national arenas to examine and compare specific definitions, representations, and contentions among nationalistic discourse, ethnic legitimization, and ethnonationalism as they are played out in response to cultural politics, national ideology, European colonial expansion, religious identity,
and ethnic identity. Nationalistic movements, ethnic nationalism, and transnational politics are explored. DPLL LILE

**ANTH 1140. European Ethnography.**
Familiarizes students with the societies and cultures of Europe from an anthropological perspective. Historical material provides for the understanding of current cultural, linguistic, religious, and ethnic variation. Major emphasis on the analysis of a range of contemporary communities from peasant to urban, from East to West, and from North to South. ANT H 1150. Middle East in Anthropological Perspective.
A seminar focusing on anthropological methods of analyzing and interpreting Middle Eastern cultures and societies. Emphasizes the study of kinship, tribal structure, social organization and gender relations, ethnic groups relations, and urban-rural distinctions. Draws upon insights from these topics as a basis for understanding contemporary social, economic, and political dynamics in the region. LILE

**ANTH 1151. Ethnographies of the Muslim Middle East.**
An introduction to ethnographic studies of Middle East, focus on: religion, language, modernity, gender, and political culture. Students will engage in critical examination which anthropologists sought to capture Middle Eastern life, and problems that have pervaded anthropological representation, methodologically and theoretically. You will learn, through the ways anthropologists approach the peoples, ideas, and cultures of the region in ways that complement and contradict the knowledge production of other disciplines, the processes we come to understand cultural difference, and ways this encounter sheds light on our selves and practices. Previous course in Anthropology/ Middle East studies is suggested. Enrollment limited to 25. DPLL LILE

**ANTH 1210. Culture and Cognition.**
Are there cultural differences in thought and perception? If so, what are these differences and what are they attributable? Reviews the history of the controversy on "primitive thought." the influence of culture and environment on perception and concept formation, the development of cognitive operations, and differences in logical processes and decision making in other cultural contexts.

**ANTH 1211. Cross Cultural Perspectives on Children.**
Explores how the behavior and psychological functioning of children are shaped by culture and how different cultures tend to produce children with characteristic personalities, selves, thought patterns and behaviors. Every cultural community provides developmental pathways for children. These pathways are shaped by history and by the goals of parents, communities and children themselves. The course will focus on how human knowledge is transmitted through multiple cultural channels in both informal and formal contexts. This is a service-learning course in which students provide a needed service: Mentoring and tutoring Liberian young people in a literacy program. This will serve as a basis for conducting research on this refugee population and the final paper will be the recording of oral histories from teenagers. Enrollment limited to 30. DPLL

**ANTH 1212. The Anthropology of Play.**
Play enters all fields, from physics to human development, art to scientific experimentation. In all cultures, play figures centrally in rites of passage, child development, learning, and times of celebration. Central to this course is an understanding of the rules of play, its intentions in work, functions throughout human history, and role in formal education. LILE

**ANTH 1220. Comparative Sex Roles.**
Covers specific cross-cultural issues of gender, cultural roles, the status of women, and their structural position in society. Themes of gender representations in the field of economics, ritual, and politics underline the concerns of the course. Though African and Asian communities are the primary focus, aspects of American society are drawn into consideration when relevant. DPLL LILE

**ANTH 1221. Anthropology of Masculinity.**
Contemporary anthropological and historical study of masculine identities and practices throughout the world, focusing on topics such as the cultural economies of masculinity, cultural regions and images of manhood, male friendship, machismo, embodied masculinity, violence, power, and sexual fault lines. Prerequisite: Prior course in Social Science or instructor's permission required. LILE

**ANTH 1222. Kinships Compared: Relations, Families, and Connections.**
In all cultures people see themselves as related more closely to some people than to others and they usually experience that relation in terms of some shared substance such as blood. Beyond these generalizations there is an enormous variety of ways in which people live in, build, and maintain connections with others - in nuclear and extended families, peer groups, friends, ethnic groups, and so on. This course is about kinship as an idea, as an experience, and as an institution. In the midst of divorce and blended families, new reproductive technologies, and adoption we will investigate kinship and connection in our own lives, in a range of other cultures, and within the discipline of Anthropology.

**ANTH 1223. Gender, Nature, the Body.**
This course is an interrogation of the ways in which gender difference comes to be conceived of as "natural" in modern science, popular science, and in popular culture. What is the connection between the science of gender difference and the colonial encounter? What are some different ways of imagining gender difference? How are gender inequalities structured and perpetuated by science and political economy? Through careful reading of historical and anthropological texts, we will learn about various ways in which gender systems are constructed and resisted, how science is used to construct gender, but also how gender politics influence scientific outcomes and practices. Case studies that we will read about include: the colonial encounter and scientific taxonomy, the medicalization of childbirth and labor, historical understandings of male-female continuities, the emerging science of sex difference and sexual orientation, gender inequality and ecological exploitation. DPLL

**ANTH 1224. Human Trafficking, Transnationalism, and the Law.**
Designed to give students an opportunity to engage in transnational research on social issues through an extended case study of a new generation of international norms that identify and combat "human trafficking." The course format combines seminar discussions, lectures, and small group exercises. Students will learn by doing. As we consider legal instruments, UN and U.S. documentary archives, anti-trafficking media such as films and websites, and the prosecution of criminal networks, we will experiment with alternative methodologies for analyzing them. We will study the relation of texts to the social and political contexts of their production and circulation. Enrollment limited to 30. DPLL LILE

**ANTH 1226. When Women Speak: Gender, Literature, and Representation.**
We will address postcolonial identities and cross-cultural issues of women through anthropology and women's writing. We will address cross-cultural issues of gender, in select African and Asian countries, particularly the culture of women in its totality. The focus on meaning and cultural construction of gender, significant ideology that defines the paradigm through which we understand a woman's domain, and the modes of behavior in the spheres of ritual, economic, and political fields of activity. Using women's literature and ethnographic works, we will center thematic endeavors to compare and contrast women's experiences in diverse areas of social and cultural dimensions. DPLL LILE

**ANTH 1227. Science, Activism, and Politics of Gender.**
How did much of the world agree that female genital cutting should be ended? This course explores grassroots and international campaigns in Africa and the West, effects of asylum and criminal laws, and international organizations' attempts to create evidence-based, scientific governance to end cutting. We will focus on ethnographies that problematize these interventions by analyzing their histories, cultural politics, contradictory effects on local communities, and global political ramifications. By examining interventions against cutting, this course offers a methodological and conceptual blueprint for researching local-global production of human rights crises and efforts to resolve them. Enrollment limited to 20. Not open to first year students. LILE

**ANTH 1229. Democracy and Difference: Political Anthropology, Citizenship and Multiculturalism.**
In seemingly endless contexts, the term "democracy" is employed toward a wide range of political and social goals. This course examines the question of cultural citizenship - the right to be different while remaining
part of the national community - as observable in places where liberal democracy's focus on the individual citizen clashes with communal wishes for collective representations of difference. By reading case studies from multiple locales, this course examines the attempts of democratic regimes to govern varied populations through the lens of political anthropology. DPLL LILE WRT

ANTH 1230. Political Anthropology.
Anthropological perspectives on politics, ranging from political processes in small-scale nonliterate societies to those in industrialized states. Special attention is given to the uses of symbolism and ritual in politics. Topics include: how is political legitimacy established and maintained? how are certain political views of the world created? what is the relationship between political change and the reinterpretation of history?

ANTH 1231. Kings, Courts, and Aristocracy.
Explores the nature and variety of kingship, royal courts, and aristocracy through comparative evidence, with strong emphasis on historical data, architecture, and archaeology. Test cases will be examined in Mesoamerica, Europe, Africa, and Asia.

ANTH 1232. War and Society.
Cross-cultural and historical perspectives on war and its larger social context. Course readings and lectures use political economic, cultural, and feminist approaches to understanding war and its effects on social life. Case studies will be drawn from several eras and areas of the globe, including the Rwandan genocide, Central American counterinsurgency wars of the 1980s, and the war in Iraq. LILE

ANTH 1233. Ethnographies of Global Connection: Politics, Culture and International Relations.
Historically, IR and Anthropology examined interactions within and among bounded objects, whether sovereign states or small-scale societies. Increasingly, through, they explore flows, circulations and exchanges across borders, and their impact on different societies. Through case studies, the course will analyze evolving understandings of "globalization" and "culture," and explore how effectively different genres of research and representation capture their complex interactions.

ANTH 1234. Anthropology and Utopia.
Utopia: designs for good societies and efforts to create them; and Anthropology: observation and description of societies. A wide-ranging reading and discussion class will address such questions as: Does Anthropological description contribute to the design of good societies? Have Anthropologists been looking for Utopia? What does Anthropology suggest is wrong with existing societies? Whose job is it to judge societies? How would Utopias be like to live in? How have people tried to build Utopias? Have they failed completely? Is failure inevitable? Is a better world possible? What would it look like? How would we get there? LILE

ANTH 1236. Urban Life: Anthropology in and of the City.
This course examines representation of Indian society in film and anthropological literature. We compare how gender, national identity, religious practices, and historical events are portrayed in films and anthropological literature. We will explore the relationship between visual and textual, showing how film reflect and make comprehensible anthropological concepts of Indian culture, and creates different images of the society. DPLL LILE

ANTH 1251. Violence and the Media.
The role of media in shaping perceptions of violent conflict. Analysis of constructions of the "violent other," "victims," and "suffering" in the written anthropological ethnographies? How do we read culture from the visual? Is culture or the social readable or not? DPLL LILE

ANTH 1252. Kill Assessment: An Investigation into Death, Genocide and Other Forms of Violence.
Is violence best understood as a set of "random acts" marginal to society? Or, do societies need violence to make culture systematic and functional? We will address two major issues throughout this course. First, we will discuss different types of violence: physical, material, structural and symbolic violence. Second, we will become familiar with ways that social groups turn violence into an aesthetic object and an artistic project. LILE

ANTH 1253. The Visual in Anthropology: Documentary Films and Society.
This lecture course entails an introduction of the history of anthropology complemented with cinematic documentary films. Anthropological text is used to demonstrate continuity between the visual and the written word in select films screened for the course. Weekly topics address the anthropological of exclusive authors to critically juxtapose their work with discussion on either the convergence or discontinuity in the uses of the documentary films. Do films inform us or deviate from our understanding of the written anthropological ethnographies? How do we read culture from the visual? Is culture or the social readable or not? DPLL LILE

ANTH 1255. Anthropology of Disasters.
This course examines disasters from an anthropological perspective. We focus on how disasters have been defined and understood, and work more broadly to see what they tell us about human experiences, vulnerabilities, and capacities for resilience building, survival, and long-term sustainability. Drawing on and comparing case studies from around the world, we also examine the nature of destructive agents; degrees of impact and injury;
rescue, relief, and humanitarian responses; and the often slow and uneven process of recovery and resilience building.

**ANTH 1260. Indigenous People and Nature: Birds.**
An exploration of intersections of indigenous peoples with the natural world; this semester with the avian world. Through a sustained focus on one class of living things, the hope is to gain access to a range of issues concerning the relationship between people and the environment. LILE

**ANTH 1300. Anthropology of Addictions and Recovery.**
The purpose of this course is to consider the uses and misuses alcohol, tobacco and drugs, and approaches to recovery from addictions. We will read some of the major cross cultural, ethnographic, linguistic, and social-political works on addictions. Students will have the opportunity to conduct their own anthropological interviews regarding substance misuse and recovery as well as observe a local 12 step recovery meeting. Enrollment limited to 20. LILE WRIT

**ANTH 1301. Anthropology of Homelessness.**
Homelessness emerged as a public concern in the United States and in other industrialized countries in the late 1970s as people began encountering people living on the streets, a way of life which had formerly been confined to the skid rows of large cities. In this course, through readings, readings, discussion, and hands on experiences with homeless populations, we will uncover the causes, conditions, and responses to homelessness. Each student will spend at least two hours per week in a local homeless-serving agency in order to gain face to face experiences. The field placements will be facilitated by the professor. LILE

**ANTH 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture.**
Medicine is arguably the most humanistic of the hard sciences, one that strives to ensure the basic dignity of individuals. In our increasingly globalized world, access to medical care is recognized as a fundamental human right. However, there continues to be considerable debate over the "best" ways to provide medical services to economically and culturally diverse communities across the globe, given the complex ways that people prioritize and perpetuate their health. Drawing on a range of disciplines, this seminar explores the multifaceted relationships between biomedicine and cultural understandings of illness, both in the US and worldwide. Instructor permission required. Enrollment limited to 25 juniors and seniors. DPLL LILE

**ANTH 1310. International Health: Anthropological Perspectives.**
This upper-level medical anthropology course focuses on the social and cultural complexity of health problems in developing nations, employing anthropological approaches to public health. International health issues such as HIV/AIDS, malaria, tuberculosis, leprosy, reproductive health, violence, and mental illness will be examined. The historical, political and socio-cultural dimensions of international health problems will be explored through reading ethnographic case studies. WRIT DPLL LILE

**ANTH 1320. Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress.**
Examines international development from an ethnographic perspective, looking critically at issues of poverty and progress from local points of view. Course is organized around the premise that culture is central to understanding processes of development. Broad development themes such as public health, agriculture, democracy, and the environment will be explored through readings representing a wide range of regions and cultures. DPLL LILE

**ANTH 1321. Impact on Colonialism: Gender and Nationalism in India.**
This course is designed to look into colonial and post-colonial identities within the disciplines of history of literary studies. We will adopt an anthropological approach to those subjects, taking the cultural anthropology and construction of gender as the guideline for the analysis. Topics will include: orientalism, and gender, nationalism and religion.

**ANTH 1322. Human Rights, Social Justice, and Humanitarian Intervention: The Anthropology of Global Aid.**
From child soldiers to starving refugees, Americans are inundated with media images of violent suffering in the developing world. Our politicians frequently present international humanitarian intervention as an unequivocal good, without examining the actual outcomes of aid initiatives. This course uses tools from anthropology to explore the motivations for global aid, along with the concrete--and often unexpected--effects it produces on the ground. Foregrounding an ethnographic approach, we seek to understand the enduring influence of the concept of "rights," the ways that local populations both welcome and resent humanitarian work, and the successes and failures of international charitable organizations. First-year students require an instructor override to register. DPLL LILE

**ANTH 1323. The Culture and Politics of Colonial Cities: Migration, Markets and the Diaspora.**
Two colonial powers (British Empire and Portuguese) form the basis for this comparative approach to unravel and comprehend how colonial policies differed in two regions. Colonial cities have a special mystique, and studying them in the present unravels socio-historical and political connections make the present more meaningful. For post-colonialism, we address migration and Diaspora, the participation of groups under analysis in transnational economy and local and global markets. Focusing on the Diaspora, we seek to tie history and cultural development to the wider issue of Diaspora and the displacement of people, the search for opportunities, migration and the global markets. DPLL LILE

**ANTH 1324. Money, Work, and Power: Culture and Economics.**
Economic activities take place within cultural contexts which define appropriate values and goals, and in societies varying in scale, technology, and organization. Looking cross-culturally, and at economic activities in societies such as the United States, this course examines the production, distribution, and consumption of material goods, analyzing these as essentially social activities - properly understood only when we take account of cultural relations and cultural values. Consequently, the course also investigates the extent to which the words commonly used to describe economic life, such as "market", "wealth", "price", "profit", "work", and "money", are culturally specific rather than universally applicable. At least one previous course in Anthropology or another social science is strongly recommended. WRIT

**ANTH 1325. Business and Entrepreneurship in Global Perspective.**
In a world of free trade, government downsizing, and the rapid movement of people and ideas, business and entrepreneurialism have become central to many peoples' economic livelihoods and social identities. Anthropologists have most often treated business and entrepreneurship as reflections of culture and social life, rather than sites of production in their own rights. Corporate workplaces, small businesses, and trade encounters are starting points for understanding myriad different social outcomes: novel forms of intercultural communication, new patterns of transnational labor migration, changing class configurations, and forums through which socially marginalized groups participate in society. DPLL LILE

**ANTH 1326. The New Economic Anthropology.**
This course introduces students to the new economic anthropology of capitalism and situates it within the historical development of economic anthropology since the late 19th century. The course begins by introducing students to basic notions of 'economy' as understood in the ancient Mediterranean up through to the present. The course covers early anthropological research into forms of peasant and sociocultural organization that contrasts sharply with the assumed universality of homo economicus. The course focuses on key debates within economic anthropology over the possibility of using 'western' economic categories for analysis and explores some of the alternative frameworks developed by anthropologists. LILE

**ANTH 1330. Women in Socialist and Developing Countries.**
A seminar, jointly taught by a sociologist and an anthropologist, exploring the changing role of women in the former socialist countries of Eastern Europe and developing countries in Africa and Asia. Includes women's position, ideologies, and choices within these societies, and the transitions that are taking place. Contributes to a better understanding of the role of women in our own society.

**ANTH 1400. Race, Culture, and Ethnic Politics.**
A seminar addressing the subjects of race, culture, and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach. DPLL
ANTH 1410. Reconstructing Multiraciality.
An examination of, first, the racial and social history of interracial and interethnic relations in the U.S. and different parts of the world, then, the contemporary American situation and changing trends in these cross-group relationships. Exploratory and interdisciplinary-intended to open a dialogue on multiple issues involved, diachronically as well as synchronically.

ANTH 1411. Nations within States.
Examines the interactions between small-scale indigenous societies (often referred to as Fourth World Nations) and the modern states within which they now exist. The relationship is obviously asymmetrical, yet these ethnic or "racial" minorities have the support of world opinion and international organizations. The sociocultural, economic, and political structure of these nations within states is the focus of the course. DPLL LILE

ANTH 1412. Anthropology of State Power and Powerlessness.
How do we conceptualize state power? Is Power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of state power through classic texts of anthropology and political theory including Foucault, Weber, Hobbes, Locke and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities. DPLL LILE

ANTH 1420. Ethnicity, Race, and Gender in the Americas.
The historical and contemporary ethnography of ethnicity, race, and gender in the Americas. Topics include racism, multiculturalism, affirmative action, immigration, nationalism, acculturation, cultural autonomy, slavery, colonialism, and genocide. DPLL LILE

ANTH 1421. Ethnic American Folklore: Continuity and the Creative Process.
An investigation of the dynamics of cultural continuity and the creative process involved in ethnic American folklore from oral narratives, life history, to foodways, and the senses of place. How do these cultural forms intersect with ethnicity, gender, group activism, and transnational contacts and exchanges? What are the new cultural forms, communication milieus, and venues negotiated or contested in contemporary America? DPLL

ANTH 1422. The American Experience-Southeast Asian Refugees/ Americans.
Explores the diaspora of the Cambodian, the Hmong, the Lao, and the Vietnamese American from their initial exodus from their war-torn countries to their strategies for reconstructing new lives. Topics include socioeconomic changes, changing family life, gender roles, life choices, and the growing American generation. Materials used include films, songs, and autobiographies written by the refugees/Americans themselves. DPLL

ANTH 1450. Living with Conflict.
Exploration into ways in which cultural groups perceive and approach situations of conflict and how these situations in turn shape cultural practices, beliefs, and norms within the group. Examples are taken from ethnographies of different parts of the world and include a discussion of customs that help mitigate conflict among members of the group as well as conflict between groups. DPLL LILE

ANTH 1530. American Indian Archaeology.
Traces the development of North American Indian cultures through the comparative study of prehistoric archaeological remains. Topics include the origins of Native Americans, Native American hunting-gathering lifeways, and the rise of the Native American agricultural societies. Emphasizes analyses of subsistence modes, settlement patterns, and symbolic systems. DPLL

ANTH 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia.
A course survey of the pre- and protohistoric archaeology of the eastern half of Asia. Topics include the origins and evolution of agricultural societies, the emergence of village and urban life, and the rise of states and kingdoms. The early states were often characterized and even reinforced by elaborate symbolic and religious systems expressed through ritual, art, and architecture-topics also covered by the course.

ANTH 1550. Ancient Environments.
This course teaches students how scientists investigate ancient environments and climate change and how these are related to ancient people and culture history. Students will learn about methods ranging from pollen and soil analysis to climate reconstruction and ecology. The class will look at a number of archaeological case studies in which climate or environment are believed to have been integral in past cultural developments. Case studies include the Levant, Mesopotamia, Polynesia, the American Southwest, and the Maya area. Students will be evaluated on class participation, weekly writing assignments, and final research papers. Prerequisite: ANTH 0500 or instructor permission. DPLL LILE

ANTH 1552. Environmental Change: Ethnographic Perspectives.
What can anthropology's concepts and methods help us understand about the ways people unevenly experience, govern, fuel or contest global environmental changes today? Focusing on sociocultural accounts and ethnographic films, we will examine contemporary realities such as deforestation; water politics and privatization of nature; pollution and its governance; agricultural change and human health; nuclear disaster; biodiversity and deforestation; the microbiome and society; and the ways environmental science is being produced alongside its emerging markets. Students will learn to put debates about ecological change in dialogue with anthropological thought and tools from the environmental humanities. DPLL LILE

ANTH 1555. Environmental Anthropology.
Environmental anthropology is the study of how people interact with environments, past and present. This course explores how humans have affected their environments over time and how environment shapes human culture, employing an interdisciplinary anthropological perspective to illuminate these reciprocal interactions. This course uses a variety of approaches to understand how people interact with environments, employing cultural, biological, linguistic, and archaeological methods. This course covers human adaptation to environmental change from earliest prehistory up to the present day and students will have the opportunity to explore the practical and interpretive dilemmas of environmental challenges of the 21st century and beyond. Enrollment limited to 20 sophomores, juniors, and seniors.

ANTH 1570. American Indian Archaeology.
This course traces the development of North American Indians and culture through a comparative study of prehistoric archaeological remains. Some of the questions addressed will be: When and why did people first migrate into North America? Were these people responsible for the mass animal extinction at the end of the last Ice Age? What accounts for the similarities and differences in the politics and adaptations of Native Americans? DPLL

ANTH 1590. Archaeology of the Ancient Near East.
A survey of archaeological sites in the ancient Near East from the Neolithic period to the early Roman Empire. Archaeology allows us to explore the development of agriculture, cities, and urban-based culture, as well as to make comparisons between cultures and examine issues of trade and commerce. We evaluate sites in relation to theoretical and methodological issues in anthropological archaeology.

ANTH 1600. Hunter-Gatherer Adaptations.
Addresses the question: to what extent can the concept of the ecosystem, as developed in evolutionary biology, explain variability in human behavior? Examines the literature on contemporary hunting and gathering societies, both human and nonhuman, as well as relevant findings in archaeology and human biology. Background in general biology and anthropology is helpful, but not required.

ANTH 1620. Global Historical Archaeology.
The course examines historical archaeology as a multidisciplinary approach to the study of the historic past. Draws in recent research from different parts of the world, including North America, South Africa, Australia, the Caribbean, and South America, to illustrate historical archaeology’s contributions to interpreting peoples’ everyday lives and the diversity of their experiences in the post-1500 era. LILE

ANTH 1621. Material Culture Practicum
Combines theory with hands-on study of artifacts from historical archaeological contexts in North and Latin America. Students will gain
skills and experience in artifact identification, dating, recording, analysis, and interpretation, and will conduct individual or team research projects on material things as products of everyday life and history. Enrollment limited to 15. LILE

ANTH 1623. Archaeology of Death.
Examines death, burial, and memorials using comparative archaeological evidence from prehistory and historical periods. The course asks: What insight does burial give us about the human condition? How do human remains illuminate the lives of people in the past? What can mortuary artifacts tell us about personal identities and social relations? What do grave stones and monuments reveal about beliefs and emotions? Current cultural and legal challenges to the excavation and study of the dead are also considered. DPLL LILE

ANTH 1624. Indians, Colonists, and Africans in New England.
The course explores the colonial and capitalist transformation of New England’s social and cultural landscapes following European contact. Using archaeology as critical evidence, we will examine claims about conquest, Indian Extinction, and class, gender and race relations by studying the daily lives and interactions of the area’s diverse Native American, African-American, and European peoples. DPLL LILE

ANTH 1625. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World.
Archaeology of slavery, and particularly that of enslaved African-American communities in what came to be the United States, has been one of the fastest growing areas of archaeological research in the last few decades. This course will look into both classic and current literature on the archaeology of Atlantic slavery in order to understand the development of this archaeological subfield, from an initial focus on the living conditions of slaves on plantation sites to later interests in the processes of consolidation of African-American ethnicities. What are current challenges faced by those investigating the material constitution of African Diaspora through time? DPLL LILE

ANTH 1630. The City, the Maroon and the Mass Grave.
How has archaeology contributed to our understanding of the past in the former Spanish colonies? How has this knowledge been presented and made socially relevant in present-day Latin America? This course proposes a critical insight into the achievements and future challenges of historical archaeology in Spanish speaking America, exploring the diverging trajectories that the discipline has had in different countries of the region, and the way in which archaeological knowledge about the colonial, republican, and contemporary periods has been either ignored or assimilated into the development of specific politics of cultural heritage at the local level. LILE

Mexico and Central America are the cradles of one of the world’s most enduring cultural traditions. The modern identity of the region was forged in these ancient traditions and their influence is apparent the world over, particularly in the area of agricultural domesticates (corn, chocolate, and chilies). Their cities (Teotihuacan, Monte Alban, Chichen Itza, etc.) rank among the greatest of the ancient world. This course offers a survey of Pre-Columbian Mexico and Central America, from the early monumental centers of the Olmec to the great Aztec city of Tenochtitlan, and explores how anthropologists and archaeologists investigate Middle America’s indigenous past.

ANTH 1650. Ancient Maya Writing.
Nature and content of Mayan hieroglyphic writing, from 100 to 1600 CE. Methods of decipherment, introduction to textual study, and application to interpretations of Mayan language, imagery, world view, and society. Literacy and Mesoamerican background of script. LILE

Course addresses the burgeoning literature on the human body, especially the meanings attached to it through time and across cultures. Anthropology, history, and archaeology offer the principal sources of evidence for this introduction to past ideas about the body. LILE

A seminar providing the basic information on the prehistory of the Circum Arctic of Northern Fennoscandia, Russia, and North America. Not open to first year students.

ANTH 1700. Evolutionary Theory and Human Behavior.
An introduction to the field of human behavioral ecology, the course provides an overview of the application of the theory of natural selection to the study of behavior in an ecological setting. Focus is on anthropological topics related to reproduction such as issues of mating and parenting, sex ratios and sex preferences, and timing of life histories events.

This course examines the fossil record of human ancestors and evidence for cultural origins in relation to evolutionary theory in biology. We will review studies of living primates as well as modern genetic and DNA research for measures of contemporary human variability. Finally, we will explore forensic applications and case studies.

ANTH 1720. The Human Skeleton.
More than simply a tissue within our bodies, the human skeleton is gateway into narratives of the past—from the evolution of our species to the biography of individual past lives. Through lecture and hands-on laboratory, students will learn the complete anatomy of the human skeleton, with an emphasis on the human skeleton in functional and evolutionary perspective. We will also explore forensic and bioarchaeological approaches to the skeleton. By the course conclusion, students will be able to conduct basic skeletal analysis and will be prepared for more advanced studies of the skeleton from medical, forensic, archaeological, and evolutionary perspectives. Enrollment limited to 20. Not open to first year students. Instructor permission required. LILE

ANTH 1764. Campus Culture.
This course presents and anthropological perspective on American colleges and universities from the past to present. In particular, it will address the emerging relationships between curriculum, governance, funding sources, academic values, and campus life. Readings will include theoretical sources on higher education, historical and ethnographic accounts of particular institutions, and recent essays regarding the purpose, practices and criticism of contemporary colleges and universities.

ANTH 1800. Sociolinguistics, Discourse and Dialogue.
An investigation of the study of language and language behavior. Centers on the study of variation in language as seen in the social and cultural context of language use. This course will feature practice in writing fictional and dramatic dialogue based on real-life discourse. Presupposes some familiarity with basic linguistics (ANTH 0800, CLPS 0030, or equivalent).

ANTH 1810. Language and Power.
This course considers how language and power relate to each other in social life. We first consider theoretical approaches to the politics of language use, such as Foucault on discursive formations, Bourdieu on language as social capital, and Bakhtin on the oppression inherent in standard languages. We then consider specific issues, including joking as linguistic resistance, language death and revitalization, the cochlear implant debate, and racializing discourses. We end with language use in the U.S. “culture wars,” covering such topics as the Ebonics controversy, language and electoral politics, hate speech, and English language legislation. DPLL LILE

ANTH 1870A. Reproductive Health and Sexuality.
No description available.

ANTH 1880. From Magic Mushrooms to Big Pharma: Anthropology of Drugs.
This course considers the social, political, and medical issues associated with illegal and pharmaceutical drugs. Some of the topics we consider are debates over the commercialization and criminalization of hallucinogenic plants such as marijuana, the politics of antiretroviral distribution, the ethics of medical and ethnic tourism, the legacies of colonialism and botanical migrations, “biopiracy” and indigenous knowledge, and critiques of modern food production, including the “locavore movement” and opposition to genetically modified foods. Through it all, we consider how the ways people talk and write about these issues affect concrete realities in daily life. Enrollment limited to 20 juniors and seniors. DPLL LILE
Looks at the way anthropological methods and theories have interlaced through history to understand the dominant concerns in present-day anthropology. What were the important issues that influenced the discipline’s history? Who were the significant, and not so well known, historic personalities who shaped anthropological practice and gave it its identity? Enrollment limited to 20.

ANTH 1901. Anthropology in/of the Museum.
This course provides an introduction to museums from an anthropological perspective. Topics include politics of representation and the construction of the “Other”; objects, identity, and meaning; collecting and cultural property; and collaboration, community engagement, and indigenous self-representation. Assignments involve work with the Haffenreffer Museum of Anthropology's exhibitions and collections. The course focuses on museums dedicated to natural and cultural history, but establishes theoretical and practical grounding for thinking about and working in other disciplines and other kinds of display institutions. It is suitable for both undergraduate and graduate students. There are no prerequisites; but familiarity with anthropology is presumed.

ANTH 1910A. Anthropological Approaches to World Issues.
Capstone seminar for Anthropology concentrators that explores how anthropology can challenge conventional or dominant wisdom about global social problems. Original research project required.

ANTH 1910B. Anthropology of Place.
The anthropology of place serves as a unifying theme for the seminar by bridging anthropology’s subdisciplines and articulating with other fields of knowledge. Through readings and discussion, students will explore how place permeates people’s everyday lives and their engagement with the world, and is implicit in the meanings they attach to specific locales, their struggles over them, and the longings they express for them in rapidly changing and reconfigured landscapes. Enrollment limited to 20.

ANTH 1910C. Campus Culture.
Colleges and universities are normative microcosms of the societies they serve. They create, partition, validate and communicate knowledge to rising generations. Their architectures, landscapes, daily routines, yearly cycles, and centennial celebrations are infused with symbolic meanings. Degree awarding ceremonies are among the most attended pilgrimages in our culture. Colleges and universities are gateways to society’s essential professions and portals to a succession of alumni/ae bound by tradition. We will look at these institutions, their values, symbols, communities, governance, financial sources, academic structures, tensions, and adaptive strategies through the seeing eye of anthropology. Enrollment limited to 20.

ANTH 1910D. Faces of Culture.
The seminar is designed to allow you as anthropology majors to question to debate and examine some of the assumptions of the discipline, and critically explore the multifarious uses of the concept. We will contextualize the study of culture with the history of anthropology and across other disciplines in the humanities and the social sciences. Limited to 20. Prerequisite: ANTH1900

ANTH 1910E. Media and the Middle East.
Media anthropology is a reinvented field within the discipline, emerging from critical engagements with ethnographic film and the crisis of representation of the 1980s. We’ll explore the development of an anthropological approach to mass media studies by focusing on research conducted and theories derived from a particular region: the Middle East. Enrollment limited to 20 senior Anthropology concentrators. Prerequisite: ANTH 1621, 1900, 1940, or 1950. DPLL LILE

ANTH 1910F. Social Construction.
No description available. Enrollment limited to 20.

ANTH 1910G. Senior Seminar: Politics and Symbols.
Examination of key role played by symbols, myth, and ritual in politics. We examine symbols, myths, and rituals used to win support, create political reality, and form political groups, whether in defense of the status quo or creating movements seeking to overthrow it. The 2014 U.S. congressional, state, and local political campaigns receive attention. Students, in part working in groups, will engage in original research both on the American elections and a wide variety of historical and contemporary political developments, from the Arab Spring to the Occupy Wall Street movement. Prerequisites: ANTH 1621 or 1900; and either ANTH 1940 or 1950.

ANTH 1940. Ethnographic Research Methods.
To understand the different theoretical assumptions that shape research efforts; to examine how hypotheses and research questions are formulated; and to appreciate the ethical and scientific dimensions of research by hands-on experience in fieldwork projects. Prerequisite: One Anthropology course.

This course brings design thinking into conversation with anthropological research methods, examining the elements of a comprehensive perspective of context. It introduces students to design research methods, ethnographic methods, and how they work together. Students will learn how to use these methods to identify and engage in ‘deep hanging out’ with the problem, gap or inefficiency in question. They will then move on to patient, contextualized opportunity identification for meaningful innovation. By the end of the course, students will have developed a process for effective context analysis. This course is relevant for designers of products, services, organizations, and experiences. Enrollment limited to 40. LILE

Training in archaeological lab and field techniques for archaeologists. Topics include the nature of field archaeology, tools of the trade, interdisciplinary field techniques, ethics, excavations methodology, survey and GIS, systematic vs. ad hoc excavation, artifact analysis, site and artifact preservation. Students gain experience as practicing archaeologists through the active investigation of local historical and archaeological sites in the College Hill area.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

A seminar investigating some themes in the history of anthropological theory. Starting with the delineations of the scope and nature of social science by Marx, Durkheim, and Weber, the seminar then considers various explorations of the concepts of structure, function, and agency, concluding with Bourdieu’s reformulation of social anthropology for a new generation in the form of practice theory.

A seminar exploring fundamental theoretical and ethnographic currents in 20th-century cultural anthropology.

Contributes to anthropological understandings of globalism, political and urban anthropology, with a focus on one particular theoretical orientation that may guide research design and/or analysis. In addition to studying this particular philosophy through which they might understand culture, this course offers a model for the adoption of any given theoretical lens that might be taken up, critiqued, and otherwise put to use in cultural analysis.

A seminar on the methodological problems associated with field research in social and cultural anthropology. Designed to help students prepare for both summer and dissertation research.

The purpose of this seminar is to help graduate students conceptualize ethnographic research, formulate a research problem, develop a research design, consider its ethical implications, design appropriate methodologies and prepared the proposal for IRB approval. The methodologies will be discussed with a view to arriving at a critical understanding of the ethical, political and theoretical issues embedded in them and the way in which they fit into our conception of anthropological practice.

ANTH 2030. Advanced Field Methods.
A seminar for advanced graduate students returning from field research or preparing for dissertation field work. Case studies are used for a critical examination of research design and data analysis.
ANTH 2035. Professional Preparation for Anthropologists.
This course covers research ethics and politics, writing of proposals, theses, and articles, publishing, public speaking, CVs and resumes, and the job search.

ANTH 2040. Advanced Social Theory.
This seminar is for graduate students who have taken ANTH 2000 and ANTH 2010 or equivalent graduate introductory courses in anthropological theory. Topics to be explored in this seminar include contemporary theories of globalization, hybridity, the politics of identity, class, cultural citizenship, democracy, social suffering, structural violence, agency, human rights, militarization, the body, multi-sited ethnography, and writing culture.

ANTH 2050. Ethnography.
Each week this class will study classic and contemporary ethnographies - as well as studies from sociology, journalism, and history - that achieve ethnographic results, but will require discussion to determine what they "are". We will carefully examine the methods involved in research for the books and how the ethnographies were written. Ethnographies will be chosen for their importance in anthropology and other fields, and will cover a broad range of topical and geographic contexts.

ANTH 2100A. Contemporary Ethnography on Latin America and Beyond.
This graduate seminar addresses contentious and creative issues in anthropology by focusing on the science and art of ethnography. Readings feature new transnational ethnographic writers. Topics: alternative research framing, the relation of field research to writing, representing violence and porous borders in practice.

ANTH 2100B. People of the Andes.
No description available.

Focuses on debates over significant social and cultural issues in Africa. Historical and cultural continuities are premised as a way of understanding political, economic, and religious complexities in present-day Africa.

ANTH 2120. Critical Locations in the Anthropology of the United States.
This graduate seminar locates and explores the anthropology of the United States. Students first work to understand the social history of anthropology in the U.S., including its theoretical and methodological contributions, and the range of approaches and examples. The course is then organized thematically as students explore key moments along this trajectory, through a close reading of ethnographic work in various settings. The course places a particular emphasis on scholars, topics, and populations that have been historically understudied and sidelined within the larger inquiry, but that are nonetheless critical for the expanded contribution of anthropological work in this field.

ANTH 2200A. International Health.
This graduate seminar (upper-class undergraduates may seek permission from the instructor) focuses on the social and cultural complexity of health problems in developing nations, exploring anthropological approaches to public health. International health issues will be investigated using historical, ecological, epidemiological, political-economic, and ethnomedical perspectives, and the role of "applied" anthropology will be explored.

ANTH 2210. Analysis of Social Structure.
This course will discuss the analysis of kinship and the construction of the person cross culturally.

ANTH 2240. Anthropological Approaches to the Body.
This course is an in-depth exploration of theoretical and analytical approaches to the body in socio-cultural anthropology. Topics covered include: the body as site and sign of the social order; theories of embodiment and the cultivation of the self; bodily order and social ritual; the senses; the relationship between bodily epistemology and socio-political structures; the commodification of the body; technological intervention in the body; the visualization of the bodily interior; and state interventions and regulations of bodily processes.

ANTH 2250A. Psychology of Gender.
This course critically examines the role of gender in development and maturation, or the psychological differentiation of males and females, in the context of their socio-cultural environment.

ANTH 2251. Anthropology of Gender and Sexuality.
In this course we will engage with writings from the social sciences on sex, gender, and sexuality. We will look at the categories that anthropologists have created to explain bodies, sexual choices, and subjectivities and historicize and interrogate them. We will do close readings of ethnographies to see how sex, sexuality, and gender are theorized and how these ideas are applied to a variety of cultural contexts and how people live their everyday lives. Enrollment limited to 15.

ANTH 2255. Gender, Liberalism, and Postcolonial Theory.
What makes gender useful to think with? What work is it charged with doing--in the "real" world and in scholarship? What is the explanatory and analytical potential of a category that has been appropriated to divergent ends? Drawing on multiple disciplines in the humanities and social sciences, this course operates at two registers throughout: it offers students a productive set of analytical tools for theorizing gender and sexuality in culture and society, and it constructs a genealogy of anthropological analysis of gender and sexuality from a postcolonial perspective, exploring how ethnography and postcolonial theory have challenged liberal feminism. Open to seniors and graduate students. S/ NC.

ANTH 2260. Politics and Symbolism: At the Interface of Anthropology and History.
An examination of the theoretical roots of the symbolic analysis of politics and the application of these perspectives to both contemporary and historical study of political life.

ANTH 2261. Globalisms: Empires and Social Movements.
This seminar explores globalization in two of its contemporary forms, including empires and global networks of social movements. Focuses on theories of empire and on their implications for anti-war and anti-corporate movements in particular.

ANTH 2262. Social Analysis, Public Goods and Social Movements.
This seminar explores some of the political, ethical, and social issues and dilemmas involved in using social analysis to advance public interests.

ANTH 2263. Colonialism and Neocolonialism.
A seminar addressing the concepts of colonialism, postcolonialism, and nationalism. The nature of colonial "rule of law," the stages of the dissolution and formation of "African" native states, and the notion of "traditional" power are all examined in a comparative context using Francophone and Anglophone case studies in Africa.

ANTH 2264. Ethnicity, Race, and Nationalism.
Study of key issues debated by anthropologists regarding ethnicity, race, and nationalism, with examination of concepts such as identity, cultural citizenship, transnationalism-globalization, gender, home, and acculturation-hybridity.

ANTH 2270. Ethnography and Women's Literature of Non-Western Societies.
Interdisciplinary and cross-cultural exploration of representation in ethnographic and literary texts. Confronts the apparent analytical opposition of objectivity and subjectivity and addresses the challenge in the academy of "writing culture." Encourages connections between women writers in the Third World and American minority discourse to deepen understanding of global politics and the poetics of culture.

ANTH 2300. Anthropological Demography.
A seminar devoted to the investigation of the interface of anthropology (especially sociocultural anthropology) and demography. A wide variety of demographic topics-fertility, mortality, marriage, migration-are considered, and the links between anthropological and demographic writings on and approaches to these areas are examined.

ANTH 2301. Interdisciplinary Perspectives on Population.
Brown University's 10 year of excavations has created a lens through which to examine the complexities of the Nabataeans and their culture. The main information about the Nabataeans comes primarily from their extant monuments. There are also literary and epigraphic sources. This
seminar will create a constellation of readable ideas, although we will still be left with many open questions about these people.

ANTH 2302. Field Methods for Anthropological Demography.
Concentrates on methods for collecting or producing data that bear on demographic issues and that are suitable for social and demographic analyses. Topics include: fertility histories, life histories, genealogies, household surveys, networks, and social units. Particular emphasis on the social contexts of data production, local meanings, and discovering appropriate categories and units of analysis.

ANTH 2303. Anthropology of Fertility and Reproduction.
A seminar examining the social significance and cultural meanings of human fertility and reproduction, including the social and cultural consequences of different fertility levels, the variety of people involved in decisions about reproduction, the allocation of responsibility for parenthood, and the political implications of contemporary debates about the meanings of biological and social reproduction.

ANTH 2304. Issues in Anthropology and Population.
This seminar is intended for graduate students and postdoctoral fellows interested in anthropological approaches to population issues and is normally taken as the second course in a two-course sequence that begins with ANTH 2303. The overarching theme of the seminar is the contributions that sociocultural anthropology can make to the understanding of population processes.

ANTH 2310A. Violence, Governance, and Transnationalism.
This seminar deals with contemporary anthropological approaches to violence, governance, and transnationalism. As faculty and graduate students, we have worked together to identify important ethnographic experiments that provide novel anthropological framings of major global issues. Our goal is to interrogate anthropological writing, explore its relation to field research, and trace anthropological appropriations of contemporary social theory from a variety of sources. Prerequisites: three previous courses in Anthropology.

ANTH 2310B. Violence, Governance and Transnationalism.
Deals with contemporary anthropological approaches to intersection of violence, human rights, law, and transnationalism. Readings will focus on the development of a new generation of research in the anthropology of human rights and its implication for rethinking legal anthropology. Anthropology has moved beyond the "cultural relativism" paradigm on to new projects which analyze the appropriation and use of human rights discourse and international norms as political tools for a variety of national and local agendas. Anthropologists have produced ethnographies that focus on the institutional grounding of legal discourse and practice in community and neighborhood politics, social movements, and ethnic nationalist projects. They have studied the radical reworking of rights discourse in different parts of the world and debated the ways in which these technologies for legal redress in the face of violence are politically empowering and/or disempowering in particular historical and cultural circumstances.

ANTH 2315. Anthropology of State Power and Powerlessness.
How do we conceptualize state power? Is sovereign power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of power through classic texts of anthropology and political theory including Foucault, Deleuze, Weber, Hobbes, and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities.

ANTH 2320. Ideology of Development.
An examination of different development theories and their relationship to field application. The analysis of project preparation and implementation is used to question the goals and objectives of Western and indigenous notions of progress and that are suitable for demographic analyses. Third World countries are utilized as case studies to address related issues, such as the meaning of development.

ANTH 2321. Coming to Terms with India: Anthropology of Colonialism and Nationalism.
This course is designed to look into the impact of colonialism, nationalism and the postcolonial identities of the person in India. In addition to the primacy of the anthropological focus, the seminar will also draw from cultural studies and history. Our engagement will be with topics of nationalism, religion, and caste and class formation during colonial and post-colonial rule. Additional topics using the anthropological approach will include orientalism and gender; the location of national minorities within the Indian democracy and the future of fundamentalism; post-colonialism and the emerging new person.

ANTH 2400. Museums and Material Culture.
This seminar discusses anthropological approaches to material culture in museum contexts, by developing themes, selecting objects, and preparing a preliminary script for an exhibition in Manning Hall. This year, "Humans and Nature." (ANTH 2400 is followed by ANTH 2410. Students can enroll in each course independently). Instructor permission required.

ANTH 2410. Exhibitions in Museums.
The goal of this seminar is to implement in Manning Hall an exhibition script developed in ANTH 2400, on "Humans and Nature" (see that course). Topics discussed and put into practice include: representation of cultures modern museum displays; thematic development; interpretation, handling, and mounting of objects in contextually rich and engaging museum environments; conservation; audience assessment.

ANTH 2420. Museums in Their Communities.
This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed.

ANTH 2450. Exchange Scholar Program.

ANTH 2500A. Problems in Archaeology: Archaeology of Colonialism.
Explores the theoretical discourses shaping anthropological approaches and defining archaeological projects on culture contact and colonialism. Attention will be given to examining colonial encounters between Europeans and indigenous peoples as ongoing processes rather than particular historical moments, and to looking at recent efforts at decolonizing archaeological practice.

ANTH 2500B. Problems in Archaeology: The Archaeology of Empires.
Empires have been among the most influential political and social formations in global history. This seminar will explore general literature on state formation, consolidation and decline, as well as considering the specific and unique contributions archaeology and art history can offer to the understanding of empire. A variety of case studies will be explored, with selections depending on student interest.

ANTH 2500C. GIS and Remote Sensing in Archaeology.
This course will train advanced students in the laboratory methods needed for the successful application of GIS and remote sensing technologies in archaeology. We will conduct an exhaustive literature review of spatial research in archaeology to place GIS and remote sensing within a broader conceptual framework. Each student will design their own geodatabase that they will be able to build upon in future research.

ANTH 2501. Principles of Archaeology.
Examines theoretical and methodological issues in anthropological archaeology. Attention is given to past concerns, current debates, and future directions of archaeology in the social sciences.

ANTH 2510. Circumpolar Archaeology.
A specialized course dealing with advanced problems in Arctic archaeology. Although primarily oriented toward the northern specialist, the seminar is designed to present, by example, methodological and analytic problems that are applicable to most archaeological areas and to hunting, fishing, and gathering societies.

ANTH 2520. Mesoamerican Archaeology and Ethnohistory.
Seminar focusing on current issues in the archaeology and history of Mesoamerica, including Mexico and Northern Central America. Draws on rich resources at Brown, including the John Carter Brown Library.
ANTH 2530. Archaeology of Tribes and States. 
Explores concepts of complexity and inequality and how these have been used to study the origins and development of complex society. Categories such as tribes, chiefdoms, the state, etc. are evaluated as conceptual tools for understanding the rise of civilizations and early state formation, as well as transformations in later historical contexts.

ANTH 2540. Historical Archaeology: From Colony to City. 
Examines historical archaeology as a complex field of inquiry that engages multiple sources of evidence and incorporates a wide range of theoretical and methodological approaches. The seminar will consider the range of evidence available to historical archaeologists, and draw on examples from colonies and cities around the world to explore how the richness and diversity of the evidence is used.

ANTH 2541. Ethnohistory. 
Seminar topic: "Comparative Ethnohistory of the Americas." Examines Indian/European encounters and interactions in North America and Latin America. Explores the conjunction of anthropology and history, combining both theoretical orientations from and methodology of the two disciplines, with particular emphasis on the problems posed by comparative analyses.

ANTH 2550. Archaeological Research Methods, Theory and Practicum. 
The seminar is designed to help the student development good research and analytical skills in archaeology. By focusing on research design, analytic techniques, the relationship between theory and methodology, and the development of research proposal and/or reports, we shall examine how both scientific and humanistic theoretical concerns can be sources of meaningful archaeological questions, and how these questions can be transformed into viable research problems.

ANTH 2560. Lived Bodies, Dead Bodies: The Archaeology of Human Remains. 
Bioarchaeology is the study of human remains from archaeological contexts. We will survey the "state of the art" in bioarchaeology, while exploring its relevance and application to the archaeology of complex societies. We will survey a range of bioarchaeological methods and applications, including paleopathology, stable isotope analysis, population affinity/ancient DNA, perimortem trauma, and body modification. In turn, we will explore how bioarchaeology can be used to approach a wide range of archaeological problems relative to complex societies, including subsistence, economy, migration, urbanism, social inequality, conflict and warfare, and identity. Open to graduate students only. S/NC. LILE

ANTH 2800. Linguistic Theory and Practice. 
An introduction to theoretical and methodological issues in the study of language and social life. We begin by examining semiotic approaches to language. We turn to classical research on language as a structured system - covering such topics as phonology and grammatical categories - but we focus on the implications of such work for broader social scientific and humanistic research. We then consider areas of active contemporary research, including cognition and linguistic relativity, meaning and semantics, pronouns and deixis, deference and register, speech acts and performativity, interaction, verbal art and poetics, reported speech, performance, and linguistic ideology.

ANTH 2810. Performance Theory. 
Explores the concept of performance as used in several social science and humanities disciplines: linguistics, anthropology, folklore, ethnomusicology, and theater. Also addresses practical problems of conducting research on performance forms. Seminar.

ANTH 2900. Teaching Practicum. 
No description available.

ANTH 2970. Preliminary Examination Preparation. 
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ANTH 2980. Reading and Research. 
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ANTH 2990. Thesis Preparation. 
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

ANTH XLIST. Courses of Interest to Students Concentrating in Anthropology. 
Fall 2014 
The following courses, listed in other departments, may be of interest to students concentrating in Anthropology. Please check the course listings of the sponsoring department for times and locations.

Archaeology and Ancient World 
ARCH 0725 Great Migrations: Mobility, Displacement and Material Culture in the Ancient Mediterranean 
French Studies 
FREN 1710E War Machines: Violence and Social Forms in West Africa 
Middle Eastern Studies 
MES 0155 Cultures of the Contemporary Middle East

Applied Mathematics 
Chair 
Bjorn Sandstede

Associate Chair 
John Mallet-Paret

The Division of Applied Mathematics at Brown University is one of the most prominent departments at Brown, and is also one of the oldest and strongest of its type in the country. The Division of Applied Mathematics is a world renowned center of research activity in a wide spectrum of traditional and modern mathematics. It explores the connections between mathematics and its applications at both the research and educational levels. The principal areas of research activities are ordinary, functional, and partial differential equations: stochastic control theory; applied probability, statistics and stochastic systems theory; neuroscience and computational molecular biology; numerical analysis and scientific computation; and the mechanics of solids, materials science and fluids. The effort in virtually all research ranges from applied and algorithmic problems to the study of fundamental mathematical questions. The Division emphasizes applied mathematics as a unifying theme. To facilitate cooperation among faculty and students, some research programs are partly organized around interdepartmental research centers. These centers facilitate funding and cooperative research in order to maintain the highest level of research and education in the Division. It is this breadth and the discovery from mutual collaboration which marks the great strength and uniqueness of the Division of Applied Mathematics at Brown. For additional information, please visit the department’s website: http://www.dam.brown.edu/

Applied Mathematics Concentration Requirements

The concentration in Applied Mathematics allows students to investigate the mathematics of problems arising in the physical, life and social sciences as well as in engineering. The basic mathematical skills of Applied Mathematics come from a variety of sources, which depend on the problems of interest: the theory of ordinary and partial differential equations, matrix theory, statistical sciences, probability and decision theory, risk and insurance analysis, among others. Applied Mathematics appeals to people with a variety of different interests, ranging from those with a desire to obtain a good quantitative background for use in some future career, to those who are interested in the basic techniques and approaches in themselves. The standard Applied Mathematics concentration leads to either the A.B. or Sc.B. degree. Students may also choose to pursue a joint program with biology, computer science or economics. The undergraduate concentration guide is available here (http://www.dam.brown.edu/undergraduate/documents/UndergraduateGuide.pdf).
Both the A.B. and Sc.B. concentrations in Applied Mathematics require certain basic courses to be taken, but beyond this there is a great deal of flexibility as to which areas of application are pursued. Students are encouraged to take courses in applied mathematics, mathematics and one or more of the application areas in the natural sciences, social sciences or engineering. Whichever areas are chosen should be studied in some depth.

**Standard program for the A.B. degree.**

**Prerequisites**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 090</td>
<td>Introductory Calculus, Part I &amp; MATH 0100 and Introductory Calculus, Part II</td>
<td>Or their equivalent</td>
</tr>
</tbody>
</table>

**Program**

Ten additional semester courses approved by the Division of Applied Mathematics. These classes must include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0180</td>
<td>Intermediate Calculus</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0520</td>
<td>Linear Algebra</td>
<td>1</td>
</tr>
<tr>
<td>APMA 0350 &amp; APMA 0360</td>
<td>Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II</td>
<td>2</td>
</tr>
</tbody>
</table>

Select one course on programming from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>APMA 0090</td>
<td>Introduction to Mathematical Modeling</td>
<td>1</td>
</tr>
<tr>
<td>APMA 0160</td>
<td>Introduction to Scientific Computing</td>
<td>1</td>
</tr>
<tr>
<td>CSCI 0040</td>
<td>Introduction to Object-Oriented Programming and Computer Science</td>
<td>1</td>
</tr>
<tr>
<td>CSCI 0150</td>
<td>Computer Science: An Integrated Introduction</td>
<td>5</td>
</tr>
</tbody>
</table>

Five additional courses, of which four should be chosen from the 1000-level courses taught by the Division of Applied Mathematics.

**Total Credits**

1. Substitution of alternate courses for the specific requirements is subject to approval by the division.
2. Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
3. APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
4. Concentrators are urged to complete their introductory programming course before the end of their sophomore year.

**Applied Mathematics-Biology Concentration Requirements**

The Applied Mathematics-Biology concentration recognizes that mathematics is essential to address many modern biological problems in the post-genomic era. Specifically, high-throughput technologies have rendered vast new biological data sets that require novel analytical skills for the most basic analyses. These technologies are spawning a new "data-driven" paradigm in the biological sciences and the fields of bioinformatics and systems biology. The foundations of these new fields are inherently mathematical, with a focus on probability, statistical inference, and systems dynamics. These mathematical methods apply very broadly in many biological fields including some like population growth, spread of disease, that predate the genomics revolution. Nevertheless, the application of these methods in areas of biology from molecular genetics is essential to address many modern biological problems in the post-genomic era. Specifically, high-throughput technologies have rendered vast new biological data sets that require novel analytical skills for the evolution of molecular genetics. Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

**Standard program for the Sc.B. degree.**

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Mathematics-Biology concentrations are prepared for careers in medicine, public health, industry and academic research.

**Required Courses:**

Students are required to take all of the following courses.

Select one of the following sequences:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>APMA 0350 &amp; APMA 0360</td>
<td>Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II</td>
<td>2</td>
</tr>
<tr>
<td>APMA 0330 &amp; APMA 0340</td>
<td>Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II</td>
<td>2</td>
</tr>
<tr>
<td>APMA 1650</td>
<td>Statistical Inference I</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0090</td>
<td>Introductory Calculus, Part I (or equivalent placement)</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0100</td>
<td>Introductory Calculus, Part II (or equivalent placement)</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0170</td>
<td>Advanced Placement Calculus</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0180</td>
<td>Intermediate Calculus</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0520</td>
<td>Linear Algebra (or an approved applied math course)</td>
<td>1</td>
</tr>
<tr>
<td>CHEM 0330</td>
<td>Equilibrium, Rate, and Structure</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 0030</td>
<td>Basic Physics</td>
<td>1</td>
</tr>
<tr>
<td>or PHYS 0050</td>
<td>Foundations of Mechanics</td>
<td>1</td>
</tr>
</tbody>
</table>

Ten additional courses, of which six should be chosen from the 1000-level or higher level courses taught by the Division of Applied Mathematics.

**Total Credits**

1. Substitution of alternate courses for the specific requirements is subject to approval by the division.
2. Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
3. APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
4. Concentrators are urged to complete their introductory programming course before the end of their sophomore year.
PHYS 0040  Basic Physics 1
or PHYS 0060  Foundations of Electromagnetism and Modern Physics

Additional Courses
In addition to required courses listed above, students must take the following:

Two additional courses in applied math, biology, chemistry, math, or physics. At least one of these must be a directed research course that reflects the theme of this program, for example:
- APMA 1970  Independent Study
- BIOL 1950  Directed Research/Independent Study
or BIOL 1960  Directed Research/Independent Study

Four biology courses agreed upon by the student and advisor, for example:
- BIOL 0410  Genetics
- BIOL 1410  Evolutionary Genetics

Areas of Emphasis and Suggested Courses:
A breadth of courses in multiple areas is suggested. For students with particular interests, the following areas of emphasis can be considered.

Biochemistry
- BIOL 0280  Introductory Biochemistry
- CHEM 0350/0360
- CHEM 1230  Chemical Biology
- CHEM 1240  Biochemistry
- BIOL 1270  Advanced Biochemistry

Cells, Tissues, and Organs
- BIOL 0800  Principles of Physiology
- BIOL 1100  Cell Physiology and Biophysics
- BIOL 1190  Synaptic Transmission and Plasticity
and/or appropriate bioengineering courses, such as:
- BIOL 1090  Polymer Science for Biomaterials
- BIOL 1120  Biomaterials
- BIOL 1140  Tissue Engineering
- BIOL 1150  Stem Cell Engineering

Neurosciences
Any Neurosciences courses (NEUR)
- APMA 0410  Mathematical Methods in the Brain Sciences

Population Biology and Ecology
- BIOL 0410  Invertebrate Zoology
- BIOL 0420  Principles of Ecology
- BIOL 0430  The Evolution of Plant Diversity
- BIOL 0480  Evolutionary Biology
- BIOL 1410  Evolutionary Genetics
- BIOL 1420  Experimental Design in Ecology
- BIOL 1430  The Computational Theory of Molecular Evolution

Other courses with permission.

Genetics
- BIOL 0470  Genetics
- BIOL 1410  Evolutionary Genetics

Total Credits 17

1  It is recommended that some concentrators take organic chemistry or biochemistry.

Applied Mathematics-Computer Science Concentration Requirements
The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

Requirements for the Standard Track of the Sc.B. degree.

Prerequisites - two semesters of Calculus, for example
- MATH 0090  Introductory Calculus, Part I
- MATH 0100  Introductory Calculus, Part II
- MATH 0170  Advanced Placement Calculus

Concentration Requirements (17 courses)
Core-Math:
- MATH 0180  Intermediate Calculus
or MATH 0350  Honors Calculus
- MATH 0520  Linear Algebra
or MATH 0540  Honors Linear Algebra
or APMA 0530  Methods: The Matrix in Computer Science

Core-Applied Mathematics:
- APMA 0350  Methods of Applied Mathematics I, II
- APMA 0360  Methods of Applied Mathematics II, II
- APMA 1170  Introduction to Computational Linear Algebra
or APMA 1180  Introduction to Numerical Solution of Differential Equations

Core-Computer Science:
Select one of the following Series:

Series A
- CSCI 0150  Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160  and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170  and CSCI 0180  Computer Science: An Integrated Introduction

Series C
- CSCI 0190  Accelerated Introduction to Computer Science
and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course)

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented:
- CSCI 0220  Introduction to Discrete Structures and Probability (math)
- CSCI 0320  Introduction to Software Engineering (systems)
- CSCI 0310  Introduction to Computer Systems (systems)
or CSCI 0330  Introduction to Computer Systems
- CSCI 0510  Models of Computation (math)

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.
Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include:
- APMA 1200/1210 and APMA 1650/1660.
A capstone course: a one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Note: CSCI 1450 may be used either as a math-oriented core course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

• Which courses were put to use in your summer’s work? Which topics, in particular, were important?
• In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
• Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
• What did you learn from the experience that probably could not have been picked up from course work?
• Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
• Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

Standard program for the A.B. degree (Advanced Economics track) - through the class of 2015:

Prerequisites:

<table>
<thead>
<tr>

Course requirements:
### Applied Mathematics requirements:

(a)  
- APMA 0350  Methods of Applied Mathematics I, II  
- APMA 0360  Methods of Applied Mathematics I, II

Select one of the following:  
- APMA 0160  Introduction to Scientific Computing  
- CSCI 0040  Introduction to Scientific Computing and Problem Solving  
- CSCI 0150  Introduction to Object-Oriented Programming and Computer Science  
- CSCI 0170  Computer Science: An Integrated Introduction

Select one of the following:  
- APMA 1200  Operations Research: Probabilistic Models  
- APMA 1210  Operations Research: Deterministic Models  
- APMA 1650  Statistical Inference I

(b)  
- APMA 1200  Operations Research: Probabilistic Models  
- APMA 1210  Operations Research: Deterministic Models  
- APMA 1650  Statistical Inference I

Select one of the following:  
- APMA 1650  Methods of Applied Mathematics I, II  
- APMA 0360  Methods of Applied Mathematics I, II

### Economics Requirements:

- ECON 1130  Intermediate Microeconomics (Mathematical)  
- ECON 1210  Intermediate Macroeconomics  
- ECON 1630  Econometrics I

Three 1000-level courses from the "mathematical-economics" group, below:  
- ECON 1170  Welfare Economics and Social Choice Theory  
- ECON 1225  Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies  
- ECON 1465  Market Design: Theory and Applications  
- ECON 1470  Bargaining Theory and Applications  
- ECON 1640  Econometrics II  
- ECON 1650  Financial Econometrics  
- ECON 1750  Investments II  
- ECON 1759  Data, Statistics, Finance  
- ECON 1810  Economics and Psychology  
- ECON 1820  Behavioral Economics  
- ECON 1850  Theory of Economic Growth  
- ECON 1880  The Theory of General Equilibrium  
- ECON 1870  Game Theory and Applications to Economics

Two additional 1000-level economics courses.  

Total Credits: 15

1. No course may be used to simultaneously satisfy (a) and (b).
2. APMA 0330 and APMA 0340 may be substituted with advisor approval.
3. Or ECON 1110 with permission.

### Standard program for the A.B. degree (Mathematical Finance track) - through the class of 2015:

#### Prerequisites:
- MATH 0100  Introductory Calculus, Part II
### Standard program for the Sc.B. degree
(Mythematical Finance track) - through the Standard program for the Sc.B. degree

#### Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

#### Course requirements:

- **Applied Mathematics requirements:**
  - (a) APMA 0350 and APMA 0360 Methods of Applied Mathematics I, II 2
  - Select one of the following: 1
    - APMA 0160 Introduction to Scientific Computing
    - CSCI 0040 Introduction to Scientific Computing and Problem Solving
    - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
    - CSCI 0170 Computer Science: An Integrated Introduction
  - APMA 1200 Operations Research: Probabilistic Models 1
  - APMA 1650 Statistical Inference I 1
  - Select two of the following: 2
    - APMA 1180 Introduction to Numerical Solution of Differential Equations
    - APMA 1330 Methods of Applied Mathematics III, IV
    - APMA 1660 Statistical Inference II
    - APMA 1670 Statistical Analysis of Time Series
    - APMA 1680 Nonparametric Statistics
    - APMA 1690 Computational Probability and Statistics
    - APMA 1700 The Mathematics of Insurance
    - APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
    - APMA 1740 Recent Applications of Probability and Statistics
    - MATH 1010 Analysis: Functions of One Variable

#### Economics requirements:
- ECON 1130 Intermediate Microeconomics (Mathematical) 2
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1
  - Select three 1000-level courses from the "financial economics" group: 3
  - ECON 1650 Financial Econometrics
  - ECON 1710 Investments I
  - ECON 1720 Corporate Finance
  - ECON 1750 Investments II
  - ECON 1759 Data, Statistics, Finance
  - ECON 1760 Financial Institutions
  - ECON 1765 Finance, Regulation, and the Economy: Research
  - ECON 1770 Fixed Income Securities
  - ECON 1780 Corporate Strategy
  - ECON 1790 Corporate Governance and Management

#### Select two 1000-level courses from the "mathematical economics" group: 1
- ECON 1170 Welfare Economics and Social Choice Theory
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics

### Standard Program for the A.B. degree
(Advanced Economics track) - class of 2016 and beyond:

#### Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

#### Course Requirements:

- **Applied Mathematics Requirements**
  - (a) 1
    - APMA 0350 and APMA 0360 Methods of Applied Mathematics I, II 2
  - Select one of the following: 1
    - APMA 0160 Introduction to Scientific Computing
    - CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)
    - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
    - CSCI 0170 Computer Science: An Integrated Introduction
  - APMA 1200 Operations Research: Probabilistic Models 1
  - APMA 1210 Operations Research: Deterministic Models 1
  - APMA 1650 Statistical Inference I 1
  - Select two of the following: 2
    - APMA 1180 Introduction to Numerical Solution of Differential Equations
    - APMA 1330 Methods of Applied Mathematics III, IV
    - APMA 1660 Statistical Inference II
    - APMA 1670 Statistical Analysis of Time Series
    - APMA 1680 Nonparametric Statistics
    - APMA 1690 Computational Probability and Statistics
    - APMA 1700 The Mathematics of Insurance
    - APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
    - APMA 1740 Recent Applications of Probability and Statistics
    - MATH 1010 Analysis: Functions of One Variable

#### Economics Requirements:
- ECON 1130 Intermediate Microeconomics (Mathematical) 3

---

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

---

Brown University
Standard program for the Sc.B. degree (Advanced Economics track) - class of 2016 and beyond

**Prerequisites:**

- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course Requirements:**

**Applied Mathematics Requirements**

1. Select one of the following:
   - APMA 0350 Methods of Applied Mathematics I, II
   - APMA 0360 Methods of Applied Mathematics I, II

2. Select one of the following:
   - APMA 0160 Introduction to Scientific Computing (preferred)
   - CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)
   - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
   - CSCI 0170 Computer Science: An Integrated Introduction

**Economics Requirements:**

- ECON 1210 Intermediate Macroeconomics
- ECON 1630 Econometrics I

- Two 1000-level courses from the "mathematical-economics" group: 4
  - APMA 1200 Operations Research: Probabilistic Models
  - APMA 1210 Operations Research: Deterministic Models
  - APMA 1650 Statistical Inference I

(b) 1

- Select two of the following:
  - APMA 1200 Operations Research: Probabilistic Models
  - APMA 1210 Operations Research: Deterministic Models
  - APMA 1660 Statistical Inference II
  - APMA 1670 Statistical Analysis of Time Series
  - APMA 1680 Nonparametric Statistics
  - APMA 1690 Computational Probability and Statistics
  - APMA 1700 The Mathematics of Insurance
  - APMA 1740 Recent Applications of Probability and Statistics

- MATH 1010 Analysis: Functions of One Variable

**Economics and Psychology**

- ECON 1305 Economics of Education: Research
- ECON 1310 Labor Economics
- ECON 1360 Health Economics
- ECON 1410 Urban Economics
- ECON 1510 Economic Development
- ECON 1520 The Economic Analysis of Institutions
- ECON 1530 Health, Hunger and the Household in Developing Countries
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1759 Data, Statistics, Finance
- ECON 1765 Finance, Regulation, and the Economy: Research

- One additional 1000-level economics course

**Total Credits: 13**

1. No course may be used to simultaneously satisfy (a) and (b).
2. APMA 0330 and APMA 0340 may be substituted with advisor approval.
3. Or ECON 1110 with permission.
4. No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.

**Departments, Centers, Programs and Institutes**

**Computer Science**

- Introductory Calculus, Part II
- Linear Algebra
- Methods of Applied Mathematics I, II
- Methods of Applied Mathematics I, II
- Introduction to Scientific Computing (preferred)
- Introduction to Scientific Computing and Problem Solving (preferred)
- Introduction to Object-Oriented Programming and Computer Science
- Computer Science: An Integrated Introduction
- Analysis: Functions of One Variable
- Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- Market Design: Theory and Applications
- Econometrics and Psychology
- Economic Development
- Health Economics
- Labor Economics
- Economics of Education: Research
- Game Theory and Applications to Economics
- Market Design: Theory and Applications
- Econometrics I
- Intermediate Macroeconomics
### Standard program for the A.B. degree (Mathematical Finance track) - class of 2016 and beyond

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course Requirements:**

#### Applied Mathematics Requirements

(a)  
- APMA 0350 Methods of Applied Mathematics I, II  
  and Methods of Applied Mathematics I, II  
- APMA 0160 Introduction to Scientific Computing (preferred)
- CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170 Computer Science: An Integrated Introduction
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1650 Statistical Inference I

Select one of the following:

- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV
- APMA 1660 Statistical Inference II
- APMA 1670 Statistical Analysis of Time Series
- APMA 1680 Nonparametric Statistics
- APMA 1690 Computational Probability and Statistics
- APMA 1700 The Mathematics of Insurance
- APMA 1720 Monte Carlo Simulation with Applications to Finance (preferred)
- APMA 1740 Recent Applications of Probability and Statistics
- MATH 1010 Analysis: Functions of One Variable

**Economics Requirements:**

- ECON 1130 Intermediate Microeconomics (Mathematical)
- ECON 1210 Intermediate Macroeconomics
- ECON 1630 Econometrics I

Select two 1000-level courses from the "financial economics" group:

- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select one 1000-level course from the "mathematical economics" group:

- ECON 1170 Welfare Economics and Social Choice Theory
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II

**Select one 1000-level course from the "data methods" group:**

- APMA 1650
- APMA 1200

**Total Credits:** 13

---

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.

2 No course may be used to simultaneously satisfy the "financial economics," the "mathematical economics," or the "data methods" requirements.

3 Or ECON 1110 with permission.

---

### Standard program for the Sc.B. degree (Mathematical Finance track) - class of 2016 and beyond:

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course Requirements:**

#### Applied Mathematics requirements:

(a)  
- APMA 0350 Methods of Applied Mathematics I, II  
  and Methods of Applied Mathematics I, II

### Honors and Capstone Requirement

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain the approval of a faculty sponsor.

### Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

- Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

### Applied Mathematics Graduate Program

The department of Applied Mathematics offers graduate programs leading to the Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/applied-mathematics

### Courses

**APMA 0070. Introduction to Applied Complex Variables.**

Applications of complex analysis that do not require calculus as a prerequisite. Topics include algebra of complex numbers, plane geometry by means of complex coordinates, complex exponentials, and logarithms and their relation to trigonometry, polynomials, and roots of polynomials, conformal mappings, rational functions and their applications, finite Fourier series and the FFT, iterations and fractals. Uses MATLAB, which has easy and comprehensive complex variable capabilities.

**APMA 0090. Introduction to Mathematical Modeling.**

We will explore issues of mathematical modeling and analysis. Five to six self-contained topics will be discussed and developed. The course will include seminars in which modeling issues are discussed, lectures to provide mathematical background, and computational experiments. Required mathematical background is knowledge of one-variable calculus, and no prior computing experience will be assumed. FYS

**APMA 0100. Elementary Probability for Applications.**

This course serves as an introduction to probability and stochastic processes with applications to practical problems. It will cover basic
probability and stochastic processes such as basic concepts of probability and conditional probability, simple random walk, Markov chains, continuous distributions, Brownian motion and option pricing. Enrollment limited to 20 first year students. FYS

APMA 0120. Mathematics of Finance.
The current volatility in international financial markets makes it imperative for us to become competent in financial calculations early in our liberal arts and scientific career paths. This course is designed to prepare the student with those elements of mathematics of finance appropriate for the calculations necessary in financial transactions.

For student in any discipline that may involve numerical computations. Includes instruction for programming in MATLAB. Applications discussed include solution of linear equations (with vectors and matrices) and nonlinear equations (by bisection, iteration, and Newton's method), interpolation, and curve-fitting, difference equations, iterated maps, numerical differentiation and integration, and differential equations. Prerequisite: MATH 0100 or its equivalent.

Mathematics is the foundation of our technological society and most of its powerful ideas are quite accessible. This course will explain some of these using historical texts and Excel. Topics include the predictive power of "differential equations" from the planets to epidemics, oscillations and music, chaotic systems, randomness and the atomic bomb. Prerequisite: some knowledge of calculus. LILE

APMA 0200. Introduction to Modelling.
This course provides an introduction to the mathematical modeling of selected biological, chemical, engineering, and physical processes. The goal is to illustrate the typical way in which applied mathematicians approach practical applications, from understanding the underlying problem, creating a model, analyzing the model using mathematical techniques, and interpreting the findings in terms of the original problem. Single-variable calculus is the only requirement; all other techniques from differential equations, linear algebra, and numerical methods, to probability and statistics will be introduced in class. Prerequisites: Math 0100 or equivalent.

APMA 0330. Methods of Applied Mathematics I, II.
This course will cover mathematical techniques involving ordinary differential equations used in the analysis of physical, biological, and economic phenomena. The course emphasizes established methods and their applications rather than rigorous foundations. Topics include: first and second order differential equations, an introduction to numerical methods, series solutions, and Laplace transforms.

APMA 0340. Methods of Applied Mathematics I, II.
Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0350. Methods of Applied Mathematics I, II.
Covers the same material as APMA 0330, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics, mathematics, physics, engineering, etc. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

APMA 0360. Methods of Applied Mathematics I, II.
Covers the same material as APMA 0340, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics, mathematics, physics, engineering, etc. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

Basic mathematical methods commonly used in the neural and cognitive sciences. Topics include: introduction to probability and statistics, emphasizing hypothesis testing and modern nonparametric methods; introduction to differential equations and systems of differential equations, emphasizing qualitative behavior and simple phase-plane analysis. Examples from neuroscience, cognitive science, and other sciences. Prerequisite: MATH 0100 or equivalent.

APMA 0450. Essential Statistics.
A first course in probability and statistics emphasizing statistical reasoning and basic concepts. Topics include visual and numerical summaries of data, representative and non-representative samples, elementary discrete probability theory, the normal distribution, sampling variability, elementary statistical inference, measures of association. Examples and applications from the popular press and the life, social and physical sciences. No prerequisites.

APMA 1070. Quantitative Models of Biological Systems.
Quantitative dynamic models help understand problems in biology and there has been rapid progress in recent years. The course provides an introduction to the concepts and techniques, with applications to population dynamics, infectious diseases, enzyme kinetics, aspects of cellular biology. Additional topics covered will vary. Mathematical techniques will be discussed as they arise in the context of biological problems. Prerequisites: APMA 0330, 0340 or 0350, 0360, or written permission.

APMA 1080. Inference in Genomics and Molecular Biology.
Sequencing of genomes has generated a massive quantity of fundamental biological data. We focus on drawing traditional and Bayesian statistical inferences from these data, including: alignment of biopolymer sequences; prediction of their structures, regulatory signals; significances in database searches; and functional genomics. Emphasis is on inferences in the discrete high dimensional spaces. Statistical topics: Bayesian inference, estimation, hypothesis testing and false discovery rates, statistical decision theory. Prerequisite: APMA 1650 or MATH 1610; BIOL 0200 recommended; Matlab or programming experience. Enrollment limited to 20.

APMA 1170. Introduction to Computational Linear Algebra.
Focuses on fundamental algorithms in computational linear algebra with relevance to all science concentrators. Basic linear algebra and matrix decompositions (Cholesky, LU, QR, etc.), round-off errors and numerical analysis of errors and convergence. Iterative methods and conjugate gradient techniques. Computation of eigenvalues and eigenvectors, and an introduction to least squares methods.

APMA 1180. Introduction to Numerical Solution of Differential Equations.

Basic probabilistic problems and methods in operations research and management science. Methods of problem formulation and solution. Markov chains, birth-death processes, stochastic service and queueing systems, the theory of sequential decisions under uncertainty, dynamic programming. Applications. Prerequisite: APMA 1650 or MATH 1610, or equivalent. LILE

An introduction to the basic mathematical ideas and computational methods of optimizing allocation of effort or resources, with or without constraints. Linear programming, network models, dynamic programming, and integer programming.

APMA 1260. Introduction to the Mechanics of Solids and Fluids. An introduction to the dynamics of fluid flow and deforming elastic solids for students in the physical or mathematical sciences. Topics in fluid mechanics include statics, simple viscous flows, inviscid flows, potential flow, linear water waves, and acoustics. Topics in solid mechanics include elastic/plastic deformation, strain and stress, simple elastostatics, and elastic waves with reference to seismology. Offered in alternate years.

APMA 1360. Topics in Chaotic Dynamics. Overview and introduction to dynamical systems. Local and global theory of maps. Attractors and limit sets. Lyapunov exponents and dimensions. Fractals: definition and examples. Lorenz attractor, Hamiltonian systems, homoclinic orbits and Smale horseshoe orbits. Chaos in finite dimensions and in PDEs. Can be used to fulfill the senior seminar requirement in applied mathematics. Prerequisites: differential equations and linear algebra.

APMA 1650. Statistical Inference I. APMA 1650 begins an integrated first course in mathematical statistics. The first half of APMA 1650 covers probability and the last half is statistics, integrated with its probabilistic foundation. Specific topics include probability spaces, discrete and continuous random variables, methods for parameter estimation, confidence intervals, and hypothesis testing. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350.

APMA 1660. Statistical Inference II. APMA 1660 is designed as a sequel to APMA 1650 to form one of the alternative tracks for an integrated year’s course in mathematical statistics. The main topic is linear models in statistics. Specific topics include likelihood-ratio tests, nonparametric tests, introduction to statistical computing, matrix approach to simple-linear and multiple regression, analysis of variance, and design of experiments. Prerequisite: APMA 1650 or equivalent, basic linear algebra.

APMA 1670. Statistical Analysis of Time Series. Time series analysis is an important branch of mathematical statistics with many applications to signal processing, econometrics, geology, etc. The course emphasizes methods for analysis in the frequency domain, in particular, estimation of the spectrum of time-series, but time domain methods are also covered. Prerequisites: elementary probability and statistics on the level of APMA 1650-1660.

APMA 1680. Nonparametric Statistics. A systematic treatment of distribution-free alternatives to classical statistical tests. These nonparametric tests make minimum assumptions about distributions governing the generation of observations, yet are of nearly equal power to the classical alternatives. Prerequisite: APMA 1650 or equivalent. Offered in alternate years.

APMA 1690. Computational Probability and Statistics. Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, dimensionality reduction. Suggested prerequisite: calculus-based probability. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or equivalent placement.

APMA 1700. The Mathematics of Insurance. The course consists of two parts: the first treats life contingencies, i.e. the construction of models for individual life insurance contracts. The second treats the Collective Theory of Risk, which constructs mathematical models for the insurance company and its portfolio of policies as a whole. Suitable also for students proceeding to the Institute of Actuaries examinations. Prerequisites: Probability Theory to the level of APMA 1650 or MATH 1610.

APMA 1710. Information Theory. Information theory is the study of the fundamental limits of information transmission and storage. This course, intended primarily for advanced undergraduates and beginning graduate students, offers a broad introduction to information theory and its applications: Entropy and information, lossless data compression, communication in the presence of noise, channel capacity, channel coding, source-channel separation, lossy data compression. Prerequisite: one course in probability.

APMA 1720. Monte Carlo Simulation with Applications to Finance. The course will cover the basics of Monte Carlo and its applications to financial engineering: generating random variables and simulating stochastic processes; analysis of simulated data; variance reduction techniques; binomial trees and option pricing; Black-Scholes formula; portfolio optimization; interest rate models. The course will use MATLAB as the standard simulation tool. Prerequisites: APMA 1650 or MATH 1610.

APMA 1740. Recent Applications of Probability and Statistics. This course covers a selection of modern applications of probability and statistics in the computational, cognitive, engineering, and neural sciences. The emphasis will be on application. Topics: Markov chains and their applications to MCMC computing and hidden Markov models; Dependency graphs and Bayesian networks; parameter estimation and the EM algorithm; Nonparametric statistics ("learning theory"), including consistency, bias/variance tradeoff, and regularization; Gibbs distributions, maximum entropy, and their connections to large deviations. Each topic will be introduced with several lectures on the mathematical underpinnings, and concluded with a computer project, by student individually, demonstrating the mathematics and the utility of the approach.

APMA 1880. Advanced Matrix Theory. Canonical forms of orthogonal, Hermitian and normal matrices; Rayleigh quotients. Norms, eigenvalues, matrix equations, generalized inverses. Banded, sparse, non-negative and circulant matrices. Prerequisite: APMA 0340 or 0360, or MATH 0520 or 0540, or permission of the instructor.

APMA 1930A. Actuarial Mathematics. A seminar considering selected topics from two fields: (1) life contingencies-the study of the valuation of life insurance contracts; and (2) collective risk theory, which is concerned with the random process that generates claims for a portfolio of policies. Topics are chosen from Actuarial Mathematics, 2nd ed., by Bowers, Gerber, Hickman, Jones, and Nesbitt. Prerequisite: knowledge of probability theory to the level of APMA 1650 or MATH 1610. Particularly appropriate for students planning to take the examinations of the Society of Actuaries.

APMA 1930B. Computational Probability and Statistics. Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from: random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, probabilistic grammars.

APMA 1930C. Information Theory. Information theory is the mathematical study of the fundamental limits of information transmission (or coding) and storage (or compression). This course offers a broad introduction to information theory and its real-world applications. A subset of the following is covered: entropy and information; the asymptotic equipartition property; theoretical limits of lossless data compression and practical algorithms; communication in the presence of noise-channel coding, channel capacity; source-channel separation; Gaussian channels; Lossy data compression.

APMA 1930D. Mixing and Transport in Dynamical Systems. Mixing and transport are important in several areas of applied science, including fluid mechanics, atmospheric science, chemistry, and particle dynamics. In many cases, mixing seems highly complicated and unpredictable. We use the modern theory of dynamical systems to understand and predict mixing and transport from the differential equations describing the physical process in question. Prerequisites: APMA 0330, 0340, or APMA 0350, 0360.
APMA 1930E. Ocean Dynamics
Works through the popular book by Henry Stommel entitled A View of the Sea. Introduces the appropriate mathematics to match the physical concepts introduced in the book.

APMA 1930G. The Mathematics of Sports
Topics to be discussed will range from the determination of who won the match, through biomechanics, free-fall of flexible bodies and aerodynamics, to the flight of ski jumpers and similar unnatural phenomena. Prerequisite: APMA 0340 or equivalent, or permission of the instructor.

APMA 1930H. Scaling and Self-Similarity
The themes of scaling and self-similarity provide the simplest, and yet the most fruitful description of complicated forms in nature such as the branching of trees, the structure of human lungs, rugged natural landscapes, and turbulent fluid flows. This seminar is an investigation of some of these phenomena in a self-contained setting requiring little more mathematical background than high school algebra. Topics to be covered: Dimensional analysis; empirical laws in biology, geosciences, and physics and the interplay between scaling and function; an introduction to fractals; social networks and the "small world" phenomenon.

APMA 1930I. Random Matrix Theory
In the past few years, random matrices have become extremely important in a variety of fields such as computer science, physics and statistics. They are also of basic importance in various areas of mathematics. This class will serve as an introduction to this area. The focus is on the basic matrix ensembles and their limiting distributions, but several applications will be considered. Prerequisites: MATH 0200 or 0350; and MATH 0520 or 0540; and APMA 0350, 0360, 1650, and 1660. APMA 1170 and MATH 1610 are recommended, but not required.

APMA 1930J. Mathematics of Random Networks
An intro to the emerging field of random networks and a glimpse of some of the latest developments. Random networks arise in a variety of applications including statistics, communications, physics, biology and social networks. They are studied using methods from a variety of disciplines ranging from probability, graph theory and statistical physics to nonlinear dynamical systems. Describes elements of these theories and shows how they can be used to gain practical insight into various aspects of these networks including their structure, design, distributed control and self-organizing properties. Prerequisites: Advanced calculus, basic knowledge of probability. Enrollment limited to 40.

APMA 1930M. Applied Asymptotic Analysis
Many problems in applied mathematics and physics are nonlinear and are intractable to solve using elementary methods. In this course we will systematically develop techniques for obtaining quantitative information from nonlinear systems by exploiting small scale parameters. Topics will include: regular and singular perturbations, boundary layer theory, multiscale and averaging methods and asymptotic expansions of integrals. Along the way, we will discuss many applications including nonlinear waves, coupled oscillators, nonlinear optics, fluid dynamics and pattern formation.

APMA 1940A. Coding and Information Theory
In a host of applications, from satellite communication to compact disc technology, the storage, retrieval, and transmission of digital data relies upon the theory of coding and information for efficient and error-free performance. This course is about choosing representations that minimize the amount of data (compression) and the probability of an error in data handling (error-correcting codes). Prerequisite: A knowledge of basic probability theory at the level of APMA 1650 or MATH 1610.

APMA 1940B. Information and Coding Theory
Originally developed by C.E. Shannon in the 1940s for describing bounds on information rates across telecommunication channels, information and coding theory is now employed in a large number of disciplines for modeling and analysis of problems that are statistical in nature. This course provides a general introduction to the field. Main topics include entropy, error correcting codes, source coding, data compression. Of special interest will be the connection to problems in pattern recognition. Includes a number of projects relevant to neuroscience, cognitive and linguistic sciences, and computer vision. Prerequisites: High school algebra, calculus. MATLAB or other computer experience helpful. Prior exposure to probability theory/statistics helpful.

APMA 1940C. Introduction to Mathematics of Fluids
Equations that arise from the description of fluid motion are born in physics, yet are interesting from a more mathematical point of view as well. Selected topics from fluid dynamics introducing various problems and techniques in the analysis of partial differential equations. Possible topics include stability, existence and uniqueness of solutions, variational problems, and active scalar equations. No prior knowledge of fluid dynamics is necessary.

APMA 1940D. Iterative Methods
Large, sparse systems of equations arise in many areas of mathematical application and in this course we explore the popular numerical solution techniques being used to efficiently solve these problems. Throughout the course we will study preconditioning strategies, Krylov subspace acceleration methods, and other projection methods. In particular, we will develop a working knowledge of the Conjugate Gradient and Minimum Residual (and Generalized Minimum Residual) algorithms. Multigrid and Domain Decomposition Methods will also be studied as well as parallel implementation, if time permits.

APMA 1940E. Mathematical Biology
This course is designed for undergraduate students in mathematics who have an interest in the life sciences. No biological experience is necessary, as we begin by a review of the relevant topics. We then examine a number of case studies where mathematical tools have been successfully applied to biological systems. Mathematical subjects include differential equations, topology and geometry.

APMA 1940F. Mathematics of Physical Plasmas
Plasmas can be big, as in the solar wind, or small, as in fluorescent bulbs. Both kinds are described by the same mathematics. Similar mathematics describes semiconducting materials, the movement of galaxies, and the re-entry of satellites. We consider how all of these physical systems are described by certain partial differential equations. Then we invoke the power of mathematics. The course is primarily mathematical. Prerequisites: APMA 0340 or 0360, MATH 0180 or 0200 or 0350, and PHYS 0060 or PHYS 0080 or ENGN 0510.

APMA 1940G. Multigrid Methods
Multigrid methods are a very active area of research in Applied Mathematics. An introduction to these techniques will expose the student to cutting-edge mathematics and perhaps pique further interest in the field of scientific computation.

APMA 1940H. Numerical Linear Algebra
This course will deal with advanced concepts in numerical linear algebra. Among the topics covered: Singular Value Decompositions (SVD) QR factorization, Conditioning and Stability and Iterative Methods.

APMA 1940I. The Mathematics of Finance
The mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis placed on the evaluation of risk and its role in decision-making under uncertainty. Prerequisite: basic probability.

APMA 1940J. The Mathematics of Speculation
The course will deal with the mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis will be placed on the evaluation of risk and its role in decision making under uncertainty. Prerequisite: basic probability.

APMA 1940K. Fluid Dynamics and Physical Oceanography
Introduction to fluid dynamics as applied to the mathematical modeling and simulation of ocean dynamics and near-shore processes. Oceanography topics include: overview of atmospheric and thermal forcing of the oceans, ocean circulation, effects of topography and Earth’s rotation, wind-driven currents in upper ocean, coastal upwelling, the Gulf Stream, tidal flows, wave propagation, tsunamis.

APMA 1940L. Mathematical Models in Biophysics
Introduction to reaction models for biomolecules, activation and formation of macro-molecules, stochastic simulation methods such as Langevin
models and Brownian dynamics. Applications to blood flow, platelet aggregation, and interactions of cells with blood vessel walls.

**APMA 1940M. The History of Mathematics.**
The course will not be a systematic survey but will focus on specific topics in the history of mathematics such as Archimedes and integration, Oresme and graphing, Newton and infinitesimals, simple harmonic motion, the discovery of 'Fourier' series, the Monte Carlo method, reading and analyzing the original texts. A basic knowledge of calculus will be assumed.

**APMA 1940N. Introduction to Mathematical Models in Computational Biology.**
This course is designed to introduce students to the use of mathematical models in biology as well as some more recent topics in computational biology. Mathematical techniques will involve difference equations and dynamical systems theory, ordinary differential equations and some partial differential equations. These techniques will be applied in the study of many biological applications such as: (i) Difference Equations: population dynamics, red blood cell production, population genetics; (ii) Ordinary Differential Equations: predator/prey models, Lotka/Volterra model, modeling the evolution of the genome, heart beat model/cycle, transmission dynamics of HIV and gonorrhea; (iii) Partial Differential Equations: tumor growth, modeling evolution of the genome, pattern formation. Prerequisites: APMA 0330 and 0340.

**APMA 1940O. Approaches to Problem Solving in Applied Mathematics.**
The aim of the course is to illustrate through the examination of unsolved (but elementary) problems the ways in which professional applied mathematicians approach the solution of such questions. Ideas considered include: choosing the "simplest" nontrivial example; generalization; and specification. Ways to think outside convention. Some knowledge of probability and linear algebra helpful. Suggested reading: "How to solve it", G. Polya "Nonplussed", Julian Havil

**APMA 1940P. Biodynamics of Block Flow and Cell Locomotion.**
Filtering (estimation of a "state process" from noisy data) is an important area of modern statistics. It is of central importance in navigation, signal and image processing, control theory and other areas of engineering and science. Filtering is one of the exemplary areas where the application of modern mathematics and statistics leads to substantial advances in engineering. This course will provide a student with the working knowledge sufficient for cutting edge research in the field of nonlinear filtering and its practical applications. Topics will include: hidden Markov models, Kalman and Wiener filters, optimal nonlinear filtering, elements of Ito calculus and Wiener chaos, Zakai and Kushner equations, spectral separating filters and wavelet-based filters, numerical implementation of filters. We will consider numerous applications of filtering to speech recognition, analysis of financial data, target tracking and image processing. No prior knowledge in the field is required but a good understanding of the basic Probability Theory (APMA1200 or APMA2630) is important.

**APMA 1940R. Linear and Nonlinear Waves.**
From sound and light waves to water waves and traffic jams, wave phenomena are everywhere around us. In this seminar, we will discuss linear and nonlinear waves as well as the propagation of wave packets. Among the tools we shall use and learn about are numerical simulations in Matlab and analytical techniques from ordinary and partial differential equations. We will also explore applications in nonlinear optics and to traffic flow problems. Prerequisites: MATH 0180 and either APMA 0330-0340 or APMA 0350-0360. No background in partial differential equations is required.

**APMA 1970. Independent Study.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**APMA 2050. Mathematical Methods of Applied Science.**
Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

**APMA 2060. Mathematical Methods of Applied Science.**
Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

**APMA 2110. Real Analysis.**
Provides the basis of real analysis which is fundamental to many of the other courses in the program: metric spaces, measure theory, and the theory of integration and differentiation.

**APMA 2120. Hilbert Spaces and Their Applications.**
A continuation of APMA 2110: metric spaces, Banach spaces, Hilbert spaces, the spectrum of bounded operators on Banach and Hilbert spaces, compact operators, applications to integral and differential equations.

**APMA 2130. Methods of Applied Mathematics: Partial Differential Equations.**

**APMA 2140. Methods of Applied Mathematics: Integral Equations.**

**APMA 2160. Methods of Applied Mathematics: Asymptotics.**
Calculus of asymptotic expansions, evaluation of integrals. Solution of linear ordinary differential equations in the complex plane, WKBJ method, special functions.

**APMA 2170. Functional Analysis and Applications.**
Topics vary according to interest of instructor and class.

**APMA 2190. Nonlinear Dynamical Systems: Theory and Applications.**

**APMA 2200. Nonlinear Dynamical Systems: Theory and Applications.**

**APMA 2210. Topics in Nonlinear Dynamical Systems.**
Topics to be covered in this course may vary depending on the audiences. One of the goals that is planned for this course is to discuss the boundary layers and/or the boundary value problems that appear and play a very important role in the kinetic theory of gases; in particular, in the theory of the Boltzmann equations. Students are encouraged to attend and participate in the kinetic theory program offered by the ICERM institute in the Fall 2011 semester. This course may be taken twice for credit.

**APMA 2230. Partial Differential Equations.**
The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential
geometrical and applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

**APMA 2240. Partial Differential Equations.**

The theory of the classical partial differential equations, as well as the methods of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

**APMA 2260. Introduction to Stochastic Control Theory.**

The course serves as an introduction to the theory of stochastic control and dynamic programming technique. Optimal stopping, total expected (discounted) cost problems, and long-run average cost problems will be discussed in discrete time setting. The last part of the course deals with continuous time deterministic control and game problems. The course requires some familiarity with the probability theory.

**APMA 2410. Fluid Dynamics I.**

Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

**APMA 2420. Fluid Dynamics II (ENGN 2820).**

Interested students must register for ENGN 2820.

**APMA 2450. Exchange Scholar Program.**

**APMA 2470. Topics in Fluid Dynamics.**

Initial review of topics selected from flow stability, turbulence, turbulent mixing, surface tension effects, and thermal convection. Followed by focussed attention on the dynamics of dispersed two-phase flow and complex fluids.

**APMA 2480. Topics in Fluid Dynamics.**

No description available.

**APMA 2550. Numerical Solution of Partial Differential Equations I.**

Finite difference methods for solving time-dependent initial value problems of partial differential equations. Fundamental concepts of consistency, accuracy, stability and convergence of finite difference methods will be covered. Associated well-posedness theory for linear time-dependent PDEs will also be covered. Some knowledge of computer programming expected.

**APMA 2560. Numerical Solution of Partial Differential Equations II.**

An introduction to weighted residual methods, specifically spectral, finite element and spectral element methods. Topics include a review of variational calculus, the Rayleigh-Ritz method, approximation properties of spectral end finite element methods, and solution techniques. Homework will include both theoretical and computational problems.

**APMA 2570A. Numerical Solution of Partial Differential Equations III.**

We will cover spectral methods for partial differential equations. Algorithm formulation, analysis, and efficient implementation issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

**APMA 2580A. Computational Fluid Dynamics.**

An introduction to computational fluid dynamics with emphasis on compressible flows. We will cover finite difference, finite volume and finite element methods for compressible Euler and Navier-Stokes equations and for general hyperbolic conservation laws. Background material in hyperbolic partial differential equations will also be covered. Algorithm development, analysis, implementation and application issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

**APMA 2610. Recent Applications of Probability and Statistics.**

This is a topics course, covering a selection of modern applications of probability and statistics in the computational, cognitive, engineering, and neural sciences. The course will be rigorous, but the emphasis will be on application. Topics will likely include: Markov chains and their applications to MCMC computing and hidden Markov models; Dependency graphs and Bayesian networks; parameter estimation and the EM algorithm; Nonparametric statistics (“learning theory”), including consistency, bias/ variance tradeoff, and regularization; Gibbs distributions, maximum entropy, and their connections to large deviations. Each topic will be introduced with several lectures on the mathematical underpinnings, and concluded with a computer project, carried out by each student individually, demonstrating the mathematics and the utility of the approach.

**APMA 2630. Theory of Probability.**

A one-semester course that provides an introduction to probability theory based on measure theory. The course covers the following topics: probability spaces, random variables and measurable functions, independence and infinite product spaces, expectation and conditional expectation, weak convergence of measures, laws of large numbers and the Central Limit Theorem, discrete time martingale theory and applications.

**APMA 2640. Theory of Probability.**

A one-semester course in probability that provides an introduction to stochastic processes. The course covers the following subjects: Markov chains, Poisson process, birth and death processes, continuous-time martingales, optional sampling theorem, martingale convergence theorem, Brownian motion, introduction to stochastic calculus and Itô’s formula, stochastic differential equations, the Feynman-Kac formula, Girsanov’s theorem, the Black-Scholes formula, basics of Gaussian and stationary processes. Prerequisite: APMA 2630 or equivalent course.

**APMA 2660. Stochastic Processes.**

Review of the theory of stochastic differential equations and reflected SDEs, and of the ergodic and stability theory of these processes. Introduction to the theory of weak convergence of probability measures and processes. Concentrates on applications to the probabilistic modeling, control, and approximation of modern communications and queuing networks; emphasizes the basic methods, which are fundamental tools throughout applications of probability.

**APMA 2670. Mathematical Statistics I.**

This course presents advanced statistical inference methods. Topics include: foundations of statistical inference and comparison of classical, Bayesian, and minimax approaches, point and set estimation, hypothesis testing, linear regression, linear classification and principal component analysis, MRF, consistency and asymptotic normality of Maximum Likelihood and estimators, statistical inference from noisy or degraded data, and computational methods (E-M Algorithm, Markov Chain Monte Carlo, Bootstrap). Prerequisite: APMA 2630 or equivalent.

**APMA 2680. Mathematical Statistics II.**

This course covers modern nonparametric statistical methods. Topics include: density estimation, multiple regression, adaptive smoothing, cross-validation, bootstrap, classification and regression trees, nonlinear discriminant analysis, projection pursuit, the ACE algorithm for time series prediction, support vector machines, and neural networks. The course will provide the mathematical underpinnings, but it will also touch upon some applications in computer vision/speech recognition, and biological, neural, and cognitive sciences. Prerequisite: APMA 2670.

**APMA 2720. Information Theory.**

**APMA 2810A. Computational Biology.**

Provides an up-to-date presentation of the main problems and algorithms in bioinformatics. Emphasis is given to statistical/probabilistic methods for various molecular biology tasks, including: comparison of genomes of different species, finding genes and motifs, understanding transcription control mechanisms, analyzing microarray data for gene clustering, and predicting RNA structure.
APMA 2810B. Computational Molecular Biology
Provides an up-to-date presentation of problems and algorithms in bioinformatics, beginning with an introduction to biochemistry and molecular genetics. Topics include: proteins and nucleic acids, the genetic code, the central dogma, the genome, gene expression, metabolic transformations, and experimental methods (gel electrophoresis, X-ray crystallography, NMR). Also, algorithms for DNA sequence alignment, database search tools (BLAST), and DNA sequencing.

No description available.

APMA 2810D. Elements of High Performance Scientific Computing II.
No description available.

APMA 2810E. Far Field Boundary Conditions for Hyperbolic Equations.
No description available.

APMA 2810F. Introduction to Non-linear Optics.
No description available.

APMA 2810G. Large Deviations.
No description available.

APMA 2810H. Math of Finance.
No description available.

APMA 2810I. Mathematical Models and Numerical Analysis in Computational Quantum Chemistry.
We shall present on some models in the quantum chemistry field (Thomas Fermi and related, Hartree Fock, Kohn Sham) the basic tools of functional analysis for the study of their solutions. Then some of the discretization methods and iterative algorithms to solve these problems will be presented and analyzed. Some of the open problems that flourish in this field will also be presented all along the lectures.

APMA 2810J. Mathematical Techniques for Neural Modeling.
No description available.

APMA 2810K. Methods of Algebraic Geometry in Control Theory I.
Develops the ideas of algebraic geometry in the context of control theory. The first semester examines scalar linear systems and affine algebraic geometry while the second semester addresses multivariable linear systems and projective algebraic geometry.

APMA 2810L. Numerical Solution of Hyperbolic PDE's.
No description available.

APMA 2810M. Some Topics in Kinetic Theory.
Nonlinear instabilities as well as boundary effects in a collisionless plasmas; Stable galaxy configurations; A nonlinear energy method in the Boltzmann theory will also be introduced. Self-contained solutions to specific concrete problems. Focus on ideas but not on technical aspects. Open problems and possible future research directions will then be discussed so that students can gain a broader perspective. Prerequisite: One semester of PDE (graduate level) is required.

APMA 2810N. Topics in Nonlinear PDEs.
Aspects of the theory on nonlinear evolution equations, which includes kinetic theory, nonlinear wave equations, variational problems, and dynamical stability.

APMA 2810O. Stochastic Differential Equations.
This course develops the theory and some applications of stochastic differential equations. Topics include: stochastic integral with respect to Brownian motion, existence and uniqueness for solutions of SDEs, Markov property of solutions, sample path properties, Girsanov’s Theorem, weak existence and uniqueness, and connections with partial differential equations. Possible additional topics include stochastic stability, reflected diffusions, numerical approximation, and stochastic control. Prerequisite: APMA 2630 and 2640.

APMA 2810P. Perturbation Methods.
Basic concepts of asymptotic approximations with examples with such as evaluation of integrals and functions. Regular and singular perturbation problems for differential equations arising in fluid mechanics, wave propagation or nonlinear oscillators. Methods include matched asymptotic expansions and multiple scales. Methods and results will be discussed in the context of applications to physical problems.

APMA 2810Q. Discontinuous Galerkin Methods.
In this seminar course we will cover the algorithm formulation, stability analysis and error estimates, and implementation and applications of discontinuous Galerkin finite element methods for solving hyperbolic conservation laws, convection diffusion equations, dispersive wave equations, and other linear and nonlinear partial differential equations. Prerequisite: APMA 2550.

APMA 2810R. Computational Biology Methods for Gene/Protein Networks and Structural Proteomics.
The course presents computational and statistical methods for gene and protein networks and structural proteomics; it emphasizes: (1) Probabilistic models for gene regulatory networks via microarray, chromatin immunoprecipitation, and cis-regulatory data; (2) Signal transduction pathways via tandem mass spectrometry data; (3) Molecular Modeling forligand-receptor coupling and docking. The course is recommended for graduate students.

APMA 2810S. Topics in Control.
No description available.

This course introduces techniques useful for solving many nonlinear partial differential equations, with emphasis on elliptic problems. PDE from a variety of applications will be discussed. Contact the instructor about prerequisites.

APMA 2810U. Topics in Differential Equations.
No description available.

APMA 2810V. Topics in Partial Differential Equations.
The course will cover an introduction of the L_p theory of second order elliptic and parabolic equations, finite difference approximations of elliptic and parabolic equations, and some recent developments in the Navier-Stokes equations and quasi-geostrophic equations. Some knowledge of real analysis will be expected.

This is an advanced seminar course. We will cover several topics in high order numerical methods for convection dominated problems, including methods for solving Boltzman type equations, methods for solving unsteady and steady Hamilton-Jacobi equations, and methods for solving moment models in semi-conductor device simulations. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

APMA 2810X. Introduction to the Theory of Large Deviations.
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, PDE, weak convergence, etc.), and basic examples (e.g., Sanov’s and Cramer’s Theorems). Then we will cover the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control and Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

APMA 2810Y. Discrete high-D Inferences in Genomics.
Genomics is revolutionizing biology and biomedicine and generated a mass of clearly relevant high-D data along with many important high-D discrete inference problems. Topics: special characteristics of discrete high-D inference including Bayesian posterior inference; point estimation; interval estimation; hypothesis tests; model selection; and statistical decision theory.

APMA 2810Z. An Introduction to the Theory of Large Deviations.
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.
APMA 2811A. Directed Methods in Control and System Theory
Various general techniques have been developed for control and system problems. Many of the methods are indirect. For example, control problems are reduced to a problem involving a differential equation (such as the partial differential equation of Dynamic Programming) or to a system of differential equations (such as the canonical system of the Maximum Principle). Since these indirect methods are not always effective, alternative approaches are necessary. In particular, direct methods are of interest.

We deal with two general classes, namely: 1.) Integration Methods; and, 2.) Representation Methods. Integration methods deal with the integration of function space differential equations. Perhaps the most familiar is the so-called Gradient Method or curve of steepest descent approach. Representation methods utilize approximation in function spaces and include both deterministic and stochastic finite element methods. Our concentration will be on the theoretical development and less on specific numerical procedures. The material on representation methods for Levy processes is new.

APMA 2811B. Computational Methods for Signaling Pathways and Protein Interactions.
The course will provide presentation of the biology and mathematical models/algorithms for a variety of topics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of phosphorylation sites and motifs and structural aspects of protein docking problems. Prerequisites: The course is recommended for graduate students. It will be self-contained; students will be able to fill in knowledge by reading material to be indicated by the instructor.

APMA 2811C. Stochastic Partial Differential Equations.
SPDEs is an interdisciplinary area at the crossroads of stochastic processes and partial differential equations (PDEs). The topics of the course include: geneses of SPDEs in real life applications, mathematical foundations and analysis of SPDEs, numerical and computational aspects of SPDEs, applications of SPDEs to fluid dynamics, population biology, hidden Markov models, etc. Prerequisites: familiarity with stochastic calculus and PDEs (graduate level).

APMA 2811D. Asymptotic Problems For Differential Equations And Stochastic Processes.
Topics that will be covered include: WKB method: zeroth and first orders; turning points; Perturbation theory: regular perturbation, singular perturbation and boundary layers; Homogenization methods for ODE’s; elliptic and parabolic PDE’s; Homogenization for SDE’s, diffusion processes in periodic and random media; Averaging principle for ODE’s and SDE’s. Applications will be discussed in class and in homework problems.

This course gives an introduction to the the basic concepts of a posteriori estimates of finite element methods. After an overview of different techniques the main focus will be on residual based estimates where as a starting point the Laplace operator is analyzed. Effectivity and reliability of the error estimator will be proven. In a second part of the course, students will either study research articles and present them or implement the error estimates for some specific problem and present their numerical results. Recommended prerequisites: basic knowledge in finite elements, APMA 2550, 2560, 2570.

The purpose of the course is to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods).

We shall also discuss efficient implementation strategies using Newton-type methods and hybrid techniques such as Rosenbruck methods. The discussion includes definitions of different notions of stability, stiffness and stability regions, local/global error estimation, and error control. Time permitting, we shall also discuss more specialized topics such as symplectic integration methods and parallel-in-time methods. A key component of the course shall be the discussion of problems and methods designed with the discretization of ODE systems originating from PDE’s in mind. Topics include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods. Part of the class will consist of student presentations on more advanced topics, summarizing properties and known results based on reading journal papers.

APMA 2811G. Topics in Averaging and Metastability with Applications.
Topics that will be covered include: the averaging principle for stochastic dynamical systems and in particular for Hamiltonian systems; metastability and stochastic resonance. We will also discuss applications in class and in homework problems. In particular we will consider metastability issues arising in chemistry and biology, e.g. in the dynamical behavior of proteins. The course will be largely self contained, but a course in graduate probability theory and/or stochastic calculus will definitely help.

APMA 2811H. Survival Analysis.
APMA 2811I. An Introduction to Turbulence Modeling.
Turbulence is the last mystery of classical physics. It surrounds us everywhere – in the air, in the ocean, in pipes carrying fluids and even in human body arteries. The course helps to understand what makes modeling the turbulence so difficult and challenging. The course covers the following issues: The nature of turbulence, characteristics of turbulence and classical constants of turbulence; Turbulent scales; Navier-Stokes equations, Reynolds stresses and Reynolds-Averaged Navier-Stokes (RANS) equations; RANS turbulence models: algebraic models, one-equation models, two-equation models; Low-Reynolds number turbulence models; Renormalization Group (RNG) turbulence model; Large-Eddy Simulation (LES); Students will be provided with user-friendly computer codes to run different benchmark cases. The final grade is based on two take home projects - computing or published papers analysis, optionally.

APMA 2811J. Computational/Statistical Methods for Signaling Pathways and Protein Interactions.
The course will cover the main mathematical/computational models/ algorithms for a variety of tasks in proteomics and structural proteomics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of phosphorylation sites and motifs, and (3) structural aspects of protein docking problems on the basis of NMR data. Open to graduate students only.

APMA 2811L. Topics in Homogenization: Theory and Computation.
Topics that will be covered include: Homogenization methods for ODE’s, for elliptic and parabolic PDE’s and for stochastic differential Equations (SDE’s) in both periodic and random media; Averaging principle for ODE’s and SDE’s. Both theoretical and computational aspects will be studied. Applications will be discussed in class and in homework problems. Prerequisites: Some background in PDE’s and probability will be helpful, even though the class will be largely self contained.

APMA 2811Q. Calculus of Variations.
An introduction to modern techniques in the calculus of variations. Topics covered will include: existence of solutions and the direct method, Euler-Lagrange equations and necessary and sufficient conditions, one-dimensional problems, multidimensional nonconvexity, Young’s measures, and singular perturbations. The emphasis of the course will be equal parts theory and applications with numerous examples drawn from topics in nonlinear elasticity, pattern formation, wrinkling thin elastic sheets, martensite phase transitions, minimal surfaces, differential geometry and optimal control.

Finite element methods for the numerical solution of partial differential equations give rise to large systems of equations. In this course, we explore iterative methods for solving these systems in conjunction with preconditioners obtained using techniques including domain decomposition and multigrid methods. The course will be of interest to those involved with the solution of such systems. You should have a knowledge of finite element methods, their basic theoretical properties, and have written your own piecewise linear finite element code. You will be
required to program the algorithms covered in the course and implement them in your own code.

**APMA 2820A. A Tutorial on Particle Methods.**
No description available.

**APMA 2820B. Advanced Topics in Information Theory.**
Explores classical and recent results in information theory. Topics chosen from: multi-terminal/network information theory; communication under channel uncertainty; side information problems (channel, source, and the duality between them); identification via channels; and multi-antenna fading channels. Prerequisite: APMA 1710 or basic knowledge of information theory.

**APMA 2820C. Computational Electromagnetics.**
No description available.

**APMA 2820D. Conventional, Real and Quantum Computing with Applications to Factoring and Root Finding.**
No description available.

**APMA 2820E. Geophysical Fluid Dynamics.**
No description available.

**APMA 2820F. Information Theory and Networks.**
No description available.

**APMA 2820G. Information Theory, Statistics and Probability.**
No description available.

**APMA 2820H. Kinetic Theory.**
We will focus on two main topics in mathematical study of the kinetic theory: (1) The new goal method to study the trend to Maxwellian; (2) various hydrodynamical (fluids) limits to Euler and Navier-Stokes equations. Main emphasis will be on the ideas behind proofs, but not on technical details.

**APMA 2820I. Multiscale Methods and Computer Vision.**
Course will address some basic multiscale computational methods such as: multigrid solvers for physical systems, including both geometric and algebraic multigrid, fast integral transforms of various kinds (including a fast Radon transform), and fast inverse integral transforms. Basic problems in computer vision such as global contour detection and their completion over gaps, image segmentation for textural images and perceptual grouping tasks in general will be explained in more details.

**APMA 2820J. Numerical Linear Algebra.**
Solving large systems of linear equations. The course will use the text of Trefethen and BAO that includes all the modern concepts of solving linear equations.

**APMA 2820K. Numerical Solution of Ordinary Differential Equations.**
We discuss the construction and general theory of multistep and multistage methods for numerically solving systems of ODE’s, including stiff and nonlinear problems. Different notions to stability and error estimation and control. As time permits we shall discuss more advanced topics such as order reduction, general linear and additive methods, symplectic methods, and methods for DAE. Prerequisites: APMA 2190 and APMA 2550 or equivalent. Some programming experience is expected.

**APMA 2820L. Random Processes in Mechanics.**
No description available.

**APMA 2820M. Singularities in Elliptic Problems and their Treatment by High-Order Finite Element Methods.**
Singular solutions for elliptic problems (elasticity and heat transfer) are discussed. These may arise around corners in 2-D and along edges and vertices in 3-D domains. Derivation of singular solutions, characterized by eigenpairs and generalized stress/flux intensity factors (GSIF/GFIFs) are a major engineering importance (because of failure initiation and propagation). High-order FE methods are introduced, and special algorithms for extracting eigenpairs and GSIF/GFIFs are studied (Steklov, dual-function, ERR method, and others).

**APMA 2820N. Topics in Scientific Computing.**
No description available.

**APMA 2820O. The Mathematics of Shape with Applications to Computer Vision.**
Methods of representing shape, the geometry of the space of shapes, warping and matching of shapes, and some applications to problems in computer vision and medical imaging. Prerequisite: See instructor for prerequisites.

**APMA 2820P. Foundations in Statistical Inference in Molecular Biology.**
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and functional genomics. Statistical topics: parameter estimation, hypothesis testing, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

**APMA 2820Q. Topics in Kinetic Theory.**
This course will introduce current mathematical study for Boltzmann equation and Vlasov equation. We will study large time behavior and hydrodynamic limits for Boltzmann theory and instabilities in the Vlasov theory. Graduate PDE course is required.

**APMA 2820R. Structure Theory of Control Systems.**
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

**APMA 2820S. Topics in Differential Equations.**
A sequel to APMA 2210 concentrating on similar material.

**APMA 2820T. Foundations in Statistical Inference in Molecular Biology.**
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and tiled arrays. Statistical topics: parameter estimation, hypothesis testing, recursions, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

**APMA 2820U. Structure Theory of Control Systems.**
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

**APMA 2820V. Progress in the Theory of Shock Waves.**
Course begins with self-contained introduction to theory of "hyperbolic conservation laws", that is quasilinear first order systems of partial differential equations whose solutions spontaneously develop singularities that propagate as shock waves. A number of recent developments will be discussed. Aim is to familiarize the students with current status of the theory as well as with the expanding areas of applications of the subject.

**APMA 2820W. An Introduction to the Theory of Large Deviations.**
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton–Jacobi–Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

**APMA 2820X. Boundary Conditions for Hyperbolic Systems: Numerical and Far Field.**

**APMA 2820Y. Approaches to Problem Solving in Applied Mathematics.**
TBA
APMA 2820Z. Topics in Discontinuous Galerkin Methods. We will cover discontinuous Galerkin methods for time-dependent and steady state problems. Stability and error estimates of different discontinuous Galerkin methods will be discussed. In particular, we will discuss in depth the local discontinuous Galerkin method. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

APMA 2821B. To Be Determined.

APMA 2821C. Topics in Partial Differential Equations. The course will start by reviewing the theory of elliptic and parabolic equations in Holder spaces. Then we will discuss several topics in nonlinear elliptic and parabolic equations, for instance, the Navier-Stokes equation and Monge-Ampere type equations. This course is a sequel to APMA 2810V, but APMA 2810V is not a prerequisite.

APMA 2821D. Random Processes and Random Variables.

APMA 2821E. Topics in Variational Methods. This course consists of two parts: a general introduction to variational methods in PDE, and a more focused foray into some special topics. For the former, we will discuss the direct method in the calculus of variations, various notions of convexity, Noether’s theorem, minimax methods, index theory, and gamma-convergence. For the latter we will focus on several specific problems of recent interest, with emphasis on the Ginzburg-Landau energy functional.

APMA 2821F. Computational Linear Algebra. The course will cover basic and advanced algorithms for solution of linear and nonlinear systems as well as eigenvalue problems.

APMA 2821G. High-Performance Discontinuous Galerkin Solvers. Addresses strategies and algorithms in devising efficient discontinuous Galerkin solvers for fluid flow equations such as Euler and Navier-Stokes. The course starts with an introduction to discontinuous Galerkin methods for elliptic and hyperbolic equations and then focuses on the following topics: 1) Serial and parallel implementations of various discontinuous Galerkin operators for curvilinear ele- ments in multiple space dimensions. 2) Explicit, semi-explicit and implicit time discretizations. 3) Multigrid (multi-level) solvers and preconditioners for systems arising from discontinuous Galerkin approximations of the partial differential equations.

APMA 2821H. Introduction to High Performance Computing: Tools and Algorithms. This course covers fundamental topics in High Performance Computing, with emphasis on Parallel Computing: basics in programming with C++; compilation and optimization; high performance scientific numerical libraries (LAPACK, BLAS, ScaLapack); MPI and OpenMP. The focus will be on load balancing, efficient design of communication and multilevel parallelism. We will use: 1) the new IBM computer of Brown University; 2) IBM BlueGene/P; 3) SGI UV 1000 co-NUMA shared-memory system; 4) CRAY XT5; 5) Sun Constellation Linux Cluster. We will have lectures and hands-on tutorials. Grades are based on 5-6 home assignments/mini-projects and a final project with presentation. Please visit the course website: http://www.dam.brown.edu/people/lgrinb/APMA2821/ HPC_CLASS.html

APMA 2821I. Formulation and Approximation of Linear and Nonlinear Problems of Solid Mechanics. Presents the formulation and approximation by the Finite Element Method (FEM) of linear and non-linear problems of Solid Mechanics. The formulation of problems is based on the Virtual Work Principle (VWP). Increasing complexity problems will be considered such as simple bar under traction, beams, plates, plane problems and solids with linear and hyperelastic materials. All problems are formulated using the same sequence of presentation which includes kinematics, strain measure, rigid body deformation, internal work, external work, VWP and constitutive equations. The approximation of the given problems is based on the High-order FEM. Examples will be presented using a Matlab code.

APMA 2821J. Some Topics in Kinetic Theory. In this advanced topic course, we will go over several aspects of recent mathematical work on kinetic theory. Graduate level PDE is required.

APMA 2821K. Probabilistic and Statistical Models for Graphs and Networks. Many modern data sets involve observations about a network of interacting components. Probabilistic and statistical models for graphs and networks play a central role in understanding these data sets. This is an area of active research across many disciplines. Students will read and discuss primary research papers and complete a final project.

APMA 2821L. Introduction to Malliavin Calculus. The Malliavin calculus is a stochastic calculus for random variables on Gaussian probability spaces, in particular the classical Wiener space. It was originally introduced in the 1970s by the French mathematician Paul Malliavin as a probabilistic approach to the regularity theory of second-order deterministic partial differential equations. Since its introduction, Malliavin’s calculus has been extended beyond its original scope and has found applications in many branches of stochastic analysis; e.g. filtering and optimal control, mathematical finance, numerical methods for stochastic differential equations. This course will introduce, starting in a simple setting, the basic concepts and operations of the Malliavin calculus, which will then be applied to the study of regularity of stochastic differential equations and their associated partial differential equations. In addition, applications from optimal control and finance, including the Clark-Ocone formula and its connection with hedging, will be presented.

APMA 2821M. Some Mathematical Problems in Materials Science. We will study a variety of mathematical models for problems in materials science. Mainly we will consider models of phase transformation, static and dynamic. Some of the topics to be treated are: (1) models of phase transformation; (2) gradient flows; (3) kinetic theories of domain growth; (4) stochastic models; (5) free boundary problems. A working familiarity with partial differential equations is required.

APMA 2821N. Numerical Solution of Ordinary Differential Equations: IVP Problems and PDE Related Issues. The course seeks to lay the foundation for the development and analysis of numerical methods for solving ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistep methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods). The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. We also discuss more specialized topics such as symplectic integration methods, parallel-in-time methods, include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods.

APMA 2821O. Topics in Posteriori Error Estimations: Finite Element and Reduced Basis Methods. The course will contain two related parts. An introduction of different types of a posteriori error estimations for various finite element methods, certified reduced basis method, where a posteriori error estimations play an important role. Emphasize both the theory and implementation. Related MBAM programs. Residual-type, local-problem type, and recovery-type error estimators for conforming, mixed, non-conforming, and discontinuous galerkin finite element methods for different types of equations. Reduced basis methods, offline-online procedure, greedy algorithm, error estimator, empirical interpolation method, and successive constraint method will be discussed. Goal-Oriented primal-dual approach for both FEM and RBM will be covered. Objective: To learn various theoretical and practical results of adaptive finite element methods and reduced basis methods.

APMA 2821P. Topics in the Atomistic-to-Continuum Coupling Methods for Material Science. Atomic-to-continuum coupling methods (a/c methods) have been proposed to increase the computational efficiency of atomistic computations involving the interaction between local crystal defects with long-range elastic fields. This course provides an introduction to the fundamentals required to understand modeling and computer simulation of material behavior. This course will first briefly review material from continuum mechanics, materials science including crystals and defects and then move on to advanced topics in development and analysis of a/c coupling methods both in static and dynamic cases. I will also select topics from statistical mechanics and temporal multiscale accelerated molecular dynamics methods (hyperdynamics, parallel replica dynamics).
APMA 2821R. Topics in the Atomistic-to-Continuum Coupling Methods for Material Science.
Atomistic-to-continuum coupling methods (a/c methods) have been proposed to increase the computational efficiency of atomistic computations involving the interaction between local crystal defects with long-range elastic fields.

This is an advanced topics course for graduate students. Provides an introduction to the fundamentals required to understand modeling and computer simulation of material behavior. First briefly review material from continuum mechanics, materials science including crystals and defects, and then move on to advanced topics in development and analysis of a/c coupling methods both in static and dynamic cases. select topics from statistical mechanics and temporal multiscale accelerated molecular dynamics methods (hyperdynamics, parallel replica dynamics).

APMA 2821T. Theory of Large Deviations.
The theory of large deviations is concerned with the probabilities of very rare events. There are many applications where a rare event can have a significant impact (think of the lottery) and it is of interest to know when and how these events occur. The course will begin with a review of the general framework, standard techniques, and elementary examples (e.g., Cramer’s and Sanov’s Theorems) before proceeding with general theory and applications. If time permits, the course will end with a study of large deviations for diffusion processes.

APMA 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

APMA 2980. Research in Applied Mathematics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

APMA 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Brown Institute for Brain Science
The Brown Institute for Brain Science (http://brown.edu/academics/brain-science) (BIBS) advances multidisciplinary research, technology development, and training in the brain sciences and works to establish Brown University as an internationally recognized leader in brain research. BIBS unites more than 100 faculty from a diverse group of departments at Brown, spanning basic and clinical departments, and physical and biological sciences. BIBS provides a mechanism to advance interdisciplinary research efforts among this broad group. BIBS provides essential support to obtain and administer multi-investigator grants for interdisciplinary research, infrastructure, and training. The Institute actively seeks new funding sources to support interdisciplinary education that transcends that available in individual academic departments.

As one of its core missions, the Institute is developing and supporting a series of interdisciplinary research centers that focus on established or emerging areas of excellence in brain research at Brown. Each center bridges the physical and life sciences, and encompasses both basic and translational research, including clinical application. The Center for Vision Research (http://cvr.brown.edu/aboutcvr.html) was created in 2007. Initiatives in Neurotechnology and in Synaptic and Neurodegenerative Disease are underway. BIBS has also established an MRI Research Facility and an Behavioral Analysis Core Facility.

The existence of Brain Science as an overall organizing entity for a series of research centers and core facilities demonstrates the university’s ongoing support for brain science research at Brown. This commitment will help to attract top faculty and students to Brown, enable higher quality research and establish Brown as a worldwide leader in brain science.

Brain Science Graduate Program
The graduate program in Brain Science is a unique interdisciplinary program formed to tackle one of the greatest mysteries of man. The program was designed to promote collaborative theoretical and experimental study of the brain from the molecular to the behavioral and cognitive level. It unites faculty who study the fundamental mechanisms of nervous-system function and those who seek to create devices with brain-like functions that can assist mankind. The faculty are also committed to translating fundamental knowledge for the diagnosis and treatment of the devastating effects of disease and trauma of the nervous system. Brown is a leader in related research and offers exceptional training and coursework for those interested in pursuing careers in brain science. The program sponsors a Master of Science (M.S.) degree as well as a Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/brain-science

Business, Entrepreneurship, Organizations (BEO)
The C.V. Starr Program in Business, Entrepreneurship, and Organizations is an interdisciplinary academic program that supports research, teaching and practice in the field of commerce. Its sponsoring departments of Economics and Sociology and the School of Engineering provide a unique scholarly foundation based upon economics, organizational studies, and entrepreneurship and technology management. Without a business school at Brown, the Business, Entrepreneurship and Organizations Program allows faculty and students a unique perspective on the critical issues facing businesses and organizations today.

An important component of BEO is a multidisciplinary, multi-track undergraduate concentration. This program:
• Provides students with a rigorous and synergistic program in the study of commercial activity grounded in Economics, Sociology and Engineering.
• Focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, globalization, and management and organizational theory.
• Connects vibrant practice-oriented co-curricular activities to the curriculum, including mentoring by entrepreneurs and other practitioners in the for-profit and not-for-profit sectors, domestic and international internships, the student-run Entrepreneurship Program, and its business plan competition.
• Is supported by interdisciplinary research that provides an academic grounding for the curriculum and keeps it innovative and fresh.
• Culminates senior year with a team-based capstone project focusing on solving a strategic, organizational, financial or marketing challenge with a sponsor company or organization.

For more information, please visit the BEO website (http://brown.edu/academics/business-entrepreneurship-organizations).

Business, Entrepreneurship and Organizations Concentration Requirements
Business, Entrepreneurship and Organizations (BEO), formerly Commerce, Organizations and Entrepreneurship (COE) is a multidisciplinary concentration that provides a rigorous and synergistic program in the study of commercial activity grounded in economics, sociology and engineering. BEO focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, and management and organizational theory. Concentrators seek to understand the basic principles, approaches and vocabulary relevant to the study of entrepreneurship from the disciplines of economics, organizational sociology and engineering. Building on this multidisciplinary base, students develop specialized expertise in one of the three disciplinary approaches, with special emphasis on critical reasoning and quantitative research methods. In senior year capstone projects, students apply and integrate
multi-disciplinary learning by working in groups on real world projects, including the creation of new ventures.

The three tracks of the concentration are as follows:
1. Business Economics
2. Organizational Studies
3. Entrepreneurship and Technology Management

Upon completion of all concentration requirements, students receive the Bachelor of Arts (A.B.) degree in Business, Entrepreneurship and Organizations.

The Curriculum

Business Economics Track

Foundation Requirements (foundation requirements must be completed before taking the capstone in fall of senior year)

- ECON 0110 Principles of Economics 1
- ECON 1110 Intermediate Microeconomics 1
- ECON 1311 Micro-Organizational Theory: Social Behavior in Organizations 1
- SOC 1315 Macro-Organizational Theory: Organizations in Social Context 1
- ENGN 0020 Transforming Society-Technology and Choices for the Future 1
- or ENGN 0030 Introduction to Engineering 1
- ENGN 1010 The Entrepreneurial Process: Innovation in Practice 1

Math and Statistics Requirements

- MATH 0090 Introductory Calculus, Part I 1
- ECON 1620 Introduction to Econometrics 1

Track Requirements

- ECON 0710 Financial Accounting 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1710 Investments I 1
- ECON 1720 Corporate Finance 1

One Data Methods-intensive course from the following list: 1

- ECON 1310/1330 Labor Economics
- ECON 1340 Health Economics
- ECON 1390 Research Methods for Economists
- ECON 1510 Economic Development
- ECON 1520 The Economic Analysis of Institutions
- ECON 1630 Econometrics I
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1765 Finance, Regulation, and the Economy: Research

One 1000-level economics course, including a second data methods intensive course from the list above 1

Capstone: one-semester required (must be taken fall of senior year) 1

- BEO 1930C BEO Capstone I: Business Economics Track

Total Credits 15

1 Or an optional two-semester capstone from the BEO 1930 and 1940 series

Organizational Studies Track

Foundation Requirements (foundation requirements must be completed before taking the capstone in fall of senior year)

- ECON 0110 Principles of Economics 1
- ECON 1110 Intermediate Microeconomics 1
- SOC 1311 Micro-Organizational Theory: Social Behavior in Organizations 1
- SOC 1315 Macro-Organizational Theory: Organizations in Social Context 1
- ENGN 0020 Transforming Society-Technology and Choices for the Future 1
- or ENGN 0030 Introduction to Engineering 1
- ENGN 1010 The Entrepreneurial Process: Innovation in Practice 1

Math and Statistics Requirements

- MATH 0090 Introductory Calculus, Part I 1
- SOC 1100 Introductory Statistics for Social Research 1
- or APMA 0650 Essential Statistics 1
- or ECON 1620 Introduction to Econometrics 1

Track Requirements

One Introduction to Research Methods course (selected from the following): 1

- SOC 1050 Methods of Research in Organizations
- SOC 1020 Methods of Social Research

One Advanced Research Methods course (selected from the following): 1

- SOC 1120 Market and Social Surveys
- SOC 1117 Focus Groups for Market and Social Research
- SOC 1118 Context Research for Innovation
- SOC 1260 Market Research in Public and Private Sectors
- SOC 1340 Principles and Methods of Geographic Information Systems
- SOC 1871W Geographical Analysis of Society
- SOC 2020 Sociological Research Methods
- ECON 1390 Research Methods for Economists
- ENGN 1630 Econometrics I
- ENGN 1210 Market and Social Surveys
- ENGN 1120 Focus Groups for Market and Social Research
- ENGN 1118 Context Research for Innovation
- ENGN 1260 Market Research in Public and Private Sectors
- ENGN 1340 Principles and Methods of Geographic Information Systems
- SOC 1871W Geographical Analysis of Society
- SOC 2020 Sociological Research Methods
- ECON 1390 Research Methods for Economists
- ENGN 1630 Econometrics I
- EDUC 1100 Introduction to Qualitative Research Methods
- EDUC 1160 Evaluating the Impact of Social Programs
- PHP 1320 Survey Research in Health Care
- PPAI 1200 Policy Analysis and Program Evaluation

One Advanced Organization Studies course (selected from the following): 1

- SOC 1060 Leadership in Organizations
- SOC 1080 Groups in Organizations
- SOC 1540 Human Needs and Social Services
- SOC 1870A Investing in Social Change
- SOC 1871M Theories of the Third Sector and Civil Society
- SOC 1871O Law, Innovation and Entrepreneurship
- SOC 2060 Complex Organizations and Health Policy
- SOC 2960M Sociology of Organizations Graduate Seminar
- CLPS 1730 Psychology in Business and Economics
- PPAI 1700V Nonprofit Organizations
- PPAI 1700Y Crisis Management
- PPAI 2550 Managing and Leading in Public Affairs

Two Organization-Relevant Electives (selected from the following): 2

- Any from the Advanced Research Methods or Advanced Organization-Studies lists; or
- SOC 1114 Law and Society
- SOC 1410 Aging and the Quality of Life
- SOC 1550 Sociology of Medicine
- SOC 1870L The Economic Foundations of Everyday Life
- SOC 1871C Sociology of the Legal Profession
- AMST 1610A American Advertising; History and Consequences
Courses

BEO 1930A. BEO Capstone I: Organizational Studies Track.
The first in a two-semester Capstone for BEO Organizational Studies Track seniors, open to all BEO seniors. Capstone builds upon concepts covered in BEO courses, specifically concepts from SOC 1311 and 1315. Students will synthesize knowledge at several levels: across disciplines, across theoretical understanding and practical application, and across private and public sector experiences of entrepreneurship and innovation. Students will be organized into client mentored teams for social entrepreneurship and social innovation projects. BEO 1930A (fall) required; 1940A (spring) strongly advised for all Organizational Studies track seniors. Application required to match students to projects. Project team meetings required outside scheduled lectures. WRIT

BEO 1930B. BEO Capstone I: Entrepreneurship and Technology Management Track.
The first in a two-semester Capstone required of BEO Tech track seniors. Student teams from Engineering, BEO and other technical and non-technical disciplines form simulated high tech start-up companies working on mentor-defined opportunities. Concepts reviewed in class include: product commercialization, intellectual property, marketing, product requirements documentation, team building, safety, environmental and legal requirements. BEO Tech track concentrators should complete ENGN 1010 prior to course. Enrollment is limited. Students must complete formal application (BEO Tech track seniors automatically approved). Project team meetings required outside scheduled lectures. Non-BEO concentrators require instructor permission. WRIT

BEO 1930C. BEO Capstone I: Business Economics Track.
Designed for BEO Business Economics Track seniors, this capstone is open to all BEO students, and builds upon BEO concepts in economics, finance, strategy and markets. Students form teams to solve existing business problems, simulating groups of consultants. Projects range from recommending appropriate finance for new investments to project evaluation and pricing of new services. Student teams have client-mentors. Students apply analytical frameworks of BEO disciplines to hone writing, presentational, leadership and organizational skills. Application required to match students to projects. Project team meetings required outside scheduled lectures. WRIT

BEO 1940A. BEO Capstone II: Organizational Studies Track.
Continuation of Semester 1, BEO Capstone I: Organizational Studies Track (BEO 1930A). This course involves the completion of team projects begun in fall semester. WRIT

BEO 1940B. BEO Capstone II: Entrepreneurship and Technology Management Track.
Continuation of Semester 1, BEO Capstone I: Entrepreneurship and Technology Management Track (BEO 1930B). This course involves the completion of team projects begun in fall semester. Non-BEO concentrators require instructor permission. WRIT

Chemistry

Chair
Matthew B. Zimmt

The Department of Chemistry maintains pedagogical and research strengths in organic, inorganic, theoretical and experimental physical chemistry, analytical chemistry, chemical biology and nanochemistry. Faculty, post-doctoral fellows, graduate and undergraduate students collaboratively pursue interdisciplinary research within the department, enhanced by the partnerships with colleagues in the medicine, biology, geology, physics and engineering.
For additional information, please visit the department’s website: http://www.brown.edu/academics/chemistry/

Chemistry Concentration Requirements

The Chemistry concentration offers courses and research opportunities that range from fundamental studies involving the characterization and preparation of synthetic and naturally occurring molecules, to interdisciplinary studies at the interfaces of chemistry with biology, medicine, physics, engineering, and nanoscience. As early as their first year, undergraduates are able to work one-on-one or in small groups with faculty members on cutting edge research projects. The Sc.B. degree provides a thorough foundation for further graduate study or for entry-level technical positions in each area. Students seeking the Sc.B. may either pursue the standard Chemistry concentration or one of the two optional tracks: Chemical Biology or Materials Chemistry. Students may also pursue the A.B. degree in Chemistry, which provides a core education in the discipline.

Standard program for the A.B. degree

1. Note that the physical chemistry courses (CHEM 1140, CHEM 1150, CHEM 1160) have mathematics and physics prerequisites.
2. At least one must be a chemistry course. BIOL 0280 is credited as an elective for the chemistry concentration.

Standard program for the Sc.B. degree

The Chemistry Department offers three tracks for the Sc.B. Chemistry Concentration – a Chemistry track, a Chemical Biology track and a Materials Chemistry track. These tracks are not separate concentrations – your degree will still be an Sc.B. in Chemistry. The Chemical Biology track is designed for students who have a strong interest in the interface of chemistry with biology. The Materials Chemistry track is designed for students who have a strong interest in the interface of chemistry with nanoscience and materials science.

Concentrating in Chemistry – Three tracks

The required/recommended courses for the three tracks are given below.

1. In each of these cases, CHEM 0970/CHEM 0980 should be carried out with a faculty member with an appointment in the Chemistry Department. Research with faculty advisors outside Chemistry may be allowed in some special cases. In this event, the student should a) prepare a proposal for the research to be carried out and b) identify a faculty member in the Chemistry Department who will serve as a second advisor and the second reader for the thesis.
Honors Requirements for Chemistry

All ScB Chemistry concentrators, and any AB concentrator who completes the following requirements, are candidates for Honors; no separate application is necessary.

The requirements for Honors in Chemistry are:
* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.
* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (http://www.brown.edu/academics/chemistry/undergraduate).
* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.
* A Poster presentation at the chemistry department’s spring undergraduate poster session.

Biochemistry & Molecular Biology Concentration Requirements

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

Standard program for the Sc.B. degree

Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits.

Three courses in mathematics, statistics and/or computer science, typically including MATH 0090, MATH 0100, or equivalent) 3
Two courses in physics, typically: 1

Quantitative Science or Mathematics Electives: 2

Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Total Credits 20

1 Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.
2 or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

Honors Requirements for Biochemistry

All ScB Biochemistry concentrators are candidates for Honors; no separate application is necessary.

The requirements for Honors in Biochemistry are:
* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.
Chemical Physics Concentration Requirements

Chemical Physics is an interdisciplinary field at the crossroads of chemistry and physics and is administered jointly by the two departments. The concentration provides students with a broad-based understanding in fundamental molecular sciences, as well as a background for graduate studies in physical chemistry, chemical physics, or molecular engineering. Concentrators are required to take twenty courses in chemistry, physics, and mathematics, although approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substitutes. Chemical Physics concentrators are also advised to take at least six courses in the humanities and social sciences. Chemical Physics concentrators at all levels (first-year through seniors) are actively involved in research with faculty members in both departments.

Standard program for the Sc.B. degree

Twenty-one semester courses in chemistry, physics, and mathematics, with a minimum of four semester courses in mathematics. Core courses are:

- **CHEM 0330** Equilibrium, Rate, and Structure
- **CHEM 0350** Organic Chemistry
- **CHEM 0500** Inorganic Chemistry
- **CHEM 1140** Physical Chemistry: Quantum Chemistry
- **PHYS 0070** Analytical Mechanics
- **PHYS 0160** Introduction to Relativity and Quantum Physics
- **PHYS 0470** Electricity and Magnetism

Select one of the following laboratory courses:

- **CHEM 1160** Physical Chemistry Laboratory
- **PHYS 0560** Experiments in Modern Physics
- **PHYS 1560** Modern Physics Laboratory

Select one course in statistical mechanics:

- **CHEM 1150** Physical Chemistry: Thermodynamics and Statistical Mechanics
- **PHYS 1530** Thermodynamics and Statistical Mechanics

Select two semesters of independent study:

- **CHEM 0970/0980** Undergraduate Research
- **PHYS 1990** Senior Conference Course

Total Credits: 21

1 Other approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substituted for some of the twenty-one.

Students are advised to take at least six courses in the humanities and social sciences.

Chemistry Graduate Program

The Department of Chemistry offers graduate programs leading to the Master of Arts (A.M.), the Master of Science (Sc.M.); a the Doctor of Philosophy (Ph.D.) degree.

Research in Chemistry stretches from the exploration of physical phenomena of individual molecules, to the creation of new molecules, to material science, and indeed to the foundations of life. The Department of Chemistry reflects this profound importance and diversity by offering excellent research opportunities in areas including organic and inorganic chemistry, chemical biology, analytical chemistry, nanotechnology and theoretical and experimental physical chemistry. In addition, graduate students have the opportunity to participate in interdisciplinary research in molecular biology, chemical engineering and the Institute for Molecular and Nanoscale Innovation. The faculty student ratio is approximately 3:1 with most research groups numbering no more than six graduate students.

For more information on admission and program requirements, please visit the following websites:

http://www.brown.edu/academics/chemistry/graduate
http://www.brown.edu/academics/gradschool/programs/chemistry

Courses

**CHEM 0080A. First Year Seminar- Energy.**

An introductory study of the scientific foundation of energy, fundamental physical, chemical, and thermodynamic aspects of common (fossil, nuclear) as well as novel (fuel cells, solar, wind, etc.) energy sources. Concentrates on scientific principles, but includes discussion on resources and reserves, environmental impact, current usage, and future needs. For students of all disciplines who are interested in obtaining an understanding of scientific principles of energy. Enrollment limited to 20 first year students. FYS LILE

**CHEM 0080B. Molecular Structures in Chemistry and Biology.**

This course will consist of a survey of historical developments and concepts of three dimensional structures of molecules. The course will conclude with a survey of the current state of the art of structure determination and 3D structure motifs for small molecules, nanomaterials and biological macromolecules. This freshman only seminar will be strictly limited to a maximum of 20 students. FYS

**CHEM 0080C. Drug Discoveries in the Pharmaceutical Industry.**

A Freshman seminar that provides a survey of past and current approaches that enable the discovery and development of therapeutic agents. Topics ranging from target validation to the development of therapeutics (small molecules, biologics, and stem cells) will be discussed. Enrollment limited to 20 first-year students. FYS

**CHEM 0080D. Chemical Ecology: Pheromones, Poisons and Chemical Messages.**

This first year seminar will explore how plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves, and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling. Enrollment limited to 20 first year students. FYS

**CHEM 0080F. Kitchen Chemistry.**

Have you ever wondered why olive oil is a liquid but butter is solid? Or why bread and cookies rise when baked? This Kitchen Chemistry course is an experimental approach to chemistry, as seen in cooking. We will examine topics such as trans fats, baking soda as a leavening agent in baking, ripening of fruit, artificial sweeteners, GMOs, and enzymatic and non-enzymatic browning of foods. Edible experiments will be used to discuss the science behind recipes. Enrollment limited to 14 first year students. Instructor permission is required. FYS WRIT

**CHEM 0100. Introductory Chemistry.**

Explores stoichiometry, atomic and molecular structure, chemical bonding, solutions, gases, chemical reactions, equilibrium, thermodynamics. Three hours of lecture, one conference per week, no laboratory section. S/NC.
Focuses on understanding a number of environmental questions from the underlying laws and concepts of chemistry and physics. While some knowledge of math, physics and chemistry are useful, none is assumed. Concepts of chemistry and physics will be developed as needed. LILE

Plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves against enemies and pathogens and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling. FYS

CHEM 0330. Equilibrium, Rate, and Structure.
Explores the electronic structure of atoms and molecules, thermodynamics, solution equilibrium, electrochemistry, chemical kinetics, and reaction mechanisms. Course includes lecture and laboratory sections. Laboratory cannot be taken without the lecture. Students who previously passed 0330 lab may be excused from repeating the lab portion of the course. Required background: CHEM 0100 or AP Chemistry 4 or CHEM Placement Test 8 or IBC Chemistry.

CHEM 0330L. Equilibrium, Rate, and Structure Lab.
Please see course description for CHEM 0330.

CHEM 0350. Organic Chemistry.
Sequel to CHEM 0330. Investigates the constitution and properties of the different classes of organic compounds, with considerable attention to reaction mechanisms. The laboratory work involves an introduction to microscale preparative and analytical techniques of organic chemistry and the preparation of representative organic compounds. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0330.

Students MUST register for a common meeting, a lecture section, a lab and a conference. If you previously completed CHEM 0350 laboratory but received a grade of no credit in the course, please register for lab section 11.

CHEM 0350L. Organic Chemistry Lab.
Please see course description for CHEM 0350.

CHEM 0360. Organic Chemistry.
Sequel to CHEM 0350. Investigates the constitution and properties of organic compounds at a fundamental level with an introduction to physical organic, bioorganic, and synthetic organic chemistry. Laboratory work is concerned with the identification and characterization of organic compounds, including modern instrumental methods. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0350.

Students MUST register for a lecture section, a lab and a conference. If you previously completed CHEM 0360 laboratory but received a grade of no credit in the course, please register for lab section 11.

CHEM 0360L. Organic Chemistry Lab.
Please see course description for CHEM 0360.

CHEM 0400. Biophysical and Bioinorganic Chemistry.
Examines aspects of physical and inorganic chemistry relevant to biochemistry: thermodynamics of hydrophobic and hydrophilic interactions, electrically charged membranes, coordination chemistry, active and passive transport, enzyme kinetics and mechanisms, metal-based drugs, and physical methods. Three hours of lecture and five hours of laboratory. Prerequisite: CHEM 0360 and MATH 0100 or 0170. Prerequisite or corequisite: PHYS 0040 or 0060.

Students MUST register for a lecture section and a lab.

CHEM 0500. Inorganic Chemistry.
Examines the chemistry of main group and transition metal elements with treatment of covalent bonding and molecular structure along with the methods of studying inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory attendance. Prerequisite: CHEM 0360.

Students MUST register for a lecture section and a lab.
CHEM 1240. Biochemistry. Examines the chemical, mechanistic, and structural basis for enzymatic catalysis. Uses examples from the recent literature to examine how the experimental and conceptual tools of chemical synthesis, isotopic labeling, stereochemistry, enzymology, kinetics, and protein structure can be brought to bear to unravel the chemical and physical principles underlying the enormous catalytic acceleration and exquisite structural specificity of enzyme-catalyzed reactions. Prerequisites: Strong background in organic chemistry (CHEM 0350-0360, A or B performance preferable) plus at least one semester of Biochemistry (BIOL 0280, BIOL 1270). Enrollment limited to: 25 students, written permission required. If enrollments exceed the limit of 25 students, permission to enroll for students who meet the course prerequisites will be allotted in the order: a) first year Chemistry graduate students, b) undergraduate senior concentrators in Chemistry, Biochemistry or Chemical Biology, c) junior concentrators in Chemistry, Biochemistry or Chemical Biology, d) other students. Students who have permission to enroll must attend the first three classes or risk losing their places to someone on the Course waiting list.

CHEM 1450. Advanced Organic Chemistry. Lectures cover topics of current interest in organic reaction mechanisms, synthesis, and structure determination. Laboratory emphasizes spectroscopic and separation techniques and modern synthetic methods. Prerequisite: CHEM 0360. WRIT Students MUST register for a lecture section and a lab.

CHEM 1560A. Molecular Modeling. No description available.

CHEM 1560B. Techniques in Inorganic Chemistry. No description available.

CHEM 1560C. Advanced Spectroscopy. No description available.

CHEM 1560D. Chemistry and Biology of Naturally Occurring Antibiotics. Small molecules produced by organisms for chemical defense have long been exploited in medicine, biotechnology, and biological research. 1560D will examine the origins, uses, modes of action, and preparations of some of the most important and useful of these "antibiotic" molecules. Given the inter-disciplinary nature of this topic, this course is open to students with backgrounds in the biological and/or physical sciences. Familiarity with concepts of organic chemistry and biochemistry will be assumed.

CHEM 1560E. Biological Mass Spectrometry. This seminar course will survey the instrumentation, methods, and applications of modern biological mass spectrometry. Through lecture and interactive discussions, we will explore the fundamentals of mass spectrometry. We will then proceed to cover a series of topics relevant to protein and peptides analysis. The seminar will conclude with an exploration of recent developments in instrumentation or applications of particular interest to the participants. Recommended pre-requisites: CHEM 0360, BIOL 0280, PHYS 0040. Enrollment limited to 20.

CHEM 1560F. Organic Structure Analysis.

CHEM 1560G. Nuclear Magnetic Resonance. These special topics cover the basics of modern NMR spectroscopy. Topics to be included are as follows: modern Fourier transform methodology, modern NMR instrumentation, and a comprehensive discussion of one and two dimensional experiments that are routinely performed. Topics such as coherence transfer and pulsed field gradients will also be included. Experimental methods covered in detail include COSY, TOCSY, HSQC, HMBC, NOEY, ROSEY, EXSY and DOSY methodology. This course will not focus on structure determination or spectral interpretation but rather on experimental methodology.

CHEM 1560H. Chemical Glycobiology. This course examines the chemistry and biology of carbohydrates in living systems. Topics to be covered may include - principles of carbohydrate recognition, enzymes involved in synthesis and modification of carbohydrates, carbohydrates in bacterial/viral and other cellular interactions, glycomics, carbohydrate synthesis. Prerequisites: CHEM 0360 and BIOL 0280. Instructor permission required. Attendance at the first class meeting is required for enrollment.

CHEM 1560I. DNA Damage and Repair. This course analyzes the chemistry of DNA damaging agents and the molecular mechanisms of DNA replication and DNA repair. We will also analyze the mutagenic and toxic consequences of modifications to DNA structure. Specific topics include the reactions of alkylating agents, ultraviolet radiation, and oxidizing radicals with DNA; additionally, chemotherapeutics that modify DNA will be discussed. Multiple cellular repair pathways will be covered including base excision repair, nucleotide excision repair, mismatch repair, and direct reversal. Prerequisites: CHEM 0350, CHEM 0360, BIOL 0280, BIOL 1270, or by permission.

CHEM 1560J. Topics in Bioinorganic Chemistry. Covers current topics of bioinorganic chemistry with review of fundamental inorganic and biological chemistry. Topics include metal ion transport and storage, oxygen metabolism, electron transfer, respiration and photosynthesis, metal ion receptors and signaling, hydrolytic chemistry, metallo-neurochemistry, and medicinal bioinorganic chemistry. Students are strongly urged to complete both CHEM 0500 and CHEM 0360 prior to this special topics course.

CHEM 1560K. Computational Chemistry. Introduction to computational tools for studying the structure of molecules, chemical bonding and chemical reactions. A survey of computational approaches for calculating electron distribution such as molecular mechanics, semi-empirical and ab initio methods (Hartree-Fock, configuration interaction, perturbation theory and density functional theory) will be given. Methods for calculating dynamics of atoms in molecular vibration and chemical reactions will be covered. The course is intended for seniors and graduate students in all subdivisions of chemistry. The goal is to make students capable of using research level tools and carry out simple calculations related to their research interests.

CHEM 1560L. Modern Natural Product Biosynthesis. This course will cover the biosynthesis of the major classes of natural products - polyketides, non-ribosomal peptides, including beta-lactam antibiotics, terpenes, alkaloids and vitamins. The readings from original literature will cover the chemical logic and mechanisms of biosynthetic pathways and individual reactions, including isotopic labeling for whole-cell feeding experiments, stable isotopic NMR analysis, and mass spectrometry. Modern topics include genomics of natural product biosynthesis, genome mining, and pathway engineering. Prerequisites: CHEM 0350 and 0360. Recommended: CHEM 1230, 1240, or 1450. Enrollment limited to 25 juniors and seniors.

CHEM 1560M. Applied Materials Chemistry. Materials chemistry is the study of the synthesis, structure, properties, and applications of solid materials. Our technology-driven world is fueled by advances in materials chemistry with examples of application in areas such as microelectronics, polymers, and energy technology. This course will explain the application of materials chemistry through the materials properties and characterization, detailing how the crystalline and molecular structure of materials can be related to electronic, optical, thermal, and mechanical properties. WRIT

CHEM 1620A. Photoacoustics. Prerequisite: CHEM 1140 or equivalent.

CHEM 1620B. Spectroscopy. Prerequisite: CHEM 1140 or equivalent.

CHEM 1620C. Topics in Modern Physical Chemistry. No description available.

CHEM 1660. Instrumental Analysis with Environmental Applications. This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid chromatography, and electrochemical methods. Prerequisite: CHEM 0330 or GEOL 1370. Enrollment limited to 20. Instructor permission required.
CHEM 1700. Nanoscale Materials: Synthesis and Applications. Focuses on synthesis, properties, and applications of nanoscale materials. It begins with the introduction to size-dependent properties and to general characterization methods of nanomaterials. It then outlines the synthesis, surface chemistry and self-assembly of nanomaterials. It further reviews catalytic, optical and magnetic properties of nanomaterials. Finally, the course highlights the applications of nanomaterials in information storage, energy conversion, and biomedicine.

CHEM 2010. Advanced Thermodynamics. Fundamental principles of macroscopic equilibrium thermodynamics. The three laws of thermodynamics, the thermodynamic potentials, temperature scales, heat engines and refrigerators, entropy, kinetic theory, and transport phenomena. Applications to solids, fluids, and magnetic systems; Gibbs relations, first and second order phase transitions, thermal radiation, gas expansions.

CHEM 2020. Statistical Mechanics. Introduction to modern equilibrium statistical mechanics, including the classical and quantum descriptions of ideal gases, the molecular basis of thermodynamics, the concepts of ensembles and fluctuations, and the implications of quantum mechanical indistinguishability. Applications include chemical and phase equilibria, the transition-state theory of chemical reaction rates, and the theory of liquids.

CHEM 2210. Chemical Crystallography. Introduces the principles of crystallography (plane groups, point groups, space groups, Bravais lattice, crystal classes), crystallographic methods (single-crystal, powder XRD, macromolecular), strategies for data collection, methods for data reduction, and structure interpretation; reviews modern crystal structure databases (CSD, ICSD) and search engines; reviews the historical development of crystallography and the scope, potential and application of X-ray analysis.

CHEM 2310. Advanced Inorganic Chemistry. Comprehensive survey of topics in synthetic and mechanistic organometallic chemistry.

CHEM 2320. Physical Inorganic Chemistry. The bonding and structures of inorganic compounds, including transition metal containing compounds and organometallics, and their spectroscopic properties are covered along with the group theoretical, quantum chemical, and physical methods employed. Prerequisites: CHEM 0500 and 1140 or equivalents or written permission. Recommended for seniors and first-year graduate students.

CHEM 2410. Physical Organic Chemistry. Detailed examination of organic reaction mechanisms, reactive intermediates, and the methods employed for their characterization (e.g., kinetics, free energy relationships, isotope effects, molecular orbital theory, spectroscopy, and product distributions). Topics may include concerted, free radical, elimination, and photochemical reactions, and the chemistry of radicals, carbocations, carbanions, and carbenes. Prerequisites: CHEM 0500, CHEM 1140.

CHEM 2420. Organic Reactions. Study of organic reactions and reaction mechanisms. Discussion and analysis of organic transformations. Topics can include arrow pushing strategies and synthetic methods.

CHEM 2430. Synthetic Organic Chemistry. Methods, strategies, and mechanisms. Topics may include the chemistry of anions, cations, and radicals, concerted reactions, conformational analysis, and stereochemistry.

CHEM 2780. Quantum Mechanics. Semester II: Lectures consider the theory and application of time-dependent quantum mechanical methods in chemical physics. Both few and many-body methods are described and discussions include the correlation function formulation of chemical dynamics. Numerical path integral methods for equilibrium and dynamical problems are introduced. Prerequisite: CHEM 2770.

CHEM 2810. Departmental Seminars. No description available.

CHEM 2820. Departmental Seminars. No description available.

CHEM 2870. Departmental Colloquia. No description available. Open to graduate students only.

CHEM 2880. Departmental Colloquia. No description available. Open to graduate students only.

CHEM 2920A. Chemistry and Physics of Amorphous Materials. No description available.

CHEM 2920B. Organic Spectroscopic Methods. No description available.

CHEM 2920C. Topics in Modern Spectroscopy. No description available.

CHEM 2970. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CHEM 2980. Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CHEM 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CHEM XLIST. Courses of Interest to Students wishing to Study Chemistry.

Classics

Chair

Jeri B. Debrohun

Like the discipline itself, which lies at the foundation of the humanities, Brown's Department of Classics has a long and distinguished history, stretching from the founding of the University down to the current initiatives for academic enrichment. The department provides both specialized training for those who wish to enter graduate school in preparation for a career in scholarship, and a broad liberal education for those with more general interests. Courses are offered from beginning to advanced levels in Ancient Greek, Latin, and Sanskrit language and literature, and also in Modern Greek. Each semester the department offers a number of courses that require no knowledge of the ancient languages, in such areas as classical literature, mythology, ancient history, philosophy, and religion. For additional information, please visit the department's website: http://www.brown.edu/academics/classics/

Classics Concentration Requirements

Classics focuses on the languages, literature, history, and culture of Greco-Roman antiquity. It provides specialized training for students intending to enter graduate school, and a broad liberal education for those with more general interests. Students may choose to study Ancient Greek, Latin, Sanskrit, or Modern Greek and gain knowledge in literature, mythology, ancient history, philosophy, and religion. Students may either pursue the standard Classics concentration - the most popular choice - or they may pursue one of the four optional tracks: Greek, Latin, Greek and Latin, or Sanskrit. Concentrators are strongly encouraged to integrate their studies in various fields of Classics by writing a senior thesis, by participating in an undergraduate seminar, or by undertaking a senior capstone project.

All tracks except "Greek and Latin" and "Sanskrit" require the satisfactory completion of eight courses as described below. Programs are flexible.
and students are encouraged to discuss their plans with the concentration advisor. The introductory courses in Greek and Latin may not usually be counted toward a concentration.

Classics
One course in Greek or Latin on the 1000-level or above. 1
Select one of the following series: 2

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Honors
Students may earn honors in the concentration by presenting a satisfactory thesis, for the preparation of which they will ordinarily enroll in the relevant 1970 and 1990 courses; these courses may not be used to satisfy the standard requirements for a concentration. In order to qualify for honors, students must maintain a B average overall.

Brown University
as the blood drained out of his veins. In this course we’ll read broadly in on that of Socrates, discoursing calmly about philosophy with his friends end was heroic: ordered to commit suicide in 65 AD, he modeled his death but begged for return from exile, and a philosopher compromised by his and a politician, a man who preached the importance of mind over matter The Stoic philosopher Seneca led a life full of contradictions: a millionaire CLAS 0210M. Seneca: A Philosopher in Politics. limited to 20 first year students. FYS material culture (archaeology, art, museum displays, etc.). Enrollment questions about access to the classical past, and its modern-day influence these ancient forms have on comedy today. Secondary readings Greece (early iambic poetry, Aristophanes, Menander), its later offshoots in Rome (Plautus, Terence), England (Shakespeare), and the continued influence these ancient forms have on comedy today. Secondary readings include ancient and modern thoughts on humor and laughter, and writings on the historical contexts in which these plays were produced. WRIT CLAS 0500. Virgil, Augustus, and Rome. Examines, in translation, the three masterpieces of Virgil, central poet of the golden age of Latin literature. In particular, considers his epic, the Aeneid, against the background of the Rome of the emperor Augustus. Subjects for discussion include the relation of poetry and power, the connection between the imagination and historical reality, and the tension between intellectual freedom and the constraints of society. CLAS 0520. Religion and Magic in Ancient Greece. Examines the sacred or supernatural realm that pervaded ancient Greek culture, considering both public and private practices. Topics include belief in the gods; aspects of polytheism; sacrifice; pollution; athletic and civic festivals; oracles; mystery cults; death and afterlife; hero cults; religion and gender; curses, spells, and charms; ancient atheism and agnosticism. LILE.
CLAS 0560. War and Society in the Ancient World.
In a broad survey of ancient societies (from Egypt and Mesopotamia to late antiquity), but with a strong focus on the Greco-Roman world, this course examines the sociology of war in premodern societies: we investigate how in each case warfare and military organization interacted with social, economic, and political structures and how each society dealt with the challenges, gains, and costs of war. Readings in English. LILE

CLAS 0600. The Worlds of Late Antiquity.
A survey of Western culture in all its variety-social, political, economic, literary-in those centuries when the Roman Empire supposedly fell, leaving in its wake the so-called Dark Ages. Emphasizes the dialectic of continuity and change that leads from Imperial Rome to the vast Empire of Charlemagne.

CLAS 0620. Greek Tragedy.
An investigation of many of the surviving plays of the Greek tragedians Aeschylus, Sophocles, and Euripides. Considers the diverse aspects of ancient drama: the context, both religious and sociopolitical; issues of theatrical production, the poetic texture of the plays; and the influence of classical drama on later drama and western thought. Additional readings may include Aristophanes’ Frogs and Thesmophoriazusae and selections from Aristotle’s Poetics, the earliest criticism of Greek tragedy. LILE WRIT

CLAS 0660. The World of Byzantium.
Caught between the East and West, the culture of Byzantium inherited the ancient worlds of Greece, Rome, and Jerusalem, nurturing many a modern ideology, conflict, and identity. Byzantium is explored through its history, texts, and art. We examine the foundation and history of Constantinople, Iconoclasm, the Crusades, medieval Christianity and Islam, Byzantine court life, concepts of gender, self, and sexuality. WRIT

CLAS 0750. Gender and Sexuality in Classical Antiquity.
This course will analyze women in classical Greek and Roman society and literature. Using gender as a critical tool, we will examine Greek and Roman women in various sources, from Homeric epics and public inscriptions to scathing Roman satire. These sources show how the Greeks and Romans defined normative gender categories and how they used these categories as a vehicle for social and political criticism. We will cover both social history and gender discourse, focusing especially on the body and sexuality as a site for power. The limitations imposed by the source materials, both literary and non-literary, will be a topic of discussion throughout, as well as the relation of these ideas to contemporary constructions of gender. WRIT

CLAS 0760. Ancient Utopias/Imaginary Places.
Literary depictions of idealized imaginary societies already had a long tradition when Thomas More produced his Utopia in 1516. This course explores the ancient Greco-Roman utopian tradition, examining both literary depictions of mythological or fantastic utopias (or dystopias), including representations of societies remote in time (“the Golden Age”) or place (e.g., Homer’s Phaeacia), and works that critique contemporary values or attempt to describe idealized possible societies (e.g., Plato’s Republic). These Greco-Roman depictions in turn provided the foundation for the utopian (and dystopian) tradition as it continued through the Medieval age and into modernity, and we will also follow that tradition. DPLL LILE WRIT

CLAS 0800. Religious and Philosophical Thought in Ancient India.
The historical development of the main themes of ancient Indian religious and philosophical thought. Part I: The rise of monism in tension with polytheism, the efficacy of Vedic words and Vedic rites, and early Brahminic cosmology and psychology. Part II: The rise of the non-Brahminic traditions (Jainas, Ājīvikas, and Buddhists) challenging Vedic revelation and everything based upon it (mainly the rites and authority of brahmans). Part III: The ensuing 'conversations' among the competing traditions, conversations that developed new world-views and new methods for effecting human well-being in the cosmos. DPLL

CLAS 0810A. Alexander the Great and the Alexander Tradition.
This course focuses on a single historical figure, Alexander the Great, using him as a point of departure for exploring a wide range of problems and approaches that typify the field of Classical Studies. How knowledge of Alexander has been used and abused provides a fascinating case study in the formation and continuous reinterpretation of the western Classical tradition.

CLAS 0820. Epics of India.
An introduction to Indian epic literature with reading and analysis of one or more of India’s grand and powerful epics, such as the Mahābhārata, the Rāmāyaṇa, the Cīlappadikāram, and others. DPLL

CLAS 0850. Mythology of India.
Reviews major myths from religions of India in order to understand how the peoples of India imagined their relation to the divine world, to nature, and to other human beings. Considers connections between myths and religious practices, social structures, historical events, and psychological and aesthetic dimensions of Indian cultural life. Reading of mythic narratives will be accompanied by analysis from selected theoretical perspectives. DPLL

CLAS 0855. The Bhagavad Gītā.
This course will study and discuss the teachings of the Bhagavad Gītā in the context of its literary, theological, and philosophical origins in ancient India. We will read the text itself (in English, not Sanskrit), parts of the epic Mahābhārata in which the Gītā is situated, and collateral texts, such as Upanisads, Indian myths, Buddhist sermons, or even modern novels, that may shed light on why and how this text has exercised such far-reaching influence across the ages, inside India and beyond. DPLL

CLAS 0890. Greek Mythology.
Reviews major myths along with some lesser known variations, in order to understand how ancient Greeks imagined their relation to the divine world, to nature, and to other human beings. Considers connections between myth and culture or ritual, and also to the psychological, social, historical, and aesthetic aspects of classical myths. Examines adaptations of classical myths in later societies and comparative materials from other cultures.

CLAS 0950. The Myth of the Seven: From Aeschylus to Kurosawa.
What is a story? Does it have a life of its own? In this class, we will focus on a single story and study its progression from epic times to Classical Greece to the Roman empire and medieval period, to the Renaissance and Hollywood. Why do certain stories survive? How do different ages think through a story and what do they need from these stories? We will read authors like Aeschylus, Euripides, Statius, and Racine, consider depictions in the visual arts, and watch film versions like the cowboy classic “The Magnificent Seven” and Kurosawa’s “Seven Samurai.” All texts in translation. LILE WRIT

CLAS 0990. Concepts of the Self in Classical Indian Literature.
Examination of the great Indian epic Mahābhārata and related mythology to introduce the context for the most ancient speculations of the Rgveda and the subtle teacher-student dialogues about the self contained in the Bhagavadgīta and Upanishads. We will also examine the more systematic Indian philosophical texts and note their resonance in ancient and modern European conceptions of self.

CLAS 1120A. Dreams, Love and Confession.
The Middle Ages are notorious for their love of bizarre locales, hauntings, fear of demons, and superstitions. But the outlook of the medieval world also encouraged a love of hidden and of internal, spiritual space. This world-view attended to dreams, a complex anatomy of human love and confessions. In this course, we will examine the social and literary context of these three modes of communication in the classical and, especially, the medieval period. We will read classical and medieval poetry (Horace, Propertius, Ovid, Lucrétius, Cambridge Songs, Alan de Lille, Bernardus Silvestris), late antique dream books (Aelius Aristides), medieval beastiaries and fables, vernacular Romances and lays, and the medieval confessionnal mode (Augustine, Guibert); we will also examine visual evidence, where possible.

CLAS 1120B. Epic Poetry from Homer to Lucan.
Traces the rich history and manifold varieties of the genre of epic poetry in the literatures of ancient Greece and Rome beginning with Homer’s Iliad and Odyssey (VII c. B.C.) and ending with Lucan’s Civil War (I. c. A.D.). Masterpieces such as Virgil’s Aeneid and Ovid’s Metamorphoses are included. Original sources read in translation. LILE WRIT

CLAS 1120D. Myth and Origins of Science.
Examinations of various explanations of the origin of the cosmos, of human beings, and human institutions, with readings from literary,
philosophical, and scientific texts. What constitutes a scientific explanation and in what respects ancient science was similar to and different from our own? Authors include Hesiod, Aeschylus, Plato, Aristotle, Hippocratic medical writings and the Presocratic fragments. Read in English translation. LILE

CLAS 1120E. Slavery in the Ancient World.
Examines the institution of slavery in the ancient world, from Mesopotamia and the Near East to the great slave societies of classical Greece and (especially) imperial Rome; comparison of ancient and modern slave systems; modern views of ancient slavery from Adam Smith to Hume to Marx to M. I. Finley. Readings in English. LILE

CLAS 1120G. The Idea of Self.
Literature gestures us toward a certain kind of knowledge not quite psychological, not quite philosophical. We read widely in the classical and medieval traditions in order to gauge the peculiar nature of what this knowledge tells us about experience and the ways in which expressions of selfhood abide or are changed over time. Authors include but are not limited to Sappho, Pindar, Catullus, Horace, Lucan, and Hildegard. LILE WRIT

CLAS 1120H. The Invention of Literature: Literary Theory from Antiquity to the Renaissance.
Literature is a recent concept. We study the prehistory of its invention in Antiquity and the Middle Ages focusing on ideas about authorship, fiction, and practices of reading. The course is based on close reading of primary texts from classical Greco-roman and medieval Byzantine, Latin, and Arabic authors. Beyond theoretical discussions, primary readings include contemporary premodern literary texts.

CLAS 1120J. Essaying the Essay.
This course explores the personal essay as a vehicle for self-expression. Examining self-reflective essays from a variety of cultures and time periods—ancient, modern, East, and West—we trace the theme of friends as dialectical others against whom individuals define themselves. Our investigations will lead us to a provisional definition of the essay genre, keeping in mind its unique placement between fiction and non-fiction, and its relationship with non-Western forms such as the suibi and the xiaopin wen. First year students need instructor permission to enroll.

CLAS 1120K. Skeptical Traditions East and West.
The skeptical project begins and ends in doubt and the refusal to affirm any belief dogmatically. While these ideas are most frequently associated with the writings of Cicero and Sextus Empiricus, they also appear in early Buddhist and Daoist texts. The course examines several strands of skeptical philosophy as they appear in writings from ancient Greece, Rome, China, and India. It further explores literary enactments, appropriations, and critiques of skepticism evident in the skeptical revival of the European Renaissance and in Zen kōans.

CLAS 1120L. Archaeology of Feasting.
No description available.

CLAS 1120M. Plato.
A close reading of Plato’s major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. Students wishing to read the texts in the original Greek should make arrangements with the instructor.

CLAS 1120N. Games and Spectacles of Ancient Greece and Rome.
Will examine games and spectacles of the ancient Greek and Roman worlds, from the early Olympic contests to the popular chariot races of late antiquity. By using a variety of sources, including archaeological evidence, we will explore not only the historical development of sports in the classical world, but also its ongoing political, social and cultural importance. By seeking to understand both participants and spectators, we also hope to connect the significance of games to other facets of Greco-Roman society, including women and religion. We will not only discuss the limitations of the primary sources, but also make relevant comparisons to the role of sports in contemporary society. WRIT

CLAS 1120Q. Seven Wonders of the Ancient World.
"Everyone has heard of the Seven Wonders of the World," wrote Philo of Byzantium two millennia ago, and it’s still true today. But what is a "Wonder"? And why seven of them? Why make such a list anyway, then or now? This class will use ancient texts, explorers’ accounts, and archaeological investigations to travel through several thousand years of history in the Mediterranean and Near Eastern world. We will consider how the Seven Wonders captured past imaginations; the aura of technological achievements; the intersections of history, memory, invention, and myth; and how members of one culture view another culture’s monuments. LILE

CLAS 1120R. Social Conflict and Political Factions in the Roman Republic.
Traces the evolution of social conflict and political factions at Rome from the foundation to the dissolution of the Republic (C5-C1 BCE), Roman armies secured a vast empire of territory, raw materials, and manpower governed by the senate and the people of Rome itself. The influx of resources, however, destabilized Rome’s constitution and upset political power balances at the city of Rome. How did the Romans—elites and masses—compete amongst themselves for the bounty of empire abroad and confront their own internal conflicts at home? Was concord possible, or were the developments of empire inconsistent with the constitution of the Republic?

CLAS 1120T. Age of Augustus: Topography, Architecture, and Politics.
Augustus Caesar boasted that he had found Rome a city in brick, but left it in marble. This course explores the transformation of Rome from an unadorned village to the capital of an empire. Was Rome’s first emperor trying to fashion himself a Hellenistic monarch on the model of Alexander and his successors? Was he simply operating within republican traditions, which had been established through centuries of aristocratic competition at Rome? Our source materials will include ancient works of art and architecture, literary accounts, maps, and critical urban theory.

CLAS 1120U. The American Presidency and the Western Tradition.
We are accustomed to engaging the American presidency as a public office best approached through the prism of government or political science, but this course studies the ways in which the presidents in thought and action are part of a larger continuum of humanistic expression in the western tradition. It is organized around five categories: memory, language, consolation, farewell, and self-reflection. Our work involves reading and viewing/listening to various materials, including videos and original documents. The words we study, both by and about presidents, will be compared to various masterworks of Greco-Roman antiquity and the western Middle Ages. LILE WRIT

CLAS 1120V. The Age of Constantine: The Roman Empire in Transition.
The reign of Constantine the Great (306-337) and his dynasty heralded a period of remarkable/rapid change in the Roman Empire. Christianity became the sole imperially sponsored religion; the split between Western and Eastern halves of the Empire gradually became permanent and irrevocable; consequently new ways of thinking and writing about the Roman world, past and future, developed. Focusing on a generous selection of primary source material in translation and current scholarship, we will explore the history, literature, and culture of Constantinian Empire in order to highlight the role of Constantine and his successors in the evolution of the late Roman Mediterranean.

CLAS 1130. Society and Population in Ancient Greece.
This interdisciplinary course stresses the importance of social and demographic themes for our understanding of ancient Greek socio-economic history. The course addresses topics that are fundamental to historical demography (mortality, birth rates, and factors that affect them). It draws directly on primary sources (documentary, literary and archaeological) and readings of modern historians that allow us respectively to analyze evidence and contextualize the issues relating to social history and historical demography. The course takes a longue durée approach and incorporates ancient Greek communities in Greece, the Balkans, Asia Minor, and the Black Sea, from the Archaic, Classical, Hellenistic, and Roman periods. WRIT

CLAS 1140. Classical Philosophy of India.
This course introduces the classical traditions of philosophy in India. After presenting a general overview of this discourse and its basic Brahminic, Buddhist, and Jain branches, the course will examine selected traditions and themes from both the several schools concerned entirely with gaining
analyze their reforms and examine the causes and historical significance of Caesar’s failure and Augustus’ success.

CLAS 1750B. Justice.
An inquiry into notions and definitions of justice. Plato’s Republic is the basic reading. Considers a wide variety of novels, poems, and plays as examples.

CLAS 1750C. Undergraduate Seminar: Emotions.
Were the emotions of the ancient Greeks and Romans identical to our own? When a Greek felt pity, or a Roman was angry, were the causes and the manifestations the same as ours? This senior seminar examines how Greeks and Romans defined the emotions, and checks their descriptions against literary texts. One year of either Greek or Latin required.

CLAS 1750D. Philosophy of Socrates.
In this class we will read and discuss various ancient portraits of Socrates (in Aristophanes’ Clouds, Plato’s Apology and Symposium, and Xenophon’s Apology) and several Platonic dialogues representing Socrates in action discussing moral questions, including the Crito, Laches, Charmides, Lessner Hippias, Protagorae, and Gorgias. We will focus on questions about the historical Socrates (as distinct from the portraits), his avowals of ignorance, irony, methods of argument, and interest in definition, as well as the moral questions explored in the dialogues. All readings will be in English translation. Enrollment limited to 20.

CLAS 1750E. Writing History in the Ancient World.
The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history; investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations.

CLAS 1750H. Heroes and Heroism in Graeco - Roman Antiquity and Beyond.
Examines the concept of hero, an ancient Greek word, which had a wide variety of meanings and was employed to designate a series of diverse characters of myth. We will trace the evolution of this idea through a detailed analysis of its uses in Greek and Roman texts, and also contrast its ancient sense with present day conceptions of the hero and heroism. All readings will be in English. The course is open to all undergraduates, but preference will be given to juniors and seniors. Enrollment limited to 20.

CLAS 1750L. Highways and Byways in Antiquity.
This seminar will explore the construction and development of pathways of communication and contact in the ancient (primarily Mediterranean) world. Emphasis will be placed upon major routes (highways) and the state-level powers that instituted and controlled them, but also on more modest roads and paths and the communities they promoted. The scope of the course is thus quite extensive, embracing both terrestrial and maritime roadways, and all forms of activity that took place on and along them (trade, pilgrimage, ‘strip development’, imperial postal and spy systems, ports, etc.). Some previous study of antiquity is desirable. Please note: CLAS1750L is being team-taught by Susan Alcock and John Bodel.

CLAS 1750P. Classical Greek Drama.
We shall study the tragedies of Aeschylus, Sophocles, and Euripides, and the comedies of Aristophanes. This is a seminar course and the text will be in Greek. It is intended for those who have had at least two years of study of Greek and are familiar with the ancient literature and its ancient sources. In order to allow us to focus on the plays themselves, the seminar will be conducted in English. Preference will be given to juniors and seniors. Enrollment is limited to 30.

CLAS 1750Q. Classical Latin Drama.
We shall study the comedies of Plautus and Terence, and the tragedies of Seneca. This is a seminar course and the text will be in Latin. It is intended for those who have completed at least three years of study of Latin and are familiar with the ancient literature and its ancient sources. In order to allow us to focus on the plays themselves, the seminar will be conducted in English. Preference will be given to juniors and seniors. Enrollment is limited to 30.
CLAS 1750L. Erotic Desire in the Premodern Mediterranean

Erotic desire may be a universal human phenomenon. How we explain, depict, express, or experience desire is, however, not a universal, uniform matter. The premodern Mediterranean (from roughly the fifth century BCE to the fifteenth century CE) gives us a variety of forms of sexual experience and expression. We will study the history of these forms through texts, images, and objects: from Platonic love or eros to Roman tales of romance, from Judeo-Christian mysticism to Islamic literature, from sexual diets to erotic amulets. Enrollment limited to 25.

CLAS 1750N. Marriage in the Ancient World.

Marriage is a historical phenomenon; it assumes various forms and has distinct meanings in different societies, even those that have been regarded as the fountainhead of Western values. This course (a seminar addressed in particular to upper-level undergraduates) investigates this important social institution in ancient Greece and Rome, using a variety of primary documents (literary, historical, epigraphical, etc.) and taking account of modern approaches to the study of marriage, including anthropological, sociological and psychological theories. All sources will be read in English.

CLAS 1750P. Staging the Law: Classical Literature and Renaissance Drama.

(1) We examine theater and its relation to society, particularly, its reflection of legal culture (detections of murderers, adulterers, and young lovers); we also examine law’s ‘theatricality’ (‘productions’ of trials). (2) We also explore more broadly how dramas were performed, using as comparanda Japanese Noh and Kabuki (in each, for example, we find all-male casts). (3) Attention is also directed toward twentieth century receptions of these plays; we focus largely on Japanese productions, particularly of Yukio Ninagawa, mastermind of Japanese theater who directed numerous Greek tragedies and Shakespearean plays in different venues, absorbing and subverting phenomena of traditional Japanese theater.

CLAS 1770. Ancient Law, Society and Jurisprudence.

After a brief survey of modern legal systems (USA, common and civil law systems), we return to Athens and Rome. Topics: sources of law, its evolution, (e.g., feuding societies); procedural law (e.g., how to bring cases); legal reasoning: rhetoric; substantive law (e.g., regarding marriage, religion, homicide). Different approaches are used: historical, comparativist, anthropological, case-law study.

CLAS 1930A. Introduction to Greek and Latin Meters.

We will survey the major metrical systems of Greek and Roman verse by reading a wide range of short poems and brief extracts. The main concerns will be, first, how to scan poems correctly, and second, how to evaluate metrical and rhythmic choices. Prerequisite: GREK/LATN 0400, or demonstration of equivalent ability in Greek and Latin.

CLAS 1930B. Dying God.

The figure of the dying god (like Adonis, Osiris, or Attis), embodying both beauty and tragedy, has exerted a fascination from ancient times to the present day. His worship was sometimes central to the community, sometimes marginal, yet compelling in its “outsider” status. His myths invited meditations on love and death in various modes from comedy to epic. This course, through the great mythological texts of Greece and Rome as well as modern literature and art, will explore the figure in all its variety, along with Christian adaptations and recent interpretations. There will be writing assignments.

CLAS 1930C. Parasites and Hypocrites.

The course is a study of the many forms of toadying, groveling, feigning friendship, flattery, ass-kissing, and so on, that were such a large source of concern — and comedy — in antiquity. The anxieties over hypocrisy in a democracy and parasites in client-patron systems will be explored historically, in literary representations, and in their social, political, and economic contexts. Authors to be read include Aristophanes, Plutarch, Lucian, Plautus, Horace, and Petronius.

What was the material underpinning of Greek Society? How did the production and distribution of resources connect individuals and states at what ancient mentalities and ideologies governed this exchange? New scholarly approaches and new evidence have drastically changed how we understand the ancient economy in recent decades. This course will survey key issues in the ancient economy such as Mediterranean ecology, trade, the invention of coinage, taxation, consumption, agriculture, slavery, and connectivity. In the process, we focus closely on the primary sources, in the form of literacy, archeological, numismatic, and epigraphic evidence, while also considering current scholarly methodologies and controversies.

CLAS 1970. Special Topics.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please check banner for the correct section number and CRN to use when registering for this course.

Introduction to standard research methods and tools in major subdisciplines of classical philology and ancient history. Required of entering graduate students. Survey of various subdisciplines in order to become familiar with field and scholarly principles.

CLAS 2010A. Mysteries Documents.

No description available.

CLAS 2010M. Problems in Old World Archaeology: The Archaeology of Empires.

They were big, they were bad, they were beautiful... Cradles of civilization, wreckers of havoc, empires rank among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as the specific and unique contributions that archaeology and art history can offer to the understanding of empire.

CLAS 2080A. Seminar: Allusion/Intertextuality/Influence.

We will study the full career of allusion (from Homer to hip-hop) to gain a sense of its origins and development, especially in antiquity and late antiquity; to understand allusion functionally, (and to measure the durability of that function across time); and to read extensively in the allusive practices of one ancient author.

CLAS 2080B. Seminar: Social Conflicts in the Roman Republic.

This seminar, open to upperclassmen with experience in Roman history, will analyze the causes, impact, and results of social conflicts in the early (the “struggle of the orders”) and late Roman Republic (Tiberius Gracchus, the Catilinarian Conspiracy), and the latters’ contribution to the demise of the Republic. Sources in translation.

CLAS 2080C. The Emperor Tiberius.

No description available.

CLAS 2110A. Graduate Seminar: The Book.

This seminar examines the relationship between ancient literary forms and the media in which they were presented. Specifically, it considers the connections between the ways in which ancient books were published and distributed—in papyrus rolls and bound codices, individually and in groups, privately and commercially—and the cultural conventions of reading and literary appreciation in antiquity. Chronologically the seminar focuses on the late Roman Republic and early Empire (ca. 100 BCE -200 CE), but attention is devoted also to new papyrological evidence for the development of poetry books during the Hellenistic period. A reading knowledge of Greek and Latin is required.

CLAS 2980. Reading and Research.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.
CLAS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CLAS XLIST. Courses of Interest to Classics Concentrators.

Greek

GREK 0100. Essentials of the Greek Language.
A two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

GREK 0110. Introduction to Ancient Greek.
Intensive, one-semester introduction to Greek. No previous knowledge of Greek is required.

GREK 0200. Essentials of the Greek Language.
Second half of a two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

GREK 0300. Introduction to Greek Literature.
Introduction to Greek literature through intensive reading. Prerequisite: GREK 0200, GREK 0110, or the equivalent. We will work on grammar skills while reading extensively in the Histories of Herodotus, who is not only the "father of history" but also a great (and delightful) artist in prose.

GREK 0310. Grammar Review and Composition.
Half-credit course with attention to student's individual needs.

GREK 0400. Introduction to Greek Literature.
Prerequisite: GREK 0300 (or the equivalent). Review of grammar of the Attic dialect through rapid reading of texts by Lysias, Plato, or Xenophon. Emphasis on syntax and style.

GREK 1010. Introduction to Greek Drama.
Both for students who have recently finished GREK 0300 and 0400 and for those who have little or no experience of translating Greek drama. Begins with a brief review of Attic grammar with readings in Plato. Then turns to Greek drama with students reading a play of one of the dramatists and focusing on philological analysis and meters.

GREK 1020. Aristophanes.
Addresses students with at least an intermediate-level command of Ancient Greek, but previous knowledge of Aristophanic language and poetry is not required. We will read in the original language Aristophanes' Frogs, and study different aspects (language, meter, historical background, theatrical performances, literary interpretations, etc.) of this play and of Aristophanic comedy generally. Frogs, composed towards the end of the Peloponnesian War, is one of Aristophanes’ most puzzling plays. It presents a fantasy (and comic!) vision of the afterlife and, indirectly, informs us about the literary criticism of the time.

GREK 1030. Euripides.
Introduction to the study of Athenian tragedy. Thorough translation of one drama with attention to literary analysis. Rapid survey of other Euripidean plays.

GREK 1050C. Sophocles.
An introduction to the study of Athenian tragedy. Thorough translation of one drama, with attention to literary analysis. Rapid survey of other Sophoclean plays.

GREK 1050D. Homer: Iliad.
No description available.

GREK 1060. Herodotus.
What does it mean to be "the father of history?" We will read the last book of the Histories in Greek, supplemented with related texts (some in English translation), as we discuss how this illuminating, entertaining masterpiece spoke to its intended audience and to modern readers as well.

GREK 1080. Attic Orators.
No description available.

GREK 1100. Advanced Homer: The Odyssey.
It is hard to imagine a more joyful way to acquire excellent control of Homeric Greek than by reading, in its entirety (if possible). Homer's wonderful and captivating work, the Odyssey. Though it can be a little time-consuming initially, students quickly become familiar with the syntax and the vocabulary, and find great pleasure in immersing themselves in this thrilling masterpiece.

GREK 1100B. Plato, Phaedrus.
We will read in Greek Plato's dialogue Phaedrus on love and rhetoric. We will attempt to understand the dialogue as a unified whole, discussing such questions as the link between love and the art of persuasion, Plato's denigration of writing, and the relationship between rhetoric and philosophy.

GREK 1100C. Plato: Statesman.
Reading of Plato's Statesman in Greek and discussion of the questions: What is special about the Statesman's expertise? How (if at all) does his expertise differ from that of the philosopher? How is the Statesman related to the philosopher-kings in Plato's Republic? Discussion of Plato's later philosophical method, a topic central of the Statesman.

GREK 1100D. Plato: Symposium.
Readings in Greek Plato's Symposium, his beautiful dialogue about love and philosophy.

GREK 1100E. Plutarch.
Reading of selections from Plutarch's works with attention to literary and historical background.

GREK 1100F. Poetry of Gods and Heroes.
Readings in early Greek hymns, creation myths (especially Hesiod's Theogony), and short poems about human struggle and values.

GREK 1100G. Selections from Greek Authors: Mysteries.
We shall read documents pertaining to the Eleusinian Mysteries. In the first part of the course, we focus on orations (Andocides 6, "On the Mysteries"; Lysias 6, Against Anocides for impiety). In the second part, we read inscriptions (including 'sacred laws') pertaining to the Mysteries.

GREK 1100H. The Odyssey.
No description available.

GREK 1100I. Selections from Greek Authors: Thucydides.
No description available.

GREK 1100J. Plato: Theaetetus.
Theaetetus is in many ways Plato's most modern dialogue. The central question is: what is it to know something? Is knowledge some sort of skill? Is it perception? True judgment? Some sort of account together with true judgment? We will read the dialogue in Greek and discuss Plato's fascinating investigation of knowledge.

GREK 1100K. Early Byzantine Literature.
No description available.

GREK 1100L. Aeschylus' Agamemnon.
No description available.

GREK 1100M. Selections from Greek Authors: Plato, Sophist.
No description available.

GREK 1100N. Menander.
Thanks to a series of remarkable discoveries over the last century, we can now read several comedies by Menander. In this course, we shall investigate the nature of New Comedy, its typical plot structures and characters, the conditions of its performance, and its relation to the Hellenistic world in which it was composed.

GREK 1100O. Aristotle: Nicomachean Ethics.
In this class we will read Books I, II, III, and X of Aristotle's Nicomachean Ethics and discuss his treatment of the highest human good, moral virtue, the doctrine of the mean, and his theory of action.

GREK 1100P. Sophocles.
Close reading of one tragedy by Sophocles. Rapid survey of his other works.
GREL 1100Q. Greek Erotic Literature: From Plato to the Medieval Romances. Survey of desire in Greek writing, with an emphasis on post-classical texts. Exploration of Platonic love, Roman Greek literature on eros, friendship in late antique and medieval rhetoric and letter-writing, erotic epigrams from Imperial to Middle Byzantine times, depictions of the erotic in hagiographical texts, and, finally, the twelfth-century revival of romantic fiction. Four semesters of Greek required.

GREL 1100R. Characters and Characterization in Greek Literature. We will read passages from a wide range of Greek literature, both verse (epic, drama, lyric, epigram) and prose (history, oratory, biography, the character sketch), as well as ancient criticism, with our attention focused on the representation of character, individuality, and self-hood, especially in relation to genre.

GREL 1100S. Xenophon. The writings of Xenophon are among the most varied of any ancient author: they include Socratic dialogues, a continuation of Thucydides’ history, the story of the march upcountry of the 10,000 Greeks stranded in Persia, a biography, a hunting manual, and the earliest surviving historical novel. All are written in an elegant and highly accessible Attic prose. We will read selections from the dialogues, the Anabasis, and some other works.

GREL 1101T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World. In a series of notorious dialogues, Plato delineated a distinction between two professions that were to define future intellectual history: philosophy and rhetoric, the science of thinking juxtaposed to the art of speaking. We will study the transformations of this distinction in four exceptional socio-cultural contexts: Classical Athens, Imperial Rome, Late Antique Alexandria, and Medieval Constantinople. We will discuss the basics and varieties of educational curricula (Aristotle’s Academy, Second Sophistic, Neoplatonism), the social position and self-definition of ancient intellectual figures, and the ever-fluid boundaries between content and form, thought and style; ultimately, between philosophy and literature.

GREL 1100U. Survey of Post-Classical Greek (2nd-12th century CE). This course will study the development of post-classical Greek language and literature with an emphasis on three traditions—the Second Sophistic, late antique discourse (4th-5th centuries), and writing in medieval Constantinople (9th-12th centuries)—through a close reading of texts from a variety of styles, authors, and genres. The selections will be tailored to the needs of the participants. Prior knowledge of Greek (an equivalent of 2 years) is required. Prerequisite: GREL 0400 or instructor permission. Enrollment limited to 20.

GREL 1100V. Greek Funeral Orations. Survey of classical Greek funeral orations; authors to be covered include Thucydides, Plato, Demosthenes, and other fourth century prose writers. The emphasis of the course will be on Greek grammar and techniques of prose translation, though throughout the semester we will also be discussing the nature of ancient Greek commemorative discourses, particularly in classical Athens. Some background on Greek lament and other funerary genres will be provided, and short supplementary texts may range from Homeric excerpts to inscribed epitaphs. Students should already have four semesters of ancient Greek (completion of GREL 0400) or the equivalent.

GREL 1100W. Persia in the Greek Historians. This course will explore Greek encounters with Persia in the 5th and 4th centuries. Following the epoch-making conflict between Greece and Persia, the Persian empire assumed a major place in the historical, literary, cultural, and artistic production of the Greek world. We will access this world primarily through the Greek historians, principally Xenophon, Herodotus, and Ctesias, including Herodotus’ histories, Xenophon’s Cyropaedia and Anabasis, and Ctesias’ Persika. While the focus of the course will be on reading these texts in Greek, we will also engage with modern scholarship on Persia and issues of cultural contact and exchange between these cultures. Recommended prerequisite: Three semesters of Ancient Greek.

GREL 1100X. Aristotle’s Politics. Aristotle’s Politics is a landmark in the history of political thought: the first systematic study of political life. Thinkers from Aquinas to Agamben and Foucault have taken the Politics as the foundation of their own political theories. In this course, we will read Book 1 of the Politics in its entirety, as well as selections from Books 3, 5, 7 and 8. We will address stylistic, philosophical and philological questions raised by the text, as well as reflecting on larger interpretive questions.

GREL 1110C. Late Antique Historiography: Procopius of Caesarea. This course will consider the writings of Procopius of Caesarea (ca. 500-565) in light of his place in Greek literary history, and his cultural context in the Late Roman Empire of Justinian. Sessions will combine a critical reading of texts in Greek with analysis of the author’s historical methods, style, and literary influences. We will study portions of all three of Procopius’ surviving works, beginning with The Wars, and continuing with The Secret History and The Buildings.

GREL 1111D. Daphnis and Chloe. Goethe said that you should read Longus’ “Daphnis and Chloe” once a year (in Greek, of course!). So if you haven’t read it yet, it’s time. One of the first novels ever written, it offers pirates, erotic encounters, and numerous goat-filled landscapes. Discussions include the origins and development of the prose novel, the political and social context of the times, and the beauty of Longus’ idyllic narrative.

GREL 1100N. Introduction to Greek Linguistics. Examines changes that took place in Greek from the time of its separation from its parent language (Proto-Indo-European) to the dialects of Classical times (5th-4th C.B.C.). This course is also an introduction to the methodology of historical linguistics, concentrating on phonology. Proficiency in ancient Greek is required.

GREL 1100O. Greek Prose Composition. Survey of Greek grammar and an opportunity to reflect on problems of translation. Main goals: to improve the students’ command of prose syntax (both in reading and writing), and to develop a keen sensitivity towards issues of translation. A variety of texts written in Attic prose are read and analyzed in class. Students are expected to write two to three compositions a week in good Attic prose. Advanced knowledge of ancient Greek is a prerequisite for this course.

GREL 1100P. Plato and Aristotle. No description available.

GREL 1100Q. Plato’s Protagoras. Plato’s Protagoras is a literary and philosophical masterpiece representing a great gathering of intellectuals, including Socrates and the sophist Protagoras. The two men try to out-wit each other on such topics as political theory, literary criticism, and education. Major questions throughout the discussion are: What is the role of knowledge in a successful life, and how can we acquire knowledge that leads to success? We will read the dialogue in Greek. Prerequisite: two years of Greek (GREL 0400) or demonstrated equivalent ability.

GREL 1810. Early Greek Literature. Surveys early Greek literature. Works studied include the Iliad, Odyssey, the Hesiodic poems, and archaic lyric and elegiac poetry. Emphasis on literary interpretation, the interpretive problems inherent in the study of archaic poetry, and the poetics of oral poetry. Extensive readings in the original.

GREL 1820. Fifth Century Survey. We begin with Pindar and read poetry and prose literature composed throughout the fifth century, with attention to its historical development styles, and the intellectual ideas that drive it.

GREL 1910. Special Topics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

GREL 1930A. Euripides. The plays of Euripides and related works, subject to consultation with students.
GREK 1930B. Greek Epigraphy.
Practical (making and reading squeezes, identifying letters, locating inscriptions, etc.) and analytical aspects of epigraphy will be pursued. The major focus will be legal inscriptions from the Greek world.

GREK 1930C. Introduction to Greek Papyrology.
During the 20th century, papyrology has become the most important source for new literary texts, with three substantial discoveries in the last decade (Simonides, Empedokles, Poseidippos). Provides an introduction to the basic techniques of this comparatively young discipline: material evidence, decipherment, dating, interpretation, restoration, editing, etc. Focus on literary texts, but documentary papyri will also be examined.

GREK 1930D. Rapid Reading in Plutarch.
No description available.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

GREK 2000A. Aristophanes.
No description available.

GREK 2000B. Greek Epigraphy.
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g. regarding historical context) will be explored.

Rapid reading of selections from Plutarch's Lives and from his Moralia.

No description available.

GREK 2020A. Sophocles.
No description available.

GREK 2020B. Herodotus.
Books 3 to 5.

GREK 2020C. Pindar.
No description available.

GREK 2020D. Thucydides.
Books I and VIII: language, mode of thought, and methodology; how the work was composed, historical problems; supplementary sources: epigraphical, literary.

GREK 2050A. Demosthenes.
No description available.

GREK 2050B. Documents: Religious Cults and Sacred Laws.
In the first half of the course we shall read documents pertaining to the Eleusinian mysteries in Athens, including (a) two orations, Andocides 1 "On the Mysteries," and Lysias 6 "Against Andocides for impiety." (b) a variety of inscriptions published by Clinton (in Eleusis, The Inscriptions on Stone: Documents of the Sanctuary of the Two Goddesses and Public Documents of the Deme), and (c) the grand inscription of Adnania (ca. 92 B.C., not Eleusinian but related). In the second half of the course, we shall read inscribed sacred laws from Greece and Asia Minor, from the fifth to the first century B.C.

GREK 2070B. Seminar: Hellenistic Poetry.
In this course, we will read extensive selections of Theocritus, Apollonius of Rhodes, and Callimachus, supplemented by readings in Herodas and Hellenistic epigrams. We shall investigate the nature of the Hellenistic aesthetic, the relation of Hellenistic to archaic and classical poetry, and the way Hellenistic poetry is a reflection of its time and place. Please note: GREK2070B is being team-taught by David Konstan and Pura Nieto Hernandez.

GREK 2100A. Herodotus.
No description available.

GREK 2100B. Making Memory: Simonides, Herodotus, and Greek Identity.
No description available.

GREK 2100C. Drama and the Polis.
No description available.

GREK 2100D. Ancient Literary Criticism.
Survey of ancient literary theory, with an emphasis on Greek sources. Topics to be covered include the representation of poets, the nature of inspiration, the elements of literary style, the moral and ethical uses (and dangers) of poetry, mimesis, the relationship between poetry and citizenship, literature and education, etc. We will read, in Greek, excerpts from (e.g.) Aristophanes' Frogs, Plato's writings on poetry, Aristotle's Poetics, Plutarch's How a young man should study poetry, and pseudo-Longinus' On the Sublime. Students will be evaluated on the basis of in-class presentations, two translation exams, and a seminar paper.

GREK 2100E. Athens on Stage, Athens as Stage.
This graduate seminar will interrogate how classical Athens performed itself - as a city and as an idea - to citizens, metics and foreigners. Our primary focus will be drama, especially plays set in Athens itself. But we will also consider the performative contexts of the plays (at festivals), and other sites of civic performance: the Panathenaea, the funeral oration and demosion sema, architecture, art, rhetoric, etc. Discussion will be rooted in the Athenian sources, but we will also draw upon ideas and concepts from other disciplines (e.g. civil religion, civic choreography, and city 'scenes' of performance).

GREK 2110A. Homer.
A close reading of the entire Odyssey, exploring all aspects of the poem, from its oral composition, language, and style to its background myths and social dimensions. Homer's text will be read in Greek, and extensive secondary sources in several languages will be used.

GREK 2110B. Literary Criticism in Greek Scholia.
No description available.

GREK 2110C. Plato's Republic and its Neoplatonic Reception.
A close reading of Plato's Republic together with Proclus' fifth-century CE commentary. The main focus is Plato's discussion of poetry and mimesis (books 2, 3, and 10), his appropriation of myth and dramatic technique (books 7 and 10), and Proclus' attempt at reconciling Plato with Homer, namely Plato's anti-mimetic stance with his overt theatrics and myth-making. Brings together classical writing with its post-classical readings, broaches such topics as the notion of mimesis and the reception of Plato as well as Homer in Antiquity, and introduces students to late antique allegory and what has been termed the birth of the symbol.

GREK 2110D. Greek Epigraphy.
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g. regarding historical context) will be explored.

GREK 2110E. Aeschines and Demosthenes, "Crowning Speeches".

GREK 2110F. Greek Palaeography and Premodern Book Cultures.
Introduction to pre-modern Greek book culture and the study of Greek literary scripts from classical antiquity to the Renaissance. Students become acquainted with the history of books, the context and agents of their production, and the transmission of Greek (classical as well as post-classical) literature. Training in provided in reading and dating different scripts and in editing ancient texts.

GREK 2110G. Political Trials: Treason and Accountability in Fourth Century Athens.
In studying trials of treason and accountability, we shall examine the democratic ideologies and political factionalism that fueled the trials and also the legal armature that rendered them possible. Our sources for the most part are speeches written by the Attic orators (Demosthenes, Aeschines, Lycourgos, Deinarchos, and Hyperides) and includes impeachment trials for treason by commission of adultery, for having the wrong dream in the Amphipolion, for leaving Athens in wartime; an accountability trial for treasonous conduct while serving on an embassy;
and trials (including the prosecution of Demosthenes) for accepting bribes from Alexander's agent, Harpalos.

**LATN 2120A. Graduate Seminar: Greek Autobiography: From Plato to the Middle Ages.**
An exploration of autobiographical narratives written in Greek from classical to Byzantine times, focusing on the relation between changing notions of the self and the development of autobiography as a literary genre. Authors examined: Plato, Demosthenes, Nicolaus of Damascus, Marcus Aurelius, Aelius Aristides, Lucian, Gregory of Nazianzus, Libanius, Synesius, Michael Psellus, Michael Attaleiates, and Anna Comnena.

**LATN 2150. Plato’s Theaetetus.**
See PHIL 2150 for course description.

**LATN 2970. Preliminary Exam Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**LATN 2980. Reading and Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

**LATN 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**Latin**

**LATN 0100. Essentials of the Latin Language.**
An intensive two-semester approach to Latin with special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required.

**LATN 0110. Introduction to Latin.**
Intensive, one-semester introduction to Latin. No previous knowledge of Latin is required.

**LATN 0200. Essentials of the Latin Language.**
Second course in an intensive two-semester approach to Latin. Special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required.

**LATN 0300. Introduction to Latin Literature.**
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).

**LATN 0310. Grammar Review and Composition.**
Half-credit course with attention to student’s individual needs.

**LATN 0400. Introduction to Latin Literature.**
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).

**LATN 0510A. Latin Mystical Writing.**
We read variably in Latin those authors (Cicero, Horace, Augustine, Anselm, Hildegard) who articulate the best traditions of mysticism in the West: a longing for transcendence, alienation, unity through participation with divinity and culture. Prerequisite: A knowledge of Latin at the intermediate level (one or two years).

**LATN 0510B. Medieval Latin Lyric.**
Open to students with two years of Latin.

**LATN 1010. Latin Lyric: Catullus and Horace.**
Introduction to Latin lyric poetry through the poems of its finest representatives, Catullus and Horace. Emphasis placed on careful reading of the poems, which will be considered individually, as parts of a collection, and as representatives of the poetry we call lyric. The primary objective of the course is to improve students’ ability to read Latin lyric poetry fluently, in terms of meter, grammar, syntax, and literary-critical appreciation. We will also read and discuss a selection of seminal articles on ancient lyric, and students will get experience (and guidance) writing scholarly criticism.

**LATN 1020A. De Oratore.**
No description available.

**LATN 1020B. Cicero, Verrines.**

**LATN 1020C. Cicero’s Republic.**
As one of the only texts that articulates a “Roman” political philosophy, Cicero’s De Re Publica is indispensable for students with an interest in Roman history or classical political thought. In this class, we will address the text from both these perspectives; but we will also read it as a work of literature that remakes the genre conventions of the Platonic dialogue for a Roman readership. We will also address the complex relationship between the text of De Re Publica and the troubled times in which it was written.

**LATN 1040A. Virgil: Eclogues and Georgics.**
Virgil, most famous as the poet of the Aeneid, began his career with two smaller masterpieces: a collection of ten bucolic poems (Eclogues) modeled on the Idylls of the Hellenistic poet Theocritus, and a didactic work on agriculture in four books, the Georgics, which found its inspiration both in Hellenistic models and in more recent Roman antecedents (including Lucretius’ De Rerum Natura) and is viewed by many as the poet’s finest achievement. We will read selections from both works, concluding with the epil realistic at the end of Georgics Four, which relates the tragic love story of Orpheus and Eurydice.

**LATN 1040B. Virgil: Aeneid.**
Close reading of selections from all twelve books of Virgil’s epic.

**LATN 1060A. Latin Prose: Further Readings in Roman Historiography.**
No description available.

**LATN 1060B. Sallust.**
A study of the nature and themes of Roman historical writing through reading one of its major representatives: “Catilinarian Conspiracy” and selections from Sallust’s other works. Comparison with other authors writing on the same topics.

**LATN 1060C. Sallust and Livy.**
Two major Roman historians provide a basis for study of style, intent, veracity, and stature.

**LATN 1060D. Sallust, Livy, and Tacitus.**
Three major Roman historians provide a basis for study of style, intent, veracity, and stature.

**LATN 1060E. Livy.**
Close readings of Livy’s history of Rome, From the Foundation of the City. As we read selections from Books 1, 5, and 21, we will explore several historiographical aspects of Livy’s text. We will consider both the historical tradition Livy was adapting and the influence and intrusion of the Augustan regime upon Livy’s particular construction of the past. We will pay special attention to the roles played by myth, legend, and history. We will also discuss the text as literature and examine how the historian structures and crafts his work into individual books, sets of books, and a coherent multi-volume whole.

**LATN 1060F. Ovid.**
Reading of selections from Ovid’s poetry, with emphasis placed both on close reading and on the texts’ engagement with poetic issues (genre and intertextuality) and with the wider political and cultural issues of Augustan Rome.

**LATN 1060G. Tacitus.**
Will examine the literary and historical significance of Tacitus’ Annals. In addition to reading the entire Annals in English, we will focus on books 1 and 4 of the Latin text, translating 6-8 pages per week (time permitting, we will also practice some sight-translations from book 14). In an effort to understand Tacitus’ place in the ancient historiographical tradition, we will read several secondary sources, many of which respond to (or build on) Ronald Syme’s monumental work. Not open to first year students.

**LATN 1060H. Conquest: Caesar and Tacitus.**
Caesar’s account of the Gallic Wars reconstructs his conquests, defeats, and ultimate victory. We will consider the great general’s aims and objectives in launching such a major military campaign and in writing a history of these endeavors. Was he simply seeking greater glory for the Roman people? After the midterm, we will turn our critical attention to
the life of another Julius: Cn. Iulius Agricola, the Imperial general largely responsible for Rome's conquest of Britain. In this moral biography of his father-in-law, Tacitus mixes panegyric and invective to reveal the less savory aspects of imperialism: Rome's rapacity, corruption, greed, and despotism.

**LATN 1060I. Senecan Tragedy.**
Close reading and thorough translation of two Senecan revenge tragedies, the Medea and Thyestes. Emphasis will be on translation of the Latin, but as time permits we will also be discussing the two plays in their mythological, cultural, historical, and performance contexts. Students should already have four semesters of Latin (LATN 0400) or the equivalent.

**LATN 1110A. Apuleius.**
No description available. WRIT

**LATN 1110B. Augustine, Confessions.**
We will read the Confessions in the light of Augustine’s use of ancient scriptural and pagan language, attending to the ways in which diction impinges on meaning in the autobiographical portions of the work. We will also read excerpts from some of the works written prior to it as a control and on our understanding of the Confessions.

**LATN 1110C. Caesar: Bellum Gallicum.**
No description available.

**LATN 1110D. Civil War Literature.**
Reading of Latin works that deal with the reality and experience of civil war, focusing primarily on the civil war of 49-48 B.C.E.: Caesar’s Civil War, Cicero’s letters of the time, Cicero’s Caesarian orations, and selections from Suetonius and Lucan. Additional readings in translation.

**LATN 1110E. Comedy.**
No description available.

**LATN 1110F. Fortunatus.**
Wide reading in the occasional poetry of the most prolific writer of the early Middle Ages, attending to diction, meter, imagery, allusion, and paying special attention to the (homo- and hetero-) erotic pieces written to the poet’s friends.

**LATN 1110G. Latin Love Elegy.**
Reading of representative selections from each of the Roman elegists: Tibullus, Propertius, and Ovid. Discussion also of the origins and development of love elegy at Rome and exploration of the themes and topos that define the genre. Follows the poets’ negotiations with various discourses and ideologies in Augustan Rome: literary, social, sexual, and political.

**LATN 1110H. Literature at the Court of Charlemagne.**
We will read widely in the Latin literature of the eighth and ninth centuries, paying attention to genre, meter, patronage, and the shifting uses put to poetry in the decades in which Charlemagne ruled.

**LATN 1110I. Lucretius.**
Lucretius’ *De Rerum Natura*, a long philosophical poem, is both a major source for Epicurean philosophical thought and an example of the ambitious Latin poetry of the late Roman Republic. We will read extensive selections from the poem in Latin. Our aim will be to make a detailed exploration of these sections through close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

**LATN 1110J. Petronius.**
Close reading of Petronius’ comic masterpiece, the *Satyricon*, with emphasis on questions of form, narrative technique, and literary intention.

**LATN 1110K. Selections from Latin Authors: Ausonius.**
We will read widely in the poetry of Ausonius, aiming for depth and breadth, but focusing especially on those poems that speak to the ways in which the poet transformed or transferred the classical Latin tradition to his successors.

**LATN 1110L. Medieval Latin Lyric.**
Close reading of a representative sampling of the personal poetry of the Latin Middle Ages, paying attention to what constitutes the lyric mode in the fourth through the twelfth centuries, developments in metrics, the effects of Christianity on vision and voice, the pressures of vernacular traditions, lyric rhetoric.

**LATN 1110M. Plautus.**
We shall read two or three plays of the comic genius of ancient Rome, with focus on Plautus’ language and cultural background.

**LATN 1110N. Latin Comedy: Terence.**
We shall read several plays of Terence. This course is ideal for freshmen who have studied Latin for three or four years in high school and who are taking their first college course and for students returning to Latin after an interval without Latin.

**LATN 1110O. Roman Satire.**
Survey of the genre of Roman verse satire, with special attention to Horace and Juvenal and additional readings in Lucilius and Persius.

**LATN 1110P. Lucan’s Civil War.**
We shall read closely Books 1 and 2 plus further selections from all ten books of Lucan’s epic. Focus will be on translation of the Latin as well as consideration of the poem in its literary and historical context. Neronian Rome. Topics of discussion will include Lucan’s choice and treatment of his historical subject (the Civil War between Caesar and Pompey), his use of highly rhetorical (and often gruesome) language, and his relationship with the epic tradition and, more specifically, with his most significant epic predecessor, Vergil. We shall also read the entire poem in English translation.

**LATN 1110Q. Catilines: Cicero and Sallust.**
Close readings of selections from Cicero’s Catilinarians and Sallust’s *Bellum Catilinae*. We will explore how two contemporary authors responded to the same historical event: the Catilinarian conspiracy. We will consider not only the differences of genre (political speech v. historical monograph), but also the ways in which each author’s involvement affected the content of his presentation. Additionally, we will examine Sallust’s and Cicero’s distinctive positions on Latin diction and stylistics. Prerequisite: Knowledge of elementary Latin grammar and intermediate Latin reading skills.

**LATN 1110R. Catullus.**
We will read all the extant poetry of Catullus with an emphasis on close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

**LATN 1110S. Juvenal.**
A survey of the work of classical Rome’s last great verse satirist, with special consideration to his place in the development of the form and in the literary culture of late first and early second century Rome.

**LATN 1110T. Selections from Latin Authors: Ovid, Ars Amatoria.**
This course will cover Ovid’s *Ars Amatoria*, Book One, as well as other selections from Ovid. Our aim will be to make a detailed exploration of this poetry through close reading of the Latin text and discussion of linguistic, literary, and cultural questions. Quizzes, exams, and a 7 to 10-page term paper will be required.

**LATN 1110U. Latin Epistemology (Cicero, Pliny).**
The personal correspondences of Cicero and of Pliny the Younger offer insight into the social and political workings of Rome in two critical periods: the final decades of the Republic and the decades just before the Empire reached its greatest extent. Selections from Cicero, composed for a private audience, expose the statesman’s inner hopes and anxieties regarding his family, his friends, and his state. Selections from Pliny, self-consciously published by the author himself, not only recount exciting moments in Roman history (such as the early persecution of Christians and Vesuvius’ eruption), but also play with the very genre of epistolopgraphy.

**LATN 1110V. Dying in the Republic.**
For those who witnessed the bloody violence and brutal butchering of the late Republic, death and dying were everywhere. What did these Romans believe happened to the dead? Was there an afterlife? This course explores two texts (Virgil and Cicero) that deal with visions from and of the spheres beyond the realm of the living. Discussion of supplementary material from other authors, religious studies, and material evidence further develop our notions of what it meant to die in the Republic.
LATN 1120A. Literary Culture in the Latin Middle Ages.
This course will survey the genres relevant to the Latin Middle Ages (beast poetry, hymns, sequences, tropes, miracle and passion plays, prosimetrum) and older forms in their medieval incarnations (epic, lyric, elegy, pastoral). We will also do some work in manuscript production, including the interplay of visual and textural modes. Work in selected medieval vernaculars is possible for students so inclined. We will focus on the tenth through the thirteenth centuries.

LATN 1120B. Poetry at the End of the Roman World.
Edward Gibbon thought the "fame of Ausonius condemned the taste of his age." Study of the taste of Ausonius' age, surveying Latin literature written during and after the so-called fall of Rome. Focus on some masterworks of Silver Latinity as a bridge to our period. Sampling of literature from the 4th, 5th, and 6th centuries. Authors include Prudentius, Ausonius, Paulinus of Nola, Sidonius, Avitus, and Fortunatus.

LATN 1120C. Survey of Late and Medieval Latin.
A study of the masterworks of the Latin language written between 350 C.E. and 1300 C.E., with special emphasis on the 4th, 6th, and 12th centuries. The historical development of Latin literature; changes in Latin grammar, syntax, and morphology; innovations in genre, prosody, and stylistics; and the relationship of writings (manuscripts) to art and music.

LATN 1120D. Alcuin.
Alcuin lived a life of wide variety and accomplishment, not least as an important member of Charlemagne’s inner circle and, like many at court, he wrote widely and in multiple genres. From his enormous output this course will focus on the large collections of poetry and letters. We will attend in both gatherings to theme, tone, style, and allusivity and, where appropriate, we will ponder alternate readings in a collection that has not been edited since the late nineteenth century.

LATN 1120E. Writing Lives in Late Antiquity: Jerome and Augustine.
This course will explore the development of new forms of biographical and autobiographical writing in Latin in the fourth and fifth centuries CE. We will focus on two monumental late ancient authors, Jerome and Augustine, and examine the way that these Christian intellectuals conceive of and express ideal lives in a newly Christian Empire. Texts will include selections of Jerome’s Lives of Paul the Monk and Hilarion, his letters, and Augustine’s Confessions.

LATN 1120F. Renaissance Latin Poetry.
This course will cover a diverse selection from the Latin poetry of the Renaissance (fourteenth through seventeenth centuries) in the original language. Epic, lyric, pastoral, and other forms will be on our reading list; we will go over the readings in class with an eye to linguistic questions as well as to literary and cultural questions and to the poets’ rethinking and reshaping of the Classical past for present concerns. This course is open to students who have had at least two years of Latin or the equivalent.

LATN 1150. Latin Prose Composition.
Review of the basic tenets of Latin syntax, composition, and style. English to Latin translation exercises will shore up composition skills; as we study the stylistic traits of seven Roman authors: Cato, Caesar, Cicero, Sallust, Livy, Seneca, and Tacitus. The course will proceed chronologically according to author. Class time will be spent on translation exercises and review, as well as the identification of the stylistic and syntactic characteristics of the seven authors under study.

LATN 1250. Law and Literature.
No description available.

LATN 1810. Survey of Republican Literature.
Our purposes in this survey of Latin literature are to acquire a comprehensive historical perspective on Latin poetry and prose until the end of the Republic and a sense of its phases and the dynamics of its tradition; and to read different styles of Latin poetry and prose with confidence and ease.

LATN 1820. Survey of Roman Literature II: Empire.
This course will survey the major authors of Latin literature in chronological order from Virgil.

LATN 1930A. Cicero: De Oratore.
Close reading of Cicero’s De Oratore.

LATN 1930B. Ammianus Marcellinus.
In brilliant if idiosyncratic language, Ammianus Marcellinus, last of the major Latin historians, records the exciting and fateful events of his own times, the fourth century A.D., including therein his personal and dramatic involvement in events. We will chiefly read his famous account of the deeds of the emperor Julian ("the Apostate"). The course is intended for advanced students.

LATN 1970. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

LATN 2000A. Senecan Tragedy.
LATN 2010A. Catullus in Horace.
No description available.

LATN 2010B. Horace’s Epistles.
No description available.

LATN 2010C. Virgil, Metamorphosis.
No description available.

LATN 2010D. Seminar: Roman Comedy.
We start with a couple of plays of Menander and fragments of New Comedy; we then read representative comedies of Plautus and Terence in depth.

No description available.

LATN 2010F. Ovid, Tristia.
Close examination of the eleven poems that comprise the first book of Ovid’s Tristia.

LATN 2010G. Roman Agricultural Writers.
No description available.

LATN 2010H. Varro.
Survey of the works of Rome’s greatest scholar, the polymath M. Terentius Varro, with focus on De Re Rustica, De Lingua Latina, Antiquitates, and the Menippean satires.

LATN 2010I. Appendix Virgiliana.
We will survey the Latin poetry of the Julio-Claudian period, focusing on collections of pseudonymous texts that have come down under the names of Virgil and others and that include epic, lyric, epigrammatic, elegiac, and other types of poetry, ranging in theme from high-flown panegyrics to raunchy Priapae. Some of these exerted great influence on later writing; some are almost unknown. We will aim for a more nuanced view of Latin poetry and Roman culture between and around the better-studied poetic texts of the period.

LATN 2010J. Terence and Reception in Donatus.
No description available.

LATN 2020F. Seminar: Ammianus Marcellinus.
No description available.

LATN 2030A. The Age of Augustus.
No description available.

LATN 2030G. Augustine: Confessions.
A close reading of selected books of the Confessions against the backdrop of its pagan and Christian sources. Part of the seminar will be devoted to re-constructing the readerly and writerly spaces Augustine inhabits, how those spaces impinge on his engagement of his sources, and what sort of readerly competencies the imply.

LATN 2030H. Graduate Seminar: Caesar, Bellum Civile.
No description available.

LATN 2040. Seminar: Roman Literature.
No description available.

LATN 2080A. Late Latin Literary Culture.
No description available.
LATN 2080B. Lucan
No description available.

LATN 2080C. Late Latin Poetry.
We will read widely and quickly in a selection of poets (Prudentius, Claudian, Sidonius, etc.) but focus our work on the poetry of Fortunatus and Alcuin, paying attention especially to textual issues and the history of scholarship, such as it is, of select poems. Reading knowledge of French required. The seminar will convene for one week at the conference on late Latin poetry to be held in October 2011 on campus. Open to graduate students; advanced undergraduates may enroll with instructor permission.

LATN 2080D. Late Latin Poetry.
We will read selectively in the fourth (Ausanius, Prudentius) and the sixth (Fortunatus) centuries, paying attention to the ancient Latinity informing the compositional habits of these poets, and focusing on the collective writing of a commentary on one book of Fortunatus’ collection. There will be regular reports and some guest lecturers.

LATN 2090A. Elegy.
No description available.

LATN 2090B. Lucretius.
In this seminar, we will read Lucretius’ De rerum natura entire, and discuss it both as a work of Epicurean philosophy and as one of the world’s greatest works of didactic poetry and a masterpiece of Latin literature. Background texts will be assigned from time to time.

LATN 2090C. Ovid: Exile Poetry.
No description available.

LATN 2090D. Propertius.
We will concentrate especially on the elegist’s third book, which has been viewed both as a work of closure (a farewell to the erotic themes dominant in the earlier books) and as transitional (as the poet moves toward the more overtly Callimachean stance and political themes that will characterize the fourth book). While our primary interest will be literary-critical, including especially the elegist’s engagement with his Roman contemporaries, we will also engage seriously with textual criticism, employing Heyworth’s Cynthia and the new Oxford commentary on Book 3 (in addition to the other major commentaries).

LATN 2090F. Tibullus.
No description available.

LATN 2090G. Epigrams.
No description available.

LATN 2090H. Allusion and Its Discontents.
Our concern is both the history and future of the study of allusion in Latin literature. We will explore the implications of the different terms and perspectives associated with our subject: most obviously, allusion and intertextuality, plus interpretative approaches that privilege authorial control and initiative, textual intentions, or readerly reception. Attention will be paid to negotiations not only between poetical works but also between prose works and between prose and poetry. We will also investigate the relationship between allusion and other types of textual appropriation, including translations, adaptations, and direct quotations. A wide variety of Latin texts will be read.

LATN 2110. Seminar: Roman Satire.
No description available.

LATN 2120A. Roman Epigraphy.
A practical introduction to the study of Latin inscriptions, with emphasis on the reading, editing, and interpretation of texts on stone. Class time will be divided between discussion of various categories of texts in the light of the ‘epigraphic habit’, literacy, and the sociology of reading in antiquity and hands-on experience with editing inscriptions on stone.

LATN 2120B. Tacitus.
Close readings of selections from Tacitus’s works, especially the Agricola, Dialogus, and Annales, with emphasis on style, form, and literary intention. Attention will be paid also to Tacitus’s political career and the life of a senatorial historian in the age of Trajan.

LATN 2120C. Graduate Seminar: Apuleius.
No description available.

LATN 2970. Preliminary Exam Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

LATN 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

LATN 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Modern Greek

MGRK 0100. Introduction to Modern Greek.
Designed for students with little or no prior knowledge of Modern Greek. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0200. Introduction to Modern Greek.
A continuation of MGRK 0100. New students may place into it, after special arrangement with the instructor. The course continues on an integrative skills approach and aims to develop language skills, within a framework of specific topics and functions. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0300. Intermediate Modern Greek.
Develops linguistic and cultural competence and may be taken by anyone who has completed MGRK 0200 or after consultation with the instructor and/or a placement exam. It focuses on further development of the four language skills as well as knowledge and understanding of various aspects of Greek society. It employs a variety of materials, including film, digital stories, internet based sources, music, art, and literature.

MGRK 0400. Intermediate Modern Greek.
A continuation of MGRK 0300. New students may place into it, after special arrangement with the instructor. It aims to enhance language skills within a variety of registers and themes; enable the students to master, use and understand effectively essential linguistic structures; examine a variety of expressive forms within an authentic cultural context.

MGRK 0500. Advanced Modern Greek.
May be taken by students who have completed the previous sequences or by anyone who places successfully into the course. The course places emphasis on the improvement of writing and oral skills, via presentations, collaborative projects, conversations and assignments based on topics and texts, drawn from a variety of sources and cultural forms of expression.

MGRK 0600. Advanced Modern Greek.
A continuation of MGRK 0500. Students who have not taken the previous sequence may take a placement test, after consultation with the instructor. The course aims to promote range, accuracy and fluency and enable students to develop ease and spontaneity with the language. Authentic materials drawn from a range of sources inform the content of the course and include films, literature, media, testimonies, music and internet based sources. The development of transcultural competence will be an essential component of the course.

MGRK 1910. Special Topics in Modern Greek.
No description available.
Sanskrit

SANS 0100. Elementary Sanskrit I.
This course introduces Sanskrit to students who have no prior knowledge of any language other than English. Students quickly learn to read the Devanāgarī script and study the basics of the sound-system of Sanskrit. The course rapidly surveys the basics of Sanskrit grammar while using adaptations of classical Indian myths and stories as reading exercises.

SANS 0200. Elementary Sanskrit II.
This course continues the survey of grammar and the reading exercises of SANS 100. The second half of this course reads selected passages of the Bhagavad Gītā and the beginning of the classic story of Nala and Damayantī from the Mahābhārata. Prerequisite: SANS 0100.

SANS 0300. Sanskrit Epic Narrative.
Consolidates and extends the knowledge of Sanskrit grammar introduced in first year Sanskrit; acquaints students first-hand with basic themes of ancient Indian culture, and cultivates the reading and interpretive skills necessary to read epic and closely related Sanskrit narrative with comprehension and increased fluency. Prerequisite: SANS 0200.

SANS 0400. Classical Sanskrit Story Literature.
Introduces students to the more challenging Sanskrit of classical story literature and continues to extend the knowledge of Sanskrit grammar introduced in first year Sanskrit and developed in SANS 0300, as well as present basic Indian cultural themes. Prerequisite: SANS 0300.

SANS 1020. Early Sanskrit Philosophy and Religion.
Reading in Sanskrit of selections from the Upanishads, Bhagavad Gītā, Dharmasāstras, etc. Prerequisite: SANS 0200.

SANS 1080. The Critical Episodes of the Mahābhārata.
A guided tour of the structure of the Mahābhārata, "The Great Epic of India," through the reading in Sanskrit of selected critical passages.

SANS 1100. Vedic Sanskrit.
Introduction to reading the Rig Veda and later Vedic literature, with particular attention to the grammar of Vedic Sanskrit.

SANS 1400. The Sanskrit Grammatical Tradition.
Introduction to the Sanskrit tradition of vyākārana (grammatical derivation and analysis) through reading Pāṇini's Astādhyāyī and commentaries upon it.

SANS 1600. Sanskrit Belles Lettres.
Introduction to kāvya (classical Sanskrit belles lettres) -- poetry, drama, and prose narrative -- through the reading of authors of the Classical Period as well as works on aesthetics and commentaries upon them.

SANS 1800. Classical Schools of Indian Philosophy.
Introduction to the classical Brahminic darsanas (comprehensive, rationalized systems of philosophy and, or, theology dealing with Hermeneutics and Philosophy of Language, Logic, Metaphysics, and Ultimate Beatitude) and to corresponding Buddhist and Jain traditions through reading, in Sanskrit, of selected works. Prerequisite: SANS 0400.

In-depth study of major poetic, dramatic, epic, philosophical, religious, grammatical, medical, or astronomical texts. Topics depend on the interest of students.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor's permission required.

SANS 2100. Theme, Language, and Meter in the Mahābhārata.
This seminar will undertake systematic studies of thematic, linguistic, and metric continua in the text of the written Sanskrit Mahābhārata. We shall alternate between the discussion of important scholarly works of interpretation of the epic, important methodological controversies, and selected case studies focused upon variations in epic language and meter and the tracing of the "threads" of important epic themes across large stretches of the epic. Prerequisite: three or more years study of Sanskrit. Instructor permission required.

SANS 2970. Sanskrit Preliminary Exam Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

SANS 2980. Sanskrit Reading and Research.
Section numbers will vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

Cognitive, Linguistic and Psychological Sciences

Chair
William C. Heindel

Associate Chairperson
Kathryn T. Spoehr

The Department of Cognitive, Linguistic & Psychological Sciences is dedicated to the multidisciplinary study of mind, brain, behavior, and language, and was formed through the merger of the Department of Cognitive and Linguistic Sciences was created in 1986 by merging the Department of Linguistics with the faculty participating in the Center for Cognitive Science. The two departments have typically taken complementary approaches to common scientific questions. State-of-the-art research on these problems requires spanning several levels of analysis using a range of approaches and methodologies, and the integration of the departments aims to create an environment in which this intellectual synthesis will flourish.

For additional information, please visit the department's website: http://www.brown.edu/Departments/CLPS/

Cognitive Neuroscience Concentration Requirements

Cognitive neuroscience is the study of higher cognitive functions in humans and their underlying neural bases. It is an integrative area of study drawing primarily from cognitive science, psychology, neuroscience, and linguistics. There are two broad directions that can be taken in this concentration - one is behavioral/experimental and the other is computational/modeling. In both, the goal is to understand the nature of cognition from a neural perspective. The standard concentration for the Sc.B. degree requires courses on the foundations, systems level, and integrative aspects of cognitive neuroscience as well as laboratory and elective courses that fit within a particular theme or category such as general cognition, perception, language development or computational/modeling. Concentrators must also complete a senior seminar course or an independent research course. Students may also participate in the work of the Brown Institute for Brain Science, an interdisciplinary program that unites ninety faculty from eleven departments.

Standard program for the ScB degree

Concentration Courses
A total of 16 courses are required for the concentration. Each student is required to pass 9 courses designed to introduce students to the foundations (5), systems level and integrative aspects (4) which uniquely define cognitive neuroscience; two laboratory courses; four elective courses; and either a senior seminar course CLPS 1900 or an independent research course. The laboratory and elective courses should fit within a particular theme or category such as general cognition, perception, language development, or computational/modeling. The design of the concentration and selection of courses should be made in consultation with the faculty advisor.
Concentration Advisor.

Students must take four additional courses around a particular theme. Electives can be characterized as either core cognitive neuroscience courses which focus directly on the intersection of mind and brain, or related courses which focus primarily on either the mind or brain. Electives may be chosen from either group. Normally only one elective course that is below the 1000-level may count towards the elective courses required. An appropriate (but additional) laboratory course may be used in lieu of one of the four elective courses. Appropriate Topic course offerings (not listed below) may also count as electives with the approval of the Concentration Advisor. 

### Systems Level and Integrative Courses:

- **CLPS 0040**  Mind and Brain: Introduction to Cognitive Neuroscience 1
- **CLPS 0400**  Brain Damage and the Mind 1
- **CLPS 1291**  Computational Cognitive Science 1
- **CLPS 1400**  Mathematical Methods in the Brain Sciences 1
- **NEUR 1030**  Neural Systems 1

### Laboratory Courses:

Students must choose two laboratory courses. Please note that due to enrollment limits in some lab courses, priority may be given to concentrators in that department. Students should therefore be prepared to choose from the other laboratory options.

- **CLPS 1192**  Experimental Analysis of Animal Behavior and Cognition
- **CLPS 1193**  Laboratory in Genes and Behavior
- **CLPS 1290**  Laboratory in Cognitive Processes
- **CLPS 1490**  Functional Magnetic Resonance Imaging: Theory and Practice
- **CLPS 1491**  Neural Modeling Laboratory
- **CLPS 1510**  Psychology of Hearing
- **CLPS 1690**  Laboratory in Developmental Psychology
- **CLPS 1791**  Laboratory in Social Cognition
- **CLPS 1890**  Laboratory in Psycholinguistics
- **CLPS 1891**  Research Methods in Physiologic and Acoustic Phonetics
- **CLPS 1970**  Directed Reading in Cognitive, Linguistic and Psychological Sciences
- **NEUR 1970**  Independent Study
- **NEUR 1600**  Experimental Neurobiology
- **NEUR 1650**  Structure of the Nervous System
- **NEUR 1670**  Neuropsycharmacology and Synaptic Transmission
- **NEUR 1680**  Computational Neuroscience

### Electives:

Students must take four additional courses around a particular theme. Electives can be characterized as either core cognitive neuroscience courses which focus directly on the intersection of mind and brain, or related courses which focus primarily on either the mind or brain. Electives may be chosen from either group.

- **CLPS 0410**  Principles of Behavioral Neuroscience
- **CLPS 1150**  Memory and the Brain
- **CLPS 1180B**  Biology of Communication
- **CLPS 1400**  The Neural Bases of Cognition
- **CLPS 1470**  Mechanisms of Motivated Decision Making

- **CLPS 1480B**  Cognitive Aging and Dementia
- **CLPS 1480C**  Cognitive Control Functions of the Prefrontal Cortex
- **CLPS 1560**  Visually-Guided Action and Cognitive Processes
- **CLPS 1570**  Perceptual Learning
- **CLPS 1571**  Visual Consciousness
- **CLPS 1620**  Developmental Cognitive Neuroscience
- **CLPS 1621**  The Developing Brain
- **CLPS 1820**  Language and the Brain
- **CLPS 1821**  Neuroimaging and Language
- **NEUR 0650**  Biology of Hearing
- **NEUR 1540**  Neurobiology of Learning and Memory
- **NEUR 1740**  The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders
- **NEUR 1930A**  Cognitive Neuroscience: Motor Learning
- **NEUR 1940I**  Neural Correlates of Consciousness
- **NEUR 1930B**  From Neurophysiology to Perception
- **NEUR 1940D**  Higher Cortical Function

### Related Electives:

- **CLPS 0210**  Human Thinking and Problem-Solving
- **CLPS 0220**  Making Decisions
- **CLPS 0500**  Perception and Mind
- **CLPS 0600**  Child Development
- **CLPS 0610**  Children's Thinking: The Nature of Cognitive Development
- **CLPS 0800**  Language and the Mind
- **CLPS 1100**  Animal Cognition
- **CLPS 1130**  Psychology of Timing
- **CLPS 1140**  Psychophysiology of Sleep and Dreams
- **CLPS 1200**  Thinking
- **CLPS 1210**  Human Memory and Learning
- **CLPS 1220**  Concepts and Categories
- **CLPS 1230**  Seminar in Decision Making
- **CLPS 1240**  Reasoning and Problem Solving
- **CLPS 1241**  Causal Reasoning
- **CLPS 1320**  The Production, Perception, and Analysis of Speech
- **CLPS 1385**  Topics in Language Acquisition: Language Acquisition and Cognitive Development
- **CLPS 1389**  Discourse Processing
- **CLPS 1500**  Ecological Approach to Perception and Action
- **CLPS 1510**  Psychology of Hearing
- **CLPS 1520**  Computational Vision
- **CLPS 1530**  3D Shape Perception
- **CLPS 1590**  Visualizing Vision
- **CLPS 1610**  Cognitive Development
- **CLPS 1611**  Cognitive Development in Infancy
- **CLPS 1650**  Child Language Acquisition
- **CLPS 1730**  Psychology in Business and Economics
- **CLPS 1800**  Language Processing
- **CLPS 1810**  Syntactic Theory and Syntactic Processing
- **NEUR 1930N**  Region of Interest: An In-Depth Analysis of One Brain Area
- **NEUR 1930F**  Brain Interfaces for Humans
- **NEUR 1930G**  Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development

### Primarily Computational/Modeling:

- **CLPS 0900**  Quantitative Methods in Psychology
- **APMA 1650**  Statistical Inference I
- **CLPS 2906**  Experimental Design
- **MATH 0909**  Introductory Calculus, Part I (or equivalent)
- **NEUR 0010**  The Brain: An Introduction to Neuroscience
- **Note:** Students wishing to pursue a computational/modeling track are encouraged to take APMA 1650

- **CLPS 1810**  Primarily Computational/Modeling
- **NEUR 1930G**  Primarily Computational/Modeling
Students are advised to take APMA 0330 (Methods of Applied Analysis I) and APMA 0340 (Methods of Applied Analysis II) as their two supporting science courses. Note that MATH 0100 is a prerequisite for these courses. See CLPS listings (above) for other computational/modeling courses. See CLPS Topics listings for other computational/modeling courses.

- APMA 1360 Topics in Chaotic Dynamics
- CLPS 1211 Human and Machine Learning
- CLPS 1291 Computational Cognitive Science
- CLPS 1470 Mechanisms of Motivated Decision Making
- CLPS 1492 Computational Cognitive Neuroscience
- CLPS 1520 Computational Vision
- CSCI 1410 Applied Artificial Intelligence
- CSCI 1430 Introduction to Computer Vision
- CSCI 1460 Introduction to Computational Linguistics
- CSCI 1480 Building Intelligent Robots
- CSCI 1950A Computational Modeling and Algorithmic Thinking
- ENGN 1220 Neuroengineering
- ENGN 1610 Image Understanding
- NEUR 1680 Computational Neuroscience

One senior seminar course CLPS 1900 or an independent research course.

Total Credits 16

Honors

Students who would like to pursue a degree with honors are normally expected to have half of their grades as A (or equivalent) within the concentration and are required to satisfactorily complete a written thesis and an oral presentation.

Cognitive Science Concentration Requirements

The field of Cognitive Science uses scientific methods of experimentation, computational modeling, and brain imaging to study mental abilities such as perception, action, memory, cognition, speech, and language, as well as the development and evolution of those processes. Students must become knowledgeable in four areas of emphasis: perception, cognition, language, and cognitive neuroscience, as well as a set of methods relevant to Cognitive Science research. Students then create their own focus area of study, potentially integrating coursework from the Cognitive, Linguistic, and Psychological Sciences departments with a diverse subset of fields including Anthropology, Applied Math, Education, Neuroscience, and Philosophy. The A.B. program is primarily for students interested in studying human mental processes and acquiring a research orientation to the study of the mind. The Sc.B. program is designed for students who wish to develop a stronger background in Cognitive Science and requires students to engage in a specific research project in the focus area of their choosing. We recommend that prospective concentrators register for one of the gateway courses and at least one other core course in their first or second year.

I. Standard program for the A.B. degree: 13 courses

---

1. Note: Students cannot use an AP Statistics course in lieu of this requirement. APMA0650 and SOC 1100 will not fulfill this requirement.

2. In most cases, electives must be at the 1000-level and must show coherence and provide the concentrator with depth in one or more focus areas. Only one course below the 1000-level can be included in this list, and only with permission of the concentration advisor. Students are strongly encouraged to work out their program of electives with the concentration advisor.

---

Brown University
Cognitive Science concentrators may use at most two credits of CLPS 1970 or CLPS 1980 towards their degree. Students in the A.B. program can use these two credits to satisfy electives. Students in the Sc.B. program must use one of these credits to satisfy the Independent Study requirement (Requirement B in Section II above), and may use the second to satisfy an elective or one of the four additional courses (Requirement C in Section II).

V. Comments
Both the A.B. and the Sc.B. programs in Cognitive Science reflect recent national trends in the field and the breadth of the course offerings and faculty research interests at Brown. A broadly trained cognitive scientist must possess certain methodological skills, including knowledge of computational methods and research methods (statistics and laboratory techniques), which are incorporated in our skills and methodology requirement. In addition, a cognitive scientist must be conversant in the four major focus areas studied in the field: perception, cognition, languages and cognitive neuroscience. Electives ensure that concentrators have the opportunity to investigate at least one particular area in depth. Finally, the concentration provides an integrative experience to all of its concentrators through the capstone senior seminar. The program is designed to provide the flexibility for each student to design a program that will meet her/his needs and interests. The Sc.B. program is designed for students who wish to bring a stronger background in general science and a research orientation to their study of cognitive science. Sc.B. candidates must also acquire first-hand experience in doing cognitive science research through an independent study project.

Linguistics Concentration Requirements
The concentration in linguistics is designed both for students interested in the discipline itself and for those wishing to use their understanding of linguistic structure to pursue other disciplines. Linguists are concerned with such issues as the commonalities of human languages, why languages change, how our linguistic abilities interact with our cognitive abilities, how language is learnable, and developing formal models of linguistic structure. Fields as diverse as anthropology, legal reasoning, language pathology, technical writing and editing, and Artificial Intelligence (AI) all rely heavily upon methods and models developed in linguistics. Required courses examine linguistic theory, phonology, syntax, and semantics, while electives may focus on computational, mathematical, or socio-linguistics, the philosophy of language, and biology and the evolution of language.

Requirements (10 courses)

Prerequisite Course
CLPS 0030 Introduction to Linguistic Theory (may be waived in special instances) 1

Required Courses
CLPS 1310 Introduction to Phonological Theory 1 1
CLPS 1330 Introduction to Syntax 1 1
Select one of the following courses in phonetics, phonology, syntax, or semantics:
   CLPS 1340 Introduction to Semantics
   CLPS 1341 Lexical Semantics
   CLPS 1342 Formal Semantics
   CLPS 1320 The Production, Perception, and Analysis of Speech
   CLPS 1381 Topics in Phonetics and Phonology: Intonation Phonology
Select one of the following courses in psycholinguistics:
   CLPS 1800 Language Processing
   CLPS 1810 Syntactic Theory and Syntactic Processing
   CLPS 1650 Child Language Acquisition
   CLPS 1890 Laboratory in Psycholinguistics
   CLPS 1820 Language and the Brain

III. Degrees with Honors
Students interested in honors under either the A.B. or Sc.B. programs should identify a faculty honors sponsor and sign up with the concentration advisor during Semester 6. Although there is no minimum grade point average to enter the program, admission to the program is limited to students who have accumulated a strong academic record and are at the discretion of the department. It is expected that honors candidates will conduct a year-long research project under the direction of a faculty sponsor in the CLPS department culminating in a written thesis and oral examination at the end of Semester 8. Students doing honors work must identify a faculty honors sponsor and sign up with the concentration advisor for details.

At least one semester of Independent Study CLPS 1970, OR participation in a directed reading related to Cognitive Sciences (CLPS 1980) OR participation in an ISP or GISP related to Cognitive Science (subject to approval from the concentration advisor). See Section IV for more details.

A coherent program of at least four (4) additional courses in the life sciences (e.g., cognitive science, psychology, or biology), physical sciences, mathematics, and/or applied mathematics that supports the student’s area(s) of study.

Total Credits 18

IV. Independent Study
Independent Study is encouraged for the A.B. degree and required for the Sc.B. degree. Students should sign up for CLPS 1970 or CLPS 1980 with a faculty advisor who is a member of the CLPS Department. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8. CLPS 1970 or CLPS 1980 can count as electives for the concentration requirements.

Section IV for more details.

MOST TOPICS IN COURSES IN CLPS (See Concentration Advisor for details)

CSCI 0220 Introduction to Discrete Structures and Probability
CSCI 0510 Models of Computation
CSCI 1230 Introduction to Computer Graphics
CSCI 1410 Applied Artificial Intelligence
CSCI 1480 Building Intelligent Robots
EDUC 1260 Emotion, Cognition, Education
EDUC 1270 Adolescent Psychology
ENGN 1220 Neuroengineering
ENGN 1570 Linear System Analysis
ENGN 1580 Communication Systems
ENGN 1610 Image Understanding
PHIL 1520 Consciousness
PHIL 1550 Decision Theory: Foundations and Applications
PHIL 1590 Philosophy of Science
PHIL 1630 Mathematical Logic
PHIL 1690 The Problem of Free Will
PHIL 1700 British Empiricists
PHIL 1750 Epistemology
PHIL 1760 Philosophy of Language
PHIL 1770 Philosophy of Mind
PHIL 1780 Philosophy of Biology
PHIL 1880 Advanced Deductive Logic

At least one semester of Independent Study CLPS 1970, OR participation in a directed reading related to Cognitive Sciences (CLPS 1980) OR participation in an ISP or GISP related to Cognitive Science (subject to approval from the concentration advisor). See Section IV for more details.

A coherent program of at least four (4) additional courses in the life sciences (e.g., cognitive science, psychology, or biology), physical sciences, mathematics, and/or applied mathematics that supports the student’s area(s) of study.
Psychology Concentration Requirements

Psychology encompasses a range of phenomena and levels of analysis in pursuit of three goals: to deepen understanding of cognitive and neural mechanisms of sensation, perception, learning, and emotion; to probe the biological and evolutionary foundations of animal behavior; and to clarify the social perception and assessment of individuals and groups. The concentration offers an array of course options, including study in quantitative methods, laboratory techniques, and senior seminars on specialized topics. Students take upper-level courses in the field’s major sub-disciplines, including perception and cognition, behavioral neuroscience, and social psychology. The concentration in Psychology prepares students for careers in clinical psychology, business, policy-related research positions, law, and education.

Concentration Requirements

Introductory Psychology: Planning a concentration and choosing elective courses requires general knowledge about the topics psychologists study. Introductory Psychology (CLPS 0010) is required for the concentration. Students may satisfy the Introductory Psychology requirement by submitting AP (score of 4 or 5) or IB (score of 5 or above) test credit or by transferring Introductory Psychology course credits from other 4-year institutions.

Quantitative: Careers in Psychology and related fields require familiarity with statistics. Therefore, the Psychology concentration requires Quantitative Methods in Psychology (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. The department does not grant concentration credit for AP Statistics, regardless of score. Students who feel that CLPS 0900 is too elementary can complete for concentration credit.

Course Distribution: Concentrators must take at least one laboratory course, which provides students with hands-on experience with research methods in a substantive area of psychology. Because the laboratory serves as the basis for independent research and is a prerequisite for the Honors program, concentrators should plan to take their lab before their senior year. This course must be taken in CLPS. Independent study or laboratory courses in other departments will not fulfill this requirement.

Advanced Seminar: Both A.B. and Sc.B. concentrators are required to take one advanced limited-enrollment seminar/critical readings course. The list of approved seminars varies yearly. Contact one of the concentration advisors for details.

AP and Transfer Credits: Students receiving AP credit for Introductory Psychology can place out of CLPS 0010, and can enroll directly in higher-level psychology courses. AP credits are not accepted for other concentration requirements. Students transferring from another college or university, or students studying abroad or at another US institution, may receive transfer credits for other concentration requirements. Please refer to our departmental policy on applying AP and transfer credits.

The A.B. degree requires 12 courses. The Sc.B. degree requires 17 courses. (Concentrators should complete either the A.B. or Sc.B. Concentration Worksheet before meeting with their Concentration Advisor.)

Comments:

Foreign language courses will generally count towards the concentration requirements, except those which focus on the structure or history of the language. Students are, however, advised to gain familiarity with a foreign language, and are encouraged to take at least one course which deals with the structure of a language other than English. It is strongly recommended that students take CLPS 1310 and CLPS 1330 before Semester 7.

Total Credits: 235

* It is recommended that students take CLPS 1310 and CLPS 1330 before higher level courses.

* Only 2 may be below 1000-level courses. The listings here are not exclusive of the possible electives; students should consult with the concentration advisor about the appropriateness of other courses.

Degrees with Honors (12 Courses)

Candidates for Honors in Linguistics will take a minimum of 10 courses for the concentration which will consist of all requirements for the standard program plus 2 additional courses in Linguistics or related disciplines. One of these courses may be an independent study project upon which the thesis is based. Honors candidates should formalize their projects in consultation with their advisors by the end of Semester 6.

Although no specific grade-point average has been set for acceptance into the Honors Program, only students with a good record and an advisor willing to work with them will be allowed into the Honors Program.

Independent Study

Independent study is encouraged for the A.B. degree. Students should sign up for CLPS 1970 with a faculty advisor who is a member of the Department of Cognitive and Linguistic Sciences. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8.

Two elective courses, with approval of the concentration advisor. 2

Total Credits: 12

1 Or advanced placement with a score of 4 or 5, or transfer credit. If placement for CLPS0010 is granted on the basis of AP or IB test scores, then another CLPS course (at any level) must be substituted.

2 The pre-approved courses in each area are listed on the concentration worksheets. A laboratory course or seminar (indicated on the worksheet) may be used to meet the area requirement only if it is the student's second lab course or second seminar. Independent study courses cannot be used for this requirement. First year seminars outside of CLPS cannot be counted for the area requirement.

3 The worksheets (http://www.brown.edu/Departments/CLPS/undergrad/psychology) include up-to-date lists of labs. Independent study courses and laboratory courses outside of CLPS cannot be used to satisfy this requirement.

4 Consult one of the concentration advisors for lists of approved courses.

5 The electives should complement the student's main area of interest in Psychology. These courses can be taken outside of CLPS. Only courses that carry concentration credit in the home department can be used for this requirement. In addition, independent study and GISP courses will not fulfill this requirement.

Honors

Detailed information about the Psychology Honors program is available on a dedicated page.

Cognitive, Linguistic and Psychological Sciences Graduate Program

The department of Cognitive, Linguistic, and Psychological Sciences is a unique multidisciplinary department that offers Doctor of Philosophy (Ph.D.) degrees in three fields: Cognitive Science, Linguistics, and Psychology. While the department offers transitional Master's degrees en route to the Ph.D., it does not accept applicants into non-Ph.D. programs.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/cognitive-linguistic-and-psychological-sciences
Courses

Cognitive, Linguistic and Psychological Sciences

CLPS 0010. Elementary Psychology: An Introduction to Mind and Behavior.
A survey covering the roles of inherited and environmental determinants of human behavior. Topics include sensation, perception, learning, memory, motivation, emotion, neural processes, language, social development, personality assessment, obedience, interpersonal attraction, and the diagnosis, origins, and treatment of mental illness. Laboratory sections illustrate methodologies used to study these issues. Topic selection varies with instructor.

Cognitive science is the study of the mind from an interdisciplinary perspective. It focuses on such questions as how do we process information to recognize objects and faces, to know that a cup is not a bowl, to remember and learn, and to speak and understand? How can studying the brain inform us about the mind? This course will examine the above questions and discuss major themes in cognitive science including nature-nurture, categories and representations, and the nature of computations. WRIT

CLPS 0030. Introduction to Linguistic Theory.
The ability to speak and understand a language involves having mastered (quite unconsciously) an intricate and highly structured rule-governed system. Linguists seek to model that rule system. This course introduces the principles underlying phonology (the principles which govern how sounds are put together), syntax (the rule system governing sentence structure), and semantics (the system which relates sentences to meanings). LILE

CLPS 0040. Mind and Brain: Introduction to Cognitive Neuroscience.
This course provides an introduction to the neuroscientific study of cognition. Topics surveyed in the course include the neural bases of perception, attention, memory, language, executive function, emotion, social cognition, and decision making. In covering these topics, the course will draw on evidence from brain imaging (fMRI, EEG, MEG), transcranial magnetic stimulation, electrophysiology, and neuropsychology. The course will also consider how knowledge about the brain constrains our understanding of the mind.

CLPS 0050A. Computing as Done in Brains and Computers.
Brains and computers compute in different ways. We will discuss the software and hardware of brains and computers and with introduction to the way brains are organized, the way computers are organized, and why they are good at such different things. We will talk about our current research, the Ersatz Brain Project, an attempt to design a first-class second-class brain. Enrollment limited to 15 first year students. FYS

In a series of theoretical articles, Melvyn Goodale and his collaborators have proposed that separate, but interacting visual systems have evolved for the perception of objects on the one hand and the control of actions directed at those objects on the other hand. This seminar will cover the basic literature addressing this problem with studies involving human and animal studies. Enrollment limited to 20 first year students. FYS

CLPS 0050C. Intentionality and Theories of the Mind.
The purpose of this seminar is to familiarize students with the topic of "theory of mind" – how we understand each other's mental states. In particular, we will focus on how human beings understand other's intenions and beliefs and how we act volitionally. Readings will span developmental, cognitive, social, and cross-cultural psychology as well as neuroscience and philosophy. Emphasis in assignments will be on evaluating and constructing scientific investigations. Reserved for First Year students. Enrollment limited to 20. FYS LILE

CLPS 0050D. Reading Science/Understanding Science.
How is science presented in the modern media? How does this shape the way we think about and understand scientific ideas and the scientific process? Focusing on the brain sciences, we will critically read several award-winning scientific works written for non-specialized audiences, including books by Dawkins, Gould, Pinker, and Sapolsky. We will also consider critiques of these works, as well as related shorter articles intended for wider audiences (e.g., from Scientific American). Finally we will examine several examples of "bad neurojournalism" in an attempt to understand what makes good and bad science reporting. No prerequisites; enrollment limited to 20 first year students. FYS LILE

CLPS 0050E. Animal Minds.
This freshman seminar examines what we can learn about the mind of an animal through observations and manipulations of that animal's behavior. Drawing on the work of biologists, ethologists and psychologists in the field and in the lab, we will critically evaluate the evidence that animals have minds and debate the thesis that their minds are qualitatively indistinguishable from our own. Enrollment limited to 20 first year students. FYS

CLPS 0050F. Olfaction and Human Behavior.
In this first year seminar we will explore how our sense of smell is involved in a variety of psychological processes, including: emotion, learning, memory, language and social behavior. Topics such as olfaction in health, technology and marketing will also be critically examined. Students will acquire the basics of olfactory physiology and perception-cognition through course reading, projects and discussions. Enrollment limited to 20 first year students. FYS

CLPS 0050G. Pidgins, Creoles, and the Emergence of Language.
Pidgins and creoles are language systems that arise in situations of contact between groups without a common language. Their study has informed models of language change and has inspired theorizing about the origins of language, in particular the role children play as agents of language creation and language change. In the last twenty years, however, the field has seen significant upheavals, as foundational assumptions have been challenged and in some cases overturned. This course will consider pidgins and creoles within their socio-historical context, with primary emphasis on what pidgins and creoles can tell us about language emergence and language change. Enrollment limited to 20 first year students. FYS LILE WRIT

CLPS 0050I. Art and Science of Learning.
The course will emphasize normal adult learning, in comparison with learning of special populations, nonhuman animals, and computers. Topics will include perceptual learning, memorization, search, conditioning in changing environments, and motor learning. The role of types and amount of practice, motivation, and talent in the development of expertise in art, music, dance, science, sports, and games will be examined. Readings will be based on laboratory experiments and case histories of experts in a range of fields. Enrollment limited to 20 first year students. FYS

CLPS 0050J. Psychology of Creativity.
This course is a first year seminar intended to introduce students to the lively word of creativity and the science thereof. Classic and contemporary readings will be discussed covering topics ranging from theory and assessment to applications in education, product design, organizational behavior, the arts, and science itself. Students will also be nudged to become more mindful of the role of creativity in their everyday lives. The course will emphasize class discussion and the production of tangible projects. Enrollment limited to 20 first year students. FYS

CLPS 0100. Learning and Conditioning.
Present classical and contemporary approaches to the study of the prediction and control of behavior. Emphasizes theories and data derived from studies of Pavlovian conditioning and instrumental learning with nonhuman animals, but also considers implications for human behavior (e.g., drug-dependent behaviors, eating disorders, behavior modification and psychopathologies). No prerequisites.

An examination of physiological and evolutionary mechanisms underlying species-specific behavior in both vertebrate and invertebrate animals. Topics include: evolution and mechanisms of sensory systems, modes of locomotion, orientation and navigation, communication, and cognitive capacities of animals.
CLPS 0120. Introduction to Sleep. Uses sleep as the focal point for describing complex behavioral phenomena. How is sleep measured and defined? How does sleep differ across species? What accounts for the timing of sleep? How does sleep change with age? What are the behavioral, physiological, and cognitive concomitants of different states of sleep? How can dreaming be understood? What can go wrong with sleep? Recommended prerequisite: CLPS 0010, CLPS 0020 or NEUR 0010; or an AP course in psychology or physiology.

CLPS 0200. Human Cognition. Introduction to theoretical issues and empirical findings motivating controversies in human cognition. Basic issues in cognition - including attention, memory, categorization, reasoning, decision making and problem solving will be examined. Emphasis will be on experimental methods and formal theories. LILE

CLPS 0210. Human Thinking and Problem-Solving. An inter-disciplinary introduction to adult human thinking and reasoning. Covers logical thinking, computational models, reasoning and the scientific method, creativity, intelligence, visual thinking, problem solving in a group setting, and methods of teaching "thinking skills." Students will learn about research findings on these topics and will practice methods for improving their own skills.

CLPS 0220. Making Decisions. Life is full of decisions. Some decisions are made rationally, others could be improved. This course considers the psychology of human decision-making, the analysis of optimal decision-making, and implications for individual action and social policy. Topics include: chance and preference (e.g., how do consumers weigh attributes when making purchases?); the value of information (e.g., when should physicians order expensive diagnostic tests?); risky choice (e.g., is it rational to play the lottery?).

CLPS 0330. The Grammar of English. English probably has greater international utility and importance today than any other human language. This no-prerequisites course takes seriously the idea that we should be able to describe its structure accurately. Challenging two hundred years of myths and mistakes, it attempts to offer students a rigorous basis for understanding sentence structure. Enrollment limited to 40.

CLPS 0400. Brain Damage and the Mind. Brain damage in human subjects can produce dramatic and highly selective impairments in cognitive functioning. This course provides an overview of the major neuropsychological disorders of perception, language, memory, thought, and action. Emphasizes the development of human information processing models for understanding the cognitive deficits observed in brain-damaged patients and the implications of neuropsychological findings for models of normal cognition.

CLPS 0410. Principles of Behavioral Neuroscience. A lecture course that covers the bodily systems that underlie motivated behavior. Topics include the autonomic nervous system, drugs and behavior, hormones and behavior, reproductive physiology/behavior, homeostasis, biological rhythms, emotions and stress, the neurobiology of mental disorders, and biological perspectives on learning and memory. Does not cover synaptic transmission or sensory processing and perception. Prerequisite: background in psychology, neuroscience, or linguistic/cognitive science including an introductory course (CLPS 0040, COGS 0720, CLPS 0400 (PSYC 0470), or NEUR 0010).

CLPS 0500. Perception and Mind. How do the mind and the brain take physical energy such as light or sound and convert it into our perception of the world? This course examines the behavioral and biological bases of human and animal perceptual systems, including vision, audition, smell, taste, and touch. Particular emphasis is placed on high-level perception and how it relates to other cognitive systems.

CLPS 0510. Perception, Illusion, and the Visual Arts. Visual art can be viewed as an exploration of perceptual questions. This course considers the representation of space and time in painting and film from the viewpoint of the science of visual perception. Topics include Renaissance linear perspective, picture perception across cultures, color, form, shape, abstraction, how film editing constructs events, and why Godzilla looks phony. Slide lectures and visual exercises. LILE

CLPS 0530. Making Visual Illusions. Visual illusions are vivid examples of the mistakes our visual systems make. This interdisciplinary course is designed for art and science students with interests in visual perception to explore how and why visual processing sometimes fails. Course work will include hands-on laboratory experiments and art construction exercises. Topics will include color, brightness, and geometric illusions. Enrollment limited to 15. LILE

CLPS 0600. Child Development. Children's behavior and development from infancy through adolescence. Major topics include learning, perception, parent-child attachment, language, intelligence, motivation, emotional development, and peer relations. Major developmental theories, including psychoanalytic, ethological, social learning, and cognitive, are considered as organizers of these phenomena and as a source of testable hypotheses.

CLPS 0610. Children's Thinking: The Nature of Cognitive Development. An examination of children's thinking and cognitive development from infancy to middle childhood. Considers a range of topics including memory, reasoning, categorization, perception, and children's understanding of concepts such as space, time, number, mind, and biology. Major theories of cognitive development are described and evaluated in light of the available psychological data. LILE

CLPS 0640. Developmental Psychopathology. A comprehensive introduction to child and adolescent psychological disorders. Focuses on risk, vulnerability, and protective factors in order to probe why some children develop significant psychological problems when others do not. Emphasis on how biological, psychological, and sociocultural factors interactively contribute to the development of psychopathology. Examines effective treatments, as well as educational and social policy implications. Prerequisite: CLPS 0010, 0200, or 0600.

CLPS 0700. Social Psychology. Examines the theories, findings, and methods of social psychology. Topics include: social cognition (person perception, attitudes), social influence (cultural sources of attitudes, conformity), and social relations (aggression, altruism, prejudice). Students become better informed consumers of empirical research and acquire a new framework for interpreting social behavior. Applications to historic and current events.

CLPS 0701. Personality. A survey of the major perspectives (psychoanalytic, behavioral, humanistic, etc.) within theories of personality. Particular emphasis is placed on the integration of research and theory.

CLPS 0800. Language and the Mind. Explores fundamental issues in psycholinguistics: what is the nature of language; what are its biological underpinnings; how does the mind process speech, recognize words, parse sentences, comprehend discourse; what do effects of brain injuries on language reveal about the organization of language in the mind? Syntheses of results from multiple modes of analysis — linguistic, psychological, computational, and neurophysiological — are emphasized. LILE

CLPS 0810. The Biology and Evolution of Language. Human language is made possible by specialized anatomy and brains that can regulate speech production, complex syntax, and acquiring and using thousands of words. This course examines Darwin's theory of evolution and the archaeological and fossil records of human evolution; studies of chimpanzee communication, culture, and language which provide insights on human evolution; the physiology of human speech; and recent studies of the brain bases of human language and thought.

CLPS 0900. Quantitative Methods in Psychology. A survey of statistical methods used in the behavioral sciences. Topics include graphical data description, probability theory, confidence intervals, principles of hypothesis testing, analysis of variance, correlation, and regression, and techniques for categorical data. Emphasizes application of statistical methods to empirical data.
CLPS 1080A. Intentionality.
The purpose of this seminar course is to familiarize students with the topic of “theory of mind” - how we understand other’s mental states. In particular, we will focus on how children develop an understanding of others intentions and beliefs. While the majority of the reading will be in developmental psychology, cognitive, social, clinical and comparative literatures will also be examined.

CLPS 1080C. Evolution of the Brain Bases of Creativity.
Humans share virtually all of our genes with chimpanzees, yet you are reading this sentence on a device that no chimpanzee could have made. For that matter, your grandparents would have been baffled had they encountered email. Creativity - the drive to think of new concepts, new ways of doing things, and new things - marks us. In this vein, we will read and discuss the findings of new studies that are exploring the neural bases and evolution of human creativity. We will also consider the alternative, that we are ruled by genes that evolved more than 50,000 years ago. Enrollment limited to 40.

CLPS 1090. Research Methods in Psychology.
This upper division laboratory course is designed to provide CLPS concentrators (psychology/cognitive science/cognitive neuroscience) with the tools to comprehend, conduct, and report on psychological research. Students will learn about the central aspects of research, including reviewing literature, formulating hypotheses, designing experiments, collecting/analyzing data, and presenting findings in written and oral reports. Lectures and laboratory exercises will survey a variety of methods to prepare students to design and execute their own research projects.
Class time will be divided between lectures, discussion, labs, and student presentations. Prerequisites: CLPS 0010 or CLPS 0020 and CLPS 0900 or APMA 1650. Enrollment limited to 25.

CLPS 1092. Psychological Theory.
An examination of types of explanations used in psychology, with an emphasis on quantitative models of perception, learning, and motivation. Students implement models on a computer and compare theoretical predictions to observed facts. No previous experience with computers assumed; students will learn to implement and develop theories based upon spreadsheets.

CLPS 1100. Animal Cognition.
A seminar focusing on the experimental analysis of animal mental processes such as perception, attention, learning, memory, and decision-making. Some specific topics include navigation, visual search, working memory, time perception and memory, song learning in birds, and concept formation. Prerequisite: advanced lab.

CLPS 1110. Behavior Modification.
Examines basic principles of learning theory as applied to the development and change of human behavior. Topics include: experimental design in animal and human research, addictive behavior, fear and anxiety reduction, cognitive behavior modification, self management, child behavior modification, and clinical therapy. Prerequisites: CLPS 0701 (PSYC 0300) or CLPS 1700 (PSYC 1330). Enrollment limited to 50.

CLPS 1120. Physiological Psychology.
Research articles focusing on the neural regulation of behavior are discussed, with an emphasis on experimentation in animal models. Topics vary from year to year but may include the neural and molecular mechanisms regulating social behaviors, the mechanisms and site of action of drugs of abuse, development of neural systems, sensory information processing and genetic analysis of behavior. Prerequisites: CLPS 0410 (PSYC 0750) or NEUR 0010. Enrollment limited to 25.

CLPS 1130. Psychology of Timing.
Topics include temporal perception, memory, and preferences; cognitive, biological, and quantitative theories of timing; biological rhythms; pharmacological influences on time perception and timed performance; altered timing in abnormal states; and timing in sports and music. Enrollment limited to 20.

CLPS 1140. Psycho-physiology of Sleep and Dreams.
Overview of sleep, biological timing, dreaming, and sleep disorders. Topics include physiology of NREM and REM sleep, circadian rhythms, determinants and measurement of daytime sleepiness, development and phylogeny, dreaming, and sleep functions. Biological bases and behavioral concomitants of sleep disorders are assessed. Prerequisites: CLPS 0010 (PSYC 0010) and NEUR 0010, or CLPS 0110 (PSYC 0550), or other background in NREM science or physiology. Students who have taken CLPS 0120 (PSYC 0550) should not take this course. Not open to Freshmen or Sophomores.

CLPS 1150. Memory and the Brain.
This class is for undergraduate and beginning graduate students of psychology, cognitive neuroscience, and biology interested in to biological research on memory. There are four parts: 1) how neurons are connected and communicate, 2) fundamental issues in the psychology of memory, 3) memory localization in the brain, and 4) consolidation of memory into a permanent store. The course is designed to be accessible to students in a variety of disciplines, but requires background in psychology, cognitive science, or neuroscience. The class will include lecture, writing assignments, and presentations of primary research articles. Prerequisite: CLPS 0010, 0020, 0040, 0200, or NEUR 0010.

CLPS 1180A. Canine Behavior.
Topics covered in this seminar include canine perception, cognition, vocalization, and social behavior. The behavior of wolves and other wild canids is explored to facilitate our understanding of dog behavior. Observational field work is required in addition to regular class meetings. Prerequisites: CLPS 0050E, CLPS 0100, CLPS 1110, or CLPS 1192. Not open to first year students.

CLPS 1180B. Biology of Communication.
The study of animal communication systems from mechanistic, developmental, ecological, and evolutionary perspectives. The use of auditory, chemical, and visual cues for mediating intraspecific communication in both vertebrate and invertebrate animals. Recommended prerequisites: CLPS 0110 (PSYC 0500), CLPS 1192 (PSYC 1200), BIOL 0450, or equivalent.

CLPS 1190. Techniques in Physiological Psychology.
Laboratory course in behavioral neuroscience for advanced students of psychology or neuroscience. The goal is to gain “hands on” research experience with a variety of behavioral assays used to assess the effects of genetic mutations on behavior. Over the course of the semester, students will examine the behavioral phenotype of three mouse models of human disease and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 (PSYC 0750) or NEUR 0010, and CLPS 0900 (PSYC/COGS 0090).

CLPS 1191. Animal Behavior Laboratory.
This course is designed for students with a serious interest in animal behavior research. Topics include methods in lab and field research, enrichment programs for captive species and conditioning procedures for managing zoo and shelter animals. Prerequisites: CLPS 0900 (COGS/PSYC 0900). Enrollment limited to 12; not open to first year students.

A laboratory course on the prediction, control, and explanation of the behavior of animals in simple environments. Prerequisite: CLPS 0900 (PSYC/COGS 0090).

CLPS 1193. Laboratory in Genes and Behavior.
Laboratory course in behavioral neuroscience designed to provide research experience in assessing effects of genetic alterations on behavior. Students examine the behavioral phenotype of a mouse model of human disease. Mice are tested on behavioral batteries to assess, for example cognitive, affective, and sensorimotor behavior. Recent cloned animal models of early life stress, Fragile X Mental Retardation, and Alzheimer’s Disease. Students will test the mice, analyze the data, and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 or NEUR 0010, and CLPS 0900 or instructor permission. Enrollment limited to 10; not open to first-year students. WRIT

CLPS 1194. Sleep and Chronobiology Research.
Part of a summer immersion in behavioral science research in human sleep and chronobiology. Instruction in human sleep and circadian rhythms, research techniques in basic physiology, laboratory skills, ethics of research, and basic CPR. Research seminars explore other techniques and career paths. Recommended prerequisite: CLPS 0010 is preferred; NEUR 0010 is also acceptable. Enrollment limited to 12.
Course open only to students admitted to the Sleep and Chronobiology Research Apprenticeship. Must apply here: www.sleepforscience.org/ academic/apprenticeship.php (http://www.sleepforscience.org/academic/apprenticeship.php)

CLPS 1194 has a commitment from May 26-August 21, 2014.

CLPS 1200. Thinking. An investigation of conceptual structure, judgment, and inferential processes. The focus is on the relation between empirical evidence, theories, and models of cognitive process and structure. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1210. Human Memory and Learning. How does human memory work and why are some things easier to learn and remember than others? This course covers experimental and behavioral studies of human memory including long- and short-term memory for text, pictures, spatial information, and autobiographical events. Emphasis on real-world situations, including education, in which memory and learning play a role. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1211. Human and Machine Learning. How is human memory like a search engine? Is human knowledge like the internet? What can artificial intelligence and machine learning tell us about the mind? How can studying the mind help machine learning? This seminar explores parallels between human cognition and contemporary research in computer science, emphasizing common problems. In addition to the above, topics include simplicity, object recognition, categorization, and causality.

CLPS 1220. Concepts and Categories. Our knowledge of the world is organized into concepts and categories. What is the basis of this organization? What information is used to make category judgments? How do children acquire concepts and categories? How are our concepts related to the language we speak? This course will examine these questions from an interdisciplinary perspective, combining relevant work in cognitive and developmental psychology, philosophy, linguistics, and computational modeling. Recommended prerequisite: CLPS 0200 (COGS 0420).

CLPS 1240. Reasoning and Problem Solving. How do people reason about informal events in everyday life and more formal subject domains? What are the fallacies that people endorse and how can they be averted? What are some strategies for developing critical reasoning skills? A presentation of theories of human reasoning and problem solving and their applications to educational practice. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1241. Causal Reasoning. This seminar will concern the principles and processes by which people learn causal knowledge and engage in causal inference, including prediction, explanation, and counterfactual reasoning. Some emphasis will be on probabilistic models of causal inference and on the development of causal reasoning in young children. Enrollment limited to 20 juniors, seniors, and graduate students.

CLPS 1250. Human Factors. The application of knowledge of human characteristics to the design of equipment, facilities, and environments for human use. Research on attention, perception, learning, and decision making will be applied to problems in various areas including: aviation, highway safety, industrial safety, consumer products, human-computer interaction, and aging. Enrollment limited to 25.

CLPS 1280A. Moral Reasoning. A review of research on how people make moral judgments. We will discuss and attempt to integrate diverse perspectives and research on cognition, action, and emotion from cognitive science, cognitive neuroscience, and philosophy.

CLPS 1290. Laboratory in Cognitive Processes. Presents the experimental way of thinking by pursuing several topics in an interactive computer-based laboratory. Students run experiments as a class and, by the end of the course, run their own experiment. Focus is on experimental design, procedure, analysis, and reporting. Topics include attention, visual imagery, memory, and reasoning. Prerequisite: CLPS 0900 (COGS/PSYC 0090) and CLPS 0200 (COGS 0420). Recommended prerequisites: CLPS 0500 (COGS 0440) or permission of the instructor.

CLPS 1291. Computational Cognitive Science. Provides an introduction to computational modeling of cognition, summarizing traditional approaches and providing experience with state-of-the-art methods. Covers pattern recognition and connectionist networks as well as Bayesian probabilistic models, and illustrates how they have been applied in several key areas in cognitive science, including visual perception and attention, object and face recognition, learning and memory as well as decision-making and reasoning. Focuses on modeling simple laboratory tasks from cognitive psychology. Connections to contemporary research will be emphasized highlighting how computational models may motivate the development of new hypothesis for experimental design in cognitive psychology. Prerequisite: comfort with basic linear algebra.

CLPS 1310. Introduction to Phonological Theory. Examines some of the classic and current issues regarding sound structure in the world’s languages and introduces the theoretical tools needed to solve them. After an introduction to articulatory phonetics and phonemic analysis, it focuses on phonological analysis of different languages, and discusses rule-based and constraint-based approaches to phonology. Implications for language learning and language change are discussed. Prerequisite: CLPS 0030.

CLPS 1320. The Production, Perception, and Analysis of Speech. An introduction to the basis of the acoustic analysis of speech, the anatomy and physiology of speech production, and the perception of speech. Discussion and demonstration of quantitative computer-implemented methods for speech analysis. Linguistic and cognitive theories are discussed in relation to the probable neural mechanisms and anatomy that make human speech possible. Lectures, discussion, and laboratory demonstrations.

CLPS 1330. Introduction to Syntax. An in-depth investigation of natural language syntax, an intricate yet highly organized human cognitive system. Focuses primarily on the syntax of English as a means of illustrating the structured nature of a grammatical system, but the broader question at issue is the nature of the rule system in natural language syntax. Prerequisite: CLPS 0030 (COGS 0410).

CLPS 1340. Introduction to Semantics. An introduction to a variety of issues in linguistic semantics and in the related philosophical literature. Topics include: the nature of semantic representations; the relationship between meaning and the world; truth-conditional and "logical" semantics; word-meaning; the interaction of semantics and pragmatics; presupposition; the interaction of semantics with syntax.

CLPS 1341. Lexical Semantics. The representation of word meaning and generalizations about the way in which meanings are packaged into words. Topics include: "fuzzy" meanings, natural kind terms, how word meanings are decomposed. Special emphasis on how temporal properties are encoded, on the status of "thematic relations," and on how the fine-grained structure of word meanings impacts on the syntax. Recommended prerequisite: CLPS 0030 (COGS 0410).

CLPS 1342. Formal Semantics. Model-theoretic approaches to the study of the semantics of natural languages. Develops the tools necessary for an understanding of "classical" formal semantics (the lambda calculus, intensional logic; Montague’s treatment of quantification, etc.); then applies these tools to the analysis of natural language semantics; and finally turns to recent developments in formal semantic theory. Prerequisite: some familiarity with syntax or semantics or basic set theory and logic.

CLPS 1350. Introduction to Mathematical Linguistics. Introduction to basic concepts and goals of mathematical linguistics with emphasis on implications for theories of natural languages. Investigates the properties of regular, context-free, and context-sensitive languages; categorical grammar and combinators and the properties of natural language in light of the results on formal grammars. Recommended
prerequisite: CLPS 0030 (COGS 0410) and/or a background in basic theory and logic; familiarity with syntax is recommended.

**CLPS 1360. Introduction to Corpus Linguistics.**
The study of Linguistics relies on language production data. Language corpora contain various sources of such data, often annotated to include additional information such as syntactic, semantic and phonological properties. Such databases often complement or even replace data sources used in other disciplines. This class aims to train students in the use of some of the tools that are commonly used to access and evaluate data in linguistic corpora. Prerequisite: CLPS 0030. Enrollment limited to 25.

**CLPS 1381. Topics in Phonetics and Phonology: Intonational Phonology.**
This course is an in-depth study of intonation—the manipulation of pitch and length to signify sentence-level meaning—in English as well as in other languages. This course will have two components, which will overlap considerably. In the laboratory skills component, you will learn how to collect, transcribe, measure, and analyze intonational data in Praat (a program for acoustic analysis), while in the theoretical component, you will read about and test the claims of various theories of intonation. With these skills, you will conduct independent research over the course of the semester. The course will also cover the interface between intonation and syntax/semantics, including the realization of focus in prosody.

**CLPS 1381A. Topics in Phonetics and Phonology: How Phonetics Shapes Phonology.**
Rule-based and constraint-based descriptions of phonological systems predict the existence of phenomena that are never observed in human language. What constrains which sound systems, rules and phonological constraints would exist in a language? What makes a phonological rule natural and other rules unnatural? We will discuss several different approaches that integrate phonetic insights into phonology.

**CLPS 1382. Sounds of the World's Languages.**
This course will introduce you to phonetics: the study of the physical aspects of speech. You will learn how to produce, perceive, describe, and transcribe the sounds of the world's languages. You will learn the fundamentals of acoustic and articulatory phonetics to better understand the properties of and mechanisms behind each speech sound. You will also gain practical skills in recording and measuring acoustic data, transcribing data in the International Phonetic Alphabet (IPA), and producing both familiar and foreign sounds in isolation as well as in real and hypothetical words. Prerequisite: CLPS 0030 or equivalent.

**CLPS 1383A. The Boundary of Semantics and Pragmatics.**
This course will examine some recent controversies regarding the question of just what is accounted for by grammatical apparatus as opposed to what can be accounted for by "Gricean" pragmatics (i.e., inferences that listeners draw that are not encoded in the grammar). Particular attention will be paid to some topics surrounding negation, including the distribution of "Negative Polarity Items". Prerequisite: CLPS 1330, 1340, or 1341. Enrollment limited to 40.

**CLPS 1385. Topics in Language Acquisition: Language Acquisition and Cognitive Development.**
What is the relationship between how we think and how we speak? This course explores the concurrent development of children's linguistic and cognitive abilities. Topics include the relationship between word meanings and concepts, the structure of the mental lexicon, pragmatic development, and the Whorfian hypothesis (whether speakers of different languages think differently). Students will read and discuss empirical and theoretical articles, and complete a set of writing assignments and problem sets. Prerequisite: CLPS 0610 or equivalent, or permission of the instructor. Appropriate for students interested in developmental/cognitive psychology, linguistics, and applied fields such as speech-language pathology.

**CLPS 1387. Topics in Neurolinguistics.**
No description available.

**CLPS 1389. Discourse Processing.**
Over the last decades psychologists have converged on a generally accepted framework for describing how humans process language at the sentence level. Much less is understood, however, about processing at the discourse level, where multiple sentences are understood to form a coherent whole. In this course we take an in-depth look at the question of discourse processing. We begin with a review of early models of discourse and narrative structure, turning next to findings from the sentence processing literature which implicate discourse structure. We consider both behavioral and neuro-imaging data in a critical analysis of past and current theories.

**CLPS 1390. Linguistic Field Methods.**
A lab/practicum course introducing the methodologies needed to collect, manage, and interpret primary data pertaining to the phonetic, phonological, morphosyntactic, semantic, and pragmatic properties of an understudied language. To achieve this, the course takes a hands-on approach, with students working in groups and individually with a native speaker consultant of an unfamiliar language. Students will learn how to test hypotheses about the language as well as construct grammatical descriptions or sketches. In addition, the course will cover a variety of practical, technological, interpersonal, cultural, and ethical issues typically encountered in fieldwork. Pre Requisite: CLPS 1310 and one other 1300-level course in CLPS or instructor permission.

**CLPS 1400. The Neural Bases of Cognition.**
Research using animal models has informed and guided many of the recent advances in our understanding of the brain mechanisms underlying cognition. This seminar course will address topics related to animal models of human cognition. Students learn about how different aspects of the neural bases of cognition are modeled in animals by reviewing the primary research literature. The course is divided into three sections, each addressing one animal model in one cognitive domain. Selected papers will emphasize learning, memory, and attention, but may also address other aspects of cognition, for example decision-making, or cognitive impairment associated with neuropathology or aging. Prerequisite: CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 1190 (PSYC 1030), CLPS 1191 (PSYC 1450), CLPS 1192 (PSYC 1200), or NEUR 1600; or instructor permission. Enrollment limited to 20. Not open to first year students.

**CLPS 1420. Cognitive Neuropsychology.**
This seminar will explore the effects of brain damage on cognitive function. The goal of cognitive neuropsychology is to understand the effects of brain pathology within the context of modern theories of cognition, and to draw inferences about normal or intact cognitive function from patterns of dysfunction observed with brain pathology. Selected papers will focus on the interface between intonation and current theories. Prerequisite: CLPS 1310 (PSYC 1030), CLPS 1191 (PSYC 1450), or NEUR 1600; or instructor permission. Enrollment limited to 20.

**CLPS 1470. Mechanisms of Motivated Decision Making.**
How do we make decisions? This course considers the factors and mechanisms involved in motivated decision making, as informed by cognitive, neuroscientific, and computational modeling approaches. Readings will span a range of populations (e.g., healthy adults, adults with acquired brain damage, monkeys) and methods (e.g., behavioral, genetic, pharmacological and neuroimaging studies, electrophysiological recordings). Computational models will be prominently featured as a means for formalizing decision making theories across multiple levels of analysis, some focusing on high-level cognitive computations and others on neural mechanisms. Prerequisite: CLPS 0010, 0040, 1291, 1400, 1491, 1492, or NEUR 0010. Enrollment limited to 20. Not open to first year students.

**CLPS 1480A. Cognitive Neuroscience of Emotion.**
Topics discussed in this course include: visual attention, awareness, emotional perception, and emotional memory. Classes will be structured around the discussion of current papers in the literature. Active participation in class is required, including the presentation of papers from the literature. Enrollment limited to 20.

**CLPS 1480B. Cognitive Aging and Dementia.**
This seminar examines the cognitive changes associated with normal aging and age-related dementia (e.g., Alzheimer’s Disease). Topics covered will include changes in the neurocognitive systems mediating memory, perception, and attention. The course is primarily intended as an advanced seminar for junior and senior concentrators in Psychology, but is also intended for other students interested in aging and the
neuropsychology of cognition. Recommended prerequisites: An introductory course in cognitive neuroscience (CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470)) or permission of the instructor. Preference will be given to senior concentrators in Psychology and related areas. Enrollment limited to 20.

CLPS 1480C. Cognitive Control Functions of the Prefrontal Cortex.
The prefrontal cortex has long been known to support higher cognitive functions, including working memory, planning, reasoning, and decision making. This seminar offers an in-depth review of recent empirical and theoretical approaches to understanding prefrontal cortex function. This year the course will focus on prefrontal contributions to the cognitive control of declarative memory. Enrollment limited to 20.

CLPS 1480D. Cognitive Neuropsychiatry.
Will provide a broad survey of the field of cognitive neuropsychiatry. The approach taken is based on the knowledge of brain-behavior-cognition relationship and allows explaining psychiatric phenomena in terms of deficits in normal cognitive mechanisms, as well as drawing conclusions about normal cognitive functioning based on patterns of impaired and intact cognition observed in clinical populations. Topics surveyed include delusions, hallucinations, social-emotional symptoms of schizophrenia, thought and language disorders, conversion disorder, obsessive-compulsive disorder, bipolar disorder, major depression, Parkinson’s and Alzheimer’s Disease. Prerequisite: CLPS 0040 or 0400, or instructor permission. Enrollment limited to 25 juniors, seniors and graduate students concentrating in Cognitive, Linguistic and Psychological Sciences. WRIT

This seminar will examine the use of a new imaging technique, Near Infrared Spectroscopy (NIRS) for understanding the neural systems underlying perception, language, and higher cognitive functions. Research focusing on both normal (infants and adults) and pathological populations (individuals with autism, Alzheimer’s disease, aphasia, and deafness) will be examined.

CLPS 1480F. Topics in Cognitive Neuroscience: Cognitive Neuroscience of Memory.
This course will provide an in-depth treatment of advanced topics in the cognitive neuroscience of memory. The course will draw on primary studies using empirical and theoretical approaches to address current problems in memory. Meetings will feature student presentations and discussion centered around weekly readings.

This course will train students in the practice and use of functional magnetic resonance imaging (fMRI) as a cognitive neuroscience methodology. Topics covered include MRI physics, the physiological basis of the BOLD signal, experimental design, data collection, statistical analysis, and inference. A practical component of the course includes the opportunity to collect and analyze fMRI data at the Brown MRF. Prerequisites: CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 0900 (PSYC/COGS 0090), or instructor permission. Enrollment limited to 20.

CLPS 1491. Neural Modeling Laboratory.
Numerical simulations of cognitively oriented nervous system models. Discussion of parallel, distributed, associative models: construction, simulation, implications, and use. Prerequisites: MATH 0090, 0100, or equivalent; knowledge of a computer language; some background in neuroscience or cognitive science is helpful.

CLPS 1492. Computational Cognitive Neuroscience.
We explore neural network models that bridge the gap between biology and cognition. Begins with basic biological and computational properties of individual neurons and networks of neurons. Examines specialized functions of various brain systems (e.g., parietal cortex, frontal cortex, hippocampus, ganglia) and their involvement in various phenomena, including perception, attention, memory, language and higher-level cognition. Includes a lab component in which students get hands on experience with graphical neural network software, allowing deeper appreciation for how these systems work. Prerequisites: CLPS 0020 (COGS 0010) or CLPS 0200 (COGS 0420), and CLPS 0410 (PSYC 0750) or NEUR 0010.

CLPS 1500. Ecological Approach to Perception and Action.
The ecological approach treats perceiving and acting as activities of agent-environment system rather than an isolated “mind,” and offers an alternative to the prevailing computational/representational view. Topics include inferential and direct perception, perception of the 3D environment, visual control of action, dynamics of motor coordination, and self-organization of behavior. Lecture and discussion. Prerequisite (any one of the following): CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), CLPS 0500 (PSYC/COGS 0440), or CLPS 0510 (COGS 0110).

CLPS 1510. Psychology of Hearing.
How do we hear the world around us? In this course, we will examine basic phenomena underlying human auditory perception, focusing on topics such as masking, pitch perception, sound localization, and auditory scene analysis. We will discuss theories of hearing, experimental techniques to evaluate hearing, and the impact of age-related declines in hearing on human psychology. Open to juniors and seniors. Prerequisite: NEUR 0650 or equivalent, or instructor permission.

CLPS 1520. Computational Vision.
An introduction to computational models of biological vision summarizing traditional approaches and providing experience with state-of-the-art methods. We will sample topics from low- and mid-level vision including fundamental aspects of image, stereo, motion, surface and color processing to high-level vision including object and action recognition as well as scene understanding. Connections to contemporary research in computer vision and computational neuroscience will be emphasized highlighting how computational models may motivate the development of new hypothesis for the design of experiments in visual perception. Prerequisite: comfort with basic linear algebra and at least one introductory course in Computer Science or programming, or instructor permission.

CLPS 1530. 3D Shape Perception.
Our ability to move in the environment, recognize and grasp objects, depends enormously on the capacity that the brain has in organizing the visual stimulation in the perceived 3D layout. 3D objects in the world project on the human retina flat images. How does the brain re-transform these flat images into a 3D representation? Enrollment limited to 40.

CLPS 1540. Human Factors.
The application of knowledge of human characteristics to the design of equipment, facilities, and environments for human use. Research on attention, perception, learning, and decision making will be applied to problems in various areas including: aviation, highway safety, industrial safety, consumer products, human-computer interaction, and aging. Enrollment limited to 25.

CLPS 1550. The Psychology of Aversion.
Explores what is aversive to us and why. In particular, the ways in which sensory perception (e.g., smell, taste, vision), cognition, culture, personal experience and neurobiology mediate our avoidance responses will be analyzed. The purpose of avoidance from an evolutionary perspective and how the emotion of disgust is uniquely human will be a theme throughout the course. Topics will range from neuropsychological disorders to our social behavior and morality. Additionally, why we are attracted to stimuli that “should” inspire avoidance (e.g., horror movies, roller coaster rides) will be examined. Students will acquire a broad knowledge of the psychology of aversion through course readings, discussions, projects and active participation. In addition to presentations and discussion, class time activities may include completing questionnaires, watching videos and assessing various sensory stimuli. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 20 students. Not open to first year students. LILE

One of the main purposes of encoding visual information is to perform visually-guided actions to directly interact with the external world. This seminar will shed light on the behavioral and underlying neural mechanisms involved in integrating perception and cognitive processes, and converting them into action. We will also explore how visuo-motor behavior can provide a useful tool to study a wide range of conscious and
unconscious cognitive processes including the current locus of attention, the nature of language representation, spatial representation of number, and high-level decision-making. Prerequisite: CLPS 0010, CLPS 0020, or NEUR 0010. Enrollment limited to 40.

CLPS 1570. Perceptual Learning. This course will focus on perceptual learning and visual plasticity. The goal of this course is to understand the mechanisms of visual perceptual learning and visual and brain plasticity. Perceptual learning is defined as long-term performance improvement as a result of visual experiences. Enrollment limited to 20. Recommended prerequisites: CLPS 1291, 1500, and 1520.

CLPS 1571. Visual Consciousness. This course will focus on consciousness related to visual perception. The goal of this course is to understand the neural correlates of visual consciousness.

1) We will learn about basic neural mechanisms of visual processing and other brain functions.
2) We will discuss philosophical and neuroscientific models of visual consciousness.
3) We will examine the roles of attention, reward, and memory in visual consciousness.
4) We will evaluate recent neuroscientific experiments with animals and humans and their potential to advance the research of consciousness.

CLPS 1580A. Visually-Guided Action and Cognitive Processes. One of the main purposes of encoding visual information is to perform visually-guided actions to directly interact with the external world. This seminar will shed light on the behavioral and underlying neural mechanisms involved in integrating perception and cognitive processes, and converting them into action. We will also explore how visuo-motor behavior can provide a useful tool to study a wide range of conscious and unconscious cognitive processes including the current locus of attention, the nature of language representation, spatial representation of number, and high-level decision-making. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 40.

CLPS 1580D. Seminar in Spatial Cognition. How do we perceive, learn, and interact with space? This seminar explores what humans and other animals know about their spatial environments, how they use this knowledge to navigate, and its sensory and neural basis. We will investigate how desert ants find their way home, what your cognitive map of campus is really like, how robots navigate, differences in spatial ability, and the effect of GPS on human wayfinding.

CLPS 1590. Visualizing Vision. This course provides hands-on experience in studying vision using computer graphics combined with visual psychophysics. Students will gain a better understanding of how images are formed, how one employs properties of image formation in the experimental study of vision, and how the perception of complex images function in biological systems. Labs will rely on Matlab and several computer graphics packages (e.g. Lightwave). Enrollment limited to 20.

CLPS 1600. History and Theories of Child Development (EDUC 1710). Interested students must register for EDUC 1710.

CLPS 1610. Cognitive Development. How do infant and preschoolers learn about the world? We will examine children’s understanding of the physical world, psychological kinds, biological entities, number, objects, and space. Students are expected to read and comment on both empirical and theoretical primary source articles, to participate in weekly discussions, and complete a set of writing assignments. Prerequisites: CLPS 0600 (PSYC0810) or CLPS 0610 (COGS0630)

CLPS 1611. Cognitive Development in Infancy. The acquisition of knowledge during the first year of life. Special attention to the infant’s emerging concepts of space, objects, intermodal sensory connections, and speech as well as to such issues as the role of innate knowledge and the nature of the infant’s concepts and categories.
CLPS 1700. Abnormal Psychology. 
The study of anxiety, stress, and neurotic disorders, psychosomatic disorders, deviant social behavior, affective disorders, and schizophrenia. Considers theories of etiology (causes) and methods of therapeutic treatment, case studies, experimental research, and clinical research.

CLPS 1701. Controversial Issues in Mental Health Practice. 
Examination of controversies involving scientific, clinical and social practices concerning mental health and illness. Topics will include: classification and diagnosis, biases in psychiatric research and practice, specific conditions (e.g., gender identity disorder, ADHD, depression), treatment issues (e.g., ECT, medicating children with psychiatric drugs), screening for mental illness in public schools, and social-legal issues (e.g., insanity defense, duty to warn, involuntary treatment). Enrollment limited to 20.

CLPS 1710. Political Psychology. 
This seminar explores topics at the intersection of psychology and political science. Topics include political attitudes, perceptions and behaviors. The psychology of ordinary individuals, political leaders, and groups will be studied in contexts where their interests do and do not coincide. As conflicts among these agents are particularly interesting, this course will stress psychological aspects of wars, oppression, and terrorism. Enrollment limited to 20.

This course explores answers to the question of what enables some individuals to escape the worst psychological consequences of extreme personal disruption caused by a range of human-made and natural disasters. It examines personal accounts, pertinent psychological research, theoretical discussions, and the creative works of catastrophe survivors. Enrollment limited to 20.

CLPS 1730. Psychology in Business and Economics. 
The goal of this course is to explore emerging themes at the intersection of psychological science, business, and behavioral economics. Psychologists are primarily interested in detecting limits to human rationality, whereas economics tends to proceed within the rational-actor model. In business, questions arise of how theoretical models and empirical findings related to the practice of managerial decision-making. Investigations of power and the psychological impact of money are relatively recent additions to the suite of research topics. New methodologies, such as neuro-imaging have led to advances not represented in the traditional framework of organizational psychology. Enrollment limited to 20 junior and senior Psychology concentrators.

Interested students must register for EDUC 1750.

CLPS 1790. Personality and Clinical Assessment. 
Examines methods used in the study of child and adult personality, including microanalysis of social interactions, observer report, self report, test data, and life outcome data. Standardized personality assessment instruments will be examined in the context of their reliability, predictive and construct validity. Students will design research projects using these methods, collect and analyze data, give oral presentations, and prepare a written report of their research. Prerequisites: CLPS 0701 (PSYC 0300), and CLPS 0900 (PSYC/COGS 0090) or equivalent. Enrollment limited to 27.

CLPS 1791. Laboratory in Social Cognition. 
Examines principles of experimental design and analysis in the context of classic and contemporary research in social cognition. Students replicate and extend several studies on topics such as person perception, social stereotyping, or judgment and decision making. Students will participate in the design of these studies, gather their own data, analyze them, and report the findings in oral presentations and written reports. Prerequisites: CLPS 0010 (PSYC 0010), CLPS 0700 (PSYC 0210), and CLPS 0900 (PSYC/COGS 0090). Enrollment limited to 27.

CLPS 1800. Language Processing. 
Explores the nature of language processing with the goal of understanding how we produce and comprehend language. Topics include speech production and speech perception, lexical processing, and syntactic processing. Experimental investigations are studied in an attempt to understand the processes and mechanisms employed in the everyday use of language. Prerequisite: one of CLPS 0020 (COGS 0010), CLPS 0030 (COGS 0410), or CLPS 0800 (COGS 0450).

CLPS 1810. Syntactic Theory and Syntactic Processing. 
The interface between work in theoretical syntax and psycholinguistic research on syntactic processing. Consideration of how results in psycholinguistics support various models of human language processing. Recommended prerequisite: CLPS 1330 (COGS 1310).

CLPS 1820. Language and the Brain. 
This course will examine the neural systems underlying language processing. Major focus will be on effects of brain injury on speaking and understanding in left hemisphere-damaged patients who have aphasia, right hemisphere-damaged patients, and split-brain patients. Behavioral, electrophysiological and neuroimaging evidence will be investigated.

CLPS 1821. Neuroimaging and Language. 
Examines neuroimaging approaches to language processing including fMRI, PET, TMS, and ERP. Consideration of the neural systems underlying speaking and understanding. Topics include neural basis of speech, lexical/semantic, and syntactic processing, mirror neurons and language, multisensory integration, meanings of words, literacy, and special populations. Recommended: either NEUR0010, CLPS 0020 (COGS0010) or CLPS 0800 (COGS0450) and one of the following: CLPS 0700 (COGS0720), CLPS 0400 (PSYC0470), CLPS 0410 (PSYC0750), CLPS 1820 (COGS1480), CLPS 1822 (COGS1500), NEUR1030, NEUR1660, or by permission.

CLPS 1822. Subcortical Brain Bases of Language and Thought. 
Recent studies indicate that the neural bases of human language and thought derive from a complex network of circuits within and connecting subcortical and cortical structures. Students prepare to evaluate published papers, noting the relationships that hold between data and theories. Relates neurophysiologic studies to current linguistic and cognitive theories and provides the background for independent research. Prerequisites: CLPS 0810 (COGS 0320), CLPS 1820 (COGS 1480), CLPS 1821 (PSYC 1100), or NEUR 0010.

CLPS 1880A. Speech Prosody. 
The broad aim of this seminar is to discuss the various ways in which linguistic and paralinguistic meanings can be conveyed by the way that speakers produce their utterances. The topics will include the effect of pitch variation and phrasing on pragmatic meanings and discourse functions, turn-taking strategies, cue phrases and filled pauses, new-given information, or prosody of deceptive speech. Recommended prerequisite: CLPS 0030 (COGS 0410).

CLPS 1880B. Cognitive Neuroscience of Language Acquisition. 
The ability to acquire language is unique to humans. This class explores our language-specific biological endowments. Topics include: Genetics and evolution of language; the brain-basis of acquisition; effects of age on language learning ability; effects of environmental differences (such as exposing up blind or deaf) on acquisition; and language in special populations such as autism. Students will read and discuss empirical and theoretical articles, and complete writing assignments and problem sets. Prerequisite: CLPS 0060, 0610, 0800, or EDUC 0800, or instructor permission. Enrollment limited to 20. Not open to first year students. WRIT

CLPS 1880C. Topics in Psycholinguistics: The Linguistic Relativity Hypothesis. 
Linguistic Relativity (i.e., the "Sapir/Whorf hypothesis") posits that properties of the language one speaks shape one’s cognition; such a position has also been quite controversial. This seminar provides a critical look at the debate. We will try to delineate different actual and potential versions of the hypothesis, and will examine how experimental work, cross-linguistics studies and an understanding of concepts in linguistic theory can be used to shed light on the debate. Classic and recent literature will be considered, with an eye to formulating ways in which specific versions of the hypothesis could be further tested. Pre Requisites: At least two courses above the 1000 level in linguistic semantics, linguistic pragmatics, language processing, and/or cognition.

CLPS 1890. Laboratory in Psycholinguistics. 
An advanced course in methodological approaches to the study of psycholinguistics. Processes (e.g. with adult lexical access, sentence
processing, corpus linguistics, etc.) Recommended prerequisites: CLPS 0800 (COGS 0450) and CLPS 0900 (COGS/PSYC 0090), or equivalent.

CLPS 1891. Research Methods in Physiologic and Acoustic Phonetics. Introduction to laboratory techniques and the analysis of data relevant to physiologic and acoustic phonetics. Emphasis on the use and interpretation of wave-form and spectrum analysis, electromyography, cineradiography, high-speed motion pictures, computer modeling of oral tract output, and experimental techniques involving the perception of synthetic and natural speech.

CLPS 1900. Senior Seminar in Cognitive Science. Examines general philosophical and theoretical issues that cut across cognitive science. Each student writes a substantial paper on a topic in cognitive science. Required of cognitive science concentrators. Enrollment limited to concentrators in the 4th semester or beyond, and, by permission, to others who have significant course background in cognitive science.

CLPS 1970. Directed Reading in Cognitive, Linguistic and Psychological Sciences. Independent study or directed research in cognitive science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 1980. Directed Research in Cognitive, Linguistic and Psychological Sciences. Required of all ScC concentrators and Honors students in psychology. Instructor permission required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CLPS 2000. Graduate Proseminar. Introduces students to the CLPS Department and the University; provides a brief history of the disciplines, philosophical foundations, and ethical treatment of human subjects; provides professional training, such as preparation of CV and research statement, practice in grant writing, and foundations in scientific writing and presentation; and supports students' early stages of developing a first-year project.

CLPS 2001. Graduate Proseminar II. No description available. Open to graduate students only.

CLPS 2091. Graduate First Year Project Research. Please check Banner for the correct section number and CRN to use when registering for this course.

CLPS 2092. Graduate First Year Project Research. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2095. Practicum in Teaching. Each student will assist a designated faculty member in teaching a course in cognitive science or related discipline. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2096. Directed Graduate Research. No description available. Instructor permission required.

CLPS 2100. Core Topics in Animal and Comparative Behavior. No description available.

CLPS 2132. Graduate Seminar in Learning. Advanced topics in animal and human learning. Topics vary from year to year; examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes.

CLPS 2180. Duration Discrimination. No description available.

CLPS 2181. Advanced Topics in Animal and Human Learning. Topics vary from year to year, examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes. Open to graduate students only.

CLPS 2200. Core Topics in Cognition. No description available.

CLPS 2210. Current Topics in Memory Research. A graduate seminar addressing selected topics in memory, including theories of normal and pathological memory, animal models of human memory, and the neural substrates of memory. Topics vary from year to year. Permission required for undergraduates.

CLPS 2400. Core Topics in the Neural Basis of Behavior. Seminar on comparative aspects of brain evolution and function, with implications for behavior. Open to graduate students only.

CLPS 2450. Exchange Scholar Program.

CLPS 2455. The Mind Asleep. Seminar on selected topics in sleep, incorporating the core disciplines of psychology (Behavioral Neuroscience, Sensation and Perception, Cognitive Processes, and Social). Discussion based classes will examine sleep and affect/mood, dreaming, sleep and learning and memory, sensation/perception processes during sleep, effects of sleep deprivation and sleep disorders.

CLPS 2500. Core Topics in Perception. No description available. Open to graduate students only.

CLPS 2510. Graduate Seminar in Vision. Selected topics in vision, including optics of the eye, anatomy of the visual system, photochemistry of vision, psychophysics of color, acuity, models of color vision, and light as a visual stimulus. Specific topics vary.

CLPS 2700. Core Topics in Social Psychology. A survey of classic and contemporary research in social psychology, including attitude formation and change, person and self perception, stereotyping, and intergroup relations. Open to graduate students only.

CLPS 2800. Core Topics in Language. No description available. Open to graduate students only.

CLPS 2902. Quantitative Methods in Research. No description available.

CLPS 2906. Experimental Design. The course designed for students at the intermediate level or above and will cover t-tests, power analysis, correlation, simple and multiple linear regression, logistic regression, analysis or variance, non-parametric tests, randomization and bootstrapping, among others. Instructor permission required. Open to graduate students only.

CLPS 2908. Multivariate Statistical Techniques. This course covers the basic multivariate techniques currently used in psychology and related sciences: multiple regression, logistic regression, principal components and factor analysis, multivariate analysis of variance, discriminant function analysis, and log-linear analysis. Students will learn these techniques' conceptual foundations, their proper selection for a given data set, and the interpretation of computer output from statistical analysis packages (primarily SPSS). Enrollment limited to 20 graduate students.

CLPS 2970. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CLPS 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Linguistics

LING 0030. Introduction to Linguistic Theory (CLPS 0030). Interested students must register for CLPS 0030.
LING 0050G. Pidgins, Creoles, and the Emergence of Language (CLPS 0050G).
Interested students must register for CLPS 0050G.

LING 0330. The Grammar of English (CLPS 0330).
Interested students must register for CLPS 0330.

LING 0800. Language and the Mind (CLPS 0800).
Interested students must register for CLPS 0800.

LING 0810. The Biology and Evolution of Language (CLPS 0810).
Interested students must register for CLPS 0810.

LING 1310. Introduction to Phonological Theory (CLPS 1310).
Interested students must register for CLPS 1310.

LING 1320. The Production, Perception, and Analysis of Speech (CLPS 1320).
Interested students must register for CLPS 1320.

LING 1330. Introduction to Syntax (CLPS 1330).
Interested students must register for CLPS 1330.

LING 1340. Introduction to Semantics (CLPS 1340).
Interested students must register for CLPS 1340.

LING 1341. Lexical Semantics (CLPS 1341).
Interested students must register for CLPS 1341.

LING 1342. Formal Semantics (CLPS 1342).
Interested students must register for CLPS 1342.

LING 1350. Introduction to Mathematical Linguistics (CLPS 1350).
Interested students must register for CLPS 1350.

LING 1360. Introduction to corpus linguistics (CLPS 1360).
Interested students must register for CLPS 1360.

LING 1370. Introduction to Pragmatics (CLPS 1370).
Interested students must register for CLPS 1370.

LING 1381. Topics in Phonetics and Phonology: International Phonology (CLPS 1381).
Interested students must register for CLPS 1381.

LING 1381A. Topics in Phonetics and Phonology: Intonation (CLPS 1381A).
Interested students must register for CLPS 1381A.

LING 1383A. The Boundary of Semantics and Pragmatics (CLPS 1383A).
Interested students must register for CLPS 1383A.

LING 1383B. Issues in Current Syntactic Theory (CLPS 1383B).
Interested students must register for CLPS 1383B.

LING 1383C. Evidentials: Information-Source Marking Across Languages (CLPS 1383C).
Interested students must register for CLPS 1383C.

LING 1385. Topics in Language Acquisition (CLPS 1385).
Interested students must register for CLPS 1385.

LING 1387. Topics in Neurolinguistics (CLPS 1387).
Interested students must register for CLPS 1387.

LING 1389. Topics in Language Processing (CLPS 1389).
Interested students must register for CLPS 1389.

LING 1390. Linguistic Field Methods (CLPS 1390).
Interested students must register for CLPS 1390.

LING 1650. Child Language Acquisition (CLPS 1650).
Interested students must register for CLPS 1650.

LING 1800. Language Processing (CLPS 1800).
Interested students must register for CLPS 1800.

LING 1810. Syntactic Theory and Syntactic Processing (CLPS 1810).
Interested students must register for CLPS 1810.

LING 1820. Language and the Brain (CLPS 1820).
Interested students must register for CLPS 1820.

LING 1821. Neuroimaging and Language (CLPS 1821).
Interested students must register for CLPS 1821.

LING 1822. Subcortical Brain Bases of Language and Thought (CLPS 1822).
Interested students must register for CLPS 1822.

LING 1880A. Speech Prosody (CLPS 1880A).
Interested students must register for CLPS 1880A.

LING 1880C. Topics in Psycholinguistics: The Linguistic Relativity Hypothesis (CLPS 1880C).
Interested students must register for CLPS 1880C.

LING 1890. Laboratory in Psycholinguistics (CLPS 1890).
Interested students must register for CLPS 1890.

Interested students must register for CLPS 1891.

Cogut Center for the Humanities

Director
Michael P. Steinberg
Brown University has long offered a unique focus and quality in the humanities, combining the preservation of knowledge with a spirit of innovation and adventure. The humanities today include ever–vital traditional disciplines such as history, philosophy, language and literary studies, and religious studies. They also include the newer disciplines of art history, musicology, the interpretive dimensions of social sciences such as anthropology and political science, and more recently, interdisciplinary initiatives such as media studies and gender and sexuality studies.

Courts for Craig M. Cogut ’75 and Deborah Cogut in recognition of their generous support, the Cogut Center for the Humanities was launched in the fall of 2003 as the Brown Humanities Center to support collaborative research among scholars in the humanities. Today, through its fellowship, grant, and distinguished visitors programs, and regularly scheduled events, the Cogut Center strives to:

- Foster innovative work in the humanities and related disciplines
- Sustain and nurture international perspectives at Brown in an era of increasing globalization
- Explore the history and effects of the rapid growth of technologies of information and visualization
- Examine the public role of the humanities in the context of recent challenges and pressures
- Enrich relations between the humanities and the studio and performing arts
- Investigate the re–emergence of pressing issues of ethics and aesthetics
- Reinvigorate the concept of critique and the role of critical theory in the humanities

The Cogut Center is poised to build on the strengths of Brown University at a moment of unique institutional distinction and growth, and at a time of particular national and global urgency. The Cogut Center is providing multiple programs to bring Brown faculty and students into regular and innovative contact with each other, as well as with national and international scholars and scholarship. In fulfilling its mission to the University and to the field of humanities, the Cogut Center supports and enhances Brown’s stellar reputation in the humanities.

For additional information please visit the Center’s website at: http://www.brown.edu/Departments/Humanities_Center/

Courses

Interested students must register for UNIV 1200.

HMAN 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture (ANTH 1305).
Interested students must register for ANTH 1305.
For the past several decades (but especially since 2001), internationalists have been increasingly preoccupied by the perceived "return of religion." Religion is often proclaimed to pose the single greatest threat to a liberal legal/political order and, less often, to be the greatest hope for that order. We will explore genealogies of the three key terms at stake in this conundrum – "religion," "secularization," and "the international." We begin from the proposition that none of these terms refer to ahistorical essences, but have been subject to continual theoretical/practical construction/reconfiguration. We focus on that contestation as it has emerged in "modernity." Enrollment limited to 20 juniors, seniors, and graduate students.

This course is built around the question of the animal as a difficulty posed to representation and thought at a time when animals have largely disappeared from humans' living environment, but proliferate as strange protagonists, specters or figures of ambiguity in literature and philosophy. We will consider a range of texts and films that "cast" the animal critically, that is, as a body that strains or scrambles meaning (interruption, irony, illegibility, haunting) and forces us to reconsider the work of language and narrative (indeed, of the "human"). Authors include Kafka, Coetzee, Hofmannsthal, Kafka, Chevillard, Darrieussecq, Derrida, Agamben, de Fontenay, Herzog. Enrollment limited to 20 juniors and seniors.

This course introduces students to the 19th/early 20th century Arab thought - the "Nahda." Through primary and secondary English texts, we will explore questions raised by thinkers of this epoch pertaining to perceived civilizational crisis, and examine the diagnoses/proposals offered by them. The course underlines the changes and continuities in these concerns under the impact of dramatic socio-political events of the epoch. We will discuss the strengths/weaknesses of "Nahda" thought that continues to inform/precocious contemporary Arab debates on culture, democracy, gender and Islam. We will examine the significance of this legacy in today's Arab world. Enrollment limited to 20 juniors and seniors.

From antiquity to our day, therapeutic landscapes such as: mineral and thermal springs; shrines and churches built at sacred springs; volcanic ash mud baths; rocky landscapes emitting odorous gasses; and ponds filled with medicinal leeches, attract health pilgrims who search for healing. Storytelling transformed these into places of memory and pilgrimage. This seminar investigates places of bodily healing and miracle from a cultural studies perspective. The cases will be drawn from the Mediterranean world and Western Asia (including Lourdes in France, Hierapolis in Southeastern Turkey and the Agiasma churches of Byzantine Istanbul). Enrollment limited to 20 juniors and seniors.

HMAN 1970E. The Precarious University.
The intensification of student protest-occupy movements across the country particularly in California, and the proliferation the OWS movements across the world have rejuvenated social movements against cutbacks for the people and kickbacks for the wealthy. In this seminar, we will address the epistemic shifts and intellectual costs of these ongoing upheavals, particularly the fight against the U.S. university's neoliberalization. We will imagine the kind of progressive university that is sustainable for the arts and humanities, and how the precarious work of artists and humanists is fundamental to 21st century global universities. Enrollment limited to 20 juniors and seniors.

Does pain and reflection on pain teach us something about ourselves, the world, our relation to it? This seminar approaches the question by examining the meaning of pain in Russian/Polish literature/literary theory of the 20th century. Our concern is with pain's resistance to language and representation. The works analyzed offer a variety of responses to problem of pain as it appears in theology, experimental medicine, discussions of materialism, the philosophy of Schopenhauer, and above all, the giants of Russian literature, Dostoevsky and Tolstoy, in whom these debates are dramatized; they also form the ground on which Russian and Polish literature meet. Enrollment limited to 20 juniors and seniors.

HMAN 1970G. International Perspectives on NGOs, Public Health, and Health Care Inequalities.
Non-governmental and other non-state organizations play an expanding role in the provision of health care across much of the globe. Growth and internationalization of the non-governmental sector, contraction of post-socialist and advanced industrial welfare states, and sub-contracting of state-funded services have all contributed. The seminar focuses on this expansion, critically assessing texts on NGOs and health and drawing comprehensive frottage across disciplinary and interdisciplinary boundaries. We will address issues of human welfare, political citizenship and identity, replacement and displacement of states, new forms of health care inequalities, and the self-concepts, missions, and roles of non-profit sector workers around the globe. Enrollment limited to 20 juniors and seniors.

Comparison, which posts a likeness between the dissimilar, is always profoundly haunted by the question of its ground and judgment. This seminar will examine the comparative logic of capitalist modernity in the works of Marx, Weber, Adorno and Horkheimer, Foucault, Heidegger, and Benjamin. We will ask the following questions: How is equivalence established between nonequivalent objects? How are actual social relations quantified and measured, and is there an ethics to modern forms of comparability? How does language reflect and produce these operations? Or, to put it differently: What are the forms through which difference "haunts" us? We will pay special attention to figures of the double and the ghost in Hoffmann and Freud. Other topics to be covered include rationalization and the disenchantment of the world, the modern uncanny, "mediaturas," colonial comparison, and the ethics of incommensurability.

What happens when a particular orthodoxy becomes able to impose itself on others? This course examines the imposition of post-Constantinian catholicism on Jews, Samaritans, other Christians (Arians, Miaphysites, etc.) and the remaining ancient Mediterranean populace (4th-7th centuries) to consider a larger cultural phenomenon. We'll draw on ancient authors and legal sources (in translation), archaeological data, and contemporary studies. Half the course entails communal exploration of the late antique Mediterranean. Student research presentations, including studies of comparable situations from other cultural and historical contexts, comprise the second half. Useful prior coursework includes: RELS 400, RELS 410, CLAS 600, CLAS 660, CLAS 1320. Enrollment limited to 20 juniors and seniors.

Why do we take pleasure in small-scale objects? What is their history and what purposes do they serve? How do the technology and the aesthetics of the small contribute to human cognition? To find answers to these and other questions, the seminar explores the cultural, literary and cognitive significance of miniatures. We will explore productive relationships between three areas of research: imaginative texts produced during the eighteenth century, the period's prolific but insufficiently studied production of small-scale versions of everyday objects, and recent developments in cognitive theory about the role of size-perception in the developing brain. Enrollment limited to 20 juniors and seniors.

In an arguably "post-secular" age, conflicts over the relationship between religion and law have moved to the forefront of international debate. In our multicultural/globalized world, such conflicts often provoke contestation over the very possibility of universal definitions of either "religion" or "law," let alone their proper relationship. Our interdisciplinary inquires on these questions will include concrete legal disputes in domestic/international courts; theoretical debates over the construction of "religion" in fields such as anthropology, religious studies, and philosophy; and historiographical controversies about the relationship between "secularization" and sovereignty, particularly in light of the legacy of colonialism. Enrollment limited to 20 juniors, seniors, and graduate students.
HMAN 1970L. Topics in the History of Aesthetics: Eighteenth Century

Modern aesthetics emerged in the eighteenth century at the intersection of different disciplines, discourses, cultures, and European nations. Contributors to the new field came not only from academic philosophy but also from the arts, literature, history, theology, and other fields. Aesthetics was thus and remains primary among interdisciplinary disciplines. Readings for this course will be drawn from British, German, and French authors such as Shaftesbury, Du Bos, Addison, Hutcheson, Hume, Burke, Kames, Diderot, Mendelssohn, Lessing, Kant, Schiller, and Herder. Enrollment limited to 25 juniors and seniors.

Doomsday predictions/apocalyptic themes have become commonplace. Between "End of History" theses/Mayan Calendar predictions/posthumanist theories/the Rapture, and environmental/financial collapse, it seems we are living in what many believe to be End Times. This course will examine some principal clusters of ideas around finitude/posthumanism/singularity, environmental collapse, postcapitalism, and post-politics. We will look at a number of cultural products: traditional fiction/non-fiction, blogs/podcasts/films. It will be less important to establish whether the Mayan calendar calculations are accurate than seeing the connections between those claims and the claims of survivalists/Rapture theorists. Taken together, what do all these claims say about this moment in history? Enrollment limited to 25.

HMAN 1970N. The Israeli-Palestinian Conflict in the Global Scene.

Dominant narratives of Israeli/Palestinian conflict obscure influential forces taking place outside the boundaries of Israel/Palestine, stories we believe are unique/historically peculiar. We will see how groups have been inspired by/have inspired both peoples’ struggles for survival/self-determination. We will examine case studies revealing connectivity/reciprocity: Zionism’s inspiration for Garvey’s-U.S.-back to-Africa movement; adoption of Fanonian/Maoist/Guevarian thought in Middle East; Black Panther Party’s support for Palestinians/their endorsement of an Israeli Black Panther Party in the 1970s; South Africa/Latin America’s economic/military ties to Israel; Palestinian call for international Boycott Divestment Sanctions; and examine how struggles for self-determination negotiate between seeking territorially bounded independence/globally networked liberation, in the region/beyond. Enrollment limited to 20 juniors and seniors.

Many of today’s dissident movements adopt leaderless/self-managed practices presenting us with radically different notions of what it means to self-determine. We will situate these movements within historical struggles for autonomy. By “autonomy” we understand the quality or state of being self-governing/self-determining. By “self,” we understand not the self-originating/self-determining/rational individual constructed by Enlightenment liberal humanism, but rather, a diversity of self-defined collectivities made up of social individuals. We will consider runaway slave societies (Western Hemisphere), Operaismo (Italy), Zapatistas (Mexico), Tahrir Square’s protesters (Egypt), Occupy Movement (US), Shackdwellers (South Africa), refugee/migrant movements. Readings include Marx/ Cleaver/Linebaugh/Rediker/Negri/Tronti/Vimio/Berardi/Holloway/others, and documents from movements we engage. Enrollment limited to 20 juniors and seniors.

Pragmatism is a distinctive American school of thought that sees the goal of philosophy not as the apprehension of timeless truths but as a practical project of bettering individual lives and society as a whole. Pragmatists such as William James and John Dewey were devoted to deepening America’s commitment to democracy. Both saw an important place for enlightenment liberal humanism, but rather, a diversity of self-defined collectivities made up of social individuals. We will consider runaway slave societies (Western Hemisphere), Operaismo (Italy), Zapatistas (Mexico), Tahrir Square’s protesters (Egypt), Occupy Movement (US), Shackdwellers (South Africa), refugee/migrant movements. Readings include Marx/ Cleaver/Linebaugh/Rediker/Negri/Tronti/Vimio/Berardi/Holloway/others, and documents from movements we engage. Enrollment limited to 20 juniors and seniors.

Concepts are usually thought of as cognitive tools, constituents of thought used for categorization/inference/memory/learning/decision-making. We shall think about them as effects of a language game whose rules change across genres, media, and discursive regimes. Looking for these rules and analyzing them comparatively, we shall ask how concepts are formed/displayed/formed, when do we need them/can we do without them. We shall read philosophers (Plato, Descartes, Kant, Heidegger, Wittgenstein, Foucault, Derrida, and Deleuze), intellectual historians (Koselleck, Skinner), literary works (Kleist, Kafka, Musil), and look at some conceptual art. Advanced juniors, seniors and graduate students welcome. Enrollment limited to 20.

Cuba today is home to writers, musicians and artists who engage with new media and a global audience against the backdrop of a socialist revolution. This seminar will explore aesthetic and political dimensions of contemporary Cuban culture with authors who will speak to us directly through a video link with Casa de las Américas in Havana. Knowledge of Spanish required.

HMAN 1970S. Ethics and the Humanities.

This seminar will engage with ethical issues in a broad range of humanities disciplines. We will survey historical and thematic perspectives on ethics, and will consider the ethical implications of authorship and possession of texts and objects; translation as an ethical problem; data and open access; the perspective of the human subject; public humanities, public intellectuals and community-based research; and ethical issues in popular culture. Enrollment limited to 20. Not open to first year students or sophomores.

We’ll investigate how new media technologies shape musical practices (and vice versa). Topics will include DJ cultures, digital music distribution and related intellectual property issues, digital gameplay, music videos, popular music reception, online music lessons, and virtual communities. We’ll give equal attention to production, circulation, and reception practices, as well as to their increasing convergence. Readings will include both contemporary and historical studies. The course will require critical engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media production and consumption practices. Enrollment limited to 20. Not open to first year students or sophomores.

HMAN 1970U. Pragmatic Medical Humanities.

The question, “What is medical humanities?” has flummoxed the very experts who ardently argue for its importance to medical education and the personal and professional growth of health care providers. The interdisciplinary nature of medical humanities, engaging in conversations with persons who possess different expertise, knowledge and approaches, provides opportunities for insight unavailable elsewhere. Students will investigate alternative meanings, interpretations and purposes embodied in the term “medical humanities.” They will develop their own personal relationship to this term/field of study, and its utility as a tool for understanding and responding to the profound experiences of clinical medicine, illness and health. Enrollment limited to 20. Not open to first year students or sophomores. This is a half-credit course.

HMAN 1970V. Pragmatic Medical Humanities.

This seminar examines the role of disease, medicine, and health in the history of the Atlantic World. Our analysis will be centered on events that took place in Latin America, the Caribbean, and Sub-Saharan Africa, during the era of European colonial expansion (1490-1940). In these four and a half centuries, the West became the dominant force in global geopolitics and Western medicine emerged as the hegemonic form of healing worldwide. This seminar explores the complex relationship between these two historical developments. Enrollment limited to 20. Not open to first year students or sophomores.

HMAN 1970W. Politics and Authority in Islamic Law and Society.

This seminar seeks to address major trends in political thought of classical Islam. In addition to reading secondary scholarship on social and political aspects of early Muslim society, we will also examine primary sources in translation (Prolegomenon, Book of Ordinances), literary genres, including official state epistles from the medieval period; and the work of Ibn Taymiyya. Finally we will address issues of authority, ethics and
and consider their contemporary convergence. The course requires critical
will give equal attention to production, circulation, and reception practices,
computer interaction studies, gender studies, and ethnomusicology. We
draw on scholarship in media ethnography, performance studies, human-
performative aspects of virtual communities. Theoretical approaches
of virtual and embodied experience, exploring overlapping genres of
This seminar investigates digital media practices at the intersection
HMAN 1971G. Digital Media and Virtual Performance

We will take as our starting-point Walter Benjamin's notes for his
unfinished masterwork, "The Arcades Project." The Passagenwerke comprise a massive index of citations/observations on the nature/form of
the city of Paris in every aspect of its cultural/political life in the 19th/20th
centuries. We will read works from which he culled his aphorisms/
investigate the present status of each of his assertions/citations, with
historical/contemporary readings. We will discuss the nature of historical/
archival interpretation and try to bring together artifacts – textual/visual/
sensorial - that might constitute a "Museum" of 19th Century Paris.
Taught by Prof. Anthony Vidler. Graduate students encouraged to register.
Enrollment limited to 20.

HMAN 1971C. History, Theory and Practice of Storytelling Using Stereoscopic ("3D") Motion Pictures.
This course will support/enhance Brown's tradition in the Humanities by
sharpening the focus on interdisciplinary/comparative work across cultural/linguistic boundaries. Can science/technology/medicine foster
the presentation of innovative work in humanities by bringing 3D to New Media? Why do some cultural values dictate genres typically produced
in 3D? What were the origins of 3D motion pictures/how might new technologies affect the distribution/visualization of 3D projects? How can 3D enrich relations between humanities and studio/performing arts? We
provide Brown students with an opportunity to establish a foundation for
analyzing/telling stories using stereoscopic tools, and receive basic technical experiences using 3D small-form video equipment.

HMAN 1971E. Cross-Cultural Approaches to Death and Dying.
Despite the universality of death, human responses to it are incredibly
varied. Because the significance of death and dying is deeply socially
constructed, this course situates biological, medical, and psychological
conceptions of death and dying in conversation with the religious and
ethical perspectives that have also informed human responses to death
and dying in different cultural contexts. This interdisciplinary course—
team-taught by a psychologist, a scholar of religion, and two end-of-
life care physicians—will facilitate a more informed understanding of
death-related cultural practices as well as a more skilled response to
death-related decisions that arise in the practice of medicine and in life.
Enrollment limited to 20 students in Medical Humanities and graduate
Humanities fields. Honors undergraduates and PLMEs may enroll with
instructor permission.

HMAN 1971F. World of Walden Pond: Transcendentalism as a Social and Intellectual Movement.
World of Walden Pond examines the 19th century phenomenon of
Transcendentalism: this country's most romanticized religious, philosophical, and literary movement. Focusing especially on Emerson, Thoreau, and Fuller, we'll examine the ideas of the Transcendentalists in the age of reform and evaluate the application of their principles to abolition, feminism, and nature. The central problem which they wrestled with will be the focus, too, of our investigations: the tension between individualism and conformity.

HMAN 1971G. Digital Media and Virtual Performance.
This seminar investigates digital media practices at the intersection of
virtual and embodied experience, exploring overlapping genres of
play, performance, pedagogy, and participatory culture. Topics include
digital games, viral videos, online music and dance lessons, and the
performatory aspects of virtual communities. Theoretical approaches
draw on scholarship in media ethnotheory, performance studies, human-
computer interaction studies, gender studies, and ethnomusicology. We
will give equal attention to production, circulation, and reception practices, and consider their contemporary convergence. The course requires critical
engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media practices.

HMAN 1971H. Skin Deep: Reading Race, Reading Form.
There has been a trend to move away from symptomatic/paranoid
readings of literature. In 2006, Stephen Best/Sharon Marcus pitched this most provocatively in their call for surface readings, which deals with what is manifest/present in texts, rather than the latent/concealed. We hope to
get beyond politically-instrumental readings of literature/to thinking in a
sustained fashion about language/form/aesthetics of race. The seminar will divide between reading histories/theories of race (obsession with physical variation as race and technologies of seeing that we use to read race) working through a range of post-nationalist works of literature/
sharpening our understanding of reading as a mean-making event.

HMAN 1971I. Queer Theories.
This course will engage with possibilities and problems of queer theorizing, from the emergence of queer theory, through its (precarious)
institutionalization, to its multiplied interventions. Rather than
understanding queer theory as a unified approach, we will consider
the variety of queer theoretical work as well as challenges within queer analysis itself. Given this focus on queer theories, we will draw from a
number of disciplines, paying particular attention to debates regarding
epistemology and ethics, politics and aesthetics, race and gender, sociality
and anti-sociality, identifications and disidentifications, publics and
privates, temporalities and locations, and global and local conjunctures
and disjunctures.

Among the most startling claims of Mikhail Bakhtin's writings on literature is his claim that in Dostoevsky's work we are dealing with "an ultimate
dialogicality, ... a dialogicality of the ultimate whole." This course will
examine the philosophical implications of this claim, reading Bakhtin's
work alongside Kierkegaard, Flusser, Deleuze, Rancière, amongst others.
Advanced juniors and seniors; graduate students.

HMAN 2970A. Accounting for Silence: Anthropology of Law and Narrativity.
Explores the role of law in redressing the past, specifically in cases of
postwar compensation for the Second World War. We look at the
convergence of two processes, the breaking of long-held silence by
victims through various forms of testimony inside and outside the
courtroom, and the legal process of redress. Cases for this course arise
primarily from the Japanese use of wartime slave labor in East Asia.
Since the 1990s, large number of Chinese and Korean war victims,
such as former forced laborers and the so-called "comfort women" to
name but a few, have filed lawsuits against the Japanese government
and corporations. In the process, they give voice to their long silenced,
traumatic experiences. Through anthropological approaches to law and
testimonial practices, we shall examine such questions as: what kind
of legal space is created through compensation lawsuits; what kind of
"performance" is produced both inside and outside the courtroom; what
kinds of power dynamics underlie the recounting of testimony, and, what
does it mean to account for silence in pursuit of the politics of redress?
Even though the course draws examples primarily from East Asia,
students are encouraged to pursue their own choice of cases elsewhere
in their final paper project. Limited to 20 graduate students.

HMAN 2970B. And What About the Human?.
This course will think about the question posed by radical anti-colonial
thought: and what about the Human? Through the writings of Foucault,
Arendt, Heidegger, Fanon, Wynter and Cesaire, as well as the novels of
Lamming and Vera, we will examine the meaning of the "death of Man" in
contemporary critical thought and theory, and the ways in which western
anti-humanism thought claims to replace the figure of the human with
discourse and language, while also contrasting the ways in which radical
anti-colonial thought has constructed the figure of the human. Enrollment
limited to 20.

HMAN 2970C. Concepts of Space and Time in Media Discourses.
No description available. Enrollment limited to 20 graduate students.

HMAN 2970D. Biological Issues in Cultural Theory.
Contemporary culture is increasingly preoccupied by biological themes
and issues—genomes, brain images, biotechnology, the natural
Comparative Literature

Chair
Marc Redfield

Comparative literature is the study of literature and other cultural expressions across linguistic and cultural boundaries. At Brown, the Department of Comparative Literature is distinct in its conviction that literary research and instruction must be international in character. The department performs a role similar to that of the study of international relations, but works with languages and artistic traditions, so as to understand cultures "from the inside." Both the department’s undergraduate and graduate programs are held to be among the finest in the country.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Comparative_Literature/

Comparative Literature Concentration Requirements

The concentration in Comparative Literature enables students to study literature in cross-cultural perspectives. The aim of the program is to encourage students to study a varied and illustrative range of literary topics rather than the total development of a single literary tradition. True to the spirit of Brown’s New Curriculum, a concentration in Comparative Literature affords great academic freedom. For example: advanced courses in any literature department at Brown count for concentration credit; although English is commonly one of the languages that students apply to their Comparative Literature studies, basically any language--ancient or modern--supported at Brown may form part of a Comparative Literature concentration program. In essence, concentrators study a generous range of literary works—from Western cultures, both ancient and modern, to Chinese, Japanese, and Arabic—and develop a focused critical understanding of how cultures differ from one another. Comparative Literature differs from other literature concentrations largely through its international focus and its broad-gauged view of art and culture in which the study of languages is combined with the analysis of literature and literary theory. All students take a course in literary theory and have the opportunity to complete a senior essay.

There are three concentration tracks in Comparative Literature, as follows:

Track 1: Concentration in Comparative Literature with two languages

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
     - Antiquity
     - Middle Ages
     - Renaissance/Early Modern
     - Enlightenment
     - Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

Track 2: Concentration in Comparative Literature with three languages

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European
languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).

- Complete the same requirement for your third language before Semester VII (the above proviso for students working in non-European languages also holds here).

- Comparative Literature 1210, Introduction to the Theory of Literature.

- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
     - Antiquity
     - Middle Ages
     - Renaissance/Early Modern
     - Enlightenment
     - Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

**Track 3: Concentration in Literary Translation**

- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).

- Comparative Literature 1210, Introduction to the Theory of Literature.

- Comparative Literature 1710 (Comparative Literature 2720 strongly urged).

- ONE course or MORE in Linguistics, drawn from among these courses: Cognitive, Linguistic and Psychological Sciences 0410, Anthropology 0800, English 1210, Hispanic Studies 1210 or an acceptable substitute.

- FIVE or SIX advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  a. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  b. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  c. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
     - Antiquity
     - Middle Ages
     - Renaissance/Early Modern
     - Enlightenment
     - Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

- TWO workshops or MORE in Creative Writing

- A senior project to consist of:
  A substantial work in translation (length will vary depending upon language and genre);
  A critical introduction outlining the method used and specific problems encountered, and commenting on the history of the original work together with other translations, if any. For thesis, the student may register for COLT 1990, which will be taken in addition to the ten required courses listed above. Successful completion of the thesis constitutes Honors. (See Guidelines for Honors Theses).

For additional information, please visit the Comparative Literature website (http://www.brown.edu/Departments/Comparative_Literature/) or see the Director of Undergraduate Studies, Professor Stephanie Merrim.

---

**Comparative Literature Graduate Program**

The department of Comparative Literature offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. While doctoral students may also earn the Master of Arts (A.M.) degree en route to the Ph.D., the department does not admit students into a terminal Master’s degree program.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/comparative-literature

**Courses**

**COLT 0510A. Best-sellers.**

Study of seven novels published within the last decade that have enjoyed broad success with reading publics in different places. What pleasures of thought and imagination do we derive from these books, and how can we express clearly our responses? What is the appeal of these best-sellers first to their home audience, then to readers in other social environments and cultures? How may we reshape our own horizons of thought in order to appreciate them? Students will be encouraged to develop their skills of literary analysis, interpretation, and critical discussion. Two lectures and one discussion section per week. Several short papers, quizzes, and a final exam.

**COLT 0510B. Caribbean Re-writes.**

Through close readings of canonical European texts and rewritings of them in the twentieth-century Caribbean, we explore the literary possibilities and political implications of writing the old in a new language. Readings include Columbus’s diaries alongside Carpenter’s The Harp and the Shadow (Cuba); Shakespeare’s Tempest with that of Aimé Césaire (Martinique); and Jane Eyre and Wuthering Heights alongside novels by Jean Rhys (Dominica) and Maryse Condé (Guadeloupe).

**COLT 0510C. The World of Lyric Poetry.**

Lyric poetry is the prime mode for conveying emotion in many cultures, from ancient times to the present day. This course will survey the variety of forms and themes from the earliest texts from Greece, Rome, China and Japan, then the glories of the Renaissance and the Tang Dynasty, then move to the challenges for lyric expression in the modern world. Enrollment limited to 20 first year students. FYS

**COLT 0510D. Poetry and Music.**

Explores the collaboration between poets and composers in the twentieth century. It will primarily focus on Modern Greek composers (Hadjidakis, Theodorakis, Lagios and others) and their collaboration with numerous poets (Garcia Lorca, Gatsos, Eliad, Elytis, Neruda, Ritsos and others). These works will also be examined in depth from a literary and theoretical perspective. Enrollment limited to 20 first year students. FYS LILE

**COLT 0510F. Che Guevara, The Man and the Myths.**

We will read Guevara’s political and philosophical writings alongside the literary, visual and filmic representations that have made him one of the twentieth century’s most iconic figures and a symbol for vastly diverging interests. From a cultural studies perspective, we will compare the development of Guevara’s theories to posthumous uses of his work and image, particularly in and in relation to present-day Cuba. Enrollment limited to 20 first year students. Instructor permission required. FYS

**COLT 0510G. "The Grand Tour; or a Room with a View": Italy in the Imagination of Others.**

Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this “grand tour.” We will read texts (both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, as well as view films (such as “A Room With a View”) - all in order to determine the ways in which Italy "means" for the cultural imagination of Western civilization. For first year students only. FYS
COLT 0510L. Virgil and Milton.
We will read the Aeneid and Paradise Lost with interpretive patience. The study of fate, character, and poetics will be wedded to investigations of beauty, wonder, and nationhood. Enrollment limited to 20 first year students. FYS

COLT 0510K. The 1001 Nights.
Explores the origins, performance, reception, adaptation, and translation of the 1001 Nights, one of the most beloved and influential story collections in world literature. We will spend the semester in the company of genies, princes, liars, slaves, mass murderers, orientalists, and Walt Disney, and will consider the Nights in the context of its various literary, artistic, and cinematic afterlives.

COLT 0510L. What is Tragedy?
Introduction to tragedy. Readings may include Sophocles, Shakespeare, Hegel, Chekhov, Chan-wook Park, and Jia Zhangke. Enrollment limited to 20 first year students. FYS

COLT 0510M. Early Modern Selves: From Soliloquy to Self-Portrait.
We will study the early modern self through its manifestation in the soliloquy (Shakespeare), philosophical treatise (Descartes), early modern poetry, and self-portraiture (Rembrandt). After examining Hamlet’s “To be or not to be” speech and other Shakespearean soliloquies as moments in which characters represent themselves in speech, we will turn to Descartes’ view of man’s essence as his thinking nature. We will then read metaphysical poetry to understand the influence of religion on the early modern self. Readings include Hamlet, Richard II and III, Taming of the Shrew, Discourse on Method, Meditations, and poetry by John Donne.

COLT 0510N. Shakespeare (ENGL 0310A).
Interested students must register for ENGL 0310A.

COLT 0610A. The Far Side of the Old World: Perspectives on Chinese Culture.
A survey of traditional Chinese culture focusing on the major literary and artistic achievements of six major periods in Chinese history, including philosophical texts, poetry, various forms of the fine arts, and vernacular fiction and drama. A broad range of primary materials will give the student greater insight and appreciation of Chinese culture in general and also provide a foundation for further study of East Asia in other disciplines.

COLT 0610C. Banned Books.
An examination of literary censorship in which we read various texts forbidden for putatively violating social, religious, and political norms in particular historical and cultural contexts. We also analyze the secondary literature surrounding the banning of these ostensibly “dangerous” texts in order to theorize questions and assumptions about the power of art and the ironies generated by these debates.

COLT 0610D. Rites of Passage.
Examines a seemingly universal theme-coming of age-by focusing on texts from disparate periods and cultures. Proposes that notions of “growing up” are profoundly inflected by issues of class, gender and race, and that the literary representation of these matters changes drastically over time. Texts from the Middle Ages to the present; authors drawn from Chrétilen de Troyes, Quevedo, Prévost, Balzac, Brontë, Twain, Faulkner, Vesaas, Rhys, Satrapi and Foer. Enrollment limited to 20 first year students. FYS

COLT 0610E. Crisis and Identity in Mexico, 1519-1968.
Examines four moments of crisis or critical moments for the forging of Mexican identity: the Conquest, the hegemonic 17th century, the Mexican Revolution, the "Mex-hippies" of the 1960s. We especially explore how key historical, essayistic, and literary writings have dealt with Mexico's past and present, with trauma and transformation. Excellent preparation for study in Mexico. In English. No prerequisites. WRIT

COLT 0610G. Literature and the American Presidency.
We are accustomed to engaging the American presidency as a public office approached through the prism of government, political science, and the like. This course studies the presidency through a literary lens, focusing on four presidents and three literary genres: epistolography (J. Adams and Jefferson), biography (Washington) and literary analysis (Lincoln). We will also study on video the inaugerals and farewells of more recent presidents and, finally, examine non-traditional literary forms, such as pamphlets, songs, posters, broadsides, graphics, newspapers, magazines, and original documents from various presidential elections. WRIT LILE

COLT 0610H. Renaissance Epic.
Explores Renaissance attempts to renew, parody, and question the classical epic tradition. The study of poetics, narrative, and imagination will be wedded to investigations of beauty, wonder, and nationhood. Authors will include Ariosto, Tasso, Ercilia, Spenser, Camões, du Bartas, and Milton.

COLT 0610I. Introduction to Cultural Studies.
We live in a cultural saturated with information. The messages we register, the meanings we deduce, and the knowledge upon which we ground our actions and choices require critical examination if we are to engage as thoughtful actors in our personal and civic lives. This class will encourage students to reflect on their initial impressions of and reactions to various media and will give them critical tools to examine how formal and thematic strategies work to shape and elicit our sympathies, our desires, our fears, and our beliefs. Focusing primarily on visual and written texts drawn from popular culture—video, print, film, and Web sources—students will practice their analytical skills by evaluating these texts in classroom discussions, several short writing assignments, and one longer essay. Reading the work of several cultural theorists, students will learn to analyze persuasive argumentation through an attention to rhetorical and framing devices and to recognize and decipher visual cues, enabling them to interpret texts and images and to produce coherent critical positions of their own. This class will prepare participants for college courses that require them to process knowledge and not simply acquire information.

Interested students must register for MCM 0901A.

Examines the narrative of detection, beginning with the great dramatic whodunit (and mystery of identity) Oedipus Rex. Literary texts which follow a trail of knowledge, whether to establish a fact (who killed Laius?) or reveal an identity (who is Oedipus?) follow in Sophocles’ footsteps. We read Sophocles’ intellectual children. Readings include: Hamlet, The Murders in the Rue Morgue, The Woman in White, and other classic novels and plays. We also analyse seminal films of the genre, including Laura and Vertigo. Will include the twentieth-century detective story, with particular attention to women writers and the genre of the female private eye.

COLT 0610M. The Israeli-Palestinian Conflict: Contested Narratives (UNIV 0980).
Interested students must register for UNIV 0980.

COLT 0610N. Being There: Bearing Witness in Modern Times (ENGL 0710F).
Interested students must register for ENGL 0710F.

COLT 0610O. The Death of the Subject in Twentieth and Twenty-first Century Literature.
Examines the condition of the subject in Western novels and plays written after 1945. Traditional markers of identity in works of literature are being eroded by globalization, split families, the invasion of science in the derailing of the subject and how literary form is affected in novels by Beckett, Coetzee, W. G. Sebald, Kazuo Ishiguro, Michel Houellebecq, Chuck Palahniuk, and in plays by Caryl Churchill.

COLT 0610P. Stories and Storytelling.
An introduction to stories, how they are constructed, and how they are told. We will explore the role of storytellers in the creation of a story, the idea of “plot,” the forms that stories take, and the category of fiction itself—in essence, how and why stories are made, and made up. Our discussion will range from topics such as fictional forms, the acts of reading and of telling, the role of memory, and the invention of self, to questions of time and duration. Texts examined will be drawn from a variety of genres, periods, and cultures. FYS
COLT 0610Q. Before Wikipedia
How did humans organize knowledge before Wikipedia? This course explores the fascinating history of encyclopedic texts, archives, and databases in various cultural contexts. We consider issues of book history, the classification of knowledge, and the obsession to collect, compile, and document everything knowable and unknowable in both real and fictional encyclopedias. The use of Wikipedia in this course is not only tolerated but required. Students will be responsible for originating, composing, and curating new Wikipedia entries over the course of the semester.

COLT 0610R. The Myth of the Seven: From Aeschylus to Kurosawa (CLAS 0950)
Interested students must register for CLAS 0950.

COLT 0610S. Literature and Knowledge
What is knowledge? How do we know what we know? We will read literary texts concerned with these questions to consider how knowledge relates to power, and how deception, stupidity, and mystification force us to question what we know. Readings include Austen, Hawthorne, Melville, Flaubert, James, and Schnitzler.

COLT 0610T. Chinese Empire and Literature.
This course offers an introduction to early imperial Chinese literature and to comparative approaches to colonization, sinicization, and cross-cultural heritage. Readings include China’s most famous works of historical literature, Sima Qian’s Shi ji, poems, essays, and visual materials from the Qin-Han to Tang periods; and contemporary representations of early empire in Chinese films. Knowledge of classical Chinese welcome but not required.

COLT 0710A. Women’s Words: Writing in Medieval Europe and Japan.
An introduction to women poets, dramatists, and prose writers from medieval court cultures, with an emphasis on what these authors show us about their educational, social, moral/spiritual environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? Readings may include works by Christine de Pizan, Dhuoda, Heloise, Hildegard of Bingen, Hrotsvit, Julian of Norwich, Margery Kempe, Marie de France, Murasaki Shikibu, Sei Shonagon, and Troïla plus shorter texts written by both men and women. Instructor permission required. DPLL

COLT 0710C. Introduction to Scandinavian Literature.
An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Kierkegaard, Ibsen, Strindberg, Munch, Hamsun, Josephson, Södergran, Lagerkvist, Vesaas, Cronqvist, August and Vinterberg, as well as children’s books by Astrid Lindgren and Tove Jansson. LILE

COLT 0710D. Inventing the Renaissance.
The invention of the Renaissance as a cultural formation and as a part of the western cultural imaginary. We will consider the so-called "discovery of man," humanism and the recovery of the classical past, the production of scriptural identity or the "bibliographic ego," courtiership, the formation of the early modern state and the discovery of the "new world" through readings of major English and continental writers of the period.

A reading of the major literary monuments, from early waka to Genji to the fiction of Ōe Kenzaburō. Surveys Japanese literary production from the 8th century to the present, examining the formation of literary genres, aesthetic values, and reading habits of successive eras in the context of political, social, and cultural development. No prerequisites.

COLT 0710F. Latin America: The French Connection.
Raises questions of intertextuality between French and Latin American literature, focusing on how each represents the other. Beginning in the late nineteenth century, questions aesthetic categories of the real, the surreal and the marvelous/magical real; and literary responses to World War II and the Dirty War, the 1968 student protests in Paris and Mexico City, feminist movements, and globalization.

COLT 0710H. Mexican lettres, 1519-1968.
The course approaches the history of ideas in Mexico by examining four critical moments/moments of crisis in the country’s development. We focus on the issues and burdens of the past as conceptualized in historical, essayistic, and literary writings of the Conquest, the Baroque, the Mexican Revolution, and the iconoclastic 1960s. In English. LILE

COLT 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America.
An interdisciplinary journey-combining history, literature, art, film, architecture, cartography-through representations of the many worlds that comprised the colonial Hispanic New World. We trace the paraisidal Antilles, the U.S. Southwest, Tenochtitlan/Mexico City, Lima, Potosí. We read European, indigenous, and Creole writers, including: Columbus, Las Casas, Bernal Díaz, Aztec poets, Guaman Poma, Sor Juana. In English. Excellent preparation for study abroad in Latin America. Enrollment limited to 20 first year students. FYS WRIT

COLT 0710L. Storytelling: Verbal Art as Performance.
This course offers a comparative selection of oral and written foltkales from Arabic, Chinese, African, North American, and European traditions in translation in order to study the formation and reception of storytelling in different socio-cultural contexts (Western and non-Western, contemporary and traditional). We will consider storytelling and associated performance practice in the light of a variety of theoretical disciplines (e.g., rhetoric, folklore, sociolinguistics, performance studies, literary criticism, narratology). There will be lectures, presentations, and videorecordings.

COLT 0710N. A Comparative Introduction to the Literatures of the Americas.
Considers the common links between the diverse literatures of North and South America, approached in relation to one another rather than to Eurocentric paradigms. Focuses on the treatment of such topics as the representation of the past and the self, the role of memory and the imagination, the nature of literary language, and the questions of alienation, colonialism and post-colonialism, communication versus silence, and fiction versus history in the works of selected writers from North and Latin America, including García-Márquez, Faulkner, Cortázar, Allende, Lisperct, Morrison, Doctorow, Rosa, and Delillo. Enrollment limited to 15 first year students. FYS WRIT

COLT 0710P. Women and Writing in Medieval France and Japan.
An introduction to women poets and prose writers from early court cultures, with emphasis on what these authors show us about their social environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? What kinds of literary approaches and conventions were perfected by them? How did they view their personal social status? What emotions, moral, and spiritual concerns did they voice? Readings: works by Murasaki Shikibu, Sei Shônagon, Heloise, Marie de France, Cristin de Pizan, plus shorter texts written by both men and women between 700 and 1450 C.E.

COLT 0710Q. Odysseus in Literature.
Examines the reinancements of the Homeric figure of Odysseus in contemporary literatures. It approaches the texts historically, culturally and literarily. How is the Odysseus myth altered from culture to culture (Greece, Rome, Ireland, the Caribbean), how is it re-adapted in different historical periods, how does Odysseus change as the genre changes (epic, poetry, the novel, film, drama)?

This survey course on Japanese literature will introduce works ranging from the 7th century AD to the present. This course will provide a historical survey of classic and modern texts, while paying attention to the close relationship Japanese literature has had with visual culture from the calligraphic poems of the Heian period to the postwar influence of manga upon literature.

COLT 0710T. Classics of Indian Literature (CLAS 0830).
Interested students must register for CLAS 0830.

While Zen, sushi and anime have become commonplaces in contemporary American parlance, Japanese literature and culture remain static enigmas, conjuring up visions of stolid-faced samurai, cherry blossoms, and post-modern dystopias. In this survey of Japanese literary works from the 8th century to the present, we will examine the development of canons of
literature, both poetry and prose, and aesthetics in specific social contexts in Japanese cultural history. Also, we will consider their re-evaluations in subsequent eras, raising questions about the stability and continuity of such traditions. In addition to readings, we will briefly look at film, manga and anime.

COLT 0710V. The Arab World Writes Itself: Contemporary Arabic Literature.
In his seminal work Orientalism, Edward Said paraphrases Marx, and suggests that Orientalist attitudes towards the Middle East have produced a discourse in which the East must always be spoken for, and not allowed to represent itself. Said’s argument has become even more relevant in the past decade, given the growing interest in the Middle East as a region in the US, coupled with a dearth of spaces where voices from the region can offer their own narratives. Designed as an introductory course to contemporary Arabic literature, this course includes a variety of readings in translation and films from across the Arab world; it foregoes an intense exploration of one national literature for a more varied survey of the textual output of several countries. We will attempt to situate each literature within its national context and within the larger pan-Arab, regional and international context while being sensitive to the political, geographical, and historical foci that have influenced these texts, including the rise of Arab nationalism and the independence struggles of the mid-twentieth century, and immigration. We will also examine—and hopefully question—some of the discursive themes and conceptual frames that have been traditionally used to think about contemporary Arabic literature. Enrollment limited to 20. LILE

COLT 0710W. Cultures of Colonialism: Palestine/Israel.
Examines the history and literary production of the Israeli-Palestinian colonial encounter from 1948 to the present. Aims to delineate the deep links between domestic culture and colonialism in Israel-Palestine by raising questions about statehood, dispossession, and exclusion in the imaginaries of both peoples and by examining novels in relation to the ethical and political imperatives of settler-colonial dynamics. Authors include: David Grossman, Emile Habibi, Jabra I. Jabra, Sahar Khalifah, Kanafani, Amos Oz, and A. B. Yehoshua. Sophomore seminar. Enrollment limited to 20 sophomores.

COLT 0710X. Fan Fiction.
What is imitation (sincerest form of flattery) to literary canons? Vergil’s Aeneid appropriated Aeneas from the Iliad, Joyce’s Ulysses modernized Odysseus. Admiration as a source of inspiration is a major force in the evolution of fiction. “Fan Fiction” explores intriguing characters in greater detail and new contexts, allowing them new lives in contemporary imagination. This course presents pairs of works that are explicitly linked by the intimate relation of imitation. Classic readings will be paired with their mostly contemporary updates, including Pride and Prejudice/Murder at Pemberley, Vilette/The Thirteenth Tale, Heart of Darkness/State of Wonder, Kim/The Game, and Monkey/Tripmaster Monkey.

COLT 0710Y. After The War: Arendt, Duras, Kahanno and Anonymou
Four women, a political theorist, a novelist, an essayist and an anonymous author question WWII. They document war’s experiences and memories, its unfolding and its end, its continuation and after effects. They are interested in what was left of public life, intimacy, friendship, womanhood, survival, liberation and invent forms of promises and forgiveness. We will read Duras’ memoir on the war and her screenplay for Hiroshima mon amour, Arendt’s Origins of Totalitarianism and her critique of Zionism, Kahannof’s fictional writings and essays and the diary of a forsaken German woman in post war Berlin, a devastated city under Soviet occupation.

COLT 0810A. Ancient Greek Myth in Modern Poetry.
Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek. Considers how poets since 1800 have approached, rewritten, or subverted the classical version of myths, such as those of Eurypides, Helen, Orpheus, Persephone, Penelope, and Ulysses. Emphasizes the challenges posed by the past, issues of cultural and political context, and questions of gender. Readings in English.

COLT 0810C. Arthurian Tales and Romances of the Middle Ages.
Why did stories of King Arthur, his knights, and their ladies fascinate writers and audiences throughout Europe? What can Arthurian quests, marvels, and love adventures tell us about successive pre-modern societies that shaped them? What are our responses to their cultural beliefs and forms of playful make-believe? Readings (in modern translation) of medieval Latin, French, English, Welsh, and German texts. LILE

COLT 0810D. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works will be brought to the foreground.

COLT 0810E. Confession, Autobiography, Testimony.
Does writing a life give it coherence and veracity, or create a fiction? What is the relationship between first-person narrative and truth, and between authorship and authority? How does the form of a first-person text -- a religious confession, a personal journal, a political denunciation, a collective memoir -- affect the telling? Must the reader of such an account be “you” to the teller’s “I”, and how does the intimacy of this relationship shape the experience of reading? In this course, we test the limits of self-narration against ethical and physical limits, reading first-person narratives that purport to be non-fictional. We will read accounts of different experiences -- social and sexual transgression, suffering and perpetrating violence, slavery -- and explore both the possibilities and duplicities of writing as “I”.

COLT 0810F. Desire and the Marketplace.
Studies love and desire as the interplay between men, women, and money in mercantilized societies, in seventeenth century Japan, eighteenth century England, nineteenth century France, and twentieth century Africa. Novels featuring female protagonists by Saikaku, Dofuo, Flaubert, Emechta and Bá, readings in economic and feminist theory, and visual art--Japanese woodcuts, Hogarth, nineteenth century French painting, West African arts. LILE

COLT 0810G. Equity: Law, Literature, and Philosophy.
Justice, rigorously applied, yields injustice. This paradox has haunted Western aspirations toward legal and political justice from antiquity to the Renaissance. It necessitated the formulation of a complementary principle, equity, whose job it was to correct or supplement the law in cases where the strict application of it would lead to unfairness. We will read Sophocles, Shakespeare, Dickens, Kafka, and others.

COLT 0810H. How Not to Be a Hero.
Shakespeare wrote two great, intense plays about ancient characters who were irredeemable failures: Coriolanus and Timon of Athens. What can tales teach us? What kind of strength does a language of failure possess? We will also read the ancient sources themselves (Livy, Lucian, Plutarch), and modern adaptations of these stories (Bertolt Brecht, T. S. Eliot, Günter Grass, Wyndham Lewis).

COLT 0810I. Tales and Talemakers of the Non-Western World.
Examines many forms of storytelling in Asia, from the Epic of Gilgamesh and the Arabian Nights Entertainments to works of history and fiction in China and Japan. The material is intended to follow the evolution of non-western narratives from mythological, historical and fictional sources in a variety of cultural contexts. Topics will include myth and ritual, the problem of epic, tales of love and the fantastic, etc. DPLL LILE

COLT 0810J. The Colonial and Postcolonial Marvelous.
A celebration and critique of the marvelous in South American and related literatures (U.S., Caribbean). We follow the marvelous from European exoticizing of the New World during the colonial period to its postcolonial incarnations in ‘magical realism’ and beyond. We attend particularly to the politics and marketing of the marvelous, in writers including Borges, Chamoiseau, Columbus, García Márquez, Fuguet. Reading in English or Spanish. DPLL WRIT

COLT 0810M. Uncanny Tales: Narratives of Repetition and Interruption.
What makes stories creepy? Close readings of short narratives with special attention to how formal and thematic elements interact to produce
the effects of uncertainty, anxiety and incoherence peculiar to "the
uncanny." Topics include: the representation of the self in images of the
arts; the representation of speech; instabilities of identity and spatial and
temporal boundaries; doubles, monsters, automata and hybrids. Texts
selected from: Walpole, Shelley, Hoffmann, Kleist, Poe, Dostoyevsky,
Freud, Wilde, Cortazar, Kafka, Lovecraft.

COLT 08100. Civilization and Its Discontents.
Investigates the age-old tension between order and chaos as a central
dynamic in the making and interpretation of literature. Texts will be
drawn from drama, fiction and poetry from Antiquity to the present. Authors
include Sophocles, Shakespeare, Racine, Beckett, Prevoit, Bronte,
Faulkner, Morrison, Blake, Whitman, Dickinson, and Rich.

COLT 0810P. Moderns and Primitives.
Modernism has been called a 'Renaissance of the Archaic'. We will
read from the major works of Anglo-American modernism (Eliot, Joyce,
Lawrence, Pound), focusing on their attitudes toward the primitive and
the archaic. In addition, we will examine anthropological theories from the
Victorian period to Durkheim, explore primitivism in modernist music and
painting, and read about recent controversies surrounding modernism and
primitivism.

COLT 0810U. Lovers, Slaves, Kings and Knaves: Major Plays in
Western Literature.
This course will introduce students to representative tragedies and
comedies, focusing in particular upon their development as literary genres;
continuities and variations of character, plot, and theme; stage and
performance conventions; and the classical tradition. Readings will include
Aeschylus, Sophocles, Euripides, Aristophanes, Shakespeare, Racine,
Eilde, Ibsen, and Vogel.

COLT 0810W. Caribbean Fiction.
Through fiction and film originally in Spanish, French or English and
theories of the postcolonial and postmodern, we explore how images of the
Caribbean have been constructed and complicated: as lands of abundance,
scenes of historical violence and natural disaster, destinations for colonial and
colonial-modern-day tourists. Readings include Carpentier, Benitez
Rojo, Santos Februs, Chamoiseau, Condé, Kincaid, Brathwaite.

COLT 0810X. European Renaissances.
Just what is the European renaissance and when and how did it happen and
who decided? Let's look at the renaissances of Petrarch, Boccaccio,
Giotto, of Erasmu, and Thomas More and Holbein, of Machiavelli and
Rojo, Santos Februs, Chamoiseau, Condé, Kincaid, Brathwaite.

COLT 0810Z. Myth and Literature.
Authors throughout the ages have been fascinated by ancient mythology
and have incorporated elements of it into their texts, often modifying
commenting on or even destroying the original myth in the process.
This course will investigate the values, dangers and limitations of myth-
writing/using in literature. Primary texts will include major works by
Milton, Goethe, Kleist, Racine and Kafka. Texts will be supplemented by
secondary readings and multimedia elements. Students will learn to
question and engage critically with the historical, cultural, literary and
scientific frontiers that separate myth and reality. Assignments will include
two short papers and a final paper.

COLT 0811A. Introduction to Modernism: Past, Future, Exile, Home
(ENGL 0700F).
Interested students must register for ENGL 0700F.

COLT 0811B. Believers, Agnostics, and Atheists in Contemporary
Fiction (JUDS 0050A).
Interested students must register for JUDS 0050A.

COLT 0811C. Belonging and Displacement: Cross-Cultural Identities
(POBS 0810).
Interested students must register for POBS 0810.

COLT 0811D. The Bible as Literature (JUDS 0830).
Interested students must register for JUDS 0830.

COLT 0811E. Media and/as Ethnography (MCM 0900W).
Interested students must register for MCM 0900W.

COLT 0811F. Writing War (ENGL 0710C).
Interested students must register for ENGL 0710C.

COLT 0811G. Literature, Trauma, and War (ENGL 0500L).
Interested students must register for ENGL 0500L.

COLT 0811H. Monuments and Monsters: Greek Literature and
Archaeology.
Survey Greek archaeology from the Bronze Age to the Hellenistic period,
and reads Greek literature roughly contemporary with the archaeological
period surveyed, with an emphasis on epic and drama. No previous
knowledge or prerequisites needed.

COLT 0811I. Classical Mythology and the Western Tradition.
Reads classical texts that expound the fundamental mythological
stories and elements of the Western tradition, then will read selected
texts from the Renaissance through the twentieth century that utilize
these myths. Ancient texts covered will include the Epic of Gilgamesh,
Hesiod's Theogony and Works and Days, Ovid's Metamorphoses, and
plays by Aeschylus, Sophocles, and Euripides. Later texts will include
Shakespeare's Venus and Adonis and Rape of Lucrece, Milton's "Lycidas,"
and lyric poetry by Keats, Shelley, Browning, Swinburne, Rilke, Auden,
and Yeats. This course is suitable for anyone wishing to understand the
classical background to Western literature. LILE.

COLT 0811K. Literature, Trauma, and War (ENGL 0910F).
Interested students must register for ENGL 0910F.

COLT 0811L. Catastrophic Communities (ENGL 0710K).
Interested students must register for ENGL 0710K.

COLT 0811M. Planes, Trains, and Automobiles: Travel and Transport
in Modern Literature and the Arts.
This course studies how new modes of transportation and the experiences
they enabled stood as symbols of both the fears and joys of rapid
modernization in 19th- and 20th-century literature, film, and visual art.
How did the speeding locomotive, the plane's aerial view, and the personal
freedom of the automobile transform the ways people traversed space,
experienced time, traded, and came into contact with one another? In
formal terms, how did these experiences inspire innovations in the media
we examine by Whitman, Kipling, Baudelaire, Marinetti, Brecht, Woolf,
Huxley, Stein, Ruttman, Wegman, Picabia, Duchamp and others? No
prerequisites.

COLT 0811N. Poetics of Madness: Aspects of Literary Insanity.
This course surveys a wide range of literary texts with a view to tracing
the long process of transition from pre-modern to modern conceptions of
madness on the one hand, and to identifying the symbolic logic and
discursive modalities that underlie its respective representations on
the other. Spanning several centuries of artistic preoccupation with the
alienated mind, these texts will serve as points of reference in a focused
exploration of the relationship between insanity and literature, as it has
been shaped by social dynamics, cultural norms, philosophical ideas,
and medical theories. Authors include Euripides, Erasmus, Shelley,
Dostoyevsky, Stevenson, and Woolf.

COLT 0811Q. Mediterranean Cities.
Athens, Istanbul, Alexandria: three iconic cities of the Levant that will serve
as points of reference in a focused exploration of East Mediterranean
history and culture. Reads and discusses a number of texts that span
several decades and a wide range of styles and genres – from realism to
postmodernism and from autobiography to thriller – but exhibit a common
interest in the urban landscape and its relationship to basic aspects of
human existence: identity and ideology, memory and desire, isolation and
connection, hope and fear, life and death. Authors include Theotokas,
Seferis, Taksits, Durrell, Mahfouz, Kharrat, Tanpinar, Shafak, Altun.

COLT 0811R. Statelessness and Global Media: Citizens, Foreigners,
Aliens (MCM 0901K).
Interested students must register for MCM 0901K.

COLT 0811U. The Palestinian-Israeli Conflict in History, Literature,
Film.
An examination of the Palestinian-Israeli conflict through the lens of
cultural production. We will read literature and film in combination with
historical texts, exploring how cultural producers have responded to key
events from the partition of Palestine in 1947 until the second Intifada.
We will examine the way that novels, poetry, documentaries, and films provide us with humanistic and alternative narratives on Israeli-Palestinian relations, exploring issues including nationalism, race, gender, colonialism, ethics, war and political resistance. We will examine the tension between historical and artistic production, analyzing how filmm and literature challenge, re-imagine and supplement historical and political accounts.

**COLT 0811V. The Quran and its Readers.**

Like the Bible, the Qur’an has had a monumental impact upon literary production in the Islamic world and beyond. Its narratives and imagery have permeated the textual cultures of Muslim societies the world over. In this course, we approach the Qur’an as a source of literary inspiration alongside the works of some of its most interesting readers, interpreters, and commentators, including Robert of Ketton, Dante, Montesquieu, Jurjani, Suyuti, Goethe, Borges, Sayyid Qutb, and Salman Rushdie.

**COLT 0811W. The Myth of Venice in Literature: Memory, Desire and Death.**

This course will explore the myth of Venice in literature: focusing on the *topos* of Venice in the genre of travel writing, we will study the theme of liberty and decadence associated with Venice’s theatrical and political culture. Readings will include Shakespeare’s *The Merchant of Venice*, excerpts from De Brosses’s *Travels through Italy*, Goldoni’s *Memoirs*, Rousseau’s *Confessions*, and Casanova’s *Histoire de ma vie*. We will also study the influence of these accounts on the Romantic poets (Goethe, Wordsworth, Byron, Shelley, and Musset), and modernity (Henry James’s *The Aspern Papers*, Thomas Mann’s *Death in Venice*, Donna Leon’s *Death at the Fenice*).

**COLT 0811X. The Dead and the Living (ENGL 0710D).**

Interested students must register for ENGL 0710D.

**COLT 1210. Introduction to the Theory of Literature.**

An historical introduction to problems of literary theory from the classical to the postmodern. Issues to be examined include mimesis, rhetoric, hermeneutics, history, psychoanalysis, formalisms and ideological criticism (questions of race, gender, sexuality, postcolonialism). Primarily for advanced undergraduates. Lectures, discussions; several short papers.

**COLT 1310B. Classics of Indian Literature (CLAS 1160).**

Interested students must register for CLAS 1160.

**COLT 1310C. Twentieth-Century Western Theatre and Performance (TAPS 1250).**

Interested students must register for TAPS 1250.

**COLT 1310D. Between Gods and Beasts: The Renaissance Ovid (ENGL 1360S).**

Interested students must register for ENGL 1360S.

**COLT 1310E. A Classical Islamic Education: Readings in Arabic Literature.**

This seminar introduces students to the essential texts of a classical education in the Arabic-Islamic world. What works of poetry, literary criticism, bellettristic prose, biography, geography, history, and other disciplines were considered staples of a well-rounded education in medieval Baghdad, Cairo, Damascus, or Fez? Emphasis will be placed on close and patient readings of primary sources. At least two years of Arabic required.

**COLT 1310F. Art and Revolution.**

“Creativity in the revolution and revolution in creativity,” was the slogan of Palestinian poet Mahmoud Darwish. How do moments of political crisis create new possibilities for art? Are political and artistic revolutions compatible? This course will concentrate on three recent moments of political upheaval and the artistic practices that emerged alongside them: the Cuban Revolution, the Algerian Revolution, and the ongoing conflict in Israel and Palestine. We will end by looking at the artistic production of the so-called Arab Spring. Readings by Che, Infante, Djebbar, Fanon, Darwish, and others. Films by Pontecorvo and Goddard.

**COLT 1310G. Silk Road Fictions.**

Today the Silk Road is a metaphor of premodern East-West exchange. Through a range of literary texts and cultural sites that are now associated with the Silk Road we will explore problems in cross-cultural comparative reading, translation, and concepts of cosmopolitanism. What is gained or lost when we read classical Chinese, Greek, or English texts outside national literatures or modern Area Studies frameworks?

**COLT 1410A. All the World’s a Stage: Seventeenth-Century Drama.**

Readings of representative English and continental plays of the 17th century including Shakespeare, Jonson, Corneille, Molière, Tasso, Calderon, and others. How do dramatists represent and negotiate oppositions between art and nature, imagination and reason, myth and history, freedom and fate through dramatic form and metaphor? Why is the stage such a powerful metaphor for the world?

**COLT 1410B. Chinese Opera: Aesthetics and Politics of the Performing Body.**

Explores traditional Chinese drama, which has always been a music theater, from the perspective of contemporary cultural theory, and in a comparative and interdisciplinary context. Analyzing classical plays in relation to their staging in today’s regional operas, this course will first examine the dialectics of “prettiness and artistry” in traditional Chinese theater aesthetics and its implications in gender politics. It will then move on to investigate issues of cross-dressing and erotic desire in Chinese drama of the late imperial period in comparison with that of early modern England. Lastly, the ramifications of Chinese opera as a national imagination in modern cultural politics, as embodied in the play *M. Butterfly*, the film *Farewell My Concubine*, and the Beijing opera version of *Turandot*, will be addressed.

**COLT 1410C. Chinese Theatre in the Mao Years.**

This course focuses on two major issues: policing traditional theater and “model revolutionary drama” as “a new proletarian culture.” The course will begin with a study of Mao Zedong’s ideas on literature and art in the light of contemporary cultural theory. It will then look at examples of the “new opera” and “new history play,” examining them in relation to a complex of censorship issues concerning the exercise of political power in administering human life and the body, literature and drama as political representation, and the hermeneutics of censorship.

**COLT 1410D. Dramatic Literature and Theoretical Practice in Eighteenth-Century England.**

An introduction to the dramatic literature of 18th-century England in the context of contemporary theatrical conventions and innovations. Plays read alongside treatises on acting techniques, stage design, and contemporary theatrical pamphlet-debates. The sociopolitical contexts of the London patent theaters and the coexistent "illegitimate" entertainments are explored, as well as the influential effects of Continental theatrical theory and innovation.

**COLT 1410E. Japanese Theatre: from Dengaku to De Sade.**

Surveys traditional Japanese theatre from the lofty medieval No drama to the more popular genres of Jōruri (puppet theatre) and Kabuki in the Edo period (1600-1868). Through playscripts, related secondary criticism, videotapes, and films, we will examine the function of spectacle and theatre, the problem of representation or mimesis, the notion of audience, and the relation of text to performance. Concludes with more recent examples of Japanese drama and performance.

**COLT 1410F. Medieval Drama.**

How drama developed in northwestern Europe between the tenth and early sixteenth century-from liturgical tropes and miracle plays to mystery cycles and morality plays, from popular feasts and minstrel performances to fool’s plays, farces, and other secular comedies. Emphasis on the cultural context and social functions of dramatic games and performances in premodern Europe.

**COLT 1410K. European Early Modern Drama.**

An introduction to early modern drama in the French, Italian, Spanish, and English traditions. The goal is to explore a wide range of imaginative impulses in the Renaissance and Baroque periods. Readings will include plays by Corneille, Racine, Calderon, Lope de Vega, Shakespeare, Machiavelli, and Molière.

**COLT 1410L. Philosophy and Tragedy.**

Explores the intersection of philosophy and tragedy in western literature. Readings may include Sophocles, Plato, Aristotle, Shakespeare, Hegel, and Nietzsche.
COLT 1410M. Shakespeare and Philosophy.
Explores the relationship between Shakespeare and philosophy. Readings include philosophers who have written about Shakespeare (Hegel, Nietzsche, Cavell, and others), as well as philosophers who may illuminate interpretive problems in Shakespeare (Plato, Seneca, Spinoza, and others).

COLT 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan.
Contrasting the demands of the text versus the screen, we will read eight to ten works of modern Japanese literature and view the film versions of each in order to discuss the problem of translation from one medium to another. Possible works for inclusion are Rashomon, Harp of Burma, Woman in the Dunes, and The Makioka Sisters. Finally, we will consider manga (the graphic novel) and its adaptation into anime.

COLT 1410O. Shakespeare and
Canon formation and disciplinary divisions have deformed the way in which we read Shakespeare. Frequently presented as a post-romantic singular "author," cut off from the sources, texts and genres on which he drew and the collaborators with whom he worked, Shakespeare looks, reads and performs differently in relation to the rich contexts in which the plays were produced and through which they are produced today. We will read plays and other materials with attention to formal and historical questions including genre, the Shakespearean text, gender, sexuality, status, degree, and nation.

COLT 1410P. Shakespeare.
We will read a number of Shakespeare's plays from The Comedy of Errors to The Winter's Tale in relation to the sources, analogues, and genres (classical, continental and English) on which he drew. We will consider both formal and historical questions. Issues to be addressed include genre, the Shakespearean text, gender, sexuality, status, degree, and nation. Some attention to what has come to be called "global" Shakespeare. Written work to include a mid-term and two papers.

COLT 1410Q. Hamlet: Translation, Adaptation, Appropriation.
Shakespeare's Hamlet is perhaps the most widely read, performed, adapted, parodied, and imitated literary text of the western tradition. In this course we will begin by reading/re-reading the play before going on to consider a number of appropriations of Shakespeare, both in the west and non-west, in order to address social and aesthetic issues including questions of meaning and interpretation, intertextuality and cultural relativism. Prerequisite: Previous study of Shakespeare. Enrollment limited to 20.

COLT 1410S. Classical Tragedy.
This course will read the great Greek tragedies of Aeschylus, Sophocles, and Euripides, and some Senecan tragedy. We will then read Renaissance and later tragedies that use the classical world as a setting, such as Antony and Cleopatra, Julius Caesar, and tragedies that rewrite classical themes, including O'Neill's Mourning Becomes Electra.

COLT 1410T. Tragedy from Sophocles to The Wire.
Explores tragedy from Athens to Baltimore. Readings will include Sophocles, Shakespeare, Hegel, Chekhov, Jia Zhangke, Chan-Wook Park, Marx, Trotsky, and the deindustrialized American city. Open to juniors and seniors. Instructor permission required.

COLT 1410V. Russian Theatre and Drama (TAPS 1430).
Interested students must register for TAPS 1430.

COLT 1410W. mujeres ARRIBA! Feminist Playwrights in Spanish Theater (TAPS 1281R).
Interested students must register for TAPS 1281R.

COLT 1410Y. Shakespeare and Embodiment (ENGL 1360Z).
Interested students must register for ENGL 1360Z.

COLT 1410Z. Perspectives on Shakespeare's Comedies.
We will explore Shakespeare’s comedies in connection with perspectives for thinking about comedy as a genre and a mode. Plays may include Love’s Labor’s Lost, Midsummer Night’s Dream, Measure for Measure, All’s Well that Ends Well, Winter’s Tale, and Cymbeline. Other readings may include Montaigne, Frye, Hegel, Nietzsche, and Freud.

COLT 1411A. Shakespeare and Money.
In an attempt to practice the art of what Nietzsche once called “slow reading,” the course is dedicated to reading The Merchant of Venice with patience and attention. We will attempt a reading that is both conceptually acute and responsive to literary form. Our detailed examination of the play will also be wedded to particular thematic concerns that emerge from the work, including problems of money, violence, and the nature of human obligation.

COLT 1420A. The Tale of Genji and its Legacy.
The Tale of Genji (circa 1000 CE), authored by Murasaki Shikibu, a woman of the Heian court, has been canonized over the centuries as the greatest work of Japanese literature. No work in the Japanese tradition has exerted as much literary influence as this mammoth work of prose fiction detailing the private lives of Genji, the brilliant son of the emperor, those with whom he consorts, and his descendents. We will read Genji in its entirety, along with antecedent works, other texts of the period, works influenced by Murasaki’s opus, other historical materials, and secondary commentary. There are no prerequisites for this course and it is open to all undergraduates.

In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cyonsure of the medieval Japanese court, and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty.

COLT 1420F. Fantastic and Existentialist Literatures of Argentina, Uruguay and Brazil.
Jose Luis Borges proclaimed that South American writers can "wield all themes" without superstition, with irreverence. This course examines the ways in which 20th century writers from Argentina, Uruguay and Brazil appropriated European fantastic and existentialist fictions, taking them in new directions. Readings, in English or original languages, include Borges, Cortazar, Onetti, Lispector. Prerequisite: previous college literature course(s).

COLT 1420G. Fictions of the Caribbean.
The Caribbean has inspired conflicting cultural and political claims, and a wealth of visual images. We will rethink the formation, representation and self-presentation of the Caribbean countries, steering our explorations through postcolonial and postmodern theory to questions of appropriation, language and identity. Readings from Columbus and Shakespeare to Danticat, Santos Febres and Kincaid; essays by Glissant, James Benitez Rojo and others.

COLT 1420K. Masterworks of Chinese Fiction.
Focuses on three acknowledged classics of Chinese fiction-Three Kingdoms, The Journey to the West, and The Dream of the Red Chamber-works which demonstrate the range of the genre as they represent historical, fantastical, and sociopsychological subjects. Topics include the role of fiction in Chinese society, the masterworks as mirrors of Chinese culture from the 14th through 18th centuries, and the comparative theory of the novel.

COLT 1420L. Modern Japanese Fiction.
Narrative fiction from the Meiji Period (1868-1912) to the present in the context of modern Japanese cultural and intellectual history. In addition to more canonical writers such as Natsume Soseki and Mori Ogi, examines the legacy of women writers such as Higuchi Ichiyo and Enchi Fumiko; proletarian writers such as Hayama Yoshiki, Kobayashi Takiji, and Hayashi Fumiko; and more contemporary mass-audience writers such as Yoshihito Banana and Yamada Eimi.

COLT 1420N. Postcolonial Faulkner.
How is it that Faulkner became one of the most influential North American authors in the Third World? To answer this, we read Faulkner’s "The Bear" against two of his citational novels, Absalom, Absalom! and The Sound and the Fury. We then turn toward a number of Faulknerian novels from the Arab world and Latin America. We discuss theoretical texts that describe the legacies of various colonialisms.
COLT 1420O. Proust, Joyce and Faulkner
A reading of three major Modernist authors, with a focus on the following issues: role of the artist, representation of consciousness, weight of the past. Texts include substantial portions of Proust’s Recherche, Joyce’s Portrait and Ulysses, Faulkner’s Sound and the Fury, Light in August and Absalom, Absalom! Prior background in these authors desirable, especially Ulysses. Senior Seminar. Reserved for Seniors, Instructor’s approval required. Enrollment limited to 20.

COLT 1420Q. The Bildungsroman
Readings of novels in the Bildungsroman tradition and the theoretical questions of the genre: the historicity and constitution of the self; problems of the representation of a life; the category of the unity of a life as a factor of identity; notions of progress, development and completion. Considerations of the successes and failures of this model. Readings to be selected from Rousseau, Chateaubriand, Sterne, Goethe, Novalis, Flaubert, Musil, Kuroauc.

COLT 1420S. The Captivity Narrative
Because the captivity narrative implies both a feminized subject and a writing subject, it provides a link among political, social, and literary phenomena common to all modern Western cultures. Examines various novels consumed by members of such cultures (including gothic romances, Bildungsromanen, boys books, girls books, ethnographic journeys, and prison diaries) as versions of the captivity narrative.

COLT 1420T. The Fiction of Relationship
Explores the manifold ways in which narrative literature sheds light on the relationships that we have in life, both knowingly and unknowingly. The novel form, with its possibilities of multiple voices and perspectives, captures the interplay between self and other that marks all lives. Authors include Laclos, Melville, Brontë, Kafka, Woolf, Faulkner, Borges, Burroughs, Vesaas, Morrison, and Coetzee.

COLT 1420U. The South: Literatures of the U.S. South and South America
For Jorge Luis Borges, in his story of the same title, the South is a spectral region, hovering between imagination and reality. The literatures of the U.S. South and South America enact his notion of the South. We examine the remarkable similarities between the two literatures-similarities that result from literary influence and from social, cultural, and historical circumstances. Prerequisites: previous upper-level literature course(s) relevant to your studies at Brown. Instructor permission is required and will be given after second class. WRIT

COLT 1420V. Visionary Fictions
Visionary and apocalyptic writing, subversive of modes of perception and understanding as well as of political doctrines and systems, from Blake and Novalis to mid-nineteenth century French writers (Nerval, Rimbaud, Lautréamont), Surrealism and William Burroughs’ Naked Lunch.

COLT 1420X. The European Novel From Goethe to Proust
Readings of major European novels of the 19th century as literary reflections on philosophical questions such as aesthetic and ethical judgment, subjectivity, mimesis, memory and the novel itself as a genre. Authors include Goethe, Stendhal, Balzac, Dickens, Flaubert and Proust. Selections from Kant, Hegel, Marx, Lukács and Benjamin.

COLT 1420Y. Gigantic Fictions
What is the relation between literary gigantism and mimesis? How do ‘gigantic fictions’ threaten to break their literary bounds? What holds these mammoth narratives together? We will address these questions and others through a close reading of three works: Murasaki Shikibu’s The Tale of Genji, Tolstoy’s War and Peace and James Joyce’s Ulysses.

COLT 1421F. Esthers of the Diaspora: Female Jewish Voices from Latin America (POBS 1500H).
Interested students must register for POBS 1500H.

COLT 1421G. Dickens and Others (ENGL 1511G).
Interested students must register for ENGL 1511G.

COLT 1421I. The Paternalistic Thriller and Other Studies in Colonial Fiction
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T. E. Lawrence, E. M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1421K. Faulkner (ENGL 1710G).
Interested students must register for ENGL 1710G.

COLT 1421L. “Terrible Beauty”: Literature and the Terrorist Imaginary (ENGL 1760I).
Interested students must register for ENGL 1760I.

Interested students must register for ENGL 1761T.

COLT 1421N. Kafka’s Writing (GRMN 1340M).
Interested students must register for GRMN 1340M.

COLT 1421O. W. G. Sebald and Some Interlocutors (ENGL 1761Q).
Interested students must register for ENGL 1761Q.

COLT 1421Q. Word and Image: Ekphrasis, the Iconic Narrative, and the Graphic Novel.
An examination of the tradition of illustrated narratives from the pre-modern to the modern periods: the ancient Indian epic the Ramayana, the early eleventh-century Japanese Genji Monogatari, the medieval English Canterbury Tales, the late eighteenth century Marriage of Heaven and Hell, as well as the contemporary graphic novel Persepolis and examples of Japanese manga. Discussion will focus on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Instructor permission required.

COLT 1421R. The European Novel from Richardson to Goethe.
This course studies the rise of the novel in eighteenth-century England, France, and Germany, focusing on the development of epistolary fiction, but with side-glances at the picturesque and sentimental tradition. Texts to be read include Richardson’s Pamela, Fielding’s Shamela and Joseph Andrews, Rousseau’s Julie, Laclos’s Les liaisons dangereuses, perhaps Bernardin de Saint-Pierre’s Paul et Virginie, perhaps Sade’s Justine, and definitely Goethe’s Sorrows of Young Werther. LILE

COLT 1421S. The Poetics of Confession (ENGL 1561J).
Interested students must register for ENGL 1561J.

COLT 1421T. Mediterranean Fictions.
Sun-drenched, seductive, and bewilidering, the Mediterranean has always been a focal point of contact, interaction, and conflict. And more than that: a cradle of civilizations; a timeless repository of memories and aspirations; a porous, protean world; a sea of many horizons, histories, and identities. We will embark on an intensive exploration of some of the basic aspects of Mediterranean culture by means of discussing a wide range of texts on Greece, Turkey, Italy, France, Egypt, Tunisia, and Algeria. Writers include Sefersis, Kazantzakis, Papadimitrius, Galanakis, Camus, Gide, Pirandello, Lampedusa, and Pamuk. All readings in English translation.

COLT 1421U. Words Like Daggers: The Epistolary Novel.
Letters as novels, novels in letters: this course traces the development of the epistolary novel, as it was cultivated in Europe from the seventeenth to the twentieth centuries. Through focused discussions of seminal, as much as fascinating, specimens of the genre, we will study the major impact that epistolary fiction had on the historical and conceptual evolution of the novel in general, also exploring its interactions with a range of established or shifting social structures, gender roles, discursive practices, and modes of consciousness. Authors include Montesquieu, Laclos, Goethe, Hölderlin, Stoker, Foscolo, Tabucchi, Alexandrou, and Galanaki.

COLT 1421V. Modernisms North and South: James Joyce and Roberto Bolaño.
James Joyce’s Ulysses (1922) and Roberto Bolaño’s The Savage Detectives (1998) are two monuments of modern fiction which bookend the productions of the 20th century. Both are novels about wandering, searching, questioning, and critiquing, and each one maps out distinctive but related forms of engagement with literary tradition, with national articulation, and with aesthetic politics. In the course we will move slowly along the paths carved by each one, tracing the passage from one to...
another, examining each one’s playful, demanding, agonistic engagement with literary traditions, national articulations, and aesthetic politics.

COLT 1421W. Blast from the Past: The Historical Novel.
Focuses on a popular literary genre known as the historical novel. We will discuss its defining characteristics, cultural meanings, and basic differences from other types of fiction. We will also explore larger theoretical issues that are intricately related to the development and scope of the genre: the representation of the past and its relationship to the present; the creative integration of the gaps between factual history and lived experience; and finally the complex interaction between authenticity and fictionality, exemplarity and specificity, temporality and detachment. Authors include Flaubert, Yourencar, Kadare, Pamuk, Calvino, Lampedusa, Roidis, and Galanaki.

COLT 1421X. Fairy Tales and Culture (FREN 1330A).
Interested students must register for FREN 1330A.

COLT 1421Z. Fiction and the Technology of Deception.
A major preoccupation of fiction in the last century, especially American fiction, is the figure of the con-man, forger, counterfeiter, or impostor. After reading Melville’s *Confidence-Man*, we will turn to several monuments of American modern and post-modern fiction, Gaddis’ *Recollections*, Nabokov’s *Lolita*, and Gass’ *Middle C*. We will consider these works in relation to twentieth-century technologies and pseudo-technologies that were invented to perform or expose deception (such as the lie-detector, the identification of sociopaths, the Turing test, corporate advertising, spin, catfishing), and also in conjunction with long-standing theoretical discussions of authenticity, simulacra, and self-deception.

COLT 1422A. The Twilight Zone: Classics of Horror Fiction.
This course discusses a number of seminal works – from Gothic novels to ghost stories and vampire epics – that exploit the oldest and strongest emotion of mankind: fear. Why are authors and readers fanatically drawn to something as disturbing as horror, supernatural or not? How do the gruesome or the macabre become sources of intellectual excitement and aesthetic gratification? How can texts whose intended effect is to shock and distress compel us to confront suppressed instincts, challenge deep-rooted certainties, or reflect on things and ideas that we generally prefer to ignore? Are you brave enough to find out?

COLT 1422B. Fictions of Family in the Enlightenment European Novel.
This course will study the emergence of the genre of domestic fiction in eighteenth-century Europe with its emphasis on the construction of a family space and the establishment of a domestic economy. We will explore this question through the prism of its disfunction: focusing on the story of “domestic misfortunes” in its various forms: poor planning, reckless spending, and general mismanagement of money. We will read novels that reflect on the failures to achieve domestic bliss and offer alternatives to the family, including *The Newcomes* by Defoe, *Moll Flanders* by Smollett, *Pride and Prejudice* by Austen, *Manon Lescaut* by Prévost, *Femmes de Marianne* by La Harpe, and *Pamela* by Richardson. We will pay special attention to the question of creative innovation. The fairy tale as a literary form will be considered as an important vehicle of social change. We will read Horace, Theocritus, Virgil, Dryden, Pope, Tennyson, and others.

COLT 1430H. Poetry, Art, and Beauty.
What does it mean to be beautiful in poetry and art? How is beauty defined from Plato to the blog? What are aesthetic relationships to beauty? A workshop in the reading of lyric poetry and visual art from cave painting to modernism. The three written exercises on text, image, and aesthetics, with creative practice in translation. No final examination. Texts include Sappho, Plato, Aristotle, Catullus, Horace, Petrarca, Goethe, Kant, Wordsworth, Baudelaire, Rilke, Benjamin, Stevens, Derrida, and Danto.

COLT 1430I. Poetry of Europe: Montale, Celan, Hill.
The fifty years between the Second World War and the formation of the European Union was a period in which the meaning of "Europe" was placed under great strain. The class will examine the strains and debates about Europe within the lyric poetry of several literary traditions. It will take the form of close historical, formal, and critical readings of three books of poems in their entirety: Montale’s *The Storm and Others* (1956), Celan’s *No-One’s Rose* (1965), and Hill’s *Canaan* (1997). Enrollment limited to 25.

COLT 1430J. Readings in Poetry and Poetics.
Concentrated readings of Hölderlin, Shelley, Baudelaire, and Yeats in conjunction with theoretical texts by Heidegger, Derrida, De Man, and Benjamin. Texts include poetry, essays, novels, and dramas of the poets in a critical and philosophical context. Focuses on the relationship between figurative and expository language, the limits of commentary, and the concept of criticism as repetition and translation. French or German required. Frequent writing and oral presentations.

We will read a number of famous short poems from antiquity in conjunction with the major English writers who later translated, imitated, and reworked them. We will pay special attention to the question of creative innovation. We will read Horace, Theocritus, Virgil, Dryden, Pope, Tennyson, and others.

COLT 1430L. Voices of Romanticism.
Readings of lyric poetry in the European Romantic tradition. Focus on problems of lyric subjectivity and representation, and the rhetoric of "voice." Emphasis on formal features of poetry. The course will be based on close reading and frequent writing assignments. Readings from Wordsworth, Shelley, Keats, Goethe, Novalis, Hugo, Nerval, Lamartine, Baudelaire and others. Knowledge of French or German required, or by permission.

Readings in French, German, British and American poetry of the nineteenth century. Texts selected from: Hölderlin, Mörke, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments.

COLT 1430Q. Poetry and the Sublime (GRMN 1440C).
Readings of Hölderlin, Mörike, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments.

COLT 1430R. Poetry and the Sublime (GRMN 1440C).
Readings of Hölderlin, Mörike, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments.

COLT 1430S. Latin American Death Trip (LITR 1230K).
Interested students must register for LITR 1230K.

COLT 1430T. Leaves of Words: Japanese Poetry and Poetics.
A historical study of various poetic forms of Japanese poetry (waka) from the 8th-century anthology, the *Man'yōshū*, to the advent of modern verse, including *jiyushi* or free verse, in the latter part of the 19th century into the 20th century. Focuses on the relationship of poetry to religion, the political implications of waka, and the dominant aesthetic governing poetic conventions in different periods.

Rhythm, intonation and their written forms measure poetic matter. This workshop introduces prose through theory and practice: the line; metrical and stanzaic form; rhyme; music and performance; free verse; language writing; and the task of translation (form). Even monkeys, Darwin wrote, express strong feelings in different tones. Enrollment limited to 20.
COLT 1440B. Killer Love: Passion and Crime in Fiction and Film. Discusses textual and cinematic representations of criminal passion and its ambiguous relationship to religious, moral, and social norms. We will focus on extreme forms of intimacy both as a thematic choice of criminal production and as a symbolic medium of communication. Why is it that art so often explores unsanctioned emotions and deviant behaviors? What is at stake when narratives capitalize on violent manifestations of desire? In what ways is the semantics of excessive love related to conceptions of subjectivity, sociability, and sexuality? What role does it play in the creative process itself?

COLT 1440C. Photography and Human Rights (MCM 1503R). Interested students must register for MCM 1503R.

COLT 1440H. The Literature and Cinema of Global Organized Crime (SLAV 1500). Interested students must register for SLAV 1500.

COLT 1440L. Light-Writing: Literature – Photography – Philosophy (GRMN 1660M). Interested students must register for GRMN 1660M.

COLT 1440J. Holocaust Literature (JUDS 1820). Interested students must register for JUDS 1820.

COLT 1610C. Japanese Aesthetics and Poetics. Focuses on the historical development of aesthetic values and their relation to social culture, religion, and national identity in Japan from the Nara period to the 20th century, with particular emphasis on the literary arts. Readings from Fujiwara Teika, Zeami Motokiyo, Sen no Rikyū, Okakura Tenshin, and others. A background in critical theory/philosophy and in East Asian studies helpful.

COLT 1610D. Theory of Lyric Poetry. Through readings of recent critical discussions of the lyric genre, we will explore general methodological problems of literary theory. Discussions include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry and history; the function of reading; and the problematic “objectivity” of criticism. Readings from Hölderlin, Shelley, Baudelaire, Yeats, Jakobson, Benveniste, Riffaterre, Jauss, Johnson, De Man.

COLT 1610E. Aesthetics and Politics (ENGL 1900E). Interested students must register for ENGL 1900E.

COLT 1610F. New Theories for a Baroque Stage (TAPS 1280N). Interested students must register for TAPS 1280N.

COLT 1610G. Mikhail Bakhtin (RUSS 1895). Interested students must register for RUSS 1895.

COLT 1610H. Getting Emotional: Passionate Theories (ENGL 1560W). Interested students must register for ENGL 1560W.

COLT 1610I. Getting Emotional: Passionate Theories (ENGL 1762C). Interested students must register for ENGL 1762C.

COLT 1610J. Introduction to Literary Translation. This is a workshop course introducing the history and theory of literary translation, with demonstrations and exercises translating poetry and prose. All languages welcome, but students must be proficient to the level of reading literature in the original language. Foreign language through 0600 or permission of the instructor.

COLT 1610K. Literature and Multilingualism (GRMN 1340N). Interested students must register for GRMN 1340N.

COLT 1610L. What is Reading?. The answers to this question will be read—deciphered—in the many “reading scenes” found throughout the history of literature or philosophy. In Plato’s *Phaedrus*, reading thus appears caught in a network of desire and power: the dominant role—the *erasas* (“lover”) who writes and teaches—and the passive or submissive position—the *eromenos* (“beloved”) who reads and learns—are constantly permuted and destabilized. Hobbes’ *Leviathan*, Melville’s *Moby Dick* and *Billy Budd*, Goethe’s and Valéry’s *Faust* will lead us to question what we do when we read and reflect upon what could be called a *politics of reading*.

COLT 1610M. Twentieth-Century Russian Approaches to Literature: Bakhtin and the Russian Formalists (SLAV 1890). Interested students must register for SLAV 1890.

COLT 1710A. Introduction to Literary Translation. This is a workshop course introducing the history and theory of literary translation, with demonstrations and exercises translating poetry and prose. All languages welcome, but students must be proficient to the level of reading literature in the original language. Foreign language through 0600 or permission of the instructor.

COLT 1710B. Advanced Translation (LITR 1010F). Interested students must register for LITR 1010F.

COLT 1710C. Literary Translation. The study of translation draws from many fields including linguistics, comparative literature, anthropology, cognitive science, and literary studies. While we consider theories of translation and particular works, students embark on a semester-length translation project that includes writing a critical introduction. Translation exercises from various languages, oral presentations, discussions of readings, and a midterm draft of a critical essay are requisite stations along the path to the manuscript in translation. Enrollment limited to 15.

COLT 1810A. Onnade: The Woman’s Hand in Classical Japanese and Medieval Western Literature. A consideration of various genres of women’s writing from 700 to 1450 C.E. focusing on such issues as literary conventions, the relationship to the vernacular, the role of religion in education, and questions of gender and social class. Writers may include Berthgny, Murasaki Shikibu, Sei Shōnagon, Héloïse, Marie de France, the contessa di Dia, Ladu Nijō, Julian of Norwich, Christine de Pisan, and various anonymous women.

COLT 1810B. Aesthetics in the Colonial Frame. Draws together works from a wide range of contexts and genres—Enlightenment philosophy, romantic travel literature, Arabic novels and poems—to compose a conversation about aesthetics in the colonial context of Egypt. Senior Seminar.

COLT 1810C. City (B)Lights. Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works are foregrounded.

COLT 1810D. Dwellers Amid the Clouds: the Literature of the Court. A survey of three court traditions—Heian Japan, medieval Iceland, and early modern England—in which the relationship between the literary genres and the specific social context from which they emerge is highlighted in the form of particular literary conventions. Topics include the question of patronage, the function of particular literature as shibboleth, the idea of spectacle and play, the politics of literature, and the trope of irony as courtly emblem.

COLT 1810E. Enlightenment and Anti-Enlightenment in Eighteenth-Century Germany. Some of the most intractable questions of contemporary philosophy were vigorously debated in eighteenth-century Germany. What are the limits of reason? Does its supposed neutrality and universality mask its own set of prejudices? Are there any universally valid claims in truth or ethics? How, why, should Christian, Jew, and Muslim tolerate their differences? We will read literary and philosophical works by Hamann, Herder, Jacobi, Kant, Lessing, and Mendelssohn.

COLT 1810G. Fiction and History. How the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors considered include Grass, Doctorow, Deillo, Garcia-Márquez, Allende, Danticat and Agualusa. Theoretical texts by White, LaCapra, Benjamin, Ricoeur, and Chartier. Films such as *The Official Story* and *Europa, Europa* will be viewed and incorporated into the
discussions. Conducted in English. Prerequisite: two previous courses in literature. Enrollment limited to 30. Instructor permission required.

**COLT 1810H. Tales of Two Cities: Havana - Miami, San Juan - New York.**

In this course we will compare representations of Havana and San Juan in contemporary fiction and film to literary inscriptions of Cuban Miami and Puerto Rican New York. We will explore mapping the city as mapping identity and city-writing as reconstruction and creation, viewing through the eyes of children, tourists, and urban detectives. Authors include Antonio José Ponte, Roberto G. Fernández, Mayra Santos Febres and Emesto Quiñones. Good preparation for study abroad on the Brown-in-Cuba program. Not open to first year students. DPLL LILE

**COLT 1810I. Gates of Asia.**

An exploration of the growth of European knowledge of Asia from the rise of the Mongol empire through the Great Game and its aftermath. Primary sources include three kinds of accounts provided by travelers who set their hearts on Asian exploration: personal narratives, official reports and dispatches, and scholarly studies of the exotic cultures. Enrollment limited to 20.

**COLT 1810J. History and Aesthetic Form.**

In this course, we will examine the co-articulation of theories of history with theories of language and aesthetics. Focus will be on the interdependence between an emerging interest in history and the origin of language, and approaches to literary history, genre definition, and general aesthetic categories. Readings to be selected from Vice, Rousseau, Herder, Lessing, Schiller, Hegel, Novalis, Lukacs, Adorno, Derrida and De Man.

**COLT 1810L. Housing Problems.**

Examines architectural figures and problems of containment and construction in a variety of literary and theoretical texts. We will consider how images of buildings structure texts and outline spaces for subjectivity. Themes include the gothic, haunted houses, foundations, ruins, walls, and doors. Texts selected from Descartes, Derrida, Goethe, Hegel, Austen, Coleridge, Poe, Baudelaire, Melville, Hawthorne, Kafka, Tschumi and Borges.

**COLT 1810M. Image and Text: the Reconstitution of Narrative.**

An examination of the tradition of illustrated narratives in several premodern cultures: the early 11th-century Japanese Genji Monogatari, the medieval English Canterbury Tales, and the ancient Indian epic the Māhābhārata. Discussion focuses on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Seminar.

**COLT 1810N. Freud: Writer and Reader.**

A broad survey of Freud's writings, with particular emphasis on psychoanalysis' relevance to literary theory and cultural analysis. Readings include Freud's major works, as well as secondary sources focused on applications to literary studies.

**COLT 1810O. Latin American Literature in Dialogue with France.**

Complicates the question of influence in Latin American literary and intellectual self-fashioning, specifically with regard to France. Explores the productivity and perplexity of this relationship through romanticism and articulations of the real (as realism, surrealism and magical realism). Approaching the twenty-first century, considers Latin American perspectives on French theories of feminism, postmodernism and globalization. DPLL

**COLT 1810P. Literature and Medicine.**

The purpose of this course is to examine a number of central issues in medicine-disease, pain, trauma, madness, the image of the physician—from the distinct perspectives of the sciences and the arts. Texts will be drawn from authors such as Sophocles, Hawthorne, Gilman, Tolstoy, Kafka, Anderson, O'Neill, Hemingway, Ionesco, Verrgese, Barker, Sacks, Foucault, Sontag, Scarry, Gawande and others. Open enrollment course: lecture + section.

**COLT 1810Q. Literature and Money in the Age of Paper.**

Focuses on the complex and highly ambivalent relationship between literature and money in nineteenth-century European literature. Works by Poe, Balzac, Dickens, Baudelaire, Stevenson, Hardy, and Zola. Relevant philosophical writing by Smith, Marx, Nietzsche, and Derrida.

**COLT 1810S. Literature and the City.**

Literature's obsession with the modern city, in 19th- and 20th-century American, English, and French fiction and poetry, in writers such as Blake, Whitman, Balzac, Dickens, Baudelaire, Rimbaud, Eliot, Williams, Bellow, Morrison. Opportunities for work in other literatures and genres, e.g., in Germany, Brecht.

**COLT 1810T. Literature and the Culture of Capitalism.**

This course will examine the literary responses to capitalism in terms of five organizing tropes: regionalism, urbanization, consumerism, aestheticism, and modernism. Our investigation will begin sometime in the early 19th-century with the moment that consolidated conditions favorable for industrialization and conclude in the first decade of the 20th-century with literary modernism and the collapse of the cultural myths of progressive enlightenment and democracy. Readings include texts by Wordsworth, Malthus, Sue, Mayhew, Marx, H. Rider Haggard, Stowe, Carroll, Zola, Wilde, Stoker, Freud. Three papers and a final essay.

**COLT 1810U. Angela's Ashes and What Went Before: Irish Immigration and Literary Creation.**

Readings in the major works of Joyce, Beckett and Farrell, without forgetting Jonathan Swift and William Butler Yeats.

**COLT 1810V. Marx and Modern Literature.**

A contrastive and integrative study of the range of Marx's writings and works by writers such as Shakespeare, Dickens, Baudelaire, Flaubert, Woolf, and Stevens. Examines Marx's leading concepts in philosophy, history, economics, ideology, and aesthetics in relation to the particularities of literary forms. One or two short papers and a longer final study of a literary work chosen from the student's major field. Enrollment limited to 30.

**COLT 1810X. Mirror for the Romantic: The Tale of the Genji and The Story of the Stone.**

In East Asian Buddhist culture, the romance is a mirror of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: COLT 0710, RELS 0040 (0088) or 0100 (0006), or permission of the instructor.

**COLT 1810Y. Modern Japanese Women Writers.**

An examination of women's writing from the Meiji Period (1868-1912) to the present. Readings include works from such writers as Higuchi Ichiyō, Miyamoto Yuriko, Enchi Fumiko, and Tsushima Yūko. Topics include the relation of 'woman' to the modern, the legacy/construction of the past, the implications of joryū bungaku (women's literature), and the problem of resistance and subversion.

**COLT 1810Z. Nietzsche.**

Intensive and extensive reading of Nietzsche's and some of the reception that has made him so prominent in contemporary literary and cultural theory. Topics include Nietzsche's aesthetics, theory of history, the concept of the eternal return, European decadence, misogyny and anti-semitism. Texts will be selected from Nietzsche, Heidegger, Horkheimer and Adorno, Deleuze, Derrida, Irigaray, de Man, Kofman, Laccoue-Labarthe, Foucault, Hamacher, Ronell, etc.

**COLT 1811B. Postcolonial Theory and Fiction.**

There is hardly a place in the contemporary world which has not somehow been touched by the histories and consequences of colonialism. What does it mean, then, to speak about the postcolonial? Should the postcolonial be seen as a new periodization in the study of world literatures, a recent trend in critical theory, or another type of minority discourse involving previously colonized peoples?

**COLT 1811D. Reading Revolution, Representations of Cuba, 1959-The Present.**

Considers the cultural and ideological impact of the Cuban revolution inside and outside Cuba. Starting in the 1960s, reads Latin American "boom" novels, European theorists and U.S. civil rights activists. Moving to today, addresses post-Soviet Cuba's literary production and the impact of new technologies on culture, as well as political change under Raul
COLT 1811F. The "Tenth Muse" Phenomenon.
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epilated socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

What does it mean to be beautiful in classical and European literature? What does it mean to be beautiful in the modern age? How is beauty defined by thinkers from Plato to Benjamin? Readings from the classical, medieval, Renaissance, and modern periods are brought into question by works concerning the problems of aesthetics. Works by Plato, Aristotle, Horace, Augustine, Dante, Petrarch, Shakespeare, Racine, Tolstoy and others in addition to readings from the history of aesthetics from Kant through the present.

COLT 1811I. The Nordic Legacy: Ibsen, Strindberg, Munch and Bergman.
This course examines the works of four major Scandinavian artists. As key figures in the development of modern theater, painting and film, these four figures share a number of common concerns: challenging the pieties of bourgeois mores; reconceiving the relations between the sexes; moving from the social to the metaphysical; undermining the unitary view of the self; and forging an artistic "language" through which the in-dwelling power of the psyche can be revealed.

COLT 1811J. The Paternalistic Thriller and Other Studies in Colonial Fiction.
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T.E. Lawrence, E.M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1811L. Travel and Tourism through the Ages.
The travel diary, whether prompted by pleasure, pilgrimage, official duty, scientific exploration, or profit, emerges as a prominent genre in virtually all times and cultures. Readings include literary accounts of actual travels, such as the autobiographical "slave narratives" recounting involuntary displacement - typified by The Life of Olaudah Equinao - and purely fictive work, such as the medieval Mandeville's Travels, and metaphoric narratives of spiritual quests.

COLT 1811N. Persons and Portraits: Self in Early Modern Europe.
Challenges the presumed supremacy of the "modern subject," the sovereign rational mind personified by Descartes. Rival theories of self in Machiavelli, Luther, Montaigne, Hobbes, Pascal, and Spinoza are explored alongside the richly embodied "persons" pictured in painting (Titian, Rembrandt, Velázquez), conduct literature (Castiglione, La Rochefoucauld), drama (Milton, Molière, Calderón), psychological fiction (La Fayette), and satiric prose (La Bruyère).

COLT 1811O. Modernism: From Paris to Athens, 1900s - 1950s.
The course examines Modernism as it developed in major European cities. Apart from focusing on major venues of modernism (Zurich, Berlin, Paris) it centers on marginal geographical spaces with specific emphasis on Athens, Greece. It further explores the rise of such movements as Cubism, Futurism, Dadaism and Surrealism and proceeds to explore the reaction of Greek modernists to these movements.

COLT 1811Q. Poisonous or Prophetic?
Wright's Native Son, Burrough's Naked Lunch, Derrida's Specters of Marx, and Rimbaud.

COLT 1811S. Philosophy and Literature of German Romanticism.
A fateful collaboration between philosophy and literature was centered in Germany roughly between 1788 (Schiller's 'Gods of Greece') and 1807 (Hegel's Phenomenology of Spirit). A survey of the major literature of this period, organized thematically, will serve as an introduction to this complex phenomenon. Authors include (in translation) Fichte, Goethe, Hölderlin, Novalis, Schelling, Schiller, and Tieck. LILE

Explores the literary and filmic imagination of three Eastern Mediterranean cities, Alexandria, Istanbul, and Athens. It examines the history, culture and politics of these cities and the ways in which they emerge in literature, film, poetry and travelogues. How is the city defined in these works? How are social tensions addressed, such as those between Greeks and Turks and Arabs or between Christians, Muslims and Jews? How are thematic and historical issues resolved, such as those involving antiquity and modernity, tradition and modernization, colonialism and nationalism, religion and secularism? How are these cities defined in the works of western writers? Enrollment limited to 30. DPLL

COLT 1811U. Literature and the Arts.
Readings in the apparitions and articulations of the arts in fiction, philosophy, criticism and poetry. Focus on the interaction between language and other media, the figure of the artist, problems of expression and performance. Readings from Diderot, Hegel, Balzac, Hoffmann, Baudelaire, Poe, Nietzsche, Wagner and Mann.

COLT 1811W. Visual Obsessions: Japanese Film, Fiction, and Modernity.
The pervasiveness of visual obsessions in contemporary Japanese culture prompts us to rethink the impact of modernity in terms of visuality. Through the examination of a wide range of filmic, literary, and visual art forms produced in Japan from the 1920s to the 2000s, this course explores the question of visuality as a historically and technologically conditioned way of seeing. The issues to be considered in this class include: the construction of "Japanese" aesthetics, orientalism, ocularcentrism, the problems of interiority and the subject, the relation between habit and the everyday, and cultural nationalism. This course will introduce important theoretical concepts about vision and modernity, asking students to interrogate these concepts through the close examination of specific Japanese texts and films discussed in class. Writers, filmmakers, and visual artists include: Tanizaki Jun'ichirō, Edogawa Rampo, Abé Kōbō, Karanji Kōjin, Ozu Yasujirō, Kurosawa Akira, Ichikawa Kon, Suzuki Seijun, and Murakami Takashi. DPLL LILE

COLT 1811X. Marx and his Critics.
This course will focus on a close study of the work of Karl Marx and its legacy for critical theory. The first part of the course will be dedicated to a reading of Marx's most important texts, with special emphasis given to his theories of economy, of ideology, alienation and fetishism. The second part will be dedicated to a reading of some of Marx's most important readers: Lukacs, Gramsci, Althusser, Zizek and Derrida. Instructor's permission required.

COLT 1811Y. Genius and Melancholia in the Renaissance.
Explores Renaissance accounts of genius, genial inspiration, and melancholia, and their accompanying ideas of intellect and immortality. Primary materials include Dürer, Montaigne, Rabelais, Ficino, Ariosto, Erasmus, Saint Teresa, and Luther. Secondary or contemporary texts include Warburg, Panofsky, Saxl, Klubansky, Wind, Benjamin, Kierkegaard, and Sebald.

COLT 1811Z. Literature and the American Presidency.
We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a diction source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film.

COLT 1812A. Literatures of Immigration.
Why do people migrate? How do literary genres, including poetry, fiction, autobiography and memoir, characterize immigrant experiences? How is the experience of "coming from somewhere else" similar and different for each subsequent generation of immigrants? How does literature indicate the impacts of migration on the culture, politics and economics of the countries of immigration and emigration? How do literatures of immigration imagine the past, present and future of networks and communities of immigrants? Focusing on twentieth-century literary texts and the socio-historical context of mass migration, the first half of the course examines immigration literature in the U.S., the second half of the course explores
literatures of immigration beyond the U.S., and the course concludes with an inquiry into immigration in our presently globalizing age.

**COLT 1812B. Aesthetics and Politics (ENGL 1900E).**
Interested students must register for ENGL 1900E.

**COLT 1812C. The Ethics of Romanticism (ENGL 1560Y).**
Interested students must register for ENGL 1560Y.

**COLT 1812F. Violence and Representation.**
Traces diverse genealogies from which to theorize violence and its relation to aesthetics. We will identify a disciplinary philology for "violence" as a signifier within visual culture, art practice and literature; historicize key transitions in varied invocations of violence in representation; study texts (photography, film, novel, installation) that create a space where violence can be discussed as both everyday and extraordinary. Some issues to be considered: representability in moments of historical crisis (war, colonialism, genocide); the efficacy of genres and artistic movements in representing violence (tragedy, surrealism, theater of cruelty); and the violence of representation (surveillance, spectatorship, voyeurism).

**COLT 1812H. "Women's Literary Make-up": Mirrors, Maquillage and the Tenth Muse.**
Focuses on the problem of creative inspiration for women writers and how the pursuit of aesthetic perfection, both somatic and literary as well as their interrelation, becomes a recurring motif in women's writing from various traditions. Readings will include fiction and poetry from the English, Japanese, and Arab traditions, both modern and pre-modern. This is an undergraduate seminar open to juniors and seniors. Prerequisite: coursework in literature and at least one course in gender studies/ women's studies. Instructor permission required.

**COLT 1812I. Collective Struggles and Cultural Politics in the Global South.**
Traces the historical and ideological mapping of the North-South axis and the regional mythologies informed by race, empire and nationalism. We will examine the ways in which imagined geographical hierarchies continue to shape cultural and political struggles and the vectors of globalization. Along with readings on imperial histories, liberal and neoliberal political economies, and postcolonialism this class seeks to establish connections between resistant narratives and collective struggles in the Global South. We will discuss political philosophies of Marx, Gramsci, Arendt, Fanon, Harvey and Schwarz, as well as the works of Achebe, Hurston, Kincaid, Rushdie, Roy, Sembene, and Wright. First year students require instructor permission.

**COLT 1812J. Poetry and Ethics.**
If history is, as Charles Olson claims, a "form of attention" and we are all participants in a collective reality relative to our capacity for language use, what ethical issues come to bear on what the poet chooses to attend to--not only as subject matter but as form? Can poetic language be sufficiently responsive to the challenge of empathy? Is there an ethics of attention? Guided by philosophical texts, we shall investigate ethical possibilities in a range of world poetics. WRIT

**COLT 1812K. European Intellectual and Cultural History: Exploring the Modern, 1880-1914 (HIST 1220).**
Interested students must register for HIST 1220.

**COLT 1812L. European Intellectual History: Exploding the Modern (HIST 1230).**
Interested students must register for HIST 1230.

**COLT 1812M. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**
Interested students must register for CLAS 1750L.

**COLT 1812N. Culture and Anarchy (ENGL 1511I).**
Interested students must register for ENGL 1511I.

**COLT 1812O. Lying, Cheating, and Stealing (ENGL 1760V).**
Interested students must register for ENGL 1760V.

**COLT 1812P. Essaying the Essay (CLAS 1120J).**
Interested students must register for CLAS 1120J.

**COLT 1812S. Violence and the Multiple Responses of Medieval France.**
Examines violence and its representations from a variety of perspectives: literary, historical, psychological, etc. Different literary forms (11th - 13th) introduce conflicts between competing value systems, problems raised by militant religion, vendettas and the pursuit of justice. Across the gamut of appetites and emotions, violence takes a variety of shapes, producing broken hearts and broken heads. The beautiful seductiveness of violence, despite its horrors, is frequently transformed into artistic and literary expression, from the highest forms of Western tradition to the cheap exploitations of pulp fiction. What can the Middle Ages teach us about violence, yesterday and today? Not open to first year students.

**COLT 1812T. On Being Bored (ENGL 1511I).**
Interested students must register for ENGL 1511I.

**COLT 1812U. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**
Interested students must register for ENGL 1900R.

**COLT 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas.**
This course addresses the relationship among language, war and the arts from the mid-twentieth century on. Even as armies engage in combat around the globe, the term "war" legitimates a much broader spectrum of situations, lending them the structure of organized hostility and the moral opposition of right to wrong. From the "Cold War" to the "War on Terror," to Argentina's "Dirty War" and Cuba's "War on Imperialism," literature, cinema, visual arts and community-based projects have responded to real and rhetorical declarations of "war." Drawing from U.S. and Latin American contexts, we will explore a range of responses and challenges. DP/L

**COLT 1812W. Love, Adultery, and Sexuality (RUSS 1450).**
Interested students must register for RUSS 1450.

**COLT 1812X. Literature and History: Russian Historical Imagination in the European Context (RUSS 1600).**
Interested students must register for RUSS 1600.

**COLT 1812Y. Central Europe: An Idea and its Literature (SLAV 1790).**
Interested students must register for SLAV 1790.

**COLT 1813B. Dying God (CLAS 1930B).**
Interested students must register for CLAS 1930B.

**COLT 1813C. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**
Interested students must register for CLAS 1750L.

**COLT 1813D. Issues in World Literature (ENGL 1761Y).**
Interested students must register for ENGL 1761Y.

**COLT 1813E. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B).**
Interested students must register for EAST 1950B.

**COLT 1813F. Communication Culture and Literary Politics (MCM 1503Q).**
Interested students must register for MCM 1503Q.

**COLT 1813H. God, Sex and Grammar: Literary Ethics in Medieval Europe.**
What does it mean to read and write ethically? While modern culture values intellectual property, many medieval texts celebrated what we call plagiarism. On the other hand, medieval thinkers saw serious consequences in literature, which could lead authors and readers to heaven or hell. But then as now, ethics were rarely clear-cut, subject to forces as diverse as religion, sexual desire, capitalism, and even language itself. Reading some of the great authors of the period, as well as modern critical reflections, we will explore the ethical dimension of literary production in the medieval world and in our own society.

**COLT 1813K. Problem of the Vernacular.**
It has been said that a language is a dialect with an army and a navy. Under what conditions do dialects, vernaculars, creoles, and slangs become mediums for literary and artistic expression? How have writers in different cultures managed the relationship between their "official" national languages and their more intimate mother tongues? This course will explore this problem in a variety of literary traditions, including Chinese,
Arabic, Hindi-Urdu, Greek, Hebrew, Brazilian Portuguese, Latin and the Romance vernaculars, and a variety of modern European languages.

COLT 1813P. Captive Imaginations: Writing Prison in the Middle Ages.
Many great works of the Middle Ages were written in prison or about the experience of imprisonment. Reading some of these masterpieces, we will discover why the medieval prison was such a fruitful space for poetic creation, and how the perspective of incarcerated writers helped to shape a diversity of literary traditions. Topics will include fortune and free will, sexual and cultural difference, and the construction of the individual. We will also explore the nature of medieval systems of captivity, which differed greatly from those of modern society. Selected authors: Boethius, Mas’ud Sa’d Salman, Juan Ruiz, Chaucer, François Villon.

COLT 1813R. The Ekphrastic Mode in Contemporary Literature (ENGL 1762B).
Interested students must register for ENGL 1762B.

COLT 1813S. Thinking Friendship, from Plato to Derrida (GRMN 1200B).
Interested students must register for GRMN 1200B.

COLT 1813T. Literature and Multilingualism (GRMN 1340N).
Interested students must register for GRMN 1340N.

COLT 1813U. Orientalism.
Europe’s longstanding fascination with the “Orient” generated a major tradition of literature, painting, music, film, and scholarship in the 18th-20th centuries. Current relations between East and West remain deeply in thrall to this legacy. This course explores the many facets of Orientalism—historical, political, and artistic—from the pre-modern period to today. Readings by Flaubert, Tolstoy, Said, and others.

COLT 1813V. The Cash Nexus: Economy and Literature.
At a time when human existence is grounded with unprecedented conviction in a rigid set of utilitarian principles and materialistic values, the relationship between literature and various modes of economic exchange presents itself as a richly rewarding field of research. The texts we will focus on offer rare insights into the ways monetary factors affect personal identity, interpersonal relationships, and social life in general. These works reflect a diachronic tension between human interactions and financial transactions that will be the basis of our critical engagement with a series of issues and questions that are more pertinent today than ever before.

COLT 1813W. Law and Literature (ENGL 1950F).
Interested students must register for ENGL 1950F.

COLT 1813X. Getting Emotional: Passionate Theories (ENGL 1560W).
Interested students must register for ENGL 1560W.

COLT 1813Y. Adam and Eve in Early Jewish and Christian Interpretation (JUDS 1612).
Interested students must register for JUDS 1612.

COLT 1813Z. Soil: Environmental Writing from Ancient China to Al Gore.
Why do people fight over soil? In an increasingly urbanized world, how have the ways we talk about soil, earth, and land shifted? In this class we will explore the politics and aesthetics of writing about soil in its particular relations to ecology, homeland, geography, and race. Readings include Homer’s Odyssey, Derek Walcott’s Omeros, and ecological criticism from ancient China to Rachel Carson, Ramachandra Guha, Al Gore and beyond. Limited to 20.

COLT 1814A. Fashion and Power (GNSS 1960Y).
Interested students must register for GNSS 1960Y.

COLT 1814B. German Romanticism: Texts, Contexts, Legacies.
Interested students must register for GRMN 1330B.

COLT 1907. Individual Independent Study.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

Special work or preparation of honors theses under the supervision of a member of the staff. Open to honors students and to others. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

COLT 2450. Exchange Scholar Program.

COLT 2520A. City (B)Lights: Interdisciplinary Approaches to the Study of the City.
Literary texts from the U.S., England, France, and Germany, together with substantial readings in the social sciences and selected works of art and cinema. Intended as a laboratory for interdisciplinary studies in an expansive educational spectrum for humanities Ph.Ds.

COLT 2520B. Dark and Cloudy Words: Metaphor and Poetry.
An examination of the philosophical significance of metaphor and its literary function in poetry ranging from makurakotoba in the Man’yoshū to kenningar in Skaldic poetry, to the use of the trope in a number of modern poets. Critical writings include works by Aristotle, Ki no Tsurayuki, Shelley, Christine Brooke-Rose, Max Black, Donald Davidson, Paul Ricoeur, and Jacques Derrida.

COLT 2520C. Irony: Language and Failure.
A study in the trope of irony and the ways in which it complicates the possibility of understanding. Focus on Socratic irony, the dialogue, and Romantic irony. We will also consider the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Quintilian, Diderot, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

COLT 2520D. The Literature of the Americas.
Forsaking the dominant Eurocentric in comparative literary studies, this seminar will search for the common links between the diverse literatures of North and Latin America, approached in relation to one another rather than to "Old World" models. Authors to be considered include Margaret Atwood, Julio Cortázar, Carlos Fuentes, William Faulkner, Gabriel García Márquez, Clarice Lispector, Machado de Assis, Toni Morrison and João Guimarães Rosa.

COLT 2520E. Dialectics of Word and Image.
Explores how proximities and interactions of text and image construct and complicate meaning. It brings together a constellation of theoretical and historical readings that have bearing on particular problems generated at the nexus of word and image. Readings by Horace, Abd al-Qahir Jurjani, Lévi-Strauss, Ricoeur, Derrida, Mitchell and others will anchor a cross-disciplinary investigation of European and non-European paradigms of the relationship between text and image in various literary and visual cultures since late antiquity. We will examine specific examples of the interaction between word and image in several Islamic manuscripts.

COLT 2520F. Theories of the Lyric.
Through readings of recent critical discussions of the lyric genre, we will explore more general methodological problems of literary theory. Questions to be raised include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry, history and politics; the function of reading; and the problematic “objectivity” of criticism. Readings from Jakobson, Benjamin, Johnson, De Man, Lacoue-Labarthe, Agamben, Badiou and Derrida. Focus on poets Hölderlin, Baudelaire and Celan.

COLT 2540C. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2540D. After Postmodernism: New Fictional Modes (ENGL 2760X).
Interested students must register for ENGL 2760X.

COLT 2540E. Political Romanticism (GRMN 2320E).
Interested students must register for GRMN 2320E.

COLT 2540F. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

Interested students must register for ENGL 2900T.
COLT 2650A. Comparative Literature and Its Others. Is there such a thing as comparative literary? This course examines the history and practices of Comparative Literature as a major discipline, including its self conceptualizations, its relations with national literatures and with other disciplines, and its evolving methods of reading. Texts include literary as well as theoretical ones.

COLT 2650C. Romantic Theory: Theirs and Ours. Recent criticism will serve as the point of departure for looking into the relation of literary criticism to its Romantic history. Emphasis on how “Romantic” problems inform contemporary criticism on such topics as periodization, literature and history, theory of symbol and allegory, and the relation between literature and philosophy. Texts will be selected from Benjamin, M.H. Abrams, de Man, McGann, Lacoue-Labarthe and Nancy, Chase, et. al.; Fichte, Schelling, Coleridge, Wordsworth, Schlegel, Novalis.

COLT 2650D. Theory of Comparative Literature. Designed to introduce students to some of the central theoretical issues that define the discipline of Comparative Literature through the study of twelve central texts in the field. We will begin with Erich Auerbach’s foundational text Mimesis, and end with Gayatri Spivak’s Death of a Disciplìne. In between the authors to be read and analyzed will be Bakhtin, Lukacs, Barthes, Derrida, DeMan, Jameson, Greenblatt and others. Open to graduate students, and to undergraduates by permission of the instructor.

COLT 2650F. Irony. A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focus on the epistemological implications of irony and the role it plays in the philosophical tradition and in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

COLT 2650G. Literary Readings in Aesthetic Theory. The seminar will examine not just the major themes but also the rhetorical complexities of a number of powerful texts in the history of aesthetic theory. Authors to be considered include Plato, Aristotle, Longinus, Burke, Kant, Hegel, Nietzsche, Heidegger, Benjamin, Adorno. Literary texts will be considered in conjunction with these texts, sometimes by way of famous arguments or exchanges (e.g., Heidegger and Staiger on Mörke).

COLT 2650H. On the Sublime (GRMN 2660A). Interested students must register for GRMN 2660A.

COLT 2650I. Late Heidegger: Art, Poetry, Technology (GRMN 2660J). Interested students must register for GRMN 2660J.

COLT 2650K. Deluze, Rancière, Literature, Film: The Logic of Connection (ENGL 2900S). Interested students must register for ENGL 2900S.

COLT 2650L. Inheriting (in) Modernity (GRMN 2660S). Interested students must register for GRMN 2660S.

COLT 2720A. Advanced Practicum in Literary Translation. Readings in theory of translation, and in monuments of literary translation from Renaissance times to the present, will be assigned to students needing further background in these areas. Students will each complete two projects: (1) by mid-semester, a critical treatment of a published translation or a comparison of such translations; (2) for the final seminar presentation and paper, the student’s own translation into English from some literary text in a language familiar to the student.

COLT 2720B. Theory and Practice of Literary Translation. Readings in the history and theory of translation from the Renaissance to the present, along with selected major examples of literature in English translation. Students will write two papers: (1) an analysis of a theoretical issue in translation, with ample attention to the historical context of that issue; and (2) either a discussion of an important translation as a criticism of the original work; or a critical comparison of several translations of an original work; or an annotated translation into English of a literary text from a language familiar to the student.

COLT 2720C. Literary Translation. Study and practice of translation as art and a potent form of literary criticism. Translation is an act of interpretation, which informs the language of the translator and the text as a whole: context, intent, and language. Discussion will include the impact of cultural difference, tone and time on translation, and the role of analytical as well as intuitive understanding of the original in the translator’s endeavor.

COLT 2820B. Fiction and History. Focuses on how the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors to be considered include E. L. Doctorow, Gabriel Garcia-Marquez, Günter Grass, José Saramago Isabel Allende, Lidia Jorge, Cooper. Attention will also be paid to theoretical texts by Hayden White, Dominick LaCapra, Walter Benjamin, Linda Hutcheon, and Roger Chartier.

COLT 2820D. The “Tenth Muse” Phenomenon. The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed “Tenth Muses,” these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

COLT 2820E. What was Enlightenment?. Emphasizes two of the Enlightenment’s most durable artists-Mozart and Jane Austen-situating them in the context of other writers of their times (such as Kant, Casanova, and Adam Smith) and modern appropriations of their work (in criticism and performance). Sub-themes are desire, reason, education, and forms of otherness. Class hours include viewing time.

COLT 2820F. Latin America and Theory. Explores the engagement of Latin American literature and criticism with non-Latin American bodies of literary and cultural theory (including poststructuralism, postcolonialism, postmodernism and cultural studies), addressing tensions between the autochthonous production of theoretical frameworks and their import from other contexts. Readings include the Latin American Subaltern Studies group, Revista de Crítica Cultural, Rama, Garcia Cancini, Sarlo, Richard and current new media theorists. Open to graduate students and qualified seniors.

COLT 2820H. The Politics and Aesthetics of Masochism. Masochism is defined as a, aestheticized positive, consensual investment in power relations. As such, it directly engages the relationship between politics and aesthetic forms, but as a sexualized relationship. Masochism articulates relations of gender in ways that seem to challenge traditional structures. Readings include novels and films, as well as theoretical engagements with masochism.

COLT 2820I. Literature and the State of Exception. This course takes as its point of departure Walter Benjamin’s famous diagnosis of modernity as a paradoxical condition under which the exception has become the rule. We will consider the aesthetic and political implications of such a state of exception in nineteenth- century literature. Authors include Baudelaire, DeQuincey, Arnold, Melville, Whitman, Benjamin, Derrida, Nancy and Agamben.

COLT 2820L. Moderns and Primitives. Major writers, artists, and theorists of European modernism put a new emphasis on the status of primitive society and archaic pre-history. We will consider the works of Durkheim, Eliot, Joyce, Picasso, and others with reference to the anthropology and ethnohistory of their period, and to subsequent post-colonial critique and controversy.

COLT 2820M. Discourses of the Senses. A comparative study of a variety of discourses dealing with the relation among the senses, the arts, and the problems of comparativity, interdisciplinarity, and intermediadity. Topics will include ekphrasis, synaesthesia, mysticism and the theory of correspondence, the Gesamtkunstwerk, and the limits between media. Readings from Condillac, Lessing, Kant, Swedenborg, the German Romantics, Baudelaire, Wagner, Balzac, Lacoue-Labarthe, Nancy, Panofsky, Tschumi and others.
COLT 2820N. City (B)Lights
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images. American cities and literary works are foregrounded.

COLT 2820O. Jacques Derrida’s Grammatology
This course is an introduction to the thought of the French philosopher Jacques Derrida. We will focus on his most important work, his “Grammatology”, though a series of some of his essays will also be part of the readings. Other readings will include the works of authors crucial to Derrida’s thought and to an understanding of the “Grammatology”: Heidegger, Nietzsche, Freud, Saussure, Rousseau and Levi-Strauss.

COLT 2820P. Aesthetics and the Eighteenth Century Subject
The debates about taste, judgment, beauty, sentiment, and sensation in the eighteenth century gave rise to the discourse of aesthetics as we know it today, but they also exerted a powerful influence on how knowledge, virtue, and subjectivity were imagined in the post-enlightenment period. In this course, we will examine some of the founding texts of aesthetic theory from the era (including Locke, Smith, Burke, Lessing, and Kant), and then turn to consider how aesthetic questions informed and were taken up by Goethe’s narrative of subject-formation in his Bildungsroman, Wilhelm Meister’s Apprenticeship. In English.

COLT 2820Q. Culture and Politics in Cuba and the Caribbean
Complicating standard narratives about intellectuals and the Cuban Revolution, explores writings whose relationship to the state is neither affirmative nor oppositional. Focusing on journals and on recent work in cultural theory, history, anthropology, and political science, addresses the evolution and potential of civil society; articulations of marginality; revisions of socialism and the Soviet legacy; and the mobility of theory. Spanish required.

COLT 2820R. Postcolonial Melancholia
Figures of loss and defeat proliferate widely in the accounts of colonization, national liberation, and decolonization in South Asia, Africa, the Arab world, and the Americas. We will attend to the particularity of loss by juxtaposing readings in literature and postcolonial theory with readings on mourning and melancholia, drawn from a range of disciplines.

COLT 2820S. Poetry after Kant
Begins with the intensive study of a selection of writings by Immanuel Kant focused especially on force and conflict in politics and aesthetics. This study, along with relevant readings from more recent work, will provide the basis for an approach to this topic in nineteenth-century poetry. Readers include Kant (Critique of Judgment, “Toward Eternal Peace,” The Conflict of the Faculties), Walter Benjamin, Jacques Derrida, and Giorgio Agamben and will lead to several “case studies” of nineteenth-century poetry, including works by Friedrich Hölderlin, Charles Baudelaire, and Matthew Arnold.

COLT 2820T. Universals
Explores the status of universals in classical, Hellenistic, Scholastic, and Renaissance metaphysics. Also explores the literary implications of this philosophical problem. Readings include Plato, Aristotle, Chrysippos, Augustine, Cicero, Seneca, Abelard, Avicenna, Aquinas, Scotus, Ficino, Cusanus, Pico, and Suárez.

COLT 2820U. Literature and Judgment
Investigates the intersections between acts of literature and acts of judgment, between language and the law. How is literature to be judged, when is it “good” or “bad”? Does literature lie, and if so, does it matter? Does it hide a crime? And, in turn: does literature provide its own particular kind of judgment, one that may make evident the very fictional status of the law? Readings span from the Bible to contemporary post-colonial readings (Rousseau, Tolstoy, Zola, Freud, Kafka, Arendt, Benjamin, Henry James, Primo Levi, Coetzee, Sadehg Hedayaet).

COLT 2820V. Nietzsche, Foucault, Latour (ENGL 2900K).
Interested students must register for ENGL 2900K.

COLT 2820W. Ethical Turns (ENGL 2900N)
Interested students must register for ENGL 2900N.

COLT 2820X. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B)
Interested students must register for ENGL 2561B.

COLT 2821A. Representing London circa 1600 (ENGL 2360T)
Interested students must register for ENGL 2360T.

COLT 2821C. From Hegel to Nietzsche: Literature as/and Philosophy (GRMN 2660Q)
Interested students must register for GRMN 2660Q.

COLT 2821E. Metaphor
Explores the role of metaphor in literary writing, the mind and public policy. Reads philosophical and literary analyses of metaphor alongside poetry, fiction and cognitive science research on metaphor’s centrality to human thought processes. Moves from these readings to a consideration of war metaphors in political speech in the Americas, including the “War on Drugs,” the “War on Terror” and Argentina’s “Dirty War.” Authors include Aristotle, de Man, Sonntag, Plath, Eluard, García Márquez, Lakoff, Pinker and Feitlowitz. Open only to graduate students.

COLT 2821F. “This is what you were born for”: Optimism and Futurity (ENGL 2561F)
Interested students must register for ENGL 2561F.

COLT 2821H. Reading Things: Early Modern Material Culture (ENGL 2360W)
Interested students must register for ENGL 2360W.

COLT 2821I. Theories of Decolonization (FREN 2630A)
Interested students must register for FREN 2630A.

COLT 2821J. Peines (techniques) de (la) mort) (FREN 2620I)
Interested students must register for FREN 2620I.

COLT 2821K. Reading Adorno’s Aesthetic Theory (GRMN 2660W)
Interested students must register for GRMN 2660W.

COLT 2830C. Literature and the Arts
An investigation of the discourse of the arts in the modern European tradition. Topics include the relation between the Ancients and the Moderns, evaluations of the possibilities and limitations of differing media, the role of language in discussions of the “other” arts, and conceptions of synaesthesia and correspondence. Texts selected from Perrault, Winckelmann, Lessing, Diderot, Rousseau, Kant, Hegel, Hoffman, Baudelaire, and others.

COLT 2830F. Walter Benjamin and Modern Theory
An intensive reading of selected essays by Walter Benjamin on language, literature, aesthetics, and politics will be paired up with the study of the interpretation and impact of this work on contemporary work in literary theory and philosophy. In addition to Benjamin, we will also read Jacques Derrida, Philippe Lacoue-Labarthe, Samuel Weber, Giorgio Agamben, and Peter Fenves. German and/or French helpful but not required. Open to graduate students only.

COLT 2830G. The Problem of Mimesis in Modern Literary and Cultural Theory (MCM 2310F)
Interested students must register for MCM 2310F.

COLT 2830H. Cultural Translation: Theory and Practice
Across a range of disciplines, "cultural translation" today stands for the dynamic interactions among cultures. Derived from cultural anthropology and linguistic translation, the metaphor of translation (already a metaphor: trans+latere, to bear across) is used increasingly to analyze how cultures are transmitted through the operations of colonial expansion, diaspora and immigration. Though cultural globalization is assumed to be a 20th century phenomenon, the result of an expansion and acceleration in the movement and exchange of ideas, commodities and capital, this seminar considers a longer historical frame for understanding cultural competition. Theoretical texts including Schielemacher, Jakobson, Benjamin, Derrida, Spivak, and a “case study,” Shakespeare.

COLT 2830I. Histories of the Early Modern Body
This seminar considers the production of knowledge about the body in the early modern period. The institution of science and how the emerging
"science" of the body was visualized; discourses of the erotic, the scientific and the religious; the body in varied cultural performances including the blason, devotional texts, erotica, drama etc. Texts include theoretical work on gender and sexuality. Open to graduate students only.

COLT 2830J. Ontology of Life: Reading Heidegger’s Being and Time with Derrida (GRMN 2660K).
Interested students must register for GRMN 2660K.

COLT 2830K. On Repression. Family life, as a structure of prohibited desires, is often thought to be the source of similar prohibitions in society or state. The same mechanism — repression — is posited in both cases. We will trace the fate of “repressive hypotheses” from Fourier through Marx and Freud to Benjamin, Foucault, and Godelier. Alongside theorists we will read literary works from Hawthorne and Dostoevsky to André Breton, Italo Calvino, and Guy Davenport.

COLT 2830L. Economies of the Visual (The Reverse of Images). In The Time-Image, Deleuze wrote: “Money is the reverse of all the images that the cinema shows and edits on the obverse, so that films about money are already, if implicitly, films within the film or about the film.” What are the implications of this sentence for the economy of images (what Susan Buck-Morss terms their iconomy)? From The Big Store (Marx Brothers) to Peter Jackson’s King Kong, we will trace various mobilizations of the gaze, leading from the proto-cinematographic elevators and escalators to the actual developments of eye-tracking technologies, allowing for an increasing commodification of the gaze itself.

COLT 2980. Reading and Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

COLT 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis.

Center for Computation and Visualization

The Center for Computation and Visualization (CCV) strives to build and foster an environment that enables teaching, learning, research, and creative undertakings that involve and rely on the use and development of advanced computing and visualization technology. CCV provides high-performance computing, highly reliable research data storage, visualization resources, physical and virtual server hosting, high-performance backup and archival services, as well as outstanding collaborative scientific support to empower computational research, scholarship, creativity, and innovation for the entire Brown community.

The computing platform, which follows the “condominium” model, comprises a 400+ node IBM DataPlex system, including a subset of 88 GPU’s for accelerated computing, providing approximately 80 Teraflops of peak performance. All parallel applications messaging and I/O are connected to a 400-terabyte GPFS file system using 40 Gigabit per second connectivity. The storage system is integrated with a 2 Petabyte Tivoli TSM backup/archival system. CCV also maintains a high-end visualization lab with large-scale immersive visualization capabilities and develops custom visualization solutions for specific projects in partnerships with our user community.

For additional information please visit the center’s website at: http://www.ccv.brown.edu/.

Center for Computational Molecular Biology

The mission of the Center for Computational Molecular Biology (CCMB) is to make breakthrough discoveries in the life sciences through the development and application of novel computational, mathematical, and statistical techniques. Research in the Center aims to exploit the opportunities from technological advances in genomics and proteomics.

The specific areas of research being conducted by our Faculty can be viewed from their profile pages on the Faculty (http://www.brown.edu/research/projects/computational-molecular-biology/about-ccmb/faculty/ccmb-faculty) page at the following address (http://www.brown.edu/research/projects/computational-molecular-biology/about-ccmb/faculty/ccmb-faculty)

We are actively recruiting new graduate students (please review Graduate section for more details) and Postdoctoral Fellows. For information on the IGERT program in Reverse Ecology, please visit: http://brown.edu/Research/IGERT-reverse-ecology/

For information on Postdoctoral Fellows & Research Staff, please visit: http://brown.edu/research/projects/computational-molecular-biology/about/postdocs-research/postdocs-research-staff

Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience and visualization. The program educates the student liberally in these fields, building on a foundation of coursework that may then focus via several possible tracks. The program offers four tracks: computational genomics, biological sciences, molecular modeling and applied mathematics and statistical genomics. The program requires a senior capstone experience that pairs students and faculty in creative research collaborations.

Standard program for the Sc.B. degree

**Prerequisites**

- MATH 0100 Introductory Calculus, Part II (or equivalent) 1
- or MATH 0170 Advanced Placement Calculus 1
- BIOL 0200 The Foundation of Living Systems (or equivalent) 1

**General Core Course Requirements**

- CHEM 0330 Equilibrium, Rate, and Structure 1
- BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent) 1
- or BIOL 0280 Introductory Biochemistry 1
- or BIOL 0500 Cell and Molecular Biology 1
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science (no prerequisite) 1
- CSCI 0160 Introduction to Algorithms and Data Structures (prerequisite CSCI 0150) 1
- or CSCI 0170 Computer Science: An Integrated Introduction 1
- CSCI 0180 Computer Science: An Integrated Introduction (prerequisite CSCI 0170) 1
- or CSCI 0190 Accelerated Introduction to Computer Science 1
- CSCI 0220 Introduction to Discrete Structures and Probability 1
- APMA 1650 Statistical Inference I 1

**Computational Biology Core Course Requirements**

- CSCI 1810 Computational Molecular Biology (prerequisites: CSCI 0160, or CSCI 0180, or CSCI 0190) and CSCI 0220
- APMA 1080 Inference in Genomics and Molecular Biology 1

**Capstone Experience**

- BIOL 1950/1960 Directed Research/Independent Study 1
- CSCI 1970 Individual Independent Study 1

**Six courses in one of the following four tracks:**

1. **Computational Genomics Track:**

2. **Biological Sciences Track:**

3. **Molecular Modeling Track:**

4. **Applied Mathematics and Statistical Genomics Track:**
Three of the following:
- CSCI 1230 Introduction to Computer Graphics
- CSCI 1270 Database Management Systems
- CSCI 1410 Applied Artificial Intelligence
- CSCI 1550 Probability and Computing: Randomized Algorithms and Probabilistic Analysis
- CSCI 1570 Design and Analysis of Algorithms

or other Computer Science courses approved by the concentration advisor

Three of the following:
- CSCI 0310 Introduction to Computer Systems
- CSCI 0320 Introduction to Software Engineering
- CSCI 1820 Algorithmic Foundations of Computational Biology

Molecular Modeling Track: 3
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Biological Sciences track 4
At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.
Select two courses from the following:
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Molecular Modeling Track: 4
- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
At least three courses from the following:
- CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- or BIOL 1270 Advanced Biochemistry
- BIOL 0530 Principles of Immunology
- BIOL 1260 Physiological Pharmacology
- BIOL 1540 Molecular Genetics

Two courses from the following:
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Applied Mathematics and Statistical Genomics Track: 5
At least three courses from the following:
- APMA 1660 Statistical Inference II
- APMA 1690 Computational Probability and Statistics
- CSCI 1410 Applied Artificial Intelligence
- APMA 0340 Methods of Applied Mathematics I, II
- APMA 0330 Methods of Applied Mathematics I, II

At least three of the following:
- BIOL 1430 The Computational Theory of Molecular Evolution
- CSCI 1820 Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1070 Quantitative Models of Biological Systems

Total Credits 19

1 Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. A minimum of one semester of independent study is required, although many students may conduct a full year of independent study.
2 This track is designed for students whose interests lie in the development of algorithms and high-quality software (tools and systems) for biological applications.
3 This track is designed for students whose interests lean more towards biological questions.
4 This track is designed for students who wish to gain competence in the field of molecular modeling and drug design.
5 This track is designed for students whose interest focuses on extracting information from genomic and molecular biology data, and modeling the dynamics of these systems. Substitution of more advanced courses with consent of advisor is permitted.

Honors:
To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

Computational Biology Graduate Program
The doctoral program is interdepartmental and the result of a collaboration between the four academic units that comprise the CCMB: Applied Mathematics, Computer Science, Ecology & Evolutionary Biology, and Molecular Biology, Cell Biology & Biochemistry

Our PhD program assumes the following prerequisites: mathematics through intermediate calculus, linear algebra and discrete mathematics, demonstrated programming skill, and at least on undergraduate course in chemistry and in molecular biology. Exceptional strengths in one area may compensate for limited background in other areas, but some proficiency across the disciplines must be evident for admission.

The application process to the CCMB graduate program is run through the Graduate School (http://www.brown.edu/academics/gradschool).

Computer Science
Chair
Ugur Cetintemel
Vice Chair and Director of Undergraduate Studies
Thomas W. Doeppner Jr
Director of Graduate Studies
Shriram Krishnamurthi

Since our inception in 1979, the Computer Science Department at Brown has forged a path of innovative information technology research and teaching at both the undergraduate and graduate levels. From our modest beginnings as an interest group within the Division of Applied Mathematics and Engineering in the 1960s to its current stature as one of the nation’s leading computer science programs, the Computer Science Department has continuously produced prominent contributors in the field. Computer Science combines the intellectual challenges of a new discipline with the excitement of an innovative and rapidly expanding technology. The department resides in Brown’s Center for Information Technology; this striking building houses many of the university’s computing activities, as well as the department’s instructional computing facilities and research labs. Faculty, staff and students are provided state-of-the-art computing facilities managed by the department’s own technical staff.
Computer Science Concentration Requirements

Computer science is now a critical tool for pursuing an ever-broadening range of topics, from outer space to the workings of the human mind. In most areas of science and in many liberal arts fields, cutting-edge work depends increasingly on computational approaches. The undergraduate program at Brown is designed to combine breadth in practical and theoretical computer science with depth in specialized areas. These areas range from traditional topics, such as analysis of algorithms, artificial intelligence, databases, distributed systems, graphics, mobile computing, networks, operating systems, programming languages, robotics and security, to novel areas including games and scientific visualization.

Requirements for the Standard Track of the Sc.B. degree

Prerequisites (1 or 2 courses)

Two semesters of Calculus, for example:

- MATH 0090  Introductory Calculus, Part I
- MATH 0100  Introductory Calculus, Part II
- or MATH 0170  Advanced Placement Calculus

Concentration Requirements (15 courses)

Core-Computer Science:

Select one of the following introductory course Series:

Series A

- CSCI 0150 & CSCI 0160  Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

Series B

- CSCI 0170 & CSCI 0180  Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction

Series C

- CSCI 0190  Accelerated Introduction to Computer Science and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or an advanced course

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented:

- CSCI 0220  Introduction to Discrete Structures and Probability (math)
- CSCI 0320  Introduction to Software Engineering (systems)
- CSCI 0330  Introduction to Computer Systems (systems) or CSCI 0310  Introduction to Computer Systems
- CSCI 0510  Models of Computation (math)
- CSCI 1450  Introduction to Probability and Computing

Additional Computer Science Courses:

Select one theoretical computer science course:

- CSCI 1490  Introduction to Combinatorial Optimization
- CSCI 1510  Introduction to Cryptography and Computer Security
- CSCI 1550  Probability and Computing: Randomized Algorithms and Probabilistic Analysis
- CSCI 1570  Design and Analysis of Algorithms
- CSCI 1590  Introduction to Computational Complexity
- CSCI 1760  Introduction to Multiprocessor Synchronization
- CSCI 1950H  Computational Topology
- CSCI 1950J  Introduction to Computational Geometry

Select one artificial intelligence course:

- CSCI 1410  Applied Artificial Intelligence
- CSCI 1420  Introduction to Machine Learning
- CSCI 1430  Introduction to Computer Vision
- CSCI 1450  Introduction to Probability and Computing
- CSCI 1460  Introduction to Computational Linguistics
- CSCI 1480  Building Intelligent Robots
- CSCI 1490  Introduction to Combinatorial Optimization
- CSCI 1580  Information Retrieval and Web Search

Select one computer science systems course:

- CSCI 1230  Introduction to Computer Graphics
- CSCI 1260  Introductory Compiler Construction
- CSCI 1270  Database Management Systems
- CSCI 1290  Computational Photography
- CSCI 1310  Fundamentals of Computer Systems
- CSCI 1320  Creating Modern Web Applications
- CSCI 1340  Innovating Game Development
- CSCI 1380  Distributed Computer Systems
- CSCI 1600  Introduction to Embedded and Real-Time Software
- CSCI 1610  Building High-Performance Servers
- CSCI 1660  Introduction to Computer Systems Security
- CSCI 1670  Operating Systems
- CSCI 1680  Computer Networks
- CSCI 1730  Introduction to Programming Languages
- CSCI 1900  Software System Design

Four additional advanced computer science courses

- MATH 0520  Linear Algebra
- MATH 0540  Honors Linear Algebra
- CSCI 0530  Directions: The Matrix in Computer Science

Total Credits: 15

1. Normally these advanced courses must be at the 1000-level or higher, though an intermediate-level course not used to satisfy a core requirement may be used.
2. These courses must include two pairs of courses with each pair forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.
3. Five of the eight courses must be computer science courses.
4. Among the eight courses may be approved 1000-level courses in Mathematics, Applied Mathematics, Biology, Engineering, Economics, Music, Cognitive, Linguistic, and Psychological Sciences, Neuroscience, and other departments that cover material relevant to the student’s concentration.
5. CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.
6. No course may be used to satisfy more than one area requirement.

Requirements for the Professional Track of the Sc.B. degree

The requirements for the professional track include all those of the standard track, as well as the following:
Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Requirements for the Standard Track of the A.B. degree

Prerequisites

Two semesters of Calculus, for example:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0090</td>
<td>Introductory Calculus, Part I</td>
</tr>
<tr>
<td>MATH 0100</td>
<td>and Introductory Calculus, Part II</td>
</tr>
<tr>
<td>MATH 0170</td>
<td>Advanced Placement Calculus</td>
</tr>
</tbody>
</table>

Concentration Requirements (9 courses)

Core Computer Science:
Select one of the following series:

Series A

- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160 Introduction to Algorithms and Data Structures

Series B

- CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction

Series C

- CSCI 0190 Accelerated Introduction to Computer Science
- and an additional CSCI course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CSCI course, or a 1000 level course)

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- or CSCI 0310 Models of Computation (math)
- CSCI 0530 Directions: The Matrix in Computer Science (math)
- CSCI 1450 Introduction to Probability and Computing

Four additional courses in computer science or related areas are required. ¹

Total Credits 9

¹ Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

- CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1520 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.

Requirements for the Professional Track of the A.B. degree

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

Prerequisites (3 courses):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0100</td>
<td>Introductory Calculus, Part II</td>
</tr>
<tr>
<td>MATH 0520</td>
<td>Linear Algebra</td>

<td>Honors Linear Algebra</td>
</tr>
<tr>
<td>or CSCI 0530</td>
<td>Directions: The Matrix in Computer Science</td>
</tr>
<tr>
<td>ECON 0110</td>
<td>Principles of Economics</td>
</tr>
</tbody>
</table>

1. Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

- CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1520 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.
Required Courses (17 courses):

Select one of the following Series: 2

- CSCI 1450 Introduction to Probability and Computing 1
- or APMA 1650 Statistical Inference I 1

Series A
- CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction

Series C
- CSCI 0190 Accelerated Introduction to Computer Science

and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course.

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math) 1
- CSCI 0320 Introduction to Software Engineering (systems) 1
- CSCI 0330 Introduction to Computer Systems (systems) 1
- or CSCI 0310 Introduction to Computer Systems 1
- CSCI 0510 Models of Computation (math) 1

A pair of CS courses with a coherent theme. 1 2

An additional CS course that is either at the 1000-level or an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement.

- ECON 1130 Intermediate Microeconomics (Mathematical) 2 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Three courses from the "mathematical economics" group: 3

- ECON 1170 Welfare Economics and Social Choice Theory
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- and any graduate Economics course

Two additional 1000-level Economics courses 2

Capstone Course in either Computer Science or Economics 3 1

Total Credits 17

1 A list of pre-approved pairs may be found at the approved-pairs web page (http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies. CSCI 1450 may not be used to satisfy this requirement.

2 Or ECON 1110, with permission.

3 A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

Standard Program for the A.B. degree:

Prerequisites (3 courses):
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science
- ECON 0110 Principles of Economics

Required Courses (13 courses):

Select one of the following series: 2

- CSCI 1450 Introduction to Probability and Computing 1
- or APMA 1650 Statistical Inference I 1

Series A
- CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction

Series C
- CSCI 0190 Accelerated Introduction to Computer Science

and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or a 1000-level course.

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math) 1
- CSCI 0320 Introduction to Software Engineering (systems) 1
- CSCI 0330 Introduction to Computer Systems (systems) 1
- or CSCI 0310 Introduction to Computer Systems 1
- CSCI 0510 Models of Computation (math) 1

A pair of CS courses with a coherent theme. 1 2

An additional CS course that is either at the 1000-level or an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement.

- ECON 1130 Intermediate Microeconomics (Mathematical) 2 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Three courses from the "mathematical economics" group: 3

- ECON 1170 Welfare Economics and Social Choice Theory
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics
Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

Requirements for the Standard Track of the Sc.B. degree.

**Prerequisites - two semesters of Calculus, for example**

- MATH 0090 Introductory Calculus, Part I
- MATH 0100 Introductory Calculus, Part II
- MATH 0170 Advanced Placement Calculus

**Concentration Requirements (17 courses)**

<table>

</tbody>
</table>

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Three 1000-level Applied Mathematics courses approved by the concentration advisor, which of two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650/1660.

A capstone course: a one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Note: CSCI 1450 may be used either as a math-oriented core course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.

**Total Credits**: 17

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (http://www.cs.brown.edu/ugrad/concentrations/professional_track.html) of the ScB program in Mathematics-Computer Science.

Requirements for the Standard Track of the Sc.B. degree.

Prerequisites

| Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350 | 3 |
| MATH 0520 Linear Algebra | 1 |
| or MATH 0540 Honors Linear Algebra | |

Core Courses

| MATH 1530 Abstract Algebra | 1 |
| Select one of the following series: | 2 |
| Series A | |
| CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures | |
| Series B | |
| CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction | |
| Series C | |
| CSCI 0190 Accelerated Introduction to Computer Science and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level CS course | |
| CSCI 0320 Introduction to Software Engineering | 1 |
| or CSCI 0330 Introduction to Computer Systems | 1 |
| CSCI 0220 Introduction to Discrete Structures and Probability | 1 |
| or CSCI 0510 Models of Computation | 1 |
| Three 1000-level Mathematics courses | 3 |

Total Credits 19

1 These courses must be at the 1000-level or higher. The three courses must include a pair of courses with a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

2 These must be approved by a concentration advisor.

3 A one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Computer Science Graduate Program

The department of Computer Science offers two graduate degrees in computer science. The Master of Science (Sc.M.) degree for those who wish to improve their professional competence in computer science or to prepare for further graduate study, and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/computer-science
Concurrent ScB (NUS) and ScM in Computational Biology (Brown University)

The School of Computing at National University of Singapore and The Department of Computer Science at Brown have established a concurrent Bachelor’s and Master’s degree program in Computational Biology. After having first completed four years of undergraduate study at National University of Singapore (NUS), qualified students will attend Brown University to complete their fifth and final year of study in computational biology. After the successful completion of requirements set forth by both universities, the students will simultaneously earn both their Sc.B. and Sc.M. degrees. The Sc.B will be awarded by the National University of Singapore, while the Sc.M. is awarded by Brown University.

Courses

CSCI 0020. The Digital World.
Removes the mystery surrounding computers and the ever-growing digital world. Introduces a range of topics and many aspects of multimedia, along with explanations of the underlying digital technology and its relevance to our society. Other topics include artificial intelligence, IT security, ethics and the economics of computing as well as the effects of its pervasiveness in today’s world. Introductory programming and analytic skills are developed through HTML, Photoshop, Excel and Python assignments. CSCI 0020 is a good introduction to a wide range of CS topics that have broad relevance in our society. No prerequisites. LILE

CSCI 0040. Introduction to Scientific Computing and Problem Solving.
CSCI0040 provides an introduction to using computers to solve STEM (Science, Technology, Engineering and Mathematics) data analysis, visualization and simulation problems from engineering, neuroscience, biology, mathematics and finance.

Students will access and analyze a number of “real world” data sets while becoming fluent MATLAB programmers. Other tools utilized may include Excel, Wolframalpha and Python.

By course end, students should be able to use MATLAB to solve a large variety of scientific data analysis, visualization and simulation problems.

No prior programming experience is required (MATLAB is easy and fun to use). A calculus course (perhaps in high school) is highly recommended.

CSCI 0080. A First Byte of Computer Science
Introduces non-CS concentrators to the academic discipline of computer science, its thought processes, and its relevance to other fields and modern life more generally. The target audience is students who are interested in learning more about what computer science is about and the ideas it has to offer tomorrow’s citizens and scholars. Topics include the basics of computation and programming, a taste of theoretical computer science and algorithms, and an introduction to codes and artificial intelligence. Although students will learn to read and understand short programs, the course will not teach or require advanced programming skills. LILE

CSCI 0081. TA Apprenticeship: Full Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to the professor of the course being TA’d. Instructor permission required.

CSCI 0082. TA Apprenticeship: Half Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to the professor of the course being TA’d. Instructor permission required.

CSCI 0150. Introduction to Object-Oriented Programming and Computer Science
Emphasizes object-oriented design and programming in Java, an effective modern technique for producing modular, reusable, internet-aware programs. Also introduces interactive computer graphics, user interface design and some fundamental data structures and algorithms. A sequence of successively more complex graphics programs, including Tetris, and culminating in a significant final project, helps provide a serious introduction to the field intended for both potential concentrators and those who may take only a single course. No prerequisites, no prior knowledge of programming required.

CSCI 0160. Introduction to Algorithms and Data Structures.
Introduces fundamental techniques for problem solving by computer that are relevant to most areas of computer science, both theoretical and applied. Algorithms and data structures for sorting, searching, graph problems, and geometric problems are covered. Programming assignments conform with the object-oriented methodology introduced in CSCI 0150. Prerequisite: CSCI 0150 or written permission.

CSCI 0170. Computer Science: An Integrated Introduction.
CSCI0170/0180 is an introductory sequence that helps students begin to develop the skills, knowledge, and confidence to solve computational problems elegantly, correctly, efficiently, and with ease. The sequence is unique in teaching both the functional and imperative programming paradigms—the first through the languages Scheme and ML in CSCI0170; the second through Java in CSCI0180. The sequence requires no previous programming experience. Indeed, few high school students are exposed to functional programming; hence even students with previous programming experience often find this sequence an invaluable part of their education.

Although students are taught to use programming languages as tools, the goal of CSCI0170/0180 is not merely to teach programming. On the contrary, the goal is to convey to students that computer science is much more than programming! All of the following fundamental computer science techniques are integrated into the course material: algorithms, data structures, analysis, problem solving, abstract reasoning, and collaboration. Concrete examples are drawn from different subareas of computer science: in 0170, from arbitrary-precision arithmetic, natural language processing, databases, and strategic games; in 0180, from discrete-event simulation, data compression, and client/server architectures.

CSCI 0180. Computer Science: An Integrated Introduction.
A continuation of CSCI 0170. Students learn to program in Java while continuing to develop their algorithmic and analytic skills. Emphasis is placed on object-oriented design, imperative programming, and the implementation and use of data structures. Examples are drawn from such areas as databases, strategy games, web programming, graphical user interfaces, route finding, and data compression. Lab work done with the assistance of TAs. Prerequisite: CSCI 0170.

CSCI 0190. Accelerated Introduction to Computer Science.
his course is a one-semester introduction to computer science for students with strong prior computer science background. It covers core data structures, algorithms, and analysis techniques similar to those of the two-course introductory sequences (CSCI 0150-0160 and CSCI 0170-0180), integrated with programming. Students who wish to take CSCI 0190 must begin in CSCI 0170 and complete additional work in that course. CSCI 0190 will branch off from CSCI 0170 after approximately one month. Students will be permitted to enroll by permission of the instructor. Please see http://cs.brown.edu/courses/csci0190/2012/ for information on registering for this class.

CSCI 0220. Introduction to Discrete Structures and Probability.
Seeks to place on solid foundations the most common structures of computer science, to illustrate proof techniques, to provide the background for an introductory course in computational theory, and to introduce basic concepts of probability theory. Introduces Boolean algebras, logic, set
Please go to https://docs.google.com/a/brown.edu/forms/.

CSCI 0220 is recommended.

CSCI 1270. Database Management Systems.
Introduction to database structure, organization, languages, and implementation. Relational model, query languages, query processing, query optimization, transaction management, file structures, concurrency control and recovery algorithms, and distributed databases. Coverage of modern applications such as the Web, but with emphasis on Database Management Systems internals. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190. One of CSCI 0330 or CSCI 0320 is strongly recommended.

CSCI 1280. Intermediate 3D Computer Animation.
Continues work begun in CSCI 1250 with deeper exploration of technical and artistic aspects of 3D computer animation including more sophisticated shading and lighting methods and character modeling, rigging, animation, and dynamics. After a series of individual exercises, students pursue an independent topic and then, working alone or in pairs, create a polished demonstration. Emphasis is on in-class critique of ongoing work. Prerequisite: CSCI 1250. Students may contact the instructor in December for permission.

CSCI 1290. Computational Photography.
Describes the convergence of computer graphics and computer vision with photography. Its goal is to overcome the limitations of traditional photography using computational techniques to enhance the way we capture, manipulate, and interact with visual media. Topics covered: cameras, human visual perception, image processing and manipulation, image based lighting and rendering, high dynamic range, single view reconstruction, photo quality assessment, non photorealistic rendering, the use of Internet-scale data, and more. Students are encouraged to capture and process their own data. Prerequisites: previous programming experience, basic linear algebra, calculus, and probability; previous knowledge of computer graphics or computer vision. Strongly recommended: CSCI 1230, CSCI 1430, ENGN 1610.

CSCI 1300. Designing, Developing and Evaluating User Interfaces.
Topics include understanding when to use different interfaces, modeling and representing user interaction, principles of user experience design, eliciting requirements and feedback from users, methods for designing and prototyping interfaces, and user interface evaluation.

Covers the fundamental concepts, principles, and abstractions that underlie the design and engineering of computer systems. Topics include computer systems organization, modularity, virtualization, communications, atomicity, fault tolerance, security, and performance. Combined lectures and presentation and discussion of case studies. Several hands-on labs and written assignments, as well as a semester-long project that is incrementally worked on throughout the semester. Prerequisites: CSCI 0160, 0180, or 0190, or permission of the instructor.
This course covers all aspects of web application development, including the initial concept, user-centric design, development methodologies, front and back end development, databases, security, testing, load testing, accessibility, and deployment. There will be a substantial team project. The course is designed for students with a programming background (equiv CSCI 0320/CSCI 0330) who want to learn how to build web applications, and for students with a background in web design, including HTML and JavaScript. Students who are interested in learning how to extend design techniques to incorporate the technologies needed in modern web applications. Project teams will consist of students with both backgrounds.

CSCI 1340. Innovating Game Development.
What technologies will shape the next generation of videos? This project-centered course focuses on computational innovations for game development. Students examine innovative game technology through case studies of existing games and talks by industrial and academic game professionals. In teams, students propose and implement a project demonstrating a novel technology for gaming. Recommended: strong computational or engineering background.

CSCI 1370. Virtual Reality Design for Science
Explores the visual and human-computer interaction design process for scientific applications in Brown’s immersive virtual reality Cave. Joint with RISD. Computer Science and design students learn how to work together effectively; study the process of design; learn about scientific problems; create designs applications; critique, evaluate, realize and iterate designs; and demonstrate final projects. Instructor permission required.

CSCI 1380. Distributed Computer Systems
Explores the fundamental principles and practice underlying networked information systems, first we cover basic distributed computing mechanisms (e.g., naming, replication, security, etc.) and enabling middleware technologies. We then discuss how these mechanisms and technologies fit together to realize distributed databases and file systems, web-based and mobile information systems. Prerequisite: CSCI 0320.

Practical approaches to designing intelligent systems. Topics include search and optimization, uncertainty, learning, and decision making. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190; and either CSCI 0220 or one of CSCI 0450 or CSCI 1450.

CSCI 1420. Introduction to Machine Learning.
How can artificial systems learn from examples, and discover information buried in massive datasets? We explore the theory and practice of statistical machine learning, focusing on computational methods for supervised and unsupervised data analysis. Specific topics include Bayesian and maximum likelihood parameter estimation, regularization and sparsity-promoting priors, kernel methods, the expectation maximization algorithm, and models for data with temporal or hierarchical structure. Applications to regression, categorization, clustering, and dimensionality reduction problems are illustrated by examples from vision, language, bioinformatics, and information retrieval. Prerequisites: CSCI 0040 or 0150 or 0180 or 0190; and CSCI 0450 or APMA 1650 or MATH 1610; and CSCI 0530 or MATH 0520 or 0540; or instructor permission.

CSCI 1430. Introduction to Computer Vision.
How can we program computers to understand the visual world? This course treats vision as inference from noisy and uncertain data and emphasizes probabilistic and statistical approaches. Topics may include perception of 3D scene structure from stereo, motion, and shading; segmentation and grouping; texture analysis; learning, object recognition; tracking and motion estimation. Strongly recommended: basic linear algebra, calculus, and probability.

CSCI 1450. Introduction to Probability and Computing.
Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major roles in machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of statistical inference.

CSCI 1460. Introduction to Computational Linguistics.
Introduction to computational linguistics (also known as natural-language processing) including the related mathematics and several programming projects. Particular topics include: language modeling (as used in e.g., speech recognition, machine translation), machine translation, part-of-speech labeling, syntactic parsing, and pronoun resolution. Mathematical techniques include basic probability, noisy channel models, the EM (Expectation-Maximization) algorithm, hidden Markov models, probabilistic context-free grammars, and the forward-backward algorithm. Not open to first year students.

CSCI 1480. Building Intelligent Robots.
How do robots function autonomously in dynamic, unpredictable environments? This course focuses on programming mobile robots, such as the iRobot Roomba, to perceive and act autonomously in real-world environments. The major paradigms for autonomous control and robot perception are examined and compared with robotic notions in science fiction. Prerequisite: CSCI 0510. CSCI 0170 or CSCI 0190. Recommended: CSCI 1410 or CSCI 1230.

CSCI 1490. Introduction to Combinatorial Optimization.
This course covers the algorithmic aspects of optimizing decisions in fully observable, non-changing environments. Students are introduced to state-of-the-art optimization methods such as linear programming, integer programming, local search, and constraint programming. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0510; and CSCI 0530 or MATH 0520 or MATH 0540.

CSCI 1510. Introduction to Cryptography and Computer Security.
This course studies the tools for guaranteeing safe communication and computation in an adversarial setting. We develop notions of security and give provably secure constructions for such cryptographic objects as cryptosystems, signature schemes and pseudorandom generators. We also review the principles for secure system design. Prerequisites: CSCI 0220 and CSCI 0510.

This course introduces students to applications of probabilistic and statistical methods to the design and analysis of algorithms, in particular randomized algorithms and probabilistic analysis of algorithms. The course covers basic probabilistic techniques such as tail bounds, martingales, coupling, etc., and presents applications of randomized and probabilistic analysis techniques in areas such as graph algorithms, data structures, communication, and Monte Carlo simulations. No prior knowledge of probability theory is assumed. CSCI 1570 recommended but not required.

CSCI 1570. Design and Analysis of Algorithms.
A single algorithmic improvement can have a greater impact on our ability to solve a problem than ten years of incremental improvements in CPU speed. We study techniques for designing and analyzing algorithms. Typical problem areas addressed include hashing, searching, dynamic programming, graph algorithms, network flow, and optimization algorithms including linear programming. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190, and one of CSCI 0220 or CSCI 1450.

CSCI 1580. Information Retrieval and Web Search.
Covers traditional material as well as recent advances in information retrieval (IR), the study of indexing, processing, and querying of textual data. The focus will be on newer techniques geared to hypertext documents available on the World Wide Web. Topics include efficient text indexing; Boolean and vector space retrieval models; evaluation and interface issues; Web crawling, link-based algorithms, and Web metadata; text/Web clustering, classification; text mining.

CSCI 1590. Introduction to Computational Complexity.
Introduction to serial and parallel models of computation; time and space complexity classes on these models; the circuit model of computation and its relation to serial and parallel time complexity; space-time tradeoffs on serial computers; area-time tradeoffs on the VLSI computational model; interactive and probabilistically checkable proofs; the definition of NP in terms of probabilistically checkable proofs; hardness of approximations to solutions of NP-hard problems. Prerequisite: CSCI 0510.
CSCI 1600. Introduction to Embedded and Real-Time Software.
Comprehensive introduction to the design and implementation of software for programmable embedded computing systems, those enclosed in devices such as cellular phones, game consoles, and car engines. Includes the overall embedded real-time software design and development processes, as well as aspects of embedded hardware and real-time, small-footprint operating systems. Major project component. Prerequisites: CSCI 0320 or 0360.

CSCI 1610. Building High-Performance Servers.
In depth study of modern server design. Considers architectures for building high-performance, robust, scalable, and secure network servers. We will consider all aspects of “mission-critical” servers. Topics include multithreaded and asynchronous programming techniques, database access, performance profiling, security, and redundancy. Teams will build significant projects. Prerequisite: CSCI 0320 or 0360. CSCI 1670 or 1680 is recommended.

This course teaches principles of computer security from an applied viewpoint and provides hands-on experience on security threats and countermeasures. Topics include code execution vulnerabilities (buffer overflow, sandboxing, mobile code), malware (trojans, viruses, and worms), access control (users, roles, policies), cryptosystems (hashing, signatures, certificates), network security (firewalls, TLS, intrusion detection, VPN), and human and social issues. Prerequisites: one of CSCI 0160 or CSCI 0180 or CSCI 0190; and CSCI 0330.

Covers not just the principles of operating systems but the intricacies of how they work. Topics include multithreaded programming, managing threads and interrupts, managing storage, processor scheduling, operating-system structure, virtualization, security, and the design of file systems (both local and distributed). Extensive examples are taken from actual systems, including Linux and Windows. Students are expected to complete both problem sets and programming assignments (in C). Prerequisite: CSCI 0310 or 0330.

CSCI 1680. Computer Networks.
Covers the technologies supporting the Internet, from Ethernet and WiFi through the routing protocols that govern the flow of traffic and the web technologies that are generating most of it. A major concern is understanding the protocols used on the Internet: what the issues are, how they work, their shortcomings, and what improvements are on the horizon. Prerequisite: CSCI 0330 or consent of instructor.

CSCI 1690. Operating Systems Laboratory.
Half-credit course intended to be taken with CSCI 1670. Students individually write a simple operating system in C. Serves to reinforce the concepts learned in 1670 and provides valuable experience in systems programming. Corequisite: CSCI 1670.

CSCI 1729. Programming Languages Lab.
Half-credit course intended to be taken concurrently with CSCI 1730. Students individually implement a full programming language chosen by the course. Reinforces the concepts learned in CSCI 1730 and provides valuable experience in implementing programming languages. Corequisite: CSCI 1730

CSCI 1730. Introduction to Programming Languages.
Explores the principles of modern programming languages by implementation. Examines linguistic features, especially control operators such as first-class functions, exceptions, and continuations. Studies data and their types, including polymorphism, type inference, and type soundness. Examines compiler and run-time system topics: continuation-passing style and garbage collection. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190. Preferred: CSCI 0220, either CSCI 0320 or CSCI 0330, and CSCI 0510.

CSCI 1760. Introduction to Multiprocessor Synchronization.
This course examines the theory and practice of multiprocessor synchronization. Subjects covered include multiprocessor architecture, mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, load balancing, concurrent data structures, and transactional synchronization. Prerequisites: CSCI 0330

CSCI 1780. Parallel and Distributed Programming.
Covers the practical aspects involved in designing, writing, tuning, and debugging software designed to run on parallel and distributed systems. Topics might include client-server computation, threads, networks of workstations, message passing, shared memory, partitioning strategies, load balancing, algorithms, remote procedure call, and synchronization techniques. Prerequisites: CSCI 0220 and either 0320 or 0360; 0510 recommended.

CSCI 1800. Cybersecurity and International Relations.
The global Internet shortens distances, makes businesses more efficient and facilitates greater social interaction. At the same time, it exposes vital national resources to exploitation and makes it easier for the international criminal element to prey on innocent Internet users. Cybersecurity is concerned with making the Internet a more secure and trustworthy environment. In this course we study this topic from the technological and policy points of view. The goal is to facilitate communication across the divide that normally characterizes the technological and policy communities. LILE WRIT

CSCI 1810. Computational Molecular Biology.
High-throughput experimental approaches now allow molecular biologists to make large-scale measurements of DNA, RNA, and protein, the three fundamental molecules of the cell. The resulting datasets are often too large for manual analysis and demand computational techniques. This course introduces algorithms for sequence comparison and alignment; molecular evolution and phylogenetics; DNA/RNA sequencing and assembly; recognition of genes and regulatory elements; and RNA and protein structure. The course demonstrates how to model biological problems in terms of computer science. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190, or consent of instructor.

The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP’s variation. The course is open to computer and mathematical sciences students as well as biological and medical students.

CSCI 1900. Software System Design.
Students identify, design, and implement significant software applications and learn and practice techniques of project management, requirements, specification, analysis, design, coding, documentation, testing, maintenance, and communication. Prerequisite: CSCI 0320.

CSCI 1950A. Computational Modeling and Algorithmic Thinking.
In this course you will learn how to apply tools from statistics and computer science to build computational models of physical and biological systems. Example applications include modeling and then simulating the behavior of a collection of genes, the spread of disease in a population, a single neuron in isolation or the complex of neurons comprising the primate visual cortex.

CSCI 1950B. Computational Topology and Discrete Geometry.
This course will investigate (through a mixture of lectures and student presentations of recent papers) topics in computational topology, including Morse theory and discrete differential geometry. Other possible topics are knot polynomials, simplicial homology, and geometric probability theory. Some mathematical sophistication and programming skills required. No prerequisites.

CSCI 1950C. Advanced Programming for Digital Art & Literature.
This workshop will explore advanced tools and techniques for the creation of innovative and expressive works of digital art. Lectures will address the application of best practices from the software design community to the context of artistic practice. In the first section of the course, students will exercise their aesthetic, conceptual, and technical skills on a set of ‘mini-projects’ exploring the analysis, generation and presentation of computationally-augmented literary texts. Assignments will include web-text mining, feature extraction, grammars, generative algorithms, and statistical techniques. During the second half of the course, students will
focus on a larger work of their own design, participating in regular critiques throughout the development cycle. Though assignments will focus on digital literature, a wide range of artistic media will be explored, including sound, image, video, 3D and installation. Collaboration is encouraged. Instructor permission required. Enrollment limited to 18.

We will study various algorithmic problems that arise in the study of topological phenomena, such as winding number, turning number, knot polynomials, topology of covering spaces (especially Riemann surfaces), and discrete Morse theory. The mathematical topics will be briefly introduced before we move to computations, but some a priori mathematical sophistication will make the course more valuable to the student. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950J. Introduction to Computational Geometry.
Geometric algorithms in two and three dimensions. Algorithmic and geometric fundamentals. Point location, convex hulls, proximity (Voronoi diagrams, Delaunay triangulations), intersections, the geometry of rectangles. Prerequisites: CSCI 0160, 0170, or 0190; and CSCI 0220.

CSCI 1950K. Innovating Game Development.
A project-centered course focused on technological, paradigm, and design innovations for game development. As teams, students will propose and implement a project demonstrating a novel technology for gaming. Examines the current state and future of game development through a seminar of speakers active in game development and research. A strong computer science or engineering background is recommended.

CSCI 1950M. Advanced Practical Combinatorial Algorithms.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2590, or instructor permission.

CSCI 1950N. 2D Game Engines.
2D Game Engines covers core techniques used in the development of the software that drives computer games and other interactive software. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950Q. Programming for the Humanities and Social Sciences.
A principled introduction to programming for students whose primary interest lies in the humanities and social sciences. Students will propose a substantial project related to their concentrations. They will learn sufficient programming skills to carry out the project, presenting it at the end of the course. The course is a continuation of CSCI 0931, "Introduction to Computation for the Humanities and Social Sciences." Prerequisite: CSCI 0931. Instructor permission required.

CSCI 1950R. Compiler Practice.
This class covers the practice of compiler writing, including lexical analysis, parsing, semantic analysis, code generation, and code optimization. Students design and implement a full compiler modularly for a modern functional language using a modern intermediate representation and modular backend. Instructor permission required.

CSCI 1950T. Advanced Animation Production.
Students will apply knowledge and skills gained in previous animation courses to produce a high quality short animated film as a group. Production will follow the industry standard pipeline that includes modeling, texturing, lighting, animating, rendering, and post production. Interested students will perform preproduction story and concept design, prior to beginning of course. Prerequisite: CSCI 1250. Enrollment limited to 15. Instructor permission required.

CSCI 1950U. Topics in 3D Game Engine Development.
Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the Qt framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisites: CSCI 1230 and one of CSCI 0320 or CSCI 1950N. Enrollment limited to 25.

CSCI 1950X. Software Foundations.
Software Foundations will be a project-based course focusing on the challenges and techniques involved in proving non-trivial properties about real-world systems. We will base our exploration around formal development in a proof environment. Roughly half of the course will be a guided tutorial of proof techniques using one or more theorem provers; in the remainder, students will apply this knowledge to existing systems. No prior experience with theorem provers or proof assistants is necessary, but familiarity with and aptitude for functional programming will be a huge bonus. Prerequisite: CSCI 1730 or equivalent; mathematical maturity.

CSCI 1950Z. Computational Methods for Biology.
This course will introduce algorithms from machine learning and combinatorial optimization with a focus on their application to biological data. Topics will include problems in phylogenetic inference, population genetics, and biological interaction networks.

CSCI 1951B. Virtual Citizens or Subjects? The Global Battle Over Governing Your Internet.
The Internet began as a U.S. government research project, progressed to an open network run by free-spirited geeks, and transitioned in the late 1990’s to a unique governance model in which nations, corporations, and civil society were supposed to all have a voice. Where are the real decisions being made? Who is making them? How can you and citizens of other nations influence these decisions? The global battle to run the Internet, brewing for years, has broken wide open with revelations of American spying on a massive scale.

CSCI 1951C. Designing Humanity Centered Robots.
This is a new course jointly offered by Brown’s Computer Science department and RISD’s Furniture Design department under the auspices of the Humanity Centered Robotics Initiative. It is focused on the iterative design process and how it can be used to develop robots for solving tasks that help people. It will expose students to a suite of fabrication and prototyping technologies sufficient for creating a functioning robotic system. The course has two tracks, one intended for CS concentrators, and one intended for non-concentrators with previous design experience. The non-concentrator track cannot be used toward fulfilling a Computer Science concentration requirement.

Independent study in various branches of Computer Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CSCI 1971. Independent Study in 2D Game Engines.
2D Game Engines covers core techniques used in the development 2D game engines. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

Important current topics in computer graphics. Course includes reading and discussing current research papers, multiple assignments and preliminary projects in which students implement recent papers, and a demanding final integrative project done in small groups. Prerequisite: Instructor’s permission or both CSCI 0320 AND CSCI 1230.

CSCI 2270. Topics in Database Management.
In-depth treatment of advanced issues in database management systems. Topics vary from year to year and may include distributed databases, mobile data management, data stream processing and web-based data management. Prerequisite: CSCI 1270.

CSCI 2300. Human-Computer Interaction Seminar.
Covers methods for conducting research in human-computer interaction (HCI). Topics will be pursued through independent reading, assignments, and class discussion. Comprises four assignments that apply to HCI research methods and push the envelope, which are designed to be meaningful and have the potential to be widely visible or to be published.
Students will gain the background necessary to perform research in HCI and the skills to conduct human-centric research. There will be little content about user interfaces, but students will find topics in CSCI 1950I relevant. Students who have not taken CSCI 1300 or CSCI 1950I need instructor permission to register.

CSCI 2310. Human Factors and User Interface Design.
Covers current research issues involving the implementation, evaluation and design of user interfaces, while also providing a basic background in the fundamentals of user interface evaluation, programming, tools, and techniques. A possible topic is programming and designing device-independent interfaces. Previous topics have included the development of pervasive internet-based interfaces and software visualization. Prerequisite: Consent of instructor.

CSCI 2330. Programming Environments.
Programming tools; control and data integration; software understanding and debugging; environments for parallel and distributed programming; reverse engineering; configuration management and version control and debugging. Emphasis on current research areas. Prerequisite: consent of instructor.

CSCI 2340. Software Engineering.
Topics in the design, specification, construction and validation of programs. Focus will be on tools to support each of these stages. Course will pay special attention to the concerns raised by the properties of modern software systems including distribution, security, component-based decomposition and implicit control. Recommended: CSCI 1900 or other upper-level systems coursework.

CSCI 2370. Interdisciplinary Scientific Visualization.
How to do research on using computer graphics, visualization, and interaction applied to scientific problems. Working in small multidisciplinary groups, students identify scientific problems, propose solutions involving computational modeling and visualization, design and implement the solutions, apply them to the problems, and evaluate their success. For 2014, immersive CAVE applications will be a focus, but other interaction or visualization projects are possible. Prerequisites: all: programming experience; CS students: graphics experience; others: problem ideas. Instructor permission required.

CSCI 2410. Statistical Models in Natural-Language Understanding.
Various topics in computer understanding of natural language, primarily from a statistical point of view. Topics include: hidden Markov models, word-tagging models, probabilistic context-free grammars, syntactic disambiguation, semantic word clustering, word-sense disambiguation, machine translation and lexical semantics. Prerequisite: CSCI 1410.

CSCI 2420. Probabilistic Graphical Models.
Probabilistic graphical models provide a flexible framework for modeling large, complex, heterogeneous collections of random variables. After a brief introduction to their representational power, we provide a comprehensive survey of state-of-the-art methods for statistical learning and inference in graphical models. We discuss a range of efficient algorithms for approximate inference, including optimization-based variational methods, and simulation-based Monte Carlo methods. Several approaches to learning from data are explored, including conditional models for discriminative learning, and Bayesian models for controlling model complexity. Programming experience required for homeworks and projects, which integrate mathematical derivations with algorithm implementations. PREREQUISITES: CSCI1420 or APMA1690.

CSCI 2430. Topics in Machine Learning.
Machine learning from the artificial intelligence perspective, with emphasis on empirical validation of learning algorithms. Different learning problems are considered, including concept learning, clustering, speed-up learning, and behavior learning. For each problem a variety of solutions are investigated, including those from symbolic AI, neural and genetic algorithms, and standard statistical methods. Prerequisite: CSCI 1410 or familiarity with basic logic and probability theory.

CSCI 2440. Game-Theoretic Artificial Intelligence.
This course surveys recent developments in an emerging area known as game-theoretic artificial intelligence (AI), which incorporates fundamental principles of game theory into AI. Research in this area is motivated by game-theoretic applications, such as auction design and voting, as well as AI application areas, such as multiagent systems. Students will conduct theoretical, empirical, and experimental investigations, asking fundamental questions such as: can the behavior of computational learning agents converge to game-theoretic equilibria? Prerequisite: Consent of instructor.

CSCI 2450. Exchange Scholar Program.

CSCI 2500A. Advanced Algorithms.
Typically, an algorithm solves one problem, whereas a well-designed data structure can help implement algorithms for a wide variety of problems. We will study the design, analysis and implementation of advanced data structures. Focus is on data structures that are fast, both theoretically and empirically. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2500B. Optimization Algorithms for Planar Graphs.
Planar graphs arise in applications such as road map navigation and logistics, graph drawing and image processing. We will study graph algorithms and data structures that exploit planarity. Our focus will be on recent research results in optimization. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2510. Approximation Algorithms.
Approximation Algorithms deal with NP-hard combinatorial optimization problems by efficiently constructing a suboptimal solution with some specified quality guarantees. We study techniques such as linear programming and semidefinite programming relaxations, and apply them to problems such as facility location, scheduling, bin packing, maximum satisfiability or vertex cover. Prerequisite - one of the following: CSCI 1510, 1550, 1810, 1950J, 1950L, any graduate-level course on algorithms (including 2500A, 2500B, 2580).

CSCI 2520. Computational Geometry.
Algorithms and data structures for fundamental geometric problems in two and three dimensions. Topics include point location, range searching, convex hull, intersection, Voronoi diagrams, and graph drawing. Applications to computer graphics, circuit layout, information visualization, and computer-aided design are also discussed. Prerequisite: CSCI 1570 or instructor permission.

CSCI 2530. Design and Analysis of Communication Networks.
A theory seminar focusing on algorithmic and combinatorial issues related to the design and analysis of communication networks for parallel and distributed systems. Topics include packet routing, circuit switching, distributed shared memory, fault tolerance, and more. Prerequisites: CSCI 1550, 1570, or equivalent.

CSCI 2531. Internet and Web Algorithms.
This advanced graduate course/seminar focuses on the mathematical foundations of algorithms for handling large amounts of data over networks. We'll read and discuss recent papers in information retrieval, search engines, link analysis, probabilistic modeling of the web and social networks, and more. Recommended: CSCI 1550 and CSCI 1570, or equivalent courses.

Advanced topics in applications of probabilistic methods in design and analysis of algorithms, in particular to randomized algorithms and probabilistic analysis of algorithms. Topics include the Markov chains Monte Carlo, martingales, entropy as a measure for information and randomness, and more. Prerequisite: CSCI 1550. Recommended but not required: CSCI 1570.

The theoretical foundations of parallel algorithms. Analysis of the most important models of parallel computation, such as directed-acyclic computation graphs, shared memory and networks, and standard data-exchange schemes (common address space and message-passing). Algorithmic techniques with numerous examples are cast mostly in the data-parallel framework. Finally, limitations to parallelizability (P-completeness) are analyzed. The content of the course is likely to change as technology evolves.

CSCI 2560. Advanced Complexity.
Advanced topics in computational complexity, such as: the polynomial hierarchy, interactive proofs, pseudorandomness, derandomization, probabilistically checkable proofs.
CSCI 2570. Introduction to Nanocomputing.
Nanoscale technologies employing materials whose smallest dimension is on the order of a few nanometers are expected to replace lithography in the design of chips. We give an introduction to computational nanotechnologies and explore problems presented by their stochastic nature. Nanotechnologies based on the use of DNA and semiconducting materials will be explored. Prerequisite: CSCI 0510.

The theory of combinatorial optimization and how it is embodied in practical systems. Explores issues encountered in implementing such systems. Emphasizes the wide variety of techniques and methodologies available, including integer programming, local search, constraint programming, and approximation algorithms. Problems addressed may include: scheduling, coloring, traveling salesman tours, and resource allocation. Prerequisites: CSCI 0320 and basic knowledge of linear algebra.

CSCI 2590. Advanced Topics in Cryptology.
Seminar-style course on advanced topics in cryptology. Example topics are zero-knowledge proofs, multi-party computation, extractors in cryptography, universal composability, anonymous credentials and escrow, interplay of cryptography and game theory. May be repeated for credit. Prerequisite: CSCI 1510 or permission of the instructor.

CSCI 2730. Programming Language Theory.
Theoretical models for the semantics of programming languages and the verification of programs. Topics include operational semantics, denotational semantics, type theory and static analyses. Recommended prerequisite: CSCI 1730. Instructor permission required.

CSCI 2750. Topics in Parallel and Distributed Computing.
CSCI 2750 is a graduate seminar that will consider an advanced topic (to be determined) in distributed computing. May be repeated for credit.

CSCI 2820. Medical Bioinformatics.
Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required.

CSCI 2890. Comprehensive Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CSCI 2950C. Topics in Computational Biology.
This course will investigate active and emerging research areas in computational biology. Topics include cancer genomics; genome rearrangements and assembly; and protein and regulatory interaction networks. The course will be a mixture of lectures and student presentations of recent conference and journal papers.

CSCI 2950D. Sensor Data Management.
Sensor networks combine sensing, computing, actuation, and communication in a single infrastructure that allows us to observe and respond to phenomena in the physical and cyber world. The sensors range from tiny "smart dusts" to dime-sized RFID tags and large-scale weather sensors. This course will cover the state-of-the-art in designing and building sensor networks, focusing on issues that revolve around data and resource management. No prerequisites.

CSCI 2950E. Stochastic Optimization.
This advanced graduate course/seminar will focus on optimization under uncertainty, or optimization problems where some of the constrains include random (stochastic) components. Most practical optimization problems are stochastic (subject to future market conditions, weather, faults, etc.), and there has been substantial research (both theoretical and experimental) in efficient solution for such problems. We’ll read and discuss some of the recent works in this area.

CSCI 2950F. Implementing Web-Based Software Systems.

CSCI 2950G. Large-Scale Networked Systems.
Explores widely-distributed systems that take advantage of resources throughout the Internet. The systems leverage their large size and geographic diversity to provide bandwidth scalability, rapid responses, fault-tolerance, high-availability and diverse data collection. Topics include overlay networks, peer-to-peer systems, content distribution networks, distributed file systems and wide-scale measurement systems.

CSCI 2950H. Advanced Cryptography.
CSCI 2950L. Computational Models of the Neocortex.
This course addresses the problem of modeling the perceptual neocortex using probabilistic graphical models, including Bayesian and Markov networks, and extensions to model time and change such as hidden Markov models and dynamic Bayesian networks. The emphasis is on problems of learning, inference, and attention. Sources include the literature in computational and cognitive neuroscience, machine learning, and other fields that bear on how biological and engineered systems make sense of the world. Prerequisites: basic probability theory, algorithms and statistics.

In this graduate seminar we will learn about models of human cognition and perception, and explore potential implications of the models on how computers and humans can interact effectively when performing scientific analyses. Participants will be responsible for reading assigned materials, taking turns guiding discussions of the readings, and preparing a final paper and presentation. It is recommended that participants have some background in at least one of the areas of study.

CSCI 2950K. Special Topics in Computational Linguistics.
Every year will cover a different topic in computational linguistics, from a statistical point of view, including parsing, machine translation, conference, summarization, etc. Prerequisites: CSCI 1460 or permission of the instructor.

CSCI 2950M. Computer Science, Algorithms and Economics.
Course investigates the interplay of economic theory and computer science. It is suitable for advanced senior undergraduates and for graduate students. We will study topics such as: algorithms for selfish routing; competitive combinatorial auctions; Multicast cost sharing and cooperative games; graphical models for games; and related topics. This course will be organized around the presentation of recent research papers. Prerequisite: CSCI 1570 or equivalent.

CSCI 2950N. Special Topics in Autonomous Robotics.
No description available.

CSCI 2950O. Topics in Brain-Computer Interfaces.
Introduces the mathematical and computational foundations of brain-computer interfaces. Statistical learning, Bayesian inference, dimensionality reduction, information theory, and other topics are presented in the context of brain interfaces based on neural implants and EEG recordings. Prerequisites: Basic knowledge of probability, statistics and linear algebra (e.g., CSCI 1550, APMA 1650, APMA 1690, or APMA 2640). Enrollment limited to 20 students.

CSCI 2950P. Special Topics in Machine Learning.
This seminar course explores current research topics in statistical machine learning. Focus varies by year, and may include Bayesian nonparametrics; models for spatial, temporal, or structured data; and variational or Monte Carlo approximations. Course meetings combine lectures with presentation and discussion of classical and contemporary research papers. Students will apply some this material to a project, ideally drawn from their own research interests.

CSCI 2950Q. Topics in Computer Vision.
This course will cover current topics in computer vision by focusing on a single real problem in computer vision. Recent courses have focused on forensic video analysis of an unsolved murder and three-dimensional object recognition for a mobile robot. Readings from the literature are integrated with group projects to solve problems beyond the state of the art. Strong mathematical skills (probability, linear algebra, calculus) and previous exposure to computer vision (e.g. CSCI 1430) are essential.
CSCI 2950R. Special Topics in Advanced Algorithms.
We will study an advanced topic in the design and analysis of algorithms. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2950S. Advanced Practical Combinatorial Algorithms.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 2950T. Topics in Distributed Databases and Systems.
This course explores data and resource management issues that arise in the design, implementation, and deployment of distributed computing systems by covering the state of the art in research and industry. Typical topics include cloud computing and sensor networks. Recommended: CSCI 0320 or equivalent.

CSCI 2950U. Special Topics on Networking and Distributed Systems.
Explores current research topics in networking, distributed and operating systems. Specific topics may include wireless and sensor networking, Internet-scale distributed systems, cloud computing, as well as the core problems, concepts, and techniques underlying these systems. The course has two components: reading and discussion of current and classical research papers, and a research project related to the topic but ideally drawn from students' own research interests. This is a graduate-level course, undergrads can join with the consent of the instructor.

CSCI 2950W. Online Algorithms.
Decisions must often be made before the entire data is available. Online algorithms solve problems in which commitments must be made as the data is arriving. Choosing which items to evict from a cache before knowing future requests, which advertisers to consider for displaying ads alongside the result of a search, or which most representative data to store when computing statistics about a huge stream of information. We will discuss the worst-case model, which hinges against the worst possible future data, and some stochastic and game-theoretic models.

CSCI 2950X. Topics in Programming Languages and Systems.
Examines contemporary research topics in software construction from the perspectives of programming languages, software engineering and computer-aided verification. The primary goals are to understand which theory applies to which problems and to convert that theory into tools. Topics include security, modularity, and new paradigms in software composition. Prerequisite: CSCI 1730 or written permission of the instructor.

CSCI 2950Y. Theorem Proving.
This course explores computer-assisted theorem proving with the Coq Proof Assistant. The course will teach students to formally specify software and model mathematical theorems. We will then study techniques for mechanically proving theorems about these Coq. Prerequisites: CSCI 1730 or CSCI 0170 and permission of the instructor.

CSCI 2950Z. Robot Learning and Autonomy.
This seminar course will cover current research topics related to perceiving and acting in the real world. These topics will be pursued through independent reading, class discussion, and project implementations. Papers covered will be drawn from robotics, computer vision, animation, machine learning, and neuroscience. Special emphasis will be given to developing autonomous control from human performance. No prerequisites.

CSCI 2951A. Robots for Education.
This seminar will explore the potential for robotics to engage future generations of scientists and engineers, with a particular focus on broadening participation in computing across society. Academic papers describing existing models, systems, courses, and evaluation for teaching robotics at undergraduate and secondary levels will be covered through students presentations. A group project will be conducted to find viable and accessible "off-the-shelf" technology solutions suited to teaching robotics without requiring a technical background. Instructor permission required.

CSCI 2951B. Data-Driven Vision and Graphics.
Investigates current research topics in image-based graphics and vision. We will examine data sources, features, and algorithms for understanding and manipulating visual data. We will pay special attention to methods that use crowd-sourcing or Internet-derived data. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing and image-based rendering. These topics will be pursued through independent reading, class discussion and presentations, and a semester long research project. Strong mathematical skills and previous imaging (vision or computational photography) courses are essential.

CSCI 2951C. Autonomous Agents and Computational Market Design.
An important area of research in artificial intelligence is how to effectively automate decision making in time-critical, information-rich environments. Electronic markets are a prime example of such environments. In this course students will create their own simulated electronic market as well as autonomous agents that trade in their market simulation. Application domains will include supply chain management, the Dutch flower auctions, and ad auctions, such as those run by Google and Facebook. Enrollment limited to 40 graduate students.

CSCI 2951E. Topics in Computer Systems Security.
This course explores advanced topics and highlights current research in computer security from a systems perspective. Topics include vulnerabilities and defenses for automotive, computing, medical, and industrial control devices, intrusion detection, botnets, secure network protocols, web spam, tracking of web users, JavaScript sandboxing, attacks and defenses for web applications, and security and privacy issues in cloud computing. Research papers and industry reports will be presented and discussed. Also, hands-on experiments and system demonstrations will be performed. CSCI 1660 or equivalent background is essential. Enrollment limited to 12. Instructor permission required.

CSCI 2951F. Learning and Sequential Decision Making.
The course explores automated decision making from a computer-science perspective. It examines efficient algorithms, where they exist, for single agent and multiagent planning as well as approaches to learning near-optimal decisions from experience. Topics will include Markov decision processes, stochastic and repeated games, partially observable Markov decision processes, and reinforcement learning. Of particular interest will be issues of generalization, exploration, and representation. Each student will be expected to present a published research paper and will participate in a group programming project. Prerequisite: a graduate-level computer science course and some exposure to reinforcement learning from a previous computer-science class or seminar.

CSCI 2951N. Advanced Algorithms in Computational Biology.
This is a full-lecture, graduate course on algorithms and biomedical applications. The Foundations lectures are an introduction to the biological and medical genomics application areas. Each Algorithm section is devoted to an algorithmic method presented in rigorous depth, followed by an important open problem in the application area, together with the current most effective algorithmic solutions to the problem. Graduate students and advanced undergraduates in computational and mathematical sciences and engineering are welcome. Biological, life sciences and medical students and faculty are welcome as well and will be able to participate more in the applications areas.

CSCI 2951P. Human-Robot Interaction Seminar.
Covers current research in Human-Robot Interaction. Course topics span the mechanical, computational, and empirical aspects of developing robot technology to improve human productivity and quality of life. Course participation includes presentation and analysis of research publications in Human-Robot Interaction and implementation of a group project. Prerequisites: CSCI 1480, or CSCI 1430, or CSCI 1410, or instructor permission.

CSCI 2955. The Design and Analysis of Trading Agents.
The Dutch Flower Auctions (DFA) clear over 100,000 auctions per day, each lasting on average between 3 and 5 seconds! This semester, we’ll study the mechanism through which the DFA distribute 2/3 of the world’s flowers, focusing on both the sellers’ and buyers’ decision-making processes. More generally, we’ll research ways to automate and optimize decision-making in time-critical, information-rich environments, like the DFA. Undergraduate students require instructor permission, and should
Development Studies

Chair
Nitsan Chorev

Development Studies is an interdisciplinary concentration whose main mission is to provide students with the knowledge, critical perspectives and skills they need to engage with the issues and problems of national and international development, especially as they relate to the Global South. The concentration draws from a range of disciplines, but is particularly grounded in the social sciences: anthropology, sociology, political science, history, and economics. Concentrators combine courses that offer local and historical knowledge of specific areas of the developing world, with those that explore transnational dimensions of development. During the senior year, most concentrators complete a capstone experience tailored to their interests in some aspect of international development. Towards this end, they benefit from extensive faculty and peer support.

For additional information, please visit the program’s website: http://brown.edu/academics/development-studies/

Development Studies Concentration Requirements

Development Studies examines the interaction of social, economic and political development in contemporary societies and is therefore, necessarily an interdisciplinary enterprise. Development Studies concentrators develop the skills and knowledge best suited to their chosen geographical area of interest, emphasizing what is historically and culturally distinctive about the region and how its development reflects general processes of socio-economic change. While the concentration produces graduates with expertise in the study of development, most concentrators combine their course work with first-hand experience in the developing world. Course selection should balance analytic training with local and historical knowledge. Therefore, courses must be taken in at least three social science disciplines to achieve an interdisciplinary approach to these processes of change.

Requirements (Graduating Before 2016)

Concentrators in Development Studies must complete a total of 11 courses based on the following general guidelines. Any course may be substituted by a similar course approved by the Deputy Director.

**CORE**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DEVL 1000/1871D</td>
<td>Sophomore Seminar in Sociology of Development</td>
</tr>
<tr>
<td>DEVL 1500</td>
<td>Methods in Development Research</td>
</tr>
<tr>
<td>DEVL 1980</td>
<td>Thesis Writing in Development Studies</td>
</tr>
<tr>
<td>ECON 0510</td>
<td>Development and the International Economy</td>
</tr>
</tbody>
</table>

**Disciplinary Courses**

The courses must focus on different regions. Substitutions approved by the Deputy Director.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 1229</td>
<td>Democracy and Difference: Political Anthropology, Citizenship and Multiculturalism</td>
</tr>
<tr>
<td>ANTH 1310</td>
<td>International Health: Anthropological Perspectives</td>
</tr>
<tr>
<td>ANTH 1320</td>
<td>Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress</td>
</tr>
<tr>
<td>ECON 1210</td>
<td>Intermediate Macroeconomics</td>
</tr>
<tr>
<td>ECON 1500</td>
<td>Current Global Macroeconomic Challenges</td>
</tr>
<tr>

<td>SOC 1600</td>
<td>Comparative Development</td>
</tr>
<tr>
<td>SOC 1620</td>
<td>Globalization and Social Conflict</td>
</tr>
</tbody>
</table>

**Advanced Seminar**

An advanced senior seminar at the 1800-level or above, and related to development. If the course does not focus on the developing world, students may write a paper that expounds a linkage with development.

For example:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMAN 1970G</td>
<td>International Perspectives on NGOs, Public Health, and Health Care Inequalities</td>
</tr>
</tbody>
</table>

**Elective Courses**

At least TWO of the three electives must focus on different regions of the developing world. Students should choose from the list of pre-approved electives, with substitutions approved by the Program Advisor.

For example:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AFRI 1020D</td>
<td>Race, Rights, Rebellion</td>
</tr>
<tr>
<td>ENVS 1355</td>
<td>Environmental Issues in Development Economics</td>
</tr>
<tr>
<td>HIST 1620</td>
<td>Colonial Latin America</td>
</tr>
</tbody>
</table>

**Language**

Advanced competency (600 level) or above.

**Senior Capstone**

DEVL 1990 | Senior Thesis Preparation

Students may complete a conventional senior thesis; a group project (would not qualify for honors); or a multimedia project. Must incorporate language skills.

Total Credits: 11

Since study abroad is a potentially important part of the concentration, the possibility of spending part or all of the junior year in a developing world country should be discussed with concentration advisors and the Office of International Programs at the earliest possible time.
Requirements (Class of 2016 +)

10 Courses + Language + Capstone

CORE

All core courses must be taken prior to senior year
Choose TWO from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1620</td>
<td>Globalization and Social Conflict</td>
</tr>
<tr>
<td>POLS 1240</td>
<td>Politics, Markets and States in Developing Countries</td>
</tr>
<tr>
<td>ANTH 0110</td>
<td>Inequality and Development and Health, Humanitarianism and Human Rights</td>
</tr>
</tbody>
</table>

Seminar in Sociology of Development (Pre-requisites: sophomore or junior standing, and prior completion of SOC 1620, POLS 1240, or ANTH 0110)

DEVL 1000/ SOC 1871D (SOC 1871D)

Development Economics (ECON 0510 for students with little economics background, 1510 for students with strong economics background or economics double concentrators)  
ECON 0510  Development and the International Economy  
or ECON 1510 Economic Development

Research Methods and Design (Junior Year)

DEVL 1500  Methods in Development Research

Regional Courses

Two courses that focus on the same region of the developing world. Should complement the student’s foreign language.

Elective Courses

Three courses chosen from a list of pre-approved electives.

Foreign Language

Advanced competency (600 level) or above.

Senior Capstone

a. Thesis option: DEVL 1980 (fall senior year) and DEVL 1990 (spring senior year), or  
b. Capstone seminar option: approved senior seminar in Development Studies, with seminar-length paper requirement.

Courses

Interested students must register for ECON 0510.

Interested students must register for SOC 1871D.

DEVL 1020. Comparative Development (SOC 1600).
Interested students must register for SOC 1600.

DEVL 1100. Economic Development (ECON 1510).
Interested students must register for ECON 1510.

DEVL 1130. Explaining China’s Rise: Development and Accumulation in Contemporary China (SOC 1870P).
Interested students must register for SOC 1870P.

DEVL 1500. Methods in Development Research.
An introduction to the various techniques of research in Development Studies, with a focus on qualitative and field methods. Open to all Development Studies concentrators.

DEVL 1600. Tools for Development: From Theory to Practice.
Course gives students a platform to define their roles in the field of development, through hands-on skills building, case studies, and conversations with development practitioners and guest lecturers. This course will prepare students to volunteer for small, grassroots development organizations abroad or in the U.S. in a summer experience following the course. Throughout the semester, students will prepare for their summer experiences by working with their host organizations to design their role descriptions, planning their summer travel and living arrangements, gaining appropriate cultural competency, etc. Prerequisite: DEVL 1000 or SOC 1871D (may be taken concurrently). Enrollment limited to 15 Development Studies concentrators. Instructor permission required.

DEVL 1801. Participatory Development.
This core Development Studies seminar will provide students with the opportunity to think critically about power relations within various contexts of development; more specifically, in relation to the condition of how development projects work in practice. The course will take a multilevel approach to the analysis of developmental interactions. We’ll look at the power relations between the global south and the global north. We will examine crucial issues having to do with local communities, gender, the state/citizen paradigm and interaction between NGOs and communities. We will connect PD to other concepts, such as empowerment, civic engagement and inequality. WRIT LILE

An integrative seminar designed for concentrators working on senior theses. Others with comparable backgrounds may enroll with written permission. Begins with a review of theoretical and methodological literature on development studies. Written and oral presentations of thesis research will be the central focus of the latter part of the course. Reserved for Development Studies seniors. WRIT

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Reserved for Development Studies seniors.

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

DEVL 2010. Theory and Research in Development II.
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

DEVL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

DEVL XLIST. Courses of Interest to Concentrators in Development Studies.

Lefschetz Center for Dynamical Systems

The Lefschetz Center for Dynamical Systems (LIDS) was established by Solomon Lefschetz and J. P. LaSalle at Brown University in the fall of 1964 to carry out a program of basic research and advanced study in the theory and applications of differential equations, dynamical systems, stochastic processes and systems theory. Within its areas, LIDS is one of the leading research centers in the world. Areas of application include developmental biology, traffic flow prediction, data assimilation for oceanic fluid flow, nonlinear optics, and pattern formation and dynamics in chemical and physical systems.

Current members of the center serve on the faculties of the Division of Applied Mathematics and the Department of Mathematics. The center
attracts distinguished visiting scientists and promising young scientists from the United States and abroad.

Members of LCDS have been supported in their research efforts by the Air Force Office of Scientific Research, the United States Army Research Office, the Office of Naval Research, the Department of Energy, the National Science Foundation and NASA.

The center was named in honor of Solomon Lefschetz (1884–1972), one of the outstanding mathematicians of this century, in August, 1974. For additional information please visit the center’s website at: http://www.dam.brown.edu/lcds/.

### Early Cultures

The Program in Early Cultures (until recently called the Program in Ancient Studies) was founded in the late 1970s, when faculty in various academic units sought new ways to foster collaboration and promote the study of ancient civilizations among Brown’s students. It is a Program of rich collaboration, critical exploration, and truly interdisciplinary scholarship that seeks to bring together all those at Brown (faculty, graduate students, undergraduates, and staff) who are interested in the cultures, religions, and histories of ancient civilizations. Geographically, the “ancient world” represented at Brown comprises early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds as well as the Pre-Columbian Mesoamerican civilizations.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Early_Cultures/

#### Early Cultures Concentration Requirements

The Program in Early Cultures is an interdisciplinary concentration that integrates the cultures, religions, and histories of ancient civilizations. Geographically, the “ancient world” includes early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds, and the Pre-Columbian Mesoamerican civilizations. Students in Early Cultures gain in-depth knowledge of the history, religions, languages, and literatures of two or more ancient civilizations. In consultation with a concentration advisor, students design their own areas of study. Examples of possible topics include: cultural contacts between Greece and Egypt/ West Asia; animal sacrifice in Greece and Israel; comparative legal studies: Israel, Hatti, and Mesopotamia; gender roles in Rome and Egypt; Wisdom literature in Egypt, Israel, and Mesopotamia; and the historiography of the exact sciences in India and Greece.

Faculty from a variety of academic units (Anthropology, Classics, Comparative Literature, Egyptology, History, History of Art and Architecture, the Joukowsky Institute for Archaeology and the Ancient World, Judaic Studies, Philosophy, Religious Studies) offer courses relevant to Early Cultures.

#### Concentration patterns:

1. Ancient History (standard and honors)
2. Ancient Religions (standard and honors)
3. Languages and Literatures of Greece, Rome, North Africa, pre-Islamic West and South Asia (honors only)

#### General Requirements

Each nonhonors concentrator will choose to focus on either ancient history or ancient religions and will complete the Concentrators Seminar (ERLY 1000) in both the junior and the senior years, and eight other courses, four in each of two civilizations, or eight in a variety of civilizations.

#### Honors Requirements:

1. Ancient History or Ancient Religions (total of up to 12 courses)
   a. The Concentrators Seminar (ERLY 1000) in both the junior and senior years

#### Courses

**ERLY 0300. Babylon: Myth and Reality (AWAS 0300).** Interested students must register for AWAS 0300.

**ERLY 0680. Judaism, Christianity, and the Bible (JUDS 0680).** Interested students must register for JUDS 0680.

**ERLY 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).** Interested students must register for CLAS 0990.

**ERLY 1000A. Writing History in the Ancient World.** The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history, investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations. Instructor permission required.

**ERLY 1000B. Geography, Ethnography, and Perceptions of the World in Antiquity.** Curious about the shape and limits of the earth and the variety of cultures, ancient Greeks and Romans explored and described the world, drew maps, and interpreted the customs of others in fascinating ways. We will discuss relevant texts (Homer, Herodotus, Strabo, Tacitus, etc., in translation) and compare the Graeco-Roman world with that of other ancient civilizations (China, Mesopotamia, Aztecs).

**ERLY 1000C. Epic and History in the Ancient and Medieval Worlds.** This seminar will focus on the question of preservation, transformation, and distortion of historical memory in epic poetry from various parts of the ancient (Mesopotamian, Hittite, Greek, and Roman) and medieval (German, French, Hispanic, and Slavic) worlds. Additional issues to be discussed include orality and literacy, cultural memory, and the social function of poetry in changing conditions. Texts in translation.

**ERLY 1000D. Highways and Byways in Antiquity.** No description available.

**ERLY 1000E. The Gift in Antiquity (RELS 1880A).** Interested students must register for RELS 1880A.
East Asian Studies Concentration Requirements

East Asian Studies is a multidisciplinary concentration designed for students wishing to attain reasonable fluency in Chinese, Japanese, or Korean with specialized exposure to selected East Asian subjects. It serves students with two types of interests: those who aim to pursue active professional careers related to the East Asian region; and those who want to pursue graduate study in the humanities or social sciences with particular emphasis on China, Japan, or Korea. Students in East Asian Studies will gain language proficiency and familiarity with East Asia through advanced courses in a variety of disciplines. Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters. The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean.

The Language Requirement

The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean. For the purposes of the concentration, proficiency is determined to be consistent with successful completion of the Department’s third-year course sequence in Chinese, Japanese, or Korean, or its equivalent. Native speakers of these languages may, for example, demonstrate competency such that language courses may be unnecessary. Department language instructors may also determine that course work completed at one of the language-intensive study abroad programs attended by our undergraduates is comparable to courses offered at Brown.

Note that we do not equate completion of third-year Chinese, Japanese, or Korean with fluency in these languages. Rather, we believe that students who have demonstrated the skills associated with third-year Chinese, Japanese, or Korean have acquired a foundational understanding of the languages’ grammar, vocabularies, and conversational patterns, such that they are able to make themselves understood in everyday situations, and to understand both spoken and written communication. For the purposes of the concentration, language courses through the third-year are treated as an accompanying requirement.

Language Prerequisites (demonstrating proficiency through the third-year or 0600 level in one of the three languages below)

East Asian Studies

Chair

Hye-Sook Wang

The 21st century has turned to Asia as a center of international trade, culture, and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vital, important corner of the world, whose civilizations reach back several millennia and whose cultural and economic ties extend throughout the globe. A vibrant community of teachers and undergraduates who work closely together in the spirit of free inquiry, the Department of East Asian Studies embodies Brown’s unique mission “to serve the community, the nation, and the world.”

The Department offers several tiers of instruction in Chinese, Japanese and Korean, with courses designed to accommodate students ranging from those who have never taken a class in the language before, to those hoping to hone their abilities at the highest levels. East Asian Studies also offers Brown students the opportunity to explore the visual, textual and religious cultures of East Asia through introductory and advanced courses on literature, film, pilgrimage and translation, among others.

For additional information, please visit the department’s website: http://www.brown.edu/academics/east-asian-studies/
Electives

The concentration requires that students complete a total of eight electives tied to their course of study, which may be defined in linguistic, chronological, thematic, or cultural terms. Students should choose their courses with the following requirements in mind:

- At least three of the eight electives must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement.
- At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration’s language requirement. A concentrator studying Korean, for example, would choose at least one course that focuses on China, Taiwan, or Japan.
- At least one of the eight elective courses must be an advanced research seminar, taken in the senior year.

As is common for interdisciplinary concentrations, a wide range of courses, including many taught by faculty in other departments, may be counted toward the concentration. These include courses offered by East Asian Studies faculty, faculty with courtesy appointments in the Department, and courses with a significant focus on East Asia offered in such disciplines as Archeology, Anthropology, Economics, International Relations, and others.

Advanced Research Seminars

At least one of the eight elective courses must be an advanced research seminar, taken in the senior year. The research seminar will normally provide students with the opportunity to develop a project or paper focusing on one or more of their areas of inquiry within the concentration. Students are strongly encouraged to find ways to incorporate the use of Chinese, Japanese or Korean language materials in their research and learning in these courses. Courses falling into this category include the East Asian Studies 150 series as well as designated seminars offered by faculty in such departments as History, Religious Studies, and Comparative Literature among others. The Department will provide a list of pre-approved advanced seminars every semester. Students wishing to add courses to that list must submit their requests in writing to the Director of Undergraduate Studies at the start of the semester.

Honors

East Asian Studies offers qualified students, in their senior year, the opportunity to undertake a sustained research and writing project that, ideally, will result not merely in a long term paper, but in a piece of original scholarship. To enroll in the Honors Program, the student must be a senior East Asian Studies concentrator, with at least a high B average in concentration courses. Candidates for Honors are required to have developed a competence in an East Asian language sufficient to allow them to use East Asia language materials in carrying out their research. Students must also successfully obtain the support of at least two faculty members who will agree to serve as primary and secondary advisors for the thesis. Prospective writers submit a thesis prospectus, brief bibliography, and completed application forms (with signatures), ordinarily late in the student’s six semester, to the Director of Undergraduate Studies, who provides the final permission to proceed. Synopses of successful thesis proposals will be distributed to Department faculty. Thesis writers enroll in advisor-specific sections of the thesis-writing course EAST 1300 (Fall) and EAST 1400 (Spring), meet regularly with their advisors over the course of both semesters, and submit final versions of their theses to the Department in mid-April. Advisors and students are required to provide updates of their progress to the Director of Undergraduate Studies at regular intervals.
The completed thesis is evaluated for Honors by the thesis director and by a second reader. In case of a difference of judgment between the two readers, a third opinion may be sought. The awarding of Honors in East Asian Studies will occur only if the Honors Thesis receives a final grade of A. If an A is not received, the student will still receive academic credit for EAST 1930-1940. Students are notified in mid-May whether the Department has recommended the awarding of Honors. Copies of readers’ comments are provided to the student.

All graduating concentrators will present the results of their senior theses in the department’s Senior Project Forum. The Forum will usually take place at the end of the spring semester, but may also occur at the end of the fall semester to accommodate mid-year graduates.

### Double Concentrations

Students who are interested in developing a double concentration, including East Asian Studies as one of the two concentrations, should bear in mind that normally no more than two courses may be double-counted toward satisfying the course requirements of either of the two concentration programs involved.

### Study Abroad

Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters during their undergraduate years. Course credits earned abroad are generally transferable to Brown. However, a maximum of three courses taken abroad, of genuine intellectual substance and significantly related to East Asian Studies, may be considered for concentration credit.

### Summary of requirements:

- Language study through the level of 0600 or the equivalent of Chinese, Japanese, or Korean
- Eight elective courses
  - At least three of the eight must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement
- At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration’s language requirement. A concentrator studying Korean, for example, would choose at least one course that focuses on China, Taiwan, or Japan.
- At least one of the eight must be an advanced research seminar, taken in the senior year.
- EAST 1930 - EAST 1940 (Thesis-writing course) for Honors candidates only

### Courses

#### Chinese

**CHIN 0100. Basic Chinese.**

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of course work in CHIN 0200 covers the entire year and is recorded as the final grade for both semesters.

**CHIN 0150. Advanced Beginning Chinese.**

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in CHIN 0250 covers the entire year and is recorded as the final grade for both semesters.

**CHIN 0200. Basic Chinese.**

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the second half of a year-long course. Students must have taken CHIN 0100 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0100. If CHIN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**CHIN 0250. Advanced Beginning Chinese.**

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the second half of a year-long course. Students must have taken CHIN 0150 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0150. If CHIN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**CHIN 0300. Intermediate Chinese.**

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

**CHIN 0400. Intermediate Chinese.**

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

**CHIN 0500. Advanced Modern Chinese I.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0250 or CHIN 0400 or permission of instructor.

**CHIN 0600. Advanced Modern Chinese II.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0500 or permission of instructor.

**CHIN 0700. Advanced Modern Chinese II.**

This course is designed to enhance the Chinese proficiency of those who have taken Advanced Modern Chinese I (CHIN 0600) or the equivalent. All four language skills are emphasized through selected authentic materials. At the end of the year, students should be able to express their ideas with sophistication and nuance. Drills on complex sentence patterns will be conducted when necessary. Prerequisite: CHIN 0600 or permission of instructor.

**CHIN 0800. Advanced Modern Chinese II.**

See Advanced Modern Chinese II (CHIN 0700) for course description. Prerequisite: CHIN 0700 or permission of instructor.

**CHIN 0910A. Academic Chinese I.**

This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Through reading and discussing literature, newspaper and magazine articles, and academic writings, students will gain a better understanding of traditional and modern China. Prerequisite: CHIN 0800 or permission of the instructor.

**CHIN 0910B. Introduction to Classical Chinese.**

This course provides the basics of Classical Chinese grammar, syntax, vocabulary, and word usage through the reading, analysis and translation of passages from several of the major works from Eastern Zhou to the Former Han (770 BCE to 9 CE). We will discuss these texts with reference to the history, culture, literature, and major debates of this period. The course will be conducted primarily in English, with some reference to
modern Chinese vocabulary, grammar, and idioms. Prerequisite: CHIN 0500, JAPN 0700 or permission of the instructor.

**CHIN 0910C. Introduction to Modern Chinese Prose**

Students will pursue their ability to appreciate and use various Chinese writing styles by reading and analyzing modern Chinese prose classics. Classes include lecture, discussion and group or individual presentations. By the end of the semester, students will be familiar with the development of modern Chinese prose, understand the language and meaning of each text, be comfortable with different writing styles and techniques, and have a deeper understanding of Chinese thought, society, and culture via the writers and their masterpieces. Conducted in Mandarin Chinese; designed for students with advanced language skills. Prerequisites: CHIN 0800 or the equivalent.

**CHIN 0920A. Advanced Reading and Writing in Chinese**

This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Masterpieces by statesmen, economists, historians, scientists, literary critics, and sociologists will be analyzed and discussed. Focus will be on the training of both analytical ability and writing skills. Prerequisite: CHIN 0800 or permission of the instructor.

**CHIN 0920B. Classical Chinese**

This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century CE. Prerequisite: CHIN 0910B. Instructor permission required.

**CHIN 0920C. The Changing Face of China: Advanced Reading in Chinese Media**

In order to develop advanced reading proficiency and formal oral and writing communication skills, students will listen to and read current news reports and commentaries from various Chinese media sources, such as TV broadcasts, newspapers, magazines, and websites. Through reading and discussion, students will gain a better understanding of a wide range of current issues in a rapidly changing China, including: economics, politics, education, and popular culture. General knowledge of Chinese newspapers, Chinese journalistic writing styles and basic vocabulary and grammatical structures used in the press will also be introduced throughout the course. Class format varies from lecture, discussion, and debate, to interviews and group or individual presentations. Prerequisites: CHIN0800 or the equivalent. Enrollment limited to 18.

**CHIN 0920D. Business Chinese**

Business Chinese focuses on practical language skills that are most useful in business interactions in Chinese-speaking communities. Classroom activities are largely based on authentic documents and correspondence as well as a textbook. Through intensive practice in the listening, speaking, reading and writing of the Chinese language for business purposes, this course aims at enhancing students’ linguistic knowledge in a business context. Classes are conducted in Chinese. Prerequisite: CHIN 0600 or instructor permission. Enrollment limited to 18.

**CHIN 1040. Modern Chinese Literature**

Introduces students to the most representative writers in 20th century China. Emphasizes textual and historical analyses. Major issues include Westernization, nationalism, revolution, class, gender, and literary innovations. Designated primarily as a literature course, rather than language class, and conducted entirely in Mandarin Chinese. Prerequisite: CHIN 0800. Instructor permission required.

**CHIN 1910L. Independent Study**

Reading materials for research in Chinese. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHIN 2450. Exchange Scholar Program**

**East Asian Studies**

**EAST 0040. Foundations of Chinese Religions (RELS 0040)**

Interested students must register for RELS 0040.

**EAST 0100. Introduction to Buddhism (RELS 0100)**

Interested students must register for RELS 0100.

**EAST 0160. Buried History, Hidden Wonders: Discovering East Asian Archaeology (ARCH 0160)**

Interested students must register for ARCH 0160.

This course is an introduction to Japanese culture and aesthetics as represented in pre-modern literature, drama, visual arts, tea practices, and martial arts. Recurring themes include Japanese attitudes toward the natural world; religious elements in traditional conceptions of beauty; and the function of ritual and mindfulness in artistic cultivation. The course is designed for students who have no previous exposure to Japanese studies at the college level; no prerequisites.

**EAST 0190. Japanese Religious Traditions (RELS 0190)**

Interested students must register for RELS 0190.

**EAST 0290E. Engaged Buddhism (RELS 0290E)**

Interested students must register for RELS 0290E.

**EAST 0410. Introduction to East Asian Civilization: China (HIST 0410)**

Interested students must register for HIST 0410.

**EAST 0420. Introduction to East Asian Civilization: Japan (HIST 0420)**

Interested students must register for HIST 0420.

**EAST 0610A. The Far Side of the Old World: Perspectives on Chinese Culture (COLT 0610A)**

Interested students must register for COLT 0610A.

**EAST 0710U. Leaves of Words: A Survey of Japanese Literature (COLT 0710U)**

Interested students must register for COLT 0710U.

**EAST 0910D. Two Virgins in the Attic: Advanced Japanese Readings in Canonical and Popular Literature (JAPN0910D)**

Interested students must register for JAPN 0910D.

**EAST 0950A. Turning Japanese: Constructing Nation, Race and Culture in Modern Japan**

This first year seminar focuses on Japan’s experiences with historical processes and concepts which have transformed the modern world. These include the creation of the nation as the fundamental structure for social and political organization, as well as the evolution and implications of beliefs and practices associated with race, culture and tradition. Participants will work with primary sources and scholarly analysis from diverse disciplinary perspectives. Enrollment limited to 20 first year students. FYS WRIT

**EAST 0950B. The Floating World**

An exploration of selected literary, artistic, and religious works with an eye to understanding Japanese culture and thought of the early modern period (1600-1868). Materials include merchant tracts, samurai codes, Buddhist sermons, Confucian disquisitions, woodblock prints, drama, and fiction. No prerequisites. Enrollment limited to 20 first year students. FYS

**EAST 0950C. Reading China: Texts and Contexts**

An introduction to Chinese lit., focusing on its translation and circulation outside of China from the 17th c. to the present. A variety of texts are examined, considering the various ways translation shapes Western conceptions of China. Begins by discussing how Chinese lit. has been construed as particularly difficult to translate, explores ways in which the translation and circulation of early Chinese classics was animated by interests in ancient Chinese wisdom, and considers the recent emergence of a global notion of Chinese literature and culture. Concludes by comparing histories: translations of Chinese drama into European languages and their adaptation within China. Enrollment limited to 20 first year students. FYS

**EAST 0971C. China in the Literature of Travel (HIST 0971C)**

Interested students must register for HIST 0971C.

**EAST 0980A. Taiwan: Crossroads of World History (HIST 0980A)**

Interested students must register for HIST 0980A.
EAST 1010. From Basho to Banana: Four Centuries of Japanese Literature

This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them—Edo merchant culture, modernism, the avant-garde, mass culture and postmodernism, among others. Writers covered will include Ibara Saikaku, Jippensha Iku, Higuchi Ichiro, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites.

EAST 1012. Expanding the Canon: A Survey of 20th Century Japanese Literature

An introduction to major and minor works of Japanese literature produced during the Japanese Empire as well as in post-WWII Japan. Covered writers include canonical novelists such as Tanizaki Junichiro, Kawabata Yasunari, and Oe Kenzaburo, as well as writers lesser known outside of Japan today; including women, queers, revolutionary and colonial/ resident Koreans. DPLL LILE

EAST 1050. The Chinese Novel

The purpose of this course is to help us see how the Chinese novel took shape from popular sources, such as storytelling and drama, how the novel drew on history as well as legend, and how its authors and editors express a distinct world view. The class will cover the "masterworks" of the Chinese novel. Through intensive reading, students can explore notions of the hero and heroism, moral action and, more broadly, history and literature from a comparative perspective. All readings are in English translation. Limited to 20 freshmen and sophomores, or by instructor permission.

EAST 1070. China Modern: An Introduction to the Literature of Twentieth-Century China

A general introduction to modern and contemporary Chinese literature from the May Fourth Movement to contemporary Taiwan and the People's Republic of China. Emphasizes reading of literary works in relation to topics such as cultural tradition, modernity, nationalism, revolution, class, gender, region, cultural commodification, and literary innovations. Readings in English. No previous knowledge of Chinese required. LILE

EAST 1100. Korean Culture and Film

This course aims to introduce and explore various aspects of Korean history, culture and society. Students are expected to develop a comprehensive understanding of Korean culture by examining contemporary films that pertain to issues such as national identity, history, international relations, religion, Korean life style, and family life. Enrollment limited to 20.

EAST 1120K. Skeptical Traditions East and West (CLAS 1120K)

Interested students must register for CLAS 1120K.

EAST 1170. Women's Literature in Japan and Korea

This course focuses on Japanese and Korean women's literature from the late medieval through early modern times. Emphasis is on the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.

EAST 1140N. Lost in Translation: The Adaptation of Literature to Film in Japan (COLT 1410N)

Interested students must register for COLT 1410N.

EAST 1141A. Classical Daoist Thought (RELS 1415A)

EAST 11420. The Confucian Mind

This course explores the Neo-Confucian tradition, a pervasive influence in the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.

EAST 1430. Classics of East Asian Buddhism (RELS 1430)

Interested students must register for RELS 1430.

EAST 1430C. Classical Japanese Poetry (COLT 1430C)

Interested students must register for COLT 1430C.

EAST 1430T. Leaves of Words: Japanese Poetry and Poetics (COLT 1430T)

Interested students must register for COLT 1430T.

EAST 1440. Themes in Japanese Buddhism: Original Enlightenment (RELS 1440)

Interested students must register for RELS 1440.

EAST 1500. Returnees in China's Modernization

This course examines the impact on contemporary China of returnees, people who having left China to study abroad have now returned home and become reintegrated into society. Focusing on a series of in-depth studies of returnees who have carved out professional identities in the commercial world, the state, and civil society. The returnee experience will be examined from 2 angles: the manner by which contemporary returnees negotiate Chinese tradition and Western learning, and the differences between this cohort’s experience and that of previous generations of returnees in China’s now century and a half long period of modernization.

EAST 1510. Chinese: A History of the Language

This course traces the historical evolution of modern Chinese, commonly known as Mandarin. We will examine the uniqueness of Chinese characters, and explore their relationship to other features of the language, including word formation, phonology, grammar, and dialects. The goal will
be to understand the manner by which the written script has become so central to the development of Chinese civilization.

EAST 1510A. China's Late Empires (HIST 1510A). Interested students must register for HIST 1510A.

EAST 1520B. Twentieth Century China (HIST 1520B). Interested students must register for HIST 1520B.

EAST 1530. Modern Korea (HIST 1530). Interested students must register for HIST 1530.

EAST 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540). Interested students must register for ANTH 1540.

EAST 1811L. Travel and Tourism through the Ages (COLT 1811L). Interested students must register for COLT 1811L.

EAST 1880A. Lao Tzu and Huai-nan Tzu. This seminar will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the Huai-nan Tzu and will discuss the historical and philosophical origins of Lao Tzu’s Tao te ching, heretofore acknowledged as the foundational text of the Taoist tradition.

EAST 1880C. Zen Meditation in China, Korea, and Japan. An intensive study of the origin and development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Both kōan and silent illumination styles will be studied in depth. Weekly seminars will study representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students MUST register for the lecture section and a lab. Prerequisites: RELS 0100, RELS 0500, UNIV 0540; or instructor’s permission.

EAST 1880D. Early Daoist Syncretism: Zhuang Zi and Huainan Zi. The final phase of the classical Daoist tradition has been called “syncretist” by Graham, "Huang-Lao” by Lin. It is the version of Daoism carried into the Han dynasty and the one that transmitted the tradition’s earlier works. Casting a broad net we will examine a variety of works from this critical phase including the “Techniques of the Mind” texts in the Guanzi collection, the so-called "Huang-Lao” silk manuscripts from the Han tomb at Mawangdui, certain chapters of the Lushi chunqin, and selections from the Zhuangzi and Huainanzi. We will examine the ways in which cosmology, self-cultivation, and political thought coalesce in these works.

EAST 1910. Independent Study. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1930. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1940. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1950B. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives. This seminar course is designed to critically re-evaluate (re)presentations of Chinese women, gender, and feminism in historical, literary, and academic discourses. It examines a diverse body of texts produced through different historical periods and in different geopolitical locations. It emphasizes gender as both a historical construct(s) among competing discourses and as a material process of individual embodiment and disembodiment. The goal of the course is to help advanced students understand Chinese history from a distinctly gendered perspective, to recognize women’s roles in history and writing, and to develop a reflective, cross-cultural approach to gender, politics, and the self.

EAST 1950D. Crime, Justice and Punishment in Modern Japan. This seminar explores the practices and ideologies associated with the pursuit of justice, state-sanctioned punishment for wrongdoing, and social order in modern Japan (late 19th century to the present). In order to bring these practices and ideologies to light, we will examine precedent-setting criminal and civil trials within their historical contexts, and draw as well on both popular culture (film and fiction) and the rich scholarship on law and legal history in Japan. The course is intended for advanced undergraduates comfortable with the seminar format and workload. There are no specific prerequisites for admission to the seminar, but all things being equal, preference will be given to students with a background in the study of Japan and/or Japanese history. Enrollment limited to 20. Instructor permission required.

EAST 1950F. The Karma of Words. This course is an opportunity for students to further their understanding of East Asian Buddhist attitudes and values by investigating characteristic themes in literature as a whole, rather than by studying formal scriptures and doctrinal tracts. Participants will explore tensions between the religious and poetic impulses and learn to recognize Buddhist symbols in Chinese and Japanese poetry, fiction and plays. Recommended: a course in Asian religions. WRIT

EAST 1950G. Market Economy, Popular Culture, and Mass Media in Contemporary China. Course focuses on mainland Chinese cultural and media production since the mid 1980’s, when China began transforming itself culturally and economically into a capitalist society with socialist characteristics. Traditional values, socialist legacy, commercial forces, and globalization have all played significant roles in the ongoing transformation. The goal of the course is to examine the complex interactions among diverse historical forces in a rapidly changing China. Course taught in Mandarin Chinese.

EAST 1950H. Translating Japanese: Short Fiction, Poetry, Film and Manga. This seminar workshop discusses a broad range of narrative arts produced over the past 100 years in Japan, and practices the art of translating them. Drawing rigor from the field of linguistics and translation theory, we shall make central to our effort of analyzing Japanese cultural productions an attentiveness to the historicity of language and a self-consciousness of our roles as cultural interpreters. While the course will focus on mid-20th century Japanese short fiction, we will also work on poetry, music, manga, animation, and film, depending on the interests of enrolled students. Pre-requisites: JAPN 0600 or equivalent. Instructor permission required.

EAST 1950I. Revolution and Culture, East Asia and Beyond. This seminar investigates cultural practices enacted with the aim of social change. Topics include the Soviet avant-garde, race and the American cultural front, gender and proletarian literature in Japan and colonial Korea, as well as issues of propaganda and struggle in the DPRK and China. Instructor permission required.

EAST 1950J. The Chinese Story, Its Authors and Readers. A study of the Chinese story in its social and historical context. The seminar will survey the broad story stereotypes and consider their earlier sources in the classical tale, storytelling, drama, and ritual. All readings are in English translation.

EAST 1950K. Losing Yourself in Love in Pre-Modern Chinese Poetry, Fiction and Drama. A seminar focused on larger-than-life loves in Chinese drama, fiction, and poetry. The course will explore how passion, feeling, and subjectivity was increasingly viewed as essential to human nature and society from the 15th century onward.

EAST 1950N. The Love Letter, Fiction and Desire. A study of the art of the love letter in China of the 16th to 18th centuries. The circulation of letter-writing manuals fueled the rise of letter fiction in China, as it did in Europe in the same period. The seminar will explore how desire serves as a motive for writing to someone far away, an element of the plot, and an end in itself, in comparative and theoretical perspectives. All readings are in English. Enrollment limited to 20.
EAST 1950O. The Art of Dissent.
This seminar investigates the relationship between activism and art in early modern and 20th century Japan and Korea. Historical topics to be discussed in relation to works of fiction, biography, poetry, film and graphic art include the Freedom and People’s Rights Movement, Japanese anarchism, pre-WWI communism, feminism, the Kwangju Uprising and the Minjung Munhak Movement.

EAST 1950P. Attachment to Objects in Chinese Literature.
A seminar investigating interactions between objects and literary composition in China of the 12th to 16th century, exploring 3 core issues: 1st, what do writers about objects reveal about notions of literary art and artifice? 2nd, in what ways are material artifacts endowed with aesthetic and personal meaning? 3rd, what literary and extra-literary factors shaped exchanges of poetry and gift-giving as linked forms of social intercourse? Readings in English translation. Instructor permission required.

A survey of the evolution of major forms of Chinese lyric poetry beginning with the Shijing (Book of Songs), the breakthrough to 5-character verse in the Han Dynasty, landscape (shanshui) and field and garden (tianyuan) poetry of the 6 Dynasties, and the flowering of the shi form during the Tang Dynasty. Readings will be in Chinese, discussions in English. Previous study of classical Chinese or permission of the instructor required.

EAST 1950S. The History, Philosophy, and Practice of Rinzai Zen Buddhism.
Follows origins of Chan Buddhism in China from the legend of Bodhidharma through the Five Houses of Chan and its great flourishing during the Song dynasty to its arrival and developments in Japan and eventual transplanting to the West. Scope includes Daoist foundations, the Buddha-Daoshi essays of Seng Zhao, Bodhidharma, the East Mountain Chan of Daoxin and Hongren, Huineng and Shenhui, Huangbo, Linji, Dahui and the development of koan, Kanzen Egan in Japan, Ikkuy, Bankei, Hakuin, and Sasaki Joshu. Practices of each of these teachers will be studied in meditation labs. Prerequisites: coursework in Buddhism at Brown; permission of instructor. Enrollment limited to 20.

EAST 1950U. South Korean Cinema: From Golden Age to Korean Wave.
This seminar explores the cinema of South Korea, proceeding chronologically and thematically, interrogating the key problematics of gender and genre. We will think about cinema’s role—as a medium for visual storytelling and as a site for producing cultural norms and values—in assessing the consequences of historical events and in helping to construct official histories. Across films from Korean cinema’s “golden age” (1950's and 60’), to post-authoritarian realist cinema to the contemporary era of globalized, transnational genre films, we will map the questions, themes, and debates on the formation and effects of South Korea’s cinematic imaginary of nation. Enrollment limited to 20 juniors and seniors.

EAST 1950V. Contemporary Film and Media Cultures in East Asia.
This course visits postwar film and television cultures in East Asia as a part of a larger narrative of contemporary media production and consumption. How can thinking about films’ relationship with other media enhance our understanding of contemporary popular culture? How does it help us re-imagine narrative issues such as textuality, production, and representation? How does understanding the rich contexts of audience interaction with media affect our approaches to reading and meaning-making? To explore these questions, we will consider postwar Chinese and Japanese films, popular fiction, literature, television dramas, as well as manga/anime.

EAST 1950X. Queer Japan: Culture, History and Sexuality.
This seminar investigates cultural practices enacted by Japanese gays and lesbians, or otherwise related to same-sex attraction. How have sexual identities traditionally been constructed in Japan, and how has the modern period transformed them? How has same-sex sexuality become figured in the Japanese art, literature and popular culture of the 20th century; and how have the forces of a global LGBT culture interacted with the specific experiences of a same-sex community in Japan? This class explores questions about queer history, writing and cultural practice by looking at particular moments in the Japanese past and present.

“Chinese opera” denotes several hundred regional variations of a performance art form that comprises sung arias with musical accompaniment, spoken dialogue, stylized movements, and elaborate costumes and make-up. Originating in the elite leisure spaces of early modern China, the best known versions of this art form are Peking opera and Kun opera. We will examine drama texts from the Yuan dynasty to the present, learn about the aesthetics and politics of these textual and performance traditions, and consider theater culture within its social, economic, and historical contexts. Prerequisite: Previous study of literature or theater at the college level. WRIT

Interested students must register for HIST 1970R.

Interested students must register for HIST 1972Z.

Interested students must register for HIST 1973J.

Interested students must register for HIST 1973M.

EAST 1990. Senior Reading and Research: Selected Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 2450. Exchange Scholar Program.

EAST XLIST. Courses of Interest to Concentrators.

Anthropology
ANTH 1111 Anthropology of China

Religious Studies
RELS 0500 The Theory and Practice of Buddhist Meditation

Spring 2015
East Asian Studies is a highly interdisciplinary concentration. The following courses in other departments can be taken for concentration credit. Please check the listing of the appropriate department for the time and location of each course.

Religious Studies
RELS 1410 Early Daoist Philosophy: Zhuangzi

Japanese

JAPN 0100. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. No prerequisites. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0200 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0250 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.
JAPN 0200. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. This is the second half of a year-long course. Students must have taken JAPN 0100 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0100. If JAPN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana and some Kanji. Placement test required. This is the second half of a year-long course. Students must have taken JAPN 0150 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0150. If JAPN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Further practice of patterns and structures of the language. Readings are introduced on aspects of Japanese culture and society to develop reading and writing skills, enhance vocabulary, and provide points of departure for conversation in Japanese. Prerequisite: JAPN 0200 or equivalent. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

See Intermediate Japanese (JAPN 0300) for course description. Prerequisite: JAPN 0300 or equivalent. Enrollment limited to 18.

JAPN 0500. Advanced Japanese I.
Continued practice in reading, writing, and speaking. Emphasizes the development of reading proficiency and speaking in cultural contexts. Students read actual articles and selections from Japanese newspapers. Course includes translation, with writing and discussion in Japanese. Films and video tapes are shown as supplementary materials. Prerequisite: JAPN 0400 or equivalent.

JAPN 0600. Advanced Japanese I.
See Advanced Japanese I (JAPN 0500) for course description.

JAPN 0700. Advanced Japanese II.
Reading of articles from Japan’s press with discussion in Japanese. Focuses on explanations and drills on the fine points in grammar and vocabulary as well as on the practice of writing in various styles. Movies and video tapes are used as supplementary materials. Prerequisite: JAPN 0600 or equivalent.

JAPN 0800. Advanced Japanese II.
See Advanced Japanese II (JAPN 0700) for course description.

JAPN 0910A. Classical Japanese.
This is an introductory course to pre-modern Japanese. It will explore the lifestyle and philosophy of samurai in 17th century Japan through reading the book, *Gorin no Sho*. The book comprises Miyamoto Musashi’s thoughts on swordplay, winning, and mind training. The course includes reading background information in English and viewing films and dramas. Enrollment limited to 20.

The goal of this course is to develop the ability to use Japanese source materials for research in social sciences. Course covers lifestyles in two contrasting cities, Tokyo and Kyoto. Topics include topography, environmental issues, houses, urban life-styles, and natural habitation. We will ask questions: why houses are so compact in cities; why crows and boars pick on garbage, etc. Information sources are films, videos, and websites in addition to textbooks. Prerequisite: JAPN 0600 or equivalent. Enrollment limited to 20.

JAPN 0910C. Japanese Linguistics.
This course will provide a structural overview of the Japanese language. Students will learn how to develop skills for analyzing the language through looking at sounds, meaning, and grammar. Topics include linguistic analysis of various sentence structures that students often find difficult to use, learning to choose words and sentences in appropriate situations, looking at the relation between language and culture.

A traditional Japanese readings course with content both canonical and unconventional. It allows students with three years of Japanese to read from a diverse selection of 20th century Japanese novels, short stories and graphic novels. Our main focus will be on understanding the original Japanese, but some translation into English will be involved as well. In addition to selections from well-known modernists such as Natsume Soseki, Tanizaki Jun’ichi and Mishima Yukio, readings may also include works by Edogawa Rampo, Inagaki Taruho, Yoshiya Nobuko, Yamaji Ebine, Hoshi Shin’ichi, Murakami Ryu, and others to be determined by student interest. All readings in Japanese. Prerequisite: JAPN 0600 or instructor permission.

JAPN 0910E. Advanced Reading for Research.
This is an advanced reading course. Class activities include reading and translation of scholarly articles in the fields of students’ interests, and of selected writings in humanities and social sciences in general or in broad perspectives. Readings include literary essays, fiction and short stories, articles from major newspapers, weekly and monthly journals/magazines. Prerequisite JAPN0600 Advanced Japanese II. WRIT, LILE

JAPN 0920A. Business Japanese.
Designed to teach post-advanced level Japanese language, with the focus on effective oral and written communication in business situations, this course emphasizes vocabulary building in the areas of business and economics, use of formal expressions, business writing, and conversation and presentation skills, as well as familiarizing students with Japanese corporate culture, protocol, and interpersonal relationships. Prerequisite: JAPN 0700 or equivalent. Enrollment limited to 20. Instructor permission required.

JAPN 0920B. Modern Japanese Poetry.
This course is an introduction to modern Japanese poetry, which includes pre-war and post-war poetic forms. We will explore issues of modernity and identity as well as poet as through a close examination of several poems each week. We will work on translations of the poems as part of the exercise of reading. The course includes reading background information in English. No prerequisites required.

JAPN 1010. Readings in Contemporary Japanese Fiction.
Introduces contemporary short stories and novellas by award winning writers published after 2000. Authors include Yoko Ogawa, Natsuo Kirino, Jiro Asada, Bin Kono. We will analyze why the great many readers are drawn into these literary works through socio cultural background of urban communities. Prerequisites: JAPN0700 or instructor permission.

Introduces a linguistic analysis of Japanese language to attain an overview of structure and a foundation for understanding how grammar relates to various modes of communication. Topics include discourse analysis, pragmatics, communicative intention, communication strategies, and intercultural communication gaps. Linguistic data is drawn from films and fiction. Prerequisite: basic knowledge of Japanese grammar, vocabulary, and linguistics. Enrollment limited to 20. WRIT

JAPN 1910. Independent Study.
Reading materials for research in Japanese. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
Korean

KREA 0100. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. No prerequisite. Enrollment limited to 18. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in KREA 0200 covers the entire year and is recorded as the final grade for both semesters.

KREA 0200. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. Enrollment limited to 18. This is the second half of a year-long course. Students must have taken KREA 0100 to receive credit for this course. The final grade for this course will become the final grade for KREA 0100. If KREA 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

KREA 0300. Intermediate Korean.
An intermediate course in Korean designed to further communicative competence in spoken Korean and to provide additional reading practice in stylistically higher level materials that are progressively integrated into the given dialogues. Discussions on various aspects of Korean culture and society. Four classroom hours per week. Prerequisite: KREA 0200 or instructor permission.

See Intermediate Korean (KREA 0300) for course description. Prerequisite: KREA 0100-0200 or equivalent.

KREA 0500. Advanced Korean.
Aims to help students develop an advanced level of communicative competence, with special focus on enhancing their reading comprehension, essay writing, and discourse (discussion and presentation) skills. Authentic reading materials from a variety of sources will be used to introduce various topics and issues pertaining to Korean society and culture, thus students’ cultural understanding will also be enhanced. Prerequisite: KREA 0400 or equivalent or permission of instructor.

KREA 0600. Advanced Korean.
See Advanced Korean (KREA 0500) for course description. Prerequisite: KREA 0500 or equivalent or permission of instructor.

KREA 0910B. Media Korean.
Develop linguistic competence and deepen cultural understanding through exposure to a variety of media sources. Built on the Content-based Instruction model and Genre-based Approach. Discuss current Korean affairs and core issues of culture based on assigned materials. Develop reading and listening comprehension skills through pre-class activities, oral proficiency through in-class discussion and presentation, and writing proficiency through assigned essays writings, in addition to various integrative tasks. Tuesday classes will focus on comprehending the text and source materials, Thursday classes will focus on related tasks and activities. Enrollment limited to 20. Conducted entirely in Korean.

KREA 0920A. Korean Culture and Society.
Develops oral proficiency in Korean language through a variety of readings on Korean culture and society. By reading about and discussing important aspects and core issues of Korea, students enhance their speaking competence and cultural understanding. Prerequisites: KREA 0300 and 0400 or permission of instructor. Enrollment limited to: 15.

KREA 0920B. Business Korean.
For students who are interested in Korean culture in general and business culture in particular, and in improving their Korean language skills in a business context. The course not only focuses on business and economy-related words and expressions, but also on developing learners’ confidence in business writing, conversation and presentations in Korean. Enrollment limited to 15. Prerequisite: KREA 0400 or instructor’s permission.

KREA 1910. Independent Study.
Reading materials for research in Korean. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Economics

Chair
Louis Putterman

Economics is a social scientific discipline that both studies economic activity in its narrower sense and develops methodologies for studying decision-making in a broader set of domains. Economic activity narrowly construed is that subset of people’s activities primarily concerned with the production and consumption of goods and services, the allocation of resources, goods and asset markets, the money supply, and taxation. More broadly, economics provides a theory of rational choice that has been useful in fields ranging from the study of politics and healthcare to theoretical biology. In recent years, economists have been expanding their study of choice to also include the interaction of cognitive limitations, decision heuristics, and psychological and social influences with the rational aspects of choice.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Economics/

Economics Concentration Requirements

Economics is the study of how individuals, businesses, and governments allocate resources to satisfy their objectives. The study of economics helps students understand markets, firms, financial organizations, and public debate about economic policy, including taxation, government expenditure, trade, globalization, health, and welfare. The concentration in Economics prepares students for graduate study in fields such as business and law, for graduate study leading to teaching and research in economics, and can be a steppingstone to employment in business, finance, non-profit, and government organizations. Students may choose either the standard or the professional track.

Students are required to begin with ECON 0110, an introductory course that stresses the economic problems of our society, and the vocabulary and principles of economic analysis. Intermediate level courses in microeconomics (ECON 1130), macroeconomics (ECON 1210), and econometrics (ECON 1620) round out the list of foundation courses for the concentration. Economics students must also fulfill a calculus requirement. The economics department sponsors a number of concentration options. The most popular is the standard economics concentration, described below. Three additional concentration options are administered jointly with other departments and are described separately under their respective titles. They are the concentrations in applied mathematics–economics, in mathematical economics, and in computer science–economics. The first two are especially recommended for students interested in graduate study in economics.

The department offers many of the required courses in an interdepartmental concentration called Business, Entrepreneurship and Organizations (BEO). BEO is jointly run by the departments of economics and sociology, and the school of engineering. BEO has three possible “tracks,” of which the business economics track is most closely related to economics. Please contact the BEO administrator for more details, including information about advising in that concentration.
Standard Economics Concentration (through the Class of 2015)

Mathematics Course Requirements (select one of the following):  
- MATH 0060 Analytic Geometry and Calculus  
- MATH 0070 Calculus with Applications to Social Science  
- MATH 0090 Introductory Calculus, Part I

A higher-level math course.

Economics Course Requirements:
- ECON 0110 Principles of Economics  
- ECON 1110 Intermediate Microeconomics  
- or ECON 1130 Intermediate Microeconomics (Mathematical)  
- ECON 1210 Intermediate Macroeconomics  
- ECON 1620 Introduction to Econometrics  
- or ECON 1630 Econometrics I

at least five additional 1000-level Economics courses.  

Total Credits 10

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than MATH 0090, without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

Standard Economics Concentration (for students in the Class of 2016 and beyond)

Mathematics Course Requirements:  
- MATH 0100 Introductory Calculus, Part II  
- or a higher-level math course.

Economics Course Requirements:
- ECON 0110 Principles of Economics  
- ECON 1110 Intermediate Microeconomics  
- or ECON 1130 Intermediate Microeconomics (Mathematical)  
- ECON 1210 Intermediate Macroeconomics  
- ECON 1620 Introduction to Econometrics  
- or ECON 1630 Econometrics I

At least five additional 1000-level Economics courses.  

Total Credits 11

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than MATH 0100, without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

2 Note that ECON 1960 (thesis) and ECON 1940 do not count for concentration credit.

Honors

Students who wish to enroll in the honors program in economics should consult the department’s undergraduate guide (available on its web site) to obtain a complete description of the requirements. See the description of Capstone Projects there, as well. Courses taken to prepare an honors thesis are in addition to the regular concentration requirements.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following: Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance advanced economics track, which is intended to prepare students for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

Standard program for the A.B. degree (Advanced Economics track) - through the class of 2015:

Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

Course Requirements:
- Applied Math Requirements
  (a)  
  - APMA 0350 Methods of Applied Mathematics I, II  
  - APMA 0360 Methods of Applied Mathematics I, II

Select one of the following:
- APMA 0160 Introduction to Scientific Computing  
- CSCI 0040 Introduction to Scientific Computing and Problem Solving  
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170  Computer Science: An Integrated Introduction  
Select one of the following:  1
APMA 1200  Operations Research: Probabilistic Models  
APMA 1210  Operations Research: Deterministic Models  
APMA 1650  Statistical Inference I  
(b)  1
Select one of the following:  1
APMA 1200  Operations Research: Probabilistic Models  
APMA 1210  Operations Research: Deterministic Models  
APMA 1650  Statistical Inference I  
(b)  1
Select one of the following:  1
APMA 1200  Operations Research: Probabilistic Models  
APMA 1210  Operations Research: Deterministic Models  
APMA 1650  Statistical Inference I  
(b)  1
Select two of the following:  2
APMA 1200  Operations Research: Probabilistic Models  
APMA 1210  Operations Research: Deterministic Models  
APMA 1650  Statistical Inference I

---

### Economics Requirements:

**ECON 1130**  Intermediate Microeconomics (Mathematical)  3  1
**ECON 1210**  Intermediate Macroeconomics  1
**ECON 1630**  Econometrics I  1

Select one of the following:

**Economics Requirements:**
- ECON 1130 Intermediate Microeconomics (Mathematical) $^2$ 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Select two 1000-level courses from the "financial economics" group: $^3$ 2
- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select one 1000-level course from the "mathematical economics" group: $^3$ 1
- ECON 1170 Welfare Economics and Social Choice Theory
- ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II
- ECON 1650 Financial Econometrics
- ECON 1759 Data, Statistics, Finance
- ECON 1810 Economics and Psychology
- ECON 1820 Behavioral Economics
- ECON 1850 Theory of Economic Growth
- ECON 1860 The Theory of General Equilibrium
- ECON 1870 Game Theory and Applications to Economics

Total Credits 12

1 APMA 0330 and APMA 0340 may be substituted with advisor approval
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

**Standard program for the Sc.B. degree (Mathematical Finance track) - through the class of 2015:**

**Prerequisites:**
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

**Course requirements:**

**Applied Mathematics requirements:**

(a)
- APMA 0350 Methods of Applied Mathematics I, II $^2$ 2
- APMA 0360 and Methods of Applied Mathematics I, II $^1$ 1

Select one of the following:
- APMA 0160 Introduction to Scientific Computing
- CSCI 0040 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170 Computer Science: An Integrated Introduction
- APMA 1200 Operations Research: Probabilistic Models 1
- APMA 1650 Statistical Inference I 1

Select two of the following:
- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV
- APMA 1660 Statistical Inference II
- APMA 1670 Statistical Analysis of Time Series
- APMA 1680 Nonparametric Statistics
- APMA 1690 Computational Probability and Statistics
- APMA 1700 The Mathematics of Insurance
- APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
- APMA 1740 Recent Applications of Probability and Statistics
- MATH 1010 Analysis: Functions of One Variable

**Economics requirements:**
- ECON 1130 Intermediate Microeconomics (Mathematical) $^2$ 1
- ECON 1210 Intermediate Macroeconomics 1
- ECON 1630 Econometrics I 1

Select three 1000-level courses from the "financial economics" group: $^3$ 3
- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

Select two 1000-level courses from the "mathematical economics" group: $^3$ 2
- ECON 1650 Financial Econometrics
- ECON 1710 Investments I
- ECON 1720 Corporate Finance
- ECON 1750 Investments II
- ECON 1759 Data, Statistics, Finance
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research
- ECON 1770 Fixed Income Securities
- ECON 1780 Corporate Strategy
- ECON 1790 Corporate Governance and Management

1 APMA 0330 and APMA 0340 may be substituted with advisor approval
2 Or ECON 1110 with permission.
Standard Program for the A.B. degree
(Advanced Economics track) - class of 2016 and beyond:

Prerequisites:
- MATH 0100  Introductory Calculus, Part II
- MATH 0520  Linear Algebra

Course Requirements:

Applied Mathematics Requirements

(a)  \(^1\)
- APMA 0350  Methods of Applied Mathematics I, II
- & APMA 0360  and Methods of Applied Mathematics I, II  \(^2\)

Select one of the following:
- APMA 0160  Introduction to Scientific Computing (preferred)
- CSCI 0040  Introduction to Scientific Computing and Problem Solving (preferred)
- CSCI 0150  Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170  Computer Science: An Integrated Introduction

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1650  Statistical Inference I

(b)  \(^1\)

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1660  Statistical Inference II
- APMA 1670  Statistical Analysis of Time Series
- APMA 1680  Nonparametric Statistics
- APMA 1690  Computational Probability and Statistics
- APMA 1700  The Mathematics of Insurance
- APMA 1740  Recent Applications of Probability and Statistics
- MATH 1010  Analysis: Functions of One Variable

Economics Requirements:
- ECON 1130  Intermediate Microeconomics (Mathematical)  \(^3\)
- ECON 1210  Intermediate Macroeconomics
- ECON 1630  Econometrics I

Two 1000-level courses from the "mathematical-economics" group:  \(^4\)
- ECON 1170  Welfare Economics and Social Choice Theory
- ECON 1670  Game Theory and Applications to Economics

Total Credits 15

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

Standard Program for the Sc.B. degree
(Advanced Economics track) - class of 2016 and beyond:

Prerequisites:
- MATH 0100  Introductory Calculus, Part II
- MATH 0520  Linear Algebra

Course Requirements:

Applied Mathematics Requirements

(a)  \(^1\)
- APMA 0350  Methods of Applied Mathematics I, II
- & APMA 0360  and Methods of Applied Mathematics I, II  \(^2\)

Select one of the following:
- APMA 0160  Introduction to Scientific Computing (preferred)
- CSCI 0040  Introduction to Scientific Computing and Problem Solving (preferred)
- CSCI 0150  Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170  Computer Science: An Integrated Introduction

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1650  Statistical Inference I

(b)  \(^1\)

Select one of the following:
- APMA 1200  Operations Research: Probabilistic Models
- APMA 1210  Operations Research: Deterministic Models
- APMA 1660  Statistical Inference II
- APMA 1670  Statistical Analysis of Time Series
- APMA 1680  Nonparametric Statistics
- APMA 1690  Computational Probability and Statistics
- APMA 1700  The Mathematics of Insurance
- APMA 1740  Recent Applications of Probability and Statistics
- MATH 1010  Analysis: Functions of One Variable

Economics Requirements:
- ECON 1130  Intermediate Microeconomics (Mathematical)  \(^3\)
- ECON 1210  Intermediate Macroeconomics
- ECON 1630  Econometrics I

Two 1000-level courses from the "mathematical-economics" group:  \(^4\)
- ECON 1170  Welfare Economics and Social Choice Theory
- ECON 1670  Game Theory and Applications to Economics

Total Credits 13

1 No course may be used to simultaneously satisfy (a) and (b).
2 APMA 0330 and APMA 0340 may be substituted with advisor approval.
3 Or ECON 1110 with permission.
4 No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.
Select two of the following: 2

APMA 1200 Operations Research: Probabilistic Models
APMA 1210 Operations Research: Deterministic Models
APMA 1660 Statistical Inference II
APMA 1670 Statistical Analysis of Time Series
APMA 1680 Nonparametric Statistics
APMA 1690 Computational Probability and Statistics
APMA 1700 The Mathematics of Insurance
APMA 1740 Recent Applications of Probability and Statistics
MATH 1010 Analysis: Functions of One Variable

Economics Requirements:
ECON 1130 Intermediate Microeconomics (Mathematical) 3 1
ECON 1210 Intermediate Macroeconomics 1
ECON 1630 Econometrics I 1

Three 1000-level courses from the "mathematical-economics" group: 4 3
ECON 1170 Welfare Economics and Social Choice Theory
ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

One 1000-level course from the "data methods" group: 4 1
ECON 1305 Economics of Education: Research
ECON 1310 Labor Economics
ECON 1360 Health Economics
ECON 1410 Urban Economics
ECON 1510 Economic Development
ECON 1520 The Economic Analysis of Institutions
ECON 1530 Health, Hunger and the Household in Developing Countries
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1759 Data, Statistics, Finance
ECON 1765 Finance, Regulation, and the Economy: Research

Two additional 1000-level economics courses 2

Total Credits 16

Course Requirements:

Applied Mathematics Requirements

(a) APMA 0350 Methods of Applied Mathematics I, II 2 & APMA 0360 and Methods of Applied Mathematics I, II 1
Select one of the following: 1
APMA 0160 Introduction to Scientific Computing (preferred)
CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170 Computer Science: An Integrated Introduction
APMA 1200 Operations Research: Probabilistic Models 1
APMA 1650 Statistical Inference I 1

(b) Select one of the following: 1
APMA 1180 Introduction to Numerical Solution of Differential Equations
APMA 1330 Methods of Applied Mathematics III, IV
APMA 1660 Statistical Inference II
APMA 1670 Statistical Analysis of Time Series
APMA 1680 Nonparametric Statistics
APMA 1690 Computational Probability and Statistics
APMA 1700 The Mathematics of Insurance
APMA 1720 Monte Carlo Simulation with Applications to Finance (preferred)
APMA 1740 Recent Applications of Probability and Statistics
MATH 1010 Analysis: Functions of One Variable

Economics Requirements:
ECON 1130 Intermediate Microeconomics (Mathematical) 3 1
ECON 1210 Intermediate Macroeconomics 1
ECON 1630 Econometrics I 1

Select two 1000-level courses from the "financial economics" group: 2 2
ECON 1650 Financial Econometrics
ECON 1710 Investments I
ECON 1720 Corporate Finance
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1760 Financial Institutions
ECON 1765 Finance, Regulation, and the Economy: Research
ECON 1770 Fixed Income Securities
ECON 1780 Corporate Strategy
ECON 1790 Corporate Governance and Management

Select one 1000-level course from the "mathematical economics" group: 1
ECON 1170 Welfare Economics and Social Choice Theory
ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

1 No course may be used to simultaneously satisfy (a) and (b).
2 APMA 0330 and APMA 0340 may be substituted with advisor approval.
3 Or ECON 1110 with permission.
4 No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.

Standard program for the A.B. degree (Mathematical Finance track) - class of 2016 and beyond

Prerequisites:
MATH 0100 Introductory Calculus, Part II
MATH 0520 Linear Algebra
Select one 1000-level course from the "data methods" group:  
ECON 1305 Economics of Education: Research
ECON 1310 Labor Economics
ECON 1360 Health Economics
ECON 1410 Urban Economics
ECON 1510 Economic Development
ECON 1520 The Economic Analysis of Institutions
ECON 1530 Health, Hunger and the Household in Developing Countries
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1759 Data, Statistics, Finance
ECON 1765 Finance, Regulation, and the Economy: Research
Total Credits 13

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 No course may be used to simultaneously satisfy the "financial economics," the "mathematical economics," or the "data methods" requirements.
3 Or ECON 1110 with permission.

Standard program for the Sc.B. degree (Mathematical Finance track) - class of 2016 and beyond:

Prerequisites:
MATH 0100 Introductory Calculus, Part II
MATH 0520 Linear Algebra

Course Requirements:
Applied Mathematics requirements:
(a) APMA 0350 and APMA 0360 Methods of Applied Mathematics I, II 2
Select one of the following:
APMA 0160 Introduction to Scientific Computing (preferred)
CSCI 0040 Introduction to Scientific Computing and Problem Solving (preferred)
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170 Computer Science: An Integrated Introduction
APMA 1200 Operations Research: Probabilistic Models 1
APMA 1650 Statistical Inference I 1
(b) Select two of the following:
APMA 1180 Introduction to Numerical Solution of Differential Equations
APMA 1330 Methods of Applied Mathematics III, IV
APMA 1660 Statistical Inference II
APMA 1670 Statistical Analysis of Time Series
APMA 1680 Nonparametric Statistics
APMA 1690 Computational Probability and Statistics
APMA 1700 The Mathematics of Insurance
APMA 1720 Monte Carlo Simulation with Applications to Finance (preferred)
APMA 1740 Recent Applications of Probability and Statistics
MATH 1010 Analysis: Functions of One Variable

Economics Requirements:
ECON 1130 Intermediate Microeconomics (Mathematical) 3
ECON 1210 Intermediate Macroeconomics

ECON 1630 Econometrics I
Select three 1000-level courses from the "financial economics" group:  
ECON 1650 Financial Econometrics
ECON 1710 Investments I
ECON 1720 Corporate Finance
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1760 Financial Institutions
ECON 1765 Finance, Regulation, and the Economy: Research
ECON 1770 Fixed Income Securities
ECON 1780 Corporate Strategy
ECON 1790 Corporate Governance and Management
Select two 1000-level courses from the "mathematical economics" group:  
ECON 1110 Welfare Economics and Social Choice Theory
ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

Select one 1000-level course from the "data methods" group:  
ECON 1305 Economics of Education: Research
ECON 1310 Labor Economics
ECON 1360 Health Economics
ECON 1410 Urban Economics
ECON 1510 Economic Development
ECON 1520 The Economic Analysis of Institutions
ECON 1530 Health, Hunger and the Household in Developing Countries
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

Total Credits 16

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 No course may be used to simultaneously satisfy the "financial economics," the "mathematical economics," or the "data methods" requirements.
3 Or ECON 1110 with permission.

Honors and Capstone Requirement
Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain the approval of a faculty sponsor.
Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

- Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
- On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:
  - Which courses were put to use in your summer’s work? Which topics, in particular, were important?
  - In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
  - Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
  - What did you learn from the experience that probably could not have been picked up from course work?
  - Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
  - Would you recommend your summer experience to other Brown students? Explain.

Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

Standard Program for the Sc.B. degree:

**Prerequisites (3 courses):**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0100</td>
<td>Introductory Calculus, Part II</td>
</tr>
<tr>
<td>MATH 0520</td>
<td>Linear Algebra</td>
</tr>
<tr>
<td>MATH 0540</td>
<td>Honors Linear Algebra</td>
</tr>
<tr>
<td>or MATH 0530</td>
<td>Directions: The Matrix in Computer Science</td>
</tr>
<tr>
<td>or CSCI 0150</td>
<td>Principles of Economics</td>
</tr>
</tbody>
</table>

**Required Courses (17 courses):**

- Select one of the following Series:
  - Series A:
    - CSCI 1450 | Introduction to Probability and Computing |
    - or APMA 1650 | Statistical Inference I |
  - Series B:
    - CSCI 0150 & CSCI 0160 | Introduction to Object-Oriented Programming and Computer Science |
    - and Introduction to Algorithms and Data Structures |

**Capstone Course in either Computer Science or Economics**

**Total Credits: 17**

1. A list of pre-approved pairs may be found at the approved-pairs web page (http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies. CSCI 1450 may not be used to satisfy this requirement.
2. Or ECON 1110, with permission.
3. A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

Standard Program for the A.B. degree:

**Prerequisites (3 courses):**

<table>
<thead>
<tr>
<th>Course</th>

<td>Econometrics I</td>
</tr>
</tbody>
</table>

- Three courses from the "mathematical economics" group:
  - ECON 1170 | Welfare Economics and Social Choice Theory |
  - ECON 1225 | Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies |
  - ECON 1465 | Market Design: Theory and Applications |
  - ECON 1470 | Bargaining Theory and Applications |
  - ECON 1640 | Econometrics II |
  - ECON 1650 | Financial Econometrics |
  - ECON 1750 | Investments II |
  - ECON 1759 | Data, Statistics, Finance |
  - ECON 1810 | Economics and Psychology |
  - ECON 1820 | Behavioral Economics |
  - ECON 1850 | Theory of Economic Growth |
  - ECON 1860 | The Theory of General Equilibrium |
  - ECON 1870 | Game Theory and Applications to Economics |

- and any graduate Economics course

- Two additional 1000-level Economics courses

- Capstone Course in either Computer Science or Economics

**Total Credits: 17**
or CSCI 0530  | Directions: The Matrix in Computer Science
ECON 0110  | Principles of Economics

**Required Courses (13 courses):**

Select one of the following series:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 1450</td>
<td>Introduction to Probability and Computing</td>
</tr>
<tr>
<td>or APMA 1650</td>
<td>Statistical Inference I</td>
</tr>
</tbody>
</table>

**Series A**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0150</td>
<td>Introduction to Object-Oriented Programming</td>
</tr>
<tr>
<td>&amp; CSCI 0160</td>
<td>and Introduction to Algorithms and Data Structures</td>
</tr>
</tbody>
</table>

**Series B**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0170</td>
<td>Computer Science: An Integrated Introduction</td>
</tr>
<tr>
<td>&amp; CSCI 0180</td>
<td>and Computer Science: An Integrated Introduction</td>
</tr>
</tbody>
</table>

**Series C**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0190</td>
<td>Accelerated Introduction to Computer Science</td>
</tr>
<tr>
<td>and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or a 1000-level course</td>
<td></td>
</tr>
</tbody>
</table>

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0220</td>
<td>Introduction to Discrete Structures and Probability (math)</td>
</tr>
<tr>
<td>CSCI 0320</td>
<td>Introduction to Software Engineering (systems)</td>
</tr>
<tr>
<td>CSCI 0330</td>
<td>Introduction to Computer Systems (systems)</td>
</tr>
<tr>
<td>or CSCI 0310</td>
<td>Introduction to Computer Systems</td>
</tr>
<tr>
<td>CSCI 0510</td>
<td>Models of Computation (math)</td>
</tr>
</tbody>
</table>

Two additional CS courses; at least one must be at the 1000-level.
The other must either be at the 1000-level or be an intermediate course not already used to satisfy concentration requirements.

**Total Credits** 13

1 Or ECON 1110, with permission.

**Honors**

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments’ websites.

**Professional Track**

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

**Mathematics-Economics Concentration Requirements**

The Mathematical Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself.

**Standard Mathematics-Economics Concentration (through the class of 2015):**

### Professional Track (applies irrespective of graduation year):

- Students must complete two two-to-four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

- On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:
  - Which courses were put to use in your summer’s work? Which topics, in particular, were important?
  - In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
  - Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
  - What did you learn from the experience that probably could not have been picked up from course work?
  - Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
  - Would you recommend your summer experience to other Brown students? Explain.

---

**Honors and Capstone Requirement:**

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain approval of a faculty sponsor.

---

**Economics Graduate Program**

The department of Economics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.
The department also offers a one-year Master of Arts (A.M.) program. However, applicants to the A.M. program should apply to the Ph.D. program, and are evaluated using the same criteria as applicants to the Ph.D. program. Students in the A.M. program are not funded by Brown. A.M. students who take the core examination and pass it will continue in the Ph.D. program and receive funding. In addition, Ph.D. students can earn the A.M. on the way to the Ph.D. or can receive the A.M. if they choose not to complete the Ph.D. program. The A.M. requires passing eight courses in the areas of Microeconomics, Macroeconomics, and Econometrics.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/economics

Courses

ECON 0110. Principles of Economics.
Extensive coverage of economic issues, institutions, and vocabulary, plus an introduction to economic analysis and its application to current social problems. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session).

ECON 0180A. Economics on a Broad Canvas.
Where economics fits into the broader pattern of the social sciences, history, and philosophy. Topics include: the world economy from pre-history to the present; the history and varieties of economic thought; comparative economic systems; challenges facing less developed countries; positive and normative perspectives on income inequality and redistribution; and the economy and the quality of life, including the environment. Enrollment limited to 20 first year students.

Introduction to the economic aspects of the major welfare programs provided by government in American Society; Social Security, Health Care and Insurance, Education, Environmental Control. The focus of the course will be on the benefits and costs of each program and proposals for altering the scope of the public sector. Enrollment limited to 20 first year students. FYS

ECON 0180C. Punishment and Inequality in America.
This seminar will use social theory and social science evidence to understand how punishment works as a mechanism to produce inequality in American society. The institution of incarceration as a generator of social stigma is examined in this light. Zero-tolerance policing practices and racial profiling are discussed from this point of view as well. Questions about authority, legitimacy, deviancy, power and social cognition will guide the discussion. Enrollment limited to 20 first year students. FYS WRIT

ECON 0180D. The Power of Data (and its Limits).
Open any newspaper, any magazine, any academic journal, you’ll find claims which rely on data. Government policies, economic data, health recommendations—all of these are based on some underlying data analysis. Data used in this context has enormous power, but it also has limits. Understanding these limits is key to using—it but not mis-using—the power of data.

This first-year seminar will focus on understanding where data comes from, what we can learn from it, and what the limitations are. The course will emphasize policy-relevant economic and public health applications.

We will explore the ethical and economic foundation of Human Rights and its relationship to the Cosmopolitanism View. In particular, we will explore the question of whether people should have not just human rights to liberty, life and security, but also to a basic level of economic subsistence. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 20.

A course designed primarily for students who do not plan to concentrate in economics but who seek a basic understanding of the economics of less developed countries, including savings and investment, health and education, agriculture and employment, and interactions with the world economy, including trade, international capital flows, aid, and migration. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 100.

Basic accounting theory and practice. Accounting procedures for various forms of business organizations.

We will examine what role economic theory plays and/or ought to play in political theory and on our conception of politics more broadly. Topics include particular political philosophies and economic concepts such as rationality and efficiency. Prerequisite: ECON 0110 or advanced placement.

This is a seminar that focuses on issues of ethics that arise in the context of business and economics. Learning occurs primarily through guided student discussions in class. Other economics courses, especially ECON 0110, 1110, 1340 and 1790 are highly recommended.

ECON 1010. Intermediate Microeconomics.
Tools for use in microeconomic analysis, with some public policy applications. Theory of consumer demand, theories of the firm, market behavior, welfare economics, and general equilibrium. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1130. Intermediate Microeconomics (Mathematical).
Microeconomic theory: Theories of the consumer and firm, competitive equilibrium, factor markets, imperfect competition, game theory, welfare economics, general equilibrium. May not be taken in addition to ECON 1110. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1160. Managerial Economics.

This is an advanced microeconomic theory class for undergraduates. Building on the intermediate microeconomics course, the approach is more formal and mathematically more rigorous, presenting arguments and expecting students to carefully develop techniques in order to understand and produce logical proofs. Topics include the efficiency and coalitional stability properties of markets, as well as other mechanisms to allocate resources. Market failures are discussed, including advanced treatments of externalities, public goods, and asymmetric information. The second part of the course will discuss a number of topics in social choice theory, including different normative criteria of compensation, life and death choices, majority voting, Arrow’s impossibility theorem.

ECON 1185. The Welfare State.
The course will include analyses of Health Care, Social Security, Medicare, Medicaid, Immigration Control, and Environmental Control. The focus will be on the extent to which the programs meet their goals without straining the federal budget. Both existing and alternative programs will be evaluated in terms of costs, benefits, as well as their present and future demands on tax revenue and user fees. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620. Enrollment limited to 30 senior concentrators in Economics, Mathematical Economics, Applied Math-Economics, Computer Science Economics, and BEO.

ECON 1210. Intermediate Macroeconomics.
The economy as a whole: Level and growth of national income, inflation, unemployment, role of government policy. Prerequisite: MATH 0060,
Interested students must register for ENVS 1350.

ECON 1355. Environmental Issues in Development Economics (ENVS 1355).
Interested students must register for ENVS 1355.

ECON 1360. Health Economics.
This course introduces students to the issues, theory and practice of health economics in the US. Topics include the economic determinants of health, the market for medical care, the market for health insurance and the role of the government in health care. Course work includes data analyses using the program STATA. Prerequisites: ECON 1110 or 1130; and ECON 1620, 1630, or APMA 1650 or other statistics background. Enrollment limited to 24. DPLL

ECON 1370. Race and Inequality in the United States.
We examine racial inequality in the United States, focusing on economic, political, social and historical aspects. Topics include urban poverty, employment discrimination, crime and the criminal justice system, affirmative action, immigration, and low wage labor markets. Black/white relations in the US are the principle but not exclusive concern. Prerequisite: ECON 1110 or 1130. Enrollment limited to 25. DPLL

ECON 1375. History of Economic Thought.
Examines empirical evidence on inequality of opportunity in the US. We cover recent work in economics that measures the importance of schools, health care, neighborhoods, income, and race in determining children’s long-term labor market success, and implications of these findings for US public policy. We will also place the empirical work in historical and philosophical context and cover a variety of statistical issues. Prerequisites: ECON 1110 or 1130; and ECON 1620, 1629, or 1630. Enrollment limited to 30 seniors.

Examines the economic basis for legal decisions. Cost-benefit analysis, social costs, the Coase Theorem, and the assignment of property rights. The economics of property and contracts, tort law, and criminal law. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1390. Research Methods for Economists.
This course is designed to prepare students to undertake empirical research in economics. Students thinking of writing an honors thesis or conducting independent research are especially urged to take it during their junior year. We will answer such questions as what does an empirical research paper look like? How do we formulate a hypothesis to test? How can we use data to test our hypothesis? Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630.

ECON 1400. The Economics of Mass Media.
The mass media shape our culture and politics but are also shaped by their economic incentives. In this course we will use tools from microeconomics and econometrics to study the effects of mass media on economic, social and political behavior, and to study the factors that shape media content and availability. We will develop implications for business and public policy. Students will complete weekly readings, bi-weekly assignments, a take-home midterm, and a final paper and presentation. Class time will be devoted to a mix of lecture and discussion of readings and lecture topics.

ECON 1410. Urban Economics.
The first part of the course covers the set of conceptual and mathematical models widely used to understand economic activity both between and within cities. The second part of the course examines various urban policy issues including urban transportation, housing, urban poverty, segregation and crime. The course makes extensive use of empirical evidence taken primarily from the United States. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 100.

ECON 1420. Urbanization in China.
Examines urbanization processes and urban public policy in China. Also draws on historical and recent experience in the U.S. Policy areas including policies affecting urbanization, migration, and industrial location; policies affecting housing, land use, and urban reform; and policies affecting fiscal decentralization and infrastructure investments such as transportation. Prerequisites: ECON 1110 or ECON 1130. Open to juniors and seniors. DPLL
ECON 1430. Population Economics. An introduction to the economic approach to demography. Applies the theoretical and empirical frameworks of economics to topics such as fertility, migration (both domestic and international), investments in health and human capital, life-cycle labor supply, intergenerational transmission of economic status, the distribution of income and wealth, and the interaction of population growth with the standard of living. Prerequisite: ECON 1110 or 1130.

ECON 1440. Economic Theories of Firms. Examines theories of why firms exist, their internal organizations and employment relations, ownership and control, efficiency versus conflict approaches, and alternative organizational forms (e.g., employee ownership). Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1450. Economic Organizations and Economic Systems. Positive and normative study of the organizations that comprise and the institutional structures that characterize a modern mixed market economy. Theoretical efficiency and potential limitations of private enterprises and markets including (a) why some market actors are organizations (e.g., companies), (b) effort elicitation problems in organizations, (c) the problem of cooperation in traditional versus behavioral economics, and (d) alternative kinds of organization (including proprietorships, corporations, nonprofits, government agencies). Roles of government, and problems of government failure, including the collective action problem of democracy. State-market balance and contemporary controversies over the economic system in light of the 2008 financial crisis. Enrollment limited to 100 juniors and seniors. Prerequisite: ECON 1110 or 1130.

ECON 1460. Industrial Organization. A study of industry structure and firm conduct and its economic/antitrust implications. Theoretical and empirical examinations of strategic firm interactions in oligopolistic markets, dominant firm behaviors, and entry deterrence by incumbents. Also economics of innovation: research and development activities and government patent policies. Prerequisite: ECON 1110 or 1130. Some knowledge of calculus required. Enrollment limited to 100.

ECON 1465. Market Design: Theory and Applications. This course studies the design of organized markets, focusing on efficient organization and the incentives created by market rules. The analysis relies on a mix of documenting the rules of real-world markets, game theoretic analysis, empirical analysis, and experimental work. Applications include: online auction markets (e.g., eBay, Amazon); ad auctions (e.g., Google); matching markets, including matching students to schools, matching workers to jobs (e.g., medical residents to hospitals, lawyers to clerkship positions), matching kidney donors to recipients, and online dating. Prerequisites: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, 0350, or advanced placement; or instructor permission. Enrollment limited to 25 juniors, seniors, and graduate students.

ECON 1470. Bargaining Theory and Applications. Bargaining theory is emerging as an important area within the general rubric of game theory. Emphasis is on providing a relatively elementary version of the theory in order to make it accessible to a large number of students. Covers introductory concepts in game theory, strategic and axiomatic theories of bargaining and their connections, applications to competitive markets, strikes, etc. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1480. Public Economics. An analysis of the role of government in the allocation of resources. Topics include welfare economics (a review), problems of social choice, the evaluation of public expenditures, and taxation. Prerequisite: ECON 1110 or 1130. DPLL

ECON 1485. Social Security Reform. The course looks at the economics of social security reform with particular focus on possible policy responses to the increasing fraction of the population that is elderly in OECD countries. Among the topics that will be considered are pay as you go funding, defined benefits versus defined concentrations, privatization, labor market effects of pensions, retirement decisions, labor supply by couples, and macroeconomic effects. Prerequisite: ECON 1110 or 1130. Enrollment limited to 30. Not open to first-year students. DPLL

ECON 1486. The Economic Analysis of Political Behavior. Slow economic growth, controversial policy, and over a decade of continuous war have led many to question the extent to which government is a force for the common good. Blame is often assigned to specific politicians or ideological perspectives. Public choice economics instead analyzes the incentive structure within which political decisions take place, seeking to uncover the forces guiding the behavior of voters, legislators, judges, and other political agents. This course will examine the insights and limitations of the public choice perspective in the context of electoral politics, legislation, bureaucracy and regulation, and constitutional rules. WRIT

ECON 1490. Economics of Antitrust: Research and Regulation of Competition. In this course we learn how economic models and empirical research shape modern competition regulation through Antitrust laws and enforcement. We review famous antitrust cases which involved substantial economic evidence in arguments and decisions. We learn how economics shaped antitrust regulation and competition policy, and we compare and contrast antitrust policy and enforcement across the U.S., the EU and other economies which have adopted similar policies. Students will be required to read cases which include economic analysis using theory and econometrics. Students will be required to participate in class debate, prepare a term paper, and argue a case before class. WRIT

ECON 1500. Current Global Macroeconomic Challenges. Analysis of current economic challenges in the U.S. and China. Topics include fiscal and monetary policies, international trade, capital flows, and exchange rate policy, and policies for long-run growth. Emphasis on macroeconomic policies in China and the U.S., including their global impact. Prerequisites: ECON 1210. Also recommended: ECON 1550 and 1850. Enrollment limited to 100.

ECON 1510. Economic Development. The economic problems of less developed countries and the theory of economic development, with emphasis on the roles played by agriculture, industry, and foreign trade. Also: education, health, employment, and migration; capital accumulation; income distribution; institutional aspects; the role of price distortions; trade policies; social discount rates, investment criteria, and the general issue of state intervention. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630. Enrollment limited to 100. DPLL

ECON 1520. The Economic Analysis of Institutions. This course deals with the economic analysis of institutions, with a focus on developing countries. The first section covers institutions in traditional agrarian societies. Topics include consumption smoothing and the organization of land, labor and credit markets. The second section focuses on the role of the community in facilitating economic activity. Institutions include cooperatives, networks, marriage and the family. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630; or equivalent. Enrollment limited to 45. DPLL

ECON 1530. Health, Hunger and the Household in Developing Countries. Microeconomic analysis of household behavior in low income societies emphasizing the economic determinants of health and nutrition and the evaluation of policy. The relationship among health, nutrition, fertility, savings, schooling, labor productivity, wage determination, and gender-based inequality. Emphasizes theoretically-based empirical research. Prerequisite: ECON 1110 or 1130, ECON 1620. Enrollment limited to 30.

ECON 1545. Topics in Macroeconomics, Development and International Economics.
This class is a senior seminar that covers selected topics at the intersection of macroeconomics, economic development and international trade. The leading theme of the class is the determinants of the observed cross-country differences in income per capita and growth rates. We will consider a wide range of theories to explain such disparities in economic outcomes, with a special focus on theories that stress problems in financial markets. We will also study the role of wealth inequality. We may also cover structural change, the link between volatility, diversification and development, and selected topics in international trade.

ECON 1550. International Finance.
The balance of payments; identification and measurement of surpluses and deficits; international monetary standards; the role of gold and paper money; government policies; free versus fixed exchange rates; international capital movements; war and inflation; the International Monetary Fund. Prerequisite: ECON 1210. Enrollment limited to 100.

ECON 1560. Economic Growth.
A theoretical and empirical examination of economic growth and income differences among countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200 or 0350; or advanced placement. Enrollment limited to 100.

ECON 1565. Income Inequality.
This course examines the macroeconomic dimensions of income inequality. How much of national income is paid to capital and how much to labor? What determines the gap in wages between workers with different skill levels, as well as variation in wages within skill groups? How have changes in technology, openness to trade, government policy, and the quantities of factors of production contributed to changes in these relative returns? What determines the aggregate quantities of different factors of production as well as their distribution among individuals? How does inequality feed back to affect macroeconomic stability and long term growth?

Recent histories, institutional structures, and performance of industrialized economies of the U.S., Europe and Asia. The Marxist critique of capitalism; the theory of centrally planned economies; the Soviet economy; and problems of reform and transition. Workers' self-management as an alternative industrial order. Prerequisite: EC 111 or 113.

ECON 1590. The Economy of China since 1949.
This course examines the organization, structure, and performance of the economy of mainland China, with a focus on urban and regional development. The course analyzes the changing economic system including the roles of planning and markets and government economic strategy and policies. The pre-reform period (1949-78) receives attention in its own right, but especially as it influences developments in the market-oriented reform period since 1978. Topics covered include rural and urban development, industrialization and FDI, housing and land markets, rural-urban migration, income inequality and growth, and the evolving spatial structure of cities. Both analytical and descriptive methods are used. Prerequisite: ECON 1110 or 1130. ECON 1210 and 1410 are helpful but not required. Enrollment limited to 100. DPLL

ECON 1600. Economics of the Middle East.
A survey of the economies of the Middle East. Examines various aspects of the economic realities of the region, including economic and human development, water and food security, the economics and politics of oil, population growth and labor mobility, education, the role of the state, economic reform, the political economy of conflict and peace, and the prospects for regional integration. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1620. Introduction to Econometrics.
Probability and statistical inference. Estimation and hypothesis testing. Simple and multiple regression analysis. Applications emphasized. Prerequisite: ECON 0110 or advanced placement, or ECON 1110 or 1130. Weekly one-hour computer conference required.

This class will cover the basics of applied research in economics. We will cover how we use economic theory to formulate a hypothesis to test and how we use data to test our hypothesis. As part of the coursework, students will be exposed to topics across multiple fields of applied economic research (eg, health, labor, political economy, urban economics, development, etc) that can be explored in greater detail in more advanced classes.

Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630.

ECON 1630. Econometrics I.
Advanced introduction to econometrics with applications in finance and economics. How to formulate and test economic questions of interest. The multivariate linear regression model is treated in detail, including tests of the model's underlying assumptions. Other topics include: asymptotic analysis, instrumental variable estimation, and likelihood analysis. Convergence concepts and matrix algebra are used extensively. Prerequisites: ECON 0110 or advanced placement; and ECON 1110 or 1130; and APMA 1650, MATH 1620, or ECON 1620; or equivalent.

ECON 1640. Econometrics II.
Continuation of ECON 1630 with an emphasis on econometric modeling and applications. Includes applied topics from labor, finance, and macroeconomics. Prerequisite: ECON 1630. Enrollment limited to 100.

Financial time series, for example, asset returns, options and interest rates, possess a number of stylized features that are analyzed using a specific set of econometric models. This course deals with an introduction to such models. It discusses time series models for analyzing asset returns and interest rates. (GARCH) models to explain volatility, models to explain extreme events which are used for the Value at Risk and models for options prices. Prerequisite: ECON 1630 or instructor permission. Enrollment limited to 100.

ECON 1710. Investments I.
The function and operation of asset markets; the determinants of the prices of stocks, bonds, options, and futures; the relations between risk, return, and investment management; the capital asset pricing model, normative portfolio management, and market efficiency. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650.

ECON 1720. Corporate Finance.
A study of theories of decision-making within corporations, with empirical evidence as background. Topics include capital budgeting, risk, securities issuance, capital structure, dividend policy, compensation policy, mergers and acquisitions, real options, financial engineering, securitization. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650.

ECON 1730. Economics of Creativity, Entrepreneurship & Innovation.
In this advanced and reading intensive seminar, students will study forces that drive the process of innovation. These forces consist of creativity and creative destruction; the innovator’s dilemma; incentives to innovate, competitive advantage; industry evolution; venture capital, and intellectual property. This course is ideal for those who are interested in pursuing investment banking, investment management, strategic consulting, nonprofit management, public policy, venture capital/private equity, and entrepreneurship.

ECON 1750. Investments II.
Individual securities: forwards, futures, options and basic derivatives, pricing conditions. Financial markets: main empirical features, equity premium and risk-free rate puzzles, consumption based asset pricing models, stock market participation, international diversification, and topics in behavioral finance. Prerequisites: ECON 1110 or 1130; ECON 1620 or 1630 or APMA 1650; ECON 1710. Enrollment limited to 100.

An experimental course that prepares students for research of the type conducted in academic finance, hedge funds, and some advanced
consulting firms and I-Banks. Nothing like this is offered at any other university as far as the instructor knows. Students that do well in this course should have a head start in academic finance PhD programs, as well as in MBA programs, quantitatively oriented investment funds, finance companies, and consulting firms. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650. CSCI0040 or equivalent also recommended as background. Enrollment limited to 20. SINC ECON 1760. Financial Institutions. This course analyzes the role of financial institutions in allocating resources, managing risk, and exerting corporate governance over firms. After studying interest rate determination, the risk and term structure of interest rates, derivatives, and the role of central banks, it takes an international perspective in examining the emergence, operation, and regulation of financial institutions, especially banks. Prerequisites: ECON 1110 or 1130; and 1210. Enrollment limited to 100.

ECON 1765. Finance, Regulation, and the Economy: Research. Analyzes the role of financial markets and institutions in allocating resources and exerting corporate governance over firms, how regulation shapes finance, and how finance influences the enactment and impact of financial regulation. The class will use: economic theory to develop a solid conceptual framework for understanding how finance affects economic growth, income distribution, and stability; empirical evidence to assess theory; and history to put the role of finance into a long-term framework. Current events will be continuously used to keep the class relevant. Prerequisites: ECON 1110 or 1130; and ECON 1210; and ECON 1630; and ECON 1720 or 1760. Enrollment limited to 30 senior concentrators in Economics, BEO, Applied Math-Economics, Computer Science-Economics, and Math-Economics.

ECON 1770. Fixed Income Securities. The fixed income market is much larger than the stock market in the U.S. Topics covered in this course include basic fixed income securities, term structure, hedging interest rate risk, investment strategies, fixed income derivatives, mortgage-backed securities and asset-backed securities. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650; and ECON 1710 or 1720. Enrollment limited to 100.

ECON 1780. Corporate Strategy. This course teaches analysis of strategic decisions facing an organization. We cover traditional strategy topics such as capabilities and sustainability as well as modern game theory models of competition. A central integrating idea is anticipating the response of other actors in the economy and recognizing that often an organization’s profits depend on the actions of other firms. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630; and ECON 1720.

ECON 1790. Corporate Governance and Management. A corporation’s economic success depends on access to human capital and other resources, effective management of these resources, and a governance system that ensures effective decision making. The course offers policy prescriptions in economic incentives and regulatory rules that attempt to align management with investors. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650; and ECON 1720; and ECON 0710. Enrollment limited to 40.

ECON 1800. Politics and Finance. This course examines how legislation and regulation influences the structure of financial markets and how players in these markets intervene in the political process to create or modify legislative and, regulatory outcomes. Particular emphasis will be placed on the environment in the United States. International comparisons will also be present. Prerequisites: ECON 1110 or 1130; and ECON 1770. Enrollment limited to 30.

ECON 1810. Economics and Psychology. This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a “richer psychology” than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as “Bayesian statisticians”. Special emphasis will be put on the implications of “psychologically richer” models on market behavior. Prerequisites: ECON 1110 or 1130; and MATH 0100 or 0170 or 0180 or 0190 or 0200 or 0350 or advanced placement; and ECON 1620 or 1630 or APMA 1650 or MATH 1610. Enrollment limited to 100.

ECON 1820. Behavioral Economics. This course provides a grounding in the main areas of study within behavioral economics, including temptation and self-control, fairness and reciprocity, reference dependence, bounded rationality, happiness and neuroeconomics. For each area of study we begin with the standard model of rational decision making, and discuss what behavior this model can explain. We then discuss the experimental evidence that indicates that the standard model is missing something important, and the models that have sprung up to account for these violations. Finally, we will look at the implications of these new models for our understanding of how the economy operates. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, 0350, or advanced placement.

ECON 1850. Theory of Economic Growth. Analysis of the fundamental elements that determine economic growth. It examines the role of technological progress, population growth, income inequality, and government policy in the determination of (a) the pattern of economic development within a country, and (b) sustainable differences in per capita income and growth rates across countries. Prerequisites: ECON 1210 and either APMA 0330, 0350 (or equivalent), MATH 0180, 0200, or 0350 (or equivalent). Enrollment limited to 100.

ECON 1860. The Theory of General Equilibrium. Existence and efficiency of equilibriab for a competitive economy; comparative statistics; time and uncertainty. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1870. Game Theory and Applications to Economics. Study of the elements of the theory of games. Non-cooperative games. Repeated games. Cooperative games. Applications include bargaining and oligopoly theory. Prerequisites: ECON 1110 or 1130; and MATH 0100, or 0170, or 0180, or 0190, or 0200, 0350, or advanced placement; and ECON 1620 or 1630 or APMA 1650, or MATH 1610. Enrollment limited to 100.

ECON 1880. Introduction to Two-Sided Matching Markets. First, we will discuss the several elements that characterize a two-sided matching market and will model several of these markets under the game-theoretic approach. Then, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets. Prerequisites: ECON 1110 or 1130; and ECON 1870.

ECON 1940. Current Economic Research: Undergraduate Seminar. The purpose of this seminar is to bring to the undergraduates concentrating in economics, applied math-economics, mathematical economics and computer science-economics a taste of the first-rate research that is being done in the economics department at Brown. Prerequisites: ECON 1110 or 1130; ECON 1210; ECON 1620 or APMA 1650 or MATH 1610 or 1620; ECON 1629 or 1630. Enrollment limited to 30.

Note this course does not count toward Economics concentration credit.

ECON 1960. Honors Tutorial for Economics Majors. Students intending to write an honors thesis in economics must register for this class. The goal is to help students with the process of identifying and defining feasible topics, investigating relevant background literature, framing hypotheses, and planning the structure of their thesis. Each student must find a thesis advisor with interests related to their topic and plan to enroll in ECON 1970 during the final semester of senior year.

Note this course does not count toward Economics concentration credit.

ECON 1970. Independent Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. ECON 1994. Senior Thesis and Independent Research in Finance and Applied Economics. An opportunity for seniors in economics to pursue a research project in the areas of applied economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register
for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

ECON 1995. Senior Thesis and Independent Research in Finance and Applied Economics. An opportunity for seniors in economics to pursue a research project in the areas of Applied Economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

ECON 2020. Applied Econometrics Analysis. This course provides students with skills needed to integrate economic theory, econometric methods, and data management in the analysis of economic problems. Provides a hands-on perspective including assignments designed to derive testable propositions from simple economic models, illustrate the loading, cleaning and merging of complex survey data, and provide experience in the selection and interpretation of basic econometric methods.

ECON 2030. Introduction to Econometrics I. The probabilistic and statistical basis of inference in econometrics.

ECON 2040. Econometric Methods. Applications of mathematical statistics in economics. The nature of economic observations, cross-section and time series analysis, the analysis of variance and regression analysis, problems of estimation.

ECON 2050. Microeconomics I. Decision theory: consumer’s and producer’s theory; general competitive equilibrium and welfare economics: the Arrow-Debreu-McKenzie model; social choice and implementation.

ECON 2060. Microeconomics II. Economics of imperfect information: expected utility, risk and risk aversion, optimization under uncertainty, moral hazard, and self-selection problems. Economics of imperfect competition: monopoly; price discrimination; monopolistic competition; market structure in single shot, repeated and stage games; and vertical differentiation.

ECON 2070. Macroeconomics I. Consumption and saving, under both certainty and uncertainty; theory of economic growth; real business cycles; investment; and asset pricing.

ECON 2080. Macroeconomics II. Money, inflation, economic fluctuations and nominal rigidities, monetary and fiscal policy, investment, unemployment, and search and coordination failure.

ECON 2090. Topics in Microeconomics: Decision Theory and Evidence. Decision theory is the use of axiomatic techniques to understand the observable implications of models of choice. It is central to the incorporation of psychological insights into economics, and provides a vital link between theory and experimental economics. This course covers standard economic models of choice in different domains - choice under risk, choice under uncertainty and intertemporal choice. It looks at key topics from behavioral economics: choice with incomplete information, reference dependent preferences, temptation and self control, the Allais paradox, ambiguity aversion and neuroeconomics. In each case it relates the predictions of theory to experimental data on behavior.

ECON 2130. Topics in Monetary Economics. Business cycle analysis with an emphasis on heterogeneous-agent economics and the interaction between business cycles and economic growth.

ECON 2160. Risk, Uncertainty, and Information. Advanced topics in the theories of risk, uncertainty and information, including the following: Decision making under uncertainty: expected and non-expected utility, measures of risk aversion, stochastic dominance. Models with a small number of agents: optimal risk-sharing, the principal-agent paradigm, contracts. Models with a large number of agents: asymmetric information in centralized and decentralized markets. Implementation theory.

ECON 2190A. Cooperative Game Theory. No description available.

ECON 2190B. General Equilibrium Theory. No description available.

ECON 2190C. Topics in Economic Theory. No description available.

ECON 2190D. Topics on Game Theory. First, we will discuss the several elements that characterize a two-sided matching market and the concept of setwise-stability versus core. Then, we will model several of these markets (one-to-one, many-to-one and many-to-many, in the discrete and continuous cases) under the game-theoretic approach and will define for all of them the stability concept, establishing its relationship with the core and the competitive equilibrium concepts. Afterwards, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets.

ECON 2190E. Topics in Economics: Economics and Psychology. This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as “Bayesian statisticians”. Special emphasis will be put on the implications of “psychologically richer” models on market behavior.

ECON 2210. Political Economy I. An introduction to political economy, focusing especially on the political economy of institutions and development. Its purpose is to give a good command of the basic tools of the area and to introduce at least some of the frontier research topics. The readings will be approximately evenly divided between theoretical and empirical approaches.

ECON 2230. Economics of Labor and Population. This course examines identification issues in empirical microeconomics. Focus on the sensible application of econometric methods to empirical problems in economics and policy research – particularly labor and population economics. The course examines issues that arise when analyzing non-experimental data and provides a guide for tools that are useful for applied research. The course also emphasizes how a basic understanding of theory and institutions can help inform the analysis. By the end of the course, students should have a firm grasp of the types of research designs and methods that can lead to convincing analysis and be comfortable working with large-scale data sets.

ECON 2330. Topics in Labor Economics. The course introduces students to procedures used to extract evidence from data and to perform rigorous causal inference in order to evaluate public policy on issues such as schooling, the return to education and returns on late intervention programs. Econometric methods, such as Instrumental Variable, Matching, Control Functions, Self Selection Models and Discrete Choice as well as Panel Data Methods, are discussed in detail.

ECON 2360. Economics of Health and Population. An introduction to current research in the economics of health and population. Focuses on studies of empirically-tractable and tested models of individual, household, and firm behaviors and how these behaviors interact through markets and other institutions. Among the subjects considered are the economics of fertility and marriage, the operation of the health services sector, and the implications of population aging.
ECON 2370. Inequality: Theory and Evidence.
This course uses economic theory to study the problems of inequality. The emphasis is two-fold: (1) to explain persistent resource disparities between individuals or social groups; and, (2) to assess the welfare effects of various equality-promoting policies. Topics include racial stereotypes, residential segregation, distributive justice, incentive effects of preferential policies, dysfunctional identity, and endogenous inequality due to the structure of production and exchange.

ECON 2410. Urbanization.
The first part of the course covers social interactions, productivity spillovers, systems of cities models, urban growth, and rural-urban migration. The second part of the course covers topics such as durable housing, land market regulation and exclusion, and local political economy. Besides covering basic theoretical models, emphasis is placed on working through recent empirical papers on both the USA and developing countries. Prerequisites: ECON 2050 and 2060.

ECON 2420. The Structure of Cities.
This course covers standard urban land use theory, urban transportation, sorting across political jurisdictions, hedonics, housing, segregation and crime. Empirical examples are taken primarily from the United States. After taking the course, students will have an understanding of standard urban theory and of empirical evidence on various important applied urban topics. In addition, students will gain practical experience in manipulating spatial data sets and simulating urban models.

ECON 2450. Exchange Scholar Program.

ECON 2470. Industrial Organization.
Monopolistic competition, market structure and entry, nonprice competition, economics of information.

ECON 2480. Public Economics.
Theoretical and empirical analysis of the role of government in private economies. Topics include welfare economics, public goods, externalities, income redistribution, tax revenues, public choice, and fiscal federalism.

ECON 2490. Public Finance II: Topics in Individual Taxation and Human Capital.
This course examines empirical work on (1) individual taxation and (2) human capital production. The goal of the course will be to provide graduate students with an overview of recent empirical methods and findings in these areas, and to identify promising research questions for their own work.

ECON 2510. Economic Development I.
This course covers issues related to labor, land, and natural resource markets in developing countries, in partial and general equilibrium settings. Topics covered include: The agricultural household model; under complete and incomplete market assumptions; household and individual labor supply, migration, self-employment, and the informal sector; rental market frictions and sharecropping arrangements; and environmental externalities (e.g., pollution, water usage, etc.), and sustainable development.

ECON 2520. Economic Development II.
This course deals with the economic analysis of institutions, with a particular focus on community-based institutions in developing countries. Institutions covered in this course includes cooperatives, ROSCAS, networks, marriage and the family.

ECON 2530. Behavioral and Experimental Economics.
An introduction to the methodology of experimental economics with an emphasis on experiments designed to illuminate problems in organizational design and emergence of institutions, and experiments investigating the operation of social and social-psychological elements of preference such as altruism, inequality aversion, reciprocity, trust, concern for relative standing, envy, and willingness to punish norm violators. Experiments studied will include ones based on the prisoners’ dilemma, dictator game, ultimatum game, and especially the voluntary contribution mechanism (public goods game) and the trust game.

ECON 2580. International Trade.
General equilibrium analysis of the theory of international trade and trade policy under perfect competition; trade under imperfect competition; strategic trade policy; trade and growth; and the political economy of trade policy determination. Empirical analysis of trade theories and policy. Additional topics include the theory of preferential trading areas, trade and labor, and the analytics of trade policy reform.

ECON 2590. Topics in International Economics.
Advanced theoretical and empirical research topics in international economics emphasizing positive and normative analysis of trade, trade policy and international trading agreements, policy reform and stabilization, exchange rate determination, sovereign debt and currency crises and optimum currency areas.

ECON 2610. Applied Econometrics.
Topics in applied econometrics. Both cross-sectional and time series issues will be discussed. Special emphasis will be placed on the link between econometric theory and empirical work.

ECON 2630. Econometric Theory.
Standard and generalized linear models, simultaneous equations, maximum likelihood, Bayesian inference, panel data, nonlinear models, asymptotic theory, discrete choice, and limited dependent variable models.

ECON 2640. Microeconometrics.
Topics in microeconometrics treated from a modern Bayesian perspective. Limited and qualitative dependent variables, selectivity bias, duration models, panel data.

Method of Moments (GMM) and Empirical Likelihood (EL). Kernel methods for density and regression estimation. Optimal instruments and local EL. Applications to non-linear time series models, Euler equations and asset pricing.

ECON 2820. Discrete Dynamical Systems and Application to Intertemporal Economics.
This course will focus on the qualitative analysis of discrete dynamical systems and their application for Intertemporal Economics.

ECON 2830. Dynamic Optimization and Economic Growth.
The role of human capital, income distribution, population growth, technological progress, and international trade in the determination of differences in growth performance across countries. Inequality and economic growth. Technological progress and wage inequality. The transition from stagnation to sustained growth. Evolution and growth.

ECON 2840. Empirical Analysis of Economic Growth.
Examines economic growth, focusing on the effects of technological change, fertility, income inequality, and government policy. ECON 2830 is strongly recommended.

ECON 2850. Theory of Innovation-Based Growth.
Issues concerning innovation-based growth theory, including scale effects and effects of research and development versus capital accumulation. Interactions between growth and phenomena such as fluctuations, unemployment, natural resources, competition, regulation, patent policy, and international trade.

ECON 2890A. Topics in Macroeconomics, Development and Trade.
This is a graduate class that covers selected topics at the intersection of macroeconomics, economic development and trade, for students in the second year of the PhD and above. The leading theme of the class is the determinants of the observed cross-country differences in income per capita and growth rates, with a focus on the long run. We start by reviewing theories where factor markets function perfectly and only aggregates matter. We then move to non-aggregative theories, placing special emphasis on theories of financial frictions. We spend some time studying the stochastic growth model with partially uninsurable idiosyncratic risk.

ECON 2890B. Economics 2890B: Topics in Economic Growth.
The course examines in depth endogenous growth theory, with a focus on what is called innovation-based, or “Schumpeterian” growth theory. This theory focuses on industrial innovations and from R&D as the mainspring of economic growth. It integrates the microeconomic theory of R&D into a macroeconomic growth model, making clear who gains and who loses from technological change, and showing how long-run growth is determined by the competitive process of creative destruction. The course will cover the details of model building and will also survey some of the literature confronting the theory with empirical evidence.
ECON 2920A. Advanced Econometrics - Microeconometrics from a Semiparametric Perspective.
This course is concerned with a rigorous, state-of-the-art introduction to Micro-econometrics. In particular, we will review many of the more recent contributions in Microeconometric Theory. While the focus of this course is theoretical, we will also be concerned with applications and the applicability of these methods. More specifically, we will consider nonparametric regression and density estimation methods, as well as methods and models for binary and categorical dependent variables, for limited dependent variables in general, and for models of selection. We will also discuss more general nonparametric IV models. Prerequisites are: Introductory Econometrics (at the level of the Wooldridge (2002)).

ECON 2920B. Topics in Game Theory.
No description available.

ECON 2930. Workshop in Applied Economics.
No description available.

ECON 2950. Workshop in Econometrics.
No description available.

ECON 2960. Workshop in Macroeconomics and Related Topics.
No description available.

ECON 2970. Workshop in Economic Theory.
No description available.

ECON 2971. Race and Inequality Seminar.
This is a workshop primarily for graduate students and faculty in the Department of Economics where original research on issues of race and inequality are presented by external visitors, along with Brown faculty and graduate students. No course credit.

ECON 2980. Reading and Research.
Individual research projects. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ECON 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Education

Chair
Kenneth K. Wong

The Department of Education focuses its scholarly and teaching efforts on the study of human learning and development, the history of education, teaching, school reform, and education policy; students study education from a variety of disciplinary perspectives, including anthropology, economics, history, political science, psychology, and sociology. The Department offers a wide range of courses designed for students seeking an understanding of the many facets of education from multidisciplinary perspectives.

For additional information, please visit the department's website: http://www.brown.edu/academics/education/

Education Studies Concentration Requirements

Education Studies takes a multidisciplinary, liberal arts approach to the field of education while focusing on the study of human learning and development, the history of education, teaching, school reform, and education policy. Concentrators choose an area of emphasis, either History/Policy (advised by Luther Spoehr) or Human Development (advised by Jin Li). History/Policy provides the historical underpinnings and intellectual skills for students to think critically about education issues in a number of settings. In the Human Development area, students learn about psychological, social, and cultural processes in a variety of contexts, including schools, families, peer groups, and neighborhoods, particularly in urban settings. Additionally, the Department offers teacher certification programs in elementary and secondary education.

Education Studies concentrators design a program that includes ten courses, of which at least eight are taken in the Education Department at Brown University. Within Education Studies, concentrators choose one of the two tracks, each designed to enable students to develop critical and creative skills for addressing issues involving children, schools, and education.

Course Requirements:

EDUC 1100 or EDUC 1110 Introduction to Qualitative Research Methods or Introductory Statistics for Education Research and Policy Analysis
At least five Education courses in the chosen area of emphasis. 5
At least two Education courses outside the chosen area of emphasis. 2
Two additional, related courses. 2
Total Credits 10

Honors
Concentrators seeking to graduate with honors must meet all requirements for the concentration, including a grade-point average established by the Department, and state their plans in writing by the end of their sixth semester. Finally, they must successfully complete EDUC 1990 (Research and Writing in Education) in which they write a thesis (usually 60-70 pages) under the guidance of a thesis advisor.

Undergraduate Teacher Education Program

Note: The Undergraduate Teacher Education Program is not a concentration. It consists of a series of courses which will prepare students for secondary teacher certification.

The Department of Education, in cooperation with other departments, offers a program of study in teacher education leading to certification in secondary school teaching: the Undergraduate Teacher Education Program (UTEP). This program is offered in English, History/Social Studies, Science (Biology, Chemistry, or Engineering/Physics), and leads to state certification for public school teaching in these fields.

The Undergraduate Teacher Education Program consists of three components: courses in educational theory, courses in the teaching field, and student teaching. These are designed to complement and enhance the liberal education derived from concentration courses and electives.

Students who are interested in completing the Undergraduate Teacher Education Program must confer with the Education Department as early as possible in order to plan a coherent program. The program includes a methods course, offered during the summer in conjunction with teaching at Brown Summer High School, between Semesters VI and VII.

Courses in the teaching field

Because the program emphasizes the importance of knowledge in the teaching field, students are required to complete an academic concentration in the subject which they are preparing to teach or a closely related field. This does not mean that a student must elect a standard concentration in the field. However, such a student must, as part of or in addition to his/her chosen concentration, elect a substantive number of courses in his/her teaching field. Students considering the program should consult with advisors both in the academic department and in the Education Department to design an appropriate program of study that meets Rhode Island state certification requirements and those of many other states.

All of the required courses in education must be taken at Brown. None can be transferred for credit from other institutions. Requirements of the program include:

EDUC 0900 Fieldwork and Seminar in Secondary Education
EDUC 1450 The Psychology of Teaching and Learning
EDUC 1070A Student Teaching: English
or EDUC 1070B Student Teaching: History and Social Studies
or EDUC 1070C Student Teaching: Science
EDUC 1080A Analysis of Teaching: English
or EDUC 1080O
Analysis of Teaching: History and Social Studies
or EDUC 1080A
Analysis of Teaching: Science
EDUC 2060A
Methods of Teaching: English
or EDUC 2060B
Methods of Teaching: History and Social Studies
or EDUC 2060Q
Methods of Teaching: Science
EDUC 2090
Literacy Across the Curriculum
An Education elective.

Education Graduate Program
The department of Education Studies offers graduate programs leading to the Master of Arts in Teaching (M.A.T.) in both Elementary Education and Secondary Education, as well as a Master of Arts (A.M.) in Urban Education Policy.

The two M.A.T programs are Certification eligible for Rhode Island state teacher certification in elementary (grades 1-6) or secondary education (grades 7-12). Rhode Island is a member of the Interstate Certification Compact (ICC) (http://www.ride.ri.gov/EducatorQuality/Certification/Reciprocity.aspx), which has reciprocal agreements with 44 states.

For more information on M.A.T. admission, program requirements, and state certification requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/education-master-arts-teaching

For more information on the A.M. in Urban Education Policy admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/education-urban-education-policy

Courses
EDUC 0400. The Campus on Fire: American Colleges and Universities in the 1960’s.
Ole Miss, Berkeley, Columbia, and Kent State: just a few of the campus battlegrounds where conflicts over civil rights, the Vietnam War, and other major issues were fought in the 1960’s. Students consult primary and secondary sources about higher education’s role in these conflicts, and why the consequences of its involvement still linger today. Enrollment limited to 20 first year students. FYS WRIT
EDUC 0410A. New Faces, New Challenges: Immigrant Students in U.S. Schools.
What challenges do immigrant students face in adapting to a new system of education? By comparing and contrasting the perspectives education stakeholders—students, teachers, administrators, and parents—this course examines a number of key contributions to the study of the immigrant experience in education, as well as a selection of memoirs and films about the pathways these newcomers take in navigating school and (trans)forming their developing identities. Enrollment limited to 20 first year students. FYS
Introduces perspectives on education based in history, economics, sociology, and political science. Students engage foundational texts in each of these fields, using the insights gained to examine controversial issues in American education policy, including policies to address ethnic disparities in student achievement, test-based accountability, class-size reduction, and school choice. Enrollment limited to 20 first year students. FYS
EDUC 0410C. The Literature of Children and Young Adults.
This course considers the literary, dramatic, and visual qualities of the literature of young readers since the 18th century, with a dominant, but not exclusive, focus on literature in English. Topics covered will include dominant themes in visual and textual aspects of these literatures, as well as their history and relationship to societal economics and valuations of children, schooling, and moral codes. Enrollment limited to 20 first year students. FYS
EDUC 0410D. Brown v. Board of Education.
Using sources in history, education, and law this course will explore the landmark Supreme Court case of Brown v. Board of Education which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in Brown and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of Brown and analyze its impact on the civil rights movement, schooling, law, and politics in the late twentieth century and consider its implications for the future. Enrollment limited to 20 first year students. FYS DPLL WRIT
EDUC 0410E. Empowering Youth: Insights from Research on Urban Adolescents.
Together, we consider the design, analysis, and interpretation of research on youth in urban settings. In doing so, we examine the roles of power, privilege, and multiculturalism in research. In the experiential component of the course, students engage in fieldwork in a local school or community-based youth organization. As part of their fieldwork, students design and undertake a research project, thereby bridging theory with practice. Reserved for First Year students. Enrollment limited to 20 first year students. Instructor permission required. FYS DPLL WRIT
EDUC 0410F. The Mind, Brain, and Education.
What do the brain and body have to do with learning? How can research findings from the brain and biological sciences inform educational practices? This first-year seminar will involve discussion of current research from multiple disciplines (e.g., education, neuroscience, neurobiology, psychology) on topics such as brain development, stress, sleep, rhythms, and emotion/motivation. Mini-lectures will provide students with a basic appreciation of the brain and basic bioregulatory systems. Students will gain an understanding of methods for studying brain/behavior interactions and explore implications of new biological/brain findings for learning and education during the preschool, elementary, middle-school, and high-school years. Enrollment limited to 20 first year students. FYS
EDUC 0450. The University: Defining Ideals and Ideas.
The course examines the concept of the university and the college in America, their foundations and development, and society’s expectations of them and their leaders. Philosophical and religious heritage, ethical and moral issues, and major themes, changes, pressures, and their role of presidents embodied in the landscape and contributions of the univeristy and its shape and future will be addressed. FYS
Using sources in history, education, and law this course will explore the landmark Supreme Court case of Brown v. Board of Education which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in Brown and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of Brown for education and explore the meaning of equity in the past and present. Enrollment limited to 20 sophomore students. DPLL WRIT LILE
EDUC 0800. Introduction to Human Development and Education.
Introduces the study of human development and education from infancy through young adulthood. Provides a broad overview of scientific understanding of how children develop and how research is generated in the field. Major topics include biological foundations, mind, cognition, language, emotion, social skills, and moral understanding based on developmental theories and empirical research. The educational implications of research on human development are discussed.
EDUC 0840. Public Policy and Public School Reform.
Will examine and assess the strategies and policies fashioned-particularly at the state and district level-to address the complex and intractable issues facing public schools.
EDUC 0850. History of Intercollegiate Athletics.
This team-taught course traces the changing place of intercollegiate athletics on the American college campus over the past 150 years. Topics examined include, among others, the historical relationship between
academic and athletic pursuits; commercialization and professionalization; the role of the NCAA and of the media; the cult of the coach; and the significance of race, gender, and class. Emphasis on critical reading, active participation in discussion, and developing research and writing skills. The course will meet twice weekly, sometimes as a whole and sometimes in smaller groups, to discuss readings, films, and guest presentations. Enrollment limited to 30.

EDUC 0900. Fieldwork and Seminar in Secondary Education. Combines study of current educational issues with extensive fieldwork that allows the student to observe how these issues translate themselves into reality on a daily basis. Each student reads and discusses recent writing about educational history, theory, and practice, and observes a class in a local school for 32 hours. The final paper synthesizes reading and observations.

EDUC 1010. The Craft of Teaching. What is the "craft of teaching"? A wide variety of texts are used to investigate the complexity of teaching and learning. Considering current problems as well as reform initiatives, we examine teaching and learning in America from the perspectives of history, public policy, critical theory, sociology, and the arts. Weekly journals and reading critiques; final portfolio presented to the class.

EDUC 1020. The History of American Education. This course is an introduction to the history of American education with an emphasis on K-12 public schooling. Using primary and secondary sources, we will explore the development of public schools and school systems, debates over aims and curriculum, conflicts over school governance and funding, and struggles for equity and inclusion over time. We will analyze the relationship between schooling, capitalism, and democracy. Finally, in exploring how different generations have defined and tried to solve educational dilemmas, we'll consider how this history might help us approach education today.

EDUC 1030. Comparative Education. National systems of formal education, over the past two centuries, have proliferated massively. International organizations, governmental and nongovernmental, have long promoted the universal provision of mass education as central goals in the modern way of life. At the same time, the way children are raised, and the kinds of adults they become, varies considerably. Comparative education seeks to explore this interplay of variety and uniformity. Enrollment limited to 40.

EDUC 1040. Sociology of Education. The eclectic sociological imagination is turned upon that crucial modern institution: education. Considers formal education as a contemporary institution and schools as organizations both in comparative perspective and in more microscopic ways. Asks what schools and schooling means to society and to children from different social and economic circumstances. Enrollment limited to 50.

EDUC 1050. History of African-American Education. This course will examine the history of African-American education with particular emphasis on the twentieth century. We will explore African-Americans' experiences with schooling under slavery and segregation, the struggle for desegregation and equity North and South, and the place of education in African-Americans' quest for equal rights. We will also consider how the African-American experience with public schooling makes us rethink major narratives of American education, democracy, and equality of opportunity and how an historical understanding of these issues may help us engage contemporary debates. DPLL

EDUC 1060. Politics and Public Education. Who exercises power in public education? This course examines the key institutions (e.g. school districts, states, Congress, and the courts) and actors (e.g. parents, teachers, interest groups, and the general public) shaping American K-12 education in order to understand recent policy trends and their consequences for students. Major policies discussed include school finance, textbook adoption, school accountability, and school choice. Particular attention is given to the federal No Child Left Behind Act of 2001 and debates over its reauthorization. Previous coursework in American politics or public policy is suggested but not required.

EDUC 1070A. Student Teaching: English. S/NC.
EDUC 1070B. Student Teaching: History and Social Studies. S/NC.
EDUC 1070C. Student Teaching: Science. S/NC.
EDUC 1080A. Analysis of Teaching: English. S/NC.
EDUC 1080B. Analysis of Teaching: History and Social Studies. S/NC.
EDUC 1080C. Analysis of Teaching: Science. S/NC.
EDUC 1090. Adolescent Literature. What are teens and tweens reading? What should they read? Do books that adults view as "trashy" ruin kids' literary sensibilities? Provide access to the wider world of academic discourse? How can reading adolescent literature provide adolescents with a path toward holding a reader identity? This course will present a general overview of the historical, socio-cultural, academic, and political issues that provide context for the use and availability of adolescent literature today. It presents a strong introduction to contemporary texts that interest adolescents inside and outside of the classroom. Particular attention is paid to issues of reading engagement for striving adolescent readers, issues of access to literacy through adolescent literature, ways that adolescent literature can be paired with the classics, and issues of censorship in American public schools, classrooms and public libraries. Students in this course will walk away with an understanding of the place of adolescent literature in today's debates as well as a background in choosing, reading, and analyzing the literature itself. Written assignments include weekly reading responses, an annotated bibliography, and a short, 3-5 page paper. There is a substantial amount of independent self-selected reading as well as one collaborative group project with a presentation.

EDUC 1100. Introduction to Qualitative Research Methods. Designed for sophomores or juniors concentrating in education studies, but also open to other undergraduates interested in qualitative research methods. Through readings, class exercises and discussions, and written assignments, examines issues related to the nature of the qualitative research methods that are commonly used in education, psychology, anthropology, and sociology. Enrollment limited to 20.

EDUC 1130. Economics of Education I. How do we attract good teachers to public schools? What are the economic returns to early-childhood intervention programs? These are just two examples of important education policy questions. This course introduces key concepts of microeconomic theory and uses them to analyze these and other policy questions. Organized around a structured sequence of readings. First year students require instructor permission.

EDUC 1150. Education, the Economy and School Reform. Changes in the economy have had dramatic negative consequences for those without a college degree. This seminar explores the impact of these changes on workplace organization and the demand for skills, on what is taught in schools, and on school reform. Prerequisites: Education and PP concentrators, EDUC 1130 and EDUC 1110 (or equivalent); Economics concentrators, ECON 1110 or ECON 1130, and ECON 1620. Enrollment limited to 20. WRIT

policy decisions. This course examines both the difficulties involved in answering causal policy questions, and research designs that can overcome these difficulties. Prerequisite: EDUC 1110, POLS 1600, ECON 1630, SOC 1100 or equivalent. Enrollment limited to 32.

EDUC 1180. Education for Liberation.
Does education challenge inequality, or (re)produce it? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions at different levels—the classroom, the school, the community, the nation, and the global society. We first examine the proposition that education can be a tool of oppression, and then consider how communities have organized struggles to demand and define a liberatory education. Rather than evaluate any technical school "reform" efforts, we consider attempts at revolutionary alternatives to dehumanizing educational conditions and institutions. Enrollment limited to 25. S/N/C

Examines a century of efforts to improve schooling in the U.S., from John Dewey to Theodore Sizer and E.D. Hirsch, from "social efficiency" to charter schools and No Child Left Behind. How have these movements been affected by the historical contexts in which they operated? Have they produced any lasting results? How, if at all, should current reform movements be informed by the experiences of the past? Enrollment limited to 40.

EDUC 1220. The Anthropology of Education.
Designed to introduce students to the many forms of "education" across the life-span and in different cultures, this course will call on students to step beyond their own schooling. Of particular importance will be the uses of materials, experts, space and time in different educational settings. Film and print materials will allow students to rethink the idea of "learner" and "teacher" in terms of varying needs, goals, and situations.

EDUC 1230. Urban Teachers and Educational Change in Historical Perspective.
Will explore the history of American teachers in the urban context from the rise of the common schools in the mid-nineteenth century to the present. Through the analysis of rich primary and secondary sources, students will examine the ways in which teachers have experienced and, in turn, shaped the schools. Focusing on public elementary and secondary school teachers of the nation’s urban centers, this historical inquiry draws from the history of education, labor history, and the history of identity.

EDUC 1260. Emotion, Cognition, Education.
Provides an understanding of the role of emotions in influencing cognitive and social development. Reviews selected topics in the growing area of emotions and social cognition. Discussions focus on critical reviews of the literature and the application of the literature to education. Basic knowledge of the area is not assumed, so students in various areas are invited to participate.

EDUC 1270. Adolescent Psychology.
Provides systematic treatment of the psychological, biological, and sociocultural nature of the adolescent. Both an individual and a collective perspective on the nature of the adolescent and adolescence are used to provide an analytical and comprehensive understanding of the complex environment and psyche of the adolescent. Readings include theoretical and empirical papers from such areas as psychology, sociology, anthropology, and education.

EDUC 1280. International Perspectives on Informal Education.
Internationally, informal learning figures centrally from early childhood through the lifespan. Voluntarily chosen areas of expertise, societally necessary tasks, and interpersonal relationships lead individuals, corporations, and communities to undertake informal education. Central to this course is examination of major means and conditions of such learning in international contexts through four primary themes - play, everyday science, social entrepreneurship, and community collaborations. DPLL

EDUC 1290. From Theory to Practice in Engaged Scholarship: Creating Community Based Learning Courses.
This course will explore theories of community-based learning and engaged scholarship within the context of higher education. The course is designed to provide students with an understanding of the possibilities in the teaching and learning exchange to address significant social concerns. Enrollment limited to 20.

EDUC 1430. The Psychology of Race, Class, and Gender.
Focuses on the social construction of race, class, and gender and how this construction influences an individual's perception of self and other individuals. Topics include identity development, achievement, motivation, and sociopolitical development. Enrollment limited to 30. WRIT

EDUC 1450. The Psychology of Teaching and Learning.
Seeks both to demystify the process of teaching and to illuminate its complexities. Assists students with such questions as: What shall I teach? How shall I teach it? Will my students respond? What if I have a discipline problem? Focuses on the teaching-learning process and student behavior, as well as research, theory, and illustrations concerned with classroom applications of psychological principles and ideas. Prerequisites: EDUC 0800 or EDUC 1710. Enrollment limited to 50.

EDUC 1560. Philosophy of Education: Educational Thought and Practice.
Consideration of different philosophies of education (classical, progressive, radical, feminist, multicultural). This iterative inquiry-based collaboration locates knowledge constructively and relationally, emphasizing classroom discussion and presentation, careful reading and writing, (including on-line), school-site observation, and midterm and final projects on our philosophies and praxes of education. Enrollment limited to 20. DPLL LILE WRIT

EDUC 1580. Cross-Cultural Perspectives on Child Development.
Focus on role of culture in child development, infancy to young adulthood. Reviews contemporary theories and empirical research to examine various age periods and domains of development. Major topics: infant care, parenting, socialization, gender roles, cognition, moral development, affect, adolescence, and education and schooling in formal and informal settings. Enrollment limited to 50.

Combines intensive study of primary and secondary sources from American history and literature between 1845 and 1980 with extensive consideration of how to teach these topics to secondary school students. Topics include the Cold War, McCarthyism, consumer society, civil rights, the women’s movement, Vietnam, and Watergate, often studied through unconventional sources such as popular music, movies, television shows, and fiction. Recommended prerequisite: HIST 0520 or equivalent. Enrollment limited to 20. Instructor permission required.

Despite expending significant energy on education reform in this country and globally, most efforts fail to achieve their lofty ambitions, due to their reliance on “silver bullet” strategies and/or poor execution. This course will focus on management approaches to improving school system performance, enabling students to (a) explore key education reform strategies (b) adopt a senior management mindset through weekly discussion of case studies; and (c) broaden their perspective through use of domestic and global school system examples. The course is appropriate for juniors, seniors and graduate students, who bring an interest in education and a commitment to active classroom discussion. Enrollment limited to 24.

EDUC 1650. Policy Implementation in Education.
This course offers an “analytical foundation” for students interested in public policy implementation, with particular emphasis on education. Drawing on social science research, the course examines strengths and limitations of several frameworks, including the “policy typology” school of thought, the rational actor paradigm, the institutional analysis, the bargain model, the organizational-bureaucratic model, and the “consumer choice” perspective. Enrollment limited to 20. WRIT

EDUC 1690. Literacy, Community, and the Arts: Theory into Practice.
An exploration of ways to improve student literacy skills through the performing arts in area schools. Students read about the theory and practice of literacy and the arts, research national and local initiatives, engage in arts activities, and spend time in area classrooms working with local teachers and artists to draft curriculum materials to be used in summer and school-year programs.
EDUC 1700. The Asian American Experience in Higher Education.
This course is an inter-disciplinary exploration of Asian Americans in higher education and the impact of their participation on the broader academic landscape. It considers the historical roots of Asian American collective identity; the evolution of Asian American Studies programs; consequences of the model minority myth; and the psychosocial and structural barriers to participation and academic achievement across different Asian American groups as compared to other racial/ethnic minority groups. Enrollment limited to 20. DPLL LILE

EDUC 1710. History and Theories of Child Development.
An examination of child development from a historical and theoretical perspective, including key historical figures such as Darwin, Hall, Baldwin, Binet, Freud, Watson, Piaget, Vygotsky, Gesell, McGraw, Bowlby, and Bayley. Explores theoretical conceptualizations of children and adolescents and investigates the representations of children in popular culture, governmental legislation, education, and public policy.

EDUC 1720. Urban Schools in Historical Perspective.
Why did urban schools, widely viewed as the best in the nation in the early twentieth century, become a “problem” to be solved by its end? How have urban schools been shaped by social, economic, and political transformations in cities and by other public policies? How have urban schools changed over time? This course will ask these and other questions to explore how historical perspective can help us better understand urban schools today. We will analyze the impact of changes in demographics, urban renewal and suburban development, the political economy of cities, educational expectations, and demands for equity. Enrollment limited to 20.

EDUC 1730. American Higher Education in Historical Context.
A study of 350 years of American higher education. The first part traces the growth and development of American higher education from premodern college to the modern research university. The second part examines issues facing higher education today and places them in historical context. Particular attention is given to: the evolution of curriculum; professionalization; student life; and the often competing priorities of teaching, research and service. WRIT

EDUC 1740. Academic Freedom on Trial: A Century of Campus Controversies.
Inside and outside the classroom—for professors, students, administrators, and others—academic freedom has been contested by forces external and internal to the university. This course focuses on challenges to and changes in the definition and application of “academic freedom” from the end of the 19th century to the present day, with particular attention to academic freedom during times of crisis, especially war time, and includes consideration of current issues such as speech codes, corporate and government funding of research, and the place of religion on campus. Enrollment limited to 40. WRIT

EDUC 1750. Contemporary Social Problems: Views from Human Development and Education.
Explores social problems in terms of contemporary theories and research in human development and education. The class chooses issues for discussion and researches their mechanisms and possible solutions. Demands basic knowledge of theory and research in psychology, sociology, or anthropology, and background in educational issues. Prerequisite: EDUC 0800, 1270, or 1710; or any other two social science courses.

EDUC 1770. Student Culture in Higher Education.
American higher education is unique because students as much as faculty have defined the undergraduate educational experience on campus. Through literary societies, Greek life, athletics, newspapers, clubs, rituals, protest movements, and social networks, students have created their own culture that has become for many a quintessential part of college education in America. This course looks at the historical development of student culture, its purpose, and current form while placing it in the larger American social context.

EDUC 1850. Moral Development and Education.
Examines contending approaches to moral development and its fostering in the home, school and peer group. Topics include philosophical underpinnings of moral theory, cognitive and behavioral dynamics of moral growth, values climate of contemporary American society, the role of schooling, and variations attributable to culture and gender. Prerequisites: EDUC 0800, 1270, or 1710, or CLPS 0610 (COGS 0630), or CLPS 0600 (PSYC 0810). Enrollment limited to 30. WRIT

EDUC 1860. Social Context of Learning and Development.
Focuses on the social environment that contributes to the development of children’s minds, language, self-understanding, relations with others, affect, and attitudes toward learning. Examines the period from birth through young adulthood. Topics include children’s social interactions, parental expectations and socialization practices, and the influences of family, peers, school, and media. Prerequisites: EDUC 0800, EDUC 1270, EDUC 1430, EDUC 1580, EDUC 1710, CLPS 0610 (COGS 0630), or equivalent. Enrollment limited to 30. WRIT

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 1990. Independent Reading and Research.
Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 2060A. Methods of Teaching: English.
S/NC.

EDUC 2060B. Methods of Teaching: History and Social Studies.
S/NC.

EDUC 2060C. Methods of Teaching: Science.
S/NC.

EDUC 2070A. Student Teaching: English.
S/NC.

EDUC 2070B. Student Teaching: History and Social Studies.
S/NC.

EDUC 2070C. Student Teaching: Science.
S/NC.

EDUC 2080A. Analysis of Teaching: English.
No credit course.

EDUC 2080B. Analysis of Teaching: History and Social Studies.
No credit course.

EDUC 2080C. Analysis of Teaching: Science.
No credit course.

EDUC 2090. Literacy Across the Curriculum.
Focuses on three major areas of pedagogy: literacy across the curriculum, special education, and teaching English Language Learners. Topics include: current theory and practice in the three areas, legal requirements for special education, planning for differentiated instruction, assessment and diagnosis of student skill levels, measuring and reporting student achievement, adapting content for ELLS, selecting and working with texts, and effective vocabulary instruction. Open to MAT students only. S/NC.

EDUC 2110. Summer Practicum and Analysis.
Introduces MAT students to elementary school students through work in a unique summer enrichment program for inner city Providence children. Summer Practicum meetings and seminar meetings focus on arts education; introductions to the teaching of literacy, math and science; curriculum and lesson planning; creating a community of learners; issues of diversity; and physical education. S/NC.

EDUC 2120. Practicum in Elementary Education.
Students participate in an elementary classroom for 2 1/2 days a week for 12 weeks, participating in all aspects of the school day. Students assume responsibility for individualized instruction, small groups and some daily routines. Examines topics in child development; race, class, ethnic and
linguistic diversity; assessment; teaching and learning as well as topics arising from the experiences in classrooms. S/NC.

EDUC 2130. Issues and Trends in Education. Introduces students to a range of topics that define the current debates in education: the competing purposes of state sponsored education; the standards movement; diversity issues and educational outcomes; the reading wars; standardized testing; multicultural and bilingual education; school choice; teacher unions and teacher professionalism. Students read about these issues from multiple perspectives and form their own views of the debates. Open to undergraduate enrollment.

EDUC 2140. Methods and Materials of Math, Science, and Technology. Using a developmental approach, students are introduced to the major concepts and teaching methods used in elementary math and science classrooms. S/NC.

EDUC 2150. Language and Literacy in the Elementary School Classroom. An introduction to Comprehensive Literacy instruction in reading and writing, including strategies for teaching interactive read alouds; shared reading and shared writing; phonics and word work; independent reading workshop; guided reading; writer’s notebooks; writing workshop; and children’s literature via an author study. S/NC.

EDUC 2270. Student Teaching. Provides no fewer than 360 hours of student teaching and observation-equivalent to six semester hours of credit in institutions operating on a semester-hour basis and fulfills the supervised student teaching requirements for elementary school teaching certification in Rhode Island and in ICC member states. S/NC.

EDUC 2280. Seminar: Principles of Learning and Teaching. A critical analysis of the activity of teaching, restricted to and required of students taking EDUC 2270. The course requires curriculum and lesson planning, reflective analyses of student learning and classroom teaching, and places learning and teaching in context with attention to issues of diversity of schools and their student bodies. S/NC.

EDUC 2300. Structures and Systems in Urban Education. The aim of this course is to prepare future education policy leaders to understand, have the tools to investigate and be effective in the context of the many organizations that affect the well-being and ultimate success of urban students. Throughout the course, the city of Providence, along with nearby cities, will be a major “text.”

EDUC 2310. Introduction to Educational Research. Intensive six-week course designed to prepare future leaders in urban education policy with a fundamental understanding of basic concepts, techniques and strategies of social science research. The goal is for students to acquire skills and knowledge that enable them to inform the design, implementation and ultimate use of applied research in a policy setting and to appreciate its limitations.

EDUC 2320. Quantitative Research Methods and Data Analysis. The goal of this course is to provide students in the Urban Education Policy course with a foundation and understanding of basic statistical analyses so that they will be able to design and carry out their own research and will be able to use data to inform education policy and practice.

EDUC 2330. Urban Politics and School Governance. This course is a requirement for students of the MA in Urban Education Policy program. It deals with the political science and public policy central question of: How can public institutions be redesigned to improve accountability? Particular attention will be given to the governance and politics in urban public school systems.

EDUC 2340. Human Development and Urban Education. In this course we will learn relevant theories and research in the academic field of Human Development to urban education practice and policy from preschools to high schools. Special emphasis will be placed in areas where there is research convergence and that are relevant to urban populations and settings. Recommended prerequisites: EDUC 0800 or EDUC 1710 or EDUC 1750.

EDUC 2350. Economics of Education II. Introduces students to the main economic theories and related applied work that inform education policy analysis. In so doing, the course combines economic theory, econometric studies, and education and institutional literature in an examination of current issues in U.S. education, particularly those issues that are most relevant to urban education. The course begins with examinations of key concepts and theories from microeconomics, labor economics, and public economics that are most relevant for studying questions in education. After laying this theoretical foundation the course then examines how these theories can illuminate and aid policy analysis around key topics in U.S. education. Open to graduate students only.

EDUC 2360. Policy Analysis and Program Evaluation for Education. Informed education policymaking requires reliable information about the causal effects of government programs and other factors shaping educational outcomes. This course offers an overview of education policy analysis with an emphasis on econometric strategies for measuring program impacts. It aims to make students critical consumers of policy evaluations and to equip them with tools to conduct their own research. Topics covered include the political context for policy research, social experiments, alternative strategies for making causal inferences, and cost-benefit analysis. Prerequisites: EDUC 1110, POLS 1600, SOC 1100, or written permission of the instructor.

EDUC 2370. Internship. Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2380. Internship. Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2450. Exchange Scholar Program.

Education Alliance for Equity and Excellence in the Nation's Schools

The Education Alliance at Brown University is a reform support organization committed to advancing equitable educational opportunities that prepare all student populations to succeed in the 21st century. Our mission is to enhance learning for culturally and linguistically diverse students. We build partnerships with communities and educational organizations to apply research and transform instructional practice. We design and deliver expert services around data collection and analysis, professional learning, and research evaluations.

Since 1975, we have partnered with schools, districts and state departments of education to apply research finding in developing solutions to educational challenges. We focus on district and school improvement with special attention to underperformance and issues of equity and diversity.

The Education Alliance operates The New England Equity Assistance Center (NEEAC), a program that helps states, districts, and public schools plan and implement policies and practices that promote access to high-quality education for all students. This is one of ten regional centers funded by the U.S. Department of Education under Title IV of the 1964 Civil Rights Act to provide training and technical assistance on education.
issues related to race, gender, and national origin. At the request of state or district officials, partnerships are formed with schools to find solutions to a variety of equity problems. This work aims to close persistent achievement gaps, to promote safe schools, and to help all students reach high standards.

The Executive Director of The Education Alliance is Dr. Maria Pacheco.

Egyptology and Ancient Western Asian Studies

Chair
John M. Steele

The Department of Egyptology and Ancient Western Asian Studies is a new department designed to explore what is sometimes called the birthplace of Western civilization. It builds on the strengths of Brown’s former Department of Egyptology, widening the intellectual focus from ancient Egypt to all of Ancient Western Asia, also known as the Ancient Near East, where and when societies first began exhibiting more complex forms of organization such as writing. As a field of higher learning, Egyptology and Ancient Western Asian Studies is represented at most of the world’s great universities. Its establishment at Brown, beginning the 2005-06 academic year, is a product of Brown’s Plan for Academic Enrichment, a commitment to higher learning in the humanities and the sciences.

For additional information, please visit the department’s website: http://www.brown.edu/academics/egyptology/

Egyptology and Ancient Western Asian Studies Concentration Requirements

The concentration in Egyptology and Ancient Western Asian Studies offers students a choice of two tracks: Ancient Western Asian Studies or Egyptology. The department promotes collaborations with other academic units at Brown devoted to the study of antiquity including Archaeology, Classics, Judaic Studies, and Religious Studies. Egyptology and Ancient Western Asian Studies also collaborates with Brown’s Joukowsky Institute for Archaeology and the Ancient World.

Ancient Western Asian Studies Track

Also known as the Near East or Middle East, Western Asia includes present-day Iraq, Syria, Turkey, and other neighboring states, a broad geographic area that was connected in antiquity with the wider world—the Mediterranean, North Africa, the Arabian Peninsula, Central Asia, and the Asian subcontinent. Students will be exposed to the critical study of the ancient cultures of this region (ca. 3400 B.C.E.—100 C.E.) using the tools of archaeology, epigraphy, and historical inquiry. A variety of interdisciplinary, comparative, and theoretical approaches will be introduced to give students the tools and methods to explore this region’s ancient languages and literatures, political and socio-economic modes of organization, art and architecture, religious traditions and other systems of knowledge, such as early science.

The Ancient Western Asian Studies (AWAS) track requires a total of at least ten (10) courses that are determined in the following way:

Introductory courses: 3

- AWAS 0800 Introduction to the Ancient Near East or ARCH 0370 Archaeology of Mesopotamia or ARCH 1600 Archaeologies of the Near East
- AWAS 0200 Introduction to Akkadian
- AWAS 0210 Intermediate Akkadian

Foundational Courses (at least one course from each of the following three areas):

- History and Culture of Ancient Western Asia: 1
- Ancient Egyptian Literature: 2
- Ancient Babylonian Magic and Medicine:
- Ancient Scientific Texts: Akkadian

Depth Requirement: At least two additional courses offered in AWAS or ARCH dealing with ancient Western Asia. These courses must be approved by the undergraduate concentration advisor.

Elective: At least one elective course on the ancient world broadly defined. Usually this course will be offered in Ancient Western Asian Studies, Anthropology, Archaeology, Classics, Comparative Literature, East Asian Studies, Egyptology, History, History of Art and Architecture, Judaic Studies, Philosophy, or Religious Studies. The elective course must be approved by the undergraduate concentration advisor.

Total Credits:

- 10

1 This list contains possible offerings but should not be considered exhaustive.

Egyptology Track

The Egyptology track requires a total of at least ten courses. Six of these must be taken by all concentrators, but the remaining four can be chosen from a fairly broad range of courses, to suit individual interests.

Introductory Courses: 6

- EGYT 1310 Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I) and Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II)
- EGYT 1430 History of Egypt I and History of Egypt II
- ARCH 0150 Introduction to Egyptian Archaeology and Art
- EGYT 1420 Ancient Egyptian Religion and Magic or ARCH 1625 Temples and Tombs: Egyptian Religion and Culture

Depth Courses: 2

- EGYT 1330 Selections from Middle Egyptian Hieroglyphic Texts
- EGYT 1410 Ancient Egyptian Literature

Breadth Course - Any course covering the ancient Near East or Mediterranean world outside Egypt, such as:
Elective Course: Any course germane to ancient Egypt or the ancient Near East or Mediterranean world. Alternative and elective courses must be approved by the undergraduate concentration advisor. Such courses will normally be offered by Egyptology and Ancient Western Asian Studies, the Joukowsky Institute for Archaeology and the Ancient World, Religious Studies, Classics, Judaic Studies, Anthropology, History of Art and Architecture, History, or Philosophy. Concentrators are welcome to take most courses offered by Egyptology and Ancient Western Asian Studies (EGYT and AWAS), Archaeology (ARCH), or related departments, though some may require the instructor’s approval. Concentrators should consult with the concentration advisor to discuss the courses most suitable to their interests.

Total Credits 10
1 Required for all students pursuing the Egyptology track.
2 Or an EGYT or ARCH course in material culture.

Capstone
All students pursuing either the Ancient Western Asian Studies or Egyptology tracks are required to complete a capstone project. The project can take many forms, but the common feature shared among all possible projects will be a public presentation. Typically in the final semester before graduating, the concentrator will give this capstone presentation before faculty, fellow students, and other interested audiences. If the concentrator is writing an undergraduate honors thesis, the procedure for which is detailed below, this work should provide the content for the capstone presentation. Students not writing an honors thesis will base their presentation on a research project more in depth than a class project, though the topic may stem from a course project or paper. The format of the presentation may vary; suggestions range from an illustrated lecture to a video or an installation presented with discussion. Both the content and the format of the capstone project should be discussed with and agreed upon by the concentration advisor no later than the end of the first semester of the senior year.

Honors in Egyptology and Ancient Western Asian Studies
1. Becoming an honors candidate
Students who wish to consider pursuing honors should meet with the Undergraduate Concentration Advisor in the first half of their sixth semester.
Eligibility is dependent on:
• Being in good standing
• Having completed at least two thirds of the concentration requirements by the end of the sixth semester.
• Having earned two-thirds “quality grades” in courses counted towards the concentration. A “quality grade” is defined as a grade of “A” or a grade of “S” accompanied by a course performance report indicating a performance at the “A” standard.

To pursue honors candidacy, eligible students must:
• Secure a faculty advisor and discuss plans for the proposed thesis project well before the established deadline; this can be done by email when a student is abroad.
• Prepare a thesis prospectus (see below).
• Submit the prospectus to the advisor, one other proposed faculty reader (at least one of the readers must be in the department) and the department chair no later than the first week of the seventh semester.

The structure of a thesis prospectus:
An honors thesis in Egyptology or Ancient Western Asian Studies is a substantial piece of research with some degree of originality that demonstrates the student’s ability to frame an appropriate question and deal critically with the range of original and secondary sources. The thesis prospectus is a short analytical document consisting of several parts. It will normally include a concise and focused research question; a justification for that question that demonstrates familiarity with previous research on the topic; a project description that includes a discussion of the types of evidence available and appropriate to answering the proposed question; a discussion of methods of collecting and analyzing that evidence; a conclusion that returns to the research question and assures the reader that the project will add value to our understanding of the topic; and a bibliography. The prospectus will ordinarily be in the range of 5-7 pages in length, exclusive of bibliography. The prospectus will include proper citations throughout.

Determination of whether or not a student may pursue the proposed project will be made on review of the prospectus by the readers and department chair. Prospectuses will be evaluated on the following scale:
1. No concerns about the viability of the project.
2. No concerns about the viability of the project, but minor weaknesses in the execution of the prospectus.
3. Concerns about the viability of the project, but willingness to reevaluate a revised prospectus submitted within two weeks of receipt of evaluation.
4. Reservations that the prospectus does not describe an honors-worthy project.
5. Poorly conceived and shoddy work.
Prospectuses will be returned to the student with this numerical evaluation and comments one week after submission of the prospectus. A prospectus must receive an evaluation of 1 or 2 prior to the third week of the seventh semester for a student to be admitted to the honors track. Students who submit an original prospectus that is graded 4 or 5 will not be permitted to rework the prospectus for the second submission.

2. Developing, completing and submitting the honors project
Once accepted as honors candidates, students will pursue a course of study that goes beyond what is expected of a regular concentrator. This includes:
• Enrollment in two semesters of independent study in Egyptology or Ancient Western Asian Studies (these do not fulfill course requirements towards the concentration).
• Twice-monthly meetings with the thesis advisor and once-monthly meetings with the second reader. These meetings will be scheduled at the beginning of each term.
• Submission of a comprehensive outline to both readers no later than October 15 (for May graduates)
• Regular submission of drafts. A partial draft including a complete version of at least one chapter or section is due before Reading Period of the seventh semester.
• A complete draft is due to both readers no later than March 15 (for May graduates).
• The revised final thesis is due in both electronic and physical form to both readers and department chair April 5 (for May graduates).

Failure to meet any deadline will result in automatic termination of the honors process. No extensions will be granted. If a thesis is turned in late but before the end of the term, credit and grade for the Independent Study may still be granted.

3. Evaluating the submitted work of honors candidates
In order to receive honors a student must be found to have:
• Remaining in good academic standing throughout the academic year.
• Not violated the Academic Code of Conduct during honors candidacy.
• Complete or be about to complete all concentration requirements.
• Produced a thesis that is judged by the readers to meet the department’s expectations for honors work (see below), and turned it in by the established deadlines.
• Successfully defended the thesis during a half hour public presentation held during the final exam period of the eighth semester.

Students who submit theses that are deemed to fall short of the expectations will graduate without honors. In that case, the theses will count as a capstone project.

4. Expectations for honors theses:
Originality:
An honors thesis in Egyptology or Ancient Western Asian Studies is expected to add to existing scholarship. The thesis must be based
on close work with primary sources (usually in publication rather than in person), supplemented by critical engagement with a substantial amount of relevant secondary literature. While the resulting study is not necessarily expected to be ground-breaking originally, and may engage with a well-studied topic, it will usually include a new insight into or interpretation of the material considered.

Scope:
An honors thesis is not a book or dissertation. It is, however, a very serious piece of research and writing for which two dedicated study courses have provided substantial time to the honors student. The question upon which the honors thesis is based should be focused enough to allow an in-depth treatment, generally in under 100 pages or 30,000 words (exclusive of bibliography and illustrations). Appropriate length will vary considerably depending on the topic itself and the nature of the primary sources being considered, particularly if substantial translation of ancient textual sources is required.

Argument:
The thesis should present a sustained analytic argument in answer to its structuring question. A thesis should not be primarily descriptive or narrative in nature. Each chapter should contain a sub-argument that is clearly related to the overall argument of the thesis. The significance of the argument and its relationship to prior scholarship should be clearly articulated. Honors theses are not expected to demonstrate comprehensive familiarity with the secondary literature, but they are expected to engage critically and maturely with important works on the defined topic.

Methodology:
Egyptology and Ancient Western Asian Studies are very broad fields, and the appropriate methods will be determined in conjunction with the thesis advisor on the basis of the questions and types of evidence - textual, archaeological, art historical - under consideration. With very few exceptions the methodology of the thesis is expected to be conventional rather than innovative, rooted in the accepted practices of the field in question.

Organization and writing:
An honors thesis must be well organized and written. It should include an introduction and conclusion as well as well-considered chapters that allow the reader to follow the line of reasoning easily. The relationship of any section to the larger whole should be clear, and segues should help the reader move between sections. Writing should be grammatically correct, well copy-edited, professional, and consistent. Citations and bibliography must be in an accepted style as determined in consultation with the advisor.

Egyptology and Ancient Western Asian Studies Graduate Program
The Department of Egyptology and Ancient Western Asian Studies offers two tracks leading to one Doctor of Philosophy (Ph.D.) degree: Egyptology and Ancient Western Asian Studies. The department offers a Master of Arts (A.M.) degree as an option after two years of study, but does not admit applicants into the non-Ph.D. program.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/egyptology-and-ancient-western-asian-studies

Courses

Ancient Western Asian Studies

AWAS 0200. Introduction to Akkadian.
This course is an intensive introduction to the writing system, grammar and vocabulary of Akkadian, the language of ancient Mesopotamia (modern Iraq). Akkadian is the earliest known Semitic language (related to Arabic and Hebrew), first written over four thousand years ago, and the language of some of the oldest written myths, historical documents, omens, magical formulas and even love poems in the world. Students will learn the classic Old Babylonian dialect (ca. 1800 BCE), and read selections from texts in the original language. No prerequisites.

AWAS 0210. Intermediate Akkadian.
This course is the second semester of an intensive, yearlong introduction to the Akkadian (Babylonian/Assyrian) language. Students will deepen their knowledge of the cuneiform writing system and continue to develop their grasp of Akkadian grammar. Readings from Mesopotamian texts in the original language will include, among others, selections from the Laws of Hammurapi, Assyrian historical texts (such as the accounts of Sennacherib’s siege of Jerusalem), and the story of the Flood from the Standard Babylonian Epic of Gilgamesh. Prerequisite: Introduction to Akkadian (AWAS0200) or permission of the instructor.

From the Hanging Gardens of Babylon to the Tower of Babel to Babylon 5, the city of Babylon in ancient Iraq holds an important place in contemporary culture. But how much of what is commonly known of Babylon is true? In this course we will explore the ancient city of Babylon through its texts and archaeological remains and investigate the ways Babylon has been viewed over the past two thousand years. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

This seminar explores the relationship between monsters and civilization, considering what exactly it is that monsters do for us; why we create, deploy, and ultimately destroy them; and what they tell us about the peoples among whom they sprang up and roamed. Emphasized is the developing civilization in Mesopotamia, and the place and functioning of monsters and demons in the visual arts and literary contexts, as well as in the worldview, of the early cities of that region. Enrollment limited to 20 first year students. FYS

Images tell stories that carry us to imaginary worlds. A story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity public monuments displayed visual narratives that animated public spaces, enthralled audiences and delivered state ideologies. This course involves reading narrative imagery from the Middle East and East Mediterranean including magical hunt scenes in prehistoric caves, political tales on Mesopotamian relief sculpture, visions of paradise in Egyptian tombs, Aegean frescoes and Assyrian reliefs of exotic landscapes. Using contemporary perspectives on art, we will explore the material power and everyday significance of pictorial representations as intimate spectacles. Enrollment limited to 20 first year students. FYS LILE WRIT

AWAS 0800. Introduction to the Ancient Near East.
This course offers an introduction to the story of the political, social and cultural history of the ancient Near East, from prehistory to the end of the Iron age (ca. 330 BC). Both literary sources and archaeological evidence are examined as relevant. Near East is understood here in its widest geographic extent, including primarily the Mesopotamian lowlands, Iranian and Syro-Anatolian highlands, as well as the Levantine coast. The course not only offers a foundational survey of the historical developments in the region, but also addresses the broader methodological and historiographic problems involved in Near Eastern studies. State formation and the development of complex societies, cult practices and cuneiform literary traditions, art, architecture and material culture, issues of landscape and settlement systems, agricultural production, regional and interregional trade, and craft production will constitute the central issues in the course. WRIT DPLL

AWAS 1100. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia.
Creation, the Flood, the Tower of Babel—well-known myths such as these have their origins in ancient Mesopotamia, the land between the Tigris and Euphrates Rivers. Using both ancient texts in translation and archaeology, this course will explore categories of Mesopotamian culture labeled "myth" and "religion" (roughly 3300-300 BCE), critically examining the ancient evidence as well as various modern interpretations. Topics will include myths of creation and the flood, prophecy and divination, death and the afterlife, ritual, kingship, combat myths and apocalypses, the nature and
expression of ancient religious experience, and representations of the divine. There are no prerequisites. WRIT DPLL

AWAS 1150. The Art of Civilization: Artist, Image, and Aesthetic in the First Cities
This course examines various facets of the relationship between art and developing social/political complexity in the ancient world, with case studies drawn primarily from the ancient Near East and Egypt between the rise of the first cities in the late fourth millennium BCE through to the fall of the Achaemenid “world empire” in the mid-fourth century BCE.

The course will focus on the cultural and religious-historical interpretation of physical displacements among sacred places, including urban processions, visits to temples and journeys to sacred places within the context of the Ancient Near Eastern religions. We will attempt to sketch a map of the holy centers and cultic itineraries, focusing on case studies from Babylonia, Assyria and Syria from the third to the first millennium BC as well as comparative case studies from surrounding cultures. These topics will be explored with an emphasis on how written and archaeological sources can be interpreted with the help of theoretical literature.

AWAS 1500. Ancient Babylonian Magic and Medicine.
A survey of ancient magic and medicine focusing on Mesopotamia (present-day Iraq, ca. 2500-300 BCE), with an emphasis on beliefs about the body, health, illness, and the causes of disease, such as witchcraft or angry gods. Topics will include the training of healers, exorcists, and herbalists; concepts of contagion and plague, modalities of treatment, incantations, prayers, and empirical remedies like prescriptions; ancient perceptions of problems like sexual dysfunction, the perils of pregnancy, tooth decay, epilepsy, and mental illness. Readings will be drawn from ancient texts (in translation), archaeology, and parallels with ancient Egypt, Greece, Rome, and the Bible. No prerequisites. Not open to first year students. WRIT

AWAS 1600. Astronomy Before the Telescope.
This course provides an introduction to the history of astronomy from ancient times down to the invention of the telescope, focusing on the development of astronomy in Babylon, Greece, China, the medieval Islamic world, and Europe. The course will cover topics such as the invention of the zodiac, cosmological models, early astronomical instruments, and the development of astronomical theories. We will also explore the reasons people practiced astronomy in the past. No prior knowledge of astronomy is necessary for this course. DPLL

AWAS 1650. Time in the Ancient World.
Time plays many roles in civic and everyday life: calendars provide a way of regulating activities ranging from gathering taxes to knowing when to perform religious rituals. This course will provide an introduction to the way time was measured, used, regulated and conceived in the ancient world. We will cover topics such as the calendars used in Mesopotamia, Egypt, Greece and China, sundials and other instruments used for measuring time in the ancient world, and the way time is used in scientific and non-scientific texts. WRIT

AWAS 1700. Astronomy, Divination and Politics in the Ancient World.
This course will explore the relationship between astronomy, divination and politics in the ancient world. The sky provided ancient cultures with many possibilities for observing occurrences that could be interpreted as omens. In many cultures, celestial omens were directed towards the king and his government. As a result, interpreting and controlling celestial omens became an important political activity. In this course, we will explore how and why astronomical events were used politically in ancient Mesopotamia, the Greco-Roman world, and ancient and medieval China. No prior knowledge of astronomy is necessary for this course. WRIT

AWAS 1750. Divination in Ancient Mesopotamia.
The interpretation of natural events as portents of good or bad outcomes played an important role in religious, political, scholarly and everyday life in ancient Mesopotamia. In this course we will study Mesopotamian omen literature from textual, scientific, philosophical and cultural viewpoints in order to understand how divination operated and what it was used for. WRIT

AWAS 2120. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler. Prerequisite: AWAS 0200. Open to graduate students only.

AWAS 2130. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler.

AWAS 2310A. Ancient Scientific Texts: Akkadian.
Readings and analysis of a major scientific text in Akkadian. Prerequisite: AWAS 0202 or 0210. Open to graduate students only.

AWAS 2310B. Assyriology I.
The kings of Babylonia and Assyria took every opportunity to boast about their military victories, successful hunts, the completion of new cities, and the building and decoration of temples and palaces. But is there the only possible version of Mesopotamian history? This course examines episodes in the history of Babylonia and Assyria (ca. 2400-500BCE) by looking at the political and social relationships among kings, political elites, entrepreneurs, and commoners; emphasis is placed on reading Akkadian texts both in the original and in translation, with a focus on letters, royal inscriptions, and astrological reports. Prerequisite: AWAS0210 or instructor’s permission. WRIT

AWAS 2310C. Assyriology II.
This seminar will focus on selected topics of Neo-Assyrian history (1000-612 BC), including: the royal family; the queen and her influence; celebrating New Year’s festivals; hunting lions; conquering a city; constructing and decorating palaces and temples; urban renewal and the founding of new cities; the substitute king ritual; and scholarly life. Assyria in the first millennium BC will be examined principally from Assyrian texts in translation. WRIT

AWAS 2310D. Ancient Scientific Texts: Cuneiform Literature.

AWAS 2400. Akkadian Literary and Religious Texts.
Readings in Akkadian literary and religious texts in the original language and script. Possible genres include myths, proverbs, and literary miscellanea as well as prayers, hymns, incantations, rituals, prophecies, and divinatory texts. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Akkadian cuneiform is required. A reading knowledge of both German and French is recommended but not required.

AWAS 2500. Readings in Sumerian.
Advanced readings in Sumerian cuneiform texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Sumerian cuneiform is required. A reading knowledge of both German and French is strongly recommended but not required.

AWAS 2600. Topics in Cuneiform Studies.
Advanced readings in Akkadian and Sumerian cuneiform texts in the original script and language(s). The focus of this course will be on the close reading of a specific genre, period, and/or dialect. A rotating cycle of topics to be covered may include the following with a synchronic and/or diachronic approach: historical texts and royal inscriptions, legal and administrative texts, letters, literary and religious texts, medical texts, or scholastic texts. May be repeated for credit. Prerequisite: AWAS 0210 or instructor permission. Open to juniors, seniors, and graduate students.

AWAS 2700. Special Topics in Ancient Sciences.
This course will be a topics course containing a detailed technical and cultural study of an area of science in a culture of the ancient world. Although intended for graduate students, undergraduate students who have taken EGYT 1600 or AWAS 1600 or a similar course may be admitted at the instructor’s discretion.

AWAS 2900. Introduction to Hittite Language and Literature.
This course is an introduction to Hittite language, literature, and culture. Hittite, the earliest attested Indo-European language (thus related to Greek, Latin, and Sanskrit) was used in Anatolia during the second millennium BCE. It survives in tens of thousands of tablets written in cuneiform script. Students will learn the basic grammar of the language
and read in the original or in translation specimens from the fascinating textual legacy of the Hitnites, which includes myths, prayers, laws, diplomatic texts as well as formal and informal letters. They will also become familiar with the cultural environment in which those texts were composed.

**AWAS 2980. Reading and Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**AWAS 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**AWAS XL1ST. Courses of Interest to Concentrators in Ancient Western Asian Studies.**
Fall 2014
The following courses may be of interest to Ancient Western Asian Studies concentrators. Please see the sponsoring department for the time and location of each course.

**Archaeology and the Ancient World**
ARCH 0150 Introduction to Egyptian Archaeology
Spring 2015
The following courses may be of interest to Ancient Western Asian Studies concentrators. Please see the sponsoring department for the time and location of each course.

**Religious Studies**
RELS 0640 Dying to be with God: Jihad, Past and Present

**Egyptology**

**EGYT 1200. Archaeology of Ancient Egypt.**
A general survey of the archaeology of ancient Egypt in prehistoric and Pharaonic times. Covers such areas as the development of private and royal funerary monuments, private and royal dwellings, and temples. Attention is also paid to the principles of Egyptian art and architecture and, where appropriate, to archaeological connections with the surrounding cultures. Offered in alternate years.

**EGYT 1210. Archaeology of Ancient Egypt.**
See Archaeology of Ancient Egypt (EGO120) for description.

**EGYT 1310. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I).**
Much of this two-semester sequence is spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology—essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. No prerequisites.

**EGYT 1320. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II).**
Continuation of a two-semester sequence spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology - essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. Prerequisite: EGYT 1310.

**EGYT 1330. Selections from Middle Egyptian Hieroglyphic Texts.**
Readings from the various genres of classical Egyptian literature, including stories and other literary texts, historical inscriptions, and religious compositions. Students will be expected to translate and discuss assigned texts. Prerequisite: EGYT 1310, 1320.

**EGYT 1340. Selections from Middle Egyptian Hieratic Texts.**
Introduction to the hieratic script and readings from a variety of hieratic documents, including literary compositions, letters, and religious texts. Students will be expected to translate and discuss assigned texts. Prerequisite: EG 131, 132 (EGYT 1310, 1320).

**EGYT 1410. Ancient Egyptian Literature.**
A survey of one of the most intriguing aspects of ancient Egyptian culture. Readings (in translation) of many of the most significant literary documents that survive from Egypt. Presentation of a reasonable amount of historical perspective. Class discussions concerning the nature, purpose, quality, and effectiveness of the works read. Two term papers. No prerequisites. Offered in alternate years. WRIT

**EGYT 1420. Ancient Egyptian Religion and Magic.**
An overview of ancient Egyptian religion from both a synchronic and diachronic perspective. Examines such topics as the Egyptian pantheon, cosmology, cosmogony, religious anthropology, personal religion, magic, and funerary beliefs. Introduces the different genres of Egyptian religious texts in translation. Also treats the archaeological evidence which contributes to our understanding of Egyptian religion, including temple and tomb architecture and decoration. Midterm and final exams; one research paper. WRIT

**EGYT 1430. History of Egypt I.**
A survey of the history and society of ancient Egypt from prehistoric times to the end of the Eighteenth Dynasty (ca. 3000-1300 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history. WRIT

**EGYT 1440. History of Egypt II.**
A survey of the history and society of ancient Egypt from the Ramesside Period to the Roman conquest (ca. 1300-30 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history.

**EGYT 1450. History of Egypt III, Libyans, Nubians, and Persians in Egypt.**
Continuation of EGYT 1430, 1440 (not prerequisites). Covers the Third Intermediate and Late Periods (ca. 1000-332 B.C.E.), from the end of the New Kingdom to Alexander’s conquest. Characterized by internal conflict and long intervals of foreign domination, this era, is often described as a period of decline, but closer study shows it to be eventful and rich in documentation. Offered in alternate years.

**EGYT 1455. Black Pharaohs: Nubian Rule over Egypt in the 25th Dynasty.**
The course will cover Egypt’s 25th Dynasty (728-657 BC), when rulers of Nubia, located in the region of modern Sudan, added Egypt to their territories. Using a wide range of textual and archaeological evidence, students will learn about the history of famous ‘black pharaohs’ such as Taharqa and study some of Africa’s most impressive archaeological remains. This fascinating period is not well understood and has often been afflicted in the past by racist, colonialist scholarship; using primary sources and recent theory on ethnic identity, this class will re-examine the complex and changing relationship between Egypt and Nubia.

**EGYT 1460. History of Egypt IV. The Age of Cleopatra.**
Continuation of EGYT 1430, 1440, and 1450 (not prerequisites). A survey of the history and society of ancient Egypt from Alexander’s conquest to the Arab conquest..ca. 332 B.C.E.-A.D. 600. Covers the Ptolemaic (323-30), Roman (30 B.C.E.-ca. A.D. 300), and Byzantine (ca. A.D. 300-640) periods. Focal point and pivot is the Ptolemaic period, from Alexander the Great to Cleopatra (332-30 B.C.E.). Offered in alternate years.

**EGYT 1465. Daily Life In Ancient Egypt.**
Ancient Egypt is remembered for its grand temples and enduring tombs. Historians often favor the examples of grandeur, forgetting the daily lives of non-royal ancient Egyptians. This class will investigate the daily lives of these underrepresented ancient Egyptians - craftsmen, servants, women, children - and address concerns such as illness, status, economy, magic and death. Additionally, we will look at the individual and discuss sexuality, love, style and fashion, religious practice and the family. Class format will include lectures and discussions, presentations, and tours through virtual temples which will enable us to reconstruct the daily lives of Ancient Egyptians.

**EGYT 1470. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods.**
The history of Egypt may be famous for the tombs, pyramids and mummys of the Pharonic periods. This course, however, offers a
vision of a different Egypt, a later Egypt: one that evolved from the traditions of the past but was infused by Christianity, Islam, Arabic, and the emergence of one of the world's great cities: Cairo. Students will experience the heritage of Egypt that is contained in the mosque of al-Azhar, the monasteries of the Egyptian desert, and the pageantry and ritual of a new set of ruling elites. At the same time they will understand the continuities of this land which Egyptians refer to as Umm al-Duniya “Mother of the World”.

EGYT 1480. Egypt in the Global World.
From the 4th to the 2nd millennium BC we see Ancient Egypt as part of a wider world in the Eastern Mediterranean. Egypt had diplomatic and trade contacts with the major powers and smaller political entities of this period as well as armed conflicts. These contacts left an abundance of material evidence in Egypt in the archaeological and epigraphical records such as foreign luxury items and pottery, and depictions of foreigners in Egyptian tombs and temples. The course will shed light on the varying intensity and character of the relationship between Egypt and her neighbors in the Levant, Nubia and Libya and wider Eastern Mediterranean world.

The course explores medical practices and beliefs, including healing magic, in ancient Egypt, from the beginning of the Old Kingdom to the end of the Roman period, drawing evidence from both ancient texts (in translation) and archaeological sources. In addition to surveying ancient Egyptian medical practices, the course investigates the social world of the physicians and their patients, and their views on their bodies and illnesses. Topics surveyed include medical handbooks and recipes, physicians’ equipment and training, gods, demons and disease, pregnancy and childbirth, veterinary medicine, the health effects of the ancient Egyptian diet, and later myths about Egyptian medical knowledge. DPLL WRIT

EGYT 1490. Calendars and Chronology in Ancient Egypt and the Ancient World.
Time is the dimension of history. Chronology studies how we know when events happened. Chronology is much more important to “BC history” than to “AD history.” History books state that the great Ramses II ruled around the thirteenth century B.C.E. But how do we know this? The focus of this class is on the answers to such questions through the study of the foundations of the history of Egypt specifically and of the ancient world in general. Some prior knowledge of Egyptian language or civilization might be handy but is by no means required.

EGYT 1500. Ancient Egyptian Art and Architecture.
Ancient Egyptian art and architecture had a remarkably long history, and much that was produced is amazingly well preserved. This course will focus on the invention and development of these material expressions of high culture through detailed studies of monumental buildings and decorated private tombs, as well as the sculpture, painting, and minor arts from the Predynastic period through the end of the Middle Kingdom (c. 3700-1790 BC). Enrollment limited to 20.

EGYT 1510. Ancient Egyptian Art II.
Considers the art of ancient Egypt’s New Kingdom or Empire Period (1500-1100 B.C.). The relief carving and painting of Theban temples and tombs are studied in detail, and the developments leading to the revolutionary Amarna style of art is carefully analyzed. Decorative arts, Tutankhamun’s treasures, and recent exciting discoveries are all surveyed. WRIT

EGYT 1520. The Archaeology of Ancient Egyptian Household and Settlement.
Survey of the primary settlement remains from the Pharaonic Period of ancient Egypt, addressing the practices and problems in settlement and household archaeology. Not open to first year students.

EGYT 1550. Ethnic Identity in Graeco-Roman Egypt.
