Examines a number of different types of texts-novels, essays, journalism, oral narratives-in order to trace the connections between the internal colonialism of America in the nineteenth century and U.S. colonial ventures in the Caribbean, Asia, and Latin America. Writers to include Melville, Twain, Marti, Black Elk, Crane, Du Bois, and Roosevelt

ENGL 1560G. Romantic Orientalism.
Representations of “the East” in British writing and visual art from 1775 to 1825. Historical and theoretical accounts of “orientalism” and analysis of the political and ideological sources and consequences of “orientalist” representation. Readings in Wordsworth, Coleridge, Owenson, DeQuincey, Byron, Percy Shelley, and Mary Shelley

ENGL 1560H. The Victorian Novel.
What specific historical conditions can be seen to have led to the emergence of the novel as a leading literary form in the Victorian era? What cultural work was it called upon to perform? How does it address broader philosophical, economic, political and social questions of the Victorian era? Authors include Dickens, Eliot, Hardy, Stevenson, and Conrad

ENGL 1560M. Orientalism and the Place of Literature.
Literary representations of “the East” from the Enlightenment through Modernism and their relation to changing conceptions of the meaning and value of “literature” itself. Thinking about “place” in representational, geopolitical, and institutional terms. Readings from the “Arabian Nights,” Mary Wortley Montagu, Oliver Goldsmith, Coleridge, Byron, De Quincey, Kipling, Michael Ondaatje, and others; theoretical and historical perspectives from Said, Williams, Eagleton, and others

ENGL 1560N. Eighteenth-Century Novel.
The 18th century marks the beginning of the novel as we know it. This course considers the “rise” of fiction during the "long" eighteenth century. Beginning with Behn, Haywood and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin

ENGL 1560O. Slavery and American Literature.
This course examines the ways in which slavery is represented in 19th-century American literature. We will consider efforts to delineate the social practices and effects of chattel slavery and deployments of slavery as a form of political rhetoric. Readings include works by Douglass, Jacobs, Stowe, Melville, Howells, Twain, and DuBois

ENGL 1560Q. The Poetry of Politics: Baudelaire, Arnold, Whitman.
Explores the special challenge to the traditional form of lyric poetry posed by the post-industrial modern city of the mid-19th century. We will study the poetry and prose of Charles Baudelaire, Matthew Arnold, and Walt Whitman as responses to the urban conditions represented by mid-19th-century Paris, London, and New York. Motifs to be considered include modernity, commodification, and crowds. Priority will be given to junior and senior concentrators in English, Comparative Literature, Modern Culture and Media, and French Studies. First-year students and sophomores may request permission by email to take the course

ENGL 1560R. From Franklinstein to Einstein: Literature and Science from 1800 to 1950.
Science and literature as interrelated ways of knowing and learning, focusing on questions of language, observation, interpretation, and value. Themes include utopias and dystopias, evolution and degeneration, man and machine, entropy and chaos, and the relationship between literary imagination and scientific creativity. Readings include poems, plays, novels, and essays (Mary Shelley, Tennyson, Huxley, Arnold, Holmes, Wells, Stoppard) alongside a range of scientific writing (Darwin, Faraday, Huxley, Gould, James Watson). Enrollment limited. First-year students
need instructor permission to register; Banner registrations after classes begin require instructor approval

ENGL 1560S. Founding an American Realism, 1865-1945. An inquiry into the nature of realism and an examination of its various historical manifestations—literary, legal, political, and aesthetic—between the Civil War and World War II. Authors to be considered include DeForest, Chesnutt, Twain, Howells, Norris, Gilman, Wharton, Hemingway, Steinbeck, Hurston, and Wright. Enrollment limited

ENGL 1560T. Literature, Religion, and "Culture Wars" in America. This course examines important moments where religious and literary histories con verge. It reads "classic" American literary works in context of ongoing conflicts between evangelical and secular forces in American life, and it thinks about literature as an arena where these very categories are contested and revised. Major readings will include works by John Winthrop, Benjamin Franklin, Harriet Beecher Stowe, African American women preachers, Emerson, Mark Twain, and Flannery O'Connor. Enrollment restricted

ENGL 1560U. Radicals and Conservatives: the later 18th Century. The relationship between literature and society is demonstrated by conservatives like "Dictionary" Johnson as well as by radicals like visionary Blake. Readings include works by Johnson, Boswell, Burke, Gibbon, Sterne, Burney, Wolstonecraft, Godwin, and Blake. Enrollment limited to 20

ENGL 1560V. The Lives of a Text. Books are composed not merely of concepts, for they are material objects whose forms, functions, and value can vary widely. We will make extensive use of rare editions at the John Hay Library to help us explore not only the literary content of works but also their production and dissemination in various formats and for various audiences. Authors include Shakespeare, Irving, Poe. Enrollment limited to 15. Not open to first year students

ENGL 1560W. Getting Emotional: Sociality, Strife, and the Romantic Self. This course examines relationships between such terms as emotions, feelings, politics, and society in several key texts from 18th- and 19th-century literature. What does it mean to "get emotional"? What does it mean to "feel"? If feelings are or can be violent, are they meaningful? Can feeling be thought? This course will consider these questions in 19th-century novels, stories, poetry, and philosophical essays. Authors include: Wordsworth, Austen, Blake, Coleridge, Keats, Shelley, Oscar Wilde, Pater, Kant, Melville, Hofmannsthal, Hume. Enrollment limited to 20

ENGL 1560X. Transatlantic America. What was "transatlantic" culture in colonial and 19th-century America? How did American writers continue to engage and respond to English culture? Franklin, Emerson, Sedgwick, Paine, Addison and Steele, Carlyle, and others. Enrollment limited

ENGL 1560Y. The Ethics of Romanticism. An exploration of the intersections of moral philosophy and Romantic literature and culture. Writers studied may include Smith, Hume, Bentham, Hazlitt, Hegel, Wordsworth, Coleridge, Keats, Shelley, Byron, Godwin, Equiano, Austen. We will consider how writings of the Enlightenment and Romantic period differently reflect upon problems of knowledge, otherness, identity, community, and aesthetics, and how these reflections are related to the ethical imagination. We will also juxtapose our selections with several recent theoretical debates. Enrollment limited to 20. LITE

ENGL 1560Z. Time and Narrative. This course studies fiction that experiments with the representation of time alongside philosophical and critical texts on the theory of time. We will consider how engagements with the question of time shape the structures, language, characters, plots, themes, and goals of narrative, looking at topics such as time and language, story and narration, memory and history. We will also consider the impact of technological and social developments on the sense of time (the wristwatch, the telegraph, railway timetables). Authors include St. Augustine, Laurence Sterne, John Locke, David Hume, Ambrose Bierce, Charles Dickens, H.G. Wells, Thomas Hardy, Henry James, Virginia Woolf. Enrollment limited

ENGL 1561C. Swift and His Contemporaries. Jonathan Swift’s works are central to this course’s investigation of early 18th-century literature and culture. The reading focuses on the period as an "information age" energized by issues not unlike those of our own time: partisan politics, money, proliferation of new forms of textuality, globalization, changing views on gender and sexuality, love, religion, and war. The emphasis will be on irony, parody, and satire. Other writers include Congreve, Defoe, Manley, Pope, Gay, Montagu, Addison, and Steele. Students who have taken ENGL 1510T may not register for this course. Not open to first-year students or students who have taken ENGL1510T. Enrollment limited

ENGL 1561D. Writing and the Ruins of Empire. An exploration of literary representations of "empire" and "imperialism" from the 18th century to the present. Readings in Gibbon’s Decline and Fall of the Roman Empire, Volney’s Ruins of Empire, and a wide range of 19th- and 20th-century texts. Some consideration of theories of imperialism and of visual representations of cultures of empire. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised.

ENGL 1561E. The Western. An examination of the formula Western in American fiction, art, and cinema, with a view toward situating the genre within urban middle-class culture in the late 19th- and 20th-century United States. Authors to be considered include Twain, Harte, Crane, Austin, Cather, Doctorow, Reed, Leonard, and L’Amour. Films: Destiny Rides Again, Stagecoach, Rio Bravo, The Seven Samurai, Fistful of Dollars, Dirty Harry, The Man from Laramie, Paint your Wagon, Act of Violence, among others. Enrollment limited to 20

ENGL 1561F. Sacred Readings: The Bible, Biblical Interpretation, and Victorian Literature. Bible reading in terms of apocalyptic and other prophecies permeates Victorian literature, coloring ideas of politics, gender, character, and the arts in ways that seem a secret code. The course therefore reads works by Charlotte Brontë, the Brownings, Carlyle, Hopkins, Newman, the Rossettis, Ruskin, and Swinburne in light of once common ideas of typology, prophecy, and apocalypse. Enrollment limited to 20. LITE WRIT

ENGL 1561G. Swift, Pope, Johnson. The course provides in-depth study of three major writers of the eighteenth century and will include cultural contexts. Readings include Gulliver’s Travels, The Rape of the LOCK, and Rasselas. Enrollment limited to 20. LITE

ENGL 1561H. The Brain and the Book: Thinking and Reading in the Victorian Novel. Considers mostly nineteenth-century novels in light of theories of cognition, both nineteenth-century and contemporary. This course proposes to study how some of the foundational questions of literary study—the nature of language, the location of meaning, the experience of reading, the power of metaphor, and the sources of creative thought—can also be studied from the perspective of mental science. Authors may include Charles Dickens, Wilkie Collins, George Eliot, Henry James. Limited to juniors and seniors only. Others by permission of the instructor if space allows. Banner registrations after classes begin require instructor approval. Enrollment limited to 20

ENGL 1561I. Gender, Narrative, and the 19th-Century Novel. Like Freud, Victorian novelists tell stories of desire that often center on a female character. This seminar examines some of the contexts, conventions, and tensions that go into the making of a "portrait of a lady" in this novelistic tradition. Texts to be studied include Freud’s case history Dora, and novels by Brontë, Collins, Eliot, and James. Enrollment limited to 20

ENGL 1561J. The Poetics of Confession. This course explores the theoretical structures and models of confession in various literary and cinematic sources, with a special emphasis on work from the nineteenth and twentieth centuries. Authors might include: St. Augustine, Rousseau, De Quincey, Foucault, Wordsworth, Bronte, Wilde

ENGL 1561K. Restoration and Eighteenth-Century Drama. After almost two decades of closure, public theaters re-opened in 1660. This new beginning occasioned new plays, new kinds of performance and production, and new intersections between the stage and society. We will study works by Etheredge, Wycherly, Congreve, Dryden, Behn, Gay, Lillo, Sheridan, and others. Not open to first-year students

ENGL 1561L. Revolution, War, Poetry: Wordsworth in the 1790s. William Wordsworth’s poetic experiments during the 1790s are often said to have invented modern poetry as the poetry of consciousness;
they are also efforts to find language adequate to a time of revolution, war, and modernity. This seminar examines texts by various writers of the revolutionary era, but focuses on Wordsworth's poetry from the early 1790s to the 1805 Prelude. Enrollment limited to 20. Not open to first-year students

ENGL 1561M. American Literature and the Corporation.
A study of the development of the American novel from the Civil War to the present in light of the emergence of the corporation as the principal unit of economic enterprise in the United States. We will survey corporate theory from Lippmann to Collins, and use it to frame the novel's development from realism through modernism into postmodernism. Corporate theoretists to be considered: Lippmann, Dewey, Berle, Drucker, Mayo, Demming, Friedman, Coase. Novelists to be considered: Twain, Dreiser, Wharton, Stein, Faulkner, Steinbeck, Wright, Ellison, McCullers, Reed, Gaddis, Morrison. Enrollment limited to 20

ENGL 1561N. Hawthorne and the Literary Market.
Hawthorne's career in context of the rise of literary criticism. Particular attention to his relation to sentimentalism and abolitionism. Meville's publishing, and print cultures in America and Britain. Enrollment limited to 20

ENGL 1561O. Lincoln, Whitman, and The Civil War.
A literary and cultural history of the Civil War with special emphasis on Whitman's poetry and Lincoln's addresses and letters. It focuses on issues of race, democracy, and modernity. Enrollment limited to 20. LILE

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required

ENGL 1610. American Poetry II: Modernism.
Study of modernist American poetry. Readings include Pound, Eliot, Stevens, Williams, H.D., Moore, Hughes, and others

ENGL 1650. Modernist Fiction.
Readings in British and American fiction and culture in the early 20th century, with particular attention to the relationships between modernist literary experiment and contemporary questions about empire, race, the changing status of women, and the grounds of literary authority. Writers may include Conrad, H.D., Joyce, Larsen, Lawrence, Rhys, Toomer, Woolf. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class

Examines Asian American writings that are difficult, complex, and/or experimental—that are, in Kingston's phrase, "extravagant." Explores the issue of what is at stake-politically and aesthetically—in writing that explicitly challenges the generic conventions with which much Asian American literature is linked: autobiography, the Bildungsroman, ethnography, realism, and sentimentalism

ENGL 1710B. American Vertigo: How the World Sees the U.S.: Why does America exercise such an extraordinary attraction for foreign writers? And why, moreover, is the America that appears in those writings so often unrecognized? This class examines the representation of American life from DeToqueville to Henry-Lévy, looking at work by Amis, Antonioni, Adorno, Nabokov, Kincaid, and others. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class

ENGL 1710C. Race and Nation in American Literature.
From the heyday of literary realism through the rise of modernism, race definitively shaped the national literature of the U.S. This course will consider representations of racial identities in relation to key historical and aesthetic developments within these two periods. Authors include Mark Twain, Frances Harper, Charles Chesnutt, Stephen Crane, William Faulkner, and John Fante

After examining the relations between fiction and nonfiction, the class will consider the work of Tom Wolfe, Joan Didion, Annie Dillard, and others within contexts created by essayists (Montaigne), satirists (Swift), and Nineteenth-century sages ( Carlyle, Thoreau, Nightingale, and Ruskin).

The class will become acquainted with various nonfictional forms including prose satire, the meditative essay, sage-writing, autobiography, and travel literature. WRIT

Focusing on pairs of African American and Asian American works that address parallel concerns, we explore the continuities and discontinuities between these literary traditions. Authors we examine may include James Weldon Johnson and Winnifred Eaton, Richard Wright and Carlos Bulosan, Chang-rae Lee and Toni Morrison, Karen Tei Yamashita and Caryl Phillips

How do major African novelists represent the interplay of tribe, nation, and race in African societies? This course will introduce students to key themes and contexts of African literature in English. We will read the work of the writers for the historical sources and conceptual implications of these categories in modern Africa. Writers include Achebe, Emecheta, Farah, Ngugi, and Vera

ENGL 1710G. Faulkner.
In examining Faulkner's major works from the early stream-of-consciousness novels through the history-driven and race-inflected texts of the 30s and 40s, this course will evaluate Faulkner's practice as a writer working both in and against Southern culture, and as Modernist writing within an international context. Issues include narrative experimentation, race, class, gender, and the evolution of Faulkner's work. Students should register for ENGL 1710G S01 and may be assigned to conference sections by the instructor during the first week of class

ENGL 1710H. Black Internationalism and African American Literature.
The notion that African Americans are an extension of a global racial community has been a fixture of black politics and culture for more than a century. In this course, we will consider how the concept of global racial alliance has shaped black political resistance, literary practice, and critical theory. Likely writers include DuBois, Hughes, McKay, and Wideman. DVPS

ENGL 1710I. Harlem Renaissance: The Politics of Culture.
The Harlem Renaissance was a remarkable flowering of culture in post-war New York as well as a social movement that advanced political agendas for the nation. This course takes up the relationship between literature and politics by exploring such matters as the urbanization of black America, the representation of the black poor, the influence of white patronage, and the rise of primitivism. Writers may include Hughes, Hurston, Larsen, Fisher, Locke, and McKay. DVPS

ENGL 1710J. Modern African Literature.
Many African writers produce their works in one European language or another. Often, these works are more widely read in Europe and North America than on the African continent itself. This course will use these facts as starting points to explore key themes, antecedents, and intellectual contexts of contemporary African writing. We will examine fiction, drama, poetry, critical prose, and visual materials. Writings by Achebe, Farah, Ngugi, Soyinka, Vera, Wicomb. Films by Davidson, Koyan, Seno. DVPS

ENGL 1710K. Plain Folk: Literature and the Problem of Poverty.
Explores poverty as a political and aesthetic problem for the American novelist. Examines the ways that writers have imagined the poor as dangerous others, agents of urban decay, bearers of folk culture, and engines of class revolt. Also considers these literary texts in relation to historical debates about economic inequality. Writers may include Crane, Faulkner, Wright, Steinbeck, and Hurston

ENGL 1710M. Nationalizing Narratives: Race, Nationalism, and the 20th-C. American Novel.
An advanced survey that examines how 20th-century American novels construct the nation as "imagined community" and as "fictive ethnicity." We focus on the central role that conceptions of race—as well as those of gender and sexuality—play in the novelistic visions of America projected by such authors as Ralph Ellison, William Faulkner, Jessica Hagedorn, and Chang-rae Lee. Not open to first-year students. DVPS WRIT
ENGL 1710N. Photography and the American Novel.
Traces the impact made by the emerging medium of photography on American fiction from its very beginnings until the present. Our focus will be on the varying strategies adopted by novelists in response to the representational challenges posed by photography. Writers include Hawthorne, Nabokov, Faulkner, Hurston, Citron, Eugenides, and Barthes.

Students should register for ENGL 1710N S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 1710O. The Dead and the Living.
Readings in literature, theory, psychoanalysis, philosophy and law examine how the relation between the dead and the living shapes the concerns of modernist narrative and thought. Topics include "Living with the Dead," "Haunting and Knowing," "Writing Lives," "Dreaming and Waking," and "Picturing the Dead." Readings include Joyce, Conrad, Woolf, Forster, and Greene as well as Freud, Lacan, Benjamin, and Barthes.

ENGL 1710P. The Literature and Culture of Black Power Reconsidered.
This course reexamines the Black Power movement as a signal development in American literature and culture. We will read classics from Millar, Ellison, McCarthy, Mailer, Pynchon, Wideman, Coover, Delillo, and Ngugiwa Thiong'o. Enrollment limited to 20 seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

ENGL 1710Q. The Dead and the Living.
Readings in literature, theory, psychoanalysis, philosophy and law examine how the relation between the dead and the living shapes the concerns of modernist narrative and thought. Topics include "Living with the Dead," "Haunting and Knowing," "Writing Lives," "Dreaming and Waking," and "Picturing the Dead." Readings include Joyce, Conrad, Woolf, Forster, and Greene as well as Freud, Lacan, Benjamin, and Barthes.

ENGL 1710R. The Literature and Culture of Black Power Reconsidered.
This course reexamines the Black Power movement as a signal development in American literature and culture. We will read classics from Millar, Ellison, McCarthy, Mailer, Pynchon, Wideman, Coover, Delillo, and Ngugiwa Thiong'o. Enrollment limited to 20 seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

ENGL 1710S. Writing War.
Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Barbusse, Brittain, Woolf, Rebecca West, Graham Greene, Pat Barker, Marc Bloch.

ENGL 1710U. What Was Postmodern Literature?
How compatible is the idea of the postmodern with the idea of a historical period? This course looks at recent British and American literature through the optic of postmodern theory, discussing how the theoretical problematization of both history and politics has an impact upon the very possibility of fiction. Readings include Doctorow, Pynchon, Amis, Jameson, Lyotard, Baudrillard. Students will be assigned to conference sections by the instructor during the first week of class.

ENGL 1710W. Literary Impressionism.
An examination of the role of "literary impressionism" in the transformation of the novel from realism to modernism. Writers studied include Henry James, Joseph Conrad, Stephen Crane, Ford Madox Ford, and Virginia Woolf. Close analysis of their narrative methods for dramatizing consciousness, with attention to the political and ethical implications of impressionism's focus on the inner life.

Interested students must register for HMAN 1970L S01.

ENGL 1710Y. American Literature and the Cold War.
A study of American literature in the context of the broad intellectual culture--strategic, ideological, philosophical, aesthetic, and economic--engendered by the conflict between the United States and the Soviet Union from 1945 to 1991. We will assess the role of the bomb, McCarthyism, game theory, the military industrial complex, and strategic doctrines of containment and deterrence in the rise of postmodernism in American literature. Authors to be considered include Bellow, Highsmith, Millar, Ellison, McCarthy, Mailer, Pynchon, Wideman, Coover, Delillo. Students should register for ENGL 1710Y S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 1760A. Joyce and Woolf.
Intensive study of two of the most innovative and influential modern British novelists, with an emphasis on the relation between their formal experiments and their political engagements. Enrollment limited to 20.

ENGL 1760B. Contemporary African American Literature and the End(s) of Identity.
African American writers and intellectuals have begun to question the wisdom of defining black identity in terms that overemphasize the shared racial and cultural heritage of black people. Course assesses a range of literary and scholarly writing that engages these concerns. Explores such topics as the growing class division among African Americans, the effects of integration, the decline of nationalism, and the visibility of sexual minorities. Likely authors include Johnson, Morrison, Wideman, Beatty, and Senna. Enrollment limited. DVPS LILE.

ENGL 1760C. Body and Event in Contemporary Fiction.
Discusses the recent turn to the body and mortality in contemporary fiction, and considers the proposition that episodes of dismemberment in contemporary fiction stand in for the dismantlement of the literary text itself. Readings include Selby, Ellis, Cooper, Acker, Frame, Deleuze, Butler, Blanchot. Enrollment limited to seniors, juniors, and sophomores.

Banner registrations after classes begin require instructor approval.

ENGL 1760D. Race and Detection: American Crime Narratives.
We examine American crime narratives, focusing on their representations of race, class, gender, and sexuality. Writers studied may include James M. Cain, Raymond Chandler, William Faulkner, Sue Grafton, Chester Himes, Walter Mosley, and Mark Twain.

ENGL 1760E. Who's Afraid of Virginia Woolf?
We will read novels, essays, diaries, and letters by Woolf in order to ask how and why Virginia Woolf haunts our culture and to consider her status as a cultural icon. The seminar will explore her work in the contexts of history, modernism, and literary influences, and it will examine the dimensions of Woolf's afterlife--a posthumous dynamic that shapes issues in art, politics, and gender. Enrollment limited to 20 seniors and juniors.

LILE.

ENGL 1760F. City, Culture, and Literature in the Early Twentieth Century.
How did changes in the city shape early 20th-century literature? How does the literature of this period--whether avant-garde or documentary, progressive or conservative--shape the way we imagine the city? Topics may include urban spectacle, mobility and segregation, the neighborhood and the crowd. Authors include Dos Passos, Eliot, Larsen, Orwell, Woolf, Wright. Prerequisite: two previous literature courses. Priority to English and Urban Studies concentrators.

ENGL 1760G. American and British Poetry Since 1945.
Study of poetry after 1945. Readings include Bishop, Plath, Ashbery, Merrill, O'Hara, Heaney, Larkin, Walcott, Rich, Dove. Enrollment limited to 20. LILE.

ENGL 1760I. "Terrible Beauty": Literature and the Terrorist Imaginary.
Why does terrorism fascinate literary writers in the modern period? Is terrorism the figure of something that is unrepresentable in fiction, or is it a type of direct political action that fiction writers aspire to? Can literature's humanistic role of allaying terror survive an age of spectacular politics? How susceptible is terrorism to "aestheticization"? Texts will include works by Conrad, Flannery O'Connor, Naipaul, Dennis Cooper, Frantz Fanon, and Ngugiwa Thiong'o. Enrollment limited to 20 seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

LILE.

ENGL 1760J. Pynchon and His Precursors.
A study not of how Thomas Pynchon's work has influenced American literature, but of how his novels have influenced the way we read writers who came before him. We will read V and Gravity's Rainbow, as well as work by Borges, Highsmith, Ellison, Nabokov, Fitzgerald, Kafka, and Rilke. Limited to 20 senior and junior concentrators in English and Comparative Literature. Others admitted by permission only.

ENGL 1760K. Reading New York.
We will explore narratives of New York City, both fictional and nonfictional, from the early 20th century to the present. Topics to be addressed include immigration, segregation and mobility, cosmopolitanism and the neighborhood, celebrity and postmodernism. Authors may include John Dos Passos, Ann Petry, E.B. White, Jane Jacobs, Rem Koolhaas. Registration limited to English and Urban Studies concentrators. Students from other concentrations should attend class on the first day and will be admitted if space is available. Enrollment limited to 20. Not open to first-year students. Prerequisite: two previous literature classes.

ENGL 1760L. Bloomsbury and Modernism.
This course will explore the contribution of the so-called "Bloomsbury Group" to the development of modernism in Britain. The focus will be...
ENGL 1760T. Literary Africa
limited to 20 juniors and seniors

disciplines shape the imagination but also aim to elicit response and connections between literature and law, and considers how both legal opinions. Examines the conceptual, psychological and rhetorical

ENGL 1760O. Literary Orientalism.
Examines Orientalism as central motif and thematic concern for American writers from Emerson to DuBois to Kingston. Issues to be addressed include the distinctions between U.S., European, and Afro-Orientalism; how intra-Asian differences (i.e., China-Japan, East/South Asia) shape conceptions of the Orient; how whiteness and blackness are constructed via a vis yellowness; the relationship between Orientalism and racism; how "nativist" Asian American literary texts, on the one hand, and diasporic texts, on the other, negotiate the legacy of Orientalism. Enrollment limited

ENGL 1760P. "Extravagant" Texts: Experiments in Asian American Writing.
We examine Asian American writings that are difficult, complex, and/ or experimental: texts that are, in Maxine Hong Kingston's phrase, "extravagant." By looking at works that explicitly challenge the generic conventions with which much Asian American literature is usually linked—autobiography, the Bildungsroman, ethnography, realism, and sentimentalism—we try to arrive at a more expansive sense of what the ends of Asian American cultural politics might be. Enrollment limited to 20. Not open to first-year students. DVPS WRIT

ENGL 1760Q. James Joyce and the Modern Novel.
One measure of James Joyce's achievement as a writer is his influence (as an inspiration, an antagonist, or a competitor) on novelists who came after him. Our primary concern will be with Joyce's formal innovations: How did his audacious narrative experiments transform the novel as a genre? Do his stylistic games break with the realistic tradition or expose its linguistic and epistemological workings? In addition to Dubliners, Portrait of the Artist, and Ulysses, we will read novels by Woolf, Faulkner, Beckett, and Nabokov. Enrollment limited to 20. Not open to first-year students. Instructor permission required

ENGL 1760R. The Roaring Twenties.
The 1920s crystallized much of what we consider modern in 20th-century U.S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to analyze the period's central features: the rise of mass culture and of public relations, changes in women's position, consumerism, car culture, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker. First-year students and students who have taken ENGL 0650K may not register for this course. Enrollment limited

ENGL 1760S. Law and Literature: From Response to Responsibility.
Explores modernism as it is shaped by the normative and ethical concerns of a rapidly changing world through literary works, legal writing, and legal opinions. Examines the conceptual, psychological and rhetorical connections between literature and law, and considers how both disciplines shape the imagination but also aim to elicit response and responsibility. Authors include Walter Benjamin, Joseph Conrad, Virginia Woolf, Rebecca West, Chinua Achebe; legal texts include Blackstone, Holmes, Bentham, Cover and a number of legal opinions. Enrollment limited to 20 juniors and seniors

ENGL 1760T. Literary Africa.
Explores the sense in which the word "Africa" has come to carry a range of disparate moral, epistemological, and political connotations in literary and related discourse. We will study 19th-century autobiographical and travel writing by black African agents of Christian missionary organizations (Ajayi Crowther, Birch Freeman, Philip Quaque, Joseph Wright); critical essays by contemporary scholars of postcolonial cultures (Appiah, Bhabha, Mudimbe, Peel, Pratt); and imaginative literature by African writers (Achebe, Soyinka, Ngugi, Marechera, Vera). Enrollment limited. Not open to first-year students. DVPS

ENGL 1760V. Lying, Cheating, and Stealing.
Explores literature's treatment of transgressions large and small, with particular attention to the way in which modernist narratives expose, obstruct, condone, or condemn acts of wrongdoing. What is the relationship between a misdeed and its retelling? Does writing right the story of a wrong? Readings from Rousseau, Graham Greene, Oscar Wilde, Lauren Slater, Nietzsche, Freud, as well as film, television, and select readings from law. Enrollment limited to 20 seniors and juniors. LILE

Focuses on the complex relationship between the genre of the novel and nationalist rhetorics in the modern U.S. Gives particular attention to how literary discourses of nationalism articulate with those of race, gender, and sexuality

Explores the interrelatedness of racial, sexual, and literary identity in works by U.S. black and Asian male writers. Particular interest given to how the issue of homosocial desire frames literary accounts of racial authenticity. Writers and theorists studied may include James Baldwin, Frank Chin, Ralph Ellison, Frantz Fanon, David Henry Hwang

ENGL 1761L. Reading the Black Masses in Literature and Critical Practice.
African American literary and critical practice in the twentieth century was definitively shaped by claims about the linkages between literature and mass politics. We will unpack the continuities and divides that constituted such assertions. Historical nodal points in our investigations will include racial uplift, the Harlem Renaissance, the Black Power Movement, and the post-identity debates

ENGL 1761M. Asian American Travel Narratives.
Examines mobility and movement as key motifs in Asian American fiction. The course will focus on Asian American literary texts that are structured around travel, both in relation to the United States and to Asia. Our approach will draw from Americanist and Asian Americanist cultural theories about narratives of mobility and from postcolonial theories about travel writing. Enrollment limited

ENGL 1761N. Natural and Supernatural: Issues in the Study of Science and Religion.
Religion has been studied in a number of fields (anthropology, classics, history, philosophy, psychology, sociology) as a complex of human/cultural phenomena to be examined and explained naturally or, as it is said, "scientifically." The course focuses on a set of key classic and contemporary texts in this tradition and on the issues they raise for current understandings of science, religion and the relations—historical, intellectual, cultural and political—between them. Enrollment limited to 20 juniors, seniors, and graduate students

ENGL 1761O. "Everything that is must be destroyed": American Modernism.
This class will attempt to discover whether there is such a thing as American modernism, examining the connections between works and movements as different as Gertrude Stein's highly experimental Three Lives, the Harlem Renaissance (Larsen, Hurston), American Gothic (Anderson, Faulkner), social realism (Wharton, Wright), the cosmopolitan fiction of Fitzgerald and Hemingway, and the proto-postmodern work of Bames and West. Enrollment limited

ENGL 1761P. Yeats, Pound, Eliot.
Readings in the poetry and selected prose of Yeats, Pound, and Eliot. Enrollment limited to 20. LILE

ENGL 1761Q. W. G. Sebald and Some Interlocutors.
The works of W. G. Sebald have received a huge amount of critical attention since his death in 2001, particularly from critics interested in the question of the ethics of literature after Auschwitz. But what is Sebald's literary heritage, and who are his interlocutors? What internal and external connections do his works establish? Besides Sebald's works, readings will include Stendhal, Kafka, Waaler, Borges, Bergson, Resnais, Lanzmann.
Banner registrations after classes begin require instructor approval. Enrollment limited to 20. Not open to first-year students.

**ENGL 1761R. The Non-Fiction of “Race” in 20th-Century American Culture.**

This course examines influential autobiographies and essays about the meaning of race in America across the 20th century. Writers we examine may include W.E.B. DuBois, Sui Sin Far, Younghill Kang, Richard Wright, Norman Mailer, Richard Rodriguez, Maxine Hong Kingston, Paul Gilroy. Enrollment limited to 20 juniors and seniors. DVPS LILE WRIT

**ENGL 1761S. The Fifties in Color: Race, Empire, and the U.S. Cold War Culture.**

In this seminar, we examine a range of cultural texts of the 1950s that provide some productive points of entry into the study of U.S. culture in the early part of the Cold War. We give particular attention to issues of race and ethnicity as they were shaped both by domestic and foreign policy concerns. Enrollment limited to 20. DVPS LILE

**ENGL 1761T. Conrad and Naipaul: The Supremacy of the Visible?.**

The reception of Conrad's works turns on a critical quandary: are his commitments primarily sensory, celebratory and imperialist, or conceptual, subdued and self-critical? This course will examine Conrad's works in detail, and the critical and literary responses to them: most notably, the work of his most direct successor, the British-Caribbean novelist V. S. Naipaul. Other readings include Said, Achebe, Jameson, Badiou, Rancièr, Deleuze. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval. LILE

**ENGL 1761U. History and Memory in Africana Literature (AFRI 1955).**

Interested students must register for AFRI 1955 S01

**ENGL 1761V. The Korean War in Color.**

We examine how the Korean War was depicted in U.S. popular culture as it was taking place with a particular focus on how it catalyzed a wholesale transformation of both domestic and transnational narratives of race. In addition to looking at Hollywood film, newspaper and magazine coverage from the 1950s, we also analyze how this event has been imagined by Asian American authors many years later. We will read the fiction of Susan Choi, Ha Jin, Richard Kim, and Chang-Rae Lee. Enrollment limited to 20.

**ENGL 1761W. Modern South Asia: Literature and Theory.**

This seminar provides an overview of 20th and 21st century writing from and about South Asia. It will serve, in addition, as an introduction to postcolonial studies. Theoretical readings will focus on issues of diaspora; transnational cultural circulation; and subaltern historiography. Fiction will be primarily Anglophone (Anand, Du Bois, Forster, Naipaul, Rushdie, etc.), with some vernacular texts in translation (Chughtai, Limbale, Premchand, Tagore). Enrollment limited to 20. DVPS

**ENGL 1761X. Desiring the Nation: Gender and Nationalism in South Asia (GNSS 1960).**

Interested students must register for GNSS 1960 S01

**ENGL 1761Y. Issues in World Literature.**

What is world literature? How does it relate to fields like comparative literature and postcolonial studies? We will read fiction and drama usually featured in this canon, including works by Achebe, Coetzee, Homer, Kafka, Rushdie, Shikibu, and Walcott. We will also attend to the critical paradigms that constitute the field, from Goethe’s Weltliteratur to more recent theorizations by Casanova, Damrosch, Deleuze, Moretti, Spivak, etc. Enrollment limited to 20. Not open to first-year students. DVPS

**ENGL 1761Z. Modernism and Everyday Life.**

We will examine modernist literature in the context of art, design, and theories of everyday life to ask about how this period understood ordinary objects and events. Could they be the proper subject matter of art? In the right circumstances, might they actually be art? Writers may include Woolf, Joyce, Williams, Eliot, Stein, James, Freud, de Certeau. Enrollment limited to 20. Not open to first-year students

**ENGL 1800. Undergraduate Independent Study in Modern and Contemporary Literatures and Cultures.**

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required

**ENGL 1900A. “Literature” and the Ideology of the Aesthetic.**

Theoretical and historical analysis of the idea of “literature” as writing that has the status of art, in relation to the emergence and elaboration of discourses of the “aesthetic.” Readings in 18th- and 19th-century German and British sources (Kant, Schiller, Hegel, Nietzsche; Coleridge, Shelley, Arnold, Wilde) and in 20th-century literary and aesthetic theory (Benjamin, Adorno, Barthes, Foucault, Derrida, Williams, Eagleton). Enrollment limited to 20. Priority given to English concentrators. All other students must obtain instructor’s permission

**ENGL 1900D. Literature and Politics.**

Literature as a changing historical formation that often represents and is always shaped by the practices of organizing, asserting, and controlling power in society. Sustained focus on writings by Raymond Williams, Leon Trotsky, Michel Foucault, Edward Said, Gayatri Spivak, and Terry Eagleton, and on literary texts read from the perspectives of these six theorists (possibly Shakespeare, Milton, Marvell, Swift, Dickens, Gaskell, the Brontës, Victor Serge, Anna Akhmatova). Enrollment limited to 20. LILE WRIT

**ENGL 1900E. Aesthetics and Politics.**

Considers the shifting relationship between art and politics beginning with the formation of aesthetics in the Enlightenment and continuing through such 20th-century historical moments as Nazism, modernism, impressionism, socialist realism, postmodernism, and such thinkers as Kant, Hegel, Marx, Adorno, Lyotard, Cixous, Deleuze

**ENGL 1900F. Interpretation.**

This course will introduce students to the central issues in the theory of interpretation and their implications for critical practice. Topics will include the causes and consequences of interpretive conflict, the availability of tests for validity; the roles of the author and the reader, and the historical, social, and political dimensions of understanding. Readings will include major theoretical statements as well as critical essays and background materials related to three controversial novels

**ENGL 1900L. The Problem of American Literature.**

Considers questions such as: what are the distinctive qualities (if any) of American literature, and how do the various writers from diverse cultural settings fit into a single literary tradition called “American” (or do they fit in)? In order to examine the assumptions and implications of studying literature as a national phenomenon, focuses reading on various critical and theoretical texts

**ENGL 1900M. Twentieth-Century Reconceptions of Knowledge and Science.**

Considers questions such as: what are the distinctive qualities (if any) of American literature, and how do the various writers from diverse cultural settings fit into a single literary tradition called “American” (or do they fit in)? In order to examine the assumptions and implications of studying literature as a national phenomenon, focuses reading on various critical and theoretical texts

**ENGL 1900N. Contemporary Feminist Literary Theory.**

An advanced survey of 20th-century feminist literary theory with an emphasis on U.S., British, and French traditions. Topics include canon formation, "resisting readers," and the category of "women's writing," as well as the relation of feminist criticism to problematics such as critical race theory, poststructuralism, psychoanalysis, and postcolonialism

**ENGL 1900P. History of Criticism from Plato to Postmodernism.**

A survey of the major theorists of literature in the western tradition, from the Greeks to the contemporary period. Recurrent issues will include the definition of literary value, the distinctiveness of the aesthetic experience, and the moral and social uses of literature. Enrollment limited. Banner registrations after classes begin require instructor approval
ENGL 1900Q. Women in/And the Novel.
An introduction to the novel through feminist theory, considering social and historical reasons why women read, wrote, and figured in novels, from the 18th century to the 20th. Novels by Defoe, Austen, George Eliot, Rhys, Woolf; readings in feminist theory and criticism. Priority will be given to concentrators in English and Gender Studies. Others will be admitted only with permission of the instructor

ENGL 1900R. Queer Relations: Aesthetics and Sexuality.
A study of the relationship between aesthetic thought and sexuality in a variety of literary and cinematic works. We will supplement our readings with ventures into queer theory, emphasizing how art is related to identity, community, race, gender, and ethics. Authors include Wilde, Pater, James, Winterson, Cole, Guibert, Foucault, Bersani, Edelman. Films by Julien and Jarman. DVPS

ENGL 1900T. The Postcolonial and the Postmodern.
Explores the contexts and conceptual implications of theories of postmodernism and postcolonialism. Particular attention to intersections and disjunctions between both concepts as attempts to grapple with the challenges of modernity from the vantage point of the late-20th century. Course will end with two novels that address related issues with the tools of fictional narrative: Coetzee’s Foe and Rushdie’s Midnight’s Children. Readings include: Butler, Hall, Jameson, Laclau, Lyotard, Spivak. Not open to first-year students. Enrollment limited to 20

ENGL 1900U. Word and Image.
How do words and images represent? This course will examine major statements about the relation between verbal and visual representation from Lessing’s classic study Laocoon to contemporary theories of the semiotic and social construction of images. Theoretical readings will be accompanied by analyses of examples from literature and the visual arts, ranging from painting to film and graphic novels. Not open to first-year students. Banner registration after classes begin requires instructor approval

ENGL 1900V. Camera Works: The Theory and Fiction of Photography.
This class focuses both on literature influenced by and theoretical considerations of photography. Texts and films to include Barthes’ Camera Lucida, essays by Benjamin, Kracauer, and Krauss, Cortazar’s “Blow-Up,” Antonioni’s Blow-Up, Fitzgerald’s Tender is the Night, Sebald’s The Emigrants, West’s The Day of the Locust, Frampton’s Nostalgia, Egoyan’s Calendar, Rancière’s The Future of the Image, and poetry by Rich, Ashbery, and Larkin. Not open to first-year students and sophomores. Open to English concentrators on written permission of the instructor.

ENGL 1900W. Aesthetic Theory/Cultural Studies (MCM 1503E).
Interested students must register for MCM 1503E S01

ENGL 1900X. Introduction to Theories of Narrative.
This course will introduce students to the major narrative theorists of the twentieth-century. Our focus will be on literary examples, such as theories of the novel, but we will also read thinkers who interrogate the workings of narrative in historiography, in cinema and television, and in extra-literary contexts (for example, the struggle of political campaigners to "control the narrative"). Enrollment limited to 20. Not open to first-year students

ENGL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.
How do you read a medieval manuscript? This course teaches hands-on methodologies for deciphering the material text, including palaeography (history of scripts) and codicology (archaeology of the book); contemporary models of interpreting scribal texts, including editorial theory and analysis of readers' reception; and medieval concepts of textuality and interpretation, including medieval theories of authorship and the arts of memory. Prior course work in Middle English or Latin or other medieval language required. Not open to first-year students. Enrollment limited to 20. Instructor permission required

ENGL 1900Z. Neuroaesthetics and Reading.
Analysis of the theories of art, reading, and aesthetic experience proposed by neuroscience and cognitive science in light of traditional aesthetics and contemporary literary theory. Enrollment limited to 20. Instructor permission required

ENGL 1901A. Poetry, Art, and Beauty (COLT 1430H).
Interested students must register for COLT 1430H S01 (CRN 23708)

ENGL 1901B. Politics and the Novel.
This course will explore how various realist and modernist novels represent political life, both in its practical dimensions and as forms of consciousness (ideologies, world views, attitudes). We will also centrally explore a number of important theoretical and critical writings on the topic of literature and politics, from a range of different political perspectives. Novels will include: Elizabeth Gaskell, Mary Barton; Anthony Trollope, The Prime Minister; E.M. Forster, Howards End; Lionel Trilling, The Middle of the Journey; Ralph Ellison, Invisible Man. Enrollment limited to 20

ENGL 1901C. Slavery’s Optic Glass: The First Century of African American Literature.
Considering the epistemological impact of slavery on nineteenth-century American culture, how does the "peculiar institution" initiate and revitalize literary genres, and extend its aesthetic and cultural influence beyond the Civil War? This course ranges from the poetry of Wheatley to Dunbar’s Sport of the Gods, and pays particular attention to the canonical literature of the American Anti-Slavery movement. DVPS

ENGL 1901D. Communication Culture and Literary Politics (MCM 1503Q).
Interested students must register for MCM 1503Q S01 (CRN 16459)

ENGL 1910A. Dreamworlds: Utopia from Plato to the Present.
Can acts of writing change the world? This course looks at a number of famous utopias and dystopias from classical time to the modern period and analyzes how the genre’s literary experiments transform reading into a political act. Works by Plato, More, Montaigne, Shakespeare, Swift, H.G. Wells, and Le Guin. Films will include Blade Runner and Pleasantville

ENGL 1910B. Great Books and Good Movies.
Since the first silent pictures, the film industry has turned to "great books." This course uses films based on "great books" to examine differences between the genres. Frequent screenings; reading and screen journals; critical essays and screenplays. Films/texts include Sense and Sensibility, Great Expectations, Beloved, and The English Patient

ENGL 1910C. Voices Beneath the Veil (AFRI 1110).
Interested students must register for AFRI 1110 S01

ENGL 1910D. Roots of African American Fiction: Oral Narrative through Richard Wright (AFRI 1050M).
Interested students must register for AFRI 1050M S01

ENGL 1910E. Lyric Language and Form: Renaissance to Modern.
Tracing the trajectory of literary forms from the renaissance into the modern, examples will look at stubborn forms like the sonnet (Shakespeare, Berryman, Lowell); soft forms like blank/free verse (Marlowe, Milton, Wordsworth, Tennyson, Eliot); low and nonsense forms (Skelton, Caroll, hip-hop); and the antithetic functions of stanza and narrative (Spenser, Browning, Dr. Sues)

ENGL 1950A. Form and Feeling in Renaissance Poetry.
Pending Approval. Renaissance poets laid claim to the ethical power of poetry to move people through imagination. How does formal imitation and innovation create fields of feeling in the poetry of Spenser, Sidney, Shakespeare, Donne, Jonson, and Milton? Enrollment limited to 20 seniors

ENGL 1950B. Literature and the Ideology of the Aesthetic.
Pending Approval. Theoretical and historical exploration of the idea of literature understood as writing that has the status of art—and of the relation of this idea to the emergence and elaboration of discourses of the aesthetic. First six weeks: decisive eighteenth- and nineteenth-century developments in the meaning of literature as it relates to the aesthetic. Second six weeks: recent positions (especially poststructuralist and Marxist) that figure prominently in current debates. Enrollment limited to 20 seniors

ENGL 1950C. Senior Seminar: Who’s Afraid of Virginia Woolf?
This course asks how and why Virginia Woolf haunts our culture, approaching her status as a cultural icon through her novels, essays, diaries and letters. We will explore her work in the contexts of history, modernism, and literary influences, and will examine the dimensions of Woolf's afterlife—a posthumous dynamic that shapes issues in art, politics, and gender. Enrollment limited to 20 seniors concentrating in English. WRIT
ENGL 1950D. Senior Seminar: American Literature and the Corporation.
A study of the development of the American novel from the Civil War to the present in light of the emergence of the corporation as the principal unit of economic enterprise in the United States. We will survey corporate theory from Lippmann to Collins, and use it to frame the novel’s development from realism through modernism into postmodernism. Corporate theorists to be considered: Lippmann, Dewey, Berle, Drucker, Mayo, Deming, Friedman, Coase. Novelists to be considered: Twain, Dreiser, Wharton, Stein, Faulkner, Steinbeck, Wright, McCullers, Reed, Gaddis, Morrison. Enrollment limited to 20 senior English concentrators

ENGL 1990. Senior Honors Thesis in Nonfiction Writing.
Independent writing project under the direction of a faculty member. Permission should be obtained from the Honors Director for Nonfiction Writing. Enrollment limited to English concentrators whose application to the Honors in Nonfiction Writing program have been accepted

ENGL 1991. Senior Honors Seminar in English.
Weekly seminar led by the Advisor of Honors in English. Introduces students to sustained literary-critical research and writing skills necessary to successful completion of the senior thesis. Particular attention to efficient ways of developing literary-critical projects, as well as evaluating, incorporating, and documenting secondary sources. Enrollment limited to English concentrators whose applications to the Honors in English program have been accepted. Permission should be obtained from the Honors Advisor in English. S/NC

Independent research and writing under the direction of a faculty member. Permission should be obtained from the Honors Advisor in English. Open to senior English concentrators pursuing Honors in English. Instructor permission required

ENGL 1993. Senior Honors Seminar in Nonfiction Writing.
This course is designed for students accepted into the Nonfiction Honors Program. It will be run in workshop format, and will focus on research skills and generative and developmental writing strategies for students embarking on their thesis projects. Weekly assignments will be directed toward helping students work through various stages in their writing processes. Students will be expected to respond thoughtfully and constructively in peer reviewing one another's work. Open to seniors who have been admitted to the Honors Program in Literature and Cultures in English. Instructor permission required

Independent research and writing under the direction of the student’s Nonfiction Writing honors supervisor. Permission should be obtained from the Honors Advisor for Nonfiction Writing. Open to senior English concentrators pursuing Honors in Nonfiction Writing. Instructor permission required

ENGL 2360A. Renaissance Drama.
This course explores Early Modern drama: its styles of representation, material conditions, and political engagements, in Marlowe, Jonson, Middleton, Webster, Ford, Beaumont and Fletcher, and others. Drawing on current scholarship, it posits the stage as the site of contests over national identity, royal power, gender ideology, social mobility, nascent capitalism, religious and ethnic differences. Enrollment limited to 15 graduate students. Undergraduate English concentrators may request permission of the instructor

ENGL 2360B. Before Holinshed: The English Brut Chronicle Tradition.
Holinshed's 16th-century history drew from 400 years of manuscript chronicles, most in verse, which founded the "modern" history of England on a Trojan/Celtic ancient Britain. We will read the medieval versions of these historical narratives from Geoffrey of Monmouth, Wace, and Layamon to the popular 15th-century Middle English prose Brut. Critical engagements with manuscript/print cultures and the "Brut" narrative as a vocabulary for nationalism. Enrollment limited to 15

ENGL 2360C. Beowulf.
This course will consist of a careful reading and analysis of Beowulf in its original language. In addition to developing language competence, we will also discuss the poem through comparison to other Old English poems and Scandinavian analogues. Themes will include the manuscript context, heroism, gender, sacrifice, lamentation and elegy, the monstrous, material culture, and contemporary theoretical approaches to the poem. Prerequisite: 2000-level Introduction to Old English or its equivalent. Enrollment limited to 15

ENGL 2360D. Early Modern Drama.
An intensive introduction, for specialists and others, to the great classics and some less-known gems of a stellar period in English drama. Plays by Shakespeare, Middleton, Webster, Jonson, and Ford, among others. Topics: the popular theatre and its audience; urban culture; English nationhood; boy actors and the representation of gender and sexuality; play texts in print culture. Enrollment limited to 15

ENGL 2360F. Introduction to Medieval Studies.
Equips students with critical, linguistic, and historical knowledge to interpret Middle English texts (1066-1500). Primary texts by Chaucer and others, to be read in contexts of current critical debates (on topics including textuality, sexuality, and political formations) and medieval conceptual systems (including dream theory, alchemy, arts of memory). Priority to graduate students; no prior Middle English required. Enrollment limited to 15

ENGL 2360G. Medieval Manuscript Studies: Paleography and Interpretation.
How to read and understand a medieval manuscript text. Methodologies include paleography, codicology, editorial theory. Hands-on analysis and interpretation of specific Middle English texts in their manuscript medium (in microfilm, facsimile, digital representation, and when accessible, actual manuscripts). For students already acquainted with Old English and/or Middle English; Latin helpful. Textual projects in other medieval languages possible with instructor’s consent. Enrollment limited to 15

ENGL 2360H. Race and Place in Renaissance Literature.
Reads early modern English drama, poetry, and prose depicting the migration of groups to foreign places (England, the Indies, the Americas) to consider how such writing defines the connection between space and identity. We will consider how this literature values environment as against blood, soil against seed, as determinants of identity capable of marking people as "strange," "alien," or "natural." Authors will include Marlowe, Shakespeare, Fletcher, Massinger, Drayton, Jonson, and Bacon. Enrollment limited to 15 graduate students. All others will be admitted only with permission of the instructor

ENGL 2360I. Renaissance Embodiments.
Considers Renaissance representations of self in pre-modern terms that is, inseparable from the physical conditions of climate and region. How did early modern culture draw the line between culture and nature? Where do these theories connect with or depart from modern paradigms of self in such authors as Elyot, Shakespeare, Calvin, Luther, Burton, Donne, Montaigne, Jonson, and Browne? Enrollment limited to 15

ENGL 2360K. The Renaissance and Modernity.
Modernism restages 17th-century cultural and political revolution and restoration. An examination of the problem of style and modernity, looking at practices in poetic and prose style and at the emergence of the term "modernity" at the moment of high modernism and after. Enrollment limited to 15

ENGL 2360L. The Pearl Manuscript in Context.
Close translation of the Middle English alliterative poems in British Library Manuscript Cotton Nero A.x., Pearl, Cleanness, Patience, and Sir Gawain and the Green Knight, with attention to their medieval theological, generic, and codicological contexts. Enrollment limited to 15

ENGL 2360O. The Pearl Manuscript in Context.
Close translation of the Middle English alliterative poems in British Library Manuscript Cotton Nero A.x., Pearl, Cleanness, Patience, and Sir Gawain and the Green Knight, with attention to their medieval theological, generic, and codicological contexts. Enrollment limited to 15

ENGL 2360P. Thinking with Romance in the Renaissance.
Modernity defines romance as escapist, a mode that flies from the "real." Yet Renaissance writers placed it at the center of debates about politics, ethics, and knowledge. Tracking its generic fingerprint in Spenser’s romance-epic, we will consider its adaptation for the stage as tragicomedy and its relation to epistemological shifts dividing science from fiction.
knowledge from pleasure. Authors include Raleigh, Spenser, Shakespeare, Fletcher, Massinger, Bacon, Cavendish. Open to graduate students only

ENGL 2360Q. Manuscript, Image, and the Middle English Text.
This seminar will engage with the interpretive issues raised by considering manuscript images in relation to manuscript text. Selected Middle English texts will include Pearl, works by Chaucer, and the popular Middle English prose Brut, in the context of twelve historiated manuscripts of the fourteenth and fifteenth centuries. Enrollment limited to 15 graduate students

ENGL 2360R. Civil Wars, Restoration, and Early Georgian Literature.
The seminar will consider major works from the English Civil Wars to the first years of the eighteenth-century, with attention to cultural and theoretical contexts for understanding important developments such as print culture, war, nation-formation, the marketplace, and public/private spheres. Writers will include Milton, Rochester, Behn, Restoration playwrights, Dryden, Swift, and others. Additional readings will include selections from Adorno, Pocock, Anderson, Zizek, Brown, Johns, and others. Enrollment limited to 15 graduate students

ENGL 2360S. Alternative Miltons.
This seminar undertakes a close reading of Milton’s monumentally significant epic "Paradise Lost." We will also consider the current state of Milton criticism. What’s new in Milton criticism? What approaches have been holding fort? Has Milton criticism been slower to take to critical and theoretical innovation than Shakespeare criticism? If so, why, and what might we do about it? On that account, the seminar will engage a range of newer approaches—disability studies, queer theory, trauma theory, eco-criticism, animal studies, technoculture studies, and popular culture studies—to consider what they have to offer by way of new perspectives on Milton. Enrollment limited to 15 graduate students

ENGL 2360T. Representing London circa 1600.
We will consider cultural capital in the fastest growing 17th-century western capital, early modern London. How did changing spatial and economic practices impact literary representation? How do cities function as sites of conflicting political, economic, religious and cultural communities? How did urbanization change notions of status, gender, and sexuality? Topics: walking, shopping, crime, service, pollution, traffic, and civic ceremony. Enrollment limited to 15 graduate students. Undergraduate seniors admitted only with permission of instructor

ENGL 2400. Graduate Independent Study in Medieval and Early Modern Literatures and Cultures.
Section numbers vary by instructor. May be repeated for credit. Instructor’s permission required

ENGL 2450. Exchange Scholar Program.

ENGL 2560A. American Exotica.
From the beginning of colonization all the way up to the American Revolution, America is consistently figured as a remote and alien place. We will explore the figurative transformation of "America" by examining the use of images of the "remote" and "exotic" in British American colonial writing, including poems, plays, maps, travel narratives and natural histories. Enrollment limited to 15

ENGL 2560C. Early American Studies.
A critical introduction for graduate students to the scholarly field of early American studies, from the colonial era to the late 19th century. Enrollment limited to 15

ENGL 2560E. Liberalism.
An interdisciplinary approach to American culture and literary history through the lens of liberal ideologies. Readings include Franklin, Thoreau, sentimental novel, and Ellison’s Invisible Man. Enrollment limited to 15 graduate students. Exceptions with permission by instructor

ENGL 2560F. Realism.
Begins with European theories of realism, including Lukacs, Watt, Jameson, and others, who define realism by linking it to some aspect of modernization. Moves to theories that expose the limits of classical realism in the name of someone as some aspect of history it systematically subordinates or excludes, e.g., women, colonial subjects, minority cultures. Enrollment limited to 15

ENGL 2560G. Romantic Orientalism.
Representations of the " Orient" in British and transatlantic literary culture during the "Romantic" period (c. 1770- c. 1830). Connections between cultural representation and both assertions of and challenges to British colonial and imperial power. Theoretical, historical and political analysis by Said, Barrell, and others; poetry by Coleridge, Southey, Byron, P.B.Shelley; prose by Sydney Owenson, Charlotte Dacre, Thomas DeQuincey. Enrollment limited to 15

ENGL 2560H. Romanticism and the Ideology of the Aesthetic.
Historical development of discourses of the "esthetic" as they relate to the problem of "romanticism" as the name of a distinctive era in British and European literature and culture. Ideas about the autonomy of art in the period of the French and the Industrial Revolutions. Readings in Baumgarten, Kant, and Hegel; in Coleridge, W. Wordsworth, P. B. Shelley, and Keats. Enrollment limited to 15

ENGL 2560K. The Transatlantic Enlightenment.
A graduate seminar in literatures and cultures of the long 18th century in transatlantic context. Emphasis on print culture, the Black Atlantic, colonialism and slavery, as well as the American Revolution. Enrollment limited to 15

ENGL 2560L. The Victorian Novel.
An intensive seminar on the Victorian novel. The aim will be historically contextualized, theoretically informed interpretations of some leading examples of this complex literary form. Will focus on the role of the (British) novel, as distinct from the (American) short story, in rise of mass culture, and on recent formalist, stylistic, and historical approaches to the Victorian novel as a literary form. Enrollment limited to 15

ENGL 2560N. American Literature and the Corporation.
An examination of 19th-century American literature in the context of the rapid growth of corporate forms in American economic, political, and social life from the mid-1830s through the turn of the century. How does literature participate in the debate this process of incorporation occasioned, and in what ways was it shaped by the process of incorporation occasioned, and in what ways was it shaped by the process? Readings include Hawthorne, Melville, Harper, Grant, Alcott, Crane, and Chestnutt. Enrollment limited to 15

ENGL 2560Q. Victorian Fictions of Consciousness.
Victorian novels, Bronté through James, with an emphasis on the ways in which novels engage 19th-century theories of mind and psychology, looking at such central concepts as memory, will, sensation, and perception. Examines the importance of form and the subgenres of Victorian fiction (Bildungsroman, sensation novel, multiple novel) in the construction of concepts of selfhood and consciousness. Attention also to the place of consciousness in Victorian and 20th-century theories of the novel. This course will also serve as an introduction to working on topics in science and literature. Enrollment limited to 15

ENGL 2560R. Romantic Dispossession: Subjectivity and Agency.
This course explores the diverse arguments made by writers of the Romantic era concerning nonidentity, and focuses on the kinds of ethical, political, and aesthetic considerations that arise once identity is forfeited and dispossession is perceived as either a matter of self-discipline, the negative result of sympathy, a characteristic of literary culture, or a sign of melancholic loss. Enrollment limited to 15 graduate students. Undergraduate seniors will be admitted only with the permission of the instructor

ENGL 2560T. The Realist Imagination.
A study of American literary realism. We will situate realism in the context of the realist turn in American artistic, political, legal, and economic enterprise from the Civil War to World War II, and measure the realist novel’s relations to alternative aesthetic ideologies such as transcendentionalism, regionalism, naturalism, and modernism. Authors to be considered include Emerson, DeForest, Grant, Twain, Cable, Chesnutt, Dreiser, Wharton, Cather, Anderson, Dos Passos, Faulkner, and Hurston. Enrollment limited to 15

ENGL 2560U. Romanticism and the Ruins of Empire.
Representations of the ruins of ancient empires (Babylonian, Assyrian, Roman) in relation to British and French imperialism during the period we call "Romanticism." Enrollment limited to 15
ENGL 2560V. Transatlantic Studies.
This course offers a theoretical and historical examination of "transatlantic" models of literary analysis as an alternative to traditionally national ones. It will look at a recent criticism theorizing the field, including both literary and historical scholarship. Primary readings will be from Rowson, Equiano, Franklin, Emerson, and Twain, among others. Enrollment limited to 15

ENGL 2560W. The Figure of the Artist in the Nineteenth Century.
This course considers the changing representations of the artist in the 19th century, as prophet, intellectual, professional, critic, genius, madman, aesthete, and social celebrity. Readings will focus on 19th-century novels, with select essays, reviews, and other nonfiction prose. Authors include George Eliot, Charles Dickens, Anthony Trollope, Arnold Bennett, George Gissing, H. G. Wells, George Bernard Shaw, Oscar Wilde. Enrollment limited to 15

ENGL 2560X. The Rise of the Novel.
The seminar would combine the study of eighteenth-century novels [some canonical, like Robinson Crusoe, Clarissa, Tom Jones, and Tristram Shandy; some less so, like amatory fiction and revolutionary fiction of the 1790’s] with important theories of and debates about the novel — its origins, rise, and discourses. Enrollment limited to 15

ENGL 2560Y. Romanticism and Cultural Property.
Changing literary representations of the aesthetic, ideological, and commercial value attributed to the remains of antiquity and to works of art generally in Britain and the United States during the period known as "Romanticism." Historical, legal, and theoretical discourses of "cultural property" and "cultural capital." Primary readings in Gibbon, Volney, Wordsworth, Jefferson, Byron, Percy and Mary Shelley, Felicia Hemans, and others. Enrollment limited to 15 graduate students

ENGL 2560Z. Global Early American Literature.
What does American literature before 1860 look like viewed from a global perspective? Our goal will be to see what specifically literary problems and questions came into focus when we read American literature in terms of economic, social, philosophic, and ideological issues that extend across the globe. Authors may include John Smith, Anne Bradstreet, Charles Brockden Brown, and Herman Melville. Enrollment limited to 15 graduate students

ENGL 2561A. Manifest Destinies: Liberalism and Expansion in American Literature, 1820-1920.
An investigation of the relations between American literature and the territorial expansion of the United States from the early 19th century through World War I. Topics include the role of liberalism in the rise and operation of American expansion, the relationship between colonialist and imperialist visions of America's manifest destiny, the ideological implications of literary genres of open space (the western, the sea narrative), race and the patterns of internal migration in the United States, and the connection between the Turner thesis and literary form (Howellsian realism, Whitman's poetics and Dickinson's anti-poetics, Jewett's regionalism). Authors include Cooper, Poe, Melville, Douglass, Craft, Whitman, Dickinson, James, Jewett, and Twain. Enrollment limited to 15 graduate students

ENGL 2561B. Things Not Entirely Possessed: Romanticism and History.
This course explores how Romanticism thinks through the historical, and in particular, it engages Romantic mediations of historical knowledge through aesthetic form. What is the relationship of the aesthetic to the historical? How is subjectivity an effect of a poem's negotiation of the past? And what role does the "future" play in Romanticism? Authors will include Liu, Pfau, Levinson, McGann, Goodman, Chandler, Ferris, Pyle

ENGL 2561C. Intellectuals and the Public Sphere.
Considers the relationship of the artist to the public sphere, focusing on the late nineteenth century. We will look back from debates today over the "public intellectual" to Victorian debates over the "intellectual." Attention to how narratives of intellectual decline in the late nineteenth and twentieth centuries portray the figure of the artist: as prophet, intellectual, professional, critic, genius, woman, madman, aesthete, scientist, and social celebrity. Readings will include literary writers and essayists (such as Dickens, Trollope, James, Pater, Shaw, Wilde, Wells), alongside theorists (Humboldt, Weber, Brecht, Benjamin, Habermas, Bourdieu, Latour, Kittler). Enrollment limited to 15 graduate students

ENGL 2561D. Political Romanticism (GRMN 2320E).
Interested students must register for GRMN 2320E S01

ENGL 2561E. The Third Person: Narrating the Subject of Modern Literature.
The modern subject is typically viewed as self-reflexive, the product of the mass media, advertising, and corporations. What such accounts overlook is that self-reflexivity is primarily a way of seeing the self in narrative terms. This class examines the centrality of narrative to modern conceptions of the self. Writers to include Whitman, Dickens, James, Cather, Beckett, Coetzee, Blanchot, Sartre, Ricoeur. Enrollment limited to 15 graduate students

Section numbers vary by instructor. May be repeated for credit. Instructor's permission required

ENGL 2760A. American Modernist Poetry and Poetics.
Study of the poetry and prose of Eliot, Pound, Stevens, Williams, H.D., Moore, and Hughes, with additional readings in criticism and theories of modernism. Enrollment limited to 15 graduate students

ENGL 2760B. City, Culture, and Literature in the Early Twentieth Century.
Examines the ways the city structures early 20th-century culture and history. Through novels, poetry, and cultural criticism, considers a range of topics that include the relation between the city, consciousness, and ideology; the effects of changing urban immigration; and the effects of mobility. Authors include Simmel, Benjamin, Harvey, Williams, Rotella, James, Woolf, Wright, and Eliot. Enrollment limited to 15 graduate students

ENGL 2760C. Contemporary African American Literature and the End(s) of Identity.
Investigates the controversies surrounding the claim that the late 20th century marks the end of nationalist and essentialist paradigms in the scripting of black identity. Readings from a range of literary and theoretical works dealing with this intricate problem, including Stuart Hall, Hortense Spillers, Reginald McKnight, Trey Ellis, Octavia Butler, and Paul Beatty. Enrollment limited to 15

ENGL 2760D. Law and Literature: From Response to Responsibility.
Explores modernism as it is shaped by the normative and ethical concerns of a rapidly changing world through literary works, legal writings, and legal opinions. Examines the conceptual, psychological and rhetorical connections between literature and law, and considers how both disciplines shape the imagination but also aim to elicit response and responsibility. Authors include Walter Benjamin, Joseph Conrad, Virginia Woolf, Rebecca West, China Achebe, and others; legal texts include Holmes, Bentham, Cover and a number of legal opinions. Enrollment limited to 15

ENGL 2760F. Metaphoric Expression: Emerson, James, Stein.
According to William Carlos Williams, metaphoric vision continually blinds Americans to the actual conditions of their world. In an attempt to answer this charge, we will read these three densely metaphorical writers against their varied historical backgrounds, hoping in the process to better understand the role played by figurative language in the shaping of American society, culture, and identity. Enrollment limited to 15

ENGL 2760G. Modernist Fiction and Theories of Modernism.
Examines a range of modernist fiction—including work by Conrad, Dos Passos, H.D., Joyce, Larsen, Rhys, Toomer, Woolf—alongside selected theories of modernism. Considers approaches ranging from theories of reification and the aesthetic to more recent considerations of modernism’s relation to gender, nation, race, empire, and professionalism. Enrollment limited to 15 graduate students

In this seminar, we will examine a number of important 20th-century U.S. novels for the ways in which they conjure the nation both as "imagined community" and "fictive ethnicity." Particular focus will be given to how the category of national identity becomes intertwined issues of race, gender,
sexuality, and region as well as with ideologies of the aesthetic. Enrollment limited to 15

ENGL 2760I. Possession and Dispossession in the Modern Novel. Examines modernist sentimentality as it is figured in notions of property. By exploring the legal and literary relationship between owning and being, we will consider how writers such as Forster, Woolf, Joyce, and Lawrence use property to conceive of human relationships—and by extension, social justice—in dramatically new ways. Enrollment limited to 15

ENGL 2760K. Postcolonial Theory and Africanist Discourse. Explores central questions in current Anglo-American postcolonial theory, and examines how related questions emerge with specific inflections in writings by Africanist philosophers, historians, and creative writers. Issues include: varied connotations of the very idea of "Africa"; ideology and subjectivity; constructivism and essentialism; nationalism and globalization; aesthetics and politics. Texts by Amilcar Cabral, Frantz Fanon, Stuart Hall, Paulin Hountondjì, Fredric Jameson, Ernesto Laclau, Ngugi wa Thiong'o, Wole Soyinka, Gayatri Spivak, Yvonne Vera. Enrollment limited to 15 graduate students. Undergraduate seniors may be admitted with instructor's permission.

ENGL 2760L. Literature and Photography. Since the invention of photography in 1839, novelists have often claimed the camera as an important model for their work. We will endeavor to investigate this claim, asking in the process what the links between modernism and the visual arts have to tell us about the nature of fictional representation. Readings to include a number of theoretical discussions of photography. Enrollment limited to 15

ENGL 2760M. Postcoloniality, Globalism, Diaspora. Introduces students to the intellectual current that has come to be called "postcolonial theory" in contemporary criticism. We read influential theoretical writings alongside literary texts by writers and critics associated with concepts of postcoloniality, transnationalism, or diaspora. We thus combine theoretical with literary texts in order to explore intersections or disjunctions between idioms, genres, and philosophical investments on such inter-related concepts and problematic as: nationalism, biopower, globalization, diaspora, or the claims of literature on the arena of the present. Texts by: Coetzee, Fanon, Gordimer, Naipaul, Said, Spivak, and Walcott. Enrollment limited to 15 graduate students

ENGL 2760N. The Politics of Modernism. An exploration of the controversies that have surrounded the political implications of modernist form. Topics will include the Brecht-Lukacs debate, surrealism and the politics of the avant-garde, the so-called "great divide" between innovative and popular art, and the relation of modernism to postmodernism. In addition to examining important theoretical statements, we will test their arguments against selected literary examples. Enrollment limited to 15

ENGL 2760O. Shame, Colonialism, Ethics. This course constructs a dialogue between debates on post-Holocaust aesthetics ("Is poetry possible after Auschwitz?") and the central questions of postcolonial theory ("Can the Subaltern Speak?"), and considers the ethical and aesthetic salience of shame. It is organized around three writers whose work suggests that the novel form itself might require decolonization: Naipaul, Coetzee and Caryl Phillips. Enrollment limited to 15

ENGL 2760P. The Fifties in Color: Race, Empire, and U.S. Cold War Culture. Examines U.S. cultural texts of the '50s in relation to both domestic race politics and foreign policy concerns. Explores issues of assimilation, conflict, containment, development, and integration in a transnational as well as a national framework. Writers we study may include Ralph Ellison, Jack Kerouac, Phillip Roth, John Okada and Jade Snow Wong. This course is limited to 15 graduate students

ENGL 2760Q. Ways of Seeing: Modern American Fiction and Photography. Reads a number of important modernist novels alongside the work of early 20th-century American photographers, focusing on what this fiction's engagement with photography has to teach us about the reproduction and circulation of American identity and history. Writers include James, Dos Passos, Hurston, Agee, Welty, and Ellison; photographers include Stieglitz, Strand, and Weston. Enrollment limited to 15

ENGL 2760R. Realism and the American Novel. An inquiry into the form, purpose, longevity, and afterlife of American realism. In what way did it differ from its British counterpart? In what ways was it different from naturalism, modernism, and romanticism? What was its aesthetic and political legacy? How has it been read by critics? Writers to include Melville, Dreiser, Norris, James, Chestnut, Wharton, and Wright. Enrollment limited to 15

ENGL 2760T. Postmodernism and Literary Form. Intended for graduate students interested in the relationship between socio-historical conditions and literary form, and for those interested in thinking beyond a narrowly periodized notion of the postmodern. Beginning with Lukács's The Theory of the Novel, considers the problematic of literary representation as it emerges in the modern age. Readings include Beckett, Nabokov, Burroughs, Amis, Rushdie, McEwan, Lyotard, and Moretti. Enrollment limited to 15

ENGL 2760U. Reading the Black Masses in Literature and Critical Practice. For more than a century, African American literature and criticism have been definitively shaped by claims about the linked fate of the black masses and the world of letters. These contested assertions provide occasions for rethinking the traditional ends of black literary production. Class conflict, the waning of black nationalism, and diasporic identity politics, are among the topics examined under this rubric. Likely literary writers include Washington, Larsen, Ellison, Brooks, and Wideman. Enrollment limited to 15 graduate students

ENGL 2760V. Neo-Victorianism: Rewriting the Long Nineteenth Century. This seminar examines recent novelists rewriting canonical 19th-century texts by Dickens and others, playing with matters of postcoloniality and gender. Jack Maggs, for example, answers the questions, "Can the subaltern speak?" and "Does the empire write back?" while Fingersmith offers a lesbian version of the Victorian sensation novel. Patchwork Girl rewrites Frankiestein, stitching together fiction, gender, and identity. Enrollment limited to 15

ENGL 2760W. American Literature and the Visual Arts. With the publication of several recent studies of cinema and modernism, interest in the relation between literature and the visual arts has never been higher. We will chart the forms this relation takes in the modern era by reading both theoretical attempts to diagnose it (Benjamin, Barthes, Derrida, Rancière) and literary attempts to enact it (James, Stein, Ellison, Williams, Agee). Enrollment limited to 15 graduate students

ENGL 2760X. After Postmodernism: New Fictional Modes. What happens when the "postmodern," the period that did away with periodization, is over? This class will discuss issues such as contemporaneity, materiality, subtraction, subjectivity, the event, and the frame in approaching British and American literature at the turn of the 21st century. Readings include Ishiguro, Cooper, Toussaint, Seth, Coetzee, Chatwin, Danielewski, Deleuze, Bergson, Badiou, Lukács, Voloshinov, Adorno, Pasolini, Nancy. Enrollment limited to 15 graduate students. Banner registrations after classes begin require instructor approval

ENGL 2760Y. American Orientalism and Asian American Literary Criticism. We examine critical studies of American Orientalism, influential works of Asian Americanist cultural criticism, American Orientalist texts by white and black authors, and literary texts by Asian American authors. Critics, cultural historians and writers we read may include: Christina Klein, Vijay Prashad, Elaine Kim, Frank Chin, Lisa Lowe, W.E.B. DuBois, Susan Choi, Nam Le, Karen Tei Yamashita. Enrollment limited to 15 graduate students

ENGL 2760Z. African American Literature After 1965: Nationalism and Dissent. Since the late 1960s, major theoretical and literary currents in African American letters have been profoundly influenced by black nationalism. This seminar examines the persistence of nationalist thought in ongoing debates about racial authenticity, gender inequality, black aesthetics, and diasporic politics. In so doing we will attend to both the complexity of nationalist ideology and the dissent generated by it. Authors include Baraka, Cruse, Giovanni, Morrison, Senna, Whitehead, and Gilroy. Open to graduate students only
ENGL 2761A. American Literature and the Cold War.
A study of American literature in the context of the broad intellectual culture—strategic, ideological, philosophical, aesthetic, and economic—engendered by the conflict between the United States and the Soviet Union from 1945 to 1991. Special attention will be given to the role of theory, as a nascent framework for intellectual activity, in the aesthetics of the period. Enrollment limited to 15 graduate students

ENGL 2800. Graduate Independent Study in Modern and Contemporary Literatures and Cultures.
Section numbers vary by instructor. May be repeated for credit. Instructor’s permission required

ENGL 2900A. Contemporary Feminist Theory: Feminist Address.
Recent feminist theory addresses identity politics and the critique of the subject; problematics of race, class, and gender; the challenge of queer theory; the demand for materialist analysis. We consider these topics in light of the problematics of address. What are the forms of feminist address? How are they received or refused? Who are the subjects of contemporary feminisms? Enrollment limited to 15

ENGL 2900C. Theories of Literature: From Classical Antiquity to Postmodernity.
Investigates theories of literature in two self-conscious historical epochs: classical antiquity, represented by figures such as Plato, Aristotle, and Horace, and by practices such as marginal notation of texts, literary commentaries, and performance techniques; and the 20th century, represented by social movements such as Adorno, Barthes, and Bakhtin, with special attention to the intersections between philosophy and literature and poststructuralist conceptions of textuality. Enrollment limited to 15

ENGL 2900D. Walter Benjamin and Modern Theory.
Intensive study of Walter Benjamin’s essays on modern culture and literature (in particular Goethe, Baudelaire, Proust, and Kafka). Explores the consequences of his thinking for problems in contemporary literary and cultural theory. German and/or French helpful but not required. Enrollment limited to 15

ENGL 2900E. Deleuze: Literature and Aesthetics.
How does Deleuze help us read modern culture? This course will focus on Deleuze’s writings on literature, painting, and cinema as a point of entry to the work of one of the most original and intriguing thinkers of the late 20th century. We will look at the reasons for Deleuze’s fascination with Anglo-American literature, and discuss the extent to which Deleuze’s model of literary analysis breaks with -- while remaining fundamentally indebted to -- Marxism and psychoanalysis. Other readers include Melville, Kafka, T. E. Lawrence, as well as films by Antonioni, Godard, and Sembene. Enrollment limited to 15

ENGL 2900F. Form and Content.
Readings in aesthetics, literary theory, structuralism-poststructuralism, and cultural studies that address the form/content distinction in one of its many avatars. Topics will include the sign, thematicity, formlessness, formalism and historicism, tenors and vehicles, structure, and defamiliarization, among others. Previous work in literary or cultural theory strongly recommended. Enrollment limited to 15

ENGL 2900G. History and Form.
An exploration of the relation between historical and formalist approaches to literary interpretation, from the New Critics to the so-called “New Formalism.” What is the role of form in historically and politically oriented criticism (examples will be taken from Marxism, the New Historicism, feminism, cultural studies, and post-colonial theory)? What happens to history when form takes center stage (for example, in structuralism and deconstruction)? Is it possible (and desirable) to avoid a pendulum swing between the poles of historicism and formalism and to mediate the conflicting claims of history and form? Or is a focus on one at the expense of the other the necessary cost of an incisive interpretive strategy? In addition to theoretical readings that exemplify the conflict between history and form, attention will be paid to the history of reception of one or more literary works in order to articulate the practical implications of their opposition and interdependence. Enrollment limited to 15

ENGL 2900H. Queer Passivity.
A study of the concept of passivity in queer theory, literature, and film. Subjects will include AIDS and temporality; the senses and dissolution; ascesis and chastity; pornography and sovereignty. We will explore poststructuralist theories and continental philosophies (Agamben, Cavarero, Deleuze, Derrida, Marion, Nancy) that resonate with the kind of queer receptivity that will be the object of study. Enrollment limited to 15

ENGL 2900I. Cultural Studies and the Problem of Form (MCM 2310G).
Interested students must register for MCM 2310G S01

ENGL 2900J. Poetry after Kant (COLT 2820S).
Interested students must register for COLT 2820S S01

ENGL 2900K. Nietzsche, Foucault, Latour.
The seminar will trace a line of radical thought about truth, language, knowledge and power—and their interrelations—in the writings of Friedrich Nietzsche, Michel Foucault and Bruno Latour. Particular attention will be given to the significance of their work for poststructuralist language theory, constructivist epistemology and science studies, and current issues involving the relations between science and religion. Enrollment limited to 15 graduate students

ENGL 2900L. Literary Readings in Aesthetic Theory (COLT 2650G).
Interested students must register for COLT 2650G S01

ENGL 2900M. The Reading Effect and the Persistence of Form.
This course examines the “reading effect” as it emerges in work on the question of form and contemporaneous scholarship on the problematics of reading. We will trace the ways in which these related but distinct critical idioms negotiate concepts of mutual concern (interpretation, representation, the reading subject/reading brain). Topics include “new formalism,” cognitive studies, symptomatic reading. Theorists from Althusser and deMan to Marcus, Wolfson and Sunshine. Enrollment limited to 15 graduate students; undergraduate seniors may enroll with instructor permission

ENGL 2900N. Ethical Turns.
Examines the relationship between literature and ethics through the notions of responsibility, conviction, obligation, knowledge, ignorance, and complicity. Readings by Barthes, Benjamin, Arendt, Freud, Lacan, Winnicot, Derrida, de Man, Miller, Butler. Enrollment limited to 15 graduate students

ENGL 2900P. The Plasticity of Form (MCM 2110F).
Interested students must register for MCM 2110F S01 (CRN 14477)

ENGL 2900Q. Liberalism and Aesthetics.
This seminar will examine the relation between liberalism as a political philosophy and liberalism in its aesthetic dimensions, focusing in particular on key formal and conceptual elements characterizing a range of realist and modernist engagements with liberal thought. The course will combine consideration of philosophical and theoretical texts with discussion of literary works from the nineteenth and twentieth centuries. Preference will be given to English graduate students. Enrollment limited to 15

ENGL 2900R. Seminar in Pedagogy and Composition Theory.
An experimental and exploratory investigation into writing as a prepartion for teaching college-level writing. Reviews the history of writing about writing, from Plato to current discussions on composition theory. Against this background, examines various processes of reading and writing. Emphasizes the practice of writing, including syllabus design. Priority given to students in the English Ph.D. program. Undergraduates admitted only with permission of instructor

ENGL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

ENGL 2990. Thesis Preparation.
For graduate students who meet the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a thesis
Environmental Studies

Interim Director
Janet A. Blume

Human society is beginning to recognize the pressing need to solve the multitude of environmental problems which have arisen over time and which continue to grow today. These environmental problems stem from patterns of human interaction with the earth and its ecosystems and from various societies’ unsustainable use of natural resources. The Center for Environmental Studies (CES) at Brown University was established with the primary aim of educating individuals to solve challenging environmental problems, both at the local and global levels. CES also works directly to improve human well-being and environmental quality through community, city, and state partnerships in service and research.

For additional information, please visit the department’s website: http://envstudies.brown.edu/

Environmental Studies Concentration Requirements

The Center for Environmental Studies offers an A.B. and an Sc.B. in Environmental Studies. Both degrees are directed toward students who intend to work toward improving the quality of the environment. The A.B. degree is appropriate for students interested in social science or policy approaches to environmental problem-solving and who want to pursue post-graduate or professional experience in various fields of environmental management or education. Fluency in some basic sciences is essential to this degree. The Sc.B degree is appropriate for students who are interested in post-graduate or professional experience in the natural sciences as a way of understanding environmental processes. All concentrators are strongly encouraged to perform some environmentally-related public service during their time at Brown. Service may include work as a teaching assistant in a relevant course, volunteer work with an environmental non-profit group or an environmental agency, or significant work with a student environmental group.

Standard program for the A.B. degree in Environmental Studies:

Basic Prerequisites

Competence in mathematics sufficient to take courses approved for the concentration.

Core Requirements

| ENVS 0110 | Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century (or an approved alternative) | 1 |
| ENVS 0490 | Environmental Science in a Changing World | 1 |

Select three intermediate level social science or humanities courses appropriate to the student’s focus, for example: 3

| ENVS 0510 | International Environmental Law and Policy |
| ENVS 1350 | Environmental Economics and Policy |
| ENVS 1410 | Environmental Law and Policy |
| ENVS 1710 | Environmental Health and Policy |
| HIST 1790 | North American Environmental History |

Select two intermediate level environmental science courses appropriate to the student’s focus, for example: 4

| BIOL 0420 | Principles of Ecology |
| GEOL 0220 | Physical Processes in Geology |
| BIOL 0440 | Plant Organism |
| BIOL 1470 | Conservation Biology |
| ENVS 0455 | Coastal Ecology and Conservation |

Competence in statistic and/or qualitative methods based on the students focus.

| ENVS 1920 | Analysis and Resolution of Environmental Problems/Case Studies | 1 |

Focus

Select four focus courses beyond the introductory level.

Capstone Requirement

Thesis:

| ENVS 1970/1971 | Independent Study | 1-2 |

Total Credits: 14-15

1. Alternatives to ENVS 0110 may include GEOL 0160B Global Change: Ecology and Climate, ENVS 0070B Environment and Society (SOC 0300B), or a similar course from transferring institution depending on the student’s situation. Substitution requires approval of the concentration advisor.

2. A score of 5 on AP exam may be used to satisfy ENVS 0110 or ENVS 0490 with permission of the concentration advisor.

3. Students are strongly encouraged to take Environmental Economics and an environmental policy course.

4. Other intermediate level science courses may be substituted with the approval of the concentration advisor.

5. Concentrators in the Class of 2013-2013.5 who have satisfied the ENVS 1920 requirement can satisfy the capstone requirement in one of the following ways: 1. ENVS 1970 and ENVS 1971: a full-year senior thesis; 2. ENVS 1970: a one-semester senior thesis; 3. ENVS 1970: an environmentally-related internship (at least 150 hours) or group project and paper; 4. Take an approved ENVS senior seminar.

Concentrators in the Class of 2013-2013.5 who have not satisfied the ENVS 1920 requirement must: A. Take an additional focus class AND B. Complete one of the following four capstone options from above.

Standard program for the Sc.B. degree in Environmental Science

Basic Requirements

Competence in mathematics and chemistry

| MATH 0090 | Introductory Calculus, Part I | 1 |
| MATH 0100 | Introductory Calculus, Part II | 1 |
| CHEM 0330 | Equilibrium, Rate, and Structure | 1 |

Core Requirements

| ENVS 0110 | Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century (or an approved alternative) | 1 |
| ENVS 0490 | Environmental Science in a Changing World | 1 |

Select two intermediate level non-science courses appropriate to the student’s focus, for example: 4

| ENVS 0510 | International Environmental Law and Policy |
| ENVS 1350 | Environmental Economics and Policy |
| ENVS 1410 | Environmental Law and Policy |
| ENVS 1710 | Environmental Health and Policy |
| HIST 1790 | North American Environmental History |

Select three intermediate level environmental science courses appropriate to the student’s focus, for example: 5

| BIOL 0420 | Principles of Ecology |
| GEOL 0220 | Physical Processes in Geology |
| BIOL 0440 | Plant Organism |
| BIOL 1470 | Conservation Biology |
| ENVS 0455 | Coastal Ecology and Conservation |
Environmental Studies Graduate Program

The Master of Arts (A.M.) Program in Environmental Studies is no longer open to new applicants effective Fall 2012. For students currently enrolled in this program please visit the following website for more information:
http://www.brown.edu/academics/gradschool/programs/environmental-studies

Courses

ENVS 0070A. Global Environmental Change (GEOL 0160C). Interested students must register for GEOL 0160C S01
ENVS 0070B. Environment and Society (SOC 0300B). Interested students must register for SOC 0300B S01
ENVS 0070C. Transcending Transportation Impacts. Students will be engaged in interdisciplinary analyses of the life-cycle costs, environmental impacts, technical developments, and policy innovations at the local and regional level. We will discuss technical modifications in vehicles, such as plug-in hybrids, as well as policy and planning on intermodal systems, recycle-a-bike programs, intelligent transportation systems, and other innovations. Enrollment limited to 20 first year students. Instructor permission required. FYS LILE WRIT

ENVS 0070D. The Misuse of Scientific Information in American Life. Many important political issues hinge on matters of science or technology. But most Americans are ill-equipped to assess these matters. As a result, we are vulnerable to spin when scientific information is distorted, cherry-picked or otherwise misused to advance financial, political or even religious ends. This course examines ways these phenomena skew public discussion of climate change, vaccine safety, the teaching of evolution, cancer screening, GM food and a host of other issues. Enrollment limited to 20 first year students. FYS LILE WRIT

ENVS 0110. Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century. Offers a survey introduction to contemporary environmental issues and is a "gateway" class for those interested in concentrations in environmental studies/sciences. It is a required course for concentrators. We explore the relationships between human societies and the non-human environment through a survey of topical cases, including: human population growth and consumption, global climate change, toxins, waste streams, water resources, environmental justice and ethics, and agro-food systems. This course also analyzes various solutions—social, political, technical, and economic—put forth by institutions and individuals to address questions of environmental sustainability. One 90-minute weekly discussion group required

ENVS 0121. Plants, Food, and People (BIOL 0190H). Interested students must register for BIOL 0190H S01 (CRN 24017)
ENVS 0186. Populations in Danger (SOC 0300G). Interested students must register for SOC 0300G S01 (CRN 25522)

ENVS 0187. Organizations and Disasters: Living With the Reality of Really Big Mistakes (SOC 0300H). Interested students must register for SOC 0300H S01
ENVS 0240. Earth: Evolution of a Habitable Planet (GEOL 0240). Interested students must register for GEOL 0240 S01 (CRN 24946)
ENVS 0241. Climate and Climate Change (GEOL 0030). Interested students must register for GEOL 0030 S01 (CRN 16328)
ENVS 0260. Religion Gone Wild: Spirituality and the Environment (RELS 0260). Interested students must register for RELS 0260 S01

ENVS 0410. Environmental Stewardship. Challenges students to address the economics and logistics of implementing strategies to conserve resources and reduce the negative impacts of the built environment. The goal is to learn the rationale, process and technical aspects of the practice of environmental stewardship. Topics include sustainable design, institutional change, and corporate environmental responsibility. Students collaborate in interdisciplinary teams on applied projects. Permission by instructor by application process prior to enrollment in the class

ENVS 0455. Coastal Ecology and Conservation. Enables students to master fundamental ecological concepts and to understand how this knowledge can be used to inform conservation and management. Case studies and field trips will enable students to develop scientific skills and experience the challenges of coastal conservation science. Suitable for students with at least some biology background; the course is aimed at first and second year undergraduates. Expected background: BIOL 0200 or equivalent. Enrollment limited to 15; instructor permission required. Email instructor (Mark_Bertness@brown.edu) to receive course application (due May 1). Admitted students will be able to register for the course in September. WRIT

ENVS 0490. Environmental Science in a Changing World. Introduces students to environmental science and the challenges we face in studying human impacts on an ever-changing earth system. We will explore what is known, and not known, about how ecosystems respond to perturbations. This understanding is crucial, because natural systems provide vital services (water and air filtration, climate stabilization, food supply, erosion and flood control) that can not be easily or inexpensively replicated. Special emphasis will be placed on climate, food and water

Competence in statistics, for example:

Total Credits 19-20
supply, population growth, and energy. Lab section meets once per week; it is required of ES concentrators and optional for other students.

**ENVS 0500. Quantitative Research Methods: Creating, Analyzing, and Displaying Data.**

A hands-on-non-mathematical approach to the creation and statistical analysis of quantitative data in the social and life sciences. Emphasizes data exploration through visualization. Provides a solid footing in basic techniques, an intuitive overview of more advanced multivariate approaches, and introduction to a range of methods (experiments, natural experiments, survey and sampling techniques, questionnaire design).

**ENVS 0510. International Environmental Law and Policy.**

Introduces students to principles of international environmental law and examines how international organizations, national governments and non-state actors interact to address human impacts on the global environment. Considers effects of treaties, trade agreements and foreign aid on resolution of trans-boundary environmental problems including climate change, marine governance, biodiversity loss and trade in endangered species and hazardous waste. Students negotiate a mock treaty (NEWORLD) to mitigate some aspect of human impact on global change from the perspective of different state and non-state actors. Introductory coursework that addresses some aspects of environmental studies or environmental science is recommended.

**ENVS 0520. Wild Literature in the Urban Landscape.**

Combines deep study of ecological poetry, fiction, essays and other writing with service to schools in the community through exploration of local ecological challenges through both creative and more discursive expressions. The field-work or community component to this course will involve students in conducting workshops that combine literature and ecology in order to better elucidate and understand local issues related to, for one example, eco-industrial histories associated with Gorham Silver in Providence and the current state of Masphaug Pond on the Reservoir Triangle, where a public high school, Alvarez, now sits on contaminated soil. Enrollment limited to 22 undergraduates. S/N/C

**ENVS 0580. Foundations of Physical Hydrology (GEOI 0580).**

Interested students must register for GEOI 0580 S01 (CRN 162224)

**ENVS 0700A. New England Environmental History.**

Explores the environmental history of New England from the arrival of people circa 10,000 years ago to the present day. Topics include Native American and colonial environmental interactions and 20th century environmental transformations. From abandoned textile mills to Northern forests, understanding the history of a place can help us plan for its future.

**ENVS 0930A. Appropriate Technology (ENGI 0930A).**

Interested students must register for ENGI 0930A S01 (CRN 24998)

**ENVS 1000. Fieldwork in the Urban Community (URBN 1000).**

Interested students must register for URBN 1000 S01

**ENVS 1070. The Burden of Disease in Developing Countries (PHP 1070).**

Interested students must register for PHP 1070 S01 (CRN 15859)

**ENVS 1100. Statistical Methods for the Natural and Social Sciences.**

An overview of statistical methods commonly utilized in natural and social environmental science, to provide students with training in analytical approaches used in both disciplines. Course topics will include data manipulation, quantitative analysis (descriptive statistics, hypothesis testing, linear models, meta-analysis, time series, spatial data analysis, environmental monitoring, and impact/risk assessment. Examples and problem sets will utilize R to analyze available data-sets. Graphical methods for exploring datasets and presenting results will be emphasized. Students will be evaluated based on weekly lab exercises and associated problem sets, research papers, a final presentation, and contributions to class discussion. Expected: Basic familiarity with algebra and calculus. Students must also register for the lab.

**ENVS 1110. Estuarine Oceanography (GEOI 1110).**

Interested students must register for GEOI 1110 S01 (CRN 15570)

**ENVS 1260. Indigenous People and Nature: Birds (ANTH 1260).**

Interested students must register for ANTH 1260 S01

**ENVS 1270. From Magic Mushrooms to Big Pharma: Anthropology of Drugs (ANTH 1880).**

Interested students must register for ANTH 1880 S01 (CRN 16160)

**ENVS 1330. Global Environmental Remote Sensing (GEOI 1330).**

Interested students must register for GEOI 1330 S01 (CRN 24899)

**ENVS 1331. Weather and Climate (GEOI 1350).**

Interested students must register for GEOI 1350 S01 (CRN 16353)

**ENVS 1350. Environmental Economics and Policy.**

Economic analysis of environmental issues in industrialized countries with an emphasis on the implications for designing appropriate policy measures. Topics include: the valuation of environmental goods; the basic theory of economic markets, market failure, and the sources of any failure; private and government solutions to market failure; the role of uncertainty in policy-making; and open trade environments and trans-boundary pollution, on a national and global scale. Applications to issues such as climate change, land use, air and water pollution, and alternative energy. Prerequisite: ECON 1110 or 1130

**ENVS 1355. Environmental Issues in Development Economics.**

Examines environmental issues in developing countries, including air and water pollution, land use change, energy use, and the extraction of natural resources. Builds on ENVS 1350 by: delving more deeply into microeconomic theory, linking household/firm decision-making on environmental issues to choices in labor, land, and product markets; developing basic empirical techniques through exercises and a project; and using recent research to illustrate the roles of econometrics and economic theory in confronting problems at the nexus of the environment, poverty, and economic development. Suggested background: ECON 1630, and ENVS 1350 or ECON 1480. Prerequisites: ECON 1110 or 1130; and ECON 1620

**ENVS 1356. Health, Hunger and the Household in Developing Countries (ECON 1530).**

Interested students must register for ECON 1530 S01 (CRN 24487)

**ENVS 1360. Modeling Global Environmental Issues.**

In-depth, interdisciplinary study of a global environmental issue, such as climate change, through the development and use of quantitative models. Environmental sciences, economics, demography, and policy studies are integrated in readings, lectures, and substantial modeling activities. Prerequisites: MA 9, 10 or equivalent; introductory environmental science course such as ES 11 or 12, GE 22, or BI 20; or permission of the instructor.

**ENVS 1370. Environmental Geochemistry (GEOL 1370).**

Interested students must register for GEOL 1370 S01 (CRN 15270)

**ENVS 1400. Sustainable Design in the Built Environment.**

Provides students with an in-depth understanding of sustainability, as it relates to planning, engineering, architecture, landscape architecture and green buildings. Students conduct economic and environmental analyses to examine planning, design and building problems and opportunities holistically. Interdisciplinary teams work on applied design projects. Prerequisites: ENVS 0410, or equivalent by permission of instructor.

**ENVS 1410. Environmental Law and Policy.**

Introduces students to environmental law in the United States. Uses legal decisions and policy frameworks to consider the roles of non-/governmental actors in formation and implementation of environmental policy. Students will become familiar with major federal environmental laws and regulatory databases and see how legal precedent, differing understandings of risk and alternative regulatory and market-enabling strategies have shaped solutions to environmental problems. Provides opportunity to apply legal skills to local environmental legislation or legal problem. Intermediate coursework in Environmental Studies, Political Science, Community Health, Urban Studies or other environmentally-related coursework is recommended.

**ENVS 1420. Environmental Journalism.**

Introduces students to the basic tools of reporting and writing journalistic articles about environmental issues. Covers news, features, investigative and first-person pieces, it explores how environmental stories can be crafted to best capture the interest of editors and readers. The focus of the course will be on producing publishable work. In addition, students will review and critique the coverage of environmental issues in the press,
read outstanding examples of environmental reportage and feature writing, and examine the role of media coverage in the resolution of environmental controversies. Enrollment limited to 15. Instructor permission required.

**WRIT**

**ENVS 1440. Conservation Biology (BIOL 1470).** Interested students must register for BIOL 1470 S01 (CRN 14620)

**ENVS 1450. Ecosystem Analysis.** Develops ability to measure and characterize important biological and physical parameters of terrestrial ecosystems. Weekly field trips to explore measurement techniques and develop testable questions and/or hypotheses about different forested ecosystems. Qualitative and quantitative writing exercises explore how to describe the patterns and processes associated with the ecosystems visited. One Saturday field trip to central Massachusetts and one weekend field trip to New Hampshire are required. A background in environmental issues, as evidenced by taking BI 42 (BIOL 0420), is strongly recommended

**ENVS 1455. Marine Conservation Science and Policy.** Students will develop an interdisciplinary understanding of ocean ecosystems and how human communities are connected to them socially, economically, and ecologically. Integration of the scientific and human dimensions of marine conservation will be achieved through analysis of the current status, trends, and threats to ocean ecosystems; the range of individual-based and institutional solutions to mediate these threats; and case studies. Suggested prerequisites include ENVS 0110 or equivalent, or ENVS 0455, or ENVS 0490, or BIOL 0420 or written permission of the instructor. Participating students -- primarily advanced juniors, seniors and graduate students -- are expected to have background in at least one related field (e.g., biology, geosciences, sociology, economics, or political science) beyond the intermediate level

**ENVS 1460. Microbial Diversity and the Environment.** This is a lecture and discussion based course that focuses on the role of microbes in biological, geological, and environmental processes. This includes: introductory concepts, origins of life, bacterial evolution, role in climate change, metabolic diversity of biogeochemical cycles, microbial communities and interactions, habitat specific examples, and applications in the environment and human health. Recommended background courses: BIOL 0200, CHEM 0330 and an intermediate science course (e.g., BIOL 0280, GEOL 0240, or ENVS 0490)

**ENVS 1490. SES-Independent Study/Science Writing.** The culmination of the Semester in Environmental Sciences at the Marine Biological Laboratory is an independent research project that builds on the topics covered in the aquatic and terrestrial ecosystem analysis core courses. In addition students participate in a seminar designed to help improve their ability to tell a lay reader about science. Enrollment is limited to students in this program. Instructor permission required

**ENVS 1491. SES-Terrestrial Ecosystem Analysis.** Team-taught course examining: the structure of terrestrial ecosystems fundamental biogeochemical processes, physiological ecology, impacts of environmental change on the landscape; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required

**ENVS 1492. SES-Aquatic Ecosystem Analysis.** Team-taught course examining the structure of freshwater, estuarine and marine ecosystems; impacts of environmental change on the landscape at local regional and global scales; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems such as coastal eutrophication, fisheries exploitation. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required

**ENVS 1493. SES-Environmental Science Elective.** Two environmental science electives are offered each fall semester as part of the Semester in Environmental Science at the Marine Biological Laboratory, including: aquatic chemistry, mathematical modeling of ecological systems and microbial ecology. Enrollment is limited to students in this program. Instructor permission required

**ENVS 1500. Human Impacts on Ecosystem Function.** Explores our current understanding of how humans are impacting the functioning of ecosystems. Students will learn about the primary drivers of ecosystem change and how they affect the Earth’s cycles of carbon, nitrogen, and water, as well as changes in biodiversity and climate. This course will be divided into two broad thematic sections: 1. global issues followed by 2. regional issues. Students will be responsible for weekly reading and writing assignments. Enrollment limited to second, third and fourth year undergraduates and graduate students

**ENVS 1510. Environmental Theory and Philosophy.** Each student develops his or her own concept of "socially better." The task is to understand conceptions of "socially better" belonging to various authors and others in the class, to put one’s own concept in context with the readings and class discussion, and explain why that concept is sensible and should be taken seriously by others. Prerequisite: ES 135 or permission of the instructor

**ENVS 1530. From Locke to Deep Ecology: Property Rights and Environmental Policy.** Examines the evolution of property law and tenure in land, water, the atmosphere and natural resources, and the consequences of these property rights regimes for environmental protection. Readings drawn from the scientific, legal, public policy and popular literature are used to consider the development of American attitudes about the relationship between people and nature; the relationship between public and private rights in the land, sea, freshwater, atmosphere and wildlife; and the use of innovative property rights regimes in environmental policy. Intermediate coursework in Environmental Studies, Urban Studies, American Civilizations or other environmentally-related coursework is recommended

**ENVS 1540. Technology and Material Culture in America: The Urban Built Environment (AMST 1520).** Interested students must register for AMST 1520 S01

**ENVS 1550. Nature, Culture, History and the Environment: the Humanistic Lens.** When we look at Nature, what do we see? And how is that vision informed by our cultural worldview and social history? Furthermore, how does the way we view Nature affect the way we interact with it? This course explores these questions by examining the way that human societies socially and culturally construct "the environment." It also probes some of the intersections of the environment and myriad humanistic studies— including the lenses of environmental literature and history, environmental film, poetry, indigenous storytelling, and art history. Enrollment limited to 20. Instructor permission required

**ENVS 1555. Urban Agriculture: The Importance of Localized Food Systems.** Urban agriculture and community gardens have a critical function in a small but increasing movement toward more localized and sustainable food economies. This class will explore research and readings from multiple disciplines on the role of urban agriculture in world development and sustainability practices. Further, we will explore current U.S. farm policy, labor practices, and global organizations that impact world agricultural systems. More importantly, students will become involved in planning and developing local urban agriculture projects. They will also learn organic agricultural practices and be involved in community partnerships associated with increasing healthy food access. Enrollment limited to 40

**ENVS 1560. Sustenance and Sustainability: Exploring the Nexus of Agro-Food Systems, Society, the Environment.** Explores the intersections of agriculture, society and the environment. Employing an interdisciplinary perspective, we explore the relationships —social, cultural, environmental and economic—that surround the cultivation, processing, distribution, marketing, preparation and consumption of food. We examine the ways in which contemporary agricultural practices have created environmental and social problems and inequities. Likewise, we also explore ways that alternative agricultural practices, including organic production, food re-localization movements, and community-supported agriculture (to name a few), may offer routes toward both human sustenance and sustainability in the face of global
ENVS 1565. Sustenance and Sovereignty: Food Justice and Global Agricultural Revolutions
Explores "food sovereignty" and "food justice," examining the potential for these concepts, in the face of the widespread inequities that characterize the current dominant agro-food system, to foster a more just, sustainable institutions and processes. We address the question: how can human societies create a more ecologically, socially, and economically sustainable agriculture, in ways that foster justice and respect for diverse cultures and practices? Topically, we examine agricultural labor practices, intellectual property rights and genetic resources, access to healthy, culturally meaningful foods, global trade policies, and corporate domination of supply chains, among others. Prerequisite: ENVS 1560. Instructor permission required. Enrollment limited to 25

ENVS 1700A. Working with Communities: Cultural Competence and Ethics
For students who will conduct research/education in community settings: for community/public health, environmental health, sociology, international development, environmental studies, and other fields. Focuses on ethical theories of research, methods of community engagement, participatory research designs, robust technical methods, IRB training and community data issues, education, and research dissemination. Students will learn the theory/practice of community-based, participatory research (CBPR) and cultural competence, particularly with selected cultural groups. Qualitative methods and research ethical understandings are critical to effective community research and education interventions and community/culturally-appropriate research practices. Enrollment limited to 40 undergraduate and graduate students

ENVS 1700B. Water Resources Science, Policy, and Management
Introduction to quantitative principles of water resource dynamics and application of those principles to water scarcity and quality management. Topics include global hydrologic cycle, water balance concept, surface and groundwater hydrology, aquatic biogeochemistry. Also intersectoral and jurisdictional allocation decision-making, balancing supply and demand, water system privatization. Prerequisites: one of the following: ES 11, 49, 51, BI 42, GE 22, or written permission

ENVS 1700C. Quantitative Research Methods: Creating, Analyzing, and Displaying Data
Introduction to the creation and analysis of quantitative data. Introduces a range of methods for obtaining data (experiments, natural experiments, surveys, and questionnaire design). Provides solid footing in basic descriptive statistics, introduction to statistical inference, and intuitive overview of more advanced multivariate approaches. Emphasizes applied data exploration and visualization

ENVS 1710. Environmental Health and Policy
Provides an overview of environmental health methods and their application to policy and regulation. Students will learn the basic tools of environmental health sciences, including toxicology, epidemiology, and risk assessment, as well as the scientific basis for regulation. Traditional environmental health concerns will be discussed, as well as emerging discourses on environmental health issues, including urban pollution and its concomitant health concerns, climate change, issues of health disparities and environmental injustice, and the interrelationship between humanitarian crises and environmental degradation. Open to both undergraduate and graduate students of all fields, space permitting. Prerequisite: ENVS 0110 or instructor permission

Provides an overview of environmental justice history, theory, and definitions. Students will review quantitative, qualitative, and theoretical approaches for understanding the origins and persistence of environmental discrimination. Examines the regulatory, institutional, structural, political, and economic forces that underlie patterns of race and class-based discrimination and their implications for environmental health among diverse communities. Case examples of environmental justice organizing will inform students of positive efforts by people of color in protecting their communities. Not open to first year students. Prerequisite: ENVS 0110

ENVS 1725. Political Economy of the Environment in Latin America (INTL 1450).
Interested students must register for INTL 1450 S01

Interested students must register for HIST 1790 S01 (CRN 15303)

ENVS 1800. Land-use Change in the Developing World
This seminar links Brown students with the Watson International Scholars of the Environmental Program that brings mid-career environmental professionals to the Brown campus for a semester. The course focuses on land-use change and understanding the forces that drive change using multi-disciplinary perspectives. It takes the hands on knowledge of the Watson Scholars and combines it with a detailed examination of western perspectives of the drivers of land-use change. The seminar will explore the degree to which the scientific literature and the experience of practitioners are in harmony or in conflict, and how these two perspectives form each other. Rapid changes in land use, particularly in developing countries, have profound impacts on environmental, economic and social sustainability. There is an opportunity and funding for students to spend the following summer working with Watson Scholars in their home country on land-use projects of mutual interest

ENVS 1820. Environmental Health and Disease (BIOL 1820).
Interested students must register for BIOL 1820 S01 (CRN 24083)

ENVS 1890. Native American Environmental Health Movements (ETHN 1890J).
Interested students must register for ETHN 1890J S01 (CRN 15276)

ENVS 1900. Introduction to Geographic Information Systems for Environmental Applications (GEOL 1320).
Interested students must register for GEOL 1320 S02 (CRN 15293)

ENVS 1920. Analysis and Resolution of Environmental Problems/Case Studies
Combines instruction about how to design research with hands-on experience conducting environmental research. Students develop their own research proposals and begin planning of a potential research project for their senior theses or capstone experience. A class research project is developed on local, state, national or global environmental issues, with the aim to serve community groups, government agencies or firms. Potential topics for class projects include urban adaptation to climate change, land use and watershed protection, and justice elements of energy and climate policy. Required for ES concentrators in Junior year. Prerequisite: ENVS 0110 or permission. Enrollment limited to Juniors and Seniors or by permission of instructor

ENVS 1925. Energy Policy and Politics
From coal power to solar power, energy drives economies and increases quality of life world wide. However, this same energy use can, and often does, lead to severe environmental destruction/pollution and global warming. This course serves as an introduction to energy policy in the United States and also explores global attempts to solve energy problems. This course examines different types of energy sources and uses, different ideological paths driving energy policy, the environmental impacts of energy use, current global and domestic attempts to solve energy problems, and the role of renewable and alternative forms of energy in future energy policy

ENVS 1929. The Fate of the Coast: Land Use and Public Policy in an Era of Rising Seas
For the last few decades, there has been a land-rush on the ocean coasts of the United States. Unfortunately, this swamps the coast at a time when sea levels are on the rise. In some places the rise is natural, in some places the rise is exacerbated by human activities and everywhere it is fueled by climate change. This course will examine the causes of sea level rise, the effect it produces on land, the steps people have taken to deal with these effects and their consequences, and possible remedies. Enrollment limited to 20. Preference given to juniors and seniors. WRIT

ENVS 1930. Land Use and Built Environment: An entrepreneurial view (ENGN 1930S).
Interested students must register for ENGN 1930S S01 (CRN 16171)

Interested students must register for ENGN 1930U S01 (CRN 24997)
ENVS 1965. Engaged Environmental Scholarship and Communication.
This upper level seminar will enable to students to place their research in the context of environmentally relevant policy and practice. Development of an environmentally-focused thesis or independent research project is a prerequisite. Students will hone practical professional skills, e.g. how to communicate scientific findings to the media and policy audiences; oral presentation skills, and tips on professional interactions. Required of all Brown Environmental Fellows (http://blogs.brown.edu/bef/), and open to others engaged in environmentally relevant projects from the natural and social sciences and humanities. Enrollment is limited to 15 seniors and graduate students, by application only (available Fall 2011). Instructor permission required. Contact Heather_leslie@brown.edu for more information. WRIT

First semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration

Second semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration

ENVS 2010. Special Topics in Environmental Studies.
A mandatory seminar for graduate students in environmental studies. This course develops group problem-solving skills by addressing a current local, national or global environmental issue. We will work on problem definition, identifying options for addressing the problems, and crafting potential solutions. In all stages we work closely with non-profit groups, government agencies, or firms, who have the capacity to implement solutions. Students learn basic research design and begin the process of developing a research question and possible methods for conducting their Master’s thesis research

ENVS 2420. The Structure of Cities (ECON 2420).
Interested students must register for ECON 2420 S01 (CRN 15137)

ENVS 2680. Ecosystem Modeling for Non-Programmers.
Emphasizes hands-on experience building ecosystem models. Students build about 8 models in an intensive three-week class in January at the Marine Biological Laboratory, then build their own model as a term project over the Spring semester. Term projects will be in the form of a manuscript formatted for publication in Ecology. Prerequisites: MATH 0050 and 0060, or co-requisite MATH 0090

ENVS 2700A. Gender and Environment.
Examines the historical roots and contemporary social movements of gender roles in environmental policy-making and protection, using both ‘Northern’ and ‘Southern’ scholarship. Case studies will be global in nature, but primarily focus on regions and localities in South Asia and Sub-Saharan Africa. In addition to the analysis of multi-national institutions such as the United Nations, the World Bank, and the IMF, community-based organizations and local resistance movements will be studied in order to fully deconstruct the current status of ‘conservation and livelihoods’ from a gender perspective

ENVS 2700B. ES Topics: Sociology of Natural Resources, Community Conflict, and Social Movements.
Examining a variety of natural resource issues, related community conflicts and social movements. This seminar challenges students to analyze conditions that encourage or prohibit social movements related to natural resource controversies, while inviting application of a political-economic theoretical frameworks. We will discuss US and global cases, and a global development perspective permeates the course. Ethical debates in natural resource development decisions will be examined in the context of theories of development. As a seminar, students will shape class discussions and add their own interests to the mix. Enrollment limited to 10 graduate students

ENVS 2980. Reading and Research.
First semester of thesis research during which a thesis proposal is prepared. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration

ENVS 2981. Reading and Research.
Second semester of thesis research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration

ENVS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

Center for Fluid Mechanics, Turbulence and Computation
Established in 1986, the Center for Fluid Mechanics, Turbulence and Computation was founded to promote research at Brown University in fluid mechanics, the study of turbulent flows and transition phenomena, the use of scientific computation in fluid mechanics research, and topics of related scientific interest. Participating members of the center include faculty from the Division of Applied Mathematics, the Division of Engineering as well as faculty from other departments. The center provides a forum for the development of new research topics and the sharing of research experience. Present areas of research range from micro-scale and nano-scale flow systems, multi-scale modeling of complex applications in arterial blood flow and the swimming of micro-organisms, as well as established areas such as multiphase flow and turbulence. The center attracts each year distinguished visiting scientists and provides a strong program for postdoctoral research, through sponsored research.

Current information on activities and research may be found at the Center’s website at http://www.cfm.brown.edu.

French Studies
Chair
Lewis C. Seifert
The prime objective of the Department of French Studies at Brown is that every student, concentrator or not, become skilled in using the French language in all types of communication, and that he or she understand as fully as possible French and Francophone literature and civilization and the contributions they have made and continue to make to human culture. The Department seeks to prepare interested concentrators in future careers such as college and secondary teaching, translation, international relations and diplomacy. It aims to give other concentrators a well-rounded education which will stand them in good stead in careers not directly related to France. Above all, the Department hopes to make all its students conscious of the wealth and diversity of the humanistic experience, open to the world of language, the arts, and the intellect, and fully equipped to continue the development of their interests and the strengthening of their powers as human beings throughout their lives.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/French/

French Studies Concentration Requirements
Building upon a foundation of proficiency in the French language, concentrators in French Studies explore the culture, history, and literature of Francophone civilizations. Students select from a variety of courses in language, historical periods, genres, themes, major writers, film, and civilization. Students interested in living in a French environment often reserve rooms in the coed dormitory (Machado House) at 87 Prospect
The department of French Studies offers three standard concentration tracks. Please note that the following apply to the French Civilization, French Literature, and French Language tracks:

1. FREN 0600 or equivalent is a prerequisite.
2. The overall requirement is for a minimum of nine courses (ten for Honors).
3. Up to four courses taken abroad may count for concentration credit.
4. The senior seminar (FREN 1900) must be taken during the senior year. (Requirement for Civilizations and Literature concentrations only).

French Civilization Track
The concentration in civilization enables students to develop a multifaceted understanding of French and Francophone cultures, histories, and contemporary issues. While based in French Studies, the program is interdisciplinary, calling for the integration of elective courses in departments such as History, Africana Studies, History of Art, International Relations, Political Science, etc. A minimum of seven courses are to be taken in French Studies.

Required courses
- An upper-level language course from the FREN 1510 or FREN 1610 series 1
- A course from the FREN 0750 series
- A course from the FREN 1900 series

Electives
- Six courses: Four must be in French Studies. A maximum of two may be in other departments, at the 1000-level or higher. 1

Total Credits
9

1 French Studies electives are numbered FREN 0760, FREN 1000, and higher. A course from the FREN 1410 series is highly encouraged. A non-exhaustive list of extra-departmental electives is posted on the department's web site.

French Literature Track
The literature concentration provides a comprehensive view of French and Francophone literature and various types of literary analysis. Introductory courses acquaint students with methods of intellectual inquiry and basic critical approaches. Upper-level courses explore a particular author, literary genre, period, or special topic. Students learn how to use diverse analytical approaches, including semiotic, philosophical, psychological, feminist, and reader-oriented methods of criticism.

Required courses
- An upper-level language course from the FREN 1510 or FREN 1610 series 1
- A course from the FREN 0750 series
- A course from the FREN 1900 series

Electives
- Five courses from the FREN 0750 and FREN 1010 series and higher.

Total Credits
9

French Language Track
The concentration in language combines advanced linguistic proficiency with the study of language as a human phenomenon. It combines course work in French Studies with disciplines that analyze the functioning of language (Cognitive and Linguistic Sciences), use linguistic models to study other fields of human behavior (Anthropology), or provide other specialized insight (e.g., Comparative Literature, Philosophy, Modern Communication and Media).

Required courses
- A course from the FREN 1510 series 1
- A course from the FREN 1610 series 1
- A course from the FREN 1020 series 1

Electives
- Two courses in French Studies, from the FREN 0750 series or higher.
- One final independent study course to provide a synthesis of the knowledge acquired in various areas of study.

Total Credits
9

1 A non-exhaustive list of extra-departmental electives is posted on the department's web site.

The Honors Program
Candidacy for honors in French Studies presupposes an outstanding academic record, particularly in the major field. Any of the programs may be expanded into an Honors Concentration with these differences: the student will take a minimum of ten courses and write an Honors Thesis. While normally taken only in the seventh semester, students may opt to re-enroll in FREN 1990 (Senior Thesis) during the last semester, in which case eleven courses are required.

Further information on French Concentration Tracks and the Honors Programs is available on the department's web site or from the Director of Undergraduate Studies.

French Studies Graduate Program
The department of French Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. Under most circumstances, the A.M. degree is only awarded as part of the Ph.D. track.

For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/french-studies

Courses
FREN 0100. Basic French.
This is the first half of a two-semester course. Four meetings a week for oral practice. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). Enrollment limited to 18

FREN 0200. Basic French.
This is the second half of a two-semester course. Four meetings a week for oral practice plus one conversation hour. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). Enrollment limited to 18

FREN 0220. Reading French in the Arts and Sciences.
Designed to develop the reading competence in French for graduate students (or advanced undergraduates with permission of the instructor). Fundamentals of grammar and syntax are emphasized as well as reading skills in the fields of individual students. Successful completion should satisfy the foreign language requirement for graduate students in other departments. (Consult the relevant department.) No prerequisites. For graduate-level credit

FREN 0300. Intermediate French I.
A semi-intensive elementary review with emphasis on all four skills (listening, speaking, reading and writing). Class activities include drills, small group activities, and skits. Class materials include an audio CD, videos, a French film, short stories, and various other authentic documents. Prerequisite: FREN 0200 or placement (Previous experience...
with French is required to take this class). Four meetings per week plus a 50-minute conversation section with TAs. Instructor permission required

**FREN 0400. Intermediate French II**
Continuation of FREN 0300 but may be taken separately. A four-skilled language course that stresses oral interaction in class (three meetings per week plus one 50-minute conversation section). Materials include audio activities, film, and a novel. Short compositions with systematic grammar practice. Prerequisite: FREN 0300, FREN 0200 with permission, or placement. Instructor permission required

**FREN 0500. Writing and Speaking French I.**
A four-skilled language course that stresses oral interaction in class. Thematic units will focus on songs, poems, a short novel (E-E Schmitt), two graphic novels (Sattouf, Larcenet), films and a detective novel by Fred Vargas. Activities include a creative project using Comic Life, and a systematic grammar review. Prerequisite: FREN 0400, FREN 0200 with written permission, or placement. Instructor permission required

**FREN 0520. Introduction to the Literary Experience.**
Pre-requisite: FREN 0400; equivalent to FREN 0500 in language sequence. Language course in which discussions and writing exercises are based on readings in French and Francophone literature and film, focusing on geographic displacement and the relationship between place and identity. With grammar review and short papers. Texts include: Baudelaire, Maupassant, Eberhardt, van Cauwelaert, Emaux

**FREN 0600. Writing and Speaking French II.**
Prerequisite for study in French-speaking countries. Class time is devoted mainly to conversation and discussion practice. Writing instruction and assignments focus on essays, commentaries, and to a lesser degree, on story writing. Apart from reading assignments for discussion (press articles and literary excerpts), students select two novels to read. Prerequisite: FREN 0500 or placement. Enrollment limited to 18. Instructor permission required

**FREN 0620. Writing and Speaking French II: Literature.**
Prerequisite for study in French-speaking countries. Continuation of FREN 500. Class time is devoted mainly to conversation and discussion practice. Same level as FREN 0600. This course is designed for students interested in literature. Discussions and writing assignments are based on a selection of literary texts from the Francophone world and introduce students to the analysis of literature. Prerequisite: FREN 0500. Enrollment limited to 18

**FREN 0720A. From Courtly Love to Postmodern Desire.**
From twelth-century courtly literature to contemporary film, this course explores the enduring romance between French culture and Eros. The ambiguities of desire are brought to the fore across changing religious and social contexts. Readings include Duras, Flaubert, Freud, and Baudrillard. Open to students who receive a 5 (AP test), 700 and above (SAT I) or with instructor’s permission. Open to first year students only. Please email Virginia_Krause@brown.edu if you have questions. FYS

**FREN 0750A. Lost in Translation: Les voyageurs français en Virginie.**
If you have questions. FYS with instructor’s permission. Open to first year students only. Please email Virginia_Krause@brown.edu if you have questions. FYS

**FREN 0750C. Cinéma et histoire.**
Is cinema a reliable source of information? What value can one attribute to a cinematographic document? What is the status of a filmic representation of historical events like the French and Algerian Revolutions or World War II? Following the lead of historians, sociologists, film analysts and critics, the goal of this course is to study the complex relationships that exist between history as it is accounted for by historians and history as it is represented by filmmakers.

**FREN 0750D. Nous et les autres: les Français et le monde de la Renaissance à la Révolution.**
An exploration of early French encounters with and reactions to non-European cultures from 1500 to 1800. Studying travel narratives, essays, and fictional texts, we will examine the multiple ways that French identity attempts to come to terms with its "Others" during this crucial period of European colonial expansion: Texts by Cartier, Thévet, and Choisy; Montaigne, Molière, and Montesquieu, among others

**FREN 0750E. Lost in Translation: Representations of America by French Writers.**
Is there a "true" America? In which ways is America different from Europe? What characterizes American culture? What does America stand for politically, culturally? In this course we will study networks of ideas and images which have shaped the dominant historical representations of America by French writers, thinkers, travelers during the nineteenth and twentieth centuries. Three short papers. Instructor permission required

**FREN 0750F. Empire in the French Imagination.**
From the early nineteenth century to the 1931 Colonial Exposition in Paris and the Algerian Revolution, ideas and debates about slavery, race, and colonialism informed the ways in which French writers and intellectuals thought about empire and its relationship to national identity. This course examines how these debates took shape through contrasting imaginative conceptions of empire from the 1800s until the 1960s, when France lost most of her colonies. How did visions of empire contribute to the formation of French colonial identity, and what kind of purchase do these ideas have on contemporary French cultural and political life?

**FREN 0760A. Introduction à l’analyse littéraire.**
On what terms and with what tools can we "read" a literary text? An introduction to major periods and genres (the short story, the novel, poetry, theater) of French and Francophile literature and to a range of analytical approaches to the text, including narrative theory, poetics, psychoanalysis and gender studies

**FREN 0980. Becoming French: Minorities and the Challenges of Integration in the French Republic (HIST 0980B).**
Interested students must register for HIST 0980B S01

**FREN 1000A. Littérature et intertextualité: du Moyen-Age jusqu’à la fin du XVIIème s.**
A chronological survey of French literature from the Grial romance to neo-classical tragedy. Topics will include the birth of courtly love, the Crusades, lyric poetry, and Humanism. Course discussions will be devoted to the close reading of texts by writers such as Marie de France, Chrétien de Troyes, Ronsard, Louise Labé and Montaigne.

**FREN 1000B. Littérature et culture: chevaliers, courtisans, sorcières et philosophes.**
From the Middle Ages to the Age of Versailles, this course will examine foundational moments in French civilization: the Crusades, courtly love, humanism, the witch hunts, Cartesian reason, and the emergence of the autonomous self. Close scrutiny of literature and film will provide a window onto French civilization before the Revolution

**FREN 1010A. Littérature et intertextualité: du 18ème siècle jusqu’à nos jours.**
This chronological survey introduces students to works from diverse genres (e.g. realism, symbolism, postmodernism). Authors to be studied include Marivaux, Prévost, Balzac, Maupassant, Baudelaire, Duras, and Camara Laye

**FREN 1010B. Modernités Littéraires: Du 18ème siècle jusqu’à nos jours.**
A chronological survey of French literature introducing seminal texts from the last 300 years. Classes devoted to discussion and to the development of skills in close textual analysis. Authors to be studied include Graffigny, Balzac, Baudelaire, Zola, Apollinaire, Duras, and Ben Jelloun

**FREN 1020A. Histoire de la langue française.**
We will examine the language interface between Gaulois, Francs, Vikings, and Romans; the voluntarism of French courts, grammarians, of the French Revolution or French feminists; the status and particularities
of French in the European, American, and African francophone areas; "French conversation," French orthography, jeux de mots, pub, and langage des jeunes

FREN 1030A. L’univers de la Renaissance: XVe et XVIe siècles.
An exploration of the cultural cosmos of Renaissance France through literature, visual culture, history, and film. What projects, fantasies, and nightmares characterize this stormy period in French history, from the birth of Humanism to the Wars of Religion? Other topics include the trial of Martin Guerre, court life, madness, and the New World. Readings in Montaigne, Louise Labé, among others.

FREN 1030B. The French Renaissance: The Birth of Modernity?
This class will read works from the French Renaissance in historical and cultural context. Did the Renaissance mark the birth of what we call the modern period? So much of twentieth and twentieth-century thought relies on the notion that our modern paradigm came into being with the Renaissance. We will read literary works by writers such as François Rabelais, Louise Labé, Marguerite de Navarre and Agnippa d’Aubigné in relation to both medieval and Renaissance writers and philosophers such as Jean Calvin, Martin Luther, Marsilio Ficino, and Erasmus and political actors such as Francis Ist, Charles IX and Henry IV. Enrollment limited to 40

FREN 1040A. Civilite et littérature.
How should one burp, pass gas, and spit in public? Should people use utensils when eating? How should a young woman react when a man speaks to her without her parents consent? Questions such as these preoccupied 17th-century France, which defined much of what we understand today to be civility (a.k.a. courtesy, good manners, politeness). In this course we will examine how literature makes civility seem either natural or normal or artificial and deceptive. We will see that civility became a powerful means of constructing the body and social categories (such as gender and class), but that it also led to far-reaching critiques of its own norms. Readings will include selections from conduct manuals (Faret and Courtin), comedies (Corneille and Molière), letters (Voiture and Sévigné), fairy tales (d’Aulnoy and Perrault), "moralist" writing (Pascal, La Rochefoucauld, La Bruyère), and cultural history (Chartier, Elias, and Foucault).

FREN 1040B. Le théâtre du XVIIe siècle: de la lecture à la mise en scène.
Considers both literary and performance aspects of 17th-century French theater. After discussion of each play as a historical and literary artifact, students stage selected passages in class. When available, videos of performances are shown and discussed. Three papers and a final class project (mises en scène of passages from some of the plays studied). Plays by Corneille, Molière, and Racine

FREN 1040C. Le Grand Siècle à l’écran.
Why is the "Grand Siècle" depicted so frequently in contemporary French film? To answer this question we will explore the roles 17th-century culture plays in French identity through readings in history and literature and recent films focusing on 17th-century texts, personalities, or events. We will highlight both continuities and discontinuities between the 17th century and our own time. Readings by Corneille, Cyrano de Bergerac, Lafayette, Maintenon, Molière, Pascal, Racine, Sévigné. 10 films. Two short papers, two oral presentations, a weekly blog, and a final project (paper or multimedia project)

FREN 1040D. Molière et son monde.
In-depth study of Molière’s theater and its cultural contexts. We will examine how Molière uses a variety of theatrical forms to portray the monarchy, social class, religion, medicine, and gender relations of seventeenth-century France. Plays by Molière will be studied alongside other literary texts and documents of the period as well as films (performances of plays, historical fiction).

FREN 1050A. "Family Values": Représentations littéraires de la famille au 18ème siècle.
This course will study the "invention" of the bourgeois family in 18th-century literature. It will examine particularly the ideological construct that supports this literature. Special attention will be given to the way in which this literature defines and orders family relationships around the notions of state, hierarchy, nature, and gender. Readings in Prévost, Diderot, Rousseau, Mme de Chardin, and Sade

FREN 1050B. Fictions de l’individu.
Explores various expressions of the self in the 18th century, especially with regard to conflicts with social constraints, hierarchical gendering, the ordering of class structures, and the effort to normalize sexuality. Notions of autonomy, freedom, and happiness, the chief pursuits of the Enlightenment, are examined. Authors studied include Marivaux, Voltaire, Rousseau, Casanova, Diderot, and Mme de Châtelet

FREN 1050C. Le Siècle des Lumières: Culture, Pensée, Société.
A presentation of various aspects of the Age of Reason through its most representative texts. This course examines the period in its entirety from its preoccupation with philosophy to its discovery of sensibility, from the development of libertinism to the affirmation of women and claims of liberty. Readings in Voltaire, Montesquieu, Rousseau, Beaumarchais, Diderot, Denon, Françoise de Graffigny, and Bernardin de Saint-Pierre

FREN 1050D. The Age of Voltaire: Culture, Pensée, Société.
A presentation of various aspects of the eighteenth century through its most representative texts. This course examines the period in its entirety from its preoccupation with philosophy to its discovery of sensibility, from the development of libertinism to the affirmation of women and claim of liberty. Authors to be read include Montesquieu, Rousseau, Sedaïne, Beaumarchais, Diderot, and Françoise de Graffigny

FREN 1050E. French Lovers: Séduction et libertinage sous l'Ancien Régime.
A study of love and relationships in the Old Regime. The course will concentrate on the major actors (the libertine, the fop), on the spaces (the boudoir, the salon, the garden), on social practices (conversation). Authors will include Molière, Mme de Lafayette, Crébillon fils, Lacos and film adaptations by Frears and Forman

FREN 1050F. Espace public; espace privé.
This course will study the interpenetration of spaces in the 18th century, the domination of the public space but the emergence of the private. We will attempt to draw the frontiers of these spaces in a variety of texts. We will explore social spaces (the salon, the café), the domestic space (cabinet, bedroom), places of leisure and exteriority (gardens). Readings in Crébillon fils, Denon, Bastide, Diderot, Mme de Chardin, Rulhi dez, Palissot

FREN 1050G. Le corps des Lumières.
This course will examine various representations of the body during the Age of the Enlightenment. We will study how these representations are influenced by notions of race and nation, discipline (Foucault), and by the Revolution. Texts by Montesquieu, Graffigny, Voltaire, Foucault, and historical context provided by Foucault, Outram and Hunt

FREN 1050H. The Age of Voltaire: Lumières et modernité.
A presentation of various aspects of the eighteenth century through its principal representative texts. This course examines the period in its various preoccupations: with philosophy, its discovery of sensibility, the development of libertinism, and the pursuits of liberty. Authors to be read include Voltaire, Marivaux, Rousseau, Sedaïne, Diderot, and Françoise de Graffigny

FREN 1060A. Décadence.
Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Péladan, Lorrain, Rachilde, Mendès, and Nordau

FREN 1060B. Gender and the Novel.
This course explores how major authors represented gender and sexuality. Obsessed with unlocking the mystery of femininity, novelists attempted to represent truths about sexual difference while new scientific discourses (psychiatry, sexology, criminology) aimed to analyze gender and sexual deviance in objective terms. Authors include: Balzac, Flaubert, Zola, Rachilde, Foucault, and 19th-century scientific texts

FREN 1060C. La texte réaliste.
This course will focus on realism, both as a literary movement of the second half of the 19th century and as a style present during other eras (such as romantic realism) and in other "non-realist" genres (poetry, science fiction, literature of the fantastic). How does a literary text convince its readers that it accurately copies reality? Does the realist novel have
privileged themes (sexuality, the modern city, corruption)? Readings by Stendhal, Balzac, Gautier, Jules Verne, Flaubert, Coppée, Zola, Maupassant

FREN 1060D. L’Orient littéraire.
This course is a study of the representations of the Orient (Turkey, Arabia, Persia) in the imaginary of classical French writers of the nineteenth century. Through the analysis of the phantasms pertaining to the representations of Sexuality and Power, this course will also study a series of figures associated with the Orient like travestissement, melancholia, nostalgia, etc. in the novels of Montesquieu, Chateaubriand, Flaubert, Gautier, and others

FREN 1060E. Gender, Sexuality and the Novel.
Examines constructions of gender and sexuality in relation to the schools and styles of the 19th-century French novel, including romanticism, realism, decadence, and the popular novel. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, accompanied by non-fictional sources in early sexology and criminology

Nineteenth century Paris in interdisciplinary perspective—literature, art, history, politics, Haussmann’s transformations of the city, revolution. Works by Balzac, Baudelaire, Flaubert, Rimbaud, Marx, Benjamin, Bernard Marchand, Ingres, Delacroix, Courbet, Manet, Caillebotte, Daumier. Classes in English, readings in original or translation depending on language proficiency of the student

FREN 1060G. Boulevard du crime.
We will analyze criminality and its representations in nineteenth-century France in order to gauge the fears, aspirations, and ideologies of the period. We will read literature by such canonical authors as Balzac, Maupassant, and Zola, as well as popular detective novels. Non-fictional sources include criminological treatises, trial transcripts, and memoirs by prisoners. Secondary sources by Barthes, Foucault, Todorov

FREN 1070A. Avant-Gardes.
We examine avant-garde groups and movements, including surrealism, Collège de Sociologie, Oulipo, existentialism, Tel Quel, situationnisme, Théâtre du Soleil, politique et psychanalyse, while trying to assess their aesthetic/political platforms and their performative strategies. Readings include (poetic) manifestoes, novels, plays and essays by Breton, Calliope, Bataille, Colette Peignot, Queneau, Sartre, Sollers, Kristeva, Guy Debord, Cixous, Wittig, Irigaray, Catherine Clément

Does a writer belong to a "nation"? To which nation does one belong when one writes in the language of one’s former colonizer? Does political independence warrant the existence of a new nation? Finally: How does literature contribute to the emergence and consolidation of a new nation? Many writers faced these questions after the independence of their countries from French colonial rule. Analyzes the answers Francophone writers offered to these perplexing questions in their novels and essays. Two short papers and a final essay

FREN 1070C. Figures du roman français au XX siècle.
We will analyse novels by Marcel Proust, Jean Giono, Julien Gracq, Samuel Beckett, Marguerite Duras, Nathalie Sarraute, Le Clézio, Philippe Sollers, Annie Ernaux and Marie Redonnet while trying to assess the main tendencies of the contemporary French novel and the cultural evolution that led to it

FREN 1070D. Le roman français au présent.
Reading and discussion of postmodernist novels of all kinds and shapes-lyrical or essayistic, minimalist or baroque, centered upon female or male subjectivities, or simply bringing an echo of inner debates, lost legends and eternal quests. Novelists include (poetic) manifestoes, novels, plays and essays by Balzac, Flaubert, Rimbaud, Marx, Benjamin, Bernard Marchand, Ingres, Delacroix, Courbet, Manet, Caillebotte, Daumier. Classes in English, readings in original or translation depending on language proficiency of the student

FREN 1070E. Littérature, appartenance et identité.
In this course, the analysis of a series of significant literary and critical texts written by French and Francophone contemporary writers will allow us to study the meaning of the emergence of new forms of identity and belonging in 20th-century modern French and Francophone writers. Three short papers

FREN 1070F. Nations of Writers.
Does a writer belong to a "Nation"? How does literature contribute to the emergence and consolidation of a new Nation? These are two of the kinds of questions which will guide our reading of major contemporary French and Francophone writers. Works or excerpts of works by Bouraoui, Sebbar, Memmi, Derrida, Farès, Khatibi, Djebar, Béji, Cixous, Roumain and others. Two short papers and an oral exam

FREN 1070G. Writing the Self: Memory, Childhood and the Novel.
The course will focus on autobiographical writings by Colette, Proust, Sarraute, Robbe-Grillet, Roche, Condé, and Barthes

FREN 1070H. Literature and Social Thought: Le Roman Policier.
What does the popular genre of the roman policier teach us about modern French culture and society? What does it show about French political and social institutions? What does it reveal about French history? Readings of works by Boileau-Narcejac, Frédéric Dard, Sébastien Japrisot, J.P. Manchette, G. de villiers, Yasmina Khadra and others. Two short papers and an oral presentation

FREN 1070I. Histoires d'animaux.
From fables and fairytales to postmodern pastiche, the presence of the animal, whether literal or allegorical, has worked as a critical counterpoint to that of the human. In this course we will consider some ways in which modern prose, poetry and film "think" - and increasingly mourn - humans' disappearing others. Authors include Michaux, Cendrars, Ponge, Bresson, Chevillard, Marker, Derrida

FREN 1100F. Contes et nouvelles du Moyen Age.
Storytelling in medieval French courts, villages, and towns. Works read (in modern French translation) include love tales, fables, chivalric adventures, comic escapades, earthy anecdotes, stories of warfare and politics. Class discussions investigate the tales and consider how medieval listeners and readers responded to them. Brief lectures on questions of cultural context

FREN 1100G. Old French Language and Literature Seminar.
An introduction to reading Old French prose and poetry. Grammar and vocabulary will be acquired by reading, translating, and discussing early texts in relation to European political and cultural developments. Prose selections: short stories, travel narratives, and chronicles. Verse selections: epic, lais, romance, fabliaux, satires, and lyrics. Taught in English

FREN 1100H. Histoires et contes du Moyen Age.
Stories told from 1100 to 1500 to instruct and entertain audiences in courts and towns. We read modern French translations of medieval legends, romances, chronic accounts of warfare and politics, comic yarns, and earthy anecdotes. We relate each of those narratives to medieval social conditions, politics and culture

FREN 1101F. Hostages and Prisoners of War in Medieval French Literature.
In the Middle Ages, being taken as a hostage or prisoner of war was a relatively common occurrence, depicted often in literature of the period. Through this theme, the course will examine some of the great works of the French Middle Ages, from Chrétien de Troyes’s Lancelot to the lyric poetry of Charles d’Orléans. The representation of captivity will allow us to investigate the era’s historical and political realities, its cultural and linguistic conflicts, and its conceptions of personal identity. The course will include instruction in reading medieval French

FREN 1110A. Fictions of Greatness.
F. Scott Fitzgerald’s The Great Gatsby is an American example of a persistent tendency in the modern novel-the dramatization of variously heroic, ironic, comic, tragic, corrupt, and even criminal quests for human achievement. This course provides a close study of a series of major French novels, from Balzac to Malraux, against the background of theoretical formulations from the German Bildungsroman to Lukacs’ Theory of the Novel, including feminist revisions

FREN 1110B. Gender, Sexuality and the Novel.
Examines constructions of gender and sexuality in relation to the schools and styles of the 19th- and early 20th-century French novel, including romanticism, realism, decadence, and the popular novel. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, and Marguerite, accompanied by non-fictional sources in early sexology
FREN 1110C. Le Roman Français de puis 1990.
Reading and discussion of postmodernist novels of all kinds and shapes, lyrical or essayistic, minimalist or baroque, centered upon female or male subjectivities, or simply bringing an echo of inner debates, lost legends and eternal quests. Novelists include Duras, Sarraute, Sollers, Le Clézio, Ernaux, Germain, Rio, Redonnet, Savitzkaya, Chevillard, and Mauvignier. Two short essays and a final paper

FREN 1110D. Lire le roman.
A close look at narrators, fictional characters, and readers in 19th- and 20th-century novels to see how ideological and psychological insights, emotions, and memory shape the reading of narrative fiction. Pays special attention to how empathy, sympathy, and persuasion make for an engaged, interested, and possibly resistant reader. Writers studied include Balzac, Flaubert, Stendhal, Proust, Colette, and Sarraute

FREN 1110E. Mémoire, oubli, histoire.
The role of memory, forgetting, and the past and their repercussions on the present as depicted in film and works of French narrative fiction, including La Princesse de Clèves, Le Rouge et le noir, Le Temps retrouvé, Mémoires d’Hadrien, La Migration des coeurs. The focus will be on personal and cultural identity, ethical questions, and literary aesthetics— informed by readings on narrative, philosophy, and psychology

FREN 1110F. Le Roman contemporain.
In this course we will read a selection of French and Francophone novels from 1990 to 2010. Authors may include Marie Ndiaye, François Bon, Laurent Mauvignier, Pierre Michon, Marie Redonnet, Patrick Chamoiseau and Anada Devi. Excerpts from contemporary criticism will provide certain key concepts with which we will engage throughout the semester: the real, the everyday, history, genealogy, women’s writing, postcoloniality, the "post-modern", etc. Assignments include two critical essays and two class presentations

FREN 1120A. Le théâtre de la Belle Epoque.
The civic festivities, universal expositions, bohemian gaiety, and commercial entertainments of the Third Republic are matched by a lively confrontation between vaudeville, naturalist comédie rosse, symbolist theater and the emerging absurd comedy of the anti-théâtre. We’ll study representative plays by Claudel, Maeterlinck, Feydeau, Courteline, Rostand, and Jarry, comparing them with paintings and prints by Degas, Seurat, or Toulouse-Lautrec

FREN 1120B. Le théâtre des femmes au Xe siècle.
We will discuss French and Francophile female playwrights and directors among whom Marguerite Yourcenar, Marguerite Duras, Nathalie Sarraute, Arianne Mnouchkine, Hélène Cixous, Marie Redonnet; Patrick Chamoiseau and Anada Devi. Excerpts from contemporary criticism will provide certain key concepts with which we will engage throughout the semester: the real, the everyday, history, genealogy, women’s writing, postcoloniality, the "post-modern", etc. Assignments include two critical essays and two class presentations

FREN 1120C. Scènes de Passion et Raison: Théâtre et culture au XVIIe siècle.
A survey of the major works and dramatic essays that span the 18th century from the Rococo to the Revolution. Readings in Marivaux, Diderot, Voltaire, Mercier, Beaumarchais, Maréchal, Chénier

FREN 1120D. L’improvisu.
What is an impromptu and when did it appear as a theatrical genre? What are the personal/professional circumstances in the life of a playwright that are addressed in impromptus? We will answer such questions while discussing clusters of impromptus; impromptu plays; plays incorporating impromptu components; and impromptu films. Readings from Molière, Marivaux, Rostand, Giraudoux, Ionesco, Beckett, Obaldia and Duras

FREN 1130A. Introduction à la poésie.
In this course we will read poetry from the major movements of the 19th and 20th centuries (romanticism, symbolism, surrealism, contemporary poetry) and explore poetic productions that have been deemed marginal to the dominant tradition (including poetry of the négritude and women’s poetry). Poets read will include Lamartine, Musset, Vigny, Hugo, Desbordes-Valmore, Baudelaire, Verlaine, Rimbaud, Mallarmé, Laforgue, Viven, Valéry, Apollinaire, Eluard, Senghor, Césaire, Ponge, Char

FREN 1130B. Révolution poétique - à la française: Baudelaire, Rimbaud, Mallarmé.
Primary emphasis: intensive study of the poetic production and theoretical texts of three writers who substantially contributed to the radical transformation of modern Western poetry. Additionally: attention to historical contexts and to influences on later writers and theories. Enrollment limited to 20

Baudelaire’s writing in Marxist, feminist and post-colonial perspectives

FREN 1130D. Le monde moderne et le poète.
What kind of language, what sort of act, is a poem? How might poetry invent the conditions of a modern world? In this course on 20th century French and Francophone poetry, we shall think about space, fragmentation, the everyday, the subject, the object, reading works by Apollinaire, Cendrars, Michaux, Césaire, Ponge, Du Bouchet, amongst others

FREN 1150A. Literature and Cinema.
Introduces the fertile relationships that exist between literature and cinema. The study of several cinematic adaptations of novels helps to answer the following questions: How does a novel translate into a film? What characterizes each medium? What kind of aesthetic impact did cinema have on literary works? Novels by Cocteau, Balzac, Zola, Maupassant, Flaubert, and Gide and films by Renoir, Truffaut, Chabrol, Rivette, and others

FREN 1150B. Introduction to French Cinema.
French Cinema: The First 50 Years. This course explores the history of French cinema and its relation to politics, history, technology and art during the first half of the 20th Century. Readings, discussions, and lectures in French and English. Films with English and French subtitles

FREN 1150C. French Cinema: The First Fifty Years.
This course explores the history of French cinema and its relation to politics, history, technology and art during the first half of the 20th century. Readings, discussions, and lectures in French and English. Films with English and French subtitles. Screenings outside of class

FREN 1150D. French Cinema from 1945 to Today.
This course explores the history of French cinema and its relation to politics, history, technology and art from 1945 up to the present. Readings, discussions, and lectures in French and English. Films with English and French subtitles. (FREN 1150B is recommended but not a prerequisite.) Screenings outside of class

FREN 1210A. Chrétiens de Troyes.
Author of some of the earliest and best Arthurian romances, Chrétien de Troyes is the central figure of 12th-century French literature. He still delights us with his clever storytelling, his sense of humor, and the playful irony of his psychological observations. We will study his five major romances, relating them to the court culture and the intellectual world in which he lived. The romances will be read in modern French prose translation, with close-up work on selected passages in the original Old French verse

FREN 1210B. Marcel Proust.
The focus will be on Proust’s enduring masterpiece A la recherche du temps perdu, and the different perspectives this compelling novel invites, including the most intimate and personal (emotions, dreams, sexuality) as well as the communal and cultural (family, society, history and the arts.) The pervasive role of time, memory, and affect will be central to our discussion. Open to undergraduate and graduate students

FREN 1210C. Reading Proust at the Turn of the Century.
Proust’s enduring masterpiece A la recherche du temps perdu, viewed from different perspectives: philosophical, psychological, and cultural. Open to undergraduate and graduate students interested in the rich rewards of reading this complex novel and in considering the impact of narrative fiction on our lives

FREN 1210D. Marguerite Duras.
A course devoted to the novels, plays, films, essays and interviews of Marguerite Duras. Two short essays and a final paper

FREN 1310A. "French Lovers": Séduction et libertinage sous l’Ancien Régime.
A study of love and relationships in the Old Regime. The course will concentrate on the major actors (the libertine, the fop), on the spaces (the boudoir, the salon, the garden), on social practices (conversation).
Authors will include Molière, Mme de Lafayette, Crébillon fils, Laclos and film adaptations by Honoré, Fréars, and Forman.

FREN 1310B. Altérités sexuelles, perversions littéraires.
Traces nearly 100 years of male and female homosexuality in literature. Examines new discourses on sexual deviance, whose emergence coincided with the "invention" of homosexuality in the mid-19th century and which then exploded with the Decadent movement at the turn of the century. Also considers some medical texts that helped define the terms of sexual deviance. Authors include Baudelaire, Verlaine, Huysmans, Rachièle, Ekhoud, Zola, Vivien, Margueritte, Colette.

FREN 1310D. L'Orient littéraire.
Examines the representations of the Orient (Turkey, Arabia, Persia) in the imagery of French and Francophone writers of the 19th and 20th centuries. Through the analysis of the fantasms pertaining to the representations of Sexuality and Power, this course will study the dominant figures associated with the Orient. Two short papers and an oral presentation.

FREN 1310E. Paris, ville des Lumières.
Representations of the city, the crowd, the rise of the individual, the narrator as spectator and promeneur, narratives of social mobility, speed and circulation; sex and the city; gender anxieties and myth of decadence; Paris as a cultural place. Various authors to be studied: Marivaux, Monbrun, Rousseau, Diderot, Mercier, Restif de la Bretonne.

FREN 1310F. Penser la France et l'Europe.
We will read philosophers (e.g. Levinas, Irigaray, Lipovetsky, Ferry, Renaut, and Le Doveu), anthropologists (Dumont and Favret-Saada), and historians (Duby and Perrot) while debating such issues as individualism versus holism, modernity versus postmodernity, autonomy versus freedom, democracy, feminism, violence, fashion, and France versus Europe.

FREN 1310G. War, Image, Text.
This course treats literary and film narratives of war from the 19th century to the present (Franco-Prussian War, WWI, WWII, colonial wars, the Gulf war). Topics include the uses and limits of realism in war narratives; issues of nationalism, patriotism, collaboration, resistance, civil rights, and the politics of gender in wartime. Students will research non-fictional sources to supplement class readings.

FREN 1310H. Contes et identités francophones.
How do folktales define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada? How have the study and rewriting of these traditions redefined such identities? We will consider these questions by studying tale-types from the 19th century to the present and address theoretical issues pertaining to women and writing. Topics include: the relation of gender to genre; the écriture féminine debate; development of feminist thought; women's relation to masculine literary traditions and the canons. Readings include Graffigny, Gouges, Stalé, Desbordes-Valmore, Sand, Vivien, Rachilde, Noailles, Colette, Beauvoir, Ernaux, Chéridé, Cixous.

FREN 1320A. Apocalypses and Millennia.
A multidisciplinary investigation of figures such as Rimbaud, Van Gogh, the Surrealists, Simon, Blanchot, and Duras in the perspectives of history, philosophy, mysticism, literature, and the visual arts.

FREN 1320B. Du côté de la passion.
Focuses on the representation of emotions and passions in French novels from the 17th century to the present. In working out a new approach to characters in narrative fiction, the emphasis will be on perception and affect. In addition to novels, students will read short essays on the nature of narrative, on emotions, and on aesthetic response. Novelist include Madame de Lafayette, Rousseau, Balzac, Flaubert, Proust, Colette, and Sarratue.

FREN 1320C. Ecrire au feminin II: littérature des femmes 18ème siècle jusqu'à nos jours.
This chronological survey of writing by women in France from the 18th century to the present day has two goals. The first is to introduce students to important poetry and prose texts by French women authors. Secondly, we will pose theoretical questions pertaining to women and writing, including the relation of gender to genre, the existence of gendered writing, the historical development of feminist thought, women's relation to masculine traditions, and the place of women's writing in the literary canon. Texts by Graffigny, Charrière, Duras, Stalé, Desbordes-Valmore, Sand, Vivien, Rachilde, Noailles, Colette, Beauvoir, Ernaux, Chéridé, Cixous.

FREN 1320D. Ecrire au féminin: Women Writing in France.
This course introduces students to important female-authored texts from the 18th century to the present and addresses theoretical issues pertaining to women and writing. Topics include: the relation of gender to genre; the écriture féminine debate; development of feminist thought; women's relation to masculine literary traditions and the canons. Readings include Graffigny, Gouges, Stalé, Desbordes-Valmore, Sand, Colette, Beauvoir, Duras, Bâ, Wittig, and Cixous.

FREN 1320E. Femmes écrivains.
French women writers from the 19th-century to the present. Topics include: hetero- and homosexualities, class and gender, the role of the mother, visibility in the public space. Texts by Sand, Rachilde, Colette, Beauvoir, Duras, Ernaux, Garreta.

FREN 1320F. Contes et identités francophones.
How do oral traditions define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada? How have the study and rewriting of these traditions redefined such identities? We will consider these questions by studying tale-types that are found in all of the above regions, tales specific to each, and literary reworkings of folktales by writers, including d'Aulnoy, Perrault, Pourrat, Diop, and Chamoiseau.

FREN 1320G. Ecrire au féminin.
This course will examine a range of works from the 20th century, attentive to how motifs of travel and the "elsewhere" have been reimagined in modern literature. Readings will include texts by Michaux, Gide, Sartrre, Camus, Barthes and Toussaint. Some films (by Duras, Malle, Denis) will also be considered.

FREN 1320H. Ecritures de l'Ailleur.
This course will examine a range of works from the 20th century, attentive to how motifs of travel and the "elsewhere" have been reimagined in modern literature. Readings will include texts by Michaux, Gide, Sartrre, Camus, Barthes and Toussaint. Some films (by Duras, Malle, Denis) will also be considered.

FREN 1330A. Fairy Tales and Culture.
Fairy tales occur in almost every culture across the globe. If the genre has such broad appeal, it is because it encapsulates in (usually) succinct form many of the pressing concerns of human existence: family conflict, the struggle for survival, sexual desire, the quest for happiness, among many others. This course explores why writers and readers have been attracted to the fairy-tale form through a study of its key elements and its uses in adult and children's literature, book illustration, and film. Special attention will be given to French contes de fées, along with North American, English, German, Italian and selected non-Western fairy tales, organized according to folkloric tale-types. The course will be conducted in English.
All readings will be in English, with French, German, and Italian originals on reserve at the Rock.

FREN 1330B. Masterpieces of French Literature.
This course will study principally the most accomplished genre of the French literature, the novel. We will analyze the major representative novels from the 17th century to the present, and will attempt to study their access to canonicity. We will also evaluate their continued interest by focusing on the major contemporary interpretations that they have provoked. Readings in Mme de la Fayette, Laclos, Stendhal, Flaubert, Genet, and Duras.

FREN 1410A. Des monstres et de l’anormal.
What are monsters and why do they fascinate us so much? How and why have representations of “abnormal” creatures changed over time? We will examine these questions through literary, philosophical, and scientific texts from the 16th century to the present. In addition to films, iconography, and criticism, readings will include: Montaigne, Paré; Perrault, d’Aulnoy; Mendès, Lorrain; Bataille, Foucault, Darrieussecq.

FREN 1410B. Fins de siècles, débuts de millénaires.
We will compare the 19th and 20th century ends of centuries with the one available fin de millénaire—what people called in France fin Millet—and explore some of the perspectives for the 21st century, as debated in France nowadays. Readings from history, literature, anthropology, sociology, and philosophy combined with explorations of contemporary art, media, film, and press.

FREN 1410C. La culture franco-américaine en Nouvelle-Angleterre.
After a period of general training, students choose a specific topic and present partial results of their research for the course on a weekly basis. Projects include collecting oral history in Woonsocket, research on/in Franco-American institutions from Woonsocket (Mallet Library, American-French Genealogical Society, Union Saint-Jean-Baptiste, Les Dames Richelieu du Rhode Island), studies on Franco-American history, onomastics, literature, press, and film.

FREN 1410D. L’identité française.
We discuss different ways of defining French identity across centuries by stressing catholicism, le génie de la langue française, Cartesianism, French Revolution, les droits de l’homme, the French Presidency, Francophonie, and l’exception française, or, in a minor key, l’esprit gaulois, French cuisine, French chanson, cafés philosophiques, and French film.

FREN 1410E. Lire et voir la Révolution française.
Drawing from a wide variety of materials (novels, plays, speeches, pamphlets, caricatures, documentaries, films), this course will analyze the ways in which the Revolution attempted to represent itself and ways in which it has been represented. We will focus on the evolution of the images of the Revolution from the time of the Declaration of the Rights of Man to the Terror. We will read commentaries by prominent cultural historians such as Furet, Hunt, and Baker, but also Chartier and De Baecque.

History, politics, revolution, urban planning, architecture, literature and the arts, and critical theory, with emphasis on Napoléon III, Haussman, Karl Marx, Adolphe Thiers, Balzac, Baudelaire, Flaubert, Rimbaud, Zola, Delacroix, Daumier, Courbet, the Impressionists, and the criticism, of W. Benjamin and T. J. Clark.

FREN 1410H. Révoltes et opposition en France.
Why are strikes and protest marches more common in France than in the United States and many other countries? A good part of the answer lies in the traditions of social and political opposition that have existed in France since the Revolution. In this course we will examine how this tradition developed by concentrating on four key historical moments: the Revolutions of 1789-1794, the Commune, the Occupation, and the 1968 uprisings.

FREN 1410I. Sorcellerie et Renaissance: le sort de la sorcière.
An interdisciplinary exploration of witches and witchcraft in Renaissance France based on close analysis of primary texts-confessions from trials, iconography, literary texts, and witchcraft theory. Topics include the trial of Joan of Arc, the science of demons, skepticism, and the nature of belief. Readings in Montaigne, Mauss, among others. Enrollment limited to 20.

FREN 1410J. War, Culture, Politics.
Armed conflict in and involving France, from World War I to the war in Iraq. We will consider the socio-political climates giving rise to armed conflict, as well as the cultural products (journalism, memoirs, film, novels) resulting from the experience of war. Issues include colonialism, nationalism, collaboration, resistance, civil rights, international relations, and the politics of gender in wartime.

FREN 1410K. French Culture and Civilization: La pensée française au XXe siècle.
We will address XIXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Luc Ferry and Alain Badiou; Paul Valéry, Roger Caillois, and Paul Ricoeur, Emile Durkheim, Raymond Aron, and Pierre Bourdieu; Luce Irigaray and Michèle Le Doeuff. Two oral presentations and one final paper.

FREN 1410L. Being Marie Antoinette.
This course will examine the life of the last queen of France, Marie Antoinette, through a variety of materials: memoirs, pamphlets, films. We will follow her from her arrival at Versailles to the fires of the Revolution, her trial, and her demise. We will read some of the critical literature that has dealt with her legacy in the historiography (Hunt, Frazer, Thomas, Weber), the fiction (Ch. Thomas), and art history (Maza).

FREN 1410M. Liens communautaires et cultures au Moyen Âge.
Study of writings and art forms that shed light on the world views, modes of belief, social attitudes, cross-ethnic relations, and collective yearnings that shaped and animated several French-speaking cultures from 1100 to 1500. We will also look at some modern legacies of medieval art works and legends.

FREN 1410N. Présence française en Amérique du Nord au XXe siècle.
We will examine varieties of French spoken in Northern America (Acadian French, chic, joul, creole) as well as the French culture and literature of Quebec, New England and Louisiana. Students will choose between fieldwork in a New England francophone community of their choice or writing a solid essay on North-American francophone culture/literature.

FREN 1410Q. Boulevard du Crime.
A study of crime and criminality in relation to French culture and literature during the 19th and 20th centuries. Readings in a variety of fictional and non-fictional sources including short stories, detective fiction, novels, trials, memoirs, and criminological treatises.

FREN 1420B. France at War.
This course treats armed conflict from the Franco-Prussian war to the war in Iraq through readings of essays (Aubrac, Camus), fiction (Maupassant, Duras), press articles, correspondence, and film viewings (Tavernier, Chabrol, Pontecorvo). Topics include: nationalism and patriotism, collaboration, resistance, torture, civil rights, international relations, and the politics of gender in wartime.

After an intensive week of training, students choose a specific topic of research and work independently during the rest of the course. They meet with the instructor and present partial results of their research in the weekly seminar. Projects include collecting oral history in Woonsocket, research on (and in) Franco-American institutions located in the vicinity; and studies on Franco-American history, onomastics, literature, film, and...
press. While not required for all of the projects, a basic knowledge of French is strongly recommended. Conducted in English.

FREN 1510C. Advanced Oral and Written French: A table! Thematic units with different approaches to French cuisine and the French meal, such as regional cuisine, meals in literature and at the movies, radio-TV culinary shows, political and economical considerations, and, of course, a practical unit on how to compose, prepare and eat a French meal. Follows FREN 0600 in the sequence of language courses. Development of oral skills via presentations, debates, conversation, and discussion based on the various topics. Writing activities: essays, e-mails, commentaries, journals, etc. May be repeated for credit. Enrollment limited to 18.

FREN 1510D. Advanced Oral and Written French: L'animal post-moderne. This course will focus on depictions of animals in the present day French (and Francophone) public and cultural sphere – in literature, journalism, cinema, advertisements, the visual arts, etc. Through presentations, class discussion and reading and writing assignments (essays, short responses, a journal, a project) students will develop their linguistic, and critical skills in French while engaging thoughtfully with the course’s materials and questions. Follows FREN 600 in the sequence of language courses. Enrollment limited to 18.

FREN 1510E. Advanced Oral and Written French: La Traduction. An introduction to the practice of translation, this course will be designed to expand students' range and appreciation of written styles and registers and will be based on translation exercises and texts reflecting different types of written and oral communication. Texts will range from literary texts (excerpts from novels, plays, comic books...) to journalistic texts (articles from newspapers...). Class activities will also include comparative studies of translated texts, as well as grammar review and vocabulary work. Course taught in French. Written translations to and from French. Prerequisite: FREN 0600. Enrollment limited to 18.

FREN 1510F. Advanced Written and Oral French: Regards sur la France actuelle. This course will use contemporary and classic works, newspaper articles, and film – all "made in France” – to explore and analyze the myths, realities, and contradictions of France today. Through in-class discussions, debates, and presentations, students will gain a deeper understanding of the enigma and legacy of this European country that once was the center of the cultural world and an early model of democracy. Follows FREN 0600 in the sequence of language courses. Writing activities, essays, commentaries, journals, etc. May be repeated for credit. Prerequisite: FREN 600. Enrollment limited to 18.

FREN 1610A. Ateliers d'écriture. An advanced course in (functional or creative) writing. The workshops range from practice in interpersonal communication (letters) to essays and various forms of narration. Recommended to students returning from a study-abroad program, students with a native French background who lack formal training in writing, or post-FREN 1510 students. Exercises for each workshop plus a final writing project. Prerequisite: FREN 1510. Enrollment limited to 17. Instructor permission required.

FREN 1610B. To Be Determined. No description available.

FREN 1710A. France-Afrique/Afrique-France: Je t'aime moi non plus. Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature and film to reflect on the historical events and, socio-political processes that have shaped the encounter between France and Africa. How are African and French novelists/filmmakers responding to this relationship? Topics include: the Colonial Encounter, "World War II", Decolonization, Negritude and Immigration.

FREN 1710B. Black, Blanc, Beur. This course examines how the ethnic makeup of contemporary French society challenges its republican ideals of Liberty, Equality and Fraternity. Violent clashes involving teenagers from immigrant descents and the police are recurrent. Anti immigration policies have also become a major component of political discourse. We will use literature; film, newspapers and popular musical forms to reflect on issues such as integration, identity, violence, race and class.

FREN 1710C. Politics, Democracy, and Corruption in Francophone Africa. What do representations of democracy (its promises as well as its shortcomings) and corruption have to tell us about postcolonial and postmillennial politics in contemporary Francophone Sub-Saharan Africa? How have these interrelated problems and discourses been negotiated in French and African literature, film, journalism, and anthropology? This course will address these and related questions in a number of national and historical contexts, paying special attention to the ways in which current events on the continent both complement and complicate our understandings of Francophone African cultural production.

FREN 1720A. Disenchantment and Melancholia in Postcolonial Africa. In the decades following independence, African novels and films were characterized by euphoria. This optimism has since been replaced by narratives of hopelessness. Rather than assuming that disenchantment and melancholia lead inevitably to pessimism, we will explore ways in which artistic forms engage the idea of a better future through a careful examination of the predicaments facing the African continent. In English.

FREN 1720B. Foreign Bodies/Forbidden Sexualities in Africa and the Caribbean. The practice of homosexuality is a crime in several Caribbean and African countries. In Uganda, it is referred to as "carnal knowledge of another against nature” while Zimbabwe’s president Mugabe claims homosexuals are "worse than pigs and dogs." We will explore ways in which artistic forms engage the LGBT experience within predominantly heterosexual societies. Topics include: psychoanalysis, Black feminism, Black Queer theory, HIV/AIDS, gender role socialization.

FREN 1720C. Black Paris. This course is a study of Black Paris, as imagined by three generations of Black cultural producers from the United States, the Caribbean and Africa, who lived in Paris. We will investigate how the representation of Paris functions in the construction of black identities from Josephine Baker to Shaya Youngblood.

FREN 1720E. Melancholia Africana: Loss Mourning and Survival in Africa and the Diaspora. Traditional beliefs, historical and cultural circumstances construct how the African understands himself/herself in relation to the world. From this construction resonates a theme of loss - loss of land; of freedom; of language; of self. Melancholia Africana incorporates loss but moreover, grapples with the external world. We will explore ways in which literature, film and music portray loss, resilience and survival.

FREN 1900A. Boulevard du Crime. A study of crime and criminality in relation to French culture and literature from the late-middle ages through the 20th-century. Readings in a variety of sources including poetry (from Villon to Verlaine), theater (Racine), the novel (Zola, Genêt, Duras), trials (Gilles de Rais, the prototype of Bluebeard), memoirs (Lacenaire, dubbed the "elegant murderer"), and criminological treatises. Film screenings will complement readings.

FREN 1900B. Figures de l'étranger dans la littérature française. From Montaigne to Marguerite Duras, Segalen to Jean Genêt, modern French literature has been haunted by a specter: the figure of the Other (the foreigner, the "immigrant", the "bon sauvage", etc.) Various literary and philosophical texts will help us study the historical status and the various forms of these figures in modern French literature. Two short papers.

FREN 1900C. Fin de siècle, début de millénaire. This course considers some of the French answers to questions such as: How do peoples and cultures envision the end of a century, especially when it coincides with and is magnified by the end of a millennium? How do they, afterwards, reposition themselves in order to confront the beginnings of a new century and millennium? We analyze and compare the 19th- and 20th-century fins de siècle with the one available fin de millénaire-what people called in France l'An Mil-trying to discover both their similarities and their unavoidable differences. We then explore some of the perspectives for the 21st century, as debated in France nowadays. Readings from literature, history, anthropology, sociology, and philosophy combine with explorations of contemporary art, media, film, and press.
FREN 1900D. L’Utopie littéraire.
For centuries literary utopias have reinvented the world according to Western desires and values. In Europe, utopias have allowed writers to protect their dreams and fantasies on foreign territories. Utopian texts and films will be studied in order to better understand the role utopias have played in shaping the imaginary of generations in France. Novels, essays, films by Campanella, Voltaire, Marivaux, Mercier, Sand, Verne, Bouille, Topor, and others. Enrollment limited to 20

FREN 1900E. Temps et récit.
Time, memory, and concepts of the self in narratives from Montaigne to Sarrate. Texts include a variety of genres (fiction and nonfiction); the essay, epistolary and autobiographical writings, the historical novel, and psychoanalytical narratives. Additional readings by Freud, Bollas, Barthes, Genette, Ricoeur, and others provide a framework for inquiry and discussion

FREN 1900F. Senior Seminar: L’identité française.
This course examines different ways of defining French identity across centuries by alternately or simultaneously stressing Catholicism, le génie de la langue française, Cartesianism, French Revolution, individualism and les droits de l’homme, France in the European Union, the exception française, and Francophonie or, in a minor key, l’esprit gaulois, French cuisine, French chanson, cafés philosophiques and French films

FREN 1900G. French Feminisms.
Analysis of feminist thought, activism, and creative work in France from the middle ages to the present day. Topics include: proto-feminisms, revolution and women’s rights, utopian feminism, surrealism, psychoanalysis and other new French feminisms, la panté, Islamic and Muslim feminisms. Authors include: Christine de Pisan, Gournay, Poulain de la Barre, Gouges, Sand, Démor, Beauvoir, Irigaray, Wittig, Halimi, Amara

FREN 1900H. France at War.
This seminar considers the impact of warfare on France, its territories, and its former colonies. We will study various instances of violent conflict (civil and revolutionary wars, wars of expansion and of independence, European conflicts, the world wars) at different historical moments through the study of historical, literary, journalistic, and autobiographical sources. Topics include: war and religion, virility and violence, extreme situations and crises of representation, resistance and collaboration, colonization, nationhood, terrorism

Independent study in an area of special interest to the student, with close guidance of a member of the staff, and leading to a major paper. Required of candidates for honors, and recommended for all senior concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

FREN 2030. Quêtes et dépaysemens, 1100-1400.
How medieval authors treated cross-cultural encounters. How they interpreted contacts with other societies or worlds -- with an eye to helping their patrons politically, influencing their audiences, and pleasing them all. Texts from several vernaculars: early French, Anglo-Norman, Franco-Venetian, Occitan. Works by troubadours, Chrétien de Troyes, Marie de France, Jean Bodel, Villehardouin, Marco Polo and Froissart, among others

FREN 2040A. Chroniqueurs du Moyen Age.
Why and how did medieval French chroniclers narrate the events of their age? Political positions, evolving cultural outlooks, and conceptions of history in Villehardouin, La canso de la crozada, Joinville, Froissart, Le journal d’un bourgeoise de Paris, and Comynes. Subsequent reception history of these texts; their role in modern nationalism and regionalism

FREN 2040B. Féminin/masculin et textualité médiévale.
Examines gender theory in medieval texts and their cultures and how gender roles were defined and represented in several important literary genres from the 12th to the 15th century. Readings of major early French texts plus contemporary scholarship concerning gender construction and medieval textuality

FREN 2040C. Le roman médiéval: poétique du récit.
Focus on works that illustrate the development of verse and prose fiction from the twelfth to the fifteenth century. Issues of narrative aesthetics and ideology will be examined from several theoretical perspectives: rhetorical, socio-political, structuralist, psychoanalytic, deconstructive, and new historicist

FREN 2040D. Arts du récit, 1100-1400.
Readings and interpretations of major texts that illustrate the development of verse and prose narrative in French medieval literature, from the Chanson de Roland and early Arthurian romances to Froissart’s Chroniques. Emphasis on relating questions of narrative aesthetics to important frames of political, social and cultural history

FREN 2110A. Le roman français à la Renaissance.
An exploration of the Renaissance’s chivalric, sentimental, and humanist novel. Topics include France’s first “best-seller”, the birth of the psychological novel, suspense, allegory, and the invention of the modern book. Readings will include Rabelais, Heléne de Crenne, Bachtine

FREN 2110B. Pratiques de l’aveu.
This course examines Renaissance literature in light of confessional practices in early modern France, focusing on notions of secrecy, sexuality, and guilt as well as on knowledge and the self. The primary corpus includes not only literary texts, but also confessor’s manuals, judicial handbooks, and confessions from witch trials. Readings in Foucault, Labé, Montaigne, Marguerite de Navarre, among others

FREN 2110C. Réthorique et poétique à la Renaissance.
An exploration of the performative modes of literature in light of the Renaissance’s rhetorical tradition. Examines the text in a variety of rhetorical situations from poetic seduction, to the courtier’s pursuit of royal favor, to the Religious Wars. Also engages contemporary theories of discourse while confronting early modern rhetorical theory with contemporary speech act theory (Austin and others). Writers include les grands rhétoriqueurs, Labé Montaigne, Du Bellay, Ronsard, pseudo-Longinus

FREN 2110D. Humanisme et Renaissance (humain, inhumain, non-humain).
Erasmus famously wrote: “one is not born human, one becomes human.” For Renaissance humanists, how does one become human, and what role do the „humanities“ play in this process? This course explores Renaissance understandings of the “human” as well as its antitheses, the inhuman, non-human, and animal. Readings include Rabelais, Marguerite de Navarre, Du Bellay, Montaigne, and La Boétie

FREN 2110E. "Sorcellerie et Renaissance".
Drawing on literary studies, history, and anthropology, this course explores witchcraft from the Late Middle Ages through the Renaissance. What cultural dynamic produced the figure of the witch, caught up in the interplay of power and knowledge? Close readings of works by demonologists and their critics offer a lens for examining the making of witchcraft theory as well as its eventual demise. Other topics include the imagination and dreams, violence and the sacred. Special attention will be paid to the methodological challenges facing the scholar of early modern literary studies. Readings in Montaigne, Rabelais, Mauss, among others

FREN 2130A. Civilité et subjectivité au XVIIème siècle.
This course explores the effect of civilité on subjectivity in 17th-century France. After considering pertinent theories of subjectivity, we examine how civility links the sense of “distinction” to disgust and, more precisely, the "objet," and how this linkage changes over the course of the century under the influence of political, economic, and aesthetic forces. We pay particular attention to the ways civility constructs language, the body, sexuality, gender, and class

FREN 2130B. Civilité, littérature, et différences sexuelles.
How did “politeness” shape gender identities in 17th-century France? What role did civilité play in the period’s conceptions of the body, sexuality, and relations between the sexes? How did literature both implement and contest the norms of civility? These questions are explored by examining conduct literature, salons and the art of conversation, "galant" poetry, male melancholy, and female cross-dressing

FREN 2130C. Fictions du masculin.
The aesthetics and politics of masculine identities in seventeenth-century France. Both literary representations and case studies of historical figures are considered. Topics include: the picaresque hero, male melancholy, effeminacy, salons and women’s cultural authority, sodomy, the king’s
body. In addition to critical readings in gender theory and cultural studies, texts by Sorel, Molière, Lafayette; iconography; satirical literature

FREN 2130D. Studies in French Literature of the Seventeenth Century: Les Modernités du XVIIe siècle
By examining how recent thinkers have used the period to (re)define "classicism," "modernity," "modernism," or the "post-modern" and confronting these interpretations with selected 17th-century texts, we will explore the crucial role the century plays in French cultural, literary and theoretical debates. Readings include Barthes, Bourdieu, Derrida, Foucault and Descartes, Cyrano de Bergerac, Pascal, La Rochefoucauld, Racine, La Bruyère, and Perrault.

FREN 2130E. Corps et esprits libertins.
Throughout the 17th century, writers flouted religious, philosophical, political, sexual, and social norms/dogmas, provoking debate, censorship, and even persecution. This seminar will explore the themes and contexts of libertine thought and practice, as well as the attacks it occasioned in both philosophy and literature. We will study debates about skepticism, Epicureanism, sexual freedom, religious and political dissent, and will read, among others, Montaigne, Charron, Vial, Garasse, Gassendi, Cyrano de Bergerac, La Mothe Le Vayer, Ninon de L'Enclos, Molière, La Fontaine, Saint-Evremont, and Deshoulières.

FREN 2130F. Façons d'aimer: Discourses of Sexuality in Early Modern France.
This course will examine both the connections and tensions among the legal, literary, philosophical, medical, and religious discourses of sexuality in early modern France. Topics such as Neoplatonism, erotomania, one-gender theory, conjugal love, cuckoldry, impotence, sodomy, and tribadism will be studied in their historical, social, and literary contexts. In addition to primary sources (selections from edicts, essays, treatises) and secondary readings (theoretical and critical), literary texts by Rabelais, Ronsard, Labé, Montaigne, Vial, Molière, Choisy, among many others. Class discussions in English or French, depending on preparation of students. Enrollment limited to graduate students or advanced undergraduates (with instructor's permission only).

FREN 2150A. Bodies of Enlightenment.
An exploration of the body in the eighteenth-century in its multiple guises: foreign and national; disciplined and idle; natural and mechanical; libertine and political. Readings in Prévost, Diderot, Rousseau, Boyer d'Argens, Sade. Critical essays by: Michel Foucault, Lynn Hunt, David Cottom, Dorinda Outram.

FREN 2150B. Foucault et les Lumières.
An examination of Foucault's key writings on the French Enlightenment and the confrontation of his criticism with the major works of that period. We will consider how other French theoreticians differ with Foucault in examining the Enlightenment, particularly Lyotard and Ferry. Readings in Histoire de la folie, Les Mots et les choses, Surveillir et Punir and Histoire de la sexualité and texts by Prévost, Rousseau, Diderot, Sade and others. Open to qualified undergraduates.

FREN 2150C. Le roman libertin: Approches critiques.
We will attempt to study the evolution of the genres of the libertine novel in the 18th century: roman de séduction, the conte, roman de la prostitution. We will also examine how current approaches around issues of gender, sexuality, pornography allow for new contextualization of that novel. Authors to be read are Crébillon fils, Duclos, Godard d'Accou, La Morlière, Boyer d'Argens, Denon and Laclos.

FREN 2150D. Qu'est-ce que les Lumières?
An examination of major and minor authors of the French Enlightenment from the point of view of the capital ideas that have dominated the century: pleasure and taste, reason and violence, gender and race. Examines the reception of the Enlightenment by contemporary theorists and historians, principally Foucault, Habermas. Readings in Montesquieu, Denon, Graffigny, Boyer d'Argens, Diderot and Rousseau.

FREN 2170A. Courants poétiques du XIX siècle, Romantisme, Modernisme, Symbolisme.
Special attention to Hugo, Baudelaire, Rimbaud, and Mallarmé.

FREN 2170B. Crimes écrits.
This course focuses on fictional crime, literary criminals, and criminalized literature in 19th-century France. Topics include the romantic murderer, popular literature, the aesthetics of evil, literary trials of the Second Empire, naturalism and legal transgression. Authors to be studied include Balzac, Lacenaire, Sue, Baudelaire, Flaubert, Barbey d’Aurévilly, Zola, Maupassant, Foucault.

FREN 2170C. Sexualités décadentes.
A study of fin-de-siècle literature and ideology. Topics include: degeneration and the new sciences of sexology and criminology; representations of homosexuality, prostitution, and the femme fatale; and masculinity in crisis. Texts by Huysmans, Nordau, Rachilde, Zola, Lorrain, Verlaine, Krafte-Ebing, Lambrasti. Secondary sources in literary criticism and contemporary theories of sexuality.

FREN 2170D. Lyriisme et différence sexuelle.
Seminar exploring the relationship between gender and the lyric, often deemed a "masculine" genre. We will read male and female poets of the 19th century (including Desbordes-Valmore, Hugo, Baudelaire, Verlaine, Rimbaud, and Vivien) and examine the gendering of the poem on various levels. Topics include the construction of masculine poetic identity, the possibility of a female lyric voice, homosexual traditions, gender and form.

FREN 2170E. Paris, capitale du dix-neuvième siècle.
History, politics, revolution, urban planning, architecture, literature and the arts, and critical theory, with emphasis on Napoléon III, Haussmann, Karl Marx, Adolphe Thiers, Balzac, Baudelaire, Flaubert, Rimbaud, Zola, Delacroix, Daumier, Courbet, the Impressionists, and the criticism of W. Benjamin and T. J. Clark.

FREN 2170F. Baudelaire et Rimbaud, poète du XIXe siècle et du nôtre.
In-depth study of two major poets of the European 19th century whose work remains especially pertinent today.

FREN 2170G. Decadence.
Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Pédalan, Lorrain, Rachilde, Mendès, and Nordau.

FREN 2170H. Baudelaire, Rimbaud et Mallarmé.
No description available.

FREN 2170I. Naturalisme et positivisme.
This seminar studies the naturalist literary "method" and its ideological implications in relation to 19th-century positivist thought and the disciplines it informed. Topics include science, anti-clericalism, republicanism, gender and social reform, and the birth of sociology. In addition to several novels from Zola's cycle, Les Rougon-Macquart: Histoire naturelle et sociale d'une famille sous le Second Empire, primary sources include texts by Maupassant, Comte, Taine, Littré, Durkheim. Secondary readings in the sociology of literature and cultural history.

FREN 2190A. Fictions Francophones Contemporaines. Nations d'écrits.
Does a writer belong to a "Nation"? To which nation does a writer belong when he or she writes in the language of his or her former colonizer? Does political independence warrant the existence of a new nation? How does literature contribute to the emergence and consolidation of a new nation? How does Francophone literature relate to French literature? Readings of major contemporary Francophone writers.

FREN 2190E. Le sujet en procès.
An engagement with 20th century literature and critical theory through a series of perspectives on the subject, including the narrative, the lyric, the historical, the feminine, the specular. Reading fiction and poetry (Michaux, Beckett, Ponge, Simon, Djelbar) alongside key theoretical writings (Deleuze, Derrida, Benveniste, Kristeva), we will consider some of the trials/processes (procès) that have marked the fate of the modern subject.

FREN 2190F. L'honneur des poètes.
This course will focus on literary and cinematic treatments of the wars that marked French modernity. We will consider these traumatic rupturings of space, time, body, identity and memory as they are recorded or responded to in poetry, prose and film, and as they reorder the stakes of form and of narrative meaning. We will discuss Surrealist, Dadaist, Resistant responses to war, major novels and films dealing with the second world.
war, occupation and the Algerian war (Perec, Simon, Duras, Resnais, Modiano, Daeninckx, Denis, Bouchareb, Dumont), and theoretical writings on war and representation (Benjamin, Sartre, Baudrillard, Virilio, Ricoeur, Derrida, Scarry)

FREN 2190G. Introduction à la poésie du 20e siècle.
A graduate-level introduction to major poets/poetic works of the century, including Apollinaire, Cendrars, Césaire, Ponge, Michaux. Through close readings, we will attend to works’ thematic preoccupations, formal innovations, conditions of production and the constellation of motifs by which the modern poetic voice has variously staked its relationship to other forms and objects of production (images, news, technology, conversation, subjecby, history), while attempting, at every turn, to answer (or at least ask) the question of what poetry is. Secondary authors include Heidegger, Sartre, de Man, Matthieu, Jenny, Kristeva, Derrida, Badiou. 999999

FREN 2450. Exchange Scholar Program.

FREN 2600A. À quoi pense la littérature?.
In this seminar we will study the relationship between literature and philosophy to clarify the following questions: What kind of relationship does literature have with philosophical discourse? Does literature produce any philosophical knowledge? What kind of thought is produced in literary texts? This course will draw on works borrowed from French and Francophone literary fiction and modern philosophy. One exposé, a mid-term and a final paper.

FREN 2600B. Gender and Sexuality in Contemporary France.
Critical theory in France focusing on changes in the last decade in approaches to feminism, gender and sexuality. Topics include 1970s feminisms (Cixous, Irigaray); history of sexuality (Foucault); contemporary political debates such as le Pacs and la parité (Agasinski, Fraisse, Bornillo, Halimi); masculine domination (Bourdieu); gay and lesbian studies (Eribon, Bourdieu).

FREN 2650C. Théories de la littérature.
Theory is perhaps the most over-used term in philosophy, in literature, and in the so-called Social Sciences. The main goal of this seminar is to draw a map of the theoretical landscape which has affected the study and the teaching of modern French and Francophone literature during the past fifty years.

FREN 2650D. Théories du texte.
Examines the major theoretical approaches to the notion of text in literature and cinema. Compares the works of literary critics (Barthes, Starobinski) to those of philosophers and film theorists (such as Deleuze, Derrida, Ropars-Wuilleumier). Significant literary works and films by Blanchot, Duras, Beckett, Godard, and Robbe-Grillet are put to the task.

FREN 2650E. Littérature et philosophie mêlées.
What kind of relationship does literature have with philosophy? Does literature produce any kind of knowledge? What kind of thought is produced in literary texts? This course will draw on a series of works borrowed from the realms of literary theory and philosophy written by Hugo, Sartre, Le Doeuf, Macherey, Ricoeur, Barthes, Badiou, Deleuze, and others. An oral presentation, one mid-term, and one final paper.

FREN 2650F. French Feminisms meet Queer Theory.
Feminist and GLBTO thought and activism in contemporary France, their conflicts and compatibilities, and their exchanges with American critical theory. Topics include Beauvoir’s legacy and 1970s feminisms (Cixous, Irigaray, Wittig); Foucault on the history of sexuality; Bourdieu on masculine domination; recent public policy debates (le Pacs and la parité); the impact of US queer theory on GLBTO studies in France.

FREN 2610A. Discours amoureux.
Confrontation of literary, philosophical, and psychoanalytical discourses on love in the 20th century. Authors discussed include Claudel, Proust, Bataille, Gracq, Duras, and Sarras. Secondary readings from Foucault, Derrida, Barthes, Irigaray, Levinas, and Kristeva.

FREN 2610C. Le récit post-moderno.
‘Postmodernism’ is a word much used and misused in a variety of disciplines, including literature, visual arts, film, architecture, literary theory, history, and philosophy. Drawing from the theoretical work of essayists such as Baudrillard, Jean-François Lyotard, Antoine Compagnon, Roland Barthes, and Linda Hutcheon, this course will attempt to analyze defining characteristics of postmodern thought—storytelling, autobiography, anecdote, localism, etc.—in the works of major contemporary French and Francophone writers of fiction.

FREN 2610D. Théories de l’action communicative et de l’intersubjectivité.
Approaches communicative action from the perspectives of literary criticism, pragmatics, political philosophy, feminist criticism etc. and examines the interplay between speech and silence, politeness and directness, reciprocity and domination etc. Authors include Benveniste, Barthes, Kristeva, Merleau-Ponty, Irigaray, Bourdieu, Molière, Balzac, and Duras. Open to qualified undergraduates.

FREN 2620A. Collège de sociologie.
We will examine the legacy of the poststructuralist, pre-World War II Collège de Sociologie (active during the critical years 1937-39) and the ways in which it tried to answer Goethe’s old question, “What unites men?”, by means of developing a “sacred sociology.” Readings will combine texts by Roger Caillois, Georges Bataille, Michiel Leiris, Jean Paulhan, Pierre Klossowski, Denis de Rougemont, and others with pre-College sociological texts by Derrida, Barthes, and Sollers that bear the trace of the Collège debates. Discussion will evolve around the oppositions between architecture and literature; festival and vacation; virility and femininity; attraction and repulsion; presacred, sacred and postsacred societies; directors of conscience and directors of unconsciousness; etc., and the significance of those oppositions for our current debates on gender and postmodernist culture.

FREN 2620B. Groupes littéraires et esthétiques communautaires au XXe siècle.
Examines avant-garde groups and movements, including surrealism, Collège de Sociologie, Ouipo, existentialism, Tel Quel, situationnisme, Théâtre du Soleil, politique et psychanalyse, and Féministes révolutionnaires. Attempts to assess their aesthetic and political platforms to evaluate their performative strategies. Readings include (poetic) manifestos, novels, plays, and essays by Breton, Bataille, Sartre, Lacan, Barthes, Derrida, Kristeva, Cixous, Wittig, and Irigaray.

FREN 2620C. Théories de la Production Textuelle et de l’intersubjectivité.
Approaches textual production from the perspectives of literary pragmatics, political philosophy, or feminist criticism and examines the interplay between speech and silence, politeness and directness, reciprocity and domination, etc. Authors include Austin, Wittgenstein, Benveniste, Barthes, Kristeva, Merleau-Ponty, Ducrot, Irigaray, Bourdieu, Molière, Balzac, and Duras.

FREN 2620D. La pensée française au XXe siècle.
We will address XXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Maurice Merleau-Ponty, Luc Ferry and Alain Badiou; Paul Valéry, Roger Caillois, and Paul Ricoeur; Émile Durkheim, Raymond Aron, and Pierre Bourdieu; Luce Irigaray and Michèle Le Deuff. Two oral presentations and one final paper.

FREN 2620E. Discours amoureux.
We will discuss love novels/plays by (Proust, Claudel, Breton, Duras, Sollers, Ernaux, Redonnet) and essays on love by Barthes, De Rougemont, Bataille, Kristeva, Lévinas, Irigaray.

FREN 2620F. France-Afrique / Afrique-France: Je t’aime moi non plus.
Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature to reflect on the historical events and socio-political processes that have shaped the encounter between France and Africa. Topics include: the Colonial Encounter, “World War II”, Decolonization, Negritude and Immigration.

FREN 2620G. Writing the Postcolonial Today: New Politics of Form.
Close reading of selected texts by major Francophone writers. Attention to postcolonial criticism, politics of form and role of intellectual. Focus on re-appropriation of history, writing of violence, migration.

FREN 2620H. The Francophone Routes of Postcolonial Thought.
One of the more striking omissions from the founding theoretical work of postcolonial studies, The Empire writes Back (1989), is Francophone writing in general and the Francophone Caribbean in particular.
Nevertheless, the Francophone Caribbean maintains a shadowy yet powerful presence in postcolonial thought. The course sets out both to resituate francophone writing in the blind spots of postcolonial theory and to explore the way in which a postcolonial approach liberalizes writing in French from what some see as the neocolonial label of francophonie.

FREN 2900. Theory and Methods of Foreign Language Teaching. Introduction to the theoretical and practical aspects of foreign language learning and teaching. Specific topics include theories of language acquisition, an overview of teaching practices and the principles underlying them, selection and evaluation of textbooks, teaching materials, and learner variables. Students observe beginning language courses and do micro-teaching. Taught in English. Undergraduates may enroll with instructor’s permission.

FREN 2970. Preliminary Examination Preparation. For graduate students who have completed their course work and are preparing for a preliminary examination.

FREN 2980. Reading and Research. Work with individual students in connection with special readings, problems of research, or preparation of theses. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

FREN 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Geological Sciences

Chair

Timothy D. Herbert

Students in the geological sciences develop a comprehensive grasp of principles as well as an ability to think critically and creatively. Formal instruction places an emphasis on fundamental principles, processes, and recent developments, using lecture, seminar, laboratory, colloquium, and field trip formats. Undergraduates as well as graduate students have opportunities to carry out research in current fields of interest.

The principal research fields of the department are geochemistry, mineral physics, igneous petrology, geophysics, structural geology, tectonophysics; environmental science, hydrology; paleoclimatology, sedimentology, and planetary geosciences. Emphasis in these different areas varies, but includes experimental, theoretical, and observational approaches as well as applications to field problems. Field studies of specific problems are encouraged rather than field mapping for its own sake. Interdisciplinary study with other departments and divisions is encouraged.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Geology/

Geological Sciences Concentration Requirements

Geological science involves the study of the Earth (and other planetary bodies), including their compositions and histories and the physical chemical and biological processes that shape them. The geosciences are highly interdisciplinary, thus students must take some supporting math and science courses. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. Students may choose an AB (total of 13 courses) or an ScB (19 total courses, including one semester of research). There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as deformation and properties of geological materials, deciphering the geologic history of some local rocks, or analysis of planetary images.

Standard program for the A.B. degree

This program provides a broad introduction to the geological sciences. Recommended for students seeking a liberal education and a general understanding of Earth processes and Earth history. Especially attractive for double concentrations, such as geology and economics as a career path to law or business, or geology and English as a career path to journalism or technical writing.

Select four courses from upper level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor. 

GEOL 1970 Individual Study of Geologic Problems (Senior Research Thesis) 1

Total Credits 19

1 Advanced placement may be substituted for the first semester of physics.

**Geology-Biology Concentration Requirements**

Geology-Biology involves study of the interactions of the Earth and its hydrosphere and atmosphere with the great diversity of life forms, and how they have evolved and influenced one another over the entire history of the Earth. Many courses emphasize climate and biogeochemistry; this concentration is a good one for students interested in quantitative approaches to environmental science. Students take a basic suite of geoscience courses and at least 4 bio courses of their choosing, plus some supporting math and science courses; the AB degree requires a total of 14 courses and the ScB degree requires a total of 19, including one semester of research. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as determining the history of climate change during the recent ice age, investigating the causes of major extinctions, and using paleoenvironmental records to determine the vulnerability of different regions of the globe to droughts and other processes that strongly affect society.

**Standard program for the A.B. degree**

This program emphasizes interrelations between biological and geological processes including an understanding of the origin and development of life as interpreted from the geologic record, evolution of climate and environments, and dynamic processes in the stratigraphic record. Prepares students for work in environmental issues, geology, ecology, oceanography, or global change.

Brown University 341
Geology-Chemistry Concentration

Requirements

Geochemistry involves two different emphases. Low-temperature geochemistry involves study of chemical and biochemical processes on and near Earth's surface, including land, oceans and freshwater bodies, and how the geochemical record reflects climate conditions. High-temperature geochemistry includes study of formation and evolution of the Earth and other planets, magma formation and properties, volcanic activity, and metamorphism. The AB degree requires a total of 14 courses, including 5 geoscience courses and 4 chemistry courses, and a few supporting math and physics courses. The ScB degree requires a total of 20 courses, including 7 geoscience courses and 4 chemistry courses, either with an organic or an inorganic focus, plus some supporting math and physics courses and one research course. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work for pay during the academic year or in the summer, in areas such as experimental studies of magma formation, and analyzing lunar rock samples for water content.

Standard program for the A.B. degree

Recommended for students seeking a liberal education and interested in applying physical and chemical principles toward an understanding of Earth history, Earth processes, and environmental and resource issues.

Basic supporting science courses

GEOL 1410 Mineralogy  
& GEOL 1420 Petrology  
GEOL 1130 Ocean Biogeochemical Cycles  
& GEOL 1370 Environmental Geochemistry

Two additional courses from upper level geological sciences, math, or supporting sciences with approval from the department concentration advisor.

Standard program for the Sc.B. degree

This program is recommended for students interested in graduate study and careers in geochemistry and related fields.

Basic Supporting Science Courses:

Select two courses in mathematics at the level of:  
MATH 0090 Introductory Calculus, Part I (or more advanced)  
MATH 0100 Introductory Calculus, Part II (or more advanced)  
CHEM 0330 Equilibrium, Rate, and Structure

Select one of the following series:  
PHYS 0050 Foundations of Mechanics  
& PHYS 0060 Foundations of Electromagnetism and Modern Physics  
ENGN 0030 Introduction to Engineering  
or a more advanced course

Concentration Courses:

Either the geochemistry/inorganic option or the geochemistry/organic option:

Geochemistry/Inorganic Option:

GEOL 0220 Physical Processes in Geology  
GEOL 0230 Geochemistry: Earth and Planetary Materials and Processes  
GEOL 0240 Earth: Evolution of a Habitable Planet  
GEOL 1120 Paleoceanography  
GEOL 1130 Ocean Biogeochemical Cycles  
GEOL 1370 Environmental Geochemistry  
GEOL 1410 Mineralogy  
GEOL 1420 Petrology

Plus one from:

GEOL 1240 Stratigraphy and Sedimentation  
GEOL 1330 Global Environmental Remote Sensing  
or GEOL 1710 Remote Sensing of Earth and Planetary Surfaces  
GEOL 1450 Structural Geology

Three from:

CHEM 0350 Organic Chemistry  
CHEM 0500 Inorganic Chemistry  
CHEM 1060 Advanced Inorganic Chemistry  
CHEM 1140 Physical Chemistry: Quantum Chemistry  
CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics

Geochemistry/Organic Option:

GEOL 0220 Physical Processes in Geology  
GEOL 0230 Geochemistry: Earth and Planetary Materials and Processes  
GEOL 0240 Earth: Evolution of a Habitable Planet  
GEOL 1120 Paleoceanography  
GEOL 1130 Ocean Biogeochemical Cycles  
GEOL 1370 Environmental Geochemistry  
GEOL 1410 Mineralogy

Plus one from:

GEOL 1240 Stratigraphy and Sedimentation  
GEOL 1330 Global Environmental Remote Sensing  
or GEOL 1710 Remote Sensing of Earth and Planetary Surfaces  
GEOL 1380 Environmental Stable Isotopes

Three Chemistry courses:

CHEM 0350 Organic Chemistry  
CHEM 0360 Organic Chemistry

Plus one additional chemistry course
Four additional courses from upper level geological sciences, mathematics, or supporting sciences with approval of the departmental concentration advisor 4

GEOL 1970 Individual Study of Geologic Problems 1

Total Credits 20

1 Advanced placement may be substituted for the first semester of physics.

Geology-Physics/Mathematics Concentration Requirements

Geophysics involves the application of physics and mathematics to the study of processes that operate on and within the Earth and other planets, over short and long timescales. The AB degree requires a total of 14 courses, including 8 geoscience courses, 3 physics or engineering courses, and 3 math and applied math courses. The ScB degree requires a total of 20 courses, including 8 geoscience courses, 4 physics or engineering courses, and 4 math and applied courses; students can choose courses from both solid Earth geophysics and environmental geophysics. Geoscience courses emphasize an analytical and process-oriented approach, with hands-on experiences in labs and on field trips. Active and collaborative learning is encouraged, as is practice in written and oral communication. There are many opportunities for students to engage in research (typically in paid positions) during the academic year or in the summer, in areas such as analysis of seismic waves in subduction zones, theoretical modeling of convection in the Earth’s mantle, interpreting the cause of gravity anomalies in southern California, and remote sensing of warming in Narragansett Bay.

Standard program for the A.B. degree

Recommended for students seeking a liberal education and interested in applying physical and mathematical principles toward an understanding of the planets, Earth and the environment.

GEOL 1970 Individual Study of Geologic Problems 1

Total Credits 20
Geological Sciences Graduate Program

The department of Geological Sciences offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/geological-sciences

Courses

GEOL 0010. Face of the Earth.
Study of Earth’s surface (e.g., mountains, rivers, shorelines) and processes which have created and modify it (e.g., glaciation, floods, volcanism, plate tectonics, earthquakes). The goals are to increase appreciation and enjoyment of our natural surroundings and provide a better understanding of environmental problems, natural resources, land use, and geologic hazards. Four labs, plus a field trip. For nonscience concentrators (science concentrators should take GEOL 0220). Students MUST register for both components of this course (the lecture and one of the labs) during the SAME registration session. Enrollment limited to 100.

GEOL 0030. Climate and Climate Change.
This course is designed to provide students with an understanding of the climate system on Earth, changes in Earth’s climate over time, and interactions between climate change and human society. Topics will include: global energy balance; the structure, composition and role of the atmosphere and oceans; the influence of the global carbon cycle on climate; the social, economic and political drivers of human perturbations to the carbon cycle; and societal vulnerability, resilience and adaptive capacity in the face of environmental changes. No prerequisites; course open to all levels. Enrollment limited to 40.

GEOL 0050. Mars, Moon, and the Earth.
Space exploration has revealed an astonishing array of surface features on the planets and their satellites. Why are atmospheres on the planets different from Earth’s atmosphere? Do other planets represent our past or future environment? Is there life on other planets? The planets and their histories are compared to gain insight and a new perspective on planet Earth.

GEOL 0070. Introduction to Oceanography.
Examines the ocean’s role in global (and local) change, emphasizing the ocean as an evolving, dynamically balanced ecosystem. Focus on physical/chemical/biological systems’ interconnections needed to understand the natural variability of the ocean on various time and space scales, from El Niño to global warming. Three lectures, one section meeting weekly; written exercises on oceanographic problems; two field trips to study estuarine and coastal processes.

GEOL 0160B. Global Change: Ecology and Climate.
Examines ways in which global change will affect ecosystems, considering how temperature, rainfall, and land use can modify the distribution of organisms in the future, and reduce biodiversity. Examine how biotic feedbacks to global change can modify climate change through their effects on the carbon cycle, absorption of sunlight at the land surface, and retention of water in soils. Enrollment limited to 20 first year students.

GEOL 0160C. Global Environmental Change.
Examination of evidence that supports or refutes various perspectives on global environmental change, with a foundation in the principles that govern the fundamental underlying processes. Example topics include climate change (warming, cooling, neutral), population growth (how many, how fast), and loss of natural resources (diversity). Topics explored through selected readings from the natural and social sciences. Enrollment limited to 20 first year students.

GEOL 0160D. Living Within the Landscape.
Physical processes that shape the Earth’s surface provide an inescapable context for human activity. We will examine the physical principles that govern erosion and sedimentation, slope stability, river and coastal flooding, and groundwater flow, and analyze how these processes affect land-use philosophies and decision-making. Enrollment limited to 20 first year students.

GEOL 0160E. Volcanos, Windows into the Deep Earth.
Examines the physical and chemical principles controlling the generation of volcanoes and their different styles of eruption. Investigates where and why volcanoes occur, and what volcanic lavas can tell us about the composition and evolution of the Earth and other planets. Evaluates volcanic hazards and the economic benefits and cultural aspects of volcanism. Two-day field trip. Enrollment limited to 20 first year students.

The shapes of plants and animals, of mountains and shorelines arise because nature dissipates energy as rapidly as possible. These morphological patterns allow description of the “energy” landscape that produced them. Societies and economies show temporal and spatial patterns as well; does the “flow rate” of ideas and of money cause these patterns? We will explore just how “entropy rules.” CAP course. Enrollment limited to 20 first year students.

GEOL 0160G. Energy Resources.
Most of our energy comes directly from the Earth - predominantly as fossil fuels, but also from geothermal, wind, and hydro sources. Developing technologies for alternative energy such as solar, nuclear, biomass and fuel cells also rely on Earth resources. The potential for these energy sources will be discussed. The science behind their utilization and environmental impact (e.g. carbon sequestration and nuclear waste disposal) will be introduced and the trade-offs in making decisions for the future will be explored. CAP course. Enrollment limited to 20 first year students.

GEOL 0160H. Chicken Little or Armageddon? Past and Future Cosmic Threats.
Explore the probability of the next impact on the Earth and assess the possible consequences through historic times (incidents), folklore/legends, examples in recent geological time (last 10 million years), and the catastrophic consequences 65 million years ago. Strategies for searching and possible mitigation of the next “big one” will be considered. This seminar will explore the realities of various predictions, consider public policy, investigate strategies for prevention, and assess the role of the press in shaping perceptions. Enrollment limited to 20 first year students.

GEOL 0160I. Diamonds.
Examines both the science and human history of diamonds, and shows how they have interacted over the years. Investigates how and where diamonds are formed in nature and what they tell us about the Earth. At the same time, explores the role diamonds have played in our history and culture. CAP course. Enrollment limited to 12 first year students.

GEOL 0160J. The Natural History of Great Writers: From Goethe to Steinbeck.
Many great and influential writers have also been natural historians. This course examines selections from the writing of such authors as the romantic and naturalist Johann Wolfgang von Goethe, the rationalist Benedict de Spinoza, the intuitive thermodynamicist William Blake, the naturalist novelist John Steinbeck, the lepidopterist novelist Vladimir Nabokov, the amateur paleontologist Arthur Conan Doyle, the protoecologist Henry David Thoreau, and the philosopher and sociologist Herbert Spencer. We will examine in a modern scientific context how facts and theories of natural history informed their writing and influenced their worldview. Specific topics in this seminar will include: man’s place in nature and the importance of the discovery of this deep time perspective, Darwinian evolution and its impact on sociology, and the emerging science of ecology in 19th century American literature. Enrollment limited to 20 first year students.

GEOL 0220. Physical Processes in Geology.
Introduction to the form and origin of interior and surface features of Earth, with emphasis on understanding the physical processes that produced them. Topics include interior processes (plate tectonics, mountain building, volcanism, earthquakes, and flow of solid rocks) and surface processes (atmospheric and oceanic circulation, flow of rivers, glaciers, and groundwater). Laboratory and field trips arranged. Intended for
Introduction to the chemical and mineralogical nature of the Earth, Moon, and meteorites, and the role of chemical processes in their evolution. Topics include: composition of rock-forming minerals; origin of crustal and mantle rocks; stable and radiogenic isotopes; models of nucleosynthesis, planet formation and differentiation. Weekly laboratory and two field trips. Intended for science concentrators. Prerequisites: basic chemistry and GEOL 0010 or 0050 or 0220, or instructor permission. Labs will meet Tuesdays from 7:00 pm to 9:00 pm

Introduces Earth's surface environment evolution - climate, chemistry, and physical makeup. Uses Earth's carbon cycle to understand solar, tectonic, and biological cycles' interactions. Examines the origin of the sedimentary record, dating of the geological record, chemistry and life on early Earth, and the nature of feedbacks that maintain the "habitable" range on Earth. Two field trips; five laboratories arranged. Prerequisite: GEOL 0220 or 0230, or instructor permission. WRIT

GEOL 0250. Computational Approaches to Modelling and Quantitative Analysis in Natural Sciences: An Introduction.
Application of numerical analysis to mathematical modelling in the natural sciences including topics such as ground water and glacier flow, earthquakes, climate models, phase equilibrium, and population dynamics. Numerical methods will include the solution of linear algebraic systems of equations, numerical integration, solution of differential equations, time series analysis, statistical data analysis tools. Development of computer programming skills in the Matlab programming environment. Suggested prerequisites: MATH 0090, 0100; PHYS 0030, 0040, or 0050, 0060

GEOL 0310. Fossil Record.
Integrated view of the history of life: biogeochemical cycles, biodiversity, evolution by natural selection, ecology, and physiology along a multiplicity of scales from the microbial to the planetary, as recorded in the fossil record. Attention is given to how biotic systems, in contrast to just physical systems, have changed through time maintaining the chemical and thermodynamic non-equilibrium state of the Earth's surface. Two lectures per week; several labs including dissections for paleobiological comparisons and one field trip to fossil localities and museum collections in Connecticut and Massachusetts. Prerequisites: GEOL 0220 or 0230 or 0240, BIOL 0200, or instructor permission

Qualitative introduction to the dynamics of watersheds and groundwater flow from an intuitive perspective. Lays the foundations for understanding the physical mechanisms by which water is transported throughout a hydrologic system. Provides background for future studies, but is primarily designed to enable informed citizens to thoughtfully critique water management practices and public policy. Pre-college math and physics background is expected.

GEOL 0810. Planetary Geology.
Examines the geology of solid planets. Focuses on a mission to Mars through an understanding of processes that shape planetary surfaces. Terrestrial analogs, conceptual models, and laboratory simulations are used as reality checks. Integration of these processes through time reveals the geologic evolution of the planets. Three lectures and one discussion session per week. CAP course. Prerequisite: GEOL 0010 or 0050, or 0220, or instructor permission

GEOL 1100. Global Physical/Descriptive Oceanography.
Examines physical characteristics, processes, and dynamics of the global ocean to understand circulation patterns and how they relate to ocean chemistry and large scale climate change. Assignments address origin and distribution of water masses, heat and water budgets, thermohaline and wind-driven circulation systems, dynamics of the oceanic conveyor belt, and El Niños. Offered alternate years

GEOL 1110. Estuarine Oceanography.
Examines physical, chemical, and biological characteristics of local estuaries using field measurements, analysis of field data, and interpretation of processes; field investigation results will be prepared as a cooperative class report. Topics include: tidal and circulation processes, salinity and freshwater fluxes, watershed pollutants, estuary flushing rates, and estuary ecosystems. Primarily for students with experience in the sciences. MATH 0090, 0100, or equivalent, recommended. Enrollment limited to 20. WRIT

GEOL 1120. Paleoceanography.
An examination of the Cenozoic history of the world ocean with attention to the processes which have acted to change its circulation, climate, geometry, and biology. Develops a strategy to use marine sediments and microfossils to identify and understand past variations in the oceans. Class projects analyze and interpret various types of paleoceanographic data. Laboratory arranged. Offered alternate years

GEOL 1130. Ocean Biogeochemical Cycles.
A quantitative treatment of the cycling of biologically important elements in the world ocean. Special attention paid to the carbon system in the ocean and the role that organisms, in conjunction with ocean circulation, play in regulating the carbon dioxide content of the atmosphere through exchange with the surface ocean. For science concentrators. Offered alternate years. Prerequisite: CHEM 0330 or equivalent, or instructor permission. WRIT

GEOL 1150. Limnology: The Study of Lakes.
This course will provide an interdisciplinary overview of the physics, chemistry, biology, and geology of lakes. Areas of emphasis will include the origin of lake basins, water circulation patterns, heat and water budgets, biogeochemical processes, lake ecosystems, and the stratigraphic record of lakes. We will also discuss human and climatic impacts on lakes. Prerequisites: GEOL 0220 and 0240, or instructor permission. Enrollment limited to 20. WRIT

GEOL 1240. Stratigraphy and Sedimentation.
Introduction to depositional environments and processes responsible for formation of sedimentary rocks. Major sedimentary environments in the Recent are discussed, general models are proposed, and stratigraphic sequences in older sediments are examined in the light of these models. The Phanerozoic stratigraphic record is examined from the perspective of Earth system history. Laboratory arranged. Prerequisites: GEOL 0220 or 0240, or instructor permission. GEOL 0310, 1410 are also recommended. WRIT

GEOL 1320. Introduction to Geographic Information Systems for Environmental Applications.
Introduction to the concepts of geospatial analysis and digital mapping. The principles of spatial data structures, coordinate systems, and database design are covered. Related work in image databases also discussed. Extensive hands-on training in ESRI-based geographic information system software will be provided. Focal point of class is the completion of student-selected research project employing GIS methods. Enrollment limited to 20. After pre-registration, instructor permission is required to register or get on wait-list. Please see or email instructor. S/NC

Introduction to physical principles of remote sensing across the electromagnetic spectrum and application to the study of Earth's systems (oceans, atmosphere, and land). Topics: interaction of light with materials, imaging principles and interpretation, methods of data analysis. Laboratory work in digital image analysis, classification, and multi-temporal studies. One field trip to Block Island. Recommended preparation courses: MATH 0090, 0100; PHYS 0060; and background courses in natural sciences.

GEOL 1350. Weather and Climate.
Weather phenomena occur on short time scales, and form the basis for understanding climate, the study of changes over longer time scales. This course aims to provide an understanding of the processes that drive weather patterns, the general circulation of the atmosphere, and climate on Earth. Topics include: structure and composition of the atmosphere; sources of energy driving atmospheric processes; weather forecasting; the hydrological cycle; the forces that create severe weather, the influence of humans on the atmosphere; and factors that influence climate variability and climate change. MATH 0090, 0100; PHYS 0050, or equivalent recommended. Enrollment limited to 30. WRIT
GEOL 1370. Environmental Geochemistry. The course will examine the biogeochemical cycling, fate and transport of chemicals in the atmospheric and aquatic environments. Topics such as chemical weathering, natural water pollution and remediation, acid deposition, global warming and air pollution will be examined through natural ecosystem examples from rivers, lakes, estuaries, and ocean. Field trips and laboratory arranged. Prerequisites: CHEM 0100 or 0330, or instructor permission

GEOL 1380. Environmental Stable Isotopes. Introduction to the concepts, analytical methods, theory and environmental applications of stable H, O, C, N and S isotopes. Emphasis will be placed on theory and applications of light isotopes in paleoclimate studies, environmental hydrogeology and biogeochemistry. Prerequisites: CHEM 0100, GEOL 0220 or 0230 recommended, or instructor permission

GEOL 1410. Mineralogy. Introduction to mineralogical processes on Earth's surface and its interior. Topics include crystallography, crystal chemistry, nucleation, crystal growth, biomineralization, environmental mineralogy, and mantle mineralogy. Laboratory study devoted to optical identification of rock-forming minerals. Prerequisites: GEOL 0230, CHEM 0100 or 0330, or equivalent

GEOL 1420. Petrology. Introduction to the origin of igneous and metamorphic rocks. Emphasis on principles and understanding rather than facts and memorization. Principles are used to extract information concealed in the rocks about their formation, processes, sources and evolution with time. Laboratory work focuses on rock hand samples and microscopic textures. Field trips, laboratory arranged. Prerequisites: GEOL 1410, or instructor permission

GEOL 1450. Structural Geology. Introduction to the geometry, kinematics and mechanics of rocks deformed by brittle fracture or faulting and ductile solid state flow, on scales from microscopic to mountain ranges. The emphasis is on using concepts to interpret the formation, strain history and rheology of deformed rocks in terms of the operative grain-scale processes, material properties and environmental conditions. Weekly 2 hour lab involving hands-on experience closely related to class topics. Two field trips. Prerequisites: GEOL 220 or instructor permission. WRIT

GEOL 1510. Introduction to Atmospheric Dynamics. Introduces the fundamental physical principles that govern the motion of the atmosphere, and provides an elementary description and interpretation of a wide range of atmospheric phenomena. Explore the dynamics of atmosphere and mathematical laws governing weather and climate. Topics: geostrophic balance, vortex dynamics, boundary layers, and baroclinic instability. Emphasis will be on physical interpretation of the equations rather than on solving them. By the end of this course, you will have investigated the workings of such phenomena as sea breezes, planetary waves, midlatitude cyclones, fronts, and the global general circulation. Prerequisites: MATH 0100 or 0170, and PHYS 0470, or ENGN 0510, or equivalent

GEOL 1560. Global Tectonics. Plate tectonic theory and the evolution of continents and the seafloor. Emphasis on the structure and tectonics of western U.S. considering geological, geophysical, and geochemical constraints as well as direct geodetic observations of plate motions from GPS measurements. Prerequisite: GEOL 0220 and 0230. Three or more of GEOL 0220, 0230, 1240, 1410, 1420, 1450 and 1610 are recommended

GEOL 1580. Quantitative Elements of Physical Hydrology. A comprehensive introduction for science, engineering, mathematics and environmental studies students to all aspects of the physical hydrology of precipitation, surface runoff and groundwater flow. Three lecture/discussion sessions will emphasize the quantitative elements of predictive physical models. Extensive class discussion will assess the practical application of specific models. Group collaboration encouraged. One recitation period/week. Lab. No exams. Prerequisites: APMA 0340, or PHYS 0470, or ENGN 0510, or instructor permission

GEOL 1590. Quantitative Modeling of Hydrologic Processes. A quantitative overview of selected topics at the advanced undergraduate and beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0470, or ENGN 0510

GEOL 1590A. Quantitative Modeling of Hydrologic Processes. A quantitative overview of selected topics at the advanced undergraduate, beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0470, or ENGN 0510

GEOL 1600. Environmental and Engineering Geophysics. A hands-on introduction to non-invasive geophysical methods applied to subsurface investigations of soil and bedrock conditions, groundwater, geotechnical engineering, forensics, archaeology and other environmental applications. Students will use ground penetrating radar, seismic, gravity resistivity, electromagnetic and magnetic methods in the field one afternoon a week to investigate relevant environmental and geotechnical problems. A background in geology is not expected. Prerequisites: APMA 0340 and PHYS 0470, or ENGN 0510, or instructor permission

GEOL 1610. Solid Earth Geophysics. A survey of basic geophysical techniques for determining the structure and dynamics of Earth's interior. Topics include: global structure from seismic waves; gravity, magnetic field, and shape of the Earth; thermal processes within the Earth; structure of continental and oceanic lithosphere. Recommended courses: GEOL 0220, PHYS 0470, APMA 0330. No prerequisites

GEOL 1620. Continuum Physics of the Solid Earth. Physics of the Earth with emphasis on fundamental physical principles and mathematical tools. Topics include application of: conductive and convective heat transfer to cooling of the Earth; potential theory to interpretation of gravity anomalies; solid mechanics to deformation of Earth's lithosphere; fluid mechanics to flow in the Earth's interior and in porous media. Recommended courses: GEOL 0220; APMA 0340; PHYS 0470 or ENGN 0510

GEOL 1650. Earthquake Seismology. Topics include: location of earthquakes in space and time; measures of size and intensity of shaking; body waves, surface waves, and free oscillations; structure of the interior of the Earth from wave propagation; earthquake faulting and relationship to tectonic processes. Recommended course: GEOL 0161. Offered in alternate years

GEOL 1660. Instrumental Analysis with Environmental Applications. This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid chromatography, and electrochemical methods. Prerequisite: CHEM 0330 or GEOL 1370. Enrollment limited to 20. Instructor permission required

GEOL 1710. Remote Sensing of Earth and Planetary Surfaces. Geologic applications of remotely sensed information derived from interaction of electromagnetic radiation (X-ray, gamma-ray, visible, near-IR, mid-IR, radar) with geologic materials. Applications emphasize remote geochanical analyses for both terrestrial and extraterrestrial environments. Several spectroscopy and image processing labs. GEOL 0230, PHYS 0060, or equivalent recommended

GEOL 1810. Physics of Planetary Evolution. Evolution of planetary bodies based on geological and geophysical evidence derived from planetary exploration of the solar system. Includes the study of physical processes responsible for volcanism and deformation on the surface as well as the state and structure of the interior of planets. Prerequisites: GEOL 0050; PHYS 0030, 0040 or 0050, PHYS 0060; MATH 0090, 0100, or instructor permission. Offered alternate years

GEOL 1950C. Planetary Materials. A comparative planetology course that examines the origin and evolution of materials on the Earth, Moon, and Mars through sample analyses,
spacecraft observations, and modeling approaches. Recommended courses: GEOL 1410, 1420. No prerequisites.

**GEOL 1950D. Field and Tectonics Seminar**

Developing field mapping and interpretive skills used in the evolution of complex orogenic terranes. Structural field mapping is carried out in highly deformed metamorphic and igneous rocks in the New England Appalachians, the site of a continental collision associated with the formation of the supercontinent Pangea. Expected: GEOL 0230 and GEOL 1450, or equivalent, and field mapping experience (generally a summer geological mapping course). Students are required to arrive one week prior to the start of classes for the beginning of field work. Instructor permission required.

**GEOL 1950F. Geomicrobiology**

Microbes are the most abundant and diverse organisms on Earth, and they control many of elemental cycles that sustain life on Earth. This is a lecture, discussion, and computationally based problem-solving course, using tools in bioinformatics and mathematical modeling to examine the influence of microbes in geological and environmental processes. Students will build and analyze data sets, participate in class discussion, and synthesis projects including a short proposal, term paper, and developing a model. Prerequisite: GEOL 1130 or BIOL 1480. Enrollment limited to 16. Instructor permission required.

**GEOL 1950G. Astrophysical and Dynamical Processes in Planetary Sciences**

Astrophysical and Dynamical Processes in Planetary Sciences is a course that challenges students to use physical and geophysical analysis to construct a quantitative understanding of the formation and evolution of the Sun, the solar system's planets and small bodies, and extrasolar planets. The goal is to provide senior undergraduate and first-year graduate students with core knowledge of facts and current theories in the planetary sciences. Through lectures, problem sets, and exams, the students will construct quantitative framework on which to evaluate, and place into context, hypotheses and theories discussed in upper-level graduate courses. Prerequisites: MATH 0100; and one of GEOL 0050, PHYS 0210, 0220, or 0270. APMA 0330 is desirable but not required.

**GEOL 1950H. The Early Earth**

Primary focus on evolution of the solid Earth (core, mantle, crust) but will also include discussion of the Archean hydrosphere, atmosphere and biosphere. Reading and discussing current literature, with lectures. Intended for graduate students and upper level undergraduates with advanced petrology and/or geophysics. Enrollment limited to 20.

**GEOL 1950J. Reactions and Rheology: Chemical and Mechanical Kinetics in Mineral Systems**

Characterization of atomic diffusion and dislocation motion responsible for chemical and physical reactions and plastic rheology in ionic solids. Topics include: point-defect thermodynamics; atomic diffusion (physical and mathematical); solid-solution formation; solid-state compound formation; dislocation structures; grain boundary structure and chemical segregation; plastic rheology. Recommended three or more of GEOL 1410, GEOL 1420, or ENGN 0410, ENGN 1410, or CHEM 0330, CHEM 1060. Enrollment limited to 20.

**GEOL 1960K. Carbon Cycle Seminar**

Consideration of quantitative models of the cycling of carbon between various reservoirs near Earth's surface. Topics include: mass balance models of carbon sedimentation; carbon chemistry in the ocean; exchange of carbon between atmosphere, ocean, and biosphere; and consumption of carbon in weathering reactions with rocks. Special emphasis will be placed on the use of isotopic tracers (d13C, 14C) to estimate present and past dynamics of the carbon cycle. Instructor's permission required. Enrollment limited to 20.

**GEOL 1960M. Lab and Field Methods in Hydrology**

A series of hands-on opportunities for students to characterize the hydrologic properties of soils and simple hydrologic systems in the field, combined with selected outdoor exercises using standard hydrologic tools. High school math and physics recommended. Enrollment limited to 20.

**GEOL 1960X. Climate and Ecosystem Change in Deep Time**

This seminar course explores the dynamics of climate forcing and major external events that influence environments and ecosystems. Topics include: 1) range of potential climatic states and the transitions between them; 2) climate change caused by greenhouse gasses and Earth's orbital cyclicity; 3) thresholds, feedbacks, and tipping points in the climate and Earth system; 4) effects of unique events such as bolide impacts and large igneous provinces; 5) range of ecosystem response and resilience to change in different climate system states; and 6) evolution of climate and life, and the future trajectory of the integrated Earth-life system. Prerequisites: GEOL 0310, 1240, and MATH 0100.

**GEOL 1970. Individual Study of Geologic Problems**

One semester is required for seniors in Sc.B. and honors program. Course work includes preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Enrollment is restricted to undergraduates only.

**GEOL 2300. Mathematical Models in the Geological Sciences**

Review of matrix algebra and basic univariate statistics. Theory and practical applications of multivariate statistical models applicable to large arrays of data. Multivariate regression and correlation procedures; principal component analysis, cluster analysis, and dissimilarity measures. Familiarity with Chemistry at the high school level is expected. Prerequisite: GE 1 (GEOL 0010), or GE 5 (GEOL 0050), or GE 22 (GEOL 0220). Offered alternate years.

**GEOL 2330. Advanced Remote Sensing**

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical properties from remotely sensed data. Emphasis on radiative transfer theory and modeling of spectra and spectral mixtures from optical constants. Advanced methods of digital image processing. Methods of integrating remotely sensed data into a GIS framework will be introduced. Recommended preparation course: GEOL 1330 or 1710; MATH 0100; PHYS 0620.

**GEOL 2350. Quaternary Climatology Seminar**

Discussion of current problems in paleoclimatology and global climate change. Students analyze the primary literature, and do original analyses of their own on published data. Topics include: theories of ice ages, millennial-scale climate variability, the influence of greenhouse gases and radiative forcing on climate, and historical and future climate changes. Prerequisites: graduate student status; or GEOL 0240, 0310, and 1240; or instructor permission.

**GEOL 2410. Kinetics of Geochemical Processes**

Emphasizes kinetic theories and their geological applications. Topics include: rate laws of chemical reaction, rates of chemical weathering; fundamentals of diffusion, nucleation, crystal growth, and dissolution; transport theory. Recommended prerequisite: GEOL 2460 or equivalent.
GEOL 2430. Igneous Petrology.
Study of mineral equilibria in igneous rocks in relation to theoretical and experimental studies in silicate systems. Principles of the origin and evolution of igneous rocks in space and time. Offered alternate years

GEOL 2440. Petrogenesis of Metamorphic Rocks.
Study of metamorphic rocks with emphasis on mineral equilibria, metamorphic facies, and metamorphic facies series. Topics include: metasomatism, mobile components, partial anatexis, and petrogenetic grids. Prerequisite: GEOL 2460. Offered alternate years

GEOL 2460. Phase Equilibria.
Principles of thermodynamics and phase equilibria in unary, binary, ternary, and multicomponent systems using analytical and graphical methods. Other topics include: solution theory, equations of state, and thermodynamics of surfaces

Numerical methods for the solution of continuum physics problems arising in geophysics and geology: Basic theoretical formulations and algorithms implementing finite element, finite difference, and boundary element methods are developed. Applications include problems in viscous and plastic flow, elasticity, and heat and mass transport discussed within a geological framework. Course consists of lectures and a computer project applying the methods and concepts considered to a scientifically significant problem. Recommended: APMA 0330, 0340; ENGN 1750. Offered alternate years

GEOL 2630. Interpretation Theory in Geophysics.
Use basic statistical theory and its matrix algebra representation and modern approaches for the optimum design of experiments, constructing model solutions to measurements, and describing nonuniqueness in models, with particular emphasis on generalized linear-inverse techniques. Introduction to stochastic processes and prediction. Recommended courses: GEOL 1610; MATH 0290, 0520, or APMA 0330, 0340, and computer programming skills. Offered alternate years

GEOL 2650. Advanced Seismology.
The theory of modern seismology will be applied to imaging of Earth structure (from local to global scales) and determination of earthquake source models. Topics include elastic wave propagation, representation theorems, seismic tomography, moment tensors, source-time functions, and models of fault rupture. Offered alternate years

GEOL 2730. Isotope Geochemistry.
A survey course emphasizing fundamental principles in isotope geochemistry, including nuclear systematics, nucleosynthesis, geochronological and stable isotope systems, and the application of radiogenic and stable isotopic tracers to geological problems. Prerequisites: GEOL 1410 and 1420, or instructor permission

GEOL 2800. The Chemistry and Mineralogy of Mars.
Examination of the chemical and mineralogical composition of Mars as revealed from meteorites and spacecraft missions. Example topics include: SNC meteorites, origin and evolution of the crust, alteration processes, remote near- and thermal-infrared observations, remote gamma-ray and neutron measurements, and petrology of surface materials. Recommended courses: GEOL 1410, 1420, 1710, or equivalent. No prerequisites

Focus on several areas of new research and current topics not necessarily covered in the core curriculum but of interest and importance to planetary scientists. Emphasis on critical evaluation of ideas, approach, results, and implications. Example topics include extra-solar-system planets, sample return issues, unanswered questions about Mercury, Pluto, etc. Prerequisites: GEOL 1410 or 1420 or 1710

GEOL 2840. Asteroids and Meteorites.
Compositional and petrographic characteristics of meteorites are examined along with the physical and compositional diversity of asteroids and other small bodies of the solar system. Possible links between specific types of asteroids and meteorite groups will be evaluated in the context of early solar system evolution. Data from spacecraft encounters with asteroids will be critically reviewed

GEOL 2850. Regolith Processes.
Particulate material (regoliths) and soils develop on every planetary surface. Physical and chemical alteration of the uppermost surface results from interwoven active processes of specific environments. Understanding these processes and products is central to interpreting data returned from planetary surfaces. Regoliths reflect surface history over a variety of time scales. Several planetary environments are examined in detail. Prerequisites: GE 141, 171, 288, or instructor permission

GEOL 2860. Planetary Volcanology.
An examination of volcanism using observations of features and deposits on planetary bodies, comparing them to predictions from the theory of magma ascent and emplacement. Attention to the influence of different variables (e.g. gravity, composition, temperature, pressure, and atmospheric effects). The history of planetary volcanism, its relation to thermal evolution, and comparative planetary volcanology are also addressed. Offered alternate years

GEOL 2870. Titan and Enceladus.
Planetary Evolution in Spring 2012 is a seminar class focus on new discoveries about Saturn’s moons Titan and Enceladus. We will address four fundamental questions about the geological and geophysical evolution of these bodies using new results from instruments onboard the Cassini spacecraft. Is Titan geologically and geophysically alive or dead? How does the global volatile cycle sculpt its surface? Does Enceladus have an ocean today? What is the driving force for plume activity in the south polar terrain? Enrollment limited to 20

GEOL 2880. Planetary Cratering.
Impact cratering affects nearly every solid-body object in the solar system. A major impact can produce relief comparable to the highest terrestrial mountains in just a few minutes. Course assesses the impact cratering process and record in different planetary environments, at different scales, and at different times. Open to Geology graduate students only. Offered alternate years

GEOL 2910A. Problems in Antarctic Dry Valley Geoscience.
The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change of millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical measurements from remotely sensed data. Advanced methods of digital image processing and data integration. Introduction to Geographical Information Systems (GIS) and methods of integrating remotely sensed data into a GIS framework. Prerequisites: GE 133 or 171; MA 10; PH 6; or permission of the instructor

This seminar course will survey the literature and discuss aspects of the marine, atmosphere, biosphere and geologic cycles of reactive nitrogen. Topics include general evaluation of the N cycle in these systems and records of changes in the N cycle through time, particularly on relevant climate change timescales

GEOL 2910E. Miocene: Prelude to the Ice Ages and Analogue to Future Climate Change.
The Miocene Epoch (~23 to 5 Ma) was characterized by a variety of interconnected changes including the tectonic evolution of various ocean gateways, changes in surface and deep-ocean circulation patterns and evolving ocean and atmospheric chemistry. In the Middle Miocene, these conditions resulted in reduced pole-to-equator temperature gradients and global mean annual surface temperatures of ~18°C, equivalent to warming predicted for the next century. These evolving conditions in the Late Miocene set the stage for the initiation of high amplitude northern hemisphere glacial cycles. Study of Miocene climate will yield insight into mechanisms relevant to past and future climate change

GEOL 2910G. Dynamics of Ice Sheets and Glaciers.
GEOL 2910I. Marine Geophysical Techniques. Theory and practice of common techniques employed in geophysical exploration of the oceanic crust, including gravity and magnetic potential field measurements, multi-beam echosounding, side-scan sonar, seismic reflection and refraction profiling, navigation and map construction. Must be willing to participate in 50-day research cruise

GEOL 2910W. Special Topics: Ophiolites. A seminar focusing on field, structural, petrological, and geochemical observations and geological processes relevant to the origin of ophiolites through geological time

GEOL 2910Z. Seismic Attenuation. The attenuation of seismic waves provides one of the most powerful constraints on the physical properties of the earth’s mantle, including temperature, the presence of melt, and rheology. Based primarily on readings of original research papers, we will discuss theoretical models of attenuation, physical mechanisms of attenuation, laboratory experimental measurements, and techniques and results of seismological observations with the overall goal of better understanding tectonic processes involving the lithosphere and asthenosphere of the earth. Recommended background preparation: GEOL 1650 and GEOL 1960A

GEOL 2920B. Cyclicities and Singularities in the History of Life. Investigates large-scale patterns, processes, and events in the history of life. Attention is focused on links between external and intrinsic forcings by contrasting the macro- and micro-evolutionary and ecological sequelae of known cyclical environmental changes (cyclicities) and unique events (singularities). Topics include: climate cyclicity, species flocks, species selection, turnover pulse hypothesis, cyclical taxonomic turnover, mass extinctions, and key evolutionary innovations. Students will have the opportunity to experiment with different time-evolutive methods

GEOL 2920D. Introduction to Geochemical Modeling. Continuum descriptions of mass transfer in geochemical cycles. Topics include: fundamentals of diffusive and advective mass transfer, kinetics of weathering and early diagenesis, fluid flow in the Earth’s crust and mantle, trace elements and isotopes in magmatic processes. Recommended: CHEM 0330, GEOL 1610 and APMA 0330, 0340

GEOL 2920E. Introduction to Organic Geochemistry. Mainly literature critiques and seminars, supplemented by introductory lectures. Topics include organic biomarkers, analytical methodologies, natural macromolecules, stable isotope ratios of biomarkers, application of organic geochemistry in studies of climatic and environmental change, fossil fuel exploration, and applied environmental research

GEOL 2920F. Kinetics of Mineralogical and Petrological Processes. Emphasizes kinetic theories and their geological applications. Topics include: fundamentals of diffusion in crystals and melts, theories of nucleation and crystal growth, kinetics of melting and dissolving, theory of phase transformation. Prerequisite: GE 246 or equivalent

GEOL 2920H. Past Variations in the Global Carbon Cycle. This course will examine variations in the earth’s carbon cycle over multiple time scales. We will examine geological tools that measure rates of carbon storage and release, especially over the past one million years. Special emphasis will be given to monitoring rates of past biological carbon storage

GEOL 2920K. Special Topics in Geological Sciences: The Hydrological Cycle on Mars. Evidence for the changing hydrological cycle on Mars, ranging from what appears to be an early warm and wet Mars, through history to the present very cold polar desert Antarctic-like environment will be examined. Ongoing rover exploration of Mars will be followed to assess what these new results are telling us about the hydrological cycle

GEOL 2920L. Evolution of the Moon II. A seminar on the thermal and chemical evolution of the Moon. In this part II of lunar seminars, we will focus more on hydrological and geochemical observations of lunar samples, terrestrial layered intrusions, related geophysical observations, and lunar petrogenesis. Prerequisite: GEOL 1420, 2730, or 2920K

GEOL 2920N. Problems Antartic Dry Valley Geoscience. The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change over millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed

GEOL 2920O. Physics of Melt Migration. A seminar course focusing on the physical processes and geochemical consequences of melt migration in the mantle. Topics include, but are not limited to: flow in porous media; compaction; adiabatic melting and melt-rock reaction; instabilities in melt migration; melt generation beneath mid-ocean ridge; and melt migration in other tectonic environments. Recommended course: GEOL 1620. Enrollment limited to 15. S/NC

GEOL 2920Q. Rheological Boundaries in the Earth. The properties of lower crust control the coupling of mantle convection to shallow crustal dynamics, post-seismic creep and the chemical evolution of the Earth. On Earth we have xenoliths and exhumed lower crustal rocks to study and relate to geophysical, experimental and theoretical investigations. We will explore these avenues of research with the goal of synthesizing our understanding of the behavior of lower crust on Earth as well as other terrestrial planets

GEOL 2920R. Evolution of the Moon. Petrological, geochemical, and geophysical observations, physical and chemical processes relevant to the formation and evolution of the Moon

GEOL 2920T. Science Applications of Lunar Spectroscopy. This course will focus on current science issues that are addressed with new lunar orbital or laboratory spectroscopy data. Each participant must identify a specific science topic (and data source) to be pursued and brought to completion during the term. Format will be seminar with very active participation by all attending. At the beginning of the term each participant will describe their chosen research topic. Subsequent sessions will critically examine issues that are associated with each topic in an iterative fashion, focusing on progress made, problems faced, solutions designed, insights found, and finally completed project. Prerequisites: GEOL 1710 and confirmation with instructor about the project

GEOL 2920U. Climate Variations. This course will examine the geologic record of lake basins on decadal to million-year time-scales. Students will gain hands-on experience with techniques in paleolimnology including sediment core acquisition, sediment description, petrography, sedimentology and environmental analysis, geochemistry, basic core scanning, and age determination, modeling, and time series analysis. The biotic content and interpretation of fossils will be stressed. The course will also cover theoretical aspects of paleoecology and more specialized techniques according to student interests through student-led discussions and a course project on regional lake sediments. Graduate students only; enrollment limited to 20

GEOL 2920V. Terrestrial Nitrogen and Carbon Cycling. This course will examine aboveground/ belowground processes in the context of the global nitrogen and carbon cycles, and the impacts of both natural and anthropogenic disturbances. It will include discussion of processes such as (de)nitrification, N-fixation, respiration, photosynthesis, and decomposition and their relationship to soil properties; the coupling of N and C cycles in soils related to climate change and increasing N deposition. It will include emphasis on emerging new techniques to quantify N and C processes in the laboratory, field and through modeling, and field trip investigating current field studies. Prerequisites: BIOL 1480 or GEOL 1130 or equivalent biogeochemistry course. Enrollment limited to 15

GEOL 2920W. Numerical Climate Change Scenarios for Southern New England. This seminar will examine regional-scale climate model scenarios for past and future climate change in Southern New England. Reliable estimates of the trajectory and variability of climate change are needed to address specific climate impacts, adaptations, and mitigations. Global climate model simulations, based on a range of IPCC green house gas scenarios, need to be "downscaled" to achieve useful regional resolution. Understanding the generation of these high-resolution "downscaled" climate scenarios and compiling a number of observed and modeled climate variables to assess the trends and reliability of climate scenarios for Southern New England is the goal of the seminar

The Center for Geometric Computing, founded in the summer of 1995, consists of members of the faculty of the Department of Computer Science and their students. The center was initially established to enhance the visibility of a major research effort funded by the Army Research Office and the National Science Foundation.

Over the years, the center has expanded its core geometric computing research focus into new strategic directions with significant potential for technological and economic impact, including computer security, information assurance, digital signatures, wireless computing, and metrology. Funding for research in the above areas is currently provided by DARPA and NSF.

Members of the center are Professor Roberto Tamassia (director) and Professor Franco P. Preparata (past director). The center frequently hosts internationally known visitors participating in joint projects.

The main objective of the center is to facilitate the transfer of technology from basic research in computational geometry to several applied areas. For additional information please visit the Center’s website at: http://www.cs.brown.edu/cgc/cgc-brown.html

German Studies

Chair
Gerhard Richter

The Department of German Studies is a vibrant intellectual community with strong ties to the full range of critical inquiry that characterizes the humanities at Brown. It focuses its research and teaching on German literature, culture, and critical thought (from German Idealism and Romanticism to the Frankfurt School and beyond), with a comparative and interdisciplinary orientation.

It offers both the B.A. and the Ph.D. in German Studies, affording its students – from beginning language learners to advanced doctoral researchers – the opportunity to combine their interests in the literary, cultural, and intellectual production of the German speaking areas of Central Europe. Concentrators combine intensive study of the German language with interdisciplinary studies by complementing courses from the German Studies core program with courses from other departments that deal with topics from the German cultural tradition. The quest for national identity that dominated German history in the nineteenth and twentieth centuries has been augmented by contemporary Germany’s efforts to come to terms with its past and create new ways of dealing with diversity. Our curriculum therefore looks back at the German literary, cultural, and historical tradition, examining figures from Goethe and Christa Wolf to Marx, Freud, Nietzsche, and Heidegger, alongside the texts of contemporary German media, including television, film, and music. Most concentrators study abroad for one or two semesters.

Standard program for the A.B. degree

Many students elect to complete a double concentration, combining German Studies with one of the above areas, or with fields such as International Relations or Economics, Comparative Literature or History of Art and Architecture.

Concentrators are expected to develop a course of study that will meet their particular needs and interests. In order to do this, students select an area of focus for their concentration, in consultation with the concentration advisor and other appropriate faculty. They should select at least three advanced courses in this area.

Knowledge of the German language is not required for declaring a concentration in German Studies. However, since language fluency is the basis for sophisticated understanding of German culture, students must meet a language requirement by the time they graduate.

Concentration Requirements

• Nine courses beyond GRMN 0400 or GRMN 0450;
• At least six of the nine courses must be at the 1000-level (or higher);
• Two of the 1000-level courses must involve writing assignments in German, and students must obtain at least a grade of B in these courses;
• At least five of the nine courses must be taken in the Department of German Studies (or four if a student spends a whole year in Germany on Study Abroad);
• Completion of a Senior Seminar during the senior year (i.e. a course from the German Studies 1900 series) as part of the five courses within the Department of German Studies; and
• If a student studies abroad for one semester, as many as four courses, in the case of two semesters, as many as five courses, from study abroad may count toward the concentration.

Honors

Candidates for honors will be expected to have a superior record in departmental courses and will have to be approved by the Department of German Studies. Honors candidates must take one additional course at the 1000-level from the German studies offerings and present an acceptable Senior Honors Thesis. The additional course may be used for preparation of the honors thesis. Students are encouraged to discuss their thesis topics with the concentration advisor no later than the third week of classes in Fall of their Senior year.

German Studies Graduate Program

The department of German Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.)
degree. The A.M. degree is only awarded as a transitional degree for Ph.D. candidates and is not open for admission for non-Ph.D. applicants.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/german-studies

Courses

German Studies

GRMN 0100. Beginning German.
A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate successfully about everyday topics. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in GRMN 0200 covers the entire year and is recorded as the final grade for both semesters

GRMN 0110. Intensive Beginning German.
Students who wish to complete the GRMN 0100-0200 sequence in one semester may do so by enrolling in GRMN 0110 for two semester course credits. There are six hours per week in small drill sections conducted by fluent undergraduate teaching apprentices. Another three hours of class will be conducted by the faculty instructor. Students must register for both the lecture section and one conference

GRMN 0120. German for Reading.
Intensive introduction to German grammar and syntax for students without prior knowledge of German and from all academic disciplines. Primarily for graduate students but also open to undergraduates. The student who successfully completes this course will have the necessary foundation for reading and translating German texts for students

GRMN 0200. Beginning German.
A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate successfully about everyday topics and participate in the annual film festival. This is the second half of a year-long course. Students must have taken GRMN 0100 to receive credit for this course. The final grade for this course will become the final grade for GRMN 0100. If GRMN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing

GRMN 0300. Intermediate German I.
Focuses on deepening students' understanding of modern German culture by reading texts and viewing films pertinent to Germany today. Intended to provide a thorough review of German grammar and help students develop their writing, reading, listening, and speaking skills. Frequent writing assignments. Four hours per week. Recommended prerequisite: GRMN 0200

GRMN 0400. Intermediate German II.
An intermediate German course that stresses improvement of the four language skills. Students read short stories and a novel; screen one film; maintain a blog in German. Topics include German art, history, and literature. Frequent writing assignments. Grammar review as needed. Four hours per week. Recommended prerequisite: GRMN 0300. WRIT

GRMN 0450. Intensive Intermediate German.
Open to students participating in Brown in Berlin or Tübingen, this is an intensive intermediate course which meets 20 hours per week for one month in Berlin. Students work on all four language skills through daily reading, writing and speaking assignments. The course introduces students to contemporary German literature, culture and politics. Prerequisite: GRMN 0300 or equivalent. May not be taken for credit by students who have completed GRMN 0400

GRMN 0500A. Cold War Germanys and the Aftermath.
The year 1990 unifies Germany and divides two decades in German history. The course investigates how self identification and the experience of present time were depicted in German literature and film in East and West in the 80s and 90s. Oral and written skills in German are furthered while deepening participants' understanding of Germany's cultural and social situation. In German. Prerequisite: GRMN 0400 or permission

GRMN 0500B. From Zero Hour to the Wende.
An exploration of postwar German culture through the study of literary and film texts. Oral and written skills in German are furthered while deepening participants' understanding of the prehistory of contemporary Germany. In German. Prerequisite: GRMN 0400 or permission

GRMN 0500E. The Presence of the Past: German Literature and Film (1945-present day).
Exploration of ways in which the German past, through cultural materials, including literature and film, played a role in the construction and deconstruction of the Berlin Wall, the two Germanys, and contemporary Germany. German oral/written skills are furthered while deepening participants' understanding of present-day Germany. In German. Prerequisite: GRMN 0400 or permission

GRMN 0500F. Twentieth-Century German Culture.
A broad exploration of twentieth-century German culture using many kinds of written and visual texts (e.g. literature, journalism, film, art). While continuing to work on all four language skills (speaking, listening, reading, writing) students will gain more intensive knowledge about German culture, society, and history. In German. Recommended prerequisite: GRMN 0400. WRIT

GRMN 0600B. Was ist Deutsch?.
In this course we will examine some of the ideas and myths that became entangled with the emerging notion of a "German" identity in the eighteenth and nineteenth centuries. Some of the terms that we will discuss include 'Kultur,' 'Bildung,' 'Freiheit' and 'Gesellschaft,' all of which have rich semantic histories. Conducted in German. Recommended prerequisite: one course in the GRMN 0500 series. WRIT

GRMN 0600C. From Faust to Freud: Germany's Long 19th Century.
In the 19th century, a fundamental renegotiation took place about what it means to be German. Literary, aesthetic, and philosophical discourses played a decisive role in these deliberations on German identity. We will study seminal texts from these fields and discuss how they shaped German self-understanding in the 20th century and beyond. Readings by Goethe, Büchner, Stifter, Wagner, Nietzsche, Raabe, Fontane, George, Freud, among others. In German. Prerequisite: GRMN 0500, LILE

GRMN 0750A. Faust and the Faust Legend.
Variations on the Faust theme focus on the role of knowledge in modern society. How do we define what we know? How do we accommodate knowledge with belief? What are the limits of human knowledge and can they satisfy us? Texts from the Reformation to the present: Marlowe, Calderon, Goethe, Turgenev, Mann, Bulgakov, Keroauc, Havel. In English. Enrollment limited to 20 first year students. FYS

GRMN 0750B. Tales of Vampirism and the Uncanny.
This course compares literary texts of horror and haunting in English and German Romanticism. The psychoanalytic foundations of vampirism are discussed to enable students to boldly go beyond mere fandom and engage these texts on a more sophisticated level. Readings by Walpole, Coleridge, Poe, Tieck, E.T.A. Hoffmann and others. In English. Enrollment limited to 20 first year students. FYS

Twenty-five percent of all new literary books worldwide are crime fiction. As a means of a society to reflect upon itself, crime fiction reflects how certain cultures deal with the dialectics of threatening and securing civic order, how they depict modernity, traditions, topographies, or cultural chance. In English

GRMN 0750D. The Poetics of Murder: Crime Fiction from Poe to the Present.
In this course, we will trace the literary and cinematic depiction of mystery and mayhem from the earliest manifestations of the genre to the present. Texts will include examples from the "Golden Age," the hard-boiled mode, the police procedural, and historical crime fiction. Enrollment limited to 20 first year students. FYS
GRMN 0900B. Great Works from Germany
Cultural and historical analysis of some of the most significant German texts from the past two centuries. Writers: Lessing, Thomas Mann, Günter Grass, Christa Wolf. Philosophers: Kant, Marx, Nietzsche, Freud. Sections: Enlightenment and its limits, liberation and oppression, and love and death. Students will give one presentation in class and write a final essay. In English.

GRMN 0900C. Introduction to German Literature.
This survey course will give a historical overview of the main periods and genres of literature in German from the eighteenth to the early twentieth century. We will also consider how literature relates and contributes to the cultural, intellectual, and political history of Germany. In English.

GRMN 0900B. The German Novel in the 19th and 20th Century.
The modern and postmodern German novel provides some of the most intriguing reading in the history of Western culture. From 19th century realism to 20th century postmodernism, these authors have commented on political events, provided historical hindsight, analyzed the German psyche, and initiated literary innovations that would have a profound impact on world literature and captivate readers worldwide. Works by Fontane, Kafka, Hesse, Mann, Grass, and Sebald, among others. In English. LILE.

GRMN 0900D. The German Novel From Classicism to Realism.
What is a novel, and how did it emerge as such a dominant genre in the course of the 18th and 19th centuries? This course introduces some of the most important German prose works prior to the 20th century, including texts by Goethe, Novalis, Hoffmann, Droste-Hülshoff, and Stifter. We will begin with the novel's earliest classical forms, follow its development in tandem with genres such as the fantastic tale and the novella, and end with a discussion of realism. All readings and discussions in English; no German language proficiency required. LILE.

GRMN 0900E. The Rhine River: An Aesthetic, Environmental, and Political History.
From Hölderlin to Hugo, cannonballs to canalization, this course examines representations of Europe’s most important waterway in the modern period. Although it has long been seen as a “natural” border between France and Germany, the Rhine River has been anything but undisputed. Both the French and German nationalisms movements claimed the river as their own, spawning a bi-lingual catalogue of songs, poems, and historical legends. We will approach the Rhine from an interdisciplinary perspective, with readings from economists, environmentalists, historians, and cultural studies scholars. We will be aided by a vast array of primary source material. Taught in English.

GRMN 0900F. Marx and Money in Modern Germany.
No critique of capitalism has been more enduring than Karl Marx’s nineteenth-century account of European finance and industry. We will engage Marx’s work alongside a close reading of the societies whose unsettling ideas revolutionized the way we understand ourselves and the modern world. We will examine such timely topics as capitalism and the ideology of the “market”; forms of religious fundamentalism and claims of truth; and the notion that, as a human being, I am fundamentally at odds with myself in elusive ways that nevertheless make me who I am. Intended for intellectually curious students from a wide variety of fields. Taught in English; knowledge of German not required.

GRMN 1320A. German Aesthetics from Lessing to Heidegger.
A survey of some of the most important German-language contributions to theories of art. Authors include Lessing, Kant, Schiller, Hegel, Nietzsche, Benjamin, Adorno, and Heidegger. Emphasis will be on how aesthetics intersects with literary theory and the idea of critique, and also how it contributes to discussions about knowledge, subjectivity, and power. All readings in English translation.

GRMN 1320B. Von der Aufklärung bis zur Klassik.
This course will cover the pinnacle of German literature in the 18th and early 19th century, from the Enlightenment to Weimar Classicism. Texts by Lessing, Wieland, Goethe, Schiller, Kleist, Hölderlin, among others. Prerequisite: GRMN 0600. (Taught in German). 999999.

GRMN 1320D. Goethe.
Selected readings of Goethe’s theater plays, novels, and poetry. Explores the meaning of reading Goethe today, at the 250th anniversary of his year of birth, and investigates the activities around the celebration of this anniversary. Time permitting, we consider versions of Goethe’s texts in film and other media. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1320E. Classical German Literature: Goethe und die Klassik.
The anthropology and aesthetics of Weimar Classicism. Readings of major works by Johann Wolfgang Goethe and Friedrich Schiller, with discussion of selected texts by Herder, Humboldt, and Kant. In German. Pre-requisite: GRMN0600 or placement. Prerequisite: GRMN 0600 or permission.

GRMN 1320F. Eighteenth-Century German Aesthetics.
A survey of important aesthetic writings from the period, including some texts of Winckelmann, Lessing, Schiller, Goethe, and Hamann. Major questions to be treated include the role of imitation, the concept of form, the relationship between the beautiful and the good, and formation of aesthetic judgments. Course will conclude with selections from Kant’s Critique of Judgment. In English.

GRMN 1320G. Drama and Religion.
Lessing used the stage as his “pulpit” when forbidden to publish in religious disputes. Some dramatists addressed particular religious views in comedies or satiric comedies; others staged religious themes more generally or in metaphysical imagery. We examine the variety, nature and context of these stagings in texts by major German authors: L. Gottsched, Gellert, Lessing, Schiller, Goethe, Kleist, and Hölderlin. In English, with a German section (TBA) for those able and interested.

GRMN 1330A. The Individual in the Age of Industry.
This seminar discusses the second part of the 19th century, which is distinguished by nation building, industrial revolution, advance of science, realism and belief in progress but also nihilism and cultural pessimism. We investigate how the new age of pragmatism and the “technological sublime” is reflected in short stories by major German writers such as Adalbert Stifter, Karl Gutzkow, Theodor Storm, Gottfried Keller, Wilhelm Raabe, Theodor Fontane, Arno Holz and Gerhart Hauptmann. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340A. Crime and Punishment- Introduction to German Mystery Texts and Films.
This course provides an exploration of German crime, detective and mystery texts and films ranging from the early 19th century to contemporary fiction. In addition to exercising hermeneutic skills, this course aims at improving proficiency in oral and reading comprehension, as well as speaking and writing skills, with an emphasis on vocabulary expansion, advanced Grammar review and stylistic development. This course is recommended for students interested in a combined introduction to literature and high-level language learning. Prerequisite: GRMN 0600 or permission.
GRMN 1340B. Guilt Management: Postwar German Culture.
The central theme of postwar German Culture, from the so-called "Zero-Hour" in 1945 to postunification, was dealing with the Nazi past. We discuss how writers, filmmakers, and critics tried to establish a public discourse on guilt. Films and readings by Mitscherlich, Syberberg, Reitz, Müller, Grass, Christa Wolf, Sichrovsky, Biller, Chaim Noll, and others. In German. Prerequisite: GRMN 0600 or permission

GRMN 1340C. Jahrhundertwende 1900.
Modernism and its contents in German literature around 1900. Examines naturalism, Jugendstil, Dada, and early expressionism. Poetry, fiction, and drama by Nietzsche, Th. Mann, Stefan George, Rilke, Kafka, Wedekind, Hofmannsthall, Schnitzler, Hauptmann, and others. Operas by Wagner and R. Strauss. In German. Prerequisite: GRMN 0600 or permission

Since the end of the 1970s, East and West German prose has tended to concentrate more on everyday life than on the overbearing questions of memory that were so central to immediate postwar authors. The changing function of literature in Germany is explored by reading representative prose fiction by major authors such as Becker, Delius, Hein, Strauss, and Walser. In German. Prerequisite: GRMN 0600 or permission

GRMN 1340l. Turn of the Century.
The most important issues in literature around 1900 will be discussed: the critique of language, media, psychoanalysis, urbanization, technical progress, the construction of the subject and a growing sense of isolation. Texts by Hofmannsthall, Rike, Schnitzler, Robert Walser, Georg Simmel, Freud, Nietzsche, Hermann Bahr and others. In German. Prerequisite: GRMN 0600 or permission

We will read a selection of texts by Kafka (including short stories, a novel, and journal entries) in order to explore his importance for the aesthetics of modernity. Topics include: representation of the law, literature and religion, the role of the paternal, and guilt. Frequent short papers based on close reading of texts, and a longer final paper. In German. Prerequisite: GRMN 0600 or permission

GRMN 1340K. Unmittelbar nach 1945: Literatur und Film in Deutschland.
Often called "Zero Hour," the period immediately following the end of the Second World War was one of turmoil and uncertainty in Germany. An enormous cultural production sprang up under extremely difficult conditions. Texts and films by Heinrich Böll, Wolfgang Borchert, Alfred Andersch, Wolfgang Staudte, Helmut Käutner, and others. In German. Prerequisite: GRMN 0600 or permission

GRMN 1340L. The Modern Period.
Explores the fascinating flowering of modernity in Germany, including the period around 1900 (adolescent Angst and the new Broadway version), Weimar culture (revolution, women's emancipation), Nazi culture, and exile literature in socio-historical context; including examples from film, art, and popular culture. Authors may include: Wedekind, Brecht, Kafka, T. Mann, Toller, Keun. In German. Recommended prerequisite: GRMN 0600 or equivalent

GRMN 1340M. Kafka's Writing.
Writing—vocation or duty, gift or curse, poison or antidote? This course provides an introduction to Kafka's stories, novels, journal entries, and letters, with a focus on his complicated, tortured relationship to the idea and practice of writing. We will explore how the difficulties of this relationship generate an enigmatic, tragic-comic oscillation between hope and despair that continues to fascinate readers today. This is a writing-intensive course, and the frequent short assignments will involve drafts, revisions, and individual consultations, with the aim of getting you to think critically about your own relationship to writing about literature. In English. Enrollment limited to 40. First year students require instructor permission.

WRIT

GRMN 1340Q. Vergangenheitsbewältigung: German Literature of Memory.
This course will examine one of the most loaded terms in German Studies, "the coming to terms with the past" or rather "the mastering of the past", which concerns German strategies of dealing with the atrocities of World War II and the Holocaust. Thus, this course will focus on the literary engagements with issues of trauma, memory, and remembrance. Authors include Adorno, Celan, Klüger, Grass, Weiss, Wolf, Müller, Timm, Kluge, and Sebald. The course will also have a closer look at contemporary debates regarding "Vergangenheitsbewältigung" and the culture of memory in Germany itself. In German. Prerequisite GRMN 0600

GRMN 1440A. Dada-Performance and Digital-Interactivity.
This course investigates the invention of performance art in German Dada and its legacy and further development in contemporary interactive art in digital media. Both phenomena are discussed with respect to their aesthetic, philosophical, and social roots and intentions. In German. Prerequisite: GRMN 0600 or permission

GRMN 1440C. Poetry and the Sublime.
We will examine some theories of the sublime, and read them alongside selected poets who take up certain related questions about representation, perception, and power. The goal will be to come to a better understanding of why the sublime is important as a category in thinking about the relationship between literature, philosophy, and history. Texts may include: Longinus, Schiller, Kant, and Paul de Man on the theory of the sublime, and poetry by Hölderlin, Wordsworth, Rilke, and Colan. In English; reading knowledge of German helpful but not required

After the failed revolution of 1848, the German bourgeoisie had to curb its desire to control the sphere of politics. At the same time, the effects of modernization started to manifest themselves in full force. We will discuss how the revolutionary changes of the second half of the 19th century in Germany were worked through in literature, and specifically in the novel. Readings by C.F. Meyer, Keller, Stifter, Storm, Raabe, Fontaine, Mörke, and Heyse. In German. Recommended prerequisite: one course in the GRMN 0600 series. LILE

GRMN 1440E. Märchen.
Fairy tales in German are usually associated with the Grimm brothers, but there is a rich tradition of popular (Volksmärchen) and literary (Kunstmärchen) fairy tales going back further and continuing into the present. We read a representative sample, consider typical features of the genre, and discuss the role of Märchen in shaping ideology. In German. Prerequisite: GRMN 0600 or permission

GRMN 1440F. Lyric Poetry From the Middle Ages to the Present.
Broad exploration of German poetry, including intersections between poetry/music/art: spiritual/worldly (medieval troubadours, Baroque); classical Greece/modern Germany (Goethe, Schiller, romantics, art songs), poetry/politics (Heine, Brecht), expressions/symbols (Rilke, expressionism), poetry after Auschwitz (Celan, Bachmann), contemporary reflections on history (V. Braun), poetry between cultures (Turkish-German poets, hip-hop). Intensive reading, discussions and vocabulary building. In German. Recommended prerequisite: one course in the GRMN 0600 series

GRMN 1440G. Projections of America.
Since its discovery, 'America' has served as a projection screen for a variety of images of the 'New World': as utopia, as harbinger of modernity, and as the origin of political, economic, and cultural imperialism. Readings of the changing and shifting image of America in German literary and journalistic texts from the 18th century to the present (Lenau, Goethe, Heine, Sealsfield, May, Frisch, and others). In German. Prerequisite: GRMN 0600 or permission

GRMN 1440L. German Lyric Poetry: From Goethe to Heine.
A survey of German lyric poetry during what Heine calls "die Kunstmärchen." Focus on rhetoric of the lyric: apostrophe, prosopopeia, metaphor, metonymy and allegory. Close reading, frequent writing assignments. Reading in German, class discussion in English

GRMN 1440N. Kunstmaerchen: the Literary Fairytale in the Nineteenth Century.
Das Kunstmaerchen" or literary fairy-tale occupies a central place in the literature of late romanticism. Focusing on major examples from writers such as Tieck, Eichendorff, and Brentano, we will examine how the content and the representational structure of these texts contribute to debates on categories like the "natural," the "fantastic," and the "moral." In German. Prerequisite: GRMN 0600 or permission
GRMN 1440O. Modern German Drama.
Explores the fascinating modern German dramatic tradition from the 19th century to the present, emphasizing plays that are still a part of the stage repertoire today and authors that have exerted a strong international influence. Authors may include: Büchner, Wedekind, Brecht, Toller, Dürenmatt, Frisch, Weiss, Heiner Müller. In German. Recommended prerequisite: GRMN 0600 or permission

GRMN 1440P. Heroes, Failures and Other Peculiar Characters-The German Novel from Goethe to Kafka.
Readings in the tradition of the German novel, including the Bildungsroman, Realism and modernist fiction. Consideration especially of failed heroes and the failure of the novel genre. Authors include Goethe, Hoelderlin, Novalis, Stifter, Fontane, Musil and Kafka. Readings and class discussions in English

GRMN 1450A. German-Jewish Literature.
From emancipation to anti-Semitism and from the "Golden Age" to the Shoah, Jewish life in Germany has experienced extremes comparable to no other cultural exchange. In this class, we will explore the German-Jewish experience by reading literary texts written by German-Jewish authors. Readings by Lessing, Mendelssohn, Heine, Kafka, Jurek Becker, and others. In English. LILE

GRMN 1450B. Die Berliner Republik und die Vergangenheit.
The opening of the Berlin Wall and the reunification of Germany brought with them a dramatic rethinking of both the past and the present of the German nation. Literature, film, architecture, visual art, and music have played important parts in this process. This course will consider a range of documents from the contemporary Berlin republic and the way they negotiate the Cold War and Nazi pasts. All readings and class discussion in German. Prerequisite: GRMN 0600 or equivalent. Enrollment limited to 20. LILE

GRMN 1450C. National Socialism and the Shoah in Recent German Prose.
Since Germany's reunification in 1990, German discourse on National Socialism and the Shoah has changed significantly. With the generation of the eye-witnesses disappearing, the third generation after World War II renegotiated issues such as perpetratorship, guilt, and responsibility on the one hand, wartime-suffering on the other. During the last decade, German literature represented voices from different generations/groups. This seminar will examine literature by Grass (b. 1927), Klüger (b. 1931), Timm (b. 1940), Schlink (b. 1944), Biler (b. 1965) and Erpenbeck (b. 1967) to situate these literary interventions within the framework of characteristic debates of the last few years. Enrollment limited to 40

GRMN 1450F. 20 Years After: The End of GDR and German Reunification.
The fall of the Berlin wall heralded the German reunification rather than the reformulation of the GDR as an example of "democratic socialism." The 20th anniversary gives reason to discuss the development of Germany since 1990. Readings of Volker Braun, Christa Wolf, Thomas Brüssig, Ingo Schütte, Clemens Meyer, Yadé Kara. Films: Goodbye Lenin, Das Leben der anderen, Willenbrock. Issues discussed: Cold War, Perestroika, Reunification, East-West-German identity, Migration and Globalization. In German. Prerequisite: GRMN 0600 or permission

GRMN 1450G. Love and Death.
The course will examine the theme of love and death in four texts from around 1800: Lessing's Emilia Galotti, Goethe's Werther, Kleist's Penthesiles and Büchner's Woyzeck. We will focus on historical changes in the understanding and theory of emotions. In German. Prerequisite: GRMN 0600 or permission

GRMN 1640C. German National Cinema from 1917 to 1989, and Cold War Germany in Film.
Examines three phases of German national cinema in competition with Hollywood's early dominance of film production, from the founding of the UFA in 1917 through National Socialist Cinema, the "New German Cinema," and the cinema of East Germany. Explores representations of Germans during the Cold War, 1949-1989, a mythical Germany cast as the locus of "world evil." Weekly screenings. In English

GRMN 1660K. German Jews and Capitalist Markets in the Long Nineteenth Century.
While the classic historiographical debates surrounding assimilation, emancipation, and anti-Semitism will not be ignored, our spotlight will remain on capitalist markets, where Germans and Jews most often encountered one another. Our study will begin and end in the Franco-German borderlands, with revolution and warfare. In between, we will traverse the German landscape, meeting, among others, bankers in Frankfurt, wine merchants in the Rhineland, and department store magnates in Berlin, all in an attempt to understand the complexities of cross-cultural (dis)integration. Readings and instruction in English

GRMN 1660L. German Jews and Capitalist Markets in the Long Nineteenth Century.
This course focuses on the commercial lives of German Jews, 1789-1918. While the classic historiographical debates surrounding assimilation, emancipation, and anti-Semitism will not be ignored, our spotlight will remain on capitalist markets, where Germans and Jews most often encountered one another. Our study will begin and end in the Franco-German borderlands, with revolution and warfare. In between, we will traverse the German landscape, meeting, among others, bankers in Frankfurt, wine merchants in the Rhineland, and department store magnates in Berlin, all in an attempt to understand the complexities of cross-cultural (dis)integration. Readings and instruction in English
GRMN 1660R. Freud: Introduction to Freud’s theories of the unconscious and its manifestations, Freud’s thinking on culture and aesthetics, his theory of sexuality, his view of religion, and of fascism. In English

GRMN 1660S. Mord und Medien. Krimis im intermedialen Vergleich. The genre of the mystery novel has proven exceedingly productive in German speaking countries. At the same time, the new and the newest media have discovered the mystery genre as one of the most appealing narrative structures in contemporary culture. Readings of mystery narratives in book form, on television, on CD-ROM, and on the Internet. In German. Prerequisite: GRMN 0600 or permission

GRMN 1660T. Germans/Jews, Deutsche (und) Juden. From emancipation to anti-Semitism and from the ‘Golden Age’ to the Shoah, Jewish life in Germany has experienced extremes comparable to no other cultural exchange. Widespread philo-Semitism and the official taboos on anti-Jewish sentiments indicate that the relationship between Jewish and non-Jewish Germans today remains one of mutual nonunderstanding and distrust. Texts by Lessing, Mendelssohn, Heine, Kafka, and others. In English

GRMN 1660U. What was Socialism? From Marx to "Goodbye Lenin". The international socialist movement was born in Germany, and many of Germany’s most important cultural figures were attracted to its striving for social justice. But socialism seems to have come to a tragic end. Course includes theoretical texts such as Marx and Luxemburg, writers such as Heine and Brecht, and a focus on East German culture (film, art, literature) and its aftermath since the fall of the Berlin Wall. In English

GRMN 1660V. Nietzsche. This course will provide an introduction into Nietzsche’s thinking. Discussion of the major works from The Birth of Tragedy and Beyond Good and Evil to Thus Spoke Zarathustra. No prerequisites. In English

GRMN 1660W. Early German Film and Film Theory. We will study the interference/interface of cinema and theory in the 20th century. Includes analysis of classical German films and texts by critics such as Eisenstein, Balazs, Vertov, Arnheim, Kracauer, Benjamin. In English

GRMN 1661A. Race and Classical German Thought. Thought about race has a complex history in modern intellectual culture; crucial paradigms regarding culture, identity, and biology have roots in the philosophy, science, and arts of eighteenth-century Germany. This course will give in-depth consideration to ideas and paradigms from classical German intellectual culture, and will trace their resonances within African, Francophone, French, and North American race theory in the twentieth century. All readings in English. Not open to first year students

GRMN 1661E. Germany, Alcohol, and the Global Nineteenth Century. This course examines the German “long nineteenth century” through the lens of the production, sale, and consumption of alcohol. The cultural resonance of alcohol allows us to better situate Germany in an increasingly global context, where its exchange reflected broader patterns of modernization, social transformation, and nationalism. Whether brewing beer in Chinese Tsingtao, harvesting grapes in California’s Napa Valley, or celebrating Purim with wine in Palestine, Germans engaged the nineteenth-century world through their own historical traditions and trades. Our endeavors will be aided by the remarkable “Alcohol and Addiction Studies” special collections at the John Hay Library

GRMN 1900A. The Weimar Republic (1918-1933). Advanced students of German culture will pursue their own interests in researching this fascinating period in German culture and political history. Common readings, general discussions, and individual class presentations will facilitate the development of individual projects. Covered areas include literature, art, music, film, politics, etc. Required for concentrators, written permission required for others. Prerequisite: at least 3 100-level GRMN courses or equivalent. In German and English

GRMN 1900B. Sites of Memory. The seminar explores the connection between representation and management of space and memory in the German context. Readings drawn from literary works, philosophy, public discourse about monuments and memorials, and so on. Assignments include individual presentations and final research project. Required for concentrators, open to others with instructor’s permission. In English and German

GRMN 1900C. Cultural Industry and the Aesthetics of the Spectacle. The course explores mass culture and distraction as conceptualized by the Frankfurt School. Readings and discussions will engage with the emergence of distraction as a specific category of experience; the function of entertainment in the culture industries of Nazi Germany; the critique of mass culture in post war Germany, and the reformulation of spectacle and distraction in Culture Studies and postmodern discourse. Readings: Schiller, Adorno, Benjamin, Kraus, Debord, Baudrillard, Postman, Virilio, Norbert Bolz. In German

GRMN 1900D. Fleeing the Nazis: German Culture in Exile, 1933-1945. When the Nazis came to power in Germany in 1933 this caused one of the biggest brain drains in history. We will trace the lives of leading experts in a variety of fields such as literature, music, philosophy, and the sciences and ask questions such as: Why did they leave? Where did they go? How did they do in their new environment? What did they say about their exile afterwards? Specific persons and places of exile will be studied according to the interests of the seminar participants. In German. Recommended prerequisite: one course in the GRMN 0600 series. Open to seniors only

GRMN 1900E. Made in Germany - A Cultural History of Science, Technology, and Engineering. In this seminar, we will examine the German technological imagination in literature and film. The material to be studied reaches from nineteenth and early twentieth century German Science Fiction to the history of engineering giants such as Volkswagen or BMW and will also include philosophical reflections of technology, the role of the German engineer as hero, and the image of the mad scientist. A field trip to Germany during spring break is planned. In German. Prerequisite: GRMN 0600. Enrollment limited to 20; first year students require an instructor override prior to registering

GRMN 1900G. Von der Aufklärung bis zur Klassik. This course will cover the pinnacle of German literature in the 18th and 19th century, from the Enlightenment to Weimar Classicism. Texts by Lessing, Weiland, Goethe, Schiller, Kleist, Hölderlin, among others. Prerequisite: GRMN 0600. In German

GRMN 1970. Independent Study. Independent study on a particular topic related to German culture. In German or English. At the discretion of the instructor. Please check Banner for the correct section number and CRN to use when registering for this course

GRMN 1990D. Senior Conference. Special work or preparation of an honors thesis under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course

GRMN 2320A. 1700. Comparing language (rhetoric, style), literature (poetry, drama, novel), and other cultural phenomena (theater, dictionaries, emblem books, professionalization), we will consider shifts in cultural paradigms from the early modern to the modern period. Grimmelshausen and Gellert; Grapheus and Gottsched; Opitz and Haller. Readings in German. Discussion in German or English

GRMN 2320B. The Works of Heinrich Kleist. Kleist’s writings continue to pose interpretive and theoretical riddles for the modern reader nearly 200 years after their composition. We will read a selection of his major texts (dramatic, narrative, and journalistic) along with some modern American and German criticism, covering methodological approaches such as deconstruction, psychoanalysis, and discourse analysis. Readings in German, with discussion in English

GRMN 2320C. Enlightened Laughter. We follow the development of German comedy and theory of comedy and laughter from the late Baroque to the Enlightenment, comparing comedies and theoretical texts with foreign examples. What kind of laughter is appropriate for a bourgeois stage? A German stage? Why is laughing important? What kind? Texts by Weise, Prehauser, the Gottscheds, Gellert, J. A. Schlegel, Lessing, also Molière, Destouches, Farquhar, Graftig. German texts read in German. Prerequisite: Graduate standing or permission
GRMN 2320D. Kafka in English.
No description available.

GRMN 2320E. Political Romanticism.
What, if anything, is political about Romanticism? We will read the literary and non-literary writings of British and German romantic authors, with a focus on their complex relationship to political ideas, political practice, and the very concept of “the political.” We will also consider why the question of Romanticism’s relationship to politics has been re-visited with such consistency in the 20th century. Authors include W. Wordsworth, P. B. Shelley, Coleridge, Friedrich Schlegel, Novalis, and Kleist. All readings and discussions in English

GRMN 2330A. Vision and Narration in the 19th Century.
Explores the relationship between vision and techniques of linguistic representation in selected literary texts from late romanticism to the fin-de-siecle. Special attention will be paid to the idea of “realistic” representation and to problems that afflict both seeing and speaking in the texts. Authors include Kleist, Stifter, Storm, Keller, Hofmannsthal, Rilke, and Musil. Readings in German, discussions in English. Open to seniors with instructor’s permission

GRMN 2340A. German Literature 1968-1989.
Discussion of major trends in literature in German: New Subjectivity, postmodernism, feminist literature, the role of mythology, post-histoiro. Authors to be discussed include Botho Strauss, Elfriede Jelinek, Thomas Bernhard, W.G. Sebald, among others. In German

GRMN 2340B. Poetik der AutorInnen.
This course will examine postwar literary aesthetics as put forth in the so-called “Poetikvorlesungen” which several universities in German-speaking countries have instituted since 1959. These lectures have featured important contemporary authors thinking about their work - from poetic practices and aesthetic theories to biographic considerations and the technicalities of writing literature in today’s world. In German

GRMN 2340C. German Modernism.
This seminar will explore German literary modernism from around 1880 to the 1930s. Schools and authors to be studied will include Naturalism (Hauptmann, Holz, Schäfer), Neo-Romanticism and Symbolism (Hofmannsthal, Rilke, George), Expressionism (Toller, Benn, Kaiser, Brecht), and New Objectivity (Kästner, Döblin, Fallada). In German. Required proficincy: GRMN 0600

GRMN 2460A. German Literature 1945-1967.
Examines the literature and the literary debates in postwar Germany, East and West. Authors to be discussed include those of the Gruppe 47 and those excluded from the group in the West; Brecht, Seghers, Becher and the new generation in the East. Emphasis on cultural politics and the role of literature in postwar German society (the work of the mourning, political restauration)

GRMN 2460C. Literature of the German Democratic Republic.
Against the background of the history of socialism in Germany, an intensive study of GDR authors and East German authors since reunification, with opportunities to explore other areas such as film and art. Authors may include: Brecht, Müller, C. Wolf, Reimann, Hein, Braun, Tellkamp. Readings in German, discussion in English or German

GRMN 2460D. Thomas Mann: Die Romane.
In this course, we will read and discuss Thomas Mann’s novels, from Buddenbrooks (1900) to Bekenntnisse des Hochstaplers Felix Krull (1954). Emphasis on narratological analysis and historical contextualization. In German

GRMN 2660A. On the Sublime.
Survey of major theories of the sublime from antiquity to modern times, with emphasis on German, British, and French texts from the 18th to 20th centuries. Authors to be read include Longinus, Immanuel Kant, Edmund Burke, Jean-Francois Lyotard, and Neil Hertz. Readings and discussions in English, with optional readings in original languages provided. Open to seniors with instructor’s permission

GRMN 2660C. Socialism and the Intellectuals.
The international socialist movement was born in Germany, and many of Germany’s most important intellectuals were attracted to its striving for social justice. Against the background of 19th century politics and theory, the course focuses on the Weimar Republic, the cultural politics of the German Democratic Republic and the New Left in the Federal Republic, and developments since reunification. Authors may include Heine, Marx, Hauptmann, Brecht, Müller, C. Wolf. Readings in German, discussions in English and/or German

GRMN 2660G. Reading (in) German Literature.
What is reading? We will discuss theories of reading from reader-response-theory to performativity and its history. Beginning with Goethe’s novel “Werther,” we will read German literature since the 18th century. We will focus on the emerging conditions and techniques of reading (extensity, accessibility, popularity) which still shape text-reader-relations and on the double-bind of reading as a bourgeois model for subject-formation alongside profound ambivalence towards its pleasures. Finally: How is our own experience and performance of reading German literature? In German

GRMN 2660H. Historicism, Photography, Film.
How does the emergence of photographic media—photography and film—affect concepts of historicity and historical experience? And how do philosophical concepts of history and historicity inform the aesthetics of form and of documentary film in particular? Taking Kracauer’s critique of photography and Benjamin’s work on film, photography and the philosophy of history as its point of departure and focusing on longitudinal documentaries from the former GDR, West Germany and Switzerland, this course proposes an inquiry into the relationship of photographic media and philosophical concepts of historicity. Readings and discussions in English. Open to graduate students. Juniors and seniors may enroll with instructor permission

GRMN 2660L. Hoelderlin, in Theory.
We will spend the semester reading of the enigmatic writings of Friedrich Hölderlin. Martin Heidegger’s Being and Time (1927) develops a “fundamental ontology” of Dasein, or human existence. Dasein, which in each case dies, is for the time being alive. How does mortal human being relate to other life forms? We will read Heidegger’s masterpiece in its entirety with this question in mind, a question sharply honed by Jacques Derrida in his Of Spirit, Aporias, and The Beast and the Sovereign, that is, from the 1980s until his death in 2004. We will proceed through close, careful, and caring readings. Intellectually curious participants from a variety of disciplines and backgrounds are welcome. Enrollment limited to 30

GRMN 2900. Theory and Methods of Foreign Language Teaching.
No description available

GRMN 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing for a preliminary examination

GRMN 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

GRMN 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis
The Department of Hispanic Studies offers a standard concentration program in Hispanic Studies with a track in Hispanic Language, Literature and Culture. This program provides students with a comprehensive view of Hispanic (Spain and Latin America) language, literature and culture. Both introductory and upper-level courses offer opportunities to explore a particular author, genre, period, or special topic, and to learn and use diverse analytical approaches. The overall requirement is a minimum of ten courses.

**Prerequisite**
- HISP 0600 Advanced Spanish II (or placement)

**Required courses**
- HISP 0730 Early and Contemporary Writers of Spanish America 1
- HISP 0740 Intensive Survey of Spanish Literature 1
- Select one of the following:
  - A course from the HISP 1900 series
  - HISP 1990 Senior Conference (for students writing an honors thesis)

**Elective courses**
Select at least eight 1000-level courses which provide more specific preparation in major areas of Hispanic Studies. Students should consider taking one upper-level language course.

Total Credits 11

1. Introduces students to standards and methods of interpretation in the field, as well as to major works, genres, and movement in the literatures and cultures of both sides of the Atlantic.
2. Four of the 1000-level courses cover the principal areas of Hispanic Studies – from medieval and early modern works all the way to works in the twenty-first century. In consultation with the concentration advisor, students also choose from four 1000-level elective courses that best suit their specific needs and interests. Concentrators are reminded that courses from Comparative Literature, History and other disciplines may be applied toward the concentration in Hispanic Studies as long as they deal with Spanish or Latin American themes, or with questions or topics that are pertinent for the study of Peninsular or Latin American culture. Individual courses may be discussed with the Concentration Advisor on a case by case basis. Up to two courses from outside of Hispanic Studies may be counted toward the concentration.

As many as four courses taken abroad may be applied towards the concentration in Hispanic Studies. These courses must meet the requirements of the concentration and be approved by the Concentration Advisor (note that they must first be approved for Brown University credit.) If you are planning to fulfill concentration requirements with courses taken abroad, please keep the syllabi and work (exams, papers) for evaluation.

**Honors**
Students are normally required to have an A average in their concentration courses before being considered for the Honors Program. Those interested in writing a Senior Thesis should discuss this possibility with the instructor they want as their thesis advisor during the spring semester of their junior year. Applications are due by the third week of a student’s seventh semester at Brown.

**Hispanic Studies Concentration Requirements**

Spanish is the second most widely spoken language in the world and the second language of the United States. In our society, knowing Spanish is not just an asset; it is increasingly a necessity. The Hispanic Studies concentration enables students to develop advanced Spanish skills while acquiring a solid background in the complex history, literature, cultures, and intellectual traditions of Spain, Latin America, and the Latino-U.S.

The department offers a variety of courses on topics related to literary history and theory; multicultural contact; linguistics and the history of the language; visual culture, film, and performance studies. Interdisciplinarity is a hallmark of the department, but students in this concentration are also encouraged to broaden their perspectives by taking relevant courses in other departments. Most choose to strengthen their academic preparation by participating in a study abroad program in Spain or Latin America and by engaging with Hispanic communities in the United States.
Courses

HISP 0100. Basic Spanish.
This fast-paced beginning course provides a solid foundation in the development of communicative skills in Spanish (speaking, listening, comprehension, reading and writing) as well as some insight on the cultures of the Spanish-speaking world. Individual work outside of class prepares students for in-class activities focused on authentic communication. Placement: students who have never taken Spanish before, or have scored below 390 in SAT II, or below 240 in the Brown Placement Exam. Students who have taken Spanish before and those with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period

HISP 0110. Intensive Basic Spanish.
A highly-intensive, two-semester sequence in one semester that carries 10 contact hours per week. Primarily for students with knowledge of Spanish, who have scored below 450 in SAT II or below 340 in Brown Placement Exam. Students with little or no preparation in Spanish should consult with the Course Supervisor. Focused on acquisition of communicative skills (speaking, listening comprehension, reading and writing), and development of cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern daily life, health, art and culture, nature and the environment, and relationships) and write simple texts with good command of grammar and sentence structure. Ideal for students interested in fast-tracking their language learning to meet study abroad requirements. Double credit. Instructor permission required. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period

HISP 0200. Basic Spanish.
A continuation of HISP 0100. This course continues to focus on acquisition of communicative skills (speaking, listening, comprehension, reading and writing) as well as cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern day life and its pressures, health, art and culture, nature and the environment, relationships) and write simple texts with good command of grammar and sentence structure. Prerequisite: HISP 0100 or placement: SAT II scores between 400 and 450. Brown Placement Exam scores between 241 and 340. Students with an AP score of 3 or below must take the Brown Placement Exam. Students who have scored below 600 in SAT II, or below 340 in Brown Placement Exam should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period

HISP 0300. Intermediate Spanish I.
This course continues to develop and strengthen students’ proficiency in the Spanish language, as well as to help them increase their cultural understanding. It seeks to develop both fluency and accuracy and to teach students to express, interpret, and negotiate meaning in context. Through the exploration of themes such as the individual and the community, health issues, traveling, multiculturalism and human rights, students focus on communication and learn to appreciate cultural differences. Prerequisite: either HISP 0200, HISP 0110, or placement: SAT II scores between 460 and 510, or Brown Placement Exam scores between 341 and 410. Students with an AP score of 3 or below must take the Brown Placement Exam. Students who should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period

HISP 0310. Spanish for Social Service Applications.
Provides unique language skills for students interested in health care, social service, and community action. It develops speaking skills and cultural awareness through discussions, readings, interviews, on all aspects of public health, presentations, and internships. Topics include case management, substance abuse, HIV and STD prevention, sexual abuse, domestic violence, mental health issues, anger management, and medical treatment. Some advanced grammar points reviewed. Prerequisite: 2-3 semesters of college Spanish, placement in HISP 0300 or 0400

HISP 0400. Intermediate Spanish II.
This course offers an exploration of the Spanish language and Hispanic cultures through a variety of thematic foci: the world of work, the arts, globalization and technology, leisure, and celebrations. It focuses on vocabulary building, the examination of some of the more difficult points of grammar, and moving students towards a more sophisticated level of comprehension and expression. Students work with readings, including literary texts, songs, film, and the visual arts. Prerequisite: HISP 0300 or placement: SAT II scores between 520 and 650 or Brown Placement Exam scores between 411 and 490. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period

HISP 0500. Advanced Spanish I.
Offers comprehensive work in listening, speaking, reading, and writing, with targeted grammar review. Students work with a variety of readings (literature, newspaper articles, etc.) and with art forms such as music and film, in order to develop oral and written expression and to explore issues relevant to the Hispanic world. Students explore topics of their own interest through student-led activities and presentations. Prerequisite: HISP0400 or placement: SAT II scores between 600 and 660, Brown Placement Exam scores between 491 and 570, or AP score of 4 in language or literature. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period
HISP 0600. Advanced Spanish II.
Offers continued, advanced-level work in speaking, listening, reading, and writing skills, with focused review of challenging aspects of Spanish grammar. Course materials include films, music, art works, and a variety of written texts (articles, stories, plays, a novella, etc.) chosen to promote class discussion and in-depth written analysis. There will be individual and group activities, including in-class presentations and creative writing projects. Prerequisite: HISP 0500 or placement: SAT II scores between 670 and 740, Brown Placement Exam scores between 571 and 650, or AP score of 5 in language. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class. If course is full, students should sign the wait list available in Rochambeau House, 84 Prospect St., Room 117 during the pre-registration period. Students with scores of 750 and above on the SAT II, 551 on the Brown Placement Exam, or 5 in AP Literature should consider offerings in the course.

A survey of the forces of tradition and innovation in Spanish literary texts, from the romantic period up to the varied literary experimentation of the 20th century. An ancillary aim is to develop students' written and oral expression in Spanish. For the place of this course in the Hispanic studies concentration, see the list of concentration requirements on the Registrar's webpage (www.brown.edu/Administration/Registrar). Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 551 or above

HISP 0730. Early and Contemporary Writers of Spanish America.
An introduction to major authors, movements, and themes of Spanish American literature from the Discovery to the present. This course also aims to develop students' oral and written expression in Spanish. Students are expected to engage in close reading and discussion of texts, as well as to revise their papers. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above. WRIT

HISP 0740. Intensive Survey of Spanish Literature.
An introduction to the major authors and literary movements of Spanish literature from the Middle Ages to contemporary times. Focusses on building critical vocabulary. Also aims to develop students' written and oral expression in Spanish. Preparatory course for 1000-level courses for students who achieve the highest placement in Spanish. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above. WRIT

HISP 0750A. Cultures of Violence.
Studies wide-range treatments of violence in Hispanic literature and film. We address such problems as intercultural violence in the early transatlantic encounter between Europe and the Americas; honor protocols in Golden Age Spain; state-sanctioned bloodshed in the southern coen; class-conflict and narco-politics in Colombia; endemic violence in Latin America's megacities. Particular attention is devoted to the patriarchal family and state as agents of violence in these works. Conducted in Spanish. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750B. Hispanics in the United States.
Designed to bridge academic learning about Hispanic/Latino culture and volunteer work in agencies serving Hispanics in Providence. Readings, films, and guest presentations focus on issues of concern to these groups. Spanish language learning occurs in the classroom and the community, where students have the opportunity to enrich and test course content. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 651 and over in the Brown Placement Exam. Instructor permission required

HISP 0750C. Love and War in Medieval and Contemporary Spanish Fiction.
Examines presentations of Medieval Iberian culture in literature and film. This subject interrogates the persistent popularity of medieval themes and stories in contemporary film and fiction. It will consider some medieval narratives, such as El Cid, medieval chronicles and ballads, and La Celestina, which inspire a tradition of revisionist re-writing, as well as modern "inventions" of the medieval in a range of cultural forms. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750D. Mexico, Image and Encounter.
An exploration of portrayals of contemporary Mexican culture and attitudes in the media, art and literature, and by means of an on-line dialogue with Mexican university students. Special emphasis on Mexico City and Tijuana and the perspectives of regional, foreign, and social outsiders. Analysis of films, travel guides/accounts, and readings by Monsiváis, Pacheco, Poniatowska, Swain, Villoro, etc. Enrollment limited to 20 first year students. FYS

HISP 0750E. Topics in Hispanic Culture and Civilization.
Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

With the death of General Francisco Franco in November of 1975, Spain began the period of transition from a forty-year dictatorship to a modern democracy. This course focuses on cultural production of the transition period, including literature and other high art forms as well as popular culture, in order to assess the way in which these discourses worked simultaneously to both reflect and effect change. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750G. Widened Stories.
From the 12th century to the 1500s. Tales of heroism, fables, stories of deception and revenge, and humorous narratives of bawdy content were transmitted orally and in manuscript first, and then, after 1472, also in print. Such narratives will help us to explore the social, cultural, and political forces that affected behavior and motivated change in Medieval and Early Modern Spain. For first year students only. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

Throughout the nineteenth century, Spain evolves from absolutism to constitutional monarchy of the Restoration, with the corresponding formation of a new bourgeois and urban proletariat. Modernization was nevertheless uneven, and different stages of political, economic, and social development coexisted. This course will analyze how literature and other cultural products both reflected and incarnated the contradictions inherent to this process. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750I. Spanish Cinema and Literature: The Postmodern Cinema.
Designed to bridge academic learning about Hispanic/Latino culture and volunteer work in agencies serving Hispanics in Providence. Readings, films, and guest presentations focus on issues of concern to these groups, particularly language and literacy. Spanish language learning occurs in the classroom and the community, where students test and enrich course content. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750J. Hispanic Populations US.
Designed to bridge academic learning about Hispanic/Latino culture and volunteer work in agencies serving Hispanics in Providence. Readings, films, and guest presentations focus on issues of concern to these groups, particularly language and literacy. Spanish language learning occurs in the classroom and the community, where students test and enrich course content. Prerequisite: HISP 0600 (formerly SP 0060) or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam

HISP 0750L. Urban Reels: Latin American Cities in Film.
How are our notions of Latin American urban space influenced by images projected by Hollywood and popular American culture? How do these
HISP 1020A. Spanish Civil War in Literature and the Visual Arts.
The Spanish Civil War (1936-1939) has inspired a vast trove of scholarly and artistic production. In this course, we will analyze documentary and feature-length Spanish films in order to understand the social and political causes of the war and its central players. We will complement our film discussions with relevant poetry, novels, and art works to expand our critical perspectives on ways of representing and remembering the Civil War. In Spanish for first-year students with SAT II of 750 or above, a 5 on the AP Literature exam, or a Brown Placement Test score of 651 or above. Enrollment limited to 20 first year students. FYS

HISP 1020B. The Spanish Realist Novel in Translation.
The course will include the two major Spanish novels of the 19th-century in fine recent translations—Leopoldo Alas’s *The Regenta* and Galdós’s *Fortunata y Jacinta*—and other supporting texts. In both novels the problematical situation of women in society is especially important. They will therefore be studied in relation with the overall themes of the subordination of women and the novel of adultery. Parallels will be drawn with such classical texts as Madame Bovary and *Anna Karenina*.

HISP 1020C. Novel of the Mexican Revolution.
By the middle of the period of violence that we know as the Mexican Revolution (1910-1920), a new literary genre emerged. This new genre, which came to be known as the Novel of the Mexican Revolution, includes many of the most celebrated Latin American novels of the 20th century. The broad objectives of this course are to untangle the myriad ways the Revolution was and is bound up in Mexican life, to gain an enduring knowledge of the different phases of the Revolution and its aftermath, and to read and discuss the canon (and some non-canonic) works in the genre. Enrollment limited to 30

HISP 1030C. The South: Literature of the U.S. South and of South America.
For Jorge Luis Borges, in his story of the same title, the South is a spectral region, hovering between imagination and reality. Both the literatures of the U.S. South and of South America enact his notion of the South. In the course, we will examine the remarkable similarities between the two literatures-similarities that result from literary influence and from social, cultural, and historical circumstances. Classes and readings in English. Prerequisites: previous 100-level course(s). Permission given after first class

HISP 1100A. Ethnicity in Nineteenth-Century Latin America.
Nineteenth-century notions of progress were complicated by the cultural heterogeneity of Latin American societies. We examine how 19th-century intellectuals struggled with this question by looking at the Gauchos of Argentina, the indigenous people of Peru and Africans in Cuba. Readings include canonical texts as well as the voices of these socially marginalized ethnicities.

HISP 1210A. Judeo-Spanish Literature and Culture.
Focuses on Judeo-Spanish literature from the 10th century to the first years of the Spanish Jewish diaspora (end of the 15th century). Poetry and narrative are read as works of moral instruction rooted in traditional modes of art and thought. Considers also the preservation of Judeo-Spanish culture in the Sephardic diaspora through ballads and songs recorded from oral traditions.

HISP 1210B. Muslims, Jews, and Christians in Medieval Spain.
We will examine through literature and history how Muslims, Christians and Jews once lived together creating a hybrid flowering culture. From the splendor of Cordoba, the caliphate capital of Al-Andalus in the 10th century, until 1492 when the Catholic Monarchs conquered Granada, Spain’s last Muslim kingdom, forced Jews to convert or emigrate, and dispatched Christopher Columbus to the New World. Spain’s Muslims, Christians, and Jews forged a golden age of culture. We will study this multicultural civilization that changed the West forever.

HISP 1210C. History of the Spanish Language. Introduction to the genealogy and development of the Spanish language. Includes the historical and cultural events that deeply influenced the shaping of the language, the nature of Medieval Spanish, and the development of the language beyond the Iberian Peninsula, especially in the Americas. This course will make the history of Spanish accessible to anyone with a knowledge of Spanish and a readiness to grasp basic linguistic concepts.

HISP 1210D. Literary Relations Between Muslims, Christians and Jews From the 10th Through the 15th Centuries.
This course examines Jewish-Christian-Muslim interactions as a Hispano-Medieval paradigm of cultural creativity. Examples are drawn from moxajjas, Hispano-Jewish poetry, the Spanish epic, the short story tradition, medieval didactic, historical chronicles, Marian miracles by Gonzalo de Berceo and Alfonso X, polemical writings, and the Sephardic romancero. Prerequisite: HISP 0730 or 0740 or placement exam required

HISP 1240A. Fashion and the Fictions of Identity in Early Modern Spain.
In the early modern period, styles of clothing and fabrics were meant to provide visible markers of status, gender, ethnicity, and nationality. Yet, as dramatists, novelists, and poets were keenly aware, clothing could conceal as much as reveal. It could trick the eye and seduce it. It could blur hierarchies of difference even as it constructed them. In other words, clothing often created fictions of identity, and fiction itself frequently made clothing the focus of action and thematic exploration. The purpose of this course is to trace the connections between fashion and fiction in a period of Spanish history of unprecedented social and economic change. Close readings of literary texts will be complemented by studies of visual sources (e.g., portraits and cityscapes), as well as samples of legislation and moral debates related to fashion. Prerequisite: HISP 0730 or 0740

HISP 1240B. Don Quijote and the Making of the Modern Novel. A detailed and analytical study of Cervantes’ masterpiece within an aesthetic and historical framework.

HISP 1240C. Golden Age Short Stories.
We will examine the spatial itinerary of main literary figures (the picaro or rogue, the morisco, the soldier, the courtesan, the witch, the indiano) and the spaces they inhabited in Spain’s short stories throughout the 16th and 17th centuries. Violence, sexual transgression, and social conflicts are themes of inquiry. Emphasis on Cervantes’ *Novelas ejemplares*.

HISP 1240D. Language, Honor, and Society in Golden Age Theater.
The canonical dramatic texts of the Spanish Golden Age—from Lope’s El *caballero de Olmedo* and El castigo sin venganza to Tirso’s El *burlador de Sevilla* and Calderón’s *La vida es sueño*—are opened to new critical inquiry. The role of language in the dramatic text, the construction of characters, social and moral discourses (justice versus revenge; reality versus dreams; courtly love versus jealousy; chastity versus incest) are at issue. Each play is studied in relation to the writer’s worldview and as metaphors of power in crisis.

HISP 1240E. Love and Eroticism in Golden Age Spanish Literature.
Platonic, carnal, epicurean, erotic, mystic, and friendly love are extensively presented in Golden Age Spanish literature, in different genres (drama, prose, poetry) and within various traditions and forms of expression. This course discusses a wide spectrum of texts and authors-mainly Garcilaso, Cervantes, Tirso de Molina, Lope de Vega, San Juan de la Cruz, and Vélez de Guevara.

HISP 1240F. Marginal Spaces in Golden Age Short Stories.
Seeks to examine two main literary subgenres: *loci* (churches, squares, palaces); daily spaces (streets, roads); religious
spaces (convents) and profane ones corral de comedias. There is also the frontier as mythical space/s. We will scrutinize the representation of space as cultural artifact and as a sign of identity.

**HISP 1240G. Metaphors of Power and of Political Crisis: Golden Age Spanish Theater.**

Golden Age Spanish theater will be studied as a representation of the political crisis of its time. Social classes, economic and historical changes, characterization, language and dramatic structures will be seen as metaphors of power in crisis.

**HISP 1240H. Spanish Golden Age Stories.**

Carefully scrutinizes various narrative models of the Golden Age: picaresque, Moorish, sentimental, and exemplary. Includes well-known works (Lazarillo, Cervantes' Colloquio de los perros) as well as other related writings. Emphasis on social, historical, and genre issues.

**HISP 1240I. Honor: Cultural and Literary Anthropology in Hispanic Letters.**

Every culture is a composite body of values, beliefs, myths and forms of behavior and customs. Since its very beginnings, the Spanish has been characterized by a profound sense of reverence and/ or disdain towards the Other based upon social interrelations among individuals, families, social groups and hierarchies. The interrelationship between language, honor and society will serve as the central focus.

**HISP 1240K. Spanish Short Stories: Cervantes' Exemplary Novels and the Emerging of Narrative Forms.**

The course will explore from the novelistic prose to the erotic fiction. Other topics: the intricate relationship between history and fiction, and the narrative voice of dissent, resistance and marginality.

**HISP 1240L. Cervantes and Don Quijote in the Context of Golden Age Spain.**

This course seeks to understand the first part of Don Quijote (1605) within the context of the social, literary and political contexts from which it sprang. We will undertake a close reading of the 1605 text supplemented by secondary readings that focus on such topics as the vogue for the romances of chivalry, the role of the oppressed in Spanish Society in the novel and in Cervantes’ Spain, the place of books and reading in Golden Age Spain, etc. The point of departure for the course will be an in-depth consideration of Marcelin Defourneaux's book, Daily Life in Spain in the Golden Age (Stanford UP, latest).

**HISP 1250A. Madrid: History and Culture.**

This course explores cultural production and about Madrid during key moments of the city’s history from its establishment as the capital of imperial Spain in the 16th century through its reinvention as a major international tourist destination in the late 20th. Multimedia in orientation, the course draws on representations of the Spanish capital in literature, painting, photography, maps, music, and film. Topics include: self-invention in the court city, modernization and its discontents, Madrid and Spanishness, provincialism versus internationalism. Prerequisite: HISP 0730 or 0740.

**HISP 1260A. Adultery in Nineteenth-Century Spanish Literature.**

Adulterous women and their lovers have always figured prominently in Spanish literature. With the rise of the bourgeoisie in the 19th century and its cultural, sexual, and economic preoccupations, the topic becomes central to modern sensibility. We examine the cultural, aesthetic, and economic treatment given to this figure by the major novelists and playwrights of the period, including Echegaray, Galdós, and Clarín.

**HISP 1260B. The Nineteenth-Century Spanish Novel.**

Despite its origins in Don Quijote and its European prehistory, the Spanish novel appears as a new genre in the 19th century, when it works to redefine the national literary canon and elaborate a new aesthetic norm. We study its development throughout the century, from the early romantic historical novel, through the mid-century bourgeois novel, and later realism and naturalism.

**HISP 1260D. Transatlantic Crossings: Spanish and Spanish American Literature of the Nineteenth Century.**

After the independence of most colonies, both Spain and the new Spanish-American countries were faced with similar tasks of (re)inventing the nation, a process in which literature served a key purpose of imagination and dissemination. This course will analyze a number of parallel texts from these different traditions, to compare their handling of both ideology and literary form.

**HISP 1290A. "Reds and Fascists," Spanish Literature Under Dictatorship and Exile (1939-1975).**

Taking as a starting point the profound ideological crisis produced by the Spanish Civil War, we explore significant cultural events produced in exile as a way of keeping alive the II Republic spirit and the revival that occurred during the 1960s. Readings by Carmen Laforet, Mercè Rodoreda, Max Aub, Camilo José Cela, Antonio Bueno Vallejo, Juan Goytisolo, Juan Marsé, Carmen Martín Gaite.

**HISP 1290B. Almodóvar to from Tijuana.**

This course closely analyzes recent developments in Spanish and Mexican film and its particularities paying special attention to its historical roots and evolution to the present. Special attention will be devoted to figures such as Luis Buñuel and Pedro Almodóvar. Topics include: Surrealism and film, censorship, representations of gender, the postmodern turn.

**HISP 1290C. Art and Literature.**

The interaction between the arts plays a significant role in 20th-century aesthetics. We discuss from a theoretical and analytical perspective, among others, Picasso and Dalí as writers (and painters), or García Lorca as painter (and writer). We also pay special attention to other cases such as the museum as revered space, and the impact of film on literature.

**HISP 1290D. Contra Franco vivíamos mejor? Literature and Culture of the Spanish Dictatorship (1939-1975).**

The end of the Spanish Civil War inaugurated one of the longest dictatorships of the twentieth century. This course will examine the literature and popular culture produced in the peninsula during that period — both the "official" culture allowed and sponsored by the Franco regime, and the voices of resistance that attempted to present alternative political views against a background of repression and censorship.

**HISP 1290E. Crime and Detection in Modern Spanish Fiction.**

XIXth-century urban societies generated unprecedented criminality, as well as sociological, scientific, legislative, journalistic, and literary discourses about it. From realism through postmodernism and recent popular culture, we will explore how these discourses appear in Spain through the present, and how the figures of the criminal and the detective permeate narrative modes from the short story and the novel to television and film.

**HISP 1290F. Entre todas las mujeres: Women Writers of Modern and Contemporary Spain.**

In Spain, organized feminism is a relatively late (20th-century) development, subsequently weakened further by the ideological constraints of franquismo. We will study female authors from the nineteenth century to the present to assess how women entered and fit into the literary and cultural fields, how they changed them, what they wrote about and how it expanded the Spanish literary repertoire.

**HISP 1290G. Generación del ’98.**

To what extent does a national crisis, the Spanish defeat of 1898 by the United States, provoke a movement of patriotic revaluation, the so-called "Generation of ’98"? Or are the symptoms of crisis more in accord with fin de siècle aesthetics, which incites literary experimentation in all the traditional genres? These crucial questions will be studied in such typical authors as Unamuno, Baroja, Azorín, Antonio Machado, and Ramón del Valle-Inclán.

**HISP 1290H. In Your Face: Buñel and Almodóvar.**

This course closely analyzes the development of Spanish film and its particularities paying special attention to two major figures of its cinema, Luis Buñuel and Pedro Almodóvar. Topics include: Surrealism and film, censorship, representations of gender, and the postmodern turn.

**HISP 1290I. Spanish Women Writers of the Twentieth Century.**

Scholars of Spanish history and literature have observed that unlike England or the U.S., in Spain organized feminism appears as a later development in the twentieth-century, and is subsequently limited by the ideological constraints of the Franco dictatorship. Against this historical background we will study the character and significance of the work of nineteenth and twentieth century writers who must reckon with their own self-definition as women and with the possibilities of living their gender as...
they assume the traditionally masculine literary profession. Among those studied will be Rosalía de Castro, Emilia Pardo Bazán, Rosa Chacel, Carmen Lafuente, Merce Rodoreda, Esther Tusquets, and other recent narrators.

**HISP 1290J. The Making of Pedro Almodóvar.**

Spanish film has experienced a complete total renewal since Franco’s death. In this course, we analyze recent developments in Spanish film paying special attention at the way film directors have exploited a very rich and well-established literary tradition from Luis G. Berlanga and Carlos Saura, to Víctor Erice and Pedro Almodóvar.

**HISP 1290K. The Spanish Novel since 1975.**

In 1975, the death of General Francisco Franco opened the door to a new democratic Spain. In the novel, the social and political novelties generated a change both thematic and formal. This course pays attention to issues such as the diverse genres that have gained strength, such as the groups that have acquired a literary voice, and the portrayal of current preoccupations.

**HISP 1290L. Wild at Heart: Hispanic Avant-Garde.**

An exploration of modernity in Spain, between 1909 and 1939, through literary texts, paintings, and film. We will pay special attention to the similarities and differences between Spain and Europe. Readings will include: Miguel de Unamuno, Federico García Lorca, Ramón Gómez de la Serna, Vincente Huidobro, César Vallejo, Rafael Alberti, Luis Buñuel, Guillermo de Torre, Salvador Dalí, Pablo Picasso.

**HISP 1290M. Literature of Dissent: Spaniards Against Spain.**

Este curso persigue dos objetivos: 1) comprobar cómo el arte ha servido a menudo de refugio para expresar lo prohibido, y 2) cómo la literatura está totalmente conectada con una realidad social. Esto permitirá estudiar el arte y la literatura hispánica a lo largo de los siglos. Textos de Mercé Rodoreda, R. P. Rez de Ayala, Federico García Lorca, Miguel Hernández, Dámaso Alonso, Gabriel Celaya, Blas de Otero, Pedro Gimferrer, Pedro Almodóvar.

**HISP 1290N. Novela Peninsular.**

This course explores new literary topics and the new reality of the contemporary Spanish society and culture through a selection of six new novels from the last decade and six new films also, as paradigms of new kinds of fiction form.

**HISP 1290O. Subjectivity, Writing and Social Space in Spanish Literary Modernity (1770-1920).**

A discussion of Modernity in Spanish literature through the analysis of subjectivity, social space, and the multiplicity of literary styles and movements. This course will explore the romantic imagination, the poetics of realism and modernism vis-a-vis some key representations of modern subjectivity: the rebellious character, the bourgeois, the bureaucrat, civil servant, the angel of the house, the feminist and the decadent.

**HISP 1290P. Federico García Lorca, 1898-1936.**

Federico García Lorca (1898-1936) embodies Spanish Modernity. While his innovative poetry and drama established him as a crucial figure in the 20th Century Spanish cultural landscape, his brutal murder by Fascist supporters at the beginning of the Civil War made of him a symbol of the lost freedom. This course will study his artistic evolution: from his youth in Granada, and his studies in Madrid—where he met and befriended filmmaker Luis Buñuel and painter Salvador Dalí— to his trip to New York and Latin America. The focus of the course will be the study of his poetry, theatre, and essays, but will also explore both the construction of the Lorca myth, and the period of cultural splendor that is encapsulated in his biographical dates: from the loss of the empire in 1898, to the beginning of the Civil War in the summer of 1936.

**HISP 1290Q. El Quijote desde el siglo XXI: lecturas modernas y postmodernas.**

Se propone una lectura a fondo del Quijote teniendo en cuenta la recepción que la novela ha tenido en la Modernidad y la Postmodernidad, en particular por parte de los mismos novelistas. Enrollment limited to 20.

**HISP 1290R. Novela y cine en la España democrática.**

A partir de la lectura y visionado de algunas novelas y películas fundamentales se discutirá la imagen de la España democrática en la ficción literaria y cinematográfica. Enrollment limited to 20.

**HISP 1290S. Federico García Lorca in all Genres.**

Federico García Lorca was not only a lyrical poet and a dramatist, but also a remarkable musician, painter, and lecturer. One aim of this course is to introduce Lorca’s world through these art forms and their mutual relationship, including also a wide range of music (flamenco, jazz, rock, contemporary), theater and film generated by García Lorca’s work. We will read, hear, see and analyze some of these elements. Prerequisite: HISP 0730 or 0740.

This course will focus on a selection of new Spanish authors from this period of intense creativity and innovation, our course intends to bring a lively image of the new novel, discussing forms, styles, and interactions with other arts and means of communication. We will also relate these novels to Spanish and International new realties as well as to aesthetic and intellectual global trends, specially Latin American, American and European. Prerequisite: HISP 0730 or 0740.

**HISP 1330A. Bodies of Resistance.**

An exploration of sexuality in 19th and 20th century Latin American poetry, fiction and prose. Specifically, we examine how sublimated, vilified or denigrated bodies and sexualities may be read as sites of cultural and political resistance. Topics include: Romanticism and sublimation; Naturalist and Modernist mysogyn; contemporary gay literature and its responses to AIDS. Prerequisites: SP54, or SP53 and SP51.

**HISP 1330B. Ficciones Argentinas (Argentinian Fictions).**

This course proposes to study writers who have forged Argentinean literary tradition in the 19th and 20th centuries: Esteban Echeverria, Leopoldo Lugones, Horacio Quiroga, Jorge Luis Borges, Julio Cortázar, and various women and contemporary writers. Through examination of course topics-fiction and violence, fiction and science, the fantastic, national issues-students will become familiar with the Argentinean language, literature, and culture. Course materials include films, documentaries, CD’s, and other interactive media.

**HISP 1330C. Indigenous Literatures of Latin America.**

In este curso estudiaremos la producción literaria, mítica y legendaria de los pueblos latinoamericanos, las redes locales y escenarios globales en que se sitúa esta producción cultural popular. Nos detendremos en textos quechues, mapuches, mayas y aztecas, tanto de la tradición oral como de la escrita. Veremos también las formas híbridas, como son las criollas, negroides y mestizas. Nos interesa seguir las sagas populares, su diálogo con lo moderno, y los grandes autores que han formalizado la conciencia étnica y la política plurinacional. Veremos también documentales y películas que interpreten el mundo indígena.

**HISP 1330D. Patriots, Rogues, and Lovers.**

Nineteenth-century Spanish American writers were committed to educating their readers, yet they delighted in entertaining them with melodrama. We critically examine patriotic novels and stories with a focus on tales of love and/or adventure. We consider the breakdown of this trend in the first quarter of the 20th century as well as feminist critiques of it.

**HISP 1330E. Rediscovering New Worlds: The Conquest of the Americas in Contemporary Literature and Film.**

Studies the problematic relation between truth and falsehood, history and fiction, in a broad range of works on the Conquest. We draw from witnesses like Columbus, Cabeza de Vaca, Carvajal, and Lefy to interpret novels like Carpenter’s El arpa y la sombra, Posse’s El largo atardecer del camino, and Saer’s El entendido, as well as films like Herzog’s Aguirre, Joffé’s The Mission, and Dreamwork’s The Road to Eldorado.

**HISP 1330F. The Nineteenth-Century Crisis of Modernity.**

The late nineteenth-century witnessed the intensification of dependent capitalism in Latin America, bringing with it the growth of the city, class tensions and a sense of alienation among artists. We explore how two different movements, Modernismo and Naturalism, framed social criticism. Topics include representations of the middle class, flights of fancy, prostitution, and biological determinism.

**HISP 1330G. The Mexican Revolution: Film and Literature.**

The Mexican Revolution is a powerful wellspring of myth and contradiction that has defined Mexico until the present. We focus on the "Golden Age" of Mexican film and its treatment of the Revolution, as well as essays.
novels and oral traditions. We also explore the reformation of the Revolution in Chicano culture and in the current Zapatista movement.

**HISP 1330H. Transatlantic Colonial Encounters**
Studies foundational accounts of the ‘discovery,’ conquest, and colonization of the Americas. We will address their status as ‘historical’ works and, particularly, their problematic representation of indigenous peoples. In addition, we will consider their impact not only on Golden Age literature, but also on contemporary mass culture - from travel advertising and adventure game shows, to Hollywood and Disney

**HISP 1330. Venezuelan and Caribbean Short Story and Popular Culture**
This course will focus on the Venezuelan and Caribbean short story and popular culture. Texts and authors will be discussed in the modernization framework, including such topics as the rural and the city, migration, ethnicity, and the popular arts.

**HISP 1330J. Wordscapes of Colonial Spanish America: Nature and City**
An introduction to 16th and 17th century Spanish American letters through examination of place - from paradisical landscapes to spectacular cityscapes - and its configuration in colonial writings. Special attention to Mexico and its historiography. Authors may include: Columbus, Cortés, Cabeza de Vaca, Las Casas, Inca Garcilaso, Sor Juana. Readings in Spanish

**HISP 1330K. Contemporary Poetry of Latin America**
An exploration of some representative poets and movements in modern Latin American poetry, with special emphasis on the Latin American Modernists, the Avant-Garde and contemporary trends. Topics include: analytical techniques, historicity, poetry and translation, and a creative writing workshop. For advanced students only. Prerequisites: HISP 0740, or HISP 0600 and HISP 0730. Previous experience in 1000-level Spanish courses desirable.

**HISP 1330L. Discovery and Conquest in Contemporary Fiction and Film**
Studies today’s visions of the encounter between the Old and New Worlds - from Columbus’s exploration of the Caribbean to Lope de Aguirre’s demented rebellion against Spain after the fall of the Inca empire. We consider the interaction between original testimonies and recent works like Carpenter’s *El arpa y la sombra*, Carmen Bouillosa’s *Son Vacas, somos puerco*, Werner Herzog’s *Aguirre: The Wrath of God*, Dreamwork’s animation *The Road to El Dorado*, and Mel Gibson’s *Apocalypto*. Prerequisite: HISP 0740 or HISP 0730.

**HISP 1330M. Modern Atlantic Urban Cultures and Literatures of Latin America**
The Atlantic was the first link between Europe, Africa and Latin America. Goods, slaves, travelers and ideas passed back and forth, shaping the understanding of nature and societies on both sides of the ocean. In this seminar we will focus on the life and literature of three cities of the Atlantic -Buenos Aires, Rio de Janeiro, Montevideo- at the time of their modernization, in some of their relations with European cities and cultures. From Sarmiento, Cambacerés and Machado de Assis to Oliverio Girondo, Borges and Oneal: living styles, urban landscapes and technologies, material and textual forms of the cultures of the East side of the continent between 1870 and 1930.

**HISP 1330N. All the World a Stage: The Early Transatlantic Encounter in Golden Age Theater**
Studies the transformation of historical accounts about the Spanish discovery and conquest of the Americas in the work of major playwrights of the Spanish Golden Age. Students will be asked to consider the complex transactions between historicity and poetics in the works of authors such as Lope de Vega, Calderón, Tirso de Molina and the Indies chroniclers.

**HISP 1330O. La esclavitud en América Latina**
narraciones y naciones afro-hispiánicas (Historia cultural atlántica de la trata en español. Testimonios, documentos históricos y jurídicos, debates, literatura popular y negrera. Restringido a 20 estudiantes.

**HISP 1330P. The Philosophy of Borges**
Jorge Luis Borges devoted several essays during his youth to developing his philosophical understanding of concepts like “personality,” “memory,” “reality,” “narrative” and “style.” At some point later in his literary career, he attempted to erase the memory of those years from his public existence, to the extent that most of the books published during the 1920s were never reprinted during Borges’ lifetime. Nevertheless, it was in those years that he developed the entire philosophical grounding of his future literary work. We will work to decipher Borges’ philosophy through the reading and interpretation of his essays, narratives and poems, including several key texts from his first three suppressed prose volumes (Inquisiciones, El tamaño de mi esperanza, and El idioma de los argentinos). In English, with some Spanish readings. Prerequisite: HISP 0730 or 0740.

**HISP 1330Q. Formas breves**
This course will study masterworks in Spanish through the lens of the “short form”: poems, short stories, novellas, and micro-stories. Our readings will be transhistorical and trans-Atlantic, ranging from early modern Iberian poetic forms, through Romantic, modernista, and avant-garde experiments in Spain and Latin America, to long, short, and even shorter stories from contemporary Argentina, Chile, Mexico, and Peru. Authors will include Francisco de Quevedo, Federico García Lorca, Pablo Neruda, Jorge Luis Borges, Julio Cortázar, Roberto Bolaño, Luisa Valenzuela, and many others. Prerequisite: HISP 0730 or 0740.

**HISP 1370A. "One Hundred Years of Solitude": Culture and Politics in García Márquez’s Work**
This course will focus on García Márquez’s masterpiece in order to analyze its modes of representation, discursive strategies, and fictional construction as well as its interactions with history, politics, and literary and popular traditions. Other related work by the Colombian Nobel Prize winner will be discussed, as will his journalistic pieces and movies. The novel may be read in Spanish or English; discussion will be mainly in Spanish.

**HISP 1370B. Gaborium: memoria, novela y lectura en la obra de García Márquez**
A partir de los distintos modelos de leer (fábula, mito, historia, leyenda, periodismo, política, memorias) que Gabriel García Márquez emplea en sus relatos, estudiaremos las representaciones de esos relatos desarrollan, los relatos que suponen, los lectores que convocan, y las interpretaciones que disputan. Desde esta saga narrativa analizaremos la historia cultural de América Latina, sus ciclos de abundancia, crisis, y promesas del porvenir.

**HISP 1370C. El sueño de la Razón: El cine de Luis Buñuel**
Una revisión contemporánea de la obra cinematográfica de Luis Buñuel, teniendo en cuenta los planteamientos más recientes sobre el más importante cineasta español de la historia y los distintos periodos, nacionales e internacionales, de su producción artística. A lo largo del curso se proyectarán y discutirán las películas más representativas del autor, desde Un perro andaluz hasta Ese obscuro objeto de deseo, con la intención de esclarecer las claves generales de su cine y detectar la singular aportación de Buñuel a un arte que probablemente no ha superado todavía sus desafíos, postulados y logros en cuestiones como la religión, la política, la vida social, la sexualidad, el deseo, etc.

**HISP 1370E. La creatividad en América Latina**
Varias teorías actuales sobre la creatividad se ilustran muy bien con relatos, poemas, películas, música y arte de América Latina gracias a su adaptación de materiales, diversidad de formas, y gusto por la mezcla. Revisaremos las poéticas del dadaísmo, el surrealismo, la literatura fantástica, el realismo mágico, la biografía imaginaria, el utopismo, y el juego verbal. La clase será visitada por algunos autores para discutir sus procesos creativos.

**HISP 1370F. Modernity and Memory in Latin America**
Contemporary cultural history proposes that memory is not an archive or a museum of history but a past evoked to amplify the present. We examine the rewriting and transformation of history in texts that illustrate issues of tradition/modernity, countryside/culture, center/margins, migration/exile, feminine/masculine, and popular culture/media culture.

**HISP 1370G. Puerto Rican Literature: Uses and Representations of "Popular Culture"**
Examines and questions the multiple representations of Puerto Rican popular culture within the contemporary Puerto Rican literary canon.
Topics constantly undertaken in the literature include race, gender, language, and national identity. Surveys major texts to rethink what constitutes "literature" in a Caribbean nation such as Puerto Rico and what kinds of discourse are decisive in naming a Puerto Rican identity. Also contributes to a broader knowledge of the complex relationships of a Latin American culture.

**HISP 1370H. Puerto Rico: Literatura, Sociedad y Cultura.**

Situated on the threshold of different histories and political tensions, Puerto Rican culture is a crucial place for a discussion of how a "national literature" comes into being. This course examines the founding metaphors and texts of contemporary Puerto Rican literary canon, focusing on critical issues such as the relationship between history and fiction, "popular culture," and the emergence of a literature in exile.

**HISP 1370J. Theatre and Society in Venezuela.**

Explores cultural representations in central works of contemporary Venezuelan theatre, with special attention to the implicit and explicit presentation of ideology and to the variety of styles in avant-garde and post avant-garde modes.

**HISP 1370K. Literatura latinoamericana del siglo XXI.**

Dedicated to recent authors and texts from the Hispanic world, this course will explore the new trends, debates, and ideas shaping fiction in Spanish. We will pay special attention to narratives of exploration and innovation, family sagas and national melodramas, migration and internationalization.

**HISP 1370L. Gabriel García Marquez and the Politics of Magic Realism.**

Estudiaremos las principales novelas del autor, desde El coronel no tiene quien le escriba hasta Cien años de soledad, con especial atención al realismo mágico y las ideas sobre la novela que cultivó el autor. Nuestra discusión se situará en el proceso social y político latinoamericano así como en las mitologías de la cultura popular. Prerequisite: HISP 0730 or 0740.

**HISP 1370M. Tango: Its Origins and Development (1880-1935).**

In this course we will read and interpret tango considering both its music and its lyrics. The main goal of the seminar is to get at first-hand the atmosphere and the nostalgic rhythm of this frequently misunderstood cultural expression. We will approach the urban atmosphere that provided the context for these lyrics and dancing. "Lunfardo" language will be considered, as well as a number of old lyrics and forgotten essays and articles on the subject. Images and music are a central resource for this course. Readings include Rossi, Borges, Matamoros, Ulla, and music by Gardel, Magaldi, Corsini and others.

**HISP 1370N. Carlos Fuentes y Nueva Narrativa Mexicana.**

Dedicated al estudio de sus cuentos, novelas y ensayos en relación a la literatura fantástica, el relato político, la historia cultural y la innovación literaria.

**HISP 1370O. Private Life and Literature in Latin America.**

Literature is one of the most productive ways of approaching intimate and private life, and Latin America has not been an exception. From Naturalist writers and Positivist essayist defiantly describing sex at the end of 19th century, to the works of 21st century novelists and poets, the other side of the public and political life will be explored in this seminar. Texts by Cambaceres, Herrera y Reissig, Ramos Mejía, Gómez Carrillo, Silva Vila, José Asunción Silva, Julio Ramón Ribeyro, César Aira, Roberto Bolaño.

**HISP 1370P. Contemporary Cuban Literature and Visual Culture.**

In this course we will read novels, short stories, essays and poetry; examine art work, performances and blogs, and watch films produced in Cuba or in the Cuban diaspora during the "Special Period." or since the 1990s. Authors, filmmakers and artists may include Ena Lucía Portela, Juan Carlos Tabío, Fernando Pérez, Carlos Garaicoa, Belkis Ayán, Antonio José Ponte, Pedro Juan Gutiérrez, Iván de la Nuez, Reina María Rodríguez, Víctor Fowler, Antón Arrufat, Ana Lydia Vega Sergova, Jesús Díaz, Zoé Valdés.

**HISP 1370Q. Caribbean Messianisms and Utopias.**

This course explores messianic and utopian thought in and about the Caribbean, broadly construed. We will pair a range of literary and historical readings with philosophical considerations of messianism’s and utopia’s relation to politics and time. Texts may include Columbus’s diaries, Vargas Llosa’s La guerra del fin del mundo; Carpenter’s El reino de este mundo; a novel about Dominican cult leader Oliviero Mateo; literature and films from the Cuban Revolution and the classic novel la nueva revolución by salseros-turned-pentacostalists Richie Ray and Bobbie Cruz. Prerequisite: HISP 0740, or both HISP 0730 and 0750, or instructor permission. Taught in Spanish.

**HISP 1370R. Peruvian Literature: Historical Memory and Human Rights.**

Este curso busca explorar las representaciones de la violencia y la "guerra sucia" en la reciente literatura peruana. Estudiaremos un conjunto de novelas, testimonios de las víctimas de la violencia, y teatro sobre los derechos humanos. Nos interesa analizar el debate sobre la conciencia jurídica, las migraciones y el lenguaje popular, así como los nuevos agentes sociales, y las nuevas formas de expresión y negociación cultural. Estudiaremos novelas, películas y obras de teatro, fotografías y arte plásticas.

**HISP 1370S. Tango: A Forgotten History Revealed.**

Tango is the original music of the Rio de la Plata countries. It was born and it evolved in Buenos Aires and Montevideo—and other minor cities—from the 1880s on. In this course we will read and interpret tango, considering both its music and its lyrics. We will study the urban atmosphere that provided the context for these lyrics and dancing. Images and music are central resources for this course. This course is aimed at those who are interested in the culture of Latin America and the Rio de la Plata, including tango, immigration, suburban and urban cultures, and connections between literature and music. Analysis and interpretation of tango lyrics will provide an opportunity to learn and understand the "lunfardo" language, a local "rioplatense" slang widely employed by tango singers from Carlos Gardel on.

**HISP 1370T. Transatlantic Literature of the XXI Century.**

This course will explore new trends and authors from the Hispanic-Atlantic world: Spanish, Latin American and Latin narratives of migration, bilingualism, globalization and innovative forms and techniques.

**HISP 1370U. Cuba: Historia y Literatura.**

Este curso constituye un viaje literario a lo largo de la historia de Cuba, desde el siglo dieciséis hasta el presente. Nuestro objetivo central es complejizar la relación entre historiografía y ficción narrativa. Entre los textos que analizaremos se incluyen tres novelas, un testimonio, una docena de cuentos y un número similar de ensayos y poemas.

**HISP 1370V. Mujeres Malas.**

Este curso está dedicado a investigar las representaciones literarias de la mujer en la sociedad patriarcal. Esas versiones de la mujer nos permitirán estudiar la ideología tradicional pero también los conflictos modernos en la construcción de roles y funciones de género.

**HISP 1370W. Política y cultura de la transición.**

Este curso discute literatures y contextos de "transición" as the social and cultural mechanisms by which a country or region moves from tradition to modernity, from the rural to urban, and from authoritarian regimes to democracy. We will also analyze the role of borders, social spaces, mapping and networks in the stories and sagas of migration. Prerequisite: HISP 0730 or 0740.

**HISP 1370A. El amor en español.**

A través de textos, ideas, y personajes característicos estudiaremos tanto los valores y emociones del diálogo amoroso como su retórica. Después del amor platónico, barroco, romántico y surrealista, nos dedicaremos a "Carmen" y a Veinte poemas de amor de Neruda. Leeremos Del amor y otros demonios de García Márquez, Mujeres de ojos grandes de Mastretta, Aura de Fuentes y otros textos españoles y latinoamericanos.

**HISP 1370B. El imaginario de los derechos humanos.**

Brown Center for Latin American Studies will dedicate the semester to Human Rights in Latin America. This course will focus on the narratives (testimonies, short-stories, plays, films, and novels) dedicated to the "dirty war" in Argentina, "desaparecidos" in Chile, and subversion and repression...
HISP 1500C. Images of the City: Barcelona through Literature and Art

In this course we will investigate three interrelated topics: the organization of city life in specific spaces, urban literature, and contemporary art. Focusing on the organization and uses of space, and offering Barcelona as a paradigm for the process of urban growth into Modernity, we will study the development of the modern city and its impact on film, art, and literature in Colombia and Peru. We will study new cultural answers to violence, networks of migration, and politics of interpretation.

HISP 1500D. Persuasion: The Epistolary Form in Hispanic Letters

In works as diverse as New World chronicles to the Spanish throne and novels that probe the heart and psyche, Hispanic writers have used letters to recount voyages of discovery and self-analysis, to persuade, cajole, and seduce. This course traces the versatility of the epistolary form and its rhetorical strategies across genres, centuries, and continents. We will begin with a 20th-century epistolary novel by the Mexican writer Elena Poniatowska, and then jetison back to Spain and 1492 to begin a chronological and transcontinental examination of diverse letter-based texts by Diego de San Pedro, Columbus, Sor Juana Inés de la Cruz, José Cadalso, Gertrudis Gómez de Avellaneda, Gustavo Adolfo Bécquer, Juan Valera, Benito Pérez Galdós, Horacio Quiroga, Julio Cortázar, Gabriel García Márquez, Manuel Puig, and Carme Riera. Along the way, we will raise questions not only about the form and function of letters, but also about the social contexts that condition their production.

HISP 1500E. The Poetics of Pleasure and Pain in Spanish Literature

Spanish life is rooted in ancient rituals, bodily expression, and cultural prejudices that have been treated in literature in very distinctive ways: seductive poetry, picaresque aggression, Romantic seduction, and modernist visual gravitation. We explore the poetics of pain and pleasure in authors from the 15th to the 20th centuries, including Rojas, Santa Teresa, Cervantes, Zayas, Zorrilla, Clarín, Lorca, Cela, and Goytisolo.

HISP 1500F. Eccentric Voices: Tradition and Change in Contemporary Catalan Culture

This course will examine a number of issues in contemporary Catalan culture from a double perspective: examining conflicts between tradition and change; and, also tensions between center and periphery. We will explore the outcome of the concept of marginality on a diversity of fields: geography, identity construction, borders between literary genres, and the definition of culture. Readings will include contemporary literature (novels, plays, poetry) and film. Taught in Spanish.

HISP 1500G. Intersections: Catalan Art and Literature

This course focuses on major cases of "intersection" between Catalan Literature and the Arts as represented in a selected number of works of art, literature, and film in contemporary texts, and the ways in which they are influenced by the historical, philosophical, political, and musical ideas of the period when these works were produced. We will analyze works by Maragall, Gimferrer, Picasso, Miró Dali, Max Aubs, Pere Portobella.

HISP 1500H. Polis and Demos: Borders, Conflicts, and Sociopolitical Paradoxes

Delving into the long personal political experience of the professor and starting with the analysis Aeschylus' Oresteia, we will discuss several contemporary conflicts and paradoxes which can be detected in current political discourses (city, nation, Europe-Catalonia), and in other more specific discourses such as immigration, minorities, genetic engineering, biotechnology, gender, colonization, diets, terrorism, prostitution, etc. Taught in Spanish.

HISP 1500L. The Power of Communication: Journalism and Manipulation of the Truth in Europe and the U.S.A.

This course centers, fundamentally, on the relations between the practice of journalism, the property of mass communication companies, and the repercussions on the quality of information: freedom of expression, pluralism, public and citizen's journalism, etc. With a participatory and open dynamic, we will part from the analysis of journalistic texts--basically European, Spanish, and Catalan-- audiovisual documents and full-length films that will permit us to frame each of the proposed themes of the course. Prerequisite: HISP 0730.

HISP 1500J. Contemporary Peninsular Narratives in Non-Castilian Language

The contemporary literature in Spain is not only expressed in the Castilian language. This course desires to approach the abundant and diverse reality (not exempt of topics, nor tensions) of the linguistic plurality in modern Spain, and it does it through contempor ary narrative in Galician, Basque, Asturian and Catalan of some emblematic and recognized authors, as well as a series of brief "letters" in poetry or the literary sociology of four languages and literatures (or in other words, of four cultures) that if we only focus on the criteria of the number of speakers they could be considered minor. Prerequisite: HISP 0730 or 0740.

HISP 1500K. Representations of Barcelona

This class proposes an analysis of the diverse processes in the construction of the identity through the urban culture and the aspects linked to it: literature, art, architecture, sports, and politics... Everything applied to one specific case: the city of Barcelona. Utilizing diverse materials (books, movies, guides, publicity) we will revise the representations (iconographic and discursive) of a 'bimilenaria' city centered in the period of modernity until the strictest actuality. Prerequisite: HISP 0730 or 0740.

HISP 1700. Stylistics and Linguistics: El cuento en América Latina (Taller de Crítica)

Este curso está dedicado a estudiar el lenguaje literario y sus estilos en los relatos orales, leyendas y mitos, así como cuentos y microrelatos, de narradores fundamentales en este género: Quiroga, Borges, Rufo, Cortázar, Arreola, Monterroso, Ribeypo, Ampuero, y autors más recientes. El análisis será formal y metódico, y estudiaremos el funcionamiento del estilo y la lengua literaria para ejercitarnos en la creatividad del español.

HISP 1900A. Ethnicity.

We explore the notion of ethnic difference in Hispanic cultural production across periods, movements, media and continents. Possible topics include: the concept of the "other", gender and ethnicity, violence and marginality, ethnic nationalism(s), exoticism and racism. We begin with theoretical and methodological considerations before proceeding with case studies from all periods. Senior concentrators only.

HISP 1900B. Literature and the Empire.

No description available.

HISP 1900C. Muslims and Jews Between the Old and New World.

No description available.

HISP 1900D. Transatlantic Explorations: Intercultural Dialogue Between Spain and Latin America.

Required of all concentrators in Hispanic studies in their junior or senior year, after they have completed 100-level courses in the department; other students may take the course with written permission. A proseminar covering topics of broad relevance to all Hispanic literatures and cultures. Several faculty contribute to the seminar; each student develops and presents a final project on an intercultural topic.

HISP 1900E. Voices of Dissent.

No description available.

HISP 1900F. Spanish Myths and Icons.

The Spanish culture has often been identified through the centuries by certain myths and icons which reveal a mode of thinking, of behavior and of social status. Such is the case of the go-between (la Celestina, the picaro who lives in the margins of society and becomes its major critic (Lazarillo)), or the figure of don Juan, The objective of this course is to study in depth these signs of identity and their rich literary and cultural tradition. Lectures and discussion groups will be conducted in Spanish.

HISP 1900G. Identities, Regions and Nationalities.

Spain and Latin America have a rich and complex process of national formation. It was based on regional conflicts and negotiations. Modern literature documents this process in novels and essays. This course is intended for concentrators and senior students in Hispanic Studies.

HISP 1900L. Theories of Literature and Culture in a Hispanic Context.

Introduces key contemporary perspectives in the fields of literary and cultural theories from a transatlantic perspective. Emphases will be on definition of literature, theories of the novel and of literary genres, theories of interpretation, Latin American and Spanish theoretic perspectives like...
hybridism, "transculturation" and the theory of Baroque, and a revision of modern approaches to culture (critical theory, ecology, gender theory, post-structuralism, etc.). Spanish and Latin American texts will be used as a counterpoint to theory. Offered for senior concentrators in the Hispanic Studies department in their last semester. Readings by Carpentier, Nietzsche, Aristote, Derrida, Foucault, Deleuze, Simmel, Paz, Borges, Abram, Rama and others. Open to senior Hispanic studies concentrators

**HISP 1990. Senior Conference.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

**HISP 2010. Spanish Philology.**
Brief introduction to textual criticism and to the development of the Spanish Language. This course is divided into 10 hour segments. Only for graduate students

**HISP 2030A. Arthurian and Carolingian Romances of Medieval Iberia.**
Arthurian and Carolingian romances captured the public's imagination throughout the European Middle Ages. This course explores the theme of separation and reunion in Medieval Iberian romances: its origins, development, and success. Texts studied include Castilian adaptations of Arthurian and Carolingian romances as well as the first indigenous Spanish romances, *El Libro del caballero Zifar*, and *Amadís de Gaula*

**HISP 2030B. History and Fiction: Literature of the 15th Century.**
The goal of this course is to familiarize students with major literary works of the Fifteenth Century, and their socio-cultural background. Major works of three outstanding poets of this period (Juan de Mena, Íñigo López de Mendoza, and Jorge Manrique), satirical and historical writings, romances, (ballads sung with instrumental accompaniment), Alfonso Martínez de Toledo's *Corbacho* and Fernando de Rojas' *Celestina* will be presented in the context of the distinct cultural traditions that coexisted in Spain

**HISP 2030C. Medieval Masterpieces.**
Examines three medieval Spanish masterpieces: *Cantar de Mio Cid*, *Libro de buen amor*, and *Celestina*. Other works are read to explore lines of continuity and discontinuity in these three works and their respective genres

**HISP 2030D. Fifteenth-Century Sentimental Romances and Celestina.**
The fifteenth-century sentimental romances establish narrative innovations and a literary climate that lead inevitably to the creation of the "novel". With their insistent portrayal of the sufferings of love, romances by Padrón, Flores, San Pedro, and Rojas represent an essential step in the evolution of the modern novel

**HISP 2030E. Medieval Spanish Epic.**
A study of the medieval Spanish epic poems and narratives. This seminar will move through a series of topics or events and texts from the 10th to the 15th centuries, exploring the relation between heroic narratives and history. Four medieval cycles (Castilllan Counts, Cid, Carolingian, and anti-Carolingian) based on oral traditions will be studied and compared with their ballad congener printed in the 16th century. We will examine the different contexts and channels in which historical epic narratives were produced, consumed and transmitted

**HISP 2030F. Arthurian and Carolingian Romances of Medieval Iberia.**
This course explores major characteristics of medieval Iberian romances, with particular attention to its origin, development, and success. We will read Castilian adaptations of Arthurian and Carolingian romances (*Historia de la linda Melosina*, *Florer y Blancafior, Berta de los pies grandes*, and *Mocedades de Carlomango [Mainete]*) as well as the first indigenous Spanish romance *El Libro del caballero Zifar*, and the artistically successful and widely influential *Amadís de Gaula*

**HISP 2030G. Mester de clerecia.**
This course will focus on different works of "mester de clerecia" from the 13th and 14th centuries, and provide an overview of current thinking regarding their nature and origin, while at the same time seeking to interrogate many of the prevailing assumptions and received ideas of Spanish literary historiography. Works and topics will include: *Libro de Alexandre* (ideologies of power), *Libro de Apolonio* (the intellectual hero), Barcoo's works (hagiography, clerical poetry, the rise of literacy), *Poesia* / *Libro de Fernán González* (epic hero), and *Libro de buen amor* (seduction manual/spiritual guide)

**HISP 2100. Literary Theory and its Relation to Hispanic Studies.**
Provides a basic theoretical foundation in matters relating to the literary act and system (representation, literary change, conceptualizations), to the subject (voice, biography, readers), and to the cultural configuration (models, innovation, translation). Texts: Bakhtin, Jakobson, Lotman, Barthes, Derrida, Kristeva, De Certeau, and Eco. Cases and texts from Spain, Latin America, and their interactions. Five short papers. Seminar

**HISP 2150B. Fin de Siécle.**
Various narrative modes converge at the end of the 19th century: the beginning of the comedia nueva, the establishment of the *New Balladry*, the pastoral and Moorish novel as a genre, and the emerging of a social and political awareness manifested throughout the picaresque and the exemplary novel, the courtly and the allegorical. Topics for discussion include canonicity and periodization; genre as legacy and as an experimentation; forms of theatricality; the ideologies of gender

**HISP 2150D. Gongora's Poetry and Poetics: Breaking from Literary Conventions.**
Góngora is the greatest revolutionary of Hispanic lyric of all time. He created a style and a school still prevailing. He assimilated a poetic convention (Petrarca, Garcilaso) and, at the same time, violently destroyed it. He has been the most commented on and also the most condemned poet. The course will focus on the great books of the Gongorine corpus (*Soledades, Políptico*) and also on the parodic method that systematically carnivaleshes and deconstructs its own creations. This is the other hillside of his poetry yet to be explored

**HISP 2160A. Paradigmas heroicos del Siglo de Oro.**
Este seminario de acerca a la Edad de Oro a través de la teoría antropológica de la figura heroica, y la historiografía. Se examinan obras de varios géneros y período, analizándolas a la luz del nivel mimético del personaje principal. De interés particular será el efecto de ese nivel en la economía textual: si un texto carece de héroe, ¿qué posibilidades representativas se crean?, ¿qué efecto tiene la presencia de una heroína en la potencia heroica del personaje masculino?, ¿qué consecuencias tiene la presencia de un Otro en la economía textual? Este sistema analítico proporciona al estudiante un método con que acercarse a cualquier período imperialista

**HISP 2160B. Garcilaso's Poetics.**
Spanish poetry has known through its history two great revolutionary movements: the one formulated by Garcilaso and the other, four centuries after, by Rubén Darío. This seminar, based on a close reading of Garcilaso's works, studies the incorporation and assimilation of the Petrarchian tradition as a source of poetic renewal, consistently reappropriating his work

**HISP 2160C. Language, Honor and Society in Golden Age Theater.**
The canonical dramatic texts of the Spanish Golden Age-from Lope's *El caballero de Olmedo* and *El castigo sin venganza* to Tirso's *El burlador de Sevilla* and Calderón *La vida es sueño*-will be opened to new critical inquiry. The role of language in the dramatic text, the construction of characters' social and moral discourses (justice vs. revenge, reality vs. dreams, courtly love vs. jealousy, chastity vs. incest) will be an issue. Each play will be studied in relation to the playwright's worldview and as a metaphor of a decadent patriarchal society

**HISP 2160D. Lope and Góngora Poetry and Poetics: The Breaking of Literary Conventions.**
The course will focus on the great books of Lope de Vega *Rimas, Rimas sacras, Rimas de Tomé de Burguillos* and on Góngora's corpus *Soledades, Políptico* and also on the parodic method that systematically carnivaleshes and deconstructs its own creation *Tomé de Burguillos, Fábula de Piramo y Tisbe*. This is an aspect of Lope's and Góngora's poetry yet to be explored

**HISP 2160E. Morphologies of the Lyric "I": from Garcilaso to Lope de Vega.**
Topics include (a) *Lope de Vega's Lyric Modes*. The seminar maps out Lope de Vega's trajectory as a poet exploring crucial topics such as the biographical versus the lyrical discourses, the rhetorical fictionalization of the poetic "I" and its Petrarchian tradition, the polemics regarding the "new poetry," and Lope de Vega's misreadings of Góngora's poetry; (b) *Golden Age Literary Parodies*. Parody as a "double-coded" device will be studied in representative works of the period. Other elements of parody such as
its comic character, reader reception, its meta-fictional and intertextual aspects, and its relation to other rhetorical devices will be discussed; and (c) Lope de Vega's Myths of History, Metaphors of Power and of Political Crisis in Golden Age Theatre.

HISP 2160F. Questioning the Canon: Golden Age Theatre.
The canonical dramatic texts of the Spanish Golden Age - from Lope de Vega’s El caballero de Olmedo and El castigo sin venganza to Tirso de Molina’s El burlador de Sevilla and Calderón’s La vida es sueno will be opened to new critical inquiry. Dramatic discourse, construction of characters, social and moral issues such as justice versus revenge, reality versus dream, courtly love versus erotic love, chastity versus incest, will be at issue. Each play will also be studied in relation to its social background and as metaphors of power and political crisis.

HISP 2160G. Cervantes, Don Quixote and the Making of the Modern Novel.
No description available.

HISP 2160H. Los sistemas culturales del Siglo de Oro.
En este curso nos adentraremos en el análisis de los sistemas de producción cultural del Siglo de Oro. Partimos de nociones de sociología de la cultura y de estudios culturales para analizar la formación del canon, las batallas literarias, las discusiones sobre la utilidad de la literatura, la promoción de universidades y academias literarias, el ansieta de fama eterna, la lucha por el mecenazgo y el favor del público. También tendremos en cuenta aspectos menos éticos como el cotilleo y la necesidad de "arrimarse a los buenos".

HISP 2160I. Four Pillars of Don Quixote.

HISP 2160J. The Poetics and Practice of Space in the Theater of the Spanish Baroque.
This seminar will explore the real and virtual spaces of seventeenth-century Spanish drama. We will examine the diverse spaces in which theatrical performances took place (public playhouses, city streets, court theaters, convents), as well as the various types of spaces represented on the stage (domestic and public, urban and rural, worldly and supernatural, familiar and distant). How did dramatic space articulate the boundaries of the public and private in the Spanish baroque? How did it function in the configuration of social hierarchies, subjectivities, and marginal as well as normative identities? In the theatrical world of seventeenth-century Spain, how did spatial practices on stage shape the experience of space off stage?

HISP 2160K. New Worlds of Baroque Lyric: Góngora, Lope, Quevedo.
Global exploration, imitation of Latin and Italian models, and rediscovery of native poetic traditions reshape Spanish 17th-century lyric, opening up new thematic territories and generic alliances for poesía curta, while redefining poetic language itself. Readings include Latin and Italian source texts, 16th-century Spanish predecessors, poetics and commentaries. Enrollment limited to 20 graduate students.

HISP 2160L. Canonical Literature of the Spanish Golden Age.
Intended to deepen understanding of canonical literary works of 16th- and 17th-century Spain selected from the Golden Age preimn exam list. Critical readings of texts in their social, historical, and cultural contexts will be accompanied by critical reflection on why we read these works in the first place—that is, on canon formation—and on the genealogy and validity of the "Golden Age" as period descriptor. We will study various aspects of book history including print and manuscript culture, regulation of the book trade, practices of reading, concepts of authorship, and debates about poetic language as well as the value of imaginative literature.

HISP 2250A. Literary Realism, Economics, and Politics in Restoration Spain.
This course explores the connections between economic and literary thought in Spain following the 1868 liberal revolution and the 1874 Bourbon Restoration. Through the study of Realist novels of the period, we will examine the importance of money both as theme and metaphor, and as an epistemological system intimately related to the literary and political structures of the nascent bourgeoisie.
We also discuss theories of modernity and explore popular culture, with special attention to early Mexican Film

HISP 2350C. La nueva novela de América Latina. Este curso está dedicado a algunos textos fundadores: Rayuela de Julio Cortázar, Pedro Páramo de Juan Rulfo, La muerte de Artemio Cruz de Carlos Fuentes, Los ríos profundos de José María Argüedas, Cien años de Soledad de Gabriel García Márquez; pero también a otros que literaria inician nuevas rutas: La guaracha del macho Camacho de Luis Rafael Sánchez, Un mundo para Julio de Alfredo Bryce Echenique, Los vigilantes de Diemla Etít, y La irangradad de Matilde Sánchez

HISP 2350D. Nineteenth-Century Latin American Prose. Departing from the national representations of the early fiction and later realism and romanticism, we will focus on the fundamental novels and stories of the nineteenth century. Some of the issues discussed are national formation, the family romance, nature and history, as well as the political dimension of these texts

HISP 2350E. Novela latinamericana contemporánea. Estudiaremos la constelación de novelas fundamentales (Pedro Páramo, Los ríos profundos, Rayuela, La muerte de Artemio Cruz, Cien Años de soledad entre otras) que configuran un sistema literario hecho de innovación formal, ampliación de la lectura, y puesta en crisis de la representación

HISP 2350F. Queering Latin American Literature. Until the 19th century, homosexuality was vilified in Latin America as the ‘pecado contra natura.’ With the medicalization of sexuality at the turn of the century, homosexuality emerged as a contested identity. We explore the representation of gay themes in relation to power, violence and political resistance. Topics include: archival work, Queer Studies, autobiography, postmodern bodies. For graduate students only

HISP 2350G. Teoría y Práctica Poética en Cesar Vallejo. Seminario dedicado a estudiar en profundidad la poesía hermética de Vallejo. Analizaremos su práctica poética así como su teoría del poema a través de la evolución de su obra y pensamiento

HISP 2350H. The History of Wonder in Colonial Spanish American Lettres. The notion of wonder (asombrar, maravilla) played a determining role in the Spanish and Creole writings of the Spanish American colonial period. The volatile aesthetic of wonder raises and implicates such important issues as otherness, exoticism, category crisis, and identity formation. A studies course examining the role of wonder in New World historiographic and literary writings of the 16th and 17th centuries

HISP 2350I. Vallejo y sus contemóparos. Este seminario monográfico tiene como finalidad explorar la obra poética de César Vallejo en relación a los contextos del modernismo, la vanguardia, y la poesía contemporánea. Partiremos de un análisis formal del lenguaje poético y su organización semántica, de modo de ejercitarnos en el análisis textual de la poesía

HISP 2350J. Metaphor: History, Theories, Problems. Metaphor (a designation that is a metaphor (? in itself), points to a central (and recursive) device of the mind and, by extension, the culture. From Plato and Aristotle to Lakoff and Johnson, this course will explore the history of the problem ¿through ancient and modern Rhetoric, to the philosophical implications for authors like Locke, Vico, Hegel, Nietzsche, I. A. Richards, Max Black, Jacques Derrida, Paul Ricoeur and Donald Davidson. Current cognitive science theories of the metaphor and its implications for the history of culture and literature will be closely examined and discussed. Latin American modern and contemporary poetry will provide instances and forms of the problem in its different expressions. In Spanish

HISP 2350K. Aesthetics, Rationality and the Occult: Intellectual and Artist in 19th Century Latin America. The figures of the intellectual and the artist in turn of the century Latin America (1880-1910). The difference between the artist and intellectual provides a new point of view for the discussion about modernization. During the years 1880-1910 the concepts of intellectual, cultural autonomy, and a Saxon-Latin divide gained centrality. Those years also witnessed a clash between Positivism and a new Spiritualistic reaction. Reason, Aesthetics, and the Occult were three strong traditions in tension with each other during those years. How did cultural agents deal with this tension? How did they represent it? These questions suggest the importance that the end of 19th century has had on our present discussions within and about Latin America. Readings by Martí, Darío, Herrera y Reissig, Rodó, Lugones, Colmo, Ingenieros, Ramos Mejía, and others

HISP 2350L. Romantico y Modernos: un proyecto para el "individuo" en el XIX latinoamericano. No description available

HISP 2350M. Poetics of the Avant-Garde in Latin America. This course traces the shocks and flows of avant-garde activities through Latin America in the first decades of the twentieth century. We will explore manifestoes, poetry, artworks, and film from Argentina, the Caribbean, Chile, Brazil, Mexico, and Peru, from creacionismo through Brazilian modernismo, ultraísmo and estridentismo, poesía afroantillana and tecnoindigenismo, with occasional detours into Iberian experiments. Authors will include Vicente Huidobro, Oliverio Girondo, César Vallejo and Pablo Neruda. Our reading will take into consideration three overlapping backdrops: regional and continental debates over culture and politics; contemporary experiments among the European avant-gardes; and local developments in technology and mass culture

HISP 2350N. Biography, Autobiography and the Representation of the Subject in 19th Century Latin America. The 19th Century was the century of the Self. In Latin America the construction of the Nation ran parallel with the construction of a new image for the individual, and both were produced in writing. We will discuss some of these narratives of the self, biographies, autobiographies, journals, personal memories and letters. Readings from Francisco de Miranda, Simon Bolívar, Juana Manuela Gorriti, Esteban Echeverria, Eugenio María de Hostos, Domingo F. Sarmiento, Teresa Wilms Montt, Rubén Darío, José Martí and others

HISP 2450. Exchange Scholar Program

HISP 2520A. Archivo Borges. Este seminario es un taller de crítica textual y genética. A partir de las correcciones y variantes, los manuscritos preservados, y la amplia red de la cultura argentina y glosa que caracteriza a la obra borgeana, trabajaremos en los procesos de configuración del poema, en las estrategias narrativas de los cuentos, en la teoría literaria del autor, en su práctica editorial y su idea misma del libro

HISP 2520C. Historia Cultural del Sujeto Hispano-americano. Investigaremos la genealogía del Sujeto americano a partir de textos contemporáneos. Seguiremos sus huellas en las relaciones, biografías, poemas, y ensayos que documentan el habla, la escritura, la representación, y los saberes de este héroe de la Modernidad. Algunos ejes de esta exploración: la heterogeneidad, la cuestión del Otro, la construcción de la nacionalidad, la génesis y nacionalidad, la migración, la memoria y diferencia

HISP 2520D. La Ciudad Modernista. Este seminario estudiará las representaciones, funciones y estilos de la ciudad como espacio del Modernismo hispanoamericano. A partir del debate ciudad vs. campo, característico de la instancia formativa de las nacionalidades (Martí y Sarmiento), analizaremos el proceso de la modernidad urbaña en la poesía del Modernismo (Darío, Lugones), así como el relato y la crónica que lo propician (Gutiérrez Nájera, Julián del Casal) y la teoría cultural que lo debate (Rodó, González Prada). El arte y la iconografía, la estética del "fin de siglo" y el cosmopolitismo son otros temas

HISP 2520E. La cultura escolástica Y el debate sobre los derechos de los indios en el encuentro transatlántico. Este curso examina las estructuras de conocimiento que conectan la tradición medieval con el descubrimiento de América, el debate jurídico sobre los derechos de los indios, y la producción etnográfica de los siglos XVI y XVII. Textos de Marco Polo, Pedro Álarcos, Cristóbal Colón, Francisco de Vitoria, Juan Ginés de Sepúlveda, y Bartolomé de las Casas

HISP 2520F. La Vision Transatlantica en las Cronicas Indigenas y Mestizas de los Siglos Dieciseis y Diecisiete. Este curso contempla la contribución de los cronistas 'indio' y 'mestizo' de México y Perú a la gran polémica historiográfica indiana. Textos: Códice florentino de Sahagún; Historia de Tlaxcala de Muñoz Camargo; Historia de la nación chicimeca de Alva Ixtlilxochitl; Relación de Titu Cusi
Yupanqui, Comentarios reales de Inca Garcilaso; y Nueva cortesía y buen gobierno de Guamán Poma

HISP 2520C. Modernismo and Its Discontents.
Spanish-American Modernismo articulated pointed critiques of the nation-state, liberalism, and middle class values. We explore Modernista prose and poetry with special attention to Rubén Darío, José Martí, and Delmira Agustini. Themes include gender, travel writing, urban life, Art Nouveau, and the rise of the fantastic. Theoretical readings by Benjamin, Said, Hall, and Freud

HISP 2520I. Sor Juana Inés de la Cruz in Her Literary Context.
Intensive study of Sor Juana’s major works in a variety of genres; comparisons with other writers of her extended literary milieu

HISP 2520J. Teoría y práctica del texto transatlántico.
Este curso propone varios escenarios teóricos sobre el texto transatlántico. Partiendo de modelos de teoría literaria formal trabajaremos sobre un conjunto de textos de ambas orillas del idioma. Revisaremos las cuestiones del género, representación, lectura y recepción, mezcla y heterogeneidad archivo y cambio

HISP 2520K. La Picaresca Entre Dos Mundos.
Este seminario considera la crisis espiritual, epistemológica, e institucional que acompañó el surgimiento de la picaresca en España, así como las condiciones que dieron lugar a la asimilación y transformación de este género en la América colonial

HISP 2520L. Latin American Existential Literature.
European existentialism had a strong impact on Latin American literature, though that impact remains under-explored. The course begins with European existentialism and Latin American identity politics. It then explores the particular constructions of European existentialism effect by Argentine, Uruguayan, Mexican, and Brazilian writers of prose fiction in the mid-twentieth century. Readings in Spanish and English. Instructor override needed for registration

HISP 2520M. The Poetry and Discursive Strategies of Spanish American Modernismo.
The development of Modernismo was a turning point in the elaboration of the continental self-image. Modernista poets like Rubén Darío, Leopoldo Lugones, Julio Herrera y Reissig, Julián del Casal, Manuel Gutiérrez Nájera and José Asunción Silva were among the first original Hispanic American creators of literature, but they did not share a common view on continental problems and solutions. The relevance of Modernismo for the shaping of Latin American self image cannot be overstated. Modernista’s conceptions on new intellectuals, aestheticism, l’art pour l’art, racism, immigrants, science and the occult, modernization, decadence, dandyismo, the body, sex, feminism, anarchism, cosmopolitanism, pan-Latinism, universalism and nationalism will be discussed

HISP 2520N. La Reinivención de América en la Nueva Novela Hispanoamericana.
Este curso estudia perspectivas recientes de los primeros encuentros entre Europa y América en la nueva novela histórica hispanoamericana. Considera no sólo la relación entre estas ficciones y las fuentes del periodo colonial, sino también su diálogo con el presente a través de la reconfiguración del pasado. Las lecturas incluyen El arpa y la sombra de Carpentier, Son vacas, somos puercos de Boullosa y Ursula de William Ospina

HISP 2520O. The Old Science in the New World: Nature, Culture, and Empire in the Age of Exploration.
Studies how Spain’s exploration and conquest of the Americas tested European understandings of the natural world; of nature’s bearing on human psycho-physiology and, thereby, on culture; and of the balance between normalcy and deviance in natural and human domains. Topics range from changing theories about the distribution of land and life around the globe to “natural” and “moral” histories implicated in a debate over Spain’s rights to the Americas and its peoples. Readings: Aristotle, Strabo, Pliny, Ptolemy, Columbus, Vespucci, Oviedo, Las Casas, and Acosta. Students will be able to read primary texts in either Spanish or English. Discussion in English. Undergraduates welcome

HISP 2520P. Narrativa latinoamericana contemporánea (De Juan Rufio a Diambela Eltit).
Estudiaremos los modos de representación, prácticas de escritura y lectura, redes culturales, tramas sociales y políticas de los relatos de la modernidad crítica y diferencia latinoamericana. Autores: Cortázar, García Márquez, Fuentes, Bryce, Rodríguez, Juliá

Writers and artists have expressed the modern city experience, its unique spaces, the shock of simultaneity, the sense of being unknown in a public place. We discuss topics such as creation (and interpretation) of new public spaces, the uses of Modernity, new sensations and feelings. Readings by B. Pérez Galdós, Azorín, P. Baroja, M. de Unamuno, R. Gómez de la Serna, F. de Ayala, P. Salinas, M. Rodoreda, E. Mendoza, J. Marsé, M. Roig

HISP 2620B. Desire in the Spanish Novel.
A study of the ways in which sexual desire has functioned as both an important theme and a structuring principle in the Spanish novel of the late 19th and 20th centuries. Readings from Pardo Bazán, Valle-Inclán, Goytisolo, Riera, Mendicutti, Grandes, and others

HISP 2620C. Epica de la transición. Literatura y fin de siglo.
Focusing on the so-called “Novísimos” group we will explore the process of literary change which took place in Spain between 1962 and 2000, addressing aesthetic issues which had particular meaning to artists who started to produce at that time and why? How did the interaction between two Madrid and Barcelona, shape the literary debate of the 1960’s? Readings by J. Benet, E. Mendoza, J. Marias, P. Gimferrer, T. Moix

HISP 2620D. Evaluation and Liminality in the Construction of the Modern Spanish Canon.
Course explores, from the perspective of modern Spanish literature, questions fundamental to literary study: What is literature? How do we distinguish between “good” and “bad” literature? What extraliterary variables are part of this process of evaluation? In a related operation of distinction, how do we differentiate literary discourse from other discourses (such as journalism or propaganda) with which it may sometimes intersect? Given the canonical map in which writers operate and the anxieties of self-categorization, what uses do authors make of the discourses of popular culture? In our consideration of these topics, we will read and analyze theoretical texts by authors including Pierre Bourdieu, Barbara Hermstein Smith, Anthony Easthope, Frank Kermode, Claudio Guillén, and others. Examples of Spanish writing for discussion will include liminal texts by, among others, nineteenth-century serial novelists; Benito Pérez Galdós; early twentieth-century erotic novelists; José Ortega y Gasset; A. de Foxá; Almudena Grandes; Manuel Vázquez Montalbán; and Arturo Pérez-Reverte

HISP 2620E. Exilios.
A partir de una indagación teórica en la relación entre exilio y literatura este curso propone una lectura de esta problemática en textos de la España “interior” y la “peregina.” Lecturas de Larra, Blanco-White, J. R. Jiménez, P. Salinas, M. Zambrano, Rafael Alberiti, M. T. León, Rosa Chacel, C. J. Cela, Max Aub, and Juan Goytisolo

HISP 2620F. Fases de la enemistad. García Lorca, Dalí, Buñuel.
Federico García Lorca, Salvador Dalí and Salvador Buñuel son tres de los artisticos más singulares en la España del siglo XX. En este curso estudiaremos cómo literatura, pintura y cine se entremezclan en su práctica artística para conseguir una renovación del viejo Surrealismo francés y su posición respecto a la llamada “generación de 27”

HISP 2620G. Narcisso ante el espejo. Indagación sobre la literatura autobiográfica.
En este curso indagaremos los recientes avances en el análisis de la literatura autobiográfica a partir de muestras de los diversos subgéneros: libros de viajes, memorias, “autores” históricos. Lecturas de L. F. Moratin, J. M. de Sagarrra, J. Goytisolo, C. Barral, P. Gimferrer

HISP 2620H. Novisima incursión en los anos sesenta. (En)claves de la transición.
Focusing on the so-called Novísimos group we explore the process of literary change which took place in Spain between 1962 and 1992, addressing such questions as: What events and artistic figures shaped the explosion of cultural life in Spain during the transition from dictatorship to democracy? What aesthetic issues had particular meaning to artists who started to produce at that time and why?
HISP 2620L. Auto(ficto)biografías.
A partir de una reflexión teórica sobre la autobiografía y un repaso del estado de la cuestión incluyendo las últimas investigaciones en Europa y América, dedicaremos una atención particular a las formas más destacadas. Textos de L.F. Moratin, Pedro Salinas, Jorge Guíllén, José Moreno Villa, Max Aub, Carols Barral, Juan Goytisolo, Josep Pla y María Manent, Mercé Rodoreda.

HISP 2620M. Del 97 al 28. Modernidades.
En este curso examinaremos diversos enfoques de la historia literaria peninsular a la luz de la problemática de la Modernidad en función de dos grupos de escritores de particular brillantez, en el pasado del siglo XIX al XX y en el periodo de entreguerras. Lecturas de Unamuno, Baroja, Machado, Maragall, Pérez de Ayala, García Lorca, Alberti, Aleixandre, Salinas, Dalí, Carner, Riba.

HISP 2620N. The Generation of 1927 throughout the XX Century.
The poetical group of 1927, as a synecdoche of a modern cultural process, goes through crucial circumstances of the XX spanish century: avantgarde, engagement with politics, civil war, exile, resistance, and faces new challenges (of relationship between arts, gender, identity). Close inspection of poetics and poems offer a privileged perspective to the broad landscape of the spanish literature during the XX Century. Enrollment limited to 20 graduate students.

HISP 2900. Theory and Methods of Foreign Language Teaching.
How do we optimize acquisition? How do we evaluate, improve or create effective teaching materials? This course introduces the theory of foreign language learning and teaching and seeks to help language teachers implement communicative language teaching through reflective practice. Written permission required for undergraduates.

HISP 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

HISP 2980. Research in Spanish and Latin American Literature.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HISP 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

HISP 2991. Thesis Preparation.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HISP XLIST. Courses of Interest to Concentrators in Hispanic Studies.
Fall 2012
The following courses, listed in other department, may be of interest to students concentrating in Hispanic Studies. Please check the course listings of the sponsoring department for times and locations.

Theatre Arts and Performance Studies
TAPS 1281R mujeres ARIBAI Feminist Playwrights in Spanish Theater
Spring 2013
The following courses, listed in other departments, may be of interest to students concentrating in Hispanic Studies. Please check the course listings of the sponsoring department for times and locations.

Comparative Literature
COLT 1421V Modernisms North and South: Ulysses in Dublin, Paris, and Buenos Aires

Portuguese and Brazilian Studies
POBS 1601C From Dictatorship to Democracy in the Iberian Peninsula: Transformations and Current Challenges

History
Chair
Kenneth S. Sacks
As one of the first institutions in the United States to provide for historical studies, Brown University has long valued and nurtured research in the Department of History. The faculty's high standard of scholarship and excellence in teaching are well known, and members of the department are committed to the value a rigorous education in the humanities confers upon students. The department trains students in the fundamentals of historical thinking: skills and attitudes that will provide a foundation for excellence in a wide range of careers and professions, including teaching, law, medicine, business, public service, and advanced historical research.
For additional information, please visit the department's website: http://brown.edu/Departments/History/

History Concentration Requirements
History is the study of how societies and cultures across the world change over time. History concentrators learn to write and think critically, and to understand issues from a variety of perspectives. The department offers a wide variety of courses concerned with changes in human experience through time, ranging from classical Greek and Roman civilizations to the histories of Europe, the Americas, and Asia. While some courses explore special topics, others concentrate on the history of a particular country (e.g. Russia or France) or period of time (e.g. the Middle Ages or the Renaissance). By taking advantage of our diverse course offerings, students can engage in and develop broad perspectives on the past and the present.

1. Basic Requirement: A concentration in History consists of a minimum of ten semester-long courses; of these, at least eight (seven in the case of students who spend more than one semester at another institution; see “Transferring Courses” below) must be offered by the Brown University History Department, including cross-listed courses.

2. Introductory Courses: Students may count no more than two lecture surveys numbered 0520 or lower and only one HIST 0970 or HIST 0980 seminar toward the concentration requirements. It is recommended that concentrators in their first or second years take a HIST 0970 series seminar or a HIST 0980 series seminar for a seminar-based introduction to historical reasoning, discussion, and writing.

3. Field of Focus: Upon declaring a concentration in History, students must define the area that will be the primary focus of their program. The primary field of focus must include minimum of four courses.
4. **Geographical Distribution:** Concentrators must distribute nine of the ten required courses as follows: four courses in the primary geographic area. Thereafter, five courses in two or more secondary areas, with a maximum of three in any of these areas. Comparative and transnational courses may count for the geographical requirement with the approval of the concentration advisor. The geographic areas are:
- Africa
- East Asia
- Europe
- Latin America and the Caribbean
- Middle East and South Asia
- North America

5. **Chronological Distribution:** All History Department courses are designated “P” for pre-modern, “M” for modern, and “E” for either pre-modern or modern. Concentrators must complete at least three courses in the pre-modern period and three courses in the modern periods. Two of the courses must be designated “P” and two must be designated “M.” Courses designated “E” may fulfill the requirements for a third course in each category.

6. **Capstone Seminar:** All concentrators must complete at least one capstone seminar (HIST 1960 or HIST 1970 series seminar). These seminars are designed to serve as an intellectual culmination of the concentration. They provide students with an opportunity to delve deeply into a historical problem and to write a major research and/or analytical paper which serves as a capstone experience. Ideally, they will be taken in the field of focus and during the student’s junior or senior year. Students considering writing a senior honors thesis are advised to take an advanced seminar in their junior year.

7. **Honors:** To be admitted to the honors program, students must have achieved two-thirds “quality grades” in History department courses. A “quality grade” is defined as a grade of “A” or a grade of “S” accompanied by a course performance report indicating a performance at the “A” standard. Honors is normally a three-semester process, with students taking HIST 1992, “History Honors Workshop for Prospective Thesis Writers,” one semester and HIST 1993, “History Honors Workshop for Thesis Writers,” for two semesters. Both classes will be offered every semester, so students may begin the process in either their 5th or 6th semester. HIST 1992 is strongly recommended but not required. The class may count as one of the 10 courses required for graduation in history. Students may be admitted into HIST 1993 in one of two ways.
   2. By submitting a thesis prospectus of equivalent quality (A- or above) no later than the first day of their 7th semester. This method of entry into HIST 1993 is geared especially, but not limited to students who have spent their junior year away from Brown. Students who take HIST 1992 in the 5th semester can finish the thesis in the 7th semester. Students who take HIST 1992 in the 6th semester will finish it in the 8th semester.

   Students who contemplate enrolling in the honors program in History should consult the department website. They are also encouraged to meet with the Director of Undergraduate Studies, who serves as the honors advisor.

8. **Transferring Courses:** The History Department encourages students to take history courses at other institutions, either in the United States or abroad, as well as history-oriented courses in other departments and programs at Brown. Students may apply two courses taken in other departments/programs at Brown to the ten-course minimum for the History concentration. Students who spend one semester at another institution may apply to their concentration a maximum of two courses from other departments or institutions, and those who spend more than one semester at another institution may apply to their concentration a third course transferred from another institution. The total number of courses from other departments or institutions may not exceed three.

Students wishing to apply such courses must present to their concentration advisor justification that those courses complement some aspect of their concentration. Courses from other Brown departments may not be applied toward the chronological distribution requirement; courses transferred from other institutions may be applied toward the chronological distribution requirement so long as they clearly are history courses.

It is normally expected that students will have declared their intention to concentrate in History and have their concentration programs approved before undertaking study elsewhere. Students taking courses in Brown-run programs abroad automatically receive University transfer credit, but concentration credit is granted only with the approval of a concentration advisor. Students taking courses in other foreign-study programs or at other universities in the United States must apply to the Transfer Credit Advisor.

Final transfer and concentration credit will not be granted until the student successfully completes the course(s) and returns to Brown. Approval by the department advisor for transfer credit will be contingent on satisfactory course content and performance (to be demonstrated by documents such as a transcript showing the grade, syllabi, notes, papers, exams, etc).

9. **Regular Consultation:** Students are strongly urged to consult regularly with their concentration advisor or a department advisor about their program. During the seventh semester, all students must meet with their concentration advisor for review and approval of their program.

---

**History Graduate Program**

The department of History offers graduate programs leading to the Master of Arts (A.M.) degree and Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/history

---

**Courses**

**HIST 0010. History Matters.**

History matters because the past profoundly shapes the present. As William Faulkner wrote, “the past is never dead. It isn’t even past.” Through readings focusing on a wide variety of cultures and eras, this course explores how and why history is so potent. It also examines the big questions that lie at the heart of the practice of history, including: how does change happen? who makes history? who owns history? In looking at these and other questions, the course considers the important concepts and theories that historians use to make sense of the past and its impact on us. 

**HIST 0020. Europe since the French Revolution.**

A survey of European history from the middle 18th century until recent times. The themes include the transformation of a traditional society, industrialization, revolutionary movements, ideological changes, imperialism, fascism, communism, and the present state of European civilization. 

**HIST 0410. Histories of East Asia: China.**

China’s ascendance as a global economic power in recent decades has been regarded by many as a reclaiming of its former glory. In introducing the history of China from earliest times to the present, this course aims to provide an understanding of the making and remaking over millennia of what we call Chinese civilization, with its changes, contingencies, and continuities, its various claims to greatness, and its many recurring
challenges. This course is open to all students and assumes no prior knowledge of Chinese culture, history, or language. Readings consist of both a textbook and relevant primary sources.

HIST 0420. Histories of East Asia: Japan.
This is a course for students who have always been curious about Japan but haven’t had an opportunity to explore that interest fully, for anyone in search of a better understanding of the historical contexts that shaped Japan’s complex relationships with China, Korea, and the West, and for all those who wish to broaden their exposure to the histories of East Asia. Open to all students, this course assumes no prior knowledge of Japanese culture, history, or language.

For four centuries, the theme of America having a special place in the world has dominated American politics and culture, though many have questioned or challenged American distinctiveness. This course examines articulations and critiques of American exceptionalism, using sources from American history and literature, from comparative history and literature, and from modern American culture and politics. It is intended both as an introduction to American history and as a thematic class, focused on the U.S. in a global context, which is different from a traditional high school or first-year college American history class.

HIST 0520. American History since 1877.
A survey of social, cultural, and political trends from 1877 to the present focusing primarily on the lives of ordinary Americans.

An indelible post-9/11 image was that of international headlines proclaiming “We are All Americans Now.” However, not everyone shared that sentiment, prompting many Americans to ask “why do they hate us?” Part of the answer lies in the history of U.S. policy. This course examines the history of the relationship between the United States and the regions of the world (Africa, Asia, Latin America, and the Middle East) that collectively came to be known as the “Third World.” No prerequisites, although a basic knowledge of American history and an active interest in current affairs and international politics are suggested.

Explores how religion, ethnicity, and race contributed to group separatism at some points in history and intersected to create a unified national identity at others. Considers influence of contextual factors, such as immigration, war, the civil rights and feminist movements, on the meaning and representation of love and intermarriage during the rising culture of individualism in an increasingly seemingly secular America.

HIST 0750. Great Modern European Thinkers.
This course will introduce you to the intellectual and cultural history of Europe from the late eighteenth century to the present. Through a broad study of ideological and artistic currents—including liberalism, romanticism, Marxism, surrealism, and fascism, and postmodernism—we will examine the changing attitudes of Europeans towards modern life.

HIST 0760. World War II in Europe: History, Experience, Memory.
World War II was the defining event of the twentieth century. This course will focus on the military, political, social and cultural dimensions of the war in Europe and the USSR. Topics and themes include: Hitler’s war aims; the uses of propaganda; civilian mobilization and “total” war; the Grand Alliance; racial policies and genocide; and the collaboration and resistance of civilians under Nazi occupation. The course will conclude with a survey of the ways in which the war has been—and continues to be—memorated and debated in Britain, Russia, Germany, France and Austria. No prerequisites.

HIST 0930A. Word, Image and Power in Renaissance Italy (ITAL 0580).
Interested students must register for ITAL 0580 S01.

HIST 0930B. American Jewish History (JUDS 0610).
Interested students must register for JUDS 0610 S01.

HIST 0930C. A World Without Borders: Introduction to Yiddish Culture and Language (JUDS 0980X).
Interested students must register for JUDS 0980X S01 (CRN 23671).

HIST 0930D. History of Zionism and the Birth of the State of Israel (JUDS 0650).
Interested students must register for JUDS 0650 S01.

HIST 0930E. Sacrifice and Suffering: Rhetorics of Martyrdom Compared (RELS 0640).
Interested students must register for RELS 0640 S01.

HIST 0930F. Twentieth-Century Africa (AFRI 0160).
Interested students must register for AFRI 0160 S01.

HIST 0930G. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 0990G).
Interested students must register for JUDS 0990G S01.

HIST 0930H. Women and Gender in the Modern Jewish World (JUDS 0990P).
Interested students must register for JUDS 0990P S01.

HIST 0930I. History of the Holocaust (JUDS 0640).
Interested students must register for JUDS 0640 S01 (CRN 23667).

HIST 0930J. The World of Byzantium (CLAS 0660).
Interested students must register for CLAS 0660 S01 (CRN 15534).

HIST 0930K. Islam and Modernity (RELS 0600).
Interested students must register for RELS 0600 S01 (CRN 24027).

HIST 0940A. History of Intercollegiate Athletics (EDUC 0850).
Interested students must register for EDUC 0850 S01 (CRN 24057).

HIST 0940B. The Campus on Fire: American Colleges and Universities in the 1960's (EDUC 0400).
Interested students must register for EDUC 0400 S01 (CRN 15485).

HIST 0940C. When Leaders Lie: Machiavelli in International Context (ITAL 0751).
Interested students must register for ITAL 0751 S01 (CRN 14472).

HIST 0940D. The Border/La Frontera (ETHN 0090A).
Interested students must register for ETHN 0090A S01.

HIST 0940E. Autobiography of the Civil Rights Movement (AFRI 0110C).
Interested students must register for AFRI 0110C S01.

Interested students must register for EDUC 0410D S01.

HIST 0940G. From Amsterdam to Istanbul: Christians, Moslems, and Jews (JUDS 0505E).
Interested students must register for JUDS 0505E S01 (CRN 15685).

HIST 0960A. Memoirs and Memory: The Individual Experience of Modern Jewish Life (JUDS 0980A).
Interested students must register for JUDS 0980A S01.

Interested students must register for JUDS 0980U S01.

HIST 0960C. Money, Power, Sex and Love: The Modern Jewish Family in Europe and America (JUDS 0980V).
Interested students must register for JUDS 0980V S01 (CRN 23668).

HIST 0960D. Radical Jews from Marx to the Students’ Revolution of 1968 (JUDS 0980Z).
Interested students must register for JUDS 0980Z S01.

Interested students must register for JUDS 0990L S01.

HIST 0960F. New York, Warsaw, Tel Aviv, Buenos Aires: Transnational Jewish Cultures in 20th Century (JUDS0990H).
Interested students must register for JUDS 0990H S01.

HIST 0970A. Object Histories: The Material Culture of Early America.
History is not just about people; it is also about things! Come explore the world of early America through the lens of objects—boats, dresses, plows, houses, wagons, watches, silver cups, wigs, blankets, land, gardens, hammers, desks—and the cultures that produced and consumed them. As a first year seminar, this course is designed to engagingly introduce students to the basic concepts of historical study. Over the course of the semester we will be visiting the terrific resources for the study of history that exist right here on or nearby our campus, such as the John Carter
Brown Library, the Rhode Island Historical Society, and the John Brown House Museum. We will take several field trips to local historical sites, both on and off campus. Our primary focus will be specific objects and their contexts and histories. Enrollment limited to 20 first year students. P

HIST 0970B. Tropical Delights: Imagining Brazil in History and Culture.
Examines the many ways that Brazilians and foreigners have understood this vast continent-size country, ranging from early European explorers’ anxieties about Cannibalism to modern images of the Amazonian rainforest, Rio De Janeiro’s freewheeling Carnival celebrations, and the array of social movements mobilizing for social justice. Through an examination of historical sources, literature, movies, and popular culture, this seminar will consider how multiple images and projections of Brazil have shaped national and international notions about the country. Reserved for First Year students. Enrollment limited to 20. FYS E

HIST 0970C. Animals and History.
Human beings have lived alongside animals for millennia. Yet only rarely have these creatures featured into the ways that historians think and write about the past. This course endeavors to introduce students to some of the conceptual questions at the heart of the historical enterprise by revising American history around such animals as the horse, the wolf, the buffalo, the passenger pigeon, and the pig. Enrollment limited to 20 first year students. FYS E

HIST 0970D. South Asian History.
M

HIST 0970E. Gender and Sexuality in Latin America: From Colonial Times to the Present.
This course examines historical constructions of gender and multiple manifestations of sexuality in Latin America to consider how family, politics, culture, can economics have conditioned power relations between men and women. We will study how gender shaped and has been shaped by conquest, colonialism, slavery, capitalism, labor struggles, urbanization, migration, nationalism, and revolution. E

HIST 0970F. Greeks, Romans, and Jews: Conflicts and Confluence in Civilization.
Students should be prepared to read texts and discuss specific problems that illuminate the collision between the ancient Greeks, Romans, and Jews from 200 B.C.E. to 200 C.E. and begin to appreciate how that collision helped produce the cultural values that have largely defined the Western world

HIST 0970G. History and Image in Modern Japan: Geisha.
Explores the persistent and stereotypical representations of the “Orient” in the popular and academic cultures of the West and considers these images in the context of Japan’s cultural, gender, and social histories. Uses Arthur Golden’s Memoirs of a Geisha alongside other works of film, fiction and analysis to address issues of “orientalism” and the realities of women’s lives in the modern era

HIST 0970H. History and Memory in China.
How do societies remember? This cultural history of history and memory examines how individuals and collectivities instrumentize the past to shape the present. Case studies are drawn from Chinese history and emphasize the history of time-keeping and temporalities, traditional Chinese historiography, ritualized memory, and monumental archives

HIST 0970I. Magic, Science and Religion in Europe.
Explores the shifting boundaries among magic, science and religion in Europe between the Renaissance and the Enlightenment. Topics include popular magic religious reform; learned magic and the scientific revolution; and the persecution of witchcraft. Considers the extent to which magical beliefs disappeared by the 18th century

HIST 0970J. Slavery and Historical Memory in the United States.
How has America chosen to remember and forget the enslavement of millions of its own people? What are appropriate ways to acknowledge slavery in monuments, museum exhibitions, film, literature, and public policy? By approaching these questions through a wide range of visual and textual sources, we will explore the indeterminate space between history and memory. Enrollment limited to 20 first year students. FYS WRIT M

An exploration of the multifaceted changes set in motion by the discovery of gold in California in 1848. Topics to be covered include the gold rush’s effect on the environment, on gender relations, on the Chinese, Mexican, and Native American communities and on American arts and letters. For first year students only. M

HIST 0970L. Tokyo Modern.
In 1868, Tokyo (known then as Edo) was a town of samurai and shoguns. By 1929, it was a cosmopolitan world city, dominated by a vibrant middle class. We will explore this transition from tradition to modernity, asking whether modernity was imported from the West or a product of the Japanese past and whether it was a wrenching experience or one that brought personal satisfaction. M

HIST 0970M. World of Walden Pond: Transcendentalism as a Social and Intellectual Movement.
Examines the 19th century phenomenon of Transcendentalism: this country’s most romanticized religious, philosophical, and literary movement. Focusing especially on Emerson, Thoreau and Fuller, we’ll examine the ideas of the Transcendentalists in the age of reform and evaluate the application of their principles to abolition, feminism, and nature. The central problem which they wrestled with will be the focus, too, of our investigations: the tension between individualism and conformity. For first year students only. P

HIST 0970N. Worlds in Collision: Colonial Encounters and the Creation of Latin America.
Explores the interaction between Europeans and Native Americans during the sixteenth century. We will study a wide range of primary texts, including Spanish and Portuguese narratives, indigenous accounts, and books written by the descendants of the encounter. Among the seminar’s major topics: ideologies of conquest; indigenous responses to invasion; and the reliability of ethnohistorical sources. For first year students only

HIST 0970O. Human Rights as History.
Are we, as human beings, entitled to a basic set of rights? How might one define these rights? This course examines the idea of human rights in its original historical environment, Europe and America from the 15th century to the present. For first year students only. M

HIST 0970P. Culture and U.S. Empire.
This seminar examines the relationship of American culture to U.S. imperial project. We will look at how cultural ideologies such as those about race, gender, and American exceptionalism have not only shaped Americans’ interactions with other peoples but also justified the spread of U.S. power. Enrollment limited to 20 first year students. FYS M

HIST 0970Q. Truth on Trial: Justice in Italy 1500-1800.
This seminar analyzes controversial trials in Italy between 1500-1800. For first year students only.

HIST 0970R. The Holocaust in Historical Perspective.
The course will examine the history and historiography of the Holocaust from early accounts to recent reconstructions of the origins, implementation, and aftermath of the "Final Solution." We will also analyze documents, testimonies, memoirs, trial records, and various forms of representations and commemorations of the Shoah. Enrollment limited to 20 first year students. FYS WRIT M

HIST 0970S. Sport in American History.
This course covers the relationship of sports to aspects of American culture since 1900. Topics include gender, race, amateurism, professionalism, intercollegiate athletics, and sports heroes. Enrollment limited to 20 first year students. FYS M

HIST 0970T. The Measure of All Things.
Interest in measurement is a peculiarly modern pre-occupation. This seminar will look at intellectual, cultural, and historical forces that have shaped attempts to reduce the world to numbers from Newton to Einstein. Enrollment limited to 20 first year students. FYS M
HIST 0970U. Politics of Gender in the U.S. from World War II to the E.R.A.
Gender and sexuality in the U.S. from World War II through the defeat of The Equal Rights Amendment in 1982. Examines issues of privacy, gender equality, reproduction, marriage, the family, homosexuality, and roles and expectations of men and women in both private and public life. Enrollment limited to 20 first year students. FYS M

HIST 0970V. The American South in History and Memory
An examination of some of the historical myths and realities surrounding the American South, especially during the period between the American Revolution and the Civil War. Special attentions will be given to southern slavery and its legacy in the United States. Students will be introduced to sources from history, literature, film, and music

HIST 0970W. The French Revolution
Explores the French Revolution and its various interpretations as an introduction to the practice of history. Through a close examination of documents and images, this course invites students to develop their own interpretation of this cataclysmic event and its legacy

HIST 0970X. Making Change: Nonviolence in Action
This seminar will focus on the life and work of one of the most influential thinkers of the twentieth century, examining both his role in the Indian nationalist movement, as well as the global impact of his ideas on leaders such as Martin Luther King Jr. and Nelson Mandela. Enrollment limited to 20 first year students. FYS

HIST 0970Y. Liberty and Empire: U.S. Expansion and Native America
This seminar explores piracy in the Atlantic from the sixteenth to the early nineteenth centuries. We will examine everyday life on pirate vessels; the pirates' role in emerging colonial societies and economies; the complex links between piracy, imperialism, and nation-building; and the image of pirates as both villains and figures of legend. Enrollment limited to 20 first year students. FYS P

HIST 0971A. The Holy Grail and the Historian’s Quest for the Truth
Dan Brown’s wildly successful novel The Da Vinci Code has recently given a feminist twist to an enduringly popular medieval legend also memorably captured in the big-screen antics of Monty Python and Indiana Jones: the quest for the Holy Grail. Beginning with Brown’s novel and other modern representations of the search for the Grail and then turning back to texts from the Middle Ages, this seminar will unravel the truth - or truths - behind the legend. One of our central questions will be how historians can use legends to understand the cultures they study. Enrollment limited to 20 first year students. Instructor permission required. FYS P

HIST 0971C. China in the Literature of Travel
Seminar in the history of travel to and travel literature about China, from the time of Marco Polo to the present. Readings include classic European travel accounts written by merchants, missionaries, tourists, and adventurers, as well as outstanding examples of Chinese travel writing about China, Southeast Asia, and Taiwan. By comparing these writings we will gain a deeper appreciation of the motives animating world travel and of the various forms of literature that travelers developed in order to communicate their findings to readers back home. The course also provides first-year students with an introduction to the practice of history. Students will read and write original essays about primary source material. The course also offers an introduction to examples of scholarship drawn from one of the most vibrant sub-fields of history today: the study of travel and tourism. No prerequisites. Reserved for First Year students. Enrollment limited to 20. FYS P

HIST 0971D. An Empire and Republic: The Dutch Golden Age
Between about 1580 and 1690, a new nation emerged in Europe that became a bastion of liberty, ideas in ferment, fine art, military power, science and technology, and global economic reach: the Dutch Republic. A nation that thought of itself as peaceful, yet was constantly at war; as Protestant, yet was composed of people of many faiths; as personally aspirational, yet derived much wealth from the conquest and slavery of others. Its people and institutional arrangements greatly influenced Britain and America on their paths to power, too. Its rise and eclipse may be instructive.. Enrollment limited to 20 first-year students. FYS P

HIST 0971E. The U.S. and the Middle East: Image and Imperialism
The Middle East has figured prominently, in narrative and image, in the Western imagination. We will assess some of those narratives and images in their historical contexts, first tracing U.S. - Middle Eastern relations in the 19th and 20th centuries, then focusing our attention on representations of the Middle East in sources such as diplomatic reports, films, travel narratives, religious tracts, magazine advertising, and cartoons. Topics include the role of the press, the creation of the Middle Eastern "bad guy," images of the "Oriental" female and male, imperial ethnographies, and visions of the "Holy Land." Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT M

HIST 0971G. The Age of Revolutions, 1760-1824
In the middle of the eighteenth century, the Americas belonged to a handful of European monarchies; within a few decades, most of the Americas was composed of independent republics, and some of the European monarchs were either deposed or quaking on their thrones. What happened? Usually considered separately, the revolutions in British North America, France, Saint-Domingue (Haiti) and Spanish America had diverse local circumstances yet composed a single cycle of intellectual ferment, imperial reform, accelerating violence and, ultimately, the forging of new political communities. This course will examine the revolutions that helped create the world we live in today. Enrollment limited to 20 first year students. FYS WRIT

HIST 0971H. The Philosophers’ Stone: Alchemy from Antiquity to Harry Potter
As both an intellectual tradition and a set of practices, alchemy has a long, rich, and varied history in Egypt, China, the Middle East, Europe, and North America. In this seminar, we will examine the evolution of this tradition, with particular attention to alchemy’s changing relationship to art, magic, medicine, science, and mysticism. We will also consider cultural images of the alchemist as sage, fool, and fraud, among others. Enrollment limited to 20 first year students. FYS WRIT

HIST 0971J. Athens, Jerusalem, and Baghdad: Three Civilizations, One Tradition
This FYS examines the core beliefs of early Greek, Jewish, Christian, and Islamic civilizations that form the basis of Western thought. Serving a similar ideological purpose in the pre-modern world as have political and economic theories for the modern world, religion and philosophy defined individual lives and collective identities. We focus on the manner of appropriation and modification of thought from one culture to another in order to appreciate that there is far more similarity than difference in belief systems among what are today viewed as separate, even contesting, cultures. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT P

HIST 0971L. Act Your Age! : Age Consciousness in the West since 1500
This course examines changing conceptions of age beginning in Early Modern Europe through 20th century Europe and North America. From Shakespeare’s "Seven Ages of Man," to the rise and fall of the Developmental Paradigm in the late 20th century, this course will explore the historical literature on the ways that human age has been constructed, understood, and worried about, from infancy to decrepitude. Enrollment limited to 20 first year students. FYS M

HIST 0980A. Taiwan: Crossroads of World History
Examines Taiwan’s place as a crossroad of world history while introducing students to core aspects of historical inquiry; primary sources, historiography, and the writing of history. We will consider the island’s importance to numerous early modern and modern colonial polities, and to the U.S. during the Cold War, as well as the intersecting histories of settlement, migration, and the environment that have shaped the island’s population, culture, and economy. Enrollment limited to 20 first-year students, sophomores, and juniors. E

HIST 0980B. Becoming French: Minorities and the Challenges of Integration in the French Republic
Recent controversies around Muslim integration, including debates around the headscarf and uprisings in the working class suburbs of large French cities, point to difficulties France has faced in integrating its minority populations. This course will explore the encounter between France and its immigrant, religious, and racial minorities from the Revolution to contemporary times. By comparing paths of integration and debates
around minority inclusion, we will consider how minorities negotiated their identities as they struggled to internalize France’s cultural and historical legacy. We will also address political and historiographical debates over the relationship between political citizenship and religious/cultural identity. Enrollment limited to 20 first year students and sophomores. M

HIST 0980E. Continental Histories.
Sometimes human history is seen as a competition, as if people on different continents were the teams and the finish line is the present. This seminar probes the power of this pervasive, yet flawed idea. Close consideration is given to environment, economics, conceptions of race, imperialism, and the nature of historical analysis. Enrollment limited to 20 first year students and sophomores

HIST 0980F. Abraham Lincoln: Historical and Cultural Perspectives.
This seminar uses the life, legacy, and myth of Abraham Lincoln to explore some central themes in American history, such as the frontier in the new republic, the nature of political leadership, early law and legal culture, and the emergence of sectionalism, slavery, antisalvery, and Civil War. Sources are drawn from Lincoln’s works, the writings of his contemporaries, and modern non-fiction, fiction, and film. Enrollment limited to 20 first year students and sophomores

HIST 0980G. The Search for King Arthur.
The legend of King Arthur is one of the most enduring stories to emerge from medieval Britain. Drawing on evidence from written and archaeological sources, this class delves into the shadowy period in which the legend is based, between the collapse of Rome and Saxon rule in Britain and the establishment of the Anglo-Saxon kingdom of Wessex. The class will also take students inside the historian’s workshop, exposing them to the tools, texts, and objects from which historians and archaeologists construct their interpretations of how the inhabitants of Arthur’s Britain lived and died. Enrollment limited to 20 first year students and sophomores

HIST 1000A. History of Greece: From Alexander the Great to the Roman Conquest.
Covers the decline of Athens as the center of classical civilization, the conquests of Alexander the Great; the culture of the Greek elite and, to the extent that it’s recoverable, of the indigenous populations of the Hellenistic world; and Greek contributions to what we call Western Civilization. P

Focuses on the ancient Greeks, Romans, and Jews, from 300 B.C.E. to 400 C.E. Covers primarily social, philosophical, and religious areas of contention and accommodation, ending with the late Antique, Christianity, and rabbinic Judaism. P

HIST 1010A. Roman History I.
No description available.

HIST 1010B. Roman History II.
No description available.

HIST 1020. Living Together: Muslims, Christians, and Jews in Medieval Iberia.
A pressing issue in today’s pluralistic societies is how people of different identities (religious, ethnic, etc.) can live together. This course explores a slice of history that can help us think through questions of difference in our own world: medieval Spain, where for centuries Muslims, Christians, and Jews lived in close proximity. Often through explicit juxtaposition with modern debates, this course examine how these people understood and structured their relations with each other in the Iberian Peninsula between 711 and 1492. Themes include: identity and cultural definition; power and religious violence; tolerance and intolerance; acculturation and assimilation; gender and sexuality. WRIT P

HIST 1030. The Long Fall of the Roman Empire.
Once thought of as the “Dark Ages,” this period of western European history should instead be seen as a fascinating time in which late Roman culture fused with that of the Germanic tribes, a mixture tempered by a new religion, Christianity. Issues of particular concern include the symbolic construction of political authority, the role of religion, the nature of social loyalties, and gender roles. P

HIST 1031. The Viking Age.
For two centuries, Viking marauders struck terror into hearts of European Christians. Feared as raiders, Norsemen were also traders and explorers who maintained a network of connections stretching from North America to Baghdad and who developed a complex civilization that was deeply concerned with power and its abuses, the role of law in society, and the corrosive power of violence. This class examines the tensions and transformations within Norse society between AD 750 and 1100 and how people living in the Viking world sought to devise solutions to the challenges that confronted them as their world expanded and changed. P

HIST 1040. Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages.
Popes named Joan, Gothic cathedrals, and crusaders—all these were produced by rich world of the western European Middle Ages. The cultural, religious, and social history of this period are explored with special attention to the social construction of power, gender roles, and relations between Christians and non-Christians. P

HIST 1045. The Paradox of Early Modern Europe.
European social, intellectual, political, and economic history from the 15th to the 18th centuries, with an eye to the paradox embodied in the term “early modern.” On the one hand, this is the heroic era of Columbus, Machiavelli, Newton, and Montesquieu, when Europeans became increasingly global, urban, and critical. On the other hand, this period also saw the rise of judicial torture, new regimes of discipline, colonialism, and a robust belief in the unseen world of demons, angels, and witches. We will explore the interplay of these paradoxical forces in Europe’s transformation from medieval to modern. P

HIST 1050. Renaissance Italy.
Italian society and culture from the fourteenth through the sixteenth centuries. Explores the traditional understanding of the Renaissance as a period of remarkable artistic and cultural achievements in Italy as well as the broader social, political and cultural context for these innovations. Topics include art, political theory, humanist scholarship, family life, court society, religion, urban and rural identities and sexuality

HIST 1060. Late Renaissance and Reformation Europe.
P

HIST 1070. Early Modern Europe from Religious Reform through the Age of Absolutism.
This course surveys the history of Europe from the Reformation to the early eighteenth century. Particular attention will be paid to the major religious splits and conflicts and political developments, as well as the expansion of European powers overseas

HIST 1080. Slavery in the Ancient World.
Examines the institution of slavery in the ancient world, from Mesopotamia and the Near East to the great slave societies of classical Greece and (especially) imperial Rome; comparison of ancient and modern slave systems; modern views of ancient slavery from Adam Smith to Hume to Marx to M.I. Finley. Readings in English. E

Examines the extended history of the Civil Rights Movement in the U.S. with a range of primary sources. Starting at World War II, the course considers the roles of the courts, the government, organizations, local communities, and individuals in the ongoing struggle for African American equality, focusing on African American agency. Sources include photographs, documents, newspapers, letters, speeches, autobiography, and secondary readings. Must have taken at least one post-1865 U.S. history course demonstrating a foundation in this time period. Enrollment limited to 50. M

HIST 1100. Crime and Mentalities in Early Modern Europe.
Through an exploration of attitudes towards crime, this course will shed light on the mentalities of early modern men and women. Includes an examination of state trials, popular shaming rituals, witchcraft confessions and representations of crime in print and image. Through its examination of crime, this course will address the process of state formation, religious reform and secularization during the early modern period

This course focuses on Southern European countries with an authoritarian tradition: Italy, Greece, Portugal and Spain. It adopts a cross-national
analysis of these countries throughout the 20th century and deals with several repressive state policies, such as torture, propaganda and censorship and their effects. The course analyzes the ideology and tactics that were adopted in order to enforce ultra-conservative ideological agendas against the backdrop of economic crises, political instability and social insurrection. The first part draws on a number of theoretical studies on the origins of fascism, and the various forms of authoritarianism and military regimes. A later part of the course analyzes the regimes' inner transformations. Questions that will be dealt with include the role of the Army in politics, the connections between authoritarian ideologies and violence, the role of charismatic personalities such as Mussolini, Franco, Salazar and Metaxas, and the similarities and differences with totalitarian systems, such as Nazi Germany.

This course is an interdisciplinary analysis of political violence in Southern Europe and Balkan countries in the 20th century. The course adopts a cross-national analysis in dealing with practices of political violence from below, its effects and the different responses to it. It analyzes the variety of ideologies that were linked to violence, ranging from fascism to communism, and the state tactics that were adopted in order to enforce law and order. The first part of the course will provide a theoretical exploration of the term "political violence" and its implications, as well as a historical background prior to the 20th century. The second part will deal with case studies, including Portuguese anarchists, Yugoslav ultranationalists and Italian fascists. Other issues that will be covered include the Greek and Spanish Civil Wars, the national liberation struggle and intercommunal fighting in Cyprus, Basque micro-nationalism and terrorism against the state in Italy and Greece.

Explores the late Renaissance as it developed primarily in sixteenth-century Northern Europe, particularly the relationship between artistic and intellectual developments and their social, political, and religious context. Topics include: the commodification of art and knowledge, court culture and patronage, early museums and curiosity cabinets, the gendering of intellectual authority, humanism and print culture.

HIST 1140A. History of the Holocaust.
An investigation of the state-sponsored murder of six million Jews and millions of non-Jews during World War II. Topics include the entry of Jews into European society, the evolution of modern anti-semitism, the rise of Nazi Germany, the implementation of the Final Solution, reactions by bystanders and perpetrators, and the long term impact among survivors, national governments, scholars, and revisionists.

HIST 1170B. History of Zionism.
Examines the history of the Zionist movement within the context of the history of European nationalism and as one of numerous Jewish political responses to rising anti-Semitism. Explores the ideological and political foundations of the Zionist movement until Israel's establishment as well as broader concerns of Jewish politics in the late 19th and 20th centuries

HIST 1171. Nation and Society in Modern France.
This course will focus on the consolidation of the French nation from the Revolution to the present with a particular emphasis on efforts to create a homogenous national culture over two centuries. Topics will include the relationship between church and state; the creation of a national infrastructure; the role of women in the polity; negotiations by colonial and post-colonial subjects with the state; Jewish emancipation, integration, and exclusion; regionalism in the 19th and 20th centuries; the "right to be different" campaigns of the 1980s; and the challenges of the European unification for French national identity.

HIST 1180. The Rise of the Scientific Worldview.
Examination of the worldview that emerged in Europe during the scientific revolution, from 1543 when Copernicus and Vesalius published their works until Lavoisier's chemical revolution in the late 18th century. Considers both the chronology of scientific developments, and their broader social and intellectual contexts. Accessible to science, humanities, and social science concentrators.

A consideration of developments in 19th-century physics, chemistry, biology, and mathematics in their relation to the natural and social worlds. Explores the ways scientific theories affected and were affected by views of the nature and potential of scientific knowledge. Also addresses the development of institutional structures and their effects on theories generated. No formal prerequisites-open to science and humanities students.

Examines selected aspects of the development of science in relation to society. The development of relativity theory, quantum mechanics, evolutionary theory, molecular biology, and ecology are considered within their social and intellectual contexts. No formal prerequisites-for the course which is open equally to science and humanities students. Occasional extra technical sections are offered to explain basic scientific ideas when necessary.

HIST 1210. European Intellectual History: Discovering the Modern.
A lecture course, primarily for juniors and seniors, that focuses on salient philosophic, artistic, and ideological currents of 19th-century Europe. Beginning with the crisis of political and cultural legitimacy posed by the French Revolution, it concludes with the consolidation of bourgeois culture in the 1860s and 1870s and the two great scientific systematizers of these decades: Darwin and Marx.

A sequel to HIST 1210 focusing on radical intellectual and cultural currents that challenged and destabilized the assumptions of Victorian high culture during the fin de siecle. Through a careful reading of primary texts by Hobhouse, Nietzsche, Weber, and Freud. The course explores issues such as the rise of mass consumer culture, neoliberal and neofascist politics, philosophic irrationalism, psychoanalysis, and the woman question.

HIST 1230. European Intellectual History: Exploding the Modern.
The overarching theme of the course is the relationship between modernity and the primitive as manifested in major cultural, aesthetic and political movements in the 20th century. Films are an integral part of the course. WRIT M

HIST 1240. Reason, Revolution and Reaction in Europe.
This course will explore cultural, economic, and political forces taking place in the globalizing Europe of the 18th and 19th centuries.

HIST 1250. Modern European Women’s History.
The history of European women from the Enlightenment to the present, with special attention to especially selected phases during the period in question. The course focuses on women’s participation in the development of institutional structures and theories of gender and sexuality.

The history of the book in Latin America does not only imply the import of European printed materials which began soon after 1492, but also the establishment of printing presses which spread across the continent during the colonial period. Thus, local intellectuals had the opportunity to communicate their own contributions for the building of a creole or proto-nationalistic conscience. As this course shall demonstrate, the history of the book is a crucial discipline which connects with political, cultural, religious, and social aspects. Prerequisites: A level of knowledge of the Spanish language equivalent to HISP 0500 (SP0050) would be helpful but not required.

HIST 1280. English History, 1529-1660.
Examines politics, religion, and society from the Protestant Reformation to the Puritan Revolution—a period of rapid and dramatic change when the world, for most English people, was turned upside down. Considers the experiences and concerns of ordinary men and women, as well as the elite. Takes in Scotland, Ireland, and the great migration to New England.

A survey of British history from the restoration of monarchy to the Wilkes affair and the loss of the American colonies. In addition to political developments such as the Glorious Revolution and the rise of party,
examines political ideology (including the great political theorist, John Locke) and various themes in social history (such as crime, popular protest, the sexual revolution, and the experiences of women).

HIST 1300. Victorian Britain: Liberalism, Morality and Empire. How and why did 19th-century Britain become the most powerful nation in the world? We will investigate Britain’s remarkable political stability, examine its industrial expansion and the growth of cities, explore its trademark philosophy-liberalism- and consider challenges to the parliamentary system, especially by workers; and chart the expansion of empire and its consequences for the metropole.

HIST 1310. Empire to Cool Britannia: Twentieth-Century Britain. One hundred years ago the greatest power in the world, Great Britain today is merely a junior partner in the new Europe. Yet is the history of Britain in the twentieth century chiefly a story of decline? Themes include the effects of the two world wars, the political incorporation of labor, decolonization and immigration, state expansion, and mass culture.

HIST 1320. Colonial Cuba: Slavery and Modernity in the Spanish Caribbean. This course explores the impact of modernity, slavery, and colonialism in the production of Cuban national identity. We will discuss how technologies of power affected the development of the island, with an emphasis on the role of modern forms of social domination based on race, gender, and class. To be taught in Cuba.

HIST 1330. Twentieth Century Europe: The Age of Extremes. Introducing students to the history and culture of twentieth-century Europe, we will discuss the major political, cultural, intellectual, economic changes that have characterized the history of Europe from 1890s to present time. Exploring the different trends in European history, and engaging with the major theoretical debates underlying the study of modern Europe. Course topic includes: total war, rise of mass politics and culture; Fascism, Nazism and the Holocaust; Communist and the Cold War; anti-colonialism and postcolonial European identity; Welfare state; post-Cold War era, using a variety of texts, including scholarly contributions, literary texts, autobiographical accounts, memoirs, film and film documentaries.

HIST 1331. Revolutionary Europe, 1750-1850. Many Europeans would have agreed with the Austrian statesman, Prince Metternich, when he concluded in 1832: "There is only one serious matter in Europe and that is revolution." Through a comparative study of revolutionary and counter-revolutionary trends in Britain, France, Italy, and German Central Europe, this course seeks to resurrect the turbulent character of early 19th-century Europe. We will engage with the main events of the period—1789, 1830, and 1848—but our special focus is the formation of national, gender, and class identities through close analysis of a broad range of primary sources: novels, memoirs, visual art, and poetry.

HIST 1350. Modern Genocide and Other Crimes against Humanity. Explores the relationship between perpetrators and victims, and questions the status of bystanders in three major modern genocides and at two important sites of encounters. It examines such issues as motivation and response to violence, ideology and greed, rescue and collaboration, repression and justice, in the cases of the Armenian genocide, the Holocaust, and the genocide in Rwanda, focusing first on the encounter between perpetrators and victims in the course of the killing and then on the encounter between defendants and survivors during subsequent post-genocide trials. The course will make extensive use of documents, testimonies, and eyewitness accounts. Limited to juniors and seniors who have taken at least one modern History course at Brown. Enrollment limited to 80.

HIST 1360. Between Marx and Coca-Cola: European Youth Cultures in the 'Long Sixties'. This comparative course is designed to guide students through the traits of a major characteristic of post-war European societies: the consolidation of separate youth cultures in the 'long Sixties'. The particular characteristics of the style, literature, socialization and self-perception of the European youth and the student bodies of both East and West will be analyzed, before proceeding to the cultural and political explosion of 1968, namely the symbolic condenser of new dynamic identities and the outbreak of long-lasting cultural tensions. The course further explores how in this time of crisis and transformation countries under authoritarian regimes, such as Czechoslovakia and Spain which had little in common on a political level, but also Yugoslavia and Greece later on, experienced a wave of student protest and youth radicalization similar to the countercultural tension of France, Italy, and West Germany. Issues such as urbanization, popular culture and cultural transfer will be widely used in the framework of this course.

HIST 1361. Empire and Nation: Violence and Cosmopolitanism in the Eastern Mediterranean, 1856-1922. With Greece in crisis and the Middle East experiencing an "Arab Spring" the Eastern Mediterranean is again hitting the headlines. This course offers a historical perspective to current developments by examining the social, political and cultural transformations between the mid-19th century and the 1922 Greco-Turkish exchange of populations while questioning the current image of the Eastern Mediterranean as a model of cosmopolitan conviviality and an archetypal of unbridled violence. Topics include state-building in Greece, the modernization of the Ottoman Empire, colonialism in Egypt, nationalism and coexistence, the Balkan wars and population movements, and, finally, contemporary nostalgias for fin-de-siècle Mediterranean.

HIST 1362. Failed States? Democracy and Dictatorship in Southern Europe. Why did some of the first European countries to introduce democratic institutions end up as dictatorships? This course examines the history of democracy and dictatorship in Spain, Italy, and Greece by looking at the development of liberal democracy, the challenges it faced, and the eventual establishment of dictatorial regimes during the nineteenth and twentieth centuries. Topics include the relationship between liberalism, authoritarianism, and nationalism; civil society and its discontinuities; military intervention in politics and proto-fascist movements; the character of charismatic leadership; the introduction of repressive state policies; and the role of violence and propaganda in the consolidation of authoritarian rule.

HIST 1370. Germany, 1914 to the Present. Explores the extraordinarily violent and no less remarkably creative course of German history in the 20th century. Emphasizes the impact of World War I; politics and culture in the Weimar Republic; conformity, resistance, and complicity in the Third Reich; Hitler’s war of destruction and genocide; the divergent paths of East and West Germanies; reunification and Germany’s future prospects.

HIST 1380. Peasant Rebellion and Popular Religion in China. Treats the role that religious beliefs played in inspiring and guiding popular protest and peasant rebellion in China up to the present. We will discuss the relationship between folk beliefs and the Three Teachings (Confucianism, Taoism, Buddhism) and state efforts to regulate religious belief. Then, through a series of case studies (the Eight Trigrams uprising, the Taiping rebellion, and the Boxer movement), we will examine how religious belief shaped both the ideology and the actions of protesters and rebels. We will conclude with a consideration of the place of religion in contemporary China.

HIST 1390. Modern Italy. Examination of Italian society, culture, and politics over the past two centuries. Particular attention is devoted to the creation of Italian national identity, the role of the Catholic Church, changing gender and class relations, conflicts between North and South, the development of fascism, postwar political developments, and changing Italian family life.

HIST 1400. The East Slavic World to 1800. The development of the Eastern Slavs before 1800, with an emphasis on Russia.

HIST 1410. Russia in the Era of Reforms, Revolutions, and World Wars. This course examines the rapid industrialization, modernization, and urbanization of Russia from the era of the "Great Reforms" (1860s) through the Second World War. We will examine both the growing discontentment among the population with autocracy’s efforts to maintain power and the Bolshevik effort to recreate the economy, society, and everyday life. Topics will include Russian Marxism and socialism.
terrorism, the Russian revolutions of 1917, the rise and consolidation of Soviet socialism, famine, the red terror, and World War II. M

HIST 1420. The Collapse of Socialism and the Rise of New Russia. This course examines late Soviet socialism, the collapse of the USSR, and the emergence of the new Russia. The following themes are emphasized in lectures and readings: the major features of de-Stalinization; Soviet and Russian foreign policy during and after the Cold War; the domestic and international causes and consequences of the collapse of the Soviet Union; and the emergence of a new Russian government and national identity during the 1990s and early 2000s.

HIST 1430. Truth on Trial: Justice in Italy, 1400-1800. Law courts had a profound impact on Italian society and culture between the Renaissance and the Enlightenment. Law courts helped define what constituted deviance, legitimate knowledge, and individual rights. They did so in a long ago world in which it was possible to imagine that some gifted individuals could fly, that certain people were created superior to others, and that the sun revolved around the earth. From the persecution of heretics and witches, to the trial of Galileo and the increasing use of courts by women and other marginalized groups, the Italian legal arena mediated what was political, social, scientific, and religious truth. By the eighteenth century many judicial practices came under criticism, including the use of torture and the death penalty. How did reformers attempt to remake the legal regime and the society in which it was by then so intricately entangled? LILE WRIT P

HIST 1440. Islamic History, 1400-1800. A survey of the major sociopolitical alignments of the central parts of the old world from 1400 to 1800. Particular attention given to the Ottoman, Safavi, and Mughal empires, which spanned much of these lands ca. 1500-1750. Concentrates on the socioeconomic and cultural environment within which the main institutions of these empires developed. P

HIST 1450. History of the Modern Middle East, 1800-1918. Transformation of Middle Eastern societies and polities from 1800 to 1918 under the impact of growing Western economic, political, and cultural domination. The rise of new patterns of economic organization, governance, sociopolitical alliances, and cultural tastes in Ottoman Turkey, Arab lands, and Iran. M

HIST 1453. Civilization, Empire, Nation: Competing Histories of the Middle East. The "Middle East" is a recent invention. A hundred years ago, none of the countries currently populating this region existed. This course considers how historians have used the concepts of civilization, empire, and nation to construct competing narratives about this region’s past from the rise of Islam to the present. Since facts acquire meanings through interpretative frameworks, we ask: What is privileged and what is hidden in these narratives? And what would the history of this region look like if we can see it through the eyes of the peoples who have long lived there? E

HIST 1460. History of the Modern Middle East since 1918. This course examines the histories of colonialism and nationalism in the modern Middle East, underlining the integral impacts of the World Wars and the Cold War in shaping the political, social, and cultural contours of the region. Throughout the 20th c., revolutionary ideologies rooted in the age of empire fed tensions between state and society and amongst states. In 2011, despotic regimes gave way to a revolutionary wave fashioned by ordinary people demanding freedom, dignity, and transparent governance. The fate of these revolutions remains unsettled. This course has been updated to provide a historical context to “the Arab Spring.”

HIST 1470. Southern African History. This course examines major themes of the history of southern Africa from the earliest times until 1994, with a heavy emphasis on historiographical debates. Our discussions of the South African past will always be informed by a consideration of the approach of the scholars who have interpreted and presented it as history. Our major questions concern the origins of historical change and the creation of racial groups. We will probe the significance of race in South African history but also the limitations of its explanatory power. Readings are arranged at three levels. First, we will be reading primary sources, to gain experience in working with the evidence that informs historical work. Second, we will be working through a concise textbook that summarizes the major themes of South African history. Third, we will be reading specialized scholarly books and articles, chosen to illustrate recent discussions about the interpretation of South Africa’s past. The course will meet twice a week for lecture and discussion groups to meet once a week. E

HIST 1480. The Crusades. From the 11th through the 15th centuries, Christians from Western Europe were pitted in a series of Holy Wars against their Islamic, Pagan, and even other Christian neighbors. This course offers a multi-faceted overview of military, political, religious and cultural aspects of the Crusades, including the Crusades’ long legacy of cultural conflict in our contemporary world. P

HIST 1490. History of Medicine I: Medical Traditions in the Old World Before 1700. People have always attempted to promote health and prolong life, and to ameliorate bodily suffering. Those living in parts of Eurasia also developed textual traditions that, together with material remains, allow historians to explore their medical practices and explanations, including changes in their traditions, sometimes caused by interactions with other peoples of Europe, Asia, and Africa. The course will introduce students to the major medical traditions of the Old World to about 1700, with an emphasis on Europe, and explore some of the reasons for change. A knowledge of languages and the social and natural sciences is welcome but not required. Not open to first year students. P

HIST 1491. History of Medicine II: The Development of Scientific Medicine in Europe and the World. From the 18th century onward, Western medicine has claimed universal validity due to its scientific foundations, relegating other kinds of medicine to the status of "alternative" practices. The course therefore examines the development of scientific medicine in Europe and elsewhere up to the late 20th century, and its relationships with other medical ideas, practices, and traditions. Students with a knowledge of languages and the social and natural sciences are welcome but no prerequisites are required. Not open to first year students. E

HIST 1492. Global History and Medicine. How medicine in one place was altered by changes elsewhere

HIST 1500. The Chinese Renaissance. Selected topics in the history of China’s middle period, the Tang and Sung Dynasties (AD 618-1279). Clustered around readings in political history, these materials focus on social and economic history, or alternatively, intellectual and cultural issues. HI 41 is recommended as prerequisite. P

HIST 1501. Modern China: 1800-2011. This course surveys the history of China from the mid-Qing (around 1800) to the present day—from relative decline, to revolutionary chaos, to reemergence as a global power. Major themes include imperial decay and the construction of the nation state, economic development and its institutional foundations, the collapse of Confucianism as a mainstream sociopolitical ideology, and the formation of Chinese Socialism. In particular, we will focus on the three-way interaction between intellectual trends, sociopolitical institutions, and economic change. The course moves in relatively broad narrative and analytical strokes, drawing comparisons with the histories of other regions, including Japan, India and Europe. M

HIST 1510A. China’s Late Empires. A post-nationalist perspective on history in China from 1200-1930, with emphasis on empire–formation, gender, and daily life in the Mongol Yuan, Chinese Ming, and Manchu Qing empires, as well as national reconstructions of the Chinese past in the early twentieth century. P

HIST 1510B. Race and Ethnicity in China. P

HIST 1520A. China Since 1936. Examines competing visions of Modern China as seen from the vantage points of China, Taiwan, Hong Kong, Tibet, and Inner Asia. Emphasizes changing relations among these places and China’s contributions to the rise and fall of international socialism, feminism, decolonization, the cold war, the emergence of Asian capitalism, the growth of international exile communities. HI 41 or 151 recommended. Lecture with discussion. M

HIST 1520B. Modern China. Examines competing visions of twentieth-century China as seen from the vantage points of various regimes in China, as well as Taiwan, Hong Kong, and Tibet. Emphasizes changing relations among these places and China’s place in the history of the rise and fall of international socialism,
feminism, decolonization, the cold war, and the emergence of East Asian capitalism. Lecture with discussion. M

**HIST 1520C. The Modern Chinese Nation: An Idea and Its Limits**

How did the Chinese empire become a nation-state? This question drives a survey of the history of China, Taiwan, Hong Kong and Chinese societies overseas from 1895 to the present. We will explore a variety of conceptions of the Chinese nation and the rise of new state formations, investigating the extent to which they shaped the way people experienced everyday life. We will also pay attention to those who have been excluded by or unwillingly drafted into these processes, or who live outside them altogether, looking at other ways society has been organized and culture defined. M

**HIST 1530. Modern Korea: Contending with Modernity**

This course examines the extraordinarily rapid revolution of Korea from isolated, agrarian society into a culturally modern, industrialized, and democratic nation that is an important actor on the world stage. It will also investigate how a non-Western society generates its own inspiration for human relations, social structure, political and cultural values. Includes coverage of North Korea. M

**HIST 1540. Samurai and Merchants, Prostitutes and Priests: Japanese Urban Culture in the Early Modern Period**

Examines the cultural traditions of the urban samurai, the wealthy merchant, and the plebian artisan that emerged in the great metropolises of Edo, Osaka, and Kyoto during the early modern period. Focuses on the efforts of the government to mold certain kinds of cultural development for its own purposes and the efforts of various social groups to redirect those efforts to suit their desires and self-interest. P

**HIST 1550. From Amsterdam to Istanbul: Jews in the Early Modern World**

What can history of a minority teach us about the history of Europe? Using text, pictures, and music, we will examine the relationship of Jewish and non-Jewish societies in the early period, focusing on how the development of the modern state and the blurring of cultural boundaries within the Jewish world and between Jews and non-Jews transformed concepts of identity. New patterns of Jewish life in the Atlantic world, the Ukrainian steppe, and the Middle East, as well as the cultural revolutions which led to the codification of Jewish law and the spread of Kabbalah, will be examined. Not open to first year students. E

The Polish-Lithuanian Commonwealth was the largest state in early-modern Europe, home to a diversity of ethnic and religious groups. We will examine how they lived together and interacted in this unique setting. The rise of the nobility and development of Poland’s constitutional monarchy show how Polish identity was transformed. The interaction of Germans, Italians, Scots, and Jews as “national” groups within urban society, and the economic dynamism of Jews and Armenians reveal the possibilities and problems of social integration. The experiences of Protestants, the Ukrainian Orthodox, and the Moslem Tatars demonstrate the meaning and limitations of Polish religious tolerance. M

**HIST 1552. Co-Existence and Conflict: Polish-Jewish Relations From 1500 Until Today**

Relations between Poles and Jews formed one of the bitterest national-religious conflicts in twentieth-century Eastern Europe. Like all such conflicts, however, it did not simply happen; nor were relations uniformly hostile. In this course we examine the roots of the conflict, stretching back centuries, and the ways in peaceful coexistence between Poles and Jews could breed hostility and violence. Topics include: Jewish and the early-modern nobility; the nineteenth-century “Polish-Jewish Brotherhood”; the exclusionary politics of the interwar Polish republic; Poland’s role in the Holocaust; the post-war Communist regime and the Jews; Polish-Jewish relations following the collapse of communism. E

**HIST 1560. The Social History of Modern Japan**

Since Japan’s modern transformation began some 150 years ago, its citizens have repeatedly confronted questions about the nature of democracy, capitalism, and modernity itself, and in so doing have shaped the institutions of society into new and powerful patterns. This course examines those transformations through the lenses of popular culture and social history. M

**HIST 1570. Japan’s Pacific War: 1937-1945**

Uses film, oral histories, historical fiction, and more traditional forms of historical interpretation to explore the events, ideas, and legacies of Japan’s Pacific War. The armed conflict began in 1937 with the Japanese invasion of China and ended in 1945 with the atomic bombing of Hiroshima and Nagasaki. Some attention is paid to military developments, but the principle concerns fall into the areas of mutual images, mobilization, and memory. M

**HIST 1580. Gandhi’s India: South Asia Before 1947**

This course will examine the recovery of early South Asia through history, archaeology and art, from the discovery of the Indus valley civilization to the establishment of Mughal rule, paying particular attention to colonial and post-colonial constructions and contestations over 'antiquity' and the making of Hindi, Buddhist and Muslim civilizations. M

**HIST 1610. Reform and Rebellion: Mexico, 1700-1887**

This course focuses on Mexico’s difficult transition from colony to nation. We will examine the key political, social, economic, and cultural developments during this period. Major topics will include: the paradoxical eighteenth century, which saw Mexico emerge as the most prosperous region of the Spanish empire, even as social and economic tensions deepened; the outbreak of peasant rebellions in the early nineteenth century; the elite-led movement for independence; the economic decline and political turmoil of the early republic; foreign interventions by the United States and France; and the rise of the Liberals as Mexico’s dominant political force. E

**HIST 1620. Colonial Latin America**

Colonial Latin America, from Columbus’s voyage in 1492 to Independence in the nineteenth century, was the creation of three peoples: Europeans, Native Americans, and Africans. The Spanish and Portuguese conquerors brought with them the world of the Crusades, the Inquisition, and the Renaissance. Native Americans lived there already, in rich empires and hunter-gatherer bands. Africans came as slaves from Senegal, Nigeria, Congo and Angola, bringing old traditions and creating new ones. These diverse peoples blended together to form a new people. This was a place of violence, slavery and oppression -- but also of art, faith, new societies and new ideas. P

**HIST 1630. Modern Latin America I**

This course offers an introduction to the history of Latin America, beginning with the late colonial period and running through the close of the twentieth century. Emphasis is placed on political, social, and cultural history; less attention is paid to diplomatic and economic history. M

**HIST 1640. Clash of Empires in Latin America**

Examines Latin America as the scene of international rivalry from the 16th to the 19th century. Topics include comparative colonization, the transatlantic slave trade, privatization and piracy in the Caribbean, and the creation of an "Atlantic world." P

**HIST 1641. The Age of Revolutions in the Atlantic World, 1760-1824**

In the middle of the eighteenth century, the Americanas were a foreign subsidiary of a handful of western European monarchies; not long into the nineteenth century, most of North and South America was composed of independent republics. What happened in the meantime? Often considered separately, the revolutions in British North America, Peru, France, Saint-Domingue (Haiti) and Spanish America had diverse local circumstances but also composed a single narrative of intellectual ferment, imperial reform and over-reach, accelerating violence and, ultimately, the forging of new political communities. It was a process that helped create the modern world. E

**HIST 1650. Modern Latin America II**

No description available

**HIST 1660. The Mexican Revolution**

An in-depth study of the Mexican Revolution. The focus is on the years of revolutionary violence (1910-1920), but considerable attention is also paid
to the roots of the Revolution and to its socioeconomic and political impact in the period 1920-1940. M

HIST 1740. Civil War and Reconstruction. Examines the origins of the Civil War, the war itself, and the period of Reconstruction. Analyzes the transformation of society, politics, and culture during this period, with special emphasis on slavery and emancipation, the revolutionary nature of the war, and the meanings and legacies of reunion. Not a course on military history. M

HIST 1750. American Politics and Culture Since 1945. History of the United States between the end of World War II and the present. Major themes and topics include race and civil rights, women's history and feminism, the Cold War, Vietnam, and U.S. foreign policy, suburbanization and the urban crisis, the rise and fall of the welfare state, and a history of consumption and popular culture. M

HIST 1754. Democracy and Inequality in the United States Since the New Deal. This course examines the United States from the 1930s to the present. We will focus on the interaction between political economy, public policy, racial inequality, class conflict, social movements, and national politics, and how these spheres of American life collectively and cumulatively shaped the modern U.S. and its internal distribution of wealth and power. M

HIST 1755. The Intimate State: The Politics of Gender, Sex, and Family in the U.S., 1873-Present. Examines the "intimate politics" of gender norms, sex and sexuality, and family structure in American history, from the 1870s to the present, focusing on law and political conflict. Topics include laws regulating sex and marriage; social norms governing gender roles in both private and public spheres; the range of political perspectives (from feminist to conservative) on sex, sexuality, and family, and the relationship of gender to notions of nationhood and the role of the modern state. Some background in history strongly recommended. M

HIST 1760. Political Movements in Twentieth-Century America. Political movements in the United States in the twentieth century. History and theory. Highlights of the course include: populism, progressivism, segregationism, first wave feminism, labor movement, civil rights, new left, second wave feminism, new right. The course focuses on the origins, nature, ideologies, and outcomes of major political movements on both left and right in the twentieth century United States. M

HIST 1770. American Cultural History: 1789-1865. This class investigates the relationship of ritual, language, and power in the United States between the Revolution and the Civil War. The course approaches cultural history as a methodology and explores how insights from anthropology and linguistic theory have allowed scholars to make new arguments about the past. One half of the semester addresses American nation-building as a matter of cultural production (rather than statecraft) and considers how public space, print culture, and consumerism set the boundaries of national identity and membership in the body politic. The second half of the course focuses on American slavery and draws on Southern legal documents to consider how enslaved men and women contested the commodification, medicalization, criminalization, and sexualization of their bodies. Students will conduct primary source research to address how conceptions of enslaved bodies organized the larger structures of racial and gendered power in Antebellum America. M

HIST 1790. North American Environmental History. Analyzes the relationship between ecological and social change in North America from pre-Columbian times to the 20th century. Topics include Indian uses of the environment; the reshaping of ecosystems under European colonization; the transfer of plants, animals, and diseases from Africa and Europe to the Americas; urbanization; and the rise of the environmental movement. Recommended prerequisites: HIST 0510 and 0520. E

HIST 1791. Exploration and Expertise: The Role of Science in American Society. In eighteenth century, scientific pursuits were the province of a small select group of gentlemen like Benjamin Franklin and Thomas Jefferson. By the end of twentieth, professional scientists numbered nearly 3 million. This course seeks to explain how and why science grew so large and so influential in the past 200 years, investigating both conceptual developments internal to particular disciplines, as well as external changes in social and institutional contexts. Students will have the opportunity
to rethink some of the defining dualisms of American culture: elitism vs. democracy; centralization vs. pluralism; pure vs. applied. M

HIST 1800. History of Religion in America, 1600-1865.
This course considers the major people, events, and issues in the history of religion in North America, from pre-Columbian Native cosmologies to the tumultuous events of the Civil War. Attention will be given to "religion as lived" by ordinary people, as well as to the ways that "religion" shaped (or not) larger cultural issues such as immigration, public policy, social reform, warfare, democracy, slavery, and women's rights. Advanced undergraduate and graduate students interested in religion and American history will find this course useful. Prior exposure to American history is helpful but not required; there are no formal prerequisites. E

HIST 1801. Religion, Politics, and Culture in America, 1865 - Present.
Religion has played an undeniable role in the contemporary American cultural landscape. This course lends some perspective on the present by investigating the various and, at times, surprising role religion has played in history in the shaping of American culture from 1865 to the present. M

This course examines the intertwined histories of the United States and the Indian nations of North America from 1800 to the present day. Particular emphasis on the unique legal experiences of American Indians, federal Indian policy, the diversity of Native communities, and the methodological challenges of American Indian history. HIST 1805 First Nations course is recommended but not mandatory.

HIST 1820. American Urban History to 1870.
Both a survey covering urbanization in America from colonial times to the present, and a specialized focus exploring American history from an urban frame of reference. Examines the premodern, "walking" city from 1600-1870. Includes such topics as cities in the Revolution and Civil War, the development of urban services, westward expansion, and social structure. E

A survey with a specialized focus exploring American history from an urban frame of reference. Topics include the social consequences of the modern city, politics, reform, and federal-city relations. M

HIST 1840. Capitalism, Slavery and the Economy of Early America.
The simultaneous expansion of capitalism and slavery witnessed intense struggle over the boundaries of the market, self-interest, and economic justice. This course traces those arguments from Colonization through Reconstruction and asks how common people navigate the shifting terrain of economic life. The approach is one of cultural and social history, rather than the application of economic models to the past. E

HIST 1845. Capitalism, 1500 to the Present.
This course will study capitalism as a historically-specific and contingent system of economic organization. By "denaturalizing" capitalism, we will seek to embed markets in a wide range of social relations, cultural practices, and institutional arrangements. The course begins with early modern Europe and the Atlantic Slave Trade, before moving into Enlightenment political economy and the Industrial Revolution. The nineteenth-century focus is on empire, law, and the rise of the corporation, before culminating in the twentieth-century of mass consumption, the IMF, deindustrialization, and the rise of the securities industry. This course presumes no economics background. E

HIST 1850. American Legal and Constitutional History.
History of American law and constitutions from European settlement to the end of the 20th century. Not a comprehensive survey but a study of specific issues or episodes connecting law and history, including witchcraft trials, slavery, contests over Native American lands, delineations of race and gender, regulation of morals and the economy, and the construction of privacy. E

HIST 1860. European Women's History.
This course deals with the history of European women and gender from the Enlightenment to the present. It will focus on large historical themes and questions, especially shifting constructions of femininity and masculinity. It will begin with an analysis of eighteenth-century philosophies regarding women and gender, and it will move to examinations of specific topics such as industrialization, Victorian femininity, the suffrage movements, gender and the Great War, interwar sexuality, fascism, gender and the Second World War, and the sexual revolution. M

HIST 1870. Modern France.
This course will explore the major events in French history from the time of absolutism to the present. We will devote particular attention to the concept of French national self-definition. Our central question will be: who belongs to the French nation at various moments in its history? Through focus on this question, we will study how phenomena such as revolution, war, sexuality, race, and imperialism shift the boundaries of national belonging in modern France. M

Modern Britain's history encompasses the industrial revolution, one of the world's greatest empires, two world wars, and one of the first welfare states. In this introductory course, we will examine this history through the lenses of the class system, imperialism, gender roles, and ideas about progress and decline. M

HIST 1890. Empires in America to 1890.
This course surveys the development of American foreign relations from initial encounters between Native Americans and newly arrived Europeans to the extension of EuroAmerican power beyond the continental United States. By being attentive to a wider global context, we will attempt to understand the trajectory of "America" from a colonial hinterland to dominant world power. E

HIST 1900. American Empire Since 1890.
This survey of twentieth-century US foreign relations will focus on the interplay between the rise of the United States as a superpower and American culture and society. Topics include: ideology and U.S. foreign policy, imperialism and American political culture, U.S. social movements and international affairs, and the relationship between U.S. power abroad and domestic race, gender and class arrangements. M

HIST 1901. The Vietnam War in Vietnamese History.
The causes, course and consequences of the Vietnam War, with emphasis on the social and cultural features of the conflict, from a Vietnamese perspective. The experiences of ordinary soldiers and civilians to be considered as much as the motives and decisions of Vietnamese and American politicians and generals. Not open to first-year students. M

Narrated like an adventure story, the history of modern Ireland seems to move from uprising to famine to revolution in a romantic and dramatic arc. This course offers a critical take on the nationalist narrative. Topics include: the Celtic Revival, the role of women, the power of the Catholic Church, Ireland's role in the British Empire, and Ireland's recent turn as the poster-child success story of the European Union. M

HIST 1920. Chicago and America.
This course explores the history of Chicago, but also uses that history as a way to think about issues in American history. Sources include novels, memoirs, popular histories, film and music. M

HIST 1940. Making the Nation: Race, Class, Gender, and the Concept of Citizenship in U.S. History.
Explores meanings and history of citizenship in the U.S. from the drafting of the national constitution in 1787 to the present. Topics include legal, political, and social content of belonging to the nation. What does citizenship mean? What is the national body? Who has been defined in and out of the nation and why? Focus on race, class, gender, and nationality as analytical frameworks.

Overview of the European expansion in the East during the early modern period. Through an analysis of European encounters with the peoples of India, Southeast Asia, China, and Japan, examines different forms of interaction. Stresses contrasts with the Portuguese, Dutch, French, and English merchant empires. P

HIST 1950C. Portuguese Navigations and Encounters with Civilizations (Africa and Brazil).
Survey of the making of the Southern Atlantic World during the early modern period based on the interaction between Portugal, Africa, and Brazil. Topics include slavery and African agency, the role of merchant communities. Indian answers to European encounters, economic cycles, colonial powers and forms of resistance, the conflicts between the Crown, the settlers and the missionaries, and the formation of colonial elites in the quest of a new nation. Conducted in English.

Overview of Iberia from the end of medieval times to the period before the Enlightenment, the period when Portugal and Spain charted the globe and established their respective Empires. The changing concepts of Golden Age and Decline are explored in their political, economic, social, and cultural contexts. Particular emphasis is given to the period from 1580 to 1640 when the three Habsburg monarchs ruled a united Iberia. Conducted in English.

HIST 1950E. Europe and the Indian Ocean, 1500 - 1800.
This course aims to characterize the Indian Ocean in the early modern period and examine the complex relationship between this lively world and a variety of European players. The classical topics related to the economic history of maritime Asia and how the trading world of the Indian Ocean was impacted by different Western powers (the Portuguese Estado da India, the European commercial companies) will be addressed. However, the course will focus on a set of relevant social and cultural phenomena, ranging from the interaction between European and Asian political, religious, scientific and artistic structures to the indigenization of individuals, groups and "micro-societies," or the formation and circulation of mutual ethnographical images. P

HIST 1950F. From Morocco to China: Frontier Societies, Cultural Brokers, Multiple Identities in Portuguese Empire.
This course focuses on the study of social and cultural forms of hybridism within the Portuguese early modern empire. By exploring the interaction between Portuguese soldiers, merchants and missionaries and a variety of litoral societies stretching from Morocco and West Africa to Brazil and Asia, the course will discuss both profile and role of those go-betweens and cultural brokers that easily moved between distinct cultural worlds. The creation and development of multiple social, ethnic and “national” identities is also under consideration. P

HIST 1965. Social Change in the 1960s.
The 1960s continue to resonate in today’s culture as the decade left an indelible imprint on the present society. This course focuses on the tumultuous decade and incorporates the following topics: the Civil Rights Movement, race and ethnicity, the Women’s Movement, the Peace movement, student movements, Vietnam War and foreign policy, sexuality, and cultural productions (music, film, art, photography). Lectures are rooted in historical narratives, but engage with interdisciplinary methodologies. In this way, as the semester unfolds we witness the complexity, the intertwining of movements and issues, and the evolution of cultural and political ideas and policy. M
Soviet-supported regimes assumed power throughout East-Central Europe in the wake of World War II. This seminar examines how writers, filmmakers, and other intellectuals grappled with the experience of communism between 1945 and 1989. When and how did they begin to oppose their political regimes, and what strategies did they use to defy state power and aesthetic orthodoxy? Readings include novels, plays, and essays (in English translation) by Czeslaw Milosz, Milan Kundera, Eugene Ionesco, Adam Michnik, Vaclav Havel, and George Konrad. Enrollment limited to 20.

Explores the different phases of the dialogue between aesthetic modernism and mass culture. In particular, it focuses on the construction of such archetypes of the modern artist as the bohemian, the flaneur, the decadent, and the primitive in the context of Parisian urban culture between 1830 and 1900.

HIST 1970C. African Environmental History.
A seminar on the history of interactions between humans and the environment in sub-Saharan Africa. Begins with consideration of theory in environmental history. Continues by exploring important issues in the field, including cultivation, pastoralism, disease, population, famine, and conservation. Preference given to students with prior background in African studies.

This seminar examines political, social, and cultural developments in 20th-century Mexico. We will pay particular attention to the emergence of the post-revolutionary state and its relationship to popular sectors, culminating in the crises of the 1980’s and 1990’s.

HIST 1970E. The Rise and Fall of the British Empire.
How did Britain amass the largest empire in the world? How did British rule affect those who were subject to it? In what ways did empire change the metropole? This course surveys the “second” British empire from the late eighteenth century through decolonization. We will focus upon three colonies ¿ Australia, India, and Kenya ¿ in an effort to understand the economic, cultural, social and political consequences of imperialism for both the colonized peoples and the British themselves. Throughout this course, we will draw comparisons among these three territories in order to determine how imperialism adapted to local conditions, and which features of empire were broadly shared.

This seminar considers economic inequality in colonial British North America and the newly United States. Studying everyone from sailors, servants, and slaves in the seventeenth century to mill owners in the nineteenth century, this course will look at the changing material structures of economic inequality and the shifting arguments that legitimized or challenged that inequality. Readings will explore how historians have approached the subject of inequality in the American past, with specific attention on class as a mode of analysis. Is class an objective category external to a particular moment in the past? Is class an identity or consciousness that people take upon themselves at a specific time and place? How is class related to other structures of inequality, such as patriarchy and race-based slavery? Specific topics include the “Atlantic Proletariat”, the emergence of the eighteenth-century middle class, the contest over the Constitution in 1780s and 1790s, the labor movement of the 1820s and 1830s, and the ideology of Antebellum America’s fiercest opponents of capitalism, Southern slaveholders. Students will write extended papers that place primary research in conversation with relevant historiography. Enrollment limited to: 20. Written permission required.

HIST 1970G. American Indian History.
This course analyzes the experiences of native peoples in the U.S. from the early national period to the early twentieth century. Topics covered include the rise of new forms of indigenous spirituality, trade, and political organization; federal Indian policy; and the methodological challenges of the "new Indian history." Recommended: HIST 0510 and 0520. Written permission required.

Undergraduate seminar on selected topics in American legal and constitutional history, focusing mainly on the period before the twentieth century. Examines recent debates surrounding such subjects as the making and meaning of the U.S. Constitution; law as an instrument of economic development and exploitation; crime and punishment in the early republic; construction of racial and gender categories through law; and the evolution of rights-consciousness. Enrollment limited to 20. Students should contact the instructor before the beginning of the semester if they are interested in taking the course. Instructor permission required.

How have Americans defined manhood? And how have these definitions changed across time, social classes, ethnic and religious groups? We will explore what it means to “be a man” in changing historical contexts.

Today we live in a ‘confessional culture’. A family’s most intimate secrets are no longer considered sacred. We will chart the shifting boundaries between what was considered private and public in Britain and the U.S. from the Victorian era to the 1980s. Topics: skeletons in the cupboard (the mentally disabled child, bankruptcy, the gay uncle) as well as the means by which family secrets were outed (the memoir, the tabloid paper, the divorce case). Instructor permission required.

What do we mean by the “everyday” and how can we study it in the social sciences and art? This seminar focuses on attempts to answer this question both on the theoretical and the empirical levels. Readings will include philosophers of everyday life and examples of recent scholarship in “everyday life studies” that have revolutionized the study of leisure, entertainment, national identity, decolonization and gender.

HIST 1970L. The Jewish Problem.
Jewish history took a dramatic turn at the end of the 18th century; having previously lived in a condition of relative isolation, many European Jewish communities began winning citizenship in modern nation-states. The inclusion of Jewish minorities raised questions about the nature of citizenship for Jews and non-Jews alike: Who made up the nation? Was religion a key component of citizenship? Could the outsiders of the past be considered the compatriots of the future? Collectively, these questions made up “the Jewish problem,” which will be the subject of this course. We will examine both the origins of the “problem” and the range of assimilationist, anti-Semitic, nationalist and Zionist solutions that were articulated. Enrollment limited to 20.

Few events define the modern era as these do: the detonation of the world’s first atomic device, the destruction of Hiroshima, and the use of a second nuclear weapon on Nagasaki. This course explores these events and their legacies through survivors’ accounts, documentation in literature and film, and the troubled personal and public histories connecting Trinity, Hiroshima, and Nagasaki.

We will read and discuss personal narratives that help illuminate recent American history. Race and ethnicity, gender and sexuality, wealth and poverty are all important topics. Enrollment limited to 20 seniors and graduate students in American Civilization and History.

This innovative seminar will combine readings and discussions with visiting scholars, writers and activists to critically examine the making of national and cultural boundaries of postcolonial South Asia - but with the goal to substantially rethink them. Connecting with the Watson Institute’s broad thematic of ‘inequality’ and history’s attention to chronology, we will trek through well-known and marginal dates that allow us to interrogate the inequalities cast by poverty, religion, caste, ethnicity and the environment and the remarkable contestations of people in the region that have challenged state power, and reshaped South Asia’s postcolonial history.

Selected topics in the social history of early modern England (c.1500-1800), with particular emphasis on the experiences of women.
HIST 1970Q. Chicago and America.
We will explore the history and culture of the "Hog butcher for the world/Tool Maker/Stacker of Wheat...City of the Big Shoulders." The course examines urban development and growth, ethnic diversity, labor radicalism. We will also devote considerable time to the culture of the city, its art and literature, including representations of Chicago in novels and film

This course explores Confucian values in late imperial and modern China through writings on family, society, and history. Students will be working mostly with primary sources in English translation. P

A Victorian dance-card, a Depression-era movie poster, a brass button from a Napoleonic War uniform, a notebook of handwritten recipes, a funeral, or a sinuous garden pathway: all of these objects and phenomena are classified as "ephemera" - historical data of transitory existence. And yet, the ephemeral object or experience is often surprisingly durable and revealing of the historical past. In this seminar, we will explore the secret meanings of the past that material objects can help us unlock. We will focus upon the histories of British families and their milieu throughout this period: how ephemeral data can not only help us understand how they lived and their value systems, but also how and why those values changed over time.

This seminar examines the role of disease, medicine, and health in the history of the Atlantic World. Our analysis will be centered on events that took place in Latin America, the Caribbean, and Sub-Saharan Africa, during the era of European colonial expansion (1490-1940). In these four and a half centuries, the West became the dominant force in global geopolitics and Western medicine emerged as the hegemonic form of healing worldwide. This seminar explores the complex relationship between these two historical developments

This seminar will undertake a close examination of race and ethnic formations as grounded in the historical experiences and interactions of major ethnoracial groups and communities in Latin America -- negros, indios, chinos, arare, and blancos. We will focus on the historical and social constructions of race and ethnic identities and the significance of miscegenation and race mixtures (mestizaje and castas), using case studies from select temporal and spatial contexts, such as the Spanish Caribbean, colonial Mexico and Peru, the US-Mexico borderlands during the transition to the 20th century, and contemporary Brazil

This seminar will explore changing ideas about the theory and practice of medicine from the Middle Ages to the early seventeenth century. During this period, medical practitioners faced new diseases, including plague and syphilis, which spurred a rethinking of traditional therapeutics. At the same time, some physicians began to challenge the ancient understanding of the body as a balance of humors and microcosm of the world, reconceptualizing it as a chemical entity instead. We will explore these major shifts, as well as the introduction of human dissection and anatomy, tensions within the medical marketplace between university-educated physicians and unlicensed "charlatans," and the experiences of patients in navigating health and disease. The emphasis in this seminar is not on locating the origins of modern medicine, as much as on understanding medieval and Renaissance medicine on its own terms. Written permission required

HIST 1970X. Comparative American Slavery.
Seeks to understand why slaves were treated more harshly in some parts of Americas than in others. Explores how such factors as religion, law, demographics, slave resistance, the actions of Native Americans, ethnicity (of red, white, and black peoples), and the formation of racial identity influenced the treatment of slaves. E

Beginning with the psychic and environmental dislocations wrought by the advent of the Bomb, this seminar will move forward in time to trace the nation's growing environmental awareness and concern as we seek to understand what underlies contemporary environmentalism. In so doing we will look not only at classic texts like Aldo Leopold's Sand County Almanac and Rachel Carson's Silent Spring, but many complicating traditional notions of the origins and conduct of the modern environmental movement

HIST 1970Z. Cuban Revolutions: Nineteenth through Twenty-First Century.
Beginning in 1959, Cuba was transformed from a shady tourist destination and virtual colony of the United States into an ostensibly socialist society and a Soviet client state. This seminar examines the Cuban Revolution in historical perspective, beginning with the tumult of the nineteenth century and ending with the collapse of the USSR and the ongoing remaking of Cuban society

HIST 1971A. Cold War/War on Terror.
This seminar will examine the militarization of U.S. society since the end of World War II. Its purpose is to provide a historical context to the current "War on Terror" by studying the foreign policy, political rhetoric, social movements, and popular culture of the Cold War.

HIST 1971B. Consumer Culture in the United States.
This seminar will examine the history of consumer culture in the United States, with readings spanning the colonial era through the present. We will focus on how the culture of the U.S. has encouraged and shaped the development of consumer culture, and how the growing power of that consumer culture has, in turn, influenced American culture and life and (arguably) impacted other cultures. Enrollment limited to 20

HIST 1971C. Gender and Sexuality in Early Modern Europe.
Explores how notions of masculinity and femininity structured society, religion, intellectual life and politics in early modern Europe. Examines how individual women and men negotiated and contested idealized notions of gender in their daily lives, as well as how ideals informed understandings of nature, power and politics. Topics include debates about womens education, sex crimes, moral moral reforms, and witchcraft

HIST 1971D. Pirates to Poppies: America and the China Trades.
From the early colonial period in North America to the 19th-century Opium Wars in China, we will examine the passionate and competitive Western fascination with the Celestial Empire and its importance to American economic and cultural development. From pirates who piloted the Indian Ocean to the tea that sparked the Revolution to U.S. involvement in smuggling drugs into China, early Americans actively participated in this global commerce. Prized trade goods and art were central to the China trades, so this course develops a critical methodology for material and visual culture analysis. Enrollment limited to 22.

HIST 1971E. The Inca Garcilaso de la Vega.
The Inca Garcilaso de la Vega, the son of a Spanish conquistador and an Inca princess, is a major figure in the Hispanic American literature and culture of the post-conquest period. A large number of publications have been devoted to his life and works, and the flow tends to increase in recent times. This seminar intends to review the most recent trends in this intellectual contribution, stressing some relevant aspects in the historiographic construction of Garcilaso's Comentarios Reales de los Incas. Prerequisite: A level of knowledge of the Spanish language equivalent to HISP 0500 (SP0050) would be helpful but not required

HIST 1971F. Gender and Society in the High Middle Ages.
This course explores the changing constructions of masculinity and femininity in the High Middle Ages and considers the sources and social consequences of these cultural conceptions. The issues addressed - including sexuality, sanctity, sin, the body, and transgression of gender boundaries- raise the problem of understanding the mutually informing relationship between cultural representations and social context

HIST 1971G. Drinking in Britain and America c. 1500-1800.
This course examines the cultural, social, and political life of beverages such as beer, gin, coffee and tea within Britain and America, paying special attention to puritan social movements, popular resistance and revolutionary struggles
This course will examine the reciprocal relevance of cinema for history and history for cinema, within the context of the so-called 'political' filmmaking. It will mainly focus on political inflected cinema and 'cinema of social concern' of the 1960s and 1970s, mainly in Europe. Drawing on a range of films the course will consider the social and political imaginary of these decades, focusing on the masters of the genre and proceeding with films made on particular historical junctures, their relation to the actual period of realization and the political messages they sought to send across. The course will examine specific case studies in order to investigate how film can be used to explore the cultural, political and social history of particular societies in important transitional periods. The case studies include: Fascist Italy; Second World War France; the Algerian War; Francoist Spain; the Greek Civil War; Greece under the Colonels; Britain in the 1950s and 1960s; and Latin American dictatorships. M

HIST 1971L. High Culture/Low Culture.
Explores the development of culture as a historical idea coterminous with industrialism, democracy, and mass society in 19th- and 20th-century Europe. Concerned particularly with the growing differentiation between high culture and popular culture and with attempts to theorize these realms by thinkers such as Matthew Arnold, Max Nordau, Raymond Williams, Theodore Adorno, Clifford Geertz, and Pierre Bourdieu. M

HIST 1971J. Ethnic Women's Histories.
By comparing literature written by and about women of different ethnic backgrounds, this seminar considers how African American, Asian American, Jewish, Chicana/Latina, and Native American women of varying social locations and generations understood their ethnicity in relationship to their lives in America, as well as the historian's task uncovering that relationship. The goal of the course is to engage with the concept of "sisterhood" and to ask how this rhetorical device brings together and divides them by failing to fully take into account the historical ways in which different backgrounds influenced women's identities and choices.

This course is an inquiry into the causes, nature and significance of the dramatic events that took place in Tiananmen Square and across the People's Republic of China in the spring of 1989. The course pushes the borders of contemporary history, forcing students to think through the meaning and limits of historical inquiry itself. The student movement in Beijing and violent crackdown by the state on June 4th is the narrative at the core of our investigation. However, the course will be primarily concerned with the historical trends, socio-political changes, and reformist thinking out of which the student movement emerged. A rare set of primary documents recording the ideas of leading reformist figures who gathered together at the peak of the student movement will provide focus for exploring the roots of Tiananmen and its historical significance. Some background in the study of modern China recommended.

Highlights of the development of a religiously inspired legal tradition which guided individuals, social relations, commercial transactions, and concepts of governmental legitimacy in Islamic lands. How did the theory and procedures of this tradition develop? How did it adapt to changing times and circumstances? How did it interact with other sources of right? Enrollment limited to 20 juniors, seniors, and graduate students with a background in Middle East and/or Islamic history. Instructor permission required. E

HIST 1971M. China's Early Modern Rise.
This seminar explores the transformation of the East Asian order in the early modern period, focusing on the fall of the Han Chinese Ming dynasty and rise of the Manchu-led, multi-ethnic Qing empire. The course will consider explanations for the collapse of the Ming state offered by modern historians as well as 17th century observers. We will use an early Qing political theorist's work to analyze the "constitutional" structure of Qing local government. We will then turn to case studies (Taiwan and "Xinjiang") in how the Qing consolidated regional control through administrative, political and ideological means. Finally we will assess the economic implications of China's early modern rise. Throughout the course, students will be exposed to the leading works in the field of Chinese historiography, and will have the opportunity to debate the most hotly contested questions facing historians today. Some background in Chinese history is recommended.

HIST 1971N. Dissolution of the Ottoman Empire.
The seminar focuses on external and internal developments that contributed to the gradual dissolution of the multi-religious and multi-ethnic Ottoman Empire into lands (a) that became dependently incorporated into the capitalist modern world order, and (b) where religious and ethnic-linguistic distinctions became the founding principle of solidarity and political organization. We examine critically the context, advantages and shortcomings of different historical approaches to these developments. Since these approaches are shared by historians who work on other parts of the modern world, historians working these approaches characterize the coverage of modern history are students who should be able to gain from this seminar a better understanding of the historiography of not only the dissolution of the Ottoman Empire but also of the broader issues of the historiography of the modern era.

Requirements: students must meet the following conditions for registration:
(1) Background knowledge of Middle East history and cultures. Students must have taken at least one survey course related to the Middle East or South East Europe, or the equivalent of such a course in another university.
(2) Written permission of the instructor when conditions are not met. Enrollment limited to 20. M

HIST 1971O. Iberia from the Golden Age to the Enlightenment, c. 1450-1800.
Overview of Iberia from the end of medieval times to the Enlightenment. This is the period when Portugal and Spain charted the globe and established their respective empires. The changing concepts of Golden Age, Decline and Enlightenment will be explored in their political, economic, social, and cultural contexts.

HIST 1971P. Identity Conflicts in Mid East History, 1900-Present: A Proseminar thru Memoirs, Novels, and Films.
A critical study of selected memoirs, novels, and films (in English translation) as mirrors of identity conflicts and problems in Middle Eastern history since 1900. How competing political agendas and ideologies, differences in social background, gender and education, and changing conditions help shape, reshape, and blur collective as well as individual identities. M

Students must meet the following conditions for registration in this seminar:
(1) Background knowledge of Middle East history and cultures. Students must have taken at least one survey course taught by Akarli, or courses focusing on the Middle East taught through Religious Studies, Comparative Literature, Political Science, and Anthropology departments.
(2) A senior or junior student status.
(3) Concentration in one of the following fields: History, Middle East Studies, International Studies, Comparative Literature, Religious Studies, or Development Studies.
(4) Instructor's written permission will be required when the conditions above do not apply.

HIST 1971Q. Imagining Modern Japan.
This course examines the ways in which images of the West and of Asia have been articulated in modern Japan and the parallel construction of Western images of Japan. Through popular culture and media, travelers' accounts and other primary sources the course explores the role these images play in shaping both definitions of race and nation in Japan and Western conceptions of Japan's status and power.

HIST 1971R. Sex and Scandal in Modern Britain.
Nothing changes more than what is considered shocking. This course traces the shifting boundaries between private vice and public virtue in modern Britain, focusing especially upon sexual practices, proscriptions, and conventions. Among the topics to be explored are sexual violence, sensationalism, imperial liaisons, slumming, homosexuality, marriages heterodox and traditional, birth control, sex scandals, and the era of permissiveness.

HIST 1971S. Indian/Black Individuals and Communities in the Americas.
Persons of mixed African and Native American ancestry were often important in the American colonial period and beyond. This course...
examines relations among Indians and blacks, the formation of Afro-African communities, and their changing ideas about one another. The focus is on the 18th and 19th centuries, but some attention is given to more recent developments

HIST 1971T. Knowing and Believing: Galileo to Darwin.
This course will consider the 17th century career of Galileo and the 19th century career of Darwin to clarify the changing relation between science and religion in the European West. Enrollment limited to 20. E

HIST 1971U. The Measure of All Things.

A study of how legalized segregation came to exist in the United States by the early twentieth century. We will examine not only legal and historical texts but also fiction and films. Students will write a final paper based on significant research into primary sources

HIST 1971X. From Emancipation To Obama.
This course develops a deep reading knowledge of significant issues and themes that define African American experiences in the 20th century, experiences that begin with the years following Emancipation and culminates with the election of President Obama. Themes include citizenship, gender, labor, politics, and culture. The goal is to develop critical analysis and historiographical depth. Some background in twentieth century United States history is preferred but not required. Assignments include weekly reading responses, class participation and presentation, and two written papers. Enrollment limited to 20. DVP S M

HIST 1971Z. Memoirs and Memory: The Individual Experience of the "good" Italian soldier, the role of Alexander the Great in the new of violence and war, such as in the former Yugoslavia. Finally, the course of violence in Southern Europe and the Balkans.

HIST 1972A. History of Science in Africa.
A study of knowledge about health, nature, and mathematics in Africa. The course will consider indigenous knowledge (and what is meant by that category), the politics of colonial knowledge production and the ownership and purposes of post-colonial science. Some background in African History strongly recommended. E

HIST 1972B. History of the Mongols.
By comparing memoirs from the early modern period through contemporary times and from widely differing geographical settings such as eastern, central and western Europe, North Africa, the U.S., and Palestine/Israel, this course considers how Jews in different historical settings have understood their Jewishness and their relationship to their past, as well as the historian's view in this relationship. Enrollment limited to 20. M

This course focuses on die-hard cultural myths that cemented a sense of "community" and fueled political nationalism in Southern Europe and the Balkans from the late eighteenth century onwards. It highlights the constant interaction between historical discourses and collective representations of the past, which are often triggered by the experiences of violence and war, such as in the former Yugoslavia. Finally, the course looks at how dissemination of historical myths, representations and transmission of memories across generations take place but also the ways in which the past is mobilized for political reasons. Topics include the relation between literature and myth, the figure of Dracula and the image of the violent Balkans, the silenced Ottoman and Jewish past, the myth of the "good" Italian soldier, the role of Alexander the Great in the new "Macedonian Question", the dominance of the Battle of Kosovo over Serb politics and the institutionalization of Columbus Day in Spain. M

Examines English attitudes towards the "other" in the period from the Reformation to the early Enlightenment. Utilizing a combination of theoretical and secondary readings and primary source materials, the course will investigate English prejudices against and stereotypes of religious minorities within England (Catholics and Puritans), the non-English peoples of The British Isles (Scots, Welsh and Irish), continental Europeans (particularly the Spanish, the French and the Dutch), and the non-Christian other (Jews, Turks, and Blacks) during a period of revolutionary upheaval. Enrollment limited to 20. P

HIST 1972E. Word of Mouth: Orality and Memory in Historiography and Documentary Film.
This course focuses on the methodological issues related to the practice of Oral History (OH), one of the most contested methods in historical research. Despite the fact that OH has been established and institutionalized through various centers, archives and journals, still the advocates of "orthodox" historical writing insist that its employment is not scientific enough and that its findings can be misleading. The course analyzes the possibilities and problems that are inherent in the use of oral sources. A theoretical part explores various theories on how to approach memory. The empirical part includes case studies from 20th century European history, such as Italian Fascism and war crimes, the Red Army in Berlin, the Spanish and Greek Civil Wars, the Vichy government in France, the Holocaust experience, the student movements of '68, the Colonels' dictatorship in Greece and the war in Yugoslavia. A further issue that will be discussed is the use of interviews in historical documentaries, such as "Shoah," "Sorrow and the Pity" and the "Fascist Legacy." Enrollment limited to 20. M

HIST 1972F. Muslims and Jews.
This course considers interactions between Muslims and Jews in various historical settings from early modern and modern Europe to the contemporary Middle East. The course is intended neither as a general survey nor as a country-by-country analysis, but rather as an opportunity to move beyond simplistic histories of interfaith utopia, Islamic persecution, and Zionism domination to consider the complexities of ethno-religious interaction in a variety of social, cultural, economic and political contexts. One of our central questions will be to explore how a variety of historians, anthropologists, and social commentators have described and analyzed Jewish-Muslim interactions to date and to think about alternative analytic or interpretative framework that might be illuminating. Enrollment limited to 20. E

HIST 1972G. The Mongols Viewed from Inside and Out.
By comparing The Secret History of the Mongols with several most important travel accounts about the Mongol empire by travelers from China, Europe, and the Islamic world, this seminar aims to present a "balanced" history of the Mongols as well as to teach students how to do historical analysis. The Mongol present an excellent opportunity to learn the historian's craft. We will evaluate primary sources throughout the course, identifying authors' biases, evaluating reliability, and determining the contribution each source makes to our understanding of the Mongols. Over the course of the seminar, students will learn how to design a historical research project (such as a senior essay) in several stages: defining a topic, locating primary materials, surveying relevant secondary sources, crafting proposals, writing drafts, presenting their findings, and preparing a final written product

Cross-dressing knights, virgin saints, homophilic priests, and mystics who speak in the language of erotic desire are but some of the medieval people considered in this seminar. This course examines how conceptions of sin, sanctity, and sexuality in the High Middle Ages intersected with structures of power in this period. While the seminar primarily focuses on Christian culture, it also considers Muslim and Jewish experience. Enrollment limited to 20. P

The acquisition of citizenship in modern nation-states transformed the course of modern Jewish history. We consider the complexities of this emancipatory process. How did the move away from self-governing enclaves, which had characterized communal life prior to this period, change Jewish life? How did Jewish communities reconcile a particularistic Jewish identity with a more universalistic national one?

This class will examine the interactions between the development of powerful new understandings of the natural world and the enormous social, cultural and intellectual changes that marked England in the Victorian Era. M

HIST 1972K. Rethinking Society in Industrializing America.
This course will examine social thought and reform in the United States during a pivotal moment of industrialization in the late nineteenth and early twentieth centuries. Paying particular attention to the development
of intellectual thought within social context, we will explore how Americans struggled with the relationship between the individual and society in a period of rapid social and economic change and wrestled with the implications of science, modernity, and industrial capitalism for American society. Topics will include the development of the social sciences, critiques and defenses of capitalism. Social Darwinism and social control, democratic realism, pragmatism, eugenics, and the new education among others. Enrollment limited to 20. M

HIST 1972M. Portuguese “Discoveries” and Early Modern Globalization. M

The purpose of this seminar is to introduce students to the study of the Portuguese overseas experience, the course is intended to place the “discoveries” in the broader framework of the early modern world and will especially deal with the question of the so-called first globalization. The economic globalization and the “world economy” will be considered side by side with the exploration of global political, social and religious connections. In the later part of the seminar, one will elaborate on issues of “cultural globalization” and reassess the role of early modern Portugal in the globalization process

HIST 1972N. Poverty and Social Welfare in the Western World, 1500-1900. M

From the emergence of capitalism in early modern Europe through 19th century industrialization, this seminar explores shifts in the definition of poverty, laws respecting unemployment, distribution of public and private relief, cultural representations of the impoverished, and survival strategies of poor families. Focus on United States, Europe, and Latin America. E

This course will focus on the political, social, economic, and cultural changes that took place in Brazil during the military dictatorship that ruled the country from 1964-85. We will examine why the generals took power, the role of the U.S. government in backing the new regime, cultural transformations during this period, and the process that led to re-democratization. M

HIST 1972S. Red, White, and Black in the Americas. M

Examines relations among red, white, and black peoples in the Americas from the 18th through the mid-19th century. Topics include slavery (of Africans and Indians by Europeans, and of Africans by Indians), religious syncretism, racial hierarchies, maroons, and communities of mixed race persons. Preference given to seniors in Afro-American studies, American civilization, and history. E

HIST 1972T. The Vote in Transnational Context. M

People in the West commonly associate the act of voting with more expansive notions of democracy and human rights. Is this an accurate assumption? This course will discuss this association through historical analyses of enfranchisement. We will first examine how voting developed, specifically focusing on the origins of concepts of voting and human rights during the Enlightenment. We will then look at how the vote was implemented in its earliest forms, particularly during the French Revolution. Who was included in voting-based definitions of citizenship and who was excluded? On what basis were these distinctions made? We will then turn to various groups’ demands to address their lack of voting rights, including female suffragists, movements for enfranchisement in various colonies, African-Americans and discriminatory practices, as well as the French movement for gender parity in elections. The course will also consider the meaning of voting in nonwestern societies, as well as the state of voting in the world today.

Examines the history of women/gender in relation to American discourses about health and well-being (both physical and mental) from the era of the Civil War through the Progressive Era. It samples various movements in the United States, including efforts to control reproduction and initiatives to advance women into the medical and “helping” professions. M

This course will explore the intersections between cultural modernity and assimilated Jews in central European cities such as Berlin, Vienna, Prague and Budapest in the 19th and 20th centuries. Enrollment limited to 20. M

HIST 1972X. History of the Book in the Atlantic World. M

This course will introduce students to the key theoretical and methodological approaches to the History of the Book, and how the latter have been applied to the study of the book in the Iberian Atlantic. Taught at the John Carter Brown Library, each class will also include hands-on experience with early printed books that illustrate the themes discussed in class. Students will develop an understanding of the central questions and methodologies employed in book history, sufficient to conduct their own research in the field. Limited to 20 students and open to advanced undergraduates and graduate students, this course should appeal to students interested in History, History and Philosophy of Science, Literature, Latin American and Caribbean Studies, Hispanic Studies, Religious Studies and other concentrations

HIST 1972Y. Rise and Fall of the Aztecs: Nahua in Fifteenth- and Sixteenth-Century Mexico. M

Examines the creation and expansion of the Triple Alliance (better known as the “Aztec Empire”); the Spanish conquest of 1519-1521; and the impact of Hispanic colonization on central Mexico during the 16th century. Also concerned with the use and evaluation of ethnographical sources.

HIST 1972Z. Minority Peoples of China. M

Examines the history of minority populations of China, where there are today 55 officially recognized ethnic minority nationalities. We will look at how minority identity and experience has shaped and been shaped by intertwined histories of ethnic classification, notions of human diversity, and broader social and political currents of the late nineteenth and early twentieth centuries, ranging from nationalism, communist “class struggle,” and tourism. Readings will be drawn heavily from anthropological accounts of minority groups, and address the Miao, Yi, Zhuang, and Uighur, among others. The course should be of interest to students of the comparative history of race and ethnicity. Enrollment limited to 20. M

Examines the world of English scientific thinkers such as Faraday, Babbage, Thompson, Lord Kelvin, Darwin, Maxwell, Huxley, Dalton, and Joule. Also examines their work in the context of the society in which they interacted and the intellectual contexts they constructed and shared.

HIST 1973B. Shanghai: Adventurer’s Paradise? A history of China’s most cosmopolitan city, tracing its rise from a “land of rice and fishes” to the “Paris of the Orient.” Emphasis is on social and cultural topics, including immigration, labor, prostitution, organized crime, “Shanghai faction” modernism, and fashion, as well as the city’s transformations under Socialism.

Selected readings in the political, religious, and social history of Scotland and Ireland in the Tudor and Stuart period, from the Reformations of the 16th century, through the upheavals of civil war and rebellion in the mid-17th century, to the far-from “Glorious” or “Bloodless” Revolutions of 1688-91.

HIST 1973D. Friends, Enemies and Heroes: Reading the Soviet Poster. M

This course will examine the concept of propaganda and the contours of Soviet propaganda iconography following the Revolution of 1917. Diverse aesthetic traditions and shifting political contexts as well as fundamental political ideas will be analyzed. Student research papers will be drawn on a database of Soviet posters, flyers, brochures and cartoons.

HIST 1973E. Cities and Urban Culture in China. M

Treats the development of cities and urban culture in China from roughly the sixteenth century (the beginning of a great urban boom) to the present. We will look at the physical layout of cities, city government and social structure, and urban economic life, often from a comparative perspective. The course focuses, however, on the changing culture of city life, tracing
the evolution of a vernacular popular culture from the late imperial period, through the rise of Shanghai commercial culture in the late nineteenth and early twentieth centuries, to the diverse regional urban cultures of contemporary China. E

HIST 1973F. Knowledge and Power: The Late Imperial Chinese Elite. This is an advanced undergraduate seminar on the nature and social, political, and economic roles of the elite class—variously identified as "the gentry," "literati," "scholar-officials"—in late imperial China (roughly the Ming and Qing dynasties, 1398-1911). We will focus in particular on the role that the civil-service examination system (and the educational institutions that supported it) and both landed and commercial wealth played in the formation of the elite and in supporting its social, economic, cultural and political dominance. We will also examine the development of a distinctive elite aesthetics, its impact on Chinese arts and letters, and the tensions that it created within the elite. After discussing the changes in and ultimate decline of the elite over the course of the nineteenth and early-twentieth centuries, we will conclude the course with a consideration of how the legacy of the late-imperial elite has shaped the modern Chinese state. E

HIST 1973G. Social History of Sports in America. Focuses on three interrelated aspects of American sport history between 1870 and the present: race, gender, and intercollegiate athletics. Readings are complemented by films. Requirements include discussions, a heavy reading load, and a 25-page research paper. Priority given to students who have taken HI 52 and/or HI 182 or 183. M

HIST 1973H. The American Founding, 1750-1800. This capstone seminar surveys original sources, classic interpretations, and new perspectives on America’s revolutionary founding during the second half of the eighteenth century. Major topics include imperial loyalty and protest, popular sovereignty, liberty and republicanism, rebellion and revolution, independence, confederation and consolidation, constitution-making and constitutional interpretation, the politics of opposition, the rise of political parties, and the legacy of the American founding. Please note that this conference course does not treat the military history of the Revolution in any substantial depth. Enrollment in this seminar is limited to 20 students and requires instructor permission. P

HIST 1973J. Korea: North and South. This course offers a systematic investigation of the political, economic, and social histories of Korea, North and South, from the inception of the two governments following liberation from Japanese occupation in 1945 to the present day. Enrollment limited to 20. Instructor permission required. M

HIST 1973K. The Age of Rebellion: Mexico and the Andes, 1750-1850. This seminar examines the two most important centers of Spanish colonization during the transitional era in which they gained their political independence but lost their social stability. The topics considered include: the Bourbon reforms, the erosion of racial hierarchies, the Andean peasant insurrections, the Hidalgo revolt, the wars of independence, and the rise of caudillismo. E

HIST 1973L. History, Politics, and Psychoanalysis from Freud to Foucault.

HIST 1973M. Outside the Mainstream. When ratifying the UN Covenant on Civil Rights in 1979, its representative reported, "The right of any person to enjoy his own culture... is ensured in western history. Yet its legacy, which is surprisingly widespread, is also quite mixed. Was it a time of progress or a time of retribution? Was it a success or a failure? In addressing these and other questions, this course will examine the social and cultural components of this moment, beginning with the Old Regime and ending with the Revolution's "revolution": the arrival of Napoleon Bonaparte. We will look at primary and secondary sources, including memoirs, pamphlets, and the debates between contemporary historians about the Revolution. M

HIST 1973O. The Chivalrous Society and the Monastic World (ca. 1000-ca. 1250). Medieval monks and nuns, knights and ladies-these are the stuff of modern popular fantasy. This seminar provides a more realistic image of these women and men while exploring their own idealized notions of themselves. A central focus is how the monastic and knighthood ways of life, ostensibly so different, often involved similar responses to changes and how they influenced each other.

HIST 1973P. City as Modernity: Popular Culture, Mass Consumption, Urban Entertainment in Nineteenth-Century Paris. Modernity as a distinct kind of cultural experience was first articulated in the Paris of the 1850s. The seminar will explore the meaning of this concept by looking at the theories of Walter Benjamin, as well as historical examples of popular urban culture such as the mass circulation newspaper, the department store, the museum, the café concert and the early cinema. Enrollment limited to 20. M

HIST 1973Q. Stalinism. In this course students will examine in detail one of the most deadly and perplexing phenomena of the twentieth century: Stalinism. Readings will introduce students to major events of Soviet history from the mid-1920s to the mid-1950s as well as debates among historians about how to interpret those events. M

HIST 1973R. Legacies of Empire: Postcolonial Immigration in Modern Europe. Turkish Gastarbeiter in Germany. Second-generation North African "Beurs" in France. Muslim "home-grown terrorists" in Britain. In the wake of the demise of formal European empires, the migration of former imperial subjects to Europe has become a vexed topic. This course looks at the links between decolonization and postcolonial immigration and examines how immigration has affected European discourses on race and citizenship. It also considers the experiences of such immigrants, focusing on France, Britain, and Germany. Previous coursework in history or related disciplines recommended. M

HIST 1973S. Punks, Queers, and Pakistanis: Subcultures and the Nation in 20th Century Britain. British cultural theorists pioneered the concept of the subculture in order to explain distinctive groupings within British society, particularly youth culture. In this course, we will use the idea of the subculture as a passport to a tour of the undergrounds and by-ways of modern Britain. Along the way, we will consider some of the central themes of British history, including the decline and the loss of empire, the intersections of race, class, gender, and nation, and the rise of consumer culture. Previous coursework in history or related disciplines recommended. M

HIST 1973T. The English Revolution. Looks at the origins and nature of the English Civil War and Republican experiment in government (1642-1660) through a close examination of primary source materials. Considers not only the constitutional conflict between the crown and parliament, but also the part played by those out-of-doors in the revolutionary upheaval, the rise of popular radicalism, and the impact of events in Scotland and Ireland. P

HIST 1973U. World of Walden Pond: Transcendentalism as a Social and Intellectual Movement. This course examines the 19th century phenomenon of Transcendentalism: this country’s most romanticized religious, philosophical, and literary movement. Focusing especially on Emerson, Thoreau, and Fuller, we’ll examine the ideas of the Transcendentalists in the age of reform and evaluate the application of their principles to abolition, feminism, and nature. The central problem which they wrestled with will be the focus, too, of our investigations: the tension between individualism and conformity. M
HIST 1973V. The History and Historiography of Suffering
How have historians approached the representation of suffering in their work? How have attitudes toward representations and displays of suffering and atrocities in museums, historical narratives, and other venues changed since the Second World War? This seminar will explore these questions in the context of recent genocides and in human rights discourses. M

HIST 1973W. Women, Gender, and Empire in Modern Europe.
This class will examine the history of European empires with respect to women and gender. We will focus on theoretical underpinnings of gender and empire, as well as particular countries’ experiences in the colonies, and finally we will look at how colonists themselves reacted (and continue to react) to colonization and decolonization. By looking at women and gender, we will be able to delve more deeply into colonial policies and practices, seeing the relationships that developed between men and women, male and female, and colonizer and colonized, all while remaining conscious of the larger histories at play. M

This seminar focuses on the Maya in postcolonial Guatemala. The main theme is the evolving relationship between indigenous peoples and the nation-state. Topics include peasant rebellions in the nineteenth century, the development and redefinition of ethnic identities, the military repression of the 1970s and 1980s, the Rigoberta Menchú controversy, and the Maya diaspora in Mexico and the United States. Enrollment limited to 20. M

HIST 1973Y. Children and Childhood in America, 1640-Present.
This course explores the history of children in America from 1640 to the present. It is organized chronologically, but is also topical in approach. Fundamental questions posed by historians in this burgeoning field will be examined: How has the regard for children changed over time? What is the role of children in the popular imagination? How has children’s work evolved? How does gender affect children’s development? We will consider answers to these questions through the historiography and primary sources that inform our knowledge of the past as children experienced it. Senior history concentrators will receive priority in enrollment. Instructor permission required. WRIT M

HIST 1973Z. Colonialism, War and Memory in East Asia.
This seminar explores the development and legacies of Japan’s empires in Asia. We will examine the realities of the colonial and wartime experiences in places like Korea, Taiwan, and China, and analyze how war crimes trials, history writing, and popular media have shaped debates to react) to colonization and decolonization. By looking at women and gender, we will be able to delve more deeply into colonial policies and practices, seeing the relationships that developed between men and women, male and female, and colonizer and colonized, all while remaining conscious of the larger histories at play. M

HIST 1974A. The Mexican Revolution.
We will cover Mexican history from the Liberal reforms of Benito Juarez in mid-19th to the long dictatorship of Porfirio Diaz which set up the Mexican Revolution of 1917, and conclude with an examination of the impact of the revolution on 20th century Mexico, including the large-scale movement of people and capital across the U.S.-Mexican border. M

HIST 1974B. The Old South and Slavery.
Focuses on the "Old South" of the United States-the period of southern history between the American Revolution and the end of the Civil War. Special attention given to slavery and race, honor and violence, class and gender relations, and political culture. Readings include historical monographs, memoirs, and novels. Enrollment limited to 20. M

HIST 1974C. The Peculiarities of the Bourgeoisie.
Explores that sometimes reviled, sometimes celebrated class--the bourgeoisie--through the history of nineteenth- and twentieth-century Europe. We will take up questions of middle-class cultures and politics as we investigate the bourgeois city, divisions of public and private, work and leisure, and the fate of liberalism. M

HIST 1974D. The Practice of History.
An examination of the practice of history and the historical process using the writings of historians, philosophers, and novelists. Permission should be obtained before the beginning of the semester. E

HIST 1974E. The Third Reich.
In contemporary culture, Nazism has become a byword for evil. This course will critically examine past and present interpretive frameworks for Nazism. It will address historical debates about the structure of dictatorship, its overt racism, and expansionism. Enrollment limited to 20. Written permission required

Upper-level seminar on the relationship between cities and American politics and political culture in mid century. Focuses on the New Deal welfare state, civil rights and black power politics, national party politics, the politics of immigration, feminist politics, and post- industrial and post-welfare state politics of fiscal retrenchment. M

HIST 1974G. Brazil as a Nation.
Highlights aspects of Brazilian history from its political independence in 1822 until contemporary times. Only more recently has Brazil garnered more serious attention in the U.S. The bulk of this interest has been found on Wall Street where since the 1990s analysts have included Brazil on a list of up and coming world economies. Only three nations rank in the top ten in the following categories--territorial expanse, population, and gross domestic product--the U.S., China, and Brazil. Still, Brazil is often a forgotten stepchild whose importance is neglected. In part, this course will explore why this is the case. Enrollment limited to 20. Not open to first year students. M

HIST 1974H. War and Gender in Modern Europe.
This course examines the interconnectivity of war and gender in twentieth-century Europe. Scholars have long assumed that wars represent times of great social change with respect to gender. This has especially been the case for women. Such scholars have argued that women's participation in war efforts has dramatically shifted cultural stereotypes about their capacities and innate natures. We will question these and other related assumptions, using a variety of primary and secondary source readings to consider issues such as violence, heroism, espionage, peace, torture, and citizenship. M

HIST 1974J. Shanghai Under Communism.
A survey of Shanghai history from 1937 to the present. Discover the fate of China’s most celebrated city under the regime of the Chinese Communist Party. How could this so-called “adventurer’s paradise” become both a center of socialist radicalism under Mao and the vanguard city of Chinese capitalism today? M

HIST 1974K. War, Culture, and Society: The Emergence and Decline of Total War.
Explores the relationship between universal conscription and the modern nation-state; the world wars, democratization, totalitarianism, and genocide; imperialism, postcolonial conflicts, and ethnic cleansing; and representations of violence, commemoration, and trauma. M

HIST 1974L. Gender and Sexuality in Brazil.
Utilizing historical sources about Brazil from the colonial period to the present, we will consider how the family, politics, culture, and economy have conditioned sexual and power relations between men and women, and how notions of honor, gender, and sexuality have structured class and ethnic relations within Brazilian society. Enrollment limited to 20. E

This course explores the relationship of two important trends in early twentieth century United States history: the emergence of the modern American state and of "sexual identities." A growing body of historical literature argues that these two trends are deeply interrelated. By exploring some of that literature, this course will meditate on several critical questions: Why and how does the state regulate sexuality? What role does the state have in the production of sexual identities? How does sexual identity condition political citizenship and access to state power? Why has sexuality been important to the expansion of state power? How has the relationship between the state and sexuality changed over the first half of the twentieth century in the United States? Enrollment is limited to 20 students. Seniors and students with substantial experience in history courses will be given priority

HIST 1974P. Hannah Arendt and Her World.
This seminar will place the work of Hannah Arendt (1906-75) in contexts of German and Jewish European, American, and émigré intellectual traditions and political commitments. Arendt’s work, especially The Origins of Totalitarianism and Eichmann in Jerusalem, will be read together with work of Walter Benjamin, Hermann Broch, Martin Heidegger, and...
Transcendentalism, the philosophy of idealism and individualism associated with Emerson and Thoreau, emerged in mid-century New England, when capitalism, democracy, religion, and popular culture were taking on modern forms. This course sets the leading Transcendentalists—Emerson, Thoreau, and Margaret Fuller—in social context, with particular attention to religious radicalism, abolitionism, women’s rights, and utopian reforms.

HIST 1975F. Early Modern Ireland
This seminar will cover various themes in the political, religious, social and cultural history of Ireland between c. 1500 and the later eighteenth century. Topics to be discussed will include the Reformation, the Irish Rebellion, Cromwell’s rule, the War of the Two Kings, popular protest, the beginnings of the Irish nationalism, and the experiences of women.

HIST 1975G. Urban Crisis and American Political Culture, 1932-1984
An exploration of major developments in American national and local urban politics and policies from the New Deal of the 1930s through the rise of the right in the 1980s. Emphasis on the 1960s. Questions focus on urban politics and policies from the New Deal of the 1930s through the rise of the right in the 1980s. Emphasis on the 1960s. Questions focus on race, class, gender, and the politics of liberalism in the era of the welfare state and dramatic urban spatial and political transformation. Heavy writing required. M

HIST 1975H. Politics and Society in Britain, 1660-1742
This course will take an interdisciplinary approach to various topics in British political and social history from the Restoration to the fall of Walpole, combining traditional historical sources with literary texts and visual materials. Themes to be discussed will include: the emergence of party politics, religion, crime, morality, sexuality, and the rise of bourgeois society.

HIST 1975J. England, Scotland and Ireland in an Age of Revolution, 1660-1691
This course explores the political and religious upheavals that tore the British Isles apart between the Restoration and the Glorious Revolution. Dealing with both high and low politics, intellectual debate as well popular protest and sectarian violence, it will seek to show how England, Scotland and Ireland were transformed as a result of a series of revolutions in the later seventeenth century.

HIST 1975K. Political Economies of Modern Capitalism, 1500-1900
This course explores capitalism not as universal economic laws, but rather as a historized political economy situated in particularities of the time, place, culture, law and politics. Readings include classic texts (Smith, Marx), as well as recent scholarship focusing on the global economy of the early modern period.

HIST 1975L. Gender and Sexuality in the European High Middle Ages
This course explores the changing constructions of masculinity and femininity in the High Middle Ages and considers the sources and social consequences of these cultural conceptions. The issues addressed - including sexuality, sanctity, sin, the body, and transgression of gender boundaries - raise the problem of understanding the mutually informing relationship between cultural representations and social context.

HIST 1975M. Image, Fiction, Stereotype: Germans and Jews in Film and Literature
This course will look at how Germans and Jews are represented in twentieth century novels written by both Jewish and non-Jewish German language writers and in films from Germany and Israel. This is an interdisciplinary course that will combine historical contextualization with close reading and aesthetic analysis. In English.

HIST 1975N. Food Empires and Food Cultures.

Examines the revolutionary upheavals in England, Scotland and Ireland of the later 17th-century through a close examination of primary source materials. Topics covered include: high and low politics, the rise of the public sphere, the politics of sexual scandal, government spin, persecution and toleration, and the revolutions of 1688-91 and their aftermaths. Enrollment limited to 20. P

HIST 1975Q. Taiwan: Past and Present
A comprehensive history of Taiwan that examine patterns of continuity and change among the island’s indigenous populations, successive waves of migration from the “mainland” under Dutch and Qing rule, the Japanese colonial period, and the problems and prospects of decolonization after 1945. The course is designed to provide a long-term perspective on the Island’s present-day predicaments and to consider the contributions that historical knowledge may play in understanding and negotiating those predicaments.

HIST 1975R. History of American Consumer Movements
This course explores how Americans have used consumption as a means to organize against perceived or actual injustices ranging from racial discrimination to labor exploitation from the colonial period to the present day. We will examine social movements, such as the boycotts of British goods during the American Revolution, antebellum “Buy for the sake of a slave” campaigns, twentieth century “buy American” movements, consumer cooperatives, and the growing environmental consumer movement of recent years. We will also investigate differing interpretations on how and when the United States became a “consumer society,” as well as the ways in which it has reinforced, reshaped or complicated people’s racial, ethnic, class and gender identities. Class readings and discussions will evaluate the varying levels of effectiveness of consumer organizing throughout different historical contexts and analyze the ways in which a consumer society has been both a liberating and a controlling force in American history.

HIST 1975S. Politics, Religion and Everyday Life in Local China.
This course will be focusing on Chinese commoners’ daily life experience and local society. In this class, we will be reading and discussing some very important works done by not only historians but social scientists to approach Chinese commoners’ daily life experience. Throughout this course, moreover, the correlations between popular religion and local politics will be one of the most important agendas for this course. Finally, depending on students’ language skills, we will discuss local archival materials (mostly in English), such as local gazetteer, temple history, and inscription, to help students build their own understanding of Chinese local history. In addition to text reading, we will also watch some first hand documentary film done by scholars during their fieldwork. HIST 0410, 1516, and 1520 are suggested, but not required.

This seminar explores Native American histories and cultures in North America, primarily through the multiple and overlapping points of contact and coexistence with Europeans from the sixteenth through the eighteenth centuries. Although we will be reading widely in the very interesting recent literature in the field, a major component of the class is to investigate in a practical way the problem of sources for understanding and writing about American Indian history. As a senior capstone seminar, the final project is a substantial research paper. Enrollment limited to 20. P

HIST 1975U. Gender, Empire, and the Nation in the Middle East.
Examines the histories of colonialism and nationalism in the modern Middle East through a gendered lens. The ruptures of colonialism recast gender relations, while the alchemy of race, gender, and ethnicity figured prominently in the formation of anti-colonial nationalisms. Colonialism and nationalism, then, were processes that informed and were shaped by highly gendered notions of civilization and citizenship. Since 9/11, gender and Islam have become central tropes in the U.S.’s securitization narrative. We will examine a variety of genres (film, art, fiction, political speeches, memoirs) and a range of scholarly writings to examine the relationship of knowledge production and power. Enrollment limited to 20 students. Not open to first year students. Instructor permission required.

HIST 1975V. Culture, Politics, and History in the Middle East.
The nexus of culture and politics helps define the relationship of the Middle East to the West—and the internal understandings of these increasingly polarized societies. This course seeks to complicate the layered histories of the modern Middle East by examining culture and politics through a variety of historical genres, including academic monographs, theoretical analysis, films, art, fiction, graphic novels, music, and the internet. The readings draw from different academic fields, including history, anthropology, sociology, and political science, providing an opportunity to think of the ways that academic disciplines draw on and...
shape historical narratives. Enrollment limited to 20. Instructor permission required. M

HIST 1975W. History and Democracy in the Middle East.
Examines the complex history of democracy in the Middle East through a synergistic approach - reading democracy through the lens of the Middle East and understanding the Middle East through the lens of democracy. For decades, U.S. politicians, the press, think tank pundits, and academics have debated the feasibility of establishing democracy in the region. Few, however, examine a longstanding history of democracy in the Middle East - one that reveals the complex underpinnings of democracy itself. We will examine the discursive debate on democratization in the Middle East and then match keywords with historical case studies in Iran, Egypt, Yemen, Turkey, Afghanistan, and Muslim Europe. Enrollment limited to 20 students. Not open to first year students. M

HIST 1975Y. Clean and Modern.
Examines the ways in which ideas of cleanliness fit into broader conceptualizations of European "modernity" and the effort to modernize others in the 19th and 20th centuries. After studying some theoretical approaches to, the border and public, the box and public, we will turn to the relationship between hygiene and power, gender, class, race, and empire in specific times and places. Enrollment limited to 20 students. M

HIST 1976A. Comparative Native American History: Indigenous Peoples of North and South America.
From Alaska to Argentina, Native people have diverse histories. Spain, Portugal, England and France established different colonial societies; indigenous Latin Americans today have a different historical legacy than Native Americans in the United States. But the experiences of conquest, resistance and adaptation also tell a single overarching story. In colonial times, Native Americans and Europeans struggled over and shared the land. After Independence, however, the new American republics tried to destroy American Indians through war and assimilation. But in the last century Native peoples (both North and South) reasserted their identities within modern states: the "vanishing Indian" refused to vanish. Enrollment limited to 20 students. E

This seminar will explore the exceptionalist narratives that settler colonial states and other imperalist powers have relied upon to understand and justify their rule. While it will focus on American exceptionalism and its European origins, it will also examine exceptionalism as an ideology of other modern states, i.e., post-Enlightenment colonial settlers, including the Japanese, the Israelis, and others. Enrollment limited to 20 students. M

HIST 1976E. Women and Gender Relations in China, Past and Present.
The government of the People's Republic of China has, since early in its history, stated as one of its goals the "liberation" of women from the institutions, customs, and attitudes that had long limited their access to power and personal fulfillment within Chinese society. We will consider, first, the assumptions about women's past made in this claim, by examining the roles that women played in the early modern Chinese society and economy. Second, we will turn to the changes of the twentieth and twenty-first centuries to discover how modern political, social, and economic transformations have reshaped women's lives and opportunities. Enrollment limited to 20. P

HIST 1976F. Stalin and Stalinism.
This course will explore one of the darkest periods in Soviet history. Beginning in the late 1920s, when Joseph Stalin and his supporters gained control of the Communist Party and the state, and ending in 1953 with Stalin's death, it explores the impact of Stalin and his policies in shaping the world's first socialist country. The course covers the bloody struggle over collectivization, "the Great Terror;" the tragedy and triumph of the war, and the painful period of rebuilding. Using history, novels, film, and primary source documents, we will examine the sharp debates over the causes of Stalinism. Enrollment limited to 20. P

This seminar course will broadly survey, chronologically and geographically, the historical development of Portuguese colonization in the Atlantic, Indian and Pacific Oceans during the early modern era (approx. 1400-1650), focusing primarily on the role of colonies as conduits for global cultural and economic exchange. The course will examine the political, economic, social and intellectual contexts in which Portuguese maritime expansion occurred. We will consider the various historical catalysts for and significance of Portuguese maritime exploration and colonization, which led to worldwide trading networks and an unprecedented diffusion of populations, cultures and technology. Enrollment limited to 20. Not open to first year students. P LILE WRIT

HIST 1976H. Racial Boundaries in Early South Africa.
Nothing about South Africa's history has been more perceptual and more deceptively continues to become a mid-twentieth-century bastion of extreme white racialism. Looking at environmental forces, war, slavery, sexuality, colonial ideology, and science, this seminar will trace evolving categories of race and deepening social divisions before 1850. We will identify patterns of boundary placement as evident in studies of individual lives, cosmopolitan colonial society, and the remote frontier. Students will write a research paper on some aspect of South African history or an historiographical paper comparing the history of race in South Africa with that of another early European colonial society. Enrollment limited to 20; instructor permission required; not open to freshmen or sophomores. P

Investigates the profound social, cultural, and political changes accompanying the First World War. The goal is to analyze the usefulness of "total war" paradigm. Consequently, readings examine primary history only to the extent that such details shed light on the war's broader social and cultural implications. Primarily, but not exclusively, focuses on Germany's role in the First World War. Themes include the social consequences of modern industrial warfare; the consequences of the war for noncombatants; the identification and restriction of ethnic and national minority populations; and the interplay between political decision-making and industrial warfare. Not open to first-year students. Enrollment limited to 20. M

HIST 1976K. The Emergence of Capitalism in Early Modern Europe.
Students will read and consider how, when and why capitalism emerged and rose to dominance in European and other societies, especially in the 16th through 18th centuries. Theories considered will include evolution/innateness, culture, societal development, colonialism, empire and institutional efficiency. Readings include Smith, Marx, Weber, Pirie, Wallerstein, Brenner, Hirschman, North and Thomas, de Vries and Arrighi. We will put these accounts into dialogue with one another, assessing their assumptions, persuasiveness and failings. Based on these readings, the goal will be for each student to come to a reasoned judgment as to why and how capitalism emerged. Enrollment limited to 20. Not open to first-year students. M

HIST 1976L. Remembering Revolution in China.
This seminar explores the history of revolution in twentieth-century China and its representation in memoirs. Together we will read a number of personal accounts of the Republican Revolution of 1911, the Communist Revolution of 1949, and the Great Proletarian Cultural Revolution from 1966 to 1976. We will try to understand how people experienced these revolutions and what historians can learn about them from reading memoirs. Enrollment limited to 20. Not open to first year students. M

HIST 1976M. Women in the Islamic Middle East.
This course focuses on women in the Middle East, from the seventh century emergence of Islam to the twentieth century recalculation of women's "place" in the context of nation state formation and the struggle for new identities. We examine the status of women and the ways women were culturally crafted. In particular, we will discuss the contested nature of women's roles; the encounter between "Eastern" and "Western" societies; power, patronage, and seclusion; veils and voices; and the mythology which women's lives are narrated (by themselves and others). Enrollment limited to 20. Instructor permission required. E

HIST 1976P. Writing the History of Brown.
This research seminar, which is limited to 20 upper-class students, asks when, how and why did Brown change from being a small, regional liberal arts college and become a "hot school" and a noted research university, and investigates the problems it faced along the way. It will involve the students in original research. Enrollment limited to 20. Instructor permission required. E
What can the experience of a minority group like the Jews teach us about the roots of globalization? What were the economic, political, and cultural conditions that allowed early modern Jewish merchants to create economic networks stretching from India to the New World? We will answer these questions by examining the connections and interactions between four major Jewish centers: Ottoman Jewry in the Eastern Mediterranean, the Port Jews of Amsterdam and London, Polish-Lithuanian Jewish estate managers in Ukraine, and the Court Jews of central Europe. We will see how European expansion exploited - and was exploiting by - these Jewish entrepreneurs. Enrollment limited to 20 undergraduates. P

HIST 1976T. History of the Andes from the Inca Empire to Evo Morales.
Before the Spanish invaded in the 1530s, western South America was the scene of the largest state the New World had ever known, Tawantinsuyu, the Inca empire. During almost 300 years of colonial rule, the Andean provinces were shared by the "Republic of Spaniards" and the "Republic of Indians" - two separate societies, one dominating and exploiting the other. Today the region remains in many ways colonial, as Quechua- and Aymara-speaking villagers face a Spanish-speaking state, as well as an ever-more-integrated world market, the pressures of neoliberal reform from international banks, and the melting of the Andean glaciers. Enrollment limited to 20. E

This seminar will trace the growth of European images of the "other" in early modern Africa, Europe and the Americas. Using the three tropes of cannibal, barbarian and noble savage, it explores evolving theories about human nature, human difference and race. Alongside critical analyses drawn from several disciplines, the main readings will be primary sources: vivid, enigmatic accounts, portraits of a world alien to the writer, yet also mirrors on the writer's own culture. Enrollment limited to 20. P

HIST 1976V. Modern Cuba.
This course is an introduction to the study of Cuban history, culture, and politics, from the sixteenth century to the present. We will discuss the development of the island along a series of overlapping and inconclusive historical processes. These include five hundred years of colonialism starting in the 1500s, a century of formal independence inaugurated in the 1900s, fifty years of real socialism since the 1960s, and two decades of virtual collapse started in the 1990s. Using Cuba as a case study, we will examine what it means, for a colony and a nation, to be Western and modern. Enrollment limited to 20.

HIST 1976W. Colonialism, Culture and Conflict in Modern Ireland.
Using recent scholarship and a wide range of literary and visual sources, this course examines the history of modern Ireland, focusing on the struggle to determine who is "Irish" and to define the country's relationship to Britain and the empire. A primary focus of our attention will be the late nineteenth and early twentieth century--the decade or so before the Easter Rising of 1916--when the underlying differences at stake in the effort to create a distinct and recognizable "Irish" culture were revealed in heated controversies in the popular press and in the plays performed in W.B. Yeats' newly-created Abbey Theatre. Enrollment limited to 20. M

HIST 1976X. The Vietnam War.
This seminar will explore the Vietnam War (or the American War, as the Vietnamese call it) from multiple perspectives and with close attention to the many forces that shaped and perpetuated the conflict. We will collectively discuss secondary and primary sources -- speeches, policy documents, films, music, photographs -- to draw out the issues and debates involved in the Vietnam War. In doing so, we will also learn about the larger historical phenomena -- the Cold War, global decolonization, 1960s dissent, and so on -- that were embedded in the ordeal of the war. Enrollment limited to 20. Not open to first year students. M WRIT

Americans' production and consumption of energy has increased dramatically over the last 200 years. This course introduces students to the different sources and uses of energy from the colonial period up to the present. Students examine how energy choices have been shaped by Americans' understanding of and interactions with the natural world. Students also examine how energy choices reflected the society Americans envisioned for themselves. The seminar's objective is to understand how the American energy environment is a historical artifact of the changing knowledge and know-how of natural resource exploitation and of the developing cultures of capitalism and consumerism. Enrollment limited to 20. M

HIST 1976Z. Charlemagne: Conquest, Empire, and the Making of the Middle Ages.
The age of Charlemagne sits at the nexus of antiquity and the middle ages. For two hundred years Charlemagne's family, the Carolingians, welded together fragments of the fragmented Roman imperial tradition and elements from the Germanic world to forge a new, medieval European civilization. This seminar examines that process by exposing students to the primary sources, archaeological evidence, and modern scholarly debates surrounding the Carolingian age. Topics include the Carolingians' rise to power; Charlemagne's imperial coronation; interactions with the Islamic and Byzantine worlds; the revival of classical learning; the Church; warfare; the economy; Vikings; and the collapse of the Carolingian Empire. Enrollment limited to 20. Not open to first year students. P

Families were the most basic social and economic unit in early modern England. In this upper-level seminar we will explore the role of families in this society, the formation of families, and the different roles that each member of the family played. We will look at the "ideal" family in this period, as well as at families that fell apart or failed to function according to social norms. We will also place the family within the context of the Reformation and the political upheavals of the seventeenth century. The course will be reading and writing intensive. Enrollment limited to 20. P

HIST 1977B. Crises, Promises, Tragedies: The History of Weimar Germany, 1918-1933.
This seminar explores Germany's ambiguous history from 1918-1933 during the "Weimar Republic." Born out of defeat of WWI, "Weimar" can be characterized as a time of chronic conflict and political extremism. But more than just a tragic prelude to Nazi Germany and WWII, it was also a period of great promise, witnessing important social and cultural innovations. The seminar's central question -- significant beyond the German context -- probes the reasons for Weimar's "failure" despite its great promises, by analyzing its social, cultural and political history through a close reading of primary sources, including literary and visual representations and films. Enrollment limited to 20. M

Introduces students to visual culture (art, urbanism, cartography) of the Spanish and Portuguese Empires during the Early Modern period c. 1450-1800. Highlights the difficulties in distinguishing between "Western" and "non-Western" art around 1500. Deals with the relations between built environment and power in the Atlantic sphere. Discusses colonial societies and "subaltern" cartographers and producers of art. Analyses the making and circulating of "hybrid" objects in Africa and Asia. Moves toward a "connected history" of global artistic production through the lens of Iberian expansion, exploring relations between empire, race, trade, religion and art. Conducted in English. Enrollment limited to 20. P

HIST 1977E. The Ottoman Empire & Europe: Interactions and Representations in the Long Early Modern Era.
The rise to power of the Ottoman Turks and their conquests of Constantinople in 1453 and Cairo in 1517 reconfigured the dynamics of power as well as religious, commercial, and cultural relations in the Afro-European world. That reconfiguration was expressed in rituals, diplomatic reports, religious tracts, maps, paintings, chronicles, harem tales, and histories, as well as in battle narratives. In this course, going beyond the popular image of "The Terrible Turk", we will also draw on Ottoman literature, we study the nature of the Ottoman system, evaluating the ways in which Europeans crafted a vision of the empire, its power, and "the Islamic threat." Enrollment limited to 20. P

HIST 1977G. The Travel Narrative and the "West’s" Encounter with the Middle East.
This course begins by examining the genre and historiography of travel narratives from the 15th-19th C. We then focus on the accounts of those who journeyed to the Middle East. European travelers, as well as their Persian, Ottoman, and Moroccan counterparts. Of particular interest
are the nature of the cross-cultural encounter: the ways in which travel narratives visualize layers of history; what difference gender makes in the witnessing of the Middle East; and how the experience of travel reveals the mental maps of travelers, the perceived nature of sovereignty and frontiers, and the ethnographic options available to the traveler. Enrollment limited to 20

HIST 1977H. U.S. Legal and Business History: Regulating the Marketplace.
A seminar surveying the history of American business and capitalism from the colonial era through the twentieth century, with special attention to how legal regimes and regulatory institutions emerged to confront specific market problems and, in turn, influenced the distribution of wealth and power throughout American history. Enrollment limited to 20. M

The earthquake and tsunami that struck Japan on 11 March 2011 left some 20,000 people dead or missing, devastated communities and infrastructure all along Japan’s northeastern coast, and triggered a series of cascading events at the Fukushima Daiichi nuclear reactor plant. This seminar studies this crisis within both a global history of disastrous encounters with natural and man-made hazards, and within Japan’s own history of such encounters. We will explore the emergence of modern, scientific explanations of how and why disasters happen, and analyze the role played by popular culture in shaping the meanings assigned to disasters past, present and future. Enrollment limited to 20 juniors and seniors. WRIT E

HIST 1977J. Dream of the Red Chamber and Late Imperial Chinese Society.
The Story of the Stone (also known as The Dream of the Red Chamber) is China’s greatest pre-modern novel. A detailed account of the decline of a large and wealthy family living in Beijing, it provides a rich picture of Chinese society, particularly life among the elite, in the eighteenth century. The novel, the central reading for the course, will be supplemented with secondary studies on gender and sexuality, elite aesthetics, socioeconomic status relations, religious belief, and material culture in late imperial China. Enrollment limited to 20

Begun as a line on a map following the U.S.-Mexico War, the border has acquired tremendous legal, political, economic, and cultural meaning in the ensuing century and a half. This class will explore the project of re-centering North American history around the U.S.-Mexico borderline, using a combination of secondary and primary works. While not mandatory, a reading knowledge of Spanish is helpful. Enrollment limited to 20. M

HIST 1977L. Latin America, Revolution and the 1960s.
The Cuban Revolution marks a turning point in the history of twentieth-century Latin American history. The victory of Fidel Castro and his revolutionary band against the Batista dictatorship sparked guerrilla movements throughout the continent. At the same time, students, labor, peasants, and intellectuals throughout the Latin America and the Caribbean mobilized for radical changes in education, land reform, and control over natural wealth and resources. This seminar will examine this rebellious decade from a transnational perspective, considering the political, social, economic, and cultural changes that took place in the 1960s and their long-term effects on Latin America. Enrollment limited to 20. M

HIST 1977M. Twentieth Century Iran.
This history of Iran in the 20th century is bracketed by two revolutions. The Constitutional Revolution of 1906 set in place the Middle East’s first parliamentary democracy; the second in 1979 ended 2500 years of monarchial reign. The 1953 Coup that ousted the democratically elected prime minister was the CIA’s first Cold War era covert operation and British intelligence’s last. The Iran-Iraq War of the 1980s was the 20th century’s longest war, leaving a million Iranian casualties. The course examines Iran’s intellectuals, writers, artists, and filmmakers, highlighting their debates on colonialism, democracy, modernity, and political Islam. Enrollment limited to 20

HIST 1977N. State, Religion and the Public Good in Modern China.
In late imperial China, religion formed an intrinsic part of public life, from the cosmological ritual of the state to the constitution of family and communities of various kinds. This arrangement was challenged in the twentieth century by the fall of the dynastic system and the introduction of new definitions of religion, modernity, sovereignty, and secularism. We will explore the ramifications of this change in greater China and its border areas during the past hundred years, looking at how people have sought to create a good public and the public good. Enrollment limited to 20. M

HIST 1977O. The Occupy Movement in Historical Context.
This seminar will explore the significance of the Occupy Movement and use it as an entry point to examine major themes in postwar U.S. history and global political economy. We will look at the historical context of Occupy’s grievances and its relationship to the American protest tradition. Students will gain a new understanding of the historical forces that have structured the current crisis and protest wave, along with a better sense of how movements relate to shifts in society and politics. A basic understanding of postwar U.S. history, political economy, and the events of 2011 is preferred, but not required. Enrollment limited to 20. M

HIST 1977P. South Africa to 1990: Apartheid’s Rise and Fall.
History of South Africa to 1990, with attention to the diverse representations and uses of the past by South Africans. Explores the challenge to develop critical and conciliatory versions of the past in post-apartheid South Africa by examining interpretations of key episodes and personalities in the making of modern South African history, including Dutch settlement at the Cape, the “Hottentot Venus” Sara Baartman, Shaka Zulu, the Greer Trek, the Anglo-Boer War, the rise of apartheid, movements of rebellion and resistance from the armed struggle to the Soweto uprising, Nelson Mandela, and the Truth and Reconciliation Commission. Enrollment limited to 20. E

This seminar will explore the knowledge-production and military-financial infrastructures that maintain empires, as well as the means through which people have either resisted or embraced empire. While some attention will be made to the 19th and early 20th century colonial context, the bulk of the course will focus on the Cold War liberal era to the neoliberal regime that continues today. Possible topics include: popular culture and ideology, the Cold War university, area studies, international anti-war networks, transnational labor activism, the anti-colonial radical tradition, and the Arab Spring/Occupy Movements. Weekly readings; evaluation based on participation and analytical essays. Enrollment limited to 20 juniors and seniors. M

With the present economic crisis depicted as a crisis of the middle class, this course revisits the middle classes in Europe, the Americas, and the colonial world in the nineteenth and twentieth centuries. It explores the local renderings of a global social category and analyzes a set of historiographical approaches to middle-class formation from Marxism to postcolonial history. Topics include the constitution, identity, and relations of the middle classes; the gender, ethnic and religious dimensions of middle-class identities; middle-class politics and political representations of the middle; and, finally, the troubled relations between the middle classes and nationalism, imperialism, and modernity. Enrollment limited to 20

This course will investigate the role memorials play in society and examine the politics of memorialization in order to better understand the dynamic nature of creating meaning in the past and present from American monuments. We will broaden our conception of monuments beyond stone statues to include museums, national parks, music, art, film and the web. Movies and viewings of local memorials will supplement our seminar experience. Case studies include the Vietnam Veterans Memorial, the Oklahoma City National Memorial, the United States Holocaust Museum, and memorials to 9/11, women’s rights and slavery (including the commissioned Brown University memorial), among others. Enrollment limited to 20

This course will trace how American attitudes towards nature have shifted over the centuries: from the colonial period, when the wilderness was seen as something to be feared and subdued, to the romantic view of nature that emerged in the nineteenth century, to the growing concerns of
the modern environmental movement. Readings will include many of the seminal works of American natural history writing, from Thomas Jefferson to Rachel Carson, in order to highlight how these changing views towards nature have influenced American political and social history. Enrollment limited to 20. E

This course examines women's participation in American politics from a historical perspective. Since women began organizing for the vote, women's political engagement has highlighted cultural tensions related to motherhood, family life, sexuality, work, and the meaning of citizenship. The goal of the course is to better understand women's participation in American politics, and to think critically about the complicated role of gender in American society. Specific course topics include suffrage, labor reform, the changing role of the First Lady, feminist politics, sexuality, race and anti-feminist family values campaigns. Enrollment limited to 20.

HIST 1977V. Science and Technology in Modern Chinese History.

In this reading seminar, we will explore how different regimes that ruled China in the nineteenth and twentieth centuries, from imperial to socialist, mobilized science in their governance of a society in rapid transition. At the same time, we will examine the scientists, doctors, and engineers involved in the process of producing scientific knowledge, and the impact that their ideas then had on ordinary Chinese men and women. In so doing, we seek not only to deepen our understanding of China's recent past, but to also rethink, more broadly, the relationship of science, technology, and society in modern states. Enrollment limited to 20. M

HIST 1977W. Europe During World War II and the Holocaust.

World War II marked a dramatic period of crisis and transition in twentieth-century Europe. The correlation of regional and global conflicts reshaped the political, social, economic and ethnic map of the continent. The material and moral losses provoked by the war impacted individual and collective lives for decades to come. This course discusses how Nazi Germany and its allies ruled occupied Europe, and analyzed the Holocaust as a modern, state-promoted, massacre. Movies and memoirs provide insightful perspectives on divided, even, conflicting memories of World War II, and their significance for the postwar reconstruction of European states and society. Enrollment limited to 20. M

HIST 1977X. Nations and Nationalism in Modern Europe.

We will explore how nationalism has become the prevailing organizing principle of states and societies in modern Europe and discuss the rising of nationalism in Europe from the French Revolution to the present time. Students will engage with theoretical debates focusing on political sovereignty, citizenship, and national identity. Course topics will include the impact of colonialism, migration, industrialization, and European integration process on national identities, comparing and contrasting case studies focusing on France, Germany, and Britain, as well as on the transition from multicultural empires to nation states in Central, Eastern and Southeastern Europe. Enrollment limited to 20.

HIST 1977Y. Communism and Dissent in East-Central Europe.

Soviet-supported regimes assumed power throughout East-Central Europe in the wake of World War II. This seminar examines how writers, filmmakers, and other intellectuals (primarily in Poland, Czechoslovakia, and Hungary) grappled with the experience of communism between 1945 and 1989. When and how did they begin to oppose their political regimes, and what strategies did they use to defy state power and aesthetic orthodoxy? Readings for the course include novels, plays, and essays (in English translation) by Czeslaw Milosz, Milan Kundera, Eugene Ionesco, Adam Michnik, Vaclav Havel, and George Konrad. Enrollment limited to 20.

It is impossible to not run into global problems or challenges. What does it mean for an issue to be global, or to think globally? What is globalization, how did it develop? How global were past societies. How global are we? This course provides a history of globalization and an introduction to a selection of globalizing moments in history as well as the modes of thinking that have contributed to contemporary global consciousness. Reaching far beyond the globalization debate of recent decades, it seeks to uncover historical greats, who were often thinking locally, but whose impact has been felt globally. Enrollment limited to 20. WRIT E

What happens to a multiethnic city when it passes from a dying empire to a nascent nation-state? This course focuses on Vienna and the Mediterranean ports of Trieste and Salonica from the late 19th century to the end of the Second World War and examines their transformation from cradles of Habsburg and Ottoman imperial modernity into laboratories of Austrian, Italian and Greek nationalism. Topics include: interethnic relations; the impact of WW1 and interwar nationalism; assimilation, antisemitism and state policies; urban transformations; the Holocaust and its memory; and nostalgic imaginings of these cities in current public discourse. Enrollment limited to 20. M

Energy is central to modern life, yet it is seldom the focus of historical study. This course examines the history of the United States through the lens of its use of major energy resources, including wood, coal, whale oil, horse, water, petroleum, natural gas, nuclear, and alternative/sustainable. We will consider the significant impact of energy on the nation’s political, diplomatic, military, social, cultural, scientific, business, and economic histories, as well as the corresponding impact that the U.S. has had on energy resources and the environment. Enrollment limited to 20.

Reading-intensive seminar that examines health, healing, and the (post-)colonial "mise-en-scene" in Africa in the nineteenth and twentieth centuries. We will study the effects of Western biomedical and scientific intervention through the prisms of imperial control, public health crusades, urbanization, reproduction, and four specific maladies: sleeping sickness (trypanosomiasis), leprosy, mental illness, and AIDS. The examination of these topics and maladies provides a window into the nature of colonial rule and the politics of race and cultural difference. Western Europe's "rational" medical theories, treatments, and preventive regimes were often shaped by preconceived notions of the colonial environment and racialized bodies. Enrollment limited to 20. M

HIST 1990. Undergraduate Reading Courses.

Guided reading on selected topics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIST 1992 and HIST 1993 students meet together as the History Honors Workshop, offered in two separate sections per week. Prospective honors students are encouraged to enroll in HIST 1992 during semesters 5 or 6. HIST 1992 offers a consideration of historical methodology and techniques of writing and research with the goal of preparing to write a senior thesis in history, allowing students to refine research skills, define a project, prepare a thesis prospectus, required for admission to honors. Students who complete honors may count HIST 1992 as a concentration requirement. Limited to juniors and seniors who have been admitted to History Honors Program. HIST 1993 is a mandatory S/NC course. See History Concentration Honors Requirements.

HIST 1992 and HIST 1993 students meet together as the History Honors Workshop, offered in two separate sections per week. All students admitted to the History Honors Program must enroll in HIST 1993 for two semesters of thesis research and writing. They may enroll in the course during semesters 6 and 7, or 7 and 8. Course work entails researching, organizing, writing a history honors thesis. Presentation of work and critique of peers' work required. Limited to seniors and juniors who have been admitted to History Honors Program. HIST 1993 is a mandatory S/NC course. See History Concentration Honors Requirements.

This is the second half of a year-long course, upon completion the grade will revert to HIST 1993. Prerequisite: HIST 1993.

HIST 2050. Proseminar in Late Medieval History.

Macrohistory/Microhistory. A comparison of two different approaches to the study of the past, especially of late medieval and early modern Europe, focusing on the works of Fernand Braudel and Carlo Ginzburg.

HIST 2060. Seminar in European Social History in the Eighteenth and Nineteenth Centuries.

Methods of analysis for current topics in social, economic, demographic, family, and gender history. Depending on sources available, papers may be on Italian topics of the 16th-19th centuries, or on French or English.
topics of the 18th-19th centuries. Language requirement depends on area of specialization

HIST 2090. Proseminar on European Social History in the Eighteenth and Nineteenth Centuries.
Selected readings on changes of social life in European cities in the period of transition from the preindustrial to the industrial economy. Primary focus is on developments in France, England, and Italy. Language requirement depends on area of specialization

HIST 2450. Exchange Scholar Program.

HIST 2890. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

HIST 2910. Reading and Research.
Section numbers vary by instructor. Please see check Banner for the correct section number and CRN to use when registering for this course

HIST 2930. Colloquium.
Required of all first-year graduate students; includes participation in Thursday Lecture Series. E

HIST 2940. Graduate Workshop: The Practice of History.
Required of all incoming Ph.D. students. E

HIST 2950. Professionalization Seminar.
Required of all second year Ph.D. students; includes participation in Thursday Lecture Series. E

HIST 2960. Prospectus Development Seminar.
This required course open only to second-year students in the History Ph.D. program focuses on the development of a dissertation prospectus. The seminar will include considering the process of choosing a dissertation topic, selecting a dissertation committee, identifying viable dissertation projects, articulating a project in the form of a prospectus, and developing research grant proposals based on the prospectus. E

HIST 2970A. New Perspectives on Medieval History.
Over the past several decades, the field of medieval history has been reshaped radically. New approaches have changed the ways that medievalists think about old subjects. Our understanding of medieval society itself has expanded as previously marginal or unexplored subjects have become central to medievalists’ concern. This seminar explores how the ways in which medieval historians practice their craft have altered in response to these developments. Readings in classic older works are juxtaposed with newer ones on their way to becoming classics themselves

HIST 2970B. Race, Ethnicity and Identity in the Atlantic World.
Explores the question of identity in the Atlantic world (especially the Spanish and English Atlantic) from the sixteenth to the nineteenth century. We will focus on three types of identity: 1) ethnicity; 2) race; and 3) nationality. How are such identities created and maintained? Are they “natural” or “artificial”? How do they change over time, and why? Throughout the seminar, we will consider both internal and external boundaries, how social actors - particularly subalterns - see themselves and how they are imagined by outsiders. Finally, we will examine how identity is expressed in a wide variety of media - codices, paintings, maps, oral histories, diaries, etc. - and how scholars make use of such sources

HIST 2970C. Rethinking the Civil Rights Movement.
This graduate course encourages a rethinking of the complex components, arguments and activities that have characterized what we have come to know as the Civil Rights Movement, concentrating primarily on African American agency, actions and politics, through careful reading of recent scholarship in the field. While knowledge of U.S. history is preferred, this course asks larger thematic questions about protest movements (the role of the state, relationships with and between oppressed groups and organizations, and periodization), that will interest non-Americanists also. Some of the topics covered include: gender, organizing and strategies, the local, global ramifications and interactions, organizational structures and politics, and the recent concept of the Long Civil Rights Movement. M

HIST 2970D. Modernity and Everyday Culture - Reading.
No description available

HIST 2970E. Early Modern Continental Europe - Reading.
No description available

HIST 2970F. Problems in Modern Jewish History - Reading.
This course examines significant issues in the history and historiography of modern European Jewry from the mid-18th century to WWII. It is divided into four units each of which considers a thematic question that has been of interest to European Jewish historians, including: emancipation, integration, and acculturation; gender and the study of modern Jewish history; approaches to minority identity; and history and memory. Written permission required

HIST 2970G. Early Modern European Empires.
This course addresses both the history and historiography of the most relevant European imperial experiences in Asia, Africa and America c. 1400-1800. It will focus on the structure and dynamics of the Iberian case(s), as well as in the profile of the so-called Second European expansion led by the Dutch, the English and a number of other (minor) European examples. Particular emphasis will be given to the relations between these imperial bodies and other (non-European) Empires, by focusing on cross-cultural contacts and conflicts, hybrid societies and images. Restricted to juniors, seniors, and graduate students only. P

HIST 2970H. History of Sexuality - Reading.
A seminar addressing recent developments in the history of sexuality. Begins with the work of Michel Foucault and explores more recent historical and theoretical work. The aim is to define how the field is constituted: how do scholars construct object; what are the primary methods of inquiry; what are the theoretical debates informing those methods? Readings include primary documents, secondary historical works, and articles primarily concerned with theory

HIST 2970I. Methodologies of the Ancient World.
No description available. Open to graduate students only

HIST 2970J. Early Modern British History-Reading.
No description available

HIST 2970L. Race and U.S. Empire.
No description available

HIST 2970M. Japan, from Tokugawa to Meiji - Reading.
Compares the organization and exercise of political authority, the production and distribution wealth, and norms of cultural expression during the Tokugawa and Meiji periods as a way of understanding the dynamics of Japanese modernization

HIST 2970N. Modern Latin American History - Reading.
No description available

HIST 2970P. Nineteenth and Twentieth Century American History - Reading.
No description available

HIST 2970Q. Core Readings in 20th Century United States History.
Major topics and themes in 20th-century U.S. history. M

HIST 2970R. U.S. Social/Cultural History, 1877-present - Reading.
Case studies of prominent public intellectuals spanning the century from John Reed to George Wills, Mary McCarthy to Frances Fitzgerald

HIST 2970S. Western and Frontier History - Reading.
An introduction to recent work on the history of North American frontiers and the region of the American West

HIST 2970T. Representations of Suffering and Victimhood in History and Memoirs.
How have historians approached the representation of suffering in their work? How have attitudes toward representations of suffering and atrocities in historical narratives changed since the second world war? More generally, how do human rights narratives construct the identities of victims? This seminar will explore these questions in the context of the genocide of European Jewry. Requirements: One in-class presentation of weekly readings; one 20-25 page paper. Class participation required

HIST 2970U. Topics in Nineteenth and Twentieth Century American History.
M

HIST 2970V. Atlantic Empires.
No description available
HIST 2970W. Graduate Readings in Early American History. No description available.
HIST 2970X. Topics in the History of Empire and Culture. No description available.
HIST 2970Y. History and Theory of Secularity. No description available.
HIST 2970Z. Core Readings in Nineteenth Century Europe. Provides an introduction to the central issues of nineteenth-century European history. It has two purposes: first, to help you refine your abilities to think historiographically; second, to assist you in preparing for your comprehensive exams. To that end, we will read both standard interpretations and newer scholarship.
HIST 2971A. Science in a Colonial Context. This graduate seminar will consider the politics of science in colonies. Subjects covered include: the relationship between science and local (indigenous) knowledge, science and the "civilizing" mission, social relations in knowledge production, science and development, racial science and subject bodies, science and nationalism. Assignments will include book review, a review essay and leading discussion.
HIST 2971B. Topics in Twentieth Century Europe. This course will introduce graduate students to current scholarship on major issues in twentieth century European history. Topics will include (but are not limited to) the causes and consequences of the two world wars; the emergence, workings, and collapse of authoritarian societies; the spread of mass culture and consumerism; Americanization; de-colonization; the European Union, and the collapse of the bi-polar political system. In the interest of introducing students to the significant historiographical debates of the field, they will read both standard historical interpretations and newer scholarship.
HIST 2971C. Readings in American History. Topics in American social and cultural history in the nineteenth and twentieth centuries.
HIST 2971D. Passion, Dispassion, and the Scholar. What role should passion and the imagination play in intellectual endeavor? Is the dispassionate, objective, and objectifying voice the only appropriate one in the arena of scholarship? How much can or should the scholar let his or her personality and personal investment in a subject appear on the page? The seminar will explore these and related questions by examining non-traditional modes of scholarly writing (primarily but not exclusively drawing on historians and anthropologists). This is not a seminar about theory and method, although such issues will inevitably be part of our discussions. It is a seminar about writing and scholarly voice.
HIST 2971E. Latin American Historiography. This course examines the development of historical writings on Latin America produced in the United States from the late nineteenth century until the present. We will focus on themes, such as race, gender, labor, subaltern studies, dependency theory, postcolonial analysis, and post-modernism, to understand the diverse approaches to Latin American history.
HIST 2971F. Gender & Knowledge in Early Modern Europe.
HIST 2971G. Notions of Public & Private in Late Modern Europe.
HIST 2971H. Politics and Society in the 20th Century.
HIST 2971J. Topics in 19th c. U.S. History. This state-of-the-field course will introduce students to nineteenth-century U.S. history, with specific attention to how recent transnational, imperial, institutional, and cultural approaches have reframed older debates over the "Age of Jackson," "Manifest Destiny," and the "Market Revolution." This seminar offers core readings for students preparing a comprehensive exam field, while providing others with content knowledge to teach this period of American history.
HIST 2971L. Borderlands: Violence and Coexistence. Readings of theoretical and empirical studies in interstate and inter-ethnic relations in borderland regions throughout the world, with an emphasis on the modern period in East-Central. Open to graduate students only.
HIST 2971M. History of Medicine. The history of medicine is a topic that can shed light on any period and place, since all aspects of human life are intertwined parts of the story: ideas, religion, culture, material life, economy, politics, social organization and legal institutions, etc. This reading course is meant to introduce graduate students to the main subjects debated in the field, so that by the end of the semester you will be able to read in the literature and to take up any related archival trail with confidence. Open to graduate students only.
HIST 2971N. Critical Perspectives on Public and Private. No description available. Open to graduate students only.
HIST 2971O. Graduate Preliminary Readings. No description available.
HIST 2971P. Diasporas and Transnationalism. This reading seminar is designed to familiarize students with the most cited and current theories on diaspora and transnationalism, to examine a few exemplary case studies from around the world, and to allow students to develop and discuss their individual interests and reading lists around these broad themes and concepts, towards a prelim field or dissertation prospectus.
HIST 2971Q. The Sinosphere: Society and Culture in the Long Twentieth Century. An exploration of recent directions in the social and cultural history of the modern Chinese world since the late 1800s. Topics include but are not confined to the concept of the "sinosphere"; internal migration and diaspora: the construction of knowledge; the constitution of various kinds of publics; trauma and conflict; gender; religion; and interdisciplinary history. Attention will be paid to matters of sourcing as well as analytic frameworks.
HIST 2980B. Legal History. An introduction for graduate students to the significance and methods of legal history, broadly defined. Students will engage with works in legal history from a variety of time periods and geographical areas, and they will be guided to sources related to their specific research interests. A major research essay will be required that draws from the models of legal history given and is based on original research into legal sources.
HIST 2980C. Race, Ethnicity and Identity in Atlantic World. This seminar examines the meaning of racial and ethnic identity in colonial Latin America. Our primary approach will be historiographical; we will begin with colonial concepts of racial hierarchy, then move on to national ideologies of mestizaje and indigenismo, the emergence of "race mixture" as a scholarly topic, the "caste vs. class" debate of the 1970s and 1980s, and finally recent works on the African diaspora.
HIST 2980D. Topics in Violence in Modern Europe: Interethnic Relations and Violence in Eastern Europe. This seminar will examine recent studies on interethnic coexistence, violence, and genocide in East-Central and Eastern Europe in the 20th century. Readings will range from works on definitions of ethnicity and the making of nations to studies of communities and interpersonal relations. We will also read and listen to testimonies and analyze contemporary documents.
HIST 2980E. Social History in Early Modern England - Research. Readings on select topics in early modern English social history. Topics include: marriage formation, crime, social unrest, gender issues, and popular culture. Open to graduate students and advanced undergraduates.
HIST 2980F. Modern British History - Research. No description available.
HIST 2980G. Topics in Violence in Modern Europe - Research. No description available.
HIST 2980I. Problems in American Social History - Research. An advanced examination of the issues and methodology of American urban and social history plus primary research in specific topics.
HIST 2980J. U.S. Women's/Gender History - Research. Focus is 20th-century history. Open only to graduate students.
HIST 2980K. Passion, Dispassion, and the Scholar.
What role should passion play in intellectual endeavor? Should the scholar’s personal involvement in a subject appear on the page? What is the value of the dispassionate voice as opposed to a narrative voice of immediacy? The seminar explores such issues in modes of scholarly writing (primarily but not exclusively historical and anthropological).

HIST 2980L. Research and Pedagogy.
This research seminar is geared to help graduate students think about the ways in which they can incorporate their own research into the courses they will teach. The final product for the seminar is a primary source unit and an accompanying essay that can conceivably serve as a “teacher’s guide.” All fields and periods welcome.

No description available

HIST 2980N. Gender and Knowledge.
No description available

HIST 2980P. Theory of Everyday Life.
What do we mean by the “everyday” and how can we study it in the social sciences and represent it in the arts? We will focus on attempts to answer this question both on the theoretical and the empirical level. Readings will include philosophers of everyday life and examples of recent scholarship in “everyday life studies” that have revolutionized the study of leisure, entertainment, national identity, decolonization and gender

HIST 2980Q. Seminar in Early Modern British History.
No description available

HIST 2980R. Cultures of Empire.
The goal of this course is to research and produce a piece of original historical scholarship, drawing on methodologies developed during the cultural turn in the study of empires. Early semester readings address approaches to studying empire (Marxian, Subaltern Studies, Cultural Studies, etc.) and various locations: British India, Japanese Manchuria, and Netherlands Indies, among others. The course then evolves into a history writing workshop for the rest of the semester, paying attention also to historical writing, including style, form, and narrative strategies. Relevant to historical inquiry into cross-cultural encounters in any time period

HIST 2980S. Hannah Arendt and Her World.
This seminar will explore key concerns and paradigms in 20th-century intellectual history via a critical consideration of the thinking of Hannah Arendt (1906-75). In recent years, Arendt’s work has earned renewed attention for its multidisciplinary, multicontinental importance as well as for its uncanny currency to the present political and academic moment. Her thinking is thus in many ways “migratory thinking.” Migratory thinking involves first the dynamic exchange and transformation of thinkers, most specifically through political exile and emigration during the Nazi period and after. It thus involves both the experience and theorization of “worldliness”: the Enlightenment value that remains a key principle for Arendt, with special reference to Lessing. Migratory thinking also involves discursive movement among disciplines and cultures, for example from German philosophy to American political theory/science, and the complications of intellectual and cultural subjectivity of émigré as well as German Jewish thinking. Finally, the history and historical contingency that support this style of thinking emphasize the drive to thinking, responsibility, and judgment at a moment of danger. Readings and seminar discussions will focus on Arendt’s work, read in dialogue with the work of thinkers with whom she was in dialogue (Benjamin, Broch, Heidegger, Scholem) and with the later work of thinkers whose own subject positions might be considered comparable with the concerns in the paragraph above (G. Rose, S. Neiman, S. Ascheim, J. Derrida et al.). Themes will include cosmopolitanism, nationalism, and totalitarianism, the global politics of race, capitalism, and exchange, religious/secular tensions, and the relations of society and politics to art and the imagination

HIST 2980T. Minorities, Citizenship and Nation.
No description available

HIST 2980U. Power, Culture, Knowledge.
Truth isn’t outside power, or lacking in power... [Truth is a thing of this world,” wrote Michel Foucault in the mid 1970s. In this course we will read and examine Foucault’s seminal works on knowledge and power, and the kinds of scholarship it has engendered at the intersections of history, art history, anthropology, political science and social theory. In addition to Foucault’s major interlocutor, Edward Said, we will read Antonio Gramsci, Derrida and Walter Benjamin. We will end the semester with facing the challenge of historicizing our own political present through a number of contemporary thinkers.

HIST 2980V. Early Modern Empires.
This seminar will explore various approaches to understanding the rise, expansion, and contraction of empires in the early modern period (ca. 1500-1800). Students will be required to write a major research essay based on primary sources

HIST 2980W. First Person History in Times of Crisis: Witnessing, Memory, Fiction.
This seminar examines the relationship between History as a narrative of events and history as individual experience. Postulating that historical events as related by historians were experienced in numerous different ways by their protagonists, the seminar focuses on the complementary and contradictory aspects of this often fraught relationship at times of crisis, especially in war and genocide. While much time will be spent on World War II and the Holocaust, the seminar will engage with other modern wars and genocides across the world. Materials will include eyewitness reports, postwar testimonies and trial records, memoirs and relevant works of fiction. Open to graduate students only.

This graduate readings seminar is a wide-ranging survey of the diversity of religious groups, practices, and movements in the early modern Atlantic world, c. 1500 – 1800. Starting briefly with the Protestant Reformation, this seminar samples recent and enduring scholarship on religion in the British, Spanish, Dutch, and French empires, including African and Native American religious movements

HIST 2981A. Collecting and Measuring in a Global World.
This course will consider the impact of globalization on the western perceptions and understandings of the natural world in the 18th and 19th centuries. Enrollment limited to 20

HIST 2981B. American Political History.
This graduate readings seminar interrogates the question, “What is political history?” We will explore a range of approaches to the study of America’s political past over the span of U.S. history, including recent and enduring historical scholarship on electoral politics and the state, political culture, grassroots politics and social movements, and the politics of gender and family, as well as social science scholarship on American political development. We will analyze how scholars have defined and redefined the field over time. Enrollment limited to 20 graduate students

HIST 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

History of Art and Architecture
Chair
Sheila Bonde

Work in the department of the History of Art and Architecture at Brown is conceived as an interdisciplinary undertaking, in which students are encouraged to become familiar with the variety of methodologies and practices that have historically been, and continue to be productive in our fields. We also maintain a longstanding commitment to museum studies and the study of objects through a close working relationship with the Museum of the Rhode Island School of Design. Interested students in this department have the opportunity to hold internships and (in the case of graduate students) proctorships at the museum.
History of Art and Architecture Concentration Requirements

The concentration in History of Art and Architecture introduces students to the history of art, architecture, and visual culture. Students in HIAA explore Western and non-Western areas ranging over a wide period of time (Ancient, Medieval, Islamic, East Asian, Latin American, Early Modern, Modern/Contemporary). Concentrators often focus on a particular period (e.g., ancient, modern architecture), a particular branch of the field (e.g., urbanism), or a methodology (e.g., semiotics, critical interpretation, archaeology), but students may choose to create their own program of study. Concentrators will receive essential training in perceptual, historical, and critical analysis. Concentrators often study abroad for first-hand knowledge of works of art and monuments as well as exposure to foreign languages and cultures. Because foreign language skills are essential for pursuing art historical studies in a professional environment or in graduate school, HIAA requires two years of foreign language study.

The concentration total ten courses (eleven for honors). There are no prerequisites, but our general survey in history of art and architecture HIAA 0010 is an excellent foundation for the concentration. Students may receive concentration credit for this course. Please remember that these figures are only the minimum requirements and that we expect concentrators to take more than just the minimum number of classes in the subject of their choice.

Students must demonstrate reading proficiency in another language, since foreign language skills are essential for pursuing art historical studies in a professional environment or graduate school. Students with previous language experience will be asked to take a placement test and/or demonstrate a 400 level reading ability.

Since the history of art and architecture addresses issues of practice within specific historical contexts, concentrators are asked to take at least one studio art course, and courses in history that pertain to their area of emphasis. Study abroad can be a valuable enrichment of the academic work available on campus, in that it offers opportunities for first-hand knowledge of works of art and monuments as well as providing exposure to foreign languages and cultures. Study abroad should be planned in consultation with the concentration advisor in order to make sure that foreign course work will relate meaningfully to the concentrator’s program of study. Only two courses taken outside the department may count for concentration credit (including courses taken abroad and at other institutions in the United States). These credits will be counted as lecture courses, not seminars and cannot replace any of the six core classes. There is a maximum of two outside credits for courses taken at other universities (transfer credits or from study abroad programs), or courses that also count towards a second concentration. No concentration credit for High School AP, Subsidiary AP, A level etc. courses. No concentration credit for language classes.

Courses are taught on three levels. HIAA 0010 - HIAA 0940 are lecture courses meeting for three to four hours a week of lectures and discussion. HIAA 0020 - HIAA 1890 are seminars dealing with specific problems or issues in, art, architecture and theory and are designed for concentrators or otherwise well-prepared students. Courses with numbers above 2000 are graduate courses, which can, in exceptional cases, be opened up to particularly qualified seniors.

The core courses of four lecture classes and two seminars have to be taken in the department without exception. Those classes cannot be replaced with classes taken in other departments or universities.

Enrollment in seminar courses requires permission of the instructor.

Requirements

The concentration consists of ten courses (eleven for honors):

- 4 general lecture core courses, (HIAA 0020 - HIAA 0940) distributed between 3 of the 7 available areas of the discipline. (Ancient / Medieval / Islamic / East Asian / Latin American / Early Modern / Contemporary)
- 2 seminar core courses (numbered between HIAA 1040 and HIAA 1890)
- 4 courses that can include other courses taught in the department and cross-listed courses elsewhere. HIAA 0010 will count as 1 of these courses, but will not count as 1 of the 4 core lecture classes. Students are encouraged to take 1 studio class as part of these 4 courses.
- The 6 core lecture courses and seminars have to be taken in the department and can NOT be replaced with an independent study/honors thesis/classes taken in other departments, universities, or high schools.
- Language requirement: (A recent placement test for a 400 level reading capacity, or passing of a 400 level language class has to be provided and will become part of the record.)
- Maximum 2 outside credits for courses taken at other universities (transfer credits or from study abroad programs), or courses that also count towards a second concentration. No concentration credit for High School AP, Subsidiary AP, A level etc. courses. No concentration credit for language classes.

Architectural Studies Track

The Architectural Studies concentration track within the Department of History of Art and Architecture blends a variety of disciplines toward the study of buildings and the built environment. The concentration prepares students for the continued study of architecture and the history of architecture in graduate school as well as careers in related areas such as urban studies. The concentration requires four lecture courses and two seminars in the history of architecture and urbanism that are offered by the Department of History of Art and Architecture. One of the seminars is a project seminar, taken in junior or senior year, and is designed as a capstone experience for the Architectural Studies concentrator. Courses that may be counted toward the concentration are listed with an “A” at the end of their descriptions in the Course Announcement Bulletin. Because the architectural studies program was especially designed for students wishing to gain greater experience in the practical skills necessary for a career in architecture or a related field, concentrators are required to take a course in design from the Visual Arts Department, the Rhode Island School of Design or an introduction to architectural design, theatre set design at Brown University or the Harvard GSD’s summer school or similar six week+ courses in drafting or design instruction.

Students will be able and are encouraged to take cross listed pertinent courses from such departments or programs as American Civilization, Center for Old World Archaeology and Art, Engineering, Mathematics, History, Modern Culture and Media, Urban Studies, and Visual Art, and Engineering, in addition to those offered by the Department.

They can receive concentration credit for a maximum of two of these courses. Study abroad can be a valuable enrichment of the academic work available on campus, in that it offers opportunities for first-hand knowledge of architecture and the built environment as well as providing exposure to foreign languages and cultures. Study abroad should be planned in consultation with the concentration advisor in order to make sure that foreign course work will relate meaningfully to the concentrator’s program of study. Only two courses taken outside the department may count for concentration credit (including courses taken abroad and at other institutions in the United States). These credits will be counted as lecture courses, not seminars.

The equivalent of two years of foreign language study are required for concentrators, in order to read scholarship in at least one other language and to sensibly interact with an architectural culture other than your own. Students with previous language experience will be asked to take a placement test and demonstrate a 400 level reading ability.

For additional information, please visit the department’s website: http://www.brown.edu/academics/art-history/
Requirements:

- Four lecture courses distributed over three areas in architectural history (numbered between HIAA 0020 and HIAA 0940 and marked with an A) from the following areas: Ancient / Medieval / Islamic / East Asian / Latin American / Early Modern (ca. 1400-1800) Modern / Contemporary
- One seminar or independent study in architectural history (numbered between HIAA 1100 and HIAA 1890 and marked with an A).
- The project seminar (HIAA 1910A-1910F or acceptable substitute to be chosen in discussion with the concentration advisor) is required of all concentrators and is taken in junior or senior year. Priority is given to architectural studies concentrators. In years when no project seminar is offered, any seminar that qualifies for architectural studies can become the starting point for a senior project.
- The two above seminars can NOT be replaced with an independent study/honors thesis/classes taken in other departments or universities.
- One studio art course in design (at Brown, RISD, Harvard Career Discovery and similar 6 week + summer courses)
- Three additional courses. These can include other courses taught in the department (including HIAA 0010 and cross-listed courses in another department that are pertinent to architectural studies. They also include a select number of non-cross listed courses that are approved by the concentration advisor. These include (but are not limited to HIAA 1910A-1910F and MATH 0100, PHYS 0030 and PHYS 0040, ENG 0030, urban studies and engineering courses, and scenic design and technical production (Department of Theatre Arts and Performance Studies)
- Language requirement (A recent placement test for a 400 level reading capacity, or passing of a 400 level language class.)
- Maximum two outside credits for courses taken at other universities (transfer credits or from study abroad programs), or courses that also count towards a second concentration. No concentration credit for High School AP, Subsidiary AP, A level etc. courses. No concentration credit for language classes.

It is expected that concentrators will wish to focus on a particular period (e.g. ancient, modern architecture), a particular branch of the field (e.g. urbanism), or a methodology (e.g. semiotics, critical interpretation, archaeology). Students are encouraged to formulate their own coherent program of study.

Honors Application Process

Towards the end of the Spring semester all concentrators will be notified via the DUG Listserv that the application process is open. In order to apply to the Honors program each student should write up a proposal of no more than two double-spaced pages stating the topic (subject and argument) of the research to be undertaken as clearly as possible, along with a one-page bibliography of the most relevant books and major articles to be consulted for the project. This three page application should be submitted, along with a résumé and a printout of the student’s most recent available transcript and submitted to the department with a short cover letter stating who you feel the most appropriate advisor and second readers are for the thesis and why, and what your preparation is for this project. Clarity and brevity are considered persuasive virtues in this process. Applicants will be notified about the success of their applications at the end of the Spring semester.

Capstone Project

Those students who are not enrolled in the honors program are encouraged to develop one of their seminar papers into a capstone project, in consultation with the instructor. This paper can contain additional research, the application of the research to a catalog or website project etc.

While capstone projects will not be mandatory, they will be highly recommended. Capstones can include honors theses, UTRA’s, undergraduate TA-shirts, internships, perfecting a seminar paper, GISP, GILP, etc. The capstone and any related course of study, including internships, must be approved and overseen by a faculty sponsor.

Self-Assessment

All concentrators are required to write an essay when they file for the concentration that lays out what they expect to gain from the course of study they propose. All second semester seniors will be required to write a final essay that takes measure of what they have learned from the concentration, including their capstone and other experiences relating to their study of the history of art and architecture. For students doing a capstone, their capstone director will read this essay. A department subcommittee will read essays written by students not electing to do a capstone. The self-assessment should be turned in with a revised list of courses actually taken and the final paperwork for concentration approval.

Attendance at lecture events and conferences in the HIAA department is strongly encouraged.

History of Art and Architecture Graduate Program

The department of History of Art and Architecture offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/history-art-and-architecture

Courses

HIAA 0010. Introduction to the History of Art and Architecture. Introduction to the history of western art and material culture from the beginning to the present. In addition to examining visual strategies of representation, the course explores the varied ways in which art reflects and shapes social, religious, and political concerns. Weekly one-hour conference required. Enrollment limited to 150. A

HIAA 0020. Introduction to the History of Architecture and Urbanism. Western architecture and urbanism from classical antiquity through the eighteenth century: patterns of development; major architects and monuments; methods of interpretation. Does not presume previous knowledge or special skills. A
HIAA 0040. Introduction to Chinese Art and Culture
This course presents a broad view of the material, aesthetic, and cultural processes through which characteristically Chinese art forms developed from their emergence in ancient China to modern times. Emphasis on visual thinking and on connections between Chinese art (why it looks the way it does) and the particular world in which it was made. Readings in Chinese literature, thought, and history are a basic part of this course. Sections and field trip will emphasize hands-on examination of paintings, calligraphies, and pottery, jade, and bronze objects. Paper assignments aim to increase abilities to write about art and to evaluate visual evidence. Weekly one-hour conference required

HIAA 0050A. The Shape of Good Fortune.
Auspicious images that attract blessings and repel harm constitute the longest, richest traditions in the history of Chinese visual culture. Topics include: tomb painting and sculpture of Early China; imperial omen painting; auspicious ornaments in metalwork, ceramics, and textiles; popular prints; visual puns and other strategies of auspicious embodiment; realism and efficacy

Is Bacon’s painting more than the “cultural barometer” of a declining western civilization? In order to answer this question, the seminar will confront Bacon’s art to that of the contemporary generation of American artists and its European counterpart. His early and late works will be taken into consideration, as well as the body of works on paper, paintings and working documents discovered after his death in 1992. The relationship of the artist to the grand western tradition will be questioned in relation to the wide range of visual stimulants which compounded in the making of his painting. A visual analysis of his works will be supported by the readings of Michel Leiris, Gilles Deleuze, George Bataille, notably, as well as the artist’s statements. Enrollment limited to 20

HIAA 0050C. Illustrating Knowledge.
This seminar will investigate the history of illustration from the first manuscript manuscripts and printed books, to the present, including paintings, photographs, and computer imaging. We will investigate the role of pictures in the exchange of scientific ideas, and modes of representation developed in both the arts and the sciences. Enrollment limited to 20 first year students. FYS WRIT

HIAA 0050D. Seeing and Writing on Contemporary Arts.
The purpose of this writing intensive seminar (especially designed for freshmen) is to train the students in both seeing and writing on contemporary art. The class will be based on looking at specific works of art of the twentieth century in museum context (using nearby collections, notably) and on how to translate visual observations into analytical and critical writing

HIAA 0060. Introduction to Indian Art.
This course presents aspects of Indian art over a period of 2,000 years, and introduces the art of Buddhism, Jainism, Hinduism, Islam, and colonial and post-colonial India. Emphasis is placed on characteristic features, functions and socio-political contexts of stupas, temples, mosques, churches, and other architectural sites as well as sculptures, painted manuscripts, paintings, and photography

This undergraduate seminar traces the rise of American painting in the period from the Revolution to the dawn of modernism in the 20th century. Major figures, such as Thomas Cole, Frederick Church, Winslow Homer and Albert Pinkham Ryder, will be examined, as will significant movements, such as the Hudson River School and Tonalism. Discussion will help place American art within the context of history, the invention of national identity, and parallel developments in popular visual culture. Enrollment limited to 100

This course will survey American art from the Civil War to World War II, with particular emphasis on the transatlantic dialogue of modernist visual culture. We will look at the way American born artists such as Tainter, Whistler and Cassatt pursued careers in Europe, while European artists such as Duchamp and Picabia created works of art in New York. We will look at the influence of European modes of abstraction on American art and design. And we will look at the way artists like Benton, O’Keeffe and Wood resisted European influences. Enrollment limited to 80

This lecture course will survey American art from the rise of abstract expressionism in the 1950s to the Culture Wars of the 1990s. What role did scandal and publicity play in promoting the avant-garde? We will trace the way artists engaged with issues of politics, class, race, and gender. We will discuss the rise of new media and various photo-based practices. Key artists include Acconci, Benglis, De Kooning, Johns, Judd, Matta-Clark, Paik, Rauschenberg, Schneeman, Sherman, Koons, Piper, Pollock, and Warhol. (Note: American Art and Modernism I is not a requirement to take this course)

HIAA 0080. Introduction to the History of Art: Modern Photography.
This class will survey the history of photography as an art form and means of visual communication in the modern era. The photograph will be considered from both esthetic and social perspectives; photography’s rise as a medium of personal expression will be examined, as will technology’s role in the creation of new regimes of spectatorship, and the mass dissemination of visual information. The class follows the rise of photography’s acceptance as an art form in the twentieth centur, and culminates with its prominence within the phenomenon of postmodernism. No prerequisites, but prior coursework in modern history or art history is helpful. Enrollment limited to 80

HIAA 0100. Introduction to Architectural Design Studio.
Introduces students to basic tools and strategies in architectural design. A number of exercises will introduce students to questions about form, function and structure and teach them to learn from close observation of the built environment. The second half of the semester is devoted to the design of a small house by each student, which will be presented in a scale model and a full set of drawings at the end of the semester. A jury of invited architects and professors will conduct a discussion of each project. Enrollment limited to 12. Instructor permission required. LILE

HIAA 0110. Ancient China: Art and Archaeology.
An introduction to Chinese art and culture, focusing on recently excavated evidence of material culture from the Stone Age through the Han Dynasty. Students will learn to use the materials and methods of archaeology, art history, and the history of technology, as well as readings in history, literature, and philosophy to interpret excavated materials. Field trip pending museum schedules. Weekly one-hour conference required

HIAA 0130A. The City: An Introduction to Urban Studies (URBN 0210).
Interested students must register for URBN 0210 S01

HIAA 0130B. Art in Antiquity: An Introduction (ARCH 0030).
Interested students must register for ARCH 0030 S01

HIAA 0130C. Archaeologies of the Greek Past (ARCH 0420).
Interested students must register for ARCH 0420 S01

HIAA 0130D. Introduction to Islamic Archaeology (ARCH 0600).
Interested students must register for ARCH 0600 S01

HIAA 0130E. The World of Byzantium (CLAS 0660).
Interested students must register for CLAS 0660 S01

Interested students must register for MCM 0901G S01 (CRN 23873)

HIAA 0130G. Heritage In and Out of Context: Museum and Archaeological Heritage (ARCH 0315).
Interested students must register for ARCH 0315 S01

HIAA 0130H. Glass from the Past: Glimpses into History, Tech, Artistry of Molten Material Culture (ARCH 0305).
Interested students must register for ARCH 0305 S01

HIAA 0140. Introduction to Medieval Art and Architecture.
A comparative examination of the three artistic cultures of the medieval Mediterranean: Islam, the Byzantine empire, and the predominantly Christian regions of western Europe. Medieval Jewish art is also treated. Topics include medieval attitudes toward the use of images, the architecture of worship (churches, synagogues, and mosques), royal and domestic art, and instances of contact among all three cultures. Weekly one-hour conference required

Surveys the visual culture(s) in the viceroyalties of New Spain and Peru over a 300-year period from the reign of the Catholic kings in the 15th
HIAA 0160. Philip II of Spain: Society, Politics, and the Arts
Examines the visual culture of the golden age of Spain and Europe from the perspective of the most powerful ruler and patron of the later Renaissance

HIAA 0200. Chinese Scholar Ink Painting.
During the Song and Yuan dynasties (11th-14th century), Chinese scholars created a new kind of art that combined poetry, calligraphy, and painting. Through their elite influence, their art came to define high culture. During times of upheaval, gaps between aspiration and practice widened, as scholars turned their amateur art into the means of their livelihood. Ink painting became commoditized, responding to new patrons through subject matter and styles. This laid the foundations of modern Chinese painting. We will examine the development and uses of scholar painting as part of China’s cultural history from the Song Dynasty to the twentieth century

HIAA 0210. Chinese Painting during the Song Dynasty.
Song Dynasty (960-1279) paintings literally are the stuff of which dreams of China were made - in their own time, in traditional China, and in modern scholarship. Song painters visualized an orderly cosmos as monumental landscape scrolls, captured poetic moments in painted fans that were the size of dinner plates, claimed their place in the Great Tradition through antique styles, and advertised signs of Heaven’s approval through images of rare birds and flowers, bustling cities, and fat baby boys. Meanwhile, literati painters presented themselves and their virtues as ink-paintings of pine, bamboo, and plum. Our work in this course, through lectures, discussions, and papers, is to investigate these idealized images and to reconnect Song paintings to the world in which they were active agents of the changes that made Song culture, politics, and society. Field trip pending museum schedules. Weekly one-hour conference required

HIAA 0230. Greek Art and Architecture.
All media are discussed and, while the emphasis of the course is on a prior background is required

HIAA 0320. Roman Art and Architecture.
Introduction to the relationship between Roman art and the art of emerging antique styles, and advertised signs of Heaven’s approval through images of rare birds and flowers, bustling cities, and fat baby boys. Meanwhile, literati painters presented themselves and their virtues as ink-paintings of pine, bamboo, and plum. Our work in this course, through lectures, discussions, and papers, is to investigate these idealized images and to reconnect Song paintings to the world in which they were active agents of the changes that made Song culture, politics, and society. Field trip pending museum schedules. Weekly one-hour conference required

HIAA 0340. Roman Art and Architecture: Spectacles and Entertainment.
Spectacles offered the Romans innumerable opportunities for self-definition, on the individual level, the community level, and even the imperial level. Performance art cuts across traditional boundaries between media, and we will examine total ensembles as often as possible. Topics will include the amphitheater and the circus, representations of gladiators and charioteers, the architecture of propaganda and theater, and the triumph of victorious individuals as well as its opposite, the literal defacement of imperial portraits. Domestic spectacles will also be considered, including pleasure boats and vacation homes, dining rooms, gardens and sculpture collections. A

HIAA 0340. Roman Art and Architecture: From Julius Caesar to Hadrian.
An introduction to the major monuments in Roman art at the point when the Empire emerged up to the time of the creation of the Pantheon. No prior background required. A

HIAA 0380. Roman Art and Architecture: From Hadrian to Late Antiquity.
This course examines the surviving environments and artifacts created to suit Roman tastes in the high and late empires. It also provides an introduction to the relationship between Roman art and the art of emerging Christianity. Beginning with a study of Roman art in the high empire, and ending with its demise of Rome as a capital in the fourth and fifth centuries C.E., the course focuses on an especially creative and complex period in Roman visual, cultural and religious history. A

No description available

HIAA 0410. Islamic Art and Architecture.
The formation of an Islamic artistic expression in art and architecture and the regional manifestations of that art from central Asia and the Middle East to Sicily and Spain. Weekly one-hour conference required.A

HIAA 0420. Cathedrals and Castles.
The course aims to engage critically with the major architectural features of the medieval world: the cathedral and the castle. In addition to examining specific buildings as case studies, we will also interrogate the cultural context and the material culture associated with the construction, use and meanings of these important spaces. The course is arranged thematically rather than chronologically. A

HIAA 0430. Visual Culture of Medieval Women.
The course considers the visual and cultural material of women in the Middle Ages. We will examine women as the commissioners, creators and subjects of medieval art, architecture and popular culture. Case studies will be drawn from across medieval Europe, Byzantium, and Islam. Classes will consider: gendered and feminist perspectives in medieval history, art history and archaeology; the imaging of women in medieval art; archaeological approaches to gender and the analysis of gendered spaces; the art and architecture of female spirituality; and the representation of identity through the body and clothing. A

HIAA 0440. Gothic Art and Architecture.
Examines Gothic art and architecture to explore its sources and "invention" in mid-12th-century France and to trace its varied manifestations in European art to the 16th century. Special attention is given to cathedral architecture and decoration. Weekly one-hour conference required.

HIAA 0490. Urban Modernity and the Middle East.
This course explores the relationship between modernity and the city in the context of the Middle East. Its goal is to provoke historically grounded, critical and comparative thinking about cities during the modern period. The concept of urban modernity refers to the experience of modern city life and the associated cultural celebration of innovation. Middle Eastern cities, in contrast, have generally been studied privileging the role of the West, and through the lens of development. Organized in three parts, this course introduces theories of urban modernity, examines the genealogy of the study of Middle East cities, and then seeks to appropriate the lens of urban modernity to look at a number of cities in the Middle East.

HIAA 0500. From Van Eyck to Bruegel.
Artists of Flanders and Holland effected a revolution in the techniques and subjects of painting during the 15th and 16th centuries. This course explores the roots of artistic change in religion, urban history, politics, Italian humanism, economics, and craft traditions. The focus is on the great works of such artists as Jan van Eyck, Hieronymus Bosch, and Pieter Bruegel the Elder.

HIAA 0550. Florence and Tuscany in the Fifteenth Century.
Examines the paintings, sculpture, graphic art, and architecture of Tuscany in the 15th century, primarily in Florence but also venturing into Siena, Arezzo, Borgo San Sepolcro. Using Renaissance critical terms and analytical tools, we take into account the technical and commercial habits of craftspeople, the economy of the cities and towns, and the forms and functions of art in domestic, civic, and religious spheres. Weekly one-hour conference required. WRIT A

HIAA 0560. The Visual Culture of Early Modern Rome.
Examines Renaissance Roman painting, sculpture, and architecture in the context of the unique urban character of the city: site of antique myth, religious pilgrimage, and a cosmopolitan court. Beginning with Filarete and Fra Angelico, we move through the Renaissance (Michelangelo and Raphael), looking at the formation of artists' workshops and academies, ending with the urbanization programs of Sixtus V. WRIT A

HIAA 0570. The Renaissance Embodied.
Renaissance depictions of the body range from muscular, idealized nudes to decaying, but ambulatory, corpses. Artists dissected human cadavers and, for the first time since antiquity, reflected the use of living models in their workshops and studios. In this course, we examine art that embodied power and sexuality, death and disease, the divine and demonic, the marginalized and the fantastic. We consider a diverse set of bodies as they were represented in paintings, sculpture, drawings, decorative
arts and prints in relation to contemporary religious, political and social concerns.

HIAA 0580. Word, Image and Power in Renaissance Italy (ITAL 0580). Interested students must register for ITAL 0580 S01

HIAA 0600. Baroque. The course surveys the visual culture of Rome from 1564-1700. During that time Rome became the center of artistic change in Europe, the seat of the Counter-Reformation Catholic Church, and the dominant source of classical learning. All media that participated in these historical developments are included: from papal urban plans to Bernini's fountains and Caravaggio's paintings

HIAA 0610. Visual Culture in Seventeenth-Century Europe. An introduction to visual communication in all media as it developed during the seventeenth-century in Europe and its colonies. Art will be analyzed in relationship to new styles, religious ideals, literature, politics, economics, and science. The work of artists such as Caravaggio, Rembrandt, Velázquez, Vermeer, Bernini, and Poussin will be connected to the great centers in which they worked, from Rome and Amsterdam to Madrid and Paris

HIAA 0620. The Age of Rubens and Rembrandt: Visual Culture of the Netherlands in the Seventeenth Century. Surveys the amazing art in Holland and Flanders that revolutionized all media. We will see how paintings, sculpture, and architecture formed the historical environment of life in the 17th-century Netherlands. The work of such artists as Rubens, Rembrandt, Van Dyck, and Vermeer is presented as part of this history of art in a "golden age." Weekly one-hour conference required

HIAA 0650. Eighteenth-Century Art-Imagining the Global Eighteenth-Century. Forging a modern state and a modern empire involved new and reworked forms of visual representation. This course looks at how artists in the two leading imperial Western powers, England and France, produced art that addressed the concerns of diverse and newly expanded audiences

HIAA 0700. Nineteenth-Century Architecture. Surveys stylistic developments, new building types, and the changing conditions of architectural production through the 19th century. Special emphasis placed on the social context in which buildings were designed and used. Weekly one-hour conference required.

HIAA 0720. Architecture and the Enlightenment: The Eighteenth Century in Context. This lecture course will analyze the architecture and urbanism of eighteenth-century Europe and America, an age that witnessed significant developments in architectural theory and a newly defined relationship between architecture and history. Lectures will address a number of different areas of architectural production within and beyond the Enlightenment, including experimental visionary architecture, changes in the architectural profession, the impact of print culture on design, aesthetic innovation in garden design, new publics for architecture, early museums, sacred architecture, buildings in expanding colonial territories such as India and the American southwest, and Baroque, Rococo, Neoclassical and modern buildings. Enrollment limited to 30

HIAA 0750. Imagining Nation and Empire in Early Nineteenth-Century Europe. Course will examine visual culture in the context of socio-political transformations during the period. We'll analyze oil paintings, watercolors, prints, and phenomena such as the panorama and the Great Exhibition. While we will look briefly at artistic production in Spain and Germany, the geographical focus will be on the two major Western colonial powers, Great Britain and France. WRIT

HIAA 0760. Later Nineteenth-Century Painting. Impressionism and Post Impressionism: the course focuses on the work of Realist, Impressionist, and Post-Impressionist artists within their political and social context. Issues to be covered include the rise of the avant-garde, the painting of contemporary life, the privatization of artistic practice, the death of naturalism, the role of gender, and the impact of mass culture. Artists to be considered include Courbet, Manet, Degas, Monet, Cezanne, Pissaro, Morisot, Renoir, Seurat, Van Gogh, Gauguin, and Toulouse-Lautrec

HIAA 0800. Twentieth-Century European Art. Modern Art 1880-1945 surveys a wide range of modern art practices in Europe from the 1880s up through World War II. Works of art and avant garde modern movements of the early 20th century will be framed by their historical contexts including issues of nationalism, gender, identity and colonial politics. Weekly discussion sections focus on problems of interpretation and reception

HIAA 0840. History of Rhode Island Architecture. This course examines the historical development of architecture and building in Rhode Island within the larger context of colonial and national trends and with a focus on important manifestations of a distinct regional identity. Emphasis will be placed on stylistic developments, new building types and technologies, and the social and economic influences on the creation of the built environment.

HIAA 0850. Modern Architecture. The "classic" period of European and American modern architecture from the turn of the century to the 1950s. Presents both the established canon of masterpieces by among many others, Frank Lloyd Wright, Mies van der Rohe, and LeCorbusier, and counterbalances this approach with information about new building materials, changing conditions of architectural production, and the "mechanisms of fame." A

HIAA 0860. Contemporary Architecture. Stylistic, technological, and theoretical developments in architecture from the 1960s to the present. Analyzes movements such as "Brutalism," "Postmodernism," and "Deconstruction" and works by architects such as Frank Gehry, T. I. Pei, and Zaha Hadid. Emphasizes the complex conditions of architectural production in different parts of the world. Complements HA 85, but may be taken independently.

HIAA 0880. Contemporary Art I. This course offers a comprehensive panorama (while inevitably not an all-inclusive one) of the arts from the last sixty years. It covers the major trends and a selection of significant individuals from the post-war period to the most recent developments; following a chronological timeline that leads from abstract-expressionism, minimal art, pop art, performances, happenings, to the various "post" critical attitudes (post-painterly, post-modern)

HIAA 0890. Contemporary Art II. This class considers the historical persistence of the dream of a realization of art in life from its romantic formulation to its recent incarnations in the contemporary era with an emphasis on the early 20th century avant-gardes, the utopian tendencies of the 20’s and 30’s, the effects of cybernetic in the 50’s and the development of environmental art forms since the 60’s.

HIAA 0900. City and Cinema. An examination of the mutual influence between two of the major art forms of the 20th century: film and architecture. Concentrates on European and American film sets throughout the 20th century and explores their formal and iconographical sources in contemporary architectural discourse. Presentation and examination of sketches, paintings, still photographs, and film clips as well as writings by directors, set designers, critics, and architects (Eisenstein, Reimann, Kracauer, Bunuel and many others)

HIAA 0910. Contemporary Photography. This course surveys the rise of photography in the art world in the period after 1960. It examines both the development of photography as an independent medium and the appropriation of lens-based imagery by Pop Art, conceptual art, minimalism, and eventually Postmodernism

HIAA 1040A. Arts of Imperial Song. Art and power share a long reciprocal relationship in imperial China. In this history, Song (960-1279) emperors stand out because of their massive collections and their personal practice of calligraphy and painting, as well as their grand patronage of contemporary art and material culture. The Song emperors literally created the Chinese national heritage by amassing and, if necessary, manufacturing the great works of the past. As Imperial artists and calligraphers, sometimes working with surrogates and collaborators the emperors and their empresses produced art in unprecedented quantities. We explore these achievements and the processes that produced them in this course. Enrollment limited to 15. Instructor permission required
HIAA 1040B. Topics in East Asian Art: Archaeology of the Afterlife in Early China.
Our study of ancient burials begins with the newly discovered "Goddess Temple" of the Hongshan Neolithic culture (c. 4900-2920 BCE) and concludes with the subterranean mansions built by the "nouveau riches" of the Eastern Han (27-220 CE). Some background in Chinese history is helpful but not required. A

HIAA 1040D. Japanese Woodblock Print and Print Makers.
An in-depth and multi-faceted survey of the social, cultural, and economic history of Japanese woodblock prints and illustrated books from 770 to 1970. What purposes did prints serve? How did artists and craftsmen create new alternative visual languages? What did these languages communicate and to whom? What roles did prints and illustrated books play in the process of cultural transformation?

HIAA 1040F. Talking Pictures, China and Japan.
In this seminar we explore the creative interactions between images and words that are fundamental features of East Asian visual culture. Discussion, projects, and presentations focus on typical modes, including: illustration and evocating objective and inscriptive texts that explain their history, meanings, and function to make them accessible to others. Topics include: popular prints, door guardians, Demon Queller, lucky couplets, and visual puns. Previous courses in Chinese art or East Asian studies useful. Enrollment limited to 15 students. Written permission required

HIAA 1040G. The Garden in China.
Explores garden building and garden culture-in painting, poetry, and fiction-from the grand imperial hunting parks of ancient China to the private retreats of scholars from the Six Dynasties to the Qing period (4th to 18th century). Considers the garden as a site for negotiation between nature and artifice, public duty and personal cultivation. Also considers the Chinese garden as the outcome of interactions among particular intellectual, political, and economic developments. Previous course work in Chinese art or East Asian studies recommended

HIAA 1040H. The Shape of Good Fortune.
Auspicious images constitute the longest, richest traditions in the history of Chinese visual culture. New Year's celebrations present images that cross class, education, and time, as they embody shared hopes for longevity, progeny, and wealth. Students shall create a Chinese New Year's image emphasizing an object that they have a personal significance. An in-depth and multi-faceted survey of the social, cultural, and economic history of Chinese woodblock prints and illustrated books from 770 to 1970. What purposes did prints serve? How did artists and craftsmen create new alternative visual languages? What did these languages communicate and to whom? What roles did prints and illustrated books play in the process of cultural transformation?

Yuan Dynasty art focused on elite Chinese artists whose works were interpreted as expressions of resistance and assertions of Chinese cultural values. But, China also entered a Mongol trade and taste economy, as the Mongols began to impose a new political and cultural system on China, and the Mongol was a new economic player in the world of Chinese art. Students shall create a Chinese New Year's image emphasizing an object that they have a personal significance. Enrollment limited to 15. Instructor permission required

HIAA 1040K. China and the Mongol Empire: Reconfiguring the Yuan Dynasty Paradigm.
Imperial China thought it was the center of the world. With the Mongol conquest, China became part of the Mongol Empire. Traditional studies of Yuan Dynasty (1279-1368) art focused on elite Chinese artists whose works were interpreted as expressions of resistance and assertions of Chinese cultural values. But, China also entered a Mongol trade and taste network that spanned Asia to the West. We revisit the standing paradigm and explore new cultural studies and material evidence that complicate the old Sinocentric perspective. Enrollment limited to 15. Instructor permission required

HIAA 1100A. Hiroshige's Tokaido Woodblock Prints.
Students in this hands-on seminar will plan, prepare, and present an installation of Japanese woodblock prints from Hiroshige's (1797-1858) Tokaido series—the most influential set of prints ever published in Japan—at the Museum of Art, Rhode Island School of Design. The seminar will study the history of woodblock printing, the landscape and genre painting traditions of Japan, and Edo cultural history. Working with the instructor and Museum staff, students will be responsible for all phases of selection, research, explanatory texts, and design. The seminar will take up practical issues of connoisseurship, conservation, museum practice, and public outreach. HA 4, 11, or 104, or courses in East Asian history, literature, or thought recommended

HIAA 1120B. History of Urbanism, 1300-1700.
Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g., the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g., fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required

HIAA 1120C. History of Western European Urbanism 1200-1600.
Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g., the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g., fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required

HIAA 1120D. Colonial Legacy in Indian Architecture.
Our study of ancient burials begins with the newly discovered "Goddess Temple" of the Hongshan Neolithic culture (c. 4900-2920 BCE) and concludes with the subterranean mansions built by the "nouveau riches" of the Eastern Han (27-220 CE). Some background in Chinese history is helpful but not required. A

HIAA 1120D. Colonial Legacy in Indian Architecture.
Addresses religion, space, tradition, and identity which are issues common to all periods of architecture on the Indian subcontinent. These issues were prominent especially under the Europeans in India from the sixteenth to the early twentieth century. Examining architectural and urban transformation of several cities under the Europeans, this course will chronologically study colonial structures especially in Goa, Pondicherry, Calcutta, Madras, Bombay, and New Delhi. The association of power, politics and religion has ancient roots in Indian architecture. Enrollment limited to 20. A

HIAA 1150A. Race, Religion, and Identity in the Arts of Spain and the Americas.
This seminar explores race, religion, and identity in the visual culture of the Spanish Empire. The course studies the "Golden Age" of Spanish art (including artist such as El Greco, Valasquez, and Goya) in its religious and political context, as well as the use of images in the conquest and colonization of the New World

No description available

HIAA 1150C. Velazquez.
No description available. Enrollment limited to 25

HIAA 1150D. El Greco and the Golden Age of Spanish Painting.
This seminar examines the career of the Greek painter from Crete known as El Greco in Spain where he worked in the late sixteenth and early seventeenth centuries. Empahsis will be given to the interaction of various European traditions in the culture of Counter Reformation Europe. Weekly readings and discussion and individual projects required. Enrollment limited to 25 students

Examines forms of visual culture—paintings, prints, photographs, sculpture—that participate in the formation of racial, social, and national identity in the U.S. from c. 1776 to 1930. Focuses on how visual culture figured African and African Americans in their interrelationships with each other and with other social groups in the U.S

HIAA 1170B. Twentieth-Century American Painting.
HA 80 is a suggested prerequisite. Weekly one-hour section required
HIAA 1170D. Self-Portraiture and the Death of the Author in the Western Tradition
This seminar will focus on self-portraiture and modes of self-identity from the vantage point of feminism, queer theory and of post-modernist critiques of the author function. We will explore and critique the hold that the autobiographical impulse has on the modern imagination. We will look closely at self-portraits by artists ranging from Rembrandt to Sherman, and from Dürer to Wojnarowicz. Students will be asked to write about artists’ self-portraits and also construct their own written and visual autobiographies. We will read memoirs by artists, as well as essays by Barthes, Foucault, and Krauss. Enrollment limited to 20

HIAA 1200A. Ancient Art in the RISD Collection
The RISD Museum’s ancient collection will be studied firsthand and in light of recent scholarship in Greek and Roman art and archaeology. Using the collection as a springboard, the course will explore original contexts for museum objects; issues of cultural property and museum ethics; conservation, restoration and display in museums; and notions of historical interpretation in museum display.

HIAA 1200B. Greek and Roman Mythology
The meaning of classical myths will be investigated by interpreting representations in the visual arts of antiquity.

HIAA 1200C. Mosaics in the Greek and Roman World
Roman mosaics survive in huge quantities from nearly every corner of the Roman Empire, far out-numbering any other surviving art form from the Roman world. The demise of architecture and wall paintings, in fact, often contributes to the survival of floor mosaics when buildings collapse, burying and thereby protecting mosaic floors, which remain unharmed. Despite their prevalence and their often excellent state of preservation, however, mosaics are only beginning to attract the volume of scholarly attention lavished on other media, such as sculpture and paintings. We will consider floor mosaics, wall mosaics and opus sectile, all in context as often as possible, and bring medieval and modern mosaics into the picture as well. Enrollment limited to 20.

HIAA 1200D. Pompeii
Pompeii and its neighboring towns are the best examples for studying the life, art, and architecture of a Roman town. This seminar covers the works of art and the life in the town as reflected in the monuments excavated over the past 250 years. Instructor permission required.

HIAA 1200E. Roman Crafts
No description available.

HIAA 1200F. Hellenistic and Roman Gems, Cameos, Jewelry
To be submitted. Enrollment limited to 20.

HIAA 1200G. Roman Spectacles
Spectacles offered the Romans innumerable opportunities for self-definition, on the individual level, the community level, and even the imperial level. Performance art cuts across traditional boundaries between media, and we will examine total ensembles as often as possible. Topics will include the Colosseum and the circus, representations of gladiators and charioteers, the architecture of propaganda and theater, and the triumph of victorious individuals as well as its opposite, the literal defacement of imperial portraits. Domestic spectacles will also be considered, including pleasure boats and vacation homes, gardens and sculpture collections, with selections depending upon student interest. Enrollment limited to 20.

HIAA 1200H. Monsters

HIAA 1200I. Hellenistic Art: From Alexander to Cleopatra
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Greece and imperial Rome. Yet the period in the Mediterranean from the death of Alexander the Great in 323 BCE to the Roman conquest of Egypt in 31 BCE saw the creation of some of the greatest masterpieces of ancient art, the development of formal art criticism, and the mass production of art for private enjoyment. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.

HIAA 1200J. The Architecture of Utopia
This course will examine the different ways many cultures have conceived of paradise and/or Utopia, with a focus on the formation and expression of these “places” in spatial, architectural, and urban terms. We will investigate, for example, the Daoist immortal abodes of Han China, the enclosed gardens of Islamic Spain, ideal cities of the Renaissance, and the high-tech industrial wonderlands promised by twentieth century Modernists. In every case we will ask how architecture, real and/or fantastic, has been used to delineate and define these alternative worlds, and what they suggest about the individuals and societies that produced them. Enrollment limited to 20.

HIAA 1300A. Word, Image and Power in Renaissance Italy (ITAL 1580)
Interested students must register for ITAL 1580 S01 (CRN 14483)

HIAA 1300B. Fieldwork in Urban Archaeology and Historical Preservation (URBN 1010)
Interested students must register for URBN 1010 S01

HIAA 1300C. The Cultural and Social Life of the Built Environment (URBN 1870N)
Interested students must register for URBN 1870N S01

HIAA 1300D. Material Worlds: Art and Agency in the Near East and Africa (ARCH 1200I)
Interested students must register for ARCH 1200I S01

HIAA 1300E. Gender and Identity in Modern and Contemporary East Central European Visual Arts (SLAV 1970H)
Interested students must register for SLAV 1970H S01

HIAA 1300F. The Archaeology of College Hill (ARCH 1900)
Interested students must register for ARCH 1900 S01

HIAA 1300G. Building Big! Supersized Architectural and Engineering Structures From Antiquity (ARCH 1715)
Interested students must register for ARCH 1715 S01

HIAA 1300H. Ancient Synagogues, Churches, and Mosques in Palestine (JUDS 1440)
Interested students must register for JUDS 1440 S01

HIAA 1300I. The Art of Curating (MCM 1700R)
Interested students must register for MCM 1700R S01

HIAA 1300J. Fieldwork in the Urban Community (URBN 1000)
Interested students must register for URBN 1000 S01

HIAA 1300K. The United States Metropolis, 1945-2000 (URBN 1200)
Interested students must register for URBN 1200 S01

HIAA 1300L. Urbanization in China (URBN 1420)
Interested students must register for URBN 1420 S01

HIAA 1300M. Green Cities: Parks and Designed Landscapes in Urban America (URBN 1870E)
Interested students must register for URBN 1870E S01

HIAA 1300N. Visual Cultures of the Afro-Americans (AFRI 1180)
Interested students must register for AFRI 1180 S01

Interested students must register for HIST 1973P S01 (CRN 24766)

HIAA 1300P. Architecture and Memory (ARCH 1710)
Interested students must register for ARCH 1710 S01

HIAA 1300Q. Russian Modernism and the Arts (RUSS 1000)
Interested students must register for RUSS 1000 S01

HIAA 1300R. How Houses Build People (ARCH 1720)
Interested students must register for ARCH 1720 S01

HIAA 1300S. Inventing the Past: Amulets, Heirlooms, Monuments, Landscapes (ARCH 1835)
Interested students must register for ARCH 1835 S01 (CRN 16138)

HIAA 1300T. Garibaldi Panorama: the Invention of a Hero (from pre-cinema to digital) (ITAL 1340)
Interested students must register for ITAL 1340 S01 (CRN 14460)
HIAA 1410A. Topics in Islamic Art: Islamic Art and Architecture on the Indian Subcontinent. This course focuses on architecture, manuscript paintings, and decorative arts produced under the patronage of Islamic rulers, who dominated the Indian subcontinent between 1192 and 1858. The class will examine works of art as instruments in the process of establishing an empire as well as expressions of political and religious power

HIAA 1410B. Painting in Mughal India 1550-1650. The Mughal (Muslim) rulers of north India in the sixteenth and seventeenth centuries presided over what was then the richest, most cosmopolitan culture in the world. The earliest rulers were open-minded and intellectually voracious; they brought together Persian, Turkish, and a variety of indigenous Indian traditions to create a distinctive new way of representing and living in the world. This cultural interaction, and the important role played by Portuguese missionaries and English traders, will be the focus of this seminar

HIAA 1410C. What is Islamic Art? Is there such a thing as modern Islamic Art? This course draws on Brown’s Minnassian collection of Islamic Art to help clarify these complex questions. Focusing on 3 forms from the collection -manuscripts, painting, and pottery- the course introduces students to key concepts in Islamic Art History. Enrollment limited to 20

HIAA 1410D. War, Revolution, and Art. Amidst the upheavals of revolution and war, art can render society’s fears and hopes legible. Artists can bear witness, propel social transformations, and imagine alternative futures. From posters to graffiti, film to photographs, painting to graphic novels, art can be a vehicle for and a reflection of social change and political resistance. In turn, for scopic regimes, art is an effective tool of propaganda and mobilization; artists become targets or minions of ideologues and demagogues. Art encompasses and documents technologies of power during revolutions and wars. Our case studies in the class include Iran, Iraq, Afghanistan, the US, and Arab Spring. Enrollment limited to 20

HIAA 1430A. The Visual Culture of Medieval Women. Considers women as patrons and producers of medieval art and architecture, and examines the imaging of women in medieval works of art. Topics include: feminist perspectives in medieval history and art history, patronage by royal and aristocratic women, costume and textile production, and the art and architecture of female monastic communities. Optional FLAC French conference offered

HIAA 1430B. First Two Hundred Years under Islamic Rule: Creation of a New Visual Expression, 7-9th centuries CE. This seminar will study the process of transforming features of the pre-existing Greco-Roman and Persiannate worlds into a new visual ‘Islamic’ expression. It will facilitate analysis of the forms, functions and meanings that the new religio-political leadership instituted and inspired, from the foundation of the religion its so-called classical period (7th-9th centuries CE), and abstract analysis the processes involved

HIAA 1430C. Shaping Faith: Sacred Images in Medieval Art and Culture. While much medieval European art was produced for use in religious settings, its spiritual role has often been deemphasized to suit the secular emphasis of traditional art history and our modern society. Lost has been an understanding of the active role played by works of art in shaping belief and generating faith, and the social practices that formed around visual culture in the later Middle Ages. Whether leading processions or performing miracles, religious imagery influenced individual attitudes and communal behavior in both civic and religious life. This course takes a fresh look at the sacred image in Christian Europe via thematic studies of cult figures, wonder-working images, processionary art, etc., analyzed from the perspectives of anthropology, ritual theory, social history, and innovative art history

HIAA 1430D. Topics in Medieval Art: England. The visual legacy of medieval England is at once unique from and responsive to predominant European movements of the sixth through fifteenth centuries. This course introduces students generally to English Art of this period, but also considers in depth the historical and critical debates surrounding key monuments, such as the Lindisfarne Gospels, the Bayeux Tapestry, Westminster Abbey, and the recently re-discovered Macclesfield Psalter. Enrollment limited to 25

HIAA 1440A. Visual Culture of Medieval Women. This course treats the history of women as the commissioners, creators and subjects of medieval art, architecture and material culture. Case studies are drawn from western Europe, Byzantium and medieval Islam. Weekly seminars will consider, among other topics: feminist perspectives in medieval history and art history; the imaging of women in medieval art; archaeological approaches to gender and the analysis of gendered spaces; the art and architecture of female spirituality; and the representation of identity through the body, costume and dance. Enrollment limited to 20. Open to graduates and undergraduates. Written permission required. A

HIAA 1440B. The Medieval Monastery. The seminar examines the medieval and early modern monastery as a research problem. The course examines the development of the monastery, and investigates the religious and functional aspects of monastic architecture. We will explore historical, art historical and archaeological approaches to monasticism. Instructor permission required. Enrollment limited to 20

HIAA 1440C. Topics in Medieval Art: England. The visual legacy of medieval England is at once unique from and responsive to predominant European movements of the sixth through fifteenth centuries. This course introduces students generally to English Art of this period, but also considers in depth the historical and critical debates surrounding key monuments, such as the Lindisfarne Gospels, the Bayeux Tapestry, Westminster Abbey, and the recently re-discovered Macclesfield Psalter.

HIAA 1440D. The Gothic Cathedral. Uses the resources of the RISD Museum in graphics and decorative arts (weaponry, embroidery, textiles, and ceramics) from the early modern period. Examines the use of ornament and mythological and sacred themes as they relate to crafts and the transmission of culture, focusing on the making, distribution, materiality, and histories of objects of everyday life

HIAA 1440E. The Body in Medieval Art. The seminar considers the contradictory aspects of embodiment in the visual and material culture of the Middle Ages. We will examine the veneration of holy bodies through living holy individuals, and through body parts (relics) and the Eucharist enshrined in sumptuous containers. We will look at the iconography of death and resurrection, the representation of the body in painting and sculpture, attitudes toward sexuality, the performance of identity through clothing, and the sumptuary laws that governed clothing and behavior. We will investigate funerary rituals and burial, and the movement of living bodies in dance and in civic and religious processions. Enrollment limited to 25

HIAA 1460. Topics in Medieval Archaeology. No description available

HIAA 1550A. Prints and Everyday Life in Early Modern Europe. Uses the resources of the RISD Museum in graphics and decorative arts (weaponry, embroidery, textiles, and ceramics) from the early modern period. Examines the use of ornament and mythological and sacred themes as they relate to crafts and the transmission of culture, focusing on the making, distribution, materiality, and histories of objects of everyday life

HIAA 1550B. Topics in the Early History of Printmaking: Festival and Carnival. This course looks at the printed festival books made for recording ideal versions of royal entries, funerals, weddings and other printed expressions of regal celebration, alongside printed, painted and otherwise recorded evidence of popular celebrations such as carnival, and civic and religious festivals such as the Sienese palio. Although beginning with circulated prints and books, we will also look at the material culture of these events in their widest sense to investigate the advertisement and control of festival cultures. The class will focus on early modern Italy but students are welcome to broaden our geographic horizons. Enrollment limited to 20

HIAA 1560A. Lorenzo Lotto and the Italian Renaissance. No description available

HIAA 1560B. Manerism. This class provides an opportunity to study courtly painting, sculpture, prints, drawing and architecture of the movement that became known as Manerism. The material will focus most strongly on the art of Florence and Rome, but we will also be looking at France and Bohemia, and at the history, literature and literature of art of those centers
HIAA 1560C. Renaissance Venice and the Veneto.
This course explores the visual culture, theater, ritual, architecture, and urban development of Venice and the Veneto from the late medieval period through the 16th century, tracing the development of painting, sculpture, architecture and a literature of art within the city’s unique physical configuration and relationship with the East. For advanced students, written permission required and given at first meeting. A

HIAA 1560D. Siena from Simone Martini to Beccafumi.
This course will focus on the art and architecture of republican Siena over the 250 year period before its annexation to Tuscany in 1555. We will study the relationships between piety, work, and politics in a rich period of building and decorating that has determined the look and, to an extent, the culture of the city until the present day. WRIT

HIAA 1560E. The Arts of Renaissance Courts.
Courts were active patronage centers in the areas of secular and religious painting, sculpture and architecture, book illumination, rich narrative textiles for interior use and ornamental ones for costume, as well as ephemeral works for theatrical productions, triumphal entries and festivities. Artists working at court were able to ignore guild regulations, and acquired a status for themselves that set them apart from other urban practitioners. Centering our investigation on primary sources as far as possible, we will study a wide range of works, materials, ideologies and practices that contributed to the reputation of the Italian courts as centers of opulence and power. Final project and weekly class meetings required. Enrollment limited to 20. Instructor permission required. WRIT

HIAA 1560F. Topics in Italian Visual Culture: The Visible City, 1400-1800.
We will look at the image of the city in all media, attending to the contexts in which they are illustrated, the technologies of representation and the reasons for imagining cities, taking into account iconic and symbolic representations, personifications, maps and views, and comparing visual and textual descriptions of the places of early modern urban life

In this historici:zation of investigation of viewing, we will be examining conditions of looking and believing from 1450-1800, asking how pictures organized information, what skills artists and viewers must have to effect the connection between viewer and idea, the role of imagery in the function of the imagination, and its trustworthiness in the production of truth. Our goal will be to identify how visual imagery in genres as diverse as maps, scientific illustration, and art has been used in different disciplines and endeavors that produce knowledge and explain ideas. Enrollment limited to 20 juniors and seniors with instructor’s permission

HIAA 1600A. Bosch and Bruegel.
An in-depth look at the work of these two enigmatic Netherlandish artists. After seeing how art history uses various methods to establish what they actually painted and drew, we will move outwards to interpretation and historical study of their images of comedy, proverb, religion, and landscape. Artworks in local museums will be important focuses of discussion. Prerequisites: HIAA 01 or 50

HIAA 1600B. Caravaggio.
Caravaggio is one of the great revolutionary artists and a real cultural phenomenon in his own time and ours. This seminar considers in-depth the nature of his work, the different historical strategies used to explain it, and possible new approaches. Prerequisites: HIAA 0010 or HIAA courses in early modern art

HIAA 1600C. Italian Baroque Painting and Sculpture.
Examines developments in painting and sculpture in 17th century Italy with focus on the impact of the Catholic church and the rediscovery of antiquity on church and palace decoration, public and private commissions, and the rhetoric of Baroque style and iconography. Study of individual artists, including Caravaggio, Artemisia Gentileschi, and Gianlorenzo Bernini, as well as art academies, the mechanics of patronage and writings about art and artists

HIAA 1600D. The Art of Peter Paul Rubens.
The seminar will study the seminal work of Rubens in all its aspects

HIAA 1600E. The World Turned Upside Down.
Seminars examining the comic and satirical traditions in Netherlandish art, including works by Hieronymus, Bosch, Pieter Bruegel the Elder, Adriaen Brouwer, and Jan Steen. How do visual images connect with writers such as Erasmus and Rabelais, with polemical satires of the Reformation, and with popular literature along the lines Renard the fox. What historical developments were at play in the formation of comic stereotypes and the representation of charged events such as the celebration of carnival?

HIAA 1600F. Antwerp: Art and Urban History.
To be submitted

HIAA 1600G. Art + Religion in Early Modern Europe.
In this seminar we will reconstruct the various ways in which visual communication participated in the practice and changes of religious life during the early modern period (1400-1800). Topics will range from the role played by prints in the spread of the Reformation to the design of new kinds of architecture for the implementation of the Catholic Counter Reformation. Close attention will be given to the significance of iconoclasm (destruction of images), ideals of visual communication for religious persuasion, the invention of new methods of meditation with visual focus, and the relationship between sacred words and images. Enrollment limited to 20

HIAA 1600H. Comedy in Netherlandish Art From Hieronymus Bosch to Jan Steen.
No description available

HIAA 1600I. Collections and Visual Knowledge in Early Modern Europe: 1400-1800.
Examines the ways in which collections organized and developed new kinds of knowledge and practices. Collections were decisive in the formation of art, history, science, religion, politics, and international relations. We will discuss the rationales behind these different kinds of collections, the order in which things were placed, the visual organization and architecture that created the first museums, and the economics of collections. Attention to the collections of kings, artists, natural scientists, middle class citizens, humanists, and the devout will provide examples from a wide variety of perspectives. Enrollment limited to 20

HIAA 1600J. Rembrandt.
This seminar will concentrate on art of Rembrandt. We will study his technique, development, and varied subject matter in all media from drawings to etchings and paintings. Rembrandt’s work will be related to the historical contexts in which it was created and displayed. Prerequisite: previous courses in History of Art and Architecture. Enrollment limited to 20

About Face: English Portraiture, 1660-1800: This course will consider the function and meaning of portraiture in England from Sir Peter Lely’s ‘Beauties’ of Charles II to James Gillray’s social and political satires. We will pay particular attention to the interrelationships between official portraiture and unofficial forms such as caricature.

HIAA 1650B. Visualizing Revolutionary Bodies 1785-1815.
The French Revolution was accompanied by crisis in representation that was both political and cultural. This seminar will examine the problem of how artists and their publics sought to image, or literally to "embody" new forms of individual and communal identity in painting, prints, public festivals, and sculpture. Students will be encouraged to draw on the resources of the John Hay Library, the RISD museum, and other local museums and archives for their research projects

HIAA 1650C. Visual Culture and the Production of Identity in the Atlantic World, 1700-1815.
This seminar will examine the production, reception and circulation of visual culture within the vortex of the 18th century Atlantic world (including such sites as Britain, France, colonial America, Mexico and the Caribbean). Enrollment limit 20

HIAA 1650D. Souvenirs: Remembering the Pleasures and Perils of the Grand Tour.
Examines visual image and objects, ranging from portraits, landscape watercolors and graphic satires, to cork models of antiquities, which served to remind and remake travelers’ ideas of Italy and other sites on the eighteenth century Grand Tour of the European continent. We will examine the role of anxiety, laughter, pleasure and danger in a rite of passage that was designed to elevate and educate young men, artists, and increasingly, women and men from the middling orders. Enrollment limited to 20
HIAA 1700A. Topics in Nineteenth-Century Architecture.
This research seminar makes extensive use of the architectural drawings at the Rhode Island School of Design. We learn how to read, analyze and catalogue architectural drawings, and explore issues in turn-of-the-century architecture. Pending approval, the enrollment limit will be set to the number of students that can be accommodated at the RISD drawings collection

HIAA 1750A. Landscape Imagery and Nationalism in Britain and North America, 1750-1900.
A research seminar exploring the role of landscape imagery in the formation of national identity in Britain and North America. Extensive use is made of the collections of oil paintings, watercolors, prints, and photographs at the Museum of the Rhode Island School of Design

HIAA 1750B. Images and the Making of London in the Nineteenth Century.
This course will examine the way in which London was "produced" as a modern city by various forms of visual imagery (print and painted), including maps, panoramas, and caricatures

HIAA 1750C. Orienting Asia in Anglo-European Visual Culture.
This seminar will examine painting, prints and the decorative arts. We will examine objects produced in Asia for export to the west as well as images that are oriented towards Asia. Enrollment limited to 20

HIAA 1750D. Landscape Imagery and National and Imperial Identities in Britain and North America, 1750-1900.
In this course we will consider the period when the landscape genre became an important medium for visualizing both nation and empire. We will begin by examining the development of landscape drawing and painting in England and its colonies in the eighteenth and early nineteenth centuries, and then consider how these traditions were reworked in the development of landscape imagery in the United States through the Civil War. We will draw on visual resources from the RISD Museum (which has an excellent collection of British watercolors, and American oil paintings and photographs)

HIAA 1760A. Symbolist Europe 1880-1910.
Symbolist artists include Munch, Khnopff, Ensor, Claudel, Van Gogh, Redon, Moreau, Klimt, Gauguin and Hodler. Until recently, Symbolism has been marginalised in the history of modern art because of its many paradoxes. Seminar sessions focus on Symbolism’s social, religious, artistic and literary content, expressed through its many styles, mediums, and practitioners, and will work with a variety of methodological approaches

HIAA 1760B. French Impressionist and Post-Impressionist Art.
The course focuses on the work of Realist, Impressionist, and Post-Impressionist artists within their political and social context. Topics to be covered include the rise of modern life subjects, the privatization of artistic practice, the death of naturalism, nationalism and avant-garde painting, the role of gender and the impact of mass culture. Artists to be considered include Manet, Monet, Degas, Cezanne, Pissarro, Morisot, Seurat, Van Gogh and Gauguin

HIAA 1760C. Constructions of the Body in Mid- to Late-Nineteenth Century French Art.
Explores the way in which French artists of the mid- to late-nineteenth century figured the human body in their work in some cases to reproduce stereotypes meant to regulate the body socially, sexually, and politically, and in others to problematize or undermine those stereotypes. Topics to be considered include formulations of the male and female nude, the imagery of prostitution, and constructions of the female artist. Artists to be considered include Courbet, manet, Degas, Pissarro, Gauguin, and Toulouse-Lautrec

HIAA 1850A. Frank Lloyd Wright.
Seminar concentrating on the architecture of Frank Lloyd Wright-usually considered the most important architect in American history-and the critical discourse surrounding it. Selected scholarship serves as a paradigm for broader discussions about the history, contemporary roles, and shortcomings of architectural criticism and historiography. Examines the Frank Lloyd Wright Foundation’s approach to critical scholarship and the commercialization of Wright’s oeuvre

HIAA 1850B. Reading the Imperial City: Ottoman Istanbul and its World.
This seminar explores the urban structure, architecture, and symbolic elements of Ottoman Istanbul. We will deal not only with the social and political institutions that shaped the urban order, but also with the meanings and experiences of the imperial landscape. Particular attention will be given to the manner in which the city was produced, experienced, documented, remembered and contested

HIAA 1850C. The City of Paris: Urbanism and Architecture from the Tenth through the Twentieth Centuries.
An introduction to the history of architecture and urbanism through the examination of Paris, capital city of France over the more than ten centuries of its development from Roman until modern times. Lectures and readings explore important monuments and urban spaces and the issues relevant to their development over time. These include the notion of a capital, the importance of construction in shaping perception of the city’s sense of identity (and identities, and major urban renewals and transformations. Paris will be briefly considered in relation to other famous capital cities such as Baroque Rome and nineteenth-century London. No previous experience in the history of architecture or urbanism is required. All readings are in English, although knowledge of French is always useful.

HIAA 1850D. Film Architecture.
Since the 1920s, a far-reaching discussion about the mutual influence between the two most important art forms of the 20th century - film and architecture - has engaged set designers, architects, cinematographers and critics. Apart from a fascination with the impact that the techniques of the new medium, such as montage, slow motion, close-ups and camera movements, would have on the perception and presentation of architecture, there continuously has been an enormous interest in the poetics of film sets as a natural home for visionary, historical, mystical or psychological space could be developed. This seminar will study selected chapters in the history of cinematic set design through the twentieth century and examine masterpieces, major movements, protagonists, and crucial theoretical debates. In addition, the course looks at the depiction of the city through film and the role of the movies as a reflection, commentary, and experimental laboratory for contemporary architecture

HIAA 1850E. Architecture, Light and Urban Screens.
This seminar explores the history, theory and practice of architectural illumination and the notion of electric light as a "building material." We will also consider the current interest in urban screens and media facades. The course will follow a historic trajectory from ca. 1900 to the present and will introduce the students to the most important techniques, protagonists and critical debates over the past 100 years. We will critically examine the broader implications of lighting design, the tension between luminous advertising and architectural illumination, the relationship to stage lighting, the implications of a "nocturnal modernity" and the use of light for propaganda purposes. Enrollment limited to 20. Instructor permission required.

HIAA 1850F. The Architecture and Urbanism of Modern Istanbul.
This seminar will survey the architecture and urbanism of modern Istanbul paying particular attention to the historiographic frameworks that have shaped the study of the city. The course will first analyze the perspectives offered by contemporary works of architectural urban history on the late Ottoman period. It will then look at recent architectural histories of the Republican era of nation building, and sociological studies on the post-war era of rapid urbanization, and post-1980s globalization. Enrollment limited to 20. WRIT

Examines the history of American urban planning from the canonization of the modernist tradition following WWII to its effect on urbanism over the remainder of the twentieth century. We will examine the influence of the modernist tradition on major urban processes of the time period, including urban renewal, sprawl, suburbanization, and downtown revival. The class considers how modernism was received and will include discussion on postmodern urban analysis and contemporary approaches to green planning. No prerequisites, but prior courses in twentieth century architecture, art, or visual culture will be helpful. Enrollment limited to 20. Instructor permission required.
HIAA 1890A. Art of Participation: Promises of Performance, Happening + Installation of Arts from the 50s to 70s. Contemporary artists (and, eventually, institutions) frequently require the active participation of the public. In order to avoid a passive acceptance of this pervasive trend, this undergraduate seminar intends to question the historical and theoretical foundations of the participation notion through the development of the arts of performance, happening and installation. First situating historically this tendency in the first avant-garde, the seminar intends to interrogate the promise of an individual or collective liberation underlying the “arts of participation”. Enrollment limited to 20

HIAA 1890B. The Sublime is Now. The art and thinking of Barnett Newman will be our starting point, focusing on his search for a “sublime art”. We will need to examine the backward and forward meanings of the sublime (in first abstraction and land art, for example). This approach will lead us to explore the infiltration of the sublime in works of abstract and figurative artists of his generation, both American and European

HIAA 1890C. Art and Technology: The Lesson of the 1960’s. Explores the alliance between art and technology by studying the development of the E.A.T. (Experiment in Art and Technology), founded in the mid-1960’s by Billy Kluyver and Robert Rauschenberg. Examining their attempt to foster a new collaboration between artists and engineers, the discussion is an attempt to question the capacity and the limits of art in creating models of social relationships

HIAA 1890D. Art Between the Wars. The seminar examines European and American art between the two World Wars. How did European and American artists give visual form to the experience of war and conceive the role of art in the aftermath of war? What factors (e.g. the founding of modern art museums, the criticism of Clement Greenberg and Meyer Schapiro, the questioning of realist modes of practice) led to New York’s emergence as the “capital” of modern art and the development of Abstract Expressionism? Did responses to the totalitarian regimes in the 1930s and World War II differ from responses to World War I, and if so why? Enrollment limited to 20

HIAA 1890E. Muzak and the Arts. The seminar will examine the relationship between the emergence of participatory aesthetics in the arts of 1960s America, the development of experimental music, and the pervasiveness of Muzak (commercial, corporate background music) in our surroundings. It offers an historical, case-study based reflection on the turning of collective life in our society into what Jean Baudrillard identified as an official, obligatory, supervised and gigantic Happening

HIAA 1890F. From Worlds in miniature to miniature worlds: Theming and Virtuality. This seminar surveys spaces of consumption that are organized around themes such as theme parks. Miniaturization, in particular, is a prevalent spatial strategy used in themed environments that range in form from historical quarters of cities that are reconfigured as miniature museums to the culturally-themed hyperreal representations that emerge in multi-user virtual environments such as Second Life. What are the different kinds of experience these spaces offer to visitors immersed in their exhibitions? What are the appeals of themed environments and virtual reality technologies they employ? Posing such questions, this seminar explores theming and virtuality both historically and globally. Enrollment limited to 20

HIAA 1890G. Contemporary Art of Africa and the Diaspora. Will explore the art of contemporary Africa and its diaspora with an eye towards understanding the political and economic context in which it is produced and consumed. Our approach will be interdisciplinary, putting key theoretical texts from anthropology on the political economy of Africa in dialog with the works of contemporary artists. However, the intent here is not to reduce creativity to an economic activity alone, though we will be addressing the economics of art markets. Rather, we will explore artistic practices that surmount "the tyranny of the 'already,'" as Malian writers Konate and Savane have eloquently said. Enrollment limited to 20 juniors, seniors, and graduate students

HIAA 1890H. Muzak and the Arts. Did responses to the development of the arts of performance, happening and installation? The seminar examines European and American art between the two World Wars. How did European and American artists give visual form to the experience of war and conceive the role of art in the aftermath of war? What factors (e.g. the founding of modern art museums, the criticism of Clement Greenberg and Meyer Schapiro, the questioning of realist modes of practice) led to New York’s emergence as the “capital” of modern art and the development of Abstract Expressionism? Did responses to the totalitarian regimes in the 1930s and World War II differ from responses to World War I, and if so why? Enrollment limited to 20

HIAA 1910A. Architecture of Downtown Providence from Late Nineteenth Century to the Present. Seminar examining selected aspects of the architecture of downtown Providence from the late 19th century to the present. Projects require research at local archives, libraries, and architectural drawings collections. Instructor permission required. A

HIAA 1910B. Project Seminar: The Architecture of Bridges. No description available

HIAA 1910C. Research Seminar Gothic Art. No description available

HIAA 1910D. Water and Architecture. The seminar explores the varied ways in which water is manipulated in architecture and urban planning. We examine several case studies, including Roman aqueducts such as the Pont du Gard, medieval urban and monastic hydraulic systems, Renaissance and early modern garden (and fountain) design, and the local examples of Slater Mill and the Providence water supply. A

HIAA 1910E. Project Seminar for Architectural Studies Concentrators. A

HIAA 1910F. To Be Determined. No description available. Enrollment limited to 20 students concentrating in History of Art and Architecture

HIAA 1920. Individual Study Project in the History of Art and Architecture. Reading and reports on an approved topic, supervised by a member of the staff. Project proposals must be submitted and approved no later than the first week of the semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

HIAA 1930. The History and Methods of Art Historical Interpretation. This seminar provides an overview of the methods and theories used by art historians and as an introduction to the history of the discipline. Through readings and discussions, we will examine how art history emerged as an intellectual pursuit and humanistic discipline in the modern era, and review its foundations in the Western philosophical tradition. The transformations wrought by the advent of critical theory and the incorporation of approaches from outside the discipline of art history will receive particular attention in the second half of the course. Open to juniors and seniors concentrating in History of Art and Architecture or Architectural Studies

HIAA 1990. Honors Thesis. The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

HIAA 2040A. Loyalty and Protest: Yimin Visual Culture During the Early Yuan Period. The Mongol conquest of China (1279) provoked loyalist survivors to embody their feelings of loss, longing, outrage, and resistance in painting. This seminar explores their empowerment of images as agents of covert political comment in the loyalist community

HIAA 2040B. Painting and Politics at the Song Court (960-1279) and Outside It. Explores deployment of painting by emperors in the service of legitimation and power maintenance and the emergence of scholar-official art as counter-aesthetic, vehicle of dissent, and instrument for contesting cultural hegemony in imperial China

HIAA 2040C. Chinese Art under Mongolian Rule: Reconfiguring the Yuan Dynasty Paradigm. Studies of Yuan Dynasty (1279-1368) visual art traditionally have centered on the activities of Chinese scholar-amateur calligraphers and painters and have interpreted their activities as assertions of Chinese cultural values under oppressive foreign rule. Recent research, archaeological excavations, and scholarly symposia – especially studies of Late Song, Jin, and Northern-tier cultures - have complicated this Sinocentric essentialist picture. In this seminar, we will explore new Late Song, Jin, Yuan and Northern cultural studies, critically interrogate the standing paradigm,
and use multi-disciplinary methodologies to arrive at a more satisfying understanding of this watershed period. Written permission required

No description available

HIAA 2150B. Spanish Renaissance and Baroque Sculpture.
No description available

HIAA 2150C. The Art of Velazquez and the Golden Age of Spanish Painting.
No description available

HIAA 2150D. Polychrome Sculpture in the Golden Age of the Spanish World.
To be submitted

HIAA 2250. Research Seminar in Greek Art and Architecture.
No description available

HIAA 2350A. Allegories/Symbols in Roman Art, Origins in Hellenistic Art, Augmentation in Early Christian Art.
Roman historical relief sculpture

HIAA 2350B. Research Seminar in Roman Art and Architecture: Topography of Rome.
Major monuments of the city of Rome from the Republic to the rise of Christianity

HIAA 2430A. The Visual Culture of Medieval Women.
The course treats the history of women as commissioners, creators and subjects of medieval art. Case studies will be drawn from western Europe, Byzantium and Islam. Weekly seminars consider feminist perspectives in medieval history and art history; imagining of women in medieval art; archaeological approaches to gender and the analysis of gendered spaces; and the art and architecture of female spirituality

HIAA 2430B. The Afterlife of Antiquity.
Examines the survival and revival of classical art and architecture in the Middle Ages. Discussion focuses on selected case studies from across Europe and critically engages the secondary literature on classical revival

HIAA 2430C. Representing the Past: Archaeology through Image and Text.
The archaeological past exists for us through intermediaries that may be written or visual. Drawings, descriptions, photographs, graphs, charts and computer visualizations all display a considered image of the past. This seminar takes a critical look at the literature on visualization, and at the strategies by which scholars have re-presented the archaeological past of a range of cultures

HIAA 2440A. Recent Approaches to the Gothic Cathedral.
No description available

HIAA 2440B. The Body in Medieval Art and Architecture.
The seminar considers the contradictory aspects of embodiment in visual and material culture of the Middle Ages. We will examine the veneration of holy bodies through living holy individuals, and through body parts (relics) and the Eucharist enshrined in sumptuous containers. We will look at the iconography of death and resurrection, the representation of the body in painting and sculpture, attitudes toward sexuality, the performance of identity through clothing, and the sumptuary laws that governed clothing and behavior. We will investigate funerary rituals and burial, and the movement of living bodies in dance and in civic and religious processions. Enrollment limited to 25

HIAA 2440C. Gothic Art.
Recent approaches to the Gothic Cathedral

HIAA 2450. Exchange Scholar Program.

HIAA 2540B. Print Culture in Early Modern Europe.
Examines the uses of prints, book illustration, and other pictorial printed schema in the early modern period, seeking to explain some of the ways visual information was produced and reproduced. Relationships between the prints and other arts are explored, with an eye to the roles of visual convention in overtly didactic materials such as maps and charts

HIAA 2540C. Illustrating Knowledge in Early Modern Europe.
We will look at the history of scientific illustration in the age of the first printed books, using works in special collections libraries to investigate the exchange of ideas and the development of specializations in the arts and sciences from about 1450-1800. Focusing primarily on Italian examples, comparative projects may be chosen from any country in which the student can read the language

HIAA 2540D. The Theater that was Rome.
The Theater that was Rome* is a digital research site uniting text and images to portray the development of Rome (1500-1800) in the flood of printed information that proceeded from interest in the physical and mythological city. Our goal is to provide historical and critical interpretation of these illustrated books and prints that created Rome as a theater for the most advanced technological and decorative feats of an international group of artists, architects, engineers, authors, and publishers, looking at their productive collaborations, and using original materials, often in languages other than English, at the Hay Library and on the website. For graduate students; qualified upper-level undergraduates should contact the instructor. Enrollment limited to 15

HIAA 2550A. The Visual Cultures of Southern Italy.
A workshop devoted to the visual cultures of Southern Italy, a geographical location with an unstable ruling population and sense of cultural identity from the late medieval through the early modern period. Projects about any aspect of art/architecture of Italy from south of Rome to Sicily are welcome. Research requires reading ability in Italian, Spanish, or French

HIAA 2550B. Art and Charity in the Renaissance.
This seminar looks at the roles of art and architecture in commissioning charitable works in the service of maintaining a healthy civic body, including the design and decoration of hospitals, orphanages, ghettos, homes for women, immigrants and the poor, in the context of institutional structures that provide for marginal people. Examples will be from Italy, but students may work in other areas

HIAA 2600B. Flemish Art.
No description available

HIAA 2600C. Rubens.
No description available

The seminar will study the central role of visual culture in Counter Reformation Antwerp

HIAA 2600E. Jesuit Global Strategies in Art and Conversion.
The purpose of this seminar is to examine the first global strategy to use art for the purpose of persuasion and conversion. In Europe, Asia, and the Americas during the early modern period, the Jesuits adapted their messages of visual communication, in architecture, prints, paintings, maps, dress, and rituals, to meet what they calculated would be the conceptual frameworks and customs of their target audiences, whether Chinese court officials, Flemish peasants. The seminar will search for the deeper historical roots of this strategy which up to now have not been traced. Open to graduate students only

This course examines art and other forms of visual representation that imaged the colonial exchange between Europe and the Caribbean from the late 17th through the early 19th centuries. Readings include current scholarship in postcolonial theory devoted to theorizing colonial relationships in terms of transculturation and exchange. Students are encouraged to select research topics that allow them to take advantage of the rich trove of primary resources at the John Carter Brown and John Hay libraries
HIAA 2650B. Comic and Satiric Art in Eighteenth-Century Britain.
Will look at the development of comic art, particularly the satiric print, as a "public" art form in Britain from 1700-1815. In the work of Hogarth, Gillray and others, we'll consider the theory and practice of caricature and the vexed relationship between "high" and "low" as artistic categories

HIAA 2750A. Fashioning the Hero/Tyrant: Visual Culture in the Age of Napoleon.
Examines the role of visual culture in producing the cult of Napoleon and the image of France as an imperial power in the late eighteenth and early nineteenth centuries. Emphasizes representations produced in France and Britain, although attention is paid as well to relevant works produced in Spain and the German and Italian states

HIAA 2750B. No Space of Virtue? Fashioning the Feminine in English Urban Culture from Hogarth to Mayhew.
Explores issues around the intersection of space and gender by considering how visual culture represented women in the context of an increasingly urban culture in 18th- and 19th-century England. Examines how urban culture affects notions of femininity as well as how gender affects representations of the city

HIAA 2750C. Representations of Racial Difference in Atlantic Art: 1770-1815.
This seminar will consider how various forms of visual representation (painting, graphic satire, ethnographic and scientific prints) participated in the production of racialized difference within the context of the Atlantic world, constituted by Europe, Africa and the Americas

HIAA 2750D. Landscape Painting and Nationalism in Britain and North America, 1750-1900.
HIAA 2760A. Cezanne.
No description available

HIAA 2760B. Manet Studies.
No description available

HIAA 2760C. Paris in the 1860s.
No description available

HIAA 2800A. Defining English Realism.
No description available

HIAA 2850A. Architectural Theory in the Nineteenth and Twentieth Centuries.
Examines key texts in the history of architecture since the 1800s.Contrasts texts by architects with their actual work and places them into the social, political, and art historical context of their time. Texts by Schinkel, Semper, Ruskin, Viollet-le-Duc, Louis Sullivan, Frank Lloyd Wright, Otto Wagner, Le Corbusier, Walter Gropius, Mies van der Rohe, Louis Kahn, Robert Venturi, and others.

HIAA 2850B. Architecture of Frank Lloyd Wright.
A seminar concentrating on the architecture of Frank Lloyd Wright and the surrounding critical discourse. Wright is usually considered the most important architect in American history. Selected scholarship serves as a paradigm for broader discussions about the history, contemporary roles, and shortcomings of architectural criticism and historiography. Examines the Frank Lloyd Wright Foundation's approach to critical scholarship and the commercialization of Wright's oeuvre

HIAA 2850C. Architecture, Urbanism, and Post-Colonial.
This graduate seminar explores the relationship among architecture and urban design, colonial empire, and national development, via a comparative analysis of cultural interactions between Europe and its non-western "others" from ca. 1800 to the present. We will draw upon recent critical debates on orientalism, colonialism and empire, and politics of representation as well as interdisciplinary studies of modernity and identity

HIAA 2850D. Ludwig Mies van der Rohe.
This seminar will explore the work of Ludwig Mies van der Rohe, one of the most influential architects of the 20th Century. While Mies has been continually discussed and exhibited (the Museum of Modern Art alone held 7 exhibitions about him since 1947, most recently in 2001), to this day, his work has neither been contextualized sufficiently nor has its reception been critically examined. Apart from studying and understanding Mies van der Rohe's work in its context, this seminar will explore responses by contemporary critics and compare those to later interpretations

HIAA 2860A. The Museum and the Photograph.
This graduate seminar examines the relationship between two rapidly evolving modern institutions: the history of photography and the modern art museum. Through readings, discussions, and independent research, we will look at how the history of photography has been affected by its unique association with the museum, and what this means for it as a field of intellectual inquiry. Enrollment limited to 15

HIAA 2860B. Photographic Origins.
Through a series of directed readings and discussions, this seminar explores the origins and implications of photography's invention in the wake of Enlightenment philosophy, the industrial revolution, and Romanticism in Europe. No prerequisites, but background in the history of photography and/or 19th century Western art is encouraged

HIAA 2860C. Roland Barthes.
In the past few decades, the ideas of the French philosopher Roland Barthes have been indispensable to our understanding of the photograph as a theoretical object. This graduate seminar will critically examine Barthes' writings on the subject, from Mythologies to Camera Lucida, placing them within the larger context of Barthes' structuralist project as a whole and contemporary analyses of photography and lens-based imagery

HIAA 2860D. Photography and Objectivity.
From the moment of its arrival in Western culture, the photograph has been characterized as the product of a machine, of optics and chemistry. The mechanical nature of the medium seemed to guarantee it a special relation to its subject: the photograph showed something real, through an analog technology that was essentially objective. This graduate level seminar will investigate the notion of objectivity, as it has been analyzed in the history of science and other fields, and as it has been discussed in relation to photography. Enrollment limited to 15 graduate students

HIAA 2870A. Pop Art-This Obscure Object of Desire.
No description available

One could argue, following Reyner Banham that the revolutionary impulse of the 1960s has been superseded, but has not been reversed. From a contemporary point of view, this seminar will discuss specific case studies in order to question the different inflexions of the technological vision of our future which developed in Europe and the United States in the 1960s (From the Independent Group in London to the foundation of the American collective Experiment in Art and Technology in the US). Along with the analysis of related works and visual documents, the discussion will be supported by a variety of writings ranging from Marshall McLuhan, Gyorgy Kepes, Buckminster Fuller, John Cage, Nicolas Schöffer, Herbert Marcuse, Billy Klüver, Paul Virilio or Italo Calvino, notably

HIAA 2870C. The Painting of Francis Bacon.
The art and personality of Francis Bacon appear to be bound in inextricable paradoxes that have fostered a high quantity of diverging commentaries. This research seminar wil try to explore the aesthetic of Francis Bacon, following the manifold propositions of his art. This contradictory and complex figure provides an appropriate standpoint to observe, after 1945, the tensions and links between the fall of a powerful European tradition and the rise of an American alternative

HIAA 2870D. Architecture of the Contemporary Art Museum.
This seminar will address the architecture of contemporary art museums. Beginning with Frank Gehry’s Guggenheim Bilbao, this course will examine the explosive growth of art museums in the past decade. An overview of museum design, especially in the late twentieth century, will introduce factors such as society, culture, money, and the phenomenon of "starchitecture" that influence the proliferation of new museums.

Students will give a presentation on a contemporary European or American architect and will then design a new art museum for Brown University as if they were that designer. Previous drawing or design experience is not required. Written permission of the instructor is required

Studies critically the reactivation, in 1960's European and American arts of the twentieth century modernist project of a reformation of society by art. Notions of participation, utopia, the expectations generated by visual music, the role of new technologies will be discussed, as well as their
repercussion on current artistic practices and discourses on contemporary art (i.e. the popular concept of "relational aesthetic"). Basic working level of French will help. Enrollment limited to 20. Instructor permission required.

HIAA 2870F. Facture: East and West.
Objects are the tangible outcomes of available means of making. One can’t understand the maker’s choices unless one understands the maker’s practical options. This seminar focuses on the materiality of objects by grounding them in the fundamentals of making material culture in Asia and the West – that is, facture. We explore ceramic technologies; lapidary crafts, and mosaics; metallurgy; painting mediums and surfaces; mass-production, and modules; realized outcomes of computer-assisted design. Instruction includes lecture-demonstrations by guest practitioners and site-visits to foundries, studios, conservation laboratories. Readings span history of technology, science and aesthetics, contemporary writings on the "thingness" of art history. Enrollment limited to 15 graduate students in History of Art and Architecture. Instructor permission required.

This course will examine the impact of the lesbian, gay, bisexual, and transgender civil rights movement on American visual culture. It will examine the works of such openly queer artists as Goldin, Hammond, Ligon, Mapplethorpe, and Warhol, but also the influences of drag, performativity, and sexual difference on such artists as Acconci, Benglis, Matta-Clark, and Sherman. A central focus will be the uses of the waterfront of New York by artists and gay subcultures. The LA Woman’s Building will be discussed in terms of the ways it negotiated an uneasy alliances between feminist and lesbian practices.

HIAA 2920. Methods of Research and Art Historical Interpretation.
Required of first-year and second year history of art and architecture A.M./Ph.D. students. Enrollment limited to 20. Instructor permission required.

HIAA 2930. Practicum.
Goya and the Interpretation of War. Working with materials from the Brown collection and RISD Museum. Reading knowledge of Spanish and French strongly advised. Pre-approval required, please contact instructor by email. Open to graduate students only.

HIAA 2940. Master’s Qualifying Paper Preparation.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for their doctoral examination.

HIAA 2980. Individual Reading (Single Credit).
Single credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2981. Individual Reading (Double Credit).
Double credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2982. Individual Reading for the Doctoral Candidate.
Single Credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2983. Dissertation Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2990. Thesis Preparation.
For graduate students who are preparing a thesis and who have met the tuition requirement and are paying the Registration Fee to continue active enrollment.

HIAA 2991. Dissertation Preparation.
For graduate students who are preparing a dissertation and who have met the tuition requirement and are paying the registration fee to continue active enrollment.

Center for the Study of Human Development
Child and Adolescent Development is the primary focus of research and teaching of the faculty affiliated with this multidisciplinary Brown University center. In the interdisciplinary study of processes by which infants, children and adolescents proceed through life along pathways characteristic of our species, issues of behavioral stability, change and transformation are paramount. The study of development focuses on the dynamic processes that underlie behavioral, cognitive, social, and affective growth, learning, language, and maturation. Influences of social and cultural context constitute critical elements of these dynamic systems.

The Center was founded in 1967 as the Child Study Center and has had a long history of sponsoring research informed by a variety of disciplines, including longitudinal studies of infant growth and development, social adaptation through childhood and adolescence, and educational reform. Research conducted by faculty affiliated with the Center in recent years includes studies of language acquisition, social and cognitive development, sleep, cultural and structural bases of developmental processes, and parenting and family functioning. Studies include both normative populations and children at risk due to physiological and/or social disadvantage. A distinguishing feature of child and adolescent developmental research at Brown is its integration of basic scientific scholarship with research that bears direct implications for practitioners and policy makers.

The center’s activities are threefold:
1. The center facilitates communication and collaboration among faculty and students interested in developmental research and training—a collaboration that crosses departmental and disciplinary boundaries and creates links between the campus and the medical school.
2. The center serves as a resource for programs for students interested in learning about human development both on campus and at the medical school. These currently include the Human Development track of the Education Studies concentration, administered by the Education Department which includes courses from several social and life science departments. In addition the Center sponsors pre- and postdoctoral training that provides a solid basis for pursuing careers in Psychology, Education, Pediatrics and a variety of other human service fields. Through grants obtained by faculty and the Solsbery Fellowship Fund students can obtain funding to conduct their own research and/or work closely on a variety of ongoing research projects.
3. The center sponsors an annual colloquium series that brings faculty from within and outside Brown and conferences on topics of interest to the campus community and the broader community beyond Brown. In 2001, for example, a 2-day conference on "Genetic Influences on Human Behavior and Development" provided the basis for a book shortly to be published by Lawrence Erlbaum Associates, Inc., Publishers.

For additional information please visit the Center’s http://www.brown.edu/Departments/Human_Development_Center/index.html.

International Relations
Director
Mark M. Blyth
Associate Director
Claudia Elliott

International Relations (IR) is a rigorous program that combines student choice with cross-disciplinary training in international and comparative perspective. The IR program emphasizes: a solid grounding in the methods of analysis used in the social sciences and humanities to help students think critically about international phenomena, the exploration of
International Relations Concentration Requirements

The IR concentration is one of the largest concentrations at Brown. The objective of the International Relations concentration is to foster creative thinking about complex global problems and to equip students with the analytic tools, language expertise, and cross-cultural understanding to guide them in that process. To this end, the concentration draws on numerous departments including political science, history, economics, anthropology, sociology, psychology, religious studies, and area studies. The IR concentration is organized around a multidisciplinary core and two sub-themes: security and society, and political economy and society. It has a three-year language requirement that must be linked to the students selected region of the world. All concentrators are required to undertake a capstone project using research in a second language.

Requirements

The IR concentration requires 14 courses and the equivalent of 3 years study of a second language.

Core Courses

- ANTH 0110 Anthropology and Global Social Problems: Movements, Mobilities, Migration
- ECON 0110 Principles of Economics
- HIST 1900 American Empire Since 1890
- POLS 0400 Introduction to International Politics
- SOC 1620 Globalization and Social Conflict

Track Requirements (five courses from ONE track distributed between the sub-themes):

Security and Society:
- Conflict (two or three courses):
  - ANTH 1232 War and Society
  - ANTH 1411 Nations within States
  - HIST 1350 Modern Genocide and Other Crimes against Humanity
- INTL 1280 Global Security After the Cold War
- POLS 1560 American Foreign Policy
- Society (two or three courses):
  - ANTH 1233 Ethnographies of Global Connection: Politics, Culture and International Relations
  - INTL 1400 Religion and Global Politics
  - INTL 1800N Global Media: History, Theory, Production
- POLS 1380 Ethnic Politics and Conflict
- POLS 1500 The International Law and Politics of Human Rights
- POLS 1821M War in Film and Literature
- SOC 1270 Race, Class, and Ethnicity in the Modern World

Political Economy and Society

Economics (two or three courses):
- ECON 1110 Intermediate Microeconomics
- ECON 1500 Current Global Macroeconomic Challenges
- or ECON 1540 International Trade
- or ECON 1550 International Finance
- ECON 1210 Intermediate Macroeconomics

Politicaleconomy (two or three courses):

ANTH 0450 Two Billion Cars: Humans, Markets, Cultures, and the Automobile
ANTH 1324 Money, Work, and Power: Culture and Economics
INTL 1801M Globalization and the Rise of Asia
POLS 1020 Politics of the Illicit Global Economy
POLS 1420 Money and Power in the International Political Economy

Regional Focus

- 3

Research Methods

- 1

Capstone Course, from the following options:

- Honors thesis (two courses: INTL 1910, INTL 1920)
- Senior seminar paper (see website for approved senior seminars)
- Directed research project (Independent Study)

Total Credits: 14

1. Required for all students, preferably to be taken during their freshman or sophomore years. Advanced Placement credit does not count toward the concentration.
2. This is only a subset of the more comprehensive list of applicable courses.
3. Both courses must be on the same area. Content must build on track of study. Students are required to link these with language study.
4. Prior to 7th semester. Quantitative or qualitative course from approved list.
5. Must be taken senior year. Must incorporate language skills.

Detailed lists of courses that satisfy these requirements may be obtained from the IR program website: www.watsoninstitute.org/IR (http://www.watsoninstitute.org/IR).

The program has a director, an associate director/concentration advisor, and a faculty advisor for each track to assist students in planning their academic programs.

Courses

INTL 1101. China and the Global Political Economy.
Can (or Should) China Save the World? The program features an academic focus on Political Economy through comparative study of China and the US. US students engage with Chinese students throughout the 8 weeks, spending 4 weeks in Hong Kong and 4 weeks at Brown. Courses are taught by CUHK and Brown faculty, resulting in two course credits. Students are required to register for both courses (INTL 1101 and INTL 1102).

INTL 1102. The US and the Global Political Economy.
Can (or Should) China Save the World? The program features an academic focus on Political Economy through comparative study of China and the US. US students engage with Chinese students throughout the 8 weeks, spending 4 weeks in Hong Kong and 4 weeks at Brown. Courses are taught by CUHK and Brown faculty, resulting in two course credits. Students are required to register for both courses (INTL 1101 and INTL 1102).

INTL 1280. Global Security After the Cold War.
Analyzes major contemporary issues of global security utilizing current theories of international politics, emphasizing both continuity and change in global security since the end of the Cold War. Issues examined include proliferation of weapons of mass destruction and of conventional weapons, terrorism, recent arms control and disarmament initiatives, and the changing role of alliances and regional and global security institutions. Prerequisite: POLS 0400. This course is open to Senior and Junior concentrators in IR and Political Science, and to other students by permission of the instructor. Enrollment limited to 40.

INTL 1350. History and Theory of International Relations.
Examines the struggles of power and knowledge which have constituted international relations history and theory. This survey stretches from the beginnings of the Western states system and its early exemplar thinkers.
INTL 1400. Religion and Global Politics. Examines the increasingly visible role of religion in international affairs and global politics. What are the political manifestations of different religious traditions? What kind of a role does religion play in conflict, economic development, peace-building and diplomacy? Why was religion ignored as a political force in the western world? This course reviews multiple ways religion has been affecting world affairs and delves into specific faith traditions and their histories. Not open to first year students.

INTL 1410. Foreign Policy Analysis and Crisis Decision-Making. It is not possible to understand international relations without a concrete understanding of decision-making mechanisms. The course covers major themes in foreign policy analysis; it examines past foreign policy decisions of major actors and investigates the dynamics of crisis decision-making in international politics. How do politicians behave when they need to take an important decision in limited time? Which factors influence how political actors choose one policy over another? We will study the possible explanations in the foreign policy analysis literature and we will analyze cases to gain an understanding of mechanisms behind international politics.

INTL 1420. Globalization and the Rise of Asia. This course will study the politics and economics of globalization, in particular the spectacular rise of the Asian economies and their impact on the global economy, financial markets, and the balance of power. The analytic goals of the course are twofold. First, to examine the key problems rapidly developing nations have faced and continue to struggle with in an interdependent world economy, and why some nations have succeeded in moving into a period of unprecedented growth while others have not. Second, to analyze how the rise of the Asian economies will affect the U.S. and other developed nations. Enrollment limited to 35.

INTL 1450. Political Economy of the Environment in Latin America. Introduces students to the political economy of the environment in Latin America. Readings survey topics on resource-based development, environmental conflict, and green governance. Lectures present theoretical accounts of development and the environment and assess their validity in light of the Latin American experience. Relies on history-based analytics and case studies. Topics include conservation of the Amazon, rights of indigenous peoples, mining and environmental well-being in the Andes, and the green revolution in tropical Latin America. Knowledge of Latin American history and politics, political-economy, and environmental studies recommended. Open to juniors, seniors, and graduate students.

INTL 1510. Citizenship, Nationalism, and Migration. What are the contemporary parameters of political belonging? How do we make a contract with states regarding our rights and responsibilities to the society? When do we move across borders for alternative arrangements and contracts? Moving from these questions, we will investigate the evolution of national and citizenship in history as we examine the challenges immigrants and policymakers face in a world where identities are more fluid than ever. We will also explore political, economic and social implications of the attitudes towards citizenship and immigration.

INTL 1550. Chinese Foreign Policy. The objective of the course is to enable students to gain familiarity with the evolution of modern Chinese politics as it related to international relations, as well as a comprehensive understanding of Chinese foreign policy priorities and institutional processes. Exploring various historical explanations, developing critical reading skills, and employing policy analytical tools will enable students to better evaluate the numerous dilemmas confronting academics and policymakers in understanding and responding to China’s rise. Students will emerge from the course with a more sophisticated understanding of China’s rise and the implications of this momentous development for the international system. Enrollment limited to 40.

INTL 1700. International Law. This introduction to public international law covers the nature of legal reasoning in international relations, the interplay of international law and international politics, and the international legal process. Examines selected substantive fields such as state responsibility, the use of force, international human rights, and the U.S. and international law.

INTL 1750. The International Law and Politics of Human Rights. The main objective of the seminar is to enable students to understand the different and competing conceptions of human rights present in the contemporary humanitarian agenda. In particular, topics such as the problem of enforcement and the role human rights in foreign policy, genocide, torture, women’s rights, humanitarian intervention, and the international criminal court. At the end of the course students will be better equipped to assess critically the potential and shortcomings of the international human rights system.

INTL 1800N. Global Media: History, Theory, Production. Explores the historical and contemporary roles of media in international affairs as a source of information and as an important medium of war and diplomacy. Three tracks: historical, focusing on the dual development of colonial and media empires from early days of print media to the Internet; theoretical, using classical IR and critical theory to examine media as product and instrument of cultural, economic and political struggles; and practical, using biweekly ‘Global Media Labs’ in which guest media practitioners teamed with media theorists present master classes in print, photography, radio, cinema, television, and online convergences. Instructor permission required. Enrollment limited to 20. WRIT.

INTL 1800R. Post-Soviet States From the Past into the Future. Examines in historical context the emergence of the new post-Soviet states from the disintegrating USSR, the development of their foreign policies, and the evolution of their mutual relations in the political, economic, security, and environmental spheres. Devotes special attention to the functioning of the Community of Independent States and other multilateral institutions. Instructor’s permission required. Enrollment limited to 20.

INTL 1800V. The United States in World Politics. Examines major aspects of American foreign policy after the Cold War and 9/11 in terms of domestic and international challenges. Discussions of the United States as ‘empire’ and ‘republic,’ with independent research and a foreign policy game. Emphasis is on the connections between the processes of policy making and the substance of policies pursued. Prerequisite: POLS 0400 required; POLS 1560 highly recommended. Enrollment limited to 20 juniors and senior concentrators. WRIT.

INTL 1801E. War in Anthropological Perspective. Examines war, peace, and militarization using anthropological frameworks. Centers on case studies from several areas of the world, as well as contemporary theories of violence. Enrollment limited to 20 students.

INTL 1801H. Amazon Governance. Studies the political economy of Amazon governance in comparative perspective. Readings trace distinct national and local paths of Amazon governance. Topics include the colonial history of deforestation, the impacts of globalizations and nation-state modernization projects, the evolution of environmentalism and Amazonian contentious movements, and selected case studies of good governance at the grassroots level. Relies on history-based research and multidisciplinary perspectives. Enrollment limited to 20 juniors, seniors, and graduate students. Instructor permission required.

INTL 1801I. Public Theologies of Governance and Secularism in World Politics. Public theology of a particular issue includes human interpretation of what is relevant and to what extent particular religious premises can be experienced in the public arena. In the analyses of international politics, what we call "religion" is usually the sum of clashing or converging public theologies. This course comparatively investigates these different religious perspectives towards issues of political governance with case studies from Islam, Christianity, Judaism, Hinduism and Buddhism. The course also
focuses on modes of secularism and the challenges they pose to political
thecologies of faith traditions. Enrollment limited to 20 juniors and seniors. Instructor permission required

INTL 1801J. War and Human Rights.
How nations and their adversaries treat civilians and other non-
combatants in wartime has become an increasingly central issue in
global politics. This seminar will explore the intersection of war, human
rights, and the laws of war (also known as the law of armed conflict or
international humanitarian law). It will focus especially on how civilians and
other non-combatants are protected (or not) in times of war and the politics
and institutions of enforcement. Topics include war crimes, genocide,
targeted killings, torture, humanitarian intervention, and the international
criminal court. Prerequisite: POLS 0400; prior coursework in human rights
or international law desirable. Enrollment limited to 20 junior and senior
concentrators in International Relations and Political Science. Instructor
permission required

INTL 1801K. China and the World.
The rise of China has emerged as one of the most important
developments in world politics during the early 21st century. Chinese
foreign policy will have an important impact on the U.S. economy as well
as on U.S. national security. Moreover, China’s influence now touches
upon every continent of the globe. This course surveys the cultural
underpinnings, modern history, institutional structures, and vital regional
contexts for contemporary Chinese foreign policy. Students will emerge
from the course with a more sophisticated understanding of China’s rise
and the implications of this momentous development for the international
system. Prerequisite: POLS 0400. Enrollment limited to 20 seniors.
Instructor permission required

INTL 1801L. Religion and Secularism: Affinities and Antagonisms.
Global events in recent years seem to defy simple ideas of the
confinement of religion to a wholly private or otherworldly domain. Is
secularism a failed ideal? Or was it simply an inadequate concept to
understand modern ethics and politics? In what ways are conceptions of
the secular being contested and reformulated in Euro-American and
postcolonial contexts? We address these questions by taking up key texts
of recent religion/secularism debates, in the process returning to canonical
texts by Weber, Schmitt, Nietzsche, Thoreau and others, to reexamine the
affinities and antagonisms between religious and secular ideas of morality
and power. Enrollment limited to 20 seniors in International Relations.
Instructor permission required. WRIT

This course introduces the politics and economics of globalization and,
in particular, the spectacular rise of the Asian economies and their impact
on the global economy, financial markets, and the balance of power.
The goals of the course are: First, examine the key problems rapidly
developing nations have faced, and continue to struggle with, in an
interdependent world economy, and why some nations have succeeded
in moving into a period of unprecedented growth. Second, analyze how
the rise of the Asian economies will affect the U.S. and other developed
nations. Enrollment limited to 20 seniors in International Relations.
Instructor permission required. WRIT

INTL 1801N. Global Security After 9-11.
Analyzes major contemporary issues of global security utilizing current
theories of international politics, emphasizing both continuity and change
in global security since the end of the Cold War with emphasis on security
issues after the September 11, 2001 terror attacks. Issues examined
include proliferation of weapons of mass destruction and of conventional
weapons, terrorism, role of intelligence, special military forces and
covert action, and the changing role of alliances and regional and global
security institutions. Senior (followed by Junior) concentrators in IR have
enrollment priority. Other students may enroll on a space-available basis
by instructor permission. Enrollment limited to 20. Instructor permission required

INTL 1801P. Conflict Resolution and Peacebuilding.
In this seminar, we will study the dynamics of conflicts, causes of violence
and the efforts of the individuals/states/institutions to manage conflict and
build peace. Moving from contemporary cases such as Bosnia, Kosovo,
Rwanda, Somalia, Lebanon, Israel/Palestine, we will discuss the lessons
that were learnt in conflict management and the policies to be devised
in the future. Understanding the frameworks of such conflicts and the
accumulated knowledge on peace-building is essential, as any career in
today’s world will touch upon conflict settings and negotiations at some
point. Enrollment limited to 20 seniors in International Relations. Instructor
permission required

INTL 1801R. Natural Resources and the Environment in the
Developing World.
Topics include war crimes, genocide,
targeted killings, torture, humanitarian intervention, and the international
criminal court. Prerequisite: POLS 0400; prior coursework in human rights
or international law desirable. Enrollment limited to 20 junior and senior
concentrators in International Relations and Political Science. Instructor
permission required

INTL 1801S. All the News That’s Fit to Post: Grappling with Issues for
Content Creators in the Global News World.
Journalists operate today in an increasingly global and increasingly
digital media environment, confronting new challenges and also seizing
new opportunities that simply did not exist a generation ago. The new
news world lacks traditional mentoring and editorial frameworks. This
seminar focuses on threshold dilemmas that journalists confront, often
independently, in newsgathering, writing, and publishing decisions.
Through class dialogue and opinion essay writing assignments, the
seminar will stress interaction, debate and international sensitivities. It
will include real life case studies from Newsweek, newsweek.com and
MSNBC. Enrollment limited to 20 seniors. WRIT

INTL 1802A. The Laws of Violence: Lawful Killings in Law
Enforcement, Punishment, War and the War on Terror.
The course introduces the basic elements of conventional theories of
law and state, and explores the centrality that legalized violence plays in
both the constitution of law and the state. The goal of the seminar is to
identify and examine the constitutive relation between law and violence.
Enrollment limited to 20 seniors. Instructor permission required. WRIT

Since 1953, the United States and South Korea have maintained a formal
security alliance, and the peninsula remains home to 28,500 U.S. troops.
Developments in Korea have an important impact on the region and
the world making knowledge of the Koreas and their challenges vital for
understanding the dynamics of the region. This course will explore the
history, politics, economics, and security of North and South Korea and
their role in the larger security context of East Asia. Enrollment limited to
20 seniors concentrating in International Relations. WRIT

INTL 1910. Senior Honors Seminar.
Open only to Senior students accepted into the honors program in
international relations. Instructor permission required. WRIT

Open only to Senior students accepted into the honors program in
international relations. Instructor permission required. WRIT

Limited to juniors and seniors. Section numbers vary by instructor.
Required: A completed proposal form and syllabus, sponsor’s and
concentration advisor’s approval, and written permission from Dr. Elliott
(following review of the proposal) prior to registering for any section of this
course. Banner overrides will be given by the IR Program manager only,
and no overrides will be issued after the Registrar’s course add deadline

INTL XLIST. Courses of Interest to Students Concentrating in
International Relations.
Fall 2012
Please see the IR website for track courses and a list of other courses which may be
of interest to IR concentrators.

Spring 2013
Please see the IR website for track courses and a list of other courses which may be
of interest to IR concentrators.

Italian Studies

Chair
Massimo Riva
Italian Studies at Brown not only teaches language and literature to students but guides their research toward problems that are cross-disciplinary in both content and method, rather than merely confirming a fixed canon or predetermined field of study. To investigate these problems, we can draw at Brown on traditional alliances with Anthropology, Art History, Classics, Comparative Literature, History, Musicology, and Philosophy, but we also join forces with disciplines such as History of Science, Film Studies, Cultural Studies, and Gender Studies.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Italian_Studies/

**Italian Studies Concentration Requirements**

Inherently interdisciplinary, the Italian Studies concentration allows students to strengthen their language skills in Italian and deepen their knowledge of Italian literature, history, art, and culture. Most concentrators have some background in Italian language. However, it is possible to concentrate in Italian studies without having studied the language before coming to Brown, although doing so requires an early start. After fulfilling the language requirement by completing up to ITAL 0600 (or the equivalent), students enroll in a variety of advanced courses, reflecting the interdisciplinary nature of the concentration. Junior concentrators often study abroad in the Brown Program in Bologna. All senior concentrators participate in the senior conference by delivering brief presentations on academic topics of their choice in Italian Studies. Concentrators might also pursue capstone research, writing, or multimedia projects.

The concentration requires that students demonstrate proficiency in the Italian language by completing up to ITAL 0600 (or the equivalent) by October 15. During the second semester, honors students enroll in ITAL 0110-0200, or ITAL 0110, or placement by examination. Requirement for enrollment in the yearlong Bologna Program. Eight meetings per week plus audio and video assignments.

**ITAL 0100. Elementary Italian.** Elective for students without previous training in Italian. No credit for first semester alone. Fundamentals of Italian grammar and development of skills in speaking, comprehension, and writing. Overview of contemporary Italian society. Five meetings per week, audio and video work, two Italian films. Note: This is a year course.

**ITAL 0110. Intensive Elementary Italian.** Covers the same material presented in Italian 100-200. One semester equivalent to the standard two-semester sequence. Sufficient for enrollment in the yearlong Bologna Program. Eight meetings per week plus audio and video assignments.

**ITAL 0200. Elementary Italian.** See Elementary Italian (ITAL 0100) for course description.

**ITAL 0300. Intermediate Italian I.** Review of the fundamentals of grammar, with emphasis on speaking and writing. Reading of representative short stories. Weekly compositions, presentations, and a paper. Three Italian films. Prerequisite: ITAL 0100-0200, or ITAL 0110, or placement by examination. Requirement for enrollment in the Bologna Program.

**ITAL 0500. Advanced Italian I.** The purpose of this advanced course is to improve speaking and writing skills by offering extensive practice in a variety of styles and forms. Students will discuss various aspects of contemporary Italian culture. Reading, analysis and class discussion of texts (articles, songs, pictures, short stories, movies and television), oral presentations, based on research, and a writing portfolio (compositions, essays, blog and a journal). Prerequisites: ITAL 0400, or placement by examination.

**ITAL 0550. Florence and Tuscany in the Fifteenth Century (HIAA 0550).** Interested students must register for HIAA 0550 S01.

**ITAL 0560. The Visual Culture of Early Modern Rome (HIAA 0560).** Interested students must register for HIAA 0560 S01.

**CAPSTONE experiences in Italian Studies**

A Capstone experiences in Italian Studies would consist of a course or project that a student, in consultation with the undergraduate advisor, feels would integrate the various intellectual engagements of this interdisciplinary concentration, and constitute a culminating experience in Italian Studies at Brown. Such experiences are strongly encouraged, and should be arrived at through conversations with the concentration advisor or a professor in the department. This could include the Brown Program in Bologna, typically taken in the Junior year, and/or the honors thesis in the senior year. However, students may also apply early in the Fall or Spring semester of their senior year for permission to designate one of their courses (1000-level or above) a Capstone course. In consultation with the professor, students in Capstone courses complete an independent research, writing, or multimedia project that is well beyond the required assignment for the course. ITAL 1920 (Independent Study) may also be designated a Capstone course with the permission of the instructor.

**Italian Studies Graduate Program**

The department of Italian Studies offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/italian-studies
ITAL 0600. Advanced Italian II.
A sixth semester course with intensive practice in speaking and writing. Short stories, poems, music, and movies will be used to discuss Italian Society from the Second World War through the present. We will explore some important themes--family, religion, gender, and politics. Class discussion, compositions, oral presentations, and a final paper. Prerequisite: ITAL 0500, placement by examination

ITAL 0750. Truth on Trial: Justice in Italy.
This seminar analyzes controversial trials in Italy between 1500 and 1800. From the persecution of heretics to the trial of Galileo and the increasing use of courts by marginal members of society, the judicial arena was crucial in defining political, social, scientific, and religious truth. Were law courts successful sites for the resolving what constituted deviance, legitimate knowledge and individual rights?

ITAL 0751. When Leaders Lie: Machiavelli in International Context.
This course examines the writing of Niccolò Machiavelli, a Renaissance author praised and condemned for his insistence on analyzing the realities of politics, rather than the ideals of political behavior. Machiavelli’s view of the tenacious relationship of ethics to politics has cast him as the founder of political science and the proponent of “consequential morality” or the notion that the ends justify the means. We will also examine precedents for his ideas in the Greek and Islamic world and conclude by examining the relevance of Machiavelli’s insights for understanding political practices and ethics in the twenty-first century. Enrollment limited to 20 first year students. Instructor permission required. FYS LILE WRIT

ITAL 0950. Introduction to Italian Cinema: Italian Film and History.
How do we visualize the past? How has cinema influenced our understanding of contemporary history? The course will focus on how key moments of 20th-century History (Fascism, WWII, the Mafia and Terrorism) have been described or fictionalized by major Italian film-makers (including Benigni, Bertolucci, Cavani, Fellini and Pasolini). Subtitled films, readings and discussion groups. Recommended for First Year students. Enrollment limited to 20.

ITAL 0985. Visions of War: Representing Italian Modern Conflicts.
This interdisciplinary course addresses issues of war within Twentieth century Italy. As a phenomenon that crucially defines the “short century,” war occupied a central role in various cultural products. This class will embrace fictional, non-fictional, musical, and visual texts that recount the experience of conflicts as seen through the eyes of Italian intellectuals. We will discuss works by authors such as Ungaretti, Calvino, Levi, and Monicelli, and analyze sources such as soldier’s songs and military posters. Readings will range from literary theory and trauma studies to history. Prerequisite: ITAL 0600 or Brown in Bologna Program. The course will be conducted in Italian

ITAL 1000A. Luigi Pirandello: Masks and Society.
Twentieth century Italian society as seen through the eyes of an outstanding contemporary author, Nobel Prize winner Luigi Pirandello. Focuses on the relationship between literature, theatre, and social reality through linguistic and stylistic analysis of texts (fiction and play) and their filmic or other media (e.g. radio) adaptations. Conducted in Italian, as a seminar-type discussion followed by writing assignments

ITAL 1000B. Reading Recent Italian Fiction.
Readings of contemporary Italian fiction. The course aims to develop students written and oral expression in Italian. A broad range of themes will be discussed. Prerequisite: ITAL 0600, a semester in Bologna, or by placement

ITAL 1000C. Nord - Sud e Identità Italiana.
Sebbene l’Italia sia da tempo uno stato unitario, permangono ampie differenze tra le varie regioni, specialmente tra Nord e Sud. Tra gli studiosi e’ sempre vivo il dibattito sull’identità italiana. Facendo ricordo a materiali letterari, cinematografici e d’attualità in una prospettiva interdisciplinare, ci porremo la domanda: esistono realtà che possono definire l’Italia o sarebbe più corretto parlare di “italiati”?

ITAL 1000D. Italian National Identity: Criticisms and Crises.
This course investigates Italian identity since its inception in 1860 to the present through multiple perspectives: literature, history, politics, film, music and art. We will focus on important crisis points in this trajectory: the founding of the national state, the collapse of liberalism and the fascist experiment, the birth of the republic and Italy in the new Europe. In English
ITAL 1310. Literature of the Middle Ages.
Readings in early Italian literature, including religious writers and love poets of the 13th century, Petrarch, Boccaccio, the Humanists of 15th-century Florence, Ferrara, etc

ITAL 1320. Great Authors and Works of Italian Renaissance.
The major authors and trends of 16th-century Italy (Machiavelli, Giacciardi, Ariosto, Tasso, classicism and anti-classicism, petrarchism, mannerism)

ITAL 1340. Garibaldi Panorama: the Invention of a Hero (from pre-cinema to digital).
Giuseppe Garibaldi (1807-1882) is the ultimate 19th-century icon, a larger-than-life figure in the struggle for Italy's unification. In this course, we will focus on the critical role of media in shaping Garibaldi's image and career as the first tabloid Super-Hero of modern times: from the Garibaldi panorma, a 270-foot-long painted scroll, to 20th-century films. Students will use touch screens and interactive software to study the panorama and explore extensive archival materials from the Brown Library digital repository. Selected projects will be published online. Taught in English, discussion group in Italian 999999

ITAL 1350A. Narratives for the Next Millennium: Italian Mysteries and the New Italian Epic.
New Italian Epic* (Wu Ming 1) describes a body of literary works published in Italy between 1993 and 2010. Blending fiction and non-fiction, many of these works investigate shady aspects of Italian history and society, such as organized crime and political corruption. The term has also been applied to cinematic works such as Matteo Garrone's film Gomorrah (based on Roberto Saviano's best seller of the same name) and other multi-media hybrids emerging from the contemporary world of garage media. We will explore this textual/visual mini-corpus, within the context of the Berlusconi era. Taught in Italian

ITAL 1350B. Non Fiction.
What is fiction and what is nonfiction? How to read a nonfictional text (diary, description, memoir, etc). Examples from well known Italian writers and further examples from photo and documentary cinema. Taught in English

ITAL 1360. Renaissance Italy.
This course explores the history of the Italian Renaissance, a period of remarkable intellectual, artistic, and cultural change between the fourteenth and the sixteenth centuries. Renaissance innovations will be considered in a broad context: how did the Renaissance happen and how far did its transformations extend in society? Course topics include the changes in learning, art, political theory, and science, as well as transformations in family life, court culture, urban and rural society. Enrollment limited to 40

ITAL 1380. Italy: From Renaissance to Enlightenment.
Between 1500 and 1800, Italians made significant contributions to European debates about the boundaries between orthodoxy and heresy; the legitimacy of social and gender hierarchies; the future of republics in an age of empires; and the possibilities for reform. Works by Machiavelli, Bemini, Galileo, Tarabotti, Goldoni, and Beccaria (among others) enrich this survey of early modern Italian history

ITAL 1390. Modern Italy.
Examination of Italian society, culture, and politics over the past two centuries. Topics include: the struggle to unify Italy in the 19th Century; the creation of a national identity; the political role of the Catholic Church; changing family life and gender relations; conflict between North and South; Mussolini and the fascist ventennio; and the struggle for political stability over the past 50 years

ITAL 1400A. "Italian (Mediterranean) Orientalisms" Major Italian Writers and Filmmakers.
Major Italian writers and filmmakers (including Amelio, Antonioni, Bertolucci, Celati and Pasolini) have attempted to incorporate non-European (African, American, Asian or Balkan) perspectives in their work (fiction, travelogues, documentaries etc.). The course will discuss these works, giving particular attention to their reception in the cultures they portray. Subtitled films, readings and discussion group in English

ITAL 1400B. Fascism and Antifascism: Culture and Literature between the Two World Wars.
Introduces and examines the most significant aspects of literary, cultural, and political life in Italy between the two world wars. The most significant tendencies in the various literary genres (novel, descriptive prose, mass market fiction, propaganda, poetry) are considered against the backdrop of a general historical and literary overview and situated in the context of the debate carried forward by the most important literary periodicals of the '20s, '30s, and '40s, from La Ronda to Solar

ITAL 1400C. Literature and Adolescence.
From Collodi’s Pinocchio and De Amici’s Cuore to works by Saba, Pavese, D’Arzo, Moravia, and Calvino, the course focuses on some of the most remarkable literary treatments of childhood and coming of age in late 19th- and 20th-century Italian literature. In Italian

ITAL 1400D. Photography and Literature: Italian Examples of an Uncanny Relationship.
The course will explore the intersection of Italian Literature and Photography from early Modernism (Luigi Pirandello) to post- Modernism (Antonio Tabucchi). Major theoretical essays on photography (Sontag, Barthes) will set the stage for close readings of narrative texts by two of the most important authors of Twentieth Century Italian literature

ITAL 1400F. Twentieth Century Italian Culture.
Contact the department for course information

ITAL 1400H. Early Modern Italy.
A survey of Italian history between 1500 and 1800. Italy’s varied political cultures from absolutism to republicanism; impact of Catholic reformation and the baroque; the woman’s question and transformations in family life and the social order; the contribution of Italian writers to the debates of the Enlightenment and ordinary people to social change in the eighteenth century

ITAL 1400I. Rituals, Myths and Symbols.
The course will analyze the diverse forms of sacralization and the esthetics of politics utilized by nationalism and Italian fascism to encourage participation by the masses in a collective liturgy. The study will begin with the Risorgimento and the nationalization of the Italians. It will then turn to the end of the nineteenth century and the period preceding the First World War with the birth of futurism and the Nationalist Party. It will look at the fascist creation of a symbolic-monumental machinery capable of inventing new rituals or of re-elaborating old myths and giving life to innovative symbolic forms. The final part will be dedicated to the years of the regime and the progressive acceleration of its fascistization of society. The analysis from inside the symbolic universe of these political movements will instead be effected through the study of culture, art, the collective imaginary, the lifestyles, the dispositions, the ceremonies, the cults and the rites of these two new lay and secular religions

ITAL 1400J. The Many Faces of Casanova.
Philosopher or charlatain, magician or trickster, seducer or seduced, Casanova's life contains multitudes. His name, unlike those of Sade or Sacher Masoch, does not designate a "perversion," but a sort of exuberant hetero-sexual "normalcy." He is the Venetian alter-ego (and possibly real-life inspiration) of Mozart’s Don Juan. In this course, we will dissect the myth of Casanova, from his own monumental autobiography to novels, films and plays which cast him as protagonist (films by Federico Fellini, Ettore Scola, Lasse Hallström, impersonations by Donald Sutherland, Marcello Mastroianni and Heath Ledger). Lectures in English; discussion group in Italian

ITAL 1400K. Italy as Other.
This course traces the variety of ways in which Italy has been viewed as the Other of the European and American imagination. We will read some of the key texts in a long tradition that traverses a broad spectrum of disciplinary fields: literature, art history, travel narrative and cinema. Works include the writings of De Stael, Goethe, Stendhal, James among others

ITAL 1400L. History of Masculinity and Femininity from the Unification to 1968.
Pending Approval The first part of the course will concentrate on gender and queer studies to provide students with a general theoretical framework of these topics. It will then focus more specifically on the analysis of the evolution of sexuality, homosexuality, masculinity and femininity from the Unification of Italy until 1968. An interdisciplinary approach will be adopted
using novels, films, newspapers, paintings, sculptures, manifestoes and
advertising posters. Anthropology, art, literature, politics and history will
be interwoven in order to reveal changes and continuities in the image of
woman and man and the dynamics of the relationship of couples. Finally
ample space will also be given to the medical and judicial treatment of
these topics and to the transformation in lifestyles and the collective
imaginary. Using this historical approach fosters understanding of how
the dichotomous and hierarchic distinction between sexual norm and
transgression became an essential paradigm of scientific, political,
religious, judicial and artistic thought. Course is taught in Italian
ITAL 1400M. Giorgio Agamben and Radical Italian Theory.
This course is dedicated to a close reading of the work of the Italian
philosopher Giorgio Agamben and to an analysis of what has come to
be known as "radical Italian theory." We will read the major works by
Agamben, some key texts by other thinkers who were influential for
Agamben (Carl Schmitt, Walter Benjamin, Michel Foucault etc), as well as
other theorists who play an important role today in Italy: Roberto Esposito,
Antonio Negri, Paolo Virno among others
ITAL 1420. Sex and the Cities: Venice, Florence, and Rome,
1450-1800.
This course examines the politics of sexuality and the sexuality of politics
in Italy between the Renaissance and the Enlightenment. Italy’s urban
settings saw the development of some of the most sophisticated political
systems in Europe, and issues of gender identity and sexual practices
figured prominently in the political symbolism, political criticism, and legal
and social orders of these regimes. Lectures and course discussions also
explore everyday practices and their implications for defining and defying
the social and political norms of gender and sexuality in early modern Italy.
Suggested prerequisites are HIST 1001 or any Italian Studies course at
level 1000 or above. No prerequisites are required. Lectures in English.
Dialogue groups in English and Italian.
ITAL 1431. Truth on Trial: Justice in Italy, 1400-1800 (HIST 1430).
Interested students must register for HIST 1430 S01 (CRN 24748)
ITAL 1550. Italian Representations of the Holocaust.
A survey of some of the most important texts (fiction, history, philosophy,
films) that deal with both the Holocaust in Italy, and representations of the
Holocaust by Italians. Readings include Levi, Bassani, Loyo, Agamben; films
those of Benigni, Caveni, Wertmlller. There will also be discussion of the
aesthetic and political complexities regarding portrayals of the Holocaust,
such as trauma, witnessing, historical truth, kitsch. Taught in English, with
the possibility of a section in Italian. WRIT
ITAL 1550B. Topics in the Early History of Printmaking: Festival and
Carnival (HIAA 1550B).
Interested students must register for HIAA 1550B S01
ITAL 1560J. Illustrating Knowledge in the Early Modern World (HIAA
1560J).
Interested students must register for HIAA 1560J S02 (CRN 24545)
ITAL 1580. Word, Image and Power in Renaissance Italy.
This class is designed to introduce cultural and historical perspectives on
Italy from Siena in the Middle Ages to Venice in the High Renaissance.
Taught by professors of Italian Literature, Art History and History, we will
move across Italy and the centuries focusing on monuments of literature,
art, architecture, and history through different disciplinary lenses. WRIT
ITAL 1610. The Divina Commedia: Inferno and Purgatorio.
A close reading of the first two canticles of Dante’s poem in the light of
contemporary European and American critical interpretations. In Italian.
Enrollment limited to 40
ITAL 1620. The Divina Commedia: Dante’s Paradiso: Justifying a
Cosmos.
Close study of the third and final part of Divine Comedy, in which Dante
unfolds how, in his view, the planetary and stellar spheres condition
human life and fashion the Providential plan of history. There will be
ancillary readings from Dante’s other works: Convivio, the Monarchia,
and the Epistles. In Italian. Prerequisite: ITAL 0500 or 0600, or instructor
permission. Enrollment limited to 40
ITAL 1920. Independent Study Project (Undergraduate).
Undergraduate Independent Study supervised by a member of the Italian
Studies Faculty. Students may pursue independent research in order to
prepare for their honors thesis or honors multimedia project, or they may
enroll in the course in order to work individually with a faculty member on a
specific area of Italian Studies not covered in the current course offerings.
Section numbers vary by instructor. Please check Banner for the correct
section number and CRN to use when registering for this course
ITAL 1990. Senior Conference.
Special work or preparation of an honors thesis under the direction of a
member of the staff. Section numbers vary by instructor. Please check
Banner for the correct section number and CRN to use when registering
for this course
ITAL 2050. Microhistory.
Italian historians pioneered a methodology called "microhistory,"
emphasizing the importance of interpreting seemingly insignificant
details in order to understand individuals for whom we typically have
little information. We will examine some classic examples of this genre,
alongside debates about the method. Students should pursue their own
graphic and disciplinary interests in the final assignment by writing a
microhistory
ITAL 2100. Introduction to Italian Studies.
Introduction to problems, instruments, and techniques of interdisciplinary
research, as applicable to Italian studies (anthropology, history, art history,
literary and media studies, including computing for the humanities. Taught
in Italian for graduate students or concentrators
ITAL 2130A. Dante’s Paradiso.
A close reading of the third canticle of the Commedia in its medieval
costext. While not essential, a knowledge of the Inferno and the Purgatorio
would be desirable. Open to qualified undergraduates
ITAL 2130B. The Lyric of Petrarch.
The style and structure of Petrarch’s Canzoniere and Triumphi and their
relationship to Latin and Romance precedents. In Italian
ITAL 2150C. Monographic Studies in Major Sixteenth- and
Seventeenth-Century Authors.
Renaissance thought. From Pico della Mirandola to Giordano Bruno
ITAL 2160. Family History: Early Modern Methods and Sources.
This course examines the world’s oldest institution during the early modern
period (1500-1800). Italian scholars have been especially innovative in
advancing our understanding of the early modern family, relying on legal,
quantitative, religious, literary, and visual sources in their efforts. Students
may concentrate in their longer essay on controversies in family history
currently debated in or beyond the Italian context
ITAL 2170A. Seminar on Giacomo Leopardi.
Word and image, thought and feeling in the poetry (Canti), dialogues
(Operette Morali), and philosophical writings (Pensieri, Zibaldone) of one
of the major figures of European Romanticism. In Italian
ITAL 2170B. Italian Modernity and the Novel: Twelve Great Books
from the Long Nineteenth Century.
This seminar is designed as a survey of the Italian contribution to the
novelistic genre. The course will be structured around 11 great Italian
novels in 12 weeks and supplemented by theoretical, methodological
and historical considerations that pertain to questions of reading and
interpretation, to the novel as a literary genre, and to those problems
centered on the specificity of Italian modernity. We will read novels by
Foscolo, Manzoni, Verga and Pirandello, among others. Reading
knowledge of Italian required
ITAL 2190A. Carducci, Pascoli and D’Annunzio.
Close textual reading of the poetic works of the three great Italian
Victorians. In Italian
ITAL 2190B. Fascism and Antifascism: Culture and Literature
between the Two World Wars.
No description available
ITAL 2190C. La Poesia del Novecento (Twentieth-Century Italian
Poetry).
No description available
ITAL 2190D. Non Fiction.
What is fiction and what is nonfiction? How to read a nonfictional text
(diary, description, memoir, etc). Examples from well-known Italian
writers (Campana, Ortese, Delfini, Calvino, Celati, Bompiani) and further
ITAL 2190E. Problems and Figures from 1860 to the Present.
Modern Italian poetry.
ITAL 2190F. Reading Recent Italian Fiction.
Reading “here” implies a special kind of attention to the linguistic formulation of the text and the construction of an imaginary hypertext based on the stimuli the text provides. The instructor exemplifies the process and students construct hypertexts of their own based on the texts. Of particular interest is the openness and interpretive richness derived from the readers not belonging to the cultural context in which the texts were produced.
ITAL 2190G. Letteratura Italiana del Novecento.
In questo seminario, leggeremo e discuteremo alcune delle più significative opere di narrativa e poesia novecentesca, da Svevo a Calvino e da Montale a Zanzotto, sullo sfondo delle grandi trasformazioni della società e della cultura italiana, dal fascismo alla seconda Guerra mondiale e alla prima repubblica, alla luce delle teorie critiche più influenti, dal futurismo all’ermetismo e dal neo-realismo al post-modernismo. Taught in Italian.
ITAL 2300. Seminar in Italian Literature, Culture, and Criticism.
This seminar focuses on some of the most important contributions made to critical theory made by modern Italian thinkers, beginning with Antonio Gramsci and ending with Giorgio Agamben. Readings include, other than Gramsci and Agamben, works by Antonio Negri, Roberto Esposito and Adriana Cavarero. Open to juniors, seniors, and graduate students.
ITAL 2450. Exchange Scholar Program.
ITAL 2540D. The Theater that was Rome (HIAA 2540D).
Interested students must register for HIAA 2540D S01.
ITAL 2550. Gender Matters.
This course examines the impact of gender as a category of historical analysis. Beginning with Joan Scott’s seminal work on the topic (1988), students assess its subsequent global impact. Two Italian issues are considered in this comparative context: Is gender analysis still gender analysis if the word gender is not employed? How has the study of masculinity, sexuality, and queer studies opened new lines of inquiry? The recasting of women as moral beings and the experiences of Benvenuto Cellini will be used as case studies to examine these questions. Students work in their own geographical area for their final project. Open to seniors and graduate students.
ITAL 2820G. Letteratura Italiana del Novecento.
The Italian Studies Colloquium is a forum for an exchange of ideas and work of the community of Italian scholars at Brown and invited outside scholars. Graduate students present their work in progress, and engage the work of faculty and visitors. They are expected to come prepared with informed questions on the topic presented. Presentations in both Italian and English. Instructor permission required.
ITAL 2900. Theory and Methods of Foreign Language Teaching.
Theory and practice of foreign language learning and teaching (theory of language, language learning and acquisition, approaches, methods and techniques, curriculum design, materials development, testing and evaluation). In English.
ITAL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.
ITAL 2980. Reading and Research.
Courses on special subjects individually planned and supervised. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
ITAL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Judaic Studies

Director
Maud Mandel

The Program in Judaic Studies is an interdisciplinary unit devoted to the study of Jews and Judaism in all historical and geographic contexts. The faculty includes scholars from both humanistic and social scientific disciplines such as anthropology, history, literary criticism, and philosophy. We offer an undergraduate curriculum that covers a wide array of courses in Judaic Studies. Several of our faculty members are engaged in graduate instruction in other departments. There are ten faculty members with appointments in the Program, plus eight affiliated faculty members with research and teaching interests in Judaic Studies. Home departments of affiliated faculty include History, Modern Culture & Media, Religious Studies, and Portuguese & Brazilian Studies.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Judaic_Studies/

Judaic Studies Concentration Requirements

Judaic Studies is an interdisciplinary concentration devoted to the study of Jews and Judaism in all historical and geographic contexts. Students blend humanistic and social scientific approaches to learning by taking courses in history, language (Hebrew, Aramaic), literature, religious studies, and sociology. Concentrators explore how distinct scholarly disciplines approach the study of Jews and Judaism in different chronological settings ranging from biblical times to the present. By taking an interdisciplinary approach, students can explore the historical, religious, literary, philosophical, sociological and political experiences of the Jews. They also learn how scholars of diverse academic disciplines frame and answer questions, strengthening their knowledge of different perspectives and methodologies in the field. Concentrators must define one area of focus and fulfill a year of course work in Hebrew, one of the strands that unifies the history of Judaism from ancient to modern times.

Required Coursework

- Six topical courses in Judaic Studies
- JUDS 0110 and JUDS 0120 Introduction to Modern Hebrew
- Two additional JUDS courses either topical or language

Topical courses (non-language courses)

- Upon declaring a concentration in Judaic studies, students must define the area of study that will be the primary focus of their program. The field may be defined as an historical period (ancient/modern), as a discipline (humanities/social science), or as a topic (religion, culture, history, language/literature, etc.). Students are expected to complete a minimum of four courses in their area of focus, but the final number will be finalized in discussion with the concentration advisor.
- Of the six required topical courses, four must be taken in the Judaic Studies Program at Brown.
- Of the six required topical courses, at least one should focus on the ancient period and one should focus on the modern period.
- Of the six required topical courses, at least one should be a 1000-level seminar or another advanced course (including independent study) approved by the concentration advisor in the student’s area of focus.
- All students are required to designate an advanced departmental course as the capstone for his or her concentration. Within the frame of this capstone course, the concentrator will write a final course paper, which displays the student’s concentration focus, addressing in an appropriate way the theoretical and interpretive issues of the concentration focus.
- In consultation with the concentration advisor, students may petition for the right to apply up to two courses taken in other departments/programs at Brown to the ten required for the Judaic Studies Concentration.
concentration. These courses must relate directly to the student’s focus and provide a comparison of a Judaic topic with some other relevant topic.

- Students who study at other institutions, either in the United States or abroad, may apply a maximum of two topical courses to their concentration in Judaic Studies. Hebrew language courses may also be transferred.
- In consultation with the concentration advisor, students may apply up to two advanced language courses (JUDS 0150 or JUDS 0300) to the six required topical courses for the concentration.

Language Courses
- One full year of Elementary Hebrew. Generally, this requirement will consist of two courses in Modern Hebrew (JUDS 0110 and JUDS 0120) or the equivalent as determined by a proficiency examination. Students who pass the proficiency exam are encouraged, but are not required, to continue the study of Hebrew for example, Intermediate Hebrew, JUDS 0130 and JUDS 0140; Writing and Speaking Hebrew, JUDS 0150). Fulfillment of the Hebrew requirement through examination does not reduce the requirement to take ten courses for the concentration.

Honors Thesis
A candidate for honors in Judaic Studies will write a thesis in the senior year. In order to be considered a candidate for honors, students will be expected to maintain an outstanding record (at least A-) in Judaic Studies courses. The honors thesis, which fulfills the capstone requirement, will normally be written as a two-semester individual study project (JUDS 1970). At the end of the senior year, the thesis advisor (a faculty member of the Judaic Studies Program), and a second reader, chosen by the thesis advisor in consultation with the student, will evaluate the thesis, and the Judaic Studies faculty will determine if it is worthy of honors in Judaic Studies. Students interested in honors should approach a potential advisor by the spring registration period of their junior year. When taken as preparation of the honors thesis, JUDS 1970 count towards the ten required courses in the concentration.

Further Information
Students who are interested in further information about the concentration should contact the Judaic Studies Office at 163 George Street to make an appointment with the undergraduate concentration advisor. [Tel: 863-3912 or Judaic@brown.edu]

Courses

**JUDS 0010. Judaism: Text and Context**
Surveys the major practices, traditions, and beliefs of the Jews, with an emphasis on modern Jewish communities. How does a Jewish community shape its practices and beliefs against its own specific historical circumstances to create a coherent and meaningful religious system? What is “Judaism,” and how do scholars of religion explain and interpret it? WRIT

**JUDS 0019. Death and Afterlife in the Biblical Tradition (REL 0020).**
Interested students must register for RELS 0020 S01 (CRN 14528)

**JUDS 0050A. Believers, Agnostics, and Atheists in Contemporary Fiction.**
Contemporary society is divided over issues of religious faith. In recent decades there has been a resurgence of religious faith, while at the same time many have been skeptical and even hostile to religious belief and practice. Others are just not sure what to believe. In this seminar, we will read and discuss contemporary short stories that explore the ways that these ongoing differences over spiritual matters affect people. These works portray a variety of human situations: the affirmation and rejection of religious faith, confusion over the existence and nature of God, and positive and negative views of religious institutions and the clergy who lead them. Writers of both Christian and Jewish background will be studied. Enrollment limited to 20 first year students. FYS

**JUDS 0050D. Astrology, Magic, and Science.**
What did the universe look like before modern science? How did Christians, Muslims, and Jews imagine the natural world and humanity’s place in it? Astrology, magic, and science played important roles in medieval attempts to explain the origins of the universe and the forces that govern the world. They sometimes challenged religious authority by competing with it as sources of truth. We will examine the interrelationship of astrology, magic, science, and religion in Western culture from the medieval to the early modern period and the permeable boundaries among them. Enrollment limited to 20 first year students. FYS WRIT

**JUDS 0050E. From Amsterdam to Istanbul: Christians, Moslems, and Jews.**
This FYS combines text, picture, and music to study the history of Europe and the wider world in the early modern period through the eyes of a minority. It examines the new Jewish centers in the Atlantic world, the Ukrainian steppe, and the Middle East from 1500-1800, and how they shaped these environments. Cultural revolutions, such as the spread of printing, the renaissance and new religious movements, will also be examined. Finally, we will see how the development of the modern state and the blurring of social, religious, and gender boundaries created new definitions of religious and cultural identity. Enrollment limited to 20 first year students. FYS WRIT

**JUDS 0050F. The God Debate.**
This class looks at public debates on the role of religion in the public sphere. How does law shape how people talk about faith? What does the Pope say about interfaith dialogue? How do atheists spread their message? Can we talk about God in the workplace? The course will examine essential texts on public reasoning and explore how these do (or do not) speak to the way we talk (or don’t talk) about God today. Enrollment limited to 20 first year students. DVPS FYS LILE WRIT

**JUDS 0050G. Angels and Demons.**
Angels and demons have been central to popular culture throughout human history. They still play a role in the belief systems of many cultural groups to this day. Why have people persisted in believing in such supernatural beings even though their existence is not evident to the naked eye? We will investigate the belief in angelic and demonic figures in Jewish culture during a period to which both Judaism and Christianity trace their origins—the Second Temple period in Judea (approximately 520 BCE – 70 CE). Enrollment limited to 20 first year students. FYS

**JUDS 0050H. Israel’s Wars.**
Israel’s history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. This first year seminar will survey the military aspect of this conflict. The major aim of the course is to present an historical survey of the Israeli-Arab wars and Jewish-Palestinian encounters in the 20th century. This will provide some of the necessary background for understanding the present phase of the Arab-Israeli conflict in the Middle East, and help in comprehending the roots and causes of contemporary controversies between Israel and the Palestinians and/or its Arab neighboring states. Enrollment limited to 20 first year students. FYS

**JUDS 0090. Modern Jewish History and Society.**
The study of Jews in their historical and contemporary communities of western and eastern Europe, the U.S., and Israel. Major themes include emancipation and assimilation; secularization and new religious expressions; the Holocaust and modern anti-Semitism; Zionism; immigration, ethnicity, and nationalism; family and intermarriage; education, Jewish culture, and politics

**JUDS 0100. Contemporary Religion: Qualitative Methods.**
Through readings, films and fieldwork, course participants will learn how social scientists interpret contemporary religious practices, culture and folkways. By studying religious communities through the lens of social theory and method, this class critically examines major themes in anthropolog, sociology, psychology, and linguistics: race, nationalism, diaspora, kinship, gender, and modernity

**JUDS 0110. Elementary Hebrew.**
An introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in
various periods to a variety of cultural issues. If unable to enroll because of closed registration, please contact the professor and a wait list will be created. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in JUDS 0120 covers the entire year and is recorded as the final grade for both semesters. Enrollment limited to 20.

JUDS 0120. Elementary Hebrew.
This is the second half of a year-long course, an introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in various periods to a variety of cultural issues. Prerequisite: JUDS 0110. Students must have taken JUDS 0110 to receive credit for this course. If JUDS 0110 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: JUDS 0120 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration, please contact the professor and a wait list will be created.

JUDS 0140. Intermediate Hebrew.
Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: JUDS 0130 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

JUDS 0150. Writing and Speaking Hebrew.
Enables students to improve their skills in speaking and writing Hebrew on a variety of topics. Features advanced work on language structure and active language practice in the classroom. Class discussions of Israeli current events draw on Israeli stories, poems, television programs, and films and on the Israeli press. Students also compose essays and stories in Hebrew. Prerequisite: JUDS 0140 or equivalent.

JUDS 0170. Introduction to Biblical Hebrew.
An intensive introduction to the fundamentals of biblical Hebrew grammar and vocabulary intended to prepare students to read biblical texts in the original language. For students with little or no prior knowledge of Hebrew.

JUDS 0180. Readings in Biblical Hebrew.
An introduction to the reading of biblical texts in Hebrew. Reading of selected texts from narrative, law, and poetry in the Hebrew Bible, with a few texts in post-classical Hebrew (the Dead Sea Scrolls and the Mishnah) introduced late in the semester. Intended for students who have completed JUDS 0170; others should consult the instructor.

JUDS 0260. The Bible as Literature.
Explores how methods of literary analysis can be applied to the reading of narratives of the Old Testament/Hebrew Bible (in English translation). Also compares the ways that modern writers have transformed biblical stories into new interpretive literary works. For students interested in an introduction to the Bible, as well as students with a knowledge of the Bible who want to deepen their understanding of biblical narratives and investigate the influence of the Bible on modern literature. All readings in English.

JUDS 0270. Excavating Apollonia.
This Field School at Apollonia-Arsuf, Israel is designed to provide students with an immersion program in archaeological field methods. Planned activities include participation in the excavation, and attendance of daily workshops, lectures and field trips to major excavation sites.

JUDS 0300. Israeli Literature in Hebrew.
For students interested in reading selections of Hebrew fiction, drama, and poetry. Concentrates on major issues of the State of Israel, for example: the relationship between modernity and tradition, responses to the Holocaust, the Arab-Israeli conflict, and other cultural, social, and political issues. Israeli feature films are viewed and discussed. Conducted in Hebrew. Emphasizes strengthening Hebrew reading, writing, and speaking skills. Prerequisite: JUDS 0150. Students who have not taken JUDS 0150 should see instructor for permission to enroll.

JUDS 0320. Israelite Religion (RELS 0320).
Interested students must register for RELS 0320 S01.

JUDS 0390. Holocaust Literature.
Readings in works of prose and poetry by victims and survivors of the Holocaust that portray experiences in ghettos, in concentration camps, and in hiding. Additional readings in works of the post-war era by survivors and their offspring. Discussion of the moral, psychological, religious, and cultural dimensions of the Holocaust and its ongoing impact on humanity.

JUDS 0470. The Old Testament/Hebrew Bible and Its World.
An introduction to the historical-critical study of the Hebrew Bible and a reconstruction of the history of Israel to the end of the Persian period (332 B.C.E.). Topics include biblical source criticism; Israel’s obscure origins; reconstructing the settlement period; an imperial Israel under David and Solomon; institutions-law and authority, covenant, prophecy, temple cult and priesthood. All readings in translation. No prerequisites.

JUDS 0530. Judaism, Christianity, and the Bible.
No book in human history has exercised as much influence as the Bible. Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of the Hebrew Bible (Old Testament) from its origins in ancient Israel to its development about five hundred years later as a foundational text of both Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible. WRIT.

JUDS 0610. American Jewish History.
By the mid-20th century, the U.S.’s Jewish population was one of the world’s largest and most important. In 1654, however, when 23 Jews landed in New Amsterdam, their position was far from assured. The history of American Jewish settlement is considered by exploring the interaction between the political, social, and cultural environment and successive waves of Jewish migrants. WRIT.

Examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. The central issue is the extent to which the Jewish experience during these centuries began to break down the fabric of traditional Jewish life and thought, thus paving the way for the emergence of modern Jewry.

JUDS 0640. History of the Holocaust.
Explores questions raised by the Holocaust regarding how such barbarism erupted in our so-called civilized and enlightened age. Attempts to analyze the meaning of the Holocaust from three vantage points: that of European, and more particularly, German history; that of Jewish history; and that of those states and religious institutions which shared responsibility. Enrollment limited to 50. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

JUDS 0650. History of Zionism and the Birth of the State of Israel.
Examines the history of the Zionist movement within the context of the history of European nationalism and as one of numerous Jewish political responses to rising antisemitism. Explores the ideological and political foundations of the Zionist movement until Israel’s establishment as well as broader concerns of Jewish politics in the late 19th and early 20th centuries.

JUDS 0660. Anti-Semitism and the Crisis of Modernity: From the Enlightenment to the Holocaust.
Examines the role of anti-Semitism in 19th- and 20th-century European ideological, political, and socioeconomic developments. Explores how anti-Semitism illuminates the underside of European history, illustrating the
ways in which it became embedded in the world views of Europeans and culminating in the Holocaust. Topics include: the Christian roots of anti-Semitism; the politicization of anti-Semitism by the left and right; the role of anti-Semitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to anti-semitism; anti-Semitism in the Nazi and Fascist revolutions; and contemporary interpretations of anti-Semitism

**JUDS 0870. Israeli Society.**
Focuses on the social, economic, political, and immigration factors shaping the emergence of Israeli society. Traces the selective movement of the Jews to Palestine and the establishment of the state of Israel, the development of ethnic diversity, the changing Arab minority, and general patterns of socioeconomic development. Issues of ethnic-religious assimilation, social inequalities, segregation, ethnic intermarriage, social mobility, and religiosity are examined

**JUDS 0980A. Memoirs and Memory: The Individual Experience of Modern Jewish Life.**
By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as eastern, central and western Europe, North Africa, the U.S., and Palestine/Israel, this course considers how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as the historian's role in this relationship. Enrollment limited to 20

**JUDS 0980B. God and Poetry.**
Throughout recorded history, poetry has expressed a variety of religious experiences. In this seminar we read selections from the Hebrew poetic tradition (in English translation), including the biblical psalms, medieval sacred poetry, and modern poetry, and explore how the language of poetry can serve as a means to convey the nature of relations between humanity and God. Enrollment limited to 20

**JUDS 0980G. Jews, Kurds, Copts: The Middle East's Forgotten Minorities.**
In descriptions of the Arab Spring, reports of violence against non-Muslim minorities dismayed international observers, but also piqued interest in these populations. Why do we know so little about Christians, Jews, Kurds and other non-Muslims in the region? Has history forgotten them? How many know that Baghdad was once considered a "Jewish" city? In 1948, Christians were the majority of Bethlehem's inhabitants; today they comprise only half of the city. This course discusses the history, literature, and legacy of these communities. We also consider the politics of memory, addressing why so little is known about non-Muslims in the Middle East. DVPS LILE WRIT

**JUDS 0980U. Making Sparks Fly: Mysticism and Politics in the History of Hasidism.**
Hasidism was a social movement founded on mystical ideas. Using the texts of its greatest masters, we will learn how revolutionary new ideas about God and the world became a powerful movement for social change. We will examine Hasidism's kabbalistic background, and the mystical ideology (in English translation) of the Bahai Shem Tov and his followers. We will focus on the development of the *Zaddik* and the Hasidic Court, as well as their conflicts with the rabbinic and community establishments in the eighteenth and nineteenth centuries. The seminar will involve critical reading of primary sources in translation and class discussions of historiography. WRIT

**JUDS 0980V. Money, Power, Sex and Love: The Modern Jewish Family in Europe and America.**
What roles did the family play in modern Jewish society and how did Jewish women participate in them? These questions are at the heart of this seminar. Through discussions of primary sources (in translation) and modern research, we will use the tools of gender analysis to examine the history of the Jewish family from the mid-seventeenth century until today. Topics discussed include: Jewish law and the family, women and the politics of the family economy, sex and the erotic, women's spirituality, the bourgeois Jewish family in imperial Germany, Jewish family life before the Holocaust, and intermarriage in the contemporary USA. WRIT

**JUDS 0980W. The Israeli-Palestinian Conflict: Contested Narratives (UNIV 0980).**
Interested students must register for UNIV 0980 S01

**JUDS 0980X. Introduction to Yiddish Culture and Language.**
Yiddish was the language spoken by most Jews in Eastern Europe and the countries to which they emigrated (including the U.S., England, South Africa, South American countries, and Israel) from the nineteenth century until after the Holocaust. It was the basis for a transnational Jewish culture and literature, and it played a central role in modern Jewish political life. We will explore the history of Yiddish culture and the development of the Yiddish press, literature, and cinema. The connection between Yiddish and modern Jewish politics will also be discussed. Students in the course will also have the opportunity to develop a basic knowledge of the Yiddish language

**JUDS 0990F. Religion and Sexuality.**
For millennia, religious thinkers have wrestled with the nature of sexuality. This class will examine how these thinkers have dealt with the essential questions that sexuality raises. Why do humans have sexual desire? Are there proper limits to sexual activity? While the focus of this class will be on Judaism and Christianity from antiquity to the present, we will also discuss Hindu, Muslim, and Tantric views. Topics to be addressed include: the nature and purpose of human sexual desire; contraception; adultery; homosexuality; abortion; and masturbation. No prerequisites. WRIT

**JUDS 0990G. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present.**
Jewish and Christian identity in Europe has traditionally been closely connected to the ways the two religions view each other. Much revulsion and attraction; early modern re-evaluations of Judaism and Christianity; modern Christian anti-Semitism, Jewish diplomacy, and the Holocaust; the effects of Vatican II; Israel and the contemporary Christian world

**JUDS 0990H. New York, Warsaw, Tel Aviv, Buenos Aires: Transnational Jewish Cultures in the 20th Century.**
Being a diasporic people without a nation-state until the mid-20th century, the Jews in Eastern Europe created Jewish cultures that were also influenced by the non-Jewish environment. How did these cultures develop in the age of mass migrations? How did the new Jewish cultures express the ideas of "homeland" and "diaspora?" Was the Jewish/Hebrew culture created in Israel part of the Jewish cultural discourse, or did it define itself separately? During the course, we will explore Jewish culture in four cities, also examining their relations with each other, in order to understand the transnational nature of these unique Jewish cultures. Enrollment limited to 40

**JUDS 0990J. Body and Society: Medicine and Medical Ethics in the Pre-modern World.**
This course examines approaches to the human body, medical ethics, and sexual identity in medieval Western culture and society. We will begin with the theory and practice of medicine, comparing the Arabic tradition of the tenth through twelfth centuries with that of Christian Europe in the thirteenth through fifteenth centuries and tracing the Jewish medical tradition as well. We will then turn to ethical issues, including contraception and abortion, the doctor-patient relationship, intractable conditions, and the moral dimension of disease. Enrollment limited to 40

**JUDS 0990L. Jews Between Christians and Moslems in the Early Modern World.**
What were the different experiences for Jews living amongst Christians and Moslems? How did Islam and Christianity affect the development of Jewish society and culture? This course will examine these questions by looking at two flourishing Jewish centers from 1500-1800: one in the Moslem Ottoman Empire, the other in the Christian Polish-Lithuanian Commonwealth. Topics to be discussed include: Christian and Moslem attitudes towards Jews and the Jews' response to them; Jewish communities in Polish and Ottoman towns; the development of Jewish law in both settings; Christianity, Islam, and anti-Jewish violence; the interactions of Jewish, Moslem, and Christian mystical movements. Enrollment limited to 20
JUDS 0990M. Friendship in the Ancient World (RELS 0090F). Interested students must register for RELS 0090F S01

JUDS 0990N. Becoming French: Minorities and the Challenges of Integration in the French Republic (HIST 0980B). Interested students must register for HIST 0980B S01

JUDS 0990P. Women and Gender in the Modern Jewish World. This course will focus on Jewish women's encounters with modernity in a variety of contexts: Western and Eastern Europe, United States, and Israel. The goal of this course is to uncover the experiences of Jewish women and to use gender analysis as a means of enriching our understanding of Jewish life. Students will consider how gender has shaped Jewish women's experience in the context of immigration, assimilation, religious observance, home, work, motherhood, family, and feminism

JUDS 0990Q. "Coming Out" Jewish, Gay or Black: Mistaken Identity in Literature from USA and Brazil (POBS 0820). Interested students must register for POBS 0820 S01 (CRN 15256)

JUDS 1000. The Shaping of the Classical World: Greeks, Jews and Romans (HIST 1000B). Interested students must register for HIST 1000B S01

JUDS 1004. Esthers of the Diaspora (POBS 1500H). Interested students must register for POBS 1500H S01

JUDS 1011. Media and Memory: Representing the Holocaust (MCM 1502U). Interested students must register for MCM 1502J S01

JUDS 1390. The Archaeology of Jerusalem. Jerusalem constitutes one of the most important architectural sites connected to the origins of Judaism, Christianity and Early Islam. In this class we will explore the material remains of the city beginning with David's conquest in ca. 1000 BC through the end of the Ottoman Period in 1917. The contemporary literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods

JUDS 1400. The Archaeology of Palestine. Palestine constitutes one of the most important archaeological regions connected to the origins of Judaism, Christianity and Islam. In this class we will examine the material remains of the region beginning in pre-historic times until the end of the Ottoman period in 1917. Literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods. WRIT

JUDS 1410. The Talmud. Written from the first - seventh centuries CE, the Talmud (which runs to 20 volumes) contains law, lore, theological speculation, and complex argumentation. We will read a selection in depth and examine both traditional and modern critical (e.g. historical and literary) approaches to this fundamental text. No prerequisites; all texts in English translation. Enrollment limited to 20. DVPS LILE WRIT

JUDS 1440. Ancient Synagogues, Churches, and Mosques in Palestine. Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development. WRIT

JUDS 1450. The Archaeology of Qumran and the Dead Sea Scrolls. Qumran is one of the most prominent archaeological sites in the world. Its fame derives from its proximity to a series of caves in which some 800 ancient scrolls were found. Scholars have debated the relevance of this site to the histories of Judaism and Christianity. This seminar will examine the debates regarding the character of Qumran through the material finds from old and new excavations conducted at the site itself and in the Dead Sea region. The lectures and readings are intended to stimulate a discussion about how to use texts and material culture for reconstructing the past. Enrollment limited to 20. LILE

JUDS 1530. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE. The exile of Judah’s elite to Babylon elicited profound and conflicting literary responses. We will undertake a literary and historical analysis of a number of the most important works produced in response to the crisis of exile, including Jeremiah, Ezekiel, Second Isaiah, Lamentations, Psalm 137, the Priestly Writing, and the work of the exilic deuteronomists. Enrollment limited to 20

JUDS 1970. Individual Study Projects. Section numbers vary by instructor. Please see Banner for the correct course reference number (CRN) to use when registering for this course

JUDS 1980A. Comparing Genocide: Armenians and Jews in Twentieth-Century Europe. Recent historical debate has centered on the Holocaust and the question of "uniqueness." Was the Nazi slaughter of Europe’s Jews an incomparable event? We address this question by comparing the Holocaust with the genocide of Ottoman Armenians during World War I, among others. Our goal: to analyze the historical, political, and societal roots of the genocidal process

JUDS 1980B. Out of the Ghetto: Emancipation and Integration in Modern Jewish History. The acquisition of citizenship in modern nation-states transformed the course of modern Jewish history. We consider the complexities of this emancipatory process. How did the move away from self-governing enclaves, which had characterized communal life prior to this period, change Jewish life? How did Jewish communities reconcile a particularistic Jewish identity with a more universalistic national one?

JUDS 1980C. Problems in Israelite Religion and Ancient Judaism. A series of topics in Israelite religion and ancient Judaism which are of current scholarly interest are explored in a seminar setting. Students are encouraged to read widely and pursue individual research interests. The course assumes a basic knowledge of biblical literature and scholarly criticism

JUDS 1980K. Biblical History: What Really Happened?. Topics of recent and current debate among specialists in the field of Israelite history. Problems include (1) the historicity of the patriarchs and matriarchs; (2) the historical evidence relevant to the question of an exodus; (3) the nature of Israel’s settlement in Canaan; (4) the 10th century, era of empire or literary fiction? (5) the land of Judah after the Babylonian conquest. Enrollment limited to 20

JUDS 1980Q. Jews and Muslims. This course considers intersections between Muslims and Jews in various historical settings from the early Islamic world, to Medieval Spain, to contemporary Europe and the Middle East. The goal is to move beyond simplistic histories of interfaith utopia, Islamic persecution, and Zionist domination to consider the complexities of ethno-religious interaction in a variety of social, cultural, economic and political contexts

JUDS 1980T. Jews and Judaism in the Greco Roman Mediterranean. An advanced survey of the evidence for Jews and Judaism in the Greco-Roman Mediterranean (Egypt, Asia Minor, Rome, North Africa, etc.). Sources include synagogue mosaics, burial and donor inscriptions, personal documents, and references in non-Jewish writers, including Christians. Also considers what theoretical models best enable us to reconstruct the identity, practices and beliefs of the ancient diaspora Jewish communities

JUDS 1980X. Religion in the Dead Sea Scrolls (RELS 1150). Interested students must register for RELS 1150 S01

JUDS 1981C. Minority News: Radical Reporting and Reading. By reading historical and contemporary accounts of minority newspapers, journalists and readerships, this course offers a comparative view of how small communities envision their role in the public sphere and how they create counterpublics. In addition to our focus on traditional news media, we examine the role new media play in transforming minority representation. Students in this course also engage in original research into the state of today’s minority presses, their rhetorics and audiences. Enrollment limited to 20
Jesus may have been Jewish, but for many centuries, Jews and Christians alike have considered their religions and their self-identifications to be mutually exclusive. When, why and how did these differences become definitive? Some modern scholars argue that "the ways parted early": others contend that they never parted at all! We focus on the period before Christianity becomes the official religion of the Roman Empire (late 4th century C.E.), with attention to persons in antiquity who contested these distinctions, and even to some in our own time ("Hebrew Christians," "Messianic Jews," and "Jews for Jesus"). Enrollment limited to 20. WRIT
Interested students must register for HIST 1971Z S01
Interested students must register for HIST 1970L S01 (CRN 24642)
Interested students must register for HIST 1550 S01
Interested students must register for HIST 1551 S01
JUDS 1981I. God and the Search for Knowledge in Medieval Cairo: Maimonides and His World.
Considered by many to be the most influential Jewish thinker of all time, Moses Maimonides inspired passionate followers and changed Judaism forever. Others denounced him as a heretic and some even burned his books. As a refugee from the twelfth-century Berber invasion of Muslim Spain, the young Maimonides settled in Cairo, Egypt. Students will learn about the Islamic Mediterranean world where this rabbinic scholar, philosopher, and physician developed his views on the messiah and the afterlife, his approach to ethical issues, and his ideas about how to know and love God, how to read the Bible, and more. WRIT
Interested students must register for HIST 1976R S01
Interested students must register for HIST 1552 S01
JUDS 1981M. The 'New Jew' and the Diaspora: Voices from Israel, Brazil and America (POBS 1500W).
Interested students must register for POBS 1500W S01
Interested students must register for GRMN 1660L S01
JUDS 1981P. Why Do People Pray?.
Prayer has been central to human culture for millennia. Why do people pray? Is it essential to think of a transcendent divine being when one prays? Is prayer related to inner psychological states that are common to believer and non-believer alike? Can an atheist pray? We will study biblical prayers, post-biblical Jewish prayers, and prayer poems by contemporary Israelis. We will also read theoretical studies on the phenomenology of prayer. Open to students no matter what their relationship to prayer is. No background in religion or in religious studies is necessary. All sources will be read in English translation. LILE
This course surveys the history of Israel from its Proclamation of Independence in 1948 until today. Israel's history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. At the same time, an entirely new, vibrant and dynamic society and culture has developed there. This course aims to familiarize the student with the major outlines of Israel's development, and with different narratives and interpretations of that history. The reading materials and class discussions will examine not only the Arab-Israeli conflict, but also its influence on Israeli politics, society and culture
Interested students must register for HMAN 1970I S01 (CRN 25390)
Interested students must register for HIST 1978A S01 (CRN 25861)
This is a course in Yiddish reading for research purposes designed primarily for advanced undergraduates and graduate students. This means that the emphasis will be on learning how to read and decipher a range of texts in modern Yiddish in different genres written. We will read the Yiddish classics and discuss their language, style and content, as well as newspaper articles published at the beginning of the 20th century and various historical documents. We will learn to read and understand non-standard pre-1930s Yiddish as well as American and Soviet Yiddish. Participation in this course requires the instructor's permission. Enrollment limited to 40
JUDS 2060B. Methods in Ancient History (HIST 2970I).
Interested students must register for HIST 2970I S01
JUDS 2450. Exchange Scholar Program.

Center for Language Studies

Director
Elissavet Amanatidou

Members of the Center for Language Studies share intellectual interests in issues of learning and teaching second languages and their cultures. The mission of the center is to facilitate contact and cooperation among second language faculty across individual department boundaries. CLS aims to promote research in the field of language study, to develop experimental or innovative language teaching materials, and to design new curricular configurations which stress the central position and interdisciplinary nature of language study. The center supports the application of emerging technologies to language learning, it seeks to improve the professional development of graduate and undergraduate teaching assistants, and it strives to forge new links within the second language community as a whole.

The Center for Language Studies is dedicated to improving the study of languages at Brown University, to extending the field of second language study, and to increasing the collaboration between language specialists and faculty and students in other disciplines. Such collaboration may be pursued: 1. through the development of interdisciplinary programs (e.g., the "Languages Across the Curriculum" program); 2. through collaborative grants and research projects; 3. through lectures and conferences involving professionals in language education; and 4. through community-oriented initiatives and projects. Individuals interested in creating new opportunities for language study are invited to share their ideas with us.
For additional information please visit the Center’s website at: http://www.brown.edu/Departments/CLS/

Courses

American Sign Language
SIGN 0100. American Sign Language I, II.
Introduces basic ASL conversation. Features core vocabulary, common signing phrases, non-manual components (facial expression, body postures), signing space, fingerspelling, numbers, loan signs, cultural protocols, rules of ASL grammar and structure. Deaf cultural behavior is introduced in the classroom and through readings, videotapes, and Deaf community events.
This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in SIGN 0200 covers the entire year and is recorded as the final grade for both semesters
SIGN 0200. American Sign Language I, II.
Introduces basic ASL conversation. Features core vocabulary, common signing phrases, non-manual components (facial expression, body postures), signing space, fingerspelling, numbers, loan signs, cultural protocols, rules of ASL grammar and structure. Deaf cultural behavior is introduced in the classroom and through readings, videotapes, and Deaf community events.
This is the second half of a year-long course. Students must have taken SIGN 0100 to receive credit for this course. If SIGN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing
SIGN 0300. American Sign Language III.
Explores sociolinguistic aspects of ASL within the Deaf cultural context. Focuses on classifiers, linguistic principles related to dialogues and storytelling techniques (e.g., role-shifting, narrative structure). Deaf culture is experienced by attending events and by voluntary service to the Deaf community. Prerequisite SIGN 0200 or placement interview
SIGN 0400. American Sign Language IV.
Intensive use of expressive and receptive skills in complex grammatical structures, advanced classifiers, dialogues, and storytelling techniques. Discussion of social factors that give rise to code-switching; regional and ethnic sign variations; social, political, and cultural evolution of U.S. Deaf community. Interaction with the Deaf community in directed and non-directed activities. Prerequisite SIGN 0300 or placement interview
SIGN 0500. American Sign Language V.
Focuses on the use of ASL discourse in formal as well as informal settings. Students will explore and present the advanced ASL genres of public speaking, artistic expression, formal discussion, interviews, and narrative projects. Development of ASL vocabulary in specialized area not covered in previous courses. Prerequisite: ASL IV (SIGN 0400) or equivalent
SIGN 0900. Introduction to Deaf Studies.
Introduction to the Deaf Community and Deaf Culture. Discussion of similarities to, and differences from, mainstream hearing culture. Supplemental videotapes focus on aspects of the culture including Deaf education and history, autobiographical sketches, Deaf norms and values, and Deaf literature, art and folklore. Theoretical issues of culture and linguistics applied to Deaf culture. American Sign Language, and the variety of cultural perspectives of the Deaf community. Students also engage in a research project related to course content. Voice interpreter will be provided; all students are welcome; no previous knowledge of American Sign Language or Deaf Studies is needed
Independent study in an area of special interest to the student, with close guidance by a member of the faculty, and leading to a major paper/project. Required of candidates for honors, and recommended for third year students. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: SIGN 0500 or instructor permission
Arabic
ARAB 0100. First-Year Arabic.
Builds basic listening, speaking, reading, and writing skills, introducing the Arabic language in its cultural environment. Six contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0200 covers the entire year and is recorded as the final grade for both semesters. If course is full, please sign the wait list in Room 205, 195 Angell Street. Enrollment limited to 18
ARAB 0200. First-Year Arabic.
Builds listening, speaking, reading, and writing skills, at the low intermediate level of Arabic proficiency. Six contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the second half of a year-long course. Students must have taken ARAB 0100 to receive credit for this course. If ARAB 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 18
ARAB 0300. Second-Year Arabic.
Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes a better understanding of the Arabic cultural traditions. Six contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0200. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0400 covers the entire year and is recorded as the final grade for both semesters. If course is full, please sign the wait list in Room 205, 195 Angell Street
ARAB 0400. Second-Year Arabic.
Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes a better understanding of the Arabic cultural traditions. Six contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0300. This is the second half of a year-long course. Students must have taken ARAB 0300 to receive credit for this course. If ARAB 0300 was taken for credit, then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 18
ARAB 0500. Third-Year Arabic.
Offers comprehensive training in listening, speaking, reading, and writing, with grammar review as needed. Broadens students’ perspective of Arabic culture using selections from the classical and modern traditions of Arabic writing and various art forms. Five contact hours weekly. Prerequisite: ARAB 0400
ARAB 0600. Third-Year Arabic.
Offers comprehensive training in listening, speaking, reading, and writing with grammar review as needed. Broadens students’ perspective of Arabic culture with selections from the classical and modern traditions of Arabic writing and various art forms. Five contact hours weekly. Prerequisite: ARAB 0500
ARAB 0700. Fourth-Year Arabic.
Builds advanced Arabic competence, using communicative approaches to the learning of content, function, and accuracy. Guided reading, writing and research. Three contact hours weekly. Prerequisite: ARAB 0600
ARAB 0800. Fourth-Year Arabic.
Builds advanced Arabic competence, using communicative approaches to the learning of content, function, and accuracy. Guided reading, writing and research. Three contact hours weekly. Prerequisite: ARAB 0700
ARAB 1990. Special Topics in Arabic Language, Literature, and Culture.
Advanced level integrated skill course focusing on specific reading and writing topics derived from the traditions and arts of the Arabic language. Course prerequisites include advanced capacity in Arabic grammar and reading comprehension. Enrollment limited to 10
Catalan
CATL 0100. Introduction to Catalan.
This course introduces students to Catalan culture and boosts their oral and writing skills through a wide range of resources: Internet, television, radio, cinema, and music
CATL 0200. Catalan Language and Culture.
An intermediate course which introduces students to Catalan culture and allows them to review and extend their knowledge of all basic patterns (e.g. grammar, vocabulary, phonetics, sociocultural norms) of the language. Students will develop their oral and written skills by describing,
narrating, and presenting arguments. They will work with texts and audiovisual material that will provide them with a deeper understanding of Catalan literature, culture, and contemporary society. Classes will be conducted in Catalan. Therefore a basic knowledge of Catalan literature is a prerequisite or students may request the instructor’s permission to take the course.

**CATL 0300. Introduction to Catalan Culture.**

The course will begin with an introduction to Catalan grammar. After students have a basic command of the language, they will be encouraged to read a wide range of texts written in Catalan relating to many different topics. The texts have been selected not only for their linguistic value, but also because of the cultural aspects they introduce. The course will include activities designed to teach students about Catalonia, its culture and its traditions. For example, students will have the opportunity to listen to songs, watch films, news reports, etc. All texts will be provided by the professor and handed out in class. Students are welcome to bring to class any Catalan text of their interest. Classes will be conducted in Catalan as much as possible. Therefore, some knowledge of another Latin language is required.

**English for International Students**

**EINT 2100. Academic Discourse for International Students.**

This course develops the English skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their listening comprehension and fluency in conversational interactions typical of academic settings. Areas of spoken English that are addressed include pronunciation, stress patterns, intonation, vocabulary, and structure. Instructor permission required

**EINT 2200. Academic Interactions.**

This course develops the English language skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their fluency and expression of complex ideas in a variety of linguistic situations typical of classroom interactions. Students also increase their control of vocabulary, pronunciation and listening comprehension when communicating with American undergraduates. Instructor permission required

**EINT 2300. Negotiating an American Classroom.**

In this course, international graduate students increase their abilities to communicate accurately and fluently in English with American undergraduates. International students develop their ability to interact, in culturally appropriate ways, in a variety of teaching situations common to an institution of higher education, where they are responsible for expressing and explaining complex information and ideas in English. Instructor permission required

**EINT 2400. Speaking Professionally for International Students.**

This course develops the English communication skills of international graduate students with an emphasis on intelligibility of speech and clarity of expression in a variety of teaching and professional situations (e.g. presenting material, responding to questions, directing discussions). Students develop increased facility of English in extended discourse when they are the authority in a teaching or other professional context. Instructor permission required

**EINT 2500. Advanced Articulation Tutorial.**

This course is an advanced pronunciation tutorial for international graduate students who have achieved a near-native speaker level of fluency in English, but who require greater precision of English articulations, pronunciation, fluency and/or expression. Instructor permission required

**Hindi-Urdu**

**HNDI 0100. Beginning Hindi or Urdu.**

Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor’s permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor.

**HNDI 0200. Beginning Hindi or Urdu.**

Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor’s permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor.

**HNDI 0300. Intermediate Hindi-Urdu.**

A continuation of HNDI 0100-0200, which is a prerequisite. Introduces the variation of the Arabic script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly

**HNDI 0400. Intermediate Hindi-Urdu.**

A continuation of HNDI 0100-0200. Introduces the variation of the Persian script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly. Prerequisite: HNDI 0300

**HNDI 1080. Advanced Hindi-Urdu.**

Each student follows an independent reading list determined in consultation with the instructor. The readings may include folk tales, journalistic prose, 20th-century literature, classical Urdu poetry of the 17th to 19th centuries, or subjects in nonfiction. The class meets together three hours weekly for discussion. Each student also spends one hour weekly with the instructor. Prerequisite: HNDI 0400

**Persian**

**PRSN 0100. Basic Persian.**

Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture

**PRSN 0200. Basic Persian.**

Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture. This is the second half of a year-long course. Students must have taken PRSN 0100 to receive credit for this course. If PRSN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**PRSN 0300. Intermediate Persian Language and Culture.**

Expands students’ proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0200

**PRSN 0400. Intermediate Persian Language and Culture.**

Expands students’ proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0300

**PRSN 0500. Advanced Persian Language and Culture I.**

For students who have completed PRSN 0400 or have acquired language skills above the intermediate level through contact with Persian in other ways. The main goal of this course is to improve speaking, listening, reading and writing skills and promote exposure to the culture. It will enable students to expand their knowledge of the language by studying samples of modern and classical Persian literature in order to advance toward mastery of contemporary literature. The course will motivate students to communicate both in written and spoken Persian by utilizing the adequate grammatical order and correct vocabulary. Prerequisite: PRSN 0400

**PRSN 0600. Advanced Persian Language and Culture II.**

Designed for students who have completed PRSN 0500 or have acquired language skills above the advanced level through other means. The main goal of the course is to improve speaking, listening, reading and writing skills and promote exposure to the language and culture through in depth study of samples of Persian literature, history, journals, newspapers, radio and TV material to advance toward mastery of contemporary literature.
Students will be motivated to communicate both in written and spoken Persian by utilizing adequate grammatical order and vocabulary. Activities will include poetry reading, informal gatherings and translation from and into Persian. Prerequisite: PRSN 0500

PRSN 1200. Iranian Cinema: Before and After the Islamic Revolution. This course provides an overview of Iranian Cinema in general and explores in detail Iranian cinema after the Iranian revolution. It explores the politics, history, techniques and the art of cinema of the past several decades in Iran. Classes consist of screenings, discussions and lectures. Conducted in English, open to all students. Enrollment limited to 25. DVPS LILE

Latin American and Caribbean Studies

Director
Richard O. Snyder

The mission of the Center for Latin American and Caribbean Studies (CLACS) is to foster greater knowledge, teaching, and research on the history, peoples, environment, languages, and contemporary problems of Latin America and the Caribbean. The Center accomplishes these goals through promoting flexible, multidisciplinary undergraduate studies on the region and helping to provide an expanding range of offerings at the graduate level; conference, grant, and curricular development support for faculty research and teaching; and a full schedule of lectures, events, and films to complement a wide range of academic interests, faculty and student initiatives, and internal and external university affiliations. As a leading center for Latin America and the Caribbean studies with a growing national and international reputation, CLACS encourages vigorous and comprehensive dialogue on key political, economic, and cultural matters related to scholarship and policy concerns regarding Latin America and the Caribbean at all levels of the university and beyond. Brown faculty-student collaboration in all aspects of Latin America and the Caribbean is a hallmark of the Center’s activities. In 2006, CLACS was designated as one of 18 Title VI National Resource Centers for Latin American Studies by the U.S. Department of Education.

For additional information, please visit the department’s website: http://www.watsoninstitute.org/clacs/

Latin American and Caribbean Studies
Concentration Requirements

Latin American and Caribbean Studies is an interdisciplinary concentration designed to help students develop an understanding of culture, history, and contemporary issues in the region. Concentrators study the social, political, economic, literary, and cultural features that comprise contemporary Latin American and Caribbean societies. Concentration requirements cover four general areas: language, area studies, research, and professional experience. Concentrators develop competency in Spanish or Portuguese and many concentrators also study in Latin America for one or both semesters during the junior year. An internship or volunteer work (required of all students) in Latin America or with a local organization that primarily serves Spanish or Portuguese speakers, puts students in direct contact with Latin Americans, and builds professional skills and experience.

Requirements are intentionally broad and flexible to accommodate the interests of students in understanding the diverse reality of Latin America and the Caribbean, yet the concentration also encourages focus. Concentration requirements cover four general areas: language and literature, area studies, independent research, and out of classroom experience.

Language
Basic competence in either Spanish or Portuguese is required. Each student must take either HISP 0100, HISP 0200, POBS 0110 or any more advanced Spanish or Portuguese language course. This requirement may be satisfied by examination, but the examination will not count as a course. No more than one advanced language course (not including literature courses) may be counted among the ten courses required for the concentration.

Literature
Some familiarity with the literature of the region is required. Each concentrator must take at least one of the following: HISP 0730, POBS 0610, or a 1000-level Spanish or Portuguese literature course dealing with Latin America.

Area Studies
6 courses: Two types of area-focused courses are required: (1) courses specifically designated "Latin American Studies" (LAST, not including LAST 1990- LAST 1991), and (2) courses in several departmental programs that demonstrate the ways in which various disciplines have contributed to our understanding of Latin America. Approved area studies courses for the concentration are listed in Appendix B of the Concentration Guide.

At least 2 disciplines (not including Latin American Studies) must be represented among the six area studies courses. Other 1000-level courses dealing with related subjects that are especially pertinent to the study of Latin America may be substituted with approval.

Senior Thesis or Project
2 courses: A Senior Thesis or Project is optional for concentrators. It includes course credit for a reading and research course (LAST 1990-LAST 1991). In order to integrate the diverse perspectives gained in courses and readings, seniors may elect to complete a Senior Thesis or Project under the direction of one faculty member. Seniors will also choose one additional faculty member to serve as a reader. The reader will receive a draft and a finished copy of the student’s thesis or project, which the reader will be responsible to grade. The reader may be involved in the earlier development of the thesis or project depending upon the arrangement made by the student with the reader. The Senior Thesis or Project will normally consist of a major research paper. A student may, with prior permission of the Latin American and Caribbean Studies Concentration Advisor, present a film, videotape, museum exhibition, or other appropriate project, together with a paper that clearly demonstrates the academic relevance of the project. Only the Senior Thesis qualifies the student (along with a minimum B+ average) for Honors. The Senior Project is quite often of a more personal nature, such as observations on practice teaching or a survey of social resources on Latin America. Near the beginning of the seventh semester, students should submit to the concentration advisor a 5 to 8 page prospectus accompanied by the signature of one faculty member indicating that he or she is willing to serve as primary advisor on the project.

If a concentrator chooses to do neither a senior thesis nor a senior project, then a research paper must be written in an advanced undergraduate seminar (1000-level). The seminar must be among the approved area studies courses listed in Appendix B of the Latin American Studies Concentration Guide, and will count as one of the ten courses required for the concentration. Research papers will typically be 20-30 pages in length and must be approved by the Concentration Advisor. Students who choose this option do not take LAST 1990 or LAST 1991. The seminar counts as the research component of the program. The distribution requirements for this option are: 2 language courses, 7 area studies courses and 1 research course (i.e. the seminar for which the paper is written).

Internships/Community Service
The Concentration in Latin American and Caribbean Studies requires students to complete an internship or volunteer service work in Latin America or with a local organization that works primarily with Spanish or Portuguese speaking peoples. The Center maintains a database of local and international internship opportunities. Students are strongly encouraged to consult with the Swearer Center for Public Service. Internships and community service work are available to Brown students who study abroad at the Brown programs in Mexico (Universidad de las Americas) and in Brazil (Catholic University of Rio de Janeiro). Examples
of local service work performed by concentrators in previous years include: helping compile a Spanish language guide to welfare service agencies, developing a culturally appropriate adaptation of a health testing and education program, and ESL instruction to Latin American immigrants. Such extracurricular work can be rewarding in itself; in consultation with a faculty member, it can often be used to earn academic credit and furnish material for either a Senior Thesis or Project. A minimum of one semester or a summer of internship or volunteer service work is required. Students need to submit an internship/service work proposal form to the Latin American and Caribbean Studies Concentration Advisor for approval prior to starting the internship or service work. Upon completion of the internship or service work, students are required to submit to the Concentration Advisor a brief summary report of their experience, which must be signed by the supervisor of the student’s internship or service work.

Honors
Qualified undergraduates may pursue work towards the B.A. with Honors. The requirements for graduation with Honors are the following:
1. Maintenance of at least a B+ average in the ten courses counting for the concentration.
2. Maintenance of at least a B+ average in all course work done for the B.A. at Brown.
3. Completion of a Senior Thesis approved by the primary advisor and reader as acceptable for Honors. The senior thesis should be "A" level work, although an "A" thesis does not automatically qualify for honors.

Prizes and Awards: Graduating seniors in Latin American Studies are eligible for an award administered by the concentration for outstanding Senior Thesis.

Foreign Study
Study abroad (normally in the junior year) is encouraged as an important part of the concentration. Interested students should begin early to prepare for such a venture. Popular programs with Latin American concentrators include Universidad de las Americas-Puebla, Mexico, and the Catholic University (PUC-Rio) of Rio de Janeiro, Brazil. Up to three courses taken abroad may be counted toward the ten courses required for the concentration. A list of Brown programs and approved non-Brown programs is available from the Office of International Programs (OIP) located in Rhode Island Hall. Feel free to consult the Latin American and Caribbean Studies concentration advisor about study abroad.

Latin American and Caribbean Studies Graduate Program
Brown offers no advanced degree in Latin American Studies, but our faculty work closely with interested graduate students in other departments such as Hispanic Studies, History, Economics, American Civilization, Anthropology, Sociology, Political Science, Portuguese and Brazilian Studies, and the A.M. in Development Studies. Information about these degrees may be obtained directly from these departments or programs.

Courses
Haitian Creole
CROL 0100. Basic Haitian Creole.
Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18. Prerequisite: Beyond basic level of reading, writing and comprehension or having successfully completed CROL 0100. If the course is full, please sign the wait list in room 215, 111 Thayer Street.

CROL 0200. Early Intermediate Creole.
Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18. Prerequisite: Beyond basic level of reading, writing and comprehension or having successfully completed CROL 0100. If the course is full, please sign the wait list in room 215, 111 Thayer Street.

CROL 0300. Advanced Intermediate Haitian Creole.
Fast-paced course for advanced/intermediate students of Haitian Creole. Designed for those who speak and understand Haitian Creole with some fluency but are seeking ways of perfecting their language skills, overcoming grammatical snags, increasing vocabulary, and mastering the idiomatic use of the language and proverbs. Reading and responding to authentic literature in Haitian Creole will be the focus of the course. Prerequisite: CROL 0200. Enrollment is limited to 18. If course is full, please sign the wait list in Rm. 215, 111 Thayer Street.

CROL 0400. Advanced Haitian Creole.
Designed for those who wish to develop more advanced level conversational, reading, and writing skills. Students work with a variety of readings (stories, poems, plays), films, interviews, and popular songs that promote in-class discussion and written analysis. Extensive practice in translating from English to Haitian and vice versa, as well as of developing accuracy, speed, and appropriateness (lexical, grammatical, and cultural). Prerequisite: CROL 0300. Enrollment limited to 20.

Latin American Studies
LAST 1510B. The Struggle for Human Rights in Brazil: Democracy without Citizenship.
Provides an analysis and discussion on the building of 16 years of continuous human rights State policy in Brazil, in the framework of the Latin-American continent. The colloquium will deal with a range of topics: democratic consolidation, "un-rule of Law", accountability for gross human rights violations. Appropriate for advanced students with some familiarity with Brazilian and Latin American political history. In English, with possibly some readings in Spanish and/or Portuguese. Enrollment limited to 20.

LAST 1510C. Democracy and the (Un)rule of Law in Latin America: Two Decades after Transitions.
This seminar aims to better understand how Latin American countries perform in terms of respect for human rights, and how citizens perceive their governments' human rights record. One of the key questions will be to ask what kind of democracy can prosper in an environment of continued violation of human rights, and how change can take place so that a 'good' democracy can develop. Another question will be focused on the role of rule of law in the development in the continent and how the evolution from a democracy of voters to a democracy of citizens can happen.

LAST 1510D. Popular Music and Social Change in Latin America.
This course is designed to illuminate the many ways that popular musicians shape, and are shaped by, the broader social milieu within which they act. Focusing largely on twentieth-century case studies from Cuba, Brazil, and Peru, it illustrates how social dynamics particular to Latin America have constrained popular musicians' efforts to communicate, circumscribed their artistic and political goals, and enabled them to intervene in sociocultural debates in specific ways. Issues to be considered include the sanctioning of musical styles as national symbols; the harnessing of music to promote racial diversity; its use as a medium of political protest as well as a vehicle for populist politics; the shifts in style wrought by industrialization, migration, and urbanization; the importance of media dissemination and commercialization, both in driving musical change and in determining its scope of influence; and the ambivalent role of the processes variously dubbed "westernization," "Americanization," and "globalization."

LAST 1510E. Race, Music and Literature in the Spanish Caribbean.
The course provides an interdisciplinary approach to racial representations in the Literature and Popular Music of the Spanish Caribbean. It explores the different definitions and representations of the Spanish Caribbean cultures and identities from a comparative view of the Anglo and French Caribbean writers.

LAST 1510F. Institutions of Justice and Democracy in Latin America.
The course will examine the relationship between democracy building and the performance of Institutions of Justice in Latin America. We will address issues of human rights violations, globalization and its threats, and the Challenges that Latin American regimes faces to build democratic
institutions and the rule of Law. The course will focus will be both on the normative and sociological and analysis of the institutions of Justice in Latin America

LAST 1510G. Literature and Popular Culture in Latin America.
Latin American cultures were built on the humanistic and intellectual perspectives exposed by José Enrique Rodó and José Martí, among many others, which propose the artistic aesthetic as a social ideal and the spreading of education as a sign of progress. But these cultural and national projects were developed in “the era of mechanical reproduction” and their literary project soon was menaced by the “cultural industry.” This course explores the dialogues and tensions between what has been branded as the “lettered” and the “real city” in Latin American societies in a selection of literature, film, television, and popular music. This course will be given in Spanish

LAST 1510H. Shaping the Brazilian Nation through Music.
This course provides an introduction to the music of Brazil, with a particular emphasis on its role in creating and contesting visions of nationhood during the twentieth century. Focusing upon a limited number of musical genres, groups, and periods, it is not intended to provide a comprehensive survey. Rather, using a small set of case studies, it highlights key dynamics that have shaped the relation between Brazilian music and Brazilian society more broadly. Topics range from traditional practices, such as candomblé and folias de reis; to samba, bossa nova, and Northeastern regional styles; to the work of composer Heitor Villa-Lobos; to the contemporary hip hop scene of São Paulo. There are no prerequisites, but it is recommended that students have either some knowledge of Latin American culture and/or history, or some musical background. Enrollment will be limited to twenty people, with preference given to those matching these criteria

LAST 1510I. Urban Latin America.
This course will analyze the crucial dynamics, contradictions and consequences of urbanization in contemporary Latin America. Themes to be addressed include: urban culture, sports, national and ethnic identities, religion and violence. Prerequisite: at least one other class in Anthropology or other social sciences

LAST 1510J. The Making of Modern Brazil.
Will focus on the building of the Brazilian nation and the meanings of social phenomena involved in this process. Based on studies of contemporary Brazilian society, it will analyze different aspects of that country: urbanization, popular culture, revival of tradition, hybridization, imageries of nation, political systems, Brazilian regional popular music. Syllabus: Brazilian regional popular music. There are no prerequisites, but it is recommended that students have either some knowledge of Latin American culture and/or history, or some musical background. Enrollment will be limited to twenty people, with preference given to those matching these criteria

LAST 1510K. Human Rights in Twenty-First Century Latin America.
Course offers a multidisciplinary introduction to the key advances in and challenges for the protection of human rights in contemporary Latin America. In contesting autocratic governments in the 1970’s and 1980’s, Latin America social movements and non-governmental organizations (NGOs) played a central role in the creation of the institutions and norms that constitute the international human rights system today. Enrollment limited to 20

LAST 1510L. The Politics of Latin America: Dilemmas and Opportunities.
A survey course on the politics of Latin America which aims at exploring the transformations experienced by the region in the last few decades. The course combines the discussion of themes (the emergent economic realities, the quality of democracy) with a more detailed look at countries of particular relevance because of their importance (Brazil, Mexico, Argentina) their unique trajectories (Chile, Cuba) and their relationship with the United States (Venezuela). Enrollment limited to 20

For Latin American Studies concentrators writing senior projects or honors theses

For Latin American Studies concentrators writing senior projects or honors theses

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. Open to senior Latin American Studies concentrators. Instructor permission required

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. LAST XLIST. Courses of Interest to Students Concentrating in Latin American Studies.
Fall 2012
The following courses, offered in other departments, may be of interest to students concentrating in Latin American Studies. Please see the course listing of the sponsoring department for times and locations.

Spring 2013
The following courses, listed in other departments, may be of interest to students concentrating in Latin American Studies and may fulfill certain concentration requirements. Please check the course listings of the sponsoring department for times and locations.

Program in Literary Arts
Chair
Leigh Cole Swensen
For over 40 years, Literary Arts at Brown University has been a creative and intellectual center for the U.S. literary avant-garde. Along with a handful of other writing programs nationwide, Brown provides a home for innovative writers of fiction, poetry, electronic writing (hypertext) and mixed media. Established in the mid-1960s by poet, translator and critic Edwin Honig. Literary Arts at Brown continues its tradition of hiring and retaining a faculty comprised of nationally and internationally known authors. Each year, the program offers 60 – 70 classes, awards the M.F.A. degree to approximately 12 graduate student writers, and confers Honors on about 35 talented seniors who will have completed the undergraduate concentration in Literary Arts. For additional information, please visit the department’s website: http://brown.edu/academics/literary-arts/home/literary-arts

Literary Arts Concentration Requirements
Browns Program in Literary Arts provides a home for innovative writers of fiction, poetry, playwriting, screenwriting, literary translation, electronic writing and mixed media. The concentration allows student writers to develop their skills in one or more genres while deepening their understanding of the craft of writing. Many courses in this concentration require a writing sample; students should consult a concentration advisor or the concentration website for strategies on getting into the appropriate course(s).

For the Bachelor of Arts degree with concentration in Literary Arts, candidates are required to complete the following course work:
1. At least four creative writing workshops from among the following series: LITR 0100, LITR 0210, LITR 0310, LITR 0610, LITR 1010, LITR 1110, and LITR 1150. At least two genres must be covered within the four courses taken. An independent study in literary arts (LITR 1310) may count toward the workshop requirement. Other writing-intensive courses may also count, at the discretion of the advisor.
2. Six elective reading and research in literary arts courses, which must include:
   a. a course in literary theory or the history of literary criticism
   b. a course that primarily covers readings and research in literary arts created before 1800
• a course that primarily covers readings and research in literary arts created between 1800 and 1900
• a course that primarily covers readings and research in literary arts created after 1900

These courses, selected in consultation with a concentration advisor, may come from (but are not limited to) the following departments: Africana Studies, American Civilization, Classics, Comparative Literature, East Asian Studies, Egyptology, French Studies, German Studies, Hispanic Studies, Italian Studies, Judaic Studies, Linguistics, Literatures and Cultures in English, Middle East Studies, Modern Culture and Media, Music, Portuguese and Brazilian Studies, Slavic Studies, South Asian Studies, Theatre, Speech and Dance, Visual Arts. With approval from the concentration advisor, courses covering pre-20th century time periods may be distributed in a variant manner, so long as they cover two distinct literary time periods that precede the 20th century

3. Among the ten required courses, at least four must be at the 1000-level or above. No more than a total of four classes (workshops or reading/research courses) may be taken outside of the Literary Arts Department at Brown (whether at another institution or within another department’s curriculum). No more than two of the ten required courses for the concentration may also count toward fulfilling a second concentration.

4. During the senior year, all students must take at least one course within the Literary Arts course offerings (courses with LITR designation by the Registrar, or courses approved by the concentration advisor).

Honors in Creative Writing: Course requirements are the same as those for the regular concentration (four workshops, six elective literature-reading courses), with the following changes and additions: honors candidates must include two 1000-level workshops or independent studies among their courses; and complete a thesis. Students who are enrolled in or have completed at least one 1000-level workshop (or independent study) may submit honors applications to the Literary Arts Department from the first day of the fall semester to 20 September. Interested students should obtain information from the office of the Literary Arts Department.

Literary Arts Graduate Program

The Graduate Program in Literary Arts offers a Master of Fine Arts (M.F.A) degree with courses in fiction, poetry, and electronic writing.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/literary-arts

Courses

LITR 0110A. Fiction I.
A workshop for students who have little or no previous experience in writing fiction. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC. WRIT

LITR 0110B. Poetry I.
A workshop for students who have little or no previous experience in writing poetry. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC. WRIT

LITR 0110D. Electronic Writing I.
Project-oriented workshop for writers, visual/sound artists, filmmakers and programmers who wish to explore digital media techniques. No experience working in this field (or with computer programming) required. You’ll learn through doing, reading, talking and collaborating on works in various traditions. Enrollment limited to 17. S/NC. WRIT

LITR 0110E. Screenwriting I.
A workshop for students who have little or no previous experience in writing screenplays. This course is limited to undergraduates. S/NC. Enrollment limited to 17

LITR 0200Z. Faking It: Literature in the Age of the Hoax.
How is society simultaneously constructed and undermined by the persistence of fakes? With its cousins the hoax and the forgery, the fake plays the straw man in much of political, religious, and philosophical discourse, but the fake’s insistence on re-conceiving notions of originality and purity is more substantial. Pursuing a definition of the fake, we will consider its many forms in contemporary society alongside novels that parody and complicate the history of these particular deceptions. Authors include: Borges, Bolano, Ishiguro, Byatt, and McCarthy. Enrollment limited to 17

LITR 0210A. Fiction Writing II.
Topics often include stylistic matters related to tone and point of view, and structural matters like controlling switches in time. See general course description above for course entry procedures for all intermediate workshops. Enrollment limited to 17. Instructor permission required. S/NC. WRIT

LITR 0210B. Poetry Writing II.
Emphasis is placed on verse strategies, meter, rhythm, imagery and rhyme. Writing includes frequent exercises in various poetic traditions. See general course description above for course entry procedures for all intermediate workshops. Written permission required. S/NC. WRIT

LITR 0210D. Electronic Writing II.
Project-oriented workshop for writers, visual/sound artists, filmmakers, and programmers wishing to explore techniques for effective and innovative use of text in digital media. Topics include hypertext narrative, kinetic poetry, and recombinant and computer-generated texts. Collaboration encouraged. Work sample (writing, programming, website) due on first day of semester. Enrollment limited to 17. Instructor permission required. S/NC. WRIT

LITR 0210E. Screenwriting II.
Emphasis is placed on filmic devices, such as dialogue, voice-over, montage and time. Writing includes frequent exercises. See general course description above for course entry procedures for all intermediate workshops. This course is limited to undergraduates. Enrollment limited to 17. Instructor permission required. S/NC

LITR 0310A. Poetry in Service to Schools and the Community.
We shall be reading, writing and talking about poetry and letting this medium reflect back on other artistic practices – what it means to live, work & think (in) this way; another key component will be an engagement with community practice through bringing poetry to local schools, a direct personal and enlightening exchange of enlightening ideas and experience. Participants will work independently, in groups, in classes (including this one); you produce, and work with others to produce, art individually as well as communally; you are the gaffer, you are also, and simply, a member of the guild. This feels more like a teacher’s enterprise, though I call it, simply, community practice—what happens when people just put themselves in the position to give their gifts, while allowing, at the same time, others to give equally of themselves. Limited to 17. S/NC. Permission will be granted by the instructor after the first class session

LITR 0310B. City/Spaces: An Introduction to Psychogeography.
Psychogeography is an artistic discipline concerned with the subconscious ways in which we respond to and interact with the physical environment of the city. This course will focus on the intersection of psychogeography and text—both narrative and non-narrative—and the possibilities for walking to inform text and narrative

LITR 0310C. Ethnic Writing (ETHN 0300).
Interested students must register for ETHN 0300 S01

LITR 0310D. Imaging the City: Visions from Film and Literature.
This course will look at representations of urban space both in films and fiction, and through the lens of critical writings on the intersections between city space, architecture, film, and narrative. How do cities affect us aesthetically and emotionally? How have film and fiction examined, reinvented and revolutionized urban space in the twentieth century? What is the future of cities? These are some of the questions we’ll address through readings, screenings, and discussion. As a class we will do weekly creative writing exercises inspired by the films and designed to explore the ways in which poetic space might be evoked through text

LITR 0510A. Masters and Servants.
We will consider the relationship between servants and masters as portrayed in fiction and films. We shall examine the basic relation of servitude to sovereignty, extrapolating to the broader power dynamics of two-person relationships. Beginning with the Hegelian dialect of
the master and the servant, and building as well on a philosophical framework provided by Nietzsche, Kojève, and Bataille, we shall look at the complexities of the relationship between masters and servants, exploring the psychological, social and ethical dimensions of two-person relationships that value each person differently. We shall focus on issues of class and power and look at literature and film in which there are explorations of several complicated manifestations of servitude and mastery; overlaps into gender power dynamics and fetishism, power dynamic reversals both to comic and tragic effect, and questions of boundaries and violation of social propriety and human communication. Core texts will include work from Ishiguro, Wodehouse, D.H. Lawrence, Miabeau, Richardson, Brôné, and Stanley Crawford, and film texts will include Joseph Losey’s *The Servant* and Luis Bunuel’s *Diary of a Chambermaid*. 

**LITR 0510B. Into the Machine.**

Starting from Turing’s work on artificial intelligence, we shall examine the cultural and artistic ramifications of the rise of the machine, using Marx and Walter Benjamin to provide a framework. We shall look at how machines generate anxiety, with special emphasis on robots, puppets and automatons; and we shall also consider utopian and dystopian images of machines, and visions of near and distant futures. Finally we will look at authors who utilize machine models of operation to generate artistic work.

Authors and filmmakers include: Capek, E.T.A. Hoffman, Asimov, Lem, Breton, Redonnet, Fritz Lang, Chaplin, Tati. Enrollment limited to 20 first year students. FYS

**LITR 0610A. Unpublishable Writing.**

This workshop explores writing projects which do not fit into conventional avenues of print publication (i.e. books). Through a series of prompted artistic projects we will explore how writing can interweave in new relationships with time, materials, sequence, procedural approaches, performance, and collaboration. Independent research will support your creative projects throughout the semester. Enrollment limited to 12. S/NC. FYS

**LITR 0610B. Fiction Through Poetry.**

This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as a means to think about fiction and the borderlands of storytelling. Students will be given weekly writing exercises. Enrollment limited to 12 first year students. S/NC. FYS

**LITR 0610C. Books By Hand.**

We shall explore small press publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects through the semester as well as research particular concerns in the field. Enrollment limited to 12 first year students. S/NC. FYS

**LITR 0710. Writers on Writing Seminar.**

Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer’s way of reading. This course will include visits to the course by contemporary writers who will read to the class and talk about their work. Enrollment limited to 20 first year students. FYS WRIT

**LITR 0999. Graphic Novels and Comic Masterworks.**

Focused on the influence of graphic novels and comic art, this course looks at examples of graphic novels and comic art from seminal texts like Art Spiegelman’s *Maus*, through a range of mainstream and independent comics from Marjane Satrapi, Grant Morrison, Alan Moore, David B, tove Jansson, Lynda Barry, Daniel Clowes, Frank Miller, and many others, including graphic memoir, reportage, and Indie and DIY zines. The course explores image and language in collaboration, seeking a better understanding of this complicated and influential genre. Assignments will be critical and creative, both individual and collaborative, and will involve daily reading and writing assignments. Enrollment limited to 20. WRIT

**LITR 1010A. Advanced Fiction.**

The writing of short stories or longer works in progress in regular installments, along with appropriate exercises and reading assignments. See general course description above for course entry procedures for all advanced workshops. Written permission required. S/NC. WRIT

**LITR 1010B. Advanced Poetry.**

Course work includes a body of exercises, close reading of poetry, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Instructor permission required. S/NC. WRIT

**LITR 1010C. Advanced Playwriting.**

Course work includes a body of exercises, significant reading, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Enrollment limited to 12. Instructor permission required. S/NC

**LITR 1010D. Advanced Electronic Writing.**

An advanced experimental workshop in writing for digital media. Students should have some experience of working with computer-based authoring tools for generating content. Writing for digital media is taken to mean any writing for which electronic supports are vital: to its literary aesthetic, to its cultural viability as (potential) literary art. The primary aim of the course is to produce a work of writing in digital media, but associated readings and discussion will draw out the problems associated with this contemporary challenge to traditional practices. Prerequisite one of the following: LITR 0210D, 1010A, 1010B, 1010C, 1010E, 1010G (or related experience).

Enrollment limited to 12. Instructor permission required. S/NC. WRIT

**LITR 1010E. Advanced Screenwriting.**

The writing of short screenplays or a longer work in progress in regular installments, along with a body of exercises, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Instructor permission required. S/NC. WRIT

**LITR 1010F. Advanced Translation.**

Translation draws from many fields including linguistics, comparative literature, literary studies, anthropology, cultural studies, cognitive science, and creative writing. While we consider different theories and approaches to translation, students will embark on a semester-length translation project. **Expect to read and energetically discuss readings, to give a presentation on your ongoing translation, and to write a critical essay and numerous translation exercises on your way toward completing a manuscript in translation (the length of which will be determined by the work itself and an agreement between professor and student).** Enrollment limited to 12. Instructor permission required. S/NC. WRIT

**LITR 1010G. Cave Writing.**

An advanced experimental workshop for writing in immersive 3D - at the cutting edge of new media - introducing text, sound, spatial poetics, and narrative movement into Brown’s “Cave” at its Center for Computation and Visualization. An easy-to-learn and easy-to-use application allows non-programmers to create projects on their laptops and then to run them in the Cave without the necessity for specialist support. Broadly interdisciplinary, the course encourages collaboration between students with different skills in different media, who work together to discover a literary aesthetic in artificially rendered space. Instructor permission required. Enrollment limited to 12. S/NC. WRIT

**LITR 1110B. American Political Drama.**

What exactly is an American political play? We’ll examine issues of personal freedom, community rights, and the positioning of public power. Are we different from the myths of America? Political theater enables us to see our moral choices and aspirations. From Aristophanes to Suzan-Lori Parks, we will look at various political texts while we attempt to create new approaches to the writing of American Political Theater

**LITR 1110E. Innovative Narrative.**

Stereotexts: a project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or texts and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., are all welcome. Writing samples and project descriptions required

**LITR 1110F. Narrative Strategies.**

A course essentially geared to the creative and critical writer interested in experimenting with some of the narrative structures suggested by the great films. To include films of Akerman, Antonioni, Eisenstein, Hou Hsiao, Hsieh, Goddard, marker, Tarkovsky and others and texts by Duras, Sebald and Vittorini. Instructor permission required
LITR 1110G. Narrative Voice: Fact and Fiction.
No description available.

LITR 1110J. The Carte Story.
Experiments in writing; extensive reading in traditional and experimental collections of fiction in shorter forms. Writing samples of no more than ten pages should be left at 68 1/2 Brown Street on the first day of the semester. Instructor permission required. S/NC

LITR 1110L. Aspects of Contemporary Prose Practice.
Using Chimamanda Ngozi Adichie’s *Purple Hibiscus*, Tayeb Saleh’s *The Wedding of Zein and Other Stories*, Luis Bernard Houwana’s *We Killed Mangy Dog*, and *Our Sister Kiliyo*, this course will look at prose narrative in contemporary African literature, for a background to general narrative practice. Among areas of special interest, the course will examine the contents and structure of the short story, not as an abbreviated novel, but as an autonomous genre. We shall also look at literature in translation, and discuss what the reader loses in the process if anything, and how much that matters, if at all. Students will be expected to work on short stories and novel chapters. Instructor permission required. Enrollment limited to 12. S/NC. WRIT

LITR 1110M. Stereotexts: Experimental Multidimensional Fiction Workshop.
A project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or text and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., are welcome submissions. Instructor permission required. Enrollment limited to 12. S/NC. WRIT

LITR 1110N. Workshop for Potential Literature.
A novel without the letter "E", 100,000-billion sonnets by permutation and texts that take the shape of a Mobius-Strip— all this time and more, as workshop participants try their hands in writing in response to problems created by and inspired by a group of writers engaged in strange constraints and procedures. Instructor permission required. S/NC

LITR 1110O. Hybrid Texts, Hybrid Thinking.
In neither being fiction, poetry, memoir, theory, nor art writing but a crossing of these genres, the hybrid text proliferates an open and complexly layered environment for engaging questions of perception, knowledge and articulation. In this course, we will study exemplary works of literature and venture briefly into visual art. Both critical and creative responses will be required.

LITR 1110P. Alternative Scriptwriting: Writing Beyond the Rules.
This course will consider various screenwriting genres and how to write against genre or extend the traditional screenwriting forms. Students applying must have already completed either a 90+ page screenplay or have taken Advanced Playwriting (LITR 1010C) or Advanced Screenwriting (LITR 1010E) at Brown. S/NC

LITR 1110R. Performance Dimensions of Text.
This workshop (modeled on a traditional "atelier") explores the relationships between the performative and the printed/textual, asking in particular how the page can serve as a dynamic blueprint for sound, video, movement, and theatrical practice. Weekly examples of works that have pushed the boundaries of literary genres by incorporating performative elements will be combined with student experimentation in long and short pieces. As an interdisciplinary workshop, this course invites students from all backgrounds. S/NC. Instructor's permission required. Enrollment limited to 12

LITR 1110S. Fiction into Film.
A study of various directors’ attempts to transfer masterpieces of fiction into film. Concerning both genres we will ask Gertrude Stein’s question: What are masterpieces, and why are there so few of them? Includes fiction by Austen, Bierce, Carter, Cowley, Doyle, Faulkner, Forster, Fowles, Kesey, Joyce, McCullers, Morrison, Nabokov, O’Connor, Thompson, Walker, Spielberg, Woolf, Yamamoto as directed by Burton, Forman, Felini, Gilliam, Huston, Jordan, Kurasaki, Lee, Potter, and others. Class and weekly screenings. Enrollment limited to 12. S/NC. WRIT

LITR 1150A. Ecopoetics in Practice.
What we have perpetrated on our environment has certainly affected a poet’s means and material. But can poetry be ecological or display values that acknowledge the economy of interrelationship between human and non-human realms? Aside from issues of theme and reference, how might syntax, line break, or the shape of the poem on the page express an ecological ethics? How might poetry register the complex interdependency that draws us into a dialogue with the world? Readings, discussion essays and creative writing. See general course description above for course entry procedures for all special topics workshops/seminars. Written permission required. S/NC

LITR 1150B. The Foreign Home: Interdisciplinary Arts.
Project-centered workshop for exploration beyond one’s “home” genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. See general course description above for entry procedures for all special topics workshops/seminars. Written permission required. S/NC

LITR 1150C. Unpublishable Writing.
Before becoming the dominant form of book-marking, "the codex" meant a tree stump where criminals were tied. After examining conventions of western print culture, we will explore literary practices which are performative, sculptural, multimedia, or out-scale. Through the course is primarily for creative projects, critical research will also be expected.

LITR 1150E. Strange Attractors: Adaptations/Translations.
A workshop for students from all genres and disciplines to explore adaptation as creative process. Adaptation can be between any genres and from any source. See general course description above for entry procedures for all special topics workshops/seminars. Written permission required. S/NC

LITR 1150F. Home and Abroad.
This course combines seminar and workshop sessions for students with special interest in the writing of novels and short fiction. Attention will be given to the ways certain English and American writers - Herman Melville, Joseph Conrad, E. M. Forster, Graham Greene - have interpreted the lives of people in other and foreign cultures. These are classic examples of the meeting of insiders and outsiders in the house of fiction. Instructor permission required. Enrollment limited to 12. WRIT

LITR 1150G. Books by Hand.
This course will explore publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects throughout the semester as well as research particular concerns in the field. See general course description above for course entry procedures for all special topics workshops/seminars. Written permission required. S/NC

LITR 1150H. Latin-American Poetry Live!
Students will read (in translation and, if possible, in Spanish), analyze, discuss and write essays about contemporary Latin American poets such as Cecilia Vicuna (Chile), Homero Aridjis (Mexico), Maria Negroni (Argentina), Jaime Saenz (Bolivia), et. al. Particular attention will be paid to how styles, themes, and geographies might be related. Although no Spanish is necessary, students will be encouraged (sometimes in pairs) to try translations and to write about the process. This section does not require permission from instructor.

LITR 1150I. The Lyric Essay.
Advanced level workshop for graduates and undergraduates to explore the possibilities of creative nonfiction in a radical or hybrid mode. See general course description above for course entry procedures for all special topics workshops/seminars. Written permission required. S/NC

LITR 1150J. The Cinematic Essay.
A creative writing seminar in which we take the Essay Film as the primary inspiration for weekly writing exercises. Works by Marker, Godard, Ivens, Resnais, Varda, Akerman, Herzog, Morris, Su Friedrich, Sadie Benning and Trihn Mon-Ha to be included. Also writing by Canetti, Gass, Handke, Cha, Hong Kingston and more. See general course description above for course entry procedures for all special topics workshops/seminars. Written permission required. S/NC. Students MUST register for the lecture section and the screening

LITR 1150M. Short Fiction Experiments.
A course in fiction which pushes against the very definitions of stories and fictions. Using short forms, we will examine our habits and assumptions of story telling and engage in willful adventures of mind, spirit, and language.
Prerequisites include a passion for trying everything and anything once. No prior writing experience needed. Written permission required

**LITR 1150N. The Novella: An Adventure in Writing.**
In this workshop/seminar, we will explore the ever elusive world of the novella - how to think of this work, what the rules are, where the boundaries lay. Alongside their reading of writers such as Marguerite Dumas and Michael Ondaatje, students will embark on their own novella-writing journeys. Written permission required. S/NC

**LITR 1150P. John Cage and Meditative Poetics.**
Primarily an interdisciplinary literature course, we will experience the writing and thinking of John Cage in the context of a wider exploration of creative processes with a basis in American and European interpretations of Buddhist practice and thought. We will explore the work of contemporary artists such as Bill Viola, Philip Glass, Meredith Monk, Allen Ginsberg and Anne Waldman, as well as Samuel Beckett and others. Students in the course will be expected to write in both creative and critical modes. Instruction in basic meditation practice is recommended but optional throughout the semester. Written permission required

**LITR 1150Q. Reading, Writing and Thinking for the Stage.**
Composed of contemporary dramatic literature for playwrights. Contemporary texts are studied. Use of each author’s dramatic techniques, the influence of the times on his drama, his themes, the demands of market driven theater and popular art considered. Simultaneously students will write an original 60-page manuscript. Students applying must have already completed plays of 60 pages or have advanced playwriting experience. Written permission required. S/NC

**LITR 1150R. Exemplary Ancient Fictions.**
We shall discuss and examine a selection of pre-Gutenberg narratives from Gilgamesh and Genesis through Ovid and fairytale and medieval romance, with a focus on the ancient art of narrative. We shall also try our hands at exercises in the alternative fictional strategies these works suggest. Course entry based on the submission of a writing sample (and in-class writing in response to an assignment) at the first class session

**LITR 1150S. What Moves at the Margins.**
A multi-genre seminar/workshop based on fiction, non-fiction and dramatic literature that has been banned or otherwise marginalized because it is critical, interrogative and alternative. Weekly writing exercises based on readings and discussions in class. A term project is required. For students who love literature. For admission, students may submit fiction, non-fiction or drama. Enrollment limited to 12. S/NC. WRIT

**LITR 1150T. Foreign Home.**
Project-centered workshop for exploration beyond one’s "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner’s mind". Collaborative and individual work expected. Instructor’s permission required

**LITR 1150U. Prose City: The Making of Spatial Texts.**
In this workshop/seminar, we will explore, through selected reading and writing exercises, some basic questions of "writing city": how is place captured, encompassed; how can the city emerge in language as a character, an event, as reflective space; how do we enter the city; how do we recognize its borders? Students will be asked to create a portfolio of texts for an imagined city, as well as to think through concepts such as "structure," "location," "encounter," and "identity" as they occur in the paragraph. Instructor’s permission required

**LITR 1150V. The Novel in Brief.**
This workshop/seminar takes the novel form on a wild ride as it investigates concepts such as compression, fragmentation, miniaturization, and sequencing in the construction of narratives. Students will be required to write their own brief novel over the course of the semester. Writing sample due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12. WRIT

**LITR 1150W. Clown Aesthetics.**
Clown as literary structure and trope as well as character will be our focus. We will ask if this "clown aesthetic" exists, could exist, should or might continue to exist -- in fiction, performance, and film in particular. Clowning of all kinds considered from history, theory, literary and performing arts. Graduate and undergraduate students from all disciplines invited. This workshop course includes individual research as well as collaborative projects. Come to first class for permission. Enrollment limited to 12. S/NC. WRIT

**LITR 1150X. Reading, Writing and Thinking.**
We will explore various ways to engage with a work of art in order to fuel one’s imagination and projects. Close textual reading of several books with writing assignments based on the readings. Writers will include Woolf, Stein, Beckett, Coetzee, Kertesz and others. Writing samples due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12. S/NC. WRIT

**LITR 1150Y. Fiction Through Poetry.**
This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as means to think about fiction, and the borderlands of storytelling. Instructor permission required (bring a writing sample to the first class meeting). Enrollment limited to 12. S/NC. WRIT

**LITR 1151A. Architectures of Poetic Space.**
We will study intersections between three-dimensionally built spaces and the constructed space of the page, asking: How does the poem take on aspects of architecture? How do we make structures with sentences? Students will be asked to write their own architectures and to consider abstract drawing as a way to both collaborate with and think through peer-generated work. Line drawings of all skill levels welcome. Enrollment limited to 12. S/NC

**LITR 1200. Writers on Writing.**
Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer’s way of reading. This course will include visits to the course by contemporary writers, who will read to the class and talk about their work. Enrollment is limited to 30 students

**LITR 1220A. History and Practice of English Versification.**
An opportunity to study through reading and imitating poems that represent a variety of poetic eras and traditions. S/NC

**LITR 1220B. Samuel Beckett.**
This course will mark the centenary of the author by reading and discussing a range of works from Samuel Beckett’s substantial output of fiction, poetry, drama and translation

**LITR 1220C. The Cantos in their Environment.**
A reading of Pound’s Cantos, with attention to their origin and developments, their background and their influence

**LITR 1220D. The Bible as Literary Source.**
A survey of the English Bible and its presence in English and American literature. Students will learn to notice and account for Biblical echoes in a wide variety of writings from several cultures

**LITR 1220E. Dada and Surrealism.**
Two of the most famous modernist movements, studied through their writings, their visual arts, their performances, and their manifestoes; their origins and influence; their place in history. S/NC

**LITR 1220F. Restoration Drama.**
A survey of English drama and theatrical practice from the reopening of the theaters at the Restoration to the early eighteenth century. Works of the major playwrights, including Dryden, Congreve, Wycherly, Gay. S/NC

**LITR 1220G. The Waste Land and After.**
We shall examine Eliot’s poem, and then deal with early poems by W.H. Auden and the work of Charles Williams and David Jones. S/NC

**LITR 1230C. Poetry Newly in Translation in English.**
This is a reading, writing, translation, and discussion class. Commit to a vigorous combination of all four. Some translation theory will be reviewed, but the emphasis of the course is upon models of translations. Texts will include works by Iva Blatny, Inger Christensen, Luljeta Lleshanaku, David Huerat, Takashi Hiraide; new translations of Rimbaud and Baudelaire and Auden and the work of Charles Williams and David Jones. S/NC

**LITR 1230D. Poetry, Mind, World.**
How does the poetic mind negotiate between an account of itself and an account of the world? How have poets used landscape as a model of mind, as an erotic, as elegy? Merleau-Ponty, Hardy, Houle, Alexander,
Dewdney, Hass, D’Aquino, Audubon and others. Presentation, several short essays, a poem, and one final essay

LITR 1230E. Form and Theory of Fiction.
Form and Theory of Fiction” offers an exploration of narrative theories directed particularly at creative writers, in conjunction with a hands-on examination of contemporary fictional narrative practices. Theoretical readings include historical essays on fiction and work by Gaston Bachelard, Mieke Bal, Gilles Deleuze, and others. Enrollment limited to 20

LITR 1230F. Writing, Reading City.
In this course, we will explore correlations, points of convergence, and possible mimesis between city and text. Students will be expected to keep a weekly journal, to have a city in question, and to write both imaginatively and critically in response to readings and class discussion

With the theme of "Slavery and Justice" in recent Brown University review, [4] "Master Poets of Apartheid Streets: Perpetual Resistance against de jure and de facto Segregation” is the formal and precise embouchure as Critical Realism which legislates as antidote to pernicious social, economic and educational racism: the aesthetic stance of this seminar is “An Integer is a Whole Number.” Through close attention to the conventions of poetry as praxis by these four master poets, in social context, the modality of this study is poetic discourse (what Frederick Douglass called “a sacred effort” in Douglass’ description of President A. Lincoln’s "Second Inaugural.” Peripheral insights will be provided by Brown University researchers of the past: Charles H. Nichols, Winthrop Jordan, Richard Slotkin, in their three dissertations, and James R. Patterson’s most recent book on "Brown v. Board of Education.” Written permission required. Enrollment limited to 20. S/NC

LITR 1230H. Being in Time.
In this discussion-based course, we will examine the many roles time plays in the building of narratives as well as its impact on contemporary concepts of self. We will use both literary and philosophical texts to explore the spaces between time and perception, time and memory, time and experience, and time and grammar. Written permission required

LITR 1230I. The Documentary Vision in New Literature of the Americas.
A study of genre-defiant works, lyric treatments, atypical narratives, film poems, etc., including works by Anne Carson, Elena Poniatowska, W.S. Merwin, Maggie Nelson, Raoul Zurita and others. Enrollment limited to 20. 999999

LITR 1230J. Writing: Material Differences.
An exploration of practices that make a material difference to writing, that may change the way we think about writing in specific cultural circumstances and locations. We will look for such differences through transcultural and translilingual experiments with writing, beginning “West” and moving “East.” We will engage with a selection of widely divergent writers and genres, with emphases on poetics - particularly a translated rendition of Chinese poetics (such as was taken up by Pound and became influential in English literature) - and on theories that we can use for our practice, from: Fanollosa, Foucault, Derrida, and others. Enrollment limited to 20

LITR 1230K. Latin American Death Trip.
Death is the subject of many of the greatest (most moving, innovative, funny, haunting, political, oneiric) Latin American poems of the 20th century, from Gorostiza’s Death without End to Villaurrutia’s Nostalgia for Death to Saenz’ The Night. What is up with Latin Americans and death? What particularities of culture, gender, age, faith or experience might account for the visionary clarity of death as constant companion or permeable border, etc.? What makes the poems great? We shall read classic Latin American books in bilingual editions (so Spanish literacy is not a requirement, but we’ll talk about translation issues). Students will be expected to participate in literary discussions, to write essays and a death poem. Enrollment limited to 20

LITR 1230L. Eros: Hot and Sour.
Literature, early and late, distant and near, at the intersection of love and loathing. A seminar on selected texts deriving their blood from poetry, their flesh from fiction, their anatomy from form and theory. Including works by Rikki Ducornet, Anne Carson, Roland Barthes, Helen Cixous, Gertrude Stein, Catullus, Henry Miller, et al. Enrollment limited to 20

LITR 1230M. Poetry and Ethics (COLT 1812J).
Interested students must register for COLT 1812J S01

LITR 1230N. Robert Coover -- Foremost Storyteller.
We shall examine the works of contemporary American fiction writer, Robert Coover. During his long, celebrated career, Coover has imaginatively responded to writers and forms that have come before him. We’ll investigate how Coover appropriates earlier traditions and think about how he simultaneously preserves and subverts literary traditions. We shall consider such concepts as myth, religion, and history, and determine how Coover applies these. We’ll focus on authorial strategies and themes explored. Furthermore, we’ll define literary terminology as a tool for textual and critical analysis. Finally, through this experience you can develop or refine the capacity for self-expression and communication. Enrollment limited to 20. WRIT

LITR 1230O. Suppression and Invention in Modern Persian Literature.
This course begins with symbolic elements from classical mystic Persian literature and journeys into pre- and post-revolution Persian short fiction and poetry. We shall analyze creative responses to restricted expression, study efforts to modernize in a variety of genres, and finish with the rise of the woman writer in Iran. Enrollment limited to 20

LITR 1230P. The New Wave in Iranian Cinema.
We shall explore this movement that produced remarkable award-winning films in Iran. Applying author (auteur) theory, we will study new Iranian movies, analyzing “signs and meaning” in their cinematic language, also investigating effects of Iranian culture on this new artistic wave. Enrollment limited to 20. S/NC

LITR 1230S. Creeley: Drive He Sd: Robert Creeley and Company.
This seminar will examine on one of the most potent, original voices of contemporary poetry in English, examining a selection of the poetry, fiction, essays, letters and collaborations of a principal shaper of the radical, vibrant, open field of new American writing. Enrollment limited to 20 juniors and seniors. S/NC

LITR 1230T. The Origins of the Detective Story.
This class will explore the development of the Detective genre, focusing on its roots in the 19th century and considering more broadly how genres develop and change. Readings include E.T.A. Hoffmann’s “Mademoiselle de Scudery”, Edgar Allan Poe's Auguste Dupin stories, Wilkie Collins, Arthur Conan Doyle, Martin Hewett, and selections from Detection by Gaslight and The Penguin Book of Gaslight Crime. We will also look at theoretical texts, including Franco Moretti's "Clues". This course fulfills Literary Arts' pre-20th century literature requirement. Enrollment limited to 20

LITR 1300. Independent Study in Reading, Research, and Writing About Literature.
Provides advanced students with an opportunity to pursue tutorial instruction oriented toward a literary research topic

LITR 1310. Independent Study in Creative Writing.
Offers tutorial instruction oriented toward some significant work in progress by the student. Typically taken by honors or capstone candidates in the antepenultimate or penultimate semester. See instructor to seek permission during the semester before undertaking the course of study. One advanced-level workshop is prerequisite. S/NC

LITR 1410A. Fiction Honors.
A workshop setting for the completion of theses by advanced writers of fiction. See general course description above for course entry procedures for all honors workshops. Instructor permission required. Enrollment limited to 12 senior Literary Arts concentrators. S/NC

LITR 1410C. Playwriting Honors.
A workshop setting for the completion of theses or capstone projects by advanced writers of dramatic literature. See general course description above for course entry procedures for all honors/capstone workshops. Written permission required. S/NC

LITR 1510. Honors Independent Study in Creative Writing.
Provides tutorial instruction for students completing their theses or capstone projects. Typically taken by honors or capstone candidates in their final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC
LITR 2110A. Graduate Fiction.
Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC

LITR 2110B. Graduate Poetry.
Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC

LITR 2110C. Graduate Playwriting.
A course focused on how to design and lead a creative writing workshop. Offers tutorial instruction oriented toward a literary research topic. Written permission required. S/NC

LITR 2410. Graduate Thesis Independent Study in Literary Writing.
Provides tutorial instruction for graduate students completing their graduate creative theses. Typically taken in the final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC

LITR 2600. Seminar in Teaching Creative Writing.
A course focused on how to design and lead a creative writing workshop. Reading, writing and laboratory workshop sessions. Designed for first-year Literary Arts graduate students. S/NC

Mathematics

Chair
Jeffrey Hoffstein

The Mathematics Department at Brown balances a lively interest in students and teaching with a distinguished research reputation. Our several strong research groups, Analysis, Algebraic Geometry, Geometry and Topology, and Number Theory, all have active weekly seminars that draw speakers ranging from the local to the international. We support 30 to 40 graduate students in a Ph.D. program whose graduates populate top mathematics departments and prominent positions in industry. Our joint graduate courses and seminars with the adjacent Division of Applied Mathematics add to the breadth of offerings available to our graduate students. The undergraduate program in mathematics at Brown is designed to prepare students for careers in the mathematical sciences and other careers requiring strong analytical skills, while engaging more ambitious students in creative projects that can culminate in a senior thesis.

For additional information, please visit the department’s website: http://www.math.brown.edu/

Mathematics Concentration Requirements

Mathematics is a grouping of sciences, including geometry, algebra, and calculus, that study quantity, structure, space, and change. Mathematics concentrators at Brown can explore these concepts through the departments broad course offerings and flexible concentration requirements. The concentration leads to either the Bachelor of Arts or Bachelor of Science degree (the latter is strongly recommended for students interested in pursuing graduate study in mathematics or related fields). Concentrators begin their learning with multivariable calculus, linear algebra, and abstract algebra. Beyond these prerequisites, students take a variety of advanced topics on the 1000 and 2000 level based on their interests. Students also have the option of completing a thesis project.

Concentrators in mathematics should complete the prerequisites by the end of their sophomore year. It is strongly recommended that students take MATH 1010 before taking MATH 1130.

Standard program for the A.B. degree

Prerequisites:

Multivariable calculus and linear algebra (choose one of the following sequences): 2

| MATH 0180 | Intermediate Calculus & MATH 0520 and Linear Algebra |
| MATH 0180 | Intermediate Calculus |
| MATH 0200 | Intermediate Calculus (Physics/Engineering) & MATH 0520 and Linear Algebra |
| MATH 0350 | Honors Calculus & MATH 0540 and Honors Linear Algebra |

Or the equivalent

Program:

| MATH 1530 | Abstract Algebra |
| Five other 1000- or 2000-level Mathematics courses 1 | 5 |

Total Credits 8

1 One of which may be replaced, with the approval of the concentration advisor, by a mathematically-oriented course in science, economics, or applied mathematics.
### Standard program for the Sc.B. degree

**Prerequisites:**

Multivariate calculus and linear algebra (choose one of the following sequences):

- MATH 0180 & MATH 0520
- MATH 0180 & MATH 0540
- MATH 0200 & MATH 0520
- MATH 0350 & MATH 0540

Or the equivalent

**Program:**

<td>Four other 1000- or 2000-level Mathematics courses.</td>
<td>4</td>
</tr>
<tr>
<td>Four additional courses in mathematics, science, economics, or applied mathematics approved by the concentration advisor.</td>
<td>4</td>
</tr>
</tbody>
</table>

**Total Credits:** 14

### Honors

Honors degrees may be recommended for students who have exhibited high achievement in mathematics. Candidates must complete at least eight mathematics courses at the 1000 or 2000 level with sufficiently good grades and must write an honors thesis under the guidance of a faculty member. The honors thesis is usually written while the candidate is enrolled in MATH 1970. The candidate should consult with the concentration advisor for the precise grade requirements.

Those interested in graduate study in mathematics are encouraged to take:

- MATH 1130 Functions of Several Variables
- MATH 1140 Functions Of Several Variables
- MATH 1260 Complex Analysis
- MATH 1410 Combinatorial Topology
- MATH 1540 Topics in Abstract Algebra

### Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (http://www.cs.brown.edu/ugrad/concentrations/professionaltrack.html) of the Sc.B program in Mathematics-Computer Science.

### Requirements for the Standard Track of the Sc.B. degree.

**Prerequisites**

- Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350
- MATH 0520 Linear Algebra

### Core Courses

<table>

Select one of the following series:

**Series A**

- CSCI 0150 & CSCI 0160: Introduction to Object-Oriented Programming and Computer Science
- CSCI 0320: Introduction to Software Engineering

**Series B**

- CSCI 0170 & CSCI 0180: Computer Science: An Integrated Introduction
- CSCI 0220: Introduction to Computer Systems

**Series C**

- CSCI 0190: Accelerated Introduction to Computer Science

or the equivalent

### Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?

1. These courses must be at the 1000-level or higher. The three courses must include a pair of courses with a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

2. These must be approved by a concentration advisor.

3. A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.
Mathematics Graduate Program

The department of Mathematics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. Ph.D. students may also earn a transitional A.M. or Sc.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/mathematics

Courses

MATH 0010A. First Year Seminar: Chopping up Space.
In this class we will investigate the mathematics behind the idea of chopping an infinite space into smaller pieces. A good example to keep in mind would be an infinite apartment complex filling up the whole universe. The general subject has two main facets: chopping space into regular repeating patterns with a lot of symmetry and chopping space into infinite patterns with no apparent symmetry but some kind of hidden underlying order. The first topic, generally called the theory of periodic tilings, leads to such subjects as group theory and non-Euclidean geometry. The second topic, generally called aperiodic tilings, leads to such ideas as self-similarity, fractals, and computability.

In this class we will investigate both these topics. The emphasis will be on concrete examples that can be understood without the need for extensive theoretical preliminaries. I will start from scratch, and not assume any particular mathematical background, but I will aim the class at people who have a strong interest in mathematics and a flair for it. I will write my own notes for the course, but from time to time I will have the class read articles written by other authors.

MATH 0010B. Exploring the Fourth Dimension.
To Be Determined. First Year Seminar

MATH 0010C. From 'Flatland' to the Fourth Dimension.
No description available. Enrollment limited to 15 first year students. Instructor permission required. After initial placement of students. FYS

MATH 0050. Analytic Geometry and Calculus.
MATH 0050 and 0060 provide a slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. Prerequisite: for MATH 0050 is written permission; for MATH 0060 is MATH 0050 or written permission. S/NC only

MATH 0060. Analytic Geometry and Calculus.
A slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. Prerequisite: for MATH 0050 is written permission; for MATH 0060 is MATH 0050 or written permission. S/NC only

MATH 0070. Calculus with Applications to Social Science.
A one-semester survey of calculus for students who wish to learn the basics of calculus for application to social sciences or for cultural appreciation. Presents two main facets: differential differentiation, maxima and minima, the chain rule, rational functions, trigonometric functions, and exponential functions. Introduction to integration with applications to area and volumes of revolution. MATH 0090 and 0100 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics. Lectures plus one 80-minute section arranged. S/NC only

MATH 0100. Introductory Calculus, Part I.
A continuation of the material of MATH 0090 including further development of integration, inverse trigonometric and logarithmic functions, techniques of integrations, and applications. Other topics include infinite series, power series, Taylor's formula, introduction to differential equations, and numerical methods. MATH 0090 and 0100 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics. Lectures plus one 80-minute section arranged

MATH 0170. Advanced Placement Calculus.
Beginns with a review of fundamentals of calculus and includes infinite series, power series, paths, and differential equations of first and second order. Placement in this course is determined by the department on the basis of high school AP examination scores or the results of tests given by the department during orientation week. May not be taken in addition to MATH 0100

MATH 0180. Intermediate Calculus.
Three-dimensional analytic geometry. Differential and integral calculus for functions of two or three variables: partial derivatives, multiple integrals, line integrals, Green's Theorem, Stokes' Theorem. Prerequisite: MATH 0100, 0170, or 0190

MATH 0190. Advanced Placement Calculus (Physics/Engineering).
Covers roughly the same material and has the same prerequisites as MATH 0170, but is intended for students with a special interest in physics or engineering. The main topics are: geometry of three-dimensional space; partial derivatives; Lagrange multipliers; double, surface, and triple integrals; vector analysis; Stokes' theorem and the divergence theorem, with applications to electrostatics and fluid flow. The extra hour is a weekly problem session

MATH 0200. Intermediate Calculus (Physics/Engineering).
Covers roughly the same material as MATH 0180, but is intended for students with a special interest in physics or engineering. The main topics are: geometry of three-dimensional space; partial derivatives; Lagrange multipliers; double, surface, and triple integrals; vector analysis; Stokes' theorem and the divergence theorem, with applications to electrostatics and fluid flow. The extra hour is a weekly problem session. Recommended prerequisite: MATH 0100, 0170, or 0190

MATH 0350. Honors Calculus.
A three-semester calculus course for students of greater aptitude and motivation. Topics include vector analysis, multiple integration, partial differentiation, line integrals, Green's theorem, Stokes' theorem, the divergence theorem, and additional material selected by the instructor. Prerequisite: Advanced placement or written permission

MATH 0420. Introduction to Number Theory.
An overview of one of the most beautiful areas of mathematics. Ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics include: prime numbers, congruences, quadratic reciprocity, sums of squares, Diophantine equations, and, as time permits, such topics as cryptography and continued fractions. No prerequisites

MATH 0520. Linear Algebra.
Vector spaces, linear transformations, matrices, systems of linear equations, bases, projections, rotations, determinants, and inner products. Applications may include differential equations, difference equations, least squares approximations, and models in economics and in biological and physical sciences. MATH 0520 or 0540 is a prerequisite for all 1000-level courses in Mathematics except MATH 1260 or 1610. Recommended prerequisite: MATH 0100, 0200, or 0350. May not be taken in addition to MATH 0540

MATH 0540. Honors Linear Algebra.
Linear algebra for students of greater aptitude and motivation, especially mathematics and science concentrators with a good mathematical preparation. Matrices, linear equations, determinants, and eigenvalues; vector spaces and linear transformations; inner products; Hermitian, orthogonal, and unitary matrices; and Jordan normal forms. Provides a
more extensive treatment of the topics in MATH 0520. Recommended prerequisites: MATH 0180, 0200, or 0350

MATH 0580. Mathematical Forms in Architecture
This project will explore and advance innovative applications of mathematics to architecture using computational methods. Historically, architecture has been guided primarily by an intuitive creative process. In contrast to the end-results of intuitive design, many "optimal" forms---i.e. geometric shapes and configurations that satisfy extremal conditions---are unique because they are the result of systematic physical experiments or explicit mathematical study in addition to imaginative input. Classic questions for which human intuition alone has been incapable of finding a solution include: What is the exact shape of the optimal arch?, or What is the shape of a child's slide that minimizes the time of travel? The use of computational methods to generate solutions to these problems will be made considerably simpler via optimization libraries in Mathematica. The application to architecture in this project will provide students a unique concrete backdrop to visualize solutions to these problems

MATH 1010. Analysis: Functions of One Variable
Completeness properties of the real number system, topology of the real line. Proof of basic theorems in calculus, infinite series. Topics selected from ordinary differential equations. Fourier series, Gamma functions, and the topology of Euclidean plane and 3-space. Prerequisite: MATH 0180, 0200, or 0350. MATH 0520 or 0540 may be taken concurrently. Most students are advised to take MATH 1010 before MATH 1130

MATH 1040. Fundamental Problems of Geometry
Topics are chosen from euclidean, projective, and affine geometry. Highly recommended for students who are considering teaching high school mathematics. Prerequisites: MATH 0520, 0540, or instructor permission

The study of curves and surfaces in 2- and 3-dimensional Euclidean space using the techniques of differential and integral calculus and linear algebra. Topics include curvature and torsion of curves, Frenet-Serret frames, global properties of closed curves, intrinsic and extrinsic properties of surfaces, Gaussian curvature and mean curvature, geodesics, minimal surfaces, and the Gauss-Bonnet theorem

MATH 1100. Ordinary Differential Equations.
Ordinary differential equations, including existence and uniqueness theorems and the theory of linear systems. Topics may also include stability theory, the study of singularities, and boundary value problems

MATH 1120. Partial Differential Equations.
The wave equation, the heat equation, Laplace's equation, and other classical equations of mathematical physics and their generalizations. Solutions in series of eigenfunctions, maximum principles, the method of characteristics, Green's functions, and discussion of well-posedness. Prerequisites: MATH 0520 or MATH 0540, or instructor permission

MATH 1130. Functions of Several Variables.
A course on calculus on manifolds. Included are differential forms, integration, and Stokes' formula on manifolds, with applications to geometrical and physical problems, the topology of Euclidean spaces, compactness, connectivity, convexity, differentiability, and Lebesgue integration. It is recommended that a student take a 1000-level course in analysis (MATH 1010 or MATH 1260) before attempting MATH 1130

MATH 1140. Functions Of Several Variables.
See Functions Of Several Variables (MATH 1130) for course description. Prerequisite: MATH 1130 or instructor permission

MATH 1230. Graph Theory.
This course covers important material about graph theory, such as spanning trees, network flow problems, matching problems, coloring problems, planarity, Cayley graphs, spectral theory on graphs, and Ramsey Theory. The emphasis will be on a combination of theory and algorithms. Depending on the instructor, connections to such fields as combinatorics, geometry, or computer science might be emphasized. Prerequisite: MATH 0180, 0200 or 0350 and MATH 0520 or 0540. Enrollment limited to 40

MATH 1260. Complex Analysis.
Examines one of the cornerstones of mathematics. Complex differentiability, Cauchy-Riemann differential equations, contour integration, residue calculus, harmonic functions, geometric properties of complex mappings. Prerequisite: MATH 0180, 0200, or 0350. This course does not require MATH 0520 or 0540

MATH 1270. Topics in Functional Analysis.
Infinite-dimensional vector spaces with applications to some or all of the following topics: Fourier series and integrals, distributions, differential equations, integral equations, calculus of variations. Prerequisite: At least one 1000-level course in Mathematics or Applied Mathematics, or permission of the instructor

MATH 1410. Combinatorial Topology.
Topology of Euclidean spaces, winding number and applications, knot theory, fundamental group and covering spaces. Euler characteristic, simplicial complexes, classification of two-dimensional manifolds, vector fields, the Poincaré-Hopf theorem, and introduction to three-dimensional topology. Prerequisites: MATH 0520 or MATH 0540, or instructor permission

MATH 1530. Abstract Algebra.
An introduction to the principles and concepts of modern abstract algebra. Topics include groups, rings, and fields; applications to number theory, the theory of equations, and geometry. MATH 1530 is required of all students concentrating in mathematics

MATH 1540. Topics in Abstract Algebra.
Galois theory together with selected topics in algebra. Examples of subjects which have been presented in the past include algebraic curves, group representations, and the advanced theory of equations. Prerequisite: MATH 1530

MATH 1560. Number Theory.
A basic introduction to the theory of numbers. Unique factorization, prime numbers, modular arithmetic, quadratic reciprocity, quadratic number fields, finite fields, Diophantine equations, and additional topics. Prerequisite: MATH 1530 or written permission

MATH 1580. Cryptography.
The main focus is on public key cryptography. Topics include symmetric ciphers, public key ciphers, complexity, digital signatures, applications and protocols. MATH 1530 is not required for this course. What is needed from abstract algebra and elementary number theory will be covered. Prerequisite: MATH 0520 or MATH 0540

MATH 1610. Probability.
Basic probability theory. Sample spaces; random variables; normal, Poisson, and related distributions; expectation; correlation; and limit theorems. Applications in various fields (biology, physics, gambling, etc.). Prerequisites: MATH 0180, 0200 or 0350

MATH 1620. Mathematical Statistics.
Central limit theorem, point estimation, interval estimation, multivariate normal distributions, tests of hypotheses, and linear models. Prerequisite: MATH 1530 or written permission

MATH 1810A. Special Topics in Mathematics.

MATH 1810B. A Second Course in Linear Algebra.
We'll study various aspects of multilinear algebra, including tensors, differential forms and homological algebra, with emphasis on coordinate-free constructions and universal properties. No background in abstract algebra, differential/algebraic geometry or manifold theory will be assumed. The only pre-requisites are a well-understood first course in linear algebra, a desire to do more with it, and a willingness to think abstractly

MATH 1820A. Introduction to Lie Algebras.
Lie groups and Lie algebras are important, because they are the symmetries of structures such as quadratic forms, differential systems and smooth manifolds. The prototype of a Lie algebra is the space of 3-vectors together with their cross product, which is closely related to the Lie group of rotations. We will see how this basic example generalizes, mostly in the context of matrices. We'll examine special types of Lie algebras, such as nilpotent, solvable and semi-simple, study root systems and their diagrams, explore some representation theory, and end with the classification of the simple Lie algebras. Prerequisite: MATH 1530
MATH 1970. Honors Conference.
Collateral reading, individual conferences. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Introduction to differential geometry (differentiable manifolds, differential forms, tensor fields, homogeneous spaces, fiber bundles, connections, and Riemannian geometry), followed by selected topics in the field

MATH 2050. Algebraic Geometry.
Complex manifolds and algebraic varieties, sheaves and cohomology, vector bundles, Hodge theory, Kähler manifolds, vanishing theorems, the Kodaira embedding theorem, the Riemann-Roch theorem, and introduction to deformation theory

MATH 2060. Algebraic Geometry.
See Algebraic Geometry (MATH 2050) for course description

MATH 2110. Introduction to Manifolds.
Inverse function theorem, manifolds, bundles, Lie groups, flows and vector fields, tensors and differential forms, Sard’s theorem and transversality, and further topics chosen by instructor

MATH 2210. Real Function Theory.
Point set topology, Lebesgue measure and integration, Lp spaces, Hilbert space, Banach spaces, differentiability, and applications

MATH 2220. Real Function Theory.
The basics of Hilbert space theory, including orthogonal projections, the Riesz representation theorem, and compact operators. The basics of Banach space theory, including the open mapping theorem, closed graph theorem, uniform boundedness principle, Hahn-Banach theorem, Riesz representation theorem (pertaining to the dual of C(X)), weak and weak-star topologies. Various additional topics, possibly including Fourier series, Fourier transform, ergodic theorems, distribution theory, and the spectral theory of linear operators

MATH 2250. Complex Function Theory.
Introduction to the theory of analytic functions of one complex variable. Content varies somewhat from year to year, but always includes the study of power series, complex line integrals, analytic continuation, conformal mapping, and an introduction to Riemann surfaces

MATH 2260. Complex Function Theory.
See Complex Function Theory (MATH 2250) for course description

MATH 2370. Partial Differential Equations.
The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Semester II concentrates on special topics chosen by the instructor

MATH 2380. Partial Differential Equations.
The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis.

MATH 2410. Topology.
An introductory course with emphasis on the algebraic and differential topology of manifolds. Topics include simplicial and singular homology, de Rham cohomology, and Poincaré duality

MATH 2420. Topology.
See Topology (MATH 2410) for course description

MATH 2450. Exchange Scholar Program.

MATH 2510. Algebra.
Basic properties of groups, rings, fields, and modules. Topics include: finite groups, representations of groups, rings with minimum condition, Galois theory, local rings, algebraic number theory, classical ideal theory, basic homological algebra, and elementary algebraic geometry

MATH 2520. Algebra.
See Algebra (MATH 2510) for course description

MATH 2530. Number Theory.
Introduction to algebraic and analytic number theory. Topics covered during the first semester include number fields, rings of integers, primes and ramification theory, completions, adeles and ideles, and zeta functions. Content of the second semester varies from year to year; possible topics include class field theory, arithmetic geometry, analytic number theory, and arithmetic K-theory. Prerequisite: MATH 2510

MATH 2540. Number Theory.
See Number Theory (MATH 2530) for course description

MATH 2630. Probability.
Introduces probability spaces, random variables, expectation values, and conditional expectations. Develops the basic tools of probability theory, such fundamental results as the weak and strong laws of large numbers, and the central limit theorem. Continues with a study of stochastic processes, such as Markov chains, branching processes, martingales, Brownian motion, and stochastic integrals. Students without a previous course in measure theory should take MATH 2210 (or APMA 2110) concurrently

MATH 2640. Probability.
See MATH 2630 for course description

MATH 2710A. Probability, Quantum Field Theory, and Geometry.

MATH 2710B. To Be Determined.

MATH 2710C. Gluing Constructions in Differential Geometry.

MATH 2710D. Lie Groups and Lie Algebras.

MATH 2710E. Arithmetic Groups.

MATH 2710F. Stable Homotopy Theory.
No description available

MATH 2710G. Introduction to Hodge Structures.

MATH 2710H. Topics in Free Boundary Problems in Continuum Mechanics.

MATH 2710I. Topics in Effective Harmonic Analysis.
Graduate topics course in Harmonic Analysis

MATH 2710J. Topics in Harmonic Analysis and Probability.
Graduate topics course in harmonic analysis and probability

MATH 2710K. A Second Course in Riemannian Geometry.
Graduate topics course in Riemannian geometry

MATH 2710L. Advanced Algebraic Topology.
Graduate Topics course in algebraic topology

MATH 2720A. Topics in Harmonic Analysis.

MATH 2720B. Multiple Dirichlet Series.

MATH 2720C. Curves on Surfaces and the Classification of Finitely Generated Kleinian Groups.
This is a course in the study of geometry and topology of hyperbolic 3-manifolds

MATH 2720D. Piecewise Isometric Maps.
This class will cover a variety of topics, all more or less related to dynamical systems that are defined by piecewise isometric maps. Topics may include: polygonal billiards and flat cone surfaces; outer billiards; interval exchange maps; The Gauss map and continued fractions; aperiodic tilings, such as the Penrose tiling; and Ashwin’s conjecture about piecewise rotation maps. A fairly large part of the class will be devoted to the explanation of the instructor’s proof of the Moser-Neumann conjecture for outer billiards. For this part, the instructor will use his book on the subject. For other parts of the course, a variety of sources will be used

MATH 2720E. Applied Topics in Mathematics.

MATH 2720F. Topics in Geometric Analysis.
No description available

MATH 2720G. Introduction to Hodge Structures.
No description available
MATH 2720H. Discrete Groups, Ergodic Theory and Hyperbolic Geometry
No description available

MATH 2720I. Automorphic Representations for GL(2).
Graduate topics course in automorphic representations for GL(2)

MATH 2970. Preliminary Examination Preparation.
No description available

MATH 2980. Reading and Research.
Independent research or course of study under the direction of a member of the faculty, which may include research for and preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

MATH 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

MATH XLIST. Courses of Interest to Graduate Students Majoring in Mathematics.

Fall 2012
The following courses may be taken for credit by graduate students majoring in Mathematics. Please check with the sponsoring department for times and locations.

Applied Mathematics
APMA 2110 Real Analysis
APMA 2830 Probability

Spring 2013
The following courses may be taken for credit by graduate students majoring in Mathematics. Please check with the sponsoring department for times and locations.

Applied Mathematics
APMA 2120 Hilbert Spaces and Their Applications
APMA 2640 Probability

Middle East Studies

The program in Middle East Studies (MES) is housed in the Watson Institute for International Studies while most of its faculty are spread across the humanities and social sciences. During the academic year, the Institute sponsors many talks, conferences, and other events on a wide range of issues that relate to the study of the Middle East.

The program offers an interdisciplinary undergraduate concentration that draws upon courses offered in the departments of Anthropology, Classics, Comparative Literature, Egyptology, History, History of Art and Architecture, Judaic Studies, Old World Archaeology, Religious Studies and Political Science. ITMES concentrators are encouraged to become familiar with the Watson Institute and to participate in its many activities. For more information please visit: http://www.middleeastbrown.org/

Middle East Studies Concentration Requirements

Middle East Studies (MES) is an interdisciplinary concentration that draws upon courses offered in the departments of Anthropology, Classics, Comparative Literature, Egyptology, History, History of Art and Architecture, Judaic Studies, Old World Archaeology, Religious Studies and Political Science. The Middle East is cradle of the three major monotheistic religions of the world and, for centuries it has been one of the most ethnically and religiously mixed regions of the world. The Middle East is an ideal site for considering the diversity and complexity of human interactions, along with the continuities and disruptions that such interactions involve in the long course of history. MES concentrators are thus uniquely poised to make significant contributions to an understanding of a broad range of contemporary problems that affect our world. The Middle East encompasses a diversity of cultures. It includes the lands where the first cities were built and the earliest writing system was developed, the same lands where the three monotheistic religious traditions – Islam, Judaism and Christianity – flourished. The region has always been a crossroads for states and empires, networks of trade and intellectual discourse. Therefore we define it beyond traditional geographic parameters, which tend to focus on the Arab world, North Africa, Iran and Turkey. The concentration approaches the study of the Middle East of the 21st century as a global phenomenon, one that has generated diasporic communities throughout the world as well as transnational Islamic and other religion-based movements. The Middle East is integral to the making of global socio-economic networks, political discourses and the histories of colonialism and empire. While the contemporary popular media focus on the Middle East of late modernity, the concentration promotes the study of the region through a long-term perspective from antiquity to the present day. As an interdisciplinary concentration, Middle East Studies integrates diverse methodological approaches drawn from a variety of disciplines. The concentration is designed to provide a broad knowledge of the region as well as a comparative understanding of Middle Eastern cultures, societies, states and economies. Within the concentration, students can choose from the following three focus areas:

I. Religions and Cultures: This focus area largely – although not exclusively – prioritizes pre-modern and early modern cultures and religions in the lands of the Middle East. Grounded primarily in the humanities, courses engage in an ongoing genealogy of the major cultural formations and religious traditions through the work of ethnographers, archaeologists, historians, sociologists, theologians, historians of science, literary critiques and numerous other realms of scholarship. Topics covered in relevant coursework vary widely, ranging from Arabic literature to the history of Syriac Christianity to the medieval pilgrims of the Holy Land.

II. Modern Politics and Society: This focus area centers on issues that have been particularly salient in the colonial and post-colonial periods of the countries and peoples from the region and practicing its major faiths. Relevant coursework examines the formation of political regimes, the development of nationalist and supra-nationalist ideologies such as Arab nationalism or Islamism, ethnic and sectarian movements and identity formation, as well as regional conflict and accommodation in the modern and contemporary periods.

III. Economies and Resources: Water, oil, cultural patrimony: From the Petra artifacts adorning RI Hall to the diesel that powers emergency generators which keep experiments running during winter storms, this university is intimately linked to the resources and economic logics that help to make the lands of the Middle East an object of academic study. Coursework in this focus area centers on two possible trajectories, including the economics of heritage practices (i.e., tourism to archaeological sites) or economic development and underdevelopment in the region (i.e., the political economy of oil, labor, water and other resource flows).

All concentrators are required to fulfill seven courses in addition to the language competency requirements for a total of eleven courses:

1. One course in a major religious tradition (i.e., Christianity, Islam, Judaism);
2. One course on the history of the Middle East. (Note: Students whose coursework deals primarily with the ancient or pre-modern periods, are strongly encouraged to take a modern history course while students whose coursework deals primarily with the modern period are strongly encouraged take an ancient or pre-modern history course);
3. Three focus area courses (the list of eligible courses for each focus area is available at the Middle East Studies website: http://www.watsoninstitute.org/middleeast/); and
4. Two electives, including any two courses from any focus area in the concentration or independent studies approved by the MES director. (Note: Language courses beyond the requirements are eligible).
5. Language competency: Intermediate competency in a Middle Eastern language (i.e., Arabic, Aramaic, Egyptian, Farsi, Hebrew, Hindi-Urdu, Turkish), or four semesters of language coursework in the same language, is required. The requirement may be met by successfully passing courses in the given language at the intermediate level at Brown or another institution. Students wishing to fulfill this requirement on the basis of study outside of Brown are required to pass a competency test administered by an authorized Brown faculty member as listed on the MES website. Students
who complete the language requirement in fewer than four courses – whether at Brown or elsewhere – are required to take courses equivalent to the number of language courses they do not need to fulfill. These may include more advanced language courses, courses in a second language, or courses from any of the three focus areas.

Capstone Project
All concentrators are required to complete a capstone project. Students undertake the project in conjunction with one or more faculty members with interests in the Middle East. The project may take the form of an undergraduate honors thesis, an independent study project, or with permission, an enhanced final project for a regularly scheduled course.

Concentration Colloquium
All concentrators are required to attend the annual concentration colloquium at which students who have completed a capstone project make a presentation related to that project. The colloquium is held during spring semester.

Honors
Students may graduate with Honors in Middle East Studies by completing an undergraduate Honors thesis under the supervision of a primary reader drawn from the Middle East Studies faculty and one additional reader from the Brown or Brown-affiliated faculty. Honors students must increase the number of courses in the concentration to twelve, of which two course credits (i.e., one thesis credit course and one elective course) may be devoted to the preparation of the thesis.

Study Away from Brown:
Up to two courses taken at educational institutions other than Brown may be credited toward the concentration upon approval of the concentration advisor. All students must provide a syllabus and samples of written work before the MES Director can review coursework taken at other institutions for approval. For languages courses taken abroad, students may provide evaluation forms or transcripts instead of written work for review by an appropriate language instructor at Brown.

Double Concentrators:
Up to two courses may be cross-listed with another concentration in order to qualify for a double concentration in Middle East Studies. All concentration proposals are subject to review by the Middle East Studies Concentration Advisor. Students are expected to submit their concentration proposals no later than two weeks before the end of the preregistration period in their sophomore year.

Courses
Limited to juniors and seniors. Section numbers vary by instructor. Please check Banner for the correct section and CRN to use when registering for this course. Required: all proposals for independent study must be approved by the faculty sponsor and the MES program director. Students should not register for any section of MES 1970 without this approval.

MES 1990. Middle East Studies Pro-Seminar.
This course explores the current state of Middle East Studies scholarship with an eye to its current moment of crisis. We will begin by situating MES within its institutional history, then survey classic works from its core disciplines. The second half of the course will trace contemporary debates over the significance and origin of political Islam.

MES XLIST. Courses of Interest to Students Concentrating in Middle East Studies.
For information on courses which may be of interest to students concentrating in Middle East Studies, please refer to the MES XLIST in the Class Schedule menu.

Fall 2012
The following related courses, offered in other departments, may be of interest to students concentrating in Middle East Studies. Please see the course listing of the sponsoring department for times and locations.

History of Art and Architecture

Brown’s Program in Medieval Studies currently offers two concentrations: medieval cultures and late antique cultures. A concentration in medieval cultures focuses on the eighth through the fifteenth centuries and combines interdisciplinary perspectives on this period with in-depth study of one or two related disciplines. Late antique cultures deals with the third through the ninth centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The country’s first undergraduate degree of its field, the concentration in late antique cultures is organized to facilitate the study of human activity in all of its variety unrestricted by the conventional demarcations of classical and medieval studies. The concentration serves those students who are interested in the changing relation of the many kinds of cultural practices, social patterns, political, and economic forms, and artistic and literary traditions in this transitional period. The program encourages students to work in other cultural areas such as Byzantine, Islamic, Judaic, and Slavic studies in addition to a traditional area of study in Western Europe.

For additional information, please visit the department’s website: [http://www.brown.edu/Departments/Medieval_Studies/](http://www.brown.edu/Departments/Medieval_Studies/)

### Medieval Cultures Concentration

**Requirements**

Medieval Cultures offers two distinct areas of historical focus: the Medieval and the Late Antique. The former focuses on the eighth through the fifteenth centuries, combining interdisciplinary perspectives with in-depth study of one or two related disciplines. Late Antique Cultures deals with the third through the ninth centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The first undergraduate degree of its kind in this country, Late Antique Cultures facilitates the study of human activity in all of its variety. A traditional area of study in Medieval Cultures is Western Europe, but students are encouraged to work in other cultural areas such as Byzantine, Islamic, Judaic and Slavic. The concentration serves students interested in the changing relation of cultural practices, social patterns, political and economic forms, and artistic and literary traditions in this important transitional period.

### Medieval Cultures Track

It is recommended that prospective concentrators take the introductory course, Medieval Perspectives, during their freshman or sophomore year.

**Requirements**

Ten courses approved by the Program in Medieval Studies, including two courses in medieval history and one 1000- or 2000-level course that uses primary texts in a medieval language other than Middle English. Interested students are invited to discuss their plans with an appropriate faculty member of the Program. A concentration proposal should be prepared in consultation with the faculty advisor and submitted to the Program Chair for approval.

### Honors

This is awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. The thesis permits the student to synthesize various disciplines or interests, or to pursue a new interest in greater depth. To be eligible for Honors, candidates must complete a minimum of six approved courses in Medieval Studies by the end of their third year with more grades of A than B. Students should apply for admission to Honors and should meet with their faculty advisor(s) no later than spring of the junior year to plan the thesis project. Accepted candidates write the thesis in a two-semester course sequence under the supervision of a director and second reader drawn from the Medieval Studies faculty.

Interested students should contact the concentration advisor for further details or consultation (863-1994).

### Late Antique Cultures Track

**Requirements:**

- Once course in Roman history: 1
- One class in medieval history: 1
- One course at the advanced level (numbered at least 1000) in one approved language: 1
- Six other courses drawn from appropriate offerings and with the approval of the concentration advisor: 6

Total Credits: 9

1. The language in most cases will be Latin, but students will present different competencies and interests; other languages, such as Greek, Hebrew, or one of the medieval vernaculars can be substituted for Latin, with the approval of the concentration advisor and in conjunction with a clearly articulated program of study.

### Honors

When in Late Antique Cultures, these are awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. Application for admission to honors should be made in the spring of the junior year, by which time honors candidates must have completed a minimum of six approved courses in Late Antique Studies. Accepted candidates write the thesis in a two-semester course sequence (MDVL 1990) under the supervision of a director and a second reader to be determined in consultation with the advisor.

**Courses**

- **MDVL 0110. Christianity (RELS 0110).** Interested students must register for RELS 0110 S01
- **MDVL 0150. Islam: An Introduction (RELS 0150).** Interested students must register for RELS 0150 S01
- **MDVL 0210F. Beowulf to Apha Behn: The Earliest British Literatures (ENGL 0210F).** Interested students must register for ENGL 0210F S01 (CRN 14287)
- **MDVL 0250E. The Medieval King Arthur (ENGL 0250E).** Interested students must register for ENGL 0250E S01
- **MDVL 0290D. Women, Sex and Gender in Islam (RELS 0290D).** Interested students must register for RELS 0290D S01
MDVL 0360. Blood, Bones and Bodies: Medieval Perspectives
Medieval attitudes toward the body—whether profane or sacred, tortured or pleased, monstrous or beautiful—were radically different from our own. So too was the sense of the boundary between death and life. The trial of a pope's cadaver, female bodies that became male through cross-dressing, the worship of saints' bones, fervent devotion to Christ's blood, diseases that unleashed God's wrath by killing one third of Europe's population, medical practices that relied on classical understandings of the body—these and other related topics form the subject of this course, which is team-taught by faculty from the Program in Medieval Studies
MDVL 0400C. Matters of Romance (ENGL 0400C).
Interested students must register for ENGL 0400C S01
MDVL 0410. Christianity in Late Antiquity (RELS 0410).
Interested students must register for RELS 0410 S01
MDVL 0620. Muslims, Jews, and Christians in Medieval Iberia.
The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian cathedrals, Islamic palaces, and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. This convivencia of Jews, Muslims, and Christians will be examined from the perspectives of literature, art, architecture, archaeology and history.
MDVL 0660. The World of Byzantium (CLAS 0660).
Interested students must register for CLAS 0660 S01 (CRN 15534)
MDVL 0971A. The Holy Grail and the Historian's Quest for the Truth (HIST 0971A).
Interested students must register for HIST 0971A S01
MDVL 0980G. The Search for King Arthur (HIST 0980G).
Interested students must register for HIST 0980G S01 (CRN 25272)
MDVL 0990G. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 0990G).
Interested students must register for JUDS 0990G S01
MDVL 0990J. Body and Society: Medicine and Medical Ethics in the Pre-modern World (JUDS 0990J).
Interested students must register for JUDS 0990J S01
MDVL 1020. Living Together: Muslims, Christians, and Jews in Medieval Iberia (HIST 1020).
Interested students must register for HIST 1020 S01
MDVL 1030. The Long Fall of the Roman Empire (HIST 1030).
Interested students must register for HIST 1030 S01 (CRN 15822)
MDVL 1031. The Viking Age (HIST 1031).
Interested students must register for HIST 1031 S01 (CRN 25169)
MDVL 1040. Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages (HIST 1040).
Interested students must register for HIST 1040 S01 (CRN 24734)
MDVL 1110F. Fortunatus (LATN 1110F).
Interested students must register for LATN 1110F S01 (CRN 15523)
MDVL 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances (GREK 1110Q).
Interested students must register for GREK 1110Q S01
MDVL 1110T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World (GREK 1110T).
Interested students must register for GREK 1110T S01
MDVL 1120C. Survey of Late and Medieval Latin (LATN 1120C).
Interested students must register for LATN 1120C S01
MDVL 1120D. Alcuin (LATN 1120D).
Interested students must register for LATN 1120D S01
MDVL 1120G. The Idea of Self (CLAS 1120G).
Interested students must register for CLAS 1120G S01 (CRN 15526)
MDVL 1200C. Mosaics (HIAA 1200C).
Interested students must register for HIAA 1200C S01
MDVL 1200H. Monsters (HIAA 1200H).
Interested students must register for HIAA 1200H S01
MDVL 1210C. History of the Spanish Language (HISP 1210C).
Interested students must register for HISP 1210C S01
MDVL 1300. Ancient Christianity and the Sensing Body (RELS 1300).
Interested students must register for RELS 1300 S01
MDVL 1310T. Chaucer (ENGL 1310T).
Interested students must register for ENGL 1310T S01
MDVL 1310V. Chaucer: The Canterbury Tales (ENGL 1310V).
Interested students must register for ENGL 1310V S01 (CRN 24610)
MDVL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives (ENGL 1360F).
Interested students must register for ENGL 1360F S01
MDVL 1360J. Literatures of Medieval England (ENGL 1360J).
Interested students must register for ENGL 1360J S01 (CRN 14484)
MDVL 1360U. Europe in the Vernacular (ENGL 1360U).
Interested students must register for ENGL 1360U S01
MDVL 1410. The Talmud (JUDS 1410).
Interested students must register for JUDS 1410 S01
MDVL 1430F. Medieval Poets (COLT 1430F).
Interested students must register for COLT 1430F S01
MDVL 1520. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).
Interested students must register for RELS 1520 S01
MDVL 1530. Methods and Approaches to Islamic Studies (RELS 1530).
Interested students must register for RELS 1530 S01
MDVL 1750L. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).
Interested students must register for CLAS 1750L S01 (CRN 24868)
MDVL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation (ENGL 1900Y).
Interested students must register for ENGL 1900Y S01 (CRN 24725)
Tutorial instruction on an approved topic in Late Antiquity and/or Medieval cultures, supervised by a member of staff. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. May be repeated once for credit
Interested students must register for HIST 1972H S01 (CRN 24770)
Interested students must register for HIST 1976R S01
Interested students must register for HIST 1976Z S01 (CRN 15429)
Interested students must register for JUDS 1981I S01
Independent research and writing on a topic of special interest to the student, under the direction of a faculty member. Required of candidates for honors. Permission should be obtained from the Director of the Program in Medieval Studies
MDVL 2030F. Arthurian and Carolingian Romances of Medieval Iberia (MDVL 2030F).
Interested students must register for HISP 2030F S01
MDVL 2040D. Arts du récit, 1100-1400 (FREN 2040D).
Interested students must register for FREN 2040D S01
MDVL 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).
Interested students must register for GREK 2110F S01
MDVL 2360Q. Manuscript, Image, and the Middle English Text (ENGL 2360Q).
Interested students must register for ENGL 2360Q S01
Modem Culture and Media

Chair
Wendy Hui Kyong Chun

Modern Culture and Media (MCM) is committed to the study of media in the context of the broader examination of modern cultural and social formations. Our curriculum proposes a distinctive subject matter, stresses comparative analysis and theoretical reflection, and highlights the integration of theory and practice, creative thought and critical production. In research and teaching at both the graduate and undergraduate level, MCM combines the analysis of diverse texts — visual and verbal, literary and historical, theoretical and popular, imaginative and archival — with the study of contemporary theories of representation and cultural production and creative practice in a range of media. Through studying MCM, students will be critically sophisticated and knowledgeable about the theory, history, and analysis of media and cultural forms and who are able to produce innovative work — whether in theory, media practice, or historical scholarship — that interrogates and transforms conventional understandings of these forms.

For additional information, please visit the department’s website: http://www.brown.edu/academics/modern-culture-and-media/

Modern Culture and Media Concentration Requirements

Modern Culture and Media (MCM) is an interdisciplinary concentration that explores the ties between media and broader cultural and social formations. We stress creative thinking and critical production: comparative analysis and theoretical reflection, as well as work that integrates practice and theory. We thus bring together aspects of modern culture that are normally separated by departmental structures such as film and media studies, fine art, literature, literary arts and philosophy. This concentration offers the student a range of possible specializations. A student might decide to focus the critical study and production of a certain type or combination of media (print, photography, sound recording, cinema, video, television, and digital media); or they might focus on certain cultural, theoretical and/or social formations (for example, gender / sexuality in post-Cold war television, postcolonial theory and film, the changing form of the novel, theories of subjectivity and ideology, video games and theories of representation).

These paths are united by a commitment to critical thinking/practice: rather than reproducing conventions, MCM concentrators learn how conventions emerge, what work they do, and explore ways to change them.

Track I

Track I concentrators may choose to study a particular historical moment, a medium, or a mode of textual production, in combination with theoretical studies that examine the categories of cultural analysis: for example, the distinction between high and low culture. Examples of areas of interest include but are not limited to film, gender/sexuality, digital media, television, post-coloniality, the novel, modern thought, the modern arts, sound, and theories of ideology and subjectivity. Productive work in some modern medium or textual mode is encouraged for all concentrators. MCM’s approach to production recognizes the inextricable link between theory and practice, and the possibility of a fruitful complicity between them. Production, in the sense defined here, is a theoretically informed sphere or practice, one within which acknowledged forms of cultural creation are tested and extended in close complementarity with the analyses conducted elsewhere in MCM.

Track I consists of 11 courses.

Core courses

</thead>
<tbody>
<tr>
<td>MCM 0230</td>
<td>Digital Media</td>
</tr>
</tbody>
</table>

Total Credits 2

Additional courses 5

One must be an upper level course from the MCM 1200 series
Two must be senior seminars from the MCM 1500 or MCM 1700 series
Two must be at any level in MCM above MCM 0260

Three additional courses. These courses must be in MCM or in related departments.

Total Credits 11

1. No more than three courses from this list may count for concentration requirements.
2. The specific courses must be approved by an MCM concentration advisor as part of a coherent program of study.

Other Requirements:

1. Focus Area: Of the 11 courses required for the concentration, at least 3 courses must be in a focus area approved by a concentration advisor. These courses may be MCM courses, related courses, or a combination of the two, and they must represent a concentration on some aspect of modern literature, theory, media, art or culture. Examples of possible focus areas are: mass/popular culture, gender/sexuality, language/representation/subjectivity, narrative, digital media, film, modern thought, television, the modern arts, the novel, colonialism and post-colonialism, and so on. This is not an exhaustive list. Production courses may be in the focus area but must be in addition to the minimum 3 courses.

2. Production: Work in production is encouraged but not required for all Track I concentrators. Of the 11 courses required for concentration, as many as 3 may be in production. These may be production courses offered by MCM (film, video, digital media) or courses in creative writing, painting, photography, journalism, etc., provided they do not bring the total number of concentration courses taken outside MCM to more than 3.

Honors: Students who qualify for Honors in Track I are eligible to apply to do an Honors project or thesis. Applications will be screened by the MCM Honors Committee. (Application forms should be obtained by prospective honors students in the 7th semester. They are available in the MCM office.) If approved, a student must then register for MCM 1990, a one-credit thesis course in which they complete the Honors project.

Track II

Track II concentration combines production courses with the critical study of the cultural role of practice. It aims to engage students in the analysis of theories of production elaborated within philosophical, artistic, and technological traditions, while encouraging them to produce works that interrogate these traditions.

Track II consists of 11 courses:

Two core courses:

Modern Culture and Media Graduate Program

The department of Modern Culture and Media offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. There is no terminal Master’s program, but students who enter the doctoral program only with an undergraduate degree may earn an A.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/modern-culture-and-media

Courses

**MCM 0100. Introduction to Modern Culture and Media.**
An introduction to key forms that constitute media in modern culture: photography, film, recorded sound, print, television, video, and digital media. We will examine the materials of such media, and produce critical accounts of them as representational forms as well as aesthetic, social, and/or political practices. Our discussions will be structured by major theoretical concepts and approaches. Students MUST register for the lecture section and the screening. A sign up-sheet will be available for conferences after the first class meeting. Open to undergraduates only. LILE

**MCM 0110. Introduction to Modern Culture and Media.**
An introduction to critical theory, cultural studies, and media analysis that addresses print, photography, film, television, and digital media. We will examine these media in relationship to influential theoretical approaches such as structuralism and post-structuralism, ideological analysis and psychoanalysis, feminist and queer theory, critical race theory and theories of post-colonialism and globality, and media and technology studies. LILE

**MCM 0150. Structuralism, Poststructuralism and their Others.**
An introduction to the theoretical foundations of contemporary cultural criticism. We will study theories of language and representation, image and narrative, signification and textuality, fantasy and ideology, and modernity and postmodernity that are crucial to understanding modern culture and media texts (including literary, photographic, film, television, and digital media). Readings will range from such scholars as Saussure, Levi-Strauss, Marx, and Freud to Barthes, Fanon, Irigaray, and Butler. Students must register for both the lecture section and one conference; a signup sheet will be available for conferences after the first class meeting. Open to undergraduates only

**MCM 0230. Digital Media.**
This course introduces students to the study of digital media. Moving from its popular mass forms to alternative artistic installations, from cyberpunk fiction and movies to facebook.com, we will study the aesthetics, politics, history and theory of digital media. Special attention will be paid to its relation to social/cultural formations (gender, sexuality, race, global flows). Students MUST register for the lecture section and the lab. A sign up-sheet will be available for conferences after the first class meeting.

**MCM 0240. Television Studies.**
Introduces students to the rigorous study of television, concentrating on televisual formations (texts, industry, audience) in relation to social/cultural formations (gender, generational, and family dynamics; constructions of race, class, and nation; consumerism and global economic flows). That is, this course considers both how television has been defined and how television itself defines the terms of our world. Students MUST register for the lecture section, the screening, and a conference section. Open to undergraduates only. LILE

**MCM 0250. Visuality and Visual Theories.**
Theories of visual representation in such traditional media as painting, in photography, and in emergent digital media (VR, robotics, etc.). Connects problems of representation to issues of power, information, subjectivity. These media are read as historically constituted and specific to particular cultures through complex forms of mediation

**MCM 0260. Cinematic Coding and Narrativity.**
Examination of the structural and ideological attributes of cinema, concentrating on the dominant narrative model developed in the American studio system and alternatives to that model. Emphasis on contemporary theories of cinematic representation. Students become conversant with specific elements and operations of the cinematic apparatus (e.g. camera, editing, soundtrack) and its production of discursive meanings. Students MUST register for the lecture, section and one screening. A sign up-sheet will be available for conferences after the first class meeting. Open to undergraduates only. LILE WRIT

**MCM 0700. Introduction to the Moving Image.**
The purpose of this course is to provide a basic introduction to film and video production and to begin to consider the kinds of texts that might be produced using these media. Students are expected to work in an intelligent manner, take risks with the content and form, engage in empirical research of the medium, and in so doing, examine common presumptions about media production. Students will utilize 16mm non-sync film cameras and small format video to produce a series of short projects emphasizing the creative use of these media in various social and visual arts contexts. Classes will consist of screenings and discussion of a wide variety of works, basic technical demonstrations, and critiques of student work. No previous production experience necessary. Prerequisites (two of the following or equivalent): MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Application required. Enrollment limited to 15. Written permission required. Mandatory S/NC

**MCM 0710. Introduction to Filmmaking: Time and Form.**
A course from the LITR 0110 series
A course from the LITR 0210 series
HIAA 0010 Introduction to the History of Art and Architecture
TAPS 0030 Introduction to Acting and Directing
MUSC 0010 Introduction to Western Music
MUSC 0040 World Music Cultures (Africa, America, Europe, Oceania)

One additional course from the following: 1

Four practice courses selected in consultation with an advisor, 2

One Senior Seminar from the MCM 1700 series or other equivalent in production

Total Credits 11

1 At least one must be from the MCM 1500 series.
2 Courses can be in any medium or combinatory sequence of media from the following departments: Modern Culture and Media, Visual Art, Music, Literary Arts, Theatre Arts and Performance Studies, Computer Science, Engineering, supplemented by approved courses at Rhode Island School of Design and study abroad. This list is not exhaustive.

Honors: Honors in Track II entails one additional course, generally an independent study (MCM 1990 Honors Thesis Project). Enrollment in this course is approved upon acceptance of an Honors Proposal. Application forms must be submitted by prospective Honors students in the beginning of their seventh semester and are available in the MCM office. The course is taken in the student’s final semester. An Honors degree reflects not only the completion of the thesis course and project, but generally distinguished performance in the concentration.
experience required. Screenings, demonstrations and studio work. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. Up to 40 students can apply, but the final class list of 15 will be determined after this meeting, with permission of the instructor. Enrollment limited to 15. S/NC

MCM 0720. Intermediate Filmmaking: Cinematic Space. Introduces more sophisticated film production techniques, including sync sound and lighting technique. Explores the influence of digital technologies on cinematic practice. Studio work supplemented by screenings, demonstrations, and discussions. Group and individual projects. Prerequisite: MCM 0710. Application required. Application is available in the MCM office or from http://www.brown.edu/Departments/MCM/. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 12. Instructor’s permission required. S/NC

MCM 0730. Introduction to Video Production: Critical Strategies and Histories. Provides the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing small format video (Mini DV). Emphasizes video as a critical intervention in social and visual arts contexts. No previous experience required. Application required. Application is available in the MCM office or from http://www.brown.edu/Departments/MCM/. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 12. S/NC

MCM 0740. Intermediate Video Production: Sound, Image, Duration. Expanded principles of independent video production utilizing small format video (Mini DV). Emphasizes video as a critical intervention in social and visual arts contexts. A major project (10-20 minutes) and a class presentation concerning your project are required. Prerequisite: MCM 0730. Application required. Application is available in the MCM office or from http://www.brown.edu/Departments/MCM/. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 15. Instructor’s permission required. S/NC

MCM 0750. Digital Art. What would Andy Warhol’s Facebook page look like? What would John Cage have done with an iPod? This introductory production course combines history, theory, and practice to explore the intersection of art and emerging digital technologies. Examples of recent student work include a dance performance lit by cell phones, a Dadaist video game, and an exquisite corpse made with Processing, a programming language for artists. Students examine and critique new media projects by various artists, as well as art historical precursors/influences, and produce media art projects. The final class list will be determined by the instructor. Enrollment limited to 40. S/NC LILE

MCM 0760. Intermediate Digital Media Production. How do technologies enabling new forms of media and communication reconfigure notions of geography, location, speed, presence, community, autonomy, public, private, and one’s ability to participate in culture? This class is an exploration of how artists and other cultural producers use these new technologies and new conditions to activate networks, form communities, create access, self-publish, proliferate, draw attention to context, demand agency, redefine property, and develop spaces for exchange and play

MCM 0780. Soundtracks: Sound Production and Visual Media. A production course that examines the role of sound in film, video, and installation forms. The listening assignments and visual media screenings will foreground the usage of audio in the works of selected artists/filmmakers. The course also considers works of sound art. Readings by sonic theorists and producers will examine the possibilities of sound production as a key register of modern social and aesthetic experience. Class members should have completed at least one time-based media class. Students are expected to be competent technically. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 15. S/NC

MCM 0790. This is a Public Service Announcement. This course will examine the broad mission of “public service” media in its various iterations, both in commercial broadcast television, state run television, and in numerous forays by artists and collectives into public space. Students will produce a series of short video and/or installation projects that will explore critically the content and form of the Public Service Announcement and its historical precedents. In addition, the class will also collectively design, shoot, and produce, in collaboration with the RI Department of Education, their own Public Service Announcement that will air on local television stations. This will be a rare opportunity for undergraduate students not only to gain hands-on production experience, but also to think about and exhibit work outside of the University classroom context. Prerequisite: MCM 0700, MCM 0710, MCM 0720, MCM 0730, or MCM 0740

MCM 0800A. Agency and Representation. Agency is one of the most popular concepts across the disciplines today, but its definitions are often far from satisfactory in relation to representational forms such as literature and film. Using both fictional and theoretical texts, this course will examine some common assumptions about agency and develop a range of possible interpretations that will make the term viable in the study of artistic representation. For first year students only

MCM 0800B. Freshman Seminar on Visuality. An examination of the key texts (from such diverse fields as philosophy, visual arts, cultural studies) which describe the historical transformation of personal and social visual space. We will explore, for example, Renaissance and Cartesian optics, the mechanization of vision in the late nineteenth century and recent hypotheses around machine-centered visuality. For first year students only

MCM 0800C. Marx, Nietzsche, Freud: History of Theory. Many of the most pressing theoretical issues addressed by contemporary cultural analysis were first investigated in the works of these three ground-breaking intellectuals. This course will survey some of their major works, with attention to such concepts as ideology and the commodity; the will to power and truth in language; the unconscious and sexual difference. For first year students only

MCM 0800D. Sound for A Moving Image. A production/seminar. An examination of the role of sound in the works of five exemplary artists/filmmakers while we produce sound works for filmic projects. For first year students only

MCM 0800E. Race and Imagined Futures. Why is race so important in imagining utopian or dystopian futures - to signaling world peace or Malthusian disaster? What do these imaginings tell us about contemporary anxieties over / desire for multiculturalism and globalization? This course responds to these questions by examining speculative, science and utopian fiction and films by African-, Asian- and Euro-American authors/film makers. Readings will be theoretical, as well as literary. Enrollment limited to 20. Students MUST register for the lecture section and the screening

MCM 0800F. The Face in Cinema. Cinema has always been obsessed with the thematics of the human face. The close-up is most frequently associated with a revelation of intense human signification, with a rendering legible of the face as the signifier of the soul, and with the face as the privileged signifier of individuality, truth, beauty, and interiority as well as the most basic support of intersubjectivity. We will examine the face in the cinema in relation to the star system, theories of desire and affect, and a history of representation of the face (Darwin, Galton, Duchenne, etc.). Films by Dreyer, Hitchcock, Warhol, Wiseman, and others. Students must register for the primary meeting and one film screening. Enrollment limited to 20 first year students. FYS

MCM 0800H. TV/Not TV: Theory and Production. This freshman seminar examines both commercial television and non-commercial media forms, considering the dialogue and/or tensions between them. What are the critical potentials and political stakes of viewing TV and of making independent media? How can we re-write TV’s cultural codes by stimulating alternative readings, fostering new interpretive practices, creating different texts, or developing diverse
modes and sites of distribution? Combining theory and practice (media studies, televisual and anti-televisual screenings, and simple production assignments using available technologies), this course encourages students to read and critique commercial television through both analysis and their own creative media practices. Enrollment limited to 20 first year students. FYS

MCM 0900I. Victim Testimonies.
This seminar will explore primarily first person narratives and historical and other accounts that seek to recreate victim's voices (of the Jewish Holocaust, Stalin's terror, the Algerian War, the Rwandan genocide) in order to understand the cultural contexts and narrative styles that fashion victims, shape readers' views of them, and lead us to take some more seriously than others. Enrollment limited to 20 first year students. FYS

MCM 0900A. Cinema and Stardom: Image/Industry/Fantasy.
Focuses on the star within the "machinery" of Hollywood cinema: how stars function in the film industry, within cinematic and extra-cinematic texts, and at the level of individual fantasy and desire. Including screenings of films which exploit, foreground, or critique star images, also considers the ideological implications and cultural consequences of stardom.

MCM 0900B. Global Cyberpunk.
Examines how cyberpunk functions both as a global phenomenon and as a way to imagine the global. Texts include American science fiction by authors such as Octavia Butler and Neal Stephenson; anime such as Akira and AD Police Force; feature films such as Blade Runner; as well as theoretical texts on globalization, science fiction, and animation.

MCM 0900F. Real TV.
This course will investigate the construction of reality on U.S. television, considering not only specific reality genres (news and "magazine" programs, crisis coverage, docudrama, talk and game shows) but the discursive and representational modes that define the "reality" of commercial television as a whole. Issues include: "liveness"; social relevancy; therapeutic discourse; TV personalities; media simulation; independent television; and new technologies/realisms.

MCM 0900G. Representing the Internet.
Investigates popular representations of the Internet (many of which precede the WWW) from cyberpunk to Supreme Court decisions, from mainstream film to Internet map sites. Considers the relationship between representation, ideology, culture, and technology. All written work for the seminar will be digital.

MCM 0901C. Photography/Film/Art: Memory, History and Ruin.
Questions of the nature of the photographic image have come to the fore in some of the most exciting modern art, such as the work of Cindy Sherman and Andy Warhol. In particular, the question of how the photograph relates to film and history has generated important questions about art and media. This course will analyze these questions through the work of such artists as Jeff Wall, Jean-Luc Godard, and Hiroshi Sugimoto. We will examine these in relation to writings that theorize the relationship of photography to film and art after World War Two. Readings include Benjamin, Barthes, and Krauss. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 undergraduates. WRIT

MCM 0901D. Film Comedy.
What makes some films so funny? This course will investigate many different forms of film comedy— from slapstick physical gags involving hapless men and umbrella-wielding matrons, to eccentric verbal banter, to parodies that subvert state politics using puppet characters. Instead of treating film comedy as "just mindless escapism," we will study how comedy's complex and slippery devices are central to the history of cinema. Readings in critical discourses about comedy, film history and film theory, e.g. Freud, Bergson, Benjamin, Rob King, Miriam Hansen, and Kathleen Rowe. Screenings range from silent slapstick, to communist satire, to romantic comedy, to political muckymonetary. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

MCM 0901E. The Fantastic in Contemporary Cinema.
This course addresses the idea of the Fantastic from its definition to its articulation in contemporary cinema. Focusing more on form than on content, we will privilege a reading of the Fantastic as an effect rather than a genre or a theme: specific attention will be given to the relationships between filmic texts, spectatorship and the production of meaning. Screenings will include popular Hollywood cinema as well as European and independent films. We will discuss works by directors such as Lynch, Nolan, Fincher, Spielberg, Gondry, Cronenben and Haneke. Readings will range from literary theory and psychoanalysis to film theory and semiotics. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 undergraduates.

MCM 0901F. "America" in Diaspora Literatures.
How have diasporic and immigrant writers come to see the United States? How do these writers negotiate dominant understandings of race, gender, ethnicity, religion, and "national" identity? Questions of the nature of the photographic image have come to the fore in some of the most exciting modern art, such as the work of Cindy Sherman and Andy Warhol. In particular, the question of how the photograph relates to film and history has generated important questions about art and media. This course will analyze these questions through the work of such artists as Jeff Wall, Jean-Luc Godard, and Hiroshi Sugimoto. We will examine these in relation to writings that theorize the relationship of photography to film and art after World War Two. Readings include Benjamin, Barthes, and Krauss. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20. LILE

MCM 0901H. Uncomfortable Media.
Why are we often addicted to that which disgusts us? This course analyzes why "uncomfortable media"— media that plays with notions of the perverse, the abject, and the taboo— remain so popular in the American cultural imaginary. Studying a variety of popular television programs and films, this course will approach these viscerally transgressive media texts through analyzing representation (how cultural taboos appear in popular culture) and analyzing spectatorship (how viewers perform discomfort). We will examine how developments in genre and narrative form, affect studies, performance studies, and queer theory have contributed to theorizing the perverse. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20. DVPS LILE

MCM 0901I. Body Count: Technologies of Life and Death.
From the War on Terror and the global obesity crisis to self-help reality TV and new biotechnologies, questions of life and death have come to center stage of contemporary politics. This course investigates the theoretical and historical contexts under which "life itself" has emerged as a key arena of social, cultural, and technological importance. We will read critical studies of race, media, embodiment, and the state, tracing how distinctions between life and its others have structured the distribution of death, risk, and freedom in modernity. Topics include biocolonialism, cyborgs and swarms, U.S. prison regime, computer viruses, "bugchasing," suicide bombing. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20. DVPS LILE

MCM 0901J. Adaptation Culture: New Media ↔ Traditional Theatres (TAPS 0080).
Interested students must register for TAPS 0080 S01 (CRN 16451)

MCM 1110. The Theory of the Sign.
A survey of three late-twentieth-century theorists: Louis Althusser, Jacques Derrida, and Michel Foucault. Our analyses will focus on these figures as they emerge from and reorient the broad field of semiotics, with particular attention to the evolution of each oeuvre, the continuities and discontinuities that distinguish their theoretical claims, and their diverging legacies. Readings will include Althusser's Reading Capital and "Contradiction and Over-determination;" Derrida's Of Grammatology and Spurs; and Foucault's This is Not a Pipe and History of Sexuality. Critical concepts to be examined include signification, reading, discourse, subjectivity, power, historicism, archaeology, the supplement, and difference. Prerequisite: MCM 0110, 0230, 0240, 0250, or 0260
MCM 1200D. African Cinema.
Subsaharan African cinemas 1960-present, primary emphasis on narrative films. We will analyze cultural and aesthetic strategies, (cinematic style, narrative, and subjects), in the context of postcolonial African and international film histories. Themes include: anticolonial resistance/ nationalist ideologies; third cinema/international art cinemas; oral aesthetic culture and cinematic style; political critique (e.g., gender, state politics); media globalization and resistance; the struggle for a mass audience. Enrollment limited to 50. Previous coursework in MCM, Africana Studies, or related areas highly recommended

This course focuses on the role of the star within the "machinery" of Hollywood: how stars function in the film industry, within cinematic and extra-cinematic texts, and at the level of individual fantasy and desire. The paradoxes posed by stars—represented as like yet unlike us, public yet privately known, commodities yet (super)human—suggest complex formations and implications of the star system. We will read film theories and histories and investigate films in which star images are foregrounded to explore these issues. Enrollment limited to 50 undergraduates. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the screening

MCM 1200K. Hollywood as Global Cinema.
Commonly treated as a U.S. national cinema, Hollywood film has long been a global institution dominating worldwide distribution. We reread U.S. narrative filmmaking and its products in relation to its global ambitions. Topics include: internationalizing the history of U.S. cinema; rethinking theories of the classical and anticlassical text; local, national and global spectatorship; concepts of cultural imperialism and cultural globalization; etc

MCM 1200Q. Publicity and Surveillance.
Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena such as webcams, face recognition technology and networked art, as well as concepts such as enlightenment, paranoia and exhibitionism. Theoretical, historical and legal readings

MCM 1201C. Imagined Networks, Glocal Connections.
This course examines emergent "imagined networks" (Arab Spring activists, global anti-globalization networks, global climate and financial systems) impacted by new media technologies and applications. Emphasis will be placed on understanding the changing relationship between the local and the global, and how "glocal phenomena affect national and personal identities. Readings will be theoretical, historical, political and literary. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1201E. Feminist Theory and the Question of Sexual Subjectivity.
Many contemporary theories of sexual subjectivity have to do not with the body but with gender. Gender is seen to have liberated people from the dictates of biology. But there are other feminist theories that see sexual subjectivity as reducible neither to anatomy (biologically male/female) nor to gender (culturally male/female/other). We’ll look at current debates among theorists and will ask what these debates have to do with the canonical work of earlier feminist film theorists on questions of spectatorship. Readings include Butler, Copjec, Freud, Lacan, Ilgarayar, Kristeva, Mulvey, Doane, and others. Prerequisites: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1201J. Aesthetics and Politics (ENGL 1900E).
Interested students must register for ENGL 1900E S01 (CRN 14571)

MCM 1201K. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).
Interested students must register for ENGL 1900R S01 (CRN 14572)

MCM 1201N. Advanced Written and Oral French (FREN 1510).
Interested students must register for FREN 1510 S01

MCM 1201O. Global Media/Global War.
The 20th Century has been called the age of total war. Alongside the globalized military conflicts of the past 100 years is a corresponding globalization of visual media technologies. This course is a study of the links between the technologies, strategies, tactics and technologies of the military and those of various media industries. Topics include "target markets"; flight simulators; Google Earth; "the logistics of military perception;" the bombing of television and radio stations in Serbia and Iraq; the global presence of U.S. military bases and their role in the Americanization of global culture; and Michael Bay's Pentagon contracts. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50. First year students require instructor permission

MCM 1201P. Freedom in Africana Political Thought (AFRI 1020B).
Interested students must register for AFRI 1020B S01

Interested students must register for MUSC 1920 S01

MCM 1201T. Russian Cinema (RUSS 1250).
Interested students must register for RUSS 1250 S01 (CRN 16056)

MCM 1201W. Modernity, Italian Style (ITAL 1030A).
Interested students must register for ITAL 1030A S01

MCM 1201X. Global Media: History, Theory, Production (INTL 1800N).
Interested students must register for INTL 1800N S01 (CRN 15338)

MCM 1201Y. Reading Michel Foucault.
This course will explore Foucault’s work and impact primarily through his own writings, but also by exploring the transformation his thought has effected on traditional ways of approaching state and society, the body, social discipline, and a number of other areas of study. In short, this course seeks to put his work in the context of ideas he meant to challenge and how those challenges have been met and incorporated in current thought about politics, society, and culture. We will follow Foucault’s trajectory from what he termed “archaeology” to “genealogy.” Prerequisites: MCM 0110, 0230, 0240, 0250, 0260 or 1110. Enrollment limited to 50 Sophomores, Juniors and Seniors

MCM 1201Z. On Being Bored (ENGL 1511L).
Interested students must register for ENGL 1511L S01

MCM 1202A. The Poetics of Confession (ENGL 1561J).
Interested students must register for ENGL 1561J S01

MCM 1202B. Literature and Politics (ENGL 1900D).
Interested students must register for ENGL 1900D S01

MCM 1202C. Camera Works: The Theory and Fiction of Photography (ENGL 1900V).
Interested students must register for ENGL 1900V S01

Interested students must register for EAST 1270 S01 (CRN 14240)

MCM 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context.
Since the late 1990’s, a discourse of “extreme Asian cinema” has gained traction among aficionados of global cinema, transforming our understandings of “national cinema.” In this course, we will interrogate the spectacular aesthetics of “extremity,” with its violence, polymorphous perversion, and grotesquerie, in relation to social and cultural phenomena in contemporary East Asia. By analyzing the genres of the gangster film, the revival of wuxia (heroic martial arts genre) and samurai films, horror, revenge films, and techno-dystopia and ecological disaster anime, we will explore “extreme Asian cinema,” as a response to cultural shifts in global identities and film experience. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1202F. Science Fiction Cinema.
Although it raises compelling philosophical, aesthetic, and socio-historical questions, science fiction cinema has been underrepresented in scholarly literature and the academic curriculum. This course surveys the modern science fiction film from experiments in the silent era through the contemporary science fiction blockbuster (with particular emphasis on the latter). Covers various thematic concerns (disaster, post-apocalypse, the future, simulation, space travel and inhabitation, future cities, alien arrivals/invasions, posthumanity) and is international in scope. Films by Kubrick, Cameron, Scott, Verhoeven, Gilliam, Bigelow, Boyle, Cineman, and others. Readings in theory, philosophy, cultural studies, film studies, gender studies, and fiction. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50. Not open to first-year students
MCM 1202G. Imaging Dance and Dancing Images: Dance in and on Screen (TAPS 1280P).
Interested students must register for TAPS 1280P S01

MCM 1202H. French Cinema: The First Fifty Years (FREN 1150C).
Interested students must register for FREN 1150C S01

By analyzing films from a variety of popular genres, from war to horror, gangster, action-thriller, and disaster films, we will consider the problem-solving function, visual pleasure, visceral thrills, and ethical stakes of multiple forms of film violence, including state violence, gendered violence, heroic and anti-heroic violence, and spectacular, extreme, or fantastic violence. Further, we will ask what forms of sociality or intersubjective relations these differing modes of violence posit or problematize, to gain insight into broader questions concerning the anti-sociability of violence and the prevalence of film violence in the social, cultural, and historical contexts of contemporary East Asia. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1202J. Faking Globalization.
This course explores piracy and the fake across a range of economic, political, and cultural fields. We begin by building a genealogy of the pirate, and then shift our attention to the contemporary discourses of "faking globalization," "pirate modernity," "information feudalism," terrorism, and the like. Focus on issues related to property and the commons; innovation and value; authorship; intellectual property; mimesis and mimicry; the illegality of everyday life; development and globalization, as well as style, capacity, distribution, and consumption in/of pirate media. Readings include Agamben, Bhabha, Abbas, Deluze, Mbembe, Liang, Lessig, Heller-Roazen, Johns, Chatterjee, among others. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1202K. Garibaldi Panorama: the Invention of a Hero (from pre-juniors, and seniors include Agamben, Bhabha, Abbas, Delueze, Mbembe, Liang, Lessig, Heller-Roazen, Johns, Chatterjee, among others. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1202L. The Many Faces of Casanova (ITAL 1400J).
Interested students must register for ITAL 1400J S01 (CRN 23869)

How can we begin to think about contemporary Hollywood? This course examines Hollywood filmmaking from the end of the studio era through the present. It interrogates the concept of "classical Hollywood cinema" as it persists, develops, and/or attenuates outside of its natural habitat under the studio monopolies, addressing topics and areas like genre revisionism, New Hollywood, technological development, postmodernism, simulation, digitization, corporatization, merchandising, globalization, Vietnam, counterculture, Reaganism, 9/11, etc. Films by the likes of Sirk, Fuller, Hitchcock, Peckinpah, Kubrick, Scorsese, Coppola, Cassavetes, Polanski, Malick, Spielberg/Lucas, Carpenter, Bigelow, Cameron, Scott, Verhoeven, Lynch, Nolan, Peter Jackson, Jonze, P.T. Anderson, Rian Johnson, Winding Reifn. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors

MCM 1202N. Performance Theory: Ritual, Play and Drama in Context (TAPS 1230).
Interested students must register for TAPS 1230 S01 (CRN 15468)

MCM 1500C. Archaeology of Multimedia.
A historical and theoretical study of "multimedia" from magic lanterns to the Internet. Examines the ways in which media have always been multiple and have always impacted on each other, as well as the ways that various media discourses constitute an "archive" of the knowable and sayable

MCM 1500D. Contemporary Film Theory.
Major arguments in film theory from the late 1960s to the present, contextualized by contemporaneous intellectual tendencies and selected films. Some key issues: cinematic specificity and signification, the politics of form and style, subjectivity/spectatorship, gender/sexuality, postmodern media, digital theory and cinema. Readings from figures such as Baudry, Bordwell, Deleuze, Doane, Elsaesser, Gunning, M. Hansen, Heath, Jameson, Koch, Manovich, Metz, Mulvey, Pasolini, Rodowick, L. Williams, Wellek, Wollen, etc. Enrollment limited to 20. Prerequisite: one MCM core course. Preferences given to juniors, seniors, and graduate students. All others seeking permission, must attend the first class

MCM 1500J. Feminist Theory and the Problem of the Subject.
Readings in contemporary feminist theory and 20th-century theories of subjectivity. Topics include interpellation, modes of address, apostrophe, positionality; texts include Butler, Haraway, Spillers, Spivak. Previous work in feminist theory strongly recommended

MCM 1500K. Film and the Avant-Garde.
An examination of film's historical relations with various avant-garde movements from surrealism, French Impressionism, German Expressionism, and Dadaism to the theoretically informed independent film of the 1970s and beyond. However, the goal of the course is not a historical survey but the investigation of various conceptualizations of "avant-gardism" and its relation to modernity, mass-culture, and technology

MCM 1500L. Film Theory.
Major positions in the history of film theory, contextualized by both contemporaneous filmmaking and intellectual approaches (phenomenology, Marxism, structuralism/poststructuralism, feminism, etc.) Key issues include: cinematic specificity, cinematic representation and the real, the politics of form and style, cinema and language, subjectivity and spectatorship, film and postmodern "media." Readings in Munsterberg, Arnow, Kracauer, Bazin, Balazs, Metz, Heath, Mulvey, Williams

MCM 1500O. From Classical Film Theory to Cinema Semiotics.
Readings from earliest film theory through the emergence of cinema semiotics, with awareness of contemporaneous filmmaking and underlying philosophical and ideological tendencies. Some key issues: cinematic specificity and relations to other media; the politics of cinema; filmic representation and the real; cinema, modernity, and modernism; mass culture debates; cinema, language and signification. Readings drawn from Adorno, Arno, Balazs, Bazin, Benjamin, Bergson, Deleuze, Eco, Eisenstein, Epstein, Kracauer, Lukacs, Merleau-Ponty, Metz, Munsterberg, Pasolini, Sartre, Wollen, etc. Enrollment limited to 20. Previous work in MCM or related topics and all others seek permission from the instructor after the first class meeting

MCM 1500S. In the Public's Eye: Publicity and Surveillance.
Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena from the paparazzi to digital surveillance, from the commodification of privacy to reality television, in order to analyze this convergence's impact on theories of public sphere. Theoretical and historical readings. Class hours include viewing time

MCM 1500X. Middlemarch and the Sopranos.
The world of The Sopranos has been called "a postmodern Middlemarch, whose inhabitants' moral and spiritual development (or devolution) unfolds within a parochial social milieu." This course offers a comparative analysis of Eliot's 1871-72 novel and HBO's (continuing) television drama, juxtaposing these two very popular, very powerful serializations in formal, thematic, ideological and narrative terms

MCM 1501B. Nation and Identity: The Concept of National Cinema.
Comparative study of constructions of nationhood in films and written texts about cinema. Interrogation of the discursive, political and epistemological power achieved by different version of the concept "national cinema" and the kinds of collective identities they imagine, from early cinema to globalized media. Readings by theorists, historians and filmmakers. Screenings from pertinent contexts (e.g. Weimar Germany, U.S. classical cinema, Japanese 1930s, third cinema, New German Cinema, New Chinese cinema, multinational corporate cinema, etc.)

MCM 1501C. National Cultures/Global Media Spaces.
Contemporary cultural practices and media processes are often described as being implicated in "globalization," but this is a linkage that may well predate the present. This course examines theoretical, historical, and critical texts that conceive of media culture through notions of globalization, with attention to the status of nation and cultural identity in a transnational context

MCM 1501I. Reading Marx.
What is it to read Marx now? We will begin with a group of key texts written by Marx drawn from different points in his development, including the first volume of Capital. We will study influential later reinterpretations and commentaries on Marx that argue for his contemporary importance
(e.g., Althusser, Balibar, Benjamin, J. Butler, Derrida, Haraway, Hardt, Negri, Zizek, etc)

**MCM 1501K. Seeing Queerly: Queer Theory, Film, Video.**

While cinema has typically circumscribed vision along (hetero)sexually normative lines, can film also empower viewers to see “queerly”? How do we, as sexual subjects (gay and straight), “look” in the cinema, in both senses of the word? How have sexual desires been portrayed across film history, and how might audiences wield the look, appropriating or creating imagery with which to (re)formulate subjectivity and sexuality? This course addresses such questions as it considers both “mainstream” and “alternative” productions. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the screening.

**MCM 1501N. Television Time and Space.**

Explores television’s temporal and spatial construction, considering how television demarcates time (regulating it through flow and segmentation, articulating work and leisure times, marking familial and national events, encouraging rhythms of reception and space) and sexed and gendered subjects, consumers and commodities, familial and social tensions, and spectatorial relations (as it variously addresses viewers as active and gendered subjects, consumers and commodities, familial and defamiliarized viewers). Enrollment limited to 20. Prerequisite - one of the following: MCM 0110, MCM 0230, MCM 0240, MCM 0250, MCM 0260, MCM 1110. Preferences given to juniors, seniors, and graduate students. All others seek permission from the instructor.

**MCM 1501Q. The Close-Up: Theory and Practice.**

An examination of the use of the close-up in film and theory, from the "primitive" cinema to IMAX and from Münsterberg to Aumont and Deleuze. Special attention to the way in which the close-up has been associated insistently with the face and its heightened cultural significance, with the advent of a "cinematic language," and with questions of cinematic space and scale.

**MCM 1501W. The Rhetoric of New Media.**

An examination of contemporary theories and practices of "new media," but in particular cyberspace; investigates the ways in which information technologies are challenging our inherited ideas about knowledge and ethics. All written work for the seminar will be digital. Application required. Occasional screenings to be announced during semester.

**MCM 1502B. Publicity and Surveillance.**

Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena such as webcams, face recognition technology and networked art, as well as concepts such as enlightenment, paranoia and exhibitionism. Theoretical, historical and legal readings.

**MCM 1502C. Race And/As Spectacle.**

Theoretical and historical examination of race and/as spectacle, from 19th century world fairs and exhibitions to 20th century media events. Focuses on the productive relationship between race and media, from early cinema to the Internet.

**MCM 1502E. Theories of the Photographic Image.**

Examines the history of attempts to assimilate the photographic image to a theory of representation. Will analyze theories of photography, chronophotography, film with respect to issues of time, subjectivity, historicity, the archive. Will also address the rise of the digital image and its potential threat to photography. Readings in Krakauer, Benjamin, Bourdieu, Barthes, Batchen, Marey, Bazin, Aumont and others.

**MCM 1502H. Information, Discourse, Networks.**

Examines the historical emergence of information in relation to language and networks more broadly defined. Some key issues: the rise of new media, cyborgs and other post-human beings, the intersections between post-structuralism and cybernetics and between computer and human languages, and networked multitudes. Readings from Friedrich Kittler, Jacques Derrida, Norbert Wiener, Williams Burroughs, Felix Guattari and Gilles Deleuze. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the lab.

**MCM 1502J. Race as Archive.**

Examination of the importance of race to the logic and practice of biological, technological and cultural archives. Engaging the similarities and differences between the categorization of race in these fields, the course will focus on race as a justification for archives more broadly, and race as an archival trace "evidence" of a biological or cultural history. Readings will be theoretical, historical and literary. Preferences given to students in Modern Culture and Media, Art-Semiotics, Modern Culture and Media-German, Modern Culture and Media-Italian, Semiotics-French, Ethnic Studies, and Science & Technology Studies. All others seek permission from the instructor.

**MCM 1502K. Real TV.**

How does television bring "real" events to us? How do we know what’s "real"? What kinds of "realities" exist on television, and how do they operate (in relationship to one another, to TV fantasy, and to our everyday lives)? This course will consider not only some specific "reality genres" (news, catastrophe coverage, "surveillance programming," documentary and docudrama, talk and game shows, reality series and "docu-soaps") but the representational modes that define the reality of commercial television as a whole. Issues to be addressed include: TV "liveness," crisis and scandal, therapeutic discourses, "surveillance society," media simulation, realism and anti-realism, civic and commercial discourses, and television’s construction of history and knowledge. Preference given to graduate students, seniors, and juniors in Modern Culture and Media, Art-Semiotics, Modern Culture and Media-German, Modern Culture and Media-Italian, Semiotics-French, Science Studies, Anthropology, Comparative Literature, English, Gender Studies, and Philosophy. All other seek permission from the instructor.

**MCM 1502N. Derrida and Telecommunications.**

Derrida famously proclaimed that writing preceded speech, rendering all communications a form of writing, but he also argued that the history of psychoanalysis would have been different if Freud had used e-mail instead of snail-mail. Tracing Derrida’s thought on telecommunications from Grammatology to Writing Machines, as well as engaging his interlocutors (Samuel Weber, Avital Ronell, etc.), this course examines the importance of medium-specificity to post-structuralism. Prerequisite - two of the following: MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Preferences given to juniors and seniors in Modern Culture and Media, Art-Semiotics, Modern Culture and Media-German, Modern Culture and Media-Italian, Semiotics-French, Science Studies, Anthropology, Comparative Literature, English, Gender Studies, and Philosophy. All other seek permission from the instructor.

**MCM 1502P. Nation and Identity in Cinema.**

Comparative study of constructions of nationhood in films, different cinematic strategies, and written texts about cinema. We will examine the discursive, political and epistemological power achieved by different versions of the concept of "national cinema" and the kinds of collective identities they imagine, from early cinema to current globalized media. Readings by theorists, historians and filmmakers. Screenings from pertinent contexts (for example, Weimar Germany, U.S. classical cinema, Japanese 1930s, third cinema, New German Cinema, New Chinese cinema, multinational corporate cinema, etc). Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the screening.

**MCM 1502T. Film Noir: Femmes Fatales, Urban Space, and Paranoia.**

An examination of film noir, concentrating on the classic films of the 1940s and 1950s, but also investigating film noir’s relation to German Expressionism as well as remakes and reincarnations of the genre such as Blade Runner. We will discuss various methodologies: psychoanalysis, ideological analysis, close textual analysis, the historical asphyxia of noir. Films by Lewis, Tourneur, Wilder, Hawks, Lang, Pabst, Welles, Preminger, Hitchcock, Ray. Readings in Copjec, Zizek, Naremore, Dimendberg, Vernet, Jameson. Enrollment limited to 20. Primarily for MCM senior...
Interested students must register for ENGL 1761Q S01. MCM 1503A. Media and Memory: Representing the Holocaust.
The Holocaust has been described as unimaginable, at the limits of representation. Yet there have been numerous attempts to imagine and represent it, across media (film, television, graphic novels), genres (documentary, melodrama, comedy, fantasy), and modalities (through history and memory, “high” and “low” culture, fiction and nonfiction, reporting and marketing). Considering such attempts to represent the unrepresentable and “mediate” the immediacy of trauma, this course will explore media texts and theoretical/philosophical reflections on the Holocaust. Enrollment limited to 20. Prerequisite: one of the following: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Preference given to juniors, seniors, and graduate students. All others seek permission from the instructor.

MCM 1502V. Theories of the Body and the Limits of Constructionism.
Scholars currently argue that cultural constructionism went too far, that theories of subjectivity that dominated the academy for over two decades neglected the materiality of the body. We will examine these criticisms as well as what it means to theorize the body. Readings include Merleau-Ponty (phenomenology), Freud and Doerner (psychoanalysis), Damasio (neurology), Fausto-Sterling (biology), Butler, Grosz, Kirby, Moore, Wilson, etc. Enrollment limited to 20. Prerequisite: one related MCM course

MCM 1502X. Race and/as Technology.
This course asks: to what extent can race be considered a technology? That is, not an identity that is true or false, but rather a technique that one uses, even as one is used by it? Ranging from contemporary cyborgs to early 20th century eugenics, it investigates what race does, regardless of what we think it is. Readings will be theoretical, historical and literary. Enrollment limited to 20 juniors, seniors and graduate students. All other seek permission from the instructor. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110

MCM 1502Y. Simulation Speed Implosion: Theories of Media Technology.
Jean Baudrillard and Paul Virilio are generally regarded as two of media studies most notorious pessimists and hyperbolists. Yet they are also theorists who treat the media as technological systems that transcend the traditionally held boundaries of the cultural, economic, social and political. This course will place Baudrillard and Virilio in a context of media theory and technology studies rooted in the work of Harold Innis and Marshall McLuhan while demonstrating important differences between these figures. We will engage in close readings of Baudrillard’s and Virilio’s major works as well as some of the writings of their interlocutors. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110

MCM 1502Z. Art Cinema and Its Legacy.
Art cinema is associated with directors who achieved international prominence after World War II, with unconventional narrative films that were understood as expressions of original artistic subjectivities and film movements like the French New Wave (e.g., Antonioni, Bergman, Fellini, Godard, Resnais, and many others). Art cinema defined how many imagined non-Hollywood cinema in a global context, but was neither avant-garde nor necessarily political. Its legacy persists to the present, for example, in the reception of recent Iranian cinema and New Taiwanese cinema. We will study its aesthetic and textual strategies, its significance in global film history, and its theoretical implications. Enrollment limited to 20 juniors, seniors, and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110

MCM 1503A. The Ethics of Romanticism (ENGL 1560Y).
Interested students must register for ENGL 1560Y S01

MCM 1503B. Jane Austen and George Eliot (ENGL 1560A).
Interested students must register for ENGL 1560A S01 (CRN 24611)

MCM 1503C. “Terrific Beauty”: Literature and the Terrorist Imaginary (ENGL 1760I).
Interested students must register for ENGL 1760I S01

MCM 1503D. W. G. Sebald and Some Interlocutors (ENGL 1761Q).
Interested students must register for ENGL 1761Q S01
MCM 1503L. South Korean Cinema: From Golden Age to Korean Wave (EAST 1950U)

Interested students must register for EAST 1950U S01 (CRN 23682)

MCM 1503M. Outside Media

Media technologies (e.g., film, television, digital) are often understood in relation to a rather limited set of locations, meanings, and practices. For instance, we generally take for granted that films are exhibited in movie theaters and TV in the home. Beyond such routine sites, this course examines the import of anthropological and spatial approaches to media and media theory. Focus on non-domestic media, intermediarity, and contexts outside the cultural center (e.g., subaltern, non-western). Readings draw on anthropology, cultural geography, social theory, and media/cultural studies. Students will also develop media ethnographic projects utilizing video, photography, sound recording, etc. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors

MCM 1503N. Video Theory

This course takes as its starting point Sean Cubitt’s assertion in the early 1990s that there is not and never will be “video theory”—an assertion tethered to video’s perceived lack of a single or essential form. Focus on the history and theory of video across “old” and “new” media, including sound and image reproduction, broadcasting, video art, documentary, gaming, digital culture, and the internet. We will consider various theoretical understandings of video and its relation to production/distribution/exhibition, aesthetics, ideology, virtuality, and mass culture. Readings drawn from Cubitt, Armes, Renov, Derrida, Galloway, Hildebrand, Larkin, Elsaesser, Manovich, Deleuze, Sundaram, Juhasz, and others. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors

MCM 1503O. Market Economy, Popular Culture, and Mass Media in Contemporary China (EAST 1950G)

Interested students must register for EAST 1950G S01 (CRN 23679)

MCM 1503P. Introduction to Theories of Narrative (ENGL 1900K)

Interested students must register for ENGL 1900X S01 (CRN 14963)

MCM 1503Q. Communication Culture and Literary Politics

A common concept of "medium" ties communication culture to art and literature. But what’s a medium? Is it basic material for a work of art, like a sculptor’s clay? Is it a communications device, like a telephone? Or is it a means to share information, like a network? The course explores the social ramifications of these questions, while also considering how politics can mediate art and technology, not just the other way around. Materials include novels by Delany, Yamashita, Mackey, and LeGuin; video art; and media and community theory by Nancy, Terranova, Rancière, Riley, Matteiari, and Liu. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors

MCM 1503R. Photography and Human Rights

In the context of the current abundance of “images of atrocity” showing global human rights violations, this course will return to one milestone exhibition, The Family of Man (1955) as a potential archive containing “visual clauses” of a Universal Declaration of Human Rights. Through this exhibition, some subsequent photographic examples and related films, we will ask new questions about the documentary genre, about the role of imagination in photography, and about the use of photography in studying history, including a history of a potential past that never was and of the actual present that should not be. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors

MCM 1503S. Cinema and Memory

This course investigates some of the major ways in which cinema has been associated with memory from the late nineteenth century to the present day. Drawing from the history of cinema practice and criticism, as well as from key theories of memory, it provides multiple frameworks for making sense of cinema as a technology of memory. While we will examine popular films, emphasis is also placed on local, minority, non-theatrical, and small-scale cinemas. Topics to be covered include film archives, prosthetic memory, trauma, community and home movies, race, migration, nostalgia, and postmodernism. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors

MCM 1700A. Approaches to Digital Cinema

An advanced seminar for students of film and video production. Examines the impact of digital technologies on the forms and practices of time-based media. A production seminar in which students undertake a semester-long project. Requires technical competence and completion of an intermediate level production class. Projects may include digital films, video, installations, and other media-based works. Application required

MCM 1700B. Approaches to Narrative

A production seminar for intermediate to advanced students in film and/or video production. Students complete a substantial media project in the course of the semester. Class meetings will focus on close readings and critical feedback of students’ work during all phases of production. Texts related to narrative theory and production will be discussed. Screenings of exemplary works will supplement the class. Class members should have completed at least one time-based media class. Students are expected to be competent technically. An application will be completed during the first class session and the final class list will be determined after this meeting, with permission of the instructor. S/NC

MCM 1700D. Reframing Documentary Production: Concepts and Questions

An advanced seminar for students of video and/or film production. Focuses on the critical discussion and production of documentary. A major project (10-20 minutes) and in-class presentations of work-in-progress required. Readings on the theory and practice of the documentary, as well as the role of screening and presentation of student work. Class members should have completed at least one time-based media class. Students are expected to be competent technically. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 20. S/NC

MCM 1700F. Theory for Practice / Practice as Theory

This advanced seminar explores the tensions between theory and practice in contemporary media and art works. The course examines how recent creative practices use theoretical concepts, and how practices today often include textual production or theoretical implications. Requirements include: a major production project, short papers, presentations of work-in-progress, and weekly readings and screenings. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 20. S/NC

MCM 1700J. TvTv: Commercial and Alternative Television

Given the centrality of commercial television in our culture, what possibilities exist for independent television viewing and/or independent television production? How might we re-write TV, either by stimulating alternative readings and new interpretive practices or by creating alternative texts and new modes of transmission? Combining theory and practice (television studies and video production), this course will encourage students to critique commercial television through both media analysis and their own video work. Enrollment limited to 20. Preference given to advanced students (graduate students, seniors, juniors) in Modern Culture & Media, Art-Semiotics, MCM German, MCM Italian, Semiotics French and Visual Arts. Prerequisites: any two previous MCM courses. Interested students who cannot pre-register should come to the first day of class to fill out an application for admission by instructor permission

MCM 1700M. Techniques of Surveillance

In the decades since George Orwell wrote 1984, Big Brother has evolved from a menacing specter of government power into a form of entertainment—a reality TV show. How does the use of surveillance media technologies (e.g. film, television, digital) often include textual production or theoretical implications. Requirements related to narrative theory and practice will be discussed. Screenings of exemplary works will supplement the class. Class members should have completed at least one time-based media class. Students are expected to be competent technically. An application will be completed during the first class session and the final class list will be determined after this meeting, with permission of the instructor. S/NC
MCM 1700N. Open Source Culture. Where do we draw the line between sampling and stealing? What would it mean to call a urinal a work of art? This production seminar explores the tension between artistic appropriation and intellectual property law, considering open source software as a model for cultural production. We will trace a history of open source culture from Cubist collage and the Readymades of Marcel Duchamp through Pop art and found footage film to Hip Hop and movie trailer mashups. Students give presentations and produce media art projects. Readings include Roland Barthes, Nicholas Bourriaud, and Rosalind Krauss. Enrollment limited to 40. S/NC LILE

MCM 1700P. Radical Media. Walter Benjamin wrote that in the age of mechanical reproduction art ceases to be based on ritual and “begins to be based on another practice--politics.” What is the relation between art and politics in an age of digital distribution? This course explores the nexus of media production and political action from the films of Sergei Eisenstein to WikiLeaks. Students give research-based presentations produce media art projects. Readings include Walter Benjamin, Jacques Rancière, and Claire Bishop. The final class list will be determined by the instructor. Enrollment limited to 40. S/NC LILE

MCM 1700Q. Approaches to Media Form. A production seminar for advanced students, organized around the completion of a substantial film or video project. Screenings and discussions will emphasize alternative approaches to media practice. Students will conduct a series of presentations on their own work as it progresses. Intermediate level production class required. Application required. Applications (available at the MCM department) should be completed and returned by, October 10, 2008. Decisions will be posted on the MCM office door at the beginning of pre-registration. Enrollment limited to 20. Instructors permission required. S/NC. Students MUST register for the lecture section of the screening

MCM 1700R. The Art of Curating. It is sometimes said in contemporary art circles that curators are the new artists. Curating involves a wide range of activities, including research, selection, commissioning, collaboration with artists, presentation, interpretation, and critical writing. This production seminar considers curatorial practice as a form of cultural production, paying particular attention to questions of audience, ethical responsibility, and institutional context. Students give presentations, develop exhibition proposals, curate online exhibitions, and collaborate on gallery exhibitions, screenings, performance art presentations, or public art projects. Visiting curators present case-studies on recent projects. Readings include Pierre Bourdieu, Douglas Crimp, and Boris Groys. Enrollment limited to 40. S/NC LILE

MCM 1700S. Narrative and Immersion. A production course examining the potentials for engagement in new media installations. The course draws on techniques of narrative to establish engagement in immersive environments. Students will be introduced to cinematic concepts, interactive technologies, multi-channel video and surround sound environments. Classes will meet consisting of viewing and analysis of exemplary work, discussion of readings, and critiques of student projects. An additional 1-hour technical workshop will be devoted to learning Jitter. Class members should have completed advanced work in film/video, digital sound, and/or creative writing. Open to upper-level undergraduate and graduate students. The final class list will be determined after the first class meeting, by permission of the instructor. Lab times to be announced. S/NC

MCM 1700T. Approaches to Narrative. A media production course concerned with practical and conceptual aspects of narrative in contemporary film and dv cinema. After attention to technique (use of 16mm film and digital cameras, lighting, sound and editing), the second half of the semester will be devoted to individual projects and discussion of them. Screenings and close analysis of contemporary narrative films from the current global renaissance in narrative cinema, involving filmmakers in China, Thailand, the Philippines, Argentina, Greece, Portugal, etc. – partly led by feature filmmakers with backgrounds in the art world. Requirements include a group project and an individual advanced level project in film/video. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 20 juniors and seniors. S/NC

MCM 1970. Directed Research: Modern Culture and Media. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

MCM 1990. Honors Thesis/Project in Modern Culture and Media. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Eighth semester students only

MCM 2100A. Contemporary Feminist Theory and the Problem of the Subject. Recent feminist theory represents the persistence of identity politics and the problem of the subject in various forms: through the “intersecionality” of race, class and gender; in the idioms of psychoanalysis; in terms of the “queer” subject. We will examine these often conflicting theories and the subjects of feminism they invoke with particular attention to the modes of address.

MCM 2100B. Criticism and Culture in Marxist Theory. Major texts and arguments in 20th century Western Marxist cultural theory, from Lukács through the present. Focus on problems in the conception and reading of culture and cultural texts. Where appropriate, consideration of literature with other major theoretical frameworks (e.g., aesthetics, phenomenology, semiotics, psychoanalysis, feminism, postcolonial criticism, globalization theory, etc.). Enrollment limited to 20 graduate students. Permission required for undergraduates only

MCM 2100G. Freud and Lacan. Readings of major texts by Freud and Lacan will stress the relations between language, subjectivity and sexuality and the feminist use and/or critique of psychoanalytic concepts. We will also look at texts by other theorists (e.g. Melanie Klein, Heinz Kohut) and investigate the clinical implications of various approaches. Familiarity with semiotic and poststructuralist theory required. Enrollment limited to 20. Primarily for MCM graduate students; other qualified graduate students and MCM seniors must obtain permission from the instructor

MCM 2100I. Habits of Living: Affect and New Media. How have we become habituated to and inhabitants of new media, and what are the effects of this voluntary and involuntary habituation? This course will stress the relations between language, subjectivity and sexuality and the feminist use and/or critique of psychoanalytic concepts. We will also look at texts by other theorists (e.g. Melanie Klein, Heinz Kohut) and investigate the clinical implications of various approaches. Familiarity with semiotic and poststructuralist theory required. Additional readings in Laplanche, Weber, Zizek, Gallop, Butler

MCM 2110B. Freud and Lacan. This course will stress the relations between language, subjectivity and sexuality and the feminist use and/or critique of psychoanalytic concepts. We will also look at texts by other theorists (e.g. Melanie Klein, Heinz Kohut) and investigate the clinical implications of various approaches. Familiarity with semiotic and poststructuralist theory required. Additional readings in Laplanche, Weber, Zizek, Gallop, Butler

MCM 2110E. The Reading Effect and the Persistence of Form (ENGL 2900M). Interested students must register for ENGL 2900M S01 (CRN 259003)

MCM 2110F. The Plasticity of Form. Cultural and literary studies have increasingly engaged with the question of the aesthetic and, as a consequence, with the problem of reading, spectatorship and the user that emerges in new media. Our course will approach the articulation of subject and object at stake in these questions through the category of form. We will examine historical conceptualizations of form in various disciplines along with contemporary efforts to think form in critical, rhetorical, dynamic, interactive, and rhizomatic modes: to think the plasticity of form. Readings will range from Williams, Deleuze and Mulvey to Jacques Rancière and Catherine Malabou. Enrollment limited to 20 graduate students. Upperclass undergraduates require instructor permission
MCM 2120A. Media Archaeology.
Provides an intellectual history of "Media Archaeology," focusing on contributions by the "SofienstraBe" departments of Humboldt University in Berlin and on the importance of Marshall McLuhan and Michel Foucault, amongst others, to its development. Readings by Friedrich Kittler, Wolfgang Erst, Cornelia Vismann

MCM 2120B. New Media Theory.
An interdisciplinary investigation of "New Media Theory," bringing together historically significant texts from the fields of media, film, literary, music, visual, HCI and cultural studies, with more recent texts in new media studies. As well as exposing students to the canon (from hypertext theory to software studies, HCI to media archaeology), the course will also address the question: what is at stake in the creation of this canon and this discipline? Preferences given to Seniors and Graduate Students in Modern Culture and Media, Art-Semiotics, Modern Culture and Media-German, Modern Culture and Media-Italian, Semiotics-French, English, Comparative Literature, German, Literary Arts, Music, and Science and Technology Studies. All others seek permission from the instructor

Theoretical and political conceptions of state and global violence posed against the theory and history of cinema, as representational apparatus and as instruction. Special attention to the establishment of film as a global medium around World War I; current issues around the global, state, and biopower; "postmodern media culture," etc. Readings from sociopolitical theorists (e.g. Weber, Schmitt, Arendt, Foucault, Agamben, Hardt and Negri, etc.) and media scholars/theorists (e.g. Virilio, Prince, L. Williams, Miller, etc.) Enrollment limited to 20. Permission required for undergraduates only

MCM 2120D. Derrida and Telecommunications.
Derrida famously proclaimed that writing preceded speech—rendering all communications a form of writing—but he also argued that the history of psychoanalysis would have been different if Freud had used e-mail instead of snail-mail. Tracing Derrida’s thought re. telecommunication from Grammatology to Writing Machines, as well as engaging his interlocutors (Samuel Weber, Avital Ronell, etc.), this course examines the importance of medium-specificity to post-structuralism. Enrollment limited to 20 graduate students. Permission required for undergraduates only

MCM 2120E. Cinema, Media Culture and Political Theory: Rancière and Others.
There is a strand of contemporary thinkers concerned with political theory, in whose writings media and especially film play significant roles. Jacques Rancière has produced a major body of work on political theory, on aesthetics, and on film as well as media culture. This class will focus on a close examination of his political theory, his conceptions of film and media, and relations between the two fields in his writings. For comparison, we will also look at smaller samples of texts on political theory, and film drawn from figures such as Agamben, Badiou, Jameson, etc. Enrollment limited to 20. This class is for Graduates only. Upperclass undergraduates require instructor permission

MCM 2120F. Concepts of Space and Time in Media Discourses (HMAN 2970C).
Interested students must register for HMAN 2970C S01

MCM 2300A. Real TV.
This course will investigate the construction of reality on U.S. television, considering not only specific reality genres (news and "magazine" programs, crisis coverage, docudrama, talk and game shows) but the discursive and representational modes that define the "reality" of commercial television as a whole. Issues include: "liveness"; social relevancy; therapeutic discourse; TV personalities; media simulation; independent television; and new technologies/realisms

MCM 2300B. Television, Gender and Sexuality.
This course investigates how television produces and reproduces constructions of gender and sexuality through its institutional form (as it maps relations between the public and the private, the domestic and the social, the inside and the outside), narrative patterns (as it circulates family romances, links gender and genre, and mediates sexual and social tensions), and spectatorial relations (as it variously addresses viewers as sexed and gendered subjects, consumers and commodities, familial and defamiliarized viewers). Enrollment limited to 20. Preference given to graduate students, and then to seniors and juniors in Modern Culture & Media, Art-Semiotics, MCM-German, MCM-Italian, Semiotics French and Gender and Sexuality Studies. Instructors permission required for all undergraduate students. Interested students who cannot pre-register should come to the first day of class to fill out an application for admission

MCM 2300C. After Postmodernism: New Fictional Modes (ENGL 2760X).
Interested students must register for ENGL 2760X S01

MCM 2300D. Historicism/Photographic Media: From Kraus and Benjamin to the DEFA Documentary (GRMN 2660H).
Interested students must register for GRMN 2660H S01

MCM 2300E. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B).
Interested students must register for ENGL 2561B S01

MCM 2310C. Eisenstein and Political Modernism.
Eisenstein’s theories and films are a formative moment in cinema and media history, bringing together the ambitions of politicized film and modernist aesthetics. From the first, they were invoked by a range of radical theorists and filmmakers all the way from Brecht and Benjamin to Metz and Deleuze, as well as a variety of filmmaking practices such as militant documentary, third cinema and Godard. In this seminar, we will intensively study Eisenstein’s theories, filmic practices and shifting historical contexts, from the heady days of the politically and aesthetically avant-garde 1920s, through the transformations of his theories in the 1930s and 1940s (many only available posthumously) and of his later film projects (several unfinished). We will also trace out some filiations and rereadings of Eisenstein within the history of politically conscious modernist film practices and theories. Permission required for undergraduates only; undergraduates seeking permission must attend the first class session

MCM 2310D. The Idea of a Medium.
What is a "medium" (a term we often seem to take for granted)? An examination of issues of medium specificity, intermediarity, convergence, formalism and the idea of a "post-medium era," in relation to the media of print, photography, film, television, and digital media. We will also investigate the role of the museum and alternative screening or exhibition spaces as well as "virtual space" in delineating reception of the media. Enrollment limited to 20. Primarily for MCM graduate students; other qualified graduate students and MCM seniors must obtain permission after the first class. Students MUST register for the lecture section and the screening

MCM 2310E. TV Space and Time.
Explores television’s temporal and spatial construction, considering how television demarcates time and space through flow and accumulation, articulating work and leisure times, marking familial and national events, encouraging rhythms of reception) and space (mapping public and private space, defining a “global media culture” through local viewings, representing and enacting travel and exchange, creating imaginary geographies and communities). Enrollment limited to 20. Preferences given to graduate students. All others seek permission from the instructor. Students MUST register for the lecture section and the screening

MCM 2310G. Cultural Studies and the Problem of Form.
This course examines the emergence and contemporary practice of "cultural studies" with a focus on concepts of form. We will consider cultural studies critiques of disciplines, canons, and the aesthetic; the politics of form; theories of reading and spectatoriality; "popular" and "mass" forms; and competing definitions of culture as form arising in fields from visual and media studies to postcoloniality and queer theory. Readings from Williams, Hall, Mulvey, Althusser, Spivak, Deleuze, Hartman, Agamben, Sedgwick, Galloway. Instructor permission required. All students seeking permission must attend first class

MCM 2310H. Television Realities.
How does television bring "real" events to us? How do we define or know what's "real"? What kinds of "realities" exist on television, and how do they operate (in relationship to one another, to TV fantasy, to social structures, and to our everyday lives)? This course will consider not only some specific "reality genres" (news, catastrophe coverage, "live" and "historical" programs, "surveillance programming," documentary and docudrama, talk and game shows, reality series and "docu-soaps") but the
MCM 2310. At the Limits: Media Representation of the Holocaust.
The Holocaust has been described as unimaginable, at the limits of representation. Yet there have been numerous attempts to imagine and represent it, across media (film, television, graphic novels), genres (documentary, melodrama, comedy, fantasy), and modalities (through history and memory, “high” and “low” culture, fiction and nonfiction, reporting and marketing). Considering such attempts to represent the unrepresentable and mediate the immediacy of trauma, this course will explore media texts and theoretical/philosophical reflections on the Holocaust. Enrollment limited to 20. This course is for Graduates only. Upperclass undergraduates require instructor’s permission.

MCM 2330. Critical Genres.
Introduces graduate students to specific aspects of the history, methods, and arguments of the academic interdiscipline known as “cultural studies.” In a workshop forum, we discuss the conventions governing academic genres and consider the evidence, argumentation, rhetoric, and the construction of expertise.

MCM 2500A. Film and Modernity.
An examination of films and film movements from 1895 through the 1930s in relation to the rise of modernity, modernization, and modernism. We will analyze the films through the lenses of theories of technology, temporality, the avant-garde, and the emergence of mass culture. Readings in Gunning, Bergson, Simmel, Kracauer, Benjamin, Jameson, Hansen, and others.

MCM 2500C. Media Archaeology.
Provides an intellectual history of “Media Archaeology,” focusing on contributions by the “Sophienstraße” departments of Humboldt University in Berlin and on the importance of Marshall McLuhan and Michel Foucault, amongst others, to its development. Readings in Friedrich Kittler, Wolfgang Ernst, Cornelia Vismann. Permission required for undergraduates only.

MCM 2500D. Archaeologies of the Projected Image.
Analysis of the history and theory of projected images from the magic lantern to IMAX. We will examine theories of scale, architecture, and perspective in order to consider the changing size of moving images, from the flip book to the cinema screen to the cell phone. We will also consider theories of mass culture, aesthetic technologies, the sublime, and public art. Readings in Jonathan Crary, Siegfried Kracauer, Sigmund Freud, Walter Benjamin, Henri Lefebvre, Jean-François Lyotard, Friedrich Kittler, Laurent Manconi, Enki Huhnamo, and others. Enrollment limited to 20 graduate students. Permission required for undergraduates only.

MCM 2500E. Temporality in and the Cinema.
An examination of the cinema’s historical and theoretical position as a mode of representing time. Is time recorded or produced by film? How can we analyze duration in the cinema? What is the cinema’s relation to the archive and to modernity? We will read work by Bergson, Freud, Marey, Kracauer, Benjamin, Deleuze, and others. Films by Lumière, Griffith, Snow, Tsai Ming-Liang, Hitchcock, and others. Enrollment limited to 20. This course is for Graduates only. Upperclass undergraduates require instructor’s permission.

MCM 2510A. Art Cinema as Transnational Textual Strategy.
In the 1960s, Antonioni, Bergman, Buñuel, Fassbinder, Fellini, Godard, Resnais, etc. achieved international, global, prominence by bending mainstream narrative cinema conventions in the name of original national and artistic subjectivities. But such “art cinema” has pervaded film history, from the 1920s (e.g. German Expressionism) to the present (e.g. New Iranian Cinema). Investigation of art cinema’s textual strategies, conceptual underpinnings, and historical functions. Enrollment limited to 20.

Theoretical and political conceptions of state and global violence posed against the history of cinema, as representational apparatus and as institution. Special attention to the establishment of film as a global medium through World War I, and current work around “globalization,” “global media culture,” etc. Readings from sociopolitical theorists (e.g. Weber, Benjamin, Schmitt, Arendt, Agabem, Hardt and Negri, Foucault) and cinema/media scholars (e.g. Virilio, Prince, L. Williams, Kaes, etc.). Enrollment limited to 20. This course is for Graduates only. Upperclass undergraduates require instructor’s permission. Students must register for the primary meeting and one film screening. 999999.

MCM 2510C. The Adventures of Dignity.
What is the ideological function of “dignity” as it is invoked in human rights discourses? What concepts of humankind and what fantasies of wholeness are assumed and reiterated? Readings include histories of human rights, treatises on dignity from Kant to Foucault, Elaine Scarry, and other theorists. Enrollment limited to 20. This class is for Graduates only. Upperclass undergraduates require instructor’s permission.

MCM 2980. Independent Reading and Research in Modern Culture and Media.
Individual reading and research for doctoral candidates. Not open to undergraduates. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

MCM 2990. Thesis Preparation.
No description available.

Music

Chair
James Marshall Baker

The study of music – a phenomenon known to all people in all ages – lies naturally at the heart of a liberal education. The Department of Music at Brown provides an ideal environment for such an education, with its integrated faculty of scholars, performers, composers, and theorists. The curriculum of the Department of Music combines studies in history, theory, ethnomusicology, and musicianship with courses in composition, technology, and performance. Application merges with analysis, creation with cultural study, and multimedia experiments with broad meditations on sound, in a unique department that welcomes all.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Music/

Music Concentration Requirements

The concentration in Music integrates theory, history, ethnomusicology, technology, composition, and performance. Students may select from among three tracks within the concentration: the first track emphasizes theory, history, and composition; a second track emphasizes ethnomusicology; and a third track focuses on computer music and multimedia. The Music curriculum is supported by the Orwig Music Library, a state-of-the-art facility with holdings of over 40,000 books and scores and an equal number of sound and video recordings. Concentrators are encouraged to participate in one or more of the departmentally sponsored performing organizations: Chorus, Orchestra, Jazz Band, Wind Symphony, Chamber Music Performance, Electroacoustic Ensemble, Sacred Harp/Shape-Note Singing, Old-time String Band, Javanese Gamelan, or Ghanaian Drumming.

MUSC 0550 and MUSC 0560 are prerequisite for many upper-level music courses and are required for all three concentration tracks. These courses lay the foundation for an understanding of the structure of Western music, and develop the musicianship and keyboard skills expected of all concentrators. Students considering a concentration in Music should complete this sequence as early as possible, preferably by the end of sophomore year.

The Department of Music does not award course credit for Advanced Placement (A.P.) courses. Students may receive placement credit for MUSC 0550 and/or MUSC 0560, however. Students interested in placing out of MUSC 0550-MUSC 0560 must take the theory placement test administered during the first class meeting of MUSC 0550 at the beginning of the fall semester. Each student who passes the test will consult with the director of the course to work out individual arrangements for placement credit.
Participation in one or more of the departmentally sponsored performing organizations is highly recommended: Chorus, Orchestra, Jazz Band, Wind Symphony, Chamber Music Performance, Electroacoustic Ensemble, Sacred Harp/Shape-Note Singing, Old-time String Band, Javanese Gamelan, or Ghanaian drumming.

All music courses—including performance courses—are open to all Brown students, provided that they have satisfied the prerequisites.

**Concentration Requirements:**

**History/Theory/Composition Track:**

**Music Theory**
- MUSC 0550 Theory of Tonal Music (offered every fall) 1
- MUSC 0560 Theory of Tonal Music (offered every spring) 1

**Advanced Theory**
- Select two of the following (the third is optional): 2
  - MUSC 0910 Medieval and Renaissance Music
  - MUSC 0920 Baroque and Classic Music
  - MUSC 0930 Romantic and Modern Music

**Advanced Musicianship**
- MUSC 1010 Advanced Musicianship I (usually offered every other fall) 0.5
- MUSC 1011 Advanced Musicianship II (usually offered every other fall) 0.5

**Ethnomusicology**
- MUSC 1900 Introduction to Ethnomusicology (usually offered annually) 1

**Electives:**
- Three upper-level courses are required (i.e., no course below MUSC 0570); 3

Total Credits 11

1 Prerequisite: MUSC 0560
2 Should be taken before the senior year.
3 1600-level seminars are preferred. Up to two full Applied Music or ensemble credits (i.e., four semesters) may be applied to the concentration requirements.

**Ethnomusicology Track:**

**Music Theory**
- MUSC 0550 Theory of Tonal Music (offered every fall) 1
- MUSC 0560 Theory of Tonal Music (offered every spring) 1

**Other Foundational Courses**
- ANTH 0100 Introduction to Cultural Anthropology 1
- MUSC 1900 Introduction to Ethnomusicology (usually offered annually) 1

**History**
- Select two of the following (the third is optional): 2
  - MUSC 0910 Medieval and Renaissance Music
  - MUSC 0920 Baroque and Classic Music
  - MUSC 0930 Romantic and Modern Music

**Electives in Ethnomusicology**
- Four additional courses in ethnomusicology numbered 1000 or higher are required. 2

Total Credits 10

1 Should be taken before the senior year.
2 For a list of qualifying courses, see the Concentration Advisor.
3 For more information on admission and program requirements for Ethnomusicology, please visit the following website: [http://www.brown.edu/academics/gradschool/programs/music-ethnomusicology](http://www.brown.edu/academics/gradschool/programs/music-ethnomusicology)

**Computer Music and Multimedia Track:**

**Music Theory**
- MUSC 0550 Theory of Tonal Music (offered every fall) 1
- MUSC 0560 Theory of Tonal Music (offered every spring) 1

**Computer Music Foundation**
- MUSC 0200 Computers and Music 1
- MUSC 1200 Seminar in Electronic Music: Recording Studio as Compositional Tool 1
- MUSC 1210 Seminar in Electronic Music: Real-Time Systems 1

**Musicology Ethnomusicology Elective**
- One scholarly course numbered above MUSC 0900 1

**Electives:**
- Four elective courses selected in any combination from the following groups:
  - Computer Music and Multimedia courses, MUSC 1220–1290 or MUSC 2200–2290
  - Theory and composition courses, MUSC 1020–1190
  - No more than one lower–level Computer Music and Multimedia course, MUSC 0210–0230
  - No more than one electronic art production course (VISA or MCM) from approved list (see the Concentration Advisor for current approved courses in this area)

Total Credits 10

**Music Graduate Program**

The department of Music offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree in either Computer Music and Multimedia or Ethnomusicology.

For more information on admission and program requirements for Computer Music and Multimedia, please visit the following website: [http://www.brown.edu/academics/gradschool/programs/music-computer-music-and-multimedia](http://www.brown.edu/academics/gradschool/programs/music-computer-music-and-multimedia)

For more information on admission and program requirements for Ethnomusicology, please visit the following website: [http://www.brown.edu/academics/gradschool/programs/music-ethnomusicology](http://www.brown.edu/academics/gradschool/programs/music-ethnomusicology)

**Courses**

**MUSC 0010. Introduction to Western Music.**
A study of a thousand years of music of Europe and America through CDs, DVDs, and YouTube. We’ll explore how individuals, institutions, and societies create music, use it, experience it, pay for it, and control it. We’ll discuss music and time, music and politics, music and identity. Still, the heart of the course is listening to great music, and learning how it works.

**MUSC 0020. Popular Music in Society.**
Critical survey of a variety of contemporary American popular music styles (including rock’n’roll, folk revival, heavy metal, progressive rock, reggae, punk, rap, world beat) and their sociocultural contexts. Aural analysis of musical examples and critical reading of media texts, with study of the music’s relationship to commerce, racial and ethnic identity, subculture, gender, and politics.

**MUSC 0021A. The Changing Broadway Musical.**
Can the history of the musical on (or near) Broadway provide useful insight into changing American values? Starting with Show Boat (1927), this course offers a multi-faceted analysis of one significant musical from each subsequent decade. Students choose the examples and direct the analysis of shows from the 1980s, 1990s, and if time permits, the 2000s. Enrollment limited to 20 first year students. FYS
MUSC 0021B. Reading Jazz
This course will explore the musical aesthetics of jazz in texts about its world. Students will listen to music and read poetry, fiction, autobiography and criticism to investigate techniques (including improvisation, rhythm, timbre and articulation), which authors such as Langston Hughes, Ralph Ellison, Charles Mingus, Stanley Crouch and Jack Kerouac employed to describe and support a creative community. Enrollment limited to 20 first year students. FYS

MUSC 0021C. Bach.
The course will explore the life and work of J. S. Bach, with an emphasis on his place in the Baroque era, and his influence on later composers. Topics will include issues of performance practice, surviving source material, and performance issues in our own time. Students will listen to music, live and recorded, compare several biographies, and explore the world of Bach criticism. Enrollment limited to 20 first year students. FYS

MUSC 0021D. Latino Diaspora Music.
This first-year seminar will explore the discipline of ethnomusicology and the cultural diversity of the Americas through the lens of Latin American music. Readings will focus on particular musical and dance genres that originated in the Caribbean and Mexico and are now practiced in North American diaspora contexts. Students will undertake individual ethnographic projects on a wide variety of Latino diaspora music traditions, to be documented via publicly-accessible research blogs. Recurring themes that cross-cut the course will include migration, cultural hybridity, youth culture, and musical collaboration/appropriation. The seminar will facilitate an understanding of the historical development and transnational pathways of musical traditions. No formal background in music is required. Enrollment limited to 20 first-year students. FYS

MUSC 0021E. Good Vibrations: The Music of Everyday Objects.
This seminar will investigate the sonic properties of everyday objects and environments, and how they can transform into musical expression. Through a focus on listening and experimentation, the seminar will explore resonances, reverberation, field recording, feedback, circuit bending, archaeological acoustics, and other topics. Students will create individual and collaborative compositions and performance situations. No formal music background is required. Enrollment limited to 20 first year students. Instructor permission required. FYS

MUSC 0021F. Popular Music and Society in Latin America.
This course examines the way that popular music shapes, and is shaped by, its social environment, with a special focus on twentieth-century Cuban and Brazilian styles. It introduces students to sociomusical analysis, by exploring the way that selected styles connect with the lived experiences of local audiences, the artistic and political goals that have motivated key performers, and the effect of their actions on broader regional debates. Issues covered include the way that musical styles become national symbols; music as a medium for social politics; and the roles of industrialization, migration, urbanization, and media dissemination in driving musical change. Enrollment limited to 20 first year students. DVPS, FYS, LILE

MUSC 0021G. Duke Ellington.
This class will be an examination of the life and work of Duke Ellington. We will use recordings, scores, films, autobiographies, interviews, oral histories and other primary source materials as well as biographical, theoretical and analytical readings to study Ellington’s three careers: the composer, the performer and the band leader. We will analyze his work largely within the musical parameters of form, improvisation techniques, orchestration, instrumentation, rhythmic and choral structures, and concepts of tone quality. Although musical literacy is not required for this course, students who so want may receive tutorials in the rudiments of theory and score reading. Enrollment limited to 20 first year students. FYS

Ever since Karl Marx and Friedrich Engels wrote their “Communist Manifesto” (1848), artists, activists and politicians have used manifestos to announce radical change and justify provocative new ideas or practices. This seminar examines the manifesto as a genre of writing with a particularly strong influence on artistic movements in 20th century Modernism. Looking at examples by poets, musicians, and visual artists, we consider how they are informed by visions of progress, social action, political efficacy, and artistic or historical necessity. Authors include Russo, Apollinaire, Schoenberg, Munich, Klee, Kandinsky, Stravinsky, Dali, Borges, Artaud, Frank O’Hara, Duchamp, Mallarmé, and Boulez. Enrollment limited to 20 first year students. FYS WRIT

MUSC 0030. History of Jazz.
The development of jazz from its roots to the present. Focuses on the study of style types (including New Orleans style, early piano jazz, swing, bebop, and cool jazz) and their major instrumental and vocal exponents. Jazz as a social phenomenon is studied in relation to contextual aspects of folk, popular, and art music traditions in the U.S

MUSC 0040. World Music Cultures (Africa, America, Europe, Oceania).
A survey of a variety of musical styles from Africa, the Americas, Europe, and Oceania outside the Western art music tradition. Introduces these musics in their historical, social, and cultural context, in an attempt to understand them in their own theoretical systems and aesthetic frameworks

MUSC 0041. World Music Cultures (Middle East and Asia).
Introductory survey of several of the world’s musical traditions, with an emphasis on East, South, and Southeast Asia. Expands powers of musical appreciation through lectures, guided listening, and active participation in music-making. Focuses on traditional music and its relations to dance and theatre, and to its social, religious, and historical contexts, but also includes popular music and the effects of modernization. No prerequisites

MUSC 0042. Diaspora Music in the Americas.
A comparative approach to musical practices in diaspora contexts in the Americas. We will engage with the critical literature on ethnicity, globalization, hybridity, and identity in connection with ethnographic case studies of particular diaspora communities (including African, Jewish, Asian, Arab, and Latino diasporas). Students will conduct ethnographic projects and investigate music’s role in the American “ethnic media.” No prerequisites

MUSC 0051. Mozart.
Mozart’s life and music from soup to nuts. While we’ll read some of the rich correspondence that anchors his biography, the heart of the course is a study of his glorious music, from intimate private piano pieces to public operas and ending with the Requiem. A rudimentary ability to read music is necessary. We’ll offer an optional listening section

MUSC 0052. Beethoven.
This course will study the life and music of the iconic Western composer, the genius who triumphed over adversity and wrote music that traced the same heroic arc. We will investigate some sources that feed into his music, among them the French Revolution, Napoleon’s remaking of Europe, the Romantic concept of composer as suffering artist, and his response to his debilitating deafness. A particular focus will be the Ninth Symphony, including attendance at rehearsals and a performance with the Brown Orchestra and interviews with the musicians involved. 999999

MUSC 0059. Jazz Masters.
Examines recordings, scores, films, autobiographies, interviews, oral histories, and other primary source materials as well as biographical, theoretical, and analytical readings to study the life and work of Duke Ellington. His career as performer, band leader, and composer is examined in the context of his predecessors and contemporaries. Tutorials in the rudiments of theory, score reading, and ear training are available. Prerequisite: MU 36 or permission of instructor

Folk songs, fiddle tunes, lined-out and shape-note hymnody, bluegrass, and country music, mainly in Appalachia and the South. Historical development, musical design, and how the musics construct working-class and regional identities, religious experience, gender, and rural values, with attention to commodification and the rise of the national country music industry

MUSC 0061. Blues.
Down-home, classic, “Chicago,” and urban blues. History, musical structure, musical styles, singers’ lives, and meanings of blues lyrics. The current blues revival, blues and tourism, race and revisionist blues scholarship, and the relation of blues to African- American poetry and fiction. Artists such as Ma Rainey, Charley Patton, Robert Johnson, Lightnin’ Hopkins, Muddy Waters, B. B. King, Buddy Guy, Robert Cray
MUSC 0062. Musical Youth Cultures
A cross-cultural examination of music-oriented youth subcultures. Topics will include youth-produced vs. youth-consumed music, club culture and associated media technologies, online communities, activist music collectives, student organizations, and concepts of the mainstream vs. the underground. Students will undertake ethnographic projects and will use web-based multimedia to present their findings. No prerequisites

MUSC 0063. Contemplative Music of India
Contemplative Music of India provides a comprehensive overview of many important traditions within the contemplative musical heritage of India, including a detailed exploration of Vedic hymnology, the classical musical traditions of both North and South India (Hindustani and Carnatic musics), the devotional music of the medieval bhakti mystics, and the ecstatic modes of the Sufi saints. With these varied practices in mind, the class will explore the myriad ways in which South Asians have used music as a vehicle to achieve and sustain contemplative states of mind. The class is open to everyone regardless of musical background. Enrollment limited to 20

MUSC 0064. Honky Tonk Heroes
This course explores country music from its origins to the present day. We will trace its development through the careers of foundational artists like the Carter Family, Hank Williams, Loretta Lynn, and Willie Nelson, and evaluate the way that their legacy is reflected in the work of contemporary artists like Miranda Lambert, Hayes Carll, and Neko Case. Bell, and the individual creativity of these figures, we will consider the way that country music has been shaped by the recording industry, the relation it has to race, gender, and political identities, and the international spread of the American country sound.

MUSC 0071. Opera.
A survey of the history, aesthetics, and politics of opera from 1600 to the present day. Analyzes operas and scenes by Monteverdi, Purcell, Mozart, Rossini, Verdi, Wagner, Strauss, and others. Ability to read music not required.

MUSC 0072. The History of Musical Theatre (TAPS 0960C).
Interested students must register for TAPS 0960C S01

MUSC 0075. Jazz and American Culture
Explores jazz in relation to American history, discussing how economics, war conditions, regional differences, and race relations shaped the music as its public reception. With readings from A. Baraka, L. Levine, R. Ellison, L. Erenberg, E. Lott, G. Early, S. DeVeaux and others, we address how jazz embodies social and political values or expresses national character. Open to non-musicians. Music proficiency preferred but not required. Enrollment limited to 60

MUSC 0080. Adaptation Culture: New Media <--- Traditional Theatres (TAPS 0980).
Interested students must register for TAPS 0080 S01 (CRN 16451)

MUSC 0120. Words About Music: Discovering Music Through Writing.
This seminar will explore the elusive meanings of music and the challenges of representing music in text. Exploring a variety of musical genres and approaches to the study of music, we will examine how authors treat music in text, and develop strategies for the analysis of musical performance in its cultural and social context.

An introduction to the field of computer music, focusing on the use of electronics and computers in music and performance. Investigates basic acoustics, perception of sound, the history of music technology, and musical applications. Extensive listening assignments illustrate the impact of technology on popular and experimental genres. No prerequisites, though some experience with computers and some knowledge of music is very helpful. Significant hands-on experience with computer music systems. Enrollment limited to 80 students. Permission will be granted based on a questionnaire given in the first class, with preference given to lower-level students.

MUSC 0210A. Introductory Topics in Interactive Performance and Composition: Performing with Media.
This studio course is for choreographers, directors, film-makers, designers or anyone interested in the collision between new media and performance. Through the creation of new works we will explore practical issues, compositional strategies, and aesthetic aspects of hybrid performance. Students will create collaborative and independent multimedia works. Some instruction in video, sound, and advanced media software will be offered.

MUSC 0210B. Real-Time Systems.
A study of works employing electronic media, including music on CD, multimedia, and live performance. Technical aspects of the course focus on programming and signal processing using Max/MSP to create interactive projects and algorithmic compositions. Prerequisite: MUSC 0200 or equivalent. Enrollment is limited. Written permission required.

MUSC 0210C. Music/Video: An Introduction to Electronic Sound and Image.
A survey of basic techniques in creating computer-based music and video, with a special focus on the ways that sound and image impact one another. We will work to develop critical listening and viewing skills through the study of important historical and contemporary works ranging from experimental audio and video to film soundtracks to MTV.

MUSC 0210D. Advanced Studio Composition.
This course will explore the elusive meanings of music and the challenges of representing music in text. Exploring a variety of musical genres and approaches to the study of music, we will examine how authors treat music in text, and develop strategies for the analysis of musical performance in its cultural and social context.

MUSC 0220. Electroacoustic Improv Ensemble.
An ensemble devoted to free improvisation with new media. Experimental approaches to sound and focused listening techniques are explored with acoustic instruments, live electronics, real-time video, together with networked improvisation, and more. Enrollment limited to 12 students; by audition.

MUSC 0221. Electroacoustic Improv Ensemble.
An ensemble devoted to free improvisation with new media. Experimental approaches to sound and focused listening techniques are explored with acoustic instruments, live electronics, real-time video, together with networked improvisation, and more. Enrollment limited to 12 students; by audition.

MUSC 0400. Introduction to Music Theory.
An introduction to musical terms, elements, and techniques, including notation, intervals, scales and modes, triads and seventh chords, modulation, melody writing and harmonization, analysis, and composition. Ear-training and sight-singing are included. For students with some musical training. Enrollment limited to 40.

MUSC 0450. On Songs and Songwriting.
A study of the art and craft of song from the perspective of the listener, the critic, the writer, and the performer. Students will examine a large range of music, from the middle ages to the present. Topics to include: song and memory; voice and literary register; declamation and delivery; melody and melodrama; rhyme and rhythm; phrasing and form. Emphasis will be on both criticism and creation, as students select their genre, hone their analytical skills, and try their hand at writing music. Some prior knowledge of music desirable. Course will feature at least one visit by a living songwriting, and will culminate in a performance and a recording of original songs by students enrolled in the class. Enrollment by audition and limited to 25. Instructor permission required.

MUSC 0455. Musical Theatre Songwriting (TAPS 0960A).
Interested students must register for TAPS 0960A S01

MUSC 0456. Musical Theatre Writing Workshop (TAPS 0960B).
Interested students must register for TAPS 0960B S01
MUSC 0646. Brazilian Choro Ensemble.
Half credit each semester. Students will play this popular Brazilian style, which emerged in the late 19th century and is often compared to early jazz. Classes run according to the traditional roda model, a structured jam session where performers read through, improvise upon, and hone their abilities to play familiar tunes. Prior familiarity with choro music is not required, but some instrumental expertise is; ability to read notation preferred. Typical instruments include guitar, cavaquinho (Brazilian ukulele), mandolin, flute, and pandeiro (Brazilian tambourine), but others are welcome to participate on instructor approval, as are performers interested in learning these. Enrollment limited to 20

MUSC 0650. Sacred Harp/Shape-Note Singing.
Half credit each semester. Students will learn the traditional performance practices associated with the shape-note tunebook The Sacred Harp, a compilation of American vernacular hymnody first published in Georgia in 1844. This is an unaccompanied, four-part, participatory singing tradition. Ability to read Western music notation helpful but not required. No concert performances. No prerequisites. Repeatable for credit. S/NC

MUSC 0661. Sacred Harp/Shape-Note Singing.
Half credit each semester. Students will learn the traditional performance practices associated with the shape-note tunebook The Sacred Harp, a compilation of American vernacular hymnody first published in Georgia in 1844. This is an unaccompanied, four-part, participatory singing tradition. Ability to read Western music notation helpful but not required. No concert performances. No prerequisites. Repeatable for credit. S/NC

MUSC 0670. Old-Time String Band.
Half course each semester. Instruction and ensemble playing. Music taught by ear. American (southern Appalachian Mountain) traditional music on violin (fiddle), 5-string banjo, mandolin, and guitar. Enrollment limited to 20 students

MUSC 0671. Old-Time String Band.
See Old-Time String Band (MUSC 0670) for course description. Enrollment limited to 20 students
MUSC 0680. Chamber Music Performance.
Half credit each semester. The practical study of the literature of chamber music through participation in a small ensemble. Regular rehearsals, coaching by department staff, and performances are required. Enrollment is by audition. Students will be notified of audition results within the first ten days of the semester. Restricted to skilled instrumentists. May be repeated for credit

MUSC 0681. Chamber Music Performance.
See Chamber Music Performance (MUSC 0680) for course description

MUSC 0690. Middle Eastern Ensemble.
Instruction, rehearsals, and performances in music from Turkey. String players (violin, viola, cello, bass), percussionists, brass and reed instruments as well as singers are welcome. We will explore classical Ottoman music, a variety of Turkish, Greek, Kurdish and Sephardic Jewish folk music as well as Turkish Sufi music, Greek-Orthodox church music and Maftirim music in Hebrew. Students audition at first class. This is a half-credit course. May be repeated for credit. Enrollment limited to 24. Final class list will be determined after the first meeting. SNC

MUSC 0691. Middle Eastern Ensemble.
Instruction, rehearsals, and performances in music from Turkey. String players (violin, viola, cello, bass), percussionists, brass and reed instruments as well as singers are welcome. We will explore classical Ottoman music, a variety of Turkish, Greek, Kurdish and Sephardic Jewish folk music as well as Turkish Sufi music, Greek-Orthodox church music and Maftirim music in Hebrew. Students audition at first class. This is a half-credit course. May be repeated for credit. Enrollment limited to 24. Final class list will be determined after the first meeting. SNC

Half credit each semester. Restricted to skilled musicians. Openings are limited. Enrollment and re-enrollment is by audition and jury. Lessons are given by consultants to the Applied Music Program. A fee is charged for enrollment. Copies of the Applied Music Program Guidelines giving detailed information are available online at www.brown.edu/music. May be repeated up to four times for credit

A history of western European music to Monteverdi’s Orfeo (1607), with emphasis on the analysis of individual works supported by reading and listening. Among the major composers studied are Byrd, Dufay, Josquin, Machaut, and Palestrina. Strongly recommended for freshmen and sophomores considering a concentration in music. Limited to students who can read music. Prerequisite: MUSC 0550 or permission of instructor

A history of music in European society from Monteverdi’s opera Orfeo to Beethoven’s Ninth, studied through texts, scores, CDs, DVDs, and YouTube. We’ll spend two-thirds of our time on five composers: Bach, Handel, Haydn, Mozart, and Beethoven. Prerequisite: MUSC0550 or equivalent

A history of European and American art music from Beethoven’s Ninth Symphony to the Postmodernists. Prerequisite: MUSC 0550 or permission of instructor

MUSC 1010. Advanced Musicianship I.
Training in advanced musicianship skills relevant to Western art music from the sixteenth Century to the present, including sight singing, ear training, score reading, keyboard harmony, improvisation, and musical transcription. Prerequisite: MUSC 0560 with a grade of B, or permission of the instructor

MUSC 1011. Advanced Musicianship II.
Continuation of MUSC 1010. Prerequisite: MUSC 1010 or permission of the instructor

MUSC 1020. Modal Counterpoint.
An introduction to contrapuntal techniques of the 16th century with particular attention to the music of Lassus and Palestrina. Two hours per week of ear training and sight singing. Prerequisite: MUSC 0560

MUSC 1030. Tonal Counterpoint.
The contrapuntal techniques of the 18th century with emphasis on music of Bach. Written exercises in and analysis of several genres including fugue. Prerequisite: MUSC 0560 or permission of instructor

MUSC 1040. Advanced Music Theory I.
A study of chromaticism and advanced tonal techniques, with a focus on 19th-century European art music. Assignments will include exercises in analysis and composition and in-class presentations. Prerequisite: MUSC 0560 with a grade of B, or the equivalent

MUSC 1050. Advanced Music Theory II.
A study of theories of Western art music since Debussy. Exercises in analysis and composition, focusing on works of Debussy, Stravinsky, Schoenberg, Webem, Bartok, and Ives. Students give presentations on selected later composers. Prerequisite: MUSC 0560 with grade of B, or the equivalent

Study of the implications of musical analysis for performance. Students prepare solo or chamber works for performance in a formal concert presented at the end of the course. Focuses on problems of interpretation and their resolution through analysis of musical structure. Short analytical assignments and an extended analytical project required. Prerequisite: MUSC 0560 or permission of the instructor and proficiency on a musical instrument

MUSC 1070. Music After 1945.
A study of the most important composers and styles of European and American concert music since the end of the second World War. Assignments will include readings from theoretical and critical writing of the period; score study, analysis and performance of representative works; and compositions in the style of selected composers. Prerequisite: MU 56 plus one course numbered between MU 103 and MU 108

MUSC 1100. Introduction to Composition.
Composition students begin by using technical resources developed in their previous theoretical studies. Analysis and discussion of contemporary music provides examples of alternatives to traditional compositional strategies, which students integrate into later assignments. A study of contemporary notational practices and computer-based manuscripting and sequencing is also included. Prerequisite: MUSC 0560 or permission of the instructor. Enrollment limited to 20 students

MUSC 1110. Seminar in Composition.
Finding a personal voice as a composer. Assignments develop familiarity with large forms and increasingly complex structures. Analyses of contemporary compositions elucidate issues of aesthetic and political stance inherent in compositional activity and teach technical facility and range of expression. Problems of rehearsal and performance for new music are considered. Prerequisite: MUSC 0560 and 1102, or permission of the instructor. Enrollment limited to 20 students

MUSC 1120. The Technique of Orchestration.
The study of orchestration includes the ranges, sounds, and idiosyncrasies of the individual instruments, and the combination of those instruments into ensemble textures. A series of graduated assignments, including pieces for solo cello, string quartet, wind quintet, wind ensemble, and full orchestra. form the basis of this course. Prerequisite: MUSC0560 or permission of the instructor. Not open to first year students

MUSC 1130. Jazz Composition and Arranging.
A review of jazz theory topics, including rhythmic structures, scales and modes, harmonic progressions and substitutions, improvisation techniques, forms and development. Weekly writing assignments for two to five parts with rhythm section accompaniment. Students compose and orchestrate three works for small and large jazz ensembles. Guest composers review students' compositions and various Brown jazz bands rehearse and record them. Prerequisites: MUSC 0550

MUSC 1140. Classical Improvisation.
A historical and practical study of improvisation in western classical traditions from the middle ages to the 19th century, with emphasis on the common practice period 1700-1850. Students will apply theoretical knowledge in harmony and counterpoint to in-class improvisations, learning such skills as melodic ornamentation, chaconne-bass elaborations, variations, preluding, and free improvisation starting with simple exercises and gradually elaborating more complex pieces.
These practices will be studied in relation to their historical contexts and shifting aesthetic purposes. Historical topics include cadenzas, harmonic experimentation, the relationship between oral and written transmission, and the social contexts of performance. MUSC0560 and consultation with instructor recommended. Prerequisite: MUSC 0550. Enrollment limited to 15.

**MUSC 1200. Seminar in Electronic Music: Recording Studio as Compositional Tool.**
A study of advanced studio techniques taught in parallel with topics in psychoacoustics. Students will create original studio work while developing listening and technical skills for audio production. Technical topics include recording, signal processing and mixing software, microphone technique, and live sound engineering. Class size is limited. Preference will be given to students who have completed MUSC 0200. Students will be evaluated for potential future work in the MEME program (Multimedia and Electronic Music Experiments) and past participation in MEME. Admission is determined by an entrance questionnaire completed at the first class meeting. Prerequisite: MUSC 0200.

**MUSC 1210. Seminar in Electronic Music: Real-Time Systems.**
Seminar in Electronic Music is a study of music employing electronic media, including real-time digital signal processing, multimedia, and live performance. Technical aspects of the course focus on programming using Max/MSP to create interactive projects and algorithmic compositions. Permission of instructor required. Interested students must come to the first class. Preference will be given to students who have completed MUSC 0200.

**MUSC 1220. Interactive Installation.**
Production class exploring ideas and techniques using multiple digital media to create audio-video installations. Technical issues focus on programming with Max/MSP/Jitter and using various types of sensors for human-computer interaction. Collaborative projects may combine performance, sculpture, computer music, hypertext, live video processing, and graphics in order to stimulate experimentation with new integrated forms. Enrollment is limited to 14. Preference will be given to students who have completed Music 200. Others will be evaluated for potential future work in the MEME program (Multimedia and Electronic Music Experiments) and past participation in MEME. Admission is determined by an entrance questionnaire completed at the first class meeting. May be repeated for credit. S/NC.

**MUSC 1230. Sound/Image Composition.**
This seminar examines various ways that image and sound can be combined in unified artworks. The course will include extensive reading assignments and analysis of preexisting works, as well as the creation of new mixed-media works. Some experience with music composition required and knowledge of current video editing, animation and/or image processing techniques also highly recommended. Course admittance is by permission of the instructor. For graduate and advanced undergraduates (with prerequisite MUSC0200).

**MUSC 1240A. Sonic Psychogeography.**
Psychogeography loosely describes a cluster of art practices that explore the effects of the geographical environment on the emotions and behaviors of individuals. How can sound, uniquely powerful in triggering memory and connecting us to the present moment, be used in contemporary forms of writing legitimate (or so-called “authentic”) music of any kind in a post-canonic age? An interdisciplinary student body enriches this course; thus, students from all backgrounds with a scholarly interest in any type of music since 1900 or in any of these issues are encouraged to enroll.

**MUSC 1600A. Seminar in Music and Critical Theory: Adorno on New Music.**
A close study of Adorno’s Philosophy of New Music, in the new translation by Robert Hullot-Kentor, and selected secondary readings relevant to this work. The course emphasizes notions of canon (the Western musical canon starting with Beethoven); of modernism (as exemplified in music by Schoenberg and Stravinsky); and of an avant garde. It also focuses on relationships between art traditions and popular music; and on problems of writing legitimate (“or so-called “authentic”) music of any kind in a post-canonic age. Interdisciplinary student body enriches this course; thus, students from all backgrounds with a scholarly interest in any type of music since 1900 or in any of these issues are encouraged to enroll. Prerequisite: MU 55 or equivalent.

**MUSC 1600B. Adorno and Jankelevitch in Dialogue.**
Philosophers Theodor Adorno and Vladimir Jankelevitch were both leading philosophers of the mid-20th century (in Germany and France respectively). Both were also avid pianists who produced several philosophical books on music. This course examines their musical writings both independently and comparatively. Jankelevitch’s ethical and metaphysical questions, together with Adorno’s sociological and historical ones, will be studied in relation to the philosophical traditions they inherited and transformed. Their work will also be evaluated in the volatile European context of the period 1930-70. Enrollment limited to 20 students.

**MUSC 1610. Writing about Music.**
A study of music criticism through three intertwined enterprises: analyzing classic 19th- and 20th-century writings on Western art music; analyzing representative writings on popular music in recent newspapers and magazines; and writing short critical pieces on a mixture of art and popular music, some assigned, some chosen by the student. Non-
MUSIC 1619. Writing about Music. A study of music criticism through three intertwined enterprises: analyzing classic 19th- and 20th-century writings on Western art music; analyzing representative writings on popular music in recent newspapers and magazines; and writing short critical pieces on a mixture of art and popular music, some assigned, some chosen by the student. Non-music concentrators welcomed. Prerequisite: MUSC 0550 or instructor permission. Enrollment limited to 15. Instructor permission required

MUSIC 1620. Seminar in American Music: The Great American Songbook (Part II: Performers). Emphasizes the musical and cultural effects of various styles of vocal performance on American standards written between 1914 and 1960. Possible singers include Louis Armstrong, Bing Crosby, Fred Astaire, Ethel Waters, Ella Fitzgerald, Billie Holiday, Frank Sinatra, Nat King Cole, and Tony Bennett. More recent jazz and cabaret singers also receive consideration. Course ends by considering changes represented by Elvis Presley and Bob Dylan. This course complements another that concentrates on operas by Mozart, Wagner, Verdi, and Puccini. We'll study the sources of their librettos, the opera houses that presented them, and their singers and orchestras. We'll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. We'll give special attention to Mozart's characterizations of women and the issues these raise for directors and singers. Work will include DVDs, CDs, readings, and scores for those who read music. Students will adopt an opera for the course

MUSIC 1620F. Seminar in Opera Studies: Italian Opera from "The Barber of Seville" to "Madama Butterfly". A study of ten nineteenth- and early-twentieth century Italian operas by Rossini, Bellini, Donizetti, Verdi, and Puccini. We'll study the sources of their librettos, the opera houses that presented them, and their singers and orchestras. We'll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. Finally we'll consider their reception from their early days to the present. Work will include DVDs, CDs, and readings

MUSIC 1622. Seminar in Music and Theater. Students compare selected Broadway musicals with their principal sources (novels, short stories, dramas, films, another musical) and, in some cases, their subsequent transformations (a film, another musical). Emphasis is on primary sources; students largely determine and run the film component of their course. The classics likely to study Porgy and Bess; Pal Joey; Kiss Me Kate; My Fair Lady; Flower Drum Song; Cabaret; and Wizard of Oz / The Wiz / Wicked. Students may choose other works for individual projects. Majors and non-majors are encouraged to enroll. Prerequisite: MUSC0550 or written permission. May be repeated for credit

MUSIC 1632A. The Great American Songbook (Part I: The Songs). This course analyzes interests and values exhibited in American popular songs in the period between 1914 and 1945. Topics range from sexual mores and work ethic to race relations and the Melting Pot. Emphasis is on the songs and their writers; performance and performers will be emphasized in a subsequent course

MUSIC 1640A. Opera, Politics, History, Gender. The will to social order and the desire to transgress it: this conflict in modern culture has been negotiated dramatically in opera. This seminar concentrates on operas by Mozart, Wagner, Verdi, Debussy, and Puccini. Each opera will be placed into dialogue with historical and theoretical texts and analyze how opera engages power in relation to gender, nationalism, modernism, and crises of representation

MUSIC 1640B. Seminar in Opera Studies: Performance Analysis and Opera. The seminar will explore current tendencies in (radical) opera productions in Germany and elsewhere as well as methods to analyze opera in performance. Based on the premise that the performative dimension of opera is to be understood as the ephemeral and reciprocal process between performing actors/singers and recipients, this seminar will raise the question of how this special relationship can be theorized and analyzed

MUSIC 1640C. Wagner’s Ring. This seminar will pursue a rigorous musical, textual, historical, and political analysis of Wagner’s tetralogy The Ring of the Nibelung. It will include an analysis of production styles, with specific attention to the production currently in joint development at the Teatro alla Scala, Milan, and the Berlin State Opera, to be directed by Guy Cassiers. We will address themes such as globalization and its discontents, the interpaly of music drama and visual technologies, and the contextual importance of serial novels such as those of Marcel Proust, Robert Musil, and Hermann Broch. Enrollment limited to 20 students. Instructor override required

MUSIC 1640D. Opera: History, Theory, Practice. This seminar will analyze the history, theory, and practice of opera in its textual (words and music), and performative (in the theater and in society) dimensions. We will focus on three paradigmatic works: Mozart’s Don Giovanni, Verdi’s Aida, and Wagner’s Die Walküre. The seminar’s work on Die Walküre will coincide with the preparation of a new production, to be premiered at the Teatro alla Scala, Milan, on December 7, 2010.

Students will have the chance to contribute ideas to the production team. In addition, each student will select a 20th or 21st-century work for individual research and presentation to the group. Enrollment limited to 20

MUSIC 1640E. Seminar in Opera Studies: Mozart’s Operas Then and Now. Mozart wrote seven operas during his Vienna years. While we’ll touch on all of them, the heart of this seminar will be his three Italian comic operas - The Marriage of Figaro, Don Giovanni, and Così fan tutte – and his German opera, The Magic Flute. We’ll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. We’ll give special attention to Mozart’s characterizations of women and all of them, the heart of this seminar will be his three Italian comic operas - The Marriage of Figaro, Don Giovanni, and Così fan tutte – and his German opera, The Magic Flute. We’ll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. We’ll give special attention to Mozart’s characterizations of women and the issues these raise for directors and singers. Work will include DVDs, CDs, readings, and scores for those who read music. Students will adopt an opera for the course

MUSIC 1640F. Seminar in Opera Studies: Italian Opera from "The Barber of Seville" to "Madama Butterfly". A study of ten nineteenth- and early-twentieth century Italian operas by Rossini, Bellini, Donizetti, Verdi, and Puccini. We’ll study the sources of their librettos, the opera houses that presented them, and their singers and orchestras. We’ll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. Finally we’ll consider their reception from their early days to the present. Work will include DVDs, CDs, and readings

MUSIC 1645. Seeing Through Sound: Music in Film and Visual Media. A study of the history and craft of film scoring. Emphasis is placed on critical theories and analytic approaches to music and the moving image. Special focus on composers Steiner, Hermann, Williams, and Corigliano. Prior musical training an asset but not required. Enrollment limited to 25

MUSIC 1650. Adorno Goes to the Opera. Of all the tasks awaiting us in the social interpretation of music", wrote T.W. Adorno, "that of Mozart would be the most difficult and the most urgent." Using writings by Adorno on opera as a point of departure, this course goes on to a critical examination of selected Italian, German and French operas between Fidelio and Wozzeck. Finally, it takes up Adorno’s challenge by reconsidering some of Mozart’s mature operas, from Figaro to Crumb’s The Magic Flute, in terms of later opera history and theory

MUSIC 1660A. Mahler’s Century. This seminar will explore key works of Gustav Mahler in multiple contexts, including critical/interpretive traditions, conducting and performance practices, and the contexts of political, cultural, intellectual, and aesthetic history. Readings will include work of Sigmund Freud, Theodor Adorno, Carl Schorske, Julia Kristeva, Judith Butler, and others; we will think about problems such modernism, orientalism, Jewishness, montage, noise, shock, and melancholy

MUSIC 1661. Death and Dying. A study of the cultural treatment of death in Europe and America from the French Revolution to the Vietnam War. Using CDs, DVDs, and YouTube, we’ll listen to operas, songs, Requiems and oratorios, and instrumental and orchestral works, from Mozart’s Don Giovanni to Crumb’s Black Angels. We’ll also read short stories, novels, and poems; watch war films; and study art, architecture, cemetery sculpture and design, mourning rituals, and state funerals

MUSIC 1671. Conductors, Orchestras and Repertory. A study of conductors and the orchestras they directed, and an exploration of great musical compositions of the past 200 years. We will cover the evolving function and status of conductors from Arturo Toscanini and Wilhelm Furtwängler to Allan Gilbert and Gustavo Dudamel; orchestras from Berlin and Vienna to New York and Los Angeles; and music from Beethoven to Stravinsky. Our work will involve scores, CDs, DVDs, YouTube, memoirs, letters, and secondary sources. Each student will adopt two conductors and orchestras for the course. 999999
MUSC 1672. Hitler’s Gift. The flight of musicians from Europe in 1933-45 exile changed the face of Western music, and it changed them. Among them were many of the great musicians of the 20th century, including Bartok, Casals, Klemperer, Rubinstein, Schoenberg, Toscanini, and Weill. We examine patterns of emigration, settlement, and adaptation through memoirs, letters, essays, newspaper articles, biographies, recordings, and videos.

MUSC 1673. Interpreting Debussy. A study in musical poetics. Debussy forms the launching point for a discussion of pleasure, liberty in harmony, melody, rhythm and form; of orchestral impressionism and of music’s links to poetry and painting. Close readings of scores and recorded performances will yield different approaches to interpretation, leading to two analytical papers and a final class concert. Prerequisite: MU 55, 56 or permission of instructor.

MUSC 1680. Musical Performance: Theatricality, Body, and Spectacle. Explores the visual and theatrical dimensions of music performance—both recent and historical—through the analysis of live performances, video clips, and historical documents. Using the critical methods of performance studies, we seek to uncover those aspects of musical experience that have become transparent or normalized by their familiarity, and which are eluded by a traditional focus on music as “sound alone.” We concentrate on five genres: rock, classical, pop, jazz, and experimental—and consider figures such as Arturo Toscanini, David Bowie, Jimi Hendrix, Louis Armstrong, Miles Davis, Pauline Oliveros, John Zorn, Diamanda Galás, Madonna and Michael Jackson. Enrollment limited to 24. First year students require instructor permission.

MUSC 1690A. Miles Davis: An Evolution in Jazz. This seminar examines the life, music, and iconic status of Miles Davis, the most complex and varied figure in the history of jazz. From the mid-40s, when he emerged as a sideman to bebop virtuoso Charlie Parker, to his death in 1991, Davis was often on the cutting edge of jazz’s evolution, spurting on the development of cool jazz, hard bop, progressive jazz, modal jazz, post-bop, and various forms of fusion. He was at the same a powerful though elusive personality who continues to inspire critical controversy. We will examine his creative evolution in the context of the history of popular music taste, race relations, gender roles, and social class in America. Readings include biographies, studies of his music, and collections of critical essays. There will be extensive listening assignments and occasional required video screenings.

MUSC 1690B. Seminar in Jazz Studies: Transatlantic Jazz. Chronicles the interaction of African American, American and European jazz perspectives over the past century of accelerating transatlantic musical and cultural exchange. Using a number of case studies, we will examine these intertwined and shifting perspectives in the context of broader geopolitical developments that have structured (and continue to structure) their evolution. Accordingly, we will divide the course roughly into three chronological periods: interwar, cold war, and post-cold war. Discussions will focus upon source readings, recordings and other materials and also important theories of transatlantic cultural exchange drawn from American, European, and African and African American Studies. Enrollment limited to 20 juniors, seniors, and graduate students. Instructor permission required.

MUSC 1700. Score Reading and Conducting. The art of reading, analyzing, and conducting a musical score. Studies in clef reading, transposition, ear-training, and structural analysis to develop the skills needed for full comprehension of an orchestral score. Introduces the theory and technique of conducting with practice in the art of physical gesture. Selected repertoire from the Baroque through contemporary periods are studied and conducted in class. Prerequisite: MUSC 0550 or permission of the instructor. May be repeated for credit.

MUSC 1710. Choral Conducting. An introduction to the art of conducting, with emphasis on choral training. A study of the relationship of gesture to sound will be combined with a survey of the choral repertoire, beginning with Gregorian Chant and covering renaissance motets, masses and madrigals, Baroque works with instruments, excerpts from Mozart’s vespers, 19th-century Romantic part-songs, and selected 20th-century. Issues of basic vocal production, warm-ups, rehearsal planning, editing, programming and concert production will also be included. Prerequisite: MUSC 0400 or 0560. Written permission required. May be repeated for credit.

MUSC 1610. Applied Music Program: Instruction in Vocal or Instrumental Music. Half credit each semester. Restricted to skilled musicians. Restricted to skilled musicians demonstrating mastery of an advanced repertory in their fields. Openings are limited. Enrollment and re-enrollment is by audition and jury. Lessons are given by consultants to the Applied Music Program. MUSC 0830, 0840 is prerequisite to this course. A fee is charged for enrollment. Copies of the Applied Music Program Guidelines giving detailed information are available online at www.brown.edu/music. Prerequisite: MUSC 0400, or MUSC 0550, MUSC 0560. Written permission required. May be repeated up to four times for credit.

MUSC 1900. Introduction to Ethnomusicology. The study of people making music. Ethnographic research and writing on musical practices; history of ethnomusicology; musical case studies from around the world highlighting such issues as authenticity, tradition, commercialism, amateurism, postcolonial politics, and the ethics of fieldwork.

MUSC 1905A. Music and Cultural Policy. What is to be done about music and the people who make it? All over the world, individuals, governments, NGOs, and other groups are making plans for music: to ensure its survival, to make it known to a wider public, or to use it as an engine of economic growth. This course will examine various social engineering projects involving music. Topics will include media and internet regulation; ownership of music and intellectual property law; the role of institutions such as UNESCO; music in war and peace; music, heritage, and cultural tourism; and conservation, stewardship, and sustainability. No prerequisites.

MUSC 1905B. Indigenous Music of the Americas (ETHN 1890D). Interested students must register for ETHN 1890D S01.

MUSC 1905C. Open Source Culture (MCM 1700N). Interested students must register for MCM 1700N S01.

MUSC 1905D. African American Musical Theatre. This seminar explores the rich history of African American musical theater, from the first black musical (A Trip to Coontown (1897)) through Dreamgirls and beyond. The class will encompass shows with all-black performance and creative teams as well as those with white producers and black casts. Drawing on the resources of the African American Sheet Music Collection at the John Hay Library, there will be a special focus on the lesser-known musicals of the early twentieth century. Issues of race, representation, and performance will be explored through theoretical and historical readings, as well as through available scores, recordings, and films.

MUSC 1910. Music and Mind. Explores music perception in terms of auditory and cognitive processes such as auditory perception, memory, and learning. Lectures, discussions, and demonstrations review and analyze a body of scientific research on the psychology of music. Problem sets and a collaborative laboratory project. Prerequisites: PSYC0010 and MU 1 (MUSC 0010) or permission of the instructor.

MUSC 1915. Music, Mediation, Circulation: the Public Life of Popular Music. This course approaches the social life of popular music by examining the people, the sites of media work, and the systems of circulation through which sounds are made into public objects. Considering music not only as sound, but also as commodity and signifying practice, we will discuss record studios and labels, radio and television broadcasts, internet distribution, and points of sale, among others, as key sites where musicians and those they work with make decisions about sound, decisions that are driven by ideological and economic considerations, and which in turn shape the audiences that accrue to particular styles and recordings.

MUSC 1920. Music and Modern Life. Examines topics related to the everyday use of music: the determinants of musical taste; music for emotional self-management (in the health club or Iraq War); “high” vs. “low” music; eclectic taste; popular music and the music industry; mp3blogs; new business models. Readings (in sociology,
MUSC 1940. Applied Ethnomusicology
A cross-cultural examination of music-oriented youth subcultures. Topics include youth-produced vs. youth-consumed music, club cultures, media technologies, online communities, minority and diaspora youth cultures, the mainstream vs. the underground, and ethno- and ethnic theory and method. This course requires critical engagement with a variety of popular music genres and cultures, encouraging students to examine their own musical production and consumption practices. Students will undertake individual ethnomusicographic projects and will use web-based multimedia to present their findings. Some background in ethnomusicology, cultural anthropology, or media studies will be helpful (e.g., MUSC 1900, ANTH 0100, MCM 0100). Sophomore standing or instructor permission required. Enrollment limited to 25

The traditional music of Java, Bali, and Sumatra, with special attention to the bronze percussion orchestras (gamelan) and their use in ritual, dance, and drama. Topics include: music and trance; the impact of colonialism; nationalism, modernization, and tourism; and Indonesian music and "world beat." Theory and practice are integrated through extensive instruction on Brown's gamelan instruments. Enrollment limited to 20 students

MUSC 1931. Music of Ireland.
An introduction to the traditional music of Ireland through readings, lectures, listening, and participation. The historical and cultural context of the music is considered as well as the instruments, genres, and styles

Case studies in African American, British and Irish American, Euro-American, Native, Latino, and Asian American traditional musics from the mid-19th century to the present. Prerequisite: MU 55 (MUSC 0550) or written permission

MUSC 1933. Music of India.
A survey of the music cultures of India. Intensive study of the classical traditions as well as an introduction to folk, tribal, and urban popular musics. Reading, listening, and class discussions focus on theory, history, and aesthetics. Improvisation; music and the dramatic arts; the social organization of music-making; and music as an expression of class, culture, and subculture in modern India. Prerequisite: MU 55 (MUSC 0550) or permission

MUSC 1934. Music of Turkey.
A study of the traditional, classical, folk, and popular music traditions of Turkey. Through directed reading, listening, and video viewings, students will become familiar with Turkey's major music traditions and instruments, learn relevant musical concepts and terminology, and develop critical listening skills. Students will also learn to perform the basic modes and rhythmic cycles of several Ottoman/Turkish musical styles. No instrumental skills are required. Students will be expected to learn to sing Turkish melodies, but will not be graded on their vocal performances. DVPS

With a musical culture that ranges from roots samba to favela funk, and from the music of indigenous Amazonian peoples to the neo-African sounds of candomblé ritual, Brazil's soundscape rivals its social and geographic diversity. This course provides an introduction to the "erudite," traditional, and mass-popular sounds of Brazil, emphasizing their role in creating and contesting visions of nationhood and Brazilian society over the twentieth century. There are no prerequisites, but a background in either music or Latin American studies will greatly aid students' progress in the course. Open to sophomores, juniors, and seniors. DVPS LILE

MUSC 1940. Applied Ethnomusicology.
Theory and practice in applying the cultural study of music outside the academic world and in the public interest. Students will research, document, interpret and present music from local and regional ethnic communities. Prerequisite: MU 5, 6, 120 (MUSC 0050, 0060, 1200), graduate standing, or written permission from the instructor

MUSC 1950. Transcription and Analysis of Jazz.
Transcriptions from major jazz recordings are made by the students. The personal styles of the musicians are defined through analysis in the context of the various trends in jazz history. The transcriptions are analyzed within the parameters of rhythmic and harmonic structures, tone quality, motivic design, and idiomatic performance. Singing, ear-training, and dictation are used to develop transcription skills. Instructor permission required

Students with experience in African and related musical traditions perform drumming, dancing, and singing of Ghana and the diaspora. Focus on a more challenging repertoire with emphasis on multi-part, lead, and improvisational playing. Prerequisite: audition. May be repeatable for credit. Instructor permission required. Enrollment limited to 15 students

Students with experience in African and related musical traditions perform drumming, dancing, and singing of Ghana and the diaspora. Focus on a more challenging repertoire with emphasis on multi-part, lead, and improvisational playing. Prerequisite: audition. May be repeatable for credit. Instructor permission required. Enrollment limited to 15 students

Directed undergraduate research for advanced students. Prerequisite: permission of the instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Directed undergraduate research for advanced students. Prerequisite: permission of the instructor. Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course

A history of thought about music outside the Western art music tradition. Three historical paradigms-comparative musicology, musical folklore, and ethnomusicology-and the search for a new approach to ethnomusicology in the postcolonial era. Prerequisite: MUSC 1900 or consent

Introduction to the theory and practice of fieldwork with people who make music. Project design, interviewing, still and video photography, recording, ethics, the researcher's roles, relations with human subjects, and strategies for documenting music in its human context. Prerequisite: Graduate standing or written permission

MUSC 2020. Interpretation in Ethnomusicology.
How to think and write about people making music. Ethnomusicological representation and authority; analytical, interpretive and experiential approaches; postmodern and postcolonial considerations; hypertext multimedia representations. Prerequisite: Graduate standing or written permission

MUSC 2030. Modernizing Traditional Music.
This course examines two types of modernization: changes in the sounds of traditional music, and changes in its social-ideational contexts. We examine general theories of modernity, and the association of modernity with the urban, rational, secular, mobile, and technologically advanced. We then inspect the processes of modernization at work in four case studies taken from four very different societies. Prerequisite: Graduate standing or written permission

MUSC 2040. Current Directions in Ethnomusicology.
The field of ethnomusicology has become increasingly interdisciplinary over the past decade, drawing inspiration from cultural studies, gender studies, popular culture studies, performance studies, psychology, phenomenology, postcolonial studies, and science and technology studies. In this seminar we will read major works of musical scholarship (most from the past ten years) that illustrate the key theoretical approaches alive in ethnomusicological research today

MUSC 2050. Musical Thinking.
An ethnomusicological approach to the analysis of musical structures and processes. Case studies include jazz, Irish music, French-Canadian fiddling, North Indian singing, Javanese gamelan, African drumming, and Japanese court music. Topics include linguistic, psychological, and oral-formulaic theories; historical change; cross-cultural modal theory; improvisation; the nature of African rhythm; "insider" versus "outsider" accounts. Readings, discussion, and first-hand experience of selected musics. Facility with Western staff notation required
MUSC 2060. The Efficacy of Music. The power of music to influence the human body and mind is widely acknowledged but poorly understood. This course considers the efficacy of music in general and connections between music and altered states of consciousness in particular. Perspectives come from musical ethnography, participant observation, phenomenology, religious studies, and neuroscience.

MUSC 2070. Music and Identity. From 19th-century European nationalism to 20th-century American multiculturalism, people have used music to affirm their identities. Drawing on anthropological and sociological theory, we examine the variety of connections between music and identity in several case studies. We consider the possible contributions of music to cross-cultural understanding, and discuss the ethics of musical border-crossing.

MUSC 2080A. Seminar in Ethnomusicology: Music and Technoculture. This seminar investigates ethnographic approaches to technologically-mediated musical practices. Case studies will focus on recording studios, electronic dance music, broadcast media, digital gameplay, virtual-reality spaces, multimedia installations, and popular music reception. Theoretical readings will be drawn from anthropology of the media, reception studies, and media design/production texts. Students will conduct ethnographic projects. Prerequisite: graduate standing or written permission.

MUSC 2080B. Ethnography of Popular Music. This seminar explores ethnographic work on popular music, including scholarship rooted in ethnomusicology, sociology, and performance studies. We will discuss case studies from around the world and compare contemporary ethnographic research with other approaches to popular music (e.g., Frankfurt School critical theory, Birmingham School cultural studies, and text-oriented popular music studies). Prerequisite: graduate standing or written permission.

MUSC 2080C. Music and Memory. This graduate seminar will investigate how music is bound up with human memory (individual and collective, cultural and cognitive). Readings will draw on scholarly work in ethnomusicology, anthropology, history, and cognitive science. Key themes include diaspora, nostalgia, oral and written transmission, ritual commemoration, and music's place-making potential. Students will undertake individual research projects. Prerequisites: graduate standing or written permission.

MUSC 2080D. Music, Nation, and Nationalism. This course explores the relation between music and nationhood, as a historically particular form of collective identity, and a dominant political category in late modern societies. Students will work with key texts in the study of nationhood and nationalism, applying them to musical case studies from different world regions. Touching upon art and popular music, these cases will explore the use of nationalist rhetoric to draw citizens into state projects; the appropriation of minority expressions in defining a national self; efforts by postcolonial societies to forge national sentiment from the fragments left by decolonization; and the nation's fate after globalization.

MUSC 2080E. Seminar in Ethnomusicology: Historiography of Music and the Performing Arts. Advanced seminar in methods of historical research and their relevance to the interpretation of music, the performing arts, and culture. Readings include Foucault, Collingwood, Schorske, Said, Adorno, Pierre Nora and Diana Taylor, as well as musicological essays by Taruskin, DeVeaux, Nettl, Tomlinson, Tretiak, Lawrence Kramer, Susan McClary, Kerman, and Nicholas Cook. Open to juniors, seniors, and graduate students.

MUSC 2080F. Music Beyond Borders: Transnational Sounds in Theory. This course explores the effects that follow when music is set in motion beyond local spaces of creation. Bringing a variety of different theoretical perspectives to bear upon case studies from around the globe, it surveys the distinct social and technological networks that enable sounds to travel, and considers the way that methods of circulation give rise to different kinds of social groups. It explores the way that such processes challenge inherited cultural and political boundaries, and shows how technological changes present musicians and listeners with novel means to resituate musical meaning, in new contexts. Open to graduate students only.

MUSC 2090A. Seminar in Ethnomusicology: Hypertext, Multimedia. Instruction in, and critical discussion of, computer-based hypertext and multimedia representation and interpretation of people making music. Sounds, pictures, texts, animations, movies. Students will complete a non-linear, reflexive hypermedia project to take advantage of the experimental moment in musical ethnography. Prerequisite: graduate standing or permission of instructor.

MUSC 2090B. World Music in Theory and Practice. This seminar investigates "world music" as a contested term in ethnomusicology, a music-industry marketing category, and a college classroom subject. We will read critical accounts of the development and significance of the "world music" concept, compare several world music textbooks, experiment with teaching the exercises/assignments therein, and explore the scholarly literature on multiculturalist pedagogy. Prerequisite: graduate standing or written permission.

MUSC 2100A. The Instrumental Sonatas of Beethoven. An analytic survey of Beethoven's sonatas for piano, violin and piano, and cello and piano from a variety of perspectives, including: topical, semiotic, and hermeneutic analysis; Schenkerian analysis; historical and critical studies; and recent developments in theory of sonata form. Students who have taken MUSC 1040 may request permission to enroll in this course. Written permission required.

MUSC 2200. Composition Seminar. A forum for graduate composers to share and critique current projects. Visiting artists and analysis of relevant outside repertoire will augment the group and one-on-one meetings. Enrollment is limited. Written permission required. May be repeated for credit.

MUSC 2210. Digital Performance. A production seminar examining the artistic impact and creative potential of digital media in the context of live performance. Readings and analysis of work examine innovations in performance practice from dance, theatre, performance art and music. Collaborative assignments investigate video projection, sound design and interactive sensor technology, culminating in a final large-scale performance. Permission will be granted based upon a questionnaire given in the first class.

MUSC 2220. Designing and Playing Alternative Controllers. This seminar will explore the science and aesthetics of designing alternate controllers for musical performance. Topics will include basic electronics and hardware prototyping, instrument construction, theories of gesture, human-computer interface issues, and the challenges of mapping sensor data to meaningful musical parameters. Previous experience with MaxMSP or other real-time programming required. Permission of instructor required.

MUSC 2221. Seminar in Computer Music and Multimedia Composition. A weekly forum for graduate composers to share and critique current projects. Visiting artists and analysis of relevant modern repertory will augment class discussion of student work. Individual private lessons - taught in addition to the three-hour seminar - help students focus on compositional technique and other problems of expression specific to their own projects.

MUSC 2230. Composing for Real-Time Systems. This seminar will explore the use of interactive systems from the point of view of the programmer/performer. Using improvisation as a starting point, we will explore the aesthetics and philosophy of performance, designing real-time systems that enhance the relation between action and event. The immediacy of improvised performance will then offer a perspective on the actions implied in composition itself. Systems designed for the individual performer become the basis for a large-scale real-time composition. Previous experience with MaxMSP or other real-time programming required. Permission of instructor required.

MUSC 2240. Composing and Improvising with Real-time Systems. This seminar will explore the use and creation of interactive computer music systems from the point of view of the performer/programmer. Using improvisation as a starting point, we will explore the aesthetics and philosophy of performance, designing real-time systems in MaxMSP that enhance the relationship between action and event using network strategies.
MUSC 2260. Topics in Computer Music Theory and Analysis. 
Explores the science and aesthetics of designing alternate controllers for musical performance. Topics include basic electronics and hardware prototyping, instrument construction, theories of gesture, human-computer interface issues, and the challenges of mapping sensor data to meaningful musical parameters. Written permission required

MUSC 2280. Designing-Large-Scale Multimedia Projects. 
A production seminar designed for students working on a single, large project in Multimedia and/or Computer Music. The course covers planning and implementation strategies, with group critiques of proposals and works-in-progress. The class structure includes individual lessons for students working on a graduate or undergraduate thesis project. Permission will be granted based upon a questionnaire given in the first class

MUSC 2300A. The Improvisor’s Art. 
Advanced seminar exploring improvisation from various perspectives: historical, anthropological, philosophical, ethical, and creative. We study improvisation in diverse musical traditions, in other arts, and in problem-solving contexts such as business, technology, and games. Discussion topics include individual vs. group improvisation, the status of “freedom” in creative processes, and the social and artistic functions of improvisation. Instructor permission required

MUSC 2450. Exchange Scholar Program. 
MUSC 2970. Preliminary Examination Preparation. 
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

MUSC 2980. Reading and Research. 
Directed graduate research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

MUSC 2990. Thesis Preparation. 
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

Pembroke Center for Teaching and Research on Women 
Director 
Kay B. Warren

The Pembroke Center supports interdisciplinary research on the ways gender systems—understood as systems of meaning—structure both the concrete and the symbolic organizations of social and cultural life; and the ways gender systems intersect with other systems of difference such as ethnicity, race and class. Faculty associated with the Center are available to advise students, who may concentrate in gender and sexuality studies or who may develop a cluster of gender and sexuality studies courses to advise students, who may concentrate in gender and sexuality studies. Candidates for honors must apply to the program’s director in their sixth semester. Honors concentrators fulfill the regular requirements plus completing a two-semester thesis as their capstone project. For more information, including current cross-listed courses and sample concentration plans, please consult the concentration webpage (www.pembrokecenter.org/IP_UndergraduateProgram.asp (http://www.pembrokecenter.org/IP_UndergraduateProgram.asp)).

Courses 
GNSS 0090B. Bodies Out of Bounds. 
In this seminar we will examine what happens to bodies - and the world around them - when they refuse to stay within "normal" boundaries. We will focus our readings on literature, essays, and memoir from the past two centuries, and use film and contemporary cultural theory for comparison and context. Readings range from Jeanette Winterson’s Written on the Body to fiction by Octavia Butler. Enrollment limited to 20 first-year students. FYS WRIT

GNSS 0090C. Reproductive Health: Science and Politics. 
Reproductive health issues such as contraception, abortion, sexually transmitted infections and gay and lesbian health are some of the most controversial and politically charged issues in the US today. After an introduction to the interpretation of medical literature we will explore scientific, political, religious and cultural aspects of these important public policy issues. Successful national and international programs will be discussed. Although all views are welcome, it is expected that students will be respectful of other’s opinions and will incorporate the best available scientific data into their conclusions. Enrollment limited to 20 first year students. Instructor permission required. FYS DVPS WRIT

GNSS 0100. Introduction to Feminist Theory. 
An historical and cross-cultural introduction to the various strands of feminist theory. The course will cover a range of theoretical frameworks, examine the connections and discomforts between theory and activism, and explore the impact of feminist theories on contemporary thought

GNSS 0120. Introduction to Gender and Sexuality Studies. 
Explores the interdisciplinary fields of Gender and Sexuality Studies, considering the relation between formations of gender and those of sexuality across a range of historical and disciplinary contexts. Considers
how both sexuality and gender are shaped in relation to race and ethnicity, economic inequality, and the postcolonial legacy. WRIT

GNSS 1700. Iranian Women’s Resistance Strategies: Gender Discrimination and the Law Since 1979

After the Islamic Revolution in Iran in 1979, the new government targeted women’s legal rights in the name of Islam. Family Law, Criminal Law, and even Constitutional Law were designed or amended in ways that imposed gender discriminations on Iranian women’s public and private lives. Iranian women from both secular and religious backgrounds have employed diverse strategies to resist these laws. Students will learn about the rules and regulations imposed on Iranian women and also the creative and innovative ways through which they overcome these discriminatory laws. Enrollment limited to 20. WRIT

GNSS 1810. Independent Study and Research.

Independent reading and research for upper-level students under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

GNSS 1820. Independent Study and Research.

Independent reading and research for upper-level students under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

GNSS 1960B. Health and Healing in American History

Surveys the history of American medicine in its social and political contexts, including changing understandings of disease, treatment practices, and medical institutions. Focuses on how gender and race have informed how patients and healers have made sense out of pain and disease. WRIT

GNSS 1960C. Gender, Sexuality, and Science.

Examines how American and European science has naturalized differences in the human body and gendered the natural world from the seventeenth through the twenty-first centuries. Will consider historical changes in the scientific study of sex, gender, race, and sexuality, as well as the participation of men and women in scientific work. First-year students require an instructor override to register. WRIT

GNSS 1960D. Feminist Theory/Feminist Activism.

Some complain that feminist theory is “too academic”, that it has no ties to social justice or activism. On the other hand, there are those in the academy who accuse gender/women’s studies of not being sufficiently academic, of not being intellectually rigorous. With those two stereotypes in mind, we will read a variety of feminist theorists, some generally thought of as “academic”, and some generally seen as “activist”. Can academic theory be useful to political and social activists? Can activism inform academic theorizing? Prerequisite: one theory course, one gender and sexuality studies course, or permission of instructor.

GNSS 1960E. Advanced Feminist Theory.

Feminist activism and feminism are the major theoretical approaches to the understanding of society, politics, and culture. What do they have in common? Where do they part company? We’ll examine their views on agency, the subject, language, and materiality; and their engagements in the “cultural wars.” Readings include Butler, Deleuze, Derrida, Irigaray, Kristeva.

GNSS 1960K. Gender and the Modernist Self.

Are women more modern than men? In the early decades of the twentieth century it may have seemed so, for in these years the figure of woman came to stand as emblematic for modernity itself. In this course, we will read the literature of the turn-of-the-century (including Ibsen’s A Doll’s House, Grant Allen’s The Typewriter Girl, Freud’s Dora, Woolf’s A Room of One’s Own and To the Lighthouse) alongside the sociology, psychology, and philosophy from the same period to see how exaggerated portraits of hyper-modern women came to serve as metaphors for a new, twentieth-century version of selfhood. Enrollment limited to 20.

States kill: law enforcement officers kill to protect innocent victims and the military kills to protect the nation. This seminar explores the constitutive relation between law and violence. Since the rise of modern statehood, sovereignty depends on the ability of a state to hold monopoly over the legitimate use of violence and thus enforce its order. But without law, bare violence is incapable of establishing order, in the absence of order there is no sovereign. Without violence law has no enforcement power, in the absence of a coercive obligation, there is no law. Enrollment limited to 20. First year students require instructor permission.

Scientific inquiry is often considered an endeavor pursued using one’s sense of vision: researchers peer into microscopes and telescopes and stare at graphs, diagrams, and computer screens. But on what other senses do scientists rely? Do they also gather evidence using senses of smell, taste, hearing, and touch? This class combines readings in the history, philosophy, and anthropology of science with primary sources to address questions such as: why non-visual senses historically have been devalued in the sciences, what a sensuous approach to scientific practice might be, and how attention to sensory epistemologies could contribute to feminist science studies. Enrollment limited to 20. First year students require instructor permission.

GNSS 1960N. Theories and Politics of Sexual Consent.

What is sexual consent good for? Does the language of sexual consent facilitate useful ethical interrogation? Or does it neutralize any worthwhile inquiry into power inequalities? This course interrogates sexual consent through surveying political theory texts, liberal and feminist legal scholarship, studies in sex and gender, court cases, and literature. We query how and to what effect the idea of consent organizes sexual politics and politicizes sex. We first consider consent in legal and political discourse; we next turn to modern theories and doctrines of sexual consent; we then explore case studies. The last weeks focus on youth. Enrollment limited to 20. Instructor permission required.

GNSS 1960O. Desiring the Nation: Gender and Nationalism in South Asia.

Examines the development and afterlives of nationalisms in South Asia to consider the attachments that tie citizens and subjects to the nation and to one another. What are the political, personal, and ideological commitments that allow or prevent individuals from belonging to the nation? Beginning with early 20th century anticolonialism, we will trace multiple nationalistic movements that lead up to the 1947 Partition of British India, and to the 1971 independence of Bangladesh. Through novels, short stories, and films, we will examine the role of gender in anticolonial protest and in early nation-building in India, Pakistan, and Bangladesh. Enrollment limited to 20.

GNSS 1960P. Post-Colonial Technoscience and the Body.

This seminar examines the intersections of race, gender, culture, and sexuality with science and technology in colonial and post-colonial contexts. How is the body a site of contestation for power enacted through medical, scientific, or technological interventions? What are the social and historical dimensions of such encounters between the global North and South? Drawing on colonial-era primary sources and accounts by science studies scholars, post-colonial theorists, historians, and anthropologists, we analyze how the uneven flow of technoscience: experts, practices, objects, and knowledge reconfigures and transforms bodies, selves, and societies. The course’s geographic focus is sub-Saharan Africa. Enrollment limited to 20.

GNSS 1960Q. On Love and Intimacy.

Love and Intimacy are terms that have a lot of cultural cache. In this course, we will analyze how the uneven flow of technoscience experts, practices, objects, and knowledge reconfigures and transforms bodies, selves, and societies. The course’s geographic focus is sub-Saharan Africa. Enrollment limited to 20.

Through screenings and transdisciplinary readings, this film-philosophy seminar explores concepts of time, affect, death and subjectivity. We will examine the cinema’s capacity to convey events and experiences of twentieth and twentieth-first century history. Philosopher Giles Deleuze echoes Shakespeare: “The time is out of joint.” What can this mean for cinema, thought and life? What is a ‘time-image’ and can filmic images of time reveal or heal past wounds, those scars that haunt all time to come? How does an image conceal or expose time? How do such images...
respond to intimate experiences, and even shape politics, history and cultural memory? Enrollment limited to 20

**GNSS 1960S. Media and Modern Childhood.**
Will explore a range of key themes in children’s media and material culture since the nineteenth century. Through readings, screenings, and the close analysis of media objects themselves (including books, toys, film, television, and digital media), the class will investigate a variety of constructions of and attitudes toward children as they are visible in these cultural forms. Will explore several methodological approaches to studying children’s media, and will observe how particular values, economic and political interests, and assumptions about childhood are encouraged, discouraged, and variously position children as consumers, active agents, citizens and cultural participants. Enrollment limited to 20

**GNSS 1970. Directed Research and Thesis.**
Independent research under the direction of a faculty member, leading to a thesis. Required of honors candidates. Open to seniors only. Instructor permission required

**GNSS 1980. Directed Research and Thesis.**
Independent research under the direction of a faculty member, leading to a thesis. Required of honors candidates. Open to seniors only. Instructor permission required

**GNSS 1990. Senior Seminar.**
A research seminar focusing on the research and writing of the participants. Required of senior concentrators; open to other advanced students by permission

**GNSS 2010D. The Power and Mystery of Expertise.**

**GNSS 2010E. Pembroke Research Seminar: The Question of Consent.**
No description available. Instructor’s permission required

**GNSS 2010F. Pembroke Research Seminar in Feminist Theory: Economies of Perception.**
An advanced research seminar in feminist theory and gender studies. Presentations made by Brown faculty, Pembroke Center fellows, visiting scholars, and students. Offered in conjunction with the Pembroke Seminar. Enrollment limited to 8. Instructor permission required

**GNSS 2020D. The Power and Mystery of Expertise.**

**GNSS 2020E. Pembroke Research Seminar: The Question of Consent.**
No description available. Instructor’s permission required

**GNSS 2020F. Pembroke Research Seminar in Feminist Theory: Economies of Perception.**
An advanced feminist research seminar in feminist theory and gender studies. Presentations made by Brown faculty, Pembroke Center fellows, visiting scholars, and students. Offered in conjunction with the Pembroke Seminar. Enrollment limited to 8.

**GNSS XLIST. Courses of Interest to Concentrators in Gender and Sexuality Studies.**

**Fall 2012**
The following courses have a primary focus on women or gender or make significant use of modes of feminist or queer analysis. They may count toward the concentration in Gender and Sexuality Studies. Please check with the sponsoring department for times and locations.

**Africana Studies**
AFRI 0600 Race, Gender, and Urban Politics
AFRI 1050E Research-to-Performance Method (RPM) Playwriting Workshop
AFRI 1110 Voices Beneath the Veil

**Anthropology**
ANTH 2100A Cultural Issues in Latin America

**Biological Sciences**
BIOL 1920C Social Contexts of Disease

**East Asian Studies**
EAST 1270 China Through the Lens: History, Cinema, and Critical Discourse

**English**
ENGL 1900R Queer Relations: Aesthetics and Sexuality

**Modern and Contemporary Art**
MCM 0901H Uncomfortable Media

**Sociology**
SOC 1240 Human Sexuality

**Spring 2013**

The following courses have a primary focus on women or gender or make significant use of modes of feminist or queer analysis. They may count toward the concentration in Gender and Sexuality Studies. Please check with the sponsoring department for times and locations.

**Africana Studies**
AFRI 0710A Racial and Gender Politics in Contemporary Brazil
AFRI 0990 Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre

**Classics**
CLAS 1750L Erotic Desire in the Premodern Mediterranean

**East Asian Studies**
EAST 1950B Chinese Women, Gender and Feminism from Historical and Transnational Perspectives

**English**
ENGL 0800A City Novels
ENGL 1761Z Modernism and Everyday Life

**History**
HIST 1755 The Intimate State: The Politics of Gender, Sex, and Family in the U.S., 1873-Present

**Judaic Studies**
JUDS 0980V Money, Power, Sex, and Love: The Modern Jewish Family

**Modern Culture and Media**
MCM 0901 Body Count: Technologies of Life and Death
MCM 1200G Cinema and Stardom: Image/Industry/Fantasy
MCM 1501D Television, Gender, Sexuality

**Philosophy**

**Chair**
Bernard M. Reginster

Like all of Brown’s fine departments, the Philosophy Department takes a special pleasure in contributing to the teaching and training of undergraduates, as part of Brown’s overall commitment to a liberal education. The Department offers a range of courses suited to newcomers to philosophy, covering subjects from the philosophy of religion, to the philosophy of science, to the philosophy of literature, as well as survey courses on various periods of the history of philosophy.

For additional information, please visit the department’s website: [http://www.brown.edu/Departments/Philosophy/](http://www.brown.edu/Departments/Philosophy/)

**Philosophy Concentration Requirements**

The Philosophy concentration offers courses covering subjects from the philosophy of religion to the philosophies of science and literature. It also provides survey courses on various periods in the history of philosophy. Concentrators can expect to strengthen their knowledge of and skills in ancient philosophy, early modern philosophy, logic, epistemology and metaphysics. In addition to the standard concentration, there are two tracks: ethics and political philosophy and the logic and philosophy of science. There is also a related, but separate concentration in physics and philosophy. All three options encourage an interdisciplinary approach and allow students to apply related courses in other departments towards the fulfillment of their concentration requirements.

There is one concentration program in Philosophy, with two optional tracks.

**Standard Concentration**

Eight courses in philosophy, which may not include more than one course numbered below 0350. In addition, at least one of the courses must be an undergraduate or graduate seminar.

**One course in Ancient Philosophy**

**British Empiricists**

PHIL 1700 British Empiricists
PHIL 1710 17th Century Continental Rationalism
PHIL 1720 Kant: The Critique of Pure Reason

**Logic**

PHIL 0540 Logic (or higher) 1

**Ethics or Political Philosophy**

PHIL 0500 Moral Philosophy (or higher) 1

**One course in Epistemology or Metaphysics**

PHIL 1660 Metaphysics
PHIL 1750 Epistemology
PHIL 1770 Philosophy of Mind

Three additional courses is philosophy 3

Total Credits 8

Optional tracks:

**Ethics and Political Philosophy**

Eight courses in philosophy, which may not include more than one course numbered below 0350.

**One course in Ancient Philosophy**

PHIL 0350 Ancient Philosophy
PHIL 1250 Aristotle
PHIL 1260 Plato
PHIL 1310 Myth and the Origins of Science

**One course in Early Modern Philosophy**

PHIL 0360 Early Modern Philosophy
PHIL 1700 British Empiricists
PHIL 1710 17th Century Continental Rationalism
PHIL 1720 Kant: The Critique of Pure Reason

**Logic**

PHIL 0540 Logic (or higher) 1

Three courses in ethics or political philosophy at the level of 0400 or higher 3

Two additional philosophy courses 2

Total Credits 8

**Logic and Philosophy of Science**

Eight courses in philosophy, which may not include more than one course numbered below 0350. With the approval of the concentration advisor, two appropriate science or mathematics courses may be taken instead of philosophy courses.

**One course in Ancient Philosophy**

PHIL 0350 Ancient Philosophy
PHIL 1250 Aristotle
PHIL 1260 Plato
PHIL 1310 Myth and the Origins of Science

**One course in Early Modern Philosophy**

PHIL 0360 Early Modern Philosophy
PHIL 1700 British Empiricists
PHIL 1710 17th Century Continental Rationalism
PHIL 1720 Kant: The Critique of Pure Reason

**A course in Logic at the level of 1630 or higher**

**One course in Epistemology or Metaphysics**

PHIL 1660 Metaphysics
PHIL 1750 Epistemology
PHIL 1770 Philosophy of Mind

Three courses in philosophy of science at the level of 0650 or higher 3

One additional philosophy course 1

Total Credits 8

Cross-listed courses may be used to fulfill the requirements of any of the concentrations above only with the approval of the concentration advisor.

**Honors**

Seniors wishing to earn honors by presenting a senior honors thesis should consult their concentration advisor during their sixth semester concerning procedures and requirements. In addition to completing the usual non-honors requirements, a student must write a thesis judged to be of honors quality by two readers and have a strong record in philosophy department courses (of which at least five must be taken for a letter grade). Honors theses are usually written during a student’s final semester at Brown.

**Physics and Philosophy Concentration Requirements**

The Physics and Philosophy concentration is for students with a deep interest in physics who do not need to acquire the laboratory and computational skills of a professional physicist. The concentration allows students to grapple with computational problems and deepen their investigation of conceptual and epistemological issues. By the end of the program, concentrators possess an excellent conceptual understanding of the most philosophically interesting physics, relativity and quantum mechanics.

This concentration should prepare a student either for graduate study, especially in a history and philosophy of science (HPS) program, or for employment in science education or journalism. Other professions such as law and medicine will look favorably on such concentrators for having versatile interests and being able to master difficult material. The concentration may serve as an excellent preparation for a law school since physics and philosophy both exercise a rigorous approach to problems of immediate relevance to life but at the same time assume two complimentary and sometimes competing viewpoints.

**Advising**

Concentration advisors from the Departments of Physics and Philosophy will guide students working towards the A.B. degree.

**Curriculum**

The curriculum builds around the fields of physics that have had the biggest impact on philosophy, especially Quantum Physics, and the fields of philosophy most relevant for physics, such as Epistemology, Metaphysics and Philosophy of Science. It is especially recommended that students complete at least one relevant history course.

There are 11 required courses (5 in Physics, 5 in Philosophy or History, one course in mathematics) and a final project. The choice of the courses is dictated by the following considerations. The field of physics with both deepest philosophical implications and deepest influence on the rest of physics is Quantum Mechanics. Thus, a 1000-level course in Quantum Mechanics or a closely related field such as Statistical Mechanics is indispensable. The second field of physics most relevant for the concentration is Relativity. This field touches upon and serves as a foundation for a broad list of subjects with major philosophical implications of their own, for example: PHYS 1170, PHYS 1280, PHYS 1510, PHYS 1100. This requires another 1000-level physics course in the concentration. 1000-level Physics courses cannot be taken without certain preliminary work, most importantly, PHYS 0470, which serves as a prerequisite for most higher-level physics courses and which relies in turn on PHYS 0160 or PHYS 0060. Another lower-level physics course is necessary for a student to develop familiarity with the tools which have been employed in producing the physics knowledge.

A natural introduction into philosophy of physics comes from a course in Early Modern Philosophy. To a large extent, Early Modern Philosophy was shaped by scholars who combined interest in philosophy and physics (e.g., Rene Descartes, Blaise Pascal, Gottfried Wilhelm Leibniz). The influence of the XVII century physics revolution on other central figures such as Kant is unquestionable. Early Modern Philosophy sets an intellectual stage for many subsequent developments in the Philosophy...
of Physics and directly addresses some of the most perplexing issues like the connection (or lack thereof) between physics and religion. The core of the Philosophy requirement involves two courses in Epistemology, Metaphysics and Philosophy of Science. One course in this field would not be sufficient due to its very broad nature. Students are strongly advised to take a relevant History course. This requirement can be substituted by an additional philosophy course to reflect interests of those students who want a deeper background in Epistemology, Metaphysics and Philosophy of Science or have other related interests such as Ancient Natural Philosophy.

In addition to the above philosophy courses, PHIL 0210 (Science, Perception, and Reality) serves as a gateway into the concentration. It may be substituted by other relevant courses such as PHYS 0100 (Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation).

A course in calculus is a prerequisite for most physics and some philosophy classes.

**Required courses for the A.B. degree are listed below:**

**Physics Courses**
- Select one of the following introductory courses in Modern Physics: 1
  - PHYS 0060 Foundations of Electromagnetism and Modern Physics
  - PHYS 0160 Introduction to Relativity and Quantum Physics
- One course in Special Relativity and Classical Field Theory: 1
  - PHYS 0470 Electricity and Magnetism
- Select one of the following in Methods of Experimental and Theoretical Physics:
  - PHYS 0500 Advanced Classical Mechanics
  - PHYS 0560 Experiments in Modern Physics
- Select one of the following in Quantum Mechanics and its applications 1
  - PHYS 1410 Quantum Mechanics A
  - PHYS 1530 Thermodynamics and Statistical Mechanics
- One more 1000-level Physics course 1

**Philosophy Courses**
- Select one of the following gateway courses: 1
  - PHIL 0210 Science, Perception and Reality
  - PHIL 0100 Critical Reasoning
- Select one of the following courses in Early Modern Philosophy: 1
  - PHIL 0360 Early Modern Philosophy
  - PHIL 1700 British Empiricists
  - PHIL 1710 17th Century Continental Rationalism
  - PHIL 1720 Kant: The Critique of Pure Reason
- Select two of the following courses in Epistemology, Metaphysics and Philosophy of Science: 2
  - PHIL 1310 Myth and the Origins of Science
  - PHIL 1590 Philosophy of Science
  - PHIL 1610 Philosophy of Relativity Physics
  - PHIL 1620 Philosophy of Quantum Mechanics
  - PHIL 1630 Deductive Logic
  - PHIL 1660 Metaphysics
  - PHIL 1670 Time
  - PHIL 1750 Epistemology
  - PHIL 1850 Philosophical Logic

**History Courses**
- Select one of the following courses in History of Science: 1
  - HIST 1140 Nature, Knowledge, and Power in Renaissance Europe
  - HIST 1180 The Rise of the Scientific Worldview
  - HIST 1190 Nineteenth-Century Roots of Modern Science
  - HIST 1200 Science and Society in the Twentieth Century

Select one of the following:
- MATH 0180 Intermediate Calculus
- MATH 0200 Intermediate Calculus (Physics/Engineering)
- MATH 0350 Honors Calculus

**Final Project**
- Select one of the following: 1
  - PHIL 1990 Independent Studies
  - PHYS 1990 Senior Conference Course

**Total Credits**
- 12

**Honors**
Seniors wishing to earn honors by presenting a senior honors thesis should consult their concentration advisor during their sixth semester or at the start of the seventh semester concerning procedures and requirements. Students may earn honors by presenting a senior thesis judged to be of honors quality by two readers. In addition to completing the usual nonhonors requirements, the student should also have a grade point average of over 3.4 in physics, philosophy and history of science courses (of which at least five must be taken for a letter grade). Honors theses are usually prepared over a period of two semesters with an advisor from the Department of Physics or the Department of Philosophy.

**Philosophy Graduate Program**

The department of Philosophy offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. The A.M. degree is only awarded as part of the Ph.D. program.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/philosophy

**Courses**

**PHIL 0010. The Place of Persons.**
Some fundamental moral and metaphysical issues concerning ourselves as persons: what (if anything) gives us a moral status different from that of other animals? Do we have the sort of free will required for moral responsibility? What makes you one individual person at a particular time? What makes you today the same individual person as the one who went by your name a few years back? A main objective is to facilitate the student’s own thinking about such issues

**PHIL 0020. Mind and Matter.**
This course will examine the relationship between the mind and the material world through a careful historical survey of prominent accounts of this relationship in Western thinking, beginning with Descartes’ “substance dualism.” We will then move on to look in detail at behaviorism, mind-brain identity theory, functionalism, panpsychism, and eliminativism. While examining these theories we will encounter a number of related topics, such as personal identity, mental causation, consciousness, and intentionality

**PHIL 0030. Skepticism and Knowledge.**
What is knowledge? What is the extent and basis of one’s knowledge about physical objects, other people, oneself, the future, morality, and religion?

**PHIL 0040. Reason and Religion.**
This is an introductory course in the philosophy of religion. We will be considering central questions in the philosophy of religion, e.g. the existence of God, from a contemporary analytic perspective. As this is a course in analytic philosophy, we will be addressing these issues in a way that stresses clarity and rigor

**PHIL 0050. Philosophy of Art.**
This course is an introduction to philosophy through the lens of philosophical issues surrounding art. Students will explore in detail some of the basic issues in aesthetics, including representation, expression,
the definition of ‘art’, and conceptions of individual artworks, from a contemporary analytic perspective. Readings and examples are drawn from all artistic fields.

PHIL 0060. Modern Science and Human Values.
Devoted to the critical study of moral problems that have been raised or affected by modern science and technology. Possible topics include animal experimentation, euthanasia, organ transplantation, and moral and legal issues raised by the computer revolution. More generally, we discuss what is and ought to be the role of the scientific community in deciding moral and social issues.

PHIL 0070. The Individual and the State.
In this course, we shall read several of the major political philosophers of the past several centuries, beginning with Plato and ending with contemporary thinkers. We will be reading primary sources and paying particular attention to the philosophers’ take on the proper relation between men and the societies in which they live. There are no prerequisites for this course.

PHIL 0080. Existentialism.
An introduction to philosophical thinking through the study of existentialist themes, including being oneself, loving others, the limits of morality, and the meaning of life in the face of suffering and death. Readings are drawn primarily from Schopenhauer, Dostoyevsky, Nietzsche, Kierkegaard, Heidegger, Sartre, de Beauvoir, and Camus. WRIT

PHIL 0090. Philosophy East and West.
Investigates themes associated with what is known as the "Western" philosophical tradition—e.g., idealism, skepticism, and the limits of understanding—as they arise in various philosophical traditions in the East (including Upanishadic, Buddhist, and Taoist traditions). The "Western" philosophers studied include key historical figures such as Wittgenstein, Kant, and Plato, as well as more recent philosophers.

PHIL 0100. Critical Reasoning.
A study of the techniques and principles of correct reasoning and effective communication. Topics may include deduction and induction, meaning and definition, fallacies in reasoning, the basic logic of propositions and predicates, and the essentials of inductive reasoning.

PHIL 0110. The Nature of Fiction.
This course is concerned with philosophical questions arising from the concept of fiction. Topics will include: What makes a story a fiction? What are fictional characters? Are fictions "created"? Are fictions physical things, like books? How do fictions make us care about things we don’t even believe in? How do fictions affect our moral beliefs.

PHIL 0111. Personal Identity.
What makes me the same person over time? How can we decide whether a person at a time is identical with a being alive at another time? We will consider the continuing existence of the body, the ability to remember experiences, and other criteria. Readings from classic (17th and 18th century) and contemporary sources.

PHIL 0120. Freedom and Responsibility.
An introduction to philosophy by way of consideration of such issues as: whether we are, can be, or ought to be free to think and act as we choose; whether we are or can be responsible (morally or legally) for our thoughts or actions or their consequences; and whether we ought to be punished for any of our thoughts or actions or their consequences. Readings from classical and contemporary sources.

PHIL 0130. Introduction to Analytic Philosophy.
This course will be an introduction to some of the major issues and methods in contemporary analytic philosophy. We will look at work on free will, the mind-body problem, knowledge and skepticism, truth and relativism, morality, and value. We will also take note of some of the main methodological tools employed in that work, such as reflective equilibrium, use of counterexamples, appeal to the best explanation, and thought experiments.

PHIL 0180. Topics in Feminist Philosophy.
This survey course is designed to introduce students to core issues of feminist philosophy. Questions central to the course include: What is the nature of women? Is there a distinctly female method of moral or theoretical reasoning? What would a feminist theory of justice look like and how does our conception of the family fit into that theory? And finally, what is the moral impact of pornography? In addition to considering problems specific to feminist philosophy, this class is intended to develop critical skills and serve as an introduction to analytic methodology as well as moral and political philosophy. No prerequisites.

PHIL 0190. Contemporary Moral Problems.
This semester we will concentrate on the issue of freedom of speech. In addition to foundational arguments in philosophy and law, we will look specifically at issues around political expression, pornography, hate speech, and the internet. Students will write three short papers, no exams. Emphasis is placed on identifying, evaluating, and constructing careful and well thought-out arguments. No prerequisites.

PHIL 0200A. Consciousness.
This course will provide an introduction to the main philosophical theories of consciousness, and also to the relevant experimental work in neuroscience and cognitive psychology. Among the issues to be considered are: the different forms of consciousness, the relationship between consciousness and attention, the role of consciousness in perception, and the "hard problem" of consciousness (that is, the problem of determining how "qualitative" psychological characteristics like pain and the taste of lemons are related to neurobiological characteristics of brain states).

PHIL 0200B. Time Travel.
Although time travel is a commonplace of popular fiction, considering it closely reveals some interesting paradoxes. Studying these paradoxes provides a natural introduction to many core topics in metaphysics, including causation, possibility, personal identity, free will and the relationship between philosophy and physics. For first-year students only.

PHIL 0200C. Personal Identity.
What makes me the same person over time? How can we decide whether a person at a time is identical with a being alive at another time? We will consider the continuing existence of the body, the ability to remember experiences, and other criteria. Readings from classic (17th and 18th century) and contemporary sources. Enrollment restricted to first-year undergraduates.

PHIL 0200D. Thinking Through Faith.
Since the dawn of science, reason has been seen as a threat to faith. We will approach the issue obliquely, reading contemporary authors who approach it from very different directions. Writers include: Dietrich Bonhoeffer, Marcus Borg, Rita Brock, John Crossan, William Jones, Jon Levenson, Elaine Pagels, Rebecca Parker, and Barbara Taylor. Faith is no prerequisite, but those who have no appreciation for what it might mean to “live faithfully” may find it difficult to engage with the readings, as will those who regard it as blasphemous to subject the claims of faith to critical appraisal. Enrollment to 15 first year students. FYS.

PHIL 0210. Science, Perception and Reality.
It is implausible that scientific discoveries could make us give up commonsensical beliefs. It is even less plausible that commonsense could make us reject established scientific theories. So when science and commonsense appear to clash, as they do over colors, solidity, mental content, values, and death, serious philosophical problems arise. We will investigate possible responses to these problems.

PHIL 0220. Introduction to Philosophy.
An introduction to basic methods of philosophical inquiry and their application to some traditional problems in philosophy. Topics include arguments and their place in philosophy, philosophical thought-experiments and the method of counterexamples, the analysis of knowledge, skepticism, the mind-body problem, free will, and the existence of God.

PHIL 0230. Human Knowledge and Truth.
We consider the concepts of knowledge and truth, given the contemporary notion that conflicting views about the world can both “be correct”. Issues covered will include realism and anti realism, pluralism and relativism, conceptual relativity, and objectivity. Readings will come from contemporary analytic philosophers, including Devitt, Rorty, Putnam and Nagel.

PHIL 0240. Dreams.
This course is concerned with philosophical questions arising from dreams and dreaming. We will be dealing with contemporary and historical...
philosophers’ work in an exploration of this mysterious and fascinating, yet extremely widespread, activity.

**PHIL 0250. The Meaning of Life.**
This is an introductory course in ethics, with a focus on the question of what is the nature of the human good, or of a life lived well. Readings will be from classical sources (Aristotle, Epicurus, Kant, Nietzsche, Camus) as well as from contemporary authors. In investigating this question, the course will also introduce students to some of the main problems and positions in moral philosophy. Central concepts such as obligation, responsibility, pluralism, moral knowledge will be discussed, but in the larger context of what is the nature of the good life. No prior work in philosophy will be presupposed.

**PHIL 0350. Ancient Philosophy.**
We will discuss the ethics, epistemology, and metaphysics of the principal figures in ancient philosophy from the Presocratics to Aristotle. Emphasis is given to understanding the problems the philosophers were trying to solve and to assessing the arguments for their various positions. Primary readings are from the original sources in translation.

**PHIL 0360. Early Modern Philosophy.**
An introduction to central themes in Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. Major topics include: reason, experience, and knowledge; substance and the nature of the world as it really is; induction, causation, and the origin of our ideas; skepticism, realism, and idealism. Connections are made with the scientific revolution of the 17th century.

**PHIL 0400. Marxism.**
In the first part of the course, we will examine Marx’s economic, political, and philosophical writings, focusing on his analysis of capitalism, his critique of liberal democracy, and his theory of history. Then in the second part, we will look at some recent attempts to renew and extend the Marxist tradition. WRIT

**PHIL 0410. Marxism after Marx.**
A study of current debates in Marxist theories concerning such issues as dialectic market socialism; class, race, and gender; and democracy. Prerequisite: PL 40 or permission of the instructor.

**PHIL 0500. Moral Philosophy.**
A systematic examination of the main alternative normative moral theories: consequentialism; moral rights; moral duties; moral virtues. Focuses on the principal issues in the formulation of the different theories, on the main points of conflict between them, and on the critical evaluation of each. Readings are drawn mainly from contemporary work in moral philosophy.

**PHIL 0540. Logic.**
An introduction to perhaps the most fundamental tool of rational thought: deductive logic. Course begins with basic sentential logic, then moves on to deduction, quantification, and prediction. Argumentation and reasoning may also be addressed at times. No previous experience with logic or philosophy is required.

**PHIL 0560. Political Philosophy.**
An analytic investigation of some central problems and topics in political philosophy, including political obligation and civil disobedience, liberty, rights, equality, and democracy. Readings are drawn from recent work in the field, along with a few classics. WRIT

**PHIL 0570. Environmental Ethics.**
In the first half of the course, we will ask what sorts of things have value. Does the realm of moral consideration extend past human beings to include animals, plants, and nature itself? How does environmental concern figure into the worthwhile life? What role do consumer goods play in a good life? How do we know? Good intentions are not enough to make good policy. Thus, in the second half of the course, we will try to determine what sorts of policies actually help to protect the environment. We will learn what economics and other social sciences tell us about human behavior and how to shape institutions. We will examine issues in wildlife management, human population, resource use, and more.

**PHIL 0660. Philosophy of Psychology.**
An introduction to philosophical issues concerning the foundations of psychology and the cognitive sciences. Possible topics include behaviorism and functionalism, mentality and neural processes, mental representation, the computational model of mind, the implications of artificial intelligence, the connectionist model, the role of consciousness in psychology, and the status of psychology as a science.

**PHIL 0700. Philosophy of Religion.**
This course will discuss a representative group of philosophical issues and problems that arise in connection with religious worldviews. Specific topics may include but are not limited to the following: concepts of a god, the existence and attributes of God, the problem of evil, miracles, religion and morality, faith and science, and the possibility of religious knowledge. Prerequisite: At least one previous philosophy course.

**PHIL 0770. Introduction to the Philosophy Mind.**
Examines three central mysteries in the philosophy of mind: the relationship between the mind and the body; the nature of thoughts; and the nature of consciousness. Prephilosophical and historical approaches, and discussion of the currently dominant themes.

**PHIL 0850. Philosophy of Language.**
Discussion of the nature of linguistic meaning and other topics, such as vagueness; metaphor; and language, thought, and culture.

**PHIL 0880. Ethical Themes in the Contemporary American Short Story.**
Consideration of contemporary American short stories in terms of their treatment of such philosophical themes as love, loyalty, envy, belief, despair, and charity. Focuses on themes in moral philosophy, rather than themes in social and political philosophy. WRIT

**PHIL 0990A. Distributive Issues in Health Care.**
No description available.

**PHIL 0990B. Equality in Political Theory.**
A study of the connections and conflicts between the liberal democratic commitment to political equality of all citizens, and the more leftist goal of economic equality, or equality of well-being. For example, do the purported rights that produce economic inequality override those that support political equality, or vice versa? Texts will be mostly contemporary.

**PHIL 0990C. Foucault and Epistemology.**
Provides an overview of Foucault’s major contributions to philosophy and a focused analysis of his theory of knowledge, especially the links between power, discourse, and knowledge. Considers debates over Foucault’s claims and whether his account leaves us with an epistemic nihilism.

**PHIL 0990D. Justice, Resource Allocation, and Health Care Rationing.**
Three main sections: first, the main philosophical theories of distributive justice and their implications for the right to health care; second, a number of specific moral issues in allocating, prioritizing, or rationing health care resources; and, third, fair institutional procedures for health care rationing. Readings drawn both from philosophical work on justice and from literature in health policy and bioethics. Prerequisite: one course in ethics or political philosophy. Preference given to concentrators in philosophy or biomedical ethics.

**PHIL 0990E. Kant’s Moral Philosophy.**
No description available.

**PHIL 0990F. Perception.**
 Begins with a reading of an 18th-century classic, Berkeley’s *New Theory of Vision*, and then moves on to contemporary work. Topics include: direct versus representational theories of perception, primary and secondary qualities, the theory-ladenness of perception, and the alleged foundational role of perception in knowledge.

**PHIL 0990G. Plato.**
A close reading of Plato’s major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. (Students wishing to read the texts in the original Greek should make arrangements with the instructor.)

**PHIL 0990H. Race and Racism.**
With special attention to the U.S., this course examines the origins of the concepts of race and racism and current controversies about it.

**PHIL 0990I. Self-Respect.**
We often act as if the sole object of morality were treating others properly. In this course, we will consider how we ought to treat ourselves. Among
the questions we will consider are: What is self-respect? How is it attained, preserved, and lost? Can self-respect exist in the absence of personal and moral integrity?

PHIL 0990J. The Concept of Alienation.
We will read texts concerning the concept of alienation from Hegel, Marx, Kierkegaard, Nietzsche, and Sartre with a view to developing a concept of alienation that proves useful for an understanding of contemporary conditions.

PHIL 0990K. Topics in the Philosophy of Language.
During the first half of the semester, we read several of the classic works that form the background for contemporary philosophy of language, including works by Frege, Russell, Ayer, Quine, and others. During the second half, we take up one or more topics of contemporary discussion, chosen from the following: vagueness, paradoxes of self-reference, the nature of truth, realism versus antirealism.

PHIL 0990L. Moral Psychology.
We all have our notions of good people, bad people, and ordinary people, but reality tends to defy these concepts. Many otherwise “nice,” family loving, church going people voted for Hitler. On the other hand, people with very stupid or even evil views about what morality is sometimes turn out to be a lot better “in practice” than their smart counterparts who know Kant by heart. The same person may be very honest with her husband but very dishonest with the IRS and other authorities, brave in battle but scared of public speaking. This class will explore this complexity, touching upon topics like free will and rationality, and read attempts by contemporary philosophers to find some method in the mess.

PHIL 0990M. Descartes Meditations.
This seminar will focus on the main arguments and overall goals of Descartes’ Meditations, read in conjunction with the Objections and Replies and some of Descartes’ other writings. Also discussed will be some philosophically engaging studies of the Meditations by contemporary writers such as Harry Frankfurt and Bernard Williams.

PHIL 0990N. Moral Metatheory: What is Moral Theory Good For?.
Moral theory investigates morality, but moral metatheory investigates moral theory. Some problems we'll consider include: Is moral theorizing worthwhile? What's the point of moral theory? What should good theories do? Does widespread disagreement or the reliance on questionable intuitions invalidate moral theorizing? What exactly does the moral theorist know? What counts as good philosophical methodology, and how do we know?

PHIL 0990O. The Structure of Scientific Revolutions.

PHIL 0990P. To Be Determined.

PHIL 0990Q. Rational Belief.
We'll examine a number of issues concerning rational belief. Specific questions will probably include: What is the relationship between rational belief and logic? Is what's rational for me to believe completely determined by my evidence? Does what’s rational for me to believe depend on my practical interests? Can I be rational in holding opinions that are denied by others who are seemingly as smart, unbiased, well-informed, etc., as I am? We'll look at these questions from a couple of different perspectives, one which sees beliefs as all-or-nothing states (either one believes P or one doesn’t), and the other which sees belief as coming in degrees.

PHIL 0990S. The Problem of Political Obligation.
No description available. Enrollment limited to 20 seniors.

PHIL 0990T. Paradox and Infinity.
This course will focus on several important paradoxes that arise within philosophy and mathematics. We will use these paradoxes to investigate central issues in metaphysics, the philosophy of language, decision theory, physics, mathematics, and logic. Among the paradoxes we will discuss are Zeno’s paradoxes of space, time, and motion; the paradoxes of set theory; the paradoxes of truth and reference; the sorites paradox; and paradoxes of rational action and rational belief. Enrollment limited to 20.

PHIL 0990U. To Be Determined.
No description available. Enrollment limited to 20 first-year students.

PHIL 0990V. Current Questions About Rational Belief.
We’ll study some “hot topics” in epistemology. Some possible questions: (1) What’s the relationship between rational belief and logic? (2) Is belief best thought as all-or-nothing, as coming in gradations, or both? (3) Can the same evidence support divergent belief-states? (4) Is rational belief completely determined by evidence, or also by values or practical interests? (5) Are graded beliefs best seen as coming in precise degrees, or as more “spread-out”? (6) Can I have rational beliefs I know are denied by others just as intelligent, unbiased, well-informed, etc., as I am? Enrollment limited to 20 juniors and seniors.

PHIL 0990W. Early Modern Theories of Ideas.
Early modern philosophers routinely employed the notion of ideas in their epistemologies. But what are ideas? Where do they fit in the prevalent substance-mode ontology of the period (if at all)? How are they supposed to avoid skepticism? And how was Hume able to turn them to his advantage? This course is a study of the evolution of theories of ideas from Descartes, Arnaud, Malebranche, Locke, Leibniz, Berkeley and Hume. Recommended prerequisites: PHIL 0220 or 0360. Enrollment limited to 20. Not open to first-year students.

PHIL 0990X. Conditionals.
In this seminar we will look at different theories of what “if” means. Is it a truth-functional connective, like the material conditional used in logic? Do sentences of the form “if P, then Q” even have truth conditions? Some logic will be very helpful; some familiarity with philosophy of language also helpful. Enrollment limited to 20 juniors and seniors.

Philosophy of science was greatly influenced by the views of Henri Poincare and Pierre Duhem. We will read their works along with contemporaries such as Emile Meyerson and Gaston Bachelard. All readings will be in English. Prerequisite: one course in Philosophy; or instructor permission. Enrollment limited to 20 juniors and seniors.

PHIL 0991A. Seminar on Ethics, Education, and Fiction.
This seminar focuses on fiction as a vehicle for discussing ethical issues in education. It also uses works by philosophers. Topics include the following: What are appropriate aims for various types and levels of education? What are appropriate student-teacher relationships? How much, if at all, should schools concern themselves with the non-academic side of students’ and teachers’ lives? How should the performance of students and teachers be evaluated? How can fiction enrich the philosophical discussion of such questions? This seminar is open to students with backgrounds in philosophy, literature, or the social sciences (including the study of education). Enrollment limited to 20 undergraduates.

PHIL 0991B. Causation.
This course will explore the relation between cause and effect from multiple perspectives. We will investigate how humans normally conceive of causation, how scientists investigate causality, how to apply judgments of causation in legal and moral situations, and what ultimately lies everywhere in the universe together. Enrollment limited to 20 juniors and seniors.

PHIL 0991C. Reasons and Ought.
Contemporary philosophical problems of the fundamental deontic concepts. Topics will include: ought implies can, ’buckpassing’ accounts of value, narrow and wide scope requirements, subjective and objective reasons (and ought). Enrollment limited to 20.

PHIL 0991D. Topics in Philosophy of Mathematics.
This course will focus on views and issues currently under discussion in the philosophy of mathematics. It is intended to cover material not covered in Philosophy 1300. We will consider historical antecedents of contemporary views and their relation to broader issues in metaphysics and epistemology. Prerequisite: PHIL 0540, 1300, 1630, or 1880. Enrollment limited to 20.

PHIL 0991E. Self and Others.
The seminar will examine various topics related to the experience of being seen, including shame, alienation, authenticity, the development and disruption of identity and of a sense of self, and forms of social participation. We will read both historical and contemporary works from philosophy (including Rousseau, Diderot, Hegel, Sartre, Velleman, Calhoun, and others), from psychiatry (including Winnicott, Laing, and others), as well as from social psychology. Enrollment limited to 20.

PHIL 0991F. Utopianism and Political Philosophy.
Might even morally perfect people require government? Could justice require certain arrangements even if these are highly unrealistic? Whether
political philosophy must be "realistic" and in what ways is a traditional concern, and recently has become a hot topic again. In this course, we will study the family of questions about realism and utopianism in political philosophy. Authors will include small amounts of Plato, Machiavelli, Hobbes, and Rousseau, as well as more extensive study of contemporary philosophers John Rawls, G. A. Cohen, Amartya Sen, and others. The course is intended for seniors, though juniors may ask for permission. Enrollment limited to 20

PHIL 1250. Aristotle
A close study of Aristotle's major works: his metaphysics, philosophy of nature, philosophy of mind, and ethics. Readings from original sources (in translation) and contemporary secondary material. (Students wishing to read the texts in the original Greek should make arrangements with the instructor.) WRIT

PHIL 1260. Plato.
A close reading of Plato's major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. (Students wishing to read the texts in the original Greek should make arrangements with the instructor.)

PHIL 1270. Pragmatism.
Course examines the central themes of American pragmatism - the belief/doubt model of inquiry, assertibility theories of truth, the critique of philosophical dualisms - with some attention to their applications to social philosophy. The focus will be on the classical theories of Peirce, James, and Dewey, as well as on contemporary philosophers such as Quine, Rorty, and Putnam.

PHIL 1280. History of Moral Philosophy.
The course will focus on Aristotle and Kant, the two most influential figures in the history of moral philosophy. We will examine their principal ethical writings, seeking to evaluate the fundamental similarities and differences in their understanding of moral life and of the purposes of moral philosophy. Attention will also be given to some contemporary treatments of the relations between Aristotle and Kant. Enrollment limited to 40

PHIL 1290. Kant's Practical Philosophy.
A study of Kant's main writings in moral and political philosophy. Topics include Kant's conception of autonomy, the formulations of the moral law, the difference between freedom as the fundamental value of his moral philosophy and his metaphysics of free will, and the foundations of his political philosophy in his moral philosophy. Writing assignments include a midterm and a final paper.

PHIL 1300. Philosophy of Mathematics.
An introduction to the philosophy of mathematics. Topics include the nature of mathematical objects and the status of mathematical knowledge. In the first part of the course, we will consider historically-influential views, such as Formalism, Intuitionism, and Logicism. In the second, we will consider contemporary views of mathematics, such as Fictionalism, neo-Fregeanism, and Structuralism.

Examines explanations of the origin of the cosmos, human beings and issues of human concern, such as illness, death and the afterlife, with readings from literary, philosophical, and scientific sources from the ancient Near East and Greece. We will ask how we and the ancients distinguish science from non-science and how ancient science differs from our own

PHIL 1400. Ethics in the Novel.
Consideration of novels in terms of their treatment of such philosophical themes as death, courage, faith, betrayal, responsibility to others, and mercy. Focuses on themes in moral philosophy rather than themes in social and political philosophy. Half of the course deals with Malory, the other half with contemporary American novels. No pre-requisites. WRIT

PHIL 1420. Philosophy and Poetry.
An examination of philosophy and poetry as rival avenues to the apprehension of truth, as well as an introduction to the basic problems of aesthetics. Philosophical readings will range from Plato to Hegel to contemporary writers. The focus of the course will be three philosophical poems: Lucretius' On the Nature of Things, Wordsworth's Prelude, and Eliot's Four Quartets. One previous course in philosophy is recommended

PHIL 1430. Feminist Philosophy.
A rigorous philosophical examination of five topics addressed in contemporary feminist writing: justice and gender; gender justice and developing countries; the social construction of gender, sexuality, and sexual orientation; the claim that women reason differently and have different ways of knowing and arguing; and radical feminism on pornography, rape, and intercourse. Prerequisite: one semester course in philosophy.

PHIL 1450. Aesthetics.
This course will treat Kant's contribution to philosophical aesthetics. We will study his theory of the beautiful as well as his theory of the sublime; the latter one has been particularly appreciated in post-modern debates. Our work will be centered upon two guiding issues: (1) Kant's distinction between aesthetics and ethics on the one hand, and his exploration of their deep-rooted connection on the other hand; (2) the importance of the reflective power of judgment within the scope of Kant's overall philosophical project. Both issues lead to the question of what it means for human beings to be capable of approaching the world aesthetically.

PHIL 1500. Methodology of Philosophy.
Does successful philosophical inquiry yield new facts or new ways of looking at old facts? Is philosophical truth absolute or relative? Relative to what? Why does philosophy lack not only a body of generally agree-upon truths, but even an established method of settling disputes? Must the results of philosophical inquiry accord with "common sense" and if so, why?

PHIL 1520. Consciousness.
Topics will include: forms of consciousness, physicalist and representationalist theories of qualia, pain and other bodily sensations, emotional experience, conscious thought, higher order representation theories of consciousness, self-representation theories, global workspace theories, blindsight and related phenomena, and the roles and attention and working memory in perceptual consciousness.

PHIL 1530. Experimental Philosophy.
Experimental philosophy (X-phi) is the offspring of a marriage between traditional conceptual analysis and scientific method. It investigates intuitions about such traditional philosophical topics as free will, moral responsibility, knowledge, and causation, but it does so systematically and rigorously, by giving carefully worded questionnaires to samples drawn from the general population, and subjecting the results to statistical analysis. The samples may include but are not limited to philosophers and philosophy students. Thus far X-phi has achieved interesting results in moral philosophy, metaphysics, philosophy of mind, and epistemology. The course will survey some of these results, examine the current objections to X-phi, and provide some instruction in the art of designing X-phi questionnaires. Open to juniors and seniors

Decision theory is a formal apparatus for analyzing preferences and choices. Students learn the formal theory and then examine its foundations and philosophical implications. Specific topics: the role of causation in decision problems, the status of the axioms of the theory, problems of infinite utility, rudimentary game theory, social choice functions, utilitarianism as a theorem.

PHIL 1590. Philosophy of Science.
Some very general, basic questions concerning science. Can evidence justify belief in theories which go beyond the evidence? What is the nature of good scientific reasoning? Is there a single scientific method? What is a scientific explanation? Does science reveal truths about unobservable reality, or merely tell us about parts of the world we can measure directly? WRIT

PHIL 1600. Philosophy of Law.
Philosophical examination of the chief classical and contemporary theories of the nature and function of law. Topics include the definition of law, the nature of legal systems, the logic of legal reasoning, the analysis of basic legal conceptions (e.g., of right and duty), legal rules and principles, law and justice, and law and morality. WRIT
PHIL 1610. Philosophy of Relativity Physics.
This course will examine how Einstein's Special and General Theory of Relativity bears on important philosophical issues with a focus on whether spacetime constitutes a kind of substance and what spacetime structures are required to support explanations of physical phenomena. Also discussed are connections with logical positivism, cosmology, spacetime singularities, determination, wormholes, time travel, causation, and the passage of time.

PHIL 1620. Philosophy of Quantum Mechanics.
Course will analyze interpretations of non-relativistic quantum mechanics like the Copenhagen interpretation. Everett’s relative state interpretation, the many-worlds/many-minds interpretations, GRW-type collapse models, Bohm’s interpretation, and various modal interpretations. The focus will be the measurement problem, but we will also discuss connections with mental states, the contextual nature of measurement, non-locality and spacetime

PHIL 1630. Deductive Logic.
This course provides a rigorous introduction to the metatheory of classical first-order predicate logic. Topics covered include the syntax, formal semantics, and proof theory of first-order logic, leading up to the completeness theorem and its consequences (the compactness and Lowenheim-Skolem theorems). Further topics may include modal logic, the logic of conditionals, basic set theory, and epistemic logic. There will be some discussion of philosophical issues, but the focus of the course will be on the technical material.

PHIL 1640. The Nature of Morality.
Investigates major theories and issues concerning the nature of moral value. Readings from 20th-century authors. Issues include naturalism, supervenience, moral motivation, subjectivity/objectivity of value, skepticism, moral relativism, and moral realism.

PHIL 1650. Moral Theories.
A systematic examination of the main alternative normative moral theories: consequentialism; moral rights; moral duties; moral virtues. Focuses on the principal issues in the formulation of the different theories, on the main points of conflict between them, and on the critical evaluation of each. Readings are drawn mainly from contemporary work in moral philosophy.

PHIL 1660. Metaphysics.
Selections from the following topics: causation and determinism, identity and persistence, including personal identity, necessity and possibility, essence and essentialism, freedom and agency, ontology, substances and events, the nature of time, realism and antirealism. Prerequisite: three courses in philosophy.

PHIL 1670. Time.
Course will focus on two questions: “Does time flow?” and “What is the difference between the future and the past?” This involves issues of fate, our consciousness of time, the connection between time and motion, and time travel. We’ll discuss arguments from classical Greek and medieval Arabic philosophy and bring modern physics to bear on these questions.

PHIL 1680. Medieval Philosophy.
Since the Renaissance, medieval philosophy has often been unjustly dismissed as arcane and irrelevant, despite impressive innovations in ethics, philosophy of mind, metaphysics, and logic. Instead of surveying so vast a field, the course focuses on one or two sets of problems, such as the problem of evil, the freedom of the will, the existence of God, universals, substance, mind and meaning.

PHIL 1690. The Problem of Free Will.
This course is an investigation into how we should understand our free will—we have free will at all. Topics for reading and discussion will be selected from among: conditions for moral responsibility, praise- and blame-worthiness, alternate possibilities, responsiveness to reasons, fatalism, determinism, and the possibility of meaning in a deterministic universe. Prerequisite: one previous course in philosophy, or permission of the instructor.

PHIL 1700. British Empiricists.
A detailed study, both historical and critical, of central issues in Locke, Berkeley, and Hume. Topics include a selection from: innate ideas; substance; personal identity; abstract ideas; theory of language; perception, materialism, and idealism; induction and causation; and skepticism. Also includes some discussion of later critics of classical empiricism.

PHIL 1710. 17th Century Continental Rationalism.
The course will focus on Descartes' "Rules for the Direction of Mind" and Spinoza’s "Ethics". The theme will be the relation between reason and reality, and considerable attention will also be given to two 20th century works that carry on a rationalist approach -- Ernst Cassirer's "Substance and Function" and Thomas Nagel's "The View from Nowhere.

A detailed study of Kant’s theoretical philosophy in the Critique of Pure Reason, which we will read in its entirety alongside contemporary secondary source material. Prerequisites: PHIL 0360, 1700, 1710 or instructor permission.

PHIL 1730. Nietzsche.
A systematic study of Nietzsche’s philosophy as it developed throughout his works. Substantial attention also given to Nietzsche’s major philosophical predecessors (e.g., Kant and Schopenhauer) as well as to the most significant recent secondary literature on his philosophy. Prerequisite: at least one prior course in philosophy.

PHIL 1740. Nineteenth-Century Philosophy.
This course will treat 19th century German philosophy. We will examine the development leading from German Idealism to Nietzsche. Starting and focal point of all debates in 19th century German philosophy is the work of Immanuel Kant. Therefore basic ideas of Kant’s philosophy will be discussed first. The German idealists criticized Kant for what they called his "dualism" which they thought splits up life’s unity into unrelated aspects. A special concern brought up was Kant’s alleged negligence of both what is different from reason and what is beyond its scope. In this context we will be reading Jacobi’s famous letter to Fichte in which he raised the issue of impending nihilism, parts of Hegel’s Faith and Knowledge, and Schelling’s Philosophical Investigations into the Essence of Human Freedom. Arthur Schopenhauer passionately opposed the systems of German Idealism (though his own philosophy has quite a bit in common with them). He emphasized the limitations of reason’s power. We will be studying selected pieces from his main work The World as Will and Representation. Thus prepared, we will move on to Nietzsche who reflects and criticize all the tendencies of 19th century philosophy, casting doubt on traditional conceptions of reason, morality, truth, and religion. The threat of nihilism reappears, even stronger and even more provocative. We will be studying Nietzsche’s analyses as well as his answers.

PHIL 1750. Epistemology.
This course provides a survey of central issues in contemporary epistemology. We will discuss the nature of knowledge, justification, and rationality. Topics include: difficulties with the traditional analysis of knowledge, skepticism about the external world, the nature of empirical justification, the problem of induction, and the epistemology of the a priori. WRIT

PHIL 1760. Philosophy of Language.
This course examines recent philosophical work in natural language semantics. The focus is on names and descriptions. We will consider which kinds of propositions sentences containing these terms express, and their truth conditions. We may also examine belief reports and vague terms, and other theoretical issues. Prerequisite: PHIL 0540 or 1630.

PHIL 1770. Philosophy of Mind.
Questions concerning the nature of mentality and its relation to the body. Selections from the following topics: mind and behavior, mind as the brain, mind as a computing machine, thought and language, action and mental causation, intentionality and consciousness, the nature of mental representation, emotion and volition, the nature and possibility of a science of mind. Prerequisite: at least one course in philosophy (2 or more preferred) or a background in cognitive science.

PHIL 1780. Philosophy of Biology.
General problems in the philosophy of science as they apply specifically to the biological sciences. Issues include the status of biological and neurobiological laws, "property reductionism" and emergentism in relation to the thesis of vitalism, evolutionary explanation, ethical and cultural influences on genetic research, and gender bias in scientific theorizing and gender research in the biological sciences.
PHIL 1790. Philosophy of the Social Sciences.
An examination of philosophical questions raised by the idea of distinctively social sciences such as economics, political science, sociology, history, and psychology. Readings from traditional and contemporary philosophers on such topics as individualism, rationality, interpretation, and value neutrality. Three short papers and weekly (very) short writing assignments.

PHIL 1800A. Anarchism, Libertarianism, and Authority.
Examines arguments challenging the idea that state power is ever morally justified, and the idea that there is any obligation to obey the law. Also considers a more moderate class of views that holds that state power is justified only for very narrow purposes such as keeping peace, but not including most of the things that modern states do. A previous course in moral or political philosophy is recommended.

PHIL 1810B. Expressivism.
Expressivism is a theory of normative language according to which the function of normative sentences is to express states of mind other than belief (emotion, plans, preferences). After a quick look at the mid-twentieth century ancestors of contemporary expressivism, we examine the main problems and the theoretical attempts to solve them, including Circularity, Embedding, Centered Norms, Fallibility, Wishful Thinking, Negation. We'll finish with an examination of quasi-realism and some metametaethics. Prerequisite: PHIL 1640.

PHIL 1810C. Topics in Philosophy of Language.
Consideration of recent work in philosophy of language. Topics may include: meaning and truth; proper names and reference; demonstratives and context-sensitivity; semantics and pragmatics; metaphor and figurative expression. Prerequisites: One course in logic, and at least one other course in philosophy.

PHIL 1820. Philosophy and Psychoanalysis.
The course proposes a philosophical examination of a variety of psychoanalytical theories beginning with classical Freudian theory and including ego psychology, various relational theories (object relations, intersubjectivity, and attachment theories), and self psychology. The course might also consider some of the philosophical sources of psychoanalytic theory, its interaction with recent developmental research, and its applications in literary and cultural studies.

PHIL 1830. Twentieth-Century Analytic Philosophy.
This course will cover major philosophers and movements of the 20th century philosophy in the analytic tradition, from the early ground-breaking works of Frege, Russell, and Wittgenstein through Logical Positivism, "ordinary language" philosophy, Quine, and the later developments. Philosophical issues discussed concern philosophy of language, metaphysics, epistemology, philosophy of science, ethics, and the nature and possibility of philosophy.

PHIL 1840. Twentieth-Century Continental Philosophy.
The course will focus on the main figures of the German tradition--Husserl, Heidegger, Cassirer, Gadamer, Adorno, Habermas, and Tugendhat, with emphasis on their efforts to rethink such key concepts as consciousness, history, reason, and the self. Some attention will be paid to points of intersection with German-language philosophers typically concerned "non-Continental"--Frege, Wittgenstein, and the Vienna Circle.

PHIL 1850. Philosophical Logic.
An examination of various philosophical issues arising in the foundations of logic, such as the following: existence, definite description, reference and truth, semantic paradoxes, implication and presupposition, modalities and "possible worlds," logical truth, the nature of logical knowledge, and logic in natural language.

PHIL 1860A. Topics in Logic: Incompleteness.
Gödel’s two incompleteness theorems are among the most important results in the history of logic. We will study these results, and explore related topics, by working through some of the classic papers on the subject. Authors to be read include Gödel, Tarski, Feferman, and Visser. Prior exposure to logic at the level of Phil 1630 or 1880 is preferred but not absolutely necessary, though strong mathematical skills are

PHIL 1880. Advanced Deductive Logic.
An introduction to the 'limitative' theorems of deductive logic, including the undecidability of first-order logic, the Gödel incompleteness theorems, and the arithmetical undefinability of arithmetical truth. Intended as a sequel to PHIL 1630; previous participation in either that course or one of similar content is strongly recommended. Students who have completed PHIL 0540 with a grade of "A" may enroll with instructor permission.

PHIL 1890A. Contextualism and Naturalism in Twentieth-Century Epistemology.
Topics include the epistemological ideas of the later Wittgenstein; the "epistemological naturalism" that P. F. Strawson finds in Wittgenstein (and in Hume), and adopts as his own philosophy, early and late; naturalized epistemology, as defined by W. V. Quine; and varieties of contextualism in the epistemology of recent decades, including selections from the work of Robert Nozick, Fred Dretske, Peter Unger, and, most recently, David Lewis.

PHIL 1890B. Wittgenstein.
A detailed study, concentrating on themes in the Philosophical Investigations. Readings also in some earlier works of Wittgenstein, Frege, and Russell that provide the background to Wittgenstein’s break with his former views. Topics include a selection from the picture theory of the proposition, logical atomism, understanding and meaning, rules and rule-following, "private languages," imagination, grammar and necessity, and skepticism and certainty. Prerequisite: three courses in philosophy.

PHIL 1890C. Philosophy and Science of Perception.
This course is structured around close examination of Wilfrid Sellars’s classic essay "Empiricism and the Philosophy of Mind". Additional readings set the work in its historical context (reductionist views of mind, foundationalist epistemology, and scientific instrumentalism), and include Ayer, Carnap, Chisholm, Hempel, Price, Schlick, Skinner, and Ryle.

PHIL 1890D. Theories of Truth.
No question more reeks of philosophy than the question "What is truth?" We'll look at what logicians have had to say about the matter and, in particular, at what they have had to say about the Liar Paradox.

PHIL 1910A. Currents in American Pragmatism: Peirce to Putnam.
Pragmatism is a uniquely American contribution to philosophy. This course analyzes the development of pragmatism by investigating the work of Peirce, James, Quine, Richard Rorty, and Putnam. Special emphasis is placed on the role played by recent pragmatism in the realism/antirealism debate.

PHIL 1910B. Intentionality in Brentano, Meinong, Husserl.
Intentionality--that feature of our mental states in virtue of which they are of or about something--was a central theme for a number of philosophers working in Vienna at the turn of the century, including most prominently Franz Brentano, Alexius Meinong, and Edmund Husserl. Their work influenced both phenomenological and analytic traditions, including Freud, Heidegger, Moore, Russell, and Ryle.

PHIL 1910C. German Idealism.
A study of the major figures and unifying themes of classical German Philosophy, focusing on Kant, Fichte, Schelling, and Hegel. Also includes discussion of such figures as Jacob, Reinhold, Maimon, Holderlin, and Novalis.

Modern aesthetics emerged in the eighteenth century at the intersection of different disciplines, discourses, cultures, and European nations. Contributors to the field came not only from academic philosophy but also from the arts, literature, history, theology, and other fields. Aesthetics was thus and remains primary among interdisciplinary studies. Readings for this course will be drawn from British, German, and French authors as Shaftesbury, Du Bos, Addison, Hutcheson, Hume, Burke, Kames, Diderot, Mendelssohn, Lessing, Kant, Schiller, and Herder. Enrollment limited to 2 juniors, seniors, and graduate students.

An elective for students with at least six previous courses in philosophy. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

PHIL 2020A. Action and Agency.
No description available.

PHIL 2020B. Cause, Action, and Explanation.
No description available.
PHIL 2020C. Consciousness.
No description available

PHIL 2020D. Consciousness and the Mind-Body Problem.
No description available

PHIL 2020E. Physicalism and the Mind.
No description available

PHIL 2020F. Self, Subjectivity, and Agency.
No description available

Could consciousness – more broadly, mentality – be an "emergent" property of the brain, arising out of neural processes and yet physically inexplicable and irreducible? There is also the associated thesis of "downward causation": Minds, having emerged from the brain, project their causal powers downward, on the brain and other physical systems. The doctrine of emergence, born in the late 19th century England, continues to exert considerable attraction on philosophers and scientists alike. We will begin with the classic works of C. Lloyd Morgan, C.D. Broad, Roger Sperry and others, and then take up current debates pro and con. Enrollment limited to 20 graduate students. S/NC

PHIL 2020H. The Self.
No description available

PHIL 2020I. Physicalism and Dualist Alternatives.
No description available

PHIL 2020J. Understanding Actions.
Our ability to understand actions of others seems essential to the possibility of a communal life. Moreover, as reflective agents, we seem to have a need to understand our own actions - why we are doing what we are doing. This course will examine some central issues concerning how understanding of actions is possible. We will begin with the classic paradigms, Davidson's causal theory, Hempel's nomological model, and Dray's critique of these approaches. This will lead to considerations of normativity and the agent's perspective in action explanation. Further topics: whether the reasons the agent has for action and the agent's beliefs and desires can be explained by directly invoking emotions, like grief and jealousy, rather than reasons-why (Rosalind Hurthhouse, Michael Smith, and Peter Goldie). I expect to use some material from recently published works, by Keirn Setiya, Michael Thompson, David-Hillel Ruben, and others

No description available

PHIL 2020L. Naturalism, Materialism, Physicalism.
If contemporary analytic philosophy has a shared ideology, it has to be naturalism. Materialism, or its successor, physicalism, which is closely associated with naturalism, is the default position in many areas of analytic philosophy, notably philosophy of mind, epistemology, metaphysics, and philosophy of science. We will explore why and how all this happened, and examine actual/possible arguments pro and con naturalism-materialism-physicalism. Readings from contemporary sources; we may focus on two books to appear soon: Physicalism by Daniel Stoljar and The Waning of Materialism ed. Robert C. Koons and George Bealer. Open to graduate students only; others may enroll with instructor permission

We begin with Donald Davidson's work on radical interpretation as a theory about how we gain entry into other minds—that is, other agent's meanings and thoughts. We will then consider the theory vs. simulation theory controversy regarding mind-reading. There is also a more basic question: How do we manage to attribute thoughts and meanings to ourselves? That is, how is self-interpretable possible? Next, we will take up action explanation—how we understand actions, our own and those of others. We will explore cases in which such understanding fails—cases of alienation, defective agency, and failure of empathetic understanding. Enrollment limited to 40 graduate students in Philosophy

PHIL 2030A. Moral Psychology.
We all have our notions of good people, bad people, and ordinary people, but reality tends to defy these concepts. Many otherwise "nice", family loving, church going people voted for Hitler. On the other hand, people with stupid or even evil views about morality sometimes turn out to be a lot better "in practice" than their smart counterparts who know Kant by heart. The same person may be very honest with her husband but very dishonest with IRS, brave in battle but scared of public speaking. In this class we shall explore this complexity, touching upon topics like rationality, free will, weak will, character, and love. We'll look at attempts by contemporary philosophers to find some method in the mess. Undergraduates require instructor permission to enroll

PHIL 2040A. Natures, Norms, and Knowledge.
No description available

PHIL 2040B. Philosophy of Thomas Reid.
No description available

PHIL 2040C. The Philosophy of A. N. Prior.
No description available

PHIL 2040D. Contractarianism and Its Limits.
Can morality, and justice in particular, be rightly understood as a contract or agreement for mutual benefit? This seminar focuses on the strengths and weaknesses of the social contract tradition, looking chiefly at contemporary authors such as Rawls, Gauthier, Dworkin, Scanlon, and Nussbaum

PHIL 2040E. Freedom.

PHIL 2040F. The Philosophy of Bernard Williams.
Bernard Williams was one of the most important philosophers of the 20th century. The seminar will focus on his ethical thought, with some attention to his writings in philosophy of mind, epistemology, and the history of philosophy

PHIL 2040G. The Ethics of Belief.
Will focus on the nature of belief, on the sense in which belief is subject to norms, and on what this fact can tell us about the ethics of action. There will be some attention to classical texts--Locke, Hume, Clifford, and James--but the focus will be on contemporary writings. Undergraduates require instructor permission to enroll

PHIL 2040H. Rawls.
A close study of A Theory of Justice and Political Liberalism, with attention to some of Rawls' most famous critics: Dworkin, Habermas, Cohen, Sen. Open to graduate students only; others may enroll with instructor permission

PHIL 2040I. Parfit on What Matters.
The seminar will focus on Derek Parfit's "On What Matters", one of the most significant works of ethical theory in recent years. Enrollment limited to 20 graduate students. S/NC

PHIL 2050A. Antonomy and Virtue.
No description available

PHIL 2050B. Epistemology.
No description available

PHIL 2050C. Rational Belief and Self-doubt.
PhIL 2050D. Dissertation Workshop.
No description available

PHIL 2050E. Level-Connections in Epistemology.
Long ago, Alston warned against "level-confusions" in epistemology. Being justified in believing that P, he argued, cannot require being justified in believing that one is justified in believing P. One might accept this, while still thinking that there are some important inter-level connections. For example, one might hold that the justification of one’s belief that P could be undermined by a justified belief that one was not justified in believing P. These sorts of connections have played a part in recent discussions of the epistemology of disagreement, bootstrapping, and higher-order evidence. We'll look at a number of papers which deal, in different ways, with the rational relationships between ordinary beliefs, and beliefs about those beliefs. Open to graduate students only; others may enroll with instructor permission

PHIL 2050F. Recent Work in Epistemology.
Philosophical Perspectives 2010 presents a nice cross-section of current work by both younger and more established epistemologists of varied interests and orientations. We'll read a number of papers from this volume,
perhaps supplemented by other readings for context. Enrollment limited to 40 graduate students concentrating in Philosophy

PHIL 2060A. Concepts
No description available. Open to graduate students only; others may enroll with instructor permission

PHIL 2060B. Perception
No description available

PHIL 2060C. Qualia
No description available

PHIL 2060D. Recent Work in Non-Consequentialist Moral Theory
No description available

PHIL 2060E. Consciousness
No description available

PHIL 2060F. Epistemology and Metaphysics of Perception
After a review of such traditional epistemological topics as Cartesian and Pyrrhonian skepticism about perceptual knowledge, the argument from hallucination, and the argument from perceptual relativity, we will consider the account of the relationship between perception and knowledge that is provided in Anil Gupta's recent book, *Empiricism and Experience*. We will then turn our attention to topics in the metaphysics of perception, including colors and color experience, the representational content of perceptual experience, perceptual quality spaces, and perceptual consciousness

PHIL 2060G. Other Minds
No description available

PHIL 2070A. Contemporary Issues in Ethical Theory
We'll survey issues in ethical theory, including normative theory and meta-ethics. Most readings will be articles written for a book I am editing, in pairs: for and against a given position. We'll take a week or two to read some of John Broome's recent papers on reasons, in preparation for the lectures he will give here in October.

PHIL 2070B. Expressivism Now
No description available

PHIL 2070C. Internalism in Ethics: The Work of Stephen Darwall
No description available

PHIL 2070D. Maximizing
No description available

PHIL 2070E. Normativity
No description available

PHIL 2070F. Objective Reasons
No description available

PHIL 2070G. Relativism and Nihilism
No description available

PHIL 2070H. Instrumental Reason
No description available

PHIL 2070I. Selected Topics in Metaethics

PHIL 2070J. Measuring Value

PHIL 2070K. New Wave Reasons Realism
No description available. Open to graduate students only; others may enroll with instructor permission

PHIL 2080A. Kantian Ethics
This seminar will investigate Kant's moral philosophy and its viability today. We will devote the first half of the semester to studying Kant's major ethical works under the guidance of John Rawls's influential lectures on Kant's moral philosophy and the other secondary literature. Then we will turn to recent works by Christine Korsgaard, Derek Parfit, and Steven Darwall that attempt to appropriate Kant's moral philosophy in different ways. Our goal will be to assess the legacy of Kant's ethics by considering the most promising form that a contemporary Kantian moral theory might take

PHIL 2080B. The Reception of Kant's Ethics
This course will study the response to Kant's ethics from its immediate reception to the present and its impact on the history of moral philosophy in general. Readings will include selections from Schiller, Fichte, Hegel, Schopenhauer, Nietzsche, T.H. Green, Prichard and Ross, H.J. Paton, Rawls and Habermas, and some followers of the latter two. Course assignments will include a seminar presentation and research paper. S/NC

PHIL 2080C. Realism, Idealism, and Modernity I: From Early Modernity through German Idealism
Debates between realism and idealism are central to modernity. The opposition between them might seem straightforward, realism being the philosophy of the scientific worldview, idealism the philosophy of more traditional religion and morality. But sometimes idealism has been the philosophical basis for modern science and moral autonomy, and realism the basis for more traditional worldviews. The philosophical debate between realism and idealism is thus part of the larger struggle over science, religion, morality and politics in modern culture. This course will begin a two-semester study of this complex dialectic from the seventeenth to the twentieth centuries. Enrollment limited to 20 graduate students

PHIL 2090A. Kant on Self-Knowledge
Our main reading will be the "Paralogisms" section of the *Critique of Pure Reason*, with attention to its (early modern) historical context. Undergraduates require instructor permission to enroll

PHIL 2090B. Self-Knowledge: Historical and Contemporary Analyses
We will consider the opposition between rationalist and empiricist views of self-knowledge in the early modern period and in contemporary philosophy. Enrollment limited to 20. S/NC

PHIL 2100A. Consent, Borders, Equality
No description available

PHIL 2100C. Morality's Demand and Their Limits
A study of the literature on agent-centered exceptions to otherwise impartial moral and political principles. Readings drawn from such authors as Singer, Williams, Scheffler, Kagan, Unger, Kamm, Nagel, G. A. Cohen, Liam Murphy, and others. Topics include: How demanding can morality be? Does practical reason give such demanding imperatives any standing? How impartial can morality be (and what kinds of impartiality might morality have)? Enrollment limited to graduate students in philosophy, and others with instructor's permission

PHIL 2100D. Political Authority
No description available

PHIL 2100E. The Philosophy of John Rawls
No description available

PHIL 2100F. Democratic Authority
No description available

PHIL 2100G. Liberal Rights in Democratic Theory: Two New Books
We will read two new books (one in final manuscript) that share an approach to liberal democracy. Both Corey Brettschneider (Democratic Rights: The Substance of Democracy, Princeton 2007) and Tom Christiano (The Constitution of Equality, Oxford, forthcoming 2008) argue that the rights that limit the prerogatives of democratic majorities can themselves be explained by the very same political values that explain the democratic political rights and liberties themselves. Rather than finding a tension between democracy and liberal rights the suggestion is that there is a harmony at the level of foundations, or even that it is all democratic after all. As Christiano puts it, a democratic people has the same sort of right to make its own decisions that individuals do in liberal theory. And in both cases there are limits stemming from other people's rights. A natural challenge for this approach is to explain why we should think a "people" can have such a right when (or at least if) its choices (unlike the individual choices protected by liberal theory) often coercively impinge unjustly on the lives of many individuals against their wills. Individual rights place some limits on such coercive impingement, but on these views such rights do not block nearly all unjust laws, and so the challenge is fairly stated. Among our rights, do we have this right to join with others to make and enforce laws even against those who oppose them, and even apart from any showing that this would be a route to substantively good decisions? Both authors will be invited to join the class for one meeting to discuss their work. There will be weekly reading reports, one or two class presentations by each student, and two papers: a shorter mid-term paper, and a longer final paper

PHIL 2100H. Ideal Theory and Political Philosophy
PHIL 2100L. Groups as Agents.
There are some things that only groups can do, such as sing a G7 chord, or invade a country. We also commonly speak of methods by which groups make decisions. These attributes raise the question whether groups are agents in only a metaphorical sense— with individuals being the only “real” agents— or whether action, intention, choice (and then belief?, responsibility?) genuinely characterize groups as such. Text will be the book by Pettit and List, “Group Agency: The Possibility, Design, and Status of Corporate Agents.” Other authors include Bratman, Gilbert, Tuomela, Kutz. Enrollment limited to 40 graduate students concentrating in Philosophy or Political Science. Senior undergraduates may request permission to enroll

PHIL 2110A. Color: History and Debates.
No description available

PHIL 2110B. Descartes.
No description available

PHIL 2110C. Descartes and After.
No description available

PHIL 2110D. Hume.
No description available

PHIL 2110E. Soul and Mind in Plato, Aristotle, and Descartes.
No description available

PHIL 2110F. Locke and Human Understanding.
We will be studying Locke’s “Essay Concerning Human Understanding” with recent critics and commentators. Topics will include: qualities, substance, mind and personal identity, language, human knowledge and its limits. S/NC

PHIL 2110G. Philosophy of Iris Murdoch.
We will concentrate on Murdoch’s Existentialists & Mystics, together with her near-contemporaries, e.g. Simone Weil, Hare, Sartre, and successors like John McDowell and Rosalind Hursthouse. Topics include: moral realism, moral perception, virtue, the notion of Good, the Platonic idea of an ascent to the Good; and perhaps Murdoch’s views on aesthetics, developed in dialogue with Kant and Plato

PHIL 2110H. Color and Perception.
A study of the science and philosophy of color-perception. We will study the varieties of color as phenomena in the world, the processes thanks to which we become aware of them, and what as philosophers we should say about the nature of colors. We will also study some of the “color measurement” systems developed for scientific and technical purposes. Readings will include a selection from: Maxwell and Helmholtz, Hurvich and Jameson; philosophical readings from C. L. Hardin and the useful anthology edited by Byrne and Hilbert. Open to graduate students only; others may enroll with instructor permission

PHIL 2120A. Logical Positivism.
No description available

PHIL 2120B. Metaphysics and Common Sense.
No description available

PHIL 2120C. Necessity and A Priority.
No description available

PHIL 2120D. Philosophy of Mathematics.
No description available

PHIL 2120H. Vagueness and Logic.
No description available

PHIL 2120I. Frege.
No description available

PHIL 2120J. Philosophy of Language.
No description available

PHIL 2130A. Causation and Physics.
This course addresses the nature of causation, contrasting philosophical accounts that focus on events or processes involving the ordinary objects with a reductionist picture where causal facts are just given by fundamental physics. We will start of the course discussing how causation has been treated historically by philosophers, and run through the standard types of accounts. Then, we will discuss different ways to see how the physics bears on causation. Two important topics will be indeterminism and locality. Enrollment limited to 40 graduate students

PHIL 2130B. Conditionals.
We will survey the philosophical literature on the semantics of conditionals. Debate will focus on (1) various logical systems describing counterfactuals, (2) whether conditionals have truth conditions, assertibility conditions, or some other semantic structure, and (3) the classification of conditionals into subjunctives and indicatives

PHIL 2130C. Physicalism.
Physicalism is the thesis that reality is entirely physical. We will investigate different definitions for physicalism and evaluate arguments for and against its truth. Special attention will be paid to the concepts of fundamental reality, ontology, reduction, and supervenience. Examples will focus on the metaphysical status of phenomenal, intentional, normative, and mathematical truths

PHIL 2140A. The A Priori.
No description available

PHIL 2140B. Recent Works in Epistemology.
In this seminar, we will discuss contemporary issues in epistemology. In the first half of the course, we will discuss recent monographs on knowledge by Williamson, Hawthorne and Stanley. In the second half of the course, we will discuss epistemic relativism, the possibility of reasonable disagreement, among other topics

PHIL 2140C. The Epistemology and Metaphysics of Modality.
In this seminar, we will discuss the metaphysics of modality and the nature of modal knowledge. We will read work by Bealer, Chalmers, Fine, Kripke, Lewis, Peacocke, Rosen, Stalnaker, van Inwagen, Williamson, Wright, Yablo, among others

PHIL 2140D. The Epistemology of Inference.
We will examine the nature of inference and inferential justification. Topics to be discussed include: (1) Is inference rule-governed? What does that come to? (2) Are there rules of inference that cannot rationally be doubted? (3) Is there a distinctive class of deductive inferences? (4) What explains our justification for employing deductive rules of inference? (5) What explains our justification for employing ampliative rules of inference? Undergraduates require instructor permission to enroll

PHIL 2140E. The A Priori.
This seminar concerns the nature of a priori knowledge and justification. The course will focus on the following issues: (1) Is there a coherent conception of the a priori? (2) Are there rules of inference that cannot rationally be explained? (3) Are a priori justified beliefs possible? If so, how? (4) Are contemporary accounts of the a priori – e.g., those based on rational insight or concept-possession – tenable? Enrollment limited to 40 graduate students concentrating in Philosophy

PHIL 2150A. Aristotle: Metaphysics Lambda.
No description available

PHIL 2150B. Aristotle’s Philosophy of Mind.
No description available

PHIL 2150C. Plato’s Theaetetus.
No description available

PHIL 2150D. Stoics on Mind and Action.
No description available

PHIL 2150E. Value Theory.
No description available

PHIL 2150F. Plato.
No description available

PHIL 2150G. Aristotle’s Metaphysics.
No description available

PHIL 2150H. Plato’s Republic.
No description available. Undergraduates require instructor permission to enroll

PHIL 2150I. Plato’s Theaetetus.
In this seminar, we will discuss Plato’s Theaetetus, his investigation of knowledge, and associated topics, including relativism, perception, true and false judgment, and accounts, with a view to understanding how Plato distinguishes knowledge from true belief. Open to graduate students only; others may enroll with instructor permission
PHIL 2160A. Critical Look at Later Wittgenstein. 
No description available

PHIL 2160B. Disability, Illness and Death. 
In this seminar, we will discuss philosophical questions about disability, illness, and death, as well as the relation of these conditions to issues of social justice. Questions will include the following: What is illness? What is disability? Are these conditions medical, social, or both? What is the relation between illness and disability? What philosophical issues are connected with the concept of brain death? What social policies should be adopted with respect to such issues as prenatal testing, disability in the workplace, accessibility of public facilities, health insurance coverage, care of the terminally ill, and research on extending the human lifespan? Readings will include philosophers, bioethicists, and disability-rights activists and their opponents. One term paper; no exams. The seminar is open to graduate students and advanced undergraduates in philosophy, bioethics, the sciences or social sciences, and to others with consent of the instructor.

PHIL 2160C. Ethics and Character in Malory’s Le Morte D’Arthur. 
No description available

PHIL 2160D. Literature and the Philosophy of Mind: Emotion, Reason, and Action in Malory’s “Le Morte D’Arthur”. 
No description available

PHIL 2160E. Ethics. 
No description available

PHIL 2160F. Ethics. 
No description available

No description available

PHIL 2160H. Disability, Fiction, and Bioethics. 
This seminar focuses on fiction as a vehicle for exploring conceptual, ethical, and social issues involving sensory, mobility, and cognitive disabilities. Topics include the following. What is disability? What is “normality”? What are the conceptual and empirical relations between disability and illness? How do disabled people see themselves? How do others see them? In what senses, if any, do various disabilities make disabled people worse off? What is disability pride? Should pride, traditionally one of the seven deadly sins, now be considered a virtue? Is it rational for non-disabled people to fear being disabled? Is it rational for disabled people to want to be “cured”? To want not to be? What do non-disabled people owe disabled people and vice versa? How can fiction aid in the philosophical analysis and discussion of such questions? Fiction writers discussed include Doris Lessing, Flannery O’Connor, Joanne Greenberg, Allen Barnett, Rosellen Brown, and others. Analytic philosophers and bioethicists, including Ronald Dworkin, Susan Wendell, Anita Silvers, and others, provide philosophical grounding for these discussions. This seminar is open to undergraduate and graduate students with background in philosophy, social sciences, biological sciences, or literature.

PHIL 2160L. Philosophical Issues About Human Longevity. 
No description available. Undergraduates require instructor permission to enroll

PHIL 2160K. To Be Determined. 
This seminar focuses on fiction as a vehicle for philosophical discussion of conceptual and moral issues involving disability, illness, and death. These issues include the definitions of “death,” “illness,” and “disability”; euthanasia and assisted suicide, hospices vs. life-extending care for the dying, decision-making for the incompetent, and the disability-rights movement’s challenge to traditional approaches to disability. In addition to novels, short stories, and disability-rights material, we will read work by philosophers and bioethicists to provide philosophical grounding. In order to include students with varied backgrounds, this seminar is open to undergraduates and has no prerequisites, despite the high course number.

PHIL 2170A. Morality and the Individual. 
No description available

PHIL 2170B. Nietzsche on Overcoming Nihilism. 
No description available

PHIL 2170C. Nietzsche’s Ethical Thought. 
No description available

PHIL 2170D. Philosophy Issues about Love. 
No description available

PHIL 2170E. Themes in Nineteenth-Century Ethics and Moral Psychology. 
No description available

PHIL 2170F. Philosophical Issues from Freud. 
The seminar will propose a discussion of a range of issues in philosophy of mind and philosophical psychology inspired by Freud’s psychoanalytic theory. These issues will include the problem of irrationality, with particular attention given to the case of self-deception; the concept of the unconscious; the concept of a drive and the idea of a drive psychology; the import of moral agency; and various technical notions bearing on all these basic issues, such as repression, identification, internalization, narcissism, sublimation, fantasy, and so on. Seminar discussions will be based on readings from Freud, and on secondary sources from recent philosophers, including Davidson, Johnston, Gardner, Deigh, Scheffler, Hopkins, Wolffheim and others.

PHIL 2170G. Alienation. 
The seminar will explore certain aspects of alienation, understood as the peculiar consciousness of “not being myself” (also called “self-alienation”). The seminar will first examine fundamental questions, propedeutic to an exploration of alienation (What is consciousness of self? Does it come in different forms? Is it dependent on, or affected by, the consciousness of others?), and then turn to more specific cases of alienation (e.g., the view of shame as an heteronomous emotion, an assessment of oneself by the standards of others). Readings will include works by Frankfurt, Velleman, Strawson, Sartre, Calhoun, as well as recent research in social psychology. Open to graduate students only; others may enroll with instructor permission.

PHIL 2170H. Nietzsche on Morality and Psychology. 
The seminar proposes a close systematic examination of On the Genealogy of Morality and relevant portions of other works. The purpose of the seminar is to attempt to understand in what sense, if any, there can be a “psychological” critique of morality. Besides primary sources from Nietzsche’s works, we will also consider relevant works from contemporary moral psychology and recent scholarly literature. Enrollment limited to 20 graduate students and seniors.

PHIL 2180A. Kant’s Philosophy of Arithmetic, Before and After Frege. 
This course will look at recent and some historical work on the topic of civic virtue. Some questions we’ll consider include: What is civic virtue and what are the duties citizens have in a modern democratic polity? What sort of model of civic virtue fits best with liberalism? Most writers on civic virtue use the Athenian democrat as a model of a good citizen, but is that the right one? Or is possible that in liberal states, leading a good private life has public value and so counts as a form of civic virtue? Are we obligated to be productive and help add to the social surplus? Do we owe a debt to society, and if so, how should we pay it? Should we vote, and if we do, how should we vote? Are we obligated to be tolerant or to respect others, and in what way? When is conscientious objection and civil disobedience acceptable, and when, if ever, are they obligatory? Readings will include Rawls, Dagger, Skinner, Brennan and Lomasky, Stuart White, Lawrence Becker, and others.

PHIL 2190A. Skepticism. 
No description available

PHIL 2190B. Perception, Knowledge and Evidence. 
No description available

PHIL 2190C. Aristotle and the Mind/Body Problem. 
The aim of this seminar series is to propose and examine a distinctive interpretation of Aristotle’s discussion in De Anima of the emotions, desire, and perception as inextricably psycho-physical phenomena which (i) undercuts the traditional mind-body question as understood by most post-Cartesian philosophers and (ii) is of continuing philosophical interest.
PHIL 2190D. Metametaphysics.
In the recent literature there has been a great deal of interest in "metametaphysical" questions about the nature of metaphysics. Is metaphysical truth in some sense relative? Are metaphysical controversies merely a matter of choosing a language? What sorts of arguments are relevant to justifying a metaphysical view? This course will consider a number of metametaphysical issues, with special attention to the question: Are certain linguistic or conceptual systems metaphysically superior to other systems, even when all of these systems produce statements that are equivalent in their truth conditions? Roughly put, Sider answers yes; Hirsch answers no. We’ll examine this debate. Enrollment limited to 20.

PHIL 2200. Graduate Proseminar.
Will cover classics of philosophy from the end of the 19th century to the end of the 20th; including ethics as well as metaphysics, epistemology and philosophy of language.

PHIL 2450. Exchange Scholar Program.

PHIL 2800. Dissertation Workshop.
No description available. Undergraduates require instructor permission to enroll.

PHIL 2900. Thesis Preparation.

PHIL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

PHIL 2980. Research in Philosophy.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

PHIL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

PHIL XLIST. Courses of Interest to Philosophy Concentrators.

Fall 2012.
There are many courses that look at philosophers or philosophical questions in other departments, including Africana Studies, Classics, Cognitive and Linguistic Sciences, French Studies, German Studies, Judaic Studies, Mathematics, Modern Culture and Media, Political Science, and Religious Studies. They include:

- Classics
- CLAS 1750D Philosophy of Socrates
- English
- ENGL 1900E Aesthetics and Politics
- Religious Studies
- RELS 0050 Love: Concept and Practice
- RELS 0830 Religion, Reason, and Ethics from Kant to Nietzsche
- RELS 1370C David Hume and Religion

Spring 2013.
There are many courses that look at philosophers or philosophical questions in other departments, including Africana Studies, Classics, Cognitive and Linguistic Sciences, French Studies, German Studies, Judaic Studies, Mathematics, Modern Culture and Media, Political Science, and Religious Studies. They include:

- Religious Studies
- RELS 0065 On Being Human: Religious and Philosophical Conceptions of the Self
- RELS 1760 Religion and Suspicion

Physics

Chair
James M. Valles Jr.
The department aims to develop in its students a comprehensive grasp of the principles of physics, together with a productive capacity in research. The courses of study are flexible in subject matter and are conducted by means of lectures, seminars, laboratories, and colloquia. Undergraduate as well as graduate students have opportunities to carry out research in fields of current interest.

The principal research fields of the department are condensed matter physics, elementary particle physics, low-temperature physics, nonlinear optics, physical acoustics, astrophysics, biological physics, and cosmology. Interdisciplinary study and research, coordinated with other departments, is encouraged for students interested in brain and neural science, semiconductor physics, geophysics, physics of solid continua, polymer physics, and computational physics, as well as other fields.

For additional information, please visit the department's website: http://www.brown.edu/academics/physics/

Physics Concentration Requirements

Physics is the scientific study of the fundamental principles governing the behavior of matter and the interaction of matter and energy. Mathematics is used to describe fundamental physical principles, the behavior of matter, and the interactions of matter and energy. As the most fundamental of sciences, physics provides a foundation for other scientific fields as well as the underpinnings of modern technology. The Physics department is unique because of the breadth of its faculty expertise and research, and the relatively intimate size of its classes above the introductory level.

Physics concentrators may choose to pursue either the A.B. or the more intensive Sc.B. degree. Course work on either path covers a broad base of topics (for example, electricity and magnetism, classical and quantum mechanics, thermodynamics, and statistical mechanics). The Sc.B. degree requires additional advanced topics as well as a senior thesis project.

Standard concentration for the A.B. degree

Select one of the following Series:

- PHYS 0070 Analytical Mechanics
- PHYS 0080 & PHYS 0160 and Introduction to Relativity and Quantum Physics
- PHYS 0030 Basic Physics
- & PHYS 0040 and Basic Physics
- PHYS 0050 Foundations of Mechanics
- & PHYS 0060 and Foundations of Electromagnetism and Modern Physics
- PHYS 0470 Electricity and Magnetism
- PHYS 0500 Advanced Classical Mechanics
- PHYS 0560 Experiments in Modern Physics
- PHYS 1410 Quantum Mechanics A
- PHYS 1530 Thermodynamics and Statistical Mechanics

One additional 1000-level course or a mathematics course beyond the introductory level.

Total Credits: 8

Standard program for the Sc.B. degree

Prerequisites:

Select one of the following Series:

- PHYS 0070 Analytical Mechanics
- & PHYS 0160 and Introduction to Relativity and Quantum Physics
- PHYS 0050 Foundations of Mechanics
- & PHYS 0060 and Foundations of Electromagnetism and Modern Physics

Select one of the following:

- MATH 0190 Advanced Placement Calculus (Physics/Engineering)
- Or MATH 0090, MATH 0100

Program:

- PHYS 0470 Electricity and Magnetism
- PHYS 0500 Advanced Classical Mechanics
- PHYS 0560 Experiments in Modern Physics
- PHYS 1410 Quantum Mechanics A
- PHYS 1420 Quantum Mechanics B
- PHYS 1510 Advanced Electromagnetic Theory
- PHYS 1530 Thermodynamics and Statistical Mechanics
- PHYS 1560 Modern Physics Laboratory
- PHYS 1980 Undergraduate Research in Physics
One additional 1000 or 2000 level Physics course or upper level course in related fields of science chosen by the student with agreement of his or her advisor.

Four Mathematics courses beyond MATH 0190 or 0090, 0100 including choices from Applied Mathematics

PHYS 1990 Senior Conference Course

Total Credits 18

1 In addition, courses in computer programming are recommended.

2 A senior thesis is required. This is to be prepared in connection with PHYS 1990 under the direction of a faculty supervisor. The topic may be in a related department or of interdisciplinary nature. In any event, a dissertation must be submitted.

Honors
Candidates for honors in physics will be expected to pursue a more rigorous and extensive program than those merely concentrating in the subject. In addition they will be required to begin an honors thesis during the seventh semester and to complete it (as part of PHYS 1990) during the eighth semester. Honors candidates are also expected to take a special oral examination on the thesis at the end of the eighth semester. Further details about the program may be obtained from the chair of the department or the departmental honors advisor.

Astrophysics Track for the Sc.B. degree

Prerequisites:
Select one of the following Series:
PHYS 0070 Analytical Mechanics
PHYS 0160 and Introduction to Relativity and Quantum Physics
PHYS 0050 Foundations of Mechanics
PHYS 0060 and Foundations of Electromagnetism and Modern Physics
PHYS 0270 Introduction to Astronomy

Select one of the following Series:
MATH 0170 Advanced Placement Calculus
MATH 0180 and Intermediate Calculus
MATH 0190 Advanced Placement Calculus (Physics/Engineering)
MATH 0200 and Intermediate Calculus (Physics/Engineering)
MATH 0350 Honors Calculus (or equivalent)
PHYS 0470 Electricity and Magnetism

Program:
MATH 0520 Linear Algebra
PHYS 0500 Advanced Classical Mechanics
PHYS 0560 Experiments in Modern Physics
PHYS 1410 Quantum Mechanics A
PHYS 1530 Thermodynamics and Statistical Mechanics

Three of the following:
PHYS 1100 Introduction to General Relativity
PHYS 1250 Stellar Structure and the Interstellar Medium
PHYS 1270 Extragalactic Astronomy and High-Energy Astrophysics
PHYS 1280 Introduction to Cosmology

Two additional 1000- or 2000-level courses in physics or a related field which are not listed as requirements.

PHYS 1990 Senior Conference Course

Total Credits 18

A senior thesis is required. This is to be prepared in connection with under the direction of a faculty supervisor. The topic may be in a related department or of interdisciplinary nature. In any event, a dissertation must be submitted.

Biological Physics Track for the Sc.B. degree

Foundations of Physics
PHYS 0070 Analytical Mechanics
PHYS 0050 Foundations of Mechanics
PHYS 0160 and Introduction to Relativity and Quantum Physics
PHYS 0060 Foundations of Electromagnetism and Modern Physics
PHYS 0470 Electricity and Magnetism
PHYS 0500 Advanced Classical Mechanics
PHYS 1410 Quantum Mechanics A
PHYS 1530 Thermodynamics and Statistical Mechanics

Select one of the following Series:

Series A
PHYS 0720 Methods of Mathematical Physics

Series B
Select one of the following:
APMA 0330 Methods of Applied Mathematics I, II
APMA 0350 Methods of Applied Mathematics I, II
MATH 1110 Ordinary Differential Equations

And select one of the following:
MATH 0180 Intermediate Calculus
MATH 0200 Intermediate Calculus (Physics/Engineering)
MATH 0350 Honors Calculus
MATH 0520 Linear Algebra
MATH 0540 Honors Linear Algebra

Basic Biology and Chemistry
BIOL 0200 The Foundation of Living Systems (or placement out of BIOL 0200)
BIOL 0500 Cell and Molecular Biology
CHEM 0330 Equilibrium, Rate, and Structure

Advanced Biophysical Topics and Techniques
PHYS 1610 Biological Physics
PHYS 1990 Senior Conference Course

Elective Courses (four chosen from the following list, with at least two 1000-level courses, or additional courses approved by the concentration advisor):

APMA 0360 Methods of Applied Mathematics I, II
APMA 0410 Mathematical Methods in the Brain Sciences
APMA 0650 Essential Statistics
APMA 1070 Quantitative Models of Biological Systems
APMA 1080 Inference in Genomics and Molecular Biology
BIOL 0280 Introductory Biochemistry
BIOL 0470 Genetics
BIOL 1050 Biology of the Eukaryotic Cell
BIOL 1200 Protein Biophysics and Structure
BIOL 1270 Advanced Biochemistry
BIOL 1870 Techniques in Pathobiology
CHEM 0350 Organic Chemistry
CHEM 0360 Organic Chemistry
MATH 0090 Introductory Calculus, Part I
Departments, Centers, Programs and Institutes

MATH 0170 Advanced Placement Calculus
MATH 0190 Advanced Placement Calculus (Physics/Engineering)
MATH 1610 Probability
MATH 1620 Mathematical Statistics
PHYS 0560 Experiments in Modern Physics
PHYS 1510 Advanced Electromagnetic Theory
PHYS 1560 Modern Physics Laboratory
PHYS 2620F Selected Topics in Molecular Biophysics
PHYS 1990 Senior Conference Course

Total Credits 17-18

Select Series A alone or two from Series B as indicated.

A senior thesis is required. This is to be prepared in connection with
under the direction of a faculty supervisor. The topic may be in a
related department or of interdisciplinary nature. In any event, a
dissertation must be submitted.

Mathematical Physics Track for the A.B. degree

Prerequisites:
MATH 0090 Introductory Calculus, Part I
or MATH 0100 Introductory Calculus, Part II
or MATH 0190 Advanced Placement Calculus (Physics/Engineering)
PHYS 0050 Foundations of Mechanics
or PHYS 0070 Analytical Mechanics

Mathematics Courses
MATH 0180 Intermediate Calculus
or MATH 0200 Intermediate Calculus (Physics/Engineering)
or MATH 0350 Honors Calculus
MATH 0520 Linear Algebra
or MATH 0540 Honors Linear Algebra
MATH 1110 Ordinary Differential Equations

Select at least one of the following:
MATH 1060 Differential Geometry
MATH 1120 Partial Differential Equations
MATH 1610 Probability

Physics Courses
PHYS 0060 Foundations of Electromagnetism and Modern Physics
or PHYS 0160 Introduction to Relativity and Quantum Physics
PHYS 0470 Electricity and Magnetism
PHYS 0500 Advanced Classical Mechanics
PHYS 0560 Experiments in Modern Physics

Select at least two of the following:
PHYS 1410 Quantum Mechanics A
PHYS 1420 Quantum Mechanics B
PHYS 1510 Advanced Electromagnetic Theory
PHYS 1530 Thermodynamics and Statistical Mechanics
PHYS 1560 Modern Physics Laboratory

Total Credits 12

Mathematical Physics Track for the Sc.B. degree

Prerequisites:
Select one of the following series:
PHYS 0070 Analytical Mechanics
& PHYS 0160 and Introduction to Relativity and Quantum Physics
PHYS 0550 Foundations of Mechanics
& PHYS 0060 and Foundations of Electromagnetism and Modern Physics

Select one of the following:
MATH 0190 Advanced Placement Calculus (Physics/Engineering)
MATH 0090 Introductory Calculus, Part I
& MATH 0100 Introductory Calculus, Part II

Required courses:
PHYS 0470 Electricity and Magnetism
PHYS 0500 Advanced Classical Mechanics
PHYS 0560 Experiments in Modern Physics
PHYS 1410 Quantum Mechanics A
PHYS 1530 Thermodynamics and Statistical Mechanics
MATH 0180 Intermediate Calculus

or MATH 0350 Honors Calculus
MATH 0520 Linear Algebra
or MATH 0540 Honors Linear Algebra
MATH 1530 Abstract Algebra
Four additional 1000 or 2000 level Physics courses
Two additional 1000 or 2000 level Math courses
PHYS 1990 Senior Conference Course

Total Credits 18-20

Physics and Philosophy Concentration Requirements

The Physics and Philosophy concentration is for students with a deep
interest in physics who do not need to acquire the laboratory and
computational skills of a professional physicist. The concentration allows
students to grapple with computational problems and deepen their
investigation of conceptual and epistemological issues. By the end of the
program, concentrators possess an excellent conceptual understanding
of the most philosophically interesting physics, relativity and quantum
mechanics.

This concentration should prepare a student either for graduate study,
especially in a history and philosophy of science (HPS) program, or
for employment in science education or journalism. Other professions
such as law and medicine will look favorably on such concentrators for
having versatile interests and being able to master difficult material. The
concentration may serve as an excellent preparation for a law school
since physics and philosophy both exercise a rigorous approach to
problems of immediate relevance to life but at the same time assume two
complimentary and sometimes competing viewpoints.

Advising

Concentration advisors from the Departments of Physics and Philosophy
will guide students working towards the A.B. degree.

Curriculum

The curriculum builds around the fields of physics that have had the
biggest impact on philosophy, especially Quantum Physics, and the

1 Concentrators are required to take at least one course in mathematics
and one in physics in each of their last two semesters.
fields of philosophy most relevant for physics, such as Epistemology, Metaphysics and Philosophy of Physics. It is strongly recommended that students complete at least one relevant history course.

There are 11 required courses (5 in Physics, 5 in Philosophy or History, one course in mathematics) and a final project. The choice of the courses is dictated by the following considerations. The field of physics with both deepest philosophical implications and deepest influence on the rest of physics is Quantum Mechanics. Thus, a 1000-level course in Quantum Mechanics or a closely related field such as Statistical Mechanics is indispensable. The second field of physics most relevant for the concentration is Relativity. This field touches upon and serves as a foundation for a broad list of subjects with major philosophical implications of their own, for example: PHYS 1170, PHYS 1280, PHYS 1510, PHYS 1100. This requires another 1000-level physics course in the concentration. 1000-level Physics courses cannot be taken without certain preliminary work, most importantly, PHYS 0470, which serves as a prerequisite for most higher-level physics courses and which relies in turn on PHYS 0160 or PHYS 0060. Another lower-level physics course is necessary for a student to develop familiarity with the tools which have been employed in producing the physics knowledge.

A natural introduction into philosophy of physics comes from a course in Early Modern Philosophy. To a large extent, Early Modern Philosophy was shaped by scholars who combined interest in philosophy and physics (e.g., Rene Descartes, Blaise Pascal, Gottfried Wilhelm Leibniz). The influence of the XVII century physics revolution on other central figures such as Kant is unquestionable. Early Modern Philosophy sets an intellectual stage for many subsequent developments in the Philosophy of Physics and directly addresses some of the most perplexing issues like the connection (or lack thereof) between physics and religion. The core of the Philosophy requirement involves two courses in Epistemology, Metaphysics and Philosophy of Science. One course in this field would not be sufficient due to its very broad nature. Students are strongly advised to take a relevant History course. This requirement can be substituted by an additional philosophy course to reflect interests of those students who want a deeper background in Epistemology, Metaphysics and Philosophy of Science or have other related interests such as Ancient Natural Philosophy.

In addition to the above philosophy courses, PHIL 0210 (Science, Perception, and Reality) serves as a gateway into the concentration. It may be substituted by other relevant courses such as PHYS 0100 (Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation).

A course in calculus is a prerequisite for most physics and some philosophy classes.

Required courses for the A.B. degree are listed below:

### Physics Courses

Select one of the following introductory courses in Modern Physics: 1

- PHYS 0060 Foundations of Electromagnetism and Modern Physics
- PHYS 0160 Introduction to Relativity and Quantum Physics

One course in Special Relativity and Classical Field Theory: 1

- PHYS 0470 Electricity and Magnetism

Select one of the following in Methods of Experimental and Theoretical physics:

- PHYS 0500 Advanced Classical Mechanics
- PHYS 0560 Experiments in Modern Physics

Select one of the following in Quantum Mechanics and its applications 1

- PHYS 1410 Quantum Mechanics A
- PHYS 1530 Thermodynamics and Statistical Mechanics

One more 1000-level Physics course 1

### Philosophy Courses

Select one of the following gateway courses: 1

- PHIL 0210 Science, Perception and Reality
- PHIL 0100 Critical Reasoning

Select one of the following courses in Early Modern Philosophy: 1

- PHIL 0360 Early Modern Philosophy
- PHIL 1700 British Empiricists
- PHIL 1710 17th Century Continental Rationalism
- PHIL 1720 Kant: The Critique of Pure Reason

Select two of the following courses in Epistemology, Metaphysics and Philosophy of Science: 2

- PHIL 1310 Myth and the Origins of Science
- PHIL 1590 Philosophy of Science
- PHIL 1610 Philosophy of Relativity Physics
- PHIL 1620 Philosophy of Quantum Mechanics
- PHIL 1630 Deductive Logic
- PHIL 1660 Metaphysics
- PHIL 1670 Time
- PHIL 1750 Epistemology
- PHIL 1850 Philosophical Logic

### History Courses

Select one of the following courses in History of Science: 1

- HIST 1140 Nature, Knowledge, and Power in Renaissance Europe
- HIST 1180 The Rise of the Scientific Worldview
- HIST 1190 Nineteenth-Century Roots of Modern Science
- HIST 1200 Science and Society in the Twentieth Century

### Calculus

Select one of the following: 1

- MATH 0180 Intermediate Calculus
- MATH 0200 Intermediate Calculus (Physics/Engineering)
- MATH 0350 Honors Calculus

### Final Project

Select one of the following: 1

- PHIL 1990 Independent Studies
- PHYS 1990 Senior Conference Course

Total Credits 12

1 Or one more Philosophy course.

### Honors

Seniors wishing to earn honors by presenting a senior honors thesis should consult their concentration advisor during their sixth semester or at the start of the seventh semester concerning procedures and requirements. Students may earn honors by presenting a senior thesis judged to be of honors quality by two readers. In addition to completing the usual nonhonors requirements, the student should also have a grade point average of over 3.4 in physics, philosophy and history of science courses (of which at least five must be taken for a letter grade). Honors theses are usually prepared over a period of two semesters with an advisor from the Department of Physics or the Department of Philosophy.

### Chemical Physics Concentration Requirements

Chemical Physics is an interdisciplinary field at the crossroads of chemistry and physics and is administered jointly by the two departments. The concentration provides students with a broad-based understanding in fundamental molecular sciences, as well as a background for graduate studies in physical chemistry, chemical physics, or molecular engineering. Concentrators are required to take twenty courses in chemistry, physics, and mathematics, although approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substitutes. Chemical Physics concentrators are also advised to take at least six courses in the humanities and social sciences. Chemical Physics concentrators at all levels (first-year through seniors) are actively involved in research with faculty members in both departments.
Standard program for the Sc.B. degree

Twenty-one semester courses in chemistry, physics, and mathematics, with a minimum of four semester courses in mathematics. Core courses are:

Total Credits 21

1. Other approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substituted for some of the twenty-one.

Students are advised to take at least six courses in the humanities and social sciences.

Engineering and Physics Concentration Requirements

The Sc.B. degree program in Engineering-Physics, sponsored jointly by the Division of Engineering and the Department of Physics, provides students with an in-depth understanding of the fundamental principles underlying modern technology. Specifically, it gives those who are interested in applied technical problems a strong background in physics and mathematics and thereby prepares them to pursue graduate work in the sciences, engineering, or applied mathematics.

Students take a significant part of the usual engineering and physics programs, obtain substantial laboratory experience, and take several upper-level courses focusing on applied physics. The program allows students to take either the standard physics or engineering programs during their first two years and then switch to this combined program.

The total number of physical science courses required for the program is 19. (We assume that a student begins his or her mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 or equivalent are encouraged but not required to take an additional upper-level mathematics course.)

The courses are as follows:

Select one of the following Series:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

Total Credits 19

In addition, students must take four courses in the humanities and social sciences. They are encouraged to consider taking courses dealing with the philosophical, ethical, or political aspects of science and technology. To accommodate the diverse preparation of individual students, variations of the above sequences and their prerequisites are possible by permission of the appropriate concentration advisor and the instructors involved.

It is required that each student’s degree program be submitted for prior approval (typically in semester four) and scrutinized for compliance (in semester seven) by one faculty member from the Department of Physics and one faculty member from the Division of Engineering.

Physics Graduate Program

The department of Physics offers graduate programs leading to the Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) Degree.
Courses

PHYS 0010. Introduction to the Meaning and Structure of Physics. A wide-ranging introduction to physics for nonscientists that emphasizes the fundamental principles and ideas underlying the field of physics. Focuses on three "great" ideas: Newton's laws of mechanics and universal gravitation, Einstein's theory of relativity, and the development of quantum mechanics. Lecture demonstrations and nonconventional laboratory sections illustrate the concepts discussed in class. Knowledge of high school algebra is sufficient background. Not designed to satisfy medical school admission requirements

PHYS 0020. From Quanta to Quarks, for the Nonscientist. This course is aimed at students of the Arts, Humanities, and Social Sciences, who would appreciate a non-mathematical presentation of the revolutionary discoveries of fundamental Physics of the Twentieth Century. The Lectures begin with Einstein's Relativity and Planck's Quantum Hypothesis, descend into the realms of Atoms and Nuclei, and end with the current limits of our knowledge, the Quark Model of the elementary particles

PHYS 0030. Basic Physics. Survey of mechanics, electricity, magnetism, optics, and modern physics for concentrators in sciences other than physics-including premedical students or students without prior exposure to physics who require a less rigorous course than PHYS 0050, 0060. Employs the concepts of elementary calculus but little of its technique. Lectures, conferences, and laboratory. Six hours of attendance. Recommended: MATH 0090 or 0100

PHYS 0040. Basic Physics. See Basic Physics (PHYS 0030) for course description

PHYS 0050. Foundations of Mechanics. An introduction to Newtonian mechanics that employs elementary calculus. Intended for science concentrators. Potential physics concentrators, who do not have adequate preparation for PHYS 0070, may enroll, but are urged to continue with PHYS 0160 rather than PHYS 0060. Lectures, conferences and laboratory. Six hours of attendance. Recommended: MATH 0090 or MATH 0100

PHYS 0060. Foundations of Electromagnetism and Modern Physics. An introduction to the principles and phenomena of electricity, magnetism, optics, and the concepts of modern physics. Recommended for those who wish to limit their college physics to two semesters but seek a firm grounding in the subject, including but not limited to those with some previous knowledge of physics. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisite: PHYS 0050. Recommended: MATH 0100

PHYS 0070. Analytical Mechanics. A mathematically more rigorous introduction to Newtonian mechanics than PHYS 0050. For first-year students and sophomores who have studied physics previously and have completed a year of calculus. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisites: high school physics and calculus or written permission

PHYS 0100. Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation. Physics has had a dramatic impact on our conception of the universe, our ideas concerning the nature of knowledge, and our view of ourselves. Philosophy, sometimes inspired by developments in physics, considers the impact of such developments on our lives. In this seminar, students will explore how classical and modern physical theory have affected our view of the cosmos, of ourselves as human beings, as well as our view of the relation of mathematical or physical structures to 'truth' or 'reality.' Through a study of physics as well as selected philosophical readings, we will consider how we can know anything, from seemingly simple facts to whether a machine is conscious. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

PHYS 0110. Excursion to Biophysics. This new course aims at freshmen with good preparation in high school physics, chemistry and biology, but who have not had a set mind what specific disciplines to focus on in their college study at Brown. The course will introduce important physics concepts and techniques relevant to biology and medicine, such as diffusion and transport of molecules and intracellular components, Brown motion and active swimming of microbes, motion of particles confined by a harmonic potential, Boltzmann distribution, exponential growth or decay, and statistics of single molecule behavior. The goal of the course is to cultivate interest and provide essential basics for more rigorous study of biological physics as a branch of interdisciplinary science. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

PHYS 0111. Are There Extra Dimensions Under Your Bed? Discusses some of the most exciting questions confronting contemporary physical science in a fashion suitable for both humanists and scientists. What are particles, antiparticles, superstrings, and black holes? How are space and time related? How are mass and gravity related to space and time? Do we live in a three-dimensional world, or are there extra dimensions? The seminar will address such questions with conceptual explanations based upon current research on campus, and highlight the experiments at the energy frontier, being carried out by the world's largest scientific instrument to-date, the Large Hadron Collider, located in Geneva, Switzerland. Enrollment limited to 20 first year students. FYS WRIT

PHYS 0112. Alien Worlds: The Search for Extra-Solar Planets and Extraterrestrial Life. The course will cover the significant developments in the detection and characterization of extra-solar planetary systems in the past 20 years. We will study the astrophysics of planetary system formation, the techniques for detecting planets, the properties of the planets discovered so far, and the prospects for future discoveries, with an emphasis on the search for "Earth-analogues" and the implications for astrobiology. Enrollment limited to 20 first year students. FYS

PHYS 0114. The Science and Technology of Energy. Energy plays fundamental roles in society. Its use underlies improvements in the living standard; the consequences of its use are having a significant impact on the Earth’s climate; its scarcity in certain forms is a source of insecurity and political conflict. This course will introduce the fundamental laws that govern energy and its use. The physical concepts to be covered include mechanical energy, thermodynamics, the Carnot cycle, electricity and magnetism, quantum mechanics, and nuclear physics. The technological applications include wind, hydro, and geothermal energy, engines and fuels, electrical energy transmission and storage, solar energy and photovoltaics, nuclear reactors, and biomass. Enrollment limited to 20 first year students. FYS

PHYS 0120. Advances in Nanoworld. Richard Feynman famously said, "There's plenty of room at the bottom," about the possibility of building molecular-size machines operating according to Quantum Mechanics. Scientists are now learning the art, and students in this course will use basic physics and simple mathematical models to understand the phenomena and materials in the nanoworld. Non-science concentrators and potential science concentrators alike will learn about important classes of nanosystems such as macromolecules, nanotubes, quantum dots, quantum wires, and films. We will learn how people make nanosystems and characterize them. We will consider existing and potential applications of nanotechnology, including molecular motors, nanoelectronics, spintronics, and quantum information. Enrollment limited to 20 first year students. FYS

PHYS 0121. Introduction to Environmental Physics: The Quantum Mechanics of Global Warming. We will use basic physics and simple mathematical models to investigate climate change, energy and entropy, the dispersal of pollutants, solar power, and other aspects of environmental science. Lectures will be supplemented with demonstrations of key physical principles. Emphasis will be placed on quantitative reasoning

PHYS 0150. Brief History of Time. An introduction to modern cosmology for nonphysicists. Topics include: the nature of space and time, the expanding universe, black holes, and the origin of structure in the universe. Attempts to bridge the gap between sciences and humanities. No mathematics other than high school algebra
is assumed. Willingness to be challenged by bold new ideas and an inquisitive mind are prerequisites.

PHYS 0160. Introduction to Relativity and Quantum Physics
A mathematically rigorous introduction to special relativity and quantum mechanics. The second course in the three-semester sequence (PHYS 0470 being the third) for those seeking the strongest foundation in physics. Also suitable for students better served by an introduction to modern physics rather than electromagnetism. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisite: PHYS 0070 or 0050. Recommended: MATH 0180 or 0200

PHYS 0210. Beginning Astronomy
Semester I: historical and conceptual developments and the study of the solar system. Semester II: stars and their evolution, our galaxy, and the universe at large. Considers the role of pulsars, quasars, neutron stars, and black holes in modern views of the universe. Three hours of attendance. See also PHYS 0270. Either semester may be taken independently

PHYS 0220. Astronomy
An introduction to basic ideas and observations in astronomy, starting with the observed sky, coordinates and astronomical calendars and cycles, the historical development of our understanding of astronomical objects. Particular emphasis is placed on the properties of stars, galaxies, and the Universe as a whole, including the basic ideas of cosmology. The material is covered at a more basic level than PHYS 0270. Knowledge of basic algebra and trigonometry is required, but no experience with calculus is necessary. The course includes evening laboratory sessions

PHYS 0270. Introduction to Astronomy
A complete survey of basic astronomy, more rigorous than is offered in PHYS 0220. Requires competence in algebra, geometry, trigonometry, and vectors and also some understanding of calculus and classical mechanics. Laboratory work required. This course or an equivalent required for students concentrating in astronomy. The course includes conferences and evening laboratory sessions

PHYS 0280. Introduction to Astrophysics and Cosmology
A survey of astrophysical phenomenology and the application of physical theory to its interpretation. Prerequisites: PH 4, 6, 8 or written permission

PHYS 0470. Electricity and Magnetism
Electric and magnetic fields. Motion of charged particles in fields. Electric and magnetic properties of matter. Direct and alternating currents. Maxwell’s equations. Laboratory work. Prerequisites: PHYS 0040, 0060, or 0160; and MATH 0180, 0200 or 0350. Labs meet every other week

PHYS 0500. Advanced Classical Mechanics
Dynamics of particles, rigid bodies, and elastic continua. Normal modes. Lagrangian and Hamiltonian formulations. Prerequisites: PHYS 0070, 0160 or 0050, 0060 and MATH 0180 or 0200; or approved equivalents

PHYS 0560. Experiments in Modern Physics
Introduction to experimental physics. Students perform fundamental experiments in modern quantum physics, including atomic physics, nuclear and particle physics, and condensed matter physics. Visits to research labs at Brown acquaint students with fields of current research. Emphasizes laboratory techniques, statistics, and data analysis. Three lecture/discussion hours and three laboratory hours each week. Required of all physics concentrators. Prerequisites: PHYS 0070, 0160 or 0050, 0060, 0470. WRIT

PHYS 0720. Methods of Mathematical Physics
This course is designed for sophomores in physical sciences, especially those intending to take sophomore or higher level Physics courses. Topics include linear algebra (including linear vector spaces), Fourier analysis, ordinary and partial differential equations, complex analysis (including contour integration). Pre-requisites: PHYS 0060 or 0160, MATH 0180, 0200 or 0350, or consent of the instructor

PHYS 0790. Physics of Matter
An introduction to the principles of quantum mechanics and their use in the description of the electronic, thermal, and optical properties of materials. Primarily intended as an advanced science course in the engineering curriculum. Open to others by permission. Prerequisites: ENGN 0040, APMA 0340 or equivalents

PHYS 1100. Introduction to General Relativity
An introduction to Einstein’s theory of gravity, including special relativity, spacetime curvature, cosmology and black holes. Prerequisites: PHYS 0500 and MATH 0520 or MATH 0540 or equivalent, or permission of the instructor. Recommended: PHYS 0720. Offered every other year

PHYS 1170. Introduction to Nuclear and High Energy Physics
A study of modern nuclear and particle physics, with emphasis on the theory and interpretation of experimental results. Prerequisites: PHYS 1410, 1420 (may be taken concurrently), or instructor permission

PHYS 1250. Stellar Structure and the Interstellar Medium
This class is an introduction to the physics of stars and their environment. The course covers the fundamental physics that set the physical properties of stars, such as their luminosity, size, spectral properties and how these quantities evolve with time. In addition, it includes a study of the physics that takes place in the gaseous environment surrounding stars, the Interstellar Medium (ISM). The ISM is very important because it contains a wealth of information on the evolutionary history of galaxies, their composition, formation and future. Prerequisites: PHYS 0270, PHYS 0500, or instructor permission. PHYS 1530 (perhaps taken concurrently) is strongly recommended but not required

PHYS 1270. Extragalactic Astronomy and High-Energy Astrophysics
This course provides an introduction to the astrophysics of galaxies, their structure and evolution, with an emphasis on physical introduction of the observations. Underlying physics concepts such as radiative transfer, nuclear reactions and accretion physics will be introduced. Intended for students at the junior level. Prerequisites: PHYS 0270 and PHYS 0470, and either MATH 0190 or MATH 0200, or instructor permission

PHYS 1280. Introduction to Cosmology
The course presents an introduction to the study of the origin, evolution and contents of the Universe. Topics include the expansion of the Universe, relativistic cosmologies, thermal evolution, primordial nucleosynthesis, structure formation and the Cosmic Microwave Background. Prerequisites: PHYS 0160, MATH 0190, MATH 0200, or MATH 0350, or instructor permission

PHYS 1410. Quantum Mechanics A
A unified treatment of quanta, photons, electrons, atoms, molecules, matter, nuclei, and particles. Quantum mechanics developed at the start and used to link and explain both the older and newer experimental phenomena of modern physics. Prerequisites: PHYS 0500 and 0560; and MATH 0520, 0540 or PHYS 0720; or approved equivalents

PHYS 1420. Quantum Mechanics B
See Quantum Mechanics A, (PHYS 1410) for course description

PHYS 1510. Advanced Electromagnetic Theory
Maxwell’s laws and electromagnetic theory. Electromagnetic waves and radiation. Special relativity. Prerequisites: PHYS 0470; and MATH 0180, 0200, or 0350; or approved equivalents

PHYS 1530. Thermodynamics and Statistical Mechanics
The laws of thermodynamics and heat transfer. Atomic interpretation in terms of kinetic theory and elementary statistical mechanics. Applications to physical problems. Prerequisites: MATH 0180 or 0200 or 0350. Corequisite: PHYS 1410

PHYS 1560. Modern Physics Laboratory
A sequence of intensive, advanced experiments often introducing sophisticated techniques. Prerequisites: PHYS 0470, 0500 and 0560; and MATH 0520, 0540 or PHYS 0720; or approved equivalents. WRIT

PHYS 1600. Computational Physics
This course provides students with an introduction to scientific computation, primarily as applied to physical science problems. It will assume a basic knowledge of programming and will focus on how computational methods can be used to study physical systems complementing experimental and theoretical techniques. Prerequisites: PHYS 0070, 0160 (or 0050, 0060) and 0470 (or ENGN 0510); MATH 0180 or 0200 or 0350; the ability to write a simple computer program in Fortran, Matlab, C or C++

PHYS 1610. Biological Physics
Introduction to structures of proteins, nucleotides, and membranes; electrostatics and hydration; chemical equilibrium; binding affinity and kinetics; hydrodynamics and transport; cellular mechanics and
motions; biophysical techniques including sedimentation, electrophoresis, microscopy and spectroscopy. Suitable for undergraduate science and engineering majors and graduate students with limited background in life science. Prerequisites: MATH 0180

**PHYS 1970A. Stellar Physics and the Interstellar Medium.**  
No description available.

**PHYS 1970B. Introductory Optics.**  
Introduction to optical principles and techniques. Offered to students who have a foundation in physics and are especially interested in optics. The course covers the interaction of light with matter, geometric and wave optics, polarization, fluorescence, and optical instruments (e.g., interferometer, spectrometer, microscope and telescope). Recommended are one physics course (PHYS 0040, PHYS 0060, or ENGN 0040) and one calculus course (MATH 0180, MATH 0200, or MATH 0350), or per instructor’s permission.

**PHYS 1970C. String Theory for Undergraduates.**  
This course will concentrate on String Theory. It will be given at introductory/intermediate level with some review of the background material. Topics covered will include dynamical systems, symmetries and Noether’s Theorem; nonrelativistic strings; relativistic systems (particle and string); quantization, gauge fixing, Feynman’s sum over paths; electrostatic analogy; string in curved space-time; and supersymmetry. Some advanced topics will also be addressed, i.e., D-Branes and M-Theory. Recommended prerequisites: PHYS 0470 and 0500, or 0160.

**PHYS 1980. Undergraduate Research in Physics.**  
Designed for undergraduates to participate, individually or in small groups, in research projects mentored by the physics faculty. Students must have taken one year of college level physics. An average of 8 to 10 hours per week of guided research is required as are weekly meetings with the supervising faculty member. Students should consult with faculty to find a mutually agreeable research project and obtain permission to enroll. Section number varies by instructor (students must register for the appropriate section).

**PHYS 1990. Senior Conference Course.**  
Preparation of thesis project. Required of candidates for the degree of bachelor of science with a concentration in physics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2010. Techniques in Experimental Physics.**  
No description available.

**PHYS 2020. Mathematical Methods of Engineers and Physicists.**  
No description available.

**PHYS 2030. Classical Theoretical Physics I.**  
No description available.

**PHYS 2040. Classical Theoretical Physics II.**  
No description available.

**PHYS 2050. Quantum Mechanics.**  
No description available.

**PHYS 2060. Quantum Mechanics.**  
No description available.

**PHYS 2070. Advanced Quantum Mechanics.**  
No description available.

**PHYS 2100. General Relativity and Cosmology.**  
Given every other year.

**PHYS 2140. Statistical Mechanics.**  
No description available.

**PHYS 2170. Introduction to Nuclear and High Energy Physics.**  
No description available.

**PHYS 2200. Elementary Particle Physics I.**  
Alternates with Physics 221.

**PHYS 2210. Elementary Particle Physics II.**  
No description available.

**PHYS 2280. Astrophysics and Cosmology.**  
This course serves as a graduate-level introduction to modern cosmology, including current topics of research on both observational and theoretical fronts. Topics include relativistic cosmology, inflation and the early Universe, observational cosmology, galaxy formation. Prerequisites for undergraduates: PHYS 1280 and PHYS 1530.

**PHYS 2300. Quantum Theory of Fields I.**  
No description available.

**PHYS 2320. Quantum Theory of Fields II.**  
No description available. Instructor permission required.

**PHYS 2340. Group Theory.**  
Offered every other year.

**PHYS 2410. Solid State Physics I.**  
No description available.

**PHYS 2420. Solid State Physics II.**  
No description available.

**PHYS 2430. Quantum Many Body Theory.**  
No description available.

**PHYS 2450. Exchange Scholar Program.**  
No description available.

**PHYS 2470. Advanced Statistical Mechanics.**  
No description available.

**PHYS 2610A. Selected Topics in Modern Cosmology.**  
Aims to provide a working knowledge of some main topics in modern cosmology. Combines study of the basics with applications to current research.

**PHYS 2610B. Theory of Relativity.**  
No description available.

**PHYS 2610C. Selected Topics in Condensed Matter Physics.**  
No description available.

**PHYS 2610D. Selected Topics in Condensed Matter Physics.**  
The objective of this course is to introduce recent developments in condensed matter physics. Selected topics include: nanoscale physics, materials, and devices; spintronics and magnetism; high temperature superconductivity; strongly correlated systems; Bose-Einstein condensate; and applications of condensed matter physics. In addition to discussing physics, some experimental techniques used in current research will also be introduced. The course will help students broaden their scope of knowledge in condensed matter physics, learn how to leverage their existing background to select and conduct research, and develop a sense of how to build their professional career based on condensed matter physics.

**PHYS 2610E. Selected Topics in Physics of Locomotion.**  
This special topics graduate course deals with the physical processes involved in the locomotion of organisms, with a particular focus on locomotion at small scales in fluids. Topics include mechanisms of swimming motility for microorganisms, fluid mechanics at low Reynolds number, diffusion and Brownian motion, physical actuation, hydrodynamic interactions, swimming in complex fluids, artificial swimmers, and optimization. Prerequisites: PHYS 0470 or ENGN 0510 and (PHYS 0500 or ENGN 0810 or ENGN 1370), or permission of the instructor. 999999.

**PHYS 2610F. Selected Topics in Collider Physics.**  
The course will cover basic aspects of conducting precision measurements and searches for new physics at modern high-energy colliders, with the emphasis given to physics at the Large Hadron Collider. The course will cover major aspects of conducting physics analysis from the underlying theory to experimental methods, such as optimization of the analysis, multivariate analysis techniques, use of statistical methods to establish a signal or set the limit. There will be reading assignments, in-class student presentations, and hands-on exercises offered as the part of the course. Prerequisite: PHYS 1170 or 2170. Open to graduate students in Physics and Math.

**PHYS 2620A. Astrophysical and Cosmological Constraints on Particle Physics.**  
No description available.

**PHYS 2620B. Green’s Functions and Ordered Exponentials.**  
No description available.

**PHYS 2620C. Introduction to String Theory.**  
No description available.

**PHYS 2620D. Modern Cosmology.**  
No description available.
**Phys 2620E. Selected Topics in Quantum Mechanics: Fuzzy Physics.**
No description available.

**Phys 2620F. Selected Topics in Molecular Biophysics.**
No description available.

**Phys 2620G. The Standard Model and Beyond.**
Topics to be covered will include: Yang-Mills theory, origin of masses and couplings of particles, effective field theory, renormalization, confinement, lattice gauge theory, anomalies and instantons, grand unification, magnetic monopoles, technicolor, introduction to supersymmetry, supersymmetry breaking, the Minimal Supersymmetric Standard Model, and dark matter candidates. Prerequisite: Phys 2300

**Phys 2710. Seminar in Research Topics.**
Instruction via reading assignments and seminars for graduate students on research projects. Credit may vary. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**Phys 2711. Seminar in Research Topics.**
See Seminar In Research Topics (PHYS 2710) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**Phys 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**Phys 2980. Research in Physics.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**Phys 2981. Research in Physics.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**Phys 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**Political Science**

**Chair**
Sharon R. Krause

Traditionally, political science splits into four subfields: (1) the study of politics in the United States (American politics); (2) the comparative study of different political systems and individual nations around the globe (comparative politics); (3) the study of relations among states and peoples (international relations); and (4) the philosophical study of political ideas (political theory). What particularly moves us at Brown are the big questions about political life, which we engage in a wide range of political contexts and in ways that cross traditional subfields. The concentration in Political Science exposes students to approaches to the study of politics ranging from ancient Greek philosophy to modern techniques of policy evaluation. The undergraduate concentration is organized around three broad tracks, or programs of study: American politics, international and comparative politics, and political theory. Twelve courses are required overall: ten within the Department of Political Science and two from areas outside the department related to your chosen track. Thirteen courses are required if the methods requirement is fulfilled with a course outside the department.

**Requirements:**

Two introductory courses:

- For the American politics and political theory tracks, select two from the following, one of which must be the introductory course associated with the chosen track:
  - POLS 0010 Introduction to the American Political Process
  - POLS 0110 Introduction to Political Thought
  - POLS 0200 Introduction to Comparative Politics
  - POLS 0400 Introduction to International Politics

- For the international and comparative politics track; two introductory courses are required:
  - POLS 0200 Introduction to Comparative Politics
  - POLS 0400 Introduction to International Politics

One course in the American politics subfield

One course in the political theory subfield

Two courses in the international and comparative politics subfield

Three upper-level courses, beyond the introductory course, in the chosen subfield

One methods course from Political Science:
- POLS 0500 Foundations of Political Analysis
- POLS 1600 Political Research Methods

One research seminar from the POLS 1820, 1821, 1822 or 1823 offerings that is track related

Two upper-level courses from outside the department related to the specialized track, chosen with the approval of the concentration advisor.

Total Credits: 13

1. A comparable course from an outside department (ECON 1620, ECON 1630, APMA 0650, EDUC 1110, or SOC 1100 may also be used). If the methods requirement is fulfilled by an outside department course, it will not count as one of the 12 required courses.

2. Appropriate 1000-level courses offered in (but not limited to) Africana Studies, American Civilization, Anthropology, Classics, Economics, History, International Relations, Philosophy, Public Policy, Religious Studies, Sociology or Urban Studies may apply. The concentration advisor may approve a course from another department if it clearly meets the intent of the outside course requirement.

To obtain an advisor, contact the concentration coordinator, Patti Gardner.

**Honors**

Students wishing to undertake the honors program need to complete the same requirements as shown for the concentration. Completion of the methods requirement is required prior to applying to the Honors program. Students must also complete an honors research project and take POLS 1910 and POLS 1920 during the senior year. POLS 1910 and POLS 1920 do not count towards the 10 required Political Science courses for the concentration.
Political Science Graduate Program

The department of Political Science offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. The A.M. degree is only awarded as part of the Ph.D. track.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/political-science

Courses

POLS 0010. Introduction to the American Political Process.
This course is designed to be an introduction to the American political process, broadly defined. We will cover topics including but not limited to: Constitution, Federalism, Federal Budget, Congress, Presidency, Bureaucracy, Judiciary, Civil Rights, Civil Liberties, Public Opinion, Media, Interest Groups, Political Parties, Campaigns, Elections, and Participation

POLS 0110. Introduction to Political Thought.
What is justice? What is freedom? What is the basis of political authority? What is the nature of the best regime? Why should we obey the laws? When may we legitimately resist? These and other perennial questions of political life are explored. Readings include Aristotle, Machiavelli, Hobbes, Locke, Rousseau, Marx, and J.S. Mill. WRIT

POLS 0200. Introduction to Comparative Politics.
Introduces students to the sub-field of comparative politics or politics within states. Topics include types of regimes (i.e., democratic, authoritarian, totalitarian); transitions to democracy and the collapse of democratic regimes; revolutionary and ethnic challenges to the state; and globalization. The course also pays attention to modes of analysis in comparative politics. Cases will be drawn from various regions, including Western and Eastern Europe, Latin America, the Middle East, and Africa

POLS 0220. City Politics.
Bosses, reformers, states, bureaucrats, politicians, the poor, the homeless, and the citizen. An introduction to the major themes of urban politics

POLS 0400. Introduction to International Politics.
This course provides a basic introduction to the central theoretical perspectives and debates in international relations. The second part of the course applies these models to current problems in international relations, including environmental degradation, pandemic disease, human trafficking, transnational organized crime, and terrorism

POLS 0500. Foundations of Political Analysis.
The course provides an introduction for undergraduate students to the methods that political scientists (and other social scientists) use to generate and answer questions about the world around us. This course will provide you with the tools to evaluate critically social science research, and it will improve your ability to pose and answer research questions of your own. Both quantitative and qualitative approaches are covered. Not open to first year students

POLS 0820A. American Presidency.
The origins and evolution of the current presidency and the role of the presidential institution in the American political and policy-making system. Evaluation of the present role of the office and critical examination of recent administrations

POLS 0820B. The Politics of Leadership.
Many people are placed in leadership positions but most never become real leaders. What separates leaders and non-leaders? What are the characteristics of a real leader? The course will focus on American politics and investigate two institutional arenas: the presidency and congress. Several case studies will be investigated where people use different skills to perform leadership roles. Among the factors to be considered are: personal qualities, prior preparation, selection of a challenge and the use of rhetorical skills. Enrollment limited to 20 first year students. FYS

POLS 0820D. Freedom.
What is freedom? Is it important? How do we know? What should we do about it? We will analyze the different conceptions of liberty - liberal egalitarian, classical liberal, Marxist, and fascist views. We will determine how the various aspects of freedom - political, personal, psychological, economic, and moral - are complementary, and determine what sorts of institutions promote or undermine these aspects. Enrollment limited to 20 first year students. FYS

POLS 0820F. Politics of Aviation.
Who are the key players in aviation conflicts? Congress and congressional committees, bureaucratic agencies and pressure groups. Governmental regulation of airlines; past, present and future. Current market trends examined. Two dominant themes in aviation politics: avoid safety failures (crashes); avoid security problems (terrorism). How 9-11 changed the industry

POLS 0820G. Race and Political Representation.
While representation is a central tenet of democracy, much disagreement exists over what political representation means and the best way to ensure equitable representation for all citizens. We will study representation and its various forms. We will then use these concepts to examine research on how well American democratic institutions capture the interest of racial and ethnic minorities. Enrollment limited to 20 first year students. FYS

POLS 0820L. Philosophy of the American Founding.
In framing our political system in the Constitution, who did the Founders rely on for their theoretical framework? In this course, we will explore the works of Montesquieu, Adams, Franklin, Jefferson, Madison, Hamilton, and other contributors to the Constitution. Enrollment limited to 20 first year students. FYS

POLS 0820N. Political Thinking for a Global World.
Administrative agencies have been called the fourth branch of government. They write regulations that have the force of law and they are responsible for the implementation of virtually all public policies. How do these agencies fit into our constitutional form of government? How do they relate to the other branches of government? This course traces the rise of the administrative state and examines the basic elements of command-and-control regulation, along with various alternatives to regulation. Written permission required

Why were ten national holidays created? The answer requires a review of key events in American political history from 1775 to 1983. Why was the Civil War pivotal? Which presidents were most important in generating support for special days? Conflicts occurred not only in creating the day but which day would be the holiday. Enrollment limited to 20 first year students. FYS

POLS 0820R. Global Governance.
Global governance* denotes the myriad ways in which states, institutions, networks, and associations help administer global affairs. In this seminar, we will explore who governs the world and how, and we will evaluate different normative theories of global governance, including the liberal/ political, cosmopolitan democratic, and republican approaches. We will focus on the values and the global structure that their proponents deem most desirable. What values, if any, ought to govern the practice of global politics? How should such values be institutionalized? Are there any good reasons for favoring a centralized global authority akin to a world state? Or should we prefer a different global institutional arrangement? What role do we envision for the nation-state?

POLS 0820S. Capitalism For and Against.
What is capitalism? What are its defining traits and institutions, and the roles of the market and the state? How should individual rights and social responsibilities be balanced? What are capitalism’s strengths and weaknesses? Are capitalist societies or other types of systems the best way to achieve justice, promote excellence, and provide freedom, happiness, and material well-being? What are the coherent criticisms of and alternatives to capitalism? This course will study some of the seminal philosophical arguments about capitalism, focusing especially on Smith,
Locke, Rousseau, Marx, and Hayek. Enrollment limited to 20 freshmen and sophomores

POLS 0820T. Women’s Work and Welfare in Global Perspective.
The seminar looks at how welfare systems structure women’s participation in the workplace, family, and society across poor, middle-income, and developed states, including flows of labor migrants from poor to developed states, human trafficking, changing global gendered and ethnic divisions of labor; work-and-family reconciliation policies in advanced nations; neo-traditionalism and neo-familism as responses to population decline; micro-financing based on the “capability” approach; clientelism and conditional income support programs in Latin America; feminization of poverty; and the growing role of women’s and human rights organizations globally in welfare issues that in the past were addressed mainly by governments or labor movements. Enrollment limited to 20 first year students. FYS

POLS 0820U. Drug War Politics.
This seminar examines the politics, practice, and consequences of government efforts to regulate mind-altering substances since the early 20th century. Although much of the focus is on the contemporary United States and Latin America, the coverage is broadly historical, comparative, and global. The main drugs focused on are cocaine, opium, and cannabis, but will include alcohol, tobacco, and synthetics. The course also evaluates policy alternatives and the obstacles to policy reform. The course draws on readings from fields such as political science, anthropology, criminology, and history. The seminar is reading intensive, and is designed to cultivate critical writing and presentation skills. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

POLS 1010. Topics in American Constitutional Law.
This course will examine major constitutional controversies within the context of wider debates in political and legal theory. Readings from Supreme Court cases and prominent texts in political/legal theory. Each year we will focus on a different theme and set of constitutional issues. Topics might include a mix of federalism, separation of powers, privacy, free speech, and abortion. We will also focus how political and legal theory helps us to consider these topics in tandem.

This course is about the “underside” of globalization. It introduces key sectors of the illicit global economy, including the clandestine flow of drugs, arms, people, body parts, arts and antiquities, endangered species, and toxic waste. The course compares these illicit sectors across time and place, and evaluates the practice and politics of state regulatory efforts. Particular attention is given to the role of the U.S. in the illicit global economy

POLS 1030. Modern Political Thought.
What is justice? In a just society how would wealth be distributed? Would such distribution respect property rights? Does the state have the exclusive right to punish and if so why? Should the family be regarded as beyond justice? Is there a tension between democratic self-governance and freedoms from coercion? With an emphasis on both lectures and Socratic dialogue, this course is designed to engage students in conversations with the most important work in modern and contemporary political thought and to get them to engage with the most fundamental questions faced by our polity. We will draw on canonical modern and contemporary writers to see understand the most important debates of the modern period and as importantly to help us dig deep into fundamental questions of justice and legitimacy. Readings from Hobbes, Locke, Rousseau, Marx, Rawls, Okin, Cohen and others. Some prior work in political theory or philosophy suggested. Prerequisite: POLS 0110 or instructor permission

POLS 1040. Ancient Political Thought.
The Greeks stand at the beginning of the Western tradition of political philosophy, yet their thought is somehow foreign. What was the special perspective from which they viewed political life? In what ways does their perspective vitalize, contest, deepen, or affirm our own thinking on justice, politics, and the good life? This course will examine the course and other questions with a special emphasis on the works of Plato and Aristotle

POLS 1050. Ethics and Public Policy.
Examines moral foundations of important policy issues in the American national context as well as at Brown. Considers issues like: What is the just distribution of resources and opportunities in society? And complementary policy issues like: affirmative action, immigration, public provision of health care and social welfare. Asks whether/how liberal democracies can come to consensus on contentious moral issues like abortion, and what the ethical roles of politicians and citizens are in such struggles. Instructor permission required

POLS 1060. The Political Economy of U.S. Monetary Policy.
This course will utilize political economy models of American political institutions to explain the relationship between politics and U.S. monetary policy. The course will provide a foundational understanding of how branches of the U.S. government relate to one another and how they relate to the Federal Reserve. We will explore several eras of monetary policy decisions in American history concluding with the recent financial crisis. In addition to providing a deeper understanding of American political institutions and the history of American monetary policy the course will explore how the Federal Reserve operates internally and how that impacts U.S. monetary policy. Instructor permission required

POLS 1070. Rights.
Investigates the moral and political foundations of rights through a reading of classical and contemporary theories of rights. Readings include Hobbes, Locke, Tocqueville, Kant, J.S. Mill, Burke, Marx, Nozick, Waldron, Okin, Ignatieff, and others. Topics include rights and justice, multiculturalism and group rights; human rights in the global context; animal rights and environmentalism; communitarian and postmodern critiques of rights; and rights in the context of American citizenship

POLS 1080. Politics of Transportation Policy.
Three transportation modes are emphasized: planes, trains, and automobiles. Three sets of actors are studied: Congress, pressure groups, and governmental agencies. The focus is on historical patterns of usage and current policy questions including safety and security concerns in aviation, problematic drivers, and congestion with cars. Background in the rudiments of American politics is desired

POLS 1100. Congress and Public Policy.
How does Congress really work? Who holds power in Congress? How does Congress change when party control changes hands? Does Congress make a difference in policy outcomes? The structures governing both the House and the Senate and the interaction between them are examined as well as the overall relationship between Congress and the president. Prerequisite: POLS 0010, 0100, or PPAI 0100

POLS 1110. Mass Media.
Dramatic changes are unfolding in the structure and operations of the U.S. media. We discuss how the media have changed over history; what the changes mean for American culture, society, and politics; and how we should evaluate the contemporary media

POLS 1120. Campaigns and Elections.
This course is designed to survey both historical and contemporary elections at both the congressional level, emphasizing the 2012 elections. Topics include campaigns, parties, candidates, voting behavior, public opinion, and the media

POLS 1130. The American Presidency.
The origins and evolution of the Presidency in the American political and policy-making system. Special emphasis on the impact of presidential policies from Franklin Roosevelt through George W. Bush, and an exploration of the future challenges facing the winner of the 2012 Presidential election

POLS 1140. Public Opinion and American Democracy.
Public opinion is an essential component of democracy. Considering the lack of familiarity about current events, how does public opinion affect public policy? Perhaps more importantly, should it? To assess these questions, we will explore how to measure public opinion and what polls tell us. We will then assess the roots of public opinion and analyze the public policy and representational impact of people’s preferences

POLS 1150. Prosperity: The Ethics and Economics of Wealth Creation.
What is prosperity? Whom does prosperity benefit? Which institutions and attitudes produce prosperity? What is the relation of prosperity to other
values such as efficiency, happiness, equality, fairness, religious faith or personal freedom? This course explores the problem of prosperity from a variety of disciplinary perspectives: philosophical, economic, historical, religious, and literary. No prerequisites. All students welcome; first and second year students especially encouraged

POLS 1160. Constitutional Law: Governmental Powers. This course examines governmental powers under the United States Constitution, addressing the powers of Congress, the President, and the courts, as well as the relationship between the national and state governments. The primary reading materials will be leading Supreme Court cases, supplemented by additional reading materials on history and legal theory. The course will consider the role of the courts in enforcing constitutional principles in a democratic system, as well as theories of constitutional interpretation and constitutional change

POLS 1170. Constitutional Law: Individual Rights. Examines the scope of individual rights under the United States Constitution and will focus on equal protection, due process, free speech, and religion. The primary reading materials will be leading Supreme Court opinions interpreting and applying the First and Fourteenth Amendments, supplemented by readings on legal history and theory. The course will consider the role of the courts in protecting individual rights in a constitutional democracy, as well as theories of constitutional interpretation and constitutional change

POLS 1190. Federalism and Public Policy. Examines basic institutional structure of American federal system, features of modern intergovernmental relationships, and how recent changes in the American federal system have shaped policy-making activity at all levels of government. The course will focus upon theories of federalism and intergovernmental relationships, as well as how these theories generate insight into the nature of contemporary legal, political, and policy debates

POLS 1210. Latin American Politics. Focuses on political and economic transformation in contemporary Latin America. Special attention is given to the processes of market-oriented economic reforms and democratization that have swept the region during the last twenty-five years. Includes in-depth country case studies where key themes can be discussed and elaborated

POLS 1220. Politics of the Post-Soviet States. What political and economic systems have developed in the Post-Soviet states since 1991? Course focuses on failed efforts to build democracy in Russia; divergent patterns of development, including democratization and EU accession in the Baltics, reversions to authoritarianism and Islamic revival in Central Asia; conflict in Georgia and Chechnya; development of economies, civil society; relations among post-Soviet states. Prior study of political science recommended

POLS 1240. Politics, Markets and States in Developing Countries. How can we explain fundamental differences in economic performance and policy across developing countries in the face of Globalization? Why are some countries praised as economic "miracles," yet others seem mired in inescapable stagnation? This course addresses these questions by introducing the basic topics, concepts, and theoretical approaches that comprise the field of political economy of development. The course draws on case studies from Asia, Africa, and Latin America

POLS 1260. Maps and Politics. How do maps affect politics, and vice versa? Maps fundamentally shape the way that we see our world and how we interact politically, economically, and socially, but maps are also shaped by political actors, interests, and institutions. This course will consider historical and contemporary issues that link maps and politics, including the connections between mapping and nation-states, colonialism, warfare, democratic politics, and indigenous rights. The course is suitable for all students with an interest in the topic

POLS 1265. Political Institutions of East Asian Democracies. Will discuss present-day government and politics of South Korea, Taiwan and the Philippines as well as the decades leading up to democratic transitions in these countries. Will discuss economic miracles in Japan and the four "Asian tigers," and democratization in these high-growing regions. Throughout, reference will be made to similarities and differences -- and implications thereof -- between the "rules of the game" in these countries and in other new democracies. We will focus on several areas of policy that have been at the center of political science and economics debates concerning policy making in Korea, Taiwan and the Philippines

POLS 1270. Middle East Politics. For decades, the Middle East was widely perceived as a bastion of authoritarianism and a hotbed of identity politics and political violence. What has sustained these perspectives and how has the Arab Spring challenged them? This course combines analytical approaches with concrete case studies to provide an overview and critical understanding of regional developments. Students will gain insights on key questions and debates in Middle East politics. Topics include "persistent authoritarianism" in the Middle East, Political Islam, sectarian violence, economic development, and social mobilization. The course is suitable for students with all levels of knowledge on the region

POLS 1280. Politics, Economy and Society in India. This course will concentrate on three aspects of the "Indian experience": democracy, ethnic and religious diversity, and political economy. With a brief exception, India has continued to be democratic since 1947. No developing country matches India's democratic record. Second, remarkable cultural, ethnic and religious diversity marks India's social landscape, and influences its politics. Third, Indian economy has of late been going through a serious economic transformation, drawing comparisons with China. Is the comparison valid?

POLS 1300. Latino Politics and Public Opinion. Over 50 million Latinos reside in the United States today, making them the largest minority group in the country. The current population size, projected growth trajectory, and population density of Latinos in many political battleground states have made this group a favored topic among politicians, interest groups and mass media. Yet, what do we really know about the politics and opinions associated with the diverse and expanding Latino population? How are Latinos incorporated into American political life? What difference does it make to be of Latino descent in the U.S.? This course presents an in-depth examination of this important population

POLS 1310. African American Politics. Focuses on the contemporary African American politics in various spheres of the American political environment. Examines also how the concept of an African American community has evolved and shifted historically. We will pay particular attention to the growing diversity within the African American community and discuss what these changes mean for black political participation, representation, and organizing

POLS 1320. Urban Politics and Urban Public Policy. A central theme of the course is that urban politics in the United States emerged from the interplay of governmental power and private resources. The course describes the evolution of urban American politics and the modern city and the theories that have evolved to explain urban politics; and the nature of the urban condition with particular emphasis on the challenges faced by residents and government in the post-industrial city. The class includes a role-playing simulation of decision-making in a medium-size city. The goal of the simulation is to give students the feel for how politics work in an urban setting. The simulation runs throughout the semester

POLS 1360. Gender and Global Politics. This course will investigate what it means to examine global politics from a feminist perspective—to notice and pay close attention to the lived experiences of women in global politics and to analyze the way gendered systems of value naturalize and enable certain practices in global politics. After exploring various feminist perspectives and how they relate to mainstream IR, the course will focus on feminist IR research contributions to substantive issue areas like security, global economy and development, environment, human rights, and international ethics. Prerequisite: POLS 0400. Not open to first-year students

POLS 1380. Ethnic Politics and Conflict. Course focuses on the politics of rising national consciousness and the development of ethnic conflicts. It covers sources of contemporary nationalism; nationalist political mobilization; emergence of conflicts; impact on societies of internal strife and wars; international interventions; explanations for resolution or persistence of conflict; politics of post-conflict states. The course combines analytical texts and case studies. Cases from Eastern and Western Europe, North America, South Asia, and Africa
POLS 1390. International Organization and World Politics.
Examines the institutions and the processes by which states and other actors seek to provide "governance" in the international system. The class explores the history of, and various theoretical perspectives on, the role of international organizations in the state system. It also considers their roles in a range of political, military, economic, environmental, and humanitarian issues.

POLS 1400. Europe and America.
Explores the contours of North Atlantic international politics through a variety of theoretical lenses. Examines the grand outlines of European, American, and transatlantic international affairs; the politics and legacies of the Cold War; and the history, theory, and politics of European integration. Then turns to North Atlantic affairs and transatlantic relations post-Cold War, and to Europe and America in the (twenty-first century) world to come.

POLS 1410. Global Security After the Cold War.
Analyzes major contemporary issues of global security utilizing current theories of international politics, emphasizing both continuity and change in global security since the end of the Cold War. Issues examined include proliferation of weapons of mass destruction and of conventional weapons, terrorism, recent arms control and disarmament initiatives, and the changing role of alliances and regional and global security institutions.

POLS 1415. Classics of Political Economy.
Traces the most important classical statements of political economy through consideration of the major contributions to the "political" study of the economy from the seventeenth century to the present: Locke, Ricardo, Smith, Rousseau, Mill, Bentham, Marx, Mill, Marshall, Keynes, Hayek, Friedman, and Lucas. By mapping the parallel evolution of the liberal/capitalist economy and the liberal/democratic notion of the individual, both a product of and a producer within this economy, the course will demonstrate the political nature of economics and the economic bases of politics. First year students require instructor permission. Not open to students who have taken POLS 1822B.

POLS 1420. Money and Power in the International Political Economy.
Examines how the interaction of states and markets create distinct global monetary and political orders. Class analyzes the shift from the classical liberal Gold Standard through the Post-War Bretton Woods arrangements through to the globalized IPE of today.

POLS 1430. Roots of Radical Islam.
Why has radical political Islam emerged as a global threat in our lifetime? This course examines potential domestic sources, such as repressive governments and poverty, as well as international sources, such as U.S. foreign policy, with a special emphasis on the various strategies that governments of states with predominantly Muslim populations have taken toward political Islam. Instructor permission required.

Focuses on the political economy of development and underdevelopment. Topics include comparisons of state and market building among "early" and "late" developers, theories of development, prescriptions for development and their shortcomings, and the challenges for developing countries in the context of a globalizing economy.

POLS 1460. International Political Economy.
An introduction to the politics of international economic relations. Examines the history of international political economy and theoretical approaches to understanding it. Also analyzes several key contemporary issues in international institutions such as the International Monetary Fund and World Trade Organization, globalization and its consequences, and challenges in foreign economic policy-making.

POLS 1470. International Negotiation and Conflict Resolution.
Analyzes negotiation process in international relations. Emphasizes how the negotiation process impacts the relations among states, non-state actors, and multilateral institutions in international politics. Deals explicitly with the "art and science" of negotiations as a means to resolve the conflicts and misunderstandings that are a ubiquitous feature of international relations. Includes simulation exercises and case discussions, drawing on issues ranging from formal diplomatic negotiations to the role of non-governmental organizations in promoting the resolution of international conflicts and on issues such as national and international security, as well as economic, environmental, and humanitarian concerns. Primarily for students with some prior background in the field of international politics. Prerequisites: PS 40 (POLS 0400) or written permission.

POLS 1480. Theory of International Relations.
Provides an overview of basic thinking about international relations. Focuses on the conceptual fundamentals, grand intellectual traditions and main theoretical trajectories, and key scholarly disagreements that have shaped the discipline of international relations over the past century and on the principal theoretical fault lines that define it today. Also scrutinizes a number of central topics in contemporary international affairs. Prerequisite: POLS 0400 recommended but not required.

POLS 1500. The International Law and Politics of Human Rights.
Human rights have become an increasingly central issue in global politics. This course introduces students to the law and politics of international human rights. It examines the gradual construction of an international human rights regime and its influence on international politics. The course seeks to understand how and why human rights standards have come into being and how they change over time. Drawing on historical and contemporary cases from around the world, the course will survey the actors and organizations, including states, international organizations, and non-state actors, involved in the promotion of human rights around the globe, as well as obstacles to such promotion. It will review competing conceptions of human rights, whether human rights are universal, problematic of enforcement, and the role of human rights in foreign policy. Major topics include civil and political rights; economic, social and cultural rights; genocide, torture, women's rights, humanitarian intervention, and the international criminal court.

POLS 1560. American Foreign Policy.
This course provides an overview of American Foreign Policy since World War I. The emphasis will be on defense and security policy, and not on foreign economic policy. This course covers significant historical events and personalities over the course of the twentieth century. When events dictate, part of any given daily class may be devoted to current events in American Foreign Policy, with emphasis on their historical source and context. Prerequisite: POLS 0400.

POLS 1570. International Law (INTL 1700).
Interested students must register for INTL 1700 S01 (CRN 16365).

POLS 1600. Political Research Methods.
Introduction to basic research methods in political science. Topics include descriptive and inferential statistics, sampling theory and measurement. Emphasis placed on understanding concepts of statistics and how statistics apply to the "real world" political issues. Enrollment limited to 40 sophomore, junior, and senior Political Science and Public Policy concentrators.

POLS 1730. Environmental Politics in the United States.
Advanced course exploring social science perspectives on the politics of the environment, with a focus on the United States. Our subjects include debates in the US over global warming, peak oil, alternative energy, habitat destruction, species extinction, sustainable agriculture, environmental justice, pollution, bioengineering, and science policy; the history of environmental movements; the emergence of Green parties; and ecological perspectives on culture, economics, and education. We will study domestic environmental politics, and consider how these affect our nation's participation in global environmental negotiations. Satisfies an upper-level American Politics track requirement. Mid-term and final exam or (alternative assessments). Guest speakers, videos. No prerequisites. Enrollment limited to 40.

POLS 1740. Politics of Food.
How do politics and public policy shape the nature of farming and the price of food in the United States? What is the extent of hunger and malnutrition in the country, and how to politics and public policy shape the responses to these issues? How well does government regulate the safety and healthfulness of food? This course will draw on a combination of case studies and scholarly work to examine these questions. The significance of globalization will also be considered but the emphasis of the course will be on American politics and policy. The course is not open to first-year students. Instructor permission required.
POLS 1750. Black Political Leadership. This course uses black political thought to understand historical and contemporary forms of black political leadership. It explores the diversity of voices, ideologies, and strategies adopted by black leaders to address an array of political and social challenges. It also focuses on how shifting goals, political contexts, and generational changes shape black leadership. Certain black leaders such as W.E.B. DuBois and Barack Obama are used to understand the different types of black political leadership.

POLS 1760. The Obama Infrastructure Policy. The focus is on transportation infrastructure: roads, bridges, rail, transit and airports. How has our infrastructure developed over the past two centuries? Which presidents have been leaders? How does Obama compare with his predecessors? Who are the key actors in Congress and bureaucracy that control the distribution of money? What are the key interest groups? Prerequisite: POLS 0010. Not open to students who have taken POLS 1080.

POLS 1770. Education, Inequality, and American Democracy. Controversy surrounds the contributions that education has made to the development and performance of American democracy. This course will explore that controversy by examining ideas about the role of education in democratic society, the development of American public schools, the dilemmas posed by vast inequalities in American schooling, and policy interventions designed to address educational inequalities.

POLS 1780. Use of Symbols in American Politics. What do a flag, Martin Luther King, Jr. and socialized medicine have in common? They are all political symbols that have produced a strong public response. The political process is complicated beyond the understanding of most. But it becomes manageable when converted into sets of conflicting symbols. How does the public learn about political symbols? What is their role in the policy making process? Three types of symbols will be considered: community, regime and situational symbols. Course coverage limited to American domestic politics. Prerequisite: POLS 0010. Not open to first-year students.

POLS 1820A. American Political Development. No description available. Enrollment limited to juniors and seniors.

POLS 1820B. Roots of Radical Islam. Why has radical, political Islam emerged as a global threat in our lifetime? This course examines potential domestic sources, such as repressive governments and poverty, as well as international sources, such as U.S. foreign policy, with a special emphasis on the various strategies that governments of states with predominantly Muslim populations have taken toward political Islam.

POLS 1820D. Civil Liberties: Moral, Political and Legal Approaches. This course will examine major constitutional controversies within the context of wider debates in political and legal theory. Readings from Supreme Court cases and prominent texts in political/legal theory. Topics include free speech, privacy, abortion, takings and capital punishment. Prior course work in political theory or philosophy recommended. Enrollment limited to 20 juniors and seniors concentrating in Political Science.

POLS 1820H. Contraband Capitalism: States and Illegal Global Markets. This course explores the clandestine side of the global economy (including flows of drugs, people, weapons, and money) and state policing efforts. We will examine the organization of these activities, how they intersect with the state and legal economy, their relationship to armed conflicts, and how they shape (and are shaped by) domestic and international politics. Enrollment limited to 20 juniors and seniors concentrating in Development Studies, Political Science, or International Relations. Course is not open to students who have taken POLS 1020. WRIT

POLS 1820I. Feminism and Political Theory. Examines recent developments in feminist scholarship and their implications for political theory and politics. We explore the impact of gender-differentiated identities on moral reasoning and political agency; the relationships between feminism and classical liberalism, feminism and radical democracy, and feminism and the law; feminist theories of citizenship; and the implications of multiculturalism for feminist politics. Enrollment limited to juniors and seniors.

POLS 1820J. Dynamics of Agenda Building. How do new issues make the political agenda? Why aren’t elections crucial? Who are the “problem pushers” and “solution savers”? How are they linked? What factors determine the life of an issue? The key processes include problem identification, conflict expansion through issue redefinition, the role of institutional actors and issue activists. Focus limited to domestic American politics. Prerequisite: POLS 0010 or 0100. Enrollment limited to 20 juniors and seniors.

POLS 1820N. International Relations in Europe. Reviews central issues in European international affairs from a variety of theoretical and analytic perspectives. Substantive issues considered include the politics of European integration, “Europeanization,” European foreign and security policy, Europe as part of the North Atlantic world and transatlantic relations, issues of European identity and Europe in the world to come. Time also allocated for discussions of course participants’ research. Designed mainly for advanced undergraduates, but graduate students are welcome. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations.

POLS 1820R. Early Modern Orders. This course will approach problems of political, social and economic order from the perspective of early modern British political thought. Authors include Hobbes, Locke, Hume and Smith. We will explore the conceptions of political authority, power and subjecthood that emerge from their theoretical engagements with orders of all kinds and consider whether these persist in our contemporary understandings of politics.

POLS 1820S. Liberalism Beyond Justice. Explores liberalism, nationalism, and the ongoing search for an adequate framework for understanding the idea of liberal citizenship. Enrollment limited to juniors and seniors.

POLS 1820V. Middle East Diplomacy. Contemporary Middle Eastern affairs demand of us greater sensitivity and closer, deeper examination because as a distinctive geo-political and ethno-cultural region the Middle East not only suffers from an overloaded political agenda but is today arguably at the epicenter of international concern and diplomacy. Of profound significance for the global system are: Iran’s rise as a regional nuclear revisionist power within the larger context of political Islam’s reawakening; the politics of Middle East water and Persian Gulf oil; and renewed Russian assertiveness contrasted with waning U.S. Influence. No less diplomatically challenging: Turkey’s ambivalent strategic orientation between East and West; the unresolved Arab-Israeli-Palestinian conflict; Iraq’s fragmentation, Lebanon’s precarious unity and Egypt’s looming leadership succession crisis; and arrested regional integration reflected in strong indicators of comparative economic stagnation. Multiple disciplinary perspectives, careful scholarly analysis, and the search for recurrent historical patterns inspire this course offering and serve as its framework.

POLS 1820W. Market Liberalism: Origins, Principles and Contemporary Applications. What is liberalism? What are the differences between capitalist, democratic and socialist versions of liberalism? Is it true that liberal theory has undergone a form of moral evolution between its “classical” and its “modern” forms? Are there common moral values that all liberals—capitalist, democratic and socialist—affirm? If so, by what dimensions of value are these rival liberal traditions to be distinguished? Enrollment limited to 20 juniors and seniors; all others require instructor permission.

POLS 1820X. States, Markets, Women and Welfare. This course will cover welfare across advanced, transitional and developing nations, focusing on the roles of states and markets and the effects on women’s roles and welfare. It will look at different welfare state structures, how they were established, how they distribute access to health care, education and social security; how they differ across political regime types; how weak states and informal economies affect provision in transitional and developing states.

POLS 1821C. Economic Freedom and Social Justice. Can capitalists care about social justice? This course considers the proposition that capitalists can, and should. Readings include a variety of classical and contemporary sources about the idea of economic freedom and its relationship to social justice. Enrollment limited to 20 seniors.
POLS 1821G. Representation, Parties and Interest Groups. Examination of the role of political parties and interest groups in translating the will of citizens into policy outcomes. Covers the extent to which voters use party as a guideline, the possibility of a viable third party at the Presidential level, the effect of parties on Presidential/Congressional relations, and the interaction of interest groups and parties in politics

POLS 1821H. Authority and Legitimacy. What gives people in power the right to make and enforce laws? The course examines classic and contemporary conceptions of political authority and legitimacy. What is authority and when is it legitimate? Does legitimate authority depend on the consent of citizens, or on the justice of decisions? Can the people hold ultimate authority over the law, or is this merely empty rhetoric? Authors include Hobbes, Rousseau, Weber, Schmitt, Arendt, Althusser, Wolff, Nozick, and Habermas. Enrollment limited to 20 juniors and seniors

POLS 1821I. Issues in Democratic Theory. This seminar engages contemporary issues in democratic theory. Topics explored include the meaning of democracy (and the political consequences of different answers to that question); representation and citizenship; democracy and rights, (free speech, religious freedom, and privacy); democracy and judicial review; deliberative democracy. We will read works of political theory and United States Supreme Court cases. Enrollment limited to 20 juniors and seniors concentrating in Political Science. WRIT

POLS 1821J. Rhode Island Government and Politics. Students participate in an approved internship in Rhode Island State Politics. Students will be expected to work 8-10 hours a week in an office of state government and, at the end of the semester, reflect on what they've learned. Enrollment limited to 20 senior Political Science concentrators. Instructor permission required

POLS 1821K. Just War Theory. Survey of just war theory, with emphasis on ancient, medieval Christian, and contemporary thinkers. What standards should we use to judge the justness or rightness of a war and of conduct during war? Should our judgments on these separate phases of war be related? Who is the relevant agent? Where does its moral authority come from? Are there any post-war obligations? How has the ideal of the warrior-soldier changed over time and why? Prior coursework in the humanities or social sciences is required

POLS 1821L. International Relations of Russia, China and Central Asia. The course focuses on the political relationships among Russia, the European Union, China, the United States, Asia, the Middle East, and the former Soviet States of Central Asia and the Caucasus. Topics include: expansion of Russia's power since 2000; conflicts with Georgia and Ukraine; resistance to expanded US influence in Eastern Europe; military and demographic security, immigration, alliance-building; energy exports and foreign policy. Enrollment limited to 20 juniors and seniors

POLS 1821M. War in Film and Literature. This course introduces students to a study of warfare, and some of the central issues raised in war, through the use of movies and novels. Central themes include civil-military relations, leadership, the role of women in war, managing the homefront as well as issues related to battlefield tactics and strategy. Students will be encouraged to address these topics in applications related to World War I, World War II, and Vietnam in particular. This course will take place in a seminar format which stresses discussion of the relevant materials. Enrollment limited to 20 juniors and seniors concentrating in Political Science

POLS 1821N. Political Journalism. Exploration of the development of political reporting and analysis of contemporary public affairs reporting. Will address key elements of the best political journalism, as well as the manner in which political journalism affects public opinion, political attitudes, and campaigns and elections. Enrollment limited to 20 junior and senior Political Science concentrators

POLS 1821O. Politics of Economic Development in Asia. It is accepted that development is not a technological or an economic phenomenon. Political processes are tied with economic development. Does the political system affect development? Does democracy slow down economic growth? If countries embrace political freedoms and market-oriented economic reforms, should one expect both to succeed equally? Since the Second World War, an enormous amount of intellectual effort has gone into understanding these issues. Asia has been at the heart of much of this literature. Emphasis will be on China, India and South Korea. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations. Instructor permission required. WRIT

POLS 1821P. Political Psychology of International Relations. This course covers basic methods and theories in the use of political psychology to study topics in international relations. The second part of the course applies these models to particular topics, including leadership, group dynamics, and the role of emotion in decision making. Enrollment limited to 20 juniors and seniors. WRIT

POLS 1821Q. The United States in World Politics. Examines major aspects of American foreign policy after the Cold War and 9/11 in terms of domestic and international challenges. Discussions of the United States as ‘empire’ and ‘republic,’ with independent research and a foreign policy game. Emphasis is on the connections between the processes of policy making and the substance of policies pursued. Pre-requisite: POLS 0400. Open to senior Political Science and International Relations concentrators

POLS 1821R. State Sovereignty and International Law. How should international law affect domestic politics and authority? What kinds of international rules, regulations and norms are there? What authority do they have? Should states obey international law even when it conflicts with their interests and that of their citizens? Is a law-governed order attainable in a world of sovereign states? This seminar explores the evolution of international law and its relation to state sovereignty. Authors include Bodin, Gentili, Grotius, Pufendorf, Rabkin, and Held. Enrollment limited to 20 juniors and seniors

POLS 1821S. Women and Politics. How has the importance of gender in politics changed over time? Must women represent women? Can men also represent women? Do women and men participate politically in different ways? Why is there a persistent gender gap in political leadership? Do women campaign differently than men? What are “women’s issues”? Do they affect all women equally? This course explores these and other questions, drawing on a range of literature from political science and public policy. We will also examine contemporary political debates and investigate varying ways in which the categories of gender, race and ethnicity, and other politically-relevant categories intersect. Enrollment limited to 20 juniors and seniors. WRIT

POLS 1821T. Criminal Justice System. An examination of police, criminal courts, and prisons in the contemporary United States. Major topics include police discretion, plea bargaining; and theories of punishment. We will also examine the politics of crime, including federal efforts to influence these traditional state functions. Major assignments are based in the Rhode Island criminal justice system. Enrollment limited to 20 juniors and seniors concentrating in Political Science or Public Policy. Instructor permission required. WRIT

POLS 1821U. Democracy and its Critics. To what degree do democracy help realize or impede important goals of social justice and prosperity? How much democracy do we really want, all things considered? Readings might include: Rousseau, Joshua Cohen, Alasdair Maclntyre, Jeffrey Stout, Diana Mutz, Bryan Caplan. Enrollment limited to 20 juniors and seniors

POLS 1821W. The Politics of Race and Gender. Politicians and scholars make a number of predictions about political life based on assumptions about race and gender. This course examines the roles of race and gender in American politics with a particular emphasis on women of color. The course focuses in social movements, political participation, and political representation. Enrollment limited to 20 juniors and seniors

POLS 1821X. The Politics of Social Welfare in the Middle East. This seminar explores the politics of social welfare in the Middle East. The first section of the course examines the concept and origins of welfare systems in developing countries as well as the relationship between the state, NGOs, civil society and traditional networks in social service provision. This segment of the course also provides an overview and brief history of welfare regimes in the Middle East as well as concepts of charity and justice in Islam. Enrollment limited to 20 juniors and seniors concentrating
in Political Science and International Relations. Preference for remaining spots given to concentrators in Developmental Studies and Middle East Studies.

**POLS 1822B. Foundations of Political Economy.**
This course is both historical and theoretical and overlaps with the disciplines of political science, history, economics, and political theory. Based around an in-depth reading of "the classics" of political economy, the course traces the evolution of political economy through a consideration of some of its major contributions from the seventeenth century to the present; Locke, Ricardo, Smith, Rousseau, Mill, Bentham, Marx, Keynes, Kalecki, Hayek, Friedman, Lucas and Minsky shall be examined.

**POLS 1822C. Congress.**
Takes a comprehensive view of the U.S. Congress, its structure, procedures, elections, parties, constituencies and its interactions with the president and the courts. The Constitution establishes the Congress as the first branch and guardian of the nation's purse strings. This course will examine the strengths and vulnerabilities of the modern Congress with its highly polarized political parties. Requires extensive reading, a detailed paper and active class participation. Students are expected to pay careful attention to current events in the U.S Congress. Enrollment limited to 20 juniors and seniors in Political Science.

**POLS 1822D. Sexuality, Gender, and the Law.**
Examines the legal regulation of sexuality, and, to a lesser extent, of gender. It interprets and applies various bodies of anti-discrimination law (e.g., Title VII, the Fourteenth Amendment to the US Constitution) to various forms of discrimination against individuals on the basis of sexual preference and gender (e.g., employment discrimination, marriage discrimination). While its principal objective is to expose students to the law's treatment of sexuality across a number of domains (e.g., employment, the domestic sphere, the military, immigration), this course will also encourage students to think not only about how the law controls sexuality, but also about how sexual minorities control the law. Familiarity with the Fourteenth Amendment is a prerequisite. Limited to 20 juniors and seniors.

**POLS 1822E. Islam and Democracy in the Middle East.**
This course covers key questions, arguments, and debates concerning the relationship between Islam (as a rubric for identity and mobilization) and democracy (as a political form and value) in the Middle East. The course is organized around major topics concerning the history, culture, and politics of the Middle East since the end of World War I: Islam and modernity, nationalism and independence, authoritarian state building, the European imperial legacy, revolution and fundamentalist resurgence, political Islam and democracy, democracy promotion, and the future prospects for democracy in the region. Enrollment limited to 25 juniors and seniors.

**POLS 1822G. Political Economy of Development and Globalization.**
Understanding and promoting economic, social, and political development is one of the primary challenges facing the world in the twenty-first century. This seminar explores key problems of development and globalization from a comparative and interdisciplinary perspective. Prerequisite: discretion of instructor. Enrollment limited to 20 juniors and seniors.

**POLS 1822H. Corruption and Clientelism in the Developing World.**
In recent years, the issue of "governance" has attracted increasing attention. Why are some countries more corrupt than others? Why do some governments distribute government programs equitably, while others manipulate them for political ends? The purpose of this class is to characterize, examine, and, to the extent possible, explain the persistence of these "bad governance" practices in many democracies in the developing world. We will draw on examples from Latin America, Africa, and Asia, and we will also make comparisons with appropriate current and historical cases from Western Europe and the United States. Enrollment limited to 20 junior and senior concentrators in Political Science and Public Policy.

**POLS 1822J. Ethics of War and Peace.**
While killing another human being is widely considered a wrong, war - a social institution that involves such killing on a massive scale - is an accepted practice that brings honor to those who carry it out on behalf of their respective political communities. This course explores the ethical dimensions of this paradox: how and why institutionalized violence is sometimes conceived of as moral action and what moral distinctions make this conception possible. The course will investigate a range of ethical approaches to these issues - including just war, pacifist, feminist, and poststructuralist approaches - treating them both sympathetically and critically. Enrollment limited to 20 juniors and seniors.

**POLS 1822L. Comparative Constitutional Law.**
An introduction to the constitutional law of other countries and a comparison of their constitutional law to U.S. constitutional law. We will consider court cases from Germany, South Africa, France, India, Britain, Japan, Canada, Australia, Israel, Egypt, Pakistan, New Zealand, Italy, Austria, Hungary, the Czech Republic, the Philippines, Ukraine, South Korea, Ireland, Poland, Latvia, Ceylon, Jamaica, Zambia, and Singapore. Topics include: judicial review, separation of powers, federalism, free speech law, freedom of religion, criminal procedure, rights to property or welfare, rights of privacy and human dignity, judicial policing of the political process, states of emergency, and constitutional amendment processes. Enrollment limited to 20 junior and senior concentrators in Political Science.

**POLS 1822M. Capitalism: For and Against.**
If capitalism just is, or is it exploitive? Does the value we place on freedom create a negative right to own property free from interference, or a positive right to a certain level of subsistence? Does capitalism ennable culture, or destroy it? Does it empower individuals, or alienate them? To what extent, if any, can capitalism's downsides be mitigated through redistributive schemes? This course will examine these questions through study of some of the seminal philosophical arguments for and against capitalism, from its origins to the present day. Enrollment limited to 20 juniors and seniors concentrating in Political Science. Not open to students who have completed POLS 0820S.

**POLS 1822O. The Presidency.**
The individual who occupies the office of the President of the United States is one of the most powerful individuals in the world. The consequences of presidential leadership are enormous and well worth of study from multiple dimensions. This seminar will survey the origins of the modern presidency; leadership attributes of the chief executive; and how presidents have initiated, reacted, and managed domestic and foreign affairs. Topics include nominations, elections, staff and bureaucracy, rhetorical, public relations, the party system, the "imperial presidency," congressional relations, policies, and political science theories of the presidency. Enrollment limited to 20 junior and senior concentrators in Political Science and Public Policy.

**POLS 1822P. Defenses of Capitalism.**
The moral justification for laissez-faire capitalism accepted in late nineteenth century came under attack in the twentieth. Will examine four schools of thought that arose to defend capitalism: schools of free-market economists, Pro-Rand Rightists, social democrats, and libertarians. We will find the differences between these schools are as charged and fundamental as any between capitalism and its critics. Primary sources (including Ayn Rand's Atlas Shrugged) will provide the bulk of our reading. The course will conclude with an application of the rival theories to a few current public policy issues. Enrollment limited to 20 juniors and seniors. WRIT

**POLS 1822T. Politics of Health in the Global South.**
Public health poses some of the most pressing challenges of our times. This course explores the political factors that shape health and access to health care in the Global South. How does the nature of the state and, especially welfare policies and institutions, shape health and access to health? What is the role of non-state actors, whether NGOs, "terrorist" organizations or other groups, in assuring the basic health needs of populations in developing countries? How do ethnic and other social divisions affect health and health systems? Why do some health crises capture the attention of powerful global actors? Enrollment limited to 20 juniors and seniors in Political Science, International Relations, Middle East Studies, Development Studies, Community Health, and Economics. Instructor permission required.

**POLS 1822U. War and Human Rights.**
This seminar will begin by studying the rise and spread of the notion of human rights, examining some of the core debates over human rights, including their enforcement in times of war. It will then turn to the laws.
of war, focusing especially on the 1949 Geneva Conventions and the challenges posed to the Conventions by the rise of non-state actors wielding significant violence. Topics include child soldiers, war crimes, humanitarian intervention, torture, targeted killings, humanitarianism, and the international justice. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations.

POLS 1822V. Pluralism and Democratic Imagination.
In this course, we will investigate the contours of historical debates about pluralism and democracy in the public imagination. Our goal will be to make the terms "pluralism" and "democracy," which simultaneously serve as hollow tropes in contemporary political discourse and as the basis for a secular religious faith for many on the left and the right, more difficult. Rather than cleansing these terms of their complications, we will strive to see them from all sides, interrogating their maddening paradoxes and ugly undertones while never losing sight of their awesome possibilities. Enrollment limited to 20 juniors and seniors.

POLS 1822X. Technology and International Politics.
This seminar examines the connections between technological change and international politics. Technologies have always been central to how states conduct war, cooperate with one another, and rule their subjects. We will consider this connection both theoretically and through a number of historical and contemporary case studies of technological changes and their relationship to international politics, including the technologies of warfare, communication, and transport. It is strongly recommended that students have taken the introductory international relations course (POLS 0400) before enrolling in this seminar. Enrollment limited to 20 juniors and seniors.

POLS 1822Z. Racial Attitudes and their Impact on American Politics.
The course first documents trends and sources of change in racial attitudes. It then evaluates the debate between psychological, sociological and political explanations for opposition to racial policies. We then transition from the policy realm to the impact of racial attitudes on electoral politics. In this half of the class we will study how racial attitudes have influenced partisan and presidential politics from Reconstruction up through the present, how parties and politicians use racial appeals for electoral gain, how racial attitudes affected black candidates before Obama, and racial attitudes and their impact on American politics in the age of Obama. Enrollment limited to 20. WRIT.

POLS 1823A. Constitutional Theory.
Will introduce the key theories that have been put forward in the last 100 years in Constitutional interpretation and how the Supreme Court exercises the power of judicial review. We will read and study key works by famous constitutional theorists of the past like James Bradley Thayer, Alexander Bickel, Charles Black, and John Hart Ely as well as reading the works of contemporary theorists such as Ronald Dworkin, Richard Posner, Robert H. Bork, Antonin Scalia, Richard Fallon, Larry Kramer, and Jack Balkin. We will devote one week to each theorist and class participation in discussions is expected. Open to juniors and seniors concentrating in Political Science and Public Policy. Prerequisite: POLS 1160 or 1170. WRIT.

POLS 1823B. Reforming the State in New Democracies.
This course analyzes the politics and reform of the administrative state in new democracies. Our general focus will be on how electoral, legislative, and bureaucratic institutions affect the nature of governance in advanced and developing democracies. We will then focus specifically on the extent to which elected politicians are able to control bureaucrats. Finally, we will turn to several policy areas – civil service reform, regulatory and administrative procedural reforms and fiscal policy – and discuss the politics of each in comparative and theoretical terms. Enrollment limited to 20 juniors and seniors.

POLS 1823C. Ancient Political Thought.
What is the purpose of politics? Who should rule? What is justice? Plato and Aristotle instigated the tradition of political philosophy in the West, and our modern democracy is deeply indebted to their ideas. Yet their answers to many of the fundamental questions of politics differ dramatically from our own. Among other things, they valued virtue over personal freedom, duties over rights, and nobility of soul over equality of access. In this course we reflect critically on the value and implications of their ideas, and we evaluate our own modern political principles and practices in light of what they taught. Enrollment limited to 20.

POLS 1823D. War and Peace in International Society.
The decline in the frequency of interstate war and the illegality of international aggression are among the most significant changes in international relations in the last century. However, international violence has not disappeared from the world. This class charts and analyzes the changes in warmaking and peacemaking up to and through the twentieth century. How has the nature and practice of war changed? Are we entering an era of global peace? Other topics covered include mercenaries, plunder, peace treaties, and robots. Enrollment limited to 20 juniors and seniors in International Relations and Political Science. WRIT.

POLS 1823E. Global Justice.
This seminar explores contemporary debates in international political theory on the question of global justice. We will focus on five different contemporary problems that are at the same time domestic, international and global problems of justice: global poverty, humanitarian intervention, transnational migration, international trade and inequality between the developed and developing world, climate change and global health issues. We will look not only at the international regimes governing and producing these problems, but also at contemporary efforts to expand the scope of moral duties to tackle global problems. In brief, we will think about new ways of imagining global justice. Enrollment limited to 20 juniors and seniors.

POLS 1823F. The International Order: Between Imperialism and Self-Determination.
Explores the encounter between ‘Europe’ and the ‘non-Western’ world. Will examine the ways in which the Western international order has conceived and managed the encounter with the ‘non-Western,’ ‘developing’ or ‘Third World.’ The history of this encounter has been fraught with violence and war. From the Spanish conquest of the ‘New World’ to the scramble for Africa in the 19th century, Western states have sought to extend their rule overseas by force. International order sanctioned violent colonial dispossession, recognizing titles to Western states –redefining overseas territories as terra nullius for example– and providing a general justification –the civilizing mission– to colonialism. Enrollment limited to 20 juniors and seniors.

Concentrators who have given evidence of superior work in political science may be admitted to honors seminar on the basis of an application submitted in the spring of their junior year. Application and guidelines may be obtained on the Department of Political Science website. Prerequisite: Fulfillment of Methods requirement. Enrollment limited to senior Political Science concentrators. Instructor permission required.

POLS 1920. Senior Honors Thesis Preparation.
This course is a continuation of POLS 1910. Political Science Honors students who are completing their theses should enroll. Prerequisite: POLS 1910. Instructor permission required.

POLS 1970. Individual Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

POLS 1971. Individual Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Introduction to research methods common in political science research. Topics include theory development, problems of explanation and causation, problem identification, research design, and other fundamentals of empirical research. Graduate students only.

No description available.

POLS 2030. Seminar in the History of Modern Political Thought.
An advanced seminar in the history of modern political thought from Machiavelli to Foucault. Themes include the nature of political sovereignty and the basis of civil authority; the emergence of liberal constitutionalism; democratic, socialist and aristocratic critiques of liberalism; the meaning of freedom; the relation between liberty and equality; and the ideas of social
progress and individual development. Graduate students only; qualified undergraduates with instructor’s permission

POLS 2050. Preparing the Prospectus I.

This course covers selected topics in research design and methodology and is designed to help students enrolled in the Political Science PhD program to write and defend a prospectus in their third year of study. Instructor permission required

POLS 2051. Preparing the Prospectus II.

This course covers selected topics in research design and methodology and is designed to help students enrolled in the Political Science PhD program to write and defend a prospectus in their third year of study. Prerequisite: POLS 2050. Instructor permission required

POLS 2060. International Relations and History.

This graduate seminar considers history both as a topic and as a method of international relations scholarship, and in other subfields of political science as well. We will read and discuss works that fall at the intersection of history and international relations, on topics including the sources of interstate conflict, the origins of the nation-state, and colonialism and postcolonialism. Open to Political Science Graduate students only

POLS 2070. Black Political Participation.

Topical issues in the political behavior of African Americans at the national level. Voter turnout and electoral choice, participation of blacks in major political parties, African American political culture, socialization, opinion, legislative behavior, and political leadership. Goal: to assess strengths and limitations of the research and literature on African American political behavior

POLS 2080. Market Democracy.

Social democracy was the progressive political program of the 20th Century. Social democracy treats economic liberty as morally less important than civil or political liberty. Social democracy is often contrasted with libertarianism, a political system that treats the economic liberties of citizens as moral absolutes. Between social democracy and libertarianism there is conceptual space for a third view: market democracy. Market democracy treats economic liberty as on a par with civil and political liberty. This course examines the moral foundations of social democracy, libertarianism, and market democracy. Could market democracy be a progressive political program for the 21st Century? Graduate students only; qualified undergraduates with instructor’s permission

Explores major works that span the range of theoretical approaches and intellectual styles in modern comparative research. Includes in-depth interviews with leading scholars where they reflect on their intellectual formation, their works and ideas, the nuts and bolts of the research process, and the evolution of the field. Graduate students only; qualified undergraduates with instructor’s permission

POLS 2090G. Readings in American Institutions.

This course is designed as a readings and research course for graduate students and advance undergraduate students. Students will be required to read and analyze the latest work political science in the subfields of American politics, including but not limited to: public opinion, voting behavior, presidency, racial politics and representation, legislative institutions, political economy, and bicameralism. Open to graduate students only

POLS 2090H. Readings in Comparative Politics.

A research and readings course on political behavior -from voting to violence, which applies rational choice theory, the Michigan model, the social logic of politics, and other theoretical perspectives

POLS 2090I. American and Comparative Political Behavior.

This course is designed for graduate students to explore the core theoretical concepts and empirical research in the fields of political behavior and political participation in the American and Comparative context. It is open to advanced undergraduates with permission from the instructor

POLS 2100. Proseminar in American Politics.

Introduction to broad issues in American politics. Topics include the interplay of political institutions in the American setting, the process of policy-making, and the behavior of key actors in American politics.

Graduate students only; qualified undergraduates with instructor’s permission

POLS 2110. Proseminar in Comparative Politics.

Provides a survey of major approaches, issues, and debates in the field of comparative politics. Topics: state formation, revolutions and civil wars, ethnic conflict and nationalism, state-market relations; systems of representation, hegemony and domination, etc. Works of theoretical importance on each topic, focusing on authors’ arguments and controversies within the literature. Open to graduate students only

POLS 2120. Proseminar in Political Theory.

An overview of central debates in political theory today. Readings include contemporary writings on justice, liberalism, democratic theory, critical theory, feminism, power, multiculturalism, and citizenship and political economy. Enrollment limited to 14 graduate students in Political Science; advanced undergraduates may enroll with permission of the instructor

POLS 2130. Proseminar in International Relations.

Surveys the main theoretical trajectories and intellectual disagreements that define International Relations as a discipline today. Positions examined include varieties of rationalism and constructivism; realism-liberalism-sociological approaches; and systemic and subsystemic theories. Also considers debates about contours of post-Cold War world politics, America and the world, and moral issues. Not open to undergraduates

POLS 2131. Politics of Gender.

Topics include gender and personal identity; the impact of gender on moral reasoning and political agency; feminism in relation to liberalism and radical democracy, feminism and the law; the gendering of political institutions and interstate relations; and the implications of multiculturalism for feminist politics. Open to qualified undergraduates with permission of the instructor

POLS 2140. Post Cold War Conflict.

Course explores the nature and causes of post-Cold War conflict. We’ll discuss the end of the Cold War, as well as prominent contemporary themes, such as the spread of ethnic warfare and humanitarian intervention, the privatization of security provision, and the proliferation of “transnational threats” such as cross-border crime and terrorism. Graduate students only; qualified undergraduates with instructor’s permission

This course will examine contemporary and historical work in the area of democratic political and legal theory. Topics include the relationship between democracy and individual rights, deliberative vs. aggregative conceptions of democracy, the substance/procedure controversy, and the role of judicial review in a democracy. Open to graduate students only

POLS 2160. International Political Economy.

Graduate seminar that surveys the subfield of international political economy. Outlines the historical development of the subfield as it moved from questions of US decline to issues of international cooperation and compliance and back to issues of US decline. Places the US research agenda in comparison with schools of IPE in the rest of the world. Topics covered include globalization and distribution, development, IGOs and NGOs in the IPE, Public and Private Authority, the rise and fall of nations. Open to graduate students only

This course explores the relationship between economic freedom and social justice. The economic liberties of capitalism have often been said to be in tension with the moral ideal of distributive justice. What are the economic liberties of capitalism and what moral value, if any, do they have? What does a commitment to social justice require? Why are libertarians traditionally skeptical of social justice as a moral ideal? How do liberal conceptions of social justice compare to socialist ones? Can capitalists care about social justice? Should they? Open to graduate students concentrating in Political Science

Why and how have welfare states been constructed, and how are they adapting to globalization? How does gender map onto contemporary welfare states, and how do different systems of welfare provision affect women and men in labor markets, families, access to health care and education? How do growing markets, insecurity, and labor migration affect
welfare provision? The course looks at formal and informal social provision, changing roles of men and women, privatization and informalization of welfare, drawing on case studies from Europe, Latin America, Asia and Africa. Enrollment limited to 20 graduate students and advanced undergraduates (with instructor’s permission)

POL 2210. Race, Ethnicity and Politics.
This is a graduate-level introduction to the politics of race and ethnicity in the US context. The seminar examines major theoretical perspectives, debates, and research findings in the study of race and its critical influence upon the politics of the US. The course focuses on political representation, political participation, and political attitudes as related to racial and ethnic minorities. Enrollment limited to 14. Open to Political Science Graduate students only; qualified undergraduates with instructor’s permission

POL 2220. Urban Politics.
Covers a number of topics linked to urban politics and urban public policy. Topics include the politics of urban education, affordable housing, downtown development. Examines how state and federal policy actions have contributed to the nature of the urban condition; and how race, class and ethnicity are interwoven with urban politics and urban public policy. Graduate Students only; all others by permission only

POL 2240. Political Economy and Political Science.
Graduate field survey of classic and contemporary political economy texts and arguments. Objective is to provide grounding for further studies. Useful for all political science subfields and related disciplines. Enrollment limited to 20 graduate students

POL 2245. The International Political Economy of Global Finance.
This class is intended to give graduate students a field survey of the main issues and debates in global finance. Although global finance is back in vogue since the 2008 crisis, it remains a frontier of research in mainstream political science. As such, it is an excellent area to conduct research since it remains an ‘open range’ of inquiry. The course is divided into three parts. The first part covers classic accounts. The second part focuses on the 2008 crisis. The third part discusses contributions in areas such as Risk Management, Hedge Funds, Money Laundering, Quantitative Finance, and Sovereign Debt. Enrollment limited to 14 graduate students in Political Science

Scholarship has increasingly focused on why radical groups emerge. Yet, there is little research to date on how and whether these groups actually have a socio-political impact. This course will examine the mechanisms whereby and the conditions under which political extremists affect political and/or social change across time and space. We will base our analysis on several historical case studies that deliberately vary radical groups according to important characteristics such as: the degree of their prominence in social and political discourse; the extent of their lifespan in a particular country; and whether their tactics include the use of violence. Graduate students only; qualified undergraduates with instructor’s permission

POL 2250. Particularism in Latin America and Comparative Perspective.
This course will characterize, examine, and explain the use of particularistic practices in today’s democracies in Latin America and in comparative perspective. Among these practices, we pay most attention to the phenomenon known as clientelism. Graduate students only; qualified undergraduates with instructor’s permission

A central attribute of the modern state has been preparing for and carrying out wars of various kinds. This course explores the nature, causes, and consequences of both inter-state and internal wars. We will examine such themes as the relationship between war-making and state-making; arguments about the obsolescence of major war; and the changing nature of conflict in the post-Cold War era

POL 2320. Ethnic Conflict.
What is ethnicity? What does it share with nationalism and in what respects is it different? Why do ethnic groups fight violently and kill wantonly, especially after living peacefully for a long time? Under what conditions do they manage their relations peacefully? Do people participate in ethnic insurgencies because of greed or grievance? Will ethnic groups disappear as modernity proceeds further? These questions will guide our intellectual journey over the semester. Graduate students only; qualified undergraduates with instructor’s permission

POL 2350. Politics in India.
This seminar will present Indian politics in a comparative and theoretical framework. It will focus on four themes: British India and Indian Nationalism; India’s democratic experience; politics of ethnic and religious diversity; and political economy, concentrating especially on India’s economic rise. Readings include the classics of the subfield of Indian politics and political economy, but also quite a lot of recent scholarship. Enrollment limited to 20 graduate students

POL 2350. Freedom.
Examines the meaning of freedom together with the self-understandings, social practices, and political institutions that underlie and constitute it. Considers literature on freedom from the contemporary liberal, republican, and democratic traditions, including Berlin, Pettit, Arendt, Honneth, Butler, and others. Enrollment limited to 14

POL 2360. Ancients and Moderns: Quarrels and Continuities.
Examines the political thought of Plato and Aristotle together with three modern thinkers whose work was especially influenced (or animated) by engagement with these ancient views of politics: Machiavelli, Rousseau, and Nietzsche. In exploring these moderns in particular, we also get a view of early modern, high modern, and postmodern receptions of the ancients. Open to graduate students

POL 2370. Political Philosophy and Economic Theory.
Political philosophy relates to economic theory in two ways. It takes primary texts of economic theory and draws out their philosophical, ethical, and political implications. It also begins from normative theory, like theories of justice, and brings these independently developed principles to bear on economic concerns. This class takes both approaches. The first half will attempt read foundational economic thinkers (e.g. Jevons, Keynes, Schumpeter, Hayek, Polanyi) as political philosophers. The second half will take an external approach, looking at how competing libertarian, socialist, post-socialist, classical liberal and liberal traditions (e.g. Smith, Friedman, Rawls, Cohen, Tomasi) think about economic freedom

POL 2450. Exchange Scholar Program.
POLS 2580. Introduction to Quantitative Research Methods.
Course begins with basic introduction of statistical analysis and, using STATA, works with students to conduct analysis of their own data set. Open to graduate students in Political Science and Public Policy only

POL 2590. Quantitative Research Methods.
An intermediate statistics course for graduate students. Topics include multiple regression, statistical inference, categorical dependent variable models, instrumental variable models, and an introduction to time series. Course readings and applications examine models used in different fields of political science and public policy including American institutions, comparative politics, and international relations. Open to graduate students concentrating in Political Science or Public Policy

POL 2970. Preliminary Examination Preparation.
An independent study directed by a tenure-line faculty member of the Department of Political Science. Only second-year graduate students may register for the course; it is intended to provide a framework to help prepare for preliminary examinations

POL 2971. Preliminary Examination Preparation.
An independent study directed by a tenure-line faculty member of the Department of Political Science. Only second-year graduate students may register for the course; it is intended to provide a framework to help prepare for preliminary examinations

POL 2975. Field Survey and Research Design.
An independent study directed by a tenure-line faculty member of the Department of Political Science. Only third-year graduate students may register for the course; it is intended to provide a framework for producing a formal research design modeled on the dissertation prospectus

POL 2976. Field Survey and Research Design.
An independent study directed by a tenure-line faculty member of the Department of Political Science. Only third-year graduate students may register for the course; it is intended to provide a framework for producing a formal research design modeled on the dissertation prospectus
POLS 2980. Individual Reading and Research.
An independent study course directed by a tenure-line faculty member in the Department of Political Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

POLS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

POLS 2991. Thesis Research and Preparation.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Population Studies and Training Center

The Population Studies and Training Center (PSTC) is a multidisciplinary unit organized to facilitate and strengthen research and graduate training in demography at Brown. Its core faculty associates are from the Departments of Sociology, Economics, and Anthropology. Other PSTC faculty are affiliated with the Brown Medical School, the Environmental Change Initiative, the Watson Institute for International Studies, and the Spatial Structures in the Social Sciences initiative. This combination has led to an extraordinarily dense network of collaborations both within and across disciplines. The PSTC is not only a source of infrastructure and research support for associated scientists, but also the nexus of intellectual activity for empirically driven and theoretically grounded scholars with population interests at Brown. The PSTC is a leader among demographic centers in several areas, including anthropological demography, multi-method data collection in the developing world, and the demography of Africa. The PSTC is also a key player in terms of the development of multi-method analysis and in the integration of demographic perspectives into the study of the process of economic development.

The PSTC provides a competitive interdisciplinary demography training program conducted in cooperation with the Ph.D. programs in Sociology, Anthropology, and Economics. The program is designed to prepare demography trainees to be successful scholars in their respective disciplines, and to give students the skills to successfully participate in the broad intellectual community of population studies. Degree requirements are described under the departmental listings, although all trainees are required to complete selected methods and interdisciplinary course requirements. Many PSTC students receive funding for their studies through Center training awards from the National Institutes of Health, and the demographic perspectives into the study of the process of economic development.

PSTC students also have an excellent record of obtaining competitive external support for their studies and research.

Those interested in learning more about research and training activities at the PSTC should visit the Center’s website at www.pstc.brown.edu.

Portuguese and Brazilian Studies

Chair

Luiz Fernando Valente

Established in 1977 as a multidisciplinary center and granted departmental status in 1991, the Department of Portuguese and Brazilian Studies has a national and international reputation for excellence in research and teaching on the Portuguese-speaking world — a vast geographical area encompassing eight different countries on four continents (Brazil, Portugal, Angola, Cape Verde, Mozambique, Guinea-Bissau, São Tomé and Príncipe, and East Timor), in addition to long-standing immigrant communities in the United States. The department’s programs focus on the global nature of the Portuguese-speaking world, as well on specific geographical areas: Continental and Insular Portugal, Brazil, Lusophone Africa, and Luso-America. Undergraduate and graduate students are able to work with a distinguished faculty committed to both research and teaching, and to take advantage of the extensive resources on the Portuguese-speaking world at the Rockefeller, John Hay, and John Carter Brown libraries. Besides offering academic programs in Portuguese language, Portuguese and Brazilian literature, history, and culture, and ESL/cross-cultural studies, the Department of Portuguese and Brazilian Studies extends its resources beyond the immediate university community by organizing a varied program of cultural events, including lectures, concerts, and symposia. Exchanges with Brazilian and Portuguese universities, the publication of books and two scholarly journals, and consultation in bilingual/ESL curricular and technical assistance exemplify the department’s broader social and educational contributions.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Portuguese_Brazilian_Studies/

Portuguese and Brazilian Studies Concentration Requirements

Portuguese and Brazilian Studies examines the Portuguese-speaking world, a large and diverse geographical and cultural area spread over five continents. Inhabited by two hundred fifty million people, this area includes Brazil, Continental and Insular Portugal, Lusophone Africa and Luso-America. Although concentrators are encouraged to examine the global nature of the Portuguese-speaking world, typically they focus on one of the specific geographical entities mentioned above. Concentrators will strengthen their Portuguese language skills (Portuguese 400 or the equivalent is a pre-requisite) and explore relevant Lusophone literature, education, history and social science. The concentration offers one program in language and literature and another that is interdisciplinary. Most concentrators study abroad in either Brazil or Portugal.

Using the Portuguese language as a basis, the concentration in Portuguese and Brazilian Studies allows students to develop their interests in the areas of language, literature, education, history or the social sciences in general. The concentration consists of eight interrelated courses to be selected by the student, in consultation with the Concentration Advisor, from the offerings in Portuguese and Brazilian Studies as well as in other departments, such as History, Political Science, Africana Studies, Anthropology and Sociology. At least four courses must be conducted in Portuguese. Students may choose between two basic programs:

Program A (Language and literature focus):

<table>
<thead>
<tr>

Honors
Candidacy for honors in Portuguese and Brazilian Studies assumes a better than average record, particularly in the concentration. Candidates for honors are required to complete an honors thesis or other approved project. Normally honors candidates will register for POBS 1990 ("Research and Preparation of Honors Projects") in Semesters VII and VIII. These independent study units may not be used to satisfy the minimum course requirement for the concentration. Honors projects are evaluated by two faculty members. Detailed information on honors is available from the concentration advisor.

Foreign Study: Study either in Brazil or in Portugal (usually in the junior year or during the summer) is encouraged as an important part of the concentration. Up to four credits from participation in foreign-study programs can be applied towards the concentration. Students should begin to prepare early for participation in such programs.

Portuguese and Brazilian Studies
Graduate Program
The department of Portuguese and Brazilian Studies offers five graduate programs.

- Doctor of Philosophy (Ph.D.) in Portuguese and Brazilian Studies. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/portuguese-and-brazilian-studies
- Master of Arts (A.M.) in Brazilian Studies. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/portuguese-and-brazilian-studies
- Master of Arts (A.M.) in Portuguese and Brazilian Studies. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/portuguese-and-brazilian-studies
- Master of Arts (A.M.) in Portuguese-Bilingual Education and Cross-Cultural Studies OR Master of Arts (A.M.) in ESL and Cross-Cultural Studies. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/portuguese-bilingual-or-esl-education-and-cross-cultural-studies

Courses
POBS 0100. Elementary Portuguese.
Designed for students with little or no preparation in the language. Stresses the fundamental language skills of understanding, speaking, reading, and writing. Aspects of Portuguese and Brazilian culture are also presented. Uses a situational/natural approach that emphasizes communication in Portuguese from the very first class. A year course; only in exceptional circumstances is credit given for one semester alone. Prerequisite: POBS 0100

POBS 0100. Writing and Speaking Portuguese.
Designed to improve the students' ability in contemporary spoken and written Portuguese. Using such cultural items as short stories, plays, films, videos, newspaper and magazine articles, and popular music, students discuss a variety of topics with the aim of developing good communication skills. Attention also given to developing writing ability. A systematic review of Portuguese grammar is included. Prerequisite: POBS 0200, or POBS 0110, or placement. Conducted in Portuguese. Completion of POBS 0400 is the minimum requirement for participation in the Brown-in-Brazil Program. Offered every semester

POBS 0610. Mapping Portuguese-Speaking Cultures: Brazil.
Selected literary and cultural texts that serve as vehicles for a deeper understanding of Brazilian society. Literary materials will be taken from several genres and periods with special attention to contemporary writings. Other media such as film and music will also be included. Considerable emphasis on strengthening speaking and writing skills. Prerequisite: POBS 0400, placement or instructor's permission. Conducted in Portuguese

POBS 0620. Mapping Portuguese-Speaking Cultures: Portugal and Africa.
Selected literary and cultural texts that serve as vehicles for a deeper understanding of Portuguese and Luso-African societies. Literary materials will be taken from several genres and periods with special attention to contemporary writings. Other media such as film and music will also be included. Considerable emphasis on strengthening speaking and writing skills. Prerequisite: POBS 0400, placement or instructor's permission. Conducted in Portuguese

POBS 0710. Modern Brazil Goes to the Movies.
Looks at Brazil through the eye of the camera and focuses on topics such as migration, race relations, gender and family dynamics and social inequities in contemporary Brazilian culture and society. Students will read articles and critical essays relating to the themes of each film as they develop their oral and written language skills. Conducted in Portuguese

POBS 0720. Racial Politics in Contemporary Brazil (AFRI 0710A).
Interested students must register for AFRI 0710A S01 (CRN 25943). Conducted in Portuguese

POBS 0810. Belonging and Displacement: Cross-Cultural Identities.
Focuses on the representation of immigrants, migrants and other "border crossers" in contemporary literature from Brazil and other countries. How do people respond to the loss of home and the shift to a new culture? Is "going home" possible? How do individuals deal with their dual or triple identities? Piton, Lispector, Sclari, Rushdie, Salih, Cristina Garcia, V. S. Naipaul and others. Conducted in English. Enrollment limited to 20 first year students. FYS WRIT

POBS 0820. "Coming Out" Jewish, Gay or Black: Mistaken Identity in Literature from USA and Brazil.
Understood as the opposite of passing or assimilating, "coming out" evokes socio-psychological and cultural tensions between public and private identities that are becoming increasingly blurred. Ambivalent identities incite concerns about belongingness, marginalization, citizenship, dislocation, and diaspora. Feeling unfamiliar or displaced as a manifestation of cultural alterity can also lead to situations of mistaken identity. Recognizing today's shift away from essentialisms, this seminar will read fiction from the USA and Brazil by applying the tropes of "coming out" and belonging to illustrate the complex formations and ambiguous practices of identity construction. Enrollment limited to 20 first year students. Conducted in English. FYS WRIT

Understood as the opposite of passing or assimilating, "coming out" evokes socio-psychological and cultural tensions between public and private identities that are becoming increasingly blurred. Ambivalent identities incite concerns about belongingness, marginalization, citizenship, dislocation, and diaspora. Feeling unfamiliar or displaced as a manifestation of cultural alterity can also lead to situations of mistaken identity. Recognizing today's shift away from essentialisms, this seminar will read fiction from the USA and Brazil by applying the tropes of "coming out" and belonging to illustrate the complex formations and ambiguous practices of identity construction. Enrollment limited to 20 first year students. Conducted in English. FYS WRIT

POBS 0970. Tropical Delights (HIST 0970B).
Interested students must register for HIST 0970B S01
POBS 1039. Portuguese Stylistics: Advanced Language Study and Creative Writing
An intensive writing course covering basic genres: letter, short essay, diary, short story, and poetry. Students write five pages per week on five different preassigned topics that range over a wide variety of subjects. Exposes students to idiomatic and stylistic writing in a multitude of areas. In class, students read and comment on each other’s writings. Enrollment limited to 20. Conducted in Portuguese. WRIT

POBS 1070. Plugging into Brazil: Print, Television, and the Internet
We will investigate the many nuances of the Brazilian media in its various forms and discuss Brazil using newspapers, leading magazines, current television broadcasts and the Internet. What are the characteristics of the Brazilian media? How does the media shape the views of Brazilians living in Brazil and those abroad? What is the role of the Brazilian media in a globalized world? Conducted in Portuguese. Prerequisite: One of the following: POBS 0610, 0620, 0710, or consent of the instructor

POBS 1080. Performing Brazil: Language, Theater, Culture
Designed to deepen the students’ understanding of Brazilian culture and society through the performing arts. Students will read a series of plays and respond to them in a variety of ways: in writing, verbally, and through performance. The course will include poetry and music as these can also be performed. Throughout the semester students will also be working on creating their own performance pieces. Conducted in Portuguese

POBS 1090. Portuguese-speaking Cultures Via Film
We will view and discuss films from Brazil, Lusophone Africa, Portugal and other regions as vehicles to understand the cultural diversity of Portuguese-speaking countries. Readings will include related fiction and non-fiction focusing on immigration, gender, race, family dynamics and social inequality. Students will write a series of short papers and develop a final project in consultation with the instructor. Particular attention will be paid to contemporary Brazilian cinema. Prerequisite: POBS 0610, 0620, 1030, or 1080, or instructor permission. Enrollment limited to 20. Conducted in Portuguese

POBS 1210. Afro-Brazilians and the Brazilian Polity (AFRI 1210)
Interested students must register for AFRI 1210 S01 (CRN 15585)

POBS 1500A. African Literatures of Portuguese Expression
A survey of representative African narrative literature of Portuguese expression (Cape Verde, Guinea-Bissau, São Tomé e Príncipe, Angola, and Mozambique). The selections will cover the periods before and after the independence of these former Portuguese colonies. Conducted in Portuguese. Enrollment limited to 40

POBS 1500B. Azorean Literature
Survey of the major works in prose and poetry of the Azorean writers of the 20th-century that reflect the acçorianidade or the Weltanschauung of the Azoreans. Works by writers such as Nunes de Rosa, Vítorino Nemésio, Côrtes-Rodrigues as well as by the most representative authors of the "New Generation." Conducted in Portuguese

POBS 1500C. Brazilian Literature in Translation: Clarice Lispector-a Woman of Spirit.
As Brazil’s foremost woman writer of the XIXth century, Clarice Lispector has received critical attention from French, Brazilian and American feminists. With the aim of appreciating her work comparatively, this course will examine four novels and four story collections from the following theoretical perspectives: existentialist, feminist, poststructuralist and Jewish hermeneutics. Conducted in English

POBS 1500D. Brief Encounters: Modernist and Postmodernist Brazilian Short Fiction
With Modernism and Postmodernism as the primary theoretical frames, we will examine the aesthetics of short fiction by discussing short stories and novellas from the 1920s to the 1990s that foreground the characteristics of these literary currents and their respective regional and urban expressions. As images of Brazil, this fiction will also be read within the context of feminist, hybrid, subaltern, and postcolonial stances. Conducted in Portuguese

POBS 1500E. Contemporary and Brazilian Fiction: New Paths and New Perspectives.
Selected prose narratives from the 1970s to the present are read with the aim of identifying new paths and perspectives in contemporary Brazilian literature and culture that challenge traditional literary and cultural hierarchies as well as canonized aesthetics. Milton Hatoum, João Gilberto Noll, Caio Fernando Abreu, Marliene Felinto, Sônia Coutinho, Roberto Drummond, Sérgio Sant’Anna, Rubem Fonseca, and others. Conducted in Portuguese

POBS 1500F. Contemporary Portuguese Women Writers.
Analyzes women’s discourse and proposes an interpretation of female characters in the works of six contemporary Portuguese women writers: Maria Velho da Costa Maina Mendes, Maria Teresa Horta Ana, Agustina Bessa-Luís O Mostro, Teolinda Gersão Paixão com a Fundo, Lídia Jorge O Jardim sem Limites, and Ivette Centeno O Jardins de Eva. By way of contrast, Mário Ventura’s A Revolta dos Herdeiros is discussed as an example of how a male writer fictionalizes a woman as narrator

POBS 1500G. Cultural Politics of Hybridity in Modern Brazilian Fiction.
Explores Brazilian fiction that manifests intersections between erudite, popular and mass cultures. With the aim of challenging unnatural polarities that separate these forms of cultural expression, the theme of hybridity will be examined in prose fiction from the 1960s to the present within the context of the development of the modern Brazilian novel and recent theories on cultural hybridization. Readings will focus on the socio-political and cultural implications of hybridization in prose fiction by such authors as Caio Fernando Abreu, Ivan Angelo, Ignácio de Loyola Brandão, Roberto Drummond, Rubem Fonseca, Clarice Lispector, José Agrippino de Paula, Adélia Prado, Sergio Sant’Anna, and others. Conducted in Portuguese

POBS 1500H. Esthers of the Diaspora: Female Jewish Voices from Latin America.
Fiction by and/or about Jewish women from Brazil, Argentina, Venezuela, Mexico, Chile, and Cuba. Evoking the image of the biblical Queen Esther who lived between two worlds, these Jewish voices will be discussed from the perspectives of feminist, hybrid, diasporic, and transcultural theories. Special attention to Brazil’s Clarice Lispector. The expression of the role of women vis-à-vis the immigrant experience will also be discussed. Conducted in English

POBS 1500I. Fiction and History (COLT 1810G)
Interested students must register for COLT 1810G S01

POBS 1500L. Prophets in the Tropics-Latin American Jewish Writing.
Compares the differences and the parallels between the narratives of the Jewish diaspora in Brazil, Argentina, Mexico, and Peru. As decentered dissenters in literature, these writers invariably address their diasporist situation vis-à-vis the larger society via such issues as immigration, cultural diversity, exile thinking, nationalism, discrimination, and postcolonialism. Prose by female and male writers, along with background materials in history, biography, memoirs, essay, and film. Conducted in English. Prerequisite: one 100-level literature course

POBS 1500M. Rereading Colonial Brazil.
In the first part of the course we will discuss major literary and artistic achievements in Brazilian society during the first three centuries after Brazil’s "discovery." In the second part of the course we will consider how novelists, poets (including song writers), filmmakers, visual artists and social scientists since independence have reassessed the colonial period from a post-colonial position. Conducted in Portuguese

POBS 1500O. The "I" of the Beholder: Self-Examination and Self-Display in Modern Brazilian Fiction.
This course will address the first-person impulse in modern Brazilian fiction with the aim of analyzing the process of self-consciousness vis-à-vis national identity, individualism, memorialism, authoritarianism, and subjectivity. The course will also consider the first person in the context of realism, modernism, regionalism, and postmodernism. Discussion will center upon prose by Mário de Andrade, Rachel de Queiroz, Antônio Olavo Pereira, Clarice Lispector, Lygia Fagundes Telles, Nélida Piñon, Ivan Ângelo, Rubem Fonseca, and others

POBS 1500P. The Personal Dynamics of Witnessing: Self-Interpretation in Brazilian Autobiographical Fiction.
Analyzes first-person narration and the ethics of self-examination, self-display, and self-invention. First-person narrators are read as self-chroniclers who become subject and object, or spectator and spectator, of their own lives. Readings from such writers as Mário de Andrade, José Lins do Rego, Cyro dos Anjos, Antônio Olavo Pereira, Clarice Lispector,
Lygia Fagundes Telles, Nélida Piñon, Rubem Fonseca, and Sérgio Sant’Anna. Conducted in Portuguese.

POBS 1500Q. The Sage of Suspicion: The Skepticism of Machado de Assis.
Focuses on the major novels and short stories of Brazil’s foremost realist. Presentations and discussions address character and narrative distrust as well as skepticism related to unreliable narrators and ironic voices. Also explores the sociopolitical picture of Brazil in the second half of the 19th century in the context of Machado’s Human Comedy. Conducted in Portuguese.

POBS 1500R. Twentieth-Century Portuguese Prose.
Reading and textual analysis of some significant writers from Portugal, along with information related to their historical context. José Saramago, Lidia Jorge, Vergílio Ferreira, Helder Macedo, Agustina Bessa-Luís, and Rosa Lobato de Faria. Conducted in Portuguese.

POBS 1500U. The Leaping Chameleon: Reconfiguration of Self-Identity and Culture in Contemporary Brazilian Fiction.
Focuses on reconfigurations/redefinitions of concepts of identity -- personal and cultural in Brazilian prose fiction from the 1980s to the present. Protean forms and unstable subjectivities become apparent in fictional portrayals of aberrant and disfigured beings in liminal spaces, these serving as vehicles critical of urban strife, cultural instability, estrangement, and social segregation, written by authors such as André Sant’Anna, Bernardo Carvalho, Lilian Fontes, Marcelino Freire, Cíntia Moscovich, Ivana Arruda Leite, Luiz Ruffato, and others. Conducted in Portuguese.

Reading the psychological, mythical and Carioca plays by Nelson Rodrigues will serve to define modern Brazilian theater. Exploring influences from Greek tragedy to Freud, discussions will focus upon social rituals and taboos Rodrigues dramatized to unmask Brazilian society. Film/taped performances and criticism will be studied for interpreting modes of ritual and taboos Rodrigues dramatized to unmask Brazilian society. Conducted in Portuguese.

POBS 1500W. The ‘New Jew’ and the Diaspora: Voices from Israel, Brazil and America.
Studies Jewish identity and belongingness in Israel and the Jewish Diasporas of Brazil and America within the context of multiple homelands. If the concept of the ‘New Jew’ suggests alternative Jewish universes in which Israel is not the center, does this imply the end of the Jewish Diaspora? This course will debate this question via novels and short stories by some of the representative writers from the above three nations. Conducted in English. Enrollment limited to 20

POBS 1500X. Modern and Contemporary Brazilian Poetry: From Text to Performance.
Introduces students to Brazilian poetry from modernists like Oswald de Andrade, Murilo Mendes, Cecília Meireles, Carlos Drummond de Andrade, and João Cabral de Melo Neto to contemporaries such as Augusto de Campos, Francisco Alvim, Arnoldo Antunes, and Ricardo Aleixo. In addition to the reading and discussion of significant works by a variety of poets and literary critics, the course includes a workshop component, in which participants will be encouraged to share their oral interpretation of poems of their choice. The course concludes with a poetry performance by the course members and other interested parties. Conducted in Portuguese. Enrollment limited to 15

Examines both fictional narratives written in Portuguese by African authors and fictional works by Portuguese authors that focus on the colonial experience of Angola, Mozambique, and Cape Verde. Aims in particular at the critical analysis of Portuguese colonialism as a means to verify its specificity or lack thereof within the larger context of overarching European colonialisms. Conducted in Portuguese. Enrollment limited to 25

POBS 1600A. Afro-Luso-Brazilian Triangle (AFRI 1020C).
Interested students must register for AFRI 1020C S01 (CRN 24688)

POBS 1600B. Colonialism, Nationalism and Gender in Portuguese India.
This seminar focuses on Portuguese rule and discourse in India, from an anthropological and historical perspective. Colonialism and nationalism in India will be studied in relation to former Portuguese colonies in Africa as well as to other experiences in India under the British raj. Gender issues will also be addressed. Attention to the case of the devadasi (ritual dancers). Conducted in English.

POBS 1600C. Cross-Cultural Perspectives on Education: Education and the Portuguese-Speaking World.
A comparative education course focusing on schooling in Brazil, Portugal, Cape Verde, and these Portuguese-speaking populations in the U.S. The role of education in these diverse societies, as well as theories and methodologies for cross-cultural research and analysis, are explored from both historical and contemporary perspectives. Conducted in English.

POBS 1600D. Portuguese Discoveries and Early Modern Globalization.
Introduces the study of global early modernity through the lens of the Portuguese empire c. 1400-1700. Maps out the origins, motivations, and nature of Portugal’s imperial expansion. Establishes the patterns of the Portuguese presence in the Atlantic and Indian Ocean. Emphasizes the dependence of the Portuguese empire on other societies, its institutional fragility, its social complexity, and the difficult relations between ideology and economy. Explores the idea of an early “cultural globalization” in religion, art and politics from Iberia to Japan via Brazil, Africa and India. Avoids the traditional idea of an exceptionality of the Portuguese overseas experience. Conducted in English. Enrollment limited to 40

POBS 1600E. Europe and the Indian Ocean (HIST 1950E).
Interested students must register for HIST 1950E S01

POBS 1600G. From Morocco to China (HIST 1950F).
Interested students must register for HIST 1950F S01

Interested students must register for HIST 1972R S01

A comparative analysis of decolonization in the twentieth century. Provides a multidisciplinary analysis of case studies drawn from the Portuguese, Belgian, French and British colonial empires. Themes: genesis and rise of anticolonial nationalism; the role of international organizations in the end of empires; the role of the Cold War in the development and demise of colonial empires; the importance of the “global color line,” and of human and civil rights debates on the crisis of legitimacy of the imperial and colonial worlds; the “modernizing missions” of late colonial empires and the legacies of colonialism in post-imperial societies. Conducted in English.

POBS 1600J. Conflicts, Diasporas and Diversities: Religion in the Early Portuguese Empire.
Focuses on the history of the early modern Portuguese religious world, covering such topics as religious diversity and oppression, the Portuguese Jews and their experiences of persecution and Diaspora, the role of the Inquisition, the establishment of the Society of Jesus in Portugal and the creation of a network of Jesuit missions in the Portuguese world, the Counter-Reformation and the evangelization of so-called gentiles and infidels, and messianic beliefs in the Kingdom of God. Primary sources include works by Portuguese chroniclers in translation, as well as the original editions housed at the John Carter Brown Library. Conducted in English.

A look at the emergence of modernity and its conflicts with the classical world view as revealed in the writings of the Portuguese navigators (XVth and XVth centuries) on their encounters with the non-European world. Readings will focus on fields such as astronomy, cartography, geography, shipbuilding, and anthropology, as stepping stones to the first scientific revolution. This literature has been practically unknown to non-Portuguese readers. Conducted in English.

POBS 1600N. Portuguese-Speaking Africa and Anthropology from Colonialism to Postcolonialism.
This course focuses on the anthropological knowledge of African sub-Saharan societies, the conditions and limitations of these studies during
Interested students must register for MUSC 1935 S01 (CRN 14538).

POBS 1601C. From Dictatorship to Democracy in the Iberian Peninsula: Transformations and Current Challenges.

Studies the origins and nature of the Franco and Salazar dictatorships, outwardly similar and largely concurrent, but in fact different in their aims, outlook and methods. Special attention to the personalities of the two dictators as well as the legacy of Spain’s Civil War and Portugal’s colonial Empire as elements of differentiation between the two regimes. The creation of democratic regimes in Spain and Portugal in the mid-1970s in the aftermath of prolonged dictatorships and the current political and economic challenges faced by these two countries are also considered in detail. Conducted in English. Enrollment limited to 25.

Interested students must register for HIST 1977C S01.

POBS 1601E. The Portuguese Colonial Empire in a Comparative Perspective (XIX-XX Centuries).

A multidisciplinary comparative analysis of the role of empires in the formation of the modern world and globalization since the ‘new’ imperialism of nineteenth century to the end of the colonial empires in the second half of the twentieth century. Case studies from several empires (Portuguese, American, Soviet, French and British) offer a global history of imperialism and colonialism. The links between imperialism, internationalism, nationalism, and modern racism; the relationship between imperial and colonial societies and cultures; the role of international and transnational institutions in the transformation of imperialism and the global emergence of human rights. Conducted in English. Enrollment limited to 40.

Examines the political, military, intelligence and economic ties between Portugal, Rhodesia (before and after its Unilateral Declaration of Independence in 1965) and apartheid-era South Africa as the three countries resisted calls for equal political representation for men and women of all races while exploiting their growing financial muscle as well as the circumstances of the Cold War. The bloc was undone by the Portuguese revolution of April 1974, which led to the independence of Angola and Mozambique, and left Rhodesia’s borders exposed. Extensive use of recently declassified material gathered in Lisbon and Pretoria. Conducted in English. Enrollment limited to 25.

A multidisciplinary comparative analysis of the role of empires in the formation of the modern world and globalization since the ‘new’ imperialism of nineteenth century to the end of the colonial empires in the second half of the twentieth century. Case studies from several empires (Portuguese, American, Soviet, French and British) offer a global history of imperialism and colonialism. The links between imperialism, internationalism, nationalism, and modern racism; the relationship between imperial and colonial societies and cultures; the role of international and transnational institutions in the transformation of imperialism and the global emergence of human rights. Conducted in English. Enrollment limited to 40.

POBS 1601J. The Making of Modern Brazil (LAST 1510J).

Interested students must register for LAST 1510J S01.

POBS 1601G. Beyond Bossa Nova: Brazilian Music and Society. Conducted in English.

Focuses on increasing awareness of the intersection of language and literacy, the sociocultural influences on literacy development, and the application of diverse strategies that support the acquisition of second-language literacy. Combines a theoretical exploration of literacy processes and methodological implications with a clinical requirement of four hours weekly in a second-language field-teaching practicum. Conducted in English.
POBS 1750. Language, Culture, and Society.
Investigates the meanings of language, culture, and society and the
terrelationship among them. Examines the functional and dysfunctional
uses they can play in public education, particularly from the public school
administrators' and teachers' viewpoints. Explores concerns directly
related to the nature, quality, and future of English-as-a-Second-Language
programs. Reflective activities, lectures, simulations, case studies, role
plays, and small group discussions. Conducted in English. Enrollment
limited to 25

POBS 1800A. “Que pais é este?” Twentieth-Century Definitions of
Brazil and Brazilianness.
Focuses on three major areas: the portraits of Brazil from the late 1930s
to the early 1960s, mainly by left-leaning intellectuals; the economic and
political model of Brazil imposed by the military regime of 1964-1985;
and the subversion of the official definitions of Brazil in the "anti-histories"
of the Abertura period (1975-1985). Materials drawn from the social
sciences, history, literature, and film. Authors include Sérgio Buarque de
Holanda, Gilberto Freyre, Vianna Moog, Paulo Freire, Golbery do Couto
e Silva, Roberto da Matta, Caio Prado Jr., Richard Morse, and others.
Conducted in Portuguese

POBS 1800B. Lusofonia: National Identities and Transnational
Challenges.
The creation of the Commonwealth of Portuguese-Speaking Countries
has reigned debate concerning the roots, history, contemporary
developments, and future prospects of the Portuguese-speaking world.
This seminar focuses on key issues regarding the identities of the
Portuguese-speaking nations, their interrelations, and their interactions
with the wider world. A. de Quental, T. de Pascoais, Pessoa, G. Freyre,
S. Buarque de Holanda, Vianna Moog, A. Sérgio, E. Lourenço, A. Cabral,
and R. DaMatt. Conducted in Portuguese

POBS 1800E. The Brazilian Puzzle: Confronting the Post-Colonial
Legacy.
Brazilian intellectuals have often attempted to understand and explain
the challenges in modern Brazilian society (political, economic, racial,
educational) by pondering Brazil’s Iberian roots and assessing the legacy
of Portuguese colonialism. Manuel Bonfim, Sérgio Buarque de Holanda,
Paulo Prado, Gilberto Freyre, Vianna Moog, Caio Prado, Celso Furtado,
Paulo Freire, Oswald the Andrade, Roberto DaMatt. Attention to film,
music and the visual arts. Conducted in Portuguese

POBS 1800F. The Lusophone World and the Struggle for Modernity.
A study of classical writings from the Portuguese-speaking world
dealing with the issue of modernity, focusing particularly on the Counter-
Reformation and Baroque paradigms versus the Enlightenment.
Portuguese, Brazilian and African writers such as Antero de Quental,
Sérgio Buarque de Holanda, Vianna Moog, Amilcar Cabral and others
will be read critically and in a comparative approach. Conducted in Portuguese.

POBS 1970. Reading and Guided Study
Section numbers vary by instructor. Please check Banner for the correct
section number and CRN to use when registering for this course

This independent study course is designed for students working on honors
projects. Written permission of the concentration advisor (Prof. Sobral)
may be required. Section numbers vary by instructor. Please check Banner for the
correct section number and CRN to use when registering for this course

POBS 2010A. Language Theory and Curriculum Development.
Focuses on the application of language theory, methodology, and
curriculum development procedures for classes enrolling English language
learners. Participants focus on setting appropriate goals and objectives
aligned with learning standards and develop appropriate curricula in
several subject areas. Conducted in English

POBS 2020A. Applied Linguistics for ESL.
Focuses on the linguistic development of bilingual children. Addresses
three major dimension of language acquisition-linguistic, cognitive
and sociocultural-within educational contexts for students of all ages.
Conducted in English

POBS 2020B. Cross-Cultural Growth and Development.
Explores physical, cognitive, social and emotional human development
from a cross-cultural perspective. Part one analyzes child-rearing practices
in agrarian and industrialized societies. Part two is based on case studies
involving the ethnolinguistic groups in the Providence area, which are
studied and discussed with implications for teaching and learning.
Conducted in English

POBS 2020C. Educational Leadership in Diverse Settings: Research,
Policy, and Practice.
A series of lectures and discussions representing various perspectives
and styles. Individual sessions focus on leadership issues surrounding
standards, high stakes testing, and school reform initiatives. Most topics
address leadership for low performing schools and for diverse student
populations. Discussions led by prominent educational leaders. Some
lectures may be open to the public. Conducted in English

POBS 2020D. Theories in First and Second Language Acquisition.
Theory and current research relating to first and second language
acquisition and learning are examined from a pedagogical perspective.
Focuses on both learning and teaching a second language. Conducted in English

POBS 2020E. Research Seminar in ESL Education.
Focuses on preparing students to conduct qualitative research in diverse
educational settings. As a final project, students develop a comprehensive
framework for a self-designed study. Conducted in English

POBS 2120A. ESL Methodology Assessment and Evaluation.
An overview of the current principles, practices and approaches that
inform assessment and evaluation for English language learners.
Participants engage in class activities that duplicate selected assessment
approaches and identify strategies for integrating assessment with
planning and instruction appropriate to the language proficiency of
students. Participants explore assessment research and theoretical
background for an understanding of the complexity of evaluating student
achievement. Conducted in English

POBS 2500B. Portuguese Overseas Encounters.
A critical analysis of some classic Portuguese travel writings from the
15th to the 20th century. The readings include Zurrara, Camões,
Fernã Mendes Pinto, História Trágico-Maritima, Ramalho Ortigão, Raul
Brandão, as well as the contemporary Pedro Rosa Mendes. Conducted in Portuguese

POBS 2500E. Portuguese Cultural and National Identity.
A critical reading of some key issues in Portuguese intellectual history
regarding Portuguese national identity. Classical authors such as Verney,
Antero de Quental, Teixeira de Pascoais, Fernando Pessoa, Antonio
Sérgio, and Eduardo Lourenço are read along with contemporary
theoretical works on the issue of cultural and national identity. Conducted
in Portuguese

POBS 2500F. Tales of the "Sertão".
The reality and mythology of the "sertão" have long been a source of
inspiration for Brazilian writers, visual artists, and filmmakers. This seminar
considers the transformations of the "sertão" motif since the second half
of the nineteenth century. Fiction by José de Alencar, Euclides da Cunha,
Graciliano Ramos and João Guimarães Rosa. Films by Glauber Rocha
and Sandra Kogut. Conducted in Portuguese

POBS 2500G. Nation and Narration.
The invention and transformation of the idea of Brazil as a nation narrative
texts since the middle of the 19th century. Manuel Antônio de Almeida,
José de Alencar, Adofo Caminha, Machado de Assis, Monteiro Lobato,
Mário de Andrade, Adalzira Bittencourt, Antônio Brandão, and João Ubaldo
Ribeiro. Theoretical texts by Benedict Anderson, Homi Bhabha, Edward
Said, Eric Hobsbawm, Frantz Fanon, Roberto Schwarz and others.
Conducted in Portuguese

POBS 2500H. The City and the Street: Tradition, Modernity and
Human Subjectivity in Brazilian Urban Literature.
From Machado de Assis’s streetcar chronicles, João do Rio’s belle-
époque flâneur crônicas, and modernists’ views of São Paulo down to the
urban paranoia of Rubem Fonseca’s crime narratives and the destabilizing
subjectivities of contemporary writers, this seminar examines diverse
urban bodies and cartographies for understanding spatial and temporal
relationships between the city and bodies, sexual cultures, gender roles,
violence, peripheries, and metropolitan apocalyptic tensions. Conducted in Portuguese
POBS 2500I. The Portuguese Essay: To study some key themes of Portuguese social, political and cultural life that have been dealt with in the essay form, in the 19th and 20th centuries, such as Portugal's decline, modernization, regeneration and national identity. Special attention to literature on the essay as a genre. Readings include Antero de Quental, Oliveira Martins, Silvio Lima, Joaquim de Carvalho, Antonio José Saraiva, Eduardo Lourenço and others. Conducted in Portuguese

POBS 2500K. Senses and Sensibilities in the Nineteenth Century Portuguese Novel. To work to be representative of the main literary trends in 19th century Portuguese literature. They will be analyzed with a focus on literary aesthetics, but also on meanings (or senses), both culturally and personally, by exploring the textual construction of emotions, i.e., the engagement of sensibilities in the written word. Authors to be studied include Almeida Garrett, Camilo Castelo Branco and Eça de Queirós. Conducted in Portuguese

POBS 2500L. Latin American Historiography (HIST 2971E). Interested students must register for HIST 2971E S01.

POBS 2600A. Medieval and Renaissance Portuguese Literature. An analysis of Portuguese literature from the Middle Ages to the 16th century. Special attention given to the poetry of the Cancioneiros, Fernão Lopes, Gil Vicente, and Luís de Camões. Conducted in Portuguese

POBS 2600B. Saramago and His Contemporaries. Focusing mainly on the "oeuvre" of José Saramago, the recently deceased Portuguese Nobel Prize winner. Four other well-known Portuguese writers (Vergílio Ferreira, Agustina Bessa-Luís, António Lobo Antunes, Lídia Jorge) are also studied as a way of contextualizing Saramago's work but, more importantly, for their own merit as outstanding novelists. Complementary readings will mostly consist of theoretical texts concerning an approach to contemporary novels based on the nexus between history and fiction on the one hand, and the construction of emotions in literature on the other. Conducted in Portuguese. Enrollment limited to 25.

POBS 2600G. Decolonizing Brazil: The Postcolonial Dilemma of "Not Being And Being Other". Considering the "ambivalent construction of the Brazilian's cultural existence" as the basic stance for reexamining Brazil from a revised postcolonial approach, this seminar will contextualize the Brazilian postcolonial from the viewpoints of diversity, difference, hybridity, and heterogeneity. Authors to be read are Manoel Antônio de Almeida, Machado de Assis, Adolfo Caminha, Oswald de Andrade, Graciliano Ramos, Samuel Rawet, Silviano Santiago, and Lygia Fagundes Telles. Conducted in Portuguese

POBS 2600I. Modern and Contemporary Brazilian Poetry. An intensive reading of selected Brazilian poets of the past eighty years, including Carlos Drummond de Andrade, João Cabral de Melo Motta, Mário Faustino, Paulo Leminski, Ana Cristina Cesar, the "concretistas", and Salgado Maranhão. Each student will be responsible for an oral presentation about an additional poet, to be chosen in consultation with the instructor. Conducted in Portuguese

POBS 2600M. The Word in the Dark: Passion, Quest and Identity in the Universe of Clarice Lispector. This seminar will examine the major novels, short story collections, and crônicas by the Brazilian writer Clarice Lispector and analyze the development of her literary voice and her unique use of language. Reading her work through and beyond the existential, feminist and poststructuralist views manifested in the best critical and theoretical analyses of her work, this seminar will focus especially upon her passionate struggle with language as well as her genre-breaking narratives, alongside her ontological quest for narrative subjectivity. Seminar presentations and papers will explore these issues with the aim of understanding Clarice's spiritual and philosophical impulses as well as her original linguistic contribution to Brazilian and World Literatures. Conducted in Portuguese

POBS 2600N. Transgressing Gender: Female Voicing in Modern Brazilian Literature. This seminar looks at theoretical and critical essays on gender and beyond in relation to the fiction of three major Brazilian female writers: Rachel de Queiroz, Lygia Fagundes Telles, and Clarice Lispector. Discussion addresses issues of gender identity and ambiguity, female voicing, gender politics, alterity, feminist consciousness, as well as power and resistance. Readings include two or more works by each of the three writers. Conducted in Portuguese

POBS 2600O. The Sage of Suspicion: Machado de Assis and the Agencies of Narrative. Novels and short stories of Machado de Assis within the context of the socio-political reality of nineteenth-century Brazil. Attention to the ideologies of Brazil's ruling class, its self-image and views on national identity, class and race; the issue of fiction vs. reality; and/or such topics as irony, symbol, and narratology. Conducted in Portuguese

POBS 2600P. Fernando Pessoa and Co. An analysis of key writings by the major Portuguese Modernist poet Fernando Pessoa, as well as by his more important heteronyms, particularly Alvaro de Campos, Alberto Caeiro, Ricardo Reis, and António Mora. The course will emphasize the recurrent themes of identity, divided self, meaning, disquietude, and displacement. Conducted in Portuguese

POBS 2700. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

POBS 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Public Policy and American Institutions

Director
Marion E. Orr

The A. Alfred Taubman Center of Public Policy and American Institutions influences local, national, and global policy makers through high quality research, teaching excellence, and a commitment to community service. The expansive nature of our undergraduate and graduate programs spans several disciplines — instilling strengths that benefit students in any field they pursue. Our alumni have become leaders and innovative change agents as they tackle the complex problems facing society today.

The center also encourages Brown University faculty and students to engage in research on important public policy problems. Engaged in an active research agenda, external grantsmanship, and community service, the current center faculty is pursuing this theme in a variety of different problem areas including urban policy, health care, education policy, law, and technology policy. The center periodically distributes the results of research conducted by its faculty and students. The center’s faculty has gained national recognition for its teaching excellence and high quality research.

For additional information, please visit the department’s website: http://www.brown.edu/academics/taubman-center/
Public Policy and American Institutions Concentration Requirements

Public Policy and American Institutions is housed in the A. Alfred Taubman Center, which is dedicated to teaching, research, and service in the areas of health care and social welfare policy, education policy, urban policy, law and criminal justice, and media and technology. Public policy refers to societal initiatives to remedy social problems. Because social problems typically emerge from complex, multi-faceted social conditions, the study of public policy requires students to become familiar with the insights of diverse academic disciplines into how institutions facilitate or inhibit societal problem-solving. The study of public policy is an excellent framework for integrating ideas drawn from several disciplines around issues of real world significance. Concentrators emerge with a sound understanding of institutional change and are well-equipped to contribute to processes of social change.

Required Courses:

Core courses:
- PPAl 0100 Introduction to Public Policy 1
- POLS 1050 Ethics and Public Policy 1
  or PPAl 1700T Good Government

Select one of the following:
- ECON 1110 Intermediate Microeconomics 1
- ECON 1130 Intermediate Microeconomics (Mathematical)
- EDUC 1130 Economics of Education I

Select one of the following:
- POLS 1600 Political Research Methods 1
- EDUC 1110 Introductory Statistics for Education Research and Policy Analysis 1
- ECON 1620 Introduction to Econometrics 1
- ECON 1630 Econometrics I 1
- PPAl 1200 Policy Analysis and Program Evaluation 1
  or EDUC 1160 Evaluating the Impact of Social Programs

Elective Courses: 1

- Two courses in American Institutions 2
- One course in global policy 1
- Two courses in policy problems 2

Total Credits 10

1 Two of the five elective courses must have a primary listing in Public Policy. One of the five elective courses must be designated as a writing course.

Honors

Candidates for honors should apply in the Spring term of their third year. Successful candidates will enroll in the Public Policy Colloquium and prepare a senior honors paper.

Public Affairs and Public Policy Graduate Program

The A. Alfred Taubman Center for Public Policy and American Institutions offers two graduate degrees: the Master of Public Affairs (MPA) and the Master of Public Policy (MPP). Each degree is a two year program building on a common core curriculum enhanced by field-area and skill-based coursework.

For more information on admission and program requirements, please visit the following website:

Courses

PPAl 0100. Introduction to Public Policy.
An overview of policymaking and policy analysis in the contemporary United States. The course begins with an examination of traditional justifications for government action. We will then examine the discipline of policy analysis that has arisen to design and evaluate public policies. We will also consider critiques of the rational method and ask questions about how policy expertise fits into the political system. The course ends with classic works on organizations and implementation. Not open to graduate students. WRIT

PPAl 0700A. Issues Facing Education Policy.
Students will analyze current policy problems in the American education system; these problems include those related to contemporary debates over standardized testing, equal access, and school choice. For first year students only

PPAl 0700B. Issues Facing Healthcare.
Examines major issue confronting policymakers who are attempting to create a coherent health insurance/healthcare delivery system. Students will analyze strategies various states are choosing to increase the medically indigents’ access to medical care while also containing costs

PPAl 0700C. Issues Facing Legal Policy.
Students will analyze contemporary legal questions that affect policy implementation and outcomes. Topics include constitutional challenges to recent laws passed, as well as the importance of the legal profession in shaping the creation, passage, and implementation of policy. For first year students only

PPAl 0700D. Religion and Public Policy.
Paying particular attention to Constitution’s religious liberty clauses, explores issue of religion in contemporary American politics. Debates and discovers ramifications of religious values and beliefs—often channeled through political or religious institutions—on American Democracy and public policy. Possible topics discussed include faith-based programs, abortion, embryonic stem-cell research, and homosexual marriage

PPAl 0700E. Race, Class, and Education.
How do race and class affect the educational experiences of different minority groups in the United States, and in what ways is racial stratification a self-perpetuating cycle? Exposes students to the experiences and obstacles currently faced by African, Asian, and Hispanic Americans, and considers the relationship between these experiences and public policies that affect educational achievements of these racial groups

PPAl 0700F. Issues Facing Our Cities.
Analyzed effective programs in dealing with urban issues such as education, employment, neighborhood renewal, brownfields, and economic development.

PPAl 0700I. Examining Social Policy Issues through Contemporary Fiction.
This course examines how contemporary novelists are addressing poverty, homelessness, mental illness, race relations, domestic abuse, and other important social issues. Students will employ a “problem definition” framework to consider the way that novels “typify” social problems by making claims about their scope, severity, and causation, as well as the attributes of “afflicted” groups and individuals

Who determines how public policy is made? Do public policies reflect what voters want, or do lobbyists, politicians, and bureaucrats really make the decisions? What factors motivate these different actors? This course examines public policy from the perspective of comparative politics. Over the course of the semester, we will examine policy making in the US and a number of industrialized countries in Western Europe and Japan. Topics studied include immigration policy, education policy, and family policy. Enrollment limited to 20 first year students. FYS WRIT

PPAl 1170. The Criminal Justice System in Rhode Island.
An examination of criminal justice issues using social science tools and traditional methods of reporting and interviewing. Assignments focus on Rhode Island’s criminal courts. Which cases get carried forward for
prosecution, and why? What factors explain the differences in sentences for various crimes? Prerequisites: PS 1, PS 10 or EL 19

Broad overview of public policy analysis and program evaluation with emphasis on methodological issues involved in the analysis and assessment of government programs. Illustrations are drawn from a variety of substantive policy areas. Prerequisite: PPAI 0100, and POLS 1600 or EDUC 1110 or SOC 1100 or ECON 1620, or written permission of instructor. Enrollment limited to 40 Political Science and Public Policy concentrators

Analyzes the institutions and policy-making of several countries. Includes an analysis of education policy, health policy, and social welfare policy

PPAI 1510. The Corporation, Law and Society.
The corporation is perhaps the most ubiquitous form for doing business in the world today. From the local dry cleaner to the largest multinational, corporations touch nearly every aspect of our economic, social and political lives. This course will introduce students to the corporation as a legal and an economic entity. Topics explored will include the historical evolution of the corporation form, economic and legal theories of the firm, the corporation as a "legal person," the financial structure of the corporation and corporate governance. We will also examine some of the ways the corporation acts in the world, including corporate speech, corporate philanthropy and corporate engagement with political and regulatory processes at the national and global levels. Finally, we will look at various attempts to limit corporate size, power and influence through traditional means such as anti-trust and anti-takeover regulation, as well as more recent strategies to encourage corporate social responsibility through voluntary codes of conduct

We will examine some of the major theories of economic development and the legal mechanisms used to implement those theories around the world since 1945. Our focus will be on the role of legal frameworks in the creation of markets and the distributional consequences of such frameworks on social welfare. Using a comparative approach, we will look at how general economic ideas often result in different policy strategies and how similar legal institutions often produce different economic results. We will also explore the impact of social context on the development effects of particular theories, policies, and institutions. Finally, we will analyze some of the institutional choices available to policymakers in particular contexts and how these choices profoundly transform economic and social welfare in such contexts. No background in legal or development studies or economic theory is required, but some familiarity with some or all of the foregoing would be helpful

PPAI 1560. Prediction, Planning and Policymaking in the Information Age.
This course encourages and helps students think in systematic, multi-dimensional, and creative fashion regarding the contemporary era and immediate future. As the current "Information Age" is characterized by the creation, transmission, and (re)processing of information, the course’s central purpose is to provide cognitive tools for orderly, future-oriented thinking (i.e. prediction and planning), regarding the social impact of communications (computer-based communications) and related technologies (e.g. nanotechnology, cybernetics, biotechnology) based on current and foreseeable trends. We shall survey prediction methodologies, discuss the interaction of values and technology, analyze characteristics of the "Information Age," and assess important trends in "new media" - all through the prism of dilemmas facing public policymakers specifically and democracy in general.
No prerequisites. Limit 50 students (preferably students with interdisciplinary academic background: courses from two humanities / social / natural sciences)

PPAI 1700A. Issues Facing Our Cities.
This course is designed to provide students with an understanding of the nature and causes of urban problems, and of some of the solutions that have been designed to address them. The course will begin by exploring urban problems such as poverty, homelessness, and crime. It then will review and evaluate different public and private responses designed to address them.

PPAI 1700B. Social Welfare Policy in the United States.
Exposes students to the key challenges for social welfare policy-making in the United States. Particular attention will be given to the formulation and administration of prominent welfare, health, and education policies. Course materials also will explore how demographic and economic trends affect the implementation of social welfare policies. Instructor permission required.

PPAI 1700C. The Internet and Public Policy.
Explores policy issues involved in technology, the internet, and other digital developments. Students will study how technology policy is formulated, how issues of privacy and security are handled, and how technology policy affects society and politics

PPAI 1700D. The Economics of Health Policy.
Applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences particular to health. The demand for health and medical care are examined theoretically and empirically. The competitiveness of these markets, the relationship with health insurance, and the role of government are explored

PPAI 1700E. American Housing Policy.
Examines U.S. public and private sector policies that affect the provision and distribution of housing to the American population. We consider the national, state, local and private sources of housing policies, the historical development of such policies, and some of their most significant consequences, including home ownership, urban sprawl, income and racial segregation, and homelessness. Comparisons with other systems will be made

PPAI 1700F. Economics and Public Policy.
An economic analysis of major social programs in the United States. Topics include the possibility of market failure in the private sector, the redistribution of income, and incentive effects created by the programs. Specific policy issues to be examined are welfare reform, Medicaid, school finance reform, and the Earned Income Tax Credit (EITC). Enrollment limited to 20

PPAI 1700G. Education Policy Challenges.
An in-depth look at education system. Analyzes current education policy problems, including contemporary debates over standardized testing, equal access, and school choice. Enrollment limited to 20. Instructor permission required

PPAI 1700H. Family Law and Policy.
A seminar exploring how the family is defined and regulated by the legal system and through public policy. Focuses on how well legal definitions of families coincide with the realities of modern American families, the role of the judiciary in constructing family policy, and the interaction between private family life and public rules. Topics include marriage, divorce, adoption, and reproductive technology

PPAI 1700I. Fiscal Federalism Policy
Issues in government spending and tax policy specific to federal systems with central, state, and local governmental units. Conceptual topics include the normative assignment of fiscal responsibilities within federal systems and the equitable distribution of income. Specific policy areas include welfare, education, and the taxation of internet commerce

PPAI 1700J. GIS and Public Policy.
An introduction to the theory and practice of social science Geographic Information Systems (GIS) as applied to public policy analysis. Topics include: the geographical basis of policy issues, spatial mapping, and the use of ArcView software to study policy problems

PPAI 1700K. Health Policy Challenges.
Introduces students to the U.S. health care system. Focuses on how the organization, financing, and market structure of the system affect the key issues of access, cost, quality, and equity of care. Specific issues include minority and vulnerable populations, technology, risk adjustment, managed care, long-term care, ethics, and public health. Enrollment limited to 20 juniors and seniors
PPAI 1700L: Issues Facing Health Care.  
When people think of "health" policy, they often think of policy issues that are related to "medical care". This course focuses on the social, environmental, and political factors that shape "public" rather than "individual" health. It uses public health topics to illustrate the basic fundamental problems of the politics of regulation and social policy.

PPAI 1700M: Law and Public Policy.  
The role of courts in social reform with special attention to the institutional limitations of adjudication and problems in implementing policy through the judiciary. The concept and practice of "public interest law" is examined in detail in the context of such issues as managing mental institutions, schools, and the welfare system. Enrollment limited to 20.

This course combines an introductory overview of the current American legal system with a look at the history, philosophy, and structure of the federal constitution and government, with particular emphasis on issues such as federalism, judicial review, separation of powers, and the commerce clause in United States Supreme Court jurisprudence. Students will be expected to read, analyze, and be prepared to discuss critically the assigned reading, including the case law and other legal materials, for each weekly class. Each class will be conducted as a seminar and taught via the Socratic Method used in many law schools.

Through a thorough examination of political parties, interest groups, the judiciary, Congress, elections, the media, the presidency, and the bureaucracy, provides students with a clear understanding of the forces that shape public policy in modern America.

PPAI 1700P: Social Science Data Technologies.  
Provides advanced training in the principle methods of data analysis across a range of substantive areas. Students will gain technical competence utilizing a variety of online internet research and data mining tools and stand alone software including but not limited to SPSS, Excel, Access, and ArcView (GIS).

PPAI 1700Q: Urban Policy Challenges.  
Uses theoretical readings and case studies to consider a variety of public policy issues related to American cities including: the commercialization of the nonprofit sector, tax exemption, charitable choice, and the role of nonprofit organizations in political advocacy.

Explores policy issues facing cities today and examines how the public, private, and nonprofit sectors have mobilized in selected cities to address these issues. Topics include jobs and economic development, education, public safety, and regional approaches. Focuses on The Providence Plan, a joint city-state revitalization initiative designed to address the problems of urban poverty. Comparisons with similar programs in other cities.

Examines sociological and economic factors and current policies contributing to conflict between caring and earning which affects working families in the U.S. Investigates dynamic landscape of the American family and costs of providing and caring for family members. Considers government's and employers' roles in shaping policies, cross-national comparison of American policies with other leading nations, and links between policies and outcomes. Enrollment limited to 20.

PPAI 1700T: Good Government.  
An applied ethics course specifically for students with backgrounds in Public Policy, it will emphasize the primary themes of good government: openness, deliberation, and integrity. Students will develop an essay on good government and do research for case studies of ethical dilemmas involving public servants. Prerequisite: POLS 0100 (or equivalent).

Instructor permission required.

PPAI 1700U: Communications, Advocacy and Public Affairs.  
Teaches students about communication strategies and tactics for affecting social change, and examines how individuals and organizations frame issues and execute campaigns in order to change policy.

PPAI 1700V: Nonprofit Organizations.  
Contemporary nonprofits and their role in community building and shaping public policy are central to this course. Topics include how strong coalitions impact housing, welfare and children's policy, organizing empowered communities, the influential and engaged donor and building the value of nonprofits. Case studies will be featured and new nonprofit models will be conceptualized to strategically address critical human need. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in Public Policy.

PPAI 1700W: Privacy in Networked Society.  
Covers philosophical, legal, and pragmatic issues surrounding privacy in a media-saturated and technologically-intense world. Examines the complex issues surrounding privacy from ethical, political, economic, and legal perspectives. Analyzes national government, domestic regulatory agency, and individual company responses (or lack thereof) to these issues and discusses potential future responses. Instructor permission required.

PPAI 1700X: Social Movements and Ethnic Conflicts.  
Social movements are organized as collective efforts to promote or to resist change in society that rely, at least in part, on non-institutionalized forms of political action (e.g. demonstrations, riots). Our study of collective action will draw principally from research in political science and sociology and may include (among others) the civil rights, environmental, and religious movements.

PPAI 1700Y: Crisis Management.  
Introduces future policymakers to the multifaceted decision-making process in which governments, businesses, advocacy organizations, and the public are thrust into the throes of a crisis. Various crisis management theories, key stakeholders in a crisis situation, and the positive and negative effects of various strategies are analyzed. Enrollment limited to 20 junior and senior concentrators in Public Policy.

PPAI 1700Z: State and Local Government.  
Examines state and local politics and government in the United States. The first part of the course examines the historical underpinning and division of power of the major political actors, institutions, and processes through both institutionalist perspectives. The second part focuses on the role of states in shaping significant policy areas including civil unions, education, healthcare, welfare, and the environment.

PPAI 1701B: Public Organization and Management.  
The aim of this course is to approach public sector organizations from a theoretical and systematic point of view in order to understand the proper function and role of public organizations in our society, and examine important conditions and factors required for effective public organization management. The boundary between the public and private sector is discussed as well as similarities and differences between the two. Also, challenges originating from the characteristics of our Knowledge-Information Society are discussed, along with potential solutions to address them. There are no specific prerequisites for the course; however, some essential knowledge in microeconomics and American government system is recommended. In case the course is oversubscribed, the enrollment preference would be determined by the student’s class standing and the areas of study.

PPAI 1701C: Corporate Power and Global Order: Regulation and Policy in the Transnational Economic Sphere.  
This course introduces students to the legal architecture of the global trading system. In the first part, we will explore some of the diverse legal regimes that shape and are shaped by the behavior of transnational economic actors, with attention to the perspectives of transnational regulators, corporate managers, and activists. In the second part, we will look at basic trade theory and concepts as well as the GATT/WTO regime. Finally, we will consider case studies presenting complex business/social/policy problems from perspectives gained in the course. Students will be assigned to groups and asked to select a case study topic during the first week of class. In the final class, student groups will present their case studies to the class for analysis. Some knowledge of trade theory, international law and institutions and/or business theory would be helpful but is not required.
A “silver tsunami” is coming. Soon 20% of US residents will be over the age of 65. Governmental policy makers and business leaders are scrambling to adapt as the aging population reshapes the demand for services and products and threatens to unravel the social safety net. This course will investigate the aging wave, analyze its impact on both private and public organizations through case study review, and consider implications for future management and policy. Emphasis will be on “social entrepreneurship” - practical solutions and their implementation within organizations. Enrollment limited to 20, preference given to graduate students, public policy concentrators, and seniors

This course will be taught at two sites simultaneously: Taubman Center for Public Policy and Tougalo College Center for Civic Engagement and Social Responsibility. At Brown, the course will be an Independent Reading & Research course with a difference, under Prof. Geri Augusto. At Tougalo, the course will be taught by Profs. Stephen Rozman and James Stewart. Students taking the course will be expected to work on their own, meeting for discussion three-four times a month, time and place to be mutually determined. The class will also meet informally with the instructor twice a month. Central to the course will be engagement in a semester-long, cross-campus Brown-Tougalo dialogue on local/regional political cultures and new electronic practices around voting and campaigning, via this MyCourses page, three scheduled video-conferences, and other modalities to be determined by students themselves. Assigned interdisciplinary course readings (to be read by students on both campuses) will inform electronic communications between the two groups of students, helping them explore the intersection of local political cultures, political action, public policy issues, civic engagement, new practices of cyberpolitics (blogging, viral networking, etc.), and the 2008 presidential election, as well as uncover areas of convergence and divergence between the two localities. Course open to juniors and seniors in Public Policy. Students from other departments and centers welcome, as space permits. Enrollment at Brown will be limited to 8 students. Written permission required. (More information in MyCourses or e-mail Geri_Augusto@brown.edu)

PPAI 1701F. How Lawyers Think: Lessons in Reading, Reasoning and Rulership from American Legal Thought.
American society is, perhaps more than any other, shaped, managed and governed by lawyers. As with other disciplines, like economics, political science, sociology or literary studies, expertise in law is gained through mastery of the unique techniques, practices and analytics of the discipline. These techniques, in turn, shape how lawyers think, see the world, imagine possibilities and obstacles, make policy and engage in professional life. In this course students will be introduced to some of the most significant techniques of reasoning, interpretation and argumentation developed in the American legal academy since the late 19th century, and will also further these techniques both emerged from and helped shape legal and policy responses to some of America’s biggest governance challenges, including economic concentration and corporate power, the welfare state and the New Deal, the dismantling of Jim Crow and the protection of civil rights, and the emergence of identity politics. The course is designed to introduce students from other disciplines to legal analysis as a disciplinary practice and presumes no prior legal study.

PPAI 1701G. Science and Technology Policy in the Global South.
Using theoretical ideas and empirical examples, this seminar explores from a variety of perspectives the relationships among science, technology, society, and public policymaking in the Global South. Bridging public policy and science studies, the seminar introduces a more internationalized perspective on science and technology governance, and enhances capacity for effective policymaking practice. Students will be graded on three writing assignments; participation in a web-based roundtable with counterparts in Brazil, South Africa and/or India; and class participation. Enrollment limited to 20 juniors and seniors; others welcome with instructor’s permission. WRIT

PPAI 1701H. Congressional Leadership, Parties and Public Policy.
Focuses on the Congressional leadership, parties in Congress and their impact on political interactions, and public policy. The course will examine the relationship between the leadership in the Congress and the powerful elements in the House and Senate such as committee chairmen and the party caucuses as well as the media and lobbyists. Emphasis is on the decades long trend toward greater political polarization and its impact on the ability of the institution to respond effectively to address critical national priorities such as the federal debt, health reform immigration, nuclear proliferation and global warming. Enrollment limited to 20 juniors, seniors and graduate students

No description available. Enrollment limited to 20

PPAI 1701J. Policy Implementation.
Why do well-intentioned policies sometimes produce unfortunate results? This course will examine how policies designed by elected officials, bureaucrats, and courts are translated into practice through implementation, how why public policies succeed or fail to produce changes in practice, and how policy implementation bears on democratic governance. The course will consider policy implementation across policy domains, with recurring attention to k-12 education policy. Enrollment is limited to 20

PPAI 1701K. Governance in the Academy: A University at Work in the 21st Century.
Focuses on understanding and evaluating the governance of the modern university. Brown will be used as one example to illustrate and illuminate various aspects of university governance. Themes of leadership, effective decision-making, priority-setting, planning, conflict and crisis management, and optimal organizational structure and behavior will be discussed. Students will be well-versed in the language, structure, roles of actors, and general operations of university governance and equipped to analyze and assess the strengths and weaknesses of various models. Students with an interest in pursuing a career in academia or other non-profit organizations will benefit from this course. Enrollment limited to 20 juniors and seniors

PPAI 1701L. Comparative Institutional Decision-Making.
Designed to introduce students to issues of bureaucratic politics and policy making in comparative perspective. The premise of this class is that thinking about the role of the bureaucracy is crucial to any theory of how modern democracy should work, as well as to our understanding of how many different modern democracies do work. Enrollment limited to 20 juniors, seniors, and graduate students in Public Policy and Political Science

PPAI 1701M. Juvenile Justice Institutions and Policy.
Examines the historical and legal development of the juvenile justice system and provides an overview of delinquency theory. These frameworks are used to study the major institutions and current policy issues in the juvenile justice system. Special topics include teen and family courts, age of jurisdiction, racial disparities in juvenile justice, and female delinquency. Students engage in a semester-long project to develop a policy brief addressing a current issue in juvenile justice. Enrollment limited to 20 juniors and seniors. Instructor permission required

The course will combine an overview of the current Americal legal system with an introductory look at the rights protected under the Due Process and Equal Protection Clauses of the United States Constitution, with particular emphasis on privacy, economic rights, abortion, sexual orientation, voting rights, and racial and gender classifications in United States Supreme Court jurisprudence. Students will be expected to read, analyze, and then be prepared to discuss critically the assigned reading and legal materials for each weekly class. Each class will be conducted as a seminar and taught via the Socratic Method used in many law schools

PPAI 1701O. Labor Market Policy.
Students will learn how to use basic economics models to analyze important labor market policy questions. Topics will include minimum wages, payroll tax cuts, training subsidies, unemployment insurance, negative income taxes, and others. Students will also learn how to find and interpret important labor market data (for example, unemployment
rates, payroll employment numbers, and wages) which are used by policy analysts to evaluate local and national labor markets. Prerequisite: ECON 1110, ECON 1130, or EDUC 1130; or instructor permission. Enrollment limited to 20

PPAI 1701P. Inequality, Poverty, and Public Policy in the United States.
The course uses a multi-disciplinary social science approach to examine the intersections of racial and gender inequality, poverty, and public policy in the United States. The course is an advanced reading seminar that explores various approaches to theorizing, measuring, and researching poverty and inequality. The course also critically examines the role of historic public policies in reinforcing existing inequalities and evaluates policies and strategies to reduce poverty and inequality. Enrollment limited to 20 juniors and seniors. DVPS

PPAI 1701Q. Leading Social Ventures - Social Entrepreneurship in Action.
Intractable social problems across the globe demand new, impactful solutions. Social entrepreneurs, driven by passion to change the world, fuse social missions and savvy business practices to create enterprises that solve these complex challenges. Leading Social Ventures is designed for students who are leading social ventures or aspire to create and lead them. "Action learning" means students will apply educational content to a specific venture in the early stage of development. Students will work on a venture that they have created or select an existing early-stage venture among provided choices. Enrollment limited to 25

PPAI 1770. Public Policy and Higher Education.
Examines federal and state policies in education, their intersection, and their impact in the U.S. on higher education. Major topics include the organization and funding of higher education in the U.S., the evolving federal and state roles in education, and recent reform movements. Ends with a review of the emerging public agenda for education and the policy changes called for or likely to occur

PPAI 1910. Social Entrepreneurship.
This course introduces students to social innovation and social entrepreneurship and engages them in identifying significant issues, problems and solutions that drive social change. It helps students understand the competencies that are needed to be a transformative social entrepreneur and proven tools and strategies to create high performance, high impact entrepreneurial enterprises that offer bold solutions to complex contemporary problems. It highlights unique models of social enterprise from strictly non-profit, through those developing products or services that produce revenue in support of a social goal, to socially responsible for-profit companies. It emphasizes how enterprises are created and sustained. Enrollment limited to 50. Not open to students who have taken ENGR 1930Q

PPAI 1970. Independent Reading and Research.
Supervised reading or research. Specific program arranged in terms of the student's individual needs and interests. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

PPAI 1971. Independent Reading and Research.
See Independent Reading And Research (PPAI 1970) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

PPAI 1990. Public Policy Colloquium.
An advanced two-semester research seminar for senior honors candidates in the public policy and American institutions concentration. Participants jointly consider strategies appropriate to researching and writing a senior paper before proceeding to individual research on topics they choose. Each participant is required to present a summary of his or her work to the colloquium

See Public Policy Colloquium (PPAI 1990) for course description

Studies how political, social, and economic institutions structure policymaking. Covers a variety of policy areas such as education, health care, technology policy, welfare, and social policy

Examines issues in government spending and tax policy. Conceptual topics include the normative assignment of responsibility with federal systems and the equitable distribution of income. Specific policy applications are covered

Explores how organizations use budgets and management tools to achieve broader social, economic, and political objectives. It is designed to show how these techniques can be used to improve organizational performance

PPAI 2030. Statistics.
Covers social and economic statistics and their role in public policy research. Among the topics explored are descriptive and inferential statistics, measurement, sampling, and multivariate analysis. Open to graduate students in Public Policy or Political Science

PPAI 2035. Statistics II for Public Policy Analysis.
The course introduces students to the use of multiple regression analysis and program evaluation for analyzing data in the social sciences. We will study a variety of designs for empirical public policy analysis, from random assignment to quasi-experimental evaluation methods, and students will have the opportunity to analyze actual datasets. We will also study the strengths and weaknesses of alternative evaluation strategies

PPAI 2040. Policy Analysis.
Investigates policy analysis and program evaluation with emphasis on assessment of government programs

PPAI 2050. Program Evaluation.
Designed to equip graduate students with the knowledge and tools needed to become critical consumers of evaluation research and to conduct evaluations of various social programs and policies. Following an introduction to the field of program evaluation, the course will address specific topics including: logic models, process evaluations, experimental and quasi-experimental designs for outcome evaluations, and alternative data sources. Class discussions and assignments will utilize evaluation examples from a variety of substantive policy areas. Prerequisite: PPAI 2030. Open to graduate students only

Graduate seminar exploring how organizational, political and professional cultures shape policymaking and implementation; how policymakers and practitioners acquire policy-relevant knowledge and frame issues for public action; and how policy is made and implemented in complex interactive systems. Draws on instructor’s own public policy experience in U.S. and southern Africa. Readings are transdisciplinary, and both U.S. and international. Seminar provides thorough grounding in key organization theories, while enhancing capacity to act across boundaries. No prerequisites. Reserved for graduate students in Public Policy and Public Affairs. Advanced undergrads and graduate students from other departments may apply for permission from the instructor. Enrollment limited to 30

PPAI 2150. Strategic Communication.
Teaches students communication skills for social change, and examines how individuals and organizations frame issues in order to effect change

PPAI 2170. Leadership and Organization.
Leadership is an integral part of-and integral to-the policy process. Teaches students how to lead policy organizations effectively and efficiently, giving them the knowledge and skills necessary to conceive, sell, and implement policy. A review of effective leadership gleaned from historical and contemporary examples serves as a reservoir of knowledge from which students will draw throughout their careers

PPAI 2200. The Political Economy of Punishment.
Examines a range of policy issues raised by the necessity to punish those who violate a society’s laws. Draws on studies in economics, sociology, criminology, and political science to explore such topics as the death penalty, the ‘war on drugs’, gun control, and racial disparities in criminal participation, victimization, and punishment

Analyzes domestic and global issues related to American national security policy. Issues examined include the evolution of national security strategy
since World War II, homeland security, economics of national security, the intelligence community and intelligence reform, counterintelligence, responses to terrorism, weapons of mass destruction, unilateralism vs. multilateralism, and economic espionage

PPAI 2300. Educational Policy: Perspectives from Developing Countries.
This graduate-level course will examine substantive education policy issues from a developing country perspective. It also provides advanced training in the tools and methods for conducting impact evaluations of educational policies and programs within the context of developing countries in Asia, Latin America and Africa. Prior coursework in statistics and/or econometrics as well as microeconomics is required. Enrollment limited to 20 graduate students. Instructor permission required

PPAI 2350. Thinking, Planning and Acting Strategically.
This course will focus on the strategic trends and issues which impact the public and nonprofit sectors and the role of strategic planning and strategic thinking as fundamental tools of public and nonprofit institutions to build high performance organizations, increase the value of their programs and services and enhance problem-solving. This course has been designed to support students in acquiring a mastery of practical skills in strategic planning and strategic thinking

PPAI 2540. Urban Economic Policy.
This course will introduce students to the economic analysis of urban policy. We will use economic theory to analyze why cities exist, where they develop, how they grow, and how activities are spatially arranged within urban areas. As we ask each of these questions, we will examine how public policy can influence the outcome and review empirical evidence. As time allows, we will also examine the economics of poverty, housing, and other issues within the urban context. Prerequisite: PPAI 2010 or instructor permission

PPAI 2550. Managing and Leading in Public Affairs.
Examines issues related to leading and managing in the realm of public affairs, covering foundation topics such as: honor, ethics, and accountability; management and organizational theory; organizational behavior; managerialism, performance, and strategic management; leadership; personnel management and social equity. Examining tools for effective relationship and networking building, cases will be used to apply concepts learned

PPAI 2600. Social Science Data Technologies.
Covers the applied use of data sources and computer software programs. Its goals are to teach students how to use common software packages and access policy-relevant data

Focus is on the federal budget process, political interactions, and public policy outcomes. The budget represents nearly one-quarter of GDP making those decisions central to the functioning of our democracy and the health of our economy. Emphasis is on the Congressional budget process, appropriations process, and revenue decision-making because the Constitution establishes Congress as the guardian of the nation’s purse strings

PPAI 2660. Political Advocacy: Interest Groups, Lobbying and Political Influence in the U.S.
Will examine political advocacy by interest groups in the American political system. We will review theoretical and empirical research on how groups mobilize, interact with one another, and seek to influence electoral politics and policymaking. Throughout the course, we will ask whether organized interests facilitate or undermine the process of democratic politics. Prerequisite: PPAI 2000. Enrollment limited to 20 graduate students in Public Policy

Corruption can distort the behavior of both elected politicians and appointed bureaucrats. In this course, we study how—withina democracy—corruption affects who is elected and appointed to government, what policies they pursue, and how those policies are implemented. Empirical examples are drawn from the US and Europe historically and from the present-day developing world. Enrollment limited to 20 graduate students in Political Science and Public Policy

PPAI 2700. Advanced Organizational and Management Strategies.
This discussion-intensive graduate-level seminar focuses on a wide range of contemporary theories and practices in organizational and management strategies. Topics include organizational structure and design, communication, culture and diversity, change management, stakeholder relations, long-term strategic planning, as well as workforce development and leadership identification, development and succession strategies. Course assignments include team-developed reports and oral presentations. Enrollment limited to 18 Public Policy graduate students and junior and senior Public Policy concentrators; other students by instructor permission

PPAI 2750. Mediation, Negotiation, and Arbitration Strategies.
This graduate-level seminar is a synthesis of negotiation, arbitration, and mediation theories and practices as applied to public policy professionals. Course topics include interagency negotiation and cooperation, professional and workplace negotiations, agreements in legislative and advocacy environments, using non-governmental bargaining partners, role of government regulators, and international and cross-cultural agreements. Emphasis on analysis of ethical issues and strategies in the planning, formulation, and implementation of negotiated agreements. Enrollment limited to 16. Instructor permission required

A greater understanding of the moral dimensions of public policy can improve the assessment of policy alternatives. Course begins with a brief overview of various ethical theories, with particular attention given to distributive justice and utilitarianism. Uses a variety of domestic policy case studies to identify and examine the role of ethics in policy analysis and policy choice. The latter part of the course will discuss the ethical conduct and responsibilities of policy professionals. Open to graduate students only

PPAI 2800. Internship.
Practical job experience in the public, private, or non-profit sector

PPAI 2900. Research Workshop.
Group research projects centering on topics organized by the instructor. Students will be organized into small teams that will undertake research projects such as policy analysis, evaluation studies, organizational assessments, or data projects. Results of these projects will be presented in the seminar

PPAI 2980. Graduate Independent Study.
Please check Banner for the correct section number and CRN to use when registering for this course

PPAI XLIST. Courses of Interest to Concentrators in Public Policy.

Fall 2012
The following courses, listed in other departments, may be of interest to Public Policy concentrators. Please check the course listings of the sponsoring department for times and locations.

Economics
ECON 1110 Intermediate Microeconomics
ECON 1620 Introduction to Econometrics
ECON 1629 Applied Research Methods for Economists
ECON 1630 Econometrics I

Education
EDUC 1110 Introductory Statistics for Education Research and Policy Analysis
EDUC 1130 Economics of Education I
EDUC 2330 Urban Politics and School Governance

Sociology
SOSC 1100 Introductory Statistics for Social Research

Spring 2013
The following courses, listed in other departments, may be of interest to Public Policy concentrators. Please check the course listings of the sponsoring department for times and locations.

Economics
ECON 1110 Intermediate Microeconomics
ECON 1130 Intermediate Microeconomics (Mathematical)
ECON 1620 Introduction to Econometrics
ECON 1630 Econometrics I

Education
EDUC 1160 Evaluating the Impact of Social Programs
EDUC 1650 Policy Implementation in Education

Political Science
Center for the Study of Race and Ethnicity in America

Assistant Director
Hilda Llorens

Established in 1986, the Center for the Study of Race and Ethnicity in America was one of the nation’s earliest academic centers dedicated to research, scholarship and academic exchanges in the field of Ethnic Studies. In 1996, CSREA became the home for Ethnic Studies at Brown University.

One purpose of the center is to develop resources for research and teaching in the area of race, ethnicity, and class. A particular focus of the center is on interdisciplinary and comparative study of non-European groups in America, with particular reference to African Americans, Asian Americans, Latinos, and Native Americans. The center also encourages interdisciplinary and comparative research on issues of race and ethnicity among ethnic minorities in other countries.

A second purpose of the center is to inform the University community about research on race and ethnicity. Toward that end, it sponsors a faculty seminar series, workshops, public lectures featuring distinguished scholars, and conferences; produces publications that are disseminated both locally and nationally; engages in joint activities with community organizations, student groups, scholars outside Brown, and learned societies; and participates as a member institution of the Southern New England Consortium on Race and Ethnicity.

A third purpose of the center is to encourage research development and participation in the research process. It does so by collaborating with other academic departments and institutions on interdisciplinary research projects, and by providing small research grants to faculty and graduate and undergraduate students.

For additional information please visit the Center’s website at: http://www.brown.edu/academics/race-ethnicity/

Ethnic Studies Concentration

Requirements

Ethnic Studies is an interdisciplinary, comparative concentration that examines the construction of race and ethnicity in social, cultural, historical, political, and economic contexts. Concentrators develop individual programs based on areas of focus in consultation with faculty advisors, drawing from courses in the humanities and social sciences. Typical areas of focus are social issues (such as inequality, education, or health), cultural production and the representation of racial groups, processes of racialization, the historical formation of transnational communities and of diaspora, and the history of particular ethnic or racial groups. The concentration is supported by the Center for the Study of Race and Ethnicity, a research center that facilitates teaching, research, and programming on issues relevant to biracial and multiracial peoples, and emphasizes the interdisciplinary and comparative study of race, ethnicity, gender, and class.

Each concentrator is required to study the history and experience of more than one group. The focus may be either a United States–based comparative analysis or a United States/international analysis. Each program is to be organized around a set of core courses that help students to identify a set of historical and theoretical questions to be investigated and provide the tools necessary to address those questions.

Each concentrator pursues work in either literature and arts, the humanities, or the social sciences, or some combination of these. The work is to be systematic and well-defined. A faculty advisor works closely with the student to ensure that the work is rigorous and intellectually sound. The primary advisors for ethnic studies concentrators are the members of the Ethnic Studies Executive Committee.

Courses taught by core Ethnic Studies faculty may be recognized in consultation with concentration advisor.

Three approved courses in the ethnic studies that addresses the student’s focus area.

Three courses drawn from a list of related courses.

A course from the ENTH 1900 series.

Total Credits 10

1 To be taken in the first semester of the student’s final year. The senior seminar is the capstone course and is required of all concentrators.

Honors

Candidates for honors must have at least a B+ average in the concentration and be approved by the Concentration Committee. Honors candidates will propose a thesis project to be completed by the end of their final semester. The development of a thesis project will begin during the sixth semester. Honors candidates will have two readers, at least one of whom must be Ethnic Studies core faculty.

Concentrators who choose not to request consideration for honors will be required to complete a major essay or project by the end of their final semester. The essay or project can be the result of major work completed in the senior seminar.

Students seeking information about the Ethnic Studies Program or in need of advising should contact the Center for the Study of Race and Ethnicity in America (401-863-3080).

Courses

ETHN 0066L. Beyond World Music: Singing and Language (ANTH 0066L).
Interested students must register for ANTH 0066L S01.

ETHN 0090A. The Border/La Frontera.
No description available. Enrollment limited to 20 first year students. WRIT ETHN 0091. An Introduction to Africana Studies (AFRI 0090).
Interested students must register for AFRI 0090 S01.

ETHN 0100. Introduction to Cultural Anthropology (ANTH 0100).
Interested students must register for ANTH 0100 S01.

Interested students must register for SOC 0130 S01.

ETHN 0190C. American (Mass)culinities: Sexuality, Race and Aesthetics (AMST 0190C).
Interested students must register for AMST 0190C S01.

ETHN 0190E. It’s the End of the World As We Know It: Zombie and Apocalypse Narratives in Pop Culture (AMST0190E).
Interested students must register for AMST 0190E S01.

ETHN 0190F. Beyond the Tourist Trap: The Past, Present, and Future of Asian American Urban Spaces (AMST 0190F).
Interested students must register for AMST 0190F S01.
ETHN 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States (AMST 0190G).
Interested students must register for AMST 0190G S01

ETHN 0190Q. Ethnic Eats: Immigration, Identity and Americanization through Food (AMST 0190Q).
Interested students must register for AMST 0190Q S01

ETHN 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy (AMST 0190X).
Interested students must register for AMST 0190X S01

ETHN 0200U. Black to the Future: Yesterday and Tomorrow in Ethnic American Literature (ENGL 0200U).
Interested students must register for ENGL 0200U S01

ETHN 0201G. Killing them Softly: Satire and Stereotype in African-American Literature (ENGL 0201G).
Interested students must register for ENGL 0201G S01

ETHN 0210. Blacks in Latin American History and Society (AFRI 0210).
Interested students must register for AFRI 0210 S01

ETHN 0270. Introduction to U.S. Latinas/os History.
This class will focus on the of people of Latin American descent (Latinas/os) living in the region known today as the United States. Our focus will include watershed moments as well as important themes including land dispossession, immigration, segregation and discrimination, community and identity formation, and racialization. No prerequisites are required

ETHN 0300. Ethnic Writing.
This course will explore the idea of "ethnic writing" in both theory and practice. Students will examine how writers draw upon race and ethnicity (not always their own) to produce creative works and will then put these ideas in practice in their own writing, including but not limited to fiction, poetry, memoir, and inter-genre work. Interested students should attend the first session prepared for an in-class exercise that will determine attendance. Enrollment limited to 17. Instructor permission required. S/N/C

ETHN 0301. Culture and Health (ANTH 0300).
Interested students must register for ANTH 0300 S01

Interested students must register for EDUC 0410D S01

ETHN 0500. Introduction to American/Ethnic Studies.
Considers the U.S. as a society whose unifying identity is rooted in ethnic and racial diversity. Explores the historical and contemporary experiences of racial and ethnic groups in this country and analyzes different forms of representation of those experiences, as well as representations of the racial and ethnic stratification in the U.S. imagination

ETHN 0510F. Che Guevara, The Man and the Myths (COLT 0510F).
Interested students must register for COLT 0510F S01

ETHN 0610E. Postcolonial Literature (ENGL 0610E).
Interested students must register for ENGL 0610E S01 (CRN 25076)

ETHN 0710B. Ethics of Black Power (AFRI 0710B).
Interested students must register for AFRI 0710B S01

ETHN 0750B. Hispanics in the United States (HISP 0750B).
Interested students must register for HISP 0750B S01

ETHN 0790A. Latina/o Literature.
This course will introduce students to a broad array of Latina/o literature- fiction, poetry, drama, and graphic novels. While there is a long tradition of Latina/o literature in the United States, we will focus primarily on a period from 1970 to the present. Aimed to familiarize students with debates in the field, the readings will also include critical essays. Enrollment limited to 20

ETHN 0790B. Native Americans and the Media.
This course explores the ways in which Indigenous Americans have been constructed in the White American imagination and through self-representation from Frontier phase of American history, through contemporary images in American popular culture and media. Through films created about, and later by, Native people we will explore the evolution of the image of Native American in America culture

ETHN 0790C. Theory Into Practice: Service Learning at a Dual Language Charter School.
Students will explore Dual Language (Two-Way Immersion; Bilingual) education through a variety of activities, using the service-learning model. Students will contribute at least 2 hours per week at the International Charter School (K-5), and another two hours in seminar at Brown University in conversation about readings, service, and politics pertaining to Two-Way Immersion education

ETHN 0800A. City Novels (ENGL 0800A).
Interested students must register for ENGL 0800A S01 (CRN 24607)

ETHN 0800F. Being There: Bearing Witness in Modern Times (ENGL 0800F).
Interested students must register for ENGL 0800F S01 (CRN 14839)

ETHN 0800J. Introduction to Asian American Literature (ENGL 0800J).
Interested students must register for ENGL 0800J S01

ETHN 0810. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).
Interested students must register for POBS 0810 S01

ETHN 0820G. Race and Political Representation (POL S 0820G).
Interested students must register for POL S 0820G S01

ETHN 0880. Hip Hop Music and Cultures.
Interested students must register for AFRI 0880 S01 (CRN 27044)

ETHN 0900. Introduction to Deaf Studies (SIGN 0900).
Interested students must register for SIGN 0900 S01

ETHN 0900W. Media and/as Ethnography (MCM 0900W).
Interested students must register for MCM 0900W S01

ETHN 0901L. Body Count: Technologies of Life and Death (MCM 0901L).
Interested students must register for MCM 0901L S01 (CRN 23876)

Pay attention to methodology and research design can enhance the capacity of research in any field and contribute to knowledge production. The purpose of this seminar is to introduce students to a variety of social science research methods with an emphasis on ethnographic, mixed-methods research (research-design, data-collection, and data analysis). Social science research is a craft, and like any other craft, it takes practice to do it well. This seminar emphasizes a "hands-on," "applied," and/or practical approach to learning. The course is suited to students who have an on-going research project they plan to pursue throughout the semester. Enrollment limited to 20

ETHN 0980C. Culture Wars in American Schools (HIST 0980C).
Interested students must register for HIST 0980C S01

Interested students must register for AFRI 0990 S01

This course will examine the role of language in the social construction of race, racism and racial identity. We will address the different language issues facing African Americans, Latinas/as, Asian Americans, Native Americans, and speakers of "accented" English. We will explore current issues such as the Oakland Ebonics case, English-Only legislation, bilingualism, and hate speech vs. free speech

ETHN 1020C. The Afro-Luso-Brazilian Triangle (AFRI 1020C).
Interested students must register for AFRI 1020C S01

ETHN 1050. Race in the Americas.
This class will explore issues of race, racial identity construction, and racism throughout Central and Latin America (including the Caribbean). This is a class in comparative race relations that covers peoples of African, Asian, Native, and European descent. Topics covered include: miscegenation, diaspora, space, socioeconomic inequality, and nation building. Previous coursework in Ethnic Studies or similar suggested

Interested students must register for EDUC 1050 S01
ETHN 1060E. West African Writers and Political Kingdom (AFRI 1060E).
Interested students must register for AFRI 1060E S01

ETHN 1060I. Africana Philosophy of Religion (AFRI 1060I).
Interested students must register for AFRI 1060I S01

This is an academic and reflective practicum on the politics and processes of social justice organizing. Students will learn about the historical and political evolution of organizing, the connection between organizing and ideology/vision, concrete tools and tactics used in the strategies of social justice organizing, and elements of running non-profit organizations. This course will require, equally, academic rigor, personal leadership and involvement, and introspective analysis. Students will be required to intern at a local organization in Providence, and reflect on their involvement utilizing the theories and discussions gained through the classroom. This course will also explore connections between local, national, and international movement-building. In keeping with this course’s commitment to real-life organizing examples and experience, course instructors and guest speakers are themselves experienced organizers and Executive Directors of social change organizations. This will be a small class with preference given to students with some experience in community, student, youth, and/or labor organizing. Permission of instructors required: contact saradaretwin@gmail.com

ETHN 1071. China Modern: An Introduction to the Literature of Twentieth-Century China (EAST 1070).
Interested students must register for EAST 1070 S01

Interested students must register for AFRI 1090 S01

ETHN 1100. Korean Culture and Film (EAST 1100).

ETHN 1870A. Ethnic Los Angeles. This course will focus on the historical and contemporary struggles of people of color in Los Angeles, California, throughout the twentieth century. We will take an interdisciplinary approach, examining films, literature, and history pertaining to the city. There are no prerequisites. Enrollment limited to 20

ETHN 1870B. Latina/o Communities Seminar. This seminar’s first goal is to introduce students to the social and economic issues that affect contemporary Latino communities. The second goal is to train the students in empirical fieldwork research methods in Ethnic Studies. The seminar searches for ways to link the academy and communities through empirical research that addresses the needs and demands of Latina/o urban communities

ETHN 1870C. Native North Americans in the Media: Representations and Self Representations in Film. How have Native North American peoples been represented and self-represented in film from the early 1900s to today? Filmmaking is employed to explore the construction and stereotyping of Indigenous peoples of North America in American popular culture, as well as the recent (re)construction of Native identities by American Indian peoples. Specific topics including identity, race, gender, violence, religion and spirituality, cultural appropriation, and Native humor frame the analysis and comparison of American popular and Native representations of Native Americans. The course centers on the screening and discussion of selected movies, complemented by academic and non-academic literature in the form of books, articles, reviews, and other media materials. Completion of introductory courses on Native American peoples and cultures is strongly recommended

ETHN 1870D. Chicana/o Fiction. This course is a survey of Chicana/o fiction from the 1950s to the present. We will be reading novels as well as stories, with the occasional inclusion of poetry. Our literary texts will be supplemented with secondary sources--history, literary criticism, cultural studies, and the like. The course will also ask students to consider the relationship between Chicana/o literature and other writing in the Americas

ETHN 1870E. Queer Latina/o Literature and Theory. Enrollment limited to 20

ETHN 1870F. Eating Cultures. Enrollment limited to 20

ETHN 1870G. Reading Race: Advanced Seminar in Critical Race Theory. Enrollment limited to 20

ETHN 1890A. Seminar on Latino Politics in the United States. Advanced seminar on the politics of Latino communities in the United States. Considers the history of Latino politics; participation, partisanship and office-holding; immigration and citizenship; social movements; public policy; gender and race; and pan-ethnic identity. Advanced undergraduate and graduate students. Includes optional community research project. Some familiarity with Latino studies, U.S. politics, Latin American politics, or ethnic studies would be helpful

ETHN 1890B. Native American and European Contact in Early North America, ca. 1600-1750. This course will consider contact between Native Americans and Europeans in the early Americas with particular attention to interactions in the greater New England area. Readings stress the diversity of Native lifeways and how contact changed both Natives and Europeans. An equally important theme is to examine the ways in which the history of Native peoples has often been ignored, changed, appropriated, and distorted, as well as reclaimed and re-evaluated over time. Therefore, while the focus is on the seventeenth and eighteenth centuries, the class will also consider how the histories of that time have been told and retold in later eras, including our own. We will also pay attention to the way in which different historians undertake the study of the past. This seminar has no prerequisites, but please be advised that the workload is substantial. If the class is oversubscribed, preference will be given to Ethnic Studies concentrators

ETHN 1890C. Business, Culture, and Globalization: An Ethnicographic Perspective. The exchange of goods, resources, or commodities is commonly understood as business transactions. Business transactions have always been global, but in the new information age, it seems that many can take part in this exchange system. What is termed as “globalization” has become increasingly popular, yet efforts to clearly define what the term actually means continue to change. This course aims at complicating, rather than simplifying, the term and to understand how business transactions unfold in a “global” economy

ETHN 1890D. Indigenous Music of the Americas. Introduces students to music of indigenous communities in North, Central, and South America, with particular attention to the relation between performance, cultural identity, and social change. We will focus especially on indigenous societies in the Andes, Brazil, and the United States and Canada. The course is designed to explore common links between indigenous history, worldviews, and performance throughout the hemisphere, while simultaneously illuminating how distinct experiences of colonization and recovery have fostered unique musical practices

ETHN 1890E. Johnny, Are You Queer? Narratives of Race and Sexuality. This course is intended as a wide-ranging romp through the fields of queer theory and narratives of race and sexuality. It will move from the 1980s through the present looking at representations of queerness and race in poetry, fiction, creative non-fiction, music, etc. We will investigate the convergences and divergences in the discourses of race and sexuality

ETHN 1890F. Bad Boys and Bad Girls in Asian American Literature and Culture. From the angry Asian men of the "Aiiieeee!!" anthologies to Margaret Cho’s raucous comedy acts, bad boys and bad girls in Asian American literature and culture have been interpreted as helping to shatter the model minority stereotype. This course examines bad subjects, especially in their relations to popular culture, gender, and sexuality. We will investigate what puts the "bad" in bad boys and bad girls, how ideas of "bad" change, and what the bad subject does for readers and writers. Readings and viewings to include Frank Chin, John Okada, Gish Jen, Margaret Cho, Harold & Kumar Go to White Castle, Better Luck Tomorrow. Enrollment limited to 20

ETHN 1890G. Native Americans in the Media: Representation and Self-Representation on Film. How have Native North American peoples been represented and self-represented in film? Specific topics include identity, race, gender, violence, religion and spirituality, cultural appropriation, and Native humor frame the analysis and comparison of American popular and Native representations of Native Americans. The course centers on screening and discussing selected movies, complemented by academic and non-academic literature such as books, articles, and reviews. Completion of introductory courses on Native American cultures is recommended, but not necessary. All students are welcome. Enrollment limited to 20

ETHN 1890H. Introduction to American Indian Studies. Introduces students to both historical and contemporary issues in North America. Issues of identity, sovereignty, representation and self-representation are key components. Because this course is interdisciplinary, we will use texts from anthropology, cultural studies, history, film and literature as tools to understand and appreciate the ways in which American Indian cultures survive, flourish and shape the United States. No special background is required. All students are welcome. Enrollment limited to 30

ETHN 1890J. Native American Environmental Health Movements. American Indian reservations are home to countless sources of environmental contamination, which impact residents’ health and ability to maintain cultural practices. In response to this assault, and the
ETHN 1890K. Engendering Empire. This class studies the ways in which empire is a gendered construct. We will also keep in mind that gender never exists in isolation, but on the contrary is always on the crossroads with race, class, and ethnicity. How have brown and black women’s bodies borne the mark of empire? This class will closely examine the relationship between empire and gender, specifically this class will discuss this relationship as it has developed in the Americas.

ETHN 1890L. (De)Colonizing Women: Writing the Third Space. As women of color, we are in the intersections of race, gender, and class. A feminist movement that does not incorporate analyses of race and class cannot meet our needs. A civil rights movement that does not address gender cannot meet our needs; therefore, we create our own space -- a third space. This course reads the literature, poetry, film and theory of third space feminism in the United States. Enrollment limited to 20. WRIT

ETHN 1890M. Treaty Rights and Food Fights: Eating Local in Indian Country. In many Native American communities the push to “eat local” is often based on reviving a traditional food culture as well as a way of promoting better health. This class explores the disparate health conditions faced by Native communities, and the efforts by many groups to address these health problems through increasing community access to traditional foods, whether by gardening projects or a revival of hunting and fishing traditions. We will examine the ways in which Native food movements have converged and diverged from general American local food movements, and the struggles they often face in reviving treaty-guaranteed food ways.

ETHN 1890N. Thawing the “Frozen Indian”: American Indian Museum Representation. This course examines the role of museums as sites where issues of identity, memory, place, and power intersect. We will review the histories, theories and paradigms that have influenced collecting processes and exhibitions, focusing on representations of Native American peoples. We will explore the ways in which Native people have spoken out against conventional museum practice and have sought to reshape it as a means of decolonizing their history, as well as utilizing museums to their benefit to both preserve and promote Native art and culture. How can non-Native scholars and museum professionals contribute to this effort? Enrollment limited to 15. DVPS

ETHN 1890P. Introduction to Native American Literature. This survey course introduces several prominent genres of Native American literary production, including oral traditions, nonfiction essay, novel, short story, and stand-up comedy/performance. Selections are drawn primarily from Native American/Aboriginal writers and performers in the United States and Canada from the nineteenth century to present, including indigenous women from Pacific Islander communities. In addition to genre considerations, particular attention will be given to the social, cultural, and political contexts in which these works were produced.

ETHN 1891. Empires in America to 1890 (HIST 1890). Interested students must register for HIST 1890 S01.

ETHN 1892. Race, Class and Gender in Latino Communities. Examines the roles of racial, class, and gender identities, in the emergence and consolidation of Latino political power in the United States. We look at Latino racial attitudes and racial hierarchies, as "inherited" from Latin American social systems, and as developed here in the U.S. We explore class politics as they shape Latino social movements, economic conditions, and communities, and we analyze the impact of Latino immigration and union membership on organized labor. We consider gender roles and patriarchy in Latino families, and the roles of intersectionality and feminism in Latino politics. Enrollment limited to 40. DVPS

ETHN 1900A. Alien Nation: US Immigration in Comparative Perspectives. Latino/a immigration to the United States has reshaped the meaning of “America” over the last hundred years. We will study Latina/os in comparison to other immigrants and examine how US immigration policy has created a nation partly composed of "alien" residents--some citizens, others not--who have constructed alternative notions of belonging.

ETHN 1900B. Community, Language and Literacy: A Practicum. This course examines adult language and literacy learning and approaches to teaching in community settings. It is designed to support students’ work teaching language and literacy to immigrant adults. Working with the Swearer Center and its community partners students will explore theories informing educational practice, and will gain skills and practice in providing language and literacy instruction to adult learners in the community. This practicum specifically addresses issues of language acquisition, acculturation, and broader contexts framing adult education. Enrollment limited to 20.

ETHN 1900C. Contemporary Latino/a Education in the United States. Latino/as are now the second largest group of students in United States schools and, in aggregate, among the most troubled as measured by drop-out rates and grade-level retentions. Yet Latino/a students also perform well in some settings. This course reviews contemporary Latino/a education, focusing on the multiple educational contexts Latino/as encounter, including how non-Latino/a educators regard Latino/a students.

ETHN 1900D. Latino Communities Seminar. Enrollment limited to: 20.

ETHN 1900E. Senior Seminar in Ethnic Studies. No description available.

ETHN 1900F. Theory, Creativity, Activism. This class will bring together much of the literature and discussions conducted throughout your education as an Ethnic Studies major and prepare you for the application of Ethnic Studies in your post-graduate life. I have chosen to emphasize three themes that have been dominant in your Ethnic Studies curriculum: Theory, Creativity, and Activism. We will begin by critically exploring the democratic principles and imperial practices that underlie the “American system” and the political formation of The Third World. Our discussions and readings will include an examination of the contributions and limitations of multiculturalism, postmodernism, anti-colonialism and feminism, and the relevance of (ethnic) “experience” in interpreting and addressing the problems we face as a planetary civil society. The majority of the class will be dedicated to the praxis of Ethnic Studies as a creative and political force within our world today. We will read fiction and non-fiction and view films that articulate the complexities of life in North America and beyond.

ETHN 1900G. Race and Immigration in the Americas. Enrollment limited to: 20.

ETHN 1900H. What is Ethnic Studies?. No description available. Enrollment limited to 20 seniors and graduate students.

ETHN 1900I. To Be Determined. Enrollment limited to 20.

ETHN 1901. American Empire Since 1890 (HIST 1900). Interested students must register for HIST 1900 S01.

Interested students must register for HIST 2970C S01

## Religious Studies

### Chair

Mark Cladis

The Department of Religious Studies at Brown University provides students with an understanding of diverse religious traditions, an exposure to a variety of approaches employed within the academic study of religion, as well as an opportunity to explore diverse intellectual, social-theoretical, and ethical issues that arise when one considers the various manifestations of religion in human affairs. While the graduate program in religious studies, with select areas of concentrated strength, is one of the finest in the world, the undergraduate program is broad and creative, serving a large number of students both inside and outside the concentration. For additional information, please visit the department’s website: [http://www.brown.edu/academics/religious-studies/](http://www.brown.edu/academics/religious-studies/)

### Religious Studies Concentration Requirements

Religious Studies seeks to understand and interpret religions in various historical, cultural, and social contexts. It fosters scholarly skills such as close reading (of texts and other social and material data), excellence in writing and verbal expression, interpretation of the past from written and physical evidence, and interpretation of contemporary society. By exploring the public and private concerns that religions engage for example, the nature of community and solitude, suffering and death, good and evil, students discover new ways of interpreting the complex world in which they live. As students venture into the religions of Asia, the Middle East, Africa, the Americas, and Europe, they learn about the formation and transmission of beliefs, behaviors, values, rituals, texts, institutions, and forms of community. Students also learn about conflict and accord within and between religions, as well as between religious and non-religious perspectives.

Concentration in religious studies includes course work in RELS 1000 (junior seminar in methods in the study of religion) and eight other courses conforming to the following requirements.

Each student in consultation with appropriate faculty members devises a concentration program. The student presents (for approval by the concentration advisor) a written statement of the objectives of his or her concentration program and a list of the component courses. The program is expected to encompass the study of at least one religious tradition from each of the following groups. Ordinarily, this requirement is satisfied by two or more courses in each of these areas:

1. Traditions that emerge from West Asia and the Mediterranean world
2. Traditions that emerge from South and East Asia

The plan of study must take account of more than one approach to the study of religion, e.g., philosophical and historical; contain at least two Intermediate-level courses (0200-0999), RELS 1000, and two additional advanced-level courses (above 1000). This means that no more than four courses (out of nine) can be at the introductory level. Courses listed in other departments but taught by religious studies faculty count toward the program. Up to three courses that are outside the department and not taught by religious studies faculty can count toward the program.

No later than the end of spring registration in the junior year, the concentrator will determine whether he or she will write an honors thesis or complete a capstone project for the concentration. A capstone course will be selected in consultation with the concentration advisor and other faculty as appropriate. Within the frame of this capstone course, the concentrator will address the theoretical and interpretive issues of his or her particular focus in the religious studies concentration.

### Honors

A religious studies concentration with honors requires, in addition to RELS 1000 and eight other courses, an honors thesis (RELS 1999, during both semesters of the senior year). To receive honors, a student must have at least a high B in the concentration and an A on the thesis.

Thomas A. Lewis, Director of Undergraduate Studies

Stephen Bush, Undergraduate Advisor for Seniors

### Religious Studies Graduate Program

The department of Religious Studies offers a graduate program leading to the Doctor of Philosophy degree (Ph.D.) in six specialized tracks: Ancient Judaism; Asian Religious Traditions; Early Christianity; Religion and Critical Thought; Religion, Comparison and Culture; and Religion in the Ancient Mediterranean. The department also offers a Master of Arts (A.M.) degree program, but terminal Master’s applicants are only accepted under exceptional circumstances.

For more information on admission and program requirements, please visit the following website:

[http://www.brown.edu/academics/gradschool/programs/religious-studies](http://www.brown.edu/academics/gradschool/programs/religious-studies)

### Courses

**RELS 0010. Approaches to Religion.**
An introduction to the study of religion by examining selected examples of religious belief and practice from around the world and exploring some theoretical tools with which to think about them

**RELS 0011. Faith and Violence.**
Explores the relationship between religious texts and rhetoric and violence. How do sacred texts promote or discourage violence, and how have later religious communities understood (and continue to understand) these texts? While the course will focus mainly on Judaism, Christianity, and Islam, occasional Asian examples will be used. No prerequisites

**RELS 0012. Radical Democracy and Ecology in Religious Romanticism.**
We will endeavor to create an intimate community of learning as we jointly explore political, environmental, and religious aspects of Romanticism (especially British Romanticism). It has become commonplace to think
of Romanticism as nostalgic notions of the pastoral or narcissistic reports of the individual’s private gaze on the sublime. In contrast to this approach, we will focus on the radical political and environmental perspectives embedded within Romantic religious and poetic sensibilities. In the process, we will reflect on how this Romantic heritage can serve as a contemporary public resource for the cultivation of interrelated environmental and democratic beliefs and practices. Enrollment limited to 20 first year students. FYS

RELS 0020. Death and Afterlife in the Biblical Tradition. A close analysis of the development of ideas about death and the afterlife in the Hebrew Bible and in the literatures of Second Temple Judaism and early Christianity. Topics: life and death in Israel and ancient West Asia; the abode of the dead and its denizens; from Sheol to Heaven, Hell, and the final judgment; religious specialists, rituals, and the literature of death: necromancy; burial and mourning rites; cults of the dead ancestor. No prerequisites. Enrollment limited to 20 first year students. FYS LILE WRIT

RELS 0030. The Apocalyptic Imagination. In anticipation of popular apocalyptic expectations for 2012, this course will explore the origins and nature of apocalypticism. Beginning with modern apocalyptic thought in ancient Jewish writings (including the Books of Daniel and Ezekiel in the Hebrew Bible), we will explore the socio-historical context for ancient Jewish visionary ascetic texts, early Christian apocalypses (including the Book of Revelation) and later interpretations and use of ancient “prophecy” concerning the end of the world. This course includes a close reading of ancients texts and an analysis of the 2012 apocalyptic imagination through popular literature and movies.

RELS 0040. Great Contemplative Traditions of Asia. Introduction to the critical study of contemplative practices and experiences emphasizing philosophical and scientific analyses of works from the major Asian contemplative traditions of South and East Asian Buddhism and Chinese Daoism in historical context. Theoretical studies of mysticism and studies from the psychological sciences will be included.

RELS 0050. Love: The Concept and Practice. A study of love (in classical and modern texts and in film) that provides a window into a host of religious, philosophical, and ethical issues. Topics include the potential conflict between divine and human love, between transcendent and earthly love, and the nature of friendship, romance, marriage, and love at the crossroads. Although the scope is love in the West, the Kamasutra and other texts furnish a comparative component.

RELS 0055. Modern Problems of Belief. Some say it is impossible to be both a modern person and a religious person. What are the assumptions behind this claim? And what is it about the modern (or postmodern) era that, according to some, has made religion difficult to believe in? These questions will be discussed as we explore the ways religion has been understood in Western culture from the Enlightenment to the present. We will read such influential thinkers as Hume, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Freud, Durkheim, Buber, and Woody Allen. Each figure has left a decisive mark on the way we think about religion.

RELS 0061. Reason and Religion (PHIL 0040). Interested students must register for PHIL 0040 S01

RELS 0065. On Being Human: Religious and Philosophical Conceptions of Self. An examination of classic and contemporary views on the nature of human existence. Central themes include human freedom, the relation between reason and emotion, and the significance of personal history and memory. We also ask how conceptions of who we are shape views about how we should live. Sources include religious and philosophical texts as well as recent films. LILE WRIT

RELS 0068. Religion and Torture. The debates about the moral and legal status of torture have acquired a new urgency since 9/11. People are now questioning the consensus of law and human rights declarations that torture is never permissible. Indeed, some argue that in extreme cases, it may be obligatory to torture a captive for information that could save many lives. This class explores the recent debates about torture from secular and religious perspectives. It also deals with more general themes related to torture: What are the nature and effects of pain? Are human beings sacred, and does sacredness involve a prohibition against torture? LILE

RELS 0070. Religious Thought in Modern Literature. Examination of themes and issues of Western moral and religious thought as represented in imaginative literature. Focuses on structures and problems of moral selfhood and religious commitment. Special attention to: project of selfhood and its significance; evil and subversion of self and community; ideas of faith, love, and redemption

RELS 0071. Believers, Agnostics, and Atheists in Contemporary Fiction (JUDS 0050A). Interested students must register for JUDS 0050A S01

RELS 0075. Reel Religion: Representations of Religions in Film. Religious practices, beliefs, and experiences are given diverse representations in film. In this course, we study some of these representations, with particular attention to critical issues in the interpretation of both religion and film, and references to major themes in the relevant religious traditions and literatures. Representative films include Star Wars 3: The Return of the Jedi; The Name of the Rose; The Chosen; The Handmaid’s Tale, The Cup, The Matrix, Witness and Water. No prerequisites. DVPS LILE

RELS 0080. Gender, Power, God(s). A comparison of women’s and men’s practices, experiences and beliefs, focusing on patterns observable in a range of religions. Special attention paid to the ways religions participate in diverse constructions of gender (ideas about masculine and feminine), and how these relate to the construction and exercise of power and authority. Specific traditions and historical periods studied vary from year to year. Examples may include: leadership in African American churches; Buddhist monasteries; early Christian asceticism; evangelical Christian organizations; medieval and early modern Christian witchcraft accusations; Hindu devotions for husbands and brothers; the turn to orthodoxy among contemporary Jewish women and men; the mosque movement in contemporary Islam; village kams in Okinawa (Japan); the Shakers, Zar and Bori possession in North Africa and the Caribbean. DVPS LILE WRIT

RELS 0085A. From Amsterdam to Istanbul: Christians, Moslems, and Jews (JUDS 0050E). Interested students must register for JUDS 0050E S01 (CRN 15685)

RELS 0085B. The God Debate (JUDS 0050F). Interested students must register for JUDS 0050F S01

RELS 0090A. Death in the Greek and Biblical Traditions. A comparative analysis of ideas about death and the afterlife as they emerge from the cultural legacy of ancient Greece, Israel and West Asia. Topics include the abode of the dead; ghosts; necromancy; ancestor cults and hero cults; burial and mourning rites; impurity of death; suicide; the literature of death. Seminar format, with emphasis on close reading of primary texts. All readings in translation.

RELS 0090B. Hindu and Christian Modes of Loving Devotion. Explores two modes of devotion prominent in the medieval West and in medieval and modern India, both centering on the human incarnation of divinity, as Jesus Christ and as Krishna. The first considers the divine as child and plays on the paroxysm of the omnipotent God of the universe as a seemingly helpless infant. In the second, God is conceived as a lover and erotic passion serves as an image and avenue of religious realization. Enrollment limited to 20 first-year students. FYS

RELS 0090D. Jewish and Christian Women in Antiquity. What do we know about Jewish and Christian women in the Greco-Roman Mediterranean, and what difference does this make for the study of early Judaism, early Christianity and women’s history and religions more broadly? An examination of literary, documentary and archaeological sources from the later Hellenistic period through the late Roman period, with generous assistance from recent scholarship and particular attention to issues of theory in women’s and gender studies, and in religious studies.

RELS 0090E. Faith and Violence. Explores the relationship between religious texts and rhetoric and violence. How do sacred texts promote or discourage violence, and how do they relate to religious communities? This course explores these themes and their impact on religious communities in the modern (or postmodern) era that, according to some, has made religion difficult to believe in? These questions will be discussed as we explore the ways religion has been understood in Western culture from the Enlightenment to the present. We will read such influential thinkers as Hume, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Freud, Durkheim, Buber, and Woody Allen. Each figure has left a decisive mark on the way we think about religion.

RELS 0090F. Religious Thought in Modern Literature. Examination of themes and issues of Western moral and religious thought as represented in imaginative literature. Focuses on structures and problems of moral selfhood and religious commitment. Special attention to: project of selfhood and its significance; evil and subversion of self and community; ideas of faith, love, and redemption

RELS 0090A. Death in the Greek and Biblical Traditions. A comparative analysis of ideas about death and the afterlife as they emerge from the cultural legacy of ancient Greece, Israel and West Asia. Topics include the abode of the dead; ghosts; necromancy; ancestor cults and hero cults; burial and mourning rites; impurity of death; suicide; the literature of death. Seminar format, with emphasis on close reading of primary texts. All readings in translation.

Departments, Centers, Programs and Institutes
REL 0090. Friendship in the Ancient World.
How have ancient societies understood friendship, and how do ancient ideas about friendship differ from or resemble those of contemporary Westerners? This seminar, a comparative investigation of the ways in which friendship has been represented in the Hebrew Bible, Mesopotamian literature, and Greco-Roman texts, will address these and other questions through study of materials such as the Epic of Gilgamesh, the Iliad, the Book of Ruth, 1 and 2 Samuel (on Jonathan and David), the Wisdom of Ben Sira (Sirach), and Aristotle’s Nicomachean Ethics. Enrollment limited to 20 first year students. FYS
REL 0100. Introduction to Buddhism.
An introductory survey of Buddhist teachings and practices, with emphasis on Asian developments. Readings will comprise a combination of primary and secondary sources and genres including sutras, narratives, and commentaries
REL 0105. Judaism.
Surveys the major practices, traditions, and beliefs of the Jews, with an emphasis on modern Jewish communities. How does a Jewish community shape its practices and beliefs against its own specific historical circumstances to create a coherent and meaningful religious system? What is “Judaism,” and how do scholars of religion explain and interpret it?
REL 0110. Christianity.
A historical survey of Christianity from its foundations to the present, tracing its development into three main branches: Orthodox, Catholic, and Protestant. Readings from a variety of Christian “classics” accompany the survey, pursuing the theme of how-in different times, places, and circumstances—Christians have understood their relations to the divine and to the world
REL 0120. The Foundations of Chinese Religions: Mystics, Moralists and Diviners.
An introduction to the origins and early development of the indigenous religious thought of China from the oracle bone divination of the Shang Dynasty to the ethical philosophy of Confucianism and the cosmology and mysticism of Daoism. The course will seek to identify and elucidate the basic elements of the distinctive Chinese world view and demonstrate how they have shaped the nature of religious practice and experience and how they have been shaped by them. Works of interpretive scholarship will be used to supplement the primary texts in translation that will form the course. Optional lab section will give first-person experience with the ancient divination practices of the I Ching, Confucian moral psychology, and early Daoist meditation
REL 0130. The Hindu Tradition.
After a brief look at our earliest evidence, we focus on the three most prominent Hindu goals during the last two millennia—enlightenment, righteous action, and loving, often passionate devotion—and the variety of practices undertaken to realize them. These include study, meditation, music, drama, image worship, asceticism, and nonviolence. Attention to issues of gender, caste, and untouchability. DVR/LILE
This course explores currents of Hinduism through its traditions of narrative and performance. Ranging across a diversity of narrative and performative "texts," we enter a world where fires are kindled, gods and demons clash, crises of faith and duty are resolved. We learn about key Hindu beliefs, mythology and iconography; and see Hinduism as it is lived across India. An introductory immersion, from karma to rebirth, OM to tantra
REL 0140. Religions of South Asia.
This course surveys five major religious traditions of South Asia: Hinduism, Buddhism, Islam, Jainism, and Sikhism. Following brief modules on each religion’s basic history, belief, and ritual systems in the first part of the course, we will proceed to theme-based studies (gender, asceticism, and violence) of some major continuities and ruptures among these religious systems
REL 0150. Islam: From Mohamed to 9/11 and Beyond.
In this course, the historical origins and development of Islam will be studied in light of the sources and communities that shaped it. Themes to be explored include the central doctrines of Islam as derived from the Qur’an and traditions (sunnah), the development of Islamic law (shari’ah), the Shi’i alternative, the growth of Muslim theology, philosophy, and mysticism (Sufism), and controversial issues among contemporary Muslims. WRIT
An introduction to the history of Japanese religion as it developed in the early and medieval periods, with some attention to related modern and contemporary manifestations. The emphasis will be on native ("Shinto") ideas and practices; selected Buddhist teachings; and popular practices such as shamanism and death rituals. Readings include primary texts in translation and selected modern interpretations. No prerequisites
Interested students must register for EAST 0180 S01
REL 0210. Celluloid Jews.
An examination of the representations of Jews in cinema from the second half of the twentieth century, with judicious comparative use and analysis of ancient narrative traditions about Jews, particularly in the New Testament gospels. Films include: Samuel Ray’s King of Kings; Pasolini’s Passion of (St) Matthew; Monty Python’s Life of Brian; Denys Arcand’s Jesus of Montreal; Scorcese’s Last Temptation of Christ, Jesus Christ Superstar and The Matrix
REL 0240. Judaism and Christianity in Conflict.
Explores the tense relationship between Judaism and Christianity from antiquity to the present, with an emphasis on theological issues and polemics. Readings include selections from the New Testament and early Christian writers on Jews and Judaism, Jewish writings on Jesus and Christianity, transcripts of medieval debates, philosophical broadsides, parodies, and contemporary theological documents (e.g., Vatican II)
Interested students must register for JUDS 0990L S01
REL 0250. Good and Evil.
This course explores changing conceptions of good and evil from antiquity to the present. After surveying the views of the Hebrew Bible and of Ancient Greek Philosophy, we will consider Jewish and Christian interpretations from the medieval period. A survey of modern thinkers - including Kant, Nietzsche and Freud will follow, before we turn to post-Holocaust thinkers Arendt, Jonas and Levinas. Enrollment limited to 25
A study of the dynamic relation between religion and nature. Religion, in this course, includes forms of spirituality within and outside the bounds of conventional religious traditions (for example, Buddhism and Christianity, on the one hand; ecofeminism and nature writing on the other). Topics in this study of religion, philosophy, and ecology will be environmental justice, environmental degradation, and depictions of humans in relation to the natural world. Enrollment limited to 20
Derives a preliminary phenomenology of religious and mystical experience in China through examining representative texts from Taoist and Buddhist traditions in their historical contexts and analyzing them using Western theoretical models. Readings divided equally between Chinese primary texts and Western theorists, with particular attention paid to the relationship between philosophical and psychological models. Seminar format. Prerequisites (in descending order of importance): RS 88 sec. 12, RS 86 sec. 18, RS 6
Interested students must register for JUDS 0100 S01
REL 0290C. Christian Ethical Theories.
Classical and contemporary readings in Christian ethical theory. Topics include: virtue ethics, natural law, divine command ethics, philosophical challenges to religious ethics, and the place of religious community in a liberal state
REL 0290D. Women, Sex and Gender in Islam.
This course is a survey of women in Islamic society from the medieval to the modern worlds. Using a variety of non-fiction, fiction and film sources, we will address issues such as women and Islamic law, women’s bodies and images of Muslim women in the Muslim world; contemporary feminism and movements in Islam, the question of secularism, veiling, and others.
Preference given to students with prior university level coursework in Islam. Examples include RELS 0150, 0640, 1520. DVPS LILE

RELS 0290E. Engaged Meditation. 
This course will examine the connection between meditation, insight, ethical character, and social activism within certain Buddhist movements. We will look at the historical background of engaged Buddhism, explore its central concepts, and analyze it theoretically. As many engaged Buddhist movements employ meditation as an important part of their practice, we will also be studying, first hand, the effects of meditation on activism by incorporating regular sessions of sitting meditation into the course. 

Prior study of Buddhism at Brown required: examples of such courses include UNIV 0540, EAST 1880C, and RELS 0500. Instructor’s permission required. LILE

RELS 0290F. Paul and the Philosophers. 
This course treats the relation between Paul the evangelist’s thought to philosophy from two angles. The first half of the course covers modern scholarship that has found philosophical influences on the letters from Cynicism, Stoicism and later Platonism. The second half of the course surveys modern and especially recent philosophers who have used Paul’s thought including Nietzsche, Agamben, Zizek and Badiou. RELS 0400 is recommended. Enrollment limited to 20 first year students. FYS

RELS 0320. Israelite Religion. 
The origins and development of ancient Israel’s religious beliefs, rituals and cultic institutions will be considered from an historical and contextual (i.e., wider West Asian) perspective. Topics include method in reconstructing religion; myth, epic and history; the identity of Yahweh, Israel’s national god; covenant; Yahweh and other deities (monolatry and monotheism; angels; a consort of Yahweh?); temples, their iconography and ideologies; festivals and sacrifice; purity; death and afterlife; religious specialists (priests, prophets, mediums, professional mourners). No prerequisites

RELS 0321. The Old Testament/Hebrew Bible and its World (JUDS 0470). 
Interested students must register for JUDS 0470 S01

RELS 0325. Judaism, Christianity and the Bible (JUDS 0530). 
Interested students must register for JUDS 0530 S01

This course provides an opportunity for students to explore the ways in which the Hebrew Bible has been interpreted by Jews and Christians from antiquity to the Enlightenment. The modern historical-critical and literary methods of biblical exegesis will be introduced at the beginning of the course and will inform our investigation of traditional approaches to interpretation. The course assumes no prior knowledge of the Bible

RELS 0360. The Bible as Literature (JUDS 0260). 
Interested students must register for JUDS 0260 S01

RELS 0365. God and Poetry (JUDS 0980B). 
Interested students must register for JUDS 0980B S01

How and why Christianity emerged in various forms in the ancient Mediterranean. Insights from religious studies, gender studies, literary studies, anthropology, and other fields. Careful critical readings of New Testament books, non-canonical gospels, early Christian letters, ancient apocalypses. Topics include: Jewish contexts; representations of Jesus; Paul and early communities; Christians and imperial Rome; gender constructions; canonization; eventual separation of Christianity and Judaism. Open to all students. LILE

RELS 0410. Christianity in Late Antiquity. 
The communal struggles, personal rivalries, and theological conflicts that shaped Christianity in its formative centuries: heresy and orthodoxy, hierarchy and charisma, gender and class, persecution and martyrdom, paganism and classical tradition, creeds and councils, asceticism and the body, church and state, eastern and western Christianity. Focused in the 2nd through 6th centuries A.D. LILE

RELS 0420. Sacred Bodies. 
How did ancient Christians understand physical holiness? What did the bodies of saints demonstrate or reveal? How was bodily sanctity represented in actual practices, and in literary, artistic, or ritual expressions? We will consider three broad categories of saints: desert heroes, holy women, and virtuosos (pillar saints, holy fools). Prerequisites: RS 9, RS 71, or RS 72

RELS 0430. Sacred Stories. 
Ancient Christian narrative imagination and the formation of Western culture. Emphasis will be on the ancient stories that accompanied the spread and “triumph” of Christianity, but attention will also be given to how these themes and images have prevailed in Western History. Biblical legends, heroes and heroines, saints and sinners, the demonized Religious Other

RELS 0440. The World of Byzantium (CLAS 0660). 
Interested students must register for CLAS 0660 S01

This course surveys historically influential views of Christian mysticism. We will look at mystics’ texts to get a sense of how they both describe and understand mystical experience. What religious communities contextualize these experiences? How is the body engaged? Is emphasis given to the work of the mind or soul? How are suffering and love involved in mystical encounters? Answers to these questions vary from author to author, but there is a common emphasis on how the human person is transformed through encounter with the (presumed) divine

RELS 0500. The Theory and Practice of Buddhist Meditation. 
Examines the theory and practice of Buddhist meditation in historical and modern contexts. Traces this practice from its origins in 6th-century B.C.E. India to its transmission to China, Korea, and Japan. Studies selected normative texts and explores how Buddhist meditation is practiced today in each of these regions, both as an individual practice and as part of a monastic regimen. Meditation lab related to weekly seminar. Topic for 2007: Meditation and Ethics. Prerequisites: RS0006 or RS0088.23

RELS 0510. Confucian Ethics. 
An examination of Confucian moral thinking as contained in the Analects, Mengzi, Xunzi, and Records of Rituals. Issues considered include the absence of a concept of transcendence, the relationship between moral and ritual norms, and moral activity as an aesthetic and spiritual discipline, against the background of Western patterns of moral thought. Prerequisite: Previous work in ethics or Chinese studies

RELS 0530. Laozi and the Dao De Jing. 
Seminar on the historical and philosophical origins of the Daodejing, heretofore acknowledged as the foundational text of the Daoist tradition. Recently discovered and translated manuscripts from Ma-wang-tui and from Guodian that cast new light on these questions will be the basis for the course. Recent research on early commentarial traditions to the Tao Te ching and on its philosophical significance will also be studied. Prerequisite: RELS 0040, 0120, or UNIV 0540 or permission of instructor

RELS 0540. Buddhist Psychology. 
The course will examine historically influential Buddhist insights into the nature activity of the human mind. It will then consider how these have been understood or misunderstood by Western psychologists and cognitive neuroscientists. Buddhist texts will be drawn from the Theravada and Mahayana traditions in South and East Asia and Western theorists and researchers will be taken from the following: Jung, Maslow, Fromm, Pickering, Epstein, Goleman, Austin, and Davidson. Seminar format. Pre-requisites: In descending order of priority: RS 188.017, "Theory and Practice of Buddhist Meditation;" RS 88.023, "Great Mystical Traditions of Asia;" prior university level coursework in Buddhism

RELS 0600. Islam and Modernity. 
Lupe Fiasco, Al-Jazeera News, Mos Def, and reality shows produced by Ryan Seacrest: Contemporary Islam is now having an impact on modern culture in unprecedented ways. Islam is often said to be the fastest growing religion in America, and is second to Christianity in all the countries of Western Europe. In this class we will study the contemporary life, culture and thought of Muslims in America and Europe. We will begin with exploring Muslims and the Islamic faith in the Americas from the Atlantic slave trade, and move to the present

RELS 0610. Sacrifice and Society. 
Investigation of the sacrificial practices and ideologies that have been important to numerous unrelated societies. The origin and significance of animal sacrifice has been a central question for classical social theory (e.g., Durkheim, Freud, Mauss) and is still important for theorization in
anthropology and religious studies. Probable examples include Israelite, Greek, Hawaiian, Christian, Nuer. 999999

RELS 0620. Encountering the Qur’an: “This is the Book about which there is no doubt.”
This course will introduce you to the Qur’an—the foundational revelational text of Islam—and to some of the central topics related with its study from within the Islamic tradition and from a critical historical perspective. By the end of the course, students will be able to engage in discourse on the formation of the text of its Qur’an, its major themes, debates about methods of its exegesis, its central place in Muslim discourses on faith and piety, ethics, mysticism, aesthetics, etc., its role in contemporary debates on issues of religion, gender, politics, science, and some questions and hypotheses of the historical critical study of the Qur’an.

RELS 0640. Sacrifice and Suffering: Rhetorics of Martyrdom Compared.
This course examines concepts of martyrdom and holy war and compares it with other monotheistic traditions, Judaism and Christianity. How are war and martyrdom presented in the sacred texts of these traditions? How has Islam idealized and problematized martyr and/or holy warrior in different ways? How have modern religious revivalism and nationalism, appropriated martyrdom and holy war in our time? Course material will include sources in translation, scholarly articles, books & films. WRIT

RELS 0650. Introduction to Islamic Archaeology (ARCH 0600).
Interested students must register for ARCH 0600 S01

RELS 0750. Death and the Afterlife in the Ancient World.
This course focuses on the evolution of beliefs and rituals related to death in and around the Mediterranean, including Egyptian, Greek, and Roman cultures. Using an interdisciplinary approach, we combine methodologies from Anthropology, Classics, and Religious Studies. Topics include myths of the afterlife; books of the dead, magic, and death rituals; divination, heaven, hell, and Last Judgment, and the impact of Christianization on Roman understandings of death.

Interested students must register for JUDS 0980U S01

RELS 0800. Christianity, Ethics, and Politics.
Classical and contemporary readings in Christian ethical theory. Topics include: virtue ethics, natural law, divine command ethics, philosophical challenges to religious ethics, and the place of religious community in a liberal state.

MLK, Jr. and Malcolm X are two iconic figures in the pantheon of black religious leadership. Their profoundly influential ideas about justice, freedom, democracy and racism, along with their activist strategies and personal biographies have generated extraordinary interest over the past 50 years. Despite this, the rich and complex tradition out of which their ideas and world-views evolve; the 300 year old religious strategies and practices employed by African-Americans have been understudied, disconnected from our understanding of their significance. This course will examine these traditions and these two central figures’ roles within them in order to shed important light on both. DVPS LILE WRIT

RELS 0825. Foundational Texts in African American Theology.
Central topics and foundational texts in the field of scholarship historically known as Black Theology. Major African American responses to those writings by Marxists, Womanists, process theologians, and religious humanists. DVPS LILE

RELS 0830. Religion, Reason, and Ethics from Kant to Nietzsche.
The nineteenth century witnessed revolutionary transformations in thinking about the power and limits of human reason, the relation between reason and religion, revelation, the role of humanity in creating religion, morality and religion, the significance of history, and the plurality of religions. This course examines major thinkers from this period who continue to shape our own assumptions and reflection. WRIT

RELS 0840. Religion and Politics.
This course examines the role of religion in public life, especially in pluralistic, democratic societies. We consider whether religion and politics can or should be separated; what role government should have in regulating religion; and whether a cohesive society needs a shared religion. Readings from early modern Western thinkers, contemporary theorists, and recent Supreme Court decisions.

RELS 0850. Liberation Theology in the Americas.
Liberation theology seeks to bring the social teachings of Christianity to bear on political and economic injustice. This course treats liberation theologies as socially grounded, politically engaged currents in religious thought. We will investigate the historical contexts and central themes of liberation theology: the relationship between theory and practice, the political function of theology, the relationship between political freedom and salvation, and the role of intellectuals.

RELS 0880A. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 0990G).
Interested students must register for JUDS 0990G S01

RELS 0880B. Body and Society: Medicine and Medical Ethics in the Pre-modern World (JUDS 0990J).
Interested students must register for JUDS 0990J S01

RELS 0880C. Religion and Sexuality (JUDS 0990F).
Interested students must register for JUDS 0990F S01

RELS 0880D. Money, Power, Sex and Love: The Modern Jewish Family in Europe and America (JUDS 0980V).
Interested students must register for JUDS 0980V S01 (CRN 23668)

RELS 0910. Music, Drama and Religion in India.
Music, drama, and dance have played central roles in Indian religious life from ancient times. They have expressed and nourished a wide range of devotional emotions toward Hindu deities and functioned as meditative modes of attaining an impersonal state. The seminar explores diverse forms of religious experience produced and enhanced by the aesthetic means of music, drama, and dance. Audiovisual materials provide a sense of these aesthetic-religious performance forms.

Intensive introduction to classical and contemporary theories of religion and the principal methods for the study of religion. Junior seminar for religious studies concentrators. Enrollment limited to 25. WRIT

Interested students must register for JUDS 1980K S01

RELS 1130. Philo.
Examines Philo’s life and writing, and their importance for the study of Judaism and Christianity in antiquity. How typical was Philo? How did he interpret the Bible? How does his thought “fit” into the religious landscape of the first century CE? Focuses on reading Philo’s writings, but will also survey scholarly approaches to Philo. Knowledge of Greek helpful.

RELS 1135. The Concept of Sin in Ancient Judaism.
How is it possible to reconcile the existence of sin and evil with the belief in an omnipotent, omniscient and benevolent God? Where does sin come from, and what are its consequences? These questions are prominent in Jewish literature during the Second Temple period – the period that engendered both Christianity and rabbinic Judaism. The approaches to sin found in these texts reflect a complex religious worldview. By reading these texts first-hand we will delve into these concepts and reflect on what they can tell us about ancient conceptualization and about our own understanding of sin and ethics.

RELS 1140. God and the Search for Knowledge in Medieval Cairo: Maimonides and His World (JUDS 1981I).
Interested students must register for JUDS 1981I S01

RELS 1150. Religion in the Dead Sea Scrolls.
An examination of the Dead Sea scrolls and the archaeology of Qumran with a particular focus on the religious aspects of this community. How did the authors of these scrolls envision their relationship with the divine? How did they worship? How did they understand religious and moral perfection? This class will have an additional section for graduate students. Enrollment limited to 20. WRIT

RELS 1170A. Talmudic Historiography.
Historians who turn to talmudic literature as a source for historical reconstruction are faced with formidable challenges. Although the corpus of materials is large, and the rabbis appear to provide a wealth of information pertaining to their lives and the society and times in which they
lived, they were not historians. Thus the information they provide appears within halakhic (legal) discussions or embedded in aggadic (homiletical, non-legal) digressions. Moreover, talmudic sources were edited long after many of rabbis lived and the events therein purportedly occurred.

**RELS 1170B. The Talmud (JUDS 1410).**
Interested students must register for JUDS 1410 S01

**RELS 1205. Ancient Egyptian Religion and Magic (EGYT 1420).**
Interested students must register for EGYT 1420 S01 (CRN 24435)

**RELS 1210. Religion and Gender in the Ancient Mediterranean.**
A consideration of the relationships between constructions of gender and religious systems in the Hellenistic and Roman periods, including but not limited to Christianity and Judaism. Prerequisites: courses in Early Christianity (RELS 0400 or 0410), or courses in Ancient Judaism (JUDS 0470), or courses in Greek and/or Roman religion

**RELS 1214. Divination in Ancient Mesopotamia (AWAS 1750).**
Interested students must register for AWAS 1750 S01

**RELS 1216. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (AWAS 1100).**
Interested students must register for AWAS 1100 S01

**RELS 1217. The Archaeology of Qumran and the Dead Sea Scrolls (JUDS 1450).**
Interested students must register for JUDS 1450 S01

**RELS 1218. The Archaeology of Jerusalem (JUDS 1390).**
Interested students must register for JUDS 1390 S01

**RELS 1219. The Archaeology of Palestine (JUDS 1400).**
Interested students must register for JUDS 1400 S01

**RELS 1220. Paul and the Philosophers.**
This course treats the relation of Paul "the apostle’s" thought to philosophy from two angles. The first half of the course covers modern scholarship that has found philosophical influences on the letters from Cynicism, Stoicism and later Platonism. The second half of the course surveys modern and especially recent philosophers who have used Paul’s thought including Nietzsche, Agamben, Zizek and Badiou. RELS 0400 is recommended. Enrollment limited to 20

**RELS 1225. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World (GREK 1110T).**
Interested students must register for GREK 1110T S01

**RELS 1300. Ancient Christianity and the Sensing Body.**
Bodily experience and sensory engagement became increasingly important for Christians during their first six centuries. This seminar examines how and why the body and its senses gained worth for ancient Christians as instruments for gaining knowledge of God. Prerequisites: RELS 0110, 0400 or 0410. WRIT

**RELS 1310. Ecology and Theology in Ancient Christianity.**
How did early Christians understand the relationship of humanity to the natural world, the animal kingdom, and the created order? What were the obligations and responsibilities of Christians regarding care for the world, and how did these manifest a relationship to God? Pre-requisite: RS 71 or RS 72

**RELS 1320. The Origins of Western Morality.**
How Greco-Roman and Jewish moral and ethical thought and practices were appropriated and transformed by Christianity. Special attention to Hellenistic philosophy, the Greek version of the Hebrew Bible and Christian writers in the first three centuries CE. Addresses questions about the origins of tensions and conflicts in Western morality and why sexual ethics have been so prominent and so problematic

**RELS 1330. Paul and His Interpreters.**
Paul’s writings have been central to understandings of human nature and conscience, sin and salvation, history, ethics, and human transformation. This course treats the historical Paul and his most important interpreters, especially Origen, Augustine, Martin Luther, Soren Kierkegaard, Friedrich Nietzsche, Albert Schweitzer, Rudolf Bultmann, and the use of Paul among certain contemporary European philosophers (Badiou, Zizek, Agamben)

**RELS 1335. Sacred Readings: The Bible, Biblical Interpretation, and Victorian Literature (ENGL 1561F).**
Interested students must register for ENGL 1561F S01

**RELS 1340. Romans.**
No description available

**RELS 1350. Paul and the Corinthians.**
One of the earliest documents of the Christ movement, Paul’s Corinthian letters are loaded with information about the new movement’s social conditions, religious practices and ideas. Gender, men and women; sexual issues, conflicts over religious practices and ideas (e.g., Christ; spirit; resurrection; pneumatic life; sacrificial meals; the “Lord’s Dinner”; prophecy); ideals and realities of community are some of the letter’s issues. This seminar will introduce students to the text and scholarly debates about its interpretation and use for religious history. Participants will then be able to focus on individually chosen research topics in the context of the seminar’s discussion

**RELS 1355. Parting of the Ways: The Separation of Judaism and Christianity (JUDS 1981D).**
Interested students should register for JUDS 1981D S01

**RELS 1356. Imposing Orthodoxy: “Jews,” “Pagans” and “Heretics” when Constantinian Christianity Won (HMAN 1970I).**
Interested students must register for HMAN 1970I S01 (CRN 25390)

**RELS 1360. Gnosticism: Studies in Early Christian Diversity.**
Before the emergence of Christian “orthodoxy,” from the second to the fourth centuries, Christianity often adopted unusual modes of expression. This course offers an examination of some of these different forms of Christianity, as Christians attempted to balance issues of self-identity and self-definition with compromise and cultural accommodation. Examining early Christian “heretics” as case-studies, this course will focus on reading second-century texts from the Nag Hammadi Library and learning what we can about the communities that produced them. Prerequisite: one course in New Testament or Christian Origins. If the course is oversubscribed, priority will be given to graduate students and Religious Studies concentrators. Prerequisite: RELS 0400 or equivalent. WRIT

**RELS 1365. Catacomb Religion: Ordinary Christianity in the Age of Constantine.**
The history of Christianity has often been the history of doctrine, the development of scripture and institution and canon, not the history of human experience. This course looks into what it meant to be Christian in the first centuries of Christianity’s development, through taking literally a “subterranean view” on the surprising things that “being Christian” meant to ordinary individuals – men, women and children – in the city’s underground spaces where this religion flourished. Prerequisite: RELS 0110 or 0400 or 0410 or 1300. Enrollment limited to 20

**RELS 1370A. Augustine and Hegel.**
A theoretical comparison of Augustine of Hippo and G.W.F. Hegel, highly influential thinkers at different turning points in Western history, on various facets of their understanding of religion. Potential themes for comparison include the relationship between Christian faith and philosophy, God and the world, and religion in history and society. WRIT

**RELS 1370B. Philosophy of Mysticism.**
Covers important attempts to understand the nature of religious experiences and mysticism. We will look at several philosophical issues surrounding religious experience, including: (a) whether mystical experiences are too private for outsiders to understand or evaluate them; (b) what the relationship between religious experiences, language, and culture is; (c) whether religious experiences justify religious beliefs; and (d) how gender and religious experiences are related. We will treat theorists from various perspectives, including philosophical, historical, theological, psychoanalytic, and neuroscientific. Previous work in philosophy courses (or philosophically-intensive courses) is highly recommended. Enrollment limited to 20

**RELS 1370C. David Hume and Religion.**
This course will consider and challenge traditional scholarly views of philosopher David Hume as a critic of Christianity, by examining a wide range of his writings (letters, historical writings, moral enquiries, philosophical and religious writings). How might his corpus inform work in
philosophy of religion? Previous coursework in philosophy or philosophy of religion strongly advised. Enrollment limited to 20

RELS 1400. The Huai-Nan Tzu.
This course will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the Huai-nan Tzu. Prerequisites: prior study of Taoism at the university level in such courses as RS188.23 (2001), Rs0088.18

Entails a careful reading of the entire text of the Chuang Tzu in translation. Secondary sources on the philosophy and textual criticism of the book- drawn from the writings of Graham, Liu Hsiao-kan, Ivanhoe, Mair, Roth, and others—are also read. Seminar format. Prerequisites: RS 88 Sec 18 or RS 88 Sec 23

RELS 1415A. Classical Daoist Thought.
Considers philosophical issues in early Daoism. We will work with classical texts such as Guanzi's "Inward Training," the Laozi, the Zhuangzi, and the Huainanzi and examine issues in them that have been of interest to comparative philosophers, such as cosmology and cosmogony, the nature of religious experience, and the types of implicit and explicit moral thought. The course will feature primary works in translation and secondary works by authors such as Graziani, Ivanhoe and Kjellberg, Moeller, Ames, Yearle, Raphals, Cook, Roth, and Slingerlands. Prerequisites: RELS 0040 and 0120. Enrollment limited to 20

RELS 1420. Earliest Taoist Syncretism.
A seminar on the early history of the Taoist tradition that explores the syncretic Taoism of the Han dynasty known as "Huang-Lao." Focuses on representative texts, analyzing them for evidence of the tradition’s unique blend of spiritual practice and political thought. No previous course work required, but preference given to students who have a demonstrable interest in the subject or prior course work in religious studies or East Asian studies.

RELS 1430. Classics of East Asian Buddhism.
An opportunity to read and understand the canonical texts of East Asian Buddhism. Through close reading, written analysis, and discussion, participants will become conversant with the major Mahayanb Buddhist teachings in their original scriptural or literary articulations. Selected later interpretations may also be considered. All readings are in English translation. Previous study of Buddhism is recommended, but not required. Enrollment limited to 20 students. WRIT

RELS 1435. The Confucian Mind (EAST 1420).
Interested students must register for EAST 1420 S01

RELS 1440. Themes in Japanese Buddhism.
An exploration of critical themes and debates in the study of Japanese Buddhism. Participants become conversant with the key features of medieval Japanese thought as well as the strengths and weaknesses of established conceptual models in Japanese Buddhist studies. Readings include primary texts in English translation and modern secondary interpretations. Recommended: a course in Buddhism or East Asian religions

RELS 1441. Zen Meditation in China, Korea, and Japan.
Intensive study of the development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Examines both koan and silent illumination methods. Weekly seminars on representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students register for both seminar and lab. Topic for 2012: Chinese Chan. Prerequisite: EAST 1950F, 1950S, RELS 0040, 0100, 0500, 1430, 1440, or UNIV 0540; or instructor’s permission. Enrollment limited to 20

Interested students must register for EAST 1950Z S01 (CRN 15963)

RELS 1445S. The History, Philosophy, and Practice of Rinzai Zen Buddhism (EAST 1950S).
Interested students must register for EAST 1950S S01

RELS 1445T. The Karma of Words (EAST 1950T).
Interested students must register for EAST 1950T S01

Interested students must register for EAST 1400 S01

RELS 1520. Pilgrimage and Sacred Travel in the Lands of Islam.
This seminar focuses on pilgrimage and travel to loca sancta in the Islamic world. We will read travelogues and pilgrimage manuals in translation, and will address theoretical and anthropological studies on the phenomenon of pilgrimage and sacred travel in a variety of geographical and chronological contexts. We will study physical, artistic, and architectural aspect of pilgrimage shrines. Enrollment limited to 20 students

RELS 1530A. Methods and Problems in Islamic Studies: Narratives.
Examines the problem of historical thinking and writing in the first six centuries of Islam. It will specifically emphasize the rise and development of Islamic narratives as they are discussed in contemporary scholarship on how to "do" Islamic studies. As such, we will discuss, in depth, theoretical issues pertaining to source criticism, Orientalism, the Cultural Turn, anthropology, and narrative. Enrollment limited to 20 students. DVPS LILE

RELS 1530B. Methods and Problems in Islam: Heresy and Orthodoxy.
Orthodoxy is defined as "right belief" while Heresy is just the opposite, but those definitions have always been in tension with society and culture. This course will interrogate theory and history to ask "What are Islamic Orthodoxy and Heresy?" From Islamic Law to who is or is not a "heretic" we will uncover interpretations of religious law, practice, and culture to learn how scholars apply orthodoxy or heresy to disrupt and unsettle notions of what "Islam" was at different moments, and how their interpretations force us to think of new ways to envision the formation of communities. Enrollment limited to 20 students. DVPS LILE

RELS 1540. Monks, Mystics and Martyrs: Abrahamic Traditions Compared.
This course explores the process of "standing out" from mainstream society, from traditional kinship relationships, from local practices of community and economic production, undertaken by ascetics and mystics in the three Abrahamic traditions. We will explore monasticism and mysticism in Judaism, Christianity, and Islam, from the period of late antiquity to the high Middle Ages. Using primary sources in translation and scholarship on the phenomena of asceticism and mysticism, we will address the motivations for and manifestations of non-traditional practices of worship and community-building in the Mediterranean and Middle-Eastern world

Interested students must register for JUDS 1530 S01 (CRN 23669)

RELS 1610. Sacrifice and Society.
Investigation of the sacrificial practices and ideologies that have been important to numerous unrelated societies. The origin and significance of animal sacrifice has been a central question for classical social theory (e.g., Durkheim, Freud, Mauss) and is still important for theorization in anthropology and religious studies. Probable examples include Israelite, Greek, Hawaiian, Christian, Nuer

RELS 1620. Disability in Antiquity.
An investigation into the ways in which physical deformities and mutilations are represented in texts from ancient Israel, Mesopotamia, Greece, and other Mediterranean cultures. Primary focus: texts of the Hebrew Bible

RELS 1730. Religion and Ethics in Public Life.
Religious traditions and moral identity; secular liberalism versus religious nationalism; universal and particular loyalties; "fundamentalism," gender, and religiously inspired violence. Priority given to concentrators in religious studies, political science, and international relations. Prerequisite: previous work in ethics

Interested students must register for ENVS 1550 S01

RELS 1740. Religion, Ethics, and Politics.
Religious traditions and moral identity; secular liberalism versus religious nationalism; universal and particular loyalties; "fundamentalism," gender,
and violence. Priority given to concentrators in religious studies, political
science, and international relations

RELS 1742. Conflicts, Diasporas and Diversities: Religion in the Early
Portuguese Empire (POBS 1600U)
Interested students must register for POBS 1600 S01

RELS 1745. Religion, Secularization, and the International (HMAN
1970A).
Interested students must register for HMAN 1970A S01

Interested students must register for HMAN 1970K S01 (CRN 25392)

RELS 1750. Reason Within the Bounds of Religion.
Is religious belief reasonable? Does it need to be? Can it respond to the
challenges of scientific traditions of Marxism or Durkheim? In order to be
intellectually defensible and morally respectable, does religion require
experts—professionals of various stripes—to adjudicate its truth claims?
This course on religious thought and truth claims

RELS 1760. Religion and Suspicion.
Religion has arguably been the classical locus of suspicious models of
interpretation. Social and critical theorists from Marx to Foucault have
argued that we only understand what religion really does if we interpret it
with suspicion—if we refuse to take its claims at face value. Others have
sought to redirect suspicion back against suspicion itself, and religious
thinkers have sought to incorporate critiques of religion into their own
theological projects. This seminar studies key figures in this complex
interplay of religion and suspicion. Likely readings from Feuerbach,
Marx, Nietzsche, Barth, Horkheimer, Adorno, Gadamer, Foucault, Said,
Gutérez, Schüssler-Fiorenza, and Butler. Enrollment limited to 20

RELS 1780. Religion and Naturalism.
What is nature? Is nature all there is? In what ways, if any, should the
study of religion be in principle different from the study of nature? This
course will survey some of the varieties of philosophical naturalism, both
historical and contemporary. Drawing a distinction between substantive or
metaphysical naturalism and methodological naturalism, it will examine
the arguments made on behalf of naturalism and explore its implications for
religion

This seminar examines a range of the most influential criticisms of human
rights; assesses several proposed theories of human rights; surveys the
approach of several religious traditions toward justifying human rights; and
considers a range of issues within contemporary debates, such as
religious freedom, minority group rights, women’s human rights, and the
role of religion in politics

RELS 1830. Religion, Politics, and Culture in America, 1600 - Present
(HIST 1801).
Interested students must register for HIST 1801 S01 (CRN 15289)

Interested students must register for HIST 1800 S01 (CRN 24755)

RELS 1880A. The Gift in Antiquity.
This course is an interdisciplinary and cross-cultural examination of gift-
giving in antiquity, with a focus on the Mediterranean in late antiquity.
We will examine a range of gift-giving activities, such as sacrifices (gifts
to the gods), civic donations, and almsgiving. Several visiting lecturers
will participate in the course, and it will culminate in an international
conference to take place at Brown

RELS 1880B. Politics and Authority in Islamic Law and Society
(HMAN 1970Y).
Interested students must register for HMAN 1970Y S01

RELS 1990. Individual Study Project.
Directed reading and research arranged with individual faculty. Section
numbers vary by instructor. Please check Banner for the correct section
number and CRN to use when registering for this course

Required of seniors in the honors program. Open to others only by
permission of the chair of the department. Section numbers vary by
instructor. Please check Banner for the correct section number and CRN
to use when registering for this course

Critical examination of major approaches to the study of religion, especially
those of the anthropology and the history of religions, with attention to issues in current debate

RELS 2050. Methods in Ancient History (HIST 2970I).
Interested students must register for HIST 2970I S01

RELS 2100A. Early Jewish Prayer.
An examination of prayer from the Hebrew Bible to late Antiquity. Will
look at actual liturgies, writings about prayer and ancient and modern
 theorizations of prayer. Knowledge of Hebrew and Greek helpful

RELS 2100B. Exegesis at Qumran.
Focuses on Hebrew exegetical texts such as the Temple Scroll, MMT,
4QJub, CD. Intended for doctoral students and others with sufficient
knowledge of Hebrew

RELS 2100C. 1 and 2 Kings.
Translation and exegesis of Kings. Intended for those with advanced Hebrew

RELS 2100D. Disappearance of Jewish Diaspora.

RELS 2100E. Literature of the Early Second Temple Period.
A close reading of selections from surviving literary texts of the late sixth
century (e.g., Isaiah 56-56, Zechariah 1-8, Haggai) and and the fifth
century (Ezra-Nehemiah, Malachi). Prerequisite: An advanced knowledge
of biblical Hebrew and permission of the instructor

Survey of Ugaritic grammar followed by readings in mythic and epic
literature (e.g. the Baal Cycle, Kita, Aqhat) and ritual texts. Prerequisite:
Knowledge of the grammar of one Semitic language. Open to graduate
students only

Readings in the Mishnah and related rabbinic literature. While the focus
will be on gaining textual skills, we will also survey academic approaches
to the Mishnah: What is the Mishnah and its relationship to earlier and
contemporary texts? How was it composed, transmitted, and received?
Prerequisite: Reading knowledge of Hebrew

RELS 2100H. Pro-Seminar on the Study of Jews and Judaism in the
Greco-Roman Mediterranean.
A graduate level introduction to the study of Jews and Judaism in the
Mediterranean orbit from the Hellenistic period through the late Roman
Empire. Topics include overviews of sources, materials, methods and
theories, including current debates about terminology (Jews/Judeans/
Judaism). Required of all RAM graduate students admitted in 2011 and
after. Not open to undergraduates. 999999

RELS 2110A. Religion and Romanticism: Religious Nature and Nature
Religion.
This seminar investigates the intersection and transformation of religion,
democracy, and the environment in German, English, and American
Romanticism

RELS 2150. Targumic Aramaic.
Introduction to Targumic Aramaic grammar with readings from Targum
Ongelos. Assumes knowledge of Hebrew

RELS 2160. Aramaic Readings.
A survey of epigraphic and biblical Aramaic intended for doctoral students
and others with sufficient background in Aramaic grammar

RELS 2200A. Apocryphal Acts.
No description available

RELS 2200B. Asceticism.
A study of Eastern Christian asceticism between the late 3rd and early
6th centuries: forms, motivations, theological understandings, and cultural
impact. Organized by region: Egypt, Cappadocia, and the Syrian Orient

RELS 2200C. Seminar in Early Christianity: Cappadocians.
Basil of Caesarea, Gregory of Nazianzus, and Gregory of Nyssa. The
seminar will consider their impact in three areas: the formation of a
Christian culture within the Roman socio-political realm; the theological
debates on Trinitarianism, Christology, and the nature of the human
person; and the Christian contemplative tradition
RELS 2200D. Christianity in the Late First and Early Second Centuries.
An assessment of the evidence for actual early Christian groups and authors, with particular attention to texts such as 1 and 2 Clement, the Shepherd of Hermas, Didache, the Ignatian corpus, as well as canonical texts likely to have been produced in this same period (e.g. Luke and Acts, the Pastoral Epistles, 1 and 2 Peter, etc.). Not open to undergraduates.
Compentence in Greek required

RELS 2200E. Christianizing Antioch.
Antioch from the first century CE until the Muslim conquest in the seventh, as Christians first utilized the city and its resources for their own formative developments, and then came to assume ascendency over its society, culture, and landscape as the Roman Empire took on its Christianized identity

RELS 2200F. Early Christian "Apocalypticism".
A critical investigation of the concept and category of apocalypticism as used in the study of early Christian literature and Jewish antecedents

RELS 2200G. Gospel of John.
An intensive professional-level study of the Gospel according to John. Competence in Greek is required. Not open to undergraduates

RELS 2200H. Ancient Christian Narratives about Jesus.
No description available

RELS 2201. Paul’s Letter to the Romans.
No description available

RELS 2202J. The Virgin Mary in Late Antiquity.
A study in the developing theological and devotional traditions regarding Mary the Mother of Jesus, focusing on the fourth through the sixth centuries A.D. Major theological positions; relationship to pre-existing civic cults and goddess traditions; the role of popular violence in the Marriologial definitions of the Council of 431; imperial Marian piety; Marian relics; Mary as cultural metaphor

RELS 2203K. Issues in Pauline Studies.

RELS 2204L. Historiography of Earliest Christianity.

RELS 2205M. Early Christian Hymnography.
Select examples of early Christian hymnography, 2nd-6th centuries. Particular attention to poetic forms, types of content, ritual contexts and functions, and performative elements. Weekly readings in Greek

RELS 2205N. Roman Religions.
This course will examine some of the various religious options open to citizens of the Roman Empire. Special attention will be paid to the so-called "oriental" cults of the high Empire: Magna Mater, Isis, and Mithraism. Evidence will be drawn from literary sources, but also epigraphy, archaeology and material culture. Drawing on contemporary scholarship, attention will also be paid to the historiographical construction of the category of ancient religion (i.e., what's "religious" about Roman religions?) Subcategories for analysis will include religion and imperialism; colonization, assimilation and hybridity, and ancient identity construction

RELS 2205P. Esotericism in the Ancient Mediterranean and Earliest Christianity.
This seminar will investigate the literary and other secret and revelatory practices of various groups as a context for understanding similar esoteric practices in early Christianity. The literature considered will include Orphic, Pythagorean, later Platonist, and Jewish examples and practices such as allegorical reading, symbolic interpretation and literary prophecy. Open to graduate students only

RELS 2205Q. Readings in Syriac.
Dramatic narratives in liturgical poetry. Readings from Cyriliconas and Jacob of Serug

RELS 2205R. Lived Religion in the High Empire and Late Antiquity.
This graduate course will use the theoretical work of Robert Orsi and Michel de Certeau to recover aspects of "lived" or "quotidian" religious experience in the High Roman Empire and Late Antiquity, particularly (but not exclusively) in the city of Rome. We will use as our data set not only textual sources in the original language and translation, but also elements of material culture (amulets, pyxides, reliquaries, crepundia, textiles, sorts, etc.), funerary epigraphy, and papyri

RELS 2210. Greek Palaeography and Premodern Book Cultures (GREK 2110F).
Interested students must register for GREK 2110F S01

RELS 2300A. Seminar: Early Taoist Thought.
The foundational philosophical texts of the Taoist tradition will be read in Classical Chinese and analyzed from a number of possible perspectives including comparative religious thought, and historical and textual criticism. Texts for each year's version of the course will be drawn from the following list: Chuang Tzu, Lao Tzu, Huang-Lao po-shu, Lü-shih ch'un-ch'iu, Han-fei Tzu, Kuan Tzu, and Hua-nan Tzu. Pre-requisites: reading knowledge of Classical Chinese and prior study of Taoist thought. Advanced undergraduates may be admitted

RELS 2300B. Hua-nan Tzu.
No description available

RELS 2400A. Jewish and Christian Women in Greco-Roman Antiquity.
A professional introduction to the textual, documentary and inscriptive evidence for Jewish and Christian women in the Greco-Roman Mediterranean, with particular attention to methodological and theoretical issues

RELS 2400B. Religion and Society in Lucian of Samosata.
No description available

RELS 2400C. Moral and Religious Economies of Graeco-Roman Households.
No description available

RELS 2400D. Orthodoxy in Antiquity.
Examines the concept of "Orthodoxy" in ancient Mediterranean religion, with a focus on the development of Jewish orthodoxies from the third century BCE to the seventh century CE. How and why are orthodoxies and heresies created? Knowledge of at least one ancient language (typically Hebrew or Greek) required

RELS 2400E. Pseudepigrapha.
A professional level introduction to a variety of ancient Jewish and/or Christian texts commonly, if imprecisely, known as "The Pseudepigrapha"

RELS 2400F. Pro-Seminar in Greek and Roman Religion and Philosophy.
A graduate level introduction to Greek and Roman religion with a focus upon the Hellenistic period and the Roman Empire and to Hellenistic and Post-Hellenistic philosophy. Topics include the critical use of sources, methods and the synthesis and theorization of the phenomena. Required of RAM graduate students

RELS 2450. Exchange Scholar Program.

RELS 2500. Religion, Culture and Comparison: Description, Redescription and Comparison.
This seminar treats theory formation in the study of religion together with issues regarding cross cultural and trans. historical comparison and translation. Readings will include both theoretical and methodological writings and examples drawn from ethnography and history such as the phenomenon of animal science

This seminar investigates theories of religion and modernity in the work of Durkheim, Weber, and Dewey

RELS 2600B. Hume and Kant on Ethics and Religion.
No description available

RELS 2600C. The Emergence of Modern Liberal and Communitarian Thought.
Throughout our country’s history liberal (individualist, rights-based) and communitarian (community centered) models of society have at times clashed. Our present age is one of those times. What are the historical origins of these two models? And what are some ways in which commitment to both models can be maintained, even in light of their potential conflict? These questions will be pursued

RELS 2600D. Pragmatism and Religion.
Readings in the original American pragmatists and their recent admirers with special attention to the topic of religion
Renaissance and Early Modern Studies

Concentration Requirements

The Program in Renaissance and Early Modern Studies (REMS) encourages students to pursue interdisciplinary and multidisciplinary approaches to the study of Europe and its relation with the Americas and Asia in the early modern period. Students focus on the late fourteenth through the late eighteenth centuries time marked by scientific and agricultural revolutions, the Reformation, the development of capitalism, and the rise of cultural forms such as the novel, opera, Grub Street journalism and the art market. Concentrators examine the development of new cultural and political forms through the imitation and reworking of those of classical antiquity, the restructuring of patriarchal society, and the emergence of the sovereign nation state. Students take courses in more than a dozen departments affiliated with REMS.

Sponsoring departments include: Africana Studies, Archaeology and the Ancient World, Classics, Comparative Literature, English, French Studies, Hispanic Studies, History, History of Art and Architecture, History of Mathematics, Italian Studies, Judaic Studies, Music, Philosophy, Portuguese and Brazilian Studies, Slavic Languages, and Theatre Arts and Performance Studies. Students are invited to take advantage of this breadth of offerings in order to enhance their understanding of the period, as well as to gain a sense of the uses, limitations, and interrelationships of particular disciplinary approaches.

Requirements:

Concentrators are required to take a minimum of 8 courses. These include the following:

1. Three courses on Renaissance and/or early modern topics in one field in which the student has primary interest or training, (for example, literature, history of art and architecture, or history).
2. Three courses related to the Renaissance and/or early modern period chosen from two other fields.
3. A senior project. (Credit will be granted through registration for Independent Study in the department in which the topic of research lies.)
4. Another relevant course of the student’s choosing.

In addition, the student must be able to demonstrate a reading knowledge of a relevant modern or ancient language other than English. This language requirement does not count as one of the 8 courses.

Students should contact the director of the program to discuss courses which are approved for the concentration in Renaissance and Early Modern Studies.

Courses

REMS 0101. Word, Image and Power in Renaissance Italy (ITAL 0580).
Interested students must register for ITAL 0580 S01
REMS 0250. Introductory Seminars in Medieval and Early Modern Literatures and Cultures (ENGL 0250).
Interested students must register for ENGL 0250 S01
REMS 0250F. Shakespeare’s Present Tense (ENGL 0250F).
Interested students must register for ENGL 0250F S01
REMS 0250G. The Green Renaissance (ENGL 0250G).
Interested students must register for ENGL 0250G S01
REMS 0400A. Introduction to Shakespeare (ENGL 0400A).
Interested students must register for ENGL 0400A S01
Science and Society Concentration

Requirements

Science and Society is an interdisciplinary concentration that examines the processes of scientific discovery and the establishment of scientific policies and systems of belief from historical, philosophical, anthropological, and sociological perspectives. Concentrators analyze the practices, norms, and values that reflect and shape our deepest convictions about what is considered "science." Students select courses in the physical sciences, life sciences, or mathematics and choose a thematic track that may include the history and philosophy of science, gender and science, race, science and ethnicity, health and medicine, environment and society, or they may create their own independent focus. Science and Society prepares students to follow, guide, and shape scientific knowledge as it travels from the laboratory into the public arena.

Requirements

Consisting of 12 courses, the program of study outlined below will be developed by each student in consultation with the concentration advisor. Where appropriate, independent reading, lab courses or GISPS may count for up to three of the twelve total courses. Students will take a minimum of 7 intermediate to advanced courses.

Required Courses (2)

The concentration has two required courses.

• SCSO 1400: Science and Society: Theories and Controversies, or equivalent introductory course: usually taken in the second or third year.
• SCSO 1900: Senior Seminar, also open to non-majors with the proper background, usually taken senior year.

Thematic Track (3)

Students will organize their course of study around the choice of a thematic track. The theme may be thought of as the applied content portion of the concentration. Students will take a minimum of three courses, at least one of which must be at an advanced level, in one of the thematic areas listed below:

• History & Philosophy of Science
• Gender & Science
• Race, Science & Ethnicity
• Health & Medicine
• Representing Science in Literature & Culture
• Policy, Persuasion & the Rhetoric of Science
• Environment & Society
• Independent Focus

Science Track (4)

Students will take a minimum of four courses in one of the following scientific areas: physical sciences, life sciences, mathematics/computer science. The chosen area should provide appropriate background and support for the chosen concentration theme. The science courses will be sequenced such that a concentrator will move enough beyond the introductory level to gain some understanding of the world view of scientists within a chosen field. The particular sequence of courses which best meets the science requirement will be chosen in consultation with
the concentration advisor. When necessary, the concentration advisor will seek guidance from faculty within the chosen scientific field.

Science and Technology Studies Theory (3)

Students will take three Science and Technology Studies-related courses in the social sciences and humanities. These courses, which will provide critical theoretical background for the study of Science and Society, should address questions of historiography, epistemology and methodology in the field of science and technology studies. A full list of such courses and sample concentrations may be found at http://www.brown.edu/Faculty/COSTS.

Honors

To qualify for Honors a student must:

1. Apply for candidacy for Honors by the end of the student’s seventh semester.
2. Maintain a high level of excellence in courses within the concentration and above average performance in non-concentration courses. In the event that a student has taken a number of courses S/NC he or she will submit CPR’s for consideration by the concentration advisory committee, which will evaluate the student’s candidacy.
3. Complete an Honors Thesis judged by the advisor and an additional reader to be of superior quality.
4. Deliver an oral presentation based on thesis work that is favorably reviewed by the concentration faculty and the advisory committee.

Courses

SCSO 0050C. Illustrating Knowledge (HIAA 0050C).
Interested students must register for HIAA 0050C S01

SCSO 0050D. Astrology, Magic, and Science (JUDS 0050D).
Interested students must register for JUDS 0050D S01

Interested students must register for ENVS 0110 S01 (CRN 14481)

SCSO 0130. Critical Reading and Writing II: The Research Essay (ENGL 0130).
Interested students must register for ENGL 0130

SCSO 0150L. Gritty Cities (AMST 0150L).
Interested students must register for AMST 0150L S01

Interested students must register for GEOL 0160F S01

SCSO 0170. Biotechnology in Medicine (BIOL 0170).
Interested students must register for BIOL 0170 S01

SCSO 0210. Science, Perception and Reality (PHIL 0210).
Interested students must register for PHIL 0210 S01

SCSO 0230. Digital Media (MCM 0230).
Interested students must register for MCM 0230 S01

SCSO 0250F. Man and Machine (ENGL 0450F).
Interested students must register for ENGL 0450F S01 (CRN 14343)

SCSO 0300. Culture and Health (ANTH 0300).
Interested students must register for ANTH 0300 S01

SCSO 0300B. Environment and Society (SOC 0300B).
Interested students must register for SOC 0300B S01

SCSO 0360. Early Modern Philosophy (PHIL 0360).
Interested students must register for PHIL 0360 S01

Interested students must register for ENVS 0455 S01

Interested students must register for ENVS 0490 S01

SCSO 0510. Problems in International Environmental Policy (ENVS 0510).
Interested students must register for ENVS 0510 S01 (CRN 14721)

SCSO 0700. Psychoactive Drugs and Society (NEUR 0700).
Interested students must register for NEUR 0700 S01

SCSO 0800E. Race and Imagined Futures (MCM 0800E).
Interested students must register for MCM 0800E S01

SCSO 0901L. Body Count: Technologies of Life and Death (MCM 0901L).
Interested students must register for MCM 0901L S01 (CRN 23876)

Interested students must register for POBS 0910 S01 (CRN 15049)

SCSO 0990J. Body and Society: Medicine and Medical Ethics in the Pre-modern World (JUDS 0990J).
Interested students must register for JUDS 0990J S01

SCSO 1000. Gender, Science, and Society.
This seminar introduces students to interdisciplinary approaches to the role of gender in science and society. It uses an integrated natural and social scientific Problem-Based Learning pedagogy to explore real-world problems like validating knowledge about sexual difference, the relationship between politics and science, and the characterization of biomedical disorders like hormone imbalance and depression. The class will be broken into groups that evenly consist of natural and social science concentrators in order to approach problems from natural and social scientific perspectives. Students will learn critical scholarship including gender studies, feminist theory, and science and technology studies.
Enrollment limited to 40

SCSO 1010. Classical Sociological Theory (SOC 1010).
Interested students must register for SOC 1010 S01

SCSO 1020. AIDS in Global Perspective (ANTH 1020).
Interested students must register for ANTH 1020 S01

SCSO 1060L. Africana Philosophy of Religion (AFRI 1060L).
Interested students must register for AFRI 1060L S01

SCSO 1060M. African Environmental History (AFRI 1060M).
Interested students must register for AFRI 1060M S01

Interested students must register for AFRI 1060Q S01

Interested students must register for HIST 1140 S01 (CRN 24739)

Interested students must register for HIST 1190 S01 (CRN 15313)

SCSO 1200. Race, Science, and Society: Genomics and Beyond.
Why are drugs being marketed as racial savors? What does biotechnology have to do with race? This course introduces students to interdisciplinary approaches to the study of race in science and society as an integrated natural and social scientific endeavor. Using a team-based pedagogy, interdisciplinary groups of natural and social science concentrators will explore real-world problems like validating knowledge about racial difference, the relationship between politics and science, and the newest findings in such scientific fields as anthropology, epidemiology, and cognitive science. Intended for seniors who are interested in race and STS, the course will give priority enrollment to students who co-enroll in BIOL 0310, 0400, 0470, 0480, or have taken similar Biology courses.
Enrollment limited to 40. S/NC

SCSO 1201C. Imagined Networks, Glocal Connections (MCM 1201C).
Interested students must register for MCM 1201C S01

SCSO 1250. Perceptions of Mental Illness (SOC 1250).
Interested students must register for SOC 1250 S01

SCSO 1310. International Health: Anthropological Perspectives (ANTH 1310).
Interested students must register for ANTH 1310 S01

What is "science"? How do scientific ideas become knowledge? What is the nature of scientific objectivity, and how can it be compromised? What is a scientific community, scientific consensus, and scientific authority? What roles does science play in our culture, and how is science related to
other social institutions and practices (e.g., government, military, business, education, medicine, law, art)? The interdisciplinary field of science studies is introduced through exploration of topics that include: gender and race, psychiatric classification, the drug industry, science and religion, and the use of nuclear weapons during WWII. Enrollment limited to 30 sophomores, juniors and seniors; others may enroll with permission of the instructor. WRIT

SCSO 1401. Sustainable Design in the Built Environment (ENVS 1400).
Interested students must register for ENVS 1400 S01 (CRN 14881).

Interested students must register for ENVS 1410 S01 (CRN 24191).

Interested students must register for ENVS 1455 S01.

SCSO 1490. History of Medicine I: Medical Traditions in the Old World Before 1700 (HIST 1490).
Interested students must register for HIST 1490 S01.

SCSO 1491. History of Medicine II: The Development of Scientific Medicine in Europe and the World (HIST 1491).
Interested students must register for HIST 1491 S01.

SCSO 1502H. Information, Discourse, Networks (MCM 1502H).
Interested students must register for MCM 1502H S01.

SCSO 1502X. Race and/as Technology (MCM 1502X).
Interested students must register for MCM 1502X S01.

SCSO 1520. Technology and Material Culture in America: The Urban Built Environment (AMST 1520).
Interested students must register for AMST 1520 S01.

SCSO 1550A. Objectivity and its Loss.
The nature and limits of objectivity in the context of biomedical practices and institutions. Topics will include: conceptions of objectivity, conflict of interest, inappropriate influence, individual ethical failings, cognitive biases, and other linguistic and social sources of error and bias. Emphasis on identifying strategies for counteracting the various threats to objectivity. SCOS 0490 or consultation with the instructor are strongly recommended.

SCSO 1550B. Neuroethics.
In this course, we will examine ethical, social, and philosophical issues raised by developments in the neurosciences. Topics will include: neurodevelopment and the emergence of persons; the impact of child abuse on brain development; aging, brain disease, and mental decline; life extension research; strategies and technologies for enhancement of human traits; “mind-reading” technologies; agency, autonomy, and excuse from responsibility; error and bias in memory; mind control; neuroscientific and evolutionary models of religious belief and moral judgement. Enrollment limited to 20. SCSO 1400 is recommended but not required. Written permission required.

If the class is oversubscribed, preference will be given to Science and Society concentration candidates.

SCSO 1550D. Biomedicalization: The Body as a Social Problem.
Why are more and more aspects of daily life seen as biomedical problems? What are the social processes and political effects that motivate people to view the body this way? This course explores how contemporary health and behavior conditions are being defined and treated by analyzing biomedical research, health, and bodily knowledge in its various institutional formations: governmental knowledge, health policy, capital markets, and popular culture. Recommended prerequisites for the course are either one course in medical sociology or anthropology (e.g. Culture and Health) or one in science studies (e.g. Introduction to Science and Society). Enrollment limited to 40.

SCSO 1550E. Science and Religion.
An examination of relationships between science and religion. Topics will include: what is science?, what is religion?, are science and religion necessarily in conflict, or are they independent or perhaps mutually sustaining and complementary institutions?, what is the importance of developments in science (e.g., cosmology, particle physics, evolutionary theory, cognitive neuroscience) for religious beliefs about deities, human nature, morality, and the place of humans in the world?, how are tensions between science and religion manifested in contemporary cultural debates (e.g., science education, sex education, abortion, cloning, terrorism)? Enrollment limited to 20. SCSO 1400 recommended but not required. Instructor permission required.

Interested students must register for ENVS 1550 S01.

Interested students must register for ENVS 1560 S01.

SCSO 1560R. From Frankenstein to Einstein: Literature and Science from 1800 to 1950 (ENGL 1560R).
Interested students must register for ENGL 1560R S01.

SCSO 1561H. The Brain and the Book: Thinking and Reading in the Victorian Novel (ENGL 1561H).
Interested students must register for ENGL 1561H S01.

SCSO 1590. Philosophy of Science (PHIL 1590).
Interested students must register for PHIL 1590 S01.

SCSO 1600. Astronomy Before the Telescope (AWAS 1600).
Interested students must register for AWAS 1600 S01 (CRN 24432).

SCSO 1620. Philosophy of Quantum Mechanics (PHIL 1620).
Interested students must register for PHIL 1620 S01.

SCSO 1650. Time in the Ancient World (AWAS 1650).
Interested students must register for AWAS 1650 S01 (CRN 15127).

SCSO 1670. Time (PHIL 1670).
Interested students must register for PHIL 1670 S01.

SCSO 1700. Astronomy, Divination and Politics in the Ancient World (AWAS 1700).
Interested students must register for AWAS 1700 S01.

SCSO 1700A. Cultural Competence and Ethics (ENVS 1700A).
Interested students must register for ENVS 1700A S01.

SCSO 1700W. Privacy in Networked Society (PPAI 1700W).
Interested students must register for PPAI 1700W S01.

SCSO 1701G. Science and Technology Policy in the Global South (PPAI 1701G).
Interested students must register for PPAI 1701G S01.

Interested students must register for ENVS 1720 S01 (CRN 24195).

SCSO 1740. Politics of Food (POLS 1740).
Interested students must register for POLS 1740 S01.

Interested students must register for HIST 1790 S01.

SCSO 1800. Cross-Knowledge: Contemporary Indigenous Knowledges (IKS) and the Sciences.
For scholars and practitioners in many fields of natural and social sciences, engineering and technology, and the humanities, an understanding of indigenous knowledges (IKS) and their interaction with other forms of knowledge is becoming imperative. Using theoretical frameworks from an interdisciplinary literature and practitioners’ thinking, as well as cases, this seminar will be a rigorous critical introduction to IKS in contemporary life, probing a variety of locales and epistemic spaces where IKS and sciences coexist: learning about and interrogating ways to study indigenous knowledges; and thinking about practice where different knowledges and technologies “cross”. Four graded writing/digital assignments; no prerequisites. Enrollment limited to 40.

SCSO 1870L. Contested Environmental Illness-Research Seminar (SOC 1870L).
Interested students must register for SOC 1870L S01.

SCSO 1871L. Law, Innovation and Entrepreneurship (SOC 1871L).
Interested students must register for SOC 1871L S01.

SCSO 1900. Senior Seminar in Science and Society.
This is an advanced seminar that uses a Problem Based Learning style pedagogy to explore real-world problems in STS. To solve assigned problems students will want to explore critical scholarship in areas such as laboratory studies, feminist science and technology studies, the
rhetoric and discourse of science and technology, expertise and the public understanding of science. Course is intended for Science and Society senior concentrators, but is open to others with appropriate background. Enrollment limited to 20.

SCSO 1920B. Health Inequality in Historical Perspective (BIOL 1920B).
Interested students must register for BIOL 1920B S01

SCSO 1920D. Race, Difference and Biomedical Research: Historical Considerations (BIOL 1920D).
Interested students must register for BIOL 1920D S01 (CRN 15192)

Interested students must register for GNSS 1960B S01

Interested students must register for GNSS 1960C S01

Independent reading and research work in Science and Society is available to students who have completed introductory and intermediate level work in Science and Society. A decision to enroll must be made via consultation with the concentration advisor and the faculty advisor for the course. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: SCSO 1400. Open to junior and senior concentrators in Science and Society; instructor permission required. S/NC

Interested students must register for HMAN 1970J S01

Interested students must register for HMAN 1970M S01

Interested students must register for HMAN 1970N S01

Independent reading and research work in Science and Society is available to students who have completed introductory and intermediate level work in Science and Society. A decision to enroll must be made via consultation with the concentration advisor and the faculty advisor for the course. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: SCSO 1400. Open to junior and senior concentrators in Science and Society; instructor permission required

Interested students must register for HIST 1972J S01

Interested students must register for HIST 1978C S01 (CRN 25866)

SCSO 2120. Historiography of Exact Sciences (AWAS 2120).
Interested students must register for AWAS 2120 S01

SCSO 2120D. Derrida and Telecommunications (MCM 2120D).
Interested students must register for MCM 2120D S01

SCSO 2130. Organizations and Policymaking (PPAI 2130).
Interested students must register for PPAI 2130 S01

Interested students must register for SOC 2131 S01

SCSO 2240. Anthropological Approaches to the Body (ANTH 2240).
Interested students must register for ANTH 2240 S01

SCSO 2303. Anthropology of Fertility and Reproduction (ANTH 2303).
Interested students must register for ANTH 2303 S01

SCSO 2310A. Ancient Scientific Texts: Akkadian (AWAS 2310A).
Interested students must register for AWAS 2310A S01

SCSO 2500C. Media Archaeology (MCM 2500C).
Interested students must register for MCM 2500C S01

SCSO 2700. Special Topics in Ancient Sciences (AWAS 2700).
Interested students must register for AWAS 2700 S01 (CRN 15130)

SCSO 2900K. Nietzsche, Foucault, Latour (ENGL 2900K).
Interested students must register for ENGL 2900K S01

SCSO 2930C. Historical Foundations of the Neurosciences (NEUR 2930C).
Interested students must register for NEUR 2930C S01

Slavic Languages

Chair
Svetlana Evdokimova

The Department of Slavic Languages at Brown specializes in the cultures, literatures, and languages of Russia, the Czech Republic and Poland. We are one of the oldest Slavic departments in the US (established in 1947, with a graduate program added in 1960). The department has been distinguished by academic excellence and dedication to teaching since its inception. Flexible and open to innovative approaches in the field, the department has remained in the vanguard of Slavic Studies. We are the center for campus study of the Slavic world at Brown and are strategically linked to a number of fields across the humanities and social sciences, including literature, performing arts, history, economics, and international relations. It is the particular strength of the department to enable students to view Slavic cultures from within through research and teaching based on solid knowledge of the relevant languages. The department helps students to discover the diversity of perspectives in those cultures and to examine and experience how they differ from the students’ own.

For additional information, please visit the department's website: [http://www.brown.edu/Departments/Slavic_Languages/](http://www.brown.edu/Departments/Slavic_Languages/)

Slavic Studies Concentration Requirements

Slavic Studies is concerned with the languages, literatures, and civilizations of the Slavic world. Built on sound knowledge of one or two Slavic languages (normally Russian or Czech) the program allows students to develop an in-depth appreciation and understanding of East European cultures and civilizations through a broad spectrum of interdisciplinary fields. Students take courses in literature, history, culture, theater, political science, economics, and international relations. Concentrators focusing on Russia learn one of the worlds most commonly spoken languages and study some of the worlds best-regarded authors and composers: Tolstoy and Dostoevsky, Gogol and Bulgakov, Tchaikovsky and Mussorgsky, and Rachmaninoff and Stravinsky. Focusing on Czech allows students to explore, for example, how Czechs distinguished themselves by peacefully transitioning from communism to capitalism (the Velvet Revolution) and separating peacefully with the Slovak Republic (the Velvet Divorce). Most concentrators study abroad in a Slavic country, either during the academic year or the summer.

Requirements for the AB degree:

1. Six semesters of one Slavic language or the equivalent (normally Czech or Russian), or a combined total of eight semesters of two Slavic languages or the equivalent.
2. Seven 1000-level courses devoted to the study of the East European civilizations: literature, history, culture, theater, political science, economics, international relations. Typically, at least four of these courses will be from within the Department of Slavic Languages. Students’ choice of courses is subject to the approval of the concentration advisor.

Honors

Honors candidacy in Slavic studies assumes an excellent academic record, particularly in the concentration. Additional requirements are the same as those for a standard concentration, plus the writing of a senior thesis (SLAV 1990). For procedures and schedule for writing a senior thesis, please refer to the department guidelines.
Slavic Languages Graduate Program

The Department of Slavic Languages offers a graduate program leading the Master of Arts (A.M.) and Doctor of Philosophy (Ph.D.) in Slavic Studies.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/slavic-studies

Courses

Czech

CZCH 0100. Introductory Czech.
Introduces the performance of basic tasks in Standard Czech, highlights of Czech culture, and a worldview of a nation uniquely located on the threshold of western and eastern Europe. Emphasis on oral communication. Five meetings per week and use of audio/visual materials. Enrollment limited to 18

CZCH 0200. Introductory Czech.
Introduces the performance of basic tasks in Standard Czech, highlights of Czech culture, and a worldview of a nation uniquely located on the threshold of western and eastern Europe. Emphasis on oral communication. CZCH 0200 includes readings of annotated literary texts on the Web. Five meetings per week and use of audio/visual materials. Enrollment limited to 18

CZCH 0400. Intermediate Czech.
Expression of abstract notions for discussion in complex structures, introduction to stylistic nuances. Listening comprehension exercises and discussion of Czech culture and history based on readings of literature and films. Prerequisites: CZ 20 or equivalent (for CZ 30); CZ 30 or equivalent (for CZ 40)

CZCH 0410A. Boys and Girls: Relationships under Socialist Bohemia.
Using Milos Forman’s film “Loves of a Blonde” and supporting materials around it, we will discuss human relationships and how they can be interpreted culturally and politically. Equally important is the acquisition of language. Tasks for the course are adjusted to two different language levels (intermediate and advanced). Enrollment limited to 18

CZCH 0410B. Coming of Age in Postwar Czechoslovakia.
Examines political and cultural changes in the post-WWII Czechoslovakia through the eyes of a child. Centerpiece of the course is a film on elementary school in post-war Prague as a symbolic representation of the society that is about to emerge. Other materials such as literary and journalistic texts are used. Places equal emphasis on the acquisition of language, including exposure to Colloquial Czech. Separate language tasks are given to students of two proficiency levels (2nd and 3rd year). Conducted in Czech. For students who completed CZCH 0200 or equivalent. Four meetings per week and use of audio/visual materials. Enrollment limited to 18

CZCH 0410C. Czech View of Self and Others.
Examines the Czech view of themselves as well as others, one of the most debated topics in the current context of expanding European Union. The centerpiece is a film about a man-eating flower (animated by Jan Kolja) interpreted culturally and politically. Equally important is the acquisition of language. Tasks for the course are adjusted to two different language levels (intermediate and advanced). Enrollment limited to 18

CZCH 0410D. Czechs and the Big Brother: Czech Lands in the 1980s.
Events in Czechoslovakia in the late 1980’s as represented in the Oscar-winning film Kolja. The Velvet Revolution and the Czech perspective on Russia. Readings from different genres. Equal emphasis on language acquisition, including Colloquial Czech. Separate language tasks for two proficiency levels (2nd-3rd year). Conducted in Czech. For students who have completed CZCH 0200 or the equivalent. Enrollment limited to 18

CZCH 0500. Advanced Czech.
Consolidation of Standard Czech and active acquisition of stylistic registers. Discussion of emblems and icons in modern Czech culture. Focus on the process of myth-making specific to the nation, on the Czech cultural identity viewed from within and without. Prerequisites: CZ 40 or equivalent (for CZ 50); CZ 50 or equivalent (for CZ 60)

CZCH 0600. Advanced Czech.
Consolidation of Standard Czech and active acquisition of stylistic nuances. Discussion of emblems and icons in modern Czech culture. Focus on the process of myth-making specific to the nation and the debates on the Czech cultural identity viewed from within and without. Prerequisites: CZ 40 or equivalent (for CZ 50); CZ 50 or permission of equivalent (for CZ 60)

CZCH 0610A. Czech Lands under Occupation and Terror.
Examines German occupation of Bohemia and Moravia seen from the perspective of ordinary Czech citizens. The course ties together the film (Divided We Fall), journalistic texts and texts on Czech history. Readings on Czech-German relations, the Holocaust, Czech and Slovak resistance movements, visual art and politics in the 1930s and 40s. Oral and written tasks for the course are adjusted to two different language levels. Conducted in Czech. Minimum requirement: CZCH0410 or placement test. Enrollment limited to 18. WRIT

CZCH 0610B. Psychosis of Occupation in the Czech Lands.
Discussion of the Occupation period during WWII. The course is built around a Czech New Wave classic film about an eccentric director of a crematorium in Prague, who turns into a fanatic collaborator under the terror and demagogy of the regime. We will also read excerpts from the original literary text on which the film was based, and work with the Czech National Corpus. Separate language tasks given to students of two proficiency levels (2nd, 3rd year). Conducted in Czech. The course is for students who completed CZCH0410 or the equivalent. Enrollment limited to 18

CZCH 0610C. Czech Cultural Icons, Emblems, and National Identity.
The “most famous Czech” Jára Cimrman and his most active period, namely the late 19th to early 20th-century Bohemia. Highlights of Czech cultural icons and emblems, and discussions on what constitutes Czech national identity reflected in the Cimrman phenomenon. Readings on several Czech cultural icons. Two different sets of requirements for students of two language proficiency levels. The course is for students who have completed CZCH 0410 or the equivalent. Enrollment limited to 18

CZCH 1000. Dimensions of Czech Animation: Contexts, Interpretations, and Dialogs with the East.
Cultural-historical contexts that gave rise to the internationally acclaimed Czech animation by Trnka, Svankmajer and others. Fascination with Czech animation in Japan used as an example to illustrate the mechanism of cross-cultural perception of Czech animation. Readings of related Czech literature/theory of animation. Selected Japanese animation and literature discussed. Readings in English. Films are dubbed or subtitled in English

CZCH 1050. Contemporary Czech Society and Literature in Translation.
Surveys representative Czech prose texts mainly from the late 20th to 21st century, in English translation. No knowledge of Czech is required. Readings include Hasek, Capek, Kundera, Hrabal, and Havel. Films also part of course

CZCH 1250. Introductory Czech.
CZ 10,20 and additional work in communicative practice, Web-based exercises, and reading

CZCH 1260. Introductory Czech.
CZ 10,20 and additional work in communicative practice, Web-based exercises, and reading

CZCH 1350. Intermediate Czech.
CZ 30,40 and additional work in communicative practice, Web-based exercises, and reading
RUSS 0200. Introductory Russian
Ten to fifteen hours weekly work outside the classroom. Enrollment limited to 18

RUSS 2710. Advanced Russian
CZ 50, 60 and additional work in communicative practice, web-based exercises, and reading

RUSS 2720. Advanced Russian
CZ 50, 60 and additional work in communicative practice, Web-based exercises, and reading

Polish

PLSH 0150. Introductory Polish
Introduction to Polish language and culture. Oral and written communication in Polish; emphasis on the literary and everyday culture of Poland. Five meetings per week, plus use of audio, video, and web materials. Enrollment limited to 18

PLSH 0410. Intermediate Polish
This course is for students who have completed first-year Polish. In this course you will further develop skills in speaking, reading, writing and understanding Polish. By the end of this course, you will be able to carry on basic conversations in Polish on many topics from your daily life. You will be able to write notes and simple letters to Polish friends or keep a journal in Polish. You will also have the skills to read basic texts. Prerequisite: PLSH 0150. Enrollment limited to 18. DVPS

Russian

RUSS 0100. Introductory Russian
Introduction to Russian language and culture. Oral and written communication in Russian; emphasis on the literary and everyday culture of Russia and the former U.S.S.R., including the changes that have reshaped everyday life for citizens of Russia. Five meetings per week, plus use of audio, video, and web materials. Enrollment limited to 18

RUSS 0110. Intensive Russian
Intensively-paced introduction to Russian culture and language; completes one year of study in one semester (RUSS 0110 = RUSS 0100-0200). Comprehension and use of contemporary Russian; fundamentals of Russian grammar; vocabulary acquisition; focus on oral communication. Introduces aspects of everyday culture of Russia and the former U.S.S.R. Ten to fifteen hours weekly work outside the classroom. Enrollment limited to 18

RUSS 0200. Introductory Russian
Introduction to Russian language and culture. Oral and written communication in Russian; emphasis on the culture of Russia and the former U.S.S.R., including the changes that have reshaped everyday life for citizens of Russia. Five meetings per week, plus use of audio, video, and Web materials. Prerequisite: RUSS 0100 or RUSS 0250. Enrollment limited to 18

RUSS 0250. Introductory Russian in St. Petersburg
Intensive introductory language and culture taught in St. Petersburg, Russia, meeting 15 hours per week. Students develop communicative and cultural competence in Russian, emphasizing 1) culture of everyday life in Russia and 2) life in St. Petersburg. For students without previous study of Russian

RUSS 0300. Intermediate Russian
Continues development of language proficiency while broadening understanding of contemporary Russian culture via readings in literature and history. Expansion of vocabulary for dealing with conversational topics and review of Russian grammar. Features literary and nonliterary readings in Russian, as well as video and computer resources. Five class meetings per week. Prerequisite: RUSS 0110 or RUSS 0200 or RUSS 0250 or placement by exam. Enrollment limited to 18

RUSS 0320A. Dostoevsky’s “The Brothers Karamazov” - The Art of the Novel.
An in depth analysis of Dostoevsky’s last novel as the culmination of his art and thought. Central religious and philosophical themes of the novel, such as the relations of faith to morality, modes of transgression, retribution, and epiphany, the question of theodicy, and the nature of authority. Discussion of Dostoevsky’s poetics and of his contribution to the genre of the novel. Readings from literary criticism and from other pertinent literary texts, such as the Bible, Schiller, and Voltaire will also be discussed. In English. Enrollment limited to 20 first year students. FYS WRIT

Gogol’s altered states of reality uniquely shape the rise of modern Russian literature and anticipate the fictional worlds of Kafka and Borges. Gogol unfurled an eerie, masque gallery of characters with radish-shaped noses and ghosts with moustaches, who live in a world, in which dogs can talk and noses can walk. Dostoevsky was among the first to relish the labyrinths of Gogol’s fantasy scapes; we will follow in Dostoevsky’s footsteps. Enrollment limited to 20. Written permission required. FYS

RUSS 0320C. Demons and Angels in Russian Literature.
The literary images of fallen angels, as well as various poetic demonologies in Russian literature extend from the medieval apocrypha, up to famous works of the twentieth-century literature, like, for example, Bulgakov’s Master and Margarita or Dostoevsky’s Demons. Although, the Russian literary angels are in many respects related to their Western counterparts, the apocalyptic character of Russian spiritual culture makes them in many respects unique. Examining these images, the course addresses the important questions concerning the human condition in general. Angels as one critic said, “represent something that was once and that we have the potential to become again” and as such, their essence is otherness. Consequently, their literary representations explore the possibilities of human existence as well as its central paradigms like, love, rebirth, mortality, or ‘falleness.’ The course will analyze the images of angels and fallen angels (devils) in the works of the nineteenth and the twentieth-century Russian prose, visual art, and film - from romanticism to ‘postmodernism’ - in the context of the world literature and culture. Authors to be studied: Byron, Lermontov, Balzac, Dostoevskii, Sologub, Bulgakov, Nabokov, Erofeev. We will also discuss films by Tarkovskii and Wenders, Russian icons, and paintings by Vrubel. In English. Enrollment limited to 20 first year students. DVPS FYS LILE

RUSS 0320D. The Tolstoy Event: War and Peace.
A close reading of Tolstoy’s major novel, with a focus on its interweaving of fictional and historical narrative and metaphorical discourse. Attention to issues of genre (e.g. the tension between “epic and novel”), literary tradition, the poetics of time and space, as well as his iconoclastic ideas about narrative, art, religion, and society. Tolstoy’s formal innovation will be considered in a broader historical and cultural context. Selected readings in Bakhtin, Lukacs, Shklovsky, Eikhenbaum, Hayden White and others. Enrollment limited to 20 first year students. FYS WRIT

RUSS 0320E. Crime and Punishment through Literature.
The seminar will explore how texts of different epochs and cultures, ranging from Ancient to Modern and from drama to poem, novel, and film, treat the issues of transgression, punishment, justice, and forgiveness. We will examine each text both in terms of its artistic merit and its place within its cultural and historical milieu. Enrollment limited to 20 first-year students. FYS WRIT

RUSS 0350. Intermediate Russian in St. Petersburg
Intensive intermediate language and culture taught in St. Petersburg, Russia meeting 15 hours a week. Development of communicative and cultural competence in Russian, emphasizing 1) descriptive and narrative texts and 2) culture and history of St. Petersburg. Prerequisite: RUSS 0110 or 0200, or equivalent

RUSS 0400. Intermediate Russian.
Continues development of language proficiency while broadening understanding of Russian culture via readings in literature and history. Includes expansion of vocabulary for dealing with conversational topics and review of Russian grammar. Features literary and nonliterary readings in Russian, as well as video and computer resources. Five class meetings per week. Prerequisite: RUSS 0300 or placement by exam. Enrollment limited to 18

RUSS 0500. Advanced Russian.
Examines selected topics in Russian culture and history as depicted in readings, the media, and Russian and Soviet films. Language work emphasizes increasing facility with spoken Russian and developing
RUSS 0600. Advanced Russian. Examines selected topics in Russian culture and history as depicted in readings, the media, and Russian and Soviet films. Language work emphasizes increasing facility with spoken Russian and developing writing skills. Includes work on advanced grammar and syntax. Four class meetings per week. Prerequisites: RUSS 0350 or RUSS 0400 or placement. Enrollment limited to 18.

RUSS 0770. Utopian Spaces in Fantasy Worlds in Literature and Film: East and West. A survey of Russian, Czech, Polish, and Austrian 19th- and 20th-century works of fiction that depict altered states of reality. Readings (in English translation) range from folk tales and tales of the supernatural, 19th-century utopias and works by such major writers as Turgenev and Dostoevsky, to accomplished novels of the 20th-century. Showings of contemporary fantasy and science fiction movies from the U.S., Russia, England, France, and Czechoslovakia.

RUSS 0930. Cultures and Literatures of the Russian and Soviet Empires. Examines in depth various topics that constituted the cultural and literary landscape of the Soviet Union, examining their antecedents in the Russian empire and their reemergence in the post-Soviet world. Topics include: the Caucasus, from Tolstoy to modern Chechnya; Orientalism; the Civil War and Pasternak; Akhmatova and the experience of the totalitarian state.

RUSS 0990. The Black Experience in Russia and the Soviet Union. A study of the African-American experience in Russia and the Soviet Union through the prism of autobiographies, biographies, diaries, travel journals, and memoirs from the 18th century to the present, of actors, American Communists, domestic servants, journalists, musicians, poets, political activists, publishers, stage designers, students and writers, including W.E.B. Du Bois, Harry Haywood, Langston Hughes, Paul Robeson and Richard Wright. Enrollment limited to 30.

RUSS 1000. Russian Modernism and the Arts. Russian culture in a period of revolutionary upheaval: developments in literature, film, design, visual and applied arts. Avant-garde experimentation and the creation of tradition: primitivism, futurism, constructivism, and other movements in literature and the arts.

RUSS 1020. Russia Rediscovered. Explores Russian culture in the pre-Revolutionary era (ca. 1861-1905): encounters between elite and popular culture in a period of immense social upheaval, in particular the attempt to recover indigenously Russian art forms and rural traditions. Analyses the expressions of this nativist trend in literature, ethnography, religion, and visual and applied arts, and attempts to sketch out the sociohistorical contexts of this “rediscovery” of native Russian culture.

RUSS 1050. Russian Culture: From Peter The Great to Putin. An interdisciplinary exploration of Russian cultural history through its literature, art, religion, social and political thought, and film. An examination of a wide range of cultural expressions: religious and civic rituals, values and practices, social customs and popular entertainment. In English.

RUSS 1060. St. Petersburg: A Window on Russia. An interdisciplinary exploration of Russian cultural history through its literature, art, architecture, religion, social and political thought, theater and ballet. Elements of Russian culture will be presented through the prism of the city of St. Petersburg, its history, its urban and cultural landscapes. Regular field trips to museums, theater, and city tours focused on specific themes.

RUSS 1090. Esoteric Russia. A survey of the main currents of mystical, esoteric, occult, and magical theories and practices in Russia from the 11th century onward. Topics include pagan survivals, Orthodox mysticism and magic, heresies and schisms, Freemasonry and Rosicrucianism, Mesmerism and Spiritualism, H. P. Blavatsky, and G. I. Gurdjieff. No knowledge of Russian is necessary. Prerequisite: any one of RU 29, 31, HI 140, 141, or UC 82, or written permission of the instructor.

RUSS 1100. The Roots of Russian Culture. Study of the patterns and roots of Russian culture over the last millennium and how Russia’s languages have determined its worldviews and cultural structures (the Whorf-Sapir thesis). Principal topics: Russian spirituality, diglossia, other kinds of literacy; speech and silence as means of knowing and unknowing; the shape of time and the rhythm of space; sacred vs. secular history; etc. Lectures and discussions in English. Prerequisite: Intermediate Russian.

RUSS 1110. Special Topics in Russian Studies I: Advanced Reading and Conversation. An advanced course recommended for students who are either planning to go or are returning from abroad. Focus on Russian culture as seen through the prism of Russian poetry. Extensive classroom discussion and frequent writing assignments. Prerequisite: RUSS 0600 or written permission. May be repeated once with permission from the instructor. Enrollment limited to 18.

RUSS 1120. Special Topics in Russian Studies II: Advanced Reading and Conversation. A continuation of Russian 1110. Examines aspects of Russian culture as manifested in Russian literature. Readings range from fairy tales to contemporary works. Extensive classroom discussion and frequent writing assignments. Prerequisite: RUSS 1110, 1700, or written permission. May be repeated once with permission of the instructor. Enrollment limited to 18.

RUSS 1200. Russian Fantasy and Science Fiction. Survey of Russian literature, from fairy tales, utopias, and dream sequences to science fiction, which depict altered states of reality. Readings in English, supplemented with films in March and April. Seminar with emphasis on discussion. Russian concentrators and graduate students expected to cover most of the readings in Russian. Familiarity with Russian literary history is not required.

RUSS 1250. Russian Cinema. This seminar will provide a chronological overview of Russian cinema from its beginning to the present. The films will be considered against the background of some historical, political, and theoretical readings. The students will also be encouraged to juxtapose Russian and non-Russian films in order to evaluate the place of Russian cinema within a global film culture. Enrollment limited to 20.

RUSS 1290. Russian Literature in Translation I: Pushkin to Dostoevsky. Survey of major works of Russian literature of the early and mid-19th century. Authors to be studied include Karamzin, Pushkin, Lermontov, Gogol, Turgenev, Leskov, and Dostoevsky. Lectures and discussion. Prerequisite: Russian 1000 or written permission of the instructor. Not open to students with credit for 1700. May be repeated once with permission of the instructor. Enrollment limited to 30.

RUSS 1300. Russian Literature in Translation II: Tolstoy to Solzhenitsyn. Survey of major works of Russian literature of the late 19th and 20th centuries. Traces the development of Russian literature from realism to symbolism and decadence, from revolutionary experiments to socialist realism and dissent. Authors to be studied include Tolstoy, Chekhov, Solzgub, Blok, Mayakovskiy, Babel, Olesha, Zamiatin, Bulgakov, and Solzhenitsyn. Lectures and discussion. No knowledge of Russian required.

RUSS 1310. Russian Poetry and Poetics. The technical study of verse; metrics and rhyme; linguistic analysis of poetic language; semiotic aspects of verse semantics, including genre and historical development. Primary focus on Russian verse, but some attention will also be given to other (Slavic and non-Slavic) traditions, as well as to general theoretical issues of poetic structure. Conducted in English.

RUSS 1320. Soviet Literature from 1917 to 1953. Survey of Soviet literature in translation from the revolution to the death of Stalin. Includes Russian literature and the literary milieu of the NEP period, literature of the Thirties, and literature written during the Second World War and the postwar period. Texts by Akhmatova, Babel, Blok,
Bulgakov, Ivanov, Lavrenyov, Mandelstam, Mayakovsky, Pasternak, Plinyak, Shklovsky, and Zamiatin. Enrollment limited to 30.

A survey of contemporary Soviet and post-Soviet literature in translation from the death of Stalin through the Glastrnost era to the present. Includes prose writers and poets as well as women writers and authors from non-Russian republics. Texts by Atmatov, Aksyonov, Bitov, Evtushenko, Ibragimbekov, Iskander, Makine, Makanin, Nagibin, Petrushevskaya, Rasputin, Shukshin, Sokolov, Soloukhin, Solzhenitsyn, Tolstaya, Trifonov, Ulitskaya. Enrollment limited to 30.

RUSS 1340. The Russian Novel.
Mikhail Bulgakov’s Master and Margarita, Andrei Bely’s Petersburg, and Fedor Sologub’s Petty Demon are read in depth as 20th century milestones in the development of Russian novel—particularly as continuation and reaction to the prose of Nikolai Gogol and Fedor Dostoevski, which opens the course. Other authors included in the course: Nabokov, Platonov, Erofeev. In English

RUSS 1420. Twentieth-Century Russia (HIST 1420).
Interested students must register for HIST 1420 S01.

Literary representations of love, marriage, adultery, and sexuality. Examines the formation of the notion of passionate romantic love, the myths of femininity, and various concepts of love and family. Emphasizes the way in which the notions of love and sexuality are linked to national identity. Readings include several Russian popular and revolutionary feminist writers as well as such classics as Rousseau, Racine, Pushkin, Flaubert, Tolstoy, Chekhov, and Kate Chopin.

RUSS 1470. New Russia: Culture and Politics in Post-Soviet Space.
Political and cultural aspects of transition from the authoritarian Soviet state to democracy. This transition will take considerable effort and time and will require change in people’s mentality. Enrollment limited to 20.

RUSS 1500. Approaches to Russian Literature.
Reading in Russian of selected poetry and prose by important authors, among them Lomonosov, Karamzim, Derzhavin, Pushkin, Lermontov, Tiutchev, Gogol, Fet, Dostoevsky, Chekhov, Briusov, Akhmatova, Sologub, Remizov, Blok, Bely, Zamiatin, Plinyak, and Mandelstam. Lectures in Russian on literary problems, literary terms, and important aspects of literary history. Prerequisites: RUSS 0600 plus RUSS 0290 or 0310 or written permission.

RUSS 1600. Literature and History: Russian Historical Imagination in the European Context.
Relationships between fact and fiction between historiography and historical fiction, between ideology and various ways of reconstructing the past. Readings will include historical fiction of Shakespeare, Schiller, Walter Scott, Pushkin, Tolstoy War and Peace, and Pasternak, as well as theoretical texts from Aristotle to Nietzsche, White, and LaCapra. Enrollment limited to 30. LILE.

RUSS 1700. Advanced Russian Grammar.
Uses M. Bogojavaensky’s Russian Review Grammar. Readings of selected passages from Russian literature as examples of Russian morphology and syntax. Prerequisite: RU 60 or written permission.

RUSS 1750. Russian and East European Folklore.
Introduction to the folklore of Russia and the Slavic countries of Eastern Europe, with occasional reference to the folklore of other regions. Among the types of folklore to be discussed: magical incantations, proverbs and riddles, ritual and lyric songs, folks tales, epic poetry, and laments. Special attention to the relation of folklore to ritual and to mythology. Lectures and discussions geared to English translations.

RUSS 1800. Pushkin.
For generations of Russian readers and writers, Pushkin has been a cult figure, a true “national poet.” This course focuses on Pushkin as the progenitor of Russian national mythology and examines the seminal nature of his writing. Analysis of the dazzling array of genres which became his greatest achievement: lyric poetry, narrative poetry, novel in verse, prose, drama, history, and other nonfictional narratives. Enrollment limited to 20.

RUSS 1810. Tolstoy.
Close readings of Tolstoy’s major novels (War and Peace and Anna Karenina, in particular) and shorter narratives with special emphasis on his iconoclastic ideas about art, religion, and society. Considers Tolstoy’s formal innovation in a broader historical and cultural context. Lectures and discussion. No knowledge of Russian required.

RUSS 1820. Dostoevsky.
An examination of Dostoevsky’s major texts tracing his development as an artist, thinker, and religious visionary. The texts will be considered against the background of literary and cultural history of Dostoevsky’s period. No knowledge of Russian required. WRIT

RUSS 1840. Nabokov.
The course examines Vladimir Nabokov’s (1899-1977) major achievements in prose in both Russian and American periods, paying particular attention to their cultural context (Russian émigré culture of the 1920s and 30s); the questions of his aesthetics, ethics, and metaphysics, as well as his engagement in the dialogue with other European modernist writers, especially with the existentialists. Readings include Nabokov’s selected short stories and novels, such as The Defense, Invitation to a Beheading, Despair, The Eye The Gift, Pnin, or Lolita. In English.

RUSS 1860. Chekhov.
Commemorating the hundredth anniversary of the death of the great Russian playwright and short-story writer, this course will examine Chekhov’s innovations in the genre of the short story and in modern theater, as well as his ongoing influences in world literature. Themes include the nature of the Chekhovian comic, subversion of the dominant literary and cultural paradigms and myths, representations of gender and sexuality. In English.

RUSS 1870. Gogol.
A thorough examination of Gogol’s major works, with special emphasis on problems of genre and style. Lectures and discussions are geared to English translations, but Russian concentrators and Slavic graduate students are expected to do some reading in the original and to show evidence of it in their papers.

RUSS 1895. Mihail Bakhtin.
Commemorating the hundredth anniversary of the death of the great Russian critic, this course will examine Bakhtin’s theories of the novel, the nature of his ideas, his theories of culture, his theories of literature, and his political and cultural implications. Some works to be studied: his famous books, The Dialogic Imagination, The Problems of Dostoevsky, the Petersburg Writer, and The notion of the carnivalesque.

RUSS 1917. Communism and Soviet Literature.
The purpose of the course is to objectively study Marxist thought and its implementation by Soviet Literary practitioners. Clichés of the Cold War -- especially those involving the concepts of totalitarianism and the nature of the Soviet state -- will be stripped in favor of a fresh evaluation. We will consider salient writings of major Soviet writers, especially with the existentialists. Readings include: Lermontov’s poetry, Dostoevsky’s Crime and Punishment, Turgenev’s Fathers and Sons, and Pasternak’s Doctor and the Dead. In English.

The most important literary currents from the Baroque to early romanticism. Study of style and genre and the development of the literary language.
RUSS 2040. Russian Symbolism.  
The origins and character of the Russian Symbolist movement; survey of major poets; the Symbolist novel (Sologub, Bely)

RUSS 2320. Old Russian Literature.  
East Slavic literature from the Kievian period to the end of the seventeenth century

RUSS 2410. Movements and Genres in Russian Literary Culture.  
Seminar. Critical reading of selected texts from the Baroque period through the first half of the 19th century. Analysis is based on a study of the infrastructure of each work and the external influences of the period. Conducted mainly in Russian, with a focus on Russian critical terminology and approaches

RUSS 2610A. Chekov.  
No description available

RUSS 2610B. Gogol’s Dead Souls.  
A research seminar for advanced students, including those with no Russian. Qualified undergraduates may be admitted with the instructor’s permission

RUSS 2610C. Russian Romanticism.  
This course will examine the works of Zhukovsky, Batushkov, Pushkin, Lermontov, Tiutchev, Bestuzhev-Marlinsky, Odoevsky, and Gogol in the context of Romanticist literary culture. Students will also read works by other European authors associated with Romanticism to elucidate the extent of the adherence of Russian writers to Romanticist aesthetics and philosophy

RUSS 2610D. Pushkin.  
No description available

RUSS 2620A. To Be Determined.  

RUSS 2620D. Russian Freemasonry.  
No description available

RUSS 2710A. Pasternak.  
The poetry of Boris Pasternak, its structure and development over the entire span of his working life. Conducted in Russian. Open to undergraduates

RUSS 2710B. Poetic Structure.  
The technical study of verse; metrics and rhyme; linguistic analysis of poetic language; semiotic aspects of verse semantics, including genre and historical development. Primary focus on Russian verse, but some attention will also be given to other Slavic materials, as well as to general theoretical issues of poetic structure. Open to qualified undergraduates with instructor’s permission

RUSS 2710C. In Memoriam in Russian Literature.  
A study of the philosophical vein in Russian poetry about the meaning of the poetic and cultural heritage of the past, as well as reactions of the rising voices in Russian poetry in succeeding generations to the individual deaths of their immediate predecessors

RUSS 2720A. Seminar in Russian Literature: Russian Decadent and Symbolist Literature.  
This course explores Russian Decadent and Symbolist literature, and its cultural and philosophical (e.g., Schopenhauer, Nietzsche, or Solovev) foundations. The analyzed works represent the achievements of these two overlapping movements in the genres of the long narrative poems, the drama, the short story, the essay, and, first of all, the novel. The authors include: Solovev, Sologub, Ivanov, Kuzmin, Blok, Bely, Brisuov, Merezhkovskii, In English. Open for undergraduate and graduate students

RUSS 2720B. Seminar in Russian Literature: Pushkin.  

RUSS 2720C. Death and Immortality in Russian Poetry.  
No description available

RUSS 2720D. Derzhavin and His Epoch.  
No description available

RUSS 2810. Russian Poetry: Silver Age.  
Exploration of the writings of such Russian poets as Blok, Tsvetaeva, Pasternak, Mandelstam – in the context of social and cultural changes that shook Russia in first decades of the twentieth century. The class will be conducted in English, but the poetry will be read in the original. Primary goal of the class is to teach students to analyze and discuss the complexities of poetic expression. The class is geared toward graduate students in Slavic but it is open to qualified upper level undergraduates, i.e. to those who can read poetry assignments in original. Instructor permission required

RUSS 2970. Preliminary Examination Preparation.  
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

RUSS 2980. Advanced Reading and Research.  
Only for graduate students. Independent research project on topics related to Russian culture. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the DGS and Chair of the department (deadline: the last day of Add a course without fee period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required

RUSS 2990. Thesis Preparation.  
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

Slavic

Interested students must register for JUDS 0990L S01

SLAV 1200. Slavic Fantasy and Science Fiction.  
Slavic literatures, with emphasis on fairy tales, utopias, and dream sequences to science fiction, which depict altered states of reality. Readings in English, supplemented with films in March and April. Seminar with discussion. Slavic concentrators and graduate students expected to cover much of the readings in the original. Familiarity with Slavic literary histories is not required

SLAV 1300. Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe).  
This seminar course examines the relationship between language and society: e.g. gender and language, politeness, terms of address, conversational analysis, dialects and language, language variation and social class, language policies and their consequences, language and national/ethnic identity. Case-study readings cover (but are not limited to) linguistic situations in East Europe, Russia, and the former republics of the USSR. Knowledge of Slavic languages not required. Open to advanced undergraduate and graduate students. Freshmen and sophomores who demonstrate their knowledge of the basic notions in linguistics or their familiarity with the former USSR and East Europe may enroll with the instructor’s written permission. Enrollment limited to 20. DVPS LILE WRIT

SLAV 1552. Co-existence and Conflict: Polish-Jewish Relations from 1500 until Today (HIST 1552).  
Interested students must register for HIST 1552 S01

SLAV 1760. Film, Theater and Culture of Poland.  
This course explores Polish twentieth-century culture with a special stress on literature, theatre, film, visual arts, and architecture. After the examining of the romantic roots of Polish twentieth-century culture through the works of two famous Polish poets, Mickiewicz and Krasinski, the course will explore the works of representative Polish modernist and avant-garde artists such as Przybyszewski, Wyspianski, Witkacy, Schulz, or Gombrowicz. The third part of the course is devoted to the Polish contemporary theatre and film, including the workshops of the two legendary European theaters Cricoteka and Gardzienie, and films of the famous Polish Film School. In English. First year students require instructor permission

An exploration of the mythopoetic universe of Prague and Petersburg through literature and film. Both - one, ancient, the other "modern" - served at one point of the historical continuum as capitals of multinational empires (Holy Roman and Russian), yet also as loci of national identity, both factors thus contributing to their respective enigmatic states. The course
SLAV 1780. Economies and Politics of Transition. The course identifies, describes, and explains major social, economic and political processes that have started in the late 1980s and early 1990s with the collapse of the communist systems in Poland and other East-Central European countries. The transition from the centrally planned to free market economies and the present challenges and problems associated with joining the European Union will be discussed in the context of the political and social changes and related to specific historical conditions. The course puts a special stress on Poland, which in turn will allow students to develop models of patterns of transition applicable to the entire region of East-Central Europe. In English. First year students require instructor permission

SLAV 1790. Central Europe: An Idea and its Literature. Central Europe has been defined by seismic historical events from the collapse of the Habsburg Monarchy to the fall of the Berlin Wall. The focus of the course is on literary strategies that developed in the face of political upheaval and cultural crisis. Focusing on Central European literature and theatre, we ask: what does it mean to be a Central European writer? Where do the cultural boundaries of Central Europe lie? Can we talk about Central European writing as a distinctive phenomenon in world literature? We will read J.Roth, Celan, Schulz, Witkacy, Gombrowicz, Babel, Handke, Hrabal, Kundera, Milosz, Kiš. In English. Enrollment limited to 20.

SLAV 1821L. International Relations of Russian, Eastern Europe, and Eurasia (POLS 1821L) Interested students must register for POLS 1821L 001

SLAV 1890. Twentieth-Century Russian Approaches to Literature: Bakhtin and the Russian Formalists. This seminar will study the three approaches to literature developed in the 20th century in Russia: the Russian Formalism (1920s), which is credited by many for inventing "literary theory" as a distinctive "scholarly" discipline; Mikhail Bakhtin (1895-1975) and his circle of philosopher critics; and the Tartu School of Cultural Semiotics (1960s-1990s). The course will put a special stress on Bakhtin and study his theories of authorship, dialogue, and philosophical anthropology, as well as their engagements in the dialogue with Marxism and Existentialism. The studied approaches to literature will be "applied" to the selected works of Russian writers including Gogol, Dostoevsky, Bely, Rozanov. In English

SLAV 1950. Independent Study. Independent research project on topics in Slavic Studies. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the Concentration Advisor and Chair of the department (deadline: the last day of Add a course without fee period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required

SLAV 1970A. Literature in the Changing Eastern Europe. Undergraduate seminar on the role of the intellectual in cultures subjected to enormous social and political change. Considers particularly the relevance of the intellectual's private and public selves to the literary, cultural and political life of society. Readings in English

SLAV 1970B. Spirituality in Russian Literature. Spirituality -- understood as the intimate, spiritual life of individuals as opposed to corporate expressions of religiosity -- occupies a large place in Russian national life, and its exploration has become the central issue of many famous literary texts. The course will examine selected Russian texts -- from symbolism to postmodernism -- from the perspective of the spiritual sensibility that combines atheism, Russian Orthodoxy, Gnosticism, and sectarian or unconscious religiosity. Authors to be studied include: Nabokov, Solzhenit, Rozanov, Efroeev, Sorokin and Pelevin. In English

SLAV 1970D. Vaclav Havel: Dissident, Playwright, and Politician. For Havel, life under communism represented "an inflated caricature of modern life in general" and the collective experiences of those who lived under such a totalitarian regime" stand as a kind of warning to the West, revealing if its own latent tendencies. "We will explore this hypothesis by studying Havel's texts and the cultural context where they arose

SLAV 1970E. Kafka/Schulz. The course explores the prose of Bruno Schulz and Franz Kafka, grasping a profound similarity between those two writers on many levels: cultural, religious, sexual, existential, and artistic. In English. For more information visit the Slavic Department web page

SLAV 1970F. Comparative Slavic Linguistics. An overview of the phonological and morphological development of Slavic languages from Common Slavic using readings and problem sets. The course will also examine the basic structure of Old Church Slavonic. Typological comparisons between contemporary Slavic languages. Familiarity with at least one Slavic language is required. Instructor permission required

SLAV 1970G. Polish for Reading and Research. An intensive course designed for students who wish to receive concise and systematic language instruction to read Polish for their research projects and/or to prepare for advanced language study in the study abroad context. The course does not require any previous knowledge of Polish. Students will develop functional reading and comprehension strategy in Polish through extensive activities focusing on grammar and reading of selected texts

SLAV 1970H. Gender and Identity in Modern and Contemporary East Central European Visual Arts. While issues of gender and identity are commonplace in Western modern and contemporary art discourse, due to isolation from the west for a better part of the twentieth century, East Central European modern and contemporary art has not been privy to similar conversations. This course will explore modernity in the Czech Republic, Slovakia, Poland and Hungary through discussions on Expressionism, Primitivism, Cubism, and Surrealism. Discussion on the role of the avant-garde artist, his manifestoes and art during heightened nationalism; the role of women as subject of modernity, significant female artists within the avant-garde context, especially in DADA and surrealist circles. Enrollment limited to 20. DYPS LILE WRT

SLAV 1981. Independent Research in the Slavic Language(s). Independent research on various topics in Slavic cultures. Reading, discussion, research must be done in the chosen Slavic language (Czech/ Russian). Close work with faculty on project is expected. Prerequisites: minimum RUSS0600/CZCH 0610 (3rd year-level) or placement evaluation by Russian or Czech language coordinator. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the Concentration Advisor and Chair of the department (deadline: the last day of Add a course without fee period during the semester when the project is undertaken). Each section limited to 10 students; instructor permission required

SLAV 1990. Senior Thesis. Only for Slavic concentrators writing their senior theses. For requirements and schedule, contact the department. Each section limited to 10 senior Slavic Studies concentrators

SLAV 2210. Old Church Slavonic. Introduction to Church Slavonic philology. Structural analysis of Old Church Slavonic. Readings in Old Church Slavonic texts

SLAV 2230. History of Russian. Elementary history of Russian, with emphasis on the standard languages, from the Kievan period to the 19th-century. Readings in early Russian texts. Some acquaintance with Old Church Slavonic is desirable. Not for graduate students in Slavic linguistics, who should take seminars in East Slavic historical dialectology and the history of the Russian literary language (SL 261, 262)

SLAV 2320. Russian Syntax. Survey of approaches to the relationship between semantics and syntax in Russian. Discussion of morphosyntactic variation in Russian, including gender-number agreement, tense-aspect, case, reflexivization, and pronounization. Some topics relevant to the teaching of Russian and stylistics

SLAV 2450. Exchange Scholar Program.
SLAV 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

SLAV 2980. Advanced Reading and Research.
Only for graduate students. Independent research project on topics in Slavic Studies. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the DGS and Chair of the department (deadline: the last day of Add a course without fee period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required

SLAV 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

SLAV XLIST. Courses of Interest to Concentrators in Slavic Languages.
Fall 2012
The following courses may be of interest to Slavic Languages concentrators. Please see the sponsoring department for the time and location of each course.

History
HIST 1410 Russia in the Age of Reform, Revolutions and World Wars (1855-1945)

Humanities
HMN 1970F Pain in Polish and Russian Twentieth-Century Literature

Theatre Arts and Performance Studies
TAPS 1430 Russian Theatre and Drama

Spring 2013
The following courses may be of interest to Slavic Languages concentrators. Please see the sponsoring department for the time and location of each course.

History
HIST 1420 The End of Soviet Socialism and the Rise of New Russia (1945-present)

Judaic Studies
JUDS 0980X Introduction to Yiddish Language and Culture

Sociology

Chair
David P. Lindstrom

The Sociology Department is at the center of the intellectual life of Brown University. Brown Sociology brings together a dynamic group of scholars, from the micro to the macro level. As a discipline, sociology provides students with the conceptual and analytic tools to make sense of complex social structures in a rapidly changing global environment. Browns Sociology department brings together a dynamic group of scholars with international reputations for outstanding achievement in a range of important research areas -- social demography, health and medicine, environmental justice and environmental change, development, politics and democracy, urban and spatial analysis, and organizations and occupations.

Ten courses are required:

Required courses:
- SOC 0010 Perspectives on Society
- SOC 0020 Perspectives on Social Interaction: An Introduction to Social Psychology
- SOC 1010 Classical Sociological Theory
- SOC 1020 Methods of Social Research
- SOC 1100 Introductory Statistics for Social Research (or equivalent)

Optional Courses

Total Credits 10

1 At least three of the optional courses have to be 1000-level courses and one of them a senior seminar. Students can choose to take up to two (showcase?) lower level (0100-level) courses. Students can petition to take a course outside of the concentration (this will be allowed only when the proposed course makes sense given the interests of the student, and there is no equivalent sociology course).

The Capstone Experience

Sociology requires all concentrators to conduct a capstone project in their senior year. The purpose of the capstone project is to allow students an opportunity to apply the knowledge they acquired on a project of their own interests. The capstone project provides a hands on experience through which students learn what can be done with Sociology. To fulfill the capstone requirement students have to take SOC 1950 – Senior Seminar during the senior year. Participation in this seminar allows each cohort of concentrators to discuss their diverse interests and exposes them to the wide range of applications of Sociological knowledge. The capstone project can take many forms, including honors theses, and other traditional and alternative projects as described below.

The capstone project can be a one semester research paper on a topic of your interest. Alternatively, you can design a different type of independent project. Below is a list of suggestions for possible capstone projects.

- Doing a one semester research project on a topic of interest.
- Working with a faculty member in an Odyssey program to design a new course.
- Producing a video ethnography on a topic of your interest.
- Assisting in organizing an academic conference.
- Producing a photographic exhibit on a sociological issue.
- Interning in a community or private sector organization or a policy agency and reflecting sociologically on your experience.
- Using sociological analysis to write Engaging in public sociology, using sociological analysis to write journalistic articles and op-ed pieces or an internal evaluation or a policy report for an organization.

You should decide your capstone project in consultation with the concentration advisor and the instructor of the Senior Seminar. You may also need to approach a specific faculty within the department to advise you on your project. At the beginning of your senior year you should file a written statement with the Concentration advisor describing your capstone project and listing your advisor for the project.

Honors

The honors program in Sociology offers an excellent opportunity for students who seek to pursue independent and original research during their senior year. Acceptance into the honors program requires a grade of “A” in at least one half of all sociology courses. Honors students must write a thesis under the guidance of two sociology faculty members, an advisor and a reader. In addition, they must enroll in SOC 1950 (Senior Seminar)
and SOC 1980 and SOC 1990 (Senior Honors Thesis) in order to develop the substantive integration of the concentration studies, and to prepare the thesis (with the advisor’s consent, students may substitute other courses for those listed above).

**Sociology Graduate Program**

The department of Sociology offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. The department also offers a Master or Arts (A.M.) but this option is only open to Ph.D. candidates. For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/sociology

**Courses**

**SOC 0010. Perspectives on Society.**

An introduction to the discipline of sociology from a macro perspective. Students explore how different sociological paradigms lead to contrasting understandings of capitalism, the state, class, race, and gender. In addition, students learn new ways to think about social problems in the United States, in the developing world, and in world history.

**SOC 0020. Perspectives on Social Interaction: An Introduction to Social Psychology.**

An introduction to the discipline of sociology examining the individual in social situations. Explores the social development of the person, the development of interpersonal relationships, and the problems of integrating the individual and social system. For each area, the personal and situational factors that bear upon the issue are investigated. The objective is to deepen understanding of the behavior of people in a social context. WRIT

**SOC 0111. Social Change, Dictatorship, and Democracy.**

Why are some countries more democratic than others? What effects have industrialization and colonization had on developing world democracies? This course probes those questions from a sociological perspective. We'll explore the relationship between political regimes and socioeconomic factors, like class and race and look at Europe, the US, East Asia, and Latin America, using historical texts, sociological theory, novels, and films. This course will be of interest to concentrators in the social sciences, and students interested in Latin America and Asia. A foundational social science course is recommended. AP U.S. History or AP Comparative Politics is required for high school students.

**SOC 0130. American Heritage: Democracy, Inequality, and Public Policy.**

America professes equality but exhibits many forms of inequality in schools, race relations, and income. An examination of contrasting elements of American society and a review of the role social science plays in public debate. To illuminate the debates, key topics, such as welfare, immigration, affirmative action, and environmental equity are considered.

**SOC 0150. Economic Development and Social Change.**

Emphasis on understanding the interrelations among economic, political, and cultural aspects of change in developing countries. The experience of currently developing nations is contrasted to that of nations which industrialized in the 19th century. Compares the different development strategies which have been adopted by currently developing nations and their consequences for social change.

**SOC 0170. The Family.**

The state of the contemporary family generates debate within and beyond sociology. That debate is considered by examining different definitions of family, changing gender roles within the family, and the family in cross-cultural context. Special issues include new family forms, such as gay and lesbian families and biological and step-parenthood, as well as changing patterns of work and housework.

**SOC 0200. Population and Society.**

Introduces some of the major social issues relating to population size, growth, and change in industrialized and developing nations. Mortality, fertility, and migration levels and trends are analyzed. Also considers contemporary issues, such as HIV/AIDS epidemic, population aging, U.S. immigration, and national and international population policy debates.

**SOC 0210. The City: An Introduction to Urban America.**

What is special about urban life? How and why do cities differ? How has the way we think about the city changed over time? Can we solve urban problems? An interdisciplinary approach to cities in the U.S. and abroad: their history, physical design, spatial form, economy, government, subcultures, and social life.

**SOC 0230. Sex, Gender, and Society.**

An introduction to the sociological study of sex and gender. More specifically, this course explores how sexuality is perceived, defined, and experienced in the context of society. How sexuality influences our lives, is reflected in social norms, attitudes and beliefs, through public and private policies and practices, and the social institutions is also investigated. This class also focuses on how prevalent gender differences really are in our society and examines social construction of gender.

**SOC 0240. The Nature of Community: Place, Space, and Identity.**

What is a community? How can it best be organized and strengthened? How can communities contribute to social justice? This course examines boundaries and identities, rights, responsibilities, cooperation and conflict, and the roles of voluntarism, sports, stories, language, meals and even sleep in community life. Concern about the nature and well-being of “community” has been at the heart of sociology since the discipline was born, so examining these issues provides an in-depth introduction to the sociological way of thinking. The course is particularly aimed at those working within community settings, such as residential units, student activists, and service programs.

**SOC 0270. The Sociology of Imagination.**

Sociology is a study of the course and effect of social action. Sociologists study human societies by researching social groups, patterns, interactions, and institutions. This course introduces students to the discipline of sociology with the hope of showing students that, as Peter Berger stats, "things are not what they seem." In other words, in this class students will learn to rethink several assumptions about society that are commonly taken for granted. The course strives to make the strange familiar, and the familiar strange.

**SOC 0300A. Contrasting Societies.**

Offers a cross-cultural examination of major social institutions and characteristics. Addresses questions such as how do families and intergenerational relations differ in various societies? How does the social safety net differ? What is the character of racial and ethnic relations? Integral is a comparison of the United States and other societies. Enrollment limited to 20 first year students. FYS WRIT

**SOC 0300B. Environment and Society.**

This course examines the intersection between the environment and social structures and institutions. It is centered around environmental sociology, environmental justice, and environmental health. We cover climate change, risk perception and risk communication, environmental consciousness and environmental movements, government regulation, lay-professional differences in scientific knowledge, and various forms of toxic contamination and environmental disasters. Readings are very broad, including work of sociologists, physicians, biologists, journalists, epidemiologists, activists, toxicologists, lawyers, and anthropologists. This course has a required service learning component. Enrollment limited to 20 first year students. FYS WRIT

**SOC 0300C. The Nature of Community.**

What is community? How can it best be organized and developed? How can communities contribute to social justice? This course investigates such questions by examining the nature of community life, rights and responsibilities of individuals in relation to communities, approaches to community service, and the roles of leadership, ritual, and narrative in community building. Enrollment limited to 20 first year students. FYS WRIT

**SOC 0300D. Who Am I?.**

A study of self in contemporary society. We examine the structural and situational forces that shape the self and their impact on personal development, orientations to the world, and interpersonal behavior. We investigate the development of the self as a way of being in the world that makes everyday doings and, ultimately society, possible. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT
The current HIV/AIDS crisis is not merely medical. It also involves fundamental political, social and economic issues. Through extensive readings, class discussions and the writing of research papers, we will explore issues such as, what are the sociological barriers to changing sexual behavior? Why do some government, but not others, fail to commit resources to fight the disease? How was improved access to expensive drugs achieved? Instructor permission required. Enrollment limited to 20 first year students. FYS WRIT

SOC 0300F. Unequal From Birth: Child Health From a Social Perspective.
Why are the children of immigrants so healthy? How do experiences in families, schools, neighborhoods and the health care system produce unequal health? What are the consequences of health for the economic and social welfare of individuals and populations? We will read, discuss and evaluate social science evidence to understand how social and economic inequalities produce and result from health inequalities among youth. Attention will be given to both industrialized and developing societies, and to potential ways that social policies can equalize children’s health. This course is designed for first-year students and should appeal to a variety of interests, including social justice, medicine, research and law. Enrollment limited to 20 first year students. FYS WRIT

SOC 0300G. Populations in Danger.
Exposure to terrorism with dangerous social, economic, political, or health crises. These include small Amazon farmers in situations of environmental degradation, Catholics and Protestants in Northern Ireland in economic and social conflict and under peace agreement, Israelis under threat of random attack with neighbors who demand Israel’s extinction, Palestinians under Israeli occupation with a largely powerless and corrupt Palestinian Authority, South Africans under HIV/AIDS pandemic, and undocumented Dominican immigrants in Providence. The seminar will include readings on these populations in danger, lectures by internationally known experts, student presentations and class discussion, and three short essays. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

SOC 0300H. Organizations and Disasters: Living With the Reality of Reality Big Mistakes.
This new first year seminar will introduce students to the amazing world of organizational failures and disasters. Recent disasters will be examined within frames provided by several leading organizational theories about how and why modern organizations are so frequently plagued by mistakes that wreak havoc on many constituencies: from customers, patients and employers to innocent bystanders. Among the disasters we will explore as examples will be the Deepwater Horizon Oil Spill, the Challenger Disaster, the 9/11 attacks, and misestimation of nuclear weapon devastation. We will consider Normal Accident Theory, High Reliability Theory, and the Normalization of Deviance. Enrollment limited to 20 first-year students. FYS WRIT

SOC 0300J. Becoming Adults: Adolescent Transitions to Adulthood.
Adolescence and early adulthood is a critical period in our lives. During this time we experience a number of major life events that mark the transition into adult roles and relationships, and that are of major consequence for the rest of our lives. We leave school, start working, form romantic relationships, begin sexual activity, leave home, become financially independent, get married, and start having children. This seminar explores how adolescent transitions are studied, how they compare across different national contexts, and how individual, family, and community factors affect the type and timing of different transitions. Enrollment limited to 20 first year students. FYS WRIT

SOC 0300K. Inequalities and Health.
We start from the assumption that the social organization of society shapes definitions and experiences of health and illness, the distribution of diseases, and the responses to them. We explore the relevance of social structure and social interaction to health and well-being, emphasizing socioeconomic status, race, ethnicity, gender, and social contexts such as relationships, families, schools, and neighborhoods. This is not a "sociology of medicine" course. It will not emphasize the profession of medicine, health care policy, or health care organizations. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

SOC 0300L. Environment and Society in Africa.
This seminar will actively examine contemporary environmental issues in Africa. The African setting is a key site for the world’s environmental challenges and policies, with a large number of highly visible and valued flora, fauna, and ecosystems. At the same time, Africa nations are severely pressed with competing social issues: poverty, economic development, health, refugees. How can these be reconciled? What roles do the many actors play? This course is multidisciplinary in orientation and broadly scoped geographically. Seminar discussion admits a variety of perspectives. Readings span a wide variety of approaches. Enrollment limited to 20 first year students. S/NC. FYS

SOC 0400. Deviance, Crime and Social Control.
This course explores the reasons why society creates mandatory rules of behavior, the reasons why members of society sometimes break those rules, and the reasons why society responds to rule-breaking in the ways that it does. We focus on leading sociological, criminological explanations of deviance, crime and social control. Enrollment limited to 100

Why do we follow social rules and conventions? And how is social change – that is, the making of new rules and expectations – possible? When we respond to rules, do we act as free-willing individuals or do we follow social structures we have no control over? These questions have motivated generations of sociologists, but many of the arguments have already been developed by four "forefathers" of sociology: Karl Marx, Max Weber, Emile Durkheim, and Georg Simmel. Looking at the transformations around them – the rise of capitalism, the modern nation-state, rational bureaucracy, the metropolitan, the decline of religion, and much more – they developed arguments that allow us to better understand ourselves, our actions, and the contemporary political, economic and social transformations around us. WRIT

SOC 1020. Methods of Social Research.
This course introduces students to the frameworks and methods of conducting sociological research – from both a qualitative and quantitative perspective. The aim is that students develop the skills to ask and answer interesting and important questions about sociological phenomenon. The focus is on designing and executing research, from identifying an interesting question and reviewing the relevant literature, to collecting and analyzing data, to drawing reliable inferences and presenting meaningful results. There is a heavy focus on reading and discussing academic research and working in research teams. By the end of the semester students will complete their own research projects.

SOC 1030. Organizational Theories of the Public and Private Sectors.
This course is a general introduction to the study of organizations from a macro-sociological perspective. Rather than examining the attitudes, actions, and interactions of individuals inside organizations, this course focuses on organizational systems and structures, their environments, and their significance in society. Topics include social, cultural, political and economic processes in organizations, issues of organizational learning, change and life cycles, inter-organizational dynamics such as alliances, and organizational networks, and topics related to power, equity and diversity.

SOC 1050. Methods of Research in Organizations.
An introduction to the various methods used by social scientists to study organizations and to the skills needed by managers and administrators to soundly evaluate problems and assess performance within organizations. Explores both qualitative and quantitative methods. Students gain experience in developing research questions and linking those questions to appropriate research designs. Enrollment limited to 60

SOC 1060. Leadership in Organizations.
What is leadership? What makes a great leader? Can leadership be learned? Improved? This course explores various theoretical approaches to leadership using a combination of lectures and case-study analysis. Additionally, it aims at developing your personal leadership skills by using self-exploration and reflection, self-assessment instruments, role-play, and feedback from peers. Enrollment limited to 100

SOC 1080. Groups in Organizations.
Teamwork has become increasingly popular in organizations. Whether structured into the organizational makeup, or temporaraly established around specific projects, teams are a critical competency of organizations.
They are considered an effective performance unit, and expected to efficiently cope with the fast changes and demands of today's corporate environment. However, deriving the full benefits from teamwork requires correct management of its processes and dynamics. This course dwells on selected issues in team development, internal processes, and members' behavior, as well as management skills needed to effectively lead teams; therefore it can benefit anyone who works in a group, whether as a student or in the business world. Enrollment limited to 35.

**SOC 1090. Theories of Organizational Dynamics and Decision Making.**
This course focuses on the internal dynamics of organizations. It examines how individuals' attitudes, actions, and interactions make a difference for organizational processes and outcomes. Rather than focusing on organizational environments, structures, processes or outputs, this course is concerned with the way individuals inside organizations enact organizational structures, actions and performance through their attitudes, actions, and interactions. Topics include the management of effective teams and groups, leadership, power and influence, principles of human motivation, cognition and decision making, social identity and informal networks, organizational culture, and change.

**SOC 1100. Introductory Statistics for Social Research.**
Introduction to descriptive and inferential statistics: measures of central tendencies and variability, sampling, tests of significance, correlation, and regression. Also includes the use of computers in data analysis. Knowledge of elementary algebra is assumed. Enrollment is limited to 144 students.

**SOC 1114. Law and Society.**
A broad exploration of contemporary social-sciences scholarship on law and legal institutions, covering competing theoretical perspectives and drawing examples from diverse empirical settings. Lectures and discussions survey different ways in which social scientists study legal life, seeking contrasts and commonalities across the various perspectives. Coverage includes: Social-psychological models of rule-following and rule-breaking; social-structural linkages between law and the economy, stratification, and politics; and the dynamic relationship between law and social change—including the role of lawyers, judges and juries in giving law "independent causal significance." Strongly recommended: previous coursework in the social sciences.

**SOC 1117. Focus Groups for Market and Social Research.**
This course introduces students to a range of qualitative research methods commonly used in market and social science research. It is designed to provide students with a skill set that will allow them to conduct and design market and social research that gets below the surface of the traditional survey. Focus groups, ethnographic observation and user-centered research are widely used in product design, communications, marketing and entrepreneurship research. Students will learn and practice all of the methods used in the course by conducting a semester-long research project, will gain insight into which methods are most appropriate for particular research needs.

**SOC 1119. Understanding the Arab Spring: Sociology of the Middle East.**
What explains the continuous mass uprisings in different parts of the Middle East since the beginning of 2011? Have they been successful in transforming power structures? Or already been co-opt by the legacies of the older regimes? This class probes the "Arab Spring" comparatively and sociologically from a historical perspective. It is sociological, it assumes a strong relationship between different forms of exclusions (on the basis of religion, ethnicity, gender and class) and the uprisings. It is historical because it explores these exclusions through a close analysis of the historical particularities of nation-state formation in the region.

**SOC 1120. Market and Social Surveys.**
This course covers the theory and practice of survey research. Topics include questionnaire design and formatting, sample design and selection; interviewing techniques; data base design and data entry; and elementary data analysis and report production. Students individually design and conduct a survey on a topic of their choice, and collectively conduct and analyze a sample survey of the Brown student population. Prerequisite: SOC 1100 or equivalent.

**SOC 1240. Human Sexuality in a Social Context.**
How do we come to know ourselves as sexual beings? How do individuals develop attractions, make sexual choices, define and enact their own sexuality? What is social about sexuality, and how do institutions and organizations influence understandings of human sexuality over time? This course investigates these questions by examining the processes through which the human body is sexed, from without, by the society into which it is born, and from within, through self-definition, desire, and practice. Social science theories of sexuality will be considered, and cross-cultural and historical accounts of sexual practices will be reviewed. Not open to first year students. WRIT.

**SOC 1250. Perceptions of Mental Illness.**
This interdisciplinary course centers on the need to understand mental illness in a broad social context. It covers personal experience of mental illness, history of psychiatric concepts and treatment, politics of diagnosis, mental health policy and deinstitutionalization, public attitudes toward mental illness, social factors and epidemiology of mental illness, and links between mental illness and creativity. There is much attention to artistic perceptions of mental illness through fiction, memoirs, drama, music, and art.

**SOC 1260. Market Research in Public and Private Sectors.**
Introduction to data and research methods for private and public sector organizations. Data used in market research include trends in the population of consumers, economic trends, trends within sectors and industries, analyses of product sales and services, and specific studies of products, promotional efforts, and consumer reactions. Emphasizes the use of demographic, GIS, and other available data.

**SOC 1270. Race, Class, and Ethnicity in the Modern World.**
Applies sociological analysis to understand present and historical cases of ethnic and race relations and conflicts. Topics addressed are the social construction of race and ethnicity; historical processes of racialization; ethnic conflict and the nation state; and the linkages between race, class, and social mobility. Focuses on racial and ethnic relations in the U.S., but also has a strong international comparative component.

**SOC 1310. Social Change in Latin America.**
Analyzes the development of modern Latin American societies, focusing on three interrelated processes: the formation of states, the formation of nations, and the formation of socioeconomic systems. The approach is macrosociological, looking at broad processes of structural and institutional change, and historical-comparative, analyzing and comparing how the three processes above developed historically in different Latin American countries.

**SOC 1311. Micro-Organizational Theory: Social Behavior in Organizations.**
Micro-Organizational Theory focuses on the human dynamics of organizations as natural systems. It examines how individual attitudes, actions, and interactions make a difference for organizational processes and outcomes. This focus is contrasted with more macro-level approaches, which take the organization (instead of the individual) as the primary unit of analysis. For example, studies of organizations from an economic perspective are typically concerned with the performance of the organization relative to its competitors. Studies of organizations from a macro-sociological focus are typically concerned with an organization’s routines and structures, contextualized by the broader environment. SOC 1311 takes a more micro and meso perspective that asks questions such as, "why do individuals in organization behave the way they do, how does this affect the organizations of which they are a part and how, in turn, are individuals affected by their organizations?"

**SOC 1315. Macro-Organizational Theory: Organizations in Social Context.**
This course examines the growing body of theoretical and empirical research on the sociology of organizations. Lectures and discussions will cover a wide range of perspectives and draw examples from a wide range of organizational settings – corporations, non-profits, political parties, public agencies, the military, professions, and voluntary associations. The goal is to survey the many different ways in which sociologists think about and study organizational life. Optional readings and assignments will also allow students to develop a more intensive command of specific sub-fields, should they wish to do so.
SOC 1330. Remaking the City. Cities are being reshaped by immigration, economic restructuring, and other forces. This course reviews these changes from several perspectives, including the patterns and causes of change, the role of politics and public policy, and how different groups of people (by class, race, and national origin) manage under the new conditions. Readings will emphasize historical and cross-national comparisons.

SOC 1400. Political Sociology. Analyzes "American Exceptionalism" through constitutional and cultural controversies. Considers relations between the state and such institutions as the market, the family, associations and churches. Examines the effects of class, race, ethnicity, and gender on American politics.

SOC 1410. Aging and the Quality of Life. Provides a broad-based knowledge of the aging process and its impact on the quality of life of elders. Explores physical, psychological, social, cultural factors. Assesses different approaches to meeting needs of elders and providing high quality care and examines consequences of an aging population for social institutions. Prerequisites: SOC 0010 or 0020 and PHP 0070 or 0310, or permission of the instructor.

SOC 1420. Violence and Society. The course focuses on the personal and structural sources and consequences of violence in the U.S. We investigate three levels of violence: interpersonal; institutional, wherein social institutions do violence to individuals or groups; and structural, examining the structures of society that tolerate or promote violence, both within the society and toward other societies. Next, we examine the culture of violence that permeates our society, including the mass media and violence. We focus on specific forms of violence in our society, including gang violence, bullying, violence within schools, sex trafficking, war, religious violence, and terrorism. WRIT.

SOC 1430. Social Structure and Personal Development. The relationship between one’s place in the social structure and one’s own personal growth. Investigates the social aspects of individual growth and change throughout the life course. Also examines social factors involved in the failure to find a meaningful place for oneself in society. WRIT.

SOC 1440. Intimate Violence. Explores sociological perspectives of violence in intimate relationships. Begins with theories of violence, including social learning theory, the frustration-aggression hypothesis, and violence as catharsis. Examines the contributions of gender, race status, media violence, and pornography to the issue. Investigates specific forms of intimate violence: sexual aggression (including "acquaintance rape"), partner abuse, elderly abuse, and child abuse. Not open to first year students.

SOC 1540. Human Needs and Social Services. The development of human services and a broad range of social welfare purposes are studied, including health and nutrition programs, job development, youth empowerment, and family, workforce, and educational policies. The role of nonprofit and nongovernmental organizations receives particular attention, and alternative models of human services are discussed. This semester will focus particularly on the impact of community-based programs, featuring case studies from projects funded through the course, "Investing in Social Change," in Fall 2010. The emphasis will be on different means and measures for evaluating impact and demonstrating sustainability and accountability. Instructor permission required.

SOC 1550. Sociology of Medicine. The sociopolitical context within which health, illness, and medical care are defined. Sociological materials are used to examine current developments in the health care field, with emphasis on identifying social and political forces that impinge upon the delivery systems and tracing their impact on the roles of practitioners and the health of their clients.

SOC 1600. Comparative Development. An exploration of the economic, political, and social changes that constitute development. Both the historical experience of Europe and the contemporary Third World are considered. Major processes examined include state and nation-building, agricultural modernization, colonialism, industrialization, revolution and socialism, authoritarianism and democracy, and socioeconomic distribution. Emphasis on the countries of Africa, Asia, and Latin America.

SOC 1620. Globalization and Social Conflict. Examines the effects globalization is having on the economies and societies of the developed and developing world. Focuses in particular on how new forms of global production and networking are transforming the traditional role of the nation-state, creating new dynamics of wealth distribution, and generating new sources of social conflict and political contestation, including transnational social movements. WRIT.

SOC 1640. Social Exclusion. Why are some groups rejected and others accepted? This course examines the mechanisms of belonging and ostracism, social integration and exclusion, theories of diversity and hierarchy, and policies to reduce exclusion and inequality.

SOC 1650. Unequal Societies. This course compares nation-states in terms of various forms of inequality and assesses theories explaining international inequalities. It examines why poverty, income inequality, and poor health are greater in the United States than in comparably affluent countries, why intergenerational mobility varies, and why some societies treat women more equally or are more accepting of immigrants and cultural minorities than others. It asks whether the high standard of living in the Global North comes at the expense of the Global South. What holds unequal societies together and pulls them apart? Can inequalities be reduced?

SOC 1830. Mattering and Dysfunctional Behavior in Adolescence. No description available.

SOC 1840. Mattering and Dysfunctional Behavior in Adolescence. No description available.

SOC 1870A. Investing in Social Change. Philanthropy -- "giving away money" -- sounds attractive and simple. But the very acts of contributing and receiving resources affect dynamics and relationships among all involved. This course explores philanthropic strategies, social change, and the sociological dimensions of philanthropy in historic and current practice. Students engage in teams to investigate a particular community concern, design an investment strategy, and recommend the investment of grant dollars. Course enrollment is by application only. Applications can be found at swearercenter.brown.edu shortly before the start of class. Students who pre-register must still complete the application process and attend the first class meeting. Instructor permission required. Enrollment limited to 12. WRIT.

SOC 1870B. Seminar in Contemporary Political Sociology. Explores how political power in society is structured from above and challenged from below. Using contemporary theory and comparative-historical analysis, this seminar critically addresses the power of the modern state, the politics of social class, the character of social movements, and the causes of social revolution. No formal prerequisites. Previous coursework in the social sciences is recommended. Enrollment limited to 20. Not open to first year students.

SOC 1870C. African Development and Demography. Focuses on the relationship between socioeconomic developments in Africa and their demographic transitions. Particular emphasis will be placed on cultural issues in the analysis of population changes (mortality, morbidity, migration, family, and fertility) in the contexts of economic growth and dependency. Theories of development will be evaluated in the context of African demography; African population patterns will be assessed in their developmental diversity.

SOC 1870D. Aging and Social Policy. This seminar examines the policy challenges of Americas aging population, centering on two major themes. The first has to do with the impact of the elderly on society and societal institutions. The second theme concerns alternate models for health and social service provision. We explore the process of policy formation, focusing on the social and political construction of the problems of aging. Enrollment limited to 20. WRIT.

SOC 1870E. Alternatives to Violence. We examine nonviolence as a method for resolving serious social conflict. We consider psychological and sociological approaches to understanding why people choose violence, as a precursor to studying theories of nonviolence. We investigate practitioners of nonviolence throughout history.
SOC 1870C. Capitalism, Democracy, and Social Welfare.
This seminar for advanced undergraduate and graduate students explores long-term developments in modern societies. Empirical comparative historical analysis and theoretical assessments of causation, inevitability, and alternative possibilities will be complemented by normative reflections.

Explores central issues in the social research of the Chinese family in both historical and contemporary contexts, with primary emphasis given to the latter and the family systems in China and in Taiwan. Two questions frame the course: "What is going on in Chinese families?" and "Why?"

SOC 1870L. Contested Environmental Illness-Research Seminar.
Examines "contested illnesses," focusing on environmental factors in Gulf War illnesses, asthma, breast cancer and other diseases. Students conduct interviews and do field work and document analysis to study lay, scientific, and governmental perspectives. Examines how these disputes can lead to progress in disease detection and etiology, and in the development of less toxic products.

SOC 1870K. Demographics and Development.
Assesses the social and economic determinants and consequences of changes in fertility, mortality, and migration and their impact on the size, distribution, and composition of population in developing societies. Implications of the evolving population structure for planning and policy. Enrollment limited to 20. WRIT

SOC 1870L. The Myth of Markets: Exploring the Social Side of Economics.
Critically examines the relationship between economics and sociology. Aims to help students develop the knowledge and skills to critically observe, assess, and respond to important social and economic issues at the macro, meso and micro levels. Students also learn the skills of critical analysis and argumentation needed to form thoughtful opinion, take a critical position, or make a decision about important economic and social issues. Thus, students gain expertise as informed actors and advocates in the social and economic system. Prerequisites: SOC 1010, SOC 1030, ECON 0110, equivalents, or permission of the instructor. Enrollment limited to 20. WRIT

SOC 1870M. Entrepreneurship and Good Work: Engineering Dreams.
In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of "good work". Using a combination of relevant case studies, readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one's working years.

SOC 1870N. Environmental Sociology.
Environmental sociology brings sociological understandings to the conversation between social groups and "the environment." How does society define what constitutes "the environment?" How do societies construct that environment--and in what ways are groups shaped by it? Who has differential access to environmental resources and why? Why and how are some members of societies victims of environmental injustices? This course explores these questions as it probes the environment-society nexus. Designed to prepare PhD students for preliminary exams and for graduate students and advanced undergraduates who wish to gain a thorough, comprehensive understanding of key issues and literature in environmental sociology. Enrollment limited to 25 juniors, seniors, and graduate students concentrating in Sociology or Environmental Studies. WRIT

SOC 1870O. Ethnic Entrepreneurship.
This course focuses on the dynamics of urban labor markets in Latin America. In spite of rapid industrialization, large numbers of people in Latin American cities depend on the informal economy for their livelihood. The course begins with a review of the different theoretical approaches to the urban labor markets and the informal economy in Latin America. It then focuses on the relationship between industrialization and urbanization in the region, the economic and social linkages of the informal economy, and the household strategies of labor market insertion. Enrollment limited to 20. WRIT

SOC 1870R. Groups in Organizations.
Groups are the core social unit of organizations. This class examines the unique processes that make groups more than just the sum of their individual members, as well as the impact of groups on organizations, and the ways in which groups are constrained and influenced by organizational context. Enrollment limited to: 20

SOC 1870S. Sociology of Gender.
Gender is among the most prominent organizing principles in our society. From the day they are born—and even earlier as the result of reproductive technologies—on through to the day they die, individuals are gendered. Instead of understanding gender as a set of behaviors derived from innate, fixed biological differences between men and women, this course analyzes gender as a social arrangement shaped by social actors, organizations, and institutions. Drawing from social science research, the course analyzes everyday interactions of intimacy, language, and identity issues, as well as macro structures like the economy, religion, and education, to understand how they affect notions of gender. The course sustains an analysis of sexuality because ideas of femininity and masculinity are constructed around notions of "appropriate" sexual conduct and relations. Although this course focuses on everyday life in this country, the class will explore the production and institutionalization of gender relations in historical moments and spaces beyond the U.S. Enrollment limited to 20 juniors and seniors.

SOC 1870U. Household and Families.
Household membership typically entails coordinated behavior. We discuss the organization of work and its gendered dimensions. We explore the determinants and consequences of existing divisions of labor drawing on readings from multiple disciplines. The approach is sociological and comparative. Considerable time devoted to less developed settings. Seminar format. Individual research encouraged. Enrollment limited to 20. WRIT

SOC 1871A. Sociological Perspectives on Mexico - United States Migration.
This course examines the economic and social determinants of migration, and the consequences of migration for migrant families and communities. Each stage of the migration process is examined: the decision to migrate, getting across the border, adaptation and settlement in the U.S., return migration, and the impact of migration on origin communities.

SOC 1871B. Sociological Perspectives on Poverty.
Examines the personal experiences of socioeconomic status, with focus on the lower tiers of the hierarchy. We distinguish three levels of poverty: the working poor, marginal workers, and the underclass. Analysis will make use of issues of gender and race, and ethnicity, and urban and rural settings. We investigate sociological perspectives on the problem of homelessness. Enrollment limited to 20.

SOC 1871C. Sociology of the Legal Profession.
This seminar explores the structure and functioning of the legal profession, with a particular focus on the role of lawyers in contemporary America. The approach is broadly sociological, emphasizing that lawyers, like all professional work, reflect the social dynamics of both the profession itself and the larger society in which the profession is embedded. Topics and materials focus on general social processes, not on the mechanics of getting into law school, choosing a practice area, or succeeding as a practitioner. Through readings and field observations, coupled with weekly discussions and e-mail dialogues, the seminar invites students to refine and extend their thinking on a series of important and controversial topics, including legal education, client relations, professional ethics, inter-
professional competition and intra-professional stratification. Prerequisites: familiarity with other areas of sociology or law is helpful, but not essential; previous coursework in the social sciences is strongly recommended

SOC 1871D. Sophomore Seminar in Sociology of Development. This seminar provides an introduction to the study of development. It looks at the diversity of understandings of the concept of development as well as its practical importance in the world. Students will read texts that present pressing questions and issues concerning development practices, policies, and theories. Efforts to connect broad theoretical debates to understanding contemporary problems will be encouraged. Enrollment limited to 20 sophomores. WRIT

SOC 1871E. Theory and Methods in Historical Sociology. An examination of work at the intersection of sociology and history. Explores the different theoretical traditions that guide the sociological analysis of history, the diverse approaches to conceptualization and comparison used in the investigation of large-scale structures, and the various methodological techniques that are available for generating valid explanations of historical patterns of change. Prerequisites: some background in sociology or history

SOC 1871F. Principles and Methods of Geographic Information Systems. An introduction to the fundamental principles and methods of geographic information systems (GIS). Topics include (a) handling different types of geographic datasets, (b) geoanalytical and modeling tools in GIS, (c) conceptual and theoretical aspects of GIS application development, and (d) errors and uncertainty analysis of GIS applications. Laboratory assignments and the project work provide hands-on experiences in GIS. Enrollment limited to 15 juniors and seniors. Instructor permission required. WRIT

SOC 1871G. Social Goals, Motivation and Behavior in Organizations. Social goals such as status, reciprocity, and group solidarity take into consideration not only our individual needs, but also the social context. In this course we will learn about these three social goals, various types of organizational motivation, and the role the social goals may play in influencing people’s behavior when they work in groups

SOC 1871H. Social Perspectives on HIV/AIDS. This seminar will build upon your understanding of the perspectives and research methods used in sociology through studying the vulnerabilities for HIV infection and the social consequences of the epidemic in East and Southern Africa. The course relies heavily on student participation, which will include leading class discussions, making formal presentations, and contributing to class discussions. The readings have been chosen to frame our discussion and to fuel debate, therefore, all readings should be completed before the class for which they are assigned. It is helpful if you have had previous coursework in sociology; however, the course is open to all students interested in the topic

SOC 1871I. Advanced Geographic Information Systems. Advanced GIS will explore students in the social sciences to the tools of spatial analysis. Students will explore both the theoretical foundation for different types of spatial analysis as well as the practical implementation of spatial analysis as presented in various software packages

SOC 1871K. Nanotechnology and Organizations. In recent years, nanotechnology has attracted enormous interests from a variety of organizations. This course examines how different organizations - public, private and non-profit - promote and shape the development of nanotechnology. To help students understand the emergence of this new high-tech science, this course also introduces theories and empirical studies in the literature of organizational studies

SOC 1871M. Theories of the Third Sector and Civil Society. Third Sector - consisting of non-government, non-profit organizations and social movements - as an important segment of societies around the world. This seminar examines social theory assessing the contributions, limitations, opportunities, challenges of this sector. The focus is both local and global, looking at organizations with social purpose related to health, wealth, development, and the environment. Critical issues: the impact, accountability, and sustainability of sector activities; how to foster optimal interactions among professionals and lay people; how the sector can avoid co-optations and nurture civic engagement; and what constitutes social justice in the distribution of the sector’s attention and resources.

Prerequisite: one advanced course in Sociology, Development Studies, or nonprofit orgs. Preference to seniors in Soc and COE. Enrollment limited to 20

SOC 1871N. Military Health: The Quest for Healthy Violence. As an institution, the military trains individuals to conduct violence while remaining, at least ideally, healthy. From the standpoint of the organization, the successful soldier is someone who is good at violence at the same time that he or she is mentally and physically fit. Enrollment limited to 20

SOC 1871O. Law, Innovation and Entrepreneurship. This seminar explores the relationship between legal institutions and macro-organizational change. The course devotes particular attention to the legal and organizational processes that shape (and are shaped by) the emergence of new technologies, new enterprises, and new industries. Although discussions may touch on technical aspects of law and/or entrepreneurship, most topics and materials focus on the general sociological processes that underlie changing organizational environments. The seminar is aimed at advanced students who have some prior familiarity with the sociology of law is helpful, but not essential. Through shared and individual readings, weekly discussions, and e-mail dialogues, the course provides an opportunity for students to refine and extend their thinking on important and controversial topics at the intersection of the contemporary organizational and socio-legal literatures. Prerequisite: SOC 1030 required (waivable by permission of instructor). Enrollment limited to 20 sophomores, seniors, and graduate students

SOC 1871P. Field Methods in Development Research. An introduction to the various techniques of field methods in development research, with a focus on qualitative and field methods

SOC 1871Q. Sociology of Culture. This upper level seminar reviews classic and contemporary approaches to the sociology of culture, with special attention to the cultural sociology, relational sociology, and questions of political culture

SOC 1871R. Knowledge Networks and Global Transformation. How do refined knowledge and the social relations that organize and distribute it influence changes in the institutions, inequalities and cultural systems and practices that define particular world regions and global formations? And how do global transformations influence the trajectories of knowledge production themselves? We will examine particular knowledge-identified agents, including universities, research institutes, think tanks, and professional associations, to consider why they approach global transformations in the way that they do. And we will consider how particular kinds of global transformations, from the end of the cold war to the transformation of the nature of war and violence to the last financial crisis, affect knowledge production itself. By exploring intersections between global complexity and reflexivity in this fashion, we hope to increase our own capacities for seeing the world not only as it is, but how knowledge might be used in making better alternatives for the future. Enrollment limited to 20 juniors and seniors. WRIT

SOC 1871S. Legacies of Inequality: The U.S. and Beyond. Does education equalize or widen gaps between people and nations? Has mass imprisonment reduced crime or exacerbated U.S. racial inequality? Does biology determine destiny, or is society more fluid? This course introduces theory and research on social inequality, emphasizing temporal dimensions of social differentiation. Attention will be paid to the characteristics we are given (race, sex), those we achieve (education, income), and institutions and policies we encounter throughout the life cycle (schools, the justice system). By understanding the complexities of social inequality and the challenges of devising solutions, students will leave as informed citizens, better equipped to enter any profession. Enrollment limited to 20. First year students require instructor permission

SOC 1871T. Religion and Politics. It is by now a cliché to state that the ‘9/11 changed the world’. This episode has certainly altered the global politics, both the international relations as well as the political dynamics within many individual countries in the global South and North. But the rise of recent wave of religious ‘fundamentalism’ goes back at least to the 1970s, a decade marked by a seeming crisis of modernity in the West as well as the post-colonial states in the global South to handle the changes that modernity had instigated. Enrollment limited to 20
SOC 1871J. Sample Surveys in Social Research.
This course covers the theory and practice of survey research. Topics include questionnaire design and formatting; sample design and selection; interviewing techniques; data base design and data entry; and elementary data analysis and report production. Students individually design and conduct a survey on a topic of their choice, and collectively conduct and analyze a sample survey of the Brown student population. Please note that this course is a seminar version of SOC 1120. Enrollment limited to 20. WRIT

SOC 1871V. Update on American Society: Social Trends in the Last Decade.
American society is always changing, and national data sources (especially the American Community Survey and Current Population Survey) provide updated information on social trends every year. This course will review the most significant recent social trends based on these sources, including such topics as income and wealth inequality, racial and ethnic change, immigration, marriage and family patterns, home ownership, and residential segregation. Enrollment limited to 30 juniors, seniors, and graduate students.

SOC 1871W. Geographical Analysis of Society.
Provides an introduction to a geographical approach to understanding the spatial organization of individuals, societies, and economies. The two main emphases are on theories/concepts and applied analytical tools. We will learn about key theories in geography, sociology, and economics that have attempted to organize and classify the spatial structures and interactions across space of social and economic actors and will work with related analytical techniques. Enrollment limited to 20 juniors, seniors, and graduate students. WRIT

SOC 1871Z. Martial Arts, Culture, and Society.
In this upper level undergraduate course for which there are no prerequisites, we will consider how martial arts and other social sciences, can help us understand martial arts and how martial arts might inform the social sciences. We shall consider how various bodymindful martial practices, their organizations, and their cultures shape, and are shaped by, different structures of power at various levels of society. We concentrate on martial arts because they straddle such an important axial dimension of society around violence. Enrollment limited to 20.

SOC 1950. Senior Seminar.
Advanced research seminar for sociology concentrators in the second semester of work on an honors thesis. Participants examine methods for analyzing, writing, and presenting thesis material and apply peer review techniques in assessing each other's work. Culminates in presentation of thesis to the department. Students doing independent study research may also participate with the instructor's permission. Required for "honors" in sociology. WRIT

Supervised reading or research. Specific program arranged in terms of the student's individual needs and interests. Required of intensive concentrators; open to others only by written consent of the Chair of the department. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Research seminar for students writing an honors thesis. Under the direction of a faculty advisor, students construct and carry out a research project. The written report of the research is submitted to the advisor for honors consideration. A second reader selected by the thesis advisor certifies that the thesis is of honors quality. Please check Banner for the correct section number and CRN to use when registering for this course.

Research seminar for students writing an honors thesis. Under the direction of a faculty advisor, students construct and carry out a research project. The written report of the research is submitted to the advisor for honors consideration. A second reader selected by the thesis advisor certifies that the thesis is of honors quality. Please check Banner for the correct section number and CRN to use when registering for this course.

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of anthropology, economics, political science, and sociology. The course has four objectives: 1) to provide students with a broad understanding of current debates and research on development; 2) to explore a range of substantive issues including growth, inequality and democratization, 3) to develop interdisciplinary analytical skills that can be applied to concrete research questions; and 4) to foster cross-disciplinary conversation and debate.

SOC 2000A. To Be Determined.
No description available.

SOC 2010. Multivariate Statistical Methods I.
Introduction to probability, descriptive statistics and statistical inference. Coverage of the linear model, its assumptions and potential biases. Emphasis on hypothesis testing, model selection and interpretation through application with real data.

SOC 2020. Multivariate Statistical Methods II.
This course is a graduate-level introduction to multivariate regression models for categorical and limited dependent variables. Subject matter includes modeling nominal and ordinal outcomes; truncated distributions; and selection processes. The course also reviews strategies for sample design; handling missing data and weighting in multivariate models. The course employs contemporary statistical software. Special emphasis is placed on model selection and interpretation. Prerequisite: SOC 2010.

This is a graduate-level course requires students to engage in detailed analysis and critical review of sociological thought of the 19th and early 20th centuries. The class will introduce students to the critical thinking, methodological innovation, and historical imagination of sociological theory by reading the original texts of the forefathers of sociology, including Karl Marx, Max Weber, Emile Durkheim and others.

SOC 2050. Contemporary Sociology.
This class offers a review of some of the most interesting contemporary social theorists and the most intense debates in current sociological thought. It thematically reviews the works of Jurgen Habermas on the public sphere, Michel Foucault on disciplinary and governmental modes of power, Bruno Latour on modernity and modern science, Pierre Bourdieu on field and habitus and among others. No prerequisites.

SOC 2060. Complex Organizations and Health Policy.
Application of organizational theory to health care organizations, with special emphasis on the development of multi–organizational provider structures, health policy formulation and reform and the influence of regulations and technology on healthcare organization relationships. Written permission required for undergraduates.

An advanced introduction to theoretical and substantive issues in the social scientific study of population. Major areas within sociology are integrated with the study of population, including the comparative–historical analysis of development, family processes, social stratification, ethnicity, ecological studies, and social policy. Primarily for first year Graduate students.

SOC 2090. Culture and Social Structure.
An analysis of the interrelations of religious ideas, value patterns, and various forms of knowledge on the one hand, and of the societal structures and changes in organizations and roles on the other hand. Offered in alternate years.

SOC 2112. Practicum in Social Research.
Covers the steps involved in social survey research, from site selection and questionnaire design all the way through data dissemination. It assumes a basic level of familiarity with social science research methods, particularly the logic of causal inference. We will discuss the linkage between research questions, site selection, and questionnaire design. We will also discuss in detail many of the practical considerations involved in fielding a survey, including balancing available funds and personnel with ideal sampling strategies and balancing the focus on a particular research topic with the responsibility to collect enough general information to make the data useful to a variety of users.

The influence of social and economic factors on the development of concepts of health and illness, on the cause and distribution of disease,
and on responses to disease. Lay-professional disputes over disease identification and intervention. Implications of medicalization (the expanding social jurisdiction of medicine). The importance of the health care system in American society. Selected issues in recent health policy

**SOC 2150. Socioeconomic Analysis of Development.**

Compares economic and sociological perspectives on the problems of development. Topics include problems of conceptualization and measurement, entrepreneurship, capital accumulation, labor force utilization, income distribution, the role of the state, and the impact of international economic relations on developing countries. Prerequisite: a basic undergraduate micro-macro economics course or permission.

**SOC 2200. Social Capital and Social Networks.**

Explores the consequences of social capital and social networks for economic development. Examines different types and combinations of social relations, network structures of these relations, institutional environments that impact them, and dynamic forms these social relations take. Multilevel development cases include urban ethnic entrepreneurship, rural Third World communities, business networks (financiers, firms), intranational regions, and state-society relations.

**SOC 2210. Qualitative Methods.**

Emphasis on ethnographic field work through participant observation and interviews. Some attention to content analysis and visual sociology. Technical training in developing observational and interview guidelines, data collection, coding, transcript analysis, and computer applications. Strong emphasis on quality writing. Analysis of ethnographic research in book and article format. Attention to recent developments in ethnography, especially reflexivity and autoethnography.

**SOC 2220. Advanced Quantitative Methods of Sociology Analysis.**

Analysis of limited variables (variables at a categorical or ordinal level of measurement). Topics include measures of association, contingency table analysis, binomial and multinomial logistic regression, ordered logistic regression, goodness-of-fit tests, and parameter interpretation. Prerequisite: SO 201.

**SOC 2230. Techniques of Demographic Analysis.**

Procedures and techniques for the collection, evaluation, and analysis of demographic data; measures of population composition, fertility, morality, and migration; construction of life tables, population and projections, population dynamics; responsible use of demographic methodology. Mandatory S/N/C.

**SOC 2240. Event History Analysis.**

An introduction to hazard models and their application to event history data in sociology. Topics include survival distributions, standard parametric models, discrete time approaches, partial likelihood models, and the introduction of covariates. Attention is given to practical application and the estimation of these models with software packages, where possible.

**SOC 2260C. Perspectives on Family Planning.**

Reviews sociological and demographic perspectives on family planning. How and why did family planning programs develop? What do they entail? Who do they serve? What are the implications of family planning programs for individuals and family life? Individual case studies are considered. International family planning efforts are emphasized.

**SOC 2260D. Race and Ethnicity in the United States.**

Examines the social construction of race and ethnicity in the U.S. and compares it to that of other countries. Considers in particular the formation of racial and ethnic identities, the effects of racial and ethnic identities, the effects of racial and ethnic classifications on the distribution of resources, and social policies that address the consequences of racial hierarchies and racism.

**SOC 2260E. Structural Equation Models in the Social Sciences.**

Structural equation models as used in the social sciences and methodological issues pertaining to such models. Topics include the logic of causal modeling; theories and models; recursive and non-recursive structural equation systems (path analysis); reduced form equations; the problem of identification; unobserved variables and the analysis of covariance structures (using LISREL).

**SOC 2260F. Advanced Demographic Techniques.**

No description available.

**SOC 2270. The Structures of Social Inequality.**

Examines the structural bases for social inequality in the U.S.: gender, race, and socioeconomic status. Investigates the processes by which we generate and preserve these social structures, as well as their effects on the individual. Finally, considers the changing nature of social inequality in a postmodern society and comparative issues across societies. Enrollment limited to 20. Instructor permission required.

**SOC 2280. Interdisciplinary Perspectives on Population.**

This course provides an introduction to interdisciplinary perspectives on population, emphasizing insights from anthropology, economics, and sociology in regards to population questions, theories, and methodologies. The focus is on three topical areas in population studies: understanding fertility change, HIV/AIDS, and population structure and process.

**SOC 2300. Welfare States.**

This seminar examines the political sociology of welfare states and social policies in the United States and abroad. It reviews major theories and policies, accounting for the origins and subsequent development of welfare states, explains the "exceptional" nature of American social policy, and discusses recent welfare reforms in the US and Europe as well as welfare state prospects in less developed countries.

**SOC 2310. Health Institutions and Professions.**

Structure and operation of health professions and health care institutions, both historically and at present. Emphasis on structural determinants of health such as race, class, and gender differences in disease, mortality, environmental exposures, and health utilization and the importance of nonmedical interventions in improving health status and reducing inequalities.

**SOC 2320. Migration.**

A review of the major patterns and differentials in international and internal migration in cross-cultural perspective. Emphasizes theoretical models of migration. Offered in alternate years.

**SOC 2350. Social Movements in Health.**

Study of social movements dealing with health and illness, with emphasis on contemporary movements such as women's health, environmental justice, environmental health, breast cancer activism, asthma activism. Examination of historical formation, recruitment, links to other movements, lay-professional interactions, research ethics, effects on science and medicine, and impacts on society.

**SOC 2360. Fertility.**

An introduction to the study of the social determinants of human fertility. Contemporary and historical populations are considered. Theories and frameworks used to guide fertility research are reviewed. Special topics include: fertility decision-making, gender and fertility, work and fertility, adolescent fertility, and population policies and family planning programs.

**SOC 2410. Contested Environmental Illnesses.**

This seminar studies contested illnesses, which are diseases or conditions in which there is dispute over environmental causation. For many diseases/conditions attributed to environmental and occupational exposure, the disease/condition and/or its causes are discovered by lay people in workplaces and communities. The seminar synthesizes a diverse set of fields, encompassing environmental sociology, medical sociology, medical anthropology, public health, science studies, history of medicine, history of science, environmental health, community-based participatory research, environmental justice, and environmental public health. It places much emphasis on both political economic and ideological factors as determinants of contestation.

**SOC 2430. Fields and Methods of Social Research.**

Introduction to strategies sociologists use to formulate theories and conduct methodologically sound research. Hypothesis formulation and research design; special emphasis on identifying causal mechanisms, techniques of operationalization, and choice of relevant comparisons.

**SOC 2450. Exchange Scholar Program.**

**SOC 2460. Sociology Paper Writing Seminar.**

This course is intended to improve writing skills that are especially relevant scholarship in Sociology. Key issues include the logical flow of ideas, awareness of the audience, clarity of expression, completeness, and (because these writing products will be peer reviewed) anticipation of potential reviewers' objections, and communicating what is new and
interesting about the work. Students will be required to provide a draft of a paper or proposal that has potential to develop into a 25-35 page manuscript. The course is open to graduate students in sociology and to doctoral students in other programs by permission of the instructor. Enrollment limited to 12

**SOC 2500. Teaching Practicum in Sociology.**
No description available

**SOC 2510. Teaching Practicum in Sociology.**
No description available

**SOC 2580. Health and Inequality: Race, Class, and Gender.**
Primarily emphasizes race, class, and gender inequalities, but also attends to inequalities of place, social control and official misconduct, and the responsibility of health care providers and researchers in dealing with inequality. Emphasizes social causation of morbidity and mortality rather than inequalities in access to health services and inequalities in clinical interaction, but touches on these other areas as well

**SOC 2600. Comparative Historical Analysis.**
The seminar focuses on the application of theory and method in historical sociology. It will combine the reading of exemplary works, both classical and current, in comparative-historical sociology, with an exploration of historical methods that involves methodological readings but focuses on students' use of archives in their own individual research. For graduate students only

**SOC 2610. Spatial Thinking in Social Science.**
This course reviews ways in which social scientists have incorporated concepts about space, place, and distance into their theories and research. Examples are drawn from many substantive areas, including the spatial organization of communities, spatial inequalities, and mobility. Separate laboratory meetings introduce methods of spatial analysis encountered in the course readings, including an introduction to GIS and related mapping tools

**SOC 2960A. Comparative Statification.**
No description available

**SOC 2960B. Democracy and Civil Society.**
No description available

**SOC 2960C. Urban Sociology.**
This course will review alternative theoretical perspectives on urban and regional development with an emphasis on variants of ecological and political economy approaches. Substantive topics will include metropolitan restructuring in the U.S. and abroad, growth politics and growth control, neighborhood social networks and collective action, and incorporation of immigrants and minority groups in the metropolis

**SOC 2960D. Organizations and Disasters.**
An overview of theory and research on organizations involved in various forms of disaster prevention, and organizations for whom mistakes can lead to major disasters (such as the Nuclear Regulatory Agency, the Office of Homeland Security, NASA, etc.). Students in this class will be involved in literature synthesis, hypothesis formulation, and the development of research designs to test those hypotheses

**SOC 2960E. Poverty as Social Inequality.**
The objective of this seminar is to examine historical and contemporary poverty in the U.S. Topics covered include the measurement and analysis of poverty, individual and structural causes of poverty, the geographic distribution of poverty, poverty abroad, the consequences of poverty, and the policies that intend to address poverty. Course is organized around sociological perspectives, although multi-disciplinary scholarship is reviewed

**SOC 2960F. Global Political Economy.**
The new phase of capitalism, commonly called "globalization," has radically transformed the postwar order. In this seminar, we will review several debates regarding current political-economic transformations, including: What caused the shift to neo-liberalism? What external economic pressures do states experience? Can domestic factors mediate such pressures? How do developing countries react to the new international environment? And what role does the United States and international organizations play in the new order?

**SOC 2960G. Spatial Data Analysis Techniques in the Social Sciences.**
Survey course of statistical methods that can be used to analyze spatial and/or clustered data at the individual and aggregate levels. Topics include multilevel analysis; fixed effects approaches; spatial choice; spatial autocorrelation, heterogeneity and dependence. Application with real data. Not a course about Geographic Information Systems (GIS) or mapping techniques. Prerequisites: SOC 2010 and 2020, or equivalents

**SOC 2960H. Demography of the Life Course.**
This seminar provides an overview of the development and current uses of the life course perspective in studies of demographic behaviors, process and change. Cohorts and age-graded patterns of behavior are considered as are the effects of social institutions, opportunity structures, and behavioral preferences all of which determine alternative life course pathways. Family origins and prior life experiences, along with ethnic/ racial, gender, and cultural identities are examined as critical factors giving rise to inter-individual differences in demographic behaviors over the life course. The role of biography and agency in decisions about demographic behaviors and actual experiences are considered, as is their relationship to life course pathways, trajectories, and success. Graduate students and advanced Undergraduates with permission

**SOC 2960I. Internal Migration.**
Critical analysis and discussion of current research on trends in, and causes and consequences of internal migration. Specific content of the course varies according to recent developments in the field

**SOC 2960J. Comparing Institutional Forms: Public, Private and Non-Profit Organizational Forms.**
No description available

**SOC 2960K. Comparative Political Sociology.**
This course explores both classic and contemporary debates in political sociology. The central thematic is the relationship between democracy and power and includes theories of the state, markets, social class and civil society. The debates are explored through historical and comparative lenses, covering both old and new democracies. Some background in political or sociological theory is recommended

**SOC 2960L. Special Topics in Population.**
No description available

**SOC 2960M. Sociology of Organizations Graduate Seminar.**
The seminar is a seminar on the sociology of organizations. It is aimed primarily at graduate students who enjoy some prior familiarity with organizational theory, whether in sociology or a kindred discipline. Enrollment limited to 15

**SOC 2960N. Governance in Development.**
No description available

**SOC 2960P. Social Network Analysis.**
Provides a synoptic survey of the various methodologies and theoretical frameworks that collectively go by the name "Social Network Analysis" in the social sciences. Students will study the origin and history of social network analysis during the latter part of the 20th Century and work to develop core competencies in the construction, use and interpretation of basic network measures. Special attention will be given to the intersection of social network theory with broader social theory. Although there are no formal prerequisites, students should be advised that social network analysis relies heavily on matrix algebra and basic statistical theory. Open to graduate students in Sociology

**SOC 2960Q. Sociology of Culture and Knowledge.**
We focus in this course on a few of the important theoretical and empirical developments in cultural sociology since the 1960s. In particular, we address ways in which culture is conceived and researched and how the sociology of knowledge and understanding underlies this address. We also consider the forms in which such a cultural sociology can inform a
wide range of sociological questions, from the formation of the self to the articulation of historical epochs

SOC 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

SOC 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

SOC 2981. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

SOC 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

SOC XLIST. Courses of Interest to Students Concentrating in Sociology
Fall 2012
The following related courses, offered in other departments, may be of interest to students concentrating in Sociology. Please see the course listing of the sponsoring department for location and time.

Spring 2013
The following related courses, offered in other departments, may be of interest to students concentrating in Sociology. Please see the course listing of the sponsoring department for location and time.

South Asian Studies

The diversity and shared histories of South Asia’s cultures, religions, languages, and nations are an important area of engagement for us in the world today. While India, Pakistan, Bangladesh, Sri Lanka, Nepal and neighboring nation-states can be identified on the map as making up a recognizable geographic region, the equally vital diasporic communities from South Asia and their globally dispersed networks extend our understanding of an old and yet changing South Asia.

The South Asian Studies Concentration, and the Brown in India Program are only two of the formal ways in which students can focus on and learn about South Asia. Faculty with teaching and research interests in South Asia and South Asian languages, an array of student organizations reflecting the diversity of South Asia itself, the Haffenreffer Anthropology Museum, RISD, and the RISD Museum, come together to provide scholarly and cultural resources for the study of South Asia at Brown.

For additional information, please visit the department’s website: http://brown.edu/Departments/South_Asia/

South Asian Studies Concentration Requirements

The diversity and shared histories of South Asia’s cultures, religions, languages, and nations are an important area of engagement in the world today. While India, Pakistan, Bangladesh, Sri Lanka, Nepal and neighboring nation-states constitute a recognizable geographic region, the equally vital diasporic communities from South Asia and their globally dispersed networks extend our understanding of an old and yet changing South Asia. South Asian Studies is an interdisciplinary concentration in which students work in a specified chronological period (e.g. ancient, medieval, early modern, or contemporary), in a geographical area (e.g. Bangladesh, Bengal, Maharashtra, North India, Pakistan, South India), or in a particular discipline (e.g. anthropology, Hindi/Urdu, history, religion, or Sanskrit) but also take courses outside of their chosen area of emphasis in disciplines such as economics, literature, philosophy, political science, or theatre arts.

Course Requirements

All South Asian Studies concentrators must take and pass 10 courses as approved by their concentration advisor.

Theatre Arts and Performance Studies Concentration Requirements

The Department of Theatre Arts and Performance Studies (TAPS) is the intellectual and artistic center for the aesthetic, historical, literary, practical, and theoretical explorations of performance in global perspective theatre, dance, speech, time-based art, and even performative roles in everyday life. The TAPS concentration offers three tracks with many points of overlap among them: Performance Studies, Theatre Arts, and Writing for Performance. Concentrators gain exposure to a broad spectrum of performance modes and methods -- acting, directing, dance, and writing, and chose an avenue of focus among them. Everyone graduates having studied craft, gained familiarity with history, and investigated the role of performance arts in culture.

Theatre Arts Track

This concentration combines the study of dramatic literature, theatre history, performance theory, and studio work in the various theatre arts. All concentrators in Theatre Arts will gain practical experience through the study of acting and directing as well as in the technical production of plays, preparing students in the practical study of a cross-section of the vital aspects of theatre craft, including one class in either dance or speech. An essential aim of the concentration track is the engagement of students in performance procedures (acting, dancing, directing, choreography, design, playwriting, dramaturgy, etc.) in order to experience the inter-relationships among social contexts, dramatic texts and theatrical enactments. Along with practical study in craft, concentrators will graduate having studied theatre history and performance theory in global perspective. The study of theatre history provides a Theatre Arts concentrator with the necessary background to understand a variety of dramatic and theatrical forms. The study of performance theory enhances a student's ability to ask fundamental questions about the role of theatre in social, political, cultural, and cross-cultural arenas.

Of the ten courses required, at least four must be in theatre history and dramatic and theatrical theory that forms a backbone for further study in these areas. Students should take at least one course that exhibits geographic or topical breadth beyond what might loosely be called "mainstream" Euro-American tradition. Basic courses in technical theatre and design are required of all students, as is a senior seminar, taken by most students in their seventh semester. The remaining three courses for the concentration may be taken in areas of applied theatre arts (though this is not a requirement); there are sequences of courses available in acting/directing, playwriting, design/technical theatre, and dance. Students wishing to enroll as concentrators in Theatre Arts and Performance Studies and take the Theatre Arts track should see the undergraduate Theatre Arts track advisor, in order to discuss options that will best serve their interests.

Total Credits 10

1 At least one course in the mix of a concentrator's elective requirement's should demonstrate enhanced geographical breadth.

Performance Studies Track

The Performance Studies track in the Theatre Arts and Performance Studies concentration offers a base for students interested in a variety of performance forms, performance media, or in intermedial art. A concentrator in this track will study the multiple modes in which live performance articulates culture, negotiates difference, constructs identity, and transmits collective historical traditions and memories. Because Performance Studies is not primarily invested in one performance mode over another (such as theatre or dance), a concentrator will gain exposure to a broad spectrum of performance modes. Studying ritual, play, game, festival, spectacle and a broad spectrum of "performance behaviors" under the umbrella of Performance Studies, a concentrator will graduate having investigated the role of performance in culture, including performative acts in everyday life, political enactment, ritual behavior, aesthetic or representational practices, and social roles or the performance of subjectivity. The history of aesthetic performance practices (such as the histories of theatre and/or dance) will be an important part of this track, serving to ground inquiry into the broader spectrum of performance study. Students will craft their electives on this track from a wide selection of courses both within the Department of Theatre, Speech and Dance and across the university. The study of performance behavior across mediums such as dance, theatre, ritual, and orature allows for geographic and historical flexibility as not all cultures parse theatre from dance, nor, historically, genres of religious or political ritual from genres of entertainment, play, or game.

At least two of the ten required classes must show geographic or cultural breadth, and be approved as such by the undergraduate concentration advisor. Participation in practical classes in modes of performance is also required.

Students wishing to enroll as concentrators in Theatre Arts and Performance Studies and take the Performance Studies track should see the undergraduate Performance Studies track advisor, in order to discuss options that will best serve their interests.

AFRI 1110 Voices Beneath the Veil
AFRI 1120 African American Folk Traditions and Cultural Expression

Two full credit courses based in performance craft in either Acting, Directing, Speech, Dance, Design, Literary Arts (with a performance emphasis), Visual Arts or Music.

Two additional courses in the academic study of performance and performance culture(s) to be culled from those listed above as well as other courses in the Department of Theatre Arts and Performance Studies or throughout the university in consultation with advisor.

TAPS 1520 Seminar in Theatre Arts

Total Credits 10

1 One of which must show geographical breadth.
2 These classes must be approved by the concentration advisor.
3 An extensive list of courses that might be considered Performance Studies can be made available to interested students

Writing for Performance Track

Concentrators explore the craft and sensibility of writing for live performance in the broad context of art in a changing society. Moving through a graduated series of skill-based writing classes, students additionally encounter theater history in core courses and focused seminars, engage with the practical aspects of production, and relate theatre to other disciplines. Writing is viewed neither as an alienated cause nor a terminal outpost, but as a co-equal aspect of a creative ecology, sharing space with orature, acting, scenography, ethics, and all fields that focus attention, invoke fascination, and alert the will to the possibilities of transformation.

Ten courses are required: A minimum of two writing-skills classes relevant to live performance; a writing or composition class outside of live performance (literature, screenplay, computer programming, video editing); a technical production class; a performance-based class; TAPS 1230 and TAPS 1250; one elective drawn from inside or outside the department that broadens the cultural and disciplinary reach of the track, for example concerning the study of social phenomena from a scientific, philosophical, or political perspective (chosen in consultation with an advisor); senior seminar.

Students wishing to enroll as concentrators in Theatre Arts and Performance Studies on the Writing for Performance track should see the undergraduate Writing for Performance track advisor, in order to discuss options that will best serve their interests.

Required Courses

Select one of the following writing courses:

TAPS 0060 Introduction to Playwriting Workshop
TAPS 0100 Playwriting I

Select one of the following:

AFRI 1050A Advanced RPM Playwriting
AFRI 1050D Intermediate RPM Playwriting
AFRI 1050E RPM Playwriting
LITR 0610A Unpublishable Writing
LITR 1150Q Reading, Writing and Thinking for the Stage
LITR 1010C Advanced Playwriting
LITR 1150S What Moves at the Margins
TAPS 0200 Playwriting II

A course from the TAPS 1500 series (A-Z)

Select one of the following writing/composition classes outside of playwriting:

LITR 1010B Advanced Poetry
LITR 1010D Advanced Electronic Writing
LITR 1010G Cave Writing
TAPS 1280F Introduction to Set Design
TAPS 0250 Introduction to Technical Theatre and Production

One performance-based class. Options include Acting, Directing, Speech, Dance, Visual Arts, Music, or Sign Language.

TAPS 1230 Performance Theory: Ritual, Play and Drama in Context
TAPS 1250 Twentieth-Century Western Theatre and Performance

Select two additional Theatre/Performance History/Theory classes:

TAPS 1240 Performance Historiography and Theatre History
TAPS 1270 Performances in the Asians
TAPS 1330 Dance History: The 20th Century
TAPS 1280N New Theories for a Baroque Stage
TAPS 1280T Contemporary Mande Performance
TAPS 1380 Mise en Scene
TAPS 1400 Advanced Performance
TAPS 1420 Global Queer Performance
TAPS 1430 Russian Theatre and Drama
A course from the TAPS 1440 series
TAPS 2120 Revolution as a Work of Art
TAPS 2200A Abstraction and Resistance
TAPS 1610 Political Theatre of the Americas
TAPS 1630 Performativity and the Body: Staging Gender, Staging Race
TAPS 1640 Theatre and Conquest in Greater Mexico: From Cortes to NAFTA
TAPS 1650 21st Century American Drama
TAPS 1670 Latino/a Theatre and Performance
TAPS 1690 Performance, Art, and Everyday Life
AFRI 0990 Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre
AFRI 1110 Voices Beneath the Veil
AFRI 1120 African American Folk Traditions and Cultural Expression

Total Credits 10

For all concentrates, regardless of track:

In cases where dual concentrations are declared, the Department allows two courses to be counted toward both concentrations.

Honors

The standard pattern above, plus an honors thesis (TAPS 1990), the topic of which would be determined before Semester VII. Candidates for the honors program should have an outstanding academic record and should apply to the Department by Semester VI.

Capstone Experiences:

The tracks come together in several courses but also in a culminating senior seminar. In addition to the senior seminar there are a wide variety of ways students who concentrate can construct a “capstone” experience—such as directing a production, a solo performance, a dance piece, an honor’s thesis, or a design project.

Theatre Arts and Performance Studies Graduate Program

The department of Theatre Arts and Performance Studies offers the following graduate programs:

• Doctor of Philosophy (Ph.D.) in Theatre Arts and Performance Studies. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/theatre-arts-and-performance-studies
• Master of Fine Arts (M.F.A) in Playwriting. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/theatre-arts-and-performance-studies-0

• Master of Fine Arts (M.F.A) in acting or Directing through the Brown-Trinity Repertory Program. For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/theatre-browntrinity-rep-acting-directing

Courses

A practical study in the methods of creating a full-scale production of a musical with elementary age students. Students enrolled in this course will get the opportunity to work hands on with teachers and students in the Providence Public School system (two days per week), culminating in a performance of a musical in a professional Providence theatre. S/NC only. Enrollment limited to 8; written permission required

TAPS 0015. Musical Theatre Songwriting.
A practical study in the creation of songs for the musical theatre. Students enrolled in this course will develop the skills necessary to write the music and lyrics for pieces intended for use in dramatic works. American and international musical theatre writers from the last eighty years will be studied and analyzed. Those enrolled may choose a focus of composition, lyric writing, or both. They will present and perform (or arrange performances of) new material (and rewritten material) each week to be examined by the class, culminating in a cabaret of new works. While beginners are encouraged to join, this is not a music theory course, and composers are expected to have a basic knowledge of theory (or self-taught skills)

TAPS 0020. The Interview: Interpretation and Practice.
Provides an introduction to the art and methodology of the Interview through participation and observation. The class will examine and "play" with published texts as well as mock interviews and exercises in order to help students develop confidence as participants in the form and in-depth understanding of its rhetorical strategies

TAPS 0030. Introduction to Acting and Directing.
Explores basic acting/directing concepts from a variety of perspectives including the use of the actor’s imagination/impulsivity in the creation of truthful, dramatic performance; the body, as a way of knowing and communicating knowledge, and the voice, as a means of discovering and revealing emotion/thought. Areas of emphasis vary with instructor. Please go to the TAPS website for specifics on admission and the mandatory technical requirement. Some evening hours are required. http://brown.edu/academics/theatre-arts-performance-studies/undergraduate-program/-required-course-information. Enrollment limited to 18 first year students. Instructor permission required

TAPS 0060. Introduction to Playwriting Workshop.
A workshop for students with little or no previous playwriting experience. Practicum and theory in various playwriting styles and techniques. Weekly writing assignments and analyses, and development of a major play. Playwriting courses are also available in the Department of English. Instructor permission required

TAPS 0800. Adaptation Culture: New Media → Traditional Theatres.
This class looks at adaptations between the stage and screen and print, as art forms are adapted into new artistic mediums. This class traces histories of theatrical inter-media --stage, cinema, TV, toys, comics and graphic novels-- as they move and multiply, propelled by adaptation. Special attention will be given to in-class presentations that adapt and incorporate various forms of media, from presentational projections to theatrical props. Preference will be given to students who have taken TAPS 1230 and 1240. Enrollment limited to 20

TAPS 0805. Uncomfortable Media (MCM 0901H).
Interested students must register for MCM 0901H S01 (CRN 14424)

TAPS 0100. Playwriting I.
A workshop for students who have little or no previous experience in writing plays. Students will be introduced to a variety of technical and imaginative considerations through exercises, readings and discussions. Course is not open to those who have taken Advanced Playwriting (TAPS 1500, formerly LITR 1010C and TSDA 1500). Enrollment is limited to 14 undergraduates per section. A limited number of spaces are reserved for incoming and transfer students. Instructor permission required. S/NC. WRIT

TAPS 0150. Screenwriting I (LITR 0110E).
Interested students must register for LITR 0110E S01 (CRN 14904 for fall 2012; CRN 24209 for spring 2013)

TAPS 0200. Playwriting II.
Emphasis is placed on dramatic conventions, such as monologues, dialogue, mise-en-scène and time. Writing includes frequent exercises in various theatrical approaches. This course is limited to undergraduate students. Instructor permission required. Prerequisite: TAPS 0100 (formerly LITR 0110C and TSDA 0100). Enrollment is limited to 14 undergraduates per section. Instructor permission required. S/NC. WRIT

TAPS 0220. Persuasive Communication.
Provides an introduction to public speaking, and helps students develop confidence in public speaking through the presentation of persuasive speeches. Primarily for seniors. Limited to 18. Instructor's permission required. No permission will be given during pre-registration; interested students should sign up well in advance on the TAPS 0220 waitlist (form is at http://www.brown.edu/academics/theatre-arts-performance-studies/undergraduate-program/-required-course-information) and attend the first day of class. Attendance is mandatory. The application/waitlist process does not apply to students registering for the Summer term through the Office of Continuing Education

TAPS 0230. Acting.
Focus on elements of dramatic analysis and interpretation as applied to the art of acting, and, by extension, directing. Monologues, scene study, and improvisation are bases for comment on individual problems. Reading of dramatic texts and theory. Substantial scene rehearsal commitment necessary. Attendance mandatory. Not open to first-year students. Enrollment limited to 20. Instructor permission required. S/NC

TAPS 0250. Introduction to Technical Theatre and Production.
This course is an introduction to the basic principles of stagecraft, lighting and sound technology and the different elements of theatrical design. Instructor permission required. Enrollment limited to 15

TAPS 0260. Stage Lighting.
This course is an introduction to stage lighting. Enrollment limited to 20

A survey of the history and concepts of clothing with a strong emphasis on the art, artists, and political-social movements influencing each major period. Aims to give the theatre designer an increased knowledge of research approaches and resources. The application of historical materials to stage-worthy costumes are discussed. Lab required

TAPS 0280. Costume Design and the Theatre.
This studio course is an introduction to the various elements of costume design in all performance forms and media. The course is structured around an exploration of thinking about performance through design, then specifically thinking about theatrical design through costume. Enrollment limited to 10

TAPS 0310. Beginning Modern Dance.
Introduction to the art of movement. Focuses on building a common vocabulary based on ballet, vernacular forms, improvisation, Laban movement analysis, American modern dance, and the body therapies. Individual work is explored. One and one-half hours of class, four days a week. Enrollment limited to 40. S/NC

TAPS 0320. Dance Composition.
Focuses on building the individual's creative voice. A movement vocabulary is developed from Western techniques (ballet, American modern dance, Laban/Bartenieff movement analysis, vernacular forms, space-harmony/movement physics, and the body therapies) along with group improvisations and collaboration with artists in other disciplines. Enrollment limited to 40. S/NC
TAPS 0330. Mande Dance, Music and Culture
Examines, by theory and praxis, the techniques and philosophy of dance in Mande culture. Each dance is taught as a highly codified language, with detailed phrasing structures, focus, center, variations of intonation, and qualitative choice. The specific ethnicities are studied in relationship to their music and dance variations. Participants must be physically fit. Despite the enrollment limit, if you are interested in taking this class, please show up to the first class, as there is an application process for enrollment. This course requires a $100 lab fee from each student to cover supplies and expenses for performances to be paid directly to the department. More info on how to pay available on first day of class. Enrollment limited to 50. S/NC

TAPS 0410. Persuasion and Public Controversy
Examines the role of persuasion in defining controversial public issues and producing social agreements and judgments. Includes units on classical, symbolic, and institutional perspectives on persuasion. The overall goal is to improve our critical consumption of public argumentation. No background in argument is required or assumed. Preference given to first- and second-year students

TAPS 0500A. Introduction to Dramaturgy.
The class will focus on the practice, theory and history of theatre. Dramatic action, stage storytelling craft and time design will be examined while also exploring and establishing alternative theories of perception and performance organization. Special attention will be paid to the dramaturg’s relationship to the making of new work.

TAPS 0500E. Improvisational Theory and Practice.
Takes a close look at improvisation—an undertheorized, underhistoricized, and yet nonetheless ubiquitous performance concept and modality—in order to better apprehend its vast potential as a practical tool for the creation of performance works and texts (both historical and contemporary) and to uncover its utility as a critical tool for reading and understanding performance of all varieties, including fully-scripted works. Please note: class time will be divided evenly between text-based work focused on theoretical/critical readings and full-bodied practical work inspired by our drawing from key “periods” of intensity in the (as of yet non-existent) history of improvisation. Enrollment limited to 18

TAPS 0510. Introduction to Shakespeare (ENGL 0400A).
Interested students must register for ENGL 0400A S01 (CRN 14341 for fall 2012; CRN 24601 for spring 2013)

TAPS 0800A. 21st Century American Drama.
This course is designed to familiarize students with contemporary American playwriting from 2000–2007. We will explore these plays and performances reflect our current moment. Playwrights may include Jorge Cortinas, Sara Ruhl, Tony Kushner, Juliana Francis, Young Jean Lee and Carl Hancock Rux

TAPS 0800B. Asian American Theatre and Performance.
This course examines Asian American Theater and Performance as a genre, and a way to inhabit and interrogate the space between “Asia” and “America” within primarily the United States. Using both play analysis and historical studies, we will look at a spectrum of dramatic traditions, performance practices as well as U.S political and social realities that constitute Asian American theater and performance. We will first locate Asian America within the imperial, economic and cultural histories of U.S.A, and then highlight the transnational and intercultural aspects of its dramatic production. Enrollment limited to 17 first year students. DVPS FYS LILE WRIT

TAPS 0800C. Musical Theatre in Global Perspective.
An engaging study of world cultures, theatrical practices and performance, music and movies, and how they contributed to the American musical. Focus will be placed on Chinese, Japanese, German, and American culture, and students enrolled will be reading both primary and secondary source material. Enrollment limited to 20 first year students. FYS

TAPS 0930A. The Actor’s Instrument: Voice and Speech.
A complete and well-seasoned actor has the ability to perform with specificity and ease, both vocally and physically. Specificity comes from an integration of source material and movement technique. Ease is only possible when a mastery of technical skills reaches the point where the actor can integrate them without loss of spontaneity. This is a life long process that begins by learning the fundamentals of technique and the continual refinement of them on a personal level. The goal of this class is to give the student the fundamental techniques of voice and speech in relation to the body. In the event of over subscription, student will be enrolled on the basis of seniority. Prerequisite: TAPS 0230. Enrollment limited to 16. Instructor permission required. S/NC

This course is designed to help students explore the development of relationships in theatrical space without the benefit (or confinement) of a script. By cultivating and developing basic performance skills including spontaneity, self-awareness, creative use of the body and mind, access to the imagination, and collaborativity, this course has applications for actors and other performers interested in all types of performance as well as those interested in improvised performance specifically.

One of the intentions of this course is to generate truthful, creative, and collaborative play, which can lead naturally to material that is funny or humorous as an organic outcome of the moment. However, “comedy” or “improv comedy,” which has a different set of intentions altogether, will be strongly discouraged in this course. “Getting laughs,” as a goal in and of itself, manufactures unproductive pressure to “be clever” or to “succeed” in ways that are inconsistent with truly creative engagement.

TAPS 0930C. The Actor’s Instrument: Stage Movement for Actors and Directors.
Students will be engaged in a process of exploration that centers on the physical relationship of the actor to the physical reality of the stage including sound, props and costumes. Work with a broad spectrum of contemporary and classic movement theories/approaches to constructing performance. Instructor permission required; interested students must come to the first class, fill out an application and participate in a sample class. Accepted students will be notified by the third class meeting. You must show up to every class meeting in order to keep your application active throughout the registration process. Enrollment limited to 18

Derived from the teachings of Jacques Lecoq and Philippe Gaulier, this course is physically-based, improvisational, loud and messy. Emphasis is on organic and intuitive response, timing and rhythms inherent in comedy, non-verbal expression, the relationship of the Actor to the Audience, and Play! Enrollment limited to 20. S/NC

TAPS 0960A. Musical Theatre Songwriting.
A practical study in the creation of songs for the musical theatre. Students enrolled in this course will develop the skills necessary to write the music and lyrics for pieces intended for use in dramatic works. American and international musical theatre writers from the last eighty years will be studied and analyzed. Those enrolled may choose a focus of composition, lyric writing, or both. They will present and perform (or arrange performances) of new material (and rewritten material) each week to be examined by the class, culminating in a cabaret of new works. While beginners are encouraged to join, this is not a music theory course, and composers are expected to have a basic knowledge of theory (or self-taught skills)

TAPS 0960B. Musical Theatre Writing Workshop.
A practical study in the creation of new works for the American musical theatre. Students enrolled in this course will learn the craft of musical theatre writing, and will be able to workshop their material for their peers. Musicals from the last eighty years will be studied and analyzed. Those enrolled may choose a focus of composition, lyric writing, playwriting, or any combination thereof. Collaborators are welcome to work together in this class, and those looking for potential collaborators will be paired with other students if they so desire. While amateur composers are encouraged to join, this is not a music theory course, and composers are expected to have a basic knowledge of theory (or self-taught skills)

TAPS 0960C. The History of Musical Theatre.
A study of the history of American Musical Theatre from Tin Pan Alley to today’s Broadway musicals. Students enrolled will study primary-source librettis, musical scores and interviews, as well as historical articles and essays on musical theatre and society. Special emphasis will be placed on musicals and their implication in helping to shape and define American social history, including topics such as national identity, race relations, and the treatment of minorities
Interested students must register for MCM 0901B S01
TAPS 0971. Digital Art (MCM0750)
Interested students must register for the MCM 0750 S01
Interested students must register for AFRI 0990 S01
TAPS 1000. Intermediate Dance.
Designed to expand the student's knowledge of and proficiency in dance as an art form. Mainly a studio course, but selected readings, papers, critiques, and field trips are important components of the course. Prerequisite: TAPS 0310 or equivalent. Enrollment limited to 40. S/NC
TAPS 1040. Interpersonal Communication.
This course introduces principles of interpersonal communication by using dyads and small groups. Topics include: the self in interpersonal communication, verbal messages, nonverbal messages, message reception, and interpersonal relationships. Attendance mandatory
TAPS 1100. Stage Management.
To introduce students to the principles and techniques of modern stage management from script selection to closing. Through the study of various models of stage management (both professional and academic), students will develop an appreciation of the role of the stage manager as the facilitator, mediator and organizer of the production process. Students will apply theory learned in the classroom by stage-managing or assistant stage-managing a TAPS production and/or observing other TAPS and Trinity Rep stage managers during the production process. Enrollment limited to 12
TAPS 1160. Style and Performance.
For qualified sophomores, juniors, and seniors who offer TAPS 0230 as a prerequisite. Period scene study and monologues are basis for comment on individual progress in acting/directing. Extensive reading of dramatic texts and historic research materials. Work in voice, movement, dialect, and poetic text. Substantial commitment necessary for preparation of class scenes. Attendance mandatory. Prerequisite: TAPS 0230. Limited to 20. Instructor’s permission required. No permissions will be given during pre-registration; interested students should sign up on the TAPS 1160 waitlist (form is at http://www.brown.edu/Departments/Theatre_Speech_Dance/) and attend the first day of class
TAPS 1210. Solo Performance.
An exploration of the challenges and rewards of performing solo. Students research, write, and perform a one-person show. Other projects may include performance art, stand-up comedy, and monologuing. Substantial time commitment. Attendance mandatory. For advanced students with appropriate background and experience. Submit proposal and resume in the fall. For guidelines and information contact Lowry_Marshal@brown.edu. Permission required in advance. Enrollment limited to 20
TAPS 1230. Performance Theory: Ritual, Play and Drama in Context.
What is ritual? What is play? What is mimesis? What is an act? This course offers an introduction to basic texts in Performance Studies applied to the study of ancient and medieval theatre in global perspective. Students will learn fundamentals of performance theory while studying the histories of ancient Greek and Roman theatre, Medieval European ritual, Indian Sanskrit drama and theatrical form, Yoruban traditional performance, and modes of cross-cultural comparison. WRIT
TAPS 1240. Performance Historiography and Theatre History.
This course will provide an introduction to performance history and historiography by concentrating on analysis of dramatic texts, theatrical events, festival performances and “performative” state and religious ceremonies from 1500-1850. We will explore incidents in Asia, the Americas and Europe as related to state consolidation, colonization, incipient nationalism(s), urbanization, cultural negotiation, and the representational practices the enacted. Enrollment limited to 35. WRIT
TAPS 1250. Twentieth-Century Western Theatre and Performance.
The study of key figures and movements in 20th-century Western theatre and performance, from approximately 1870 to 2000. We explore naturalism and alternative strategies to realism such as symbolism, futurism, surrealism and constructivism, along with myriad figures in the modern and postmodern “avant-garde.” WRIT
TAPS 1270. Performances in the Asia.
Introduces students to the rich performative utterances of Asia with a combination of national, comparative, circum-Pacific, and inter-Asian perspectives. We will study several significant forms of Asian theater, rituals and dance-drama, and historicize them through a variety of encounters: traditional, (post-)colonial, orientalist, and intercultural. How do differing approaches reconfigure Western assumptions about otherness (alterity)? How is an Asian imaginary in the West often tied to the “native,” “non-Western,” “primitive,” “exotic,” and “queer”? We will encounter Asian performance broadly defined in both national and transnational contexts, such as the Asian diaspora, global arts festivals, museums, and tourism. Not open to first year students. WRIT
TAPS 1280A. Acting for Camera.
Introduces students to theories of acting for camera to develop the practical skills required for film and television performance. Attention will be paid to the ways in which stage techniques can be adapted for use in media performance. Students will prepare scenes and monologue material written specifically for film and television
TAPS 1280B. The Creative Ensemble.
Develops skills in acting, improvisation, directing, teaching, and writing. Through research, performance and collaboration, participants explore individual/group talents and creative passions. Ensemble-created final performance project. Prerequisite: TAPS 0230 or equivalent
TAPS 1280C. Advanced Stage Lighting.
This course focuses on the implementation of lighting techniques learned in the introductory course. Emphasizes work in a studio environment with other theatre designers, implementing CAD and vector works techniques as well as scale models. Course culminates in a full lighting design for a production. Prerequisite: TAPS 0230
TAPS 1280F. Introduction to Set Design.
A survey of the history and concepts of scenic design with emphasis on the art, artists and the social/political movements influencing the major period. Aims to give the designer a foundation in research approaches. Also provide an examination of stylistic approaches and innovations in the context of the historical period. Enrollment limited to 20
TAPS 1280H. Modern Asian Performance.
This course studies contemporary Asian performance with a special focus on modernity. Students are encouraged to move beyond a Western historiography toward an understanding of alternative modernities. This course explores most nations in the Asian continent and covers wide theoretical and aesthetic ground; from performances of healing to revolutionary theatre to diasporic utterances. Essentialized and Orientalist notions are problematized. This course aims to familiarize students with different historical instances of Asian performances, while at the same time enabling critical thinking about the relation between theory and practice by paying close attention to the questions of gender, identity, aesthetics and politics
TAPS 1280J. Introduction to Dramaturgy.
Seminar in the theory and practice of theatrical dramaturgy, with a particular emphasis on new play development in the contemporary American theatre. Examines basic historical theory, contemporary theatrical texts, production dramaturgy, and the role of the dramaturg in the rehearsal and development process
TAPS 1280L. Modern American Drama.
Modern American Drama is a broad overview of the field, from O'Neill through Kushner and Parks. Particular attention will be paid to the theatrical, social and performance context of the plays under study, although the plays themselves will be the only assigned texts
TAPS 1280N. New Theories for a Baroque Stage.
This course re-conceptualizes and re-models seventeenth-century “baroque” theatricality through the lenses of Russian formalist theory, phenomenology, (post-)surrealist literature and objects, Oulipian literature of constraints, Deleuzian theory, ontological-hysteric theatre, film, etc.
TAPS 1280O. New Works/World Traditions.
From research to performance, develops new dance theater pieces that are rooted in Mande dance and American dance. Includes study with
Mande, American, and European artists in building a body of repertory for the concert stage. May be repeated for credit. By audition. S/NC

TAPS 1280P. Imagining Dance and Dancing Images: Dance in and on Screen.
What happens when a three-dimensional, embodied, ephemeral art form encounters two-dimensional, repeatable space? This course explores intersections of dance and film, television, video, and digital media, looking at the ways that dance transforms and is transformed by these relationships. Throughout the course we will question the interfaces between kinesthetic and visual perception and the ways that dance becomes both the story and the means of telling it on screen. Enrollment limited to 17

TAPS 1280Q. Hybrid Art (VISA 1800L).
Interested students must register for VISA 1800L S01 (CRN 15932)

TAPS 1280R. Puppet Theatre Workshop.
This class is designed to provide students with an introduction to puppet theatre and performance. It is an interdisciplinary arts class that is open to any interested Brown student. Students with an interest and/or experience in Visual Art, Dance, Music, Acting, Writing, and Performance are strongly encouraged to apply. Enrolled students will be given a brief history of puppet theatre performance. In addition they will also design, construct, and perform with puppets. Guest Artists will share their various approaches to working in a wide range of puppet theatre styles including: shadow puppetry, Bunraku, and marionette. Enrollment limited to 18. S/NC

TAPS 1280S. Libretto Workshop for Musical Theatre.
This class is not only for the aspiring librettist but for any student desiring insight into the craft of book writing for musical theater. The course will cover the basics of storytelling (plot, character development conflict, etc.) but specifically in terms of the musical. It will also detail the fundamentals of lyric writing, musical narrative and basic composition. We will examine three libretti (Sweeney Todd: the classic horror, Little Shop of Horrors, the modern sci-fi and Rent, the contemporary adaptation). There will be lectures, group discussions, talks with guest professionals, and analysis of student assignments. Enrollment limited to 15 sophomores, juniors, and seniors.

TAPS 1280T. Contemporary Mande Performance.
This course examines the influences of contemporary society upon traditional Mande Performance. Equal emphasis will be given to the theory and practice of embodied performance as it responds to selected music traditions, oral literatures, and aesthetic traditions. Films, readings, guest lectures and collaborative research projects will help to facilitate a deeper understanding of contemporary Mande society and its artistic production. Students MUST register for a conference and a lecture section. Enrollment limited to 150.

Students must attend the first class meeting, as final enrollment is determined by application/tryout during that meeting. If the course is full before the class meeting, interested students can still attend the first class.

TAPS 1280V. Theatre and Conquest in the Americas, from Cortes to NAFTA.
Explores the intimate relationship between theatre and conquest in the Americas as contained in missionary accounts, plays, performances and visual art from Cortes arrival to the present. Students will analyze plays and performances that stage the Spanish Conquest, consider the theatrical procedures of the conquest and examine theatrical representation as a methodology of conquest in the Americas

TAPS 1280Y. Issues in Performance Studies.
Explores myriad ways of thinking, doing and talking about performance using the values, theories and practices of performance studies as a field of study. Students will study a variety of actions and sites as performance, from everyday life, convention spectacles, surgical procedures, museum installations, dance and tourist shows to ethnological displays, among others. There will be several opportunities for us to visit some of these sites as participant-observers, critics, artists and performers. The objective is not so much to pin down a genre or category of performance as it is to understand performance variously as an analytic and practice, a form of lived history and way of being, and a critical formulation or formation beyond traditional theater practice

TAPS 1281A. Director/Designer Collaborative Studio.
Students will explore the relationship between director and designer within the production process. The main objective is to improve collaboration and production output by learning the language, tools, and skills involved in each area of discipline so as to enhance creative output. Enrollment limited to 17 students

TAPS 1281C. Memory Plays: Theatricality and Time.
This course will read philosophy and critical theory about memory and time beside dramatic works and performance art that take up the topic of history, repetition, and temporality in live art. Readings will be selected from Sophocles, Aristotle, Shakespeare, Noh, Freud, Benjamin, Bergson, Brecht, Muller, Stein, Duras, Homi Bhabha, Paula Vogel, Suzan-Lori Parks, W. G. Sebald, Gilles Deleuze, Thomas King, Philip Deloria, Coco Fusco, Diana Taylor, Charles Ludlam, Teching Hsieh, Wooster Group, Spiderwoman Theatre, Ubu and the Truth Commission, Errol Morris, Robin Soans, and Erik Ehn to ask about time, memory, history, act, Mneme, anamnesis, recognition, and *reconciliation

TAPS 1281J. Farce.
This is a physical acting class exploring farce and comedic improvisation in high and low art and performance. The class will involve an investigation of the work of Moliere and other playwrights inspired by Commedia dell’Arte, classical and contemporary. We will examine texts, excavate comedy, explore extension of gesture and techniquet of exaggeration and improvisation.

TAPS 1281K. New Media Theory and Composition: Performing With Media.
This studio course is for choreographers, directors, film-makers, performance artists, musicians, designers or anyone interested in the collision between New Media (primarily projection and sound environments) and performance of all kinds. Through the creation of new works we will explore practical issues, compositional strategies, and aesthetic aspects of hybrid performance. Beginning with a series of short studies, students will collaborate to create mid-term pieces. Final projects may be collaborative or independent multimedia performance works. Though some instruction in media applications will be offered, this is primarily a class for students wishing to explore aesthetic and performative issues rather than in-depth study of specific technologies. Enrollment limited to 12

TAPS 1281M. Introduction to Costume Construction.
An introduction to the study and practice of core costume construction skills. Topics include basic machine, hand sewing and patterning techniques.

TAPS 1281N. Practice: Exploring Contemplative Practice in Creative Process.
An experimental dialogue between Buddhist and Catholic Contemplative Practices as a ground for creating performance works; an interdisciplinary/interfaith/inter-institutional exploration. Students from both Brown and RISD will be participating. Instructor permission is required and will be granted on the basis of a) an interview with one of the teachers (which may be scheduled at the time of the first session), and b) a short statement of goals and intentions (reasons for taking the course) not to exceed one page, due to Erik_Ehn@brown.edu prior to the first session. Enrollment limited to 12

TAPS 1281O. Acting Outside the Box: Race, Class, Gender and Sexuality in Performance.
Examines the relationship between social and cultural identities and their representations in dramatic literature and performance. Students will be expected to read critical essays and plays, conduct research, and prepare to act in scenes that challenge the actor to confront the specifics of character and situation beyond the Eurocentric ideal. The goal is to strengthen the actor’s ability to construct truly meaningful characters by removing any reliance of “type” and/or immediate “identification” with the characters they will portray. Instructor permission required; interested students must come to the first class, fill out an application and participate in a sample class. Accepted students will be notified by the third class meeting. You must show up to every class meeting in order to keep your application active throughout the registration process. Enrollment limited to 18. DVPS
TAPS 1281P. Under One Roof: Interdisciplinary and Intermedial Art.  
In this course, students from various arts disciplines will develop interdisciplinary/intermedial projects inspired by the resources and architecture of the Granoff Center for the Creative Arts. They will also study a wide range of historic and contemporary collaborations, providing them with diverse models to emulate - or reject. This is primarily a studio course using the inside and outside of the Granoff Center as a canvas/studio/stage. Lectures, readings, media, guest artists, scholars, and field trips will be included. Instructor override required for registration. Mandatory S/NC

TAPS 1281Q. Introduction to Dance Studies: Sex, Death and Endurance.  
Dance Studies investigates multiple facets of dance, including choreography, performance, spectatorship, and theory. In this course we will engage with social dances (including hip-hop, tango, and Renaissance dance) and concert dance as we debate dance’s use and/or subversion of gender-specific and ethnic hierarchies. Emphasis will be given to choreographic portrayals of the human struggle with love, sickness, and death. We will also consider neuroscientific approaches to dance spectatorship, particularly as relates to empathizing with physical pain. This course presumes no prior knowledge of dance. Students with a scientific interest in human anatomy and movement are also encouraged to join.

TAPS 1281R. mujeres ARRIBA! Feminist Playwrights in Spanish Theater.  
How have contemporary women playwrights contributed to socio-political movements in Spain? This seminar introduces students to some of the most celebrated (and often silenced) Spanish women dramatists of the 20th and 21st centuries. We will look at the historical, cultural and political context surrounding selected plays, to understand the dramaturgical, revolutionary and historical significance of each theater text. Identity, gender, sexuality, patriarchal values, feminist, political thought will be central to discussion. The class will be taught in English. The writings are in Spanish so the students should be bilingual or able to read in Spanish.

TAPS 1281S. The Precarious University (HMAN 1970E).  
Interested students must register for HMAN 1970E S01 (CRN 15740).

TAPS 1281T. Native Americans in the Media: Representation and Self-Representation on Film (ETHN 1890G).  
Interested students must register for ETHN 1890G S01 (CRN 16641).

TAPS 1281U. Africana Dance in the US.  
In this course we will seek to gain an embodied, historico-cultural perspective on Africana dance in the U.S. through reading dance scholarship and also engaging in dance practice. We will consider "vernacular" dances hip-hop and break dancing as well as works by choreographers including Katherine Dunham, Bill T. Jones, Urban Bush Women, and Alvin Ailey. Encountering the early reception and continuing influence of traditional African dance, we will investigate whether African-American dance might embody a narrative or distillation of black bodies' histories in the U.S.

TAPS 1280. Advanced Costume Design.  
Costume design and rendering approaches to various genres of performing arts, including opera, musicals, and dance. Designed for the serious student of theatrical design. Advanced work on rendering emphasizing character, practicality, line, form, and color. Lab required

TAPS 1300. Advanced Set Design.  
The examination of the working relationship between designer and director. An emphasis on the design abilities needed to communicate varied visual approaches. Developing the creative, theatrical vocabulary needed to turn a director’s vision into a fully articulated set design. A substantial amount of plays will be read and researched. Drafting and model rendering techniques will be applied. Prerequisite: TAPS 1280F. Instructor approval required prior to registration. Enrollment limited to 10.

TAPS 1310. Advanced Modern Dance.  
Designed for dancers who have attained an advanced level in any dance technique. The purpose is to help such dancers come to understand both intellectually and kinesthetically the diversity of one of the few indigenous American art forms: modern dance. Enrollment limited to 40. S/NC

TAPS 1320. Choreography.  
Designed for those who have had some experience in composition and would like to work, under supervision, on making dances. Emphasizes making full-length dances for small and large groups and demands a sophisticated use of space, dynamics, and music. Further emphasis on viewing and interpreting classic and contemporary works from a choreographic viewpoint. S/NC

TAPS 1330. Dance History: The 20th Century.  
An exploration of the major figures and trends in modern dance. While the main focus of the course is on American Dance, attention is given to earlier European and other dance traditions that have contributed to the American dance heritage. May be of particular interest Americanists, art historians, dancers, and theatre majors.

TAPS 1340. Dance Styles.  
This course focuses on the diverse styles, techniques and movement theories of Modern Dance. The students will practice the techniques and styles and will also study biographical material, view films, and attend live performances when possible. Enrollment limited to 40. S/NC

TAPS 1350. Dance Performance and Repertory.  
Half course credit each semester. A study of dance repertory through commissioned new works, reconstruction, coaching, rehearsal, and performance. Guest artists and consultants from the American Dance Legacy Institute. Enrollment is by audition. Limited to skilled dancers. Instructor permission required. S/NC

TAPS 1360. Dance Performance and Repertory.  
A study of dance repertory offered through commissioned new works, reconstruction, coaching, rehearsal, and performance. The course will explore the phenomenology of dance, audience-performer connection, theatre production and dance criticism, among other topics. Enrollment is by audition. Limited to skilled dancers. S/NC

TAPS 1370. New Works/World Traditions.  
From research to performance, develops new dance theater pieces that are rooted in Mande dance and American dance. Includes study with Mande, American, and European artists in building a body of repertory for the concert stage. May be repeated for credit. By audition. S/NC

TAPS 1380. Mise en Scene.  
A reconstruction of the idea of a stage and a frame on the evidence of theory, novels, plays, and especially films-the seen and the unseen-using the organizing strategies of mystery. Art's "impossible" brokering of the real and the representational in a dialectic of space is considered from a multiplicity of perspectives in diverse works. Enrollment limited to 20. Instructor permission required

TAPS 1390. Contemporary Mande Performance.  
This course examines the influences of contemporary society upon traditional Mande Performance. Equal emphasis will be given to the theory and practice of embodied performance as it responds to selected music traditions, oral literatures, and aesthetic traditions. Films, readings, guest lectures and collaborative research projects will help to facilitate a deeper understanding of contemporary Mande society and its artistic production. Students MUST register for a conference and a lecture section. Enrollment limited to 150. Students must attend the first class meeting, as final enrollment is determined by application/tryout

TAPS 1400. Advanced Performance.  
An investigation into abstract and nonlinear modes of performance, working from fragmentary and recombinant narrative, dramatic, and found sources. Seeks to evolve a conceptual approach to performance of the individual actor-director-writer through supervised and independent exercises and projects. Prerequisite: TAPS 0230. For juniors and especially seniors. Enrollment limited to 20.

TAPS 1420. Global Queer Performance.  
What is queer performance from a global perspective? Within the U.S., this might refer to theater, visual and sonic practices, or styles of lesbian, gay, bisexual and transgender writ large. In the world outside the U.S. such an identitarian narrative has gained some traction through the discourse of global queering, which renders an understanding of same-sex formations through Pride Parades, pink-dollar tourism, gay marriage and Western-LGBT cultures. There is, however, much debate as to what queer means, and how it translates. This course uses queer performance to consider how we might understand sexual minorities in the U.S. and the
TAPS 1430. Russian Theatre and Drama. An overview of Russian theatre and drama from the 18th century to the late 20th century. Emphasis on plays as texts and historical documents, and on theatrical conditions, productions, and innovations. All readings are in English. Russian area studies concentrators are encouraged to enroll. Instructor permission required

TAPS 1500A. Advanced Playwriting: Guhahamuka. Guhahamuka is a Kinyarwanda word meaning “breathlessness,” sometimes applied to the wordlessness that befalls survivors of trauma. We will progress through a series of graduated exercises designed to work-out the fundamentals of writing for the live encounter. Emphasis will be on the uses of testimony and language that pushes into spaces where language doesn’t fit, doesn’t belong, falls, and then converts itself to different energies. How a writer’s technique images spiritual practice and avails of the useful impossibilities of incarnation and transcendence. See TAPS 1500 description for writing sample instructions. WRIT

TAPS 1500B. Splendor Solis: Memory, Alchemy and Performance Writing. A playwriting course, centered on readings, in-session exercises and a final assignment relating to various theories of memory, mystical thinking, and philosophies that link material practice with spiritual exercises (in particular, alchemy). The final project is an original 25 page play. Reading averages 80 pages/week; two to ten pages of original dramatic material due each session, with a 250 My Courses post on the reading due for the upcoming meeting. Enrollment limited to 15 Graduate/Undergraduate students in any program. Recommended Prerequisites: Introductory Playwriting; preference given to students who have completed an Intermediate Playwriting course. Ten-page writing sample. S/NC WRIT

TAPS 1500E. Performance Making in Community. Community performance has been used to encourage dialogue, give voice, bear witness, practice resistance, heal from traumatic events, celebrate - among many other purposes and processes. This course will explore the theories, methods, and results of community-based performance techniques and programs through a combination of study and experience. Includes a weekly seminar for discussing readings/writings, practicing the performance-making process, and exploring pedagogies, as well as a significant field work component: a collaborative performance project with a community partner, Everett Dance Theater/The Carriage House School. Enrollment limited to 17. Instructor permission required and can be obtained at the first class meeting. DVPS

TAPS 1500G. Special Topics in Playwriting: Gravity and Grace – Seven Ways of Writing. A playwriting course centered on readings, in-session exercises and a series of assignments relating to navigations of the inexplicable: how do we say what we can’t say? How do we say it elegantly, freely, insistently? We’ll be writing seven distinct plays en route to a final play; each of the short pieces addresses a different principle in the works of Simone Weil (metaxu, decreation, evil), Martin Heidegger (va Giorgio Agamben – Dasein, Eleusis, Ereignis), and Ikkyu (zen). Weekly sessions include discussion of assigned reading, reading take-home exercises, and guided in-session writing. The final project is an original full-length play. Prerequisite: TAPS 0100 or 0200. Enrollment limited to 17. Instructor permission required

TAPS 1500H. Advanced Writing for Performance. This course is an intense examination of the craft of writing scripts for the stage from germinal idea through production by analyzing students work in workshops, reading scripts and attending local performances. Students will learn proper script format, story outline and structure, characterization, plot and the nuts and bolts of the script writing business. Moreover, they will write a full-length play or a series of one-acts. They will also be required to read and critique each other’s work and bring a significant number of script copies to class for workshop. Prerequisite: TAPS 0100 and 0200. Enrollment limited to 17

TAPS 1500L. Screenwriting. Screenwriting is a course designed to familiarize the neophyte screenwriter with the basic principles of writing for the silver-screen. By closely examining produced films, in-depth readings of both good and bad scripts, and through the writing of our own, we will gain an understanding of how screenplays are written, and written well. The course will provide a foundation in the basics of the three-act act structure, dramatic action, character arc, the revision process, and an introduction to the business of screenwriting. By the end of the semester we will have produced and polished a 10 page/minute manuscript. Enrollment limited to 17

TAPS 1500J. Script Adaptation. This class aims to develop skills and techniques for the creation of new dramatic works based upon previously published or performed material. The unit explores the process of creating a script from previously published source material. To achieve this goal, students will explore problems inherent in creating dramatic material from source material of various forms. The module will enhance core skills in scriptwriting, dramaturgy and script analysis. Weekly classes will include lecture and discussion, readings, film screenings and writing exercises. Enrollment limited to 17

TAPS 1500K. The Practical Dionysiac: Pseudo-Dionysus and Dion Boucicault. This is a playwriting course. Weekly in-session and take-home assignments lead to a final play as a culminating experience. We pace our writing and thinking with readings of the scripts of Boucicault and the philosophy of Pseudo-Dionysus. Short weekly responses to assigned readings and each others work are posted to a shared website. Prerequisite: TAPS 0100 and 0200. Enrollment limited to 17

TAPS 1500L. Acting Together on the World Stage: Writing and Political Performance. Practical research in art for social change, with an emphasis on writing and composition, resulting in a series of solo and group devised performances (or well articulated proposals). Each week, in-session writing and devising exercises, coupled with a discussion of critical readings and case histories, build to projects that may be constructed solo or in small groups. We partner with students at Central Falls High School, who act as advisors and potential collaborators. Final projects may take the form of carefully constructed, achievable plans for long-range implementation (with momentum towards their actualization beyond the reach of the class). Students will be required to attend special workshops, field trips, and performances as scheduled throughout this semester; this schedule will be available at the first class. Enrollment limited to 12

TAPS 1520. Seminar in Theatre Arts. Seminar designed primarily for senior theatre arts concentrators, required during Semester VII. Topics focus on career planning and theatre arts subjects not dealt with in other courses. Enrollment limited to 25 seniors

TAPS 1530. Guest Artist Series: Contemporary Interdisciplinary Performance. A semester of performances/master classes featuring the work of invited guests, each a performer/practitioner in multi-media, multi-disciplinary solo performance. The instructor curates the series, moderates discussions, supervises reading lists, and assesses students. Enrollment limited to 17. Not open to first year students

TAPS 1610. Political Theatre of the Americas. This course explores political theatre and performance in Latin America, the US and Canada. The primary concern will be the use of performance in indigenous rights, queer rights, and gender equity campaigns as well as general critiques of socioeconomic inequity. The course examines the strategies used by actors in theatrical performances, performance art, and political protests that use the tools of performance. Exploration is of the rich relationship between politics and performance. There are no prerequisites, but one course in either Latin American Studies or Theatre and Performance Studies is recommended

TAPS 1630. Performativity and the Body: Staging Gender, Staging Race. Bodies come in many shapes, colors, and sizes. In performances practices, the body is an instrument sometimes used to “talk back” to the ways shapes, colors, and sizes are haunted by histories of racialization, sexual discrimination, and other biases. This class explores various feminist and race critical theories in tandem with work of performance artists, visual artists, and theatre artists. Enrollment limited to 20
TAPS 1640. Theatre and Conquest in Greater Mexico: From Cortes to NAFTA.
Explores the intimate relationship between theatre and conquest in the Americas as contained in missionary accounts, plays, performances and visual art from Cortés arrival to the present. Students will analyze plays and performances that stage the Spanish Conquest, consider the theatrical procedures of the conquest and examine theatrical representation as a methodology of conquest in the Americas

TAPS 1650. 21st Century American Drama.
Course is designed to familiarize students with contemporary American playwriting from 2000-2005. We will explore how these plays reflect our current moment with attention to conceptions of gender, sexuality, national identity, trauma and memory. Playwrights may include Jorge Cortinas, Sarah Ruhl, Tony Kushner, Juliana Francis, Sabina Berman, and Carl Hancock Rux. WRIT

TAPS 1670. Latino/a Theatre and Performance.
This course will be an introduction to Latino/a theatre concentrating on the following themes: borders, diaspora and exile, political and personal identities, sexuality, gender and violence, and Latino re-imagination of U.S. and Latin history. We will read Chicano/a, Cuban American and Nuyorican drama and performance art. No prerequisites

TAPS 1690. Performance, Art, and Everyday Life.
Provides an introduction to performance-based art. Some knowledge of the historical avant-garde is required. The class will explore site-specific work, time-based work, life art, body art, instruction art and a variety of intermedial artwork. Theories of 'theatricality' and "performativity" will be explored as will expressive properties of repetition, excess, mimesis, banality, mobility, framing, failure and shock. Enrollment limited to 16

TAPS 1700A. Voices Beneath the Veil (AFRI 1110).
Interested students must register for AFRI 1110 S01

TAPS 1700B. African American Folk Traditions and Cultural Expression (AFRI 1120).
Interested students must register for AFRI 1120 S01

TAPS 1700C. Advanced RPM Playwriting (AFRI 1050A).
Interested students must register for AFRI 1050A S01

TAPS 1700D. Intermediate RPM Playwriting (AFRI 1050D).
Interested students must register for AFRI 1050D S01

TAPS 1700E. Introduction to Post-Colonial African and African Diasporic Theatre (AFRI 1050H).
Interested students must register for AFRI 1050H S01

TAPS 1700F. RPM Africana Music History and Vocal Performance (AFRI 1050J).
Interested students must register for AFRI 1050J S01

TAPS 1700G. Roots of African American Fiction: Oral Narrative through Richard Wright (AFRI 1050M).
Interested students must register for AFRI 1050M S01

TAPS 1700H. Art and Civic Engagement: Creativity/Reality (AFRI 1050P).
Interested students must register for AFRI 1050P S01

TAPS 1700I. RPM Playwriting (AFRI 1050E).
Interested students must register for AFRI 1050E S01

TAPS 1700J. Musical Performance and Theatricality (MUSC 1680).
Interested students must register for MUSC 1680 S01

TAPS 1700K. Site-Specific Writing in Brown’s Historical Spaces (AMST 1570).
Interested students must register for AMST 1570 S01

TAPS 1700L. African American Musical Theatre (MUSC 1905D).
Interested students must register for MUSC 1905D S01

TAPS 1710A. Open Source Culture (MCM 1700N).
Interested students must register for MCM 1700N S01 (CRN 14316)

TAPS 1710B. Radical Media (MCM 1700P).
Interested students must register for MCM 1700P S01 (CRN 14461)

TAPS 1720. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).
Interested students must register for ENGL 1900R S01 (CRN 14572)

TAPS 1730. Stage from Page: Ancient Greek Drama in Performance (CLAS 1750M).
Interested students must register for CLAS 1750M S01 (CRN 25339)

TAPS 1970. Independent Reading and Research.
Intensive reading and research on selected topics arranged in terms of special needs and interests of the student. A written proposal must be submitted to the instructor and the chair of the theatre arts department before the project can be approved. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

To be taken by all students accepted into the theatre arts honors program. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

TAPS 2100. Seminar in Dramatic and Theatrical Theory.
Theorized from drama of Greeks to Grotowski. Raises questions that are crucial to thinking about directing and acting in the theatre-the nature of theatrical space, political and aesthetic implications of mimesis and narrative form, and the role of theatre in society. Enrollment limited to 20

TAPS 2120. Revolution as a Work of Art.
A study of Russian revolutionary culture and new personhood, ca. 1905-1930, with readings from Russian fiction, philosophy, art criticism, dramatic and political theory, and cultural and theatre history. Topics include the revolution of the spirit, the culture of the future, iconography and spectacle, charismatic authority, and revolutionary terror. For graduate students and qualified juniors and seniors. All readings are in English. Those who may read some materials in Russian. Enrollment limited to 20

TAPS 2200A. Abstraction and Resistance.
A study of the uses of abstraction in modernist and postmodern theatre and drama, film, painting, and narrative fiction and of the engagement of resistance as a performative strategy for conceptualizing such nominally unframed and alogical texts. The works of selected theatre directors and playwrights, philosophers and theorists, novelists, filmmakers, and artists are examined and discussed

TAPS 2200B. Neoliberalism and Performance.
This course will explore the relationship between performance (dance, theatre, performance art, public art) and Neoliberal economic and governmental policies and practices. We will place special emphasis on how the arts participate in modes of labor flexibility, globalization, entrepreneurship, governmentality and surveillance as well as how these forms critique these phenomenon. Critical readings will include political theory, play and performance texts and videos and economic theory

TAPS 2200E. Historiography.
No description available

TAPS 2200F. Archive Culture, Memory, and Repetition.
If live performance is ephemeral, what is its function in archive culture? Theatre, visual culture, orature, and "performatives" will be explored for temporality, memory, and remains. Enrollment limited to 20. Written permission required. S/NC

TAPS 2200G. Performance, Photography, and the Live Border.
What are the limits of approaching live performance as essentially ephemeral? What is at stake in the lines drawn between media histories and theatre histories that account for the "still"? Questions such as these will be posed across media as we explore histories of photography and tableau vivant, as well as critical theories in performance studies, visual studies, art history, media studies, and theatre studies. We will look at images documenting violence, images re-presenting documented violence, and violence to documentary images in the course of a broader conversation about the "life" or "liveness" of the still. Enrollment limited to 20

TAPS 2200I. Wittgenstein, Writing and Performance.
Performance is the ideal forum in which to discuss Wittgenstein’s philosophy-19th century, especially as the latter involves rigorous close reading of the physical and metaphysical identities of words, thought and action in the construction of discernible and livable roles and courses of action and understanding within the given circumstances of the mysterious world into which we are born. Wittgenstein’s aphoristic writing, which creates a poetic
structure, along with the necessary incompleteness of Wittgenstein’s thought expression and the wide range of philosophical interpretations of his work by numerous artists and theorists underscore the liveliness of Wittgenstein’s writing as creative texts in themselves. Enrollment limited to 17 juniors, seniors, and graduate students. Instructor permission required

TAPS 2200K. Digital Performance (MUSC 2210).
Interested students must register for MUSC 2210 S01 (CRN 14358)

TAPS 2310. Graduate Playwriting.
With Word as the bodying forth into social reality of original experience, the structures, purposes and ethical risks of writing for performance are examined; experienced through the reading of each other’s works-in-progress, through the reading of essays and in session exercises. Must be taken by playwriting grad students every semester in residence. May be taken multiple times for credit. Undergraduates will be admitted with permission of the instructor. Contact Erik_Ehn@Brown.edu using "Grad PW" in the subject line. Permission will be given once manuscripts have been reviewed. S/NC

TAPS 2315. Collaborative Languages.
A course for artists and scholars to develop a lexicography for theatrical collaboration. The course will explore a variety of collaborative approaches to performance creation through practical exercises, viewing archival video of contemporary performers, guest lecturers, and analyzing collaborative techniques used by a variety of performance creators. This course is limited to participants in the MFA program in acting, directing and playwriting. Instructor permission required. S/NC

TAPS 2400A. Concepts of Space and Time in Media Discourses (HMAN 2970C).
Interested students must register for HMAN 2970C S01

TAPS 2410. Habits of Living: Affect and New Media (MCM 2100I).
Interested students must register for MCM 2100I S01

TAPS 2420. Habits of Living: Affect and New Media (HMAN 2970I).
Interested students must register for HMAN 2970I S01 (CRN 25903)

This course is open only to students of the Consortium. It will include fundamental exercises, textual analysis, rehearsal techniques, character and scene work designed to provide the student actor with a working method based upon the general principles of the Stanislavsky system. A major part of this course will include rehearsal and performance responsibilities.

This course is open only to students of the Consortium. It will provide a progression of exercises to free, develop and strengthen the voice as the actor’s instrument. The classes focus on relaxation, physical awareness, breath, freeing the channel for sound developing the resonators, releasing the voice from the body, articulation, self-expression, and the link to text and acting

TAPS 2520. Movement: Form, Center and Balance.
This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. It will develop a physical vocabulary through floor work, choreographed combinations and movement improvisation, helping the actor develop an understanding of space, strength of movement, and physical life onstage

TAPS 2530. Directing: Composition and Staging.
This course is open only to the MFA Consortium program. It will include information and exercises addressing how to stage a play, balance the space, and transition from scene to scene. It will also focus on the director’s responsibility to the actors, and ways in which to help them create their roles

TAPS 2550. Acting: Realism and Modernism.
This is a two-credit course and is open only to students of the MFA Consortium program. This is a scene study class with an emphasis on the problems of style and language in the plays of Moliere and Shakespeare

TAPS 2580. Directing: Collaboration with the Playwright.
This course is open only to students of the MFA Consortium program. It will focus on issues of collaboration between the playwright and the director. Each director will be assigned to work on a new script in cooperation with a playwright. A workshop production will be staged and open to the public

TAPS 2600. Acting: Shakespeare and Moliere.
This is a two-credit course and is open only to students of the MFA Consortium program. This class will provide a step-by-step understanding and application of The Alexander Technique, which helps to develop body alignment, range of motion, and inner stillness

TAPS 2630. Directing: The Director’s Vision.
This course is open only to students of the MFA Consortium program. Under close supervision, students will direct projects at the Consortium. Each student will be responsible for the creation of either a new or an established script. Students will meet regularly with the faculty to discuss process and progress

TAPS 2650. Acting: Problems of Style.
This is a two-credit course and is open only to students of the MFA Consortium program. This class will include issues of directing, as well as the concerns of an Artistic Director and Associate Artistic Director. Each student will be expected to assistant direct a professional production at Trinity Rep Company

TAPS 2700. Acting: Monologue Performance.
This is a two-credit course and is open only to students of the Brown University/Trinity Rep MFA Consortium program. Acting assignments will include solo work presented in a variety of ways. These might include a selection of monologues and songs presented by the students to show the full range of his or her abilities. A performance might also include a solo piece written by the student and presented as a single-actor production

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. This course will teach actors various American...
regional dialects and international accents including British, Irish, Italian and Russian. Students will examine the language with the use of the International Phonetic Alphabet, and will be expected to perform using the regionalisms and dialect and then teach it to the rest of the class.

**TAPS 2720. Physical Theatre.**
This course is open only to students of the Brown/University/Trinity Rep MFA Consortium program. This course will explore various kinds of physical theatre, and ways in which the actor can be free, spontaneous and open in rehearsal and performance. Areas of exploration will include Commedia, mask and yoga.

**TAPS 2730. Directing: Design in the Collaborative Process.**
This is a two-credit course and is open only to students of the Brown/University/Trinity Rep MFA Consortium program. Directing students will study theatrical design including stage settings, costumes, lights and sound. Particular focus will be given to ways in which a director works with a designer to establish his or her vision of the play. Areas of study will include blueprints, floor plans, renderings and focus.

**TAPS 2750. Acting and Directing: Practical Application.**
This is a two-credit course and is open only to students of the Brown/University/Trinity Rep MFA Consortium program. The course will prepare acting students for a graduate showcase which will be performed in New York City and Los Angeles for agents, casting directors, and other professionals in the industry. Directing students will stage a New York showcase of their work for agents, artistic directors, and other theatre professionals. The course will also cover audition and interview techniques. Video work will be explored in detail, examining the difference between stage and on-camera direction and performance.

**TAPS 2760. Professional Performance.**
This is a two-credit course and is open only to students of the Brown/University/Trinity Rep MFA Consortium program. It will include performance work in a variety of venues including, but not limited to, Trinity Rep’s mainstage. Work might include major and/or minor roles at Trinity, as well as understudy responsibilities for the professional company. Based on their participation in this course, students will be awarded their union cards so that they are able to enter the professional area upon graduating.

**TAPS 2770. Directing: Practical Application.**
This is a two-credit course and is open only to students of the Brown/University/Trinity Rep MFA Consortium program. Each student will direct a professional full-scale production in one of Trinity Rep’s theatres. In addition to directorial duties, students will assist in casting and designing the play, and will be fully involved in areas of budget, publicity, press relations, marketing and development.

**TAPS 2890A. Theatricality: Labor, Time, Affect.**
No description available.

**TAPS 2970. Comprehensive Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**TAPS 2975. Thesis Workshop.**
For graduate playwrights, in their second and third years, rehearsing and revising their thesis projects. May be taken multiple times for credit. Must be taken both semesters in the second and third year.

**TAPS 2980. Graduate Level Independent Reading and Research.**
A program of intensive reading and research on selected topics arranged in terms of special needs and interests of the student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 2981. Master’s Thesis Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

---

**Urban Studies**

**Director**

Hilary Silver

The Urban Studies Program focuses on urban phenomena through the approaches of different disciplines, thus providing an interdisciplinary context in which to understand various dimensions of the urbanization process. Although the program provides sufficient flexibility to allow students to pursue specific interests without being overly bound by requirements, it is designed so that there is a core content. The primary aim of the program is to contribute to a broad, liberal education. Its purpose is to satisfy the needs of those students who are interested in urban problems, but who do not feel well served by the existing departmental programs in a single discipline.

The Urban Studies Program has a close relationship with the City of Providence. The faculty serve on numerous local and state government committees and councils. They also lend their expertise to a wide range of community organizations. The Program offers senior seminar-workshops on aspects of urban development in Providence, such as grass-roots community action and urban development.

For additional information, please visit the department’s website: [http://www.brown.edu/academics/urban-studies/](http://www.brown.edu/academics/urban-studies/)

---

**Urban Studies Concentration Requirements**

The Urban Studies Program seeks to understand the social, economic, demographic, and political consequences of urban development. The program emphasizes the development of students’ powers of analysis and ability to think in an interdisciplinary manner. Urban Studies concentrators take courses in American studies, art, economics, history, history of art and architecture, political science, and sociology. The program has several objectives: to enable students to explore the various issues or problems inherent in urbanization; to provide an excellent background for careers in city planning, architectural design, historical preservation, real estate development, law and business administration and to prepare students for graduate work in urban studies related disciplines. As part of their fieldwork training, students are expected to work with local agencies and non-profit organizations. Summer internships are available for concentrators and students are encouraged to undertake projects involving the study of Providence and nearby cities for their honors thesis projects.

For a concentration, the program requires ten courses selected from four course groups:

**Introduction (choose one):**

- URBN 0210 The City: An Introduction to Urban Studies
- POLS 0220 City Politics

**Research Skills (choose one):**

- ECON 1620 Introduction to Econometrics
- EDUC 1110 Introductory Statistics for Education Research and Policy Analysis
- POLS 1600 Political Research Methods
- SOC 1100 Introductory Statistics for Social Research

**Core Courses (choose three courses covering three of the seven core areas - American Civilization, Economics, History, History of Art and Architecture, Literature, Political Science, and Sociology, from the following):**

- AMST 1520 Technology and Material Culture in America: The Urban Built Environment
- AMST 1530 Technology and Material Culture in America: The Automobile in American Life
- COLT 1810C City (B)Lights
- ECON 1410 Urban Economics

3. RiSD courses approved by the Urban Studies Program each semester as applicable to the Urban Studies concentration.  

Total Credits: 10

Notes:  
1. There are also other statistics courses offered by other departments (e.g., Applied Mathematics, Cognitive Sciences, and Psychology). On occasion, an alternative research skills course may be approved for a specific concentration.  
2. The courses provide opportunities to undertake research or fieldwork projects and all qualify as "capstone" experiences.  
3. No more than two may be used to satisfy the requirements of this concentration. The RiSD course is identified in the student’s record at Brown by a RiSD course code.  

Off-Campus Courses: Some courses taken outside Brown (e.g., in study abroad programs) may be used for credit towards the concentration if the material covered directly corresponds to that taught in Brown courses.
or is relevant to the complementary curriculum. Such courses will be approved each semester by the concentration advisor.

Honors Candidates for Honors must apply to the Director of the Program in letter form by the middle of the second semester of their junior year. They must include a brief statement of the intended research proposal required for honors, as well as the name of the member of the Urban Studies faculty who would serve as their advisor and with whom they must work closely. They must also arrange for a second advisor/reader. Honors candidates must maintain a high grade record. Twelve courses are required of an Honors concentrator, two in addition to the ten courses required for a standard program. These two courses may be either one research skills course and one thesis preparation (one independent reading and research - URBN 1970, one semester course), or two thesis preparation (URBN 1970, two semesters). The candidate’s thesis and course record must be of outstanding quality, in order to qualify for honors.

Courses

**URBN 0210. The City: An Introduction to Urban Studies.**
What is special about urban life? How and why do cities differ? How has the way we think about the city changed over time? Can we solve urban problems? This course offers an interdisciplinary approach to the history of urbanism, physical design, social form, economy, government, cultures, and social life of cities in the U.S. and beyond.

**URBN 1000. Fieldwork in the Urban Community.**
A fieldwork course with limited enrollment. Each student undertakes a fieldwork project in close collaboration with a government agency, a nonprofit association, or a planning firm. In weekly seminar meetings, the class examines a series of urban issues and discusses fieldwork methodology. Students also schedule regular appointments with the instructor. Restricted to Urban Studies concentrators. Enrollment limited to 8 during registration. Instructor will select additional 2 students after first day of class. Instructor permission required. WRIT

**URBN 1010. Fieldwork in Urban Archaeology and Historical Preservation.**
Study of the surface and subsurface features of the urban built environment. An introduction to research methods and fieldwork procedures used by archaeologists and historical preservationists who work on urban sites. Students undertake fieldwork projects that involve archival research, close examination of historic structures, and theoretical analysis of the changing urban landscape. Priority given to Urban Studies concentrators and American Civilization grad students. Other students selected on first day of class. WRIT

**URBN 1200. The United States Metropolis, 1945-2000.**
This lecture and discussion course will provide students with an introduction to the history, politics, and culture of United States cities and suburbs from the end of World War II to the close of the twentieth century. Readings are drawn from recent work in the political, social, and cultural history of U.S. cities as well as primary sources rooted in the period under study. DVPS WRIT

**URBN 1210. Regional Planning.**
Urban sprawl, uncoordinated land use policy, environmental decline, shrinking cities, regional inequities in housing, education, and tax capacity are all challenges that transcend city boundaries. Does it take regional planning to address these challenges? What can regional planning provide that urban planning cannot? In this course, students will develop a critical understanding of regional planning approaches to economic, social, environmental, and land use issues in the United States and abroad. Students will learn urban and regional planning methods which will be integrated throughout the course. A weekly studio and practical group projects are planned.

**URBN 1220. Sustainable Urbanism.**
Various notions of sustainability are used to explain degraded urban conditions and to guide development in urban areas. What, in fact, does sustainability mean in the context of urban areas? Can sustainability be achieved in cities? This course offers a comprehensive, yet critical understanding of the competing theories and practices of sustainable development as applied in cities. Topics include sprawl, energy-efficient transportation, brownfields, community land trusts, green architecture, renewal energy, air and water pollution, and waste recycling. A weekly studio and practical group projects are planned.

**URBN 1230. Crime and Policing.**
Crime has declined in the United States since the 1990s, but not uniformly across cities and neighborhoods. Drawing from sociology, criminology, and history, this course engages theories of crime and policing; examines consequences of fear of crime; and considers the lived experiences of youth, families, community members, and police navigating crime in urban centers. In-depth topics include: perceptions of crime, disorder, underground economies, neighborhood organization, gangs, violence, organized crime, police interactions, incarceration and parole. Data on the city of Providence will be analyzed to test and generate crime and policing theories.

**URBN 1420. Urbanization in China.**
Examines urbanization processes and urban public policy in China. Also draws on historical and recent experience in the U.S. Policy areas including policies affecting urbanization, migration, and industrial location; policies affecting housing, land use, and urban reform; and policies affecting fiscal decentralization and infrastructure investments such as transportation. Prerequisite: ECON 0110. Open to juniors and seniors.

**URBN 1570. Guts of the City: Interdisciplinary Perspectives on Urban Infrastructure and Environmental Planning.**
This course confronts the complex challenges of reconciling multiple uses of contemporary urban environments in the 21st century globalized city. It investigates current environmental impacts and risks related to urban infrastructure systems and analyzes current efforts to minimize negative impacts through best management practices. It addresses urban initiatives to increase sustainability and resiliency of infrastructure systems in anticipation of increased risks related to climate change. Students will lead the key problems and solutions related to urban infrastructure and develop competence in technical analysis, policy analysis, and program implementation. Enrollment limited to 40.

**URBN 1870A. American Culture and the City.**
This course explores American culture and the way it shapes our cities. Topics include the American dream, race, immigration, urban dilemmas and the seduction of suburbia. We read a book (readings include Alexis de Tocqueville, Richard Wright, William Cronon) and screen a film (movies include Wall Street, Traffic, Crash, Malcolm X) each week. Prerequisite: POLS 0220. Priority given to Urban Studies concentrators

**URBN 1870C. The Environment Built: Urban Environmental History and Urban Environmentalism for the 21st Century.**
The term "built environment" suggests an intimate relationship between natural and human-made landscapes. For the last twenty years, environmental historians such as William Cronon have contributed to the project of transcending the false dichotomy between a "pristine" natural environment and the (supposedly artificial) social, cultural, and political terrain of humans. Building upon this important scholarly trajectory, this seminar will re-examine these and other important contributions in light of recent environmental and urban disasters, aiming to bring theoretical readings in environmental history down to earth in order to inspire new ways of thinking about the "environment" for the 21st century. Enrollment limited to 20 juniors and seniors. Instructor permission required.

**URBN 1870D. Downtown Development.**
Study of the revitalization of central business districts (CBDs) in large United States cities. Topics include the CBD as a land use system, retail change, the rise of white-collar offices, gentrification near the CBD, and the political economy of CBD redevelopment. Providence’s CBD used as a case example; guest speakers discuss its change; field trips are taken. Enrollment limited to 15 during registration. Instructor will select additional 5 students after first day of class. Instructor permission required.

**URBN 1870E. Green Cities: Parks and Designed Landscapes in Urban America.**
Examines the cultural meaning and public use of greenspace in American towns and cities. Covers city parks and metropolitan park systems; the landscaping of riverfronts, streets, cemeteries, and company property; and the contributions of landscape architects such as Olmsted and Manning.
URBN 1870F. Housing and Homelessness. What is homelessness and where does it come from? Can affordable housing solve the problem? This seminar examines homelessness, low-income housing policies, segregation, gentrification, privatization of public space, and related processes that make it difficult to house the poor. Open to Urban Studies concentrators and by permission based on demonstration of research skills. Enrollment limited to 20.

URBN 1870H. Rivers and Cities. Rivers promote urban development and serve as important resources and cultural amenities for communities. This interdisciplinary seminar looks at the use and abuse of selected rivers which have run by or through American cities from the colonial period to the present.

URBN 1870I. The Changing American City. This course examines the recent evolution of the American city. We will consider various external forces that act upon the city, principally (a) migration patterns, (b) economic and technological change, and (c) public policy. We will also consider how various groups and political leaders respond to these forces and on what resources they draw. Priority given to Urban Studies and Political Science concentrators.

URBN 1870J. The Politics of Community Organizing. Introduces key issues concerning community organizing. Focuses on the life, skills, and tactics of Saul Alinsky and the national organization he founded, the Industrial Areas Foundation (IAF). Analyzes the work of the IAF in a number of urban settings. Seeks to develop theories and models for studying community mobilization in urban America. Priority given to Political Science and Urban Studies concentrators.

URBN 1870M. Urban Regimes in the American Republic. A probing of topical issues in both their theoretical antecedents and their contemporary manifestations. Examines the intellectual debates and the scholarly treatments surrounding issues of power in the city, urban redevelopment policy, urban poverty, urban educational policy, and race in the city. Enrollment limited to 20.

URBN 1870N. The Cultural and Social Life of the Built Environment. This seminar investigates the relationship between people and place. It considers the ways that people create and experience the man-made landscape, how they understand place through various aesthetic forms, and political conflict over space and place. We look mostly at the history and contemporary development of cities and suburbs in the United States. Students will prepare a final project on a specific aspect of the built environment; they will be encouraged to focus their research on Providence or another local community. Enrollment limited to 20. Priority given to Urban Studies concentrators and seniors; instructor permission required otherwise. LILE WRIT.

URBN 1870P. Representing the Twentieth-Century City. This course examines how one represents, analyzes, constructs, and projects the future design of an urban site. One approach examines the city as a series of distinct physical spaces and operates by establishing typological standards and constructs significant and iconic public spaces. The second approach is concerned with the city as a technical object that organizes time – the operational aspects of the city - as well as space. In this studio, we ask you to consider how intervening in a specific location in downtown Providence can initiate a larger plan and longer-term vision through urban and an architectural scale propositions. Enrollment limited to 10 seniors concentrating in Urban Studies and History of Art and Architecture.

URBN 1970. Independent Reading and Research. A specific program of intensive reading and research arranged in terms of the special needs and interests of the student. Open primarily to concentrators, but others may be admitted by written permission. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

URBN 1981. Honors Thesis Workshop. This seminar introduces students to independent research and writing skills necessary for successful and timely completion of the honors thesis. Course work includes presentation of one’s own thesis drafts and peer review of classmates’ work. All students who submit an approved honors thesis proposal shall enroll in URBN 1981 for the spring semester of their thesis research and writing. Concentrators may also enroll in the course during semesters 6 or 7 in preparation for the honors thesis, but must present a written proposal in place of chapters. Enrollment limited to 20 juniors and seniors in Urban Studies. S/N/C.

URBN XLIST. Courses of interest to Concentrators in Urban Studies. Fall 2012. The following courses offered by other departments will fulfill specific requirements of the Urban Studies concentration. (Please refer to the Urban Studies website to determine which requirements are fulfilled by these courses.)

ENVS 1920 Analysis and Resolution of Environmental Problems / Case Studies
Visual Art

Chair

Wendy Edwards

A Visual Art education at Brown is a rich experience of conceptual challenge, skill-building, and self-discovery. Our students acquire the intellectual and practical tools to make art, as well as to interpret and critique the world of images. We offer a range of courses: drawing, painting, photography, printmaking and sculpture, as well as new genres, digital media, and video. Our students also have opportunities to take courses at the neighboring Rhode Island School of Design.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Visual_Art/

Visual Art Concentration Requirements

The Visual Arts concentration engages in artistic practice across a wide range of media: painting, sculpture, printmaking, drawing, photography, and digital imaging. Courses in art history combine with these to frame the direction of the concentrator’s work and to develop his or her critical thinking skills. Students are encouraged to cultivate an informed and thoughtful individual perspective. Students in the Visual Arts department enjoy cutting-edge facilities and a knowledgeable faculty. These two resources inspire creativity and pleasure in our concentrators while they explore the discipline. Students acquire the intellectual and practical tools to make art as well as to interpret and critique the world of images. Students also have the opportunity to take courses at the neighboring Rhode Island School of Design.

Total Credits: 12

1 VISA 0100 and VISA 0110 do not count as one of the 7 studio concentration requirements; VISA 0100 or VISA 0110 are prerequisites for all studio courses.
2 Qualifies as one of the 7 studio concentration requirements.
3 Should be taken by the first semester of junior year.

Honors

The project is a two-semester enterprise and counts as two courses taken for graduation credit VISA 1800C (Sem I) and VISA 1900 (Sem II) but will not count as two of the twelve courses needed for the visual art concentration. Students that are planning to complete their degree requirements in December must apply for honors by December 5 of the previous year.

Courses

VISA 0061. Drawing I and II: Introduction and Advanced Tutorial. Drawing on-site and in the studio from nature, still life and the imagination in a variety of media. Great emphasis is placed on creative work and classroom participation.

VISA 0062. Printmaking Workshop. No description available

VISA 0064. Sculpture/Installation/Site Work. No description available

VISA 0100. Studio Foundation. An introduction to basic visual art concepts, exploring a range of materials with emphasis on experimentation and analysis of visual relationships. Drawing is a vital part of this course. Admittance to this course will be determined by an online lottery, which can be accessed through the VISA 0100 Lottery link in the Student menu in Banner Web. VISA 0100 or 0110 is a prerequisite to any advanced studio course work at Brown or the Rhode Island School of Design. Under certain circumstances a student may petition for a waiver of this requirement upon submission of a portfolio.

VISA 0110. Advanced Studio Foundation. Some students arrive at Brown with a greater understanding of visual art principles than most, yet need an introduction to other aspects before taking more advanced courses. Figure drawing is practiced throughout the semester, utilizing a variety of media. Weekly outside assignments explore diverse themes and become the subject of comprehensive class discussions. Serves as a prerequisite to upper-level courses, as does VISA0100.

Admittance to this course will be determined by a portfolio review. Students must submit their portfolio, one week prior to the start of classes, to the Visual Art department office in List, room 222; digital images submitted on a CD are preferred. Students will be notified of acceptance into the class by the end of the first week of classes.

VISA 0120. Foundation Media: Sound and Image. This foundation studio course focuses on the production and theory of screen-based digital media artwork and introduces the computer as a medium and a tool for art. The principles and techniques web design, and sound and image production are addressed in readings, screenings, and a number of specific projects. During pre-registration, the course is open to Visual Arts concentrators; all others may enroll with instructor permission. After pre-registration ends, registration for all students is by instructor permission only. Enrollment limited to 12

VISA 0130. 3-D Foundation. This is an extensive study in form and structure intended to develop spatial understanding and the fundamentals of 3-dimensional design and construction. Students will explore the structural, compositional and conceptual implications of basic materials, such as wood, metal, plaster and found objects. Projects are designed as a means for investigating a variety of sculptural processes. Students will learn casting techniques, safe usage of power tools and welding equipment. In addition special emphasis will be placed on creativity, critical thinking and the ability to successfully articulate ideas visually. Instructor permission required.
Students who are not admitted during pre-registration or were unable to pre-register are advised to attend the first meeting of the class.

VISA 0710. Introduction to Filmmaking: Time and Form (MCM 0710). Interested students must register for MCM 0710 S01.

VISA 0730. Introduction to Video Production: Critical Strategies and Histories (MCM 0730). Interested students must register for MCM 0730 S01.

VISA 0750. Digital Art (MCM 0750). Interested students must register for MCM 0750 S01.

VISA 0800H. TV/Not TV: Theory and Production (MCM 0800H). Interested students must register for MCM 0800H S01.

VISA 1110. Drawing I.

Drawing from nature, still life, the model, and the imagination in a variety of media. A continuing series of outside assignments emphasized. Visits to galleries and museums and pertinent exhibitions may be undertaken. The portfolio of the individual student will be the basis of evaluation. Great emphasis is put on classroom participation. Prerequisite: VISA 0100 or 0110.

This course restricted to 20 students. 18 seats will be available during pre-registration. Students who are not admitted during pre-registration should attend the first meeting.

VISA 1120. Drawing II.

Drawing from the imagination, the model, and the landscapes in a variety of media. Great emphasis is placed on creative work and on classroom participation. Prerequisite: VISA 0100 or 0110.

This course restricted to 20 students. 18 seats will be available during pre-registration. This class will satisfy VA concentration requirement for drawing. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

VISA 1130. Drawing for Projection.

A studio course which will address the issues and techniques of drawing for motion, animation and/or projection. We will undertake one semester-long project undertaken with several short parallel works.

VISA 1210A. Big Woodcut.

This class will work both in black and white, as well as in color, using a reduction process. The emphasis will be on printing on a large scale, using various types of paper. Much independent work will be required, along with participation in classroom discussions and critiques. Lottery for spaces reserved for nonconcentrators. Prerequisite: VISA 0100 or VISA 0110.

VISA 1210B. Etching.

Covers all aspects of black and white etching, using zinc plates. Combines an emphasis on traditional skills and craft with a critical and theoretical approach to images. Extensive outside work required. Prerequisite: VISA 0100 or VISA 0110.

VISA 1210C. Investigating Collage.

No description available. Prerequisite: VISA 0100 or VISA 0110.

VISA 1210D. Lithography.

Lithography is the most versatile printmaking process. Working on limestone and aluminum plates, students will learn to produce, process and print their work in black and white. Class participation is vital, as students will be aiding each other in this complicated process. This course requires considerable time outside of class. Prerequisite: VISA 0100 or VISA 0110.

This course restricted to 17 VA or Art Semiotic Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration.

Students who are unable to pre-register should attend the first class.

VISA 1210E. Printmaking.

This course covers a range of traditional and digital printmaking processes. The course will explore how traditional and digital techniques can be used together and how they may interact with and influence one another. Work will be in black and white and color. Prerequisite: VISA 0100 or VISA 0110.

VISA 1210F. Relief Printing.

No description available. Prerequisite: VISA 0100 or VISA 0110.

VISA 1210G. Silkscreen.

This course will provide students with a thorough knowledge of both water-based screen printing techniques and digital imaging. The intersection of digital printing processes and screen printing within the context of contemporary works on paper will be explored through a series of experimental mixed-media projects. Work will be in both black and white and color. Prerequisite: VISA 0100 or VISA 0110. This course restricted to 17 students. Students who are not admitted during pre-registration or were unable to pre-register should attend the first class.

VISA 1210I. Woodcut.

Woodcut, the simplest printmaking method, has been used as a communication device for more than a thousand years. Students will work in both black and white and color to address contemporary issues. The history and aesthetics of the political poster will provide the foundational knowledge for the class. Prerequisite: VISA 0100 or VISA 0110.

Enrollment limited to 17. Students who are not admitted during pre-registration or who were unable to pre-register should attend the first class.

The aim of the course is to understand the variability, sequencing potential and the inherent luminosity of the monotype medium and to use these attributes to discover and advance one’s own visual ideas. Monotype refers to the making of a single unique print through press and non-press means. Several rapid projects with themes will precede a longer series culminating in a final epic portfolio of independent content. Individual, peer and small and large group critiques will occur weekly for feedback. Readings and visits to the Bell Gallery and the RISD Museum of Art collections will give both a historical context and a singular appreciation to the studio.

VISA 1210K. Pixel/Paint/Print.

This studio art course investigates possibilities for using the computer along with traditional painting and printmaking processes to produce image-based intermedial work. Students will explore how computers and computer networks have changed the creation, content, form, distribution, and exhibition of artwork through a series of assignments, readings, discussions, and slide lectures, and how computers and digital media can intersect with a traditional studio practice. Students will produce a portfolio of mixed-media work. Photoshop, Illustrator, the internet, and digital printers, along with traditional painting, drawing, and printing mediums will be used as tools for art-making. Prerequisite: VISA 0100. Enrollment limited to 12. Instructor permission required.

VISA 1240. Art of the Book.

This course restricted to 15 VISA Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

VISA 1250. Art of the Book.

This course restricted to 15 students. They may not enroll in 1250 without 1240 as a prerequisite. Prerequisite: VISA 0100 or VISA 0110.

Visits, and guided exploration of the special collections at the John Hay Library. While students may take VISA 1240 only, they may not enroll in 1250 without 1240 as a prerequisite. Prerequisite: VISA 0100 or VISA 0110. This course restricted to 15 VA Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration. Students will work in both black and white and color to address contemporary issues. Great emphasis is put on classroom participation. Prerequisite: VISA 0100 or VISA 0110.

VISA 1310. Painting I.

Designed to accommodate a variety of interests and aptitudes. Provides basic instruction in media and painting procedure, but emphasizes the
development of the image as a visual statement. Covers the building of stretchers, basic color principles, and painting media and procedures. Slides and related books and articles are discussed. Individual criticism is given; participation in regularly scheduled group discussions is required. Pre-requisite: VISA 0100 or 0110. This course restricted to 18 VISA Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register should attend the first class. Not all restrictions apply to students registering for the Summer term through the Office of Continuing Education.

**VISA 1320. Painting II.**

The advanced class covers information beyond the introductory level. Individual criticism is emphasized. Students are required to complete all structured assignments and to participate in regularly scheduled discussions. Prerequisite: VISA 0100 or VISA 0110, and VISA 1310. This course will be restricted to 18 VISA Concentrators and others by permission of the instructor. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register are advised to attend the first meeting of the class.

**VISA 1330. Drawing with Watercolor.**

This course will be a rigorous examination of the possibilities of drawing with watercolor. We will do a lot of work outside and there will be an emphasis on unorthodox use of the watercolor medium. Because the basis of watercolor is sound drawing, there will be considerable instruction and practice in drawing fundamentals such as perspective, value, composition, scale, rendering, etc. Recommended prequisite: VISA 0100, 0110, or comparable foundation level course is expected.

**VISA 1410. Sculpture: Material Investigations.**

This studio course addresses basic sculptural methods, i.e., additive and subtractive modeling, casting, and assemblage, and common sculptural materials, i.e., wood, metal, plaster, and found objects. Demonstrations and workshops on a number of sculptural tools and materials form the foundation for this studio. Students develop sculptural solutions to a given set of problems. Contemporary issues raised in critiques and readings. Extensive outside work is expected. Students are invited to take this course more than once, as the problems can be customized for those with more experience. Pre-requisite: VISA 0100 or VISA 0110 or VISA 0130. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting of the class.

**VISA 1420. Sculpture: Conceptual Propositions.**

This studio course explores a number of contemporary sculptural theories and practices. Students develop sculptural solutions to a given set of problems, using materials and methods of their choosing. Contemporary issues raised in critiques and readings. Completion of VISA 1410 or comparable experience in some type of three-dimensional practice is suggested, but not required. Demonstrations and workshops on a number of sculptural tools and materials will be given as needed. Students are invited to take this course more than once, as the problems can be customized for those with more experience. Extensive outside work is expected. Prerequisite: VISA 0100 or VISA 0110 or VISA 0130. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting of the class.

**VISA 1430. Elm Tree Project.**

This is an intensive studio course requiring a considerable out of class time commitment.

**VISA 1510. Photography I.**

Introductory course in black and white photography, emphasizing core photographic concepts, possibilities, history, genres, technical information, and techniques. A variety of lens-less and lens based exercises will be introduced blurring the boundaries between the “traditional” sense of photography (as means of mechanical reproduction) and other studio based media such as drawing or painting. Large and medium format cameras will be introduced, but students should have their own 35 mm film camera. Prerequisite: VISA 0100 or VISA 0110. This course restricted to 15 VISA Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

**VISA 1520. Photography II – Digital Photography.**

Will explore digital image processing in color and B&W. Using digital cameras, computer editing software, digital printing, as well as critical analysis of computer digitized images will be covered. The execution of visual problems and in-class presentations as well as theoretical readings allow students to examine the content and function of digital imaging technology and production in modern photography. A digital SLR type camera is required. Prerequisite: VISA 0100, VISA 0110, or VISA 0120. Prerequisite: VISA 0100, VISA 0110, or VISA 0120.

This course restricted to 15 VISA Concentrators, and others by permission of the instructor. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration should attend the first meeting. May be repeated once for credit.

**VISA 1700D. Reframing Documentary Production: Concepts and Questions (MCM 1700D).**

Interested students must register for MCM 1700D S01.

**VISA 1700N. Open Source Culture (MCM 1700N).**

Interested students must register for MCM 1700N S01.

**VISA 1700P. Radical Media (MCM 1700P).**

Interested students must register for MCM 1700P S01.

**VISA 1700R. The Art of Curating (MCM 1700R).**

Interested students must register for MCM 1700R S01.

**VISA 1700S. Narrative and Immersion (MCM 1700S).**

Interested students must register for MCM 1700S S01.

**VISA 1710. New Genre: Site and Sound.**

This studio course provides an overview of contemporary sound art and sound installation, facilitates the development of site-based sonic artwork, and encourages a critical approach to sound and audio practice. Work will be developed for and from specific sites with special emphasis placed on modes of listening and the physical characteristics of sound itself. Examples of site-specific sound work in a variety of formats including performance, installation, sculpture, literature, and radio are presented and analyzed. Readings and assignments will coincide with these areas and regular listening exercises are incorporated throughout the class. The format for the class includes lectures and discussions, lab time, and technical training in sound production as necessary for the production of sound-based works. Prerequisite: VISA 0120. This course restricted to 15 students. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration should attend the first meeting. May be repeated once for credit.

**VISA 1720. New Genre: Physical Computing.**

This semester will focus on the theme of Physical Computing. This studio course is an intensive introduction to electronic devices for use in art making and includes hands-on experience working with sensors, motors, switches, gears, lights, simple circuits, microprocessors and hardware-store devices to create kinetic and interactive works of art. Demonstrations, lectures and critical discussion of work will be given to develop concepts and technical skills. Prerequisite: VISA 0120. This course restricted to 15 students. 10 seats will be available during pre-registration. Students who are not admitted during pre-registration should attend the first meeting. May be repeated once for credit.

**VISA 1800A. Accessorizing Painting: The Exalted Surface.**

This studio course will examine the crossover between decorative arts and painting. Drawing upon sources such as fashion, textiles, adornments, jewelry, furniture, hair and architecture we will study how design aesthetics demonstrate class, position, lineage or a particular period in the history of painting and embellishment. Students will be encouraged to experiment with a wide variety of media and work on projects based on their selected researched subject areas. Enrollment limited to 14 Visual Art concentrators. Prerequisite: VISA 1310.

**VISA 1800B. Elm Tree Project: Site and Material.**

No description available.

**VISA 1800C. Honors Seminar.**

Required for students who have been accepted as candidates for honors. The seminar meets weekly to discuss readings and for group critiques.
The Watson Institute for International Studies

The Watson Institute for International Studies is dedicated to research and teaching on international affairs. Named for Thomas J. Watson Jr. ’37, the institute analyzes the most pressing global problems of our time and seeks initiatives to address them from a multidisciplinary and multinational perspective. Working at the intersection of academia and policymaking, the institute analyzes globalization and inequalities; the international flow of ideas, arms, and capital; and other matters of world policy.

The institute houses five undergraduate programs—Development Studies, International Relations, Latin American Studies, and Caribbean Studies, Middle East Studies, and South Asian Studies. Institute faculty add over 25 courses to the Brown curriculum each year. The Graduate Program in Development is also based at the institute. In addition, Brown undergraduate and graduate students actively participate with faculty on institute research projects. Additionally, the institute also provides curriculum and professional development opportunities for high schools nationwide, through its institutional partnership with the Choices for the 21st Century Education Program.

Watson’s core faculty is complemented by faculty associates from across the university and an ever-changing cohort of visiting scholars and practitioners from around the world. Each year, they publish more than 100 research findings as books, major policy reports, book chapters, journal articles, documentaries, and electronic publications.

Joint initiatives across the university include strong inter-departmental collaborations, such as those with the Anthropology, Economics, History, Political Science, and Sociology Departments, as well as relationships with such Brown centers as the Center for Latin American and Caribbean Studies, and the Office of International Affairs. Beyond the university, the institute collaborates on research with educational institutions, foundations, governments, and intergovernmental and nongovernmental organizations (NGOs). Many of the seminars, workshops, and conferences sponsored by the institute each year are born of these partnerships.

The institute also houses and supports three major academic journals: Studies in Comparative International Development, the Review of International Political Economy, and the Brown Journal of World Affairs (BJWA). Founded in 1993, BJWA is a widely recognized scholarly publication in the field of international studies, edited and managed entirely by Brown undergraduates.

Research, teaching, and events at the institute increasingly involve the use of media, such as video, various forms of Internet broadcasting, and interactive web-based commentary. Media is also analyzed for its role in shaping international affairs.

For more information about the institute and its programs, please visit their website (http://www.watsoninstitute.org).

Harriet W. Sheridan Center for Teaching and Learning

The Harriet W. Sheridan Center for Teaching and Learning was founded in 1987 to provide professional development in pedagogy for faculty, post-doctoral fellows and graduate students to enhance the quality of undergraduate and graduate instruction within the University. Today, the Center supports members of the Brown teaching community across the disciplines in building reflective teaching practices which ensure that a diverse student body has the best possible environment for learning. The Center plays a crucial role in facilitating the ongoing development of the mutually productive relationship between teaching and research among faculty, post-doctoral fellows, graduate students, and undergraduate students in the open Brown curriculum. The Center also assists graduate students prepare for productive professional teaching careers after graduation from Brown.

To serve the needs of its constituencies, the Sheridan Center offers a variety of programs, services and publications. Programs include public Teaching Forums, the Sheridan Teaching Seminar lecture series, and four Sheridan Center Teaching Certificate programs (I: Building a Reflective Teaching Practice; II: Classroom Tools; III: Professional Development Seminar for Advanced Graduate Students; and IV: the Teaching Consultant Program). The Center also offers orientations and seminars for new and junior faculty, including the Junior Faculty Roundtable. Specific topics and concerns are addressed in seminars for faculty and graduate students.

A variety of Consulting Services provide the Brown teaching community with individual feedback on classroom performance, course revision, conference/poster session presentation skills, and broader impact statements for grant applications. Through the network of faculty and graduate student liaisons to academic departments, the Center assists with the design and implementation of seminars on discipline-specific teaching and learning. The Center also maintains a resource library of books, articles, journals and monographs on teaching and learning issues for members of the University teaching community.

Sheridan Center publications (in both printed and electronic form) include The Teaching Exchange, Handbooks and a web site. The Teaching Exchange is a bi-annual forum for the exchange of ideas about pedagogy within the Brown community. Handbooks include Teaching at Brown, Constructing a Syllabus, The Teaching Portfolio, and Teaching and Persuasive Communication and Teaching to Variation in Learning. The videotape Effective Teaching for Dyslexic/All College Students is distributed nationally to facilitate understanding of learning diversity in the classroom. The Center’s web site (http://www.brown.edu/Administration/Sheridan_Center/) offers 24/7 access to information about teaching resources, Center activities, on-line editions of all publications, and two unique, interactive, pedagogical workshops. The Sheridan Center is centrally located in Lippitt House at 96 Waterman St. For information about the Center and resources for teaching at Brown, please contact (401) 863-1219; or Sheridan_Center@Brown.edu; Brown University, Box 1912, Providence, RI 02912.
University Courses

In an intellectually creative atmosphere, ideas for new academic approaches and new kinds of courses may and should arise. Among these courses are offerings that address departmental offerings. They provide students with the opportunity to integrate their understanding of major areas of learning and explore relationships among diverse forms of human experience; or to relate one or more disciplines to a broader context; or to focus on large and fundamental problems that need to be approached through several disciplines or by ways not found in existing disciplines. University courses originate with individual instructors and are retained in the curriculum only so long as these instructors wish to teach them.

Courses

UNIV 0090. Meditation and the Brain: Applications in Basic and Clinical Science.
This class is a detailed exploration of the most recent neuroscientific research of meditation. The course explores the cognitive, affective, and neurophysiological effects of meditation practices with reference to their clinical applications in health, psychiatry and medicine. Current methodological challenges and directions for future research will also be explored.

We begin with the chronicle of a great scientific quest: the 19th-century search for the structure of molecules. A consensus was reached only after many decades of experiments, interpretations and misinterpretations, polemics, and controversies both scientific and personal. Our purpose is to show how theories are shaped and to give insight into the human dimensions of science. We next detail the transfer of the new chemistry to the marketplace, from its beginnings in the synthetic dye industry. Finally, we conclude with the role of chemistry in World War I.

UNIV 0300. The Hispanic Experience in the United States.
This seminar will consider how Hispanics are transforming the United States even as they evolve as a people. We will discuss Hispanicity as an ethnocentric and racial identity, debate the ethical dilemmas posed by undocumented immigration, the significance of the unprecedented geographic dispersal, and what the burgeoning second generation portends for the future contours of economic inequality.

UNIV 0400. Beyond Narnia: The Literature of C.S. Lewis.
C.S. Lewis was one of the most widely read authors of the 20th Century, yet much of his philosophical, theological and political theories are unfamiliar. His fiction and philosophical writings will be explored to better understand his perspective on modern humanity, the relationship of man to family, the community and the state. C.S. Lewis had a very clear philosophy on the importance of the individual and how he relates to the larger social structures. Morality and the role of individuals as they interface with others around them and their responsibility for working with society both at community level and at the macro-state level will be explored.

UNIV 0500. A Comparative Phenomenology of Mystical Experience.
Mystical experience – personal engagement with an ultimate reality—is found in virtually all cultures, in explicitly religious and deliberately secular guises. It has received extraordinarily diverse appraisals: some have acclaimed it "the only truth there is," while others have been executed for asserting it. This course examines the nature of mystical experience and the variety of its manifestations in and out of the world’s major religious traditions. Students will read broadly in primary sources and engage two contemporary theoretical questions: Is mystical experience conditioned on issues of race and gender. Our goal is to create an environment that enables new voices to evaluate how the process of governance has worked. Participation by President Simmons depends on her availability. Interested students should apply using the application found at http://www.brown.edu/administration/presidential_seminar/. Applications are due by April 30th.

UNIV 1160. Drug and Alcohol Addiction in the American Consciousness.
The roots of our responses to addiction lie deep in the American consciousness. Conceptions of drug and alcohol addiction are explored in works of history, law, policy, and literature. Students take an active role in leading seminar discussions. Reading and writing assignments are rigorous. There is no final examination.

Considers the ethical tradition in the sciences, and the ways in which ethical issues are engaged in science. Readings and case study examples are drawn from a range of fields, including engineering, chemistry, physics, astronomy and the biological sciences. The seminar has been designated with NSF funding, and is being co-taught at Brown University, Zhejiang University in China and the Indian Institute of Technology in Bombay. The three sections of this seminar will meet together to share international perspectives several times during the semester. Enrollment limited to 25. Not open to freshmen. LILE WRIT.

UNIV 1400. The Cultural History of Disability Minorities in the United States.
Due to the efforts of people with disabilities to secure their civil rights, "disability" has begun to be perceived as a social identity and role rather than solely a medical condition. This course analyzes the cultural history of disability, giving attention to cross-cultural comparisons. Broad topics include: concepts of disability; disability and bioethics; images of disability in film, the media, art, and literature; and political movements of people with disabilities.

UNIV 1520. The Shaping of World Views.
To many students, an exclusive emphasis on specialized studies fragments the "world" in which they live. A widespread feeling of loss pervades the minds of students who often come to universities to learn right from wrong, to distinguish what is true from what is false, but who realize at the end of four years that they have deconstructed their
freshman beliefs, values, and ideologies, but have created nothing to replace them. This course examines the diversity of worldviews both synchronically and diachronically and surveys various explanations for such diversity. Enrollment limited to 30. Conducted in English

**UNIV 1700. Transformation of the Research University.**
This seminar will focus on recent transformations of the academic, instructional and administrative character of the elite American research universities. Emphasis will be on selected pressure points (such as research funding, diversity, technology, market influence) that drive change and shape the future
Independent Study Plans

Independent Study Projects
Most academic departments offer students opportunities to work independently with one of its faculty members. Students may approach a professor, and request to do a departmental independent study which, if successfully arranged, takes place under the rubric of the sponsoring department’s course code (i.e. ECON 1970 or SOC 1970.) When such an option is not available the student may choose to propose an Independent Study Project (ISP) through the College Curriculum Council. Each course proposal must have the approval of a faculty sponsor who shall be responsible for the scrutiny of the proposal, the evaluation of the work done, and the assignment of a grade. The faculty sponsor is not expected to give regular tutorial instruction.

Proposals for non-departmental Independent Study Projects (ISP) must be submitted in accordance with guidelines established by the College Curriculum Council on a form provided by the Office of the Dean of the College. The proposals will be reviewed by the College Curriculum Council to assure the academic quality of the proposed course and to avoid undue duplication. Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Curricular Resource Center (http://brown.edu/academics/college/advising/curricular-resource-center/independent-studies/independent-studies) website.

Group Independent Study Project
Group Independent Studies (GISP) are cooperative inquiries in which participating students bear major responsibility for both planning and conduct of the work. They provide an opportunity for academic pursuits which might not be available in regular courses. They carry course credit.

Each Group Independent Study is sponsored by an instructor who holds a teaching appointment in Brown University and whose central functions are to assess the proposed study, to provide advice during the work, and to be responsible for the evaluation of each student’s work. Group Independent Studies permit instructors to interact with more students than independent studies can realistically permit. A Teaching Assistant or Teaching Associate may sponsor a Group Independent Study if the department chair recommends that he or she be permitted to do so.

Proposals for Group Independent Studies should be made on a form provided by the Office of the Dean of the College. They will be reviewed by the College Curriculum Council to assure the academic quality of the proposed study and to avoid undue duplication. Group Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Curricular Resource Center (http://brown.edu/academics/college/advising/curricular-resource-center/independent-studies/independent-studies) website.

Each group should be sponsored by an instructor holding a teaching appointment at Brown University who is prepared to assess the proposed study, to provide advice during the project, and to be responsible for the evaluation of each student’s work. Normally this person will be a faculty member. Under exceptional circumstances a graduate student with appropriate expertise and teaching experience would be eligible to be a sponsor. In this case, the proposal must be accompanied by a curriculum vitae for the graduate student and a statement of qualification and recommendation from the chair of the graduate student’s department. The chair will assume ultimate responsibility for the academic quality of the GISP. The College will not offer remuneration for sponsors of GISPs.

At the end of each Group Independent Study, a joint student-faculty evaluation report of the accomplishments of the project must be submitted by the faculty sponsor to the College Curriculum Council.

Global Independent Study Project
Brown students studying abroad have the option of crafting a Global Independent Study Project (GLSP) with a Brown faculty member. Students accepted to this program work with faculty who have teaching or research experience in their proposed overseas study destination. Together, the student and the faculty member develop a project proposal that is an integral part of the student’s study abroad curriculum and that, where possible, is connected to the student’s concentration. Project proposals are submitted to the College Curriculum Council for review. Upon successfully completing the global independent study project, students receive one Brown credit. The remainder of the student’s course load abroad is taken through the study abroad sponsor institution.

Group Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Office of International Programs (http://www.brown.edu/academics/college/special-programs/international-study/programs/global-independent-study-glisp) website.
Financial Information

The College — Tuition Regulations

Undergraduate students at Brown are required to accumulate eight semesters, or 32 units of enrollment credit (in order to earn a baccalaureate degree. The eight-semester enrollment requirement is separate from and in addition to any other degree requirements.

1. Tuition rates are set by the Corporation of the University for each semester. Normally, the tuition rates for the two semesters of a given academic year will be the same.

2. Tuition payments for the baccalaureate degree are based on the norm of thirty-two courses, four courses in each of eight semesters. The minimum enrollment requirement is eight semesters, or the equivalent. The minimum tuition requirement for the program leading to the combined degrees of A.B.—Sc.B. is ten semesters of tuition credit. (Note: The Brown Corporation has enacted a provision allowing students in the five-year A.B.—Sc.B. program who complete all academic requirements in nine semesters to terminate their studies at that point, provided the Committee on Academic Standing (CAS) approves the breadth and quality of the student's program. In that case, the tuition requirement is reduced to nine semesters.)

3. Payment of full-time tuition for a semester entitles the student to enroll in three, four, or five courses for that semester. For full-time degree candidates, tuition charges are set for the semester, not per course.

4. Enrollment Credit for Transfer Credits

A. Students who are granted credit for Advanced Placement scores and/or transfer credit for courses completed at another college or university prior to enrollment at Brown may apply for up to four semesters of enrollment credit according to the following schedule:

<table>
<thead>
<tr>
<th>Brown Semester Course Credits</th>
<th>Advanced Standing and Enrollment Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3-6</td>
<td>1 semester</td>
</tr>
<tr>
<td>7-10</td>
<td>2 semesters</td>
</tr>
<tr>
<td>11-14</td>
<td>3 semesters</td>
</tr>
<tr>
<td>15 or more</td>
<td>4 semesters</td>
</tr>
</tbody>
</table>

B. Students who are granted Brown course credits by the Committee on Academic Standing for equivalent work completed at and transferred from another college or university after enrollment at Brown may apply for and may be granted advanced standing and enrollment credit according to the same schedule as in A(a) above. All transfer credits earned after enrollment at Brown are cumulative. Advanced standing and enrollment credit for this cumulative total of transfer credits will be awarded only in semester-equivalent blocks. In exceptional cases the Committee on Academic Standing may allow a student to transfer the equivalent of one or two Brown semester course credits for work completed during the regular academic year. Tuition credit will be granted for each such course at the rate of one quarter of a full-semester credit subject to the following conditions:

i Such courses completed while the student is not currently enrolled at Brown will become part of the cumulative total of any subsequent transfer credit earned by the student and the Table in (a) above will apply.

ii If the courses are completed as part of a dual registration arrangement (e.g., a student who is permitted to carry a less-than-normal load of courses at Brown and to pay an appropriate reduced amount of tuition in order to pursue concurrently certain specialized courses at another institution), enrollment credit for such courses will be independent of any other cumulative total of transfer credits earned by the student.

iii Once advanced standing has been granted, a student wishing to extend his or her total period of enrollment beyond eight full-time semesters, or the equivalent, must make a special petition to the Committee on Academic Standing. If approval is granted, tuition for each course (for the extended period) will be charged at the rate of one quarter of the full-time semester rate.

iv Transfer credit for summer school courses is allowed in accordance with provisions established by the Faculty Rules and the Committee on Academic Standing. When such credit is awarded, no enrollment credit is associated with the transfer credit granted. The academic credit awarded may not be combined in any cumulative total of transfer credits for the purpose of determining advanced standing or enrollment credit.

5. Undergraduate degree candidates who successfully complete four Brown Summer Session courses may apply for a waiver of one semester’s enrollment. See regulations for Brown Summer Session below.

6. An eighth-semester student who owes less than a full-semester tuition credit at the beginning of the eighth semester will be charged the fraction of the full-time tuition charge for that semester which will complete the eight-semester obligation and may take an equivalent number of courses. Additional courses will be charged at the rate of one quarter of the semester’s full tuition charge.

7. Regular degree candidate students who must or choose to take courses in semesters beyond the eighth semester in order to complete requirements for the baccalaureate degree will be charged tuition at the rate of one quarter of the semester’s full tuition charge for each course enrollment.

8. Degree candidate students who are given permission by the dean to register for a reduced workload (one or two courses) will be charged one quarter of the semester’s full tuition charge for each course enrollment.

9. Students in the eight-year program leading to a baccalaureate degree and the M.D. degree (Program in Liberal Medical Education) shall make four annual tuition payments at the rate fixed for the College (for years one through four) and four annual tuition payments at the rate fixed for the Medical School (for years five through eight).

10. Students in the Concurrent Bachelor’s-Master’s program are required to fulfill the minimum eight semester, 32 enrollment unit requirement, but can extend study up to nine semesters, 36 enrollment units.

11. The minimum enrollment requirement for the integrated five-year baccalaureate-master’s degree program is eight semesters, 32 enrollment units while an undergraduate, and a minimum of six enrollment units while in the fifth year in the graduate school.

12. The above regulations cover students who are candidates for a baccalaureate degree. For special students who are not candidates for a degree, a tuition charge of one quarter of the semester tuition rate will be made for each course/credit registered. (Exception - RISD cross-registration students during the fall and spring semesters).

Enrollment Credit Regulations Relating to Brown Summer Session Courses

For undergraduates, Brown Summer Session courses carry a course fee charge; they do not carry enrollment credit. Brown Summer Session courses may not be offered in fulfillment of enrollment requirements on a course-by-course basis for undergraduates. Graduate students, however, do receive enrollment credit for summer courses when they pay the full tuition charge.

A special provision of the enrollment regulations enables undergraduates to offer Brown Summer Session courses, in partial fulfillment of the enrollment requirement, under certain specified conditions: undergraduates who have otherwise fulfilled the graduation requirements at Brown and have been enrolled in seven semesters of full-time study or an acceptable equivalent, plus have taken and passed four Brown Summer Session courses, will be granted, on request, a waiver of the final semester of their enrollment requirement.
The enrollment requirements dictate that courses taken prior to matriculation may not be combined with courses taken after matriculation in order to achieve advanced standing and enrollment credit; hence, Summer Session courses cannot be so combined. In a similar manner, summer courses taken elsewhere and transferred after matriculation may not be combined with Brown Summer Session courses to achieve advanced standing. The maximum number of summer courses from all sources for which a student may receive credit is four, with no more than two in the same summer.

**Estimated Date of Completion (EDOC)**

One goal of the enrollment requirement is to enable the University to manage enrollment in the College more effectively. It is essential that this be done to the maximum extent possible. Accordingly, all currently enrolled students are assigned an expected date of completion (EDOC). This information is sent annually to all students with instructions to confirm the assignments or to work out any necessary adjustment with the Registrar. Any extension of enrollment beyond the student’s official EDOC will have to be applied for by December 1 for the spring semester and June 1 for the fall semester.

**The College — Student Charges**

The University reserves the right to change the rates that apply to all students whenever it is deemed advisable. Published notice of any change will normally be provided in advance.

*Tuition*: The annual tuition charge for the year 2012–13 is $42,808 or eight tuition units. The tuition charge for part-time and special students is $5,351, or one tuition unit, per course.

*Room*: The dormitory charge for the academic year 2012–13 in the undergraduate residence halls is $6,974 for regular accommodations and $8,264 for dormitory apartments/suites.

*Board*: All undergraduate, graduate and medical students may elect either a twenty, fourteen, ten, or seven meal contract at an annual charge of $4,284, $4,030, $3,654, or $3,340 respectively. They may also elect a twenty- or fourteen-meal Kosher/Halal meal plan at an annual charge of $5,050 or $4,796 respectively. Consistent with Brown’s commitment to the residential college, all resident undergraduates (except RUE students) are required to participate in a meal plan throughout their first full year of enrollment. Any board plan may be changed once during the first three weeks of each semester with a refund credited to the student’s University account on a prorated basis. A student may increase his or her contract participation at any time during the academic year. A fifty dollar ($50) administrative fee is charged to a student’s University account for any meal plan contract cancellation that occurs after the start of the semester. A ten dollar ($10) fee is applied for any meal plan contract change made after the start of the fall semester. Because services offered are often modified to reflect changes in student life, a current brochure is available from the food services office.

*Nonresident Fee/Commuter Fee*: Nonresident undergraduate students in co-ops or off-campus housing and those commuting from home are charged a $658 fee for services provided by the University such as Faunce House, security services, and off-campus information and listing services.

*Health Services Fee*: A $672 fee is charged all degree candidates in residence, both full and part time. This fee is designed to cover costs of providing care at Health Services from late August through Commencement. This fee does not include Health Insurance coverage.

*Student Health Insurance*: Charge for the academic year 2012–13 is $2,861. Mandatory participation is required in the university group health and accident insurance program for students unless a waiver of participation is granted upon submission of proof of comparable coverage. Waiver deadline is June 1.

*Student Activity Fee*: A $214 fee is charged to all students for the support of registered student organizations, the activities of the Undergraduate Council of Students, and the Student Union.

*Readmission Fee*: A $70 fee is charged to all students who re-enroll at the University after having been officially separated for any reason, including leave of absence.

**Late Registration Fee**: A $15 fee is charged to students who register after their normal early registration period in November for upcoming spring semester and in April for upcoming fall semester. There is an additional charge of $15 per course for all registrations after the second week of classes.

*Transcripts*: Information about ordering transcripts and the associated fees can be found at: [http://www.brown.edu/Administration/Registrar/records/](http://www.brown.edu/Administration/Registrar/records/)

**The College — Payment of Charges**

The University utilizes an electronic billing system (E-Bill). Payment of tuition and fees are due by August 1 for Semester I obligations and by January 1 for Semester II obligations. Charges applied to the student account during the semester will be due upon receipt of the monthly electronic statement.

Students who fail to make payment in full by the prescribed deadlines are assessed a late payment charge of 1.5% per month (an annual rate of 18%) on any unpaid balance. Outstanding balances greater than $100 will prevent a student from receiving an official transcript from the University. Outstanding balances greater than $1,000 will prevent a student from re-registering for any subsequent semester. Students who fail to meet their financial obligation in accordance with established University regulations will have the status of their account reported to the University Student Account Committee for appropriate action, which may include cancellation of eligibility for enrollment and/or dismissal. Students expecting to receive a degree in May are required to settle their accounts by May 1 to retain eligibility for receipt of a diploma. The University reserves the right to refuse to furnish grades, transcripts, certificates, diplomas, letters of honorable dismissal or recommendations, for students who fail to pay their student account balances. The University utilizes the service of a commercial collection agency to assist in the collection of unpaid student accounts.

Upon application, a monthly installment payment plan is available through the Bursar’s Office. Additional information is available in the Bursar’s Office or on the web at [http://brown.edu/Administration/Financial_Services/Bursar/index.html](http://brown.edu/Administration/Financial_Services/Bursar/index.html).

Checks in payment of student accounts should be made payable to Brown University in U.S. dollars and mailed to the Cashier’s Office, Campus Box 1911, Providence, RI 02912. Instructions for sending payment via wire transfer are available by contacting the Cashier’s Office at 401-863-2151. Payment maybe made online via U.S. personal checking/savings accounts at [https://payment.brown.edu](https://payment.brown.edu).

**The College — Refund of Annual Charges**

1. **Tuition**

   A. A student who leaves the University during or at the end of the first semester shall not be charged tuition for the second semester.

   B. A student who leaves the University (except under conditions noted in (c) below) or changes his/her enrollment status during a semester shall be eligible for tuition payment refund during the first five weeks according to the following schedule:

<table>
<thead>
<tr>
<th>Week of Withdrawal</th>
<th>Percentage Amount of Refund</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 and 2</td>
<td>80 percent</td>
</tr>
<tr>
<td>3</td>
<td>60 percent</td>
</tr>
<tr>
<td>4</td>
<td>40 percent</td>
</tr>
<tr>
<td>5</td>
<td>20 percent</td>
</tr>
</tbody>
</table>

   ii If a partial refund is made, no portion of the tuition paid and not refunded will be credited to the total tuition required for the degree. When no refund is made, the four tuition units paid will be credited toward the total tuition requirement for the degree, and the number of semesters to which a student is entitled for full-time enrollment will be reduced by one.
C. A student who is suspended, dismissed, or withdraws when under investigation for misconduct shall not have tuition refunded for the semester in which the action is taken.

2. Room
While residence hall rooms are rented on an academic year basis, students who leave the University or change their status to married students during or at the end of the first semester are not charged room rental for the second semester. Students who leave the residence halls during the semester are charged room rental for the balance of that semester unless the residential life office can provide a satisfactory replacement for the vacant space. A satisfactory replacement is deemed to be a student who is not currently living on campus or a student who is living in a “roomsharing” room if the total occupancy of the residence halls is in excess of normal capacity. Prorated room refunds when applicable will be made from a schedule prepared by the Director of Residential Life and will be on file in the Office of Residential Life. Students seeking any further information regarding room charges and/or refunds should contact the Office of Residential Life.

3. Board
Brown Dining Services offers flexible meal plans and varied menu and service offerings. The following meal plan contract options, based on meals available per week, are available to all undergraduate, graduate, and medical students; twenty; fourteen; ten; seven; twenty Kosher/Halal; and fourteen Kosher/Halal. Consistent with Brown’s commitment to the residential college, all resident undergraduates (except RUE students) are required to participate in a meal plan throughout their first full year of enrollment. Any students who wish to change, or upperclass students who wish to cancel their meal contract, can prior to the start of, or during the first three weeks of the fall semester. One change is permitted per semester. Meal plan contracts are in effect for the full academic year. Therefore, contracts may be changed but not cancelled during the spring semester. A credit or debit will be applied to the student’s university account based on a weekly proration of the annual contract price. Additionally, the following fee structure applies:
A. A fifty dollar ($50) administrative fee is charged to a student’s University account for any meal contract cancellation that occurs after the start of classes in the fall.
B. A ten dollar ($10) fee is applied for any meal plan contract change made after the start of the fall semester.

4. Health Services Fee
A student who leaves the University at any time after the start of the semester is not eligible for a health fee refund. A student who leaves the University during or at the end of the first semester shall not be charged a health fee for the second semester.

5. Health Insurance Fee
Enrollment in the student health insurance plan is for a twelve-month period (August 15th to August 14th). Students who start their enrollment at Brown in the second semester are enrolled from January 15th to August 14th. Prorated refunds are available only to students who separate from the University. Students who wish to request a prorated refund must notify the Office of Risk Management in writing within 30 days of their separation date. Details are available from the Office of Risk Management, Box 1914, (401) 863-1703.

Student account records are maintained in the bursar’s office. Questions concerning the exact amount of debit or credit balance on a student account should be directed to the bursar.

Additional information regarding student charges and payment options, please visit the Bursar’s Office website at: http://brown.edu/Administration/Financial_Services/Bursar/index.html

The College — Financial Aid
The Office of Financial Aid is committed to partnering with students and families to explore options to finance the cost of an education at Brown. We assist undergraduate and graduate students, in understanding all aspects of the financial aid application processes for federal, state and institutional need-based grants and loans. Our office also provides information about student employment opportunities both on and off-campus. At Brown, financial aid is one of our highest priorities. Brown is committed to meeting a family’s full demonstrated financial need with a combination of federal and institutional need-based grants, student employment, and loans. Our financial aid program includes initiatives that in some cases offer awards with no expected parent contribution, and/or no loans.

The instructions and links on this website (http://www.brown.edu/about/administration/financial-aid/) will provide you and your family details regarding required application forms and documentation, as well as deadlines and other helpful information. All inquiries concerning scholarships, loans, and student employment should be addressed to the Office of Financial Aid, Box 1827, Brown University, Providence, Rhode Island 02912 or (401) 863-2721.

The College — Financing Alternatives
The Loan Office is the centralized department for all university-based loan programs. This office administers student loans for undergraduate, graduate and medical students. The University participates in the Federal Direct Lending program for subsidized and unsubsidized Stafford Loans and Plus Loans. In addition, the University offers alternative Parent Loans and the Tuition Prepayment Program, along with various employee loan programs. Financial counseling is available to the families of Brown students.

If you have any questions regarding these programs or require more information you may contact the Loan Office at Box 1590, Providence, Rhode Island 02912 or call (401) 863-3296; or please visit the Loan Office website at: http://brown.edu/Administration/Financial_Services/Loan/index.html.

The Graduate School — Tuition Regulations, Student Charges, etc.
For the current information regarding Graduate School tuition regulations, student charges, payment of charges and financial aid, refunds, and financial support, please visit the Graduate School website at: http://www.brown.edu/academics/gradschool/financing-support.

Warren Alpert Medical School — Tuition and Financial Aid, Student Charges, etc.

PLME
The tuition for the first four years of the Program in Liberal Medical Education is the same as that of the College listed above. Tuition for the last four years of the PLME is somewhat higher than the College tuition, but consistent with other private medical schools. Tuition is determined each year by vote of the Brown Corporation.

For the current information regarding tuition regulations, student charges, payment of charges and financial aid, refunds, and financial support for the Warren Alpert Medical School, please visit the website at: http://brown.edu/academics/medical/financial-aid.
Academic Facilities and Educational Resources

Libraries
University Library
The Brown University Library supports the educational and research mission of the University by serving as the local repository for and principal gateway to current information and the scholarly record. The library contains more than 3.8 million volumes and 6 million items, including printed and electronic books, periodicals and e-journals, maps, microforms, videos, sound recordings, sheet music, manuscripts, electronic media, government documents, and resources in other formats. Currently the Brown University Library is one of the largest and most notable academic libraries in New England and holds several world-renowned special collections. The University library system includes five libraries on campus and the Library Collections Annex, a high-density storage facility located about four miles from campus. The John Carter Brown Library is an independent research library also located on the Brown campus.

The library web site http://library.brown.edu/ is the principal gateway to the collections and services available for library users at Brown. Josiah, http://josiah.brown.edu/, the Brown University Library online catalog, provides access to information about holdings in all the libraries at Brown. Expenditures for acquisitions in 2008-9 totaled over $8.5 million. The library has received over 65,000 journal titles and has licenses for more than 300 research databases. The library complements its local collection by providing Brown users with access to over 50 million additional volumes via direct borrowing agreements with consortial partners (a supplement to traditional interlibrary loan services). A growing portion of the library’s resources today are digital, providing users with more immediately accessible information in a format that suits their research preferences.

John D. Rockefeller Jr. Library
The Rockefeller Library http://library.brown.edu/about/rock/, otherwise known as “the Rock,” houses the collections in the social sciences and humanities. On the first floor near the entrance, users will find the circulation desk where they can check out books for borrowing, seek reference assistance, or inquire about library services and policies. The entire building allows for wireless connections to the Brown network and the Internet. Computer clusters are available on Levels 1 and 2; a separate graduate student cluster is available on Level 2. The Rock provides a variety of spaces to suit different work styles, including open, comfortable seating as well as group study rooms in the Laura & David Finn Reading Room on Level 1, an “absolute quiet” study room on Level A, and individual study carrels located throughout the building. The Alfred and Laura Hecker Center for Library Technology, a state-of-the-art classroom for library instruction, is located on Level 1. Josiah, the library’s online catalog, and other search tools and online resources can be searched from workstations located throughout all the libraries as well as from any device with access to the Internet. Books and bound periodicals are shelved together in open stacks arranged by Library of Congress call numbers. The library’s main collection of newspapers is housed in the Periodicals Reading Room on the first floor. East Asian material, located on level 3, includes the Gardner Collection which consists of mostly historical Chinese material from the Ch’ing Dynasty (1644–1912). A small café in the lobby of the Rock provides a convenient place for a study break or to meet informally with friends or colleagues.

Sciences Library
The Sciences Library http://library.brown.edu/about/scil/, a 14-story high-rise building, contains the library’s resources in the physical, biological, and medical sciences. Library Richard A. Friedman Study Center http://library.brown.edu/about/friedman.php, a modern, comfortable, and technologically equipped 24-hour study environment for Brown students in the heart of campus. The Friedman Study Center is open 24/5 and features individual and group study areas, computer clusters, and common areas designed to meet students’ needs for academic and gathering spaces. A café is located in the lobby of the Sciences Library. Additional computer clusters and study spaces are available on the Mezzanine level. Books and bound periodicals are shelved together by Library of Congress call numbers on the upper floors of the Sciences Library. There is an extensive map collection including U.S. Geological Survey depository maps on Level 8. The Science Center is located on Level 3 and offers work, study, and lecture spaces as well as tutoring and advising resources for math and science students. The Media Services department (part of Computing and Information Services) is located on Level 14, and provides assistance to the Brown community in the use of instructional technology equipment for classrooms and events.

John Hay Library
The John Hay Library http://library.brown.edu/about/hay/ is the location for most of the University’s rare books, manuscripts, special collections and archives. Among the notable materials in “the Hay” are the renowned Harris Collection of American Poetry and Plays, the Sheet Music Collection, the McLellan Lincoln Collection, the Anne S. K. Brown Military Collection, the Lownes History of Science Collection, the papers and works of H. P. Lovecraft, the Smith Collection of books on Magic, and the Annmary Brown Collection of incunabula. Other notable collections include the Hall-Hogeland Collection of Extremist and Dissenting Literature, the Katzoff Collection of Gay and Lesbian Literature, the Poulin and Ciaraldi Collections of Comic Books and Illustrated Novels, the Miller Collection of Wit Collection of Modern American Poetry, and the Leab Collection on George Orwell. A detailed listing of special collections in the John Hay Library is available at http://library.brown.edu/collatoz/. Exhibitions of materials from the collections are mounted year-round. The University archives http://library.brown.edu/collections/archives/, dating from 1763, contain copies of the official records and publications of the University and the papers of many of its departments, officers, and affiliated groups. All materials are paginated at the reader services desk for use in the reading room, which is also available for general study. Materials in the library do not circulate outside the building. The Walter L. S. Bopp Seminar Room, a state-of-the-art instruction and meeting space, is located on the third floor of the John Hay Library.

Virginia Baldwin Orwig Music Library
The Orwig Music Library http://library.brown.edu/about/orwig/ houses the general collections of music materials, including books, periodicals, scores, and sound recordings. The study space is particularly convenient for students living in the East campus area. A listening facility for sound recordings, audio cassettes, and compact discs is also available; the recordings do not circulate. Digital audio files may be placed on reserve using OCRA (Online Course Reserves Access), a system that streams required listening assignments to students registered in Brown University classes; see http://library.brown.edu/reserves/ for more information.

Art Slide Library
Located on the fourth floor of the List Art Center for the convenience of its most frequent users, the Art Slide Library http://library.brown.edu/about/asl/ acquires digital images, slides, photographs, printed reproductions, microfiche, reference books, and electronic resources to support the general needs of the Brown University community for visual materials pertaining to art and art-related subjects, including architecture and archaeology. The resources include a growing collection of digital images as well as approximately 300,000 slides, 39,000 photographs, and 10,000 microfiche. In collaboration with the Center for Digital Scholarship, the ASL provides scanning services for faculty who need digital images of visual culture for teaching. A local image database is available via Luna Insight software. Anyone affiliated with the University is welcome to use items from the collections for teaching on campus, student presentations, research, or related educational activities. The staff of the Art Slide Library is available to answer humanities reference questions and to provide training in the use of the digital image collections.

John Carter Brown Library
The John Carter Brown Library http://www.brown.edu/Facilities/John_Carter_Brown_Library/ is a separately administered and independently funded library, operating under its own policies and procedures. In the field of Americana, it is one of the outstanding libraries
of the world. Among the some 50,000 volumes printed before 1825 are numerous books and pamphlets describing the growth of the European colonies in the New World and the impact of the discovery and exploration of the New World upon Europe. The library also has an extensive collection of maps dating from 1477 to the mid-19th century. While the resources of the John Carter Brown Library are available to anyone who needs to use them, the library is designed to serve those engaged in advanced scholarly research. Use of the reading room is restricted to those making use of the collections. The John Carter Brown is a closed stack library, and all materials must be paged by the staff. The library regularly mounts exhibitions open to the general public.

Library Services

Access to Library Buildings

The primary goal of the libraries at Brown University is to support the instructional and research needs of the Brown academic community. Currently, the libraries are open and provide services over 110 hours per week during the academic year with additional hours available during reading and exam periods. In addition, the Friedman Study Center in the Sciences Library is open overnight (5 nights per week) for studying. A Brown University identification card or other proof of Brown affiliation is necessary to gain access to the Rockefeller and Sciences libraries. Following is a brief listing and description of some of the library services. More complete information and assistance are available at http://library.brown.edu/ or from staff at any of the service points throughout the libraries.

Locating and Using Library Materials

Josiah, the Brown University Library online catalog http://josiah.brown.edu/, and the library’s other search tools and online resources, can be searched from workstations located throughout all library buildings or from any device with access to the Internet. The book stacks in Rockefeller, Sciences, and Orwin libraries are open and allow users direct access to the collections for browsing purposes. Materials shelved off-campus at the Library Collections Annex can be requested for delivery to campus (usually within 24 hours). Details about loan periods are available on the library’s web page. Materials at the John Hay Library must be retrieved by staff from the closed stacks and used within the library; please inquire at the Hay Reader Services Desk for more information.

Library staff provide a variety of general and specialized services to assist students, faculty, and staff members of the Brown community. Library staff promote academic success by advising students and faculty on how to use a wide range of information resources available though the library. Subject specialists are available to consult on research topics, instruct in the use of library resources and tools, evaluate sources of information, and help users navigate the research process.

An increasing portion of the library’s collections is available digitally through licensed or networked resources. The library currently has licenses to over 300 research databases and approximately 52,000 full-text online journals. Detailed lists of electronic titles are available through Josiah and on the library web site. Instructions for accessing licensed content from off-campus are available at http://library.brown.edu/offcampus/

Access to Other Libraries

Beyond the immediate collections available on campus, Brown students and faculty have direct access to more than 50 million volumes through special borrowing agreements with partner libraries. Titles from these libraries — including Columbia, Cornell, Dartmouth, University of Pennsylvania, Princeton, Yale, and the academic libraries in Rhode Island — can be searched and requested using easyBorrow, the library’s web service for expedited borrowing and delivery of books to the Brown campus. In addition, Brown has reciprocal agreements for on-site access to a number of libraries in the region and throughout the nation. More information about these and other options for obtaining materials from other libraries is available from the library’s web site or from staff at any of the service points throughout the libraries.

Center for Digital Initiatives

The Center for Digital Scholarship (CDS) coordinates the library’s efforts in building its digital collections. CDS focuses on producing digital materials for use in scholarship and teaching efforts at Brown; digitizing “signature collections” from Brown’s world renowned special collections; developing databases, programs, and applications to enhance access to and use of these materials; and providing consultative services for library and academic units undertaking digital projects. A growing collection of digitized materials, faculty projects, databases, search tools, and finding guides is available at the library’s web site: http://library.brown.edu/cds.

Services for Users with Disabilities

The library works closely with the University’s Disability Support Services to accommodate Brown students, staff, and faculty with special needs. The main entrances to the Rockefeller and Sciences libraries are wheelchair accessible. The John Hay Library is also accessible via the entrance at the rear of the building, where a phone is available to gain admittance by calling the staff at the Reader Services Desk. The service desks in the Rockefeller, Sciences, and Hay libraries can arrange to have materials retrieved from the stacks and provide other special services as required for users with physical disabilities. The Rockefeller Library currently has a computer workstation with magnification and reading software for the vision impaired.

Museums

Gardner House

Gardner House, located at 106 George Street, is the University guest house and a historic house museum. It was built in 1806 for Joseph Hale, a mason, and for many years was a single family residence. Later it was partitioned into a multifamily dwelling, and, during the early 1930s, the owner offered room and board to Brown students.

In 1932 the house was acquired by Brown University. Shortly thereafter, George Warren Gardner, M.D., a member of the Brown Class of 1894, and his wife Jessie Barker Gardner, offered to donate to the University their home on Orchard Avenue and all their antiques. In return, arrangements were made to restore Gardner House and for the Gardens to occupy it for as long as they lived. In accordance with their agreement with the University, upon their deaths, the house became available to Brown as a historic house museum and a guest house. It has been maintained for these purposes since 1948.

In 1979, renovated, Gardner House was reopened as the President’s guest house for distinguished guests of Brown University.

Haffenreffer Museum of Anthropology

The Haffenreffer Museum of Anthropology curates over 100,000 archaeological and ethnographic objects from around the world. The Museum is also the federally designated repository for significant arctic collections from Alaska. The Museum’s Collections and Research Center and offices are located at the museum’s original site on the 375-acre Mount Hope Grant in Bristol, Rhode Island, eighteen miles from Providence—Museum and land having been a gift in 1955 from the heirs of Rudolf Haffenreffer. In 2005, the Museum opened a 2,000 SF gallery on campus, in Manning Hall on the main green. Museum education outreach programs are run from Manning Hall and Giddings House on campus. Since 1955, the Museum has close intellectual and historical ties with the Department of Anthropology, being led by a director with a faculty appointment in the department, offering courses and a master’s degree in anthropology-museum studies, guiding undergraduate and graduate students in co-curation of exhibitions. The gallery in Manning Hall is open Tuesday-Sunday, 10-4. For more information see http://brown.edu/Facilities/Haffenreffer/index.html.

Laboratories

The University provides extensive, modern laboratory facilities designed for undergraduate instruction, graduate instruction, and research. The major laboratory facilities include the following.
Physical Sciences Laboratories

**Barus and Holley Building:** a seven story building housing both the School of Engineering and the Department of Physics. In addition to classrooms and faculty offices, the building contains over fifty laboratory rooms. These rooms are equipped with the latest scientific apparatus permitting research in fields such as: bio- and nano-mechanics, picosecond ultrasonics, low-temperature physics and superconductivity, surface physics, colloidal physics, liquid crystal physics, solid-state physics, magnetic properties of solids, nonlinear optics, high-energy and elementary particle physics, laser systems, microwaves, servo-mechanisms, instrumentation, solid state electronics, microelectronics, creep and fatigue of materials, materials preparation, transmission and scanning electron microscopy and electron microprobe analysis, scanning tunneling and atomic force microscopy, x-ray diffraction, soil mechanics, dislocation dynamics, dynamic inelasticity, binocular vision, coal gasification, speech recognition; robotics, image processing and computer systems, and the CVD (Chemical Vapor Deposition).

**Chemical Laboratories:** The instructional laboratories and classrooms are housed in MacMillan Hall. The research programs in inorganic, organic, physical, and biochemistry as well as the offices of the Department of Chemistry are housed in the adjacent Geology-Chemistry building. Facilities include a machine shop, and an electronics shop. The laboratories are equipped with modern instruments for research in chemistry, including NMR, ESR, IR, Raman, UV and mass-spectrometers, X-ray and electron diffraction systems, several state-of-the-art laser facilities, and equipment for ESCA, Auger and photoacoustic spectroscopy. The laboratories contain an extensive array of computational and graphics workstations, linked via networks to departmental minicomputers, to the university’s mainframe, and to remote databases and supercomputing facilities.

**Geo-Chem Building, MacMillan Hall, and Lincoln Field Building:** These buildings house the Department of Geological Sciences. In addition to classrooms and faculty graduate student offices, the buildings contain laboratory space and research equipment and facilities including an extensive computing network of workstations and minicomputers which are linked via Ethernet to a campus parallel computing facility and to national networks and The MacMillan Undergraduate Science Center houses undergraduate geoscience and environmental science laboratories, office and laboratory space for concentrators, as well as a computer center, well-equipped lecture halls, and a lounge. Planetary Geoscience facilities include a sophisticated image processing and analysis facility, the Brown/NASA Reflectance Experiment Laboratory (RELAB), and an extensive collection of photographs, images, and maps from all planetary exploration missions. Brown/NASA Regional Planetary Data Center makes available to researchers data from the U.S. Space Program. Experimental and analytical labs include: pollen, micropaleontological, and alkenone paleotemperature laboratories, EIonzone particle counter, elemental analyzer and the Environmental Stable Isotopes Laboratory for analysis of d15N, d18O, dD and d13C in carbonates and organic samples, several multicollector gas and solid-source mass spectrometers, hydrothermal, gas, and piston cylinder apparatus, electron microprobe/scanning microscope, X-ray fluorescence analysis facility (XRF), an X-ray diffraction unit, a computer controlled rotary shear gas apparatus for frictional sliding experiments, modified Griggs-type solid medium deformation apparatus (3) for high and low temperature and pressures as well as various strain rates. A jointly owned ion microprobe and a campus Electron Microscope Facility for SEM and TEM studies are available, as well as Raman spectroscopies in other laboratories which are linked via Ethernet to a campus parallel computing facility and to remote databases and supercomputing facilities.

**Life Sciences Laboratories**

**Genomics Core Facility:** The facility provides state-of-the-art genomics and proteomics equipment to researchers at Brown University and to the entire Rhode Island research community, as well as assistance with experimental design, trouble shooting, and data analysis. For more information regarding the services and equipment that will be found at the facility, please go to: http://www.brown.edu/Research/CGP/core/

**Leduc Bioimaging Facility:** The facility, open to all investigators, provides equipment and training dedicated to high-resolution imaging in the life sciences. It includes a Transmission Electron Microscope, a Scanning Electron Microscope, two Fluorescence Microscopes, a Fluorescence Stereomicroscope, three Confocal Laser Scanning Microscopes, and several other image analysis systems. The facility also maintains equipment for sample preparation, including a critical point dryer, sputter coater, and microtomes for ultrathin sectioning. The facility currently offers training and equipment at two locations: in Sidney Frank Hall for Life Sciences and the Laboratories for Molecular Medicine. The facility maintains nine main imaging systems and serves more than 200 users.

**Molecular Pathology Core Research Laboratory:** The laboratory provides instrumentation and supports personnel in research efforts for both the COBRE mentors and their junior associates, as well as specially immunohistochemical services for the Department of Pathology. The 1250 square foot facility is equipped with an Arcturus AutoPix automated laser capture microdissection system, Olympus BX41 with CoolSnap Camera from Media Cybernetics and Image Pro-Plus Software, Stratagene MX4000 quantitative Real Time PCR system, BioRad Cycler, Agilent BioAnalyzer, Ventana Discovery automated immunohistochemistry processor, microtome and cryostat, and Beecher tissue arrayer, and 40 cubic feet of 80 degrees Celsius freezer space for the tumor bank.

**MRI Research Facility (MRF):** The facility occupies a 3000 sq. ft. research suite located in the Sidney Frank Hall for Life Sciences on Brown’s main campus. The centerpiece of the Facility is a state-of-the-art research dedicated Siemens 3 Tesla TIM Trio. The scanner is equipped with 32 receiver channels for significant gains in signal-to-noise ratio and acquisition speed. The MRI Research Facility provides infrastructure and support to facilitate research and educational activities using magnetic resonance imaging technology. The MRF is affiliated with the University’s Institute for Brain Science and is a resource available both to Brown researchers and those at Brown affiliated hospitals. Ongoing research includes studies of brain structure and function in normal and clinical populations as well as studies of other body systems, non-invasive animal imaging and materials science.

**NSF/EPSCoR Proteomics Facility:** The facility shall have a broadly-inclusive philosophy to ensure rapid and equal access to the facility’s services for the entire Rhode Island research community. In addition to the acquisition of instrumentation, the NSF/EPSCoR Proteomics Core Facility will undertake the training of research in emerging proteomics techniques, a component that is essential to maintaining a productive and professional level of service. The NSF/EPSCoR Proteomics Core Facility shall have a strong commitment to be at the leading edge of developing technologies and provides consultation on their application.

**Outcomes and Biostatistics Core:** The core participates in a wide variety of activities, including consultation on design and analysis for small pilot projects, development of study design for major projects (e.g. R01 proposals), assistance and advice on database construction and management, collaboration on large projects where outcomes measurement and statistical analysis considerations are nontrivial, development of new statistical methodology, and mentorship for junior investigators and fellows. To request services from the biostatistics core, please contact one of the core co-directors. you should describe your project in detail, explain your statistical needs, and provide pertinent deadlines. A member of the core will respond to set up an intake meeting.

**Plant Environment Center:** A complex of greenhouses, growth chambers, and growth rooms is located on Waterman Street. We provide an educational research facility which is open to all investigators, provides equipment and training dedicated to high-resolution imaging in the life sciences. It includes a Transmission Electron Microscope, a Scanning Electron Microscope, two Fluorescence Microscopes, a Fluorescence Stereomicroscope, three Confocal Laser Scanning Microscopes, and several other image analysis systems. The facility also maintains equipment for sample preparation, including a critical point dryer, sputter coater, and microtomes for ultrathin sectioning. The facility currently offers training and equipment at two locations: in Sidney Frank Hall for Life Sciences and the Laboratories for Molecular Medicine. The facility maintains nine main imaging systems and serves more than 200 users.

**NSF/EPSCoR Proteomics Facility:** The facility shall have a broadly-inclusive philosophy to ensure rapid and equal access to the facility’s services for the entire Rhode Island research community. In addition to the acquisition of instrumentation, the NSF/EPSCoR Proteomics Core Facility will undertake the training of research in emerging proteomics techniques, a component that is essential to maintaining a productive and professional level of service. The NSF/EPSCoR Proteomics Core Facility shall have a strong commitment to be at the leading edge of developing technologies and provides consultation on their application.

**Outcomes and Biostatistics Core:** The core participates in a wide variety of activities, including consultation on design and analysis for small pilot projects, development of study design for major projects (e.g. R01 proposals), assistance and advice on database construction and management, collaboration on large projects where outcomes measurement and statistical analysis considerations are nontrivial, development of new statistical methodology, and mentorship for junior investigators and fellows. To request services from the biostatistics core, please contact one of the core co-directors. you should describe your project in detail, explain your statistical needs, and provide pertinent deadlines. A member of the core will respond to set up an intake meeting.

**Plant Environment Center:** The Center, consisting of research greenhouses, a classroom laboratory and Conservatory, is located at 91 Waterman Street. We provide an educational research facility which is primarily available to those in the Department of Ecology and Evolutionary Biology, a part of the Division of Biology and Medicine. The facility is comprised of 3 research greenhouses approximately 5,000 sq.ft. used for research experiments and a teaching plant collection for biological science classes. There is also a Conservatory of approximately 2000 sq.ft. The collection includes many plant families, including a diverse collection of Cycads, Orchids, Aroids, and many plants from the Amazon region. Many
of these plants have medicinal and ceremonial uses and are part of our Ethnobotanical collection.

In addition to the greenhouse facilities, we have five E7/2 Conviron Plant Growth Chamber units, as well as one eighty square foot walk-in chamber. These units are used by graduate students and professors with very specific cultural requirements for optimal plant growth.

Walter S. Hunter Laboratory houses most facilities for research and teaching in psychology. Psychology is the branch of the life sciences that studies how we perceive, learn about, and remember the world around us, how we develop physically and socially, and how we interact with our fellow humans. Modern psychology studies both human and animal behavior, employs both observational and experimental methods, and incorporates many levels of analysis—including biological and neural, evolutionary, cognitive, and social.

Creative Arts

Perry and Marty Granoff Center for the Creative Arts

The Granoff Center serves as a catalyst for collaboration between and among the arts, sciences, and humanities. Within the Center, creative thinkers from across disciplines can come together to work collaboratively, exchange ideas, and create new art forms.

The center serves as the home for the Brown University Creative Arts Council, which supports the goals of individual creative arts departments and programs, while facilitating a common vision for the arts that transcends discipline and creates unity. The Council serves as a catalyst for innovative collaboration across disciplines and provides a regular forum for communication among all members of the arts community. The Creative Arts Council is for the benefit of students, faculty, staff, alumni, and friends. Through its public activities, it seeks to maximize the visibility of the arts on campus, throughout the local community, and on a national and international level.

For more information on the Granoff Center and/or the Creative Arts Council, please visit: http://brown.edu/academics/creative-arts-council/.

Leeds Theatre

The flexible theatre space in Leeds Theatre allows seating on three sides or in the round. Each year the department of Theatre arts and Performance Studies produces several productions and festivals in Leeds Theatre including the annual Writing is Live Festival, Brown/Trinity Playwrights Rep and the annual student-directed Senior Slot production.

Ashamu Dance Studio

Ashamu Dance Studio serves as the home for the Dance Program at Brown. Measuring approximately 30x80 feet and equipped with mirrors and sprung floor, it is well-equipped for performance with seats, lights, sound system, Marley floor, and curtains. It has a seating capacity of 105 (75 seats and 30 floor spaces) and is also the home of the Theatre Arts and Performance Studies' annual alumni cabaret, produced each year on Commencement Weekend.

Stuart Theatre

Stuart Theatre has a seating capacity of 250. The department of Theatre Arts and Performance Studies produces several productions in Stuart each year including the annual musical and dance concert.
Summary of Enrollment & Degrees

The total IPEDS enrollment of Brown University degree candidates for Fall 2011 (October 15, 2011) was 8,390 FTE. The breakdown by school was as follows:

**The College**
6,109 FTE

**The Graduate School**
1,864 FTE

**Warren Alpert Medical School**
417 FTE

Summary of Degrees

As of May 2012, there were enrolled the names of 119,972 graduates, both men and women. Of this number 92,538 had received the bachelor’s degree; 24,450 had received advanced degrees; 2,988 had received the degree of doctor of medicine; 1,567 had received honorary degrees.

For historical information regarding student enrollment figures and/or degrees for Brown University, please visit the website of the Office of Institutional Research: [http://www.brown.edu/Administration/Institutional_Research/](http://www.brown.edu/Administration/Institutional_Research/)
Prizes, Premiums, and Honors

Complete details concerning endowed funds from which prizes and premiums are paid and special conditions which must be taken into consideration in making awards may be obtained from the Office of the Dean of the College.

The University reserves the right to withhold any award for any reason it deems valid.

Prizes for Excellence in Preparatory Studies

Prizes for excellence in certain preparatory studies are awarded each year during the first semester to members of the entering class on the basis of special examinations as described below. Examinations separately judged with separate awards but covering the same material are conducted simultaneously for both men and women.

The competitions in Greek, Latin, and Mathematics are open to all freshmen. However, those in the French, German and Spanish languages, respectively, are open only to those freshmen whose knowledge of the language concerned has been gained through secondary school studies rather than from family or community contacts.

The PRESIDENT FRANCIS WAYLAND PRIZES, derived from the income of a fund presented in 1843 by President Wayland, and later increased, are awarded each year to those members of the freshman class who upon examination are found to excel in preparatory Greek and Latin.

The HARTSHORN PRIZES IN MATHEMATICS, derived from the income of a fund presented to the University in 1872 by Joseph Charles Hartshorn of the class of 1841, are awarded each year to the two members of the freshman class who are found to excel in an examination on elementary algebra (through quadratic equations and the binomial theorem) and plane geometry.

The HYPTATIA PRIZES IN MATHEMATICS, derived from the income of a fund named for Hypatia of Alexandria, and presented anonymously in 1951, parallel for women freshmen the Hartshorn prizes for men.

The ALBERT BUSHNELL JOHNSON PRIZES IN FRENCH are derived from part of the income of the Albert Bushnell Johnson Fund bequeathed to the University in 1949 by Edward K. Aldrich, Jr. and are awarded each year to the two members of the freshman class who are found to excel in preparatory French.

The CAESAR MISCH PRIZES IN GERMAN, established in 1913 by a gift of Mrs. Marion L. Misch, are awarded to the two members of the freshman class who are found to excel in preparatory German.

The ASA CLINTON CROWELL PRIZES IN GERMAN, derived from the income of a fund established in 1928 by alumnae of the University, are awarded to the two women members of the freshman class who are found to excel in preparatory German.

The LOPE DE VEGA PRIZES IN SPANISH, established in 1962 by anonymous gift, are awarded to two men of the freshman class who are found to excel in preparatory work in Spanish.

The GABRIELA MISTRAL PRIZES IN SPANISH, established in 1962 by anonymous gift, are awarded to two women of the freshman class who are found to excel in preparatory work in Spanish.

Prizes and Premiums for Excellence in Undergraduate Studies

The KIM ANN ARSTARK MEMORIAL AWARD IN POETRY is derived from a fund established in 1971 by Mr. and Mrs. Lester D. Arstark in memory of their daughter. It is awarded annually for a poem or poems “in celebration of life.”

The DEREK CANFIELD BARKER PRIZE was established in 1994 through a gift from Richard C. Barker ’57 and Abbie D. Paterson ’57 in memory of their son, Derek. The purpose of this prize is to recognize students who have shown qualities of leadership, who have triumphed over adversity, and who have worked to bring the Brown community together through community service.

The ALBERT ARNOLD BENNETT, CLASS OF 1872, AWARD FUND was established by an anonymous donor through several gifts made between 1941 and 1949. The fund is in memory of the Reverend Albert A. Bennett, D.D., pioneer missionary to Japan, and is available annually for award purposes, but not continuously for any one object.

The PHILIP SHERMAN BENNETT PRIZE was established in 1904 by Philo Sherman Bennett for the “best essay discussing the principles of free government.”

The HONORABLE THOMAS WILLIAMS BICKNELL MEMORIAL AWARD was established in 1963 by the National Society of Sons and Daughters of the Pilgrims as a memorial to Thomas Williams Bicknell. The prize is awarded for an essay in American history.

The BRAND MUSICAL PREMIUM is derived from a fund established in 1960 by William C. H. Brand as a memorial to William and Mina R. Brand and is divided equally between two seniors of Brown University, one man and one woman, on the basis of merit.

The TRISTAM BURGES PREMIUM IN ENGLISH, instituted in 1953, is given at the end of the junior year to the woman student “with the highest standing in rhetoric, English composition, and public speaking.”

The BUXTEHUDE PREMIUM FOR MUSICAL EXCELLENCE was established by a gift from an anonymous donor to provide annual premiums for one or more undergraduates in the junior year.

The THOMAS CARPENTER PRIZES FOR ELOCUTION, derived from the income of a fund established in 1867 by Thomas Carpenter, are awarded each year to the three students to whom are assigned the first, the second, and the third rank of excellence in elocution.

The THOMAS CARPENTER AND LYDIA CARPENTER PREMIUMS were established in 1869 by Lydia Carpenter, on behalf of her late brother. They are assigned at the end of the academic year to the two members of the senior class who, “already on scholarships, shall, in the judgment of the faculty, unite in the highest degree the three most important elements of success in life—ability, character, and attainment.”

The HOPE CHATTERTON PRIZE IN MUSIC, to memorialize Hope Chatterton, was instituted in 1946, by anonymous donation. A prize is given in the spring to a woman student who in public audition is deemed to excel in piano performance.

The LEALLYN B. CLAPP PRIZE for an outstanding undergraduate thesis in chemistry. The prize honors Professor Clapp, who retired in 1983 after a long and distinguished career in the Brown chemistry department.

The CLASS OF 1873 PRIZES are derived from the income of a fund presented in 1877 by the class of 1873 and are awarded each year to seniors for essays on such topic(s) as the “faculty may, from time to time, deem most expedient.”

The CLASS OF 1906 MEMORIAL PREMIUM was established in 1956 by the will of Harry Knowles, Brown 1906. Currently the premium is awarded to a student who has completed with highest distinction the honors program in Russian studies.

The CLASS OF 1952 PREMIUM is derived from the income of a fund established in 1952 by the Class of 1952, at the College. It is awarded annually to an outstanding student at the end of his or her junior year, on the basis of excellence in scholastic achievement and extracurricular activity.

The CLARKSON A. COLLINS, JR., PRIZE IN AMERICAN HISTORY is derived from the income of a fund given to Brown University in 1941 by Letta I. Collins in memory of her son. An annual prize is offered for the best paper on any approved topic dealing with the American Merchant Marine or Navy. Competition is restricted to men in the junior or senior class.

The RUTH ELECTA COLLINS PREMIUM IN FRENCH is derived from the income of a fund established in 1936 by Mrs. Clarkson Abel Collins in memory of her daughter Ruth Electa Collins. It is awarded annually to a male senior, distinguished for outstanding work in French.

The CURT JOHN DUCASSE PREMIUM IN METAPHYSICS is paid from income of a fund established anonymously in 1958. The premium is...
awarded to a freshman, sophomore, or junior who excels in metaphysics and related subjects:
The ROBINSON POTT DUNN PREMIUM. The income of a premium scholarship fund presented to the University in 1872 by pupils and friends of Professor Robinson Potter Dunn is given, at the end of the junior year, to the student "with the highest standing in rhetoric, English composition, and public speaking."
The ADOLPH CONRAD ELY PREMIUM IN GERMAN is derived from a fund bequeathed in 1941 to Brown University by Adolph Conrad Ely, teacher, of the class of 1894. A premium is awarded annually to the senior with highest standing in Germanic languages and literature.
The BETH LISA FELDMAN PRIZE IN ENGLISH COMPOSITION is derived from a fund established in 1966 by Mr. and Mrs. Robert Feldman. This competition is open to all students of the University. Preference is given to the writing of stories for children.
The WILLIAM LEOPOLD FICHTER PREMIUM IN SPANISH was established in 1962 by anonymous gift. The premium is awarded to a member of the junior class who has the highest standing in courses in Spanish language and literature.
The IRVING LYSANDER FOSTER PREMIUM IN FRENCH is awarded from the income of a fund established in 1940 by Warren Woden Foster and Hafie Foster Moore in memory of their father, Irving Lysander Foster, of the class of 1893. The premium is awarded at the end of the academic year to that freshman who excels in French.
The LAFAYETTE SABINE FOSTER PRIZE IN GREEK is derived from the income of a fund bequeathed in 1880 by the Hon. Lafayette Sabine Foster, of the class of 1828. This income is to be paid annually "to that scholar of the institution who passes the best examination in the Greek language, the examination to be made in the first, third, sixth, and twenty-fourth books of Homer’s Iliad, or in the Oration on the Crown by Demosthenes."
The GASPEE CHAPTER DAUGHTERS OF THE AMERICAN REVOLUTION PRIZE. This prize, instituted in 1895, is now paid from the income of a fund presented to Brown University in 1899. The prize is awarded annually to that woman student who presents the best paper written as a class assignment in an American history course.
The WILLIAM GASTON PREMIUM SCHOLARSHIP is provided by the income of a fund established in 1899 by the widow and the children of the Hon. William Gaston, L.L.D., of the class of 1840. The scholarship is awarded to a member of the senior class solely upon scholarly merit.
The WILLIAM GASTON PRIZE FOR EXCELLENCE IN ORATORY. From the income of a fund established in 1894 as a memorial to the Hon. William Gaston, L.L.D., of the class of 1840, a prize is awarded annually to the member of the graduating class who presents the best original address.
The PRESTON GURNEY LITERARY PRIZES are derived from the income of a fund bequeathed in 1928 to Brown University by Preston Gurney, of the class of 1866. From the income of the endowment two prizes are awarded annually to members of the senior class for the best essays on approved literary topics.
The FRANCES MASON HARRIS ‘26 PRIZE established in 1983, is awarded annually to a woman undergraduate or graduate student for a book-length manuscript of poetry or prose-fiction.
The MARION HASSENFIELD PREMIUM IN MUSIC is paid from a fund bequeathed in 1960 by Marion Hasseenfeld. It is an annual award to a woman student who "excels in music or music appreciation."
The MINNIE HELEN HICKS PREMIUM IN ENGLISH is awarded at the end of the senior year to the woman student who has "the highest standing in the courses in English literature and language."
The MINNIE HELEN HICKS PRIZES IN ART are awarded from income of the Minnie Helen Hicks Fund, for creative work in art by women students.
The MINNIE HELEN HICKS PRIZES IN CLASSICAL APPRECIATION, instituted in 1953 from income of the Minnie Helen Hicks Prize Fund, is currently awarded to the woman undergraduate who presents the best paper in the course in Greek art and archaeology or in Greek and Roman history, these being offered in alternate years.
The MINNIE HELEN HICKS PRIZES FOR ELOCUTION parallel, for women students, the Thomas Carpenter Prizes for Elocution established in 1867 for men students.
The RATCLIFFE HICKS PREMIUM IN ENGLISH, established in 1915, from income from the Ratcliffe Hicks Fund of 1907, is awarded at the end of the senior year to the male student who has "the highest standing in the courses in English literature and language."
The RATCLIFFE HICKS PRIZES AND PREMIUMS FOR EXCELLENCE IN DEBATE, established in 1891 by the Hon. Ratcliffe Hicks, of the class of 1864, and by bequest in 1907, are awarded annually for intercollegiate debates and interclass debates.
The DAVID HOWELL PREMIUM is awarded from income of a premium scholarship fund presented to the University in 1866 by Gamaliel Lyman Dwight in honor of his grandfather, David Howell. The premium is given at the close of the first semester of the senior year to the student who, "having a good record of deportment, has the highest rank in Mathematics and Natural Philosophy."
The DOMENICO A. IONATA FUND, established by gifts of the family of Domenico A. Ionata, Class of 1926, provides for a premium to be awarded annually to that senior concentrating in engineering who demonstrates an unusual degree of creativity and imagination in an independent study project.
The JIN PRIZE FUND was established in 1997 in honor of the late Professor Young-Son Jin and his wife, Mrs. Kyunghee Jin. This prize will be awarded to the most outstanding graduating senior on the basis of academic achievement and service.
The PROFESSOR I. J. KAPSTEIN FUND, established by friends, students, and colleagues of Professor Kapstein, provides a premium for that undergraduate who has done the best work in the areas of literature, creative writing, or theater arts.
The JAMES F. KIDWELL PRIZE IN GENETICS OR POPULATION BIOLOGY is awarded each year to a graduating biology concentrator for excellence in course work and research in these areas. The prize is in honor of Professor Kidwell.
The NOAH KRIEGER MEMORIAL FUND was established in 1995 by family and friends of Noah Krieger, Class of 1993. Awards from this fund are given annually to one or more seniors studying in the A. Alfred Taubman Center for Public Policy and American Institutions who have demonstrated outstanding accomplishment and intellectual ability.
The SAMUEL C. LAMPORT PRIZES IN INTERNATIONAL UNDERSTANDING, first offered in 1943 by annual gift of the Trustees of the Samuel C. and Miriam D. Lamport Foundation, are now awarded from the income of a fund donated to Brown University in 1952 by these trustees. The prizes are offered to undergraduate students for papers on international understanding, with emphasis on cooperation and tolerance.
The LUCIUS LYON PRIZES IN LATIN are derived from the income of a fund presented in 1893 by Mrs. Caroline L. Lyon, in memory of her husband, Lucius Lyon, of the class of 1844. The prizes are awarded on the basis of a special examination relating to any or all of the following subjects: the Latin language, Latin literature, Roman history.
The GEORGE H. MAIN ’45 FUND, established by gifts of the family and friends of George H. Main, class of 1945, provides for a premium to be awarded annually to that senior in engineering who is distinguished by his diligence and devotion to studies rather than for high grades and who holds promise of success in his field.
The MURIEL HASSENFIELD MANN PREMIUM IN MUSIC is paid from a fund bequeathed to the University in 1960. An annual award is made to a woman student who excels in music, music appreciation, or both.
The HENRY PARKER MANNING MATHEMATICAL PRIZES, instituted in 1936 by annual gift, as the “Calculus Prizes,” are now paid out of the annual income of a fund established anonymously in 1949, on the ninetieth birthday of Henry Parker Manning, Brown 1863, mathematician and scholar of ancient languages. Competition is restricted to juniors.
The BISHOP MCVICKAR PRIZES were instituted in 1909 by the Rt. Rev. William Neilon McVickar, Bishop of the Protestant Episcopal Diocese of Rhode Island, 1898–1910, and are now awarded from the income of a fund established in 1923 in his memory by his sister, Miss E. C. McVickar.
The prizes are awarded for the best papers submitted under conditions designated by the Department of Religious Studies.

THE ALEXANDER MEIKLEJOHN PREMIUM IN LOGIC is paid from income of a fund established anonymously in 1951. The premium is awarded to a freshman, sophomore, or junior who excels in logic and related subjects.

THE EVA A. MOOAR PREMIUM is derived from a fund established in 1967 by the gift of Mrs. Edward M. Kanzer (Lydia W. Mason ’31) honoring Eva A. Mooar, Pembroke Dean of Admissions 1926–54. It is awarded annually to that woman student of the senior class “whose achievement over her college years gives evidence of the greatest mental growth and who has contributed to the college and to the community.”

THE WALTER JOSEPH NELSON MEMORIAL PREMIUM FOR EXCELLENCE IN MUSIC, instituted in 1957, is paid from an expendable fund given to the University by friends of the late Dr. Walter J. Nelson, Brown 1934.

THE JAMES ALDRICH PIRCE PRIZE is awarded from the income of a fund established in 1927 by Miss Florence Pierce in memory of her brother, a member of the class of 1892. The prize is currently awarded to the male undergraduate who presents the best paper in the course in Greek art and archaeology or in Greek and Roman history, these being offered in alternate years.

THE MORRIS L. POVAR PRIZE IN PHYSIOLOGY OR ZOOLOGY is awarded annually to a senior biology concentrator for outstanding academic performance and research. The prize was established in honor of Professor P ovar.

THE ROSE LOW ROME MEMORIAL PRIZE IN POETRY, paid by gift by Mrs. Peter H. Ten Eyck (Arlene B. Rome, Pembroke ’43), is awarded annually for the best poem or poems submitted to the English department by an undergraduate or graduate student.

THE SUSAN COLVER ROSENBERGER PRIZES were established in 1919 by Jesse L. Rosenberger, as a memorial to his wife, who was the daughter of Charles K. Colver, of the class of 1842. The awards are to be made under conditions to be laid down by the University.

THE ROSTROPOVICH PRIZE IN MUSIC is awarded to the outstanding graduating string musician in the Brown Orchestra.

THE ROYCE FELLOWSHIP, established by a generous gift from Charles M. Royce, ’21, recognizes undergraduates who have gained distinction for their outstanding scholarship, leadership, creativity, and service.

THE HAROLD SCHLOSBERG MEMORIAL PREMIUM IN PSYCHOLOGY is derived from income of a fund established in 1964 by the colleagues, former students, and friends of Harold Schlosberg, professor of psychology and chair of the department, 1954–1964. It is awarded annually to an outstanding senior concentrating in psychology.

THE MURIEL FAIN SHER MEMORIAL PREMIUM IN PSYCHOLOGY is derived from the income of a fund established in 1952 by the friends of Muriel Fain Sher. It is awarded annually to the most outstanding woman student in the senior class “showing the greatest promise in the field of Psychology.”

THE SUSAN ROSS STEINFIELD MEMORIAL FUND was established in 1984 by the family and friends of Susan Ross Steinfield, class of 1961. Awards from this fund are made to seniors who have contributed significantly to the performing arts during their undergraduate years.

MARGARET B. STILLWELL PRIZE awarded each year by the John Russell Bartlett Society for the best collections of books developed by undergraduates attending colleges in the state of Rhode Island. Entry forms available at the John Carter Brown Library.

THE GILBERT STUART PRIZES IN ART have been awarded since 1965, from income of the Gilbert Stuart Prize Fund, established in 1955–56 by friends of Brown University and of for creative work in art.

THE TECHNICAL ANALYSIS CORPORATION AWARDS are given annually by Dr. David M. Rosenbaum ’56, President of TAC, to an undergraduate member of Sigma Xi and Tau Beta Pi who best exemplifies the ideal of “whole person” by demonstrating excellence and initiative outside science and engineering.

THE ROHN TRUELL PREMIUM IN APPLIED MATHEMATICS is derived from income of a fund established in 1968 by friends of Rohn Truell, former professor and chair of the Division of Applied Mathematics. It is awarded annually to a member or members of the senior class concentrating in applied mathematics, who during their studies at Brown have achieved high distinction.

THE MARJORIE HARRIS WEISS MEMORIAL PREMIUM IN HISTORY is awarded annually to the outstanding undergraduate woman student majoring in history.

THE ROSAMOND WINSLOW WOODWIND PRIZE established by Mr. and Mrs. Marcellus D. Lemaire and friends of Miss Rosamond W. Lemaire, Pembroke 1961, is given on the basis of a public audition.

Advanced Awards
THE SAMUEL T. ARNOLD FELLOWSHIPS were established in 1964 by Thomas J. Watson, to 1949 and later provost of the University. The fellowships provide unusually promising seniors with a year of foreign travel and independent study following graduation.

THE HARVEY A. BAKER FELLOWSHIPS were established in memory of Harvey A. Baker, class of 1903, by his wife. These fellowships support the first year of graduate or professional study for students who “have high scholastic standings, have participated in college activities, and have shown qualities of leadership” at Brown.

THE ANNE CROSBY EMERY ALUMNAE FELLOWSHIP provides financial assistance to women in the graduating class who continue their education in professional or graduate school. The fellowship was established in 1914 by the Alumnae Association to honor Anne Crosby Emery, the second dean of the Women’s College of Brown University.

THE BERNARD ROY POLLOCK MEMORIAL PRIZE established in 1984 to honor the memory of Bernard Roy Pollock of the class of 1948, is awarded to a graduating senior, accepted at an accredited law school, who “best exemplifies the personal and professional characteristics which made Bernie Pollock an outstanding member of the communities in which he lived and worked.”

THE WILLIAM ROBERT POTTER, 1887, PREMIUM IN CHEMISTRY, was established in 1942 from income of a fund bequeathed by William R. Potter. The premium is awarded “on the basis of a thesis of highest merit submitted by a postgraduate student specializing in chemistry.”

THE BARRY JAY ROSEN PREMIUM IN MOLECULAR BIOLOGY was established in 1966 by friends and associates of Barry Jay Rosen, a graduate student at Brown from 1962–1965, who was awarded the Ph.D. degree posthumously in 1966. The premium is awarded to a graduate student for high achievement in the field of molecular biology.

THE BROWN CHAPTER OF SIGMA XI AWARD FUND was given to Brown University in 1954 by the Brown Chapter of Sigma Xi for an award toward the encouragement of science, whether for research, teaching, or otherwise.

Honorary Societies
Phi Beta Kappa

The Rhode Island Alpha of the Phi Beta Kappa Society was established at Brown University in 1830. Phi Beta Kappa seeks to reward “acquisition of liberal culture; command of cultivated expression in speech and writing; intellectual honesty and tolerance; breadth of intellectual interest; understanding not merely knowledge.” In terms of present day concerns and curricular structures, this is interpreted to mean that Phi Beta Kappa seeks to recognize, and thus to encourage, intellectual distinction among undergraduates, as attested by substantial formal evidence of outstanding academic accomplishment in the course of a broad educational experience. Excessively narrow preoccupation with any discipline or field of study may constitute grounds for disqualification even in cases of unquestionably superior academic performance. At least 40% of a candidate’s course work must be in mathematics, humanities, or the social sciences.

Election to Phi Beta Kappa is very competitive. Although not more than one-sixth of the candidates for the bachelor’s degrees (A.B. and Sc.B.)
may receive invitations to become members, in recent years no more than one-tenth of a class has generally been invited into membership.

Additional information is available at: http://www.brown.edu/Administration/Dean_of_the_College/degree/pbk.php

**Sigma Xi**

The Society of the Sigma Xi was founded in 1886 for the encouragement of original investigation in science, pure and applied. The Brown University Chapter, established in 1900, sponsors lectures in a variety of scientific disciplines during the academic year.

Nominations for membership are made by representatives of the various science departments. From the list of nominees the Board of Electors, meeting in February each year, elects those deemed eligible. This Board consists of the Chapter President, the Chapter Secretary, who acts ex-officio as Chair, and a representative from each of the following departments: Applied Mathematics, Biology and Medicine, Chemistry, Cognitive and Linguistic Sciences, Computer Sciences, Engineering, Environmental Studies, Geological Sciences, Mathematics, Neuroscience, Physics, Psychology.

To be eligible for election to membership as an undergraduate, the student must be in either the junior or senior year. To be eligible as a junior, scholastic records must fall within the top fifth of the class and as a senior the top eighth. Distinguished scholarship, while the primary requisite for admittance, is not considered the sole criterion. After the scholarship requirements have been fulfilled, the selection is based on integrity, breadth of interest both inside and outside of engineering, adaptability, and unselfish activity. An alumnus, either of Brown University or other accredited engineering schools, may be elected to membership if he or she has a proven record of character, ability, and integrity, the election still being made by the undergraduate chapter.

The Rhode Island Alpha Chapter was installed at Brown University on February 12, 1954. At the time of the installation of the chapter, in addition to the charter members, 128 alumni members were initiated, mostly alumni who would have been eligible for membership in the society had the chapter existed prior to their graduation.

**Rosenberger Medal**

The Susan Colver Rosenberger Medal of Honor is awarded by designation of the Faculty. Provision for the medal was made in 1919 by Jesse L. Rosenberger as a memorial to his wife, with the stipulation that it be used to recognize "specially notable or beneficial achievement in scholarship, in authorship, in public life of any kind, or relating to the advancement of the public welfare, or for whatever it may be thought best thus to honor and commemorate..." The recipients and years of past awards are the following:

- William Williams Keen, 1925
- Charles Evans Hughes, 1928
- John Davison Rockefeller, Jr., 1931
- Charles Value Chapin, 1935
- Mary Emma Woolley, 1937
- Fred Tarbell Field, 1940
- Henry Dexter Sharpe, 1944
- Zehariah Chafee, Jr., 1947
- Warren Randolph Burgess, 1953
- Rowland Roberts Hughes, 1955
- Theodore Francis Green, 1956
- Alexander Meiklejohn, 1959
- Waldo Gifford Leland, 1965
- Thomas John Watson, Jr., 1968
- Henry Merritt Wriston, 1976
- Richard Salomon, 1982
- Charles Carpenter Tillinghast, Jr., 1982
- Howard Robert Sweater, 1983
- Otto Eduard Neugebauer, 1987
- Roderick Milton Chisholm, 1992
- Vartan Gregorian, 1997
- Sheila E. Blumstein, 2001
- Artemis A.W. Joukowsky, 2005
- Martha Sharp Joukowsky, 2005
- Ciaiborne deBorda Pell, 2006
- Stephen Robert, 2007
- Charles C. J. Carpenter, 2009
- Ruth J. Simmons, 2011

**Honorary Degrees Conferred by the University**

Prior records of honorary degree recipients are listed in archived University Bulletins

**Commencement May 29, 2011**

- Arianna Huffington, Doctor of Humane Letters
- Katie King Crowley ’97, Doctor of Humane Letters
- Nicholas D. Kristof, Doctor of Letters
- David B. Mumford, Doctor of Science
- John J. Nicholson, Doctor of Fine Arts
- Lynn Ida Nottage ’86, Doctor of Fine Arts
- Lisa Randall, Doctor of Science
- Kenneth Roth ’77, Doctor of Humane Letters
- David R. Scott, Doctor of Science
- Zhao Zhenkai (Bei Dao), Doctor of Letters

**October 21, 2011**

- Herbert M. Kaplan, Doctor of Humane Letters

**Commencement May 27, 2012**

- Carolyn Bertozzi, Doctor of Science
- Viola Davis, Doctor of Fine Arts
- John Robert Lewis, Doctor of Laws
- Marilyne Summers Robinson, Doctor of Letters
- Sebastian A. Ruth, Doctor of Music
- Diane Sawyer, Doctor of Letters
- Gene Sharp, Doctor of Humane Letters
- Ruth J. Simmons, Doctor of Humane Letters
- Wei Yang, Doctor of Science
The Brown Alumni Association

Board of Governors 2011-2013

Elected Officers

• President, George H. Billings ’72, Massachusetts
• President-Elect, Nancy Chick Hyde ’80, Massachusetts
• Secretary, Cristina Sales ’90, Virginia
• Treasurer, Clare Borschlein Hare ’81, Connecticut

BAA Board & Committee Chairs

2014/250th Anniversary: Nancy Chick Hyde ’80 (MA)
Brown Clubs: Anthony Cheng ’95, Jacqui Hogans ’03 (CA, NY)
Maddock Alumni Center: Ken McDaniel ’69 (RI)
Multicultural Alumni: Cris Sales ’90, Ellen Hunter ’04 (VA, GA)
Resources: Clare Hare ’81 (CT)
Social Networking and New Media: Ben Arno ’79 (NY)

Members

• Pamela Arya ’84 (VA)
• Elizabeth Cho ’01 ’02 A.M. (NY)
• Eric De Los Santos ’89 (WA)
• Eric Egan ’90 (Italy)
• Jeffry Esquivel ’09 (RI)
• Robert Greenglass ’07 (MA)
• Mark Hauser ’77 (MA)
• Galen Henderson MD ’93 (MA)
• Renee Inomata ’87 (MA)
• Zachary Langway ’09 (DC)
• Brian Lopez ’00 (NY)
• Katherine Melchior Ray ’85 (OR)
• Seneca Mudd ’93 (NY)
• Valerie Phillips ’98 (NY)
• M. Rodney Robinson ’90 (IL)
• Judith Sanford-Harris ’74 (MA)

Ex-officio Members

Brown Annual Fund: E. Robert Lupone ’81 (CT)
Brown Alumni Magazine: TBA
Brown Medical Alumni Association: Michelle Ginsberg ’87, ’90 MD (NY)
Brown University Sports Foundation: Allison Galer ’11 (CA)
Pembroke Center Associates Council: Phyllis Kollmer Santry ’66 (NY)
Class of 2012 Co-Presidents: Meera Chappidi ’12 (NY) and Imani Tisdale ’12 (CT)

The above Listing is as of 08/2012. For additional information regarding the Brown Alumni Association please visit: http://alumni.brown.edu/about/
