This bulletin is intended to provide only general information concerning Brown University and is not in any manner contractually binding. The information contained herein is subject to revision and change at any time.

EQUAL OPPORTUNITY AND NONDISCRIMINATION

Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, or sexual orientation in the administration of its educational policies, admission policies, scholarship and loan programs, or other school-administered programs.

CORRESPONDENCE

The general mailing address for the University is Brown University, Providence, Rhode Island 02912. Correspondence sent to that address may be expected to reach the proper department, but, in order to avoid delay, information and inquiries concerning the items below should be addressed as noted. Addresses for other offices are available on the World Wide Web at www.brown.edu.

Foreword

Brown University is a leading Ivy League institution and the only major research university in the nation where undergraduates are the architects of their own course of study. Brown is distinguished by its unique undergraduate academic program, a world-class faculty, outstanding graduate and medical students, and a tradition of innovative and rigorous multidisciplinary study.

The University’s mission—to serve the community, the nation, and the world by educating and preparing students (in the words of the College charter) to “discharge the offices of life with usefulness and reputation”—is fulfilled through a strong partnership of students and teachers.

The seventh oldest university in America, Brown was established in 1764 as Rhode Island College in the town of Warren, Rhode Island, and enrolled its first student in 1765. In 1770 the College moved to its present location, and in 1804 it was renamed Brown University to honor a $5,000 donation from local merchant Nicholas Brown. Today the University’s main campus covers nearly 140 acres on a historic residential hill overlooking downtown Providence, a vibrant city of some 170,000 people and the capital of Rhode Island.

Brown draws men and women from all over the United States and many other countries. Distinguished by their academic excellence, creativity, self-direction, leadership, and faculty known for its prize-winning multidisciplinary scholarship and dedication to teaching. By providing a rich undergraduate experience together with strong graduate and medical programs, the University fosters internal and external discovery at every level of the academic enterprise.

Brown is internationally known for its dynamic undergraduate curriculum, implemented by faculty vote in 1969. Undergraduates must pass 30 courses and complete the requirements for a concentration, or major, in order to receive a bachelor’s degree. The curriculum does not require distribution or core courses outside the concentration. More than 2,000 undergraduate courses support just under 80 concentrations, many of them interdisciplinary, and a wide variety of independent studies.

At the heart of the Brown curriculum are three basic principles: that students are active participants in learning; that acquiring analytical and critical skills is as important as mastering factual knowledge; and that learning requires opportunities for experimentation and cross-disciplinary synthesis.

The Graduate School at Brown is a national leader in the creation and dissemination of new knowledge. In 2003, Brown celebrated the centennial of the Graduate Department, formally established in 1903 to confer advanced degrees.

The Warren Alpert Medical School, which awarded its first M.D. degrees in 1975, is renowned for innovation in medical education and for its programs in family medicine and primary care. The Warren Alpert Medical School now enrolls some 400 students, most of whom are accepted through Brown’s unique Program in Liberal Medical Education (PLME), which combines undergraduate study with professional studies in medicine.

Beginning in 2002, fortified by vigorous leadership, prudent planning, and new ideas, the University launched an exciting program for academic enrichment to enlarge its faculty by 100 members over the next five to ten years, improve support for graduate students, and invest in libraries, information technology, and academic facilities. As part of this extensive program of improvements, the University instituted a need-blind undergraduate admission process to ensure all worthy applicants access to the University, regardless of their ability to pay.

Brown University is accredited by the New England Association of Schools and Colleges. In addition, the Warren Alpert Medical School is accredited by the Liaison Committee on Medical Education. The School of Engineering has received accreditation from the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for its bachelor of science programs in civil, chemical, electrical, materials, and mechanical engineering.

Academic Freedom

Consonant with Brown’s tradition concerning academic freedom, the faculty and Corporation, in 1966, adopted the following statement of principles:

Academic freedom is essential to the function of education and to the pursuit of scholarship in universities.

Therefore, Brown University, mindful of its historic commitment to scholarship and to the free exchange of ideas, affirms that faculty and students alike shall enjoy full freedom in their teaching, learning, and research.

Brown University also affirms that faculty and students shall have freedom of religious belief, of speech, of press, of association and assembly, of political activity inside and outside the University, the right to petition the authorities, public and university, to invite speakers of their choice to the campus, and that students and faculty as such should not be required to take any oath not required of other citizens. The time, place, and manner of exercising these rights on campus shall be subject to reasonable regulation only to prevent interference with the normal functions of the University.

Nondiscrimination Policy

Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, sexual orientation, gender identity or gender expression, in administration of its educational policies, admissions policies, scholarship and loan programs, or other school-administered programs.

The Family Educational Rights and Privacy Act of 1974

The Family Educational Rights and Privacy Act of 1974 (P.L. 93–380) extends to a student the right of access to his or her education records maintained at the University. Education records are those records maintained by or for Brown University that directly relate to an individual who is or has been in attendance (enrolled) at Brown University and for whom Brown maintains educational records. Information and notification as to the type of record; the accessibility of and policies for maintaining, reviewing and expunging the record; and the procedure for inspecting, reviewing, obtaining copies of, or challenging the record are established and promulgated by the appropriate executive officers. Further information may be obtained on the Office of the Registrar’s website (http://www.brown.edu/Administration/Registrar/guidelines/records/info_rights.html).

Faculty

This information is provided by the Office of the Dean of the Faculty and is current as of 08/2012.

Roy K. Aaron
Professor of Orthopaedics; Professor of Molecular Pharmacology, Physiology and Biotechnology
Christopher A. Abadi
Clinical Assistant Professor in Medicine
Beau Abar
Assistant Professor of Pediatrics (Research)
Cristina Abbona-Sneider
Senior Lecturer in Italian Studies
Brian G. Abbott
Associate Professor of Medicine (Clinical)
Gerald F. Abbott
Adjunct Associate Professor of Diagnostic Imaging
J. Dawn Abbott
Associate Professor of Medicine
Edward W. Aberger
Clinical Assistant Professor in Health Services, Policy and Practice
Ruhul Abid
Assistant Professor of Surgery (Research)
Dan Abramovich
Professor of Mathematics
Ana M. Abrantes
Assistant Professor of Psychiatry and Human Behavior (Research)
Nicole Abrunzo
Clinical Instructor in Pediatrics
J. Gary Abuelo
Associate Professor of Medicine
Muhammed A. Abu-Hijleh
Associate Professor of Medicine (Clinical)
Christine Acebo
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
Juan C. Aceros
Senior Research Associate in Engineering
Chinua Achebe
David and Marianna Fisher University Professor
Felicia Nimue Ackerman
Professor of Philosophy
Charles A. Adams
Associate Professor of Surgery (Trauma)
Eli Y. Adashi
Professor of Medical Science
Oludurotimi O. Adetunji
Adjunct Assistant Professor of Physics
Ruth Adler Ben Yehuda
Senior Lecturer in Judaic Studies
Alyn L. Adrain
Clinical Assistant Professor in Medicine
Kailash C. Agarwal
Professor Emeritus of Medical Science (Research)
Edward James Ahearn
University Professor Emeritus of Comparative Literature and French Studies
Khaja Ahmed
Clinical Associate Professor in Medicine
Sun Ho Ahn
Assistant Professor of Diagnostic Imaging (Clinical)

Jeremy T. Aidlen
Assistant Professor of Surgery; Assistant Professor of Pediatrics
Mark Ainsworth
Professor of Applied Mathematics
Carlos Aizenman-Stern
Associate Professor of Neuroscience
Anna Aizer
Associate Professor of Economics; Associate Professor of Public Policy
Engin D. Akarli
Professor Emeritus of History
Edward A. Akelman
Professor of Orthopaedics
Paul A. Akerman
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Surgery

Angela C. Anderson
Associate Professor of Pediatrics (Clinical); Associate Professor of Emergency Medicine (Clinical)

Brenna L. Anderson
Associate Professor of Obstetrics and Gynecology

Douglas D. Anderson
Professor of Anthropology

James A. Anderson
Professor of Cognitive, Linguistic, and Psychological Sciences

Wanni W. Anderson
Adjunct Professor of Anthropology (Research)

Claire Andrade-Watkin
Visiting Scholar in Race and Ethnicity in America

Peter R. Andreas
Professor of Political Science and International Studies

Diane J. Angelini
Clinical Professor in Obstetrics and Gynecology

Marla Cathleen Angermeier
Clinical Associate Professor in Dermatology

Sarah Anis
Clinical Instructor in Surgery (Ophthalmology)

David C. Anthony
Assistant Professor of Family Medicine

Douglas Anthony
Professor of Pathology and Laboratory Medicine

Jennifer L. Anthony
Clinical Assistant Professor in Psychiatry and Human Behavior

George A. Antonelli
Adjunct Assistant Professor of Physics (Research)

Iraj Anvar
Visiting Lecturer in Language Studies

Michelle Stozek Anvar
Assistant Professor of Medicine (Clinical)

Timothy R. Apodaca
Adjunct Associate Professor of Behavioral and Social Sciences

Rex W. Appenfeller
Clinical Assistant Professor in Medicine

Denise M. Arcand
Clinical Assistant Professor in Family Medicine

Michel A. Arcand
Clinical Instructor in Orthopaedics

Richard C. Archambault
Clinical Assistant Professor in Psychiatry and Human Behavior

Andrea E. Arena
Clinical Assistant Professor in Family Medicine

Richard A. Arenberg
Adjunct Lecturer in Public Policy

Irina Arkhipova
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Michael Arney
Assistant Professor of Psychiatry and Human Behavior (Research)

Paul B. Armstrong
Professor of English

Kenneth A. Arndt
Adjunct Professor of Dermatology

Mary B. Arnold
Associate Professor Emerita of Pediatrics

Stanley Maynard Aronson
Professor Emeritus of Health Services, Policy and Practice

Nomy Arpaly
Associate Professor of Philosophy

James A. Arrighi
Associate Professor of Medicine; Associate Professor of Diagnostic Imaging

Andrew W. Artenstein
Professor of Medicine; Professor of Health Services, Policy and Practice

Thanumalaya Arumugam
Clinical Instructor in Medicine

Jose Arvizu
Clinical Assistant Professor in Psychiatry and Human Behavior

Wael Asaad
Assistant Professor of Neurosurgery

Saba Asad
Clinical Instructor in Medicine

David Ashley
Clinical Assistant Professor in Family Medicine

Daniel K. Asiedu
Clinical Instructor in Medicine

Kathleen Askland
Assistant Professor of Psychiatry and Human Behavior

Karen E. Aspy
Assistant Professor of Medicine (Clinical)
Annalouise R. Assaf  
Adjunct Professor of Health Services, Policy and Practice

Sandol E. Astrausky  
Teaching Associate in Music

Bassam I. Aswad  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Michael K. Atalay  
Associate Professor of Diagnostic Imaging; Associate Professor of Medicine

Nisrine I. Atieh  
Assistant Professor of Pediatrics (Clinical)

Ayman Attia Alla  
Clinical Instructor in Medicine

Naureen Attiullah  
Clinical Assistant Professor in Psychiatry and Human Behavior

Walter J. Atwood  
Professor of Medical Science

Geri M. Augusto  
Visiting Associate Professor of Africana Studies

Jeffrey Austerlitz  
Clinical Assistant Professor in Medicine

Gregory James Austin  
Clinical Assistant Professor in Family Medicine

Alfred Ayala  
Professor of Surgery (Research)(Trauma)

Marouz Azar  
Assistant Professor of Medicine

Ariella Azoulay  
Assistant Professor of Modern Culture and Media and Comparative Literature

Kimberly S. Babb  
Clinical Instructor in Medicine; Clinical Instructor in Pediatrics

Timothy Babineau  
Professor of Surgery (Clinical)

Kavita M. Babu  
Assistant Professor of Emergency Medicine

Angelo Baca  
Visiting Lecturer in Race and Ethnicity in America

Michelle R. Bach-Coulibaly  
Senior Lecturer in Theatre Arts

James M. Badger  
Clinical Assistant Professor in Psychiatry and Human Behavior

David Badre  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Gwi-Young Bae  
Visiting Scholar in Theatre Arts

Ruth Iris Bahar  
Professor of Engineering

Robert L. Bahr  
Clinical Assistant Professor in Surgery (Ophthalmology)

David Baier  
Adjunct Assistant Professor of Ecology and Evolutionary Biology

Genie L. Bailey  
Clinical Assistant Professor in Psychiatry and Human Behavior

Gianpaoilo Baiocchi  
Associate Professor of Sociology and International Studies

James C. Baird  
Professor Emeritus of Chemistry

Janette Baird  
Assistant Professor of Emergency Medicine (Research)

James Marshall Baker  
Professor of Music

Richard E. Baker Jr  
Clinical Assistant Professor in Surgery

Elizabeth A. Bakewell  
Assistant Professor of Latin American and Caribbean Studies (Research)

Cornel Ban  
Post-Doctoral Fellow in International Studies

Thomas F. Banchoff  
Professor of Mathematics

Utpala Bandyopadhyay  
Clinical Assistant Professor in Health Services, Policy and Practice

Priya Banerjee  
Clinical Assistant Professor in Pathology and Laboratory Medicine

Mohammad Banki  
Clinical Instructor in Surgery

Magdalena Baranowska  
Teaching Associate in Hispanic Studies

Marilyn M. Barbour  
Adjunct Associate Professor of Medicine

Barbara E. Barker  
Associate Professor of Pathology and Laboratory Medicine

Gilad Barnea  
Assistant Professor of Neuroscience

LaShonda Katrice Barnett  
Visiting Scholar in Africana Studies

Nancy P. Barnett  
Associate Professor of Behavioral and Social Sciences (Research)

Anthony J. Barone III  
Clinical Assistant Professor in Surgery (Otolaryngology)

David Barrall  
Clinical Assistant Professor in Surgery (Plastic Surgery)

Steven Barreto  
Clinical Assistant Professor in Psychiatry and Human Behavior

Rowland P. Barrett  
Associate Professor of Psychiatry and Human Behavior

Christine E. Barron  
Associate Professor of Pediatrics (Clinical)

Thomas Benedict Bartnikas  
Assistant Professor of Pathology and Laboratory Medicine

Omer Bartov  
John P. Birckelund Distinguished Professor of European History

Jay M. Baruch  
Assistant Professor of Emergency Medicine

Francis Basile  
Clinical Associate Professor in Medicine

Orazio J. Basile  
Clinical Assistant Professor in Dermatology

Laura R. Bass  
Associate Professor of Hispanic Studies; Associate Professor of History of Art and Architecture

William C. Bastan  
Clinical Instructor in Pathology and Laboratory Medicine

Amil Basu  
Associate Professor of Chemistry

Kim A. Basu  
Clinical Instructor in Medicine

Kevin G. Bath  
Assistant Professor of Neuroscience (Research)

Dalia L. Batista  
Clinical Assistant Professor in Pediatrics

Kerri L. Batra  
Assistant Professor of Medicine
Cynthia Battle
Assistant Professor of Psychiatry and Human Behavior (Research)
Beth W. Bauer
Senior Lecturer in Hispanic Studies
Cici Bauer
Assistant Professor of Biostatistics
Jeeyang Rhee Baum
Visiting Lecturer in Political Science
Carol L. Baum-Gupta
Assistant Professor of Pediatrics (Clinical)
Nathaniel Baum-Snow
Associate Professor of Economics; Associate Professor of Urban Studies
Ana Baylin
Adjunct Assistant Professor of Epidemiology
George P. Bayliss
Assistant Professor of Medicine
Carthene R. Bazemore-Walker
Assistant Professor of Chemistry
Alexander T. Bazilevskiy
Visiting Professor of Geological Sciences
Peter Baziotis
Clinical Assistant Professor in Surgery (Anesthesiology)
Samuel I. Beale
Professor Emeritus of Biology
Mark F. Bear
Adjunct Professor of Brain and Neural Systems (Research)
Francesca L. Beaudoin
Assistant Professor of Emergency Medicine
Bruce M. Becker
Professor of Emergency Medicine; Professor of Behavioral and Social Sciences
Sara Becker
Assistant Professor of Psychiatry and Human Behavior (Research)
Tanya J. Becker
Clinical Assistant Professor in Pediatrics
Curt G. Beckwith
Associate Professor of Medicine
Patrick Bedard
Assistant Professor of Neuroscience (Research)
Megan E. Beers
Assistant Professor of Psychiatry and Human Behavior (Clinical)
Jose Behar
Professor of Medicine
Vikram Behera
Clinical Instructor in Medicine
M. David Betle
Clinical Assistant Professor in Obstetrics and Gynecology
Michael D. Beland
Assistant Professor of Diagnostic Imaging
Michael J. Belanger
Clinical Instructor in Orthopaedics
Christina Bellanti
Clinical Assistant Professor in Psychiatry and Human Behavior
Arkady Belozovsky
Lecturer in Language Studies
Irene Belsky
Clinical Assistant Professor in Family Medicine
G. Jesse Bender
Assistant Professor of Pediatrics
Judith L. Bender
Professor of Biology
Denis Beneich
Teaching Associate in French Studies
David J. Bennett
Visiting Scholar in Philosophy
Jabbar R. Bennett
Clinical Assistant Professor in Medicine
Richard J. Bennett
Associate Professor of Medical Science
Reda Bensmaia
University Professor Emeritus of French Studies and Comparative Literature
Judith D. Bentkover
Adjunct Professor of Health Services, Policy and Practice
Adia Benton
Assistant Professor of Anthropology
Jacques Benun
Clinical Associate Professor in Pediatrics
Scott E. Benzuly
Clinical Assistant Professor in Surgery (Anesthesiology)
Nathan Barry Beraha
Clinical Assistant Professor in Pediatrics
Lionel Bercovitch
Professor of Dermatology
Stephen Berenson
Clinical Professor in Theatre Arts
J. Roderic Beresford
Professor of Engineering
Alexander Berezin
Clinical Assistant Professor in Surgery (Anesthesiology)
Geoffrey H. Berg
Clinical Instructor in Medicine
Eric E. Berger
Clinical Assistant Professor in Medicine
Jacob R. Berger
Assistant Professor of Neurology (Clinical)
Katherine Bergeron
Professor of Music
Amaldo Berges
Clinical Assistant Professor in Psychiatry and Human Behavior
Kristina Berglund
Clinical Instructor in Medicine
Mary Bergstein
Adjunct Professor of Italian Studies
Seth F. Berkley
Adjunct Professor of Medicine
Nathaniel A. Berman
Rahel Varnhagen Professor of International Affairs, Law, and Modern Culture
Amir B. Bernaba
Clinical Instructor in Emergency Medicine
Douglas B. Bernon
Clinical Assistant Professor in Psychiatry and Human Behavior
Scott David Berns
Clinical Professor in Pediatrics
Wesley H. Bernskoetter
Manning Assistant Professor of Chemistry
Paul Bernstein
Clinical Instructor in Neurosurgery
Susan Bernstein
Professor of Comparative Literature; Professor of German Studies
Robert Berry
Associate Professor of Obstetrics and Gynecology (Clinical)
David M. Berson
Sidney A. Fox and Dorothea Fox Professorship of Ophthalmology and Visual Science
Arthur A. Bert
Clinical Professor in Surgery (Anesthesiology)
John J. Bert
Clinical Assistant Professor in Obstetrics and Gynecology
Richard G. Bertini
Clinical Assistant Professor Emeritus in Orthopaedics
Jonathan M. Bertman
Clinical Assistant Professor in Family Medicine
Mark D. Bertness
Robert P. Brown Professor of Biology
Richard W. Besdine
David S. Greer M.D. Professor of Geriatric Medicine
Laurel D. Bestock
Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies
Jack R. Bevivino
Clinical Assistant Professor in Surgery
Timothy R. T. Bewes
Professor of English
Christina A. Beyer
Clinical Instructor in Medicine
Michael A. Bharier
Clinical Assistant Professor in Dermatology
Hankrashna Bhatt
Assistant Professor of Medicine (Clinical)
Piero Biancani
Professor Emeritus of Medicine (Research)
Cesario Bianchi
Associate Professor of Surgery (Research)
Roberta Bickford
Professor Emerita of History of Art and Architecture
L. Cinnamon Bidwell
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Behavioral and Social Sciences (Research)
Lucien J. E. Bienenstock
Associate Professor of Applied Mathematics and Neuroscience
Rosemarie Bigsby
Clinical Associate Professor in Pediatrics
William D. Binder
Clinical Instructor in Emergency Medicine
Briannan E. Bintz
Adjunct Assistant Professor of Pathology and Laboratory Medicine
Elizabeth M. Bird
Assistant Professor of Pediatrics
Ariel Birnbaum
Assistant Professor of Medicine
Christine Anne Biron
Esther Elizabeth Brintzenhoff Professor of Medical Science
Daniel J. Bisaccio
Lecturer in Education
Michael J. Black
Adjunct Professor of Computer Science (Research)
Karen Blackmer
Clinical Assistant Professor in Family Medicine
Brian S. Blais
Adjunct Associate Professor of Brain Science (Research)
Dawna A. Blake
Clinical Assistant Professor in Medicine
Karyn K. Blane
Clinical Assistant Professor in Psychiatry and Human Behavior
Mutlu Konuk Blasing
Professor of English
Joaquin Blaum
Assistant Professor of Economics
Steven L. Blazar
Clinical Assistant Professor in Orthopaedics
Douglas L. Blecker
Clinical Instructor in Medicine
Thomas A. Bledsoe
Clinical Associate Professor in Medicine
Karine Bligny-Bollinger
Teaching Associate in French Studies
Cynthia Bliss
Clinical Instructor in Pediatrics
Joseph M. Bliss
Associate Professor of Pediatrics
Thomas F. Bliss
Clinical Assistant Professor in Orthopaedics
Eve Block
Clinical Assistant Professor in Medicine
Stanley Hoyt Block
Clinical Associate Professor in Pediatrics
Andrew S. Blum
Associate Professor of Neurology
Roger B. Blumberg
Adjunct Lecturer in Computer Science
Janet A. Blume
Associate Professor of Engineering
Sheila E. Blumstein
Albert D. Mead Professor of Cognitive, Linguistic and Psychological Sciences
Mark M. Blyth
Professor of Political Science and International Studies
Pamela Boachieho
Assistant Professor of Psychiatry and Human Behavior (Clinical)
Beth C. Bock
Professor of Psychiatry and Human Behavior (Research)
John P. Bodel
W. Duncan MacMillan II Professor of Classics
Deborah Boedeker
Professor Emerita of Classics
John R. Boekamp
Clinical Assistant Professor in Psychiatry and Human Behavior
Kim Boekelheide
Professor of Medical Science
Daniela Boerescu
Clinical Assistant Professor in Psychiatry and Human Behavior
Julie Boergers
Associate Professor of Psychiatry and Human Behavior (Clinical); Associate Professor of Pediatrics (Clinical)
Theodore Bogosian
Visiting Scholar in International Studies
Barrymore A. Boggess
Harmon Family Professor of Africana Studies
Robert J. Boland
Professor of Psychiatry and Human Behavior
Madeleine Therese Bollenot
Teaching Associate in French Studies
Dale S. Bond
Assistant Professor of Psychiatry and Human Behavior (Research)
Sheila Bonde  
Professor of History of Art and Architecture; Professor of Archaeology and the Ancient World

Charlotte M. Boney  
Professor of Pediatrics

Alice E. Bonitati  
Associate Professor of Medicine (Clinical)

M. Christopher Borden  
Clinical Assistant Professor in Psychiatry and Human Behavior

Bruno Borenstein  
Clinical Assistant Professor Emeritus in Medicine

Jeffrey Borkan  
Professor of Family Medicine

Christopher T. Born  
Intrepid Heroes Professor of Orthopedic Surgery

Belinda Borrelli  
Professor of Psychiatry and Human Behavior (Research)

Brian E. Borsari  
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

George Herbert Borts  
George S. and Nancy B. Parker Professor of Economics

Michel-Andre R. Bossy  
Professor Emeritus of French Studies

Andrew G. Bostom  
Associate Professor of Medicine

Leslie A. Bostrom  
Professor of Visual Art

Paul J. Botelho  
Clinical Assistant Professor in Surgery (Ophthalmology)

Ghada Bourjeily  
Assistant Professor of Medicine

David B. Bouslough  
Clinical Assistant Professor in Emergency Medicine

Lawrence P. Bowen  
Clinical Assistant Professor in Surgery (Plastic Surgery)

Wayne D. Bowen  
Upjohn Professor of Pharmacology

Thomas Bowen Coburn  
Visiting Scholar in Religious Studies

Allan Francis Bower  
Royce Family Professor in Teaching Excellence and Professor of Engineering

Lisa D. Bowie  
Clinical Assistant Professor in Family Medicine

Kipp L. Bradford  
Lecturer in Engineering

Kathleen Cote Bowling  
Clinical Associate Professor in Obstetrics and Gynecology

Jerrold L. Boxerman  
Assistant Professor of Diagnostic Imaging

George K. Boyd  
Clinical Associate Professor Emeritus in Pediatrics

Kathleen A. Boyd  
Teaching Associate in Music

Jennifer M. Boyle  
Clinical Assistant Professor in Obstetrics and Gynecology

Lisa D. Boyle  
Clinical Assistant Professor in Obstetrics and Gynecology

Michelle A. Boyle  
Clinical Assistant Professor in Family Medicine

William Braden  
Clinical Assistant Professor in Psychiatry and Human Behavior

Kathleen A. Boyd  
Teaching Associate in Music

Dror Brenner  
Lecturer in Economics

Patricia A. Bresky  
Clinical Assistant Professor in Psychiatry and Human Behavior

Tracy Breton  
Visiting Professor of English

Corey L. Bretschneider  
Professor of Political Science

Kenneth S. Breuer  
Professor of Engineering; Professor of Ecology and Evolutionary Biology

Clyde L. Briant  
Otis Everett Randall University Professor of Engineering

Steven C. Brin  
Clinical Assistant Professor in Medicine

Deborah Elaine Brit  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Willoughby B. Britton  
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Behavioral and Social Sciences (Research)

Justin Broackes  
Professor of Philosophy

Jeffrey F. Brock  
Professor of Mathematics

Alexander S. Brodsky  
Assistant Professor of Medical Science

Cheryl Brodsky  
Clinical Assistant Professor in Obstetrics and Gynecology

Jeffrey M. Brody  
Associate Professor of Diagnostic Imaging (Clinical)
Julia G. Brody  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Richard Brody  
Clinical Assistant Professor in Family Medicine

Cynthia J. Brokaw  
Professor of History

Reinier Broker  
Visiting Assistant Professor of Mathematics

Fred A. Brosco  
Clinical Assistant Professor in Obstetrics and Gynecology

Laurent Brossay  
Associate Professor of Medical Science

E. Christine Brousseau  
Clinical Assistant Professor in Obstetrics and Gynecology

Daniel C. Brown  
Clinical Assistant Professor in Family Medicine

Edward M. Brown  
Clinical Associate Professor in Psychiatry and Human Behavior

Gail R. Brown  
Clinical Assistant Professor in Pediatrics

Joanna D. Brown  
Clinical Assistant Professor in Family Medicine

Larry K. Brown  
Professor of Psychiatry and Human Behavior

Linda L. Brown  
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics

Phil Brown  
Adjunct Professor of Pathology and Laboratory Medicine

Richard A. Brown  
Professor of Psychiatry and Human Behavior

Steven A. Brown  
Clinical Assistant Professor in Surgery (Oral & Maxillofacial Surgery)

Walter A. Brown  
Clinical Professor in Psychiatry and Human Behavior

William D. Brown  
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)

Richard A. Browning  
Clinical Professor in Surgery (Anesthesiology)

Hugo Bruggeman  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences (Research)

Palmina Brummell  
Visiting Professor of History

Elizabeth Johnson Bryan  
Associate Professor of English

Richard G. Bryan  
Clinical Assistant Professor in Surgery (Ophthalmology)

Margaret Hanson Bublitz  
Instructor in Psychiatry and Human Behavior (Research)

Gary Bubly  
Clinical Associate Professor in Emergency Medicine; Clinical Associate Professor in Medicine

David Buchta  
Lecturer in Classics

Jennifer Buckley  
Clinical Instructor in Family Medicine

Maria L. Buckley  
Clinical Assistant Professor in Psychiatry and Human Behavior

George B. Buczko  
Clinical Associate Professor in Surgery (Anesthesiology)

Mari Jo Buhle  
Professor Emerita of American Studies

Stephen L. Buka  
Professor of Epidemiology

Christopher Bull  
Senior Lecturer in Engineering

David Bullard  
Assistant Professor of Emergency Medicine (Clinical)

Richard D. Bungiro  
Lecturer in Biology

Jasmina Burdzovic Andreas  
Assistant Professor of Epidemiology (Research)

Frederick W. Burgess  
Clinical Professor in Surgery (Anesthesiology)

Katrina Burgess  
Visiting Scholar in International Studies

Robert T. Burke  
Associate Professor of Pediatrics (Clinical)

Nancy J. Burnside  
Assistant Professor of Dermatology (Clinical)

Jeffrey M. Burock  
Clinical Assistant Professor in Psychiatry and Human Behavior

James Burrell  
Clinical Associate Professor in Psychiatry and Human Behavior

Stuart Burrows  
Associate Professor of English

Douglas M. Burtt  
Clinical Assistant Professor in Medicine

Rebecca D. Burwell  
Professor of Cognitive, Linguistic, and Psychological Sciences

Andrew M. Busch  
Assistant Professor of Psychiatry and Human Behavior (Research)

Stephen S. Bush  
Assistant Professor of Religious Studies

Amy Turner Bushnell  
Adjunct Associate Professor of History

John E. Buster  
Professor of Obstetrics and Gynecology

James Butera  
Clinical Associate Professor in Medicine

Melissa Anne Buttarro  
Clinical Assistant Professor in Psychiatry and Human Behavior

William M. Buttnner  
Clinical Assistant Professor in Family Medicine

Claudia S. R. Cabrera  
Adjunct Assistant Professor of Medicine

Blake Cady  
Professor Emeritus of Surgery

Richard E. Caesar  
Clinical Instructor in Surgery (Urology)

Deborah Cahill  
Clinical Assistant Professor in Surgery (Anesthesiology)

John D. Cahill  
Adjunct Assistant Professor of Emergency Medicine

Jonathan F. Cahill  
Assistant Professor of Neurology (Clinical)

Terrence F. Cahill  
Clinical Associate Professor in Pediatrics and Gynecology

Joseph M. Caiati  
Clinical Assistant Professor in Surgery (Anesthesiology)
Rachel L. Caiati
Assistant Professor of Diagnostic Imaging

Anthony Angelo Caldamone
Professor of Surgery (Urology); Professor of Pediatrics (Urology)

Nicholas A. Califano
Clinical Associate Professor in Medicine

Joseph F. Callaghan
Clinical Assistant Professor Emeritus in Surgery (Urology)

Charles M. Callahan
Assistant Professor of Emergency Medicine (Clinical)

Keith Callahan
Clinical Assistant Professor in Family Medicine

Joseph M. Calo
Professor Emeritus of Engineering

Carlos Camargo
Adjunct Associate Professor of Pediatrics

Melani C. Cammett
Associate Professor of Political Science

Karen T. Cammuso
Clinical Assistant Professor in Psychiatry and Human Behavior

Christopher A. Campagnari
Clinical Assistant Professor in Family Medicine

Christopher P. Campanile
Clinical Associate Professor in Family Medicine

Andrew G. Campbell
Associate Professor of Medical Science

David E. Cane
Vernon K. Krieble Professor of Chemistry

Jacob A. Canick
Professor of Pathology and Laboratory Medicine

Anthony J. Cannistra
Clinical Assistant Professor in Medicine

Lauralyn B. Cannistra
Clinical Associate Professor in Medicine

Wanrong Cao
Visiting Associate Professor of Applied Mathematics (Research)

Weibiao Cao
Assistant Professor of Medicine (Research); Assistant Professor of Pathology and Laboratory Medicine (Research)

Carmine J. Capalbo
Clinical Associate Professor Emeritus in Surgery

Christy Capone
Assistant Professor of Psychiatry and Human Behavior

Geoffrey Capraro
Assistant Professor of Emergency Medicine

Cassandra L. Carberry
Assistant Professor of Obstetrics and Gynecology (Clinical)

David A. Carcieri
Clinical Assistant Professor in Obstetrics and Gynecology

Esteban V. Cardemil
Adjunct Associate Professor of Psychiatry and Human Behavior

Zoe G. Caron
Professor of Geological Sciences (MBL)

Chelsy Caren
Assistant Professor of Obstetrics and Gynecology (Clinical)

Claude Carey
Associate Professor of Slavic Languages

Kate B. Carey
Professor of Behavioral and Social Sciences

Michael Carey
Professor of Psychiatry and Human Behavior; Professor of Behavioral and Social Sciences

Gerardo P. Carino
Assistant Professor of Medicine

Lynn Carlson
Lecturer in Geological Sciences

Robert A. Carnevale
Clinical Associate Professor in Medicine

Kathleen Carney-Godley
Clinical Assistant Professor in Dermatology

Wilfred I. Carney Jr
Clinical Associate Professor in Surgery

Mark Carol
Adjunct Assistant Professor of Radiation Oncology

Colleen M. Caron
Clinical Assistant Professor in Epidemiology

Charles C. J. Carpenter
Professor of Medicine

Linda L. Carpenter
Professor of Psychiatry and Human Behavior

Stephen R. Carr
Professor of Obstetrics and Gynecology

Mary A. Caruskadon
Professor of Psychiatry and Human Behavior

David P. Carter
Clinical Associate Professor in Family Medicine

E. Jane Carter
Associate Professor of Medicine

Joseph E. Caruolo
Clinical Assistant Professor Emeritus in Surgery

Angelina C. A. Carvalho
Professor Emerita of Medicine

Brady G. Case
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Health Services, Policy and Practice (Research)

Sarah Case
Assistant Professor of Emergency Medicine (Clinical)

Leslie E. Cashel
Clinical Instructor in Medicine

William J. Cashore
Professor of Pediatrics

Melinda A. Caskey
Assistant Professor of Pediatrics

Brian P. Casserly
Adjunct Assistant Professor of Medicine

John Cassese
Assistant Professor of Diagnostic Imaging (Clinical); Assistant Professor of Pediatrics (Clinical)

Gastone Castellani
Adjunct Professor of Brain Science (Research)

Caroline Castiglione
Associate Professor of Italian Studies

Jorge J. Castillo
Assistant Professor of Medicine

Bruce Caswell
Professor Emeritus of Engineering

Thomas E. Cataldo
Assistant Professor of Surgery

John Cava
Clinical Instructor in Medicine

Colleen Cavanaugh
Clinical Assistant Professor in Obstetrics and Gynecology

Timothy Cavanaugh
Clinical Assistant Professor in Family Medicine
John Cayley  
Professor of Literary Arts  
Stefano Cazzaniga  
Clinical Assistant Professor in Medicine  
Ipek A. Celik  
Visiting Scholar in Comparative Literature  
Samuele Centorrino  
Teaching Associate in Economics  
Carolina S. Cerezo  
Assistant Professor of Pediatrics (Clinical)  
Dilek O. Cermik  
Clinical Assistant Professor in Obstetrics and Gynecology  
Ronald M. Cesario  
Lecturer in Theatre Arts  
Ugur Cetintemel  
Professor of Computer Science  
Chung-Ja M. Cha  
Associate Professor Emerita of Pediatrics (Research)  
Stephen L. Chabot  
Clinical Assistant Professor in Family Medicine  
John A. Chaffey  
Clinical Instructor in Medicine  
Peter Chami  
Adjunct Lecturer in Health Services, Policy and Practice  
Philip A. Chan  
Assistant Professor of Medicine  
Rabin F. Chandran  
Associate Professor of Family Medicine (Clinical)  
Joyce R. Chang  
Clinical Assistant Professor in Medicine  
Kevin J. Chang  
Assistant Professor of Diagnostic Imaging  
Victoria C. Chang  
Assistant Professor of Neurology (Clinical)  
Kimberle C. Chapin  
Professor of Pathology and Laboratory Medicine; Professor of Medicine  
Heather A. Chapman  
Clinical Assistant Professor in Pediatrics  
Laura L. Chapman  
Assistant Professor of Emergency Medicine (Clinical)  
Amos Charles  
Clinical Associate Professor in Medicine  
David Charles  
Visiting Professor of Philosophy  
Eugene Charniak  
University Professor of Computer Science  
Kevin P. Charpentier  
Assistant Professor of Surgery  
Sarah Alexander Chase  
Visiting Lecturer in Anthropology  
Eric Chason  
Professor of Engineering  
Yael Chatav Schonbrun  
Associate Professor of Psychiatry and Human Behavior (Research)  
Devisas Chatterjee  
Assistant Professor of Medicine (Research)  
Joseph Chaves  
Visiting Scholar in Comparative Literature  
Anulika Chawla  
Associate Professor of Pediatrics (Clinical)  
Kenneth Chay  
Professor of Economics  
Joseph Chazan  
Clinical Professor Emeritus in Medicine  
Ross E. Cheit  
Professor of Public Policy and Political Science  
Iwona Chelminksi  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Kenneth K. L. Chen  
Assistant Professor of Medicine  
Qian Chen  
Michael G. Ehrlich, MD Professor of Orthopedic Research  
Tzong-Huei Herbert Chen  
Clinical Instructor in Surgery (Anesthesiology)  
Xuwen Chen  
Tamarkin Assistant Professor  
Juan Cheng  
Visiting Professor of Applied Mathematics  
Shibin Cheng  
Assistant Professor of Medicine (Research)  
Vicky Cheng  
Assistant Professor of Medicine (Clinical)  
Edward G. Chernesky  
Clinical Instructor in Diagnostic Imaging  
John F. Cherry  
Joukowsky Family Professor of Archaeology  
Edward Chien  
Associate Professor of Obstetrics and Gynecology  
Michael K. Chin  
Clinical Assistant Professor in Family Medicine  
Michelle H. Cho  
Cogut Humanities Post Doctoral Fellow in East Asian Studies and Modern Culture and Media  
Adam Chodobski  
Associate Professor of Emergency Medicine (Research)  
Bum-Rak Choi  
Assistant Professor of Medicine (Research)  
Hoon Choi  
Visiting Scholar in Cognitive, Linguistic, and Psychological Sciences  
Hyunjung Choi  
Teaching Associate in Music  
Kue Chung Choi  
Clinical Assistant Professor in Obstetrics and Gynecology  
Tze Tec Chong  
Assistant Professor of Surgery (Clinical)  
Esther Choo  
Assistant Professor of Emergency Medicine  
Pradeep Chopra  
Assistant Professor of Medicine (Clinical)  
Nitsan Chorev  
Associate Professor of Sociology  
Gaurav Choudhary  
Associate Professor of Medicine  
David P. Christensen  
Professor of Philosophy  
Fredric V. Christian  
Clinical Assistant Professor in Medicine  
Mirena Christoff  
Senior Lecturer in Language Studies  
Paul Christopher  
Clinical Assistant Professor in Psychiatry and Human Behavior
Paris Papamichos Chronakis  
Visiting Assistant Professor of History

David J. Chronley  
Clinical Assistant Professor in Pediatrics

Antony Chu  
Assistant Professor of Medicine

Ming-Yu Wang Chu  
Professor Emerita of Medicine (Research)

Shih-Hsi Chu  
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology (Research)

Rosalind Y. Chua  
Teaching Associate in Music

Cheng-Chieh Chuang  
Clinical Assistant Professor in Family Medicine

Howard P. Chudacoff  
George L. Littlefield Professor of American History

Min Ji Chun  
Visiting Lecturer in East Asian Studies

Erica Chung  
Assistant Professor of Pediatrics

Maureen A. Chung  
Associate Professor of Surgery

Russell M. Church  
Edgar L. Marston Professor of Psychology

Lydia R. Ciarallo  
Assistant Professor of Emergency Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)

Joseph T. Ciccolo  
Clinical Assistant Professor in Behavioral and Social Sciences (Research)

Sybil Cineas  
Assistant Professor of Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)

Francesco Cinnirella  
Visiting Scholar in Economics

J. Murray Beardsley Professor of Surgery

Mark Cladis  
Brooke Russell Astor Professor of Humanities

Wayne C. Clairborne  
Clinical Associate Professor in Obstetrics and Gynecology

Melissa A. Clark  
Professor of Epidemiology; Professor of Obstetrics and Gynecology

Jennifer G. Clarke  
Associate Professor of Medicine; Associate Professor of Obstetrics and Gynecology

Michael W. Clarkson  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)

Michelle Clayton  
Associate Professor of Hispanic Studies and Associate Professor of Comparative Literature

Colleen A. Cleary  
Clinical Assistant Professor in Family Medicine

Steven C. Clemens  
Associate Professor of Geological Sciences (Research)

Jeffrey D. Clement  
Clinical Assistant Professor in Medicine

Alice R. Clemente  
Adjunct Professor of Portuguese and Brazilian Studies

Richard Clements  
Assistant Professor of Surgery (Research)

James G. Clifton  
Assistant Professor of Medical Science (Research)

Rodney J. Clifton  
Rush C. Hawkins University Professor Emeritus of Engineering

David R. Cloutier  
Clinical Assistant Professor in Surgery

Brian Clyne  
Assistant Professor of Emergency Medicine

Roger Cobb  
Professor of Political Science

Mia Coetzer  
Assistant Professor of Medicine (Research)

Daniel T. Coghlin  
Assistant Professor of Pediatrics (Clinical)

Andrew Cohen  
Professor of Medicine

Evan Cohen  
Clinical Assistant Professor in Medicine

Jon Cohen  
Adjunct Lecturer in Engineering

Ronald A. Cohen  
Professor of Psychiatry and Human Behavior

Steven Ira Cohen  
Clinical Assistant Professor in Surgery

Steven Irvin Cohen  
Clinical Assistant Professor in Surgery (Urology)

Wendy Cohen  
Clinical Assistant Professor in Family Medicine

Uriel Cohen-Priva  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Jamieson V. Cohn  
Assistant Professor of Emergency Medicine (Clinical)

Anthony G. Cokes  
Professor of Modern Culture and Media

Mauro Colavita  
Clinical Assistant Professor in Obstetrics and Gynecology

Suzanne Marie Colby  
Associate Professor of Psychiatry and Human Behavior (Research)

Artiene M. Cole  
Adjunct Lecturer in Music

Brian J. Cole  
Professor of Mathematics

Annette W. Coleman  
Stephen T Olney Professor Emerita of Natural History

John R. Coleman  
Professor Emeritus of Biology

Reid W. Coleman  
Clinical Associate Professor in Medicine

Bradley J. Collins  
Clinical Assistant Professor in Medicine
Raymond F. Collins  
Visiting Scholar in Religious Studies

Douglas J. Colson  
Clinical Instructor in Surgery (Otolaryngology)

Curt Columbus  
Clinical Professor in Theatre Arts

Ruth Melanie Colwill  
Professor of Cognitive, Linguistic, and Psychological Sciences

Jack D. Combs  
Lecturer in Public Policy

Jonathan P. Conant  
Assistant Professor of History

Jeannine M. Connolly  
Clinical Assistant Professor in Obstetrics and Gynecology

Michael Connolly  
Assistant Professor of Surgery (Trauma)

Francis Connor Jr  
Clinical Associate Professor in Surgery (Oral & Maxillofacial Surgery)

L. Herbert Ballou University Professor of Neuroscience

Erika F. Constantine  
Clinical Assistant Professor in Emergency Medicine; Clinical Assistant Professor in Pediatrics

Herbert P. Constantine  
Professor Emeritus of Health Services, Policy and Practice

Maria Constantinou  
Clinical Assistant Professor in Medicine

John M. Conte  
Clinical Assistant Professor in Medicine

Maureen H. Conte  
Adjunct Associate Professor of Geological Sciences

Harold J. Cook  
Professor Emeritus of History

Linda J. Cook  
Professor of Political Science; Professor of Slavic Languages

Travis A. Cook  
Assistant Professor of Psychiatry and Human Behavior

Valerie A. Cooley  
Lecturer in Public Policy

Kathryn Coolidge  
Clinical Instructor in Medicine

David B. Cooper  
Professor Emeritus of Engineering

George Cooper  
Clinical Associate Professor Emeritus in Surgery

Leon N. Cooper  
Thomas J. Watson, Sr. Professor of Science

Mary Reich Cooper  
Assistant Professor of Medicine (Research)

Reid F. Cooper  
Professor of Geological Sciences

Robert Coover  
T.B. Stowell University Professor Emeritus of Literary Arts

Robert Douglas Cope  
Associate Professor of History

A. Michael Coppa  
Clinical Instructor in Obstetrics and Gynecology

Denise Coppa  
Clinical Assistant Professor in Pediatrics

Paul I. Coppock  
Visiting Scholar in Philosophy

William M. Corrao  
Clinical Professor in Medicine

Giselle A. Corre  
Clinical Assistant Professor in Psychiatry and Human Behavior

Raquel Correa da Silva  
Visiting Scholar in Portuguese and Brazilian Studies

Silvia Adriana Barbosa Correia  
Visiting Scholar in Portuguese and Brazilian Studies

Stephen Correia  
Assistant Professor of Psychiatry and Human Behavior

Dominic Corrigan  
Clinical Associate Professor in Medicine

Louis Corvese  
Clinical Assistant Professor in Orthopaedics

R. William Corwin  
Clinical Assistant Professor in Medicine

Christopher J. Cosgrove  
Clinical Assistant Professor in Medicine

Garth Rees Cosgrove  
Professor of Neurosurgery

Joseph A. Costa  
Clinical Assistant Professor in Family Medicine

Geanna O. Costea  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ellen M. Costello  
Clinical Assistant Professor in Psychiatry and Human Behavior

Philippe Cote  
Clinical Assistant Professor in Family Medicine

Richard A. Cottiero  
Clinical Associate Professor in Medicine

Donald R. Coustan  
Professor of Obstetrics and Gynecology

Shiavax Cowasji  
Clinical Assistant Professor in Medicine

Hugh P. Cowdin Jr  
Clinical Assistant Professor in Surgery (Anesthesiology)

William Cox  
Clinical Assistant Professor in Pathology and Laboratory Medicine

Mara G. Coyle  
Associate Professor of Pediatrics (Clinical)

Thomas F. Crain  
Assistant Professor of Medicine (Clinical)

Robert Crausman  
Clinical Associate Professor in Medicine

Norbert J. Craybas  
Clinical Assistant Professor in Surgery

Suzannah Creech  
Instructor in Psychiatry and Human Behavior (Research)

Robyn S. Creswell  
Assistant Professor of Comparative Literature

Robbert J. Creton  
Associate Professor of Medical Science (Research)

Rebecca J. Crichton  
Clinical Assistant Professor in Obstetrics and Gynecology

Frederick Crisafulli  
Clinical Associate Professor in Medicine

Gene Crisafulli  
Teaching Associate in Music

Joseph Crisco III  
Henry F. Lippitt Professor of Orthopedics
John J. Cronan  
Professor of Diagnostic Imaging

James P. Crowley  
Professor Emeritus of Medicine

Scott J. Cruikshank  
Assistant Professor of Neuroscience (Research)

Antonio P. Cruz  
Clinical Assistant Professor in Dermatology

Xia Cui  
Visiting Associate Professor of Applied Mathematics

Larry Culpepper  
Adjunct Professor of Family Medicine

Catherine A. Cummings  
Clinical Assistant Professor in Emergency Medicine

Danielle A. Cummings  
Clinical Instructor in Surgery (Oral & Maxillofacial Surgery)

Francis J. Cummings  
Adjunct Associate Professor of Medicine

Michael L. Cummings  
Clinical Instructor in Pediatrics

Stephen Cummings  
Clinical Assistant Professor in Family Medicine

Charles Cummings III  
Clinical Assistant Professor in Family Medicine

Ruggero Curci  
Adjunct Professor of Chemistry

Wilfredo Curioso  
Clinical Assistant Professor in Medicine

Bruce H. Curran  
Clinical Associate Professor in Radiation Oncology

Robert E. Curran  
Clinical Assistant Professor in Surgery (Ophthalmology)

Alicia Curtin  
Assistant Professor of Family Medicine (Clinical)

Anne Cushing-Brescia  
Clinical Assistant Professor in Medicine

Fiery A. Cushman  
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Marlene Cutitar  
Clinical Assistant Professor in Surgery

David Cutts  
Professor of Physics

Susan Cu-Uvin  
Professor of Medicine; Professor of Obstetrics and Gynecology; Professor of Health Services, Policy and Practice

Michele G. Cyr  
Professor of Medicine

Maxim J. Daamen  
Clinical Associate Professor in Psychiatry and Human Behavior

Constantine Michael Dafermos  
Alumni-Alumnae University Professor of Applied Mathematics

Issa J. Dahabreh  
Assistant Professor of Health Services, Policy and Practice (Research)

Albert E. Dahlgren  
Professor of Medical Science

Lori A. Daigle  
Assistant Professor of Neurology (Research); Assistant Professor of Health Services, Policy and Practice (Research)

Karen Daigle  
Clinical Associate Professor in Pediatrics

Tanya Dailey  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Arthur D. Daily  
Clinical Associate Professor Emeritus in Dermatology

Pedro Dal Bo  
Associate Professor of Economics

Jean Marie Daley  
Assistant Professor of Surgery (Research)

Kristy L. Dalrymple  
Assistant Professor of Psychiatry and Human Behavior (Research)

Suzanne C. Dambe  
Clinical Instructor in Obstetrics and Gynecology

Robert A. D’Andrea  
Adjunct Lecturer in Economics

Cuong Huy Dang  
Clinical Assistant Professor in Family Medicine

Michelle M. Daniel  
Assistant Professor of Emergency Medicine (Clinical)

Jerry Delmar Daniels  
Associate Professor of Engineering

Kwame Dapaah-Afiyie  
Clinical Associate Professor in Medicine

Laia Darder  
Teaching Associate in Language Studies

Eric M. Darling  
Assistant Professor of Medical Science; Assistant Professor of Engineering; Assistant Professor of Orthopaedics

Georgios D. Daskalopoulos  
Professor of Mathematics

Sean P. David  
Adjunct Associate Professor of Family Medicine

Kristopher Davignon  
Clinical Assistant Professor in Surgery (Anesthesiology)

Denise L. Davis  
Adjunct Lecturer in Pembroke Center

Jennifer D. Davis  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Lawrence M. Davis  
Assistant Professor of Diagnostic Imaging (Clinical)

Robert Paul Davis  
Professor Emeritus of Medical Science

Stephan W. Davis  
Clinical Associate Professor in Family Medicine

Susan Day  
Associate Professor of Pediatrics (Clinical)

T. Eugene Day  
Adjunct Assistant Professor of Emergency Medicine

Carolyn J. Dean  
John Hay Professor of International Studies

Cornelia Dean  
Visiting Lecturer in Environmental Studies

Mark R. Dean  
Stephen Robert Assistant Professor of Economics

Thomas L. Dean  
Adjunct Professor of Computer Science

Lynne Debenedette  
Senior Lecturer in Slavic Languages

Carol L. DeBoer-Langworthy  
Lecturer in English

Jeri B. Debrohun  
Associate Professor of Classics
Geoffroy DeClippel
Assistant Professor of Economics
Marcel A. DeDios
Assistant Professor of Psychiatry and Human Behavior (Research)
Linda Deegan
Professor of Ecology and Evolutionary Biology (MBL)
Silvia Degli Esposti
Associate Professor of Medicine (Clinical)
Catherine Degood
Clinical Assistant Professor in Family Medicine
Laura Deihl
Clinical Assistant Professor in Psychiatry and Human Behavior
Pascale Delache-Feldman
Teaching Associate in Music
Suzanne M. DeLaMonte
Professor of Pathology and Laboratory Medicine; Professor of Neurosurgery
Sarah Delaney
Assistant Professor of Chemistry
Sara Delaporta
Clinical Instructor in Family Medicine
Ronald A. DeLellis
Professor Emeritus of Pathology and Laboratory Medicine
Deborah Del Gais
Visiting Scholar in East Asian Studies
Paul V. Del Guercio
Clinical Assistant Professor in Family Medicine
Francine A. D’Elia
Clinical Assistant Professor in Psychiatry and Human Behavior
Ian P. Dell’antonio
Associate Professor of Physics
Thomas D. Della Torre
Clinical Assistant Professor in Family Medicine
Alison DeLong
Associate Professor of Biology
Joseph Demartino
Clinical Assistant Professor in Obstetrics and Gynecology
Kathryn Teigen DeMaster
Visiting Assistant Professor of Environmental Studies
Filipe de Meneses
Visiting Professor of Portuguese and Brazilian Studies
Kathryn E. Demos
Assistant Professor of Psychiatry and Human Behavior (Research)
Penelope Hill Dennehy
Professor of Pediatrics
Jane Mackenzie Dennison
Clinical Assistant Professor in Pediatrics
Dorothy L. Denniston
Associate Professor Emerita of English
Lisa R. Denny
Clinical Assistant Professor in Family Medicine
David Denofrio
Adjunct Associate Professor of Medicine
Thomas D. Denucci
Clinical Assistant Professor in Medicine
Nicola F. Denzey
Visiting Associate Professor of Religious Studies
Sean C. L. Deoni
Assistant Professor of Engineering
Monique E. DePaep
Associate Professor of Pathology and Laboratory Medicine
Vera A. DePaolo
Associate Professor of Medicine
Judith Depue
Clinical Professor in Psychiatry and Human Behavior
Leo Depuydt
Professor of Egyptology and Ancient Western Asian Studies
Zoltan Derdak
Clinical Assistant Professor in Medicine (Research)
James Der Derian
Professor of International Studies (Research)
Diane Dermarderosian
Assistant Professor of Pediatrics (Clinical)
Angela Katz DeRobertis
Clinical Assistant Professor in Radiation Oncology
Mary Derosa
Clinical Assistant Professor in Obstetrics and Gynecology
Katrin Dettmer
Visiting Lecturer in German Studies
Allan Mark Deutsch
Clinical Associate Professor Emeritus in Diagnostic Imaging
Theresa J. Devine
Lecturer in Public Policy
Paula Deyoung
Clinical Instructor in Obstetrics and Gynecology
Giulio G. Diamante
Clinical Assistant Professor in Surgery (Ophthalmology)
Joseph Anthony Diaz
Associate Professor of Medicine
Christy Dibble
Clinical Assistant Professor in Medicine
Joseph DiBenedetto
Clinical Assistant Professor in Medicine
Lisa DiCarlo
Visiting Assistant Professor of Sociology
Margaret A. Dicarlo
Clinical Assistant Professor in Psychiatry and Human Behavior
Daniel P. Dickstein
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics
Susan Dickstein
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics
Elizabeth R. Didie
Assistant Professor of Psychiatry and Human Behavior (Research)
Gerald J. Diebold
Professor of Chemistry
Dinusha W. Dietrich
Clinical Assistant Professor in Pediatrics
Christopher W. Digiovanni
Professor of Orthopaedics
Amy Bach Dilello
Clinical Assistant Professor in Psychiatry and Human Behavior
Ann Dill
Associate Professor of Sociology
Joseph D. DiMase
Clinical Assistant Professor Emeritus in Medicine
John Diorio
Clinical Assistant Professor in Obstetrics and Gynecology
Thomas Dipetrillo
Associate Professor of Radiation Oncology
Paul A. Disilvestro
Associate Professor of Obstetrics and Gynecology
Stephen Dizio
Clinical Assistant Professor in Psychiatry and Human Behavior

Beata E. Dizoglio
Clinical Assistant Professor in Obstetrics and Gynecology

Don S. Dizon
Associate Professor of Obstetrics and Gynecology; Associate Professor of Medicine

Curtis Doberstein
Associate Professor of Neurosurgery (Clinical)

Nikola Dobrilovic
Assistant Professor of Surgery

Vladimir Dobrushkin
Visiting Professor of Applied Mathematics

Robert J. Dobrzynski Jr
Clinical Assistant Professor in Medicine

Kimberly A. Dodd
Assistant Professor of Family Medicine; Assistant Professor of Medicine

Thomas W. Doepner Jr
Associate Professor of Computer Science (Research)

Jimmie D. Doll
Associate Professor of Pathology and Laboratory Medicine; Associate Professor of Neurology

Lisa Ruth Domagalski
Clinical Assistant Professor in Obstetrics and Gynecology

Fulvio Domini
Professor of Cognitive, Linguistic, and Psychological Sciences

Wai-Sun Don
Visiting Professor of Applied Mathematics

John E. Donahue
Associate Professor of Pathology and Laboratory Medicine; Associate Professor of Neurology

John P. Donahue
Clinical Assistant Professor in Surgery (Ophthalmology)

David Donaldson
Clinical Assistant Professor in Medicine

Deidre L. Donaldson
Adjunct Assistant Professor of Psychiatry and Human Behavior

Walter E. Donat
Clinical Associate Professor in Medicine

Linda L. Donegan
Assistant Professor of Diagnostic Imaging (Clinical)

Hongjie Dong
Associate Professor of Applied Mathematics

Jeffrey P. Donnelly
Adjunct Associate Professor of Geological Sciences

John P. Donoghue
Henry Merritt Wriston Professor of Neuroscience

Alexei A. Doohovskoy
Teaching Associate in Music

Miquel Dorca
Visiting Lecturer in Physics

David D. Dore
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Epidemiology

Gary S. Dorfman
Professor Emeritus of Diagnostic Imaging

David M. Dosa
Associate Professor of Medicine; Associate Professor of Health Services, Policy and Practice

Edmund T. Dosremedios
Clinical Assistant Professor in Orthopaedics

Beshara B. Doumani
Joukowsky Family Assistant Professor of Modern Middle East History
Jennifer L. Dyl
Clinical Assistant Professor in Psychiatry and Human Behavior
Anani Dzidzienyo
Associate Professor of Africana Studies; Associate Professor of Portuguese and Brazilian Studies
Mary Frances Dzurinko
Clinical Assistant Professor in Surgery
J. Donald Easton
Professor Emeritus of Neurology
Charles B. Eaton
Professor of Family Medicine; Professor of Epidemiology
Nicole M. Eaton
Visiting Assistant Professor of History
Craig P. Eberson
Associate Professor of Orthopaedics
Sue E. Eckert
Senior Fellow in International Studies
Julia Edelman
Adjunct Instructor in Obstetrics and Gynecology
Robert Eden
Clinical Assistant Professor in Pediatrics
David Edmonson
Assistant Professor of Obstetrics and Gynecology (Clinical)
Lee Edstrom
Professor of Surgery
Erika J. Edwards
Richard and Edna Salomon Assistant Professor of Ecology and Evolutionary Biology
Jonathan A. Edwards
Adjunct Lecturer in Visual Art
Wendy Edwards
Professor of Visual Art
Jessica B. Edwards-George
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)
James F. Egan
Professor of English
Lisa S. Egan
Visiting Lecturer in English
Renee Ross Eger
Clinical Assistant Professor in Obstetrics and Gynecology
Gautil B. Eggertsson
Associate Professor of Economics
Thomas K. Egglin
Associate Professor of Diagnostic Imaging
David Eglman
Clinical Professor in Family Medicine
Erik T. Ehn
Professor of Theatre Arts
Jonathan A. Ehrenberg
Adjunct Lecturer in Visual Art
Michael G. Ehrlich
Vincent Zecchino, MD Professor of Orthopaedic Surgery
Charles Elia
Clinical Associate Professor in Medicine
Jane L. Eisen
Associate Professor of Psychiatry and Human Behavior
Yul D. Ejnes
Clinical Associate Professor in Medicine
Charles Elbaum
Professor Emeritus of Physics
Courtney Beard Elias
Assistant Professor of Psychiatry and Human Behavior (Research)
Kfir Eliaz
Professor of Economics
Heinrich Elinzano
Assistant Professor of Neurology
Jonathan Elion
Associate Professor of Medicine
Peter M. Eller
Clinical Assistant Professor in Medicine
Claudia Elliott
Lecturer in International Studies
Gregory C. Elliott
Professor of Sociology
Richard Akers Ellis
Professor Emeritus of Biology
Kristin E. Ellison
Associate Professor of Medicine
Pamela I. Elsworth
Associate Professor of Surgery (Urology)
Fadya El Rayess
Assistant Professor of Family Medicine (Clinical)
Martin Elson
Clinical Assistant Professor in Surgery
Michelle Embree-Ku
Adjunct Instructor in Pathology and Laboratory Medicine
Rinchen-Tzo Emgushov
Clinical Instructor in Medicine
John Emigh
Professor Emeritus of Theatre Arts and English
Robert P. Emlen
Senior Lecturer in American Studies
Christine M. Emmick
Clinical Assistant Professor in Surgery
Timothy M. Empkie
Clinical Associate Professor in Family Medicine
Joseph J. England
Clinical Assistant Professor in Family Medicine
John Eng-Wong
Visiting Scholar in Race and Ethnicity in America
Christian Enss
Adjunct Professor of Physics (Research)
Esther Entin
Clinical Associate Professor in Family Medicine
Yoash R. Enzer
Clinical Associate Professor in Surgery; Clinical Associate Professor in Dermatology
Jeanette I. Epstein
Adjunct Lecturer in Education
Lynn C. Epstein
Clinical Professor Emerita in Psychiatry and Human Behavior
Mel H. Epstein
Professor Emeritus of Neurosurgery
Nathan B. Epstein
Professor Emeritus of Psychiatry and Human Behavior
Gary P. Epstein-Lubow
Assistant Professor of Psychiatry and Human Behavior; Assistant Professor of Health Services, Policy and Practice
Allan Erickson
Associate Professor Emeritus of Medicine
Debra Erickson-Owens
Clinical Instructor in Family Medicine
Daniel Esmaili
Adjunct Instructor in Surgery
Matthew A. Esposito
Assistant Professor of Obstetrics and Gynecology (Clinical)
Christianne Esposito-Smyth
Adjunct Assistant Professor of Behavioral and Social Sciences
Mohammad Esteghamati
Clinical Assistant Professor in Surgery (Anesthesiology)
David Estlund
Lombardo Family Professor of the Humanities
Elkin O. Estrada
Clinical Assistant Professor in Medicine
Faiza Fawaz Estrup
Clinical Professor Emerita in Medicine
David Ettensohn
Clinical Associate Professor in Medicine
Peter T. Evangelista
Assistant Professor of Diagnostic Imaging (Clinical)
Allison Schettini Evans
Clinical Assistant Professor in Psychiatry and Human Behavior
Matthew Evans
Clinical Assistant Professor in Psychiatry and Human Behavior
Peter B. Evans
Visiting Professor of Sociology; Senior Fellow in International Studies
Svetlana Evdokimova
Professor of Slavic Languages and Comparative Literature
Brian K. Evenson
Royce Family Professor in Teaching Excellence and Professor of Literary Arts
Paul Fadale
Professor of Orthopaedics
Mark J. Fagan
Professor of Medicine
Elaine B. Fain
Clinical Assistant Professor in Medicine
Itay P. Faimesser
Assistant Professor of Economics
William G. Fairbrother
Associate Professor of Biology
Miled Faiza
Lecturer in Language Studies
M. Khurram Faizan
Assistant Professor of Pediatrics (Clinical)
Peter L. Falb
Professor Emeritus of Applied Mathematics
Stephen Falkenberg
Clinical Associate Professor in Obstetrics and Gynecology
Justin R. Fallon
Professor of Medical Science
Frank Faltus
Clinical Assistant Professor in Psychiatry and Human Behavior
Edward V. Famiglietti
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology
Katherine E. Faricy-Anderson
Instructor in Medicine (Clinical)
Ashraf M. Farid
Clinical Instructor in Surgery
Ulana V. Farmer
Clinical Assistant Professor in Family Medicine
Elisabeth K. Farnum
Clinical Assistant Professor in Family Medicine
Susan E. Fasoli
Instructor in Neurology (Research)
Loren D. Fast
Associate Professor of Medicine (Research)
Paja L. Faudree
Assistant Professor of Anthropology
Carol J. Faulkner
Assistant Professor of Psychiatry and Human Behavior (Clinical)
David Faust
Adjunct Associate Professor of Psychiatry and Human Behavior
Anne Fausto-Sterling
Nancy Duke Lewis Professor of Molecular Biology, Cell Biology and Biochemistry and Gender Studies
Nicolas Lux Fawzi
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology
Peter Fay
Clinical Assistant Professor in Surgery (Ophthalmology)
Deirde M. Fearon
Associate Professor of Emergency Medicine (Clinical); Associate Professor of Pediatrics (Clinical)
Jeffrey Feden
Assistant Professor of Emergency Medicine
Seth Feder
Clinical Assistant Professor in Dermatology
Jean Feerick
Assistant Professor of English
Corey R. Fehnel
Assistant Professor of Neurology; Assistant Professor of Neurosurgery
Leslie Ann Feil
Clinical Assistant Professor in Psychiatry and Human Behavior
Lloyd R. Feit
Associate Professor of Pediatrics
Martin E. Felder
Clinical Professor Emeritus in Surgery
Michael F. Felder
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics
Allan Maurice Feldman
Professor Emeritus of Economics
Dmitri Feldman
Associate Professor of Physics
Martin P. Feldman
Clinical Instructor Emeritus in Surgery
Michael Feldman
Clinical Assistant Professor in Orthopaedics
Edward R. Feller
Clinical Professor in Medicine; Adjunct Professor of Health Services, Policy and Practice
Pedro F. Felzenszwalb
Associate Professor of Engineering; Associate Professor of Computer Science
Jun Feng
Assistant Professor of Surgery (Research)
Yuanuyuan Feng
Visiting Scholar in Race and Ethnicity in America
Zhanliang Feng
Adjunct Assistant Professor of Health Services, Policy and Practice
Mary L. Fennell
Professor of Sociology; Professor of Health Services, Policy and Practice
Mary Anne Fenton
Clinical Associate Professor in Medicine
Steven R. Fera
Clinical Assistant Professor in Medicine
Gary M. Ferguson
Clinical Assistant Professor in Orthopaedics
Marcolino Ferretti
Clinical Assistant Professor in Pediatrics
Fred F. Ferri
Clinical Professor in Health Services, Policy and Practice
Sarah J. Fessler
Clinical Assistant Professor in Family Medicine
Masako Ueda Fidler
Professor of Slavic Languages
Vlastimil Fidler
Teaching Associate in Chemistry
Thalia L. Field
Clinical Assistant Professor in Medicine
Edward J. Filardo
Associate Professor of Medicine (Research); Associate Professor of Surgery (Research)
James G. Fingleton
Clinical Assistant Professor in Surgery (Cardiothoracic Surgery)
John W. Finigan
Clinical Instructor in Pediatrics
Lois Finkel
Teaching Associate in Music
Arkadiy Finn
Clinical Instructor in Medicine
Michael A. Fiori
Clinical Assistant Professor in Psychiatry and Human Behavior
Simon Fiorucci
Senior Research Associate in Physics
Karen M. Fischer
Professor of Geological Sciences
Staci A. Fischer
Associate Professor of Medicine
Sumner L. Fishbein
Clinical Assistant Professor in Surgery (Ophthalmology)
Linford Fisher
Professor of Visual Art
Kathryn Fisler
Adjunct Associate Professor of Computer Science (Research)
James L. Fitzgerald
St. Purander Das Distinguished Professor of Classics
Kathleen Fitzgerald
Clinical Associate Professor in Obstetrics and Gynecology
Walter D. Fitzhugh
Clinical Assistant Professor in Psychiatry and Human Behavior
Patricia Jeanne Flanagan
Professor of Pediatrics
Timothy P. Flanigan
Dean’s Professor of Medical Science
B. Allen Flaxman
Clinical Professor Emeritus in Dermatology
Richard D. Fleeter
Adjunct Associate Professor of Engineering
Braden C. Fleming
Lucy Lippitt Professor of Orthopedics
Wendell H. Fleming
Professor of Applied Mathematics (Research)
Steven Charles Flood
Clinical Assistant Professor in Family Medicine
Paul R. Florin
Adjunct Professor of Epidemiology
Ellen Flynn
Clinical Assistant Professor in Psychiatry and Human Behavior
Laura M. Flynn
Professor of Slavic Languages
Vlastimil Fidler
Visiting Associate Professor of Chemistry
Thalia L. Field
Professor of Slavic Languages
Michael A. Fiori
Clinical Assistant Professor in Medicine
Edward J. Filardo
Associate Professor of Medicine (Research); Associate Professor of Surgery (Research)
James G. Fingleton
Clinical Assistant Professor in Surgery (Cardiothoracic Surgery)
John W. Finigan
Clinical Instructor in Pediatrics
Lois Finkel
Teaching Associate in Music
Arkadiy Finn
Clinical Instructor in Medicine
Michael A. Fiori
Clinical Assistant Professor in Psychiatry and Human Behavior
Simon Fiorucci
Senior Research Associate in Physics
Karen M. Fischer
Professor of Geological Sciences
Staci A. Fischer
Associate Professor of Medicine
Sumner L. Fishbein
Clinical Assistant Professor in Surgery (Ophthalmology)
Linford Fisher
Professor of Visual Art
Kathryn Fisler
Adjunct Associate Professor of Computer Science (Research)
James L. Fitzgerald
St. Purander Das Distinguished Professor of Classics
Kathleen Fitzgerald
Clinical Associate Professor in Obstetrics and Gynecology
Walter D. Fitzhugh
Clinical Assistant Professor in Psychiatry and Human Behavior
Patricia Jeanne Flanagan
Professor of Pediatrics
Timothy P. Flanigan
Dean’s Professor of Medical Science
B. Allen Flaxman
Clinical Professor Emeritus in Dermatology
Richard D. Fleeter
Adjunct Associate Professor of Engineering
Braden C. Fleming
Lucy Lippitt Professor of Orthopedics
Wendell H. Fleming
Professor of Applied Mathematics (Research)
Caren L. Francione
Clinical Assistant Professor in Psychiatry and Human Behavior

Greta Francis
Associate Professor of Psychiatry and Human Behavior

Christian Franck
Assistant Professor of Engineering

Jennifer A. Franck
Lecturer in Engineering

Caroline B. Frank
Visiting Scholar in American Studies

Michael J. Frank
Associate Professor of Cognitive, Linguistic, and Psychological Sciences

Steven Frank
Clinical Assistant Professor in Family Medicine

Rachel S. Franklin
Assistant Professor of Population Studies (Research)

Lucia Paolicelli Fratantaro
Clinical Assistant Professor in Pediatrics

Arthur Frazzano
Clinical Associate Professor in Family Medicine

Lisa M. Freda
Clinical Assistant Professor in Psychiatry and Human Behavior

Jennifer B. Freeman
Assistant Professor of Psychiatry and Human Behavior (Research)

Nancy J. Freeman
Clinical Associate Professor in Medicine

Walter F. Freiberger
Professor Emeritus of Applied Mathematics

Richard N. Freiman
Associate Professor of Medical Science

Lambert B. Freund
Professor Emeritus of Engineering

David L. Fried
Clinical Assistant Professor in Medicine

Herbert M. Fried
Professor Emeritus of Physics

Rachel M. Friedberg
Senior Lecturer in Economics

Catherine Friedman
Associate Professor of Psychiatry and Human Behavior (Clinical)

Fredric C. Friedman
Clinical Assistant Professor in Psychiatry and Human Behavior

Jennifer F. Friedman
Associate Professor of Pediatrics

Joseph H. Friedman
Professor of Neurology (Clinical)

Michael A. Friedman
Clinical Assistant Professor in Psychiatry and Human Behavior ; Clinical

Professor in Neurology

Peter D. Friedmann
Professor of Medicine; Professor of Health Services, Policy and Practice

Karen Friend
Adjunct Associate Professor of Psychiatry and Human Behavior

Gary N. Frishman
Professor of Obstetrics and Gynecology

Gregory K. Fritz
Professor of Psychiatry and Human Behavior

John A. Froehlich
Clinical Assistant Professor in Orthopaedics

Lina M. Fruzzetti
Royce Family Professor in Teaching Excellence and Professor of Anthropology

Bradley K. Fugate
Adjunct Lecturer in Music

Ana Tuya Fulton
Assistant Professor of Medicine

John P. Fulton
Clinical Associate Professor in Behavioral and Social Sciences

Martin Fumman
Clinical Assistant Professor in Psychiatry and Human Behavior

Stephen Fuzesi
Visiting Fellow in International Relations

Darlene Gabeau
Adjunct Assistant Professor of Radiation Oncology

Joseph R. Gaeta
Clinical Assistant Professor Emeritus in Medicine

Alan D. Gaines
Clinical Assistant Professor in Pediatrics

Sarah A. Gaines
Assistant Professor of Emergency Medicine (Clinical)

John Gaitanis
Associate Professor of Neurology (Clinical); Associate Professor of Pediatrics (Clinical)

Melissa M. Gaitanis
Assistant Professor of Medicine (Clinical)

Richard J. Gaitskell
Professor of Physics

Omar Galarraga
Assistant Professor of Health Services, Policy and Practice

Harris M. Galkin
Clinical Assistant Professor in Obstetrics and Gynecology

Ezra L. Galler
Clinical Assistant Professor in Surgery (Ophthalmology)

Anthony L. Gallo
Clinical Assistant Professor in Psychiatry and Human Behavior

Katharina M. Galor
Hirschfeld Visiting Assistant Professor of Judaic Studies

Oded Galor
Herbert H. Goldberger Professor of Economics

Giovanni Gambassi
Adjunct Associate Professor of Health Services, Policy and Practice

Feng Gan
Visiting Associate Professor of German Studies (Research)

Forrest Gander
Adele Kellenberg Seaver ’49 Professor of Creative Writing

Michele R. Gange
Clinical Assistant Professor in Obstetrics and Gynecology

Marie L. Ganim
Clinical Assistant Professor in Health Services, Policy and Practice

Kim M. Gams
Professor of Behavioral and Social Sciences

Theresa C. Ganz
Assistant Professor of Visual Art

Huajian Gao
Walter H. Annenberg Professor of Engineering

Abbe L. Garcia
Assistant Professor of Psychiatry and Human Behavior (Research)

Alejandra Prieto Garcia
Adjunct Lecturer in Theatre Arts

Cynthia T. Garcia Coll
Charles Pitts Robinson and John Palmer Barstow Professor of Education
Manuel Garcia-Toca
Assistant Professor of Surgery
Martin F. Gardiner
Research Associate in Human Development
Marcus Gardley
Visiting Assistant Professor of Theatre Arts
Adrian Gardner
Assistant Professor of Medicine (Research)
Rebekah L. Gardner
Assistant Professor of Medicine
Ilana F. Gareen
Assistant Professor of Epidemiology (Research)
Veenu Garewal
Clinical Instructor in Medicine
Andrew B. Garland
Teaching Associate in Music
Ana C. Garnecho
Assistant Professor of Pediatrics (Clinical)
Aris C. Garro
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics
Eric J. Gartman
Assistant Professor of Medicine
Generoso G. Gascon
Professor Emeritus of Neurology
Ronnesia B. Gaskins
Assistant Professor of Behavioral and Social Sciences (Research)
Mason C. Gasper
Assistant Professor of Neurology (Clinical)
Jennifer S. Gass
Associate Professor of Surgery; Associate Professor of Obstetrics and Gynecology
Stephen M. Gatesy
Professor of Biology
Constantine A. Gatsonis
Henry Ledyard Goddard University Professor of Medical Science and Applied Mathematics
Brandon A. Gaudiano
Assistant Professor of Psychiatry and Human Behavior (Research)
Giuseppe Gazzola
Visiting Lecturer in Italian Studies
Elizabeth A. Gebhard
Clinical Assistant Professor in Family Medicine
Gretchen V. Gee
Investigator in Molecular Biology, Cell Biology and Biochemistry
Arthur I. Geltzer
Clinical Associate Professor in Surgery (Ophthalmology)
Stuart Geman
James Manning Professor of Applied Mathematics
Mychal Gendron
Teaching Associate in Music
Frank T. Gentile
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology
Bethany J. Gentilesco
Assistant Professor of Medicine (Clinical)
Michael George
Adjunct Assistant Professor of Medicine
Olakunle George
Associate Professor of English; Associate Professor of Africana Studies
Paul George
Assistant Professor of Family Medicine
Susan A. Gerbi
George D. Eggleston Professor of Biochemistry
Thomas German
Clinical Assistant Professor in Emergency Medicine
Jonathan Gershon
Clinical Assistant Professor in Psychiatry and Human Behavior
Frantz J. Gibbs
Assistant Professor of Emergency Medicine (Clinical)
Anne Giblin
Professor of Ecology and Evolutionary Biology (MBL)
Sharon E. Gibson
Clinical Associate Professor in Surgery (Otolaryngology)
Basilis Gidas
Professor of Applied Mathematics
Donald B. Giddon
Clinical Professor Emeritus in Behavioral and Social Sciences
David R. Gifford
Clinical Associate Professor in Medicine; Clinical Associate Professor in Health Services, Policy and Practice
Deidre S. Gifford
Clinical Assistant Professor in Health Services, Policy and Practice
Alfredo Gil
Assistant Professor of Obstetrics and Gynecology (Clinical)
Holly C. Gil
Assistant Professor of Diagnostic Imaging (Clinical)
Vanessa Gilbert
Adjunct Lecturer in Theatre Arts
James M. Gilchrist
Professor of Neurology
Mary Louise G. Gill
Professor of Classics and Philosophy
Peter S. Gill
Clinical Assistant Professor in Surgery
Fizza S. Gillani
Assistant Professor of Medicine (Research)
Malini C. Gillen
Clinical Assistant Professor in Pediatrics
Richard G. Gillerman
Clinical Assistant Professor in Surgery (Anesthesiology)
Gregory Gillette
Clinical Assistant Professor in Psychiatry and Human Behavior
Ronald M. Gilman
Clinical Assistant Professor in Medicine
Irving T. Gilson
Clinical Instructor in Medicine
Michael F. Gilson
Clinical Associate Professor in Medicine
Julien Ginsberg-Peltz
Clinical Assistant Professor in Family Medicine
Julianne M. Giust
Assistant Professor of Psychiatry and Human Behavior (Clinical)
Annie Gjelsvik
Assistant Professor of Epidemiology (Research)
Annette R. Gladman
Assistant Professor of Literary Arts
Arvin S. Glicksman
Professor Emeritus of Medical Science
Stephen E. Glinick
Clinical Associate Professor in Dermatology
Sebastjan Glinsek
Post-Doc Research Associate in Engineering
Douglas J. Glod
Clinical Assistant Professor in Orthopaedics
Mary Gluck
Professor of History
Douglas R. Gnepp
Professor of Pathology and Laboratory Medicine
Moses Goddard
Associate Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)
Reginald Y. Gohh
Associate Professor of Medicine
Jessica Gokke La Rose
Assistant Professor of Psychiatry and Human Behavior (Research)
Richard L. Gold
Associate Professor of Diagnostic Imaging (Clinical)
Amy P. Goldberg
Clinical Assistant Professor in Pediatrics
Laura B. Goldberg
Assistant Professor of Medicine
Richard J. Goldberg
Professor of Psychiatry and Human Behavior
Robert J. Goldberg
Adjunct Professor of Epidemiology
Daniel M. Golding
Assistant Professor of Diagnostic Imaging (Clinical)
Eric Goldlust
Assistant Professor of Emergency Medicine
Debra L. Goldman
Clinical Assistant Professor in Obstetrics and Gynecology
Robert E. Goldman
Clinical Professor in Family Medicine
David L. Goldsby
Associate Professor of Geological Sciences (Research)
Frances K. Goldscheider
Professor Emerita of Sociology
Leon Goldstein
Professor Emeritus of Medical Science
Lisa J. Goldstein
Clinical Assistant Professor in Pathology and Laboratory Medicine
Michael G. Goldstein
Adjunct Professor of Psychiatry and Human Behavior
Dragan Golijanin
Assistant Professor of Surgery (Urology)
Sandra A. Golopentia
Professor Emerita of French Studies
Natalia Golova
Assistant Professor of Pediatrics (Clinical)
Vladimir Golsteine
Associate Professor of Slavic Languages
Spencer Golub
Professor of Theatre Arts; Professor of Comparative Literature; Professor of Slavic Languages
Marta Gomez-Chiarri
Visiting Professor of Computational Molecular Biology
Chao Gong
Visiting Scholar in Chemistry
Rujun Gong
Associate Professor of Medicine (Research)
Wei Gong
Visiting Lecturer in East Asian Studies
Assawin Gongvatana
Assistant Professor of Psychiatry and Human Behavior (Research)
Katherine R. Goodman
Professor Emerita of German Studies
Thomas G. Goodwillie
Professor of Mathematics
Matthew S. Goodwin
Adjunct Assistant Professor of Psychiatry and Human Behavior
Dana A. Gooley
Associate Professor of Music; Associate Professor of Italian Studies
Geetha Gopalakrishnan
Associate Professor of Medicine
Pamina Gorbach
Adjunct Professor of Medicine
Alan L. Gordon
Clinical Assistant Professor in Psychiatry and Human Behavior
Leslie B. Gordon
Associate Professor of Pediatrics (Research)
Norman M. Gordon
Clinical Associate Professor in Neurology
Paul C. Gordon
Associate Professor of Medicine (Clinical)
Amy A. Gorin
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
George E. Goslow Jr
Professor Emeritus of Biology
David M. Gottesman
Clinical Assistant Professor in Psychiatry and Human Behavior
Amy S. Gottlieb
Associate Professor of Medicine (Clinical); Associate Professor of Obstetrics and Gynecology (Clinical)
Sigal Gottlieb
Visiting Professor of Applied Mathematics
Michael Gottsegen
Visiting Scholar in Religious Studies
Brett W. Goudie
Assistant Professor of Pediatrics (Clinical)
Philip Gould
Nicholas Brown Professor of Oratory and Belles Lettres
Vinita Goyal
Assistant Professor of Obstetrics and Gynecology
Pedro Luis Gozalo
Associate Professor of Health Services, Policy and Practice (Research)
David C. Grabowski
Adjunct Associate Professor of Health Services, Policy and Practice
Janet Grace
Professor of Psychiatry and Human Behavior (Clinical)
Mark Gradstein
Visiting Professor of Economics
Michael Grady
Clinical Assistant Professor in Education
Steven N. Graff
Clinical Assistant Professor in Orthopaedics
Rod A. Gragg
Clinical Assistant Professor in Psychiatry and Human Behavior
Cornelius O. Granai
Professor of Obstetrics and Gynecology
Enzo Granato
Adjunct Professor of Physics
David J. Grand
Assistant Professor of Diagnostic Imaging
Susan W. Graseck
Senior Fellow in International Studies
Laurie J. Grauel  
Clinical Instructor in Pediatrics  
Stefan Gravenstein  
Professor of Medicine; Professor of Health Services, Policy and Practice  
Theresa A. Graves  
Assistant Professor of Surgery (Clinical)  
Robyn A. Gray  
Assistant Professor of Obstetrics and Gynecology (Clinical)  
James N. Green  
Professor of History; Professor of Portuguese and Brazilian Studies  
Traci C. Green  
Assistant Professor of Medicine (Research); Assistant Professor of Epidemiology (Research)  
Benjamin D. Greenberg  
Associate Professor of Psychiatry and Human Behavior  
Paul B. Greenberg  
Clinical Associate Professor in Surgery (Ophthalmology)  
David J. Greenblatt  
Adjunct Professor of Medicine  
Samuel H. Greenblatt  
Professor of Neurosurgery; Professor of Neuroscience  
Gerson Greenburg  
Professor Emeritus of Surgery  
Jack Greene  
Adjunct Professor of History  
Melanie Greenman  
Clinical Instructor in Obstetrics and Gynecology  
Neil R. Greenspan  
Clinical Associate Professor in Medicine  
Amy R. Greenwald  
Associate Professor of Computer Science  
David S. Greer  
Professor Emeritus of Health Services, Policy and Practice  
James Edward Greer  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Kristin Lynch Gregg  
Clinical Assistant Professor in Emergency Medicine  
Shea C. Gregg  
Assistant Professor of Surgery  
Stephen H. Gregory  
Associate Professor of Medicine (Research)  
Steven T. Gregory  
Associate Professor of Medical Science (Research)  
Angela Grenander-Raufi  
Clinical Assistant Professor in Pediatrics  
Stephen D. Gresham  
Adjunct Lecturer in Public Health  
Mark W. Greve  
Adjunct Assistant Professor of Emergency Medicine  
Fred F. Griffith  
Clinical Instructor in Neurology  
Rogers C. Griffith  
Associate Professor of Pathology and Laboratory Medicine  
Robert T. Griffith Jr  
Clinical Associate Professor in Pediatrics  
Iulia C. Grillo  
Clinical Assistant Professor in Medicine  
Andrew Griscom  
Clinical Assistant Professor in Emergency Medicine  
Jan C. Groblewski  
Clinical Assistant Professor in Surgery (Otolaryngology); Clinical Assistant Professor in Pediatrics  
Howard Grodman  
Associate Professor of Pediatrics (Clinical)  
L. Peter Gromet  
Associate Professor of Geological Sciences  
Stephen D. Groskin  
Clinical Assistant Professor in Family Medicine  
Nicholas Grumbach  
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics  
Philip A. Gruppuso  
Professor of Pediatrics; Professor of Molecular Biology, Cell Biology and Biochemistry (Research)  
Tao Gu  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)  
Yingjie Guan  
Assistant Professor of Orthopaedics (Research)  
Esgar Guarin-Nieto  
Clinical Assistant Professor in Family Medicine  
Pradeep R. Guduru  
Associate Professor of Engineering  
Nicholas Guerina  
Clinical Assistant Professor in Pediatrics  
Daniel Guevara  
Clinical Assistant Professor in Medicine  
Frederick G. Guggenheim  
Clinical Professor in Psychiatry and Human Behavior  
Barbara J. Guillette  
Clinical Instructor in Surgery (Otolaryngology)  
Thomas J. Guilmette  
Adjunct Associate Professor of Psychiatry and Human Behavior  
Joanna Guldi  
Assistant Professor of History  
Fusun Gundogan  
Associate Professor of Pathology and Laboratory Medicine  
Jian-Gang Guo  
Visiting Associate Professor of Engineering  
Yan Guo  
Professor of Applied Mathematics  
Gaurav Gupta  
Clinical Assistant Professor in Surgery (Ophthalmology)  
Preeti Gupta  
Assistant Professor of Neurology (Clinical)  
Ravi Gupta  
Assistant Professor of Medicine (Clinical)  
Gerald S. Guralnik  
Chancellor's Professorship  
Volkan Gurel  
Adjunct Assistant Professor of Pathology and Laboratory Medicine  
Matthew Pratt Gutel  
Professor of Africana Studies and American Studies  
Tracey Guthrie  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Deborah C. Gutman  
Adjunct Assistant Professor of Emergency Medicine  
Joshua D. Gutman  
Clinical Assistant Professor in Family Medicine  
Ned H. Gutman  
Clinical Assistant Professor in Medicine
Roya Gutman
Assistant Professor of Biostatistics

Matthew C. Gutmann
Professor of Anthropology

Thomas E. Guttmacher
Clinical Assistant Professor in Family Medicine

Paul Guyer
Jonas Nelson Professor of Philosophy

Johnny Guzman
Assistant Professor of Applied Mathematics

Levis M. Guzman
Clinical Instructor in Medicine

Chad J. Gwaltney
Assistant Professor of Behavioral and Social Sciences (Research)

Richard A. Haas
Associate Professor of Diagnostic Imaging (Clinical); Associate Professor of Neurosurgery (Clinical)

Karen Marie Haberstroh
Assistant Professor of Engineering (Research)

Fadlallah G. Habr
Associate Professor of Medicine (Clinical)

Jason B. Hack
Associate Professor of Emergency Medicine

Melissa Hackman
Visiting Assistant Professor of Anthropology

James E. Haddow
Professor of Pathology and Laboratory Medicine (Research)

Wendy S. Hadley
Assistant Professor of Psychiatry and Human Behavior (Research)

Suhdong Hahn
Clinical Assistant Professor in Medicine

Chi-Ming Hai
Professor of Medical Science

Sheila A. Haley
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Harald A. Hall
Adjunct Assistant Professor of Medicine

Howard A. Hall
Clinical Assistant Professor Emeritus in Obstetrics and Gynecology

Sherine F. Handay
Kutayba Alghanim Assistant Professor of Social Science

Geoffrey R. Hamilton
Clinical Assistant Professor in Medicine

Joshua Hamilton
Professor of Pathology and Laboratory Medicine (MBL)

Teresita Hamilton
Clinical Assistant Professor in Family Medicine

Francoise N. Hamlin
Hans Rothfels Assistant Professor

Abdel-Hai Hammo
Assistant Professor of Pediatrics (Clinical)

Milton William Hamolsky
Professor Emeritus of Medical Science

Brittany Star Hampton
Associate Professor of Obstetrics and Gynecology

Xiangxin Han
Visiting Associate Professor of Engineering

Sajeev Handa
Clinical Assistant Professor in Medicine

Todd E. Handel
Clinical Assistant Professor in Orthopaedics

Johanna M. Hanink
Robert Gale Noyes Assistant Professor of Humanities

L. Corey Hanley
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Roger T. Hanlon
Professor of Ecology and Evolutionary Biology (MBL)

Cynthia M. Hanna
Clinical Assistant Professor in Obstetrics and Gynecology

Katrine Hansen
Assistant Professor of Pathology and Laboratory Medicine

Daniel J. Hanson
Clinical Professor Emeritus in Diagnostic Imaging

Rongrong Hao
Visiting Lecturer in East Asian Studies

Gita V. Harappanahally
Assistant Professor of Neurology (Clinical); Assistant Professor of Pediatrics (Clinical)

Christine Hardy
Clinical Assistant Professor in Pediatrics

Edward Hardy
Visiting Lecturer in English

Erica J. Hardy
Assistant Professor of Medicine (Clinical)

Zeev Harel
Professor of Pediatrics

I. M. Harjito
Teaching Associate in Music

Omur Harmansah
Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies

Karen M. Harnett
Assistant Professor of Medicine (Research); Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)

Thomas J. Haronian
Clinical Assistant Professor in Emergency Medicine

Daniel Harp
Teaching Associate in Music

Michael S. Harper
University Professor of Literary Arts

James S. Harper III
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Colin Harrington
Associate Professor of Psychiatry and Human Behavior (Clinical); Associate Professor of Medicine (Clinical)

David T. Harrington
Associate Professor of Surgery (Trauma)

Elizabeth O. Harrington
Associate Professor of Medicine (Research)

Adam D. Harris
Assistant Professor of Medicine

Timothy J. G. Harris
Munro, Goodwin, Wilkinson Professor of European History

Abigail Harrison
Assistant Professor of Behavioral and Social Sciences (Research)

Douglas J. Harrison
Assistant Professor of Pediatrics

Emily C. Harrison
Clinical Assistant Professor in Family Medicine

Matthew T. Harrison
Assistant Professor of Applied Mathematics

Pamela A. Harrop
Clinical Assistant Professor in Medicine
Anne C. Hart
Professor of Neuroscience
Ashley Hart
Assistant Professor of Psychiatry and Human Behavior (Research)
Chantelle N. Hart
Assistant Professor of Psychiatry and Human Behavior (Research)
Susan Ashbrook Harvey
Willard Prescott and Annie McClelland Smith Professor of History and Religion
Joseph L. Harwell
Clinical Associate Professor in Medicine; Clinical Associate Professor in Pediatrics
Sadaf Hashmi
Clinical Assistant Professor in Psychiatry and Human Behavior
Alla Hassan
Visiting Lecturer in Language Studies
Ghinwa Hassan
Clinical Assistant Professor in Family Medicine
Linda R. Hassan
Clinical Assistant Professor in Medicine
Justine Hastings
Associate Professor of Economics
Meredith K. Hastings
Joukowsky Family Assistant Professor of Geological Sciences
Kathryn Hatch
Clinical Instructor in Surgery (Ophthalmology)
Beverly Haviland
Senior Lecturer in American Studies
Risa Weisberg Hawkins
Assistant Professor of Psychiatry and Human Behavior (Research)
Edward Hawrot
Alva O'Way University Professor of Medical Science
Tawfik F. Hawwa
Clinical Associate Professor in Obstetrics and Gynecology
Roman A. Hayda
Associate Professor of Orthopaedics
Brian C. Hayden
Adjunct Professor of Cognitive, Linguistic, and Psychological Sciences
Kenneth Haynes
Professor of Comparative Literature; Associate Professor of Classics
James H. Hays
Assistant Professor of Computer Science
Anthony Richard Hayward
Adjunct Professor of Pediatrics
Barrett Hazeltine
Professor Emeritus of Engineering
Jimian He
Assistant Professor of Medicine (Research)
Mai He
Assistant Professor of Pathology and Laboratory Medicine
James W. Head III
Louis ande Elizabeth Scherck Distinguished Professor of the Geological Sciences
Eugene H. Healey
Clinical Assistant Professor Emeritus in Surgery
Terrance T. Healey
Assistant Professor of Diagnostic Imaging
Michael Hecht
Visiting Scientist in Geological Sciences
Richard Heck
Romeo Elton Professor of Natural Theology
Daithi J. Heffernan
Assistant Professor of Surgery
Robert C. Heffron
Clinical Assistant Professor in Family Medicine
William C. Heindel
Professor of Cognitive, Linguistic, and Psychological Sciences
Ulrich Heintz
Professor of Physics
Dwayne Heitmiller
Clinical Assistant Professor in Psychiatry and Human Behavior
Stephen L. Helfand
Professor of Biology
Patrick G. Heller
Professor of Sociology and International Studies
J. Vernon Henderson
Eastman Professor of Political Economy
Karen Heninger
Teaching Associate in Music
Casey Henry
Visiting Scholar in Literary Arts
Paget Henry
Professor of Africana Studies and Sociology
Jaroslaw T. Hepel
Assistant Professor of Radiation Oncology
Christine V. Herbert
Clinical Assistant Professor in Medicine
Timothy D. Herbert
Professor of Geological Sciences; Professor of Environmental Studies
David Herec
Clinical Assistant Professor in Medicine
Thaddeus W. Herliczek
Assistant Professor of Diagnostic Imaging
Maurice P. Herlihy
Professor of Computer Science
Arnold Herman
Clinical Associate Professor in Surgery
Debra S. Herman
Clinical Assistant Professor in Psychiatry and Human Behavior
John F. Hermance
Professor of Geological Sciences
Lynn Hernandez
Assistant Professor of Behavioral and Social Sciences (Research)
Melvin Hershkovitz
Clinical Assistant Professor Emeritus in Medicine
Rachel Herz
Adjunct Assistant Professor of Psychiatry and Human Behavior
Kathleen M. Hess
Lecturer in Chemistry
Laura E. Hess
Adjunct Assistant Professor of East Asian Studies
Lynn Hess
Clinical Assistant Professor in Psychiatry and Human Behavior
Jan Sickmann Hesthaven
Professor of Applied Mathematics
Timothy C. Hett
Lecturer in Theatre Arts
Peter Heywood
Professor of Biology
Lauri A. Hicks
Adjunct Assistant Professor of Medicine
Pamela C. High  
Professor of Pediatrics (Clinical)

Ellen B. Hight  
Clinical Assistant Professor in Family Medicine

Christopher S. Hill  
Professor of Philosophy

Constance R. Hiller  
Clinical Instructor in Pediatrics

Mary M. Hillstrom  
Assistant Professor of Diagnostic Imaging (Clinical)

Howard S. Hirsch  
Clinical Assistant Professor in Orthopaedics

Laurence M. Hirshberg  
Clinical Assistant Professor in Psychiatry and Human Behavior

James G. Hirth  
Professor of Geological Sciences

Kathleen C. Hittner  
Clinical Professor in Surgery (Anesthesiology)

Douglas C. Hixson  
Professor Emeritus of Pathology and Laboratory Medicine (Research)

John Hobbie  
Professor of Ecology and Evolutionary Biology (MBL)

Leigh R. Hochberg  
Associate Professor of Engineering

Bettina B. Hoeppner  
Adjunct Assistant Professor of Behavioral and Social Sciences

Diane Hoffman  
Adjunct Lecturer in Visual Art

Diane Hoffman-Kim  
Associate Professor of Medical Science and Engineering

Jeffrey Hoffstein  
Professor of Mathematics

Robert J. Hofmann  
Clinical Assistant Professor in Surgery (Ophthalmology)

Dawn B. Hogan  
Assistant Professor of Family Medicine (Clinical)

Dennis Hogan  
Robert E. Turner Distinguished Professor of Population Studies

Joseph W. Hogan  
Professor of Biostatistics

Mary H. Hohenhaus  
Assistant Professor of Medicine (Clinical)

Leigh Anne Hohlstein  
Clinical Assistant Professor in Psychiatry and Human Behavior

Horacio B. Hojman  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jamie Hollenbeck  
Clinical Assistant Professor in Psychiatry and Human Behavior

Karen A. Holler  
Clinical Assistant Professor in Psychiatry and Human Behavior

William H. Hollinshead III  
Clinical Assistant Professor in Epidemiology

Peter Amberg Hollmann  
Clinical Assistant Professor in Family Medicine

Marida C. Hollos  
Professor of Anthropology

Michael Holloway  
Assistant Professor of Pediatrics (Research)

Justin A. Holmer  
Associate Professor of Mathematics

Katherine M. Holmes  
Clinical Assistant Professor in Family Medicine

Andrew W. Holowinsky  
Associate Professor Emeritus of Molecular Biology, Cell Biology and Biochemistry

Cathleen S. Hood  
Clinical Assistant Professor in Family Medicine

Ryan James Hooper  
Visiting Scientist in Physics

Elizabeth M. Hoover  
Assistant Professor of American Studies and Race and Ethnicity in America

Robert W. Hopkins  
Professor Emeritus of Medical Science

Frederic G. Hoppin Jr  
Professor Emeritus of Medicine

John F. X. Horan  
Clinical Assistant Professor in Family Medicine

Marko Horb  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Andrew R. Hordes  
Clinical Associate Professor in Medicine

Jeffrey D. Horowitz  
Clinical Instructor in Medicine

Karyn J. Horowitz  
Clinical Assistant Professor in Psychiatry and Human Behavior

Seth Horowitz  
Assistant Professor of Ecology and Evolutionary Biology (Research)

Diana M. Horngan  
Lecturer in Molecular Pharmacology, Physiology and Biotechnology

Abraham Horvitz  
Clinical Associate Professor Emeritus in Surgery

Harold Milton Horwitz  
Clinical Associate Professor in Medicine

Jennifer J. Hosmer  
Clinical Assistant Professor in Obstetrics and Gynecology

Adriana M. Hosu  
Clinical Instructor in Medicine

Christopher D. Houck  
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)

E. Andres Houseman  
Adjunct Associate Professor of Epidemiology

Stephen D. Houston  
Dupee Family Professor of Social Science

Elisabeth D. Howard  
Clinical Assistant Professor in Obstetrics and Gynecology

Joanna E. Howard  
Visiting Lecturer in Literary Arts

Margaret M. Howard  
Clinical Associate Professor in Psychiatry and Human Behavior; Clinical Associate Professor in Medicine

Chanelle J. Howe  
Assistant Professor of Epidemiology

Peter Howitt  
Lyn Crost Professor of Social Sciences

James P. Hoye  
Clinical Assistant Professor in Family Medicine

Kelly L. Hoye  
Clinical Assistant Professor in Family Medicine
Wen-Pin Hsieh  
Visiting Lecturer in East Asian Studies

Feng Hu  
Visiting Associate Professor of Population Studies

Lung-Hua Hu  
Senior Lecturer in East Asian Studies

Susie Lee Hu  
Assistant Professor of Medicine

Austin Huang  
Assistant Professor of Medicine (Research)

Hsiang-Yi Huang  
Visiting Lecturer in East Asian Studies

Xin Huang  
Instructor in Surgery (Research)

Yen-Tsung Huang  
Assistant Professor of Epidemiology

Yongsong Huang  
Professor of Geological Sciences

Jia-Lin Huang Hsieh  
Visiting Lecturer in East Asian Studies

Julie A. Huber  
Assistant Professor of Ecology and Evolutionary Biology (MBL)

Kathryn Huber  
Adjunct Assistant Professor of Radiation Oncology

Evelyn Hu-Dehart  
Professor of History and Race and Ethnicity in America

Nathan Hudepohl  
Assistant Professor of Emergency Medicine

Neha Shroff Hudepohl  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

David C. Hughes  
Adjunct Assistant Professor of Pediatrics

John F. Hughes  
Professor of Computer Science

Michelle L. Hughes  
Clinical Assistant Professor in Obstetrics and Gynecology

Anne L. Hume  
Adjunct Professor of Family Medicine

Jeffrey I. Hunt  
Associate Professor of Psychiatry and Human Behavior

Vincent R. Hunt  
Professor Emeritus of Family Medicine

Linda A. Hunter  
Clinical Assistant Professor in Obstetrics and Gynecology

Robert H. Hurt  
Professor of Engineering

Reema Husain  
Clinical Assistant Professor in Psychiatry and Human Behavior

Susan Marie Huse  
Assistant Professor of Pathology and Laboratory Medicine (Research)

John Hustad  
Adjunct Assistant Professor of Behavioral and Social Sciences

Quyen Huynh  
Adjunct Professor of Brain Science (Research)

Kathleen Huwang  
Assistant Professor of Surgery (Urology); Assistant Professor of Pathology and Laboratory Medicine

Michael K. Hyder  
Clinical Assistant Professor in Medicine

Harry Iannotti  
Clinical Assistant Professor in Surgery (Urology)

Edward A. Iannuccilli  
Clinical Professor Emeritus in Medicine

Jason D. Iannuccilli  
Assistant Professor of Diagnostic Imaging

Sadia Iftikhar  
Clinical Assistant Professor in Medicine

Catherine Imbriglio  
Senior Lecturer in English

James William Ingraham  
Clinical Assistant Professor in Psychiatry and Human Behavior

Nathan Intrator  
Adjunct Professor of Brain Science

Orna Intrator  
Associate Professor of Health Services, Policy and Practice (Research)

Julianne Ip  
Clinical Associate Professor in Family Medicine

Ahmad Ismail  
Assistant Professor of Medicine (Clinical)

Janet Isserlis  
Lecturer in Race and Ethnicity in America

Sorin Istrail  
Julie Nguyen Brown Professor of Computational and Mathematical Science

Jose Itzigsohn  
Professor of Sociology

Henry F. Izeman  
Clinical Associate Professor Emeritus in Medicine

Justin Izzo  
Professor Emeritus of Surgery

Cynthia L. Jackson  
Associate Professor of Pathology and Laboratory Medicine

Donald C. Jackson  
Professor Emeritus of Medical Science

Francine Jackson  
Research Associate in Physics

Ivor M. D. Jackson  
Professor Emeritus in Physics

Kristina M. Jackson  
Associate Professor of Behavioral and Social Sciences (Research)

Margot Jackson  
Assistant Professor of Sociology

Yuko Imoto Jackson  
Senior Lecturer in East Asian Studies

Elizabeth S. Jacobs  
Assistant Professor of Emergency Medicine (Clinical)

Nancy J. Jacobs  
Associate Professor of History and Africana Studies

David C. Jacobson  
Professor of Judaic Studies

Pauline I. Jacobson  
Professor of Cognitive, Linguistic, and Psychological Sciences

Tara K. Jacobson  
Research Associate in Cognitive, Linguistic, and Psychological Sciences
Marc A. Jaffe
Clinical Assistant Professor in Obstetrics and Gynecology

Daniel Jaffee
Clinical Instructor in Surgery (Urology)

Liudvika Jagminas
Adjunct Associate Professor of Emergency Medicine

Neeta Jain
Clinical Assistant Professor in Psychiatry and Human Behavior

Barbara N. Jandasek
Assistant Professor of Psychiatry and Human Behavior (Research)

Robert H. Janigian Jr
Clinical Assistant Professor in Surgery (Ophthalmology)

Christine Marie Janis
Professor of Biology

Matthew D. Jankowich
Assistant Professor of Medicine

Noel S. C. Javier
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics

Bryan S. Jay
Clinical Assistant Professor in Diagnostic Imaging

Gregory D. Jay
Professor of Emergency Medicine; Professor of Medicine; Professor of Engineering (Research)

Ravi Jayanti
Clinical Instructor in Medicine

Neeta Jain
Clinical Assistant Professor in Psychiatry and Human Behavior

Barbara N. Jandasek
Assistant Professor of Psychiatry and Human Behavior (Research)

Robert H. Janigian Jr
Clinical Assistant Professor in Surgery (Ophthalmology)

Christine Marie Janis
Professor of Biology

Matthew D. Jankowich
Assistant Professor of Medicine

Noel S. C. Javier
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics

Bryan S. Jay
Clinical Assistant Professor in Diagnostic Imaging

Gregory D. Jay
Professor of Emergency Medicine; Professor of Medicine; Professor of Engineering (Research)

Ravi Jayanti
Clinical Instructor in Medicine

Mahesh V. Jayaraman
Assistant Professor of Diagnostic Imaging; Assistant Professor of Neurosurgery

Thomas W. Jean
Assistant Professor of Medicine (Clinical)

Julie A. Jefferson
Clinical Assistant Professor in Epidemiology

Elissa Jelalian
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Pediatrics

Melissa A. Jenkins
Clinical Assistant Professor in Psychiatry and Human Behavior

Odest C. Jenkins
Associate Professor of Computer Science

Ernestine G. Jennings
Assistant Professor of Psychiatry and Human Behavior (Research)

Kathryn Jennings
Teaching Associate in Music

Carole A. Jenny
Professor of Pediatrics

Ilse M. Jenouri
Clinical Assistant Professor in Emergency Medicine

Carol J. Jensen
Clinical Assistant Professor in Psychiatry and Human Behavior

Jennifer Jeremiah
Clinical Associate Professor in Medicine

Beth A. Jersekey
Assistant Professor of Psychiatry and Human Behavior (Research)

Antal Jevicki
Professor of Physics

Suriya Jayapalan
Assistant Professor of Neurology

Huiling Ji
Assistant Professor of Obstetrics and Gynecology (Research)

Yongwen Jiang
Clinical Assistant Professor in Epidemiology

Tong Jiao
Senior Research Associate in Engineering

Shen Jiayi
Visiting Scholar in Theatre Arts

Hitesh K. Jindal
Assistant Professor of Medicine (Research)

Linda Jiore-Nagy
Teaching Associate in Music

Louis Frederick Jodry
Senior Lecturer in Music

Gerwald Jogl
Associate Professor of Biology

Conrad E. Johanson
Professor Emeritus of Neurosurgery

Belinda A. Johnson
Clinical Assistant Professor in Psychiatry and Human Behavior

Benjamin Johnson
Clinical Assistant Professor in Psychiatry and Human Behavior

Christine Johnson
Clinical Assistant Professor in Family Medicine

Eileen G. Johnson
Clinical Assistant Professor in Psychiatry and Human Behavior

Gary D. Johnson
Associate Professor of Neurology (Clinical)

Jennifer E. Johnson
Associate Professor of Psychiatry and Human Behavior (Research)

Julie M. Johnson
Assistant Professor of Obstetrics and Gynecology (Clinical)

Mark A. Johnson
Associate Professor of Biology

Michael P. Johnson
Clinical Assistant Professor in Medicine

Robert G. M. Johnston
Clinical Assistant Professor in Psychiatry and Human Behavior

Stephanie R. Jones
Assistant Professor of Neuroscience (Research)

Thom Jones
Clinical Professor in Theatre Arts

Plakyl J. Joseph
Clinical Assistant Professor in Medicine

David Josephson
Professor of Music

Djuro Josic
Adjunct Professor of Medicine (Research)

Donald R. Joyce
Clinical Assistant Professor in Radiation Oncology

Lynne Joyrich
Associate Professor of Modern Culture and Media

Thomas P. Jundt
Visiting Assistant Professor of History

Annmari Jurczak
Clinical Assistant Professor in Obstetrics and Gynecology

Alicia N. Justus
Assistant Professor of Behavioral and Social Sciences (Research)

David Kadmon
Clinical Assistant Professor in Family Medicine

Carl Kaestle
Professor Emeritus of Education

Samuel Kagan
Clinical Assistant Professor in Family Medicine

Odest C. Jenkins
Assistant Professor of Computer Science

Ernestine G. Jennings
Assistant Professor of Psychiatry and Human Behavior (Research)

Kathryn Jennings
Teaching Associate in Music

Carole A. Jenny
Professor of Pediatrics

Ilse M. Jenouri
Clinical Assistant Professor in Emergency Medicine

Carol J. Jensen
Clinical Assistant Professor in Psychiatry and Human Behavior

Jennifer Jeremiah
Clinical Associate Professor in Medicine

Beth A. Jersekey
Assistant Professor of Psychiatry and Human Behavior (Research)

Antal Jevicki
Professor of Physics

Suriya Jayapalan
Assistant Professor of Neurology

Huiling Ji
Assistant Professor of Obstetrics and Gynecology (Research)

Yongwen Jiang
Clinical Assistant Professor in Epidemiology
Christopher W. Kahler  
Professor of Behavioral and Social Sciences

Charles B. Kahn  
Clinical Professor in Medicine

Coppelia Kahn  
Professor of English

Jeremy A. Kahn  
Professor of Mathematics

Sewell I. Kahn  
Clinical Assistant Professor Emeritus in Medicine

Leway Kailani  
Clinical Instructor in Medicine

S. Paul Kajencki  
Clinical Assistant Professor in Family Medicine

Satyan Kalkunte  
Instructor in Pediatrics (Research)

Brett D. Kalmowitz  
Clinical Assistant Professor in Medicine

Achyut Kamat  
Clinical Associate Professor in Emergency Medicine

Shuba Kamath  
Assistant Professor of Pediatrics (Clinical)

Elena Kamenetsky  
Clinical Assistant Professor Emerita in Neurology

Michael S. Kaminer  
Adjunct Assistant Professor of Dermatology

Natalie Kampen  
Visiting Scholar in Archaeology and the Ancient World

Agnes B. Kane  
Professor of Medical Science

Rami Kantor  
Associate Professor of Medicine

Barbara T. Kao  
Clinical Assistant Professor in Pediatrics

Hung-Teh Kao  
Associate Professor of Psychiatry and Human Behavior (Research)

David Kaplan  
Clinical Assistant Professor in Emergency Medicine

Stephen R. Kaplan  
Clinical Professor Emeritus in Medicine

Nicolaos Kapouleas  
Professor of Mathematics

Mehrzig Kar  
Visiting Professor of Pembroke Center

Peter Karczmar  
Clinical Assistant Professor in Medicine

George E. Kariadakis  
Professor of Applied Mathematics

Caroline Anne Karp  
Senior Lecturer in Environmental Studies

Mohit Kasibhatla  
Clinical Assistant Professor in Radiation Oncology

Julie Katarinic  
Assistant Professor of Orthopaedics

Daniel Katz  
Lecturer in Mathematics

David E. Katz  
Clinical Assistant Professor in Medicine

Emily R. Katz  
Assistant Professor of Psychiatry and Human Behavior (Clinical)

E. Tamar Katz  
Associate Professor of English; Associate Professor of Urban Studies Program

Gary M. Katzman  
Clinical Assistant Professor in Medicine

Julie Kauer  
Professor of Medical Science; Professor of Neuroscience

Donald G. Kaufman  
Clinical Assistant Professor Emeritus in Medicine

Joel M. Kaufman  
Clinical Associate Professor in Neurology

Craig Kaufmann  
Clinical Assistant Professor in Psychiatry and Human Behavior

David Kawatu  
Assistant Professor of Pediatrics

William E. Kaye  
Professor Emeritus of Medicine

William Keach  
Professor of English

Edward Keating  
Clinical Assistant Professor in Medicine

W. Scott Keigwin  
Clinical Assistant Professor in Family Medicine

Akilah Dunu Keita  
Assistant Professor of Behavioral and Social Sciences

Gabor I. Keitner  
Professor of Psychiatry and Human Behavior

David Keller  
Adjunct Associate Professor of Family Medicine

Martin B. Keller  
Professor of Psychiatry and Human Behavior

Colleen R. Kelly  
Clinical Assistant Professor in Medicine

John F. Kelly  
Adjunct Associate Professor of Behavioral and Social Sciences

Megan M. Kelly  
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Susan M. Kelly  
Clinical Assistant Professor in Psychiatry and Human Behavior

Karl T. Kelsey  
Professor of Epidemiology; Professor of Pathology and Laboratory Medicine

Patrick J. Ketley  
Clinical Assistant Professor in Surgery (Urology)

Kathleen Elizabeth Kendra  
Clinical Assistant Professor in Psychiatry and Human Behavior

George A. Kenna  
Assistant Professor of Psychiatry and Human Behavior (Research)

Christine A. Kennedy  
Clinical Assistant Professor in Family Medicine

Michael D. Kennedy  
Professor of Sociology

James Kennelly  
Visiting Scholar in Classics

Claire Kenyon  
Professor of Computer Science

Richard W. Kenyon  
William R. Kenan, Jr. University Professor of Mathematics

Zhong Yang Belinda Ker  
Clinical Instructor in Medicine
Richard Kerbel
Adjunct Lecturer in Public Policy
Karen L. Kerman
Assistant Professor of Neurology (Clinical); Assistant Professor of Pediatrics (Clinical)
Arthur B. Kern
Clinical Professor Emeritus in Dermatology
Catherine Kerr
Assistant Professor of Family Medicine (Research)
Laura Kertz
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences
David I. Kertzer
Paul R. Dupee, Jr. University Professor of Social Science
Youenn Yves J. Kervennic
Senior Lecturer in French Studies
Martin J. Kerzer
Clinical Assistant Professor in Family Medicine
Haneesh Kesari
Assistant Professor of Engineering
Noubar Kessimian
Associate Professor of Pathology and Laboratory Medicine (Clinical)
Lisa A. Keswick
Clinical Instructor in Pediatrics
Martin Keszler
Professor of Pediatrics
Nancy Khalek
William A. Dyer, Jr. Assistant Professor of Humanities
Hanan I. Khalil
Assistant Professor of Diagnostic Imaging (Clinical)
Jacques Khalip
Associate Professor of English
Amir A. Khan
Clinical Assistant Professor in Psychiatry and Human Behavior
Razib Khaund
Clinical Assistant Professor in Family Medicine
Elias Khawam
Clinical Instructor in Medicine
Nabil Y. Khoury
Clinical Associate Professor in Obstetrics and Gynecology
Sergei Khruzhchev
Visiting Professor of Slavic Languages
Humera Khurshid
Assistant Professor of Medicine
Stephen E. Kidd
Assistant Professor of Classics
Douglas P. Kiel
Adjunct Professor of Epidemiology
Susan M. Kiene
Adjunct Assistant Professor of Behavioral and Social Sciences
Louise Sadler Kessler
Professor Emerita of Pediatrics
Jane E. Kiff
Assistant Professor of Pediatrics (Clinical)
Daniel Kim
Associate Professor of English
Eunhee Kim
Assistant Professor of Biostatistics
Eunsuk Kim
Assistant Professor of Chemistry
Hyun K. Kim
Clinical Assistant Professor in Epidemiology
Jaegwon Kim
William Herbert Perry Faunce Professor of Philosophy
Jin Ho Kim
Senior Research Associate in Engineering
Kerri Kim
Clinical Assistant Professor in Psychiatry and Human Behavior
Kyu Kwang Kim
Assistant Professor of Obstetrics and Gynecology (Research)
Kyung-Suk Kim
Professor of Engineering
Miram Kim
Clinical Assistant Professor of Medicine (Research)
Murgungaru Kimani
Visiting Senior Lecturer in Population Studies
Brian Andrew Kimble
Clinical Associate Professor in Medicine
Katherine C. Kimbrell
Clinical Instructor in Emergency Medicine
Benjamin B. Kimia
Professor of Engineering
Robert S. L. Kinder
Clinical Professor Emeritus in Surgery
Boyd P. King
Clinical Associate Professor Emeritus in Medicine
M. Dawn King
Visiting Assistant Professor of Environmental Studies
Angus I. Kingon
Professor of Engineering
Timothy Kinsella
Professor of Radiation Oncology
Malcolm M. Kirk
Clinical Assistant Professor in Medicine
Ozlem Kiri
Visiting Scholar in Political Science
Jennifer E. Kittler
Clinical Assistant Professor in Psychiatry and Human Behavior
David L. Kitzes
Clinical Associate Professor in Medicine
Frank Kleiberger
Professor of Economics
Donald E. Klein
Clinical Associate Professor in Pediatrics
Erika Klein
Clinical Assistant Professor in Obstetrics and Gynecology
Michael D. Klein
Clinical Assistant Professor in Family Medicine
Philip Klein
Professor of Computer Science
Robert B. Klein
Sylvia Kay Hassenfeld Professor of Pediatrics
Jack H. Klie
Clinical Assistant Professor in Medicine
Thomas P. Kling
Visiting Scholar in Physics
Petra Klunge
Associate Professor of Neurosurgery
James R. Klunger
Professor of Medicine
Brown University

Adam Klipfel
Clinical Assistant Professor in Surgery

Cindy E. Klipfel
Clinical Assistant Professor in Pediatrics

Margaret G. Kltzke
Clinical Assistant Professor in Psychiatry and Human Behavior

Caroline J. Klivans
Adjunct Assistant Professor of Mathematics, Applied Mathematics, and Computer Science

Thomas W. Kniesche
Associate Professor of German Studies

Brian G. Knight
Professor of Economics

George B. Knight
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Robert E. Knisley
Clinical Associate Professor Emeritus in Medicine

Paul M. Knopf
Charles A. and Helen B. Stuart Professor Emeritus of Medical Science

Valerie S. Knopik
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Behavioral and Social Sciences (Research)

Leo Kobayashi
Associate Professor of Emergency Medicine

Susan L. Koelliker
Assistant Professor of Diagnostic Imaging (Clinical)

Robert Kohn
Professor of Psychiatry and Human Behavior

Daphne Koinis-Mitchell
Associate Professor of Psychiatry and Human Behavior (Research)

Erma M. Kojc
Associate Professor of Medicine

Aravind Kokkirala
Instructor in Medicine (Clinical)

Paul Kolesnikow
Teaching Associate in Music

R. James Koness
Clinical Assistant Professor in Surgery

David Konstan
John Rowe Workman Distinguished Professor Emeritus of Classics and Professor Emeritus of Comparative Literature

Matthew A. Kopp
Clinical Associate Professor in Emergency Medicine

Gideon Koren
Professor of Medicine

Andrei Korotkov
Senior Research Associate in Physics

Kenneth S. Korr
Associate Professor of Medicine

Stefan G. Kostadinov
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Michael P. Koster
Assistant Professor of Pediatrics (Clinical)

J. Michael Kosterlitz
Harrison E. Farnsworth Professor of Physics

Renu O. Kothari
Clinical Assistant Professor in Psychiatry and Human Behavior

Christopher N. Kottke
Tamarkin Assistant Professor of Mathematics

Ashok K. Koul
Senior Lecturer in Language Studies

Savvas M. Koushiappas
Assistant Professor of Physics

Nicola M. Kouttab
Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)

Liliya Koyfman
Clinical Assistant Professor in Psychiatry and Human Behavior

Ross S. Kraemer
Professor of Religious Studies and Judaic Studies

Thomas A. Krahn
Clinical Assistant Professor in Medicine

Naomi R. Kramer
Clinical Assistant Professor in Medicine

Peter D. Kramer
Clinical Professor in Psychiatry and Human Behavior

Tim Kraska
Assistant Professor of Computer Science

Sharon R. Krause
Professor of Political Science

Virginia A. Krause
Associate Professor of French Studies

Dennis S. Krauss
Clinical Assistant Professor in Medicine

Shepard Krech III
Professor Emeritus of Anthropology

Jill A. Kreiling
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Heather L. Kreth
Clinical Assistant Professor in Psychiatry and Human Behavior

Andrea Kretzschmar
Clinical Assistant Professor in Psychiatry and Human Behavior

Shriram Krishnamurthi
Professor of Computer Science

K. Dian Kriz
Professor of History of Art and Architecture

Peter K. Kurz
Assistant Professor of Pediatrics (Clinical)

Joachim Israel Krueger
Professor of Cognitive, Linguistic, and Psychological Sciences

Brandon H. Krupp
Clinical Associate Professor in Psychiatry and Human Behavior

Magdalena Krzystolik
Clinical Assistant Professor in Surgery (Ophthalmology)

Donna A. Kucharski
Clinical Assistant Professor in Surgery (Anesthesiology)

Indrek Kulaots
Lecturer in Engineering

Sharvan K. Kumar
Professor of Engineering

Varun Kumar
Clinical Assistant Professor in Pediatrics

Tobias Kummer
Assistant Professor of Emergency Medicine (Clinical)

Sylvia Kuo
Lecturer in Economics

Arlet G. Kurkchubasche
Associate Professor of Surgery (Pediatric Surgery); Associate Professor of Pediatrics

Jayne A. Kurkjian
Clinical Assistant Professor in Psychiatry and Human Behavior

Jill A. Kurkjian
Clinical Assistant Professor in Psychiatry and Human Behavior
Kathleen Mary Kurowski
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences (Research)
Jonathan D. Kurtis
Professor of Pathology and Laboratory Medicine
Harold J. Kushner
Professor Emeritus of Applied Mathematics and Engineering and L. Herbert Ballou University Professor Emeritus
Johanna M. Kutluhan
Tamarkin Assistant Professor of Mathematics
Awewura Kwara
Associate Professor of Medicine
Rosalind E. Ladd
Visiting Scholar in Philosophy
John V. Ladetto
Clinical Assistant Professor in Medicine
John E. Lafleuer
Assistant Professor of Emergency Medicine
Donna M. Lafontaine
Clinical Associate Professor in Obstetrics and Gynecology
W. C. T. Lafrance
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Neurology (Research)
Linda L. Lagasse
Associate Professor of Pediatrics (Research)
Ricardo Lagos Escobar
Professor-at-Large in International Studies
David H. Laidlaw
Professor of Computer Science
Chandani N. Lakhiani
Assistant Professor of Pediatrics (Clinical)
Linda Laliberte-Cote
Clinical Assistant Professor in Health Services, Policy and Practice
Edward V. Lally
Professor of Medicine
Michelle A. Lally
Associate Professor of Medicine; Associate Professor of Health Services, Policy and Practice
Robert H. Lambe
Clinical Assistant Professor in Family Medicine
Jennifer F. Lambert
Clinical Assistant Professor in Psychiatry and Human Behavior
Robert E. Lambiase
Associate Professor of Diagnostic Imaging
Jon K. Lambrecht
Clinical Assistant Professor in Medicine
Chad E. Lamendola
Clinical Assistant Professor in Family Medicine
Anthony Lancaster
Herbert H Goldberger Professor Emeritus of Economics
Jene L. Lancaster
Adjunct Assistant Professor of History
Carol Landau
Clinical Professor in Psychiatry and Human Behavior; Clinical Professor in Medicine
Alan Landman
Associate Professor of Mathematics
George P. Landow
Professor Emeritus of English
Shoshana M. Landow
Clinical Assistant Professor in Dermatology
Greg Landsberg
Professor of Physics
Arthur Landy
University Professor of Molecular Biology, Cellular Biology and Biochemistry
Thomas P. Lang
Clinical Assistant Professor in Surgery (Ophthalmology)
Elizabeth Lange
Clinical Assistant Professor in Pediatrics
Thilo Sascha Lange
Adjunct Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)
Robert E. Lanou Jr
Professor of Physics (Research)
Candace S. Lapidus
Clinical Assistant Professor in Pediatrics
Kerry L. Laplante
Adjunct Associate Professor of Medicine
Elizabeth A. Laposata
Clinical Associate Professor in Pathology and Laboratory Medicine
Abbot Laptook
Professor of Pediatrics
Rebecca Laptook
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)
Charles Larmore
W. Duncan MacMillan Family Professor of the Humanities
Erica N. Larschan
Assistant Professor of Biology
Lawrence E. Larson
Professor of Engineering
Lucia Larson
Associate Professor of Medicine; Associate Professor of Obstetrics and Gynecology
Stephen A. Lassonde
Adjunct Assistant Professor of History
John C. Lathrop
Clinical Associate Professor Emeritus in Obstetrics and Gynecology
Syed A. Latif
Professor of Pathology and Laboratory Medicine (Clinical)
Helene Latzer
Post-Doctoral Scholar in Economics
Joseph Lau
Professor of Health Services, Policy and Practice
Bernd Lauenburg
Adjunct Instructor in Family Medicine
Joseph R. Lauro
Assistant Professor of Emergency Medicine (Clinical)
Joseph J. Laviola
Adjunct Assistant Professor of Computer Science (Research)
Nabil M. Lawandy
Professor of Engineering (Research)
Charles Lawrence
Professor of Applied Mathematics
Kira T. Lawrence
Adjunct Assistant Professor of Geological Sciences
W. Dwayne Lawrence
Professor of Pathology and Laboratory Medicine
Michael Barton Laws
Assistant Professor of Health Services, Policy and Practice (Research)
Bruce A. Lazarus
Clinical Assistant Professor in Family Medicine
Elizabeth Lazarus
Assistant Professor of Diagnostic Imaging
Tricia M. Leahey
Assistant Professor of Psychiatry and Human Behavior (Research)
Monique K. Lebourgeois
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
Beatrice E. Lechnor
Assistant Professor of Pediatrics
Seymour Lederberg
Professor Emeritus of Medical Science
Catherine Lee
Assistant Professor of Psychiatry and Human Behavior (Clinical)
Christina S. Lee
Adjunct Associate Professor of Behavioral and Social Sciences
David Lee
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pediatrics
George Lee
Clinical Assistant Professor in Medicine
Han-Kyu Lee
Instructor in Neurology (Research)
Lawrence W. Lee
Clinical Assistant Professor in Family Medicine
Michael H. Lee
Assistant Professor of Emergency Medicine
Robert George Lee
Associate Professor of American Studies
Sung-Hee Rhim Lee
Clinical Assistant Professor in Obstetrics and Gynecology
Sung-Woo Lee
Assistant Professor of Radiation Oncology
Yun J. Lee
Clinical Assistant Professor in Pediatrics
Michelle J. Lefebvre
Clinical Instructor in Pediatrics
Janet Lefkowitz
Clinical Instructor in Obstetrics and Gynecology
Robert Legare
Associate Professor of Obstetrics and Gynecology (Clinical); Associate Professor of Medicine (Clinical)
Mark P. Legolvan
Assistant Professor of Pathology and Laboratory Medicine
Frank M. Lehman
Visiting Lecturer in Music
Jessaca B. Leinaeweaver
Vartan Gregorian Assistant Professor of Anthropology
Philip E. Leis
Professor Emeritus of Anthropology
Kimberly A. Leite-Morriss
Adjunct Assistant Professor of Behavioral and Social Sciences
Mary D. Lekas
Clinical Professor Emerita in Surgery
Natalie Leland
Adjunct Assistant Professor of Health Services, Policy and Practice
Neal S. Leleiko
Professor of Pediatrics
Louis A. Leone
Professor Emeritus of Medicine
Michael J. Lepore
Adjunct Assistant Professor of Health Services, Policy and Practice
Victor D. Lerish
Clinical Assistant Professor in Pediatrics
Heather M. Leslie
Peggy and Henry D. Sharpe Assistant Professor of Environmental Studies
Barry M. Lester
Professor of Psychiatry and Human Behavior; Professor of Pediatrics
Natalie Lester
Clinical Assistant Professor in Psychiatry and Human Behavior
Emily A. Leven
Instructor in Medicine (Clinical)
William A. Levin
Clinical Associate Professor in Medicine
Adam Levine
Assistant Professor of Emergency Medicine
Daniel J. Levine
Clinical Associate Professor in Medicine
Laura Levine
Clinical Assistant Professor in Psychiatry and Human Behavior
Scott M. Levine
Assistant Professor of Diagnostic Imaging (Clinical)
Todd P. Levine
Assistant Professor of Psychiatry and Human Behavior (Research)
Andrew T. Levinson
Assistant Professor of Medicine (Clinical)
Paul David Levinson
Associate Professor of Medicine
Alexander Levitsky
Professor of Slavic Languages
Carol S. Levitt
Clinical Assistant Professor in Family Medicine
Dore J. Levy
Professor of Comparative Literature; Professor of East Asian Studies
Mitchell M. Levy
Professor of Medicine
William J. Lewander
Professor of Emergency Medicine; Professor of Pediatrics
Carol T. Lewis
Associate Professor of Pediatrics (Clinical)
David C. Lewis
Professor Emeritus of Behavioral and Social Sciences
Thomas A. Lewis
Associate Professor of Religious Studies
Anlong Li
Instructor in Medicine (Research)
Hong-Xia Li
Visiting Scientist in Applied Mathematics
Jin Li
Associate Professor of Education
Jisu Li
Associate Professor of Medicine (Research)
Luen-Chau Li
Visiting Professor of Applied Mathematics (Research)
Ming Li
Assistant Professor of Medicine (Research)
Qing Li
Visiting Associate Professor of Medicine
Weiyan Li
Instructor in Medicine (Research)
Xingjie Helen Li
Assistant Professor of Applied Mathematics
Yan Liang
Professor of Geological Sciences

N. Peter Libbey
Clinical Associate Professor in Pathology and Laboratory Medicine

Jonah M. Licht
Clinical Assistant Professor in Medicine

Rashmi Shetty Licht
Clinical Assistant Professor in Surgery (Urology)

Warren E. Licht
Clinical Assistant Professor in Medicine

Stephen Lichtenbaum
Clinical Assistant Professor in Family Medicine

Kristin N. Lichtenberg
Clinical Assistant Professor in Psychiatry and Human Behavior

Diana Elliott Lidofsky
Clinical Assistant Professor in Psychiatry and Human Behavior

Sheldon Lidofsky
Clinical Assistant Professor in Medicine

Paul B. Lieberman
Associate Professor of Psychiatry and Human Behavior (Clinical)

Philip Lieberman
George Hazard Crooker University Professor Emeritus

Otto Liebmann
Assistant Professor of Emergency Medicine

Stacey P. Lievense
Clinical Assistant Professor in Obstetrics and Gynecology

Joseph T. Lifrak
Clinical Assistant Professor in Family Medicine

Jason Lillis
Assistant Professor of Psychiatry and Human Behavior (Research)

Eng Beng Lim
Assistant Professor of Theatre Arts

Yow-Pin Lim
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Richard S. Limbird Jr
Clinical Assistant Professor in Orthopaedics

Su-Ching Lin
Visiting Lecturer in East Asian Studies

James G. Linakis
Professor of Emergency Medicine; Professor of Pediatrics

Alisa Linarejos Jimenez
Visiting Lecturer in Hispanic Studies

Evelyn Lincoln
Associate Professor of History of Art and Architecture; Associate Professor of Italian Studies

Monica Linde
Lecturer in Neuroscience

David G. Lindquist
Assistant Professor of Emergency Medicine (Clinical)

Jennifer L. Lindsay
Lecturer in Education

David P. Lindstrom
Professor of Sociology

Xinsheng Sean Ling
Professor of Physics

Crystal D. Linkletter
Adjunct Assistant Professor of Biostatistics

James Lippincott
Clinical Assistant Professor in Family Medicine

Diane Lipscombe
Professor of Neuroscience

Julie A. Lipot
Visiting Scholar in Hispanic Studies

Nancy T. Littell
Clinical Assistant Professor in Medicine

Michael L. Littman
Professor of Computer Science

Joseph T. C. Liu
Professor of Engineering

Paul Liu
Professor of Surgery (Clinical)(Plastic Surgery)

Tao Liu
Assistant Professor of Biostatistics (Research)

Zhi-Hong Liu
Adjunct Professor of Medicine

David J. Livingston
Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Hilda Liorens
Visiting Assistant Professor of Race and Ethnicity in America

Elizabeth E. Lloyd-Richardson
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Albert C. Lo
Associate Professor of Neurology; Associate Professor of Epidemiology

Debra J. Lobato
Professor of Psychiatry and Human Behavior (Clinical); Professor of Pediatrics (Clinical)

Gregory R. Lockhart
Associate Professor of Emergency Medicine (Clinical); Associate Professor of Pediatrics (Clinical)

John Logan
Professor of Sociology

Joanne L. Lomas-Neira
Instructor in Surgery (Research)

Michele M. Lomme
Assistant Professor of Pathology and Laboratory Medicine

Thomas Lonardo
Adjunct Lecturer in Economics

Cynthia L. Loncar
Assistant Professor of Pediatrics (Research)

Richard Long
Adjunct Clinical Associate Professor in Family Medicine

Richard H. Longabaugh
Professor Emeritus of Psychiatry and Human Behavior (Research)

John R. Lonks
Associate Professor of Medicine

Salvatore J. Loporchio
Clinical Assistant Professor in Surgery (Ophthalmology)

Peem Lorvidhaya
Clinical Assistant Professor in Medicine

Phyllis T. Losikoff
Assistant Professor of Pediatrics (Clinical)

Eric B. Loucks
Assistant Professor of Epidemiology

Mariam Louis
Assistant Professor of Medicine

Sydney Louis
Professor Emeritus of Neurology

Ana P. Lourencz
Assistant Professor of Diagnostic Imaging
Glenn C. Loury
Merton P. Stoltz Professor of Social Sciences
Christine M. Low
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)
David Lowe
Associate Professor of Physics
Elizabeth A. Lowenhaupt
Instructor in Psychiatry and Human Behavior
Bing Lu
Adjunct Assistant Professor of Family Medicine
Qing Lu
Assistant Professor of Medicine (Research)
Steven D. Lubar
Professor of American Studies; Professor of History; Professor of History of Art and Architecture
Phillip R. Lucas
Clinical Associate Professor in Orthopaedics
Arnold M. Ludwig
Adjunct Professor of Psychiatry and Human Behavior
Melissa Ludwig
Clinical Assistant Professor in Psychiatry and Human Behavior
Ivana Lukacova-Zib
Assistant Professor of Medicine (Clinical)
Katarina Lukatela
Clinical Assistant Professor in Psychiatry and Human Behavior
Nancy Luke
Associate Professor of Sociology
Francois I. Luk
Professor of Surgery; Professor of Obstetrics and Gynecology; Professor of Pediatrics
Gary K. Lundstrom
Clinical Instructor in Diagnostic Imaging
Xi Luo
Assistant Professor of Biostatistics
Yan Luo
Research Fellow in Cognitive, Linguistic, and Psychological Sciences
Esperanza Godoy Luque
Teaching Associate in Hispanic Studies
Mark Lurie
Assistant Professor of Epidemiology; Assistant Professor of Medicine
Catherine A. Lutz
Thomas J. Watson, Jr. Family Professor of International Studies
Kerri Luzzo
Clinical Instructor in Family Medicine
Amanda Lynch
Professor of Geological Sciences
Mary E. Lyster
Clinical Assistant Professor in Family Medicine
Anna A. Lysyanskaya
Associate Professor of Computer Science
John J. Machata
Clinical Assistant Professor in Family Medicine
James Mackillop
Adjunct Associate Professor of Behavioral and Social Sciences
Scott F. Mackinnon
Clinical Assistant Professor in Surgery (Anesthesiology)
David B. Maclean
Adjunct Associate Professor of Medicine
Roderick B. Macleod
Teaching Associate in Music
Yvon Jean Maday
Visiting Professor of Applied Mathematics
Susanna R. Magee
Assistant Professor of Family Medicine
Henry G. Magendantz
Clinical Associate Professor in Obstetrics and Gynecology
Molly Magill
Assistant Professor of Behavioral and Social Sciences (Research)
James O. Maher
Clinical Assistant Professor in Orthopaedics
Michael J. Maher
Assistant Professor of Medicine (Clinical)
Martha B. Mainiero
Professor of Diagnostic Imaging
Abby L. Maizel
Adjunct Professor of Pathology and Laboratory Medicine
Samir H. Makarious
Clinical Assistant Professor in Medicine
Tariq K. Malik
Clinical Associate Professor in Medicine
Bertram F. Malle
Professor of Cognitive, Linguistic, and Psychological Sciences
John Mallet-Paret
George Ide Chase Professor of Physical Science
Paul F. Malloy
Professor of Psychiatry and Human Behavior
Steven A. Mallozzi
Clinical Assistant Professor in Medicine
Charles A. Malone
Professor Emeritus of Psychiatry and Human Behavior
Patrick M. Malone
Professor Emeritus of American Studies
Shafiq T. Mamdani
Clinical Assistant Professor in Medicine
Maria C. Mancebo
Assistant Professor of Psychiatry and Human Behavior (Research)
Maud Mandel
Associate Professor of History and Judaic Studies
David E. Mandelbaum
Professor of Neurology; Professor of Pediatrics
Shreyas Mandre
Assistant Professor of Engineering
Shamlal Mangray
Associate Professor of Pathology and Laboratory Medicine (Clinical)
James Manis
Clinical Associate Professor Emeritus in Medicine
Bradley Manning
Clinical Instructor in Medicine
Jeffrey Manning
Clinical Assistant Professor in Family Medicine
Margaret M. Mannix
Assistant Professor of Psychiatry and Human Behavior (Clinical); Assistant Professor of Pediatrics (Clinical)
Anthony Lynn Mansell
Professor Emeritus of Pediatrics
Fadi F. Mansourati
Clinical Assistant Professor in Medicine
Kalyan Mantripragada
Clinical Instructor in Medicine
Ginger L. Manzo
Clinical Assistant Professor in Psychiatry and Human Behavior
Pierre R. Manzo  
Clinical Assistant Professor in Family Medicine

Abigail Marcaccio  
Assistant Professor of Psychiatry and Human Behavior (Research)

Beth G. Marcaccio  
Clinical Assistant Professor in Obstetrics and Gynecology

Edward J. Marcaccio  
Associate Professor of Surgery (Clinical)

John R. Marcaccio  
Clinical Assistant Professor Emeritus in Surgery (Urology)

Vincent F. Marcaccio  
Clinical Instructor in Medicine

David A. Marcoux  
Clinical Assistant Professor in Medicine

Bess Marcus  
Adjunct Professor of Behavioral and Social Sciences; Adjunct Professor of Psychiatry and Human Behavior

Christian Marek  
Visiting Scholar in Classics

Peter S. Margolis  
Clinical Assistant Professor in Medicine

Louis J. Marino  
Clinical Associate Professor in Psychiatry and Human Behavior

Peter M. Marino  
Adjunct Lecturer in Public Policy

Humphrey J. Maris  
Hazard Professor of Physics

Hon Fong Louie Mark  
Clinical Professor Emerita in Pediatrics

David Mark Welch  
Assistance Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Donald J. Marsh  
Frank L. Day Professor Emeritus of Biology

Brandon Di Marshall  
Assistant Professor of Epidemiology

Jean McElroy Marshall  
Professor of Medical Science

John Marshall  
Professor of Medical Science

Lowry Marshall  
Professor of Theatre Arts

Robert J. Marshall  
Clinical Associate Professor in Health Services, Policy and Practice

Carmen Marsit  
Adjunct Assistant Professor of Epidemiology

John Bradley Marston  
Professor of Physics

Carla M. Martin  
Clinical Assistant Professor in Family Medicine

Douglas W. Martin  
Assistant Professor of Medicine (Clinical)

Edward W. Martin  
Clinical Associate Professor in Medicine

Rosemarie Ann Martin  
Assistant Professor of Behavioral and Social Sciences (Research)

Saul A. Martin  
Clinical Assistant Professor Emeritus in Psychiatry and Human Behavior

Ronald L. Martinez  
Professor of Italian Studies

Elena Festa Martino  
Visiting Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Daniel Toby Marwil  
Clinical Instructor in Pediatrics

Gabriela B. Masko  
Clinical Assistant Professor in Radiation Oncology

Andrew Maslow  
Clinical Associate Professor in Surgery (Anesthesiology)

Carole Maso  
Professor of Literary Arts

Paul Mason  
Teaching Associate in Music

Susanna Massa  
Visiting Lecturer in Italian Studies

Nadine R. Mastroleo  
Assistant Professor of Behavioral and Social Sciences (Research)

Thais P. Mather  
Adjunct Assistant Professor of Molecular Microbiology and Immunology

Donnath Mathews  
Assistant Professor of Medicine (Clinical)

Edith Mathiowitz  
Professor of Medical Science; Professor of Engineering

Christopher M. Matkovic  
Clinical Assistant Professor in Psychiatry and Human Behavior

Kristen A. Matteson  
Clinical Assistant Professor of Obstetrics and Gynecology

Cara A. Matthews  
Assistant Professor of Obstetrics and Gynecology

Jennifer L. Maude  
Clinical Instructor in Medicine

Kate E. Mavrich  
Assistant Professor of Medicine (Clinical)

Martin R. Maxey  
Professor of Applied Mathematics

Kenneth Hugh Mayer  
Adjunct Professor of Medicine; Adjunct Professor of Epidemiology

William W. Mayo-Smith  
Professor of Diagnostic Imaging

Jeffrey M. Mazer  
Assistant Professor of Medicine

Peter J. Mazzaglia  
Assistant Professor of Surgery

Aldo Mazzucchelli  
Assistant Professor of Hispanic Studies

Jeanne McCaffery  
Associate Professor of Psychiatry and Human Behavior (Research)

Kathleen M. McCarten  
Associate Professor of Diagnostic Imaging (Clinical); Associate Professor of Pediatrics (Clinical)

James R. McCartney  
Associate Professor Emeritus of Psychiatry and Human Behavior

John P. McCaskey  
Visiting Lecturer in Political Science

Thomas McCauley  
Clinical Assistant Professor in Surgery (Ophthalmology)

James L. McClain  
Professor of History

Adam M. McCloskey  
Assistant Professor of Economics

Steven G. McCloy  
Clinical Assistant Professor in Medicine
Donald E. McClure  
Professor Emeritus of Applied Mathematics

Bryna J. McConarthy  
Assistant Professor of Medicine (Clinical)

David W. McConville  
Clinical Assistant Professor in Psychiatry and Human Behavior

F. Dennis McCool  
Professor of Medicine

Carolyn K. McCourt  
Assistant Professor of Obstetrics and Gynecology

Charles E. McCoy  
Clinical Associate Professor in Medicine

Rose McDermott  
Professor of Political Science

Ian M. McDonald  
Visiting Lecturer in Literary Arts

Stefan McDonough  
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology

Rebecca R. McEachern  
Assistant Professor of Pediatrics (Clinical)

Brian McEleney  
Clinical Professor in Theatre Arts

Matthew Richards McGarrell  
Senior Lecturer in Music

Kelly Ann McGarry  
Associate Professor of Medicine

Michael P. McGarty  
Lecturer in Theatre Arts

Stephen T. McGarvey  
Professor of Epidemiology

John E. McGearry  
Assistant Professor of Psychiatry and Human Behavior

Brian M. McGillen  
Assistant Professor of Medicine (Clinical)

John McGonigle  
Clinical Instructor in Family Medicine

Edward D. McGookin  
Clinical Associate Professor in Pediatrics; Clinical Associate Professor in Family Medicine

Andrew P. McGrath  
Clinical Instructor in Pediatrics

Margaret M. McGrath  
Adjunct Professor of Pediatrics

Alyson J. McGregor  
Assistant Professor of Emergency Medicine

Patrick J. McGuigan  
Adjunct Lecturer in Public Policy

Patrick McHugh  
Lecturer in Engineering

James T. McIlwain  
Sidney A. Fox and Dorothea Doctors Fox Professor Emeritus of Ophthalmology and Visual Science

Kevin M. McKay  
Clinical Assistant Professor in Psychiatry and Human Behavior

George R. McKendall  
Associate Professor of Medicine

Michael McKeown  
Professor of Medical Science

Kevin McLaughlin  
Nicholas Brown Professor of Oratory and Belles Lettres

Nicole McLaughlin  
Assistant Professor of Psychiatry and Human Behavior (Research)

Suzanne McLaughlin  
Assistant Professor of Pediatrics and Medicine

Paul N. McMillan  
Associate Professor of Pathology and Laboratory Medicine (Clinical); Associate Professor of Neurosurgery (Clinical)

Joseph M. McNamara  
Assistant Professor of Pediatrics (Clinical)

Megan J. McNamara  
Clinical Instructor in Emergency Medicine

Lynn McNicoll  
Associate Professor of Medicine (Clinical)

Laura H. McPeake  
Assistant Professor of Emergency Medicine (Clinical)

William H. McQuade  
Adjunct Assistant Professor of Family Medicine

Elizabeth L. McQuaid  
Clinical Instructor in Medicine

Anthony E. Mega  
Associate Professor of Medicine (Clinical); Associate Professor of Surgery (Clinical)(Urology)

Joseph Vincent Meharg  
Adjunct Assistant Professor of Medicine

Niharika D. Mehta  
Assistant Professor of Medicine (Clinical)

Barbara J. Meier  
Senior Lecturer in Computer Science

Joseph S. Meisel  
Adjunct Assistant Professor of History

Christopher Melhus  
Adjunct Assistant Professor of Radiation Oncology

Jerry Melillo  
Professor of Ecology and Evolutionary Biology (MBL)

Michelle L. Mellon  
Assistant Professor of Neurology

Michael J. Mello  
Associate Professor of Emergency Medicine; Associate Professor of Health Services, Policy and Practice

Blaise S. Melly  
Assistant Professor of Economics

A. Sattar N. Memon  
Clinical Associate Professor Emeritus in Medicine

Baltasar Mena  
Visiting Professor of Engineering

Lisa M. Menard-Manlove  
Clinical Assistant Professor in Family Medicine

Ulrike Mende  
Associate Professor of Medicine
Manuela M. Mendes
Clinical Assistant Professor in Family Medicine
Amy Mendillo
Teaching Associate in Music
Govind Menon
Associate Professor of Applied Mathematics
Judith S. Mercer
Adjunct Professor of Pediatrics
Roland C. Merchant
Associate Professor of Emergency Medicine; Associate Professor of Epidemiology
Lisa Merck
Assistant Professor of Emergency Medicine
Robert D. Meringolo
Clinical Associate Professor in Medicine
Leonard A. Mermel
Professor of Medicine
Stephen T. Mernoff
Associate Professor of Neurology (Clinical)
Stephanie Merrim
Professor of Comparative Literature and Hispanic Studies
Christopher H. Merritt
Assistant Professor of Emergency Medicine
Brian Mertes
Clinical Professor in Theatre Arts
John A. Mertus
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences (Research)
Geralyn M. L. Messerlian
Professor of Pathology and Laboratory Medicine
Jane Metrik
Assistant Professor of Behavioral and Social Sciences (Research)
Keith A. Metzger
Adjunct Assistant Professor of Ecology and Evolutionary Biology
Markus Meuwly
Adjunct Associate Professor of Chemistry
David R. Meyer
Professor Emeritus of Sociology and Urban Studies Program
Stylianos G. Michalopoulos
Assistant Professor of Economics
Dominique S. Michaud
Associate Professor of Epidemiology
Jacqueline Michaud
Clinical Instructor in Medicine
Ian Michelow
Assistant Professor of Pediatrics
Ralph P. Mielch
Associate Professor Emeritus of Medical Science
Michael E. Migliori
Clinical Professor in Surgery (Ophthalmology)
Stephen J. Migliori
Assistant Professor of Surgery (Clinical)(Laparoscopy)
John E. Mignano
Adjunct Instructor in Radiation Oncology
Jeffrey P. Migneault
Clinical Assistant Professor in Family Medicine
Lisa M. Mignone
Assistant Professor of Classics
Ivaylo B. Mihaylov
Assistant Professor of Radiation Oncology
Maria D. Mileno
Associate Professor of Medicine
Alison Miller
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
E. Bradley Miller
Clinical Assistant Professor in Surgery (Urology)
Edward A. Miller
Adjunct Associate Professor of Health Services, Policy and Practice
Howard Miller
Clinical Assistant Professor in Surgery (Urology)
Ivan W. Miller
Professor of Psychiatry and Human Behavior
Janice S. Miller
Clinical Assistant Professor in Family Medicine
Kenneth Raymond Miller
Professor of Biology
Kiri M. Miller
Associate Professor of Music
Linda B. Miller
Visiting Scholar in International Relations
Margaret Miller
Associate Professor of Medicine; Associate Professor of Obstetrics and Gynecology
Marsha Miller
Clinical Assistant Professor in Family Medicine
Susan Miller
Professor of Health Services, Policy and Practice (Research)
Ralph Edward Milliken
Assistant Professor of Geological Sciences
Richard P. Millman
Professor of Medicine and Pediatrics
David R. Mills
Assistant Professor of Medicine (Research)
Taro Minami
Assistant Professor of Medicine (Clinical)
Diane E. Minasian
Clinical Assistant Professor in Family Medicine
Martin M. Miner
Clinical Associate Professor in Family Medicine; Clinical Associate Professor in Surgery (Urology)
Thomas J. Miner
Associate Professor of Surgery
Jane Miniutti
Clinical Assistant Professor in Family Medicine
Robert Miranda Jr
Associate Professor of Psychiatry and Human Behavior (Research)
John P. Miskovsky
Clinical Assistant Professor in Medicine
Cristina L. Mitchell
Clinical Assistant Professor in Family Medicine
Vesna Mitrovic
Associate Professor of Physics
Josef Mittlemann
Adjunct Lecturer in Engineering
Amy C. B. Milan
Assistant Professor of Geological Sciences
Vladan Milan
Assistant Professor of Engineering (Research)
John Modell
Professor Emeritus of Education and Sociology
Poonam Modha
Clinical Assistant Professor in Psychiatry and Human Behavior
Jeffrey S. Moffit  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Susan L. Moffitt  
Mary Tefft and John Hazen White, Sr. Assistant Professor of Political Science and Public Policy

Heather Silber Mohamed  
Visiting Lecturer in Political Science

Leslie C. Mohlman  
Clinical Instructor in Pediatrics

Ethan Moitra  
Assistant Professor of Psychiatry and Human Behavior (Research)

Rebecca M. Molholt  
Assistant Professor of History of Art and Architecture

Joyce E. Monac  
Clinical Assistant Professor in Pediatrics

Jack M. Monchik  
Clinical Professor in Surgery (Endocrine Surgery)

Keith O. Monchik  
Clinical Assistant Professor in Family Medicine

Shahriar Mondanipour  
Visiting Professor of Literary Arts

Brian Montague  
Assistant Professor of Medicine; Assistant Professor of Health Services, Policy and Practice

Terri L. Montague  
Assistant Professor of Medicine

Alain J. Montegut  
Adjunct Assistant Professor of Family Medicine

George Monteiro  
Professor Emeritus of English

Lois A. Monteiro  
Professor Emerita of Behavioral and Social Sciences

James E. Monti  
Clinical Associate Professor in Emergency Medicine

Peter M. Monti  
Donald G. Millar Distinguished Professor of Alcohol and Addiction Studies

Christine Montross  
Assistant Professor of Psychiatry and Human Behavior

Carmen V. Monzon  
Clinical Assistant Professor in Psychiatry and Human Behavior; Clinical Assistant Professor in Medicine

Christopher I. Moore  
Associate Professor of Neuroscience

Jason H. Moore  
Adjunct Associate Professor of Psychiatry and Human Behavior

Kym Moore  
Assistant Professor of Theatre Arts

Richard G. Moore  
Associate Professor of Obstetrics and Gynecology

Robert K. Moore  
Visiting Scholar in Cognitive, Linguistic, and Psychological Sciences

Finnian Moore-Gerety  
Visiting Lecturer in Religious Studies

Vincent Mor  
Florence Pirece Grant University Professor

Luis Vicente Mora  
Visiting Lecturer in Hispanic Studies

Sandro Mario Moraldo  
Visiting Professor of German Studies

Eduardo Morales  
Clinical Instructor in Medicine

John H. Moran  
Clinical Associate Professor in Pediatrics

Christopher J. Morath  
Adjunct Assistant Professor of Physics

Sarah Morgen  
Clinical Instructor in Family Medicine

James L. Morgan  
Professor of Cognitive, Linguistic, and Psychological Sciences

Jeffrey R. Morgan  
Associate Professor of Medical Science; Associate Professor of Engineering

Thomas F. Morgan  
Clinical Assistant Professor in Neurology

Richard V. Morgera  
Clinical Assistant Professor in Family Medicine

William J. Moroco  
Clinical Instructor in Pediatrics

James A. Morone Jr  
Professor of Political Science and Urban Studies Program

Jody Morr  
Adjunct Assistant Professor of Radiation Oncology

David J. Morris  
Professor of Pathology and Laboratory Medicine

Paul E. Morrissey  
Associate Professor of Surgery

Eric M. Morrow  
Assistant Professor of Biology; Assistant Professor of Psychiatry and Human Behavior

Kathleen M. Morrow  
Associate Professor of Psychiatry and Human Behavior (Research)

Douglass H. Morse  
Hermon Bumpus Professor Emeritus of Biology

John Rollin Morton  
Clinical Assistant Professor in Family Medicine

James R. Moses  
Lecturer in Music

Steven F. Moss  
Professor of Medicine

Albert S. Most  
Professor of Medicine

Ourida Mostefai  
Visiting Scholar in French Studies

Samir G. Moubayed  
Clinical Associate Professor Emeritus in Obstetrics and Gynecology

Bernard A. Moule  
Clinical Assistant Professor in Surgery (Urology)

Anne W. Moulton  
Associate Professor of Medicine

Anthony Moultcn  
Clinical Professor in Surgery (Cardiothoracic Surgery)

Jonathan S. Movson  
Assistant Professor of Diagnostic Imaging (Clinical)

Kimberly L. Movry  
Robin Chemers Neustein Professor of Biomedicine

Jennie J. Muglia  
Associate Professor of Dermatology (Clinical)

Elias I. Muhanna  
Assistant Professor of Comparative Literature

Nadia Mujahid  
Assistant Professor of Medicine (Clinical)

Tokir Mujtaba  
Clinical Instructor in Medicine
Vincent A. Mukkada  
Assistant Professor of Pediatrics (Clinical)

Sharon Mullane  
Clinical Assistant Professor in Family Medicine

Tracy K. Mullare  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jeffrey M. Muller  
Professor of History of Art and Architecture

David Mumford  
Professor Emeritus of Applied Mathematics

Jeremy R. Mumford  
Visiting Assistant Professor of History

Joseph L. Mundy  
Professor of Engineering (Research)

Annmarie Munoz  
Clinical Assistant Professor in Surgery (Anesthesiology)

Kaivan Munshi  
Professor of Economics

Christopher S. Muratore  
Assistant Professor of Surgery; Assistant Professor of Pediatrics

Brian L. Murphy  
Clinical Associate Professor in Diagnostic Imaging

John A. Murphy  
Clinical Assistant Professor Emeritus in Obstetrics and Gynecology

John B. Murphy  
Professor of Medicine; Professor of Family Medicine

Marjorie A. Murphy  
Professor of Surgery (Clinical)(Ophthalmology)

Timothy P. Murphy  
Professor of Diagnostic Imaging

Andrea Murray  
Visiting Lecturer in Anthropology

Anne L. Murray  
Clinical Assistant Professor in Obstetrics and Gynecology

David W. Murray  
Lecturer in Environmental Studies

Rolland D. Murray  
Associate Professor of English

Jayasimha N. Murthy  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)

Krithika M. Muruganandan  
Assistant Professor of Emergency Medicine (Clinical)

Sandra J. Musial  
Clinical Assistant Professor in Pediatrics

John F. Mustard  
Professor of Geological Sciences

Ann Wanjiru Mwangi  
Adjunct Assistant Professor of Biostatistics

Tracey L. Myatt  
Clinical Assistant Professor in Pediatrics

Deborah L. Myers  
Professor of Obstetrics and Gynecology

Emily B. Myers  
Adjunct Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

James R. Myers  
Clinical Associate Professor in Medicine

Wade Myers  
Professor of Psychiatry and Human Behavior

Eleftherios Mylonakis  
Professor of Medicine

Paul T. Myoda  
Assistant Professor of Visual Art

Drayton Nabers  
Associate Professor of English

Howard L. Nachamie  
Assistant Professor of Medicine (Clinical)

Ahmed Nadeem  
Clinical Assistant Professor in Medicine

Sriniketh S. Nagavarapu  
Assistant Professor of Economics and Environmental Studies

Igor Najfeld  
Visiting Scholar in Applied Mathematics

Peter Nakhla  
Clinical Instructor in Medicine

Aman Nanda  
Associate Professor of Medicine

Anthony M. Napoli  
Assistant Professor of Emergency Medicine

Meenakshi Narain  
Professor of Physics

Sriniwas Narayanaswamy  
Clinical Instructor in Medicine

Justin M. Nash  
Associate Professor of Family Medicine; Associate Professor of Psychiatry and Human Behavior

Marjorie Nasin  
Assistant Professor of Pediatrics (Clinical)

Jack Nassau  
Clinical Associate Professor in Psychiatry and Human Behavior

Andrew T. Nathanson  
Clinical Associate Professor in Emergency Medicine

Betsabé Navarro-Romero  
Teaching Associate in Hispanic Studies

Rebecca Nedostup  
Associate Professor of History

Christopher Neill  
Associate Professor of Ecology and Evolutionary Biology (MBL)

Marguerite A. Neill  
Associate Professor of Medicine

Ezequiel Neimark  
Assistant Professor of Pediatrics (Clinical)

Peter Gale Nelson  
Senior Lecturer in Literary Arts

Lina R. Nemchenok  
Clinical Instructor in Medicine

Saed Nemr  
Clinical Instructor in Medicine

Nicolà Neretti  
Assistant Professor of Biology

Predrag V. Neskovic  
Adjunct Assistant Professor of Brain Science (Research)

Elizabeth M. Nestor  
Clinical Professor in Emergency Medicine

David Neumann  
Assistant Professor of Diagnostic Imaging (Clinical)

Dietrich Neumann  
Professor of History of Art and Architecture; Professor of Italian Studies; Professor of Urban Studies Program

Laura S. Nevel  
Clinical Assistant Professor in Obstetrics and Gynecology
Joshua Neves
Assistant Professor of Modern Culture and Media

Chad P. Nevola
Clinical Instructor in Pediatrics

Paige E. Newby-Henderson
Visiting Assistant Professor of Geological Sciences

Karen A. Newman
Owen F. Walker ’33 Professor of Humanities and Professor of Comparative Literature

Lucile F. Newman
Professor Emerita of Biostatistics

Michael Newstein
Adjunct Assistant Professor of Medicine

Christopher Newton
Clinical Assistant Professor in Surgery (Ophthalmology)

Karen Y. Ng
Clinical Assistant Professor in Family Medicine

Thomas Ng
Associate Professor of Surgery (Cardiothoracic Surgery)

Thanh Chi Nguyen
Adjunct Lecturer in Economics

Toan T. Nguyen
Prager Assistant Professor of Applied Mathematics

Hao Ni
Research Associate in Mathematics

Raymond S. Niaura
Professor of Psychiatry and Human Behavior

Guy R. Nicola
Clinical Associate Professor in Surgery; Clinical Associate Professor in Family Medicine

Linda Nici
Clinical Professor in Medicine

Douglas R. Nickel
Andrea V. Rosenthal Professor of History of Art and Architecture

Kate M. Nielsen
Clinical Assistant Professor in Psychiatry and Human Behavior

Heather M. Niemeier
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Pura Nieto Hernandez
Senior Lecturer in Classics

Peter T. Nigri
Clinical Assistant Professor in Surgery (Otolaryngology)

Nicolas Nikolski
Visiting Professor of Mathematics

Eduardo A. Nillni
Professor of Medicine (Research); Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Ted D. Nirendberg
Associate Professor of Psychiatry and Human Behavior (Research); Associate Professor of Emergency Medicine (Research)

John D. Nisbet II
Clinical Assistant Professor in Obstetrics and Gynecology

Arthur W. Noel
Clinical Assistant Professor in Diagnostic Imaging

Patricia A. Nolan
Adjunct Associate Professor of Health Services, Policy and Practice

Thomas E. Noonan
Clinical Assistant Professor in Medicine

Georg Noren
Professor Emeritus of Neurosurgery

Maureen Nosal
Adjunct Lecturer in Education

Melissa B. Nothnagle
Associate Professor of Family Medicine

Richard B. Noto
Professor of Diagnostic Imaging (Clinical)

Roger H. Nozaki
Lecturer in Sociology

Judith Nudelman
Clinical Assistant Professor in Family Medicine

Nicole R. Nugent
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)

Tara E. Nummedal
Associate Professor of History; Associate Professor of Italian Studies

Amy Nunn
Assistant Professor of Medicine (Research); Assistant Professor of Behavioral and Social Sciences (Research)

Arto V. Nurmikko
L. Herbert Ballou University Professor of Engineering

Elena Oancea
Assistant Professor of Medical Science

Dina Obeid
Visiting Scholar in Physics

John W. O’Bell
Assistant Professor of Medicine (Clinical)

Barbara M. O’Brien
Assistant Professor of Obstetrics and Gynecology

Erin M. O’Brien
Clinical Assistant Professor in Psychiatry and Human Behavior

James A. O’Brien
Assistant Professor of Obstetrics and Gynecology (Clinical)

Jill A. O’Brien
Clinical Instructor in Medicine

J. Michael O’Connell
Clinical Instructor in Medicine

Monica Hairston O’Connell
Fellow in American Studies

Bonnie O’Connor
Professor of Pediatrics (Clinical)

Katja Odening
Adjunct Assistant Professor of Medicine

Patricia Ogera
Clinical Assistant Professor in Pathology and Laboratory Medicine

Daekon Oh
Visiting Scientist in Engineering

Hee Oh
Professor of Mathematics

Kathleen A. O’Heelan
Clinical Assistant Professor in Family Medicine

Richard K. Okhmacht
Clinical Associate Professor in Pediatrics

Michal Oklot
Assistant Professor of Slavic Languages

Anthony J. Oldcorn
Professor Emeritus of Italian Studies

Rudolf Oldenbourg
Professor of Physics (MBL)

Nicklas B. E. Oldenburg
Clinical Assistant Professor in Radiation Oncology

G. Richard Olds
Adjunct Professor of Medicine
Jeanne M. Oliva  
Clinical Assistant Professor in Medicine

Alvaro Olivares  
Clinical Assistant Professor in Psychiatry and Human Behavior

Ruben Oliven  
Adjunct Professor of International Studies

Karen Oliver  
Clinical Assistant Professor in Psychiatry and Human Behavior

Susan P. Oliverio  
Assistant Professor of Medicine (Clinical)

Adam Olszewski  
Assistant Professor of Medicine

Segun Dele Olubanwo  
Visiting Scholar in Chemistry

Saul Olyan  
Samuel Ungerleider, Jr. Professor of Judaic Studies

Joseph O'Mahoney  
Visiting Lecturer in Political Science

Iker Leon Ona  
Visiting Scholar in Chemistry

Warren Ong  
Clinical Assistant Professor in Psychiatry and Human Behavior

Steven M. Opal  
Professor of Medicine

Don Operario  
Associate Professor of Behavioral and Social Sciences

Marion E. Orr  
Frederick Lippitt Professor of Public Policy

Jay M. Orson  
Clinical Associate Professor Emeritus in Pediatrics

Julio C. Ortega  
Professor of Hispanic Studies

Francisco Amado Mejia Ortiz  
Adjunct Professor of Medicine

Roberto Ortiz  
Clinical Assistant Professor in Medicine; Clinical Assistant Professor in Pathology and Laboratory Medicine

Brenda Marie Osbey  
Visiting Professor of Africana Studies

Edward P. Osborn  
Assistant Professor of Visual Art

Roanne Osborne-Gaskin  
Clinical Assistant Professor in Family Medicine

Mahasin Osman  
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Wendy A. Osman  
Clinical Assistant Professor in Psychiatry and Human Behavior

Thomas P. O'Toole  
Professor of Medicine

Brian R. Ott  
Professor of Neurology

Joyce Ou  
Assistant Professor of Pathology and Laboratory Medicine

Frank L. Overly  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Adetokunbo A. Oyelese  
Assistant Professor of Neurosurgery

Calvin E. Oyer  
Clinical Associate Professor in Pathology and Laboratory Medicine

Ilker Ozden  
Assistant Professor of Engineering (Research)

Margaret Paccione-Dyszelowski  
Clinical Assistant Professor in Psychiatry and Human Behavior

Jan Matuesz Pachewicz  
Assistant Professor of Sociology and Urban Studies Program

Cristina A. Pacheco  
Clinical Assistant Professor in Family Medicine

Maria F. Pacheco  
Adjunct Assistant Professor of Portuguese and Brazilian Studies

Domenico Pacifici  
Assistant Professor of Engineering

James F. Padbury  
William and Mary Oh - William and Elsa Zopfi Professor of Pediatrics for Perinatal Research

Rafael E. Padilla  
Clinical Assistant Professor in Surgery (Anesthesiology)

Nitin P. Padture  
Professor of Engineering

Lyman A. Page  
Clinical Professor Emeritus in Pediatrics

Rebecca Page  
Associate Professor of Biology

Talbot Page  
Professor Emeritus of Economics and Environmental Studies

Kelly Pagidas  
Associate Professor of Obstetrics and Gynecology

Michael J. Paglia  
Clinical Assistant Professor in Obstetrics and Gynecology

David C. Paine  
Professor of Engineering

Anjali Palav  
Clinical Assistant Professor in Psychiatry and Human Behavior

Frank Paletta  
Clinical Assistant Professor in Surgery

Adam D. Pallant  
Associate Professor of Pediatrics (Clinical)

Kathleen M. Palm  
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Lynne M. Palmisciano  
Assistant Professor of Emergency Medicine (Clinical); Assistant Professor of Pediatrics (Clinical)

G. Tayhas R. Palmore  
Professor of Engineering; Professor of Chemistry

Glenn E. Palomaki  
Associate Professor of Pathology and Laboratory Medicine (Research)

Mark A. Palumbo  
Associate Professor of Orthopaedics

Bai-Chuan Pan  
Professor Emeritus of Medicine (Research)

Heather Panaro  
Clinical Assistant Professor in Surgery (Anesthesiology)

Stephen V. Panaro  
Clinical Assistant Professor in Surgery (Anesthesiology)

Nikolaos Panou  
Visiting Assistant Professor of Comparative Literature

Dennis Pantazatos  
Assistant Professor of Medicine (Research)
Efstratios Papaioannou
Associate Professor of Classics

George D. Papandonatos
Associate Professor of Biostatistics (Research)

Rebecca K. Papas
Assistant Professor of Psychiatry and Human Behavior (Research)

John P. Papay
Assistant Professor of Education; Assistant Professor of Economics

Martin R. Papazian
Clinical Assistant Professor in Surgery (Otolaryngology)

Cinzia Pappi
Visiting Assistant Professor of Egyptology and Ancient Western Asian Studies

Michael A. Paradiso
Sidney A. Fox and Dorothea Doctors Fox Professorship of Ophthalmology and Visual Science

Gretchen Paranya
Clinical Instructor in Obstetrics and Gynecology

Gyan Pareek
Assistant Professor of Surgery (Urology)

Alfred F. Parisi
Professor Emeritus of Medicine

William Keun Chan Park
Assistant Professor of Diagnostic Imaging (Research)

Yun Sang Park
Post-Doc Research Associate in Engineering

Donna R. Parker
Associate Professor of Family Medicine (Research); Associate Professor of Epidemiology (Research)

Stephen Parman
Assistant Professor of Geological Sciences

Edgar M. Parmentier
Professor of Geological Sciences

Robert A. Partridge
Adjunct Associate Professor of Emergency Medicine

James T. Pascaldes
Clinical Assistant Professor in Orthopaedics

George Pasquarello
Clinical Assistant Professor in Family Medicine

Mary Ann C. Passero
Clinical Associate Professor in Pediatrics

Michael A. Passero
Adjunct Associate Professor of Medicine

Dhiren K. Patel
Clinical Instructor in Family Medicine

Neha Pathak
Assistant Professor of Medicine (Clinical)

Robert L. Patrick
Associate Professor of Medical Science

David R. Patterson
Professor of Ecology and Evolutionary Biology (MBL)

Robert B. Patterson
Clinical Associate Professor in Surgery

William R. Patterson III
Senior Lecturer in Engineering

Robert H. Paul
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Christina Paxson
Professor of Economics and Public Policy

Gillian E. Pears
Clinical Assistant Professor in Psychiatry and Human Behavior

Deborah N. Pearman
Assistant Professor of Epidemiology (Research)

Teri B. Pearstein
Associate Professor of Psychiatry and Human Behavior; Associate Professor of Medicine

Matthew Pearsall
Clinical Instructor in Surgery (Anesthesiology)

David W. Pearson
Clinical Assistant Professor Emeritus in Psychiatry and Human Behavior

Cengiz Pehlevan
Visiting Scholar in Physics

Robert A. Pelcovits
Professor of Physics

Andrew Stephen Pennock
Lecturer in Public Policy

Frank A. Pensa
Clinical Associate Professor in Obstetrics and Gynecology

Michael A. Pepi
Clinical Assistant Professor in Obstetrics and Gynecology

Vincent Pera Jr
Clinical Assistant Professor in Medicine

Helen Perdicoyianni-Paleologou
Visiting Scholar in Classics

Kimberly J. Perez
Assistant Professor of Medicine

Elliot M. Perlman
Clinical Associate Professor in Surgery (Ophthalmology)

Marc A. Perlman
Associate Professor of Music

Adrienne J. Perry
Clinical Assistant Professor in Obstetrics and Gynecology

Keisha-Khan Y. Perry
Assistant Professor of Africana Studies

Samuel E. Perry
Assistant Professor of East Asian Studies

Francis J. Pescosolido
Clinical Associate Professor in Psychiatry and Human Behavior

Georges Peter
Professor Emeritus of Pediatrics

Andrew A. Peterson
Assistant Professor of Engineering

Bruce Peterson
Professor of Ecology and Evolutionary Biology (MBL)

Heidi H. Peterson
Clinical Assistant Professor in Family Medicine

Wolfgang Petl
Associate Professor of Medical Science; Associate Professor of Chemistry

Anthony R. Pellegrino
Clinical Assistant Professor in Surgery

John A. Pezzullo
Assistant Professor of Diagnostic Imaging (Clinical)

Suzanne Phelan
Adjunct Associate Professor of Psychiatry and Human Behavior

Noah Philip
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Bruce A. Phillips
Clinical Assistant Professor in Family Medicine

Katharine A. Phillips
Professor of Psychiatry and Human Behavior

Martin R. Phillips
Clinical Assistant Professor in Surgery
Paul Schuyler Phillips
Senior Lecturer in Music

Maureen G. Phipps
Associate Professor of Obstetrics and Gynecology; Associate Professor of Epidemiology

Chanika Phornphutkul
Associate Professor of Pediatrics

Marcelle L. Piccolello
Assistant Professor of Diagnostic Imaging (Clinical)

Dawn M. Picotte
Clinical Assistant Professor in Psychiatry and Human Behavior

Carle M. Pieters
Professor of Geological Sciences (Research)

M. Halit Pinar
Professor of Pathology and Laboratory Medicine

Megan Michelle Pinkston-Camp
Assistant Professor of Psychiatry and Human Behavior (Research)

Angela Marinilli Pinto
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)

Bernadine M. Pinto
Professor of Psychiatry and Human Behavior (Research)

Jill Catherine Pipher
Professor of Mathematics

Paul A. Pirraglia
Assistant Professor of Medicine

Irene Piryatinsky
Assistant Professor of Psychiatry and Human Behavior (Clinical)

Latha R. Pisharodi
Associate Professor of Pathology and Laboratory Medicine (Clinical)

Mark M. Pitt
Professor of Population Studies (Research)

Martha A. Pizzarello
Clinical Assistant Professor in Obstetrics and Gynecology

Peter A. Pizzarello
Clinical Assistant Professor in Family Medicine

Beth Plante
Assistant Professor of Obstetrics and Gynecology (Clinical)

Matthew J. Plante
Clinical Assistant Professor in Family Medicine

Wendy A. Plante
Clinical Associate Professor in Psychiatry and Human Behavior

Angela M. Plette
Assistant Professor of Medicine

Kevin M. Plouffe
Teaching Associate in Music

Barry A. Plummer
Clinical Associate Professor in Psychiatry and Human Behavior

Alan D. Podis
Clinical Assistant Professor in Surgery (Urology)

Jose R. Polanco
Clinical Assistant Professor in Medicine

Ethan Pollock
Associate Professor of History; Associate Professor of Slavic Languages

Richard Polonsky
Research Fellow in Environmental Studies

Michael A. Pomerantz
Clinical Assistant Professor in Medicine

Carol Jean Poore
Professor Emerita of German Studies

Athena Poppas
Associate Professor of Medicine

Aurora E. Pop-Vicas
Assistant Professor of Medicine

Stephen Porder
Assistant Professor of Biology

Gisela I. Porras
Clinical Assistant Professor in Pediatrics

David C. Portelli
Clinical Associate Professor in Emergency Medicine

Paul S. Porter
Assistant Professor of Emergency Medicine (Clinical)

Barbara Porton
Assistant Professor of Psychiatry and Human Behavior (Research)

Roy M. Poses
Clinical Associate Professor in Medicine

Michael T. Poshkus
Assistant Professor of Medicine (Clinical)

Rock Positano
Adjunct Assistant Professor of Orthopaedics

Donn A. Posner
Clinical Associate Professor in Psychiatry and Human Behavior

Anton F. Post
Professor of Ecology and Evolutionary Biology (MBL)

Nicholas Stevenson Potter
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Morris Leon Povar
Professor Emeritus of Medical Science

E. Erin Powell
Visiting Assistant Professor of Engineering

Donya A. Powers
Clinical Associate Professor in Family Medicine

Marylin M. Powers
Clinical Assistant Professor in Obstetrics and Gynecology

Thomas R. Powers
Professor of Engineering; Professor of Physics

Raymond O. Powrie
Professor of Medicine; Professor of Obstetrics and Gynecology

Warren L. Prall
Henry L. Doherty Professor of Oceanography

Franco Preparata
An Wang Professor of Computer Science

Amanda B. Pressman
Assistant Professor of Medicine (Clinical)

Ann Back Price
Clinical Assistant Professor in Psychiatry and Human Behavior

Katharine A. Price
Clinical Instructor in Medicine

Lawrence H. Price
Professor of Psychiatry and Human Behavior

Victor E. Pricolo
Professor of Surgery

Cedric J. Priebe
Assistant Professor of Pediatrics (Clinical)

Jennifer M. Primack
Assistant Professor of Psychiatry and Human Behavior (Research)

Ethan A. Prince
Assistant Professor of Diagnostic Imaging

Lawrence Proano
Clinical Associate Professor in Emergency Medicine

Romano Prodi
Clinical Associate Professor in Emergency Medicine

Professor at Large
Neha P. Raukar
Assistant Professor of Emergency Medicine
Stephanie Ravillon
Lecturer in French Studies
Thangam Ravindranathan
Manning Assistant Professor of French Studies
Roger D. Raymond
Clinical Assistant Professor in Medicine
Christine E. Rayner
Assistant Professor of Psychiatry and Human Behavior (Research)
Jonathan Readey
Lecturer in English
Patricia R. Recupero
Clinical Professor in Psychiatry and Human Behavior
Sherief Reda
Assistant Professor of Engineering
Marc Redfield
Professor of English and Comparative Literature
Joseph D. Reed
Professor of Classics
Robert A. Reenan
Professor of Biology
Frances Regas
Clinical Assistant Professor in Surgery (Anesthesiology)
Vishram B. Rege
Clinical Associate Professor Emeritus in Medicine
Anthony M. Reginato
Assistant Professor of Medicine
Bernard M. Reginster
Professor of Philosophy
Richard A. Regnante
Clinical Instructor in Medicine
Ravit Reichman
Associate Professor of English
Jonathan S. Reichner
Associate Professor of Surgery (Research)
Lawrence E. Reinstein
Adjunct Professor of Radiation Oncology
Shmuel Reis
Adjunct Professor of Family Medicine
Steven P. Reiss
Professor of Computer Science
Amy G. Remensnyder
Associate Professor of History
Eric M. Renault
C.V. Starr Professor of Commerce, Organizations and Entrepreneurship
Richard D. Rende
Associate Professor of Psychiatry and Human Behavior (Research)
Michelle Renee
Clinical Assistant Professor in Education
Joseph F. Renzulli
Assistant Professor of Surgery (Clinical) (Urology)
Barbara M. Reo
Lecturer in Theatre Arts
Murray Resnick
Professor of Pathology and Laboratory Medicine
Susan K. Resnick
Visiting Lecturer in English
Linda J. Resnik
Associate Professor of Health Services, Policy and Practice (Research)
Carolyn Revercomb
Clinical Assistant Professor in Pathology and Laboratory Medicine
William R. Rhodes
Professor at Large
Iole Ribizzi-Akhtar
Clinical Assistant Professor in Medicine
Anthony R. Ricci
Clinical Instructor in Medicine
Ronald R. H. Ricco
Clinical Assistant Professor in Family Medicine
Jana Rice
Assistant Professor of Diagnostic Imaging (Clinical)
Louis B. Rice
Joukowsky Family Professor of Medicine
Harlan G. Rich
Associate Professor of Medicine
Jeremy J. Rich
Assistant Professor of Ecology and Evolutionary Biology
Josiah D. Rich
Professor of Medicine; Professor of Epidemiology
Joan L. Richards
Professor of History
Peter Damian Richardson
Professor of Engineering
Katherine Richman
Assistant Professor of Medicine
Gerhard Richter
Professor of German Studies and Comparative Literature
Michelle L. Rickerby
Clinical Associate Professor in Psychiatry and Human Behavior
Kenneth C. Rickler
Clinical Associate Professor in Psychiatry and Human Behavior; Clinical Associate Professor in Neurology
Mark S. Ridlen
Associate Professor of Diagnostic Imaging (Clinical)
Renee Ridzon
Adjunct Assistant Professor of Medicine
John Riedel
Clinical Assistant Professor in Emergency Medicine
Anne L. Rieger
Visiting Scholar in Chemistry
Abdalla Rifai
Associate Professor of Pathology and Laboratory Medicine
Raymond S. Riley
Clinical Professor Emeritus in Medicine
Mark A. Ringiewicz
Clinical Assistant Professor in Family Medicine
Patricia M. Risica
Assistant Professor of Epidemiology (Research)
Robert Risica
Clinical Assistant Professor in Surgery (Otolaryngology)
Dianne C. Ritchie
Adjunct Assistant Professor of Family Medicine
Dale A. Ritter
Senior Lecturer in Biology
Massimo Riva
Professor of Italian Studies
Mark J. Rivard
Adjunct Professor of Radiation Oncology
Deborah Rivas
Assistant Professor of Education
David Rivera
Clinical Instructor in Surgery (Ophthalmology)
Jorge Rivera
Clinical Instructor in Surgery (Ophthalmology)
Syed A. Rizvi
Associate Professor of Neurology (Clinical)
Christie J. Rizzo
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)
Philip R. Rizzuto
Clinical Associate Professor in Surgery (Ophthalmology)
Barbara H. Roberts
Clinical Associate Professor in Medicine
Debra L. Roberts
Clinical Assistant Professor in Family Medicine
J. Timmons Roberts
Ittleson Professor of Environmental Studies
Thomas Roberts
Associate Professor of Ecology and Evolutionary Biology
Alexander P. Robertson
Clinical Assistant Professor in Orthopaedics
James F. Robertson
Clinical Assistant Professor in Medicine
Henry J. Robidoux
Clinical Associate Professor Emeritus in Surgery
Jared C. Robins
Assistant Professor of Obstetrics and Gynecology
Leslie Robinson-Bostom
Associate Professor of Dermatology
Katina M. Robison
Assistant Professor of Obstetrics and Gynecology
Marcia B. Robitaille
Clinical Assistant Professor in Emergency Medicine
Seth E. Rockman
Associate Professor of History
Randy Rockney
Professor of Pediatrics; Professor of Family Medicine
Karim Roder
Assistant Professor of Medicine (Research)
Richard C. Rodman
Clinical Assistant Professor in Surgery (Ophthalmology)
Daniel Rodriguez
Assistant Professor of Psychiatry and Human Behavior (Research)
Edgardo Rodriguez
Clinical Assistant Professor in Surgery (Anesthesiology)
Marina Rodriguez
Clinical Instructor in Medicine
Pablo Rodriguez
Clinical Associate Professor in Obstetrics and Gynecology
Ralph E. Rodriguez
Associate Professor of Race and Ethnicity in America and American Studies; Associate Professor of English
Cesar Rodriguez-Garavito
Visiting Professor of Latin American and Caribbean Studies
Thomas A. Roesler
Associate Professor of Psychiatry and Human Behavior
Jamison E. Rogers
Assistant Professor of Psychiatry and Human Behavior (Clinical)
William H. Rogers
Adjunct Professor of Health Services, Policy and Practice
Jeffrey M. Rogg
Associate Professor of Diagnostic Imaging
Thomas E. Rohrer
Adjunct Associate Professor of Dermatology
Damaris J. Rohsenow
Professor of Behavioral and Social Sciences (Research)
Rachel Rojanski
Adjunct Associate Professor of Judaic Studies
Felipe Rojas Silva
Assistant Professor of Archaeology and the Ancient World and Egyptology and Ancient Western Asian Studies
Camille Roman
Visiting Scholar in English
Thomas D. Romeo
Clinical Assistant Professor Emeritus in Health Services, Policy and Practice
Ellen Frances Rooney
Professor of Modern Culture and Media and English
Gary Rose
Adjunct Professor of Health Services, Policy and Practice
Patricia L. Rose
Professor of Africana Studies
Henry Rosemont Jr
Visiting Scholar in Religious Studies
Karen J. Rosen
Clinical Assistant Professor in Psychiatry and Human Behavior
Michael I. Rosen
Professor Emeritus of Mathematics
Philip Rosen
Professor of Modern Culture and Media
Rochelle K. Rosen
Assistant Professor of Behavioral and Social Sciences (Research)
Wilma S. F. Rosen
Clinical Assistant Professor Emerita in Psychiatry and Human Behavior
Jerrold N. Rosenberg
Clinical Assistant Professor in Orthopaedics
Michael C. Rosenberg
Clinical Assistant Professor in Family Medicine
Mindy S. Rosenbloom
Clinical Assistant Professor in Psychiatry and Human Behavior
Karen Rosene Montella
Professor of Medicine
Cynthia Rosengard
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Medicine (Research)
Jacob Rosenstein
Assistant Professor of Engineering
Andrew Rosenzweig
Clinical Assistant Professor in Psychiatry and Human Behavior
Christoph Rose-Petruck
Professor of Chemistry
Albert M. Ross
Clinical Associate Professor in Pediatrics
Fred A. Rotenberg
Assistant Professor of Surgery (Clinical)(Anesthesiology)
Harold D. Roth
Professor of Religious Studies and East Asian Studies
Julie L. Roth
Assistant Professor of Neurology
Leslie A. Roth  
Assistant Professor of Surgery  
Frank G. Rothman  
Professor Emeritus of Biology  
Lynn Rothchild  
Adjunct Professor of Molecular Biology, Cell Biology and Biochemistry  
Marcos Boris Rotman  
Professor Emeritus of Medical Science  
Kathleen M. Rotondo  
Associate Professor of Pediatrics (Clinical)  
Sharon I. Rounds  
Professor of Medicine; Professor of Pathology and Laboratory Medicine  
Stephen N. Rous  
Clinical Professor in Surgery (Urology)  
Dwight J. Rouse  
Professor of Obstetrics and Gynecology  
Joseph W. Rovan  
Professor of Music  
Brenda N. Roy  
Clinical Assistant Professor in Obstetrics and Gynecology  
G. Dean Roye  
Assistant Professor of Surgery (Clinical)  
Boris L. Rozovsky  
Ford Foundation Professor of Applied Mathematics  
Amity Rubeor  
Assistant Professor of Family Medicine (Clinical)  
Patricia E. Rubertone  
Professor of Anthropology  
Lee Rubin  
Assistant Professor of Orthopaedics  
Lowell J. Rubin  
Clinical Assistant Professor in Psychiatry and Human Behavior  
David H. Rubinstein  
Teaching Associate in Music  
Fedor Rudakov  
Adjunct Assistant Professor of Chemistry  
Susan A. Rudders  
Assistant Professor of Pediatrics  
Sarah Ruden  
Visiting Scholar in Classics  
Marilyn Rueschemeyer  
Adjunct Professor of International Studies  
Jessica Ruffolo  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Richard J. Ruggieri  
Clinical Assistant Professor in Medicine  
Charles M. Ruhl  
Clinical Assistant Professor in Surgery (Otolaryngology)  
Renee B. Ruin  
Clinical Assistant Professor in Family Medicine  
James M. Russell  
Associate Professor of Geological Sciences  
Philip Christian Russell  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Geoffrey R. Russom  
Professor Emeritus of English  
Sandra Russo-Rodriguez  
Lecturer in Chemistry  
Malcolm J. Rutherford  
Professor Emeritus of Geological Sciences  
Matthew T. Rutz  
Assistant Professor of Egyptology and Ancient Western Asian Studies  
J. Mark Ryan  
Clinical Assistant Professor in Medicine  
Vanessa L. Ryan  
Assistant Professor of English  
Beth A. Ryder  
Assistant Professor of Surgery  
Michael J. Ryvicker  
Clinical Assistant Professor in Diagnostic Imaging  
Inna Ryvkin  
Clinical Instructor in Family Medicine  
Krysta H. Ryzewski  
Visiting Scholar in Archaeology and the Ancient World  
Carl Saab  
Assistant Professor of Neurosurgery (Research); Assistant Professor of Neuroscience (Research)  
Alberto Saal  
Associate Professor of Geological Sciences  
Hani M. Sabbour  
Clinical Instructor in Medicine  
George M. Sachs  
Associate Professor of Neurology (Clinical)  
Henry T. Sachs  
Clinical Assistant Professor in Psychiatry and Human Behavior  
Kenneth S. Sacks  
Professor of History  
Ara Sadaniantz  
Clinical Associate Professor in Medicine  
Noha Sadek  
Assistant Professor of Psychiatry and Human Behavior (Clinical)  
Grazyna B. Sadowska  
Instructor in Pediatrics (Research)  
Howard Safran  
Professor of Medicine  
Christoph Anthony Sahar  
Clinical Assistant Professor in Family Medicine  
Pierre Saint-Amand  
Francis Wayland Professor of French Studies  
Caitlin Saint-Aubin  
Clinical Instructor in Obstetrics and Gynecology  
Bachir Sakr  
Assistant Professor of Obstetrics and Gynecology (Clinical)  
Osvaldo E. Sala  
Adjunct Professor of Biology  
Jessica R. Salak  
Clinical Assistant Professor in Obstetrics and Gynecology  
Gisele I. Saliba  
Clinical Assistant Professor in Medicine  
Amy Lynn Salisbury  
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)  
Matthew T. Salisbury  
Clinical Assistant Professor in Family Medicine  
Robert A. Salk  
Clinical Assistant Professor in Obstetrics and Gynecology  
Stephen P. Salloway  
Professor of Neurology; Professor of Psychiatry and Human Behavior  
Arthur R. Salomon  
Associate Professor of Biology; Associate Professor of Chemistry  
Jason Salter  
Clinical Assistant Professor in Family Medicine
Ellen P. Salvatore  
Adjunct Associate Professor of Health Services, Policy and Practice

David A. Sam  
Clinical Assistant Professor in Family Medicine

Fadi Samaan  
Clinical Instructor in Medicine

Sundaresan T. Sambandam  
Clinical Assistant Professor in Medicine

Prakash Sampath  
Adjunct Associate Professor of Neurosurgery

Juan Sanchez-Esteban  
Associate Professor of Pediatrics

Jennifer A. Sanders  
Assistant Professor of Pediatrics (Research)

Bjorn Sandstede  
Professor of Applied Mathematics

Jerome Sanes  
Professor of Neuroscience

Ronald Sanfilippo  
Teaching Associate in Music

Lidia Santarelli  
Visiting Assistant Professor of History

Benjamin L. Sapers  
Assistant Professor of Pediatrics (Research)

Sajid Saraf  
Instructor in Medicine (Clinical)

Michael L. Satlow  
Professor of Judaic Studies and Religious Studies

Anja Sautmann  
Assistant Professor of Economics

John E. Savage  
An Wang Professor of Computer Science

Peter K. Saval  
Assistant Professor of Comparative Literature

Daniel L. Savitt  
Associate Professor of Emergency Medicine

Sajid Saraf  
Instructor in Medicine (Clinical)

David A. Savitz  
Professor of Epidemiology; Professor of Obstetrics and Gynecology

Janine T. Anderson Sawada  
Professor of Religious Studies and East Asian Studies

Dov Sax  
Assistant Professor of Biology

Adele C. Scafuro  
Professor of Classics

Thomas J. Scaramella  
Clinical Assistant Professor Emeritus in Psychiatry and Human Behavior

Monica J. Schaberg  
Clinical Assistant Professor Emerita in Pediatrics

Frank John Schaberg Jr  
Associate Professor Emeritus of Surgery (Clinical)

Jay S. Schachne  
Clinical Assistant Professor in Medicine

Kate J. Schapira  
Lecturer in English

Joshua B. Schechter  
Associate Professor of Philosophy

Steven Schechter  
Clinical Assistant Professor in Surgery (Colo-Rectal Surgery)

Jacquelyn Y. Schell  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Susan Schennach  
Professor of Economics

Barbara Schepps  
Professor Emerita of Diagnostic Imaging (Clinical)

Andrew K. Scherer  
Assistant Professor of Anthropology; Assistant Professor of Archaeology and the Ancient World

Stephen F. Schiff  
Associate Professor of Surgery (Clinical)(Urology)

Fred Jay Schiffman  
Sigal Family Professor of Humanistic Medicine

Jonathan R. Schiller  
Assistant Professor of Orthopaedics

Wendy J. Schiller  
Associate Professor of Political Science; Associate Professor of Public Policy

Mark Schleinitz  
Associate Professor of Medicine

Mark S. Schlissel  
Professor of Biology

Christopher H. Schmid  
Professor of Biostatistics

Scott T. Schmidt  
Clinical Assistant Professor in Surgery (Plastic Surgery)

Johanna M. Schmitt  
Adjunct Professor of Ecology and Evolutionary Biology

Franklin Schneider  
Clinical Instructor in Medicine

Heidi Schneider  
Clinical Assistant Professor in Family Medicine

Rebecca Schneider  
Professor of Theatre Arts; Professor of History of Art and Architecture

Evan Schnidman  
Adjunct Lecturer in Public Policy

Robert Scholes  
Andrew W. Mellon Professor of Humanities

Gregory Schoppen  
Professor of Religious Studies; Rush C. Hawkins University Professor of Religious Studies

Christoph Schorl  
Assistant Professor of Biology (Research)

Teresa L. Schraeder  
Clinical Assistant Professor in Family Medicine

David Schreiber  
Clinical Instructor in Medicine

Nidia A. Schuhmacher  
Senior Lecturer in Hispanic Studies

Gretchen Schultz  
Associate Professor of French Studies

Peter H. Schultz  
Professor of Geological Sciences

Anne M. Schulz  
Visiting Scholar in History of Art and Architecture

Eric B. Schwam  
Clinical Assistant Professor in Emergency Medicine

Carl Schwartz  
Assistant Professor of Surgery (Clinical)(Anesthesiology)

Cindy L. Schwartz  
Alan G. Hassenfeld Professor of Pediatrics

Harry Schwartz  
Clinical Assistant Professor in Medicine
James M. Schwartz
Clinical Assistant Professor in Family Medicine
Richard E. Schwartz
Chancellor’s Professor
Robert Schwartz
Professor Emeritus of Pediatrics
Stanley Schwartz
Assistant Professor of Pathology and Laboratory Medicine (Clinical)
Stuart T. Schwartz
Clinical Associate Professor in Medicine
Jack L. Schwartzwald
Clinical Assistant Professor in Medicine
Lisa Schweigler
Assistant Professor of Emergency Medicine
Robert H. Schwengel
Clinical Assistant Professor in Medicine
Frank Sciuto
Adjunct Lecturer in Economics
Francis H. Scota
Clinical Professor Emeritus in Diagnostic Imaging
H. Denman Scott
Professor Emeritus of Medicine
Jeffrey Scott
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology
Mark F. Scott
Clinical Assistant Professor in Obstetrics and Gynecology
Stephen M. Scott
Clinical Assistant Professor in Medicine
Lori Scott-Sheldon
Assistant Professor of Psychiatry and Human Behavior (Research)
Kurt Sebastian
Visiting Professor of Applied Mathematics
Ivona Sediva
Assistant Professor of Pediatrics
John M. Sedivy
Hermon C. Bumpus Professor of Biology
George M. Seidel
Professor Emeritus of Physics
Ronald Seifer
Professor of Psychiatry and Human Behavior
Lewis C. Seifert
Professor of French Studies
Todd Seigel
Assistant Professor of Emergency Medicine
Umut Selamet
Clinical Instructor in Medicine
Robert O. Self
Associate Professor of History
Gregg J. Selke
Clinical Assistant Professor in Psychiatry and Human Behavior
Peter Sell
Clinical Assistant Professor in Family Medicine
Frank W. Sellke
Karl E. Karlson, MD and Gloria A. Karlson Professor of Cardiothoracic Surgery
Jason K. Sello
Associate Professor of Chemistry
Theresa Senn
Associate Professor of Psychiatry and Human Behavior (Research)
Victor K. Seow
Visiting Lecturer in History
Thomas E. Sepe
Clinical Associate Professor in Medicine
Amy S. Serrano
Adjunct Lecturer in Economics
Roberto Serrano
Harrison S. Kravis University Professor of Economics
Thomas R. Serre
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences
Jigme M. Sethi
Assistant Professor of Medicine
Vijay Sethuraman
Assistant Professor of Engineering (Research)
Kurush Setna
Clinical Assistant Professor in Medicine
Christopher Takakazu Seto
Associate Professor of Chemistry
Robert J. Settipane
Clinical Assistant Professor in Pediatrics
Russell Settipane
Clinical Associate Professor in Medicine
Timothy D. Shafman
Adjunct Assistant Professor of Radiation Oncology
Catherine E. Shafts
Clinical Instructor in Family Medicine
Nishit Shah
Assistant Professor of Surgery
Sachita Shah
Adjunct Assistant Professor of Emergency Medicine
Samir A. Shah
Clinical Associate Professor in Medicine
Bahram Shah-Hosseini
Clinical Assistant Professor in Obstetrics and Gynecology
Reza Shah-Hosseini
Clinical Associate Professor Emeritus in Obstetrics and Gynecology
Thomas K. Shahinian
Clinical Associate Professor in Surgery (Colo-Rectal Surgery)
Linda B. Shalon
Associate Professor of Pediatrics (Clinical)
Peter R. Shank
Professor of Medical Science
Bradley A. Shapiro
Clinical Assistant Professor in Diagnostic Imaging
Gerald M. Shapiro
Professor of Music
Jason M. Shapiro
Assistant Professor of Pediatrics (Clinical)
Barry L. Sharaf
Associate Professor of Medicine
Uzma Sharif
Assistant Professor of Neurology (Clinical)
Katherine M. Sharkey
Assistant Professor of Medicine; Assistant Professor of Psychiatry and Human Behavior
Satish C. Sharma
Professor of Medicine
Surendra Sharma
Professor of Pediatrics (Research); Professor of Pathology and Laboratory Medicine (Research)
Jane R. Sharp
Clinical Assistant Professor in Obstetrics and Gynecology
Parviz Shavandy
Clinical Instructor in Medicine
Gaius Shaver
Professor of Ecology and Evolutionary Biology (MBL)
Judith Gibbs Shaw
Clinical Assistant Professor in Pediatrics
Sunil K. Shaw
Assistant Professor of Pediatrics (Research)
Laura Shawhughes
Clinical Instructor in Medicine
Lisa B. Shea
Clinical Assistant Professor in Psychiatry and Human Behavior
M. Tracie Shea
Professor of Psychiatry and Human Behavior
Thomas Sheeran
Assistant Professor of Psychiatry and Human Behavior (Research)
Michael F. Sheff
Associate Professor Emeritus of Pathology and Laboratory Medicine (Research)
David Sheinberg
Professor of Neuroscience
Stephen J. Sheinkopf
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)
Brian W. Sheldon
Professor of Engineering
Douglas G. Shemin
Associate Professor of Medicine
Edmond D. Shenassa
Adjunct Associate Professor of Epidemiology
Vivek Shenoy
Adjunct Professor of Engineering
Charles B. Sherman
Clinical Associate Professor in Medicine
Eytan Sheshinski
Professor of Economics
Siqi Shi
Senior Research Associate in Engineering
Naoko Shibusawa
Associate Professor of History; Associate Professor of American Studies
Renee R. Shield
Clinical Professor in Health Services, Policy and Practice
Victor H. Shin
Assistant Professor of Medicine (Clinical)
Susan Short
Professor of Sociology
Hatem Shoukeir
Clinical Assistant Professor in Medicine
Harel Z. Shouval
Adjunct Assistant Professor of Brain Science (Research)
Ofira Shraga
Adjunct Lecturer in Sociology
Chi-Wang Shu
Stowell University Professor of Applied Mathematics
Priscilla Shube
Clinical Assistant Professor in Family Medicine
Jeffrey Shuhaiber
Clinical Instructor in Surgery
Natasha Shur
Assistant Professor of Pediatrics
Nicholas J. Sibrava
Instructor in Psychiatry and Human Behavior (Research)
Afreen Siddiqui
Clinical Assistant Professor in Surgery
Santina L. Siena
Clinical Assistant Professor in Obstetrics and Gynecology
Mark Sigman
Krishnamurthi Family Professor of Urology
Matthew S. Siket
Assistant Professor of Emergency Medicine
William M. Sikov
Clinical Associate Professor in Medicine
Henry A. Silva
Adjunct Lecturer in Economics
Brian Silver
Associate Professor of Neurology
Caroll Mitchell Silver
Clinical Professor Emeritus in Orthopaedics
Hilary Silver
Professor of Urban Studies Program and Sociology; Professor of Public Policy
Michael A. Silver
Clinical Assistant Professor in Psychiatry and Human Behavior
Rebecca B. Silver
Assistant Professor of Psychiatry and Human Behavior (Research)
Gerald D. Silverberg
Professor of Neurosurgery (Research)
Fredric Joel Silverblatt
Professor Emeritus of Medicine
Harvey Fox Silverman
Professor of Engineering
John Michael Silverman
Professor Emeritus of Modern Culture and Media
Joseph H. Silverman
Professor of Mathematics
Jared A. Silverstein
Clinical Assistant Professor of Pediatrics (Clinical)
Joanne M. Silvia
Clinical Assistant Professor in Family Medicine
Leonor Simas-Almeida
Senior Lecturer in Portuguese and Brazilian Studies
John Simeral
Associate Professor of Engineering (Research)
Andrea Megela Simmons
Professor of Cognitive, Linguistic, and Psychological Sciences
James A. Simmons
Professor of Biology
Ruth J. Simmons
Professor of Comparative Literature and Africana Studies
Sheri Simmons
Assistant Professor of Ecology and Evolutionary Biology (MBL)
William S. Simmons
Professor of Anthropology
Meera Varma Simoes
Clinical Assistant Professor in Obstetrics and Gynecology
Peter R. Simon
Clinical Associate Professor in Health Services, Policy and Practice
Rochelle Simon
Assistant Professor of Pathology and Laboratory Medicine
Don B. Singer
Professor Emeritus of Pathology and Laboratory Medicine
Joseph B. Singer
Clinical Instructor in Pediatrics
Arun Singh
Clinical Professor in Surgery
Rakesh K. Singh
Assistant Professor of Obstetrics and Gynecology (Research)

Alan D. Sirota
Professor of Psychiatry and Human Behavior (Clinical)

Mark S. Siskind
Clinical Associate Professor in Medicine

Margie Skeer
Adjunct Assistant Professor of Behavioral and Social Sciences

Mitchel Sklar
Clinical Assistant Professor in Medicine

Luisa Skoble
Clinical Assistant Professor in Psychiatry and Human Behavior

Gail Skowron
Adjunct Professor of Medicine

Caroline Maria Skudlarek-Prete
Clinical Assistant Professor in Obstetrics and Gynecology

Boris Skurkovich
Clinical Professor in Pediatrics

S. Frederick Slafsky
Clinical Assistant Professor Emeritus in Surgery

Jeffrey M. Slaiby
Assistant Professor of Surgery (Clinical)

John G. Slattery
Clinical Assistant Professor in Family Medicine

Jennifer A. Slattery-Bownds
Lecturer in Public Policy

Steven A. Sloman
Professor of Cognitive, Linguistic, and Psychological Sciences

Cheryl L. Slomkowski
Assistant Professor of Psychiatry and Human Behavior (Research)

Jessica Sluasarski
Clinical Assistant Professor in Pediatrics

Karen Smigel
Clinical Assistant Professor in Family Medicine

Caldwell W. Smith
Clinical Associate Professor in Surgery (Ophthalmology)

Daniel J. Smith
Associate Professor of Anthropology

Jeanette G. Smith
Assistant Professor of Medicine

Jessica L. Smith
Assistant Professor of Emergency Medicine (Clinical)

Joel Smith
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Katherine F. Smith
Assistant Professor of Ecology and Evolutionary Biology

Kerry Smith
Associate Professor of History and East Asian Studies

Marcia R. Smith
Clinical Associate Professor in Family Medicine

Peter S. Smith
Professor Emeritus of Pediatrics

Richard M. Smith
Clinical Assistant Professor in Psychiatry and Human Behavior

Robert A. Smith
Clinical Instructor Emeritus in Health Services, Policy and Practice

Robert J. Smith
Professor of Medicine

Sara W. Smith
Adjunct Lecturer in Portuguese and Brazilian Studies

Stephen R. Smith
Professor Emeritus of Family Medicine

Victoria P. Smith
Senior Lecturer in Hispanic Studies

Herbert J. Smokler
Clinical Assistant Professor in Psychiatry and Human Behavior

Romina P. Smulever
Clinical Assistant Professor in Psychiatry and Human Behavior

Susan Smulyan
Professor of American Studies

Lory Snady-McCoy
Clinical Associate Professor in Surgery (Ophthalmology)

Linda K. Snelling
Professor of Pediatrics (Clinical); Professor of Surgery (Clinical)

Zachary Sng
Associate Professor of German Studies; Associate Professor of Comparative Literature

Amy L. Snyder
Assistant Professor of Obstetrics and Gynecology (Clinical)

Laura A. Snyder
Lecturer in Education

Paul E. Snyder
Clinical Assistant Professor in Dermatology

Peter Snyder
Professor of Neurology (Research)

Richard O. Snyder
Professor of Political Science and International Studies

Gregory M. Soares
Associate Professor of Diagnostic Imaging

David M. Sobel
Associate Professor of Cognitive, Linguistic, and Psychological Sciences

Patricia I. Sobral
Senior Lecturer in Portuguese and Brazilian Studies

Silvia Sobral
Senior Lecturer in Hispanic Studies

Clarence H. Soderberg Jr
Clinical Associate Professor Emeritus in Surgery

Mitchell Sogin
Professor of Molecular Biology, Cell Biology and Biochemistry (MBL)

Hillel Soifer
Visiting Scholar in Latin American and Caribbean Studies

Jane Sokolosky
Senior Lecturer in German Studies

Patricia M. Solga
Clinical Assistant Professor in Orthopaedics

David A. Solomon
Clinical Associate Professor in Psychiatry and Human Behavior

John J. Solomon
Clinical Assistant Professor in Family Medicine

Sukanya Somasundar
Clinical Assistant Professor in Family Medicine

Joo-Hyun Song
Assistant Professor of Cognitive, Linguistic, and Psychological Sciences

Julie H. Song
Associate Professor of Diagnostic Imaging (Clinical)

Yoon-Kyu Song
Adjunct Assistant Professor of Engineering

Jay A. Sorgman
Clinical Assistant Professor in Medicine

Ernest Sosa
Professor Emeritus of Philosophy
Peter Soukas  
Assistant Professor of Medicine
Jennifer R. Souther  
Clinical Assistant Professor in Family Medicine
Jennifer M. Souza  
Clinical Assistant Professor in Family Medicine
Mark Spaller  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology
Dana Sparkawk  
Clinical Assistant Professor in Emergency Medicine
Brian K. Sparks  
Teaching Associate in Music
Shirley A. Spater  
Clinical Assistant Professor in Surgery
Carrie E. Spearin  
Visiting Assistant Professor of Sociology
Jeremy Spector  
Clinical Assistant Professor in Medicine
Thomas J. Speer  
Assistant Professor of Physics (Research)
Joel S. Spellun  
Clinical Assistant Professor in Medicine
Keith A. Spencer  
Adjunct Lecturer in Visual Art
Megan B. Spencer  
Clinical Assistant Professor in Psychiatry and Human Behavior
Patricia K. Spencer  
Clinical Associate Professor in Diagnostic Imaging
Kenneth F. Sperber  
Clinical Assistant Professor in Family Medicine
Nichea S. Spillane  
Assistant Professor of Behavioral and Social Sciences (Research)
Anthony Spirito  
Professor of Psychiatry and Human Behavior
Kathryn T. Sproehr  
Professor of Cognitive, Linguistic, and Psychological Sciences; Professor of Public Policy
Luther Sproehr  
Senior Lecturer in Education
Serena A. Sposato  
Clinical Assistant Professor in Obstetrics and Gynecology
Marcus B. Spradlin  
Associate Professor of Physics
Emily B. Spurrell  
Clinical Assistant Professor in Psychiatry and Human Behavior
Timothy P. Spurrell  
Clinical Assistant Professor in Obstetrics and Gynecology
Daniel D. Squires  
Assistant Professor of Behavioral and Social Sciences (Research)
Darius R. Stachurski  
Assistant Professor of Pathology and Laboratory Medicine
Michael L. Stanchina  
Clinical Assistant Professor in Medicine
Donald L. Stanford  
Adjunct Professor of Computer Science
Christina Stanley  
Clinical Assistant Professor in Pathology and Laboratory Medicine
Lawrence K. Stanley  
Senior Lecturer in English
Cassandra A. Stanton  
Adjunct Assistant Professor of Psychiatry and Human Behavior
Janusz E. Starakiewicz  
Assistant Professor of Pathology and Laboratory Medicine (Clinical)
Barton L. St Armand  
Professor Emeritus of English and American Studies
Kathleen Staudinger  
Clinical Instructor in Diagnostic Imaging
Pamela Steadman-Wood  
Clinical Assistant Professor in Psychiatry and Human Behavior
Brett S. Stecker  
Clinical Assistant Professor in Family Medicine
Dale W. Steele  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics
John M. Steele  
Professor of Egyptology and Ancient Western Asian Studies
Tracy L. Steffes  
Assistant Professor of Education; Assistant Professor of History
Eva Stehle  
Visiting Scholar in Classics
Achina P. Stein  
Clinical Assistant Professor in Psychiatry and Human Behavior
Daniel A. Stein  
Clinical Professor in Theatre Arts
Derek M. Stein  
Manning Assistant Professor of Physics
John J. Stein  
Senior Lecturer in Neuroscience
Michael D. Stein  
Professor of Medicine; Professor of Health Services, Policy and Practice
Steven H. Stein  
Clinical Assistant Professor in Family Medicine
Mark F. Steinbach  
Lecturer in Music
Meredith Steinbach  
Professor of Literary Arts
Michael P. Steinberg  
Barnaby Conrad and Mary Critchfield Keeney Professor of History
Solomon Steiner  
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology
Margaret M. Steinhoff  
Professor of Pathology and Laboratory Medicine
Gregory J. Steinmetz  
Clinical Associate Professor in Family Medicine
Andrew H. Stephen  
Assistant Professor of Surgery (Trauma)
Bonnie E. Stephens  
Adjunct Assistant Professor of Pediatrics
Edward S. Sternick  
Professor of Radiation Oncology
Angela Stewart  
Clinical Assistant Professor in Psychiatry and Human Behavior
Babette Stewart  
Lecturer Emerita in Medical Science
Michael H. Stewart  
Lecturer in English
Suzanne Stewart-Steinberg  
Professor of Italian Studies and Comparative Literature
Gregory Siener  
Clinical Assistant Professor in Psychiatry and Human Behavior
Philip H. Stockwell  
Assistant Professor of Medicine (Clinical)
Kristen C. Stone
Assistant Professor of Psychiatry and Human Behavior (Research)
William M. Stone
Clinical Associate Professor in Neurology
Barbara S. Stonestreet
Professor of Pediatrics
Edward G. Stopa
Professor of Pathology and Laboratory Medicine; Professor of Neurosurgery
John A. Stoukides
Clinical Assistant Professor in Medicine
Robert L. Stout
Adjunct Professor of Psychiatry and Human Behavior
Stanley K. Stowers
Professor of Religious Studies
Julie A. Strandberg
Senior Lecturer in Theatre Arts
Richard Mark Stratt
Newport Rogers Professor of Chemistry
Ian B. Straughn
Visiting Assistant Professor of Anthropology
Walter A. Strauss
L. Herbert Ballou University Professor of Mathematics
Rochelle S. Strenger
Clinical Associate Professor in Medicine
David R. Strong
Adjunct Assistant Professor of Psychiatry and Human Behavior
Laura Stroud
Associate Professor of Psychiatry and Human Behavior (Research)
Gregory L. Stuart
Adjunct Professor of Psychiatry and Human Behavior
Ashley R. Stuckey
Assistant Professor of Obstetrics and Gynecology
Edward J. Stulik
Clinical Assistant Professor in Medicine
Newell Maynard Stultz
Professor Emeritus of Political Science
Chau-Hsing Su
Professor of Applied Mathematics
Sharon W. Su
Assistant Professor of Pediatrics (Clinical)
Mark C. Suchman
Professor of Sociology
Erik B. Sudereth
Assistant Professor of Computer Science
Vijayendra Sudheendra
Clinical Assistant Professor in Surgery (Anesthesiology)
J. William Suggs
Associate Professor of Chemistry
Edward Suh
Clinical Instructor in Surgery (Anesthesiology)
Francis M. Sullivan
Clinical Associate Professor in Emergency Medicine
Frank W. Sullivan
Clinical Associate Professor Emeritus in Psychiatry and Human Behavior
James C. Sullivan
Clinical Assistant Professor in Medicine
James K. Sullivan
Clinical Assistant Professor in Psychiatry and Human Behavior
Mary C. Sullivan
Adjunct Professor of Pediatrics
Patrick K. Sullivan
Associate Professor of Surgery
Stephen R. Sullivan
Assistant Professor of Surgery (Plastic Surgery); Assistant Professor of Pediatrics
Eleanor M. Summerhill
Associate Professor of Medicine
Margaret A. Sun
Clinical Assistant Professor in Family Medicine
Shouheng Sun
Professor of Chemistry
Selim Suner
Professor of Emergency Medicine; Professor of Engineering; Professor of Surgery
C. James Sung
Professor of Pathology and Laboratory Medicine
Vivian W. Sung
Associate Professor of Obstetrics and Gynecology
Ghulam M. Surti
Clinical Assistant Professor in Psychiatry and Human Behavior
Jacques G. Susset
Clinical Professor Emeritus in Surgery (Urology)
Elizabeth M. Sutton
Assistant Professor of Emergency Medicine (Clinical)
Eric Suuberg
Professor of Engineering
Shailender Swaminathan
Assistant Professor of Health Services, Policy and Practice (Research)
Sharon M. Swartz
Professor of Biology; Professor of Engineering
Joseph D. Sweeney
Professor of Pathology and Laboratory Medicine; Professor of Medicine
Lynn A. Sweeney
Assistant Professor of Emergency Medicine (Clinical)
Patrick J. Sweeney
Professor of Obstetrics and Gynecology
Lawrence H. Sweet
Associate Professor of Psychiatry and Human Behavior (Research)
Dwight A. Sweigart
Professor of Chemistry
Jeanne W. Swen
Clinical Instructor in Family Medicine
Leigh Cole Swensen
Professor of Literary Arts
Rebecca R. Swenson
Assistant Professor of Psychiatry and Human Behavior (Research)
Robert M. Swift
Professor of Psychiatry and Human Behavior
Patrick Sylvain
Visiting Lecturer in Latin American and Caribbean Studies
Jeffrey B. Syme
Clinical Assistant Professor in Family Medicine
Patricia V. Symonds
Visiting Scholar in Anthropology
Joanna Szmydynger-Chodobska
Assistant Professor of Emergency Medicine (Research)
Ramin Tabaddor
Clinical Assistant Professor in Family Medicine
Hiroshi Tajima
Lecturer in East Asian Studies
Kathy M. Takayama
Adjunct Associate Professor of Molecular Biology, Cell Biology and Biochemistry

Ross Taliano
Assistant Professor of Pathology and Laboratory Medicine

Roberto Tamassia
Plastech Professor of Computer Science

Dominick Tammaro
Associate Professor of Medicine

Chung-I Tan
Professor of Physics

Jay X. Tang
Associate Professor of Physics

Jianwu Tang
Assistant Professor of Geological Sciences (MBL)

Jin Bo Tang
Adjunct Professor of Surgery (Plastic Surgery)

Xiaoli Tang
Assistant Professor of Medicine (Research)

Barbara I. Tannenbaum
Senior Lecturer in Theatre Arts

Nina Tannenwald
Senior Lecturer in Political Science

Hakan Tanriver
Visiting Assistant Professor of Engineering

Umadevi Tantravahi
Associate Professor of Pathology and Laboratory Medicine

Leigh Tarentino
Assistant Professor of Visual Art

David Targan
Adjunct Associate Professor of Physics

Madhusudhan Tarigopula
Clinical Instructor in Medicine

Gerald M. Tarnoff
Clinical Assistant Professor in Psychiatry and Human Behavior

Leila Tarokh
Adjunct Assistant Professor of Psychiatry and Human Behavior

Keiko M. Tarquinio
Assistant Professor of Pediatrics

John M. Tarro
Clinical Assistant Professor in Surgery (Otolaryngology)

Linda S. Tartell
Clinical Associate Professor in Pediatrics

Karen T. Tashima
Professor of Medicine

Marc Tatar
Professor of Biology

Charlene A. Tate
Assistant Professor of Neurology (Clinical)

Gabriel Taubin
Associate Professor of Engineering; Associate Professor of Computer Science

Joao M. Tavares
Clinical Assistant Professor in Medicine

Tracey Taveira
Adjunct Associate Professor of Medicine

Elisabeth B. Taylor
Clinical Assistant Professor in Psychiatry and Human Behavior

Elizabeth Taylor
Senior Lecturer in English

Helena Taylor
Assistant Professor of Surgery (Plastic Surgery); Assistant Professor of Pediatrics

Julie S. Taylor
Associate Professor of Family Medicine

Lynn E. Taylor
Assistant Professor of Medicine

Marshall A. Taylor
Clinical Assistant Professor Emeritus in Obstetrics and Gynecology

Kurt Teichert
Lecturer in Environmental Studies

Trevor Tejada-Berges
Assistant Professor of Obstetrics and Gynecology

Adam Teller
Associate Professor of Judaic Studies and History

Tahir Tellioglu
Clinical Assistant Professor in Psychiatry and Human Behavior

Joan M. Teno
Professor of Health Services, Policy and Practice; Professor of Medicine

Richard M. Terek
Associate Professor of Orthopaedics

Dmitry Terentyev
Assistant Professor of Medicine (Research)

Joseph Terlato
Clinical Assistant Professor in Medicine

Elmo Terry-Morgan
Associate Professor of Africana Studies and Theatre Arts

Michael S. Tesler
Assistant Professor of Political Science

Anthony F. Testa
Clinical Instructor in Medicine

Tracy O'Leary Tevyaw
Clinical Associate Professor in Psychiatry and Human Behavior

Christopher G. Thanos
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Simone Thavaseelan
Assistant Professor of Surgery (Clinical)(Urology)

Walter R. Thayer Jr
Professor Emeritus of Medical Science

Ronald W. Thebange
Clinical Assistant Professor in Psychiatry and Human Behavior

Deepak V. Thiragarajan
Clinical Assistant Professor in Medicine

Anthony G. Thomas
Clinical Assistant Professor in Medicine

Edward S. Thomas
Clinical Assistant Professor in Medicine

John G. Thomas
Assistant Professor of Psychiatry and Human Behavior (Research)

Tenny J. Thomas
Clinical Assistant Professor in Emergency Medicine

Valerie A. Thomas
Clinical Assistant Professor in Medicine

Bradford B. Thompson
Assistant Professor of Neurology; Assistant Professor of Neurosurgery

Marjorie E. Thompson
Adjunct Associate Professor of Biology

Nancy L. Thompson
Professor Emerita of Medicine (Research)

William Thompson
Assistant Professor of Applied Mathematics (Research)
William R. Thompson  
Clinical Professor Emeritus in Surgery  

Leslie Thornton  
Professor of Modern Culture and Media  

Matthew J. Thran  
Clinical Assistant Professor in Surgery (Anesthesiology)  

Steven Threlkeld  
Adjunct Assistant Professor of Pediatrics  

Michael A. Thursby  
Clinical Assistant Professor in Medicine  

Jennifer Tidey  
Associate Professor of Psychiatry and Human Behavior (Research)  

Alexandra M. Tien  
Clinical Assistant Professor in Family Medicine  

David Robbins Tien  
Clinical Associate Professor in Surgery (Ophthalmology)  

Peter L. Tilkemeier  
Associate Professor of Medicine  

Alvaro M. Tinajero  
Clinical Assistant Professor in Epidemiology  

Jeff T. Tilton  
Professor of Music  

Pratyush Tiwary  
Post-Doc Research Associate in Engineering  

King W. To  
Clinical Professor in Surgery (Ophthalmology)  

Cristina Toba  
Clinical Assistant Professor in Psychiatry and Human Behavior  

John F. Todaro  
Clinical Assistant Professor in Psychiatry and Human Behavior  

Lyudmil Todorov  
Clinical Instructor in Surgery (Anesthesiology)  

Elizabeth Toll  
Clinical Associate Professor in Pediatrics; Clinical Associate Professor in Medicine  

Khachig Tololyan  
Visiting Scholar in Modern Culture and Media  

Marina Tolou-Shams  
Assistant Professor of Psychiatry and Human Behavior (Research)  

John O. Tomasi  
Professor of Political Science  

Edward S. Tomassi  
Teaching Associate in Music  

David R. Tomlinson  
Clinical Instructor in Family Medicine  

Mary Eleanor Toms  
Clinical Assistant Professor in Family Medicine  

Iris L. Tong  
Assistant Professor of Medicine  

Shuping Tong  
Associate Professor of Medicine (Research)  

Beth A. Toolan  
Clinical Instructor in Pediatrics  

Philip A. Torgan  
Clinical Associate Professor Emeritus in Medicine  

Alison Tovar  
Adjunct Assistant Professor of Behavioral and Social Sciences  

Gregory J. Towne  
Assistant Professor of Surgery (Clinical)(Anesthesiology)  

Nicholas William Townsend  
Professor Emeritus of Anthropology  

Molly M. Tracy  
Assistant Professor of Neurology (Clinical)  

Thomas F. Tracy Jr  
Professor of Surgery and Pediatrics  

Peter G. Trafton  
Professor of Orthopaedics  

Christine L. Trask  
Clinical Assistant Professor in Psychiatry and Human Behavior  

Diana Q. Treaba  
Assistant Professor of Pathology and Laboratory Medicine  

Serguei R. Treil  
Professor of Mathematics  

Miguel L. Trelles  
Adjunct Lecturer in Visual Art  

Geoffrey Tremont  
Associate Professor of Psychiatry and Human Behavior  

Mark A. Tribe  
Assistant Professor of Modern Culture and Media  

Elizabeth W. Triche  
Assistant Professor of Epidemiology  

Andrew S. Triebwasser  
Assistant Professor of Surgery (Clinical)(Anesthesiology)  

M. Howard Triedman  
Clinical Associate Professor Emeritus in Anesthesiology  

Scott A. Triedman  
Clinical Assistant Professor in Radiation Oncology  

Thomas Trikalinos  
Associate Professor of Health Services, Policy and Practice  

Anubhav Tripathi  
Associate Professor of Engineering; Associate Professor of Molecular Pharmacology, Physiology and Biotechnology  

Amal N. Trivedi  
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Medicine  

Caroline A. Troise  
Clinical Assistant Professor in Medicine  

Wilson A. Truccolo-Filho  
Assistant Professor of Neuroscience (Research)  

Margaret Tryforos  
Clinical Assistant Professor in Family Medicine  

Devin Tsai  
Adjunct Assistant Professor of Emergency Medicine  

Hsin-I Tseng  
Lecturer in East Asian Studies  

Yi-Tang Tseng  
Associate Professor of Pediatrics (Research)  

Ekaterini V. Tsiapali  
Clinical Assistant Professor in Surgery  

William G. Tsiapali  
Clinical Assistant Professor in Surgery (Ophthalmology)  

Robert J. Tubbs  
Assistant Professor of Emergency Medicine  

Joseph R. Tucci  
Adjunct Professor of Medicine  

Christopher Joshua Tucker  
Assistant Professor of Music  

Gregory S. Tucker  
Professor of Physics  

Jan A. Tullis  
Professor of Geological Sciences  

Terry E. Tullis  
Professor Emeritus of Geological Sciences
Glenn A. Tung
Professor of Diagnostic Imaging
Christopher A. Tuttle
Visiting Scholar in Archaeology and the Ancient World
Jean E. Twomey
Assistant Professor of Psychiatry and Human Behavior (Research); Assistant Professor of Pediatrics (Research)
Barbara Tylenda
Clinical Associate Professor in Psychiatry and Human Behavior
Denise A. Tyler
Assistant Professor of Health Services, Policy and Practice (Research)
John H. Tyler
Professor of Education; Professor of Public Policy
Audrey R. Tycka
Associate Professor of Psychiatry and Human Behavior
Holly Tytell
Clinical Assistant Professor in Psychiatry and Human Behavior
Lisa A. Ubelacker
Associate Professor of Psychiatry and Human Behavior (Research)
Kenneth Uhnak
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology
Jody Ann Underwood
Clinical Assistant Professor in Psychiatry and Human Behavior
William S. Unger
Clinical Assistant Professor in Psychiatry and Human Behavior
Jessica L. Unick
Assistant Professor of Psychiatry and Human Behavior (Research)
Eliezer Upfal
Professor of Computer Science
Jonathan D. Uri
Clinical Assistant Professor in Surgery (Anesthesiology)
Wilson F. Utter
Clinical Associate Professor Emeritus in Pediatrics
Alper Uzun
Instructor in Pediatrics (Research)
Constantine Vafidis
Clinical Instructor in Family Medicine
Armen Vagharshakyan
Tamarkin Assistant Professor of Mathematics
Jamsheed Vakharia
Clinical Assistant Professor in Surgery
Jonathan Valente
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics
Luiz Fernando Valente
Professor of Portuguese and Brazilian Studies; Professor of Comparative Literature
Paul Valiant
Assistant Professor of Computer Science
Tuire Valkeakari
Visiting Scholar in American Studies
James M. Valles Jr
Professor of Physics
Joseph Vallino
Assistant Professor of Geological Sciences (MBL)
James van Cleve
Adjunct Professor of Philosophy
Andries van Dam
Thomas J. Watson Jr. University Professor of Technology and Education
Jacob Vandenbarg
Assistant Professor of Medicine (Research)
Herman H. Vandenburgh
Professor Emeritus of Pathology and Laboratory Medicine
Robert Vanderslice
Clinical Assistant Professor in Epidemiology
Axel van de Walle
Associate Professor of Engineering
Fabio Vandin
Assistant Professor of Computer Science (Research)
Peter van Dommelen
Joukowsky Family Professor of Archaeology and Professor of Anthropology
David A. Vandyke
Clinical Assistant Professor in Family Medicine
Eliza van Reen
Instructor in Psychiatry and Human Behavior (Research)
Erin Vanscoyoc
Assistant Professor of Pediatrics (Clinical); Assistant Professor of Medicine (Clinical)
Andre van Tonder
Visiting Scholar in Physics
Marcia W. Vanvleet
Assistant Professor of Pediatrics
Leah K. Vanwey
Associate Professor of Sociology
Paul E. A. van Zuiden
Clinical Assistant Professor in Medicine
Mercedes Vaquero
Professor of Hispanic Studies
Ashutosh Varshney
Sol Goldman Charitable Trust Professor in International Studies and Social Sciences
Charles A. Vaslet
Associate Professor of Pathology and Laboratory Medicine (Research)
Sreekala Vasudevan
Clinical Instructor in Medicine
Rosalind M. Vaz
Professor of Pediatrics (Clinical)
Nico Vehse
Assistant Professor of Pediatrics
Corey E. Ventetuolo
Assistant Professor of Medicine; Assistant Professor of Health Services, Policy and Practice
Daniele Venturi
Visiting Assistant Professor of Applied Mathematics (Research)
Wendy Verhoek-Oftedahl
Adjunct Assistant Professor of Epidemiology
Armand D. Versaci
Clinical Professor Emeritus in Surgery
Alice-Lee Vestner
Clinical Professor Emeritus in Surgery
Paul E. A. van Zuiden
Assistant Professor of Computer Science
Tuire Valkeakari
Visiting Scholar in American Studies
James M. Valles Jr
Professor of Physics
Joseph Vallino
Assistant Professor of Geological Sciences (MBL)
James van Cleve
Adjunct Professor of Philosophy
Andries van Dam
Thomas J. Watson Jr. University Professor of Technology and Education
Jacob Vandenbarg
Assistant Professor of Medicine (Research)
Cedric Villani  
Visiting Professor of Applied Mathematics

William W. Vint  
Teaching Associate in Music

Bianca L. Viray  
Tamarkin Assistant Professor of Mathematics

Meera Sushila Viswanathan  
Associate Professor of Comparative Literature; Associate Professor of East Asian Studies

Sivamainthan Vithianathan  
Associate Professor of Surgery (Clinical)

Gwenn M. Vittimberga  
Clinical Assistant Professor in Dermatology

Patrick M. Vivier  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Pediatrics

Petia Vlahovska  
Assistant Professor of Engineering

Annette E. von Dem Bussche  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Michael Vorenberg  
Associate Professor of History

Matthew D. Vrees  
Clinical Assistant Professor in Surgery

Roxanne Vrees  
Assistant Professor of Obstetrics and Gynecology (Clinical)

Jonathan K. Waage  
Professor Emeritus of Biology

Rajan Wadhawan  
Adjunct Assistant Professor of Pediatric Surgery

Safa F. Wagdi  
Clinical Assistant Professor in Surgery (Ophthalmology)

Hedy S. Wald  
Clinical Associate Professor in Family Medicine

Bernard K. Waldrop  
Brooke Russell Astor Emeritus Professor of the Humanities

Rosmarie Waldrop  
Visiting Scholar in Literary Arts

Corey D. B. Walker  
Associate Professor of Africana Studies

W. Scott Walker  
Clinical Assistant Professor in Obstetrics and Gynecology

Barry W. Wall  
Clinical Associate Professor in Psychiatry and Human Behavior

Byron C. Wallace  
Assistant Professor of Health Services, Policy and Practice (Research)

Eric Wallace  
Clinical Assistant Professor in Family Medicine

Michael T. Wallach  
Associate Professor of Diagnostic Imaging (Clinical); Associate Professor of Pediatrics (Clinical)

Edward G. Walsh  
Assistant Professor of Neuroscience (Research)

Anne S. Walters  
Clinical Associate Professor in Psychiatry and Human Behavior

Hui Wang  
Associate Professor of Applied Mathematics

Hye-Sook Wang  
Associate Professor of East Asian Studies

Lai-Sheng Wang  
Professor of Chemistry

Liangjun Wang  
Visiting Scholar in Economics

Lingzheng Wang  
Associate Professor of East Asian Studies

Li-Qiong Wang  
Lecturer in Chemistry

Yang Wang  
Lecturer in East Asian Studies

Christine A. Wanke  
Adjunct Professor of Medicine

Harold R. Ward  
Professor Emeritus of Chemistry and Environmental Studies

Nicholas S. Ward  
Associate Professor of Medicine

Robert P. Ward  
Visiting Lecturer in English

Kay B. Warren  
Charles C. Tillinghast, Jr. ’32 University Professor of International Studies

Otis U. Warren  
Assistant Professor of Emergency Medicine (Clinical)

William H. Warren Jr  
Chancellor’s Professor

Sarita S. Warrier  
Assistant Professor of Medicine (Clinical)

Shoggy T. Waryn  
Senior Lecturer in French Studies

Marvin S. Wasser  
Clinical Assistant Professor in Pediatrics

Takeo Watanabe  
Professor of Cognitive, Linguistic, and Psychological Sciences

Delma-Jean Watts  
Assistant Professor of Pediatrics (Clinical)

David E. Wazer  
Professor of Radiation Oncology

Banice M. Webber  
Clinical Associate Professor Emeritus in Radiation Oncology

Thompson Webb III  
Professor Emeritus of Geological Sciences

Peter M. Weber  
Professor of Chemistry

Elizabeth A. Weed  
Visiting Scholar in Pembroke Center

Lei Wei  
Associate Professor of Orthopaedics (Research)

Marilyn Weigner  
Clinical Associate Professor in Medicine

Barbara J. Weil  
Clinical Assistant Professor in Medicine

David N. Weil  
James and Meryl Tisch Professor of Economics

Jonathan Weinberg  
Visiting Associate Professor of History of Art and Architecture
Daniel M. Weinreich  
Assistant Professor of Biology; Assistant Professor of Center for Computational Molecular Biology  

Ann C. Weinstein  
Adjunct Lecturer in German Studies  

Arnold Louis Weinstein  
Edna and Richard Salomon Distinguished Professor of Comparative Literature  

Deborah F. Weinstein  
Lecturer in Pembroke Center  

Lauren M. Weinstock  
Assistant Professor of Psychiatry and Human Behavior (Research)  

Martin A. Weinstock  
Professor of Dermatology; Professor of Epidemiology  

James H. Weintrub  
Clinical Assistant Professor in Surgery (Plastic Surgery)  

Marjorie E. Weishaar  
Clinical Professor in Psychiatry and Human Behavior  

Barrie L. Weisman  
Clinical Assistant Professor in Family Medicine  

Arnold-Peter Weiss  
Professor of Orthopaedics  

Rebecca B. Weitz-Shapiro  
Stanley J. Bernstein ’65 P’02 Assistant Professor of Political Science  

Elizabeth A. Welch  
Clinical Assistant Professor in Dermatology  

Ivo Welch  
C.V. Starr Professor of Commerce, Organizations and Entrepreneurship  

Jennifer Greene Welch  
Assistant Professor of Pediatrics  

Leslie Welch  
Associate Professor of Cognitive, Linguistic, and Psychological Sciences  

Raymond H. Welch  
Clinical Assistant Professor in Dermatology  

Gregory A. Wellenius  
Assistant Professor of Epidemiology  

Ryan J. Welter  
Clinical Assistant Professor in Family Medicine  

Joel K. Weltman  
Clinical Professor Emeritus in Medicine  

Jane Wen  
Clinical Instructor in Medicine  

Linda C. Wendell  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery  

Katharine D. Wenstrom  
Professor of Obstetrics and Gynecology  

Susan J. Wenze  
Assistant Professor of Psychiatry and Human Behavior (Research)  

Lee V. Wesner  
Clinical Assistant Professor in Surgery (Anesthesiology)  

Gary M. Wessel  
Professor of Biology  

Conrad W. Wesselhoeft Jr  
Professor Emeritus of Surgery (Clinical)  

Albert F. Wessen  
Professor Emeritus of Behavioral and Social Sciences  

Holly K. Westervelt  
Associate Professor of Psychiatry and Human Behavior (Clinical)  

Robert J. Westlake  
Professor Emeritus of Psychiatry and Human Behavior  

Judith B. Westrick  
Clinical Instructor in Pediatrics  

Terrie T. Wette  
Professor of Health Services, Policy and Practice  

Patrick Weyer  
Clinical Assistant Professor in Medicine  

Gary G. Wharton  
Clinical Assistant Professor in Obstetrics and Gynecology  

Kristi A. Wharton  
Professor of Biology  

Carol A. Wheeler  
Clinical Associate Professor in Obstetrics and Gynecology  

Elizabeth Wheeler  
Clinical Assistant Professor in Psychiatry and Human Behavior  

William M. Wheiihan  
Clinical Associate Professor in Psychiatry and Human Behavior  

Emily M. White  
Clinical Professor in Obstetrics and Gynecology (Clinical)  

Jordan White  
Assistant Professor of Family Medicine (Clinical)  

Michael White  
Professor of Sociology  

Russell E. White  
Clinical Associate Professor in Surgery  

Tara L. White  
Assistant Professor of Behavioral and Social Sciences (Research)  

Laura Brave Whiteley  
Clinical Assistant Professor in Psychiatry and Human Behavior (Research)  

Jessica H. Whiteside  
Assistant Professor of Psychological Sciences  

Esther K. Whitfield  
Associate Professor of Comparative Literature  

Hilary Whitlatch  
Assistant Professor of Medicine  

Annie J. Wiart  
Senior Lecturer in French Studies  

John Edgar Wideman  
Asa Messer Professor of Africana Studies  

Doreen L. Wiggins  
Clinical Assistant Professor in Obstetrics and Gynecology  

Faith Widling  
Visiting Scholar in Pembroke Center  

Brian Wiley  
Clinical Assistant Professor in Emergency Medicine  

Joanne E. Wilkinson  
Clinical Assistant Professor of Family Medicine  

David M. Williams  
Clinical Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Psychiatry and Human Behavior  

Kenneth Williams  
Associate Professor of Obstetrics and Gynecology (Clinical)  

Paul Gregory Williard  
Professor of Chemistry  

Andre Willis  
Visiting Assistant Professor of Religious Studies  

Ira B. Wilson  
Professor of Health Services, Policy and Practice; Professor of Medicine  

Jeffrey M. Wilson  
Clinical Assistant Professor in Family Medicine  

Julie M. Wilson  
Clinical Assistant Professor in Psychiatry and Human Behavior
Valerie P. Wilson
Clinical Professor in Health Services, Policy and Practice

David M. Wilterdink
Clinical Assistant Professor in Family Medicine

Janet L. Wilterdink
Clinical Associate Professor in Neurology

Inge Crosman Wimmers
Professor Emerita of French Studies

Jeffrey P. Wincze
Clinical Assistant Professor in Psychiatry and Human Behavior

John P. Wincze
Clinical Professor in Psychiatry and Human Behavior

Eric Winer
Assistant Professor of Medicine

Edward Wing
Professor of Psychiatry and Human Behavior

Rena R. Wing
Professor Emeritus of History of Art and Architecture

Marion F. Winkler
Associate Professor of Surgery

Todd G. Winkler
Professor of Music

Ronald M. Wintrob
Clinical Professor in Psychiatry and Human Behavior

Sabrina M. Witherby
Assistant Professor of Medicine (Clinical)

Jon D. Witman
Clinical Associate Professor in Obstetrics and Gynecology

Edward G. Wittels
Associate Professor of Medicine

Kyle J. Wohlrab
Assistant Professor in Obstetrics and Gynecology (Clinical)

Patricia N. Wold
Clinical Assistant Professor Emerita in Psychiatry and Human Behavior

Charles A. Wolff
Clinical Assistant Professor in Family Medicine

Jennifer C. Wolff
Assistant Professor of Psychiatry and Human Behavior (Research)

Ivan S. Wolfson
Clinical Associate Professor in Family Medicine

Arthur W. Y. Wong
Clinical Instructor in Surgery (Urology)

Kenneth K. Wong
Professor Emeritus of Education Policy

Mark Wood
Adjunct Professor of Behavioral and Social Sciences

Harold A. Woodcome Jr
Clinical Associate Professor in Surgery (Ophthalmology)

Kathleen Woodruff
Clinical Assistant Professor in Obstetrics and Gynecology

Margaret S. Wool
Clinical Associate Professor in Family Medicine; Clinical Associate Professor in Behavioral and Social Sciences

Karen L. Woolfall-Quinn
Clinical Associate Professor in Medicine

Hugh Woolverton III
Clinical Assistant Professor in Family Medicine

Billy R. Wooten
Professor Emeritus of Psychology

Michael S. Worden
Assistant Professor of Neuroscience (Research)

Carolyn D. Wright
Isreal J. Kapstein Professor of English

Jack C. Wright
Associate Professor of Cognitive, Linguistic, and Psychological Sciences

Daniel E. Wroblewski
Clinical Instructor in Surgery

Haiwei Wu
Assistant Professor of Pediatrics (Research)

Tony C. Wu
Clinical Associate Professor in Medicine

Wen-Chih Wu
Associate Professor of Medicine; Associate Professor of Epidemiology

Zhijin J. Wu
Associate Professor of Biostatistics

Donna M. Wuflf
Professor Emerita of Religious Studies

Michael B. Wyatt
Adjunct Assistant Professor of Geological Sciences

David Wyss
Adjunct Professor of Economics and International Relations

Gang Xiao
Professor of Physics

Jinjun Xiong
Assistant Professor of Pathology and Laboratory Medicine

Haian Xu
Assistant Professor of Medicine (Research)

Jingming Xu
Charles C. Tillinghast, Jr. ’32 University Professor of Engineering

Wenli Xu
Senior Fellow

Israel Yaar
Associate Professor Emeritus of Neurology

Evgeny Yakirevich
Assistant Professor of Pathology and Laboratory Medicine

Ali Yalcindag
Assistant Professor of Pediatrics (Clinical)

Chie Yamamoto
Teaching Associate in East Asian Studies

Kikuko Yamashita
Associate Professor of East Asian Studies

Joseph Yammine
Assistant Professor of Medicine (Clinical)

WeiWei Yang
Visiting Scholar in Chemistry

Wentian Yang
Assistant Professor of Orthopaedics (Research); Assistant Professor of Medicine (Research)

Ronald A. Yankee
Professor Emeritus of Medicine

Akio Yasuhara
Adjunct Assistant Professor of Economics

Yvette E. Yatchmink
Associate Professor of Pediatrics (Clinical)

Patricia Ybarra
Associate Professor of Theatre Arts

Shirley Yen Matloff
Assistant Professor of Psychiatry and Human Behavior (Research)
See-Chen Ying
Professor of Physics

Agustin Yip
Clinical Assistant Professor in Psychiatry and Human Behavior

David C. Yoburn
Clinical Associate Professor in Medicine

Don C. Yoo
Assistant Professor of Diagnostic Imaging (Clinical)

Gi Yoon-Huang
Clinical Instructor in Surgery (Ophthalmology)

Carolyn Te Young
Clinical Assistant Professor in Pathology and Laboratory Medicine

Mark Young
Clinical Assistant Professor in Family Medicine

Gengsheng Yu
Assistant Professor of Pathology and Laboratory Medicine

Zhenglong Yuan
Assistant Professor of Surgery (Research)

Najam A. Zaidi
Assistant Professor of Medicine (Clinical)

Clinical Instructor in Medicine

Anna Zaletayaeva
Clinical Assistant Professor in Family Medicine

Nickolas D. Zaller
Assistant Professor of Medicine (Research)

Vazira F-Y Zamindar
Associate Professor of History

Dominick Zangari
Clinical Assistant Professor in Surgery (Ophthalmology)

Raymond P. Zarlingo
Clinical Assistant Professor in Pediatrics

Alexander Zaslavsky
Professor of Engineering; Professor of Physics

Vladislav Zayas
Clinical Assistant Professor in Neurology

Stanley B. Zdonik Jr
Professor of Computer Science

Kimberly A. Zeller
Clinical Assistant Professor in Family Medicine

Catherine Zerner
Professor of History of Art and Architecture

Mark Zervas
Manning Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Hua-Jin Zhai
Senior Research Associate in Chemistry

Cunxian Zhang
Associate Professor of Pathology and Laboratory Medicine

Peng Zhang
Assistant Professor of Medicine (Research)

Tong Zhang
Visiting Associate Professor of Engineering

Yingjie Zhang
Assistant Professor of Medicine (Research)

Zheng Zhang
Assistant Professor of Biostatistics (Research)

Anatoly Zhiltkovich
Professor of Medical Science

Wenpeng Zhu
Post-Doc Research Associate in Engineering

Shougang Zhuang
Associate Professor of Medicine (Research)

Rashid Zia
Manning Assistant Professor of Engineering

James W. Ziegler
Associate Professor of Pediatrics (Clinical)

Beth Anne Zielinski
Lecturer in Molecular Pharmacology, Physiology and Biotechnology

Robert Zielinski
Clinical Assistant Professor in Psychiatry and Human Behavior

Richard J. Zienowicz
Associate Professor of Surgery

Sally Zierler
Professor Emerita of Epidemiology

Stanley Zimmering
Professor Emeritus of Biology

Anita L. Zimmerman
Professor of Medical Science

Mark Zimmerman
Associate Professor of Psychiatry and Human Behavior

Bernard Zimmermann III
Adjunct Associate Professor of Medicine

Matthew B. Zimmt
Royce Family Professor in Teaching Excellence and Professor of Chemistry

Brian Zink
Frances Weeden Gibson-Edward A. Inannuccilli, MD, Professor of Emergency Medicine

Stephen H. Zinner
Adjunct Professor of Medicine

David Amato Zinno
Teaching Associate in Music

Samuel Zipp
Assistant Professor of American Studies and Urban Studies Program

Jeanne Zifer
Clinical Instructor in Pediatrics

Caron Zlotnick
Professor of Psychiatry and Human Behavior

Seth A. Zuckerman
Visiting Scholar in Environmental Studies

Janet Zweig
Adjunct Assistant Professor of American Studies

John F. Zwetchkenbaum
Clinical Instructor in Medicine

William H. Zywiak
Adjunct Assistant Professor of Psychiatry and Human Behavior (Research)
General Regulations

General academic requirements

Undergraduate degrees:

Information regarding general academic degree requirements are listed under 'The College' section of the University Bulletin as well as on the respective websites of the Office of the Registrar (http://brown.edu/Administration/Registrar/guidelines/undergrad_progs) and the Dean of the College (http://brown.edu/Administration/Dean_of_the_College/degree).

Advanced degrees:

Information regarding Advanced degree requirements for specific academic programs are listed on the Graduate School (http://www.brown.edu/academics/degree-granting) website. Information regarding general and overall guidelines for advanced degrees are also listed on the Office of the Registrar (http://www.brown.edu/Administration/Registrar/guidelines/advanced_progs) website.

Enrollment and course registration

Instructions about enrollment will be sent via e-mail prior to the opening of each semester to all students. To complete enrollment, all requirements of the pertinent administrative offices of the University must be met, including registration for courses, payment of accounts, and arrangements for housing as appropriate. Fees will be charged for failure to meet established deadlines. All students must complete enrollment in order to be eligible to remain at the University.

Students are urged to note carefully the instructions provided at registration in order to assure eligibility for enrollment, proper registration in courses, and to avoid unnecessary payment of Late Registration and Change of Course fees. All registration materials and/or processes are considered official university documents. Any falsification of signatures or other tampering with such forms/processes constitutes a violation of the Academic Code.

All registration-related deadlines for each semester are listed in the 'Academic Calendar' section of the Bulletin and also on the Office of the Registrar website as well as answers to common registration-related questions.

For the full text on the Academic Regulations and Instructions for Registration, see the Registrar's Office web site at: http://www.brown.edu/Administration/Registrar/guidelines/index.html

For a registration on registration, see: http://www.brown.edu/CIS/Training/onlinetraining/index.php

To access the most up-to-date course information (*The course information in this Bulletin is current as of October 2012), see: http://selfservice.brown.edu/menu

Course Credit

The semester course is the unit of credit. This is defined as a course taken for the duration of one semester and, for purposes of evaluation, may be considered the approximate equivalent of four semester hours.

Maximum Course Load and Auditing

No student enrolled in The College or the Graduate School may enroll for more than five Brown credits in a semester. A degree candidate paying full tuition (4 or more enrollment units per semester) and is enrolled in less than five academic credits may be permitted to audit (see below section on auditing) additional course(s). At no time may a student be registered for more than 5 credits/courses including audits.

Enrollment Without Academic Credit

Auditing. An auditor is a student who is registered in a course without earning academic credit upon successful completion under the following conditions: (1) the student must be properly registered for it; (2) the student must pay the usual course fee except as indicated in the next paragraph; (3) the student is entitled to all instruction in the course, including conferences, the criticism of papers, tests, and examinations.

Any student registered on a full-time basis may be permitted to audit additional courses in any semester without charge. The total number of course registrations, including audits, may not exceed five credits.

Non-degree or student paying less than four enrollment units of tuition may choose to audit if they so choose, but the student does so with the understanding that they will pay the equivalent rate as if registered for academic credit.

With the concurrence of the instructor, the fact that a course has been audited shall be entered on the permanent record of any student electing this privilege. The status of a course in which a student has registered may not be changed from audit to credit after the fourth week of classes or from credit to audit after midsemester.

Vagabonding. A “vagabond” is a student who, with the permission of the instructor involved, visits a given course occasionally or regularly without payment of fees. It is understood that such a student shall be entitled to participate in classes and activities, including discussions, conferences, and papers, only at the pleasure of the instructor.

Attendance, Grading, Examinations

Attendance

It is in the interest of every student to attend all sessions of the classes in which registered, and each student has an obligation to contribute to the academic performance of all by full participation in the work of each class; however, within such limits as are necessary for the general welfare, a student benefits also from exercising discretion and assuming responsibility for his or her educational progress.

Accordingly, unless the instructor imposes attendance requirements, students are not limited with respect to the number of absences from a course.

When, in the instructor’s opinion, a student is abusing the privilege of voluntary attendance, the appropriate dean’s office should be notified so that appropriate action may be taken.

A student is always fully responsible for any course work missed because of absences and will be assigned failing grades in final examinations missed without excuse from the dean’s office.

No student organization shall make any appointment for undergraduates which conflicts with college exercises unless permission has been obtained from the dean.

Grading System

At the end of each semester final grades are given in semester courses. In all courses, except those designated by the instructor as Mandatory Satisfactory/No Credit, a student may, in consultation with the advisor, elect to be graded on a basis of either Satisfactory/No Credit or A, B, C/No Credit or for Satisfactory/No Credit, may request from the instructor a more detailed written evaluation of his or her work. (See Course Performance Report below.) Such supplemental evaluations are intended primarily for the information of the student and do not replace departmental evaluations.

No Credit. This grade is given when courses are not satisfactorily completed. The notation No Credit, and the description of the course in which it is given, are not entered on the official academic transcript.

1. Courses may be designated to be graded on a Mandatory Satisfactory/No Credit basis for all students enrolled on the initiative of the instructor. The designation of a course by an instructor to be graded S/NC only must be announced no later than the first day of classes and entails the responsibility for providing Course Performance Report forms to all students who request them. An asterisk shall accompany the listing on the transcript of any course that has been designated by the instructor to be graded on the basis of S/NC only, with an appropriate explanation of the symbol provided.
Course Performance Reports may be sent out of the University at the student's request as information on his or her work at Brown University. In such cases, the student must provide copies of all material to be enclosed at the time the transcript is requested.

Concentration Evaluations: Undergraduate students may request a written evaluation of performance in concentration, which will consist of the student's own statement and an evaluation prepared by an appropriate faculty member. The following points may be included in such an evaluation: any special characteristics of the concentration program; information not on the student's official transcript, such as the interest and motivation of the student, the probable capacity for more advanced work, the ability to conduct research, and so forth; and a comment describing the bases on which the evaluation was prepared. If the student elects to have a concentration evaluation prepared, the student's statement and request for departmental evaluation should be submitted to the concentration advisor by the end of the first week of the student's final semester. There is no specific form for concentration evaluations; faculty may use whatever format they choose.

Transcripts: Requests for transcripts must be made either in writing by completing a Transcript Order Form, or electronically. For further information please visit the Office of the Registrar's website (http://www.brown.edu/Administration/Registrar). Transcripts will be issued only if all financial obligations to the University have been met.

An official transcript consists of a copy of the permanent record listing courses passed and grades received. A statement is added to all transcripts explaining the grading system and indicating that the student may elect to include other material with the official transcript. The student should choose this material in consultation with his or her advisor. The University will mail this material in one envelope along with the official transcript.

Examinations

A final, written examination (at the end of each semester) shall be given in each course numbered under 2000 unless the instructor of a particular course decides to use some other mode of final evaluation. If the written examination is not to be used, the mode of final examination which is to be used shall be made known to the students in the course no later than midterm and, in addition, the department and the registrar shall be informed.

Final Examination Schedule: A pre-defined period at the close of each semester is provided for final examinations for those courses for which such an examination is scheduled. Two examination periods are scheduled for each day. The examination group is determined by, in most cases, the offering time associated with the course (indicated by the figure for the course), with the mode of final examination which is to be used shall be made known to the students in the course at the end of the semester. The offering time associated with the course is determined by the figure for the course, with the mode of final examination which is to be used shall be made known to the students in the course at the end of the semester.
Exam Excuses: The Office of the Dean of the College is solely responsible for determining whether a student's absence from a final examination is excused. To ensure equitable treatment of all students, students are excused from exams only for family or medical emergencies or for religious reasons. Please note that students' travel plans are never an excuse for missing a final exam. Faculty wishing to grant a student an exam excuse may contact Dean Stephen Lassonde or Dean Kathleen McSharry, the deans authorized to grant exam excuses. In emergency situations, students who are unable to contact their professors must contact Dean Lassonde or Dean McSharry, who will determine whether or not an exam excuse is warranted. Course instructors are notified of exam excuses granted by the Dean of the College Office.

Consistent with Brown’s policy on nondiscrimination, students who are unable to take a final examination due to religious observance may arrange to take their final at an alternate time. Consultation is required with the course instructor, the Chaplain’s Office, and the Office of the Registrar, and the arrangements must be made by mid-semester. Students may obtain more information and an application for rescheduling a final due to religious observance from the Registrar’s Office.

Make-up exams for approved exam excuses are administered by the Registrar in the second week of the subsequent fall or spring term. The Registrar’s Office informs students by email of the date, time, and location of make-up exams.

Placement and Achievement Tests in Foreign Languages. Placement tests in the foreign languages are given during Orientation Program in the fall and during the first week of classes in each semester.

All students, before taking college courses in a foreign language in which they have presented entrance credit, must take either a placement test at Brown University or, preferably, a College Board Language Achievement Test in secondary school. Students with outstanding performance on these tests, or on the Advanced Placement Tests of the College Entrance Examination Board, may be admitted to advanced courses without the usual course prerequisites.

Student Code of Conduct

Academic Code Violations

All cases of academic dishonesty among undergraduates, graduate, or medical students, as defined in the Academic Code at Brown University, shall be referred to the dean of the College, Graduate School, or Medical School, or his or her designated representative. A student accused of such an offense shall be notified in writing as soon as possible of the specific charge or charges against him or her before his or her case is considered. The student shall be given the opportunity of a hearing before the designated representative of the dean of the College, Graduate School, or Medical School, and two members of the faculty, at which all relevant facts may be presented. A student shall have the right to appeal any decision to the dean of the College, Graduate School, or Medical School within five business days after receipt of the official letter outlining the case and the decision reached. For definitions of offenses against the Academic Code, procedures, policies, and a list of penalties, see the pamphlet issued by the Office of the Dean of the College, Principles of the Brown University Community: The Academic Code and Non-Academic Disciplinary System.

Nonacademic Discipline

Brown strives to sustain a learning environment that supports individual exploration. Central to this effort are the four primary Principles of the Brown University Community: individual integrity, respect for others, respect for University resources, and respect for the values of teaching, learning and scholarship. Our community believes that adherence to these principles supports the overall academic mission of the University. Violations of these principles will be handled through the procedures governing the Academic Code and the Non-Academic Disciplinary Procedures. These procedures are designed to address behaviors that impede the educational activity of the University or that infringe upon the rights of others.

Non-academic disciplinary cases are administered by the Office of Student Life, the Peer Community Standards Board, and the University Disciplinary Council. Specific hearing procedures can be found online at www.brown.edu/rand. Printed copies of the Non-Academic Disciplinary Procedures are available from the Office of Student Life.
## Academic Calendar

### Fall 2012

<table>
<thead>
<tr>
<th>Date</th>

The College

Admission

In order to receive information about admission to the undergraduate college, please visit our website to register online: www.brown.edu/Admission/Admission. Requests for applications for admission to undergraduate study should be addressed to:

College Admission Office
Brown University
Box 1876
Providence, Rhode Island 02912
(401) 863-2378

The application deadline for the regular admission process is January 1 of the year of desired entrance to Brown. An early plan is available for students who wish to receive December notification. Early Decision candidates must apply as early in the fall of the senior year of high school as possible but in any case by November 1.

Subject Requirements

Brown’s commitment to fostering a liberal education assumes that a candidate for admission will profit most from pursuing a comprehensive college preparatory program. A strong background in English (both literature and writing), foreign languages, mathematics, science, and history will enable students to benefit from the intellectual opportunities offered by Brown University. Brown considers the programs listed below to be a desirable secondary school preparation.

English—four years with significant emphasis on writing, continued through the senior year;

Mathematics—at least three years of college preparatory mathematics, preferably continued through the senior year;

Foreign Language—at least three years, preferably continued through the senior year;

Laboratory Science—at least two years of laboratory science above the freshman-year level. Prospective science or engineering students should take both physics and chemistry, and as advanced a level of mathematics as possible;

History—at least two years, including American History;

The Arts—at least one year of study in music or art;

Elective Subjects—at least one year of elective academic subjects;

Information Technology—facility with computers is recommended for all applicants.

Exceptions may be made. The Board of Admission encourages the growth of innovative programs and welcomes applications from students of varying educational backgrounds who have shown outstanding intellectual promise. Exceptionally able students who are well-prepared to enter college before completion of secondary school may also be admitted, although such cases are unusual.

College Entrance Examination Board Tests

Each applicant must take the Scholastic Assessment Test (SAT Reasoning Test) and any two SATSubject Tests of the College Entrance Examination Board no later than January of the senior year. Scores for the examinations administered through the American College Testing Program (the ACT) may be submitted in lieu of those of the College Board; the ACT with the Writing Test will serve as a substitute for the SAT requirements. It is the responsibility of each candidate to take the appropriate tests and to see that they are officially reported to the Board of Admission at The College by January 1 (or the January administration of the tests). A final decision on the application cannot be made until official scores have been received.

Advanced Placement Examinations

Brown participates in the Advanced Placement Program of the College Entrance Examination Board. The program’s aims are “to give able students challenging educational experiences in school, and to increase for these able students the opportunity to take advanced work in college.” Students enrolled in secondary schools participating in this program may take the appropriate examinations given in May and have the scores sent to the Office of the Dean of the College. Course credit and/or placement is determined by the appropriate academic department of Brown University, which may review the examination booklets and other materials. Policies on credit and/or placement vary from department to department. Students will be notified of such credit upon matriculation at Brown. Subjects in which course credit may be granted include American history, art history, biology, economics, European history, French, German, Latin, mathematics, physics, and Spanish.

Advanced Placement credits may not be applied to the minimum 30 courses needed to earn a Brown degree.

Advanced Standing for Work Done Prior to Entrance

Freshmen who have taken college courses at an accredited institution prior to matriculation at Brown may be considered for some advanced standing. Further, freshmen who have received certification under various international educational systems may also be considered for some advanced standing. Questions concerning course credit and advanced standing should be addressed to the Office of the Dean of the College.

Course Credit and Advanced Standing

By the end of their fifth semester, students must declare to the Office of the Dean of the College whether or not they wish to use their A.P. and/or international examination credit to accelerate their graduation. To use credit for acceleration, students may request one semester of Advanced Standing (and enrollment credit) for 3–8 course credits or two semesters of Advanced Standing (and enrollment credit) for 7–10 course credits. Students not requesting Advanced Standing (and enrollment credit) from the registrar by this deadline may not do so subsequently, except by petitioning the Committee on Academic Standing.

Transfer Admission from Other Colleges

Only a limited number of transfer students can be accepted each year. A maximum of two years of study elsewhere is transferable; online, extension, and correspondence courses are not transferable, nor are courses outside the realm of defined academic disciplines (nursing, radio electronics and/or broadcasting, or business administration, to name a few). Students who wish to be considered as transfer candidates should write or call The College Admission Office for additional information, application forms, and procedures.

Special and Visiting Students

Each year, a number of students enrolled at other colleges spend a semester or a year as “visitors” at Brown to pursue course work (toward credit at their own college) not offered at their own institution. Other students are accepted on a nonmatriculated basis for a limited number of courses and are classified as special students.

Resumed Education Program

The Resumed Undergraduate Education program at Brown University enables a person who has interrupted his or her formal education for five or more years, or who is twenty-five years or older, to enroll as a fully matriculated student and to study at a full or part-time rate. Some students have begun college work already; others have interrupted their education after completing high school. The Board of Admission for Resumed Education goes beyond the traditional bases of secondary school grades and college board scores in maturity, commitment, and future potential.

Interested people should write to:

The Resumed Undergraduate Education Program
The College Admission Office, Box 1876
Brown University, Providence, Rhode Island 02912 or call (401) 863-2378.
Requirements for Baccalaureate Degrees

Baccalaureate Degree Programs

At Brown, two baccalaureate degrees are awarded—the Bachelor of Arts (A.B.) and the Bachelor of Science (Sc.B.). The degree awarded is determined by a student’s chosen concentration program. All Brown undergraduates must complete the requirements for either an A.B. or a Sc.B. in order to earn the baccalaureate degree at Brown.

The Sc.B. degree recognizes a science concentration that demonstrates breadth and depth in science beyond the minimum required for the A.B. degree in the same field. An Sc.B. program normally follows these guidelines:

1. The concentration program, with the exception of Engineering, shall require no more than ten courses in any one department. The total number of concentration courses required shall not exceed twenty (twenty-one for Engineering).
2. At least one semester course of independent study, research, or design in the concentration discipline must be included.
3. Additional electives must be chosen to meet the quantity requirement for all baccalaureate degrees. In cases, where the student may successfully complete the Sc.B. degree on the basis of one concentration as well as an additional concentration associated with an A.B. degree, only one degree (Bachelor of Science) is awarded upon graduation. *See below for requirements associated with combined degrees.*

Degrees with Distinction

Baccalaureate degrees may be awarded with distinction (magna cum laude) to those students whose percentage of quality grades -- grades of "A" or "S with Distinction" -- in courses taken at Brown puts them in the top 20% of the entire undergraduate graduating class. The Registrar will provide an opportunity for students to indicate that they do not wish to be considered for a degree with distinction.

Quantity and Progress Requirements

In order to graduate with a Brown baccalaureate degree, a student must successfully complete at least 30 courses (equivalent to 120 semester hours), 15 of which must be taken at Brown. A maximum of 4 summer courses may be applied toward this requirement. Approved study at another institution may also count toward the 30-course degree requirement.

The standard semester course load at Brown is four courses. Full-time students are permitted to enroll in a maximum of five courses in a given semester; students may take three courses in a semester as long as doing so will not bring them below the level of good academic standing. A student may not enroll in fewer than three courses in any semester without written permission from a designated academic dean. Resumed Undergraduate Education students may study on either a part-time or full-time basis.

Residence Requirement

With the exception of students admitted to the Resumed Undergraduate Education (RUE) Program, every candidate for a baccalaureate degree must be in residence at Brown for at least four semesters as a full-time student. Credits from Brown Exchange programs, Brown Approved Alternative Study Abroad programs, and the Brown Summer School do not apply to the residency requirement. Students in the RUE Program must be in residence for the equivalent of four full-time semesters. RUE students may study on either a part-time or full-time basis. Every student must spend sufficient time in concentration studies to permit faculty evaluation of his or her concentration.

Writing Requirement

In order to earn a baccalaureate degree, all students must demonstrate the ability to write well. Learning to write well is a developmental process that occurs over time; Brown students are therefore expected to work on their writing across the four years, in their general studies and the concentration. Students may begin to fulfill this expectation by taking one or more WRIT designated courses, which require students to draft and revise writing assignments based on feedback about their prose. When they declare their concentration, students explain what writing they have completed at Brown and the writing they intend to do in the concentration. The University provides an online portfolio in which students may save examples of their best work each year. This evidence allows students to demonstrate their abilities not only to Brown advisors but also to future colleagues and employers.

All students are expected to communicate effectively in writing in all of their courses. If an instructor is concerned about a student’s ability to write competently, he or she may contact the Associate Dean of the College for Writing, who will help the student identify a course in which the student may work on writing. Some students may be urged to complete a writing course when they first study at Brown; such cases are determined on the basis of materials students submit when applying for admission to Brown and during the summer prior to matriculation. Students with identified writing concerns who do not complete such a course satisfactorily and/or are judged by the dean to be incompetent in writing will be refused registration by the Committee on Academic Standing until they demonstrate that they can meet University standards for written communication.

Concentration Requirement

An academic concentration is the focal point for a student’s undergraduate educational experience at Brown. It is an in-depth study centering on a discipline or disciplines, a problem or a theme, or a broad question. Concentrations aid intellectual development by encouraging conceptual and methodological study on a sophisticated level. A concentration may coincide in some ways with specific prerequisite training for professional goals, but professional training is not the central aspect of the concentration process. Rather, the concentration is designed to foster students’ command of an area of knowledge and ability to use a concentration’s concepts and methods in a coherent manner.

Brown offers standard concentrations that lead to either the Sc.B. or the A.B. degree. In keeping with the philosophy of the open curriculum, students may design an independent concentration if standard concentration offerings do not match their interests. Independent concentration proposals are sponsored by at least one faculty member and must be reviewed and approved by a subcommittee of the College Curriculum Council.

A listing of departmental and interdepartmental concentration programs that are currently available may be found at: http://www.brown.edu/academics/college/concentrations/. The programs have been approved and are subject to periodic review by the College Curriculum Council. Guidelines for preparing an independent concentration proposal are on the Dean of the College website.

All students must request, in writing, admission to a concentration program no later than the middle of their fourth semester, before pre-registering for semester five (usually spring semester of sophomore year). The written proposal should outline the student’s major objectives in choosing the concentration, while also listing the specific courses to be taken. This proposal functions as a kind of contract, and is signed jointly by the student and the concentration advisor for the relevant department or program. Once the contract has been signed, the departmental concentration advisor becomes the student’s advisor for the remainder of his or her time at Brown.

Students may complete as many as three concentrations during a regular four-year program; Brown does not offer minors. A student who satisfactorily completes more than one concentration program may have that fact indicated on his or her permanent record. In order to accomplish this, the student must have filed a declaration form for each concentration by the end of the pre-registration period in the student’s seventh semester. Sponsorship and authorization of each concentration program shall follow the usual procedures.

No student will be permitted to register for his or her fifth semester unless a declaration of concentration has been filed. Students failing to complete registration on time because of the failure to file a concentration declaration will be subject to the same action taken by the University for all cases of late registration (see Financial Information (p. 573)).
Honors in the Concentration: Students whose work in the field of concentration has demonstrated superior quality and culminated in an honors thesis of distinction are awarded departmental honors at Commencement. The designation “Honors” is included on the student’s transcript and diploma. No distinctions are made among quality levels of honors work. Students considering honors work should consult their departmental, interdepartmental, or independent concentration advisor.

Recommendations for honors are due in early May preceding Commencement. Brown does not grant honors retroactively. Therefore, students who consider taking a grade of Incomplete in a thesis project should understand that they will not receive honors unless the thesis is completed in time to be evaluated by faculty readers and a recommendation submitted before graduation.

Enrollment Requirement

By decision of the Corporation, prior to the awarding of a baccalaureate degree each student is required to accumulate eight semesters, or 32 units, of enrollment credit. The eight-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-Levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.)

Requirements for Combined Degree Programs

Combined A.B./Sc.B. Degree

Students who wish to earn a combined A.B. and Sc.B. degree may do so in a five-year program in which work for both degrees proceeds concurrently. Students who elect this five-year plan will usually arrange their programs of study so that they may change to either degree candidacy alone prior to the fourth year.

Requirements for this degree program are as follows:

• Declaration of intent. A formal application approved by the appropriate dean must be filed with the Registrar no later than the student’s fifth semester of study.
• Satisfactory completion of the Sc.B. requirements for a standard concentration program in the life sciences, physical sciences or mathematics, or an approved independent Sc.B. program spanning one or more of these areas.
• Satisfactory completion of the A.B. requirements for a standard or independent concentration in the humanities or social sciences.
• A minimum of 38 courses passed. Transfer credits are awarded according to the University’s standard rules and regulations.
• At least three years in residence.
• Ten semesters, or 40 units, of enrollment credit. At least six of the ten semesters must be completed in residence at Brown. The ten-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester’s worth of work from an approved program of study at another institution, from certain Advanced Placement (AP) exams, and from some international certification programs such as the British A-Levels and the International Baccalaureate. Summer school courses do not count toward the enrollment requirement unless students successfully complete four summer courses at Brown. (See section below on Tuition Regulations Relating to Brown Summer Session Courses.)

Concurrent Program Leading to a Baccalaureate Degree and a Master’s Degree

Subject to the prior approval of the department involved, the Graduate Council, and the Committee on Academic Standing, exceptionally capable students may be permitted, in their junior year, to enter a graduate program of study leading to the earning of both baccalaureate and master’s degrees at the end of eight or nine semesters. Students who are granted this permission complete a minimum of 34 courses within eight or nine semesters. Specific requirements for both degrees must be met, although some courses may be used for credit toward both degrees. Normally, no more than two courses counted toward the undergraduate concentration may be used to fulfill the requirements of the graduate degree. The program includes at least two 2000-level courses, not including any 2000-level courses counted for the independent project or thesis.

In cases where the requirements for an advanced degree are partially completed by students in meeting the requirements for a baccalaureate degree, graduate credit for such work may be allowed upon formal admission to the Graduate School. The Graduate Council shall, in consultation with the department involved, determine the remaining requirements to be satisfied for the advanced degree.

The Committee on Academic Standing follows certain guidelines in considering requests for admission to this combined degree program. Interested students should obtain a copy of these guidelines at the Office of the Registrar prior to filing an application.

Integrated Five-Year Baccalaureate–Master’s Degree Program

With the approval of the Graduate Council, academic departments may establish integrated programs leading to the successive awarding of the bachelor’s and the master’s degrees. In such programs, a student may offer up to two courses taken during undergraduate study at Brown in partial fulfillment of the requirements for the master’s degree. In all cases, the equivalent of at least six semester courses must be taken in residence at Brown University.

A student must apply for admission to an integrated program no later than the end of the third week of his or her penultimate semester of undergraduate study. Admission to the Graduate School for the fifth year will ordinarily be a matter of course; however, such admission must be applied for at the proper time and decided on in the regular way. Students interested in this program should consult with the Associate Dean for Academic Affairs in the Graduate School.

Brown-Rhode Island School of Design Dual Degree Program

In this five-year program, students complete a baccalaureate degree at Brown and a Bachelor of Fine Arts (B.F.A.) degree at RISD. The Brown degree earned by students in the program will ordinarily be an A.B. degree. Earning a Bachelor of Science degree is not prohibited, but doing so is difficult because Sc.B. programs are more credit heavy than A.B. programs. For this reason, permission to pursue an Sc.B. in this program is granted on a case-by-case basis. The RISD degree will in all cases be a bachelor of fine arts (B.F.A.) degree. Other degrees offered at RISD ordinarily take five years and thus are excluded from the program.

To gain admission to the program, students must apply to and be admitted by both schools. Because of the program’s strict requirements, only students applying to enter as first-year students are eligible. Approximately 15 students matriculate in the program each year. Once admitted to the program, students must complete 156 credit hours, at least 60 of which (15 courses) must be taken at Brown. This requirement does not include courses earned on Brown sponsored exchange or approved study abroad programs.
Program in Liberal Medical Education

Each year, Brown’s Program in Liberal Medical Education (PLME) matriculates approximately fifty first-year students who will pursue an undergraduate degree and professional studies in medicine in a single eight-year program. As undergraduates, PLME students may choose to work toward an A.B. or Sc.B. degree in the sciences, or toward an A.B. in the humanities, social sciences, or behavioral sciences. The undergraduate experience is designed to prepare students for the last four years of the program, which constitute the medical school years and culminate in the MD degree.

To apply to the PLME program, students submit the standard Brown application. Candidates considered admissible by the College Admission Office are reviewed by the PLME Advisory Board. Applicants not admitted to PLME are still considered candidates to the College for the Bachelor of Arts or Bachelor of Science degree.

Academic Advising Programs

A strong network of advisors and mentors helps students engage fully and successfully with Brown’s open learning environment. Brown’s advising programs are designed to facilitate these relationships and provide students with maximum opportunity to formulate and achieve their educational objectives. Students are expected to take the initiative in seeking out and working with advisors to make the best use of their time at Brown.

To ensure that students have the guidance and support they need to make informed choices, the University assigns each first-year student two advising partners: an academic advisor. The academic advisor provides a long-term institutional perspective on educational options while generally informing, sometimes encouraging, and occasionally challenging students. The student Meiklejohn provides an experienced perspective on the ins and outs of course registration, course reputations, prerequisites, and the like.

As first-year students transition to the sophomore year, they are encouraged to stay with their first-year advisors so that they can benefit from the continuity and depth of a two-year advising relationship. Most do stay with the same advisor, although some select a different faculty member or administrator. The efforts of assigned sophomore advisors are augmented by Randall Advisors and Sophomore Deans in the Dean of the College Office. These advising resources constitute the foundation of “sophomore advising” at Brown and help students navigate the critical second year of undergraduate study.

Students declare a concentration in their fourth semester of study. Concentration advisors help with this process by explaining the dimensions of their academic disciplines, reading and providing feedback on students’ concentration declaration essays, and advising students during their final two years at Brown. Faculty of individual departments and programs that administer concentrations often serve as informal advisors to their concentrators.

Students in all four years can interact informally with advisors over coffee or tea in Advising Central, located on the second floor of J. Walter Wilson. Academic deans and Faculty Advising Fellows hold office hours in Advising Central every weekday afternoon. Faculty Advising Fellows (FAFs) are experienced academic advisors who are interested in students’ lives both in and outside the classroom. By directing students to Brown’s many programs and resources, FAFs can help first years, sophomores, juniors, and seniors make the most of their college experience.

A broad network of academic, co-curricular, and personal counseling complements the work of assigned advisors and faculty fellows. Throughout the year, deans in the College and in the Office of Student Life provide one-on-one consultation to all students who request it. Additional support is available from the Tutoring Program, the Curricular Resource Center, the Sarah Doyle Women’s Center, the Third World Center, the Career Development Center, the professional staff in University Health Services, and the chaplains. Peer advising groups include Brown’s Meiklejohn advising program, residential peer leaders, minority peer counselors, Career Center peer counselors, pre-med peer counselors, and athlete peer advisors.

Academic Support Services

A number of programs support undergraduates’ academic success and help them take full advantage of the curriculum.

- The Office of Co-Curricular Advising and Tutoring organizes academic coaching, group tutoring, and individualized tutoring. Group tutoring is offered for select courses in chemistry, economics, math, and physics. Individual tutoring is available by application.
- The Curricular Resource Center provides advising, facilitation and reference materials for students wishing to design their own courses (ISPs and GISPs), to craft independent concentrations, and to explore options for time away from Brown.
- Disability Support Services coordinates and facilitates services for students, faculty, and staff with physical, psychological, and learning disabilities.
- The Math Resource Center assists students in introductory mathematics courses.
- The Science Center offers academic support, tutoring, science-related activities, and a network of faculty and peer advisors familiar with Brown’s science curricula. Through various events and workshops, the Center works to increase the Brown community’s understanding of science.
- The Writing Center provides individual and group writing support to any member of the Brown community. Writing Center staff members help students with all stages of the writing process, from finding a topic through drafting, revising, and final editing. Writing Center associates also offer workshops for groups of students on various writing topics.

Academic Standing

The Brown Faculty and Corporation set the minimum standards students must meet in order to earn the baccalaureate degree. Undergraduate students are normally expected to take 4 courses each semester for a total of 32 courses in 8 semesters and will ordinarily complete 8 courses in every 2 consecutive semesters. Students must complete a minimum of 30 courses in 8 semesters. (Successful completion means a course completed with a grade of A, B, C, or S.)

To remain in good academic standing, Brown students must satisfactorily complete at least three courses by the end of the first semester, seven courses by the end of the second semester, eleven courses by the end of the third, fifteen by the end of the fourth, eighteen by the end of the fifth, twenty-two by the end of the sixth, twenty-six by the end of the seventh, and thirty courses to graduate after eight semesters. In addition, students making satisfactory academic progress will complete a minimum of seven courses in any two consecutive semesters. Academic standing is determined only on the basis of courses completed at Brown. Transfer credits, Advanced Placement (A.P.) credit, and summer credit earned away from Brown do not figure in the determination of academic standing.

Undergraduates who, in the judgment of the Committee on Academic Standing, have unsatisfactory scholastic records may be placed in one of three categories—Academic Warning, Serious Warning, or Academic Suspension—which include a permanent transcript notation. The Committee’s judgment will depend on the extent of a student’s academic deficiency as defined by rules approved by the Faculty on February 5, 1991.

Academic Warning cautions a student that his or her record is below the standard for graduation. Serious Warning notifies a student that, unless the record improves, he or she will be subject to academic suspension at the end of the semester. Academic Suspension may be ordered when the Committee finds that a student’s academic record falls more than two credits below the number expected for the student’s semester level.

Students on Academic Warning and Serious Warning are required to obtain special academic advising from an assigned dean.

Guidelines for Study Elsewhere

Students who wish to transfer credit for study completed at other four-year institutions may do so with prior approval of the appropriate departments
and the Committee on Academic Standing (CAS). The rules governing
transfer credit for study away from Brown are complex. One set of rules
governs study abroad; another applies to study away in the U.S. Yet
another set of rules applies to summer study transfer credits. This section
describes the policies and procedures that are most commonly called
into play when matriculated students wish to have credits from elsewhere
added to their Brown transcript.

Students may receive up to eight course credits for work undertaken
during one academic year. In a semester credit hour system, one Brown
course is considered the equivalent of four semester hours. In a quarter
credit hour system, one Brown course is considered the equivalent of
six quarter hours. For that reason, the number of course credits received
for study away from Brown may not be equal to the number of courses
taken. For example, a student taking three four-semester-hour courses, all
properly approved for Brown transfer credit, will receive the equivalent of
three Brown course credits. However, a student taking three four-quarter-
hour courses, all properly approved for Brown transfer credit, will receive
the equivalent of two Brown course credits. It is the student’s responsibility
to clarify in advance any concerns regarding the amount of transfer credit
that may be awarded.

In order to be considered for transfer credit, courses must be completed
with a grade of C or better, and an official transcript must be received by
Brown’s Office of the Registrar from the host institution. This transcript
will be retained by the University, and the student will receive faculty and
Committee on Academic Standing approval. Students should also keep
all records from their work away, including: course syllabi, exams, papers,
notes, projects, and portfolios, in the event that post-approval is required
from an academic department at Brown.

The Brown transcript will indicate the name of the host institution, the
time period during which the student studied there, as well as the courses
taken and/or unassigned credits at Brown. In the case of Brown sponsored
exchange and approved study abroad programs during the academic year,
all course work is reflected with the actual course title and a grade of ‘S.’
Students applying to graduate and professional schools are often asked
to provide official transcripts from all institutions at which they have been
enrolled. In such cases, the student will need to request copies of their
transcripts from the study-away institution.

Study Away in the U.S.

Students planning to study elsewhere in the United States should obtain
an instruction sheet and a preliminary transfer credit approval form from
the Dean of the College website. Students should then work out a program
and present it to their concentration advisor and/or other appropriate
faculty members for approval. When the preliminary transfer credit form is
returned to the study away dean, that dean will approve it on a tentative
basis for review by the University. All transfer credit must receive faculty
and Committee on Academic Standing approval. Students should also keep
all records from their work away, including: course syllabi, exams, papers,
notes, projects, and portfolios, in the event that post-approval is required
from an academic department at Brown.

Study Away during the Summer

Two avenues of study are available to undergraduate students interested
in summer work. They may take courses in Brown’s Summer School, or
apply for transfer credit from other summer programs—either domestic or
international—that meet certain conditions. Whether studying in the U.S.
or abroad, students must study at accredited, degree granting, four-year
institutions. Extension division courses are generally not allowed. Students
should obtain preliminary approval for summer study away from Brown by
the Committee on Academic Standing and appropriate faculty.

Students may count as many as four summer courses from all sources
(or their equivalent, if summer courses carrying fewer than 4 credits were
transferred to Brown) toward the baccalaureate degree. No more than the
equivalent of two Brown courses will be transcripted for any given summer
of enrollment. Summer transfer credit may not be used to advance a
student’s date of graduation, nor will it figure in the determination of
academic standing. Students interested in summer study elsewhere
should consult staff in the Office of the Dean of the College or the Office of
International Programs (OIP), as appropriate.

International Study

Brown’s Office of International Programs (OIP) coordinates all study
abroad undertaken by Brown students either on Brown sponsored
programs or on Brown approved programs. At present, Brown sponsors
programs in France, Spain, Cuba, Czech Republic, Italy, Germany,
Denmark, Sweden, The United Kingdom, Tanzania, Japan, Barbados,
Brazil, India. Students interested in study abroad should check with OIP as
far in advance of any intended study as possible. Brown students of any
nationality are not allowed to study abroad in countries where there is a
travel ban by the U.S. State Department.

The College Curriculum Council (CCC) has established the following
guidelines for study abroad by Brown students:

To receive credit for international study, students must spend at least
one semester enrolled in an international institution of higher learning,
subject to the same rules and regulations as the host institution’s regular
students. There are two exceptions: where the language of study is one
in which sufficient proficiency is unlikely to be achieved by the average
Brown undergraduate, but the student should study the language while
in the country; and where the usual assessment procedures may not be
appropriate, in which case special arrangements may have to be made.

Students may not study on itinerant programs (i.e., those which travel
through many sites rather than being based in one primary site). Nor
may they study at institutions created for overseas study for Americans,
with special exceptions: for study of a specific area and/or field research
unavailable at Brown or better pursued at an international site OR in sites
where “the average Brown student” cannot study alongside local students
because of the language, e.g., Keio, Denmark, Sweden, Czech Republic.

Exceptions include Syracuse-in-Florence, for art history students; ICCS
in Rome for classics students; programs that provide a structured “field
study” curriculum appropriate for students in such fields as development
studies, environmental studies, ecology, geological studies, etc.; and
programs providing for studies pursued at Brown but often not found in
regular university programs overseas, such as studio art or theater arts.
Prerequisites for such programs will be stated and must include previous
course work pertinent to the intended study abroad.

International Study and Brown Curriculum

International study should complement the student’s program of study at
Brown. This should be ascertained by the Office of International Programs
(OIP) in consultation with the CCC subcommittee on International Study,
the Committee on Academic Standing (CAS), and regional advisory
committees.

Non-Brown programs

Brown’s Office of International Programs works closely with key academic
departments to develop a list of programs approved for international
study. This list includes all Brown-sponsored programs and programs
administered by institutions other than Brown in each region. All such
programs should conform to the above guidelines for international study.
Students do not need CAS approval for study on these programs. The
list will be reviewed every two years, and any new Brown-sponsored
programs are added immediately.

For Programs Not on the List

Students may petition for approval to study on other programs but
should be sure to check the international study guidelines to see if the
proposed program meets the criteria. Grounds for exceptions include: the
desire to study in a country where there is no approved program; or the
desire to study at an institution known for excellence in a specific field.
Students must submit a written rationale, a tentative list of courses, and a
supporting statement by a faculty member who is familiar with the program
or who has expertise in the field of study being pursued. The proposal will
be evaluated by the appropriate regional committee; CAS will make the
final decision.

OIP reports annually on petition actions to the CCC subcommittee on
international study.

Students planning to study abroad must be in good academic standing.
They must be able to demonstrate competency in a foreign language,
if one is involved in the international study opportunity. Brown program
Curricular Programs

Diversity Perspectives

Diversity Perspectives courses focus primarily or at least substantially on the knowledge and experience of groups that are underrepresented in traditional approaches to knowledge and learning. These courses examine the ways in which disciplines, histories, and paradigms of knowledge are reconfigured by the study of diversity-related intellectual questions. Diversity Perspectives courses are designated “DVPS” at the end of course descriptions. They may be viewed in Brown Course Search by choosing “Diversity Perspectives” in the Curricular Programs field.

First Year Seminars

First-year seminars ensure close contact between first-year students and faculty members while simultaneously offering a rigorous introduction to the concepts and methods of a particular subject area or department. Seminars have few if any prerequisites and are offered in all areas of the curriculum, from anthropology to physics to literary arts. Students receive regular feedback on the work they produce for the seminars, and seminar faculty often serve as informal mentors for their students long after the class has ended.

First-year seminars are designated “FYS” at the end of course descriptions. A complete list of each semester’s seminars may be viewed in the Brown Course Search by choosing “First-Year Seminars” in the Curricular Programs field. Registration for first-year seminars takes place during the summer prior to students’ matriculation to Brown. Depending on availability, first-year students may also add seminars to their course schedules during pre-registration and shopping periods.

Liberal Learning

The Liberal Learning course list was created to assist students in planning a course of study consistent with the goals of a liberal education. These courses, which are an established part of the Brown curriculum, emphasize synthesis rather than survey and focus on methods, concepts, and values. Reflecting Brown’s conviction that liberal education requires active student involvement, Liberal Learning courses entail extensive student participation through papers, projects, reports, and class discussion.

Liberal Learning Courses are designated with “LILE” at the end of course descriptions. A complete list of each semester’s LILE courses may be viewed in the Brown Course Search by choosing “Liberal Learning” in the Curricular Programs field.

Writing-Designated Courses

Brown students are expected to work on writing in their general studies and in the concentration. Students may begin to fulfill this expectation by taking at least one course that carries the WRIT designation. WRIT courses are offered across the curriculum and help students develop the ability to write well in styles appropriate to different academic disciplines.

A complete list of each semester’s WRIT courses may be viewed in the Brown Course Search by choosing “Writing-Designated Courses” in the Curricular Programs field.

The Summer Session

Brown’s Summer Session offers courses on campus and at international sites during the summer. Summer classes meet for six weeks; exams and final work are completed during the seventh week of the program. Brown students take summer courses to enhance their degree work or to maintain their progress toward degree completion. Summer Session courses are open to all Brown students and to students from other institutions by application.

Governed by Faculty Rules, Brown’s Summer Session maintains guidelines that are similar to those followed during the academic year. The courses are equivalent to academic year offerings, are approved by the College Curriculum Council, and, as of summer 2000, count toward official determination of academic standing.

Brown undergraduates may complete up to two courses in any given summer, and may apply a total of four summer courses toward their bachelor’s degree. Brown Summer Session courses at the 1000-level may count toward graduate degrees. A special Corporation rule allows undergraduates who have completed four Summer Session courses at Brown to request one semester of enrollment credit. Undergraduate fees for summer courses are set annually by the Corporation at a rate lower than the per-course fee during the academic year.

For more information, contact Brown’s Office of Continuing Education, Box T, Providence, RI 02912 (401) 863-7900, or visit www.brown.edu/ece.

Each year’s Summer Session calendar is posted on the Brown Registrar’s web site, www.brown.edu/Administration/Registrar/, as well as at the site above.

The Graduate School

The Graduate School oversees graduate education at Brown University, which prepares students for distinguished careers in research, teaching, and as experts in the public and private sectors. Master’s students are trained to assess information and trends in their fields and to create original works. Doctoral students perform research at the highest level, advancing knowledge in their fields.

The rigors of research, analysis, debate, performance, and publication prepare our graduates to help solve local, national, and international problems.

Brown University offers more than 70 graduate programs through the Graduate School. Brown has a friendly scale and collaborative culture. With nearly 2,000 graduate students and more than 700 full-time faculty members, Brown offers exceptionally close mentoring in its doctoral and terminal master’s programs.

The Graduate School website (http://www.brown.edu/gradschool) serves as the primary source of information on doctoral programs (http://www.brown.edu/academics/gradschool/phd-programs) and master’s programs (http://www.brown.edu/academics/gradschool/masters-programs) including a distinct page (also contained with this Bulletin) for each program in terms of application and completion requirements. The main site also explains the general application (http://www.brown.edu/academics/gradschool/application-information) process as well as provides the link to the online application.

Information on general rules and regulations are detailed on the Graduate School (http://www.brown.edu/academics/gradschool/academics/rules-regulations) site. The Graduate School Handbook, dissertation guidelines, and master's thesis guidelines can all be found in that section. Additional regulations with regards to overall requirements and tuition regulations can also be found on the Office of the Registrar’s website.
The Division of Biology and Medicine

The Division of Biology and Medicine is home to five academic departments, fourteen clinical departments, and is affiliated with seven diverse teaching hospitals in and around Providence. At the Division’s core is the Warren Alpert Medical School, the five academic departments in Biology (which includes study at the undergraduate and graduate levels) and Neuroscience, as well as the Program in Public Health and its affiliated departments.

For more information on Brown’s many research centers, institutes, programs, and other initiatives in the health and life sciences found within the Division of Biology and Medicine, please visit http://biomed.brown.edu/research/cip.

For further summary information on the academic units within the Division, please follow the below links:

- The Warren Alpert Medical School of Brown University (p. 84)
- Biology (Undergraduate) (p. 91)
- Biology (Graduate) (p. 105)
- Public Health (p. 110)
- Neuroscience (p. 117)

The Warren Alpert Medical School of Brown University

Dean

Edward Wing

Admissions

Students interested in the study of medicine at Brown may apply through a variety of admission routes designed to create a highly qualified and diverse medical student body. Approximately one-half of the matriculants in the first-year class enroll from our eight-year continuum leading to both the bachelor’s degree and the M.D. degree. These students are joined by students entering through the standard admission route, through the M.D./Ph.D. Program, or through special programs at institutions with which the medical school has formed a linkage (early identification). These admission routes are described below. Additional information and related admission requirements may be found at http://med.brown.edu/admissions/ or by writing or calling the Office of Admissions and Financial Aid, Brown Medical School, Box G-A212, Providence, RI 02912-9706; (401) 863-2149.

Program in Liberal Medical Education

(Program in Liberal Medical Education) (PLME)

The Program in Liberal Medical Education is an eight-year, continuum of liberal arts and medical education leading to both the bachelor’s and M.D. degrees. The PLME is open to high school graduates who have applied to and are simultaneously admitted to Brown for their undergraduate studies. The PLME seeks highly qualified and strongly motivated high school students who are committed to a career in medicine at an early age and who also wish to pursue another area of academic interest to an advanced level of scholarship within the framework of a broad liberal education. From a large (approximately 1,300) and highly qualified applicant pool, roughly 50 students matriculate annually. For additional information regarding the PLME, access the website at http://www.brown.edu/academics/medical/plme/ or contact the College Admission Office, Brown University, Prospect Street, Providence, RI 02912-9706; (401) 863-2378.

Standard Admission

Qualified students of any college or university may also apply to the Brown Medical School through the standard route. Individuals must first complete and submit an application through the American College Application Service (AMCAS), indicating on the application that they wish to apply to Brown Medical School.

The Early Identification Program (EIP)

The Early Identification Program (EIP) provides selected students at cooperating institutions with a place at Brown Medical School upon continued academic progress and college graduation. This route provides opportunities for a medical career to two groups:

- Rhode Island residents enrolled at Providence College, Rhode Island College, and the University of Rhode Island; and
- Students enrolled at Tougaloo College, a historically black, liberal arts institution in Mississippi.

Eligible students are identified by their premedical advisor in the sophomore year of college, participate in selected PLME activities, and enroll in medical school after receiving the bachelor’s degree. Generally, up to two students may be admitted annually from each school. For more information and application procedures, please contact the premedical advisor at the participating institutions. For more information access the website at http://www.brown.edu/academics/medical/admission/special-programs/special-programs.

The M.D./Ph.D. Program

The M.D./Ph.D. Program seeks students who are motivated to pursue a career in academic medicine and biomedical research. Candidates seek simultaneous admission to the medical school and to one of the following graduate programs in the Division of Biology and Medicine: Artificial Organs, Biomaterials, and Cellular Technology; Biomedical Engineering; Ecology and Evolutionary Biology; Epidemiology and Biostatistics; Molecular Biology, Cell Biology and Biochemistry; Molecular Pharmacology and Physiology; Neuroscience; or Pathobiology.

There is a unified review process which requires submission of a single M.D./Ph.D. application. Offers of admission to the Graduate School and to the Medical School are made simultaneously and must be accepted jointly. Approximately one hundred candidates apply each year for three openings. The M.D./Ph.D. Program is open to individuals who have completed their undergraduate studies or will have completed the requirements for their undergraduate degree prior to matriculation into the M.D./Ph.D. Program. Students enrolled in M.D., D.O. or Ph.D. programs at other institutions may apply, but preference is given to those who can best integrate their clinical and research experiences at Brown. Individuals who are neither U.S. citizens nor permanent U.S. residents may apply; however, financial assistance for these individuals is limited during the M.D. years of the program. Additional information regarding the M.D./Ph.D. Program may be found at http://med.brown.edu/mdphd/or by calling the M.D./Ph.D. Program, Brown Medical School, Box G-044, Providence, RI 02912-9706; (401) 863-1953.

Definition of Rhode Island Residency for Medical School Admission

An individual is considered a Rhode Island resident if he or she graduated from a Rhode Island high school and if the individual’s parent(s) have lived in Rhode Island for the previous two calendar years, as documented by federal tax returns. For dependent students, the custodial parent(s) must claim the student as a dependent on his or her federal tax returns for the prior two years. Individuals who are independent (i.e., not living with parents and filing individual federal tax returns for the previous two years) must have at least one parent residing in Rhode Island for the previous two years, as documented by federal tax returns.

Selection Factors

Students admitted to Brown Medical School must attain competence in the sciences basic to medicine at a sufficient level to provide adequate preparation for medical school. Applicants are expected to demonstrate competence by successfully completing the following premedical course requirements at a college or university in the United States or Canada: one semester of Organic Chemistry; and two semesters of Physics, Inorganic Chemistry, and Social and Behavioral Sciences. The Medical College Admission Test (MCAT) is required for standard and M.D./Ph.D. program applicants.
All applicants are selected on the basis of academic achievement, faculty evaluations, evidence of maturity, motivation, leadership, integrity, and compassion. Applicants to the M.D./Ph.D. Program are also evaluated on the basis of their research accomplishment and potential. For the PLME, Brown seeks highly qualified and strongly motivated students who wish to pursue an area of academic interest to an advanced level of scholarship within the framework of a liberal premedical education.

In order to be eligible for consideration, candidates must present a minimum cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken as a matriculated student at an undergraduate college. Applicants who have attended graduate school must achieve a cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken in graduate school. Applicants must have completed requirements for the baccalaureate degree before matriculating into the medical school. All applicants must be capable of meeting the competency requirements expected of all graduates. Technological compensation can be made for some disabilities in certain competency requirements. Candidates accepted for admission who will need special accommodations cannot be admitted unless those supportive services are available, as determined by the Dean of Medicine and Biological Sciences. The processes for assessing whether applicants will be able to meet the competency requirements for the M.D. degree are described in Technical Standards for Medicine, listed below.

Brown University adheres to a policy of equal opportunity in medical education and therefore considers applicants without regard to sex, race, religion, color, national or ethnic origin, age, physical disability, or sexual orientation.

A strong affirmative action program is maintained in all admission entry routes. Brown particularly invites applications from Rhode Island residents and from members of medically-underrepresented minority groups, including African-Americans, Mexican-Americans, American Indians and mainland Puerto Ricans.

**Technical Standards for Medicine**

**Process for Assessing Whether Applicants Meet Technical Standards for Medicine:**

1. No inquiry will be made on the application forms concerning disability. Brown’s policies regarding technical abilities and skills necessary to meet the competency requirements are included with the letter of admission, and students are asked at that time to contact the Associate Dean for Medical Education if they have any concerns about their ability to meet these standards.

2. Applicants who are identified as having a disability through volunteered information, supporting credentials, or interviews will have an assessment of their ability to meet competency requirements only after a determination is made of their admissibility to the medical program.

3. Those applicants with disabilities deemed admissible to the Medical School will be requested to have submitted on their behalf appropriate documentation in regard to the disability from a qualified health professional. The health professional will be asked to provide an opinion on the candidate’s ability to meet the competency requirements for the M.D. degree. The applicant may also be requested to respond to that question.

4. The responses will be submitted to a committee appointed by the Dean of Medicine and Biological Sciences. This committee may ask for a review of the supporting documentation by appropriate members of the faculty in regard to the applicant’s meeting the competency requirements. The committee will ascertain what accommodations, if any, the medical program would need to make in order that the applicant might be able to meet the competency requirements, and assess the feasibility of any needed accommodations.

5. The committee will review the information received to determine if the applicant will be able to meet the competency requirements, with reasonable accommodations on the part of the medical program, if necessary.

6. The committee will recommend to the Dean of Medicine and Biological Sciences acceptance of applicants who can meet the competency requirements or will recommend nonacceptance if they cannot.

**Process for Assessing Student’s Ability to Continue in the Medical School Should Disability Occur After Matriculation at Brown University:**

1. A student who develops a disability after matriculation at Brown University may be identified to the Medical Student Affairs Office through a variety of sources, e.g., reporting of accident or illness by peers, family, friends, or faculty and subsequent follow-up with health professionals managing the care.

2. If the degree to which the student has become disabled raises questions related to meeting the competency requirements after a review by the Associate Dean for Medical Education, a meeting of an ad hoc committee will be set up to discuss the situation. The student will be asked to meet with the committee members, unless the disability is so severe that the student needs to be represented by another individual. In some cases, it might be more appropriate to have a health professional, not directly involved in the care, serve as a consultant to the committee on the issues surrounding the disability.

3. The ad hoc committee will develop a recommendation as to the student’s ability to successfully pursue a medical education based on his or her ability to meet the competency requirements of the medical program. These educational accommodations will be discussed with the appropriate course directors to be certain that there is agreement on how the student will be managed. If facilities accommodations are recommended, the committee will discuss these with the appropriate individuals to be certain that the needs for the disabled student can be provided. The committee’s recommendations will be discussed with the student or his or her representative in the event that the student cannot attend.

4. When the recommendation is that the disabled student can meet the medical program’s competency requirements, the committee will develop a report on any educational program accommodations that, if made, will still meet the competency requirements.

5. Should the decision of the committee be to recommend to the dean that the student be dropped from enrollment in the medical program, the normal due process appeals mechanism will be in effect, and the Student Affairs Office will work with the individual as appropriate on potential alternative career options. For students in the Program in Liberal Medical Education continuum, being dropped from the program due to inability to meet competency requirements for medical education does not necessitate the withdrawal of the student from the undergraduate college if that phase of the student’s education has not been completed.

**Advanced Scholarship**

Medical students who wish to earn an advanced degree (M.A., Sc.M., M.P.H., Ph.D.), must meet the requirements of the Graduate School. Numerous academic departments at Brown offer graduate programs. All graduate studies are carried out under the supervision of a faculty member of a graduate program at Brown University and are subject to the specific requirements of that program in addition to the general guidelines given below. Students should discuss their interests and goals with a director of a graduate program in planning any study that might lead to an advanced graduate degree.

**Educational Programs**

**Program in Liberal Medical Education**

Brown’s Program in Liberal Medical Education (PLME) offers a unique opportunity to combine undergraduate and professional studies in medicine in an eight-year continuum. The PLME combines the open curriculum concept of the college and the competency-based curriculum of the Medical School. It encourages students to pursue their own interests.
The PLME provides great flexibility in curriculum planning. During the early years of the continuum, students take courses related to their chosen concentration and to obtain a broad liberal education. In addition, students take courses designed to meet the competencies required for admission to Brown Medical School. This begins with courses in the natural, social and behavioral sciences, and mathematics, which provide a foundation for later medical science and clinical courses.

Students may choose to work towards an A.B. or Sc.B. degree in the sciences, or to fulfill the requirements for an A.B. in the humanities, social sciences or behavioral sciences. Several interdisciplinary concentrations such as Public Policy, and International Relations are also available. The expected duration of the program is eight years. The last four years of the program culminate in the M.D. degree.

Brown’s entire faculty is available to PLME students. This access to faculty throughout the University fosters collaborative teaching and research among scholars and students from widely divergent disciplines. Although the program is characterized by the unique breadth of educational opportunities available to students, it has great strength in the conventional biomedical sciences as well.

The Medical Curriculum

The Warren Alpert Medical School curriculum has been designed and implemented with the intention of creating an integrated, contemporary, compassionate, and flexible program of learning for our students. Our approach to medical education is predicated on the vision that tomorrow’s physician must be a lifelong learner who is scientifically and clinically enlightened, patient and service-centered, and who understands the economic underpinnings of the US health care system. Our goal is to train physicians who will provide informed and compassionate care while at the same time serving as leaders and change agents for the health care system. To achieve the latter goal, we aim to train physicians who will be leaders at all levels.

These educational goals are pursued through a curriculum with the following structure. During Years 1 and 2, students enroll in four sequential semesters of Integrated Medical Sciences (IMS-I through -IV) and Doctoring-I through -IV. The elective Scholarly Concentrations Program is introduced to students during Year 1. Year 3 allows students to explore core disciplines and related specialties through the completion of required clerkships in medicine, surgery, pediatrics, obstetrics & gynecology, psychiatry, and family medicine. The transition from the third year to the fourth year takes place in May, after which time students have the opportunity to develop a program of elective rotations aimed at finalizing a career choice, and obtaining and preparing for a residency in their chosen field.

Brown Medical School continues to employ a competency-based curriculum that began with the inauguration of the PLME in 1985. The rationale behind the competency-based curriculum stems from the need to define the outcomes of the educational process: what are the desirable qualities of a medical school graduate, and what constitutes the essential knowledge base that will enable a graduate to make a successful transition to his or her chosen medical field?

All students are expected to gain competency in the nine abilities (see below) and knowledge base by graduation. Each course within the core curriculum of the Medical School identifies which abilities and parts of the knowledge base it addresses. Students may also meet the competency requirements through individualized study, group independent study projects (GISPs), or alternative courses that might be arranged as part of collaborative learning opportunities.

Nine Abilities:
1. Effective communication
2. Basic clinical skills
3. Using basic science in the practice of medicine
4. Diagnosis, management, and prevention
5. Lifelong learning
6. Professional development and personal growth
7. Social and community contexts of health care
8. Moral reasoning and clinical ethics
9. Problem solving

BIOL 3890. Culture, Patient, Advocacy and the Community.
This course focuses on the knowledge, skills, and attitudes required for effective patient advocacy with an emphasis on the role of culture in developing advocacy partnerships with patients, families, peers and community service providers. Specifically, it examines the relationships between race, ethnicity, social factors, economic factors and health status indicators. The course will provide opportunities to build self-awareness, to develop greater insight into the social and community contexts of health care and patient advocacy, and to refine physician-patient communication skills.

Biol 5470. Wilderness Medicine.
The Wilderness Medicine elective is designed to instill the basic survival skills training necessary for environments outside the hospital, both urban and wild. It combines didactic lectures on such topics as toxicology and travel medicine with field skills sessions & workshops (e.g. suturing, splinting). These sessions also include mock medical scenarios, such as near drownings, for the students to handle. It includes off-campus consultation with experts to review their medical emergency procedures. A final project consisting of writing about a popular wilderness myth and its veracity is required

An 8-session elective seminar for 2nd year medical school students. Emphasis is placed on the multidisciplinary approach to medical problems. The course concentrates on those conditions for which fetal and/or neonatal intervention may be indicated, from gene therapy to fetal surgical intervention

Biol 5740. Gender and Sexuality in Healthcare: Caring for ALL Patients.
The goal of the course is to provide medical students with the knowledge needed to effectively and competently work with a growingly diverse patient (and colleague) population. Contemporary medical school curricula are lacking in the instruction and discussion of patients of all genders and sexualities. This elective will address this need. The course will consist of eight 2-hour sessions, with guest speakers lecturing for the first hour and small group discussion happening for the second hour. Students are required to keep a journal of their experiences as their final assignment for the class. The class will be graded S/NC.
The topics range from LGBTQ Teenagers to Institutionalized Homophobia to Hormone Therapy, led by experts in each field.

Biology Concentration Requirements

The Biology concentration enables students to study, in depth and in breadth, the science of life and living matter. Whether pursuing the A.B. or Sc.B. in biology, students can expect to learn broadly in the discipline through a selection of courses in three areas: cell and molecular biology, structure and function, and organismal biology. In addition, students pursuing the ScB complete a thematic cluster through which they gain an in-depth understanding of a particular biological subfield (examples include immunobiology, ecology, and evolutionary biology, and biotechnology). The concentration also emphasizes practical skills and experimental design. Concentrators are therefore required to take at least three courses with a laboratory or fieldwork component. Within all of these requirements, students have a high degree of flexibility and choice. Broad research opportunities are also available across several departments within the basic sciences as well.

Standard program for the A.B. Biology

The concentration program for the A.B. in Biology consists of four prerequisite courses in math and chemistry and ten courses in biological sciences, including courses in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3:
Organismal Biology. Beyond the area requirement, students may choose up to two, upper-level science courses from an approved selection for science concentrators.

**Prerequisites:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 0330</td>
<td>Equilibrium, Rate, and Structure</td>
<td>1</td>
</tr>
<tr>
<td>CHEM 0350</td>
<td>Organic Chemistry</td>
<td>1</td>
</tr>
<tr>
<td>MATH 0090</td>
<td>Introductory Calculus, Part I (or equivalent placement)</td>
<td>1</td>

</tbody>
</table>

**Total Credits:** 14

1. AP scores of 4 or above may substitute Math courses.
2. At least two BIOL and/or NEUR courses must be above 1000-level. At least three of the BIOL and/or NEUR courses must include lab or fieldwork. BIOL 1950/1960, (Directed Research) may be included, but is not required. If a lab project, this can count for one of the three lab course requirements, and one advanced course.
3. No substitutions per above Area list. If a course is listed in more than one area, it may be used to fulfill one of those, the other must be fulfilled by a different course.
4. See listing on website for options. Related sciences must be above prerequisite level, and suitable for science concentrators.

**Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/BIOl 1960), and quality grades in the concentration. Guidelines, a manual, and information on faculty research are available in the Biology Undergraduate Affairs Office (Arnold, Room 124) or at the Research Projects Collection, found at [http://biology.brown.edu/bug/honors](http://biology.brown.edu/bug/honors).

**Standard Program for the Sc.B. Biology**

The concentration program for the Sc.B. in Biology consists of five prerequisite courses in math and chemistry and ten courses in biological sciences, including courses in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology, and an additional three course advanced cluster. The biological sciences requirement also requires research (BIOL 1950/BIOl 1960), which should reflect the advanced cluster.

</table>

**Total Credits: 18**

1. AP scores of 4 or 5 may substitute Math courses.
2. At least two BIOL and/or NEUR courses must be above 1000-level. At least three of the BIOL and/or NEUR courses must include lab or fieldwork. *No substitutions per above Area lists. If a course is listed in more than one area, it may be used to fulfill one of those; the other must be fulfilled by a different course*.
3. If substantial research is carried out away from Brown, it must be approved by an appropriate Brown BioMed faculty member but does not carry course credit toward the Core program.
4. See listing on website for options. *Related sciences must be above prerequisite level, and suitable for science concentrators*.
5. At least two, and preferably all three, must be above 1000-level. Courses used for the cluster, must be approved by an advisor and/or Dean Thompson.

**Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/1960 research) that form a logical thematic cluster. Examples of thematic clusters include: Molecular Biology; Immunology; Ecology and Evolutionary Biology; Physiology and Biotechnology; Neurobiology; Physical Sciences.

**Stipulations for Biology Programs:**

1. For double concentrations, no more than two courses may overlap (i.e., be used to meet requirements of both) programs, prerequisites excepted.
2. No more than two semesters of directed research may be used as concentration credits. Each does count as an individual core towards the program, but only one lab credit towards the three required.
3. Transfer or study abroad courses may be used within the program, subject to approval of advisor, and Dean Thompson.

**Health & Human Biology Concentration Requirements**

Health and Human biology is an interdisciplinary concentration whose goals are to provide a rigorous foundation in the biological sciences with course work in humanities and social sciences within a subfield of Human Health and Disease.
The program includes: background courses, Biology core courses, a set of Theme courses, and a Senior Capstone. Background courses provide the essential foundations in chemistry, mathematics, methods, and basic biology. These support the Biology core, comprised of a flexible menu of intermediate and advanced courses. A required portion of the Biology core is Genetics, which is considered a cornerstone of human biology and its interface with other fields. The Biology core underscores the related coursework within the Health and Disease Theme. This course grouping is comprised of social science and humanities courses and must form a cohesive, thoughtful cohort. Suggested theme subfoci must be discussed and approved by an advisor. It is expected that these course selections will evolve over the course of the student’s college career, as each semester’s experience builds on the previous one. Finally, the human biology program requires a senior year capstone course or experience, which should build on the program’s theme.

**Program Requirements**

**Required Background:**
- MATH 0090 Introductory Calculus, Part I (or Advanced Placement)
- CHEM 0330 Equilibrium, Rate, and Structure
- BIOL 0200 The Foundation of Living Systems (or Advanced Placement)
- A Statistics or Methods course (chosen with advisor’s approval), for example:
  - APMA 0650 Essential Statistics
  - SOC 1100 Introductory Statistics for Social Research
  - BIOL 0495 Statistical Analysis of Biological Data
  - EDUC 1100 Introduction to Qualitative Research Methods

**Core Program:**
Select one of the following Series:

**Series A**
- BIOL 0470 Genetics

**Series B**
- BIOL 0480 Evolutionary Biology
- BIOL 0500 Cell and Molecular Biology

**Series C**
- BIOL 0480 Evolutionary Biology
- BIOL 0510 Introductory Microbiology

Select one course in structure, development and physiology such as:
- BIOL 0310 Introduction to Developmental Biology
- BIOL 0320 Vertebrate Embryology
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0800 Principles of Physiology
- BIOL 1310 Analysis of Development
- BIOL 1800 Animal Locomotion
- BIOL 1880 Comparative Biology of the Vertebrates
- NEUR 0010 The Brain: An Introduction to Neuroscience

Select one course in organismal/population biology such as:
- BIOL 0380 The Ecology and Evolution of Infectious Disease
- BIOL 0390 Vertebrate Evolution and Diversity
- BIOL 0400 Biological Design: Structural Architecture of Organisms
- BIOL 0410 Invertebrate Zoology
- BIOL 0420 Principles of Ecology
- BIOL 0475 Conservation Medicine
- BIOL 0480 Evolutionary Biology
- BIOL 1410 Evolutionary Genetics
- BIOL 1430 The Computational Theory of Molecular Evolution
- BIOL 1475 Biogeography

**BIOL 1480** Terrestrial Biogeochemistry and the Functioning of Ecosystems
**BIOL 1880** Comparative Biology of the Vertebrates
**ENVS 0490** Environmental Science in a Changing World
**ENVS 0455** Coastal Ecology and Conservation
**ENVS 1455** Marine Conservation Science and Policy

Two Biology or Neuroscience courses that relate to and support the chosen theme course grouping:
- Theme: four appropriate and cohesively grouped courses from non-biology and non-neuroscience offerings

Senior Capstone Activity

**Total Credits**

1. Note: These latter two options involve TWO courses, both of which would therefore count as part of the five biology course portion of the program.
2. BIOL 0480 serves as the organismal/population biology course that is required.
3. At least one of these at the advanced (>1000) level.
4. The unifying theme in this program is Human Health and Disease. With advisor’s assistance, a subfocus is chosen from departments such as: CLPS, PHP, EDUC, GNSS, SOC, ANTH, HIST, SCSO, ETHN, ENVS, AFRI, PPAI, and sections of BIOL 1920; others by approval or suggestion of the advisor. Approved courses must be suitable for concentrators, and at least one must be advanced (>1000 level in the discipline).
5. May be fulfilled by an independent activity such as an approved relevant advanced course, or seminar or, Directed Research (eg, BIOL 1950/1960, or an independent study in another Department if approved by the concentration advisor), or an appropriate internship accompanied by a scholarly paper written under the direction of a Brown faculty mentor. The Capstone activity must be approved by the concentration advisor and must be carried out DURING the senior year.

**THEME:** Examples of thematic subfoci that may describe a course group include (but are not necessarily limited to):
- Health Behavior (Brain & Behavior)
- Health Systems Structure and Policy
- Culture and Health
- Environmental Health
- Global/International Health
- Women’s/Children’s Health
- Disability/Ethics
- Social context
- Race and ethnic disparities in disease

**HONORS:** Honors in Human Biology is based on approved Capstone research that yields a thesis and oral presentation, plus quality grades. (see more information about Honors at http://biology.brown.edu/bug/honors)

**Applied Mathematics-Biology Concentration Requirements**

Applied Mathematics-Biology is an interdepartmental concentration in which students learn to use quantitative methods, including probability, statistical inference, and system dynamics in the study of problems in the biological sciences. With the growth of large-scale genomics data and the use of high throughput technologies, mathematics is becoming an essential analytical tool for biological research. As such, coursework in Applied Math-Biology requires students to gain a strong foundation in mathematical and statistical sciences through courses in the departments of Mathematics and Applied Mathematics. In addition, students must take basic science courses in physics and chemistry. Along with these foundational courses, students work with a faculty advisor to develop an
area emphasis in biology (e.g. biochemistry, neurosciences, genetics, etc.). Students earn the Sc.B. degree upon completion of the Applied Mathematics-Biology concentration.

**Standard program for the Sc.B. degree**

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

**Requirements:**

Select one of the following sequences:

</tbody>
</table>

Biochemistry & Molecular Biology

Concentration Requirements

Biochemistry is the study of the chemistry of living organisms. Biochemistry and Molecular Biology is an interdisciplinary program drawing on the methods of biology and chemistry to examine how life works at the molecular level, and is applicable across areas within the biomedical sciences including neuroscience, developmental biology, immunology, pharmacology, and synthetic biology. Concentrators in Biochemistry and Molecular Biology begin their learning with foundational courses in biology, mathematics, chemistry, and physics as well as three courses in biochemistry. Elective courses in biology expose students to a variety of additional topics. Students are also expected to become familiar with research methodologies in the field. This is accomplished through two semesters of independent research in collaboration with a member of the faculty from the Chemistry Department or the Division of Biology and Medicine. Students earn the Bachelor of Science degree upon completing the concentration.

**Genetics**

<table>

Biomedical Engineering Concentration Requirements

Biomedical Engineering is an interdisciplinary concentration through which students learn to apply the methods and tools of engineering to the subject matter of biology and the life sciences. Jointly administered by the Division of Engineering and the Division of Biology and Medicine, biomedical engineering offers students the unique opportunity to master much of the essential material and methodologies of two different disciplines. The program emphasizes strong biomedical engineering fundamentals, while allowing students to personalize their curriculum based upon their intellectual and career interests. Students must learn broadly in engineering and life sciences. Thus, a large number of courses are required across several fields. Because of its highly interdisciplinary nature, at least one semester of research collaboration with a faculty member is also required, though two semesters of research is strongly recommended.

Biophysics Concentration Requirements

Biophysics is an interdisciplinary field that seeks to understand biological systems using knowledge from physics and chemistry along with mathematical analysis and computer modeling. The broad scope of biophysics requires that students begin their learning with several courses in physics, biology, chemistry, and mathematics. In consultation with a faculty advisor, students then develop a set of courses constituting an advanced area of focus (e.g., structure-function relations of macromolecules, biomechanics of cell cytoskeleton, biotechnology for drug and gene delivery, nanotechnology, etc.). Through a one or two semester research experience, students integrate their learning around a particular problem or question. Because members of the biophysics faculty come from biology, chemistry, and physics, students can choose from a wide variety of research opportunities. The Biophysics concentration culminates in the Bachelor of Science degree.

Additional detailed information about the field of Biophysics may be found at: [http://www.biophysics.org/AboutUs/Biophysics/tabid/517/Default.aspx](http://www.biophysics.org/AboutUs/Biophysics/tabid/517/Default.aspx)

Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and therefore requires that students begin their learning with prerequisite and core courses in computer science, applied mathematics, statistics, chemistry, and biology (e.g., biochemistry, molecular biology, genetics, ecology, evolution, anatomy, and neuroscience and visualization). From this broad foundation in the sciences, students are well prepared to pursue one of four possible tracks: computational genomics, biological sciences, molecular modeling, and applied mathematics and statistical genomics.

Standard program for the Sc.B. degree

Prerequisites

- MATH 0100 Introductory Calculus, Part II (or equivalent) 1
- CHEM 0330 Equilibrium, Rate, and Structure 1
- PHYS 1530 Thermodynamics and Statistical Mechanics 1
- APMA 0360 Methods of Applied Mathematics I, II 1
- MATH 0180 Intermediate Calculus (or equivalent) 1
- BIOL 0280 Introductory Biochemistry 1
- CHEM 0360 Organic Chemistry 1
- CHEM 0350 Physical Chemistry: Quantum Chemistry 1
- APMA 0340 Methods of Applied Mathematics I, II 1
- APMA 0350 Methods of Applied Mathematics I, II 1
- APMA 0330 Methods of Applied Mathematics I, II 1
- BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent) 1
- APMA 1080 Inference in Genomics and Molecular Biology (prerequisite APMA 1080) 1
- CSCI 1550 Introduction to Artificial Intelligence (prerequisite CSCI 1550) 1
- CSCI 1570 Design and Analysis of Algorithms (prerequisite CSCI 1570) 1
- APMA 0300 Methods of Applied Mathematics I, II 1
- CSCI 1810 Computational Molecular Biology (prerequisites: CSCI 1800, CSCI 1810, or CSCI 1820) 1
- APMA 1650 Statistical Inference I 1
- CSCI 1820 Computational Molecular Biology (prerequisites: CSCI 1800, CSCI 1810, or CSCI 1820) 1
- APMA 1080 Inference in Genomics and Molecular Biology 1

Six courses in one of the following four tracks: 6

Computational Genomics Track: 1

Three of the following:
- CSCI 1230 Introduction to Computer Graphics
- CSCI 1270 Database Management Systems
- CSCI 1410 Introduction to Artificial Intelligence
- CSCI 1550 Probability and Computing: Randomized Algorithms and Probabilistic Analysis
- CSCI 1570 Design and Analysis of Algorithms
- APMA 0300 Methods of Applied Mathematics I, II

or other Computer Science courses approved by the concentration advisor

Three of the following:
- CSCI 0310 Introduction to Computer Systems
CSCI 0320 Introduction to Software Engineering
CSCI 1950L Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

**Biological Sciences track**

At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.

Select two courses from the following:

CSCI 1950L Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

**Molecular Modeling Track**

At least three courses from the following:

CHEM 1560A Molecular Modeling
CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
CHEM 1230 Chemical Biology
CHEM 1240 Biochemistry
CHEM 1270 Advanced Biochemistry
BIOL 0530 Principles of Immunology
BIOL 1260 Physiological Pharmacology
BIOL 1540 Molecular Genetics

Two courses from the following:

CSCI 1950L Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

**Applied Mathematics and Statistical Genomics Track**

At least three courses from the following:

APMA 1660 Statistical Inference II
APMA 1690 Computational Probability and Statistics
CSCI 1410 Introduction to Artificial Intelligence
APMA 0340 Methods of Applied Mathematics I, II
APMA 0360 Methods of Applied Mathematics I, II

At least three of the following:

CSCI 1950L Algorithmic Foundations of Computational Biology
PHP 2620 Statistical Methods in Bioinformatics, I
APMA 1660 Statistical Inference II
BIOL 1430 The Computational Theory of Molecular Evolution

**Capstone Experience**

BIOL 1950/1960 Directed Research/Independent Study
CSCI 1970 Individual Independent Study

Total Credits 19

---

1. This track is designed for students whose interests lie in the development of algorithms and high-quality software (tools and systems) for biological applications.
2. This track is designed for students whose interests lean more towards modeling biological questions.
3. This track is designed for students who wish to gain competence in the field of molecular modeling and drug design.
4. This track is designed for students whose interest focuses on extracting information from genomic and molecular biology data, and modeling the dynamics of these systems. Substitution of more advanced courses with consent of advisor is permitted.
5. Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. A minimum of one semester of independent study is required, although many students may conduct a full year of independent study.

**Honors:**

To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

**Marine Biology Concentration Requirements**

Marine biology encompasses the study of living organisms in the ocean or other marine or brackish bodies of water. Because marine organisms play an important role in sustaining life on earth, and because of the diverse habitats studied by marine biologists, concentrators must study broadly in the basic sciences and become familiar with the varied research techniques in the field. Consequently, students begin their learning with foundational courses in biology, mathematics, chemistry, and physics. Subsequent coursework in the concentration exposes students to a range of topics in biology (e.g., Invertebrate Zoology, Ecology, Physiology, Conservation) and courses in other sciences, including geological sciences, computer science, and engineering. Students are encouraged to spend a summer or semester conducting research at a field station. The field experience is a key feature of this program and provides scholarly interaction with leaders in the field so that students are mentored at the cutting edge.

**Standard program for the Sc.B. degree**

An approved course in statistics

BIOL 1950/1960 Directed Research/Independent Study (conducted at Brown or an approved marine lab or field station.) 1

Total Credits 17

1 Or substitutions as approved by the concentration advisor.
2 A summer or semester at a field station is recommended. Please note that some recommended courses are offered every other year; others have limited enrollment and require early sign-up.

BIOL 0030. Principles of Nutrition

Introduces the basic principles of human nutrition, and the application of these principles to the specific needs of humans, and the role of nutrition in chronic diseases. Provides an overview of the nutrients and their use by the human body. Also examines the role of nutrients in specific functions and disease states of the body. Not for biology concentration credit. Enrollment limited to 100. LILÉ

BIOL 0040. Nutrition for Fitness and Physical Activity

Reviews the role of nutrition in physical activity and health. It is designed to provide the student with the information and skills needed to translate nutrition and physical activity recommendations into guidelines for both the athlete for maximal performance and the non-athlete to improve both health and body weight. Students will learn the use of the energy yielding nutrition in physical activity and how food choices can influence both athletic performance and long-term health through the effect on risk factors for chronic diseases. Prerequisite: BIOL 0030. Enrollment limited to 20. Instructor permission required.

BIOL 0060. Introduction to Human Physiology

An introduction to human physiology aimed primarily at undergraduates who are not concentrating in biology. Topics include basic cardiovascular, respiratory, kidney, gastrointestinal, endocrine, and neuromuscular function, as well as aspects of reproduction and exercise physiology. Not for biology concentration credit. BIOL 0060 should not be taken following BIOL 0800 or the equivalent

BIOL 0080. Biotechnology Management

An examination of the pharmaceutical, biotechnology, and medical product industries: what they are, how they function, whence they originate, and various perspectives on why some succeed and others fail. Pathways from lab-bench to marketplace are described as are the pervasive influences of the FDA, patent office, and courts. Extensive reading; emphasis on oral presentation. Primarily intended for students planning a career in biomedical industry. Not for biology concentration credit. Students MUST register for the lecture section and the conference. Enrollment limited to 20.

BIOL 0150A. Techniques and Analyses using DNA-Based Biotechnology

The development of powerful tools in molecular biology has led to an explosion in our understanding of genes and the factors controlling expression. Illuminating research, including recent Nobel Prize winning work, is beginning to reveal the significant role of RNA; a molecule long thought to be merely a “messenger.” Through extensive laboratory work, students will acquire skills used in current research in molecular biology while examining the ways in which tools are being used in research and in development of medical treatments. Expected background: high school Biology course. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/N. FYS

BIOL 0150B. Statistical Computing for Biology

Modern biological research is a data rich endeavor, necessitating strong quantitative and computational skills to interpret the results of experimental and observational studies. In this course we will explore applications of statistics and modeling in biological research and environmental science. Topics covered will include basic probability, experimental design, sampling, hypothesis testing and mathematical models for prediction. No prior statistics knowledge is assumed. Enrollment limited to 10 first year students and sophomores. Instructor permission required. This is a half-credit course. S/N. FYS

BIOL 0150C. Methods for Extraction and Analyzing Secondary Metabolites of Medicinal Plants

Plant secondary metabolites are currently the subject of much research interest when investigating new target compounds for potential medicine from natural products. New leads for drugs and phytomedicines from plants and plant parts have been increasing at a rapid rate especially by the pharmaceutical industry. Many plants have been selected and collected for their specific secondary compounds and healing powers by ethnobotanists in the field. The final step is the extraction, analyzing and identification of these plant specimens. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/N. FYS

BIOL 0150D. Techniques in Regenerative Medicine: Cells, Scaffolds and Staining

Regenerative Medicine, also known as Tissue Engineering, is the process of creating living, functional tissues to repair or replace native tissue or organ functions that have been lost due to disease or congenital defects. As such, it is a prominent scientific discipline that can either “stand alone” or complement material-based research efforts in the areas of device design, drug delivery, diagnostics and pharmaceuticals. Students will develop proficiencies in basic cell culture techniques, early stage tissue regeneration strategies and histochemical characterization of mammalian cell constructs. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/N. FYS

BIOL 0170. Biotechnology in Medicine

Introduces undergraduates to the main technological advances currently dominating the practice of medicine. Provides an overview of the objectives, techniques, and problems related to the application of biomedical technology to the diagnosis and treatment of disease and the contemporary health care industry. Topics include: pharmaceutical development and formulation; organ replacement by prosthesis and tissue transplantation; medical imaging; tissue engineering, therapeutic cloning, regenerative medicine; stem cells; societal, economic, and ethical issues. This course does carry Biology concentration credit

BIOL 0180. The Biology of AIDS

AIDS represents an example of the vulnerability of humans to new infectious agents. We will review some human infectious diseases including small pox yellow fever and influenza, and then explore AIDS/ HIV. First characterized in 1981, AIDS became the leading cause of death in U.S. males aged 25-44 within a decade. We will examine what factors make HIV such a potent pathogen. The course is intended for students beginning in biology. Expected: BIOL 0200, or equivalent placement. This course does carry Biology concentration credit

BIOL 0190E. Botanical Roots of Modern Medicine

This course will explore a variety of medicinal plants found throughout the world, the diverse cultures that use them in their daily lives and the scientific underpinnings of their medicinal uses. In conjunction with readings, students will gain a hands-on approach in lab, observing, identifying and growing these plants. Enrollment limited to: 20. Students MUST register for the lecture section and the lab

BIOL 0190F. Darwinian Medicine

Explores evolutionary explanations of why we get sick, and how this can shape, or misshape, our interpretations of medicine. Draws on evolutionary genetics, population biology, molecular biology and
BIOL 0190S. Phage Hunters, Part II
Examine the selection, breeding, cultivation, and use of food plants. Discusses the effects on agriculture of pathogens, climate change, and loss of biodiversity. Considers whether enough food can be produced for a world population of potentially 10 billion, while sustaining biodiversity and environmental quality. Course will include two papers and assistance from Writing Fellows; feedback from first paper will be available when writing second paper. Enrollment limited to 40. LILE

BIOL 0190P. Development of Scientific Theories: Context and the Individual
We will examine how the pace and shape of scientific progress is affected by the social/cultural context and the “personality” of the individual. We will look into how the interplay between society and the individual affects how scientific theories arise, are presented, are debated and are accepted. The course will initially focus on Charles Darwin and his theory of Natural Selection and Adrian Desmond and Jan Morris, “Darwin: The Life of a Tormented Evolutionist.” Enrollment limited to 20 first year students. FYS

BIOL 0190Q. Climate Change and Species Extinction
This seminar will explore the newly emerging issue of how climate change will contribute to species extinctions. Two over-night field trips will familiarize students with how climate influences the distribution of species. Readings from a text book will consider the geographic distribution of species, species immigration, change in climate since the last ice-age, and the geography of previous species extinctions. Most readings will be directly from the scientific literature, ones that are too new to be described in text books, focusing particularly on future climate change and species extinctions. A group research project will be conducted, one that aims to perform original scientific research, focusing on questions we can address with data that already exists in online databases. This mini-project will take students through many of the major steps in scientific research and publication, with the goal of acquainting students with the scientific process of discovery. FYS

BIOL 0190R. Phage Hunters, Part I
A research-based lab class for freshmen; both semesters are required in the sequence. Students will isolate and characterize a bacteriophage virus found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over winter break, and are annotated in the spring. One hour lecture, discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, and HS chemistry. Instructor permission required. Enrollment limited to 20 freshmen. S/NC only. FYS

BIOL 0190S. Phage Hunters, Part II
A research-based laboratory class for freshmen; both semesters are required. Students will isolate and characterize a bacteriophage virus found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over winter break, and are annotated in the spring. One hour lecture, discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, HS chemistry, and permission of the instructor. Students are expected to take both fall and spring courses in the sequence. Enrollment limited to 20 first year students. S/NC only. Instructor permission required. FYS

BIOL 0200. The Foundation of Living Systems
A broad overview of biological systems, emphasizing patterns and processes that form the basis of life. Explores essentials of biochemistry, molecular, and cellular biology and their relationship to the larger issues of ecology, evolution, and development. Examines current research and trends in biology and their influence on culture. Appropriate for all students interested in biology. Serves as a gateway course to much of the intermediate and advanced curriculum. Placement tests are offered (contact Jody_Hall@brown.edu); AP scores of 4 or 5 are equivalent to BIOL 0200, and place a student out of this course. Students will be assigned to a lab section during the second week of class

BIOL 0280. Introductory Biochemistry
Lectures and recitation sections explore the mechanisms involved in the principles of macromolecular structure and function, the organization and regulation of pathways for intermediary metabolism, and the transfer of information from genes to proteins. It is expected that students have taken CHEM 0350 or are taking it concurrently

BIOL 0300. Endocrinology
A basic examination of endocrinology with emphasis on hormone biosynthesis, mechanism of action, physiological roles, and endocrine pathology. Topics include: mechanism of action of steroid, amine, and peptide hormones; neuroendocrinology; reproductive endocrinology; and endocrinology of metabolism and calcium homeostasis. It is expected that students have taken BIOL 0200 (or equivalent) and CHEM 0350

BIOL 0310. Introduction to Developmental Biology
An introductory level course focusing on the scientific principles and concepts governing development of animals and plants, evolutionary comparisons of these processes, and the ethical and social implications of these events. Expected: BIOL 0200, or equivalent

BIOL 0320. Vertebrate Embryology
Introduction to the developmental anatomy of vertebrate embryos, including humans, in an evolutionary context, through lecture, discussion and slide study. Gametogenesis through germ layers and their organ system development. Expected: BIOL 0200, or equivalent placement, or AP Biology score of 4 or 5. Limited to 18 freshmen and 18 sophomores. Students MUST register for the lecture section and the lab

BIOL 0380. The Ecology and Evolution of Infectious Disease
We will survey the diverse biology of microbes responsible for human infectious disease, develop and apply ecological and evolutionary theory to infectious microbes, and provide practical experience interpreting and synthesizing the peer-reviewed scientific literature. The discovery of infectious microbes, the role of genetic novelty, population structure and transmission mode, and the influence of clinical therapies and host immune response will be considered. Evaluation will be based on preparation, participation, weekly student presentations, and weekly written assignments, a midterm and a final. Expected: BIOL 0200 or equivalent. Enrollment limited to 45 freshmen and sophomores. Instructor permission required. LILE

BIOL 0390. Vertebrate Evolution and Diversity
An overview of vertebrate evolution that not only covers historical events, but also introduces various scientific concepts and modes of thought. Topics include past and present biodiversity, convergent evolution, biogeography, competition, continental drift, climatic change over time, the evolution of evolution as a process, and a whole-animal approach to understanding evolutionary events. Enrollment limited to 50. WRIT

BIOL 0400. Biological Design: Structural Architecture of Organisms
Many questions about the workings of living creatures can be answered by joining math, physics, and biology. We will identify basic physical science concepts that help biologists understand the structure and function of animals, plants, and microorganisms, and use these to study how the physical world constrains and facilitates the evolution of extraordinary design and diversity of organisms. For first and second year students; others by permission. Recommended background: BIOL 0200, or equivalent. Enrollment limited to 40. Instructor permission required

BIOL 0410. Invertebrate Zoology
A survey of invertebrate animals emphasizing evolutionary patterns and ecological relationships. Functional morphology, physiology, reproduction, development, and behavior of invertebrates will be examined. Laboratory exercises and two separate day-long field trips provide firsthand experience with the animals. Expected: BIOL 0200 or equivalent. Enrollment limited to 44. Students MUST register for the lecture section and a lab

BIOL 0415. Microbes in the Environment
A survey of microbes performing ecological functions in the environment. Examines current research and trends in biology and their influence on culture. Appropriate for all students interested in biology. Serves as a gateway course to much of the intermediate and advanced curriculum. Placement tests are offered (contact Jody_Hall@brown.edu); AP scores of 4 or 5 are equivalent to BIOL 0200, and place a student out of this course. Students will be assigned to a lab section during the second week of class
of the diversity of microbes in the environment and explain the benefits in an ecological and evolutionary context. Lecture based, two field trips to expand appreciation for microbial ecology. BIOL 0200 or equivalent placement; CHEM 0330. Enrollment limited to 24 sophomores. WRIT

BIOL 0420. Principles of Ecology. The principles, concepts, and controversies involved in the study of the distribution and abundance of plant and animal populations and their integration into natural communities. Emphasizes interactions among organisms and the hierarchical nature of ecological processes affecting individuals, populations, and communities. Expected: BIOL 0200 (or equivalent) and MATH 0990. Lectures and weekly discussion

BIOL 0430. The Evolution of Plant Diversity. Examines the evolutionary history of plants from a phylogenetic perspective. Introduces the science of phylogenetics - how to infer phylogenies and how to use them to understand organismal evolution. Highlights major trends in plant evolution over the past 400 million years. Lectures survey major plant lineages, with special focus on flowering plants. Weekly labs, field trips, and assignments stress basic plant anatomy and morphology, identification, and learning the local flora. Expected: BIOL 0200 (or equivalent placement). WRIT

BIOL 0440. Plant Organism. This course focuses on what plants do and how they do it. Introduces the biology of plants, their growth and development, structural features, and their cellular and organismal responses to key stimuli. Examines physiological, reproductive and developmental strategies throughout the plant life cycle and in relation to environmental challenges. Discusses the significance of various plant model systems for genetic research and understanding of mechanisms controlling plant growth and development. Prerequisites: BIOL 0200 (or equivalent placement). Students MUST register for the lecture section and lab.

BIOL 0460. Insect Biology. Focuses on characteristics that make insects unique and why more insect species have been described than all other organisms combined; the opportunity to investigate diversity and adaptation; their abundance, small size, and short lifespans; their importance as agents of biocontrol pollination, agricultural pests, and disease vectors. Expected: BIOL 0200 or equivalent. Enrollment limited to 20. Students MUST register for lecture AND lab. Primarily for freshmen and sophomores

BIOL 0470. Genetics. Genetic phenomena at the molecular, cellular, organismal, and population levels. Topics include transmission of genes and chromosomes, mutation, structure and regulation of the expression of the genetic material, elements of genetic engineering, and evolutionary genetics. One laboratory session and one discussion session per week. (Students should not plan to take BIOL 0470 after 1540.) Expected: BIOL 0200 (or equivalent placement). Students will be assigned to Lab sections the first week of class

BIOL 0475. Conservation Medicine. How have fruit bats contributed to the emergence of Nipah virus in Malaysia? Is an infectious cancer going to drive the Tasmanian Devil to extinction? Will a warmer world be a sicker world? We will consider these and additional topics at the intersection of global change biology and infectious disease emergence in this course. The course should be of interest to pre-med, general biology and environmental studies concentrators looking for an interdisciplinary learning classroom experience. Conservation Medicine will satisfy the “Area 3” organismal biology concentration requirement for Biology and Human Biology. Expected background: BIOL 0200 or equivalent placement. Enrollment limited to 25 sophomores and juniors. Instructor permission required

BIOL 0480. Evolutionary Biology. A broad introduction to the patterns and processes of evolution at diverse levels of biological organization. Topics covered include natural selection, adaptation, speciation, systematics, macroevolution, mass extinction events, and human evolution. Weekly discussion sections involve debates on original research papers. Occasional problem sets involve computer exercises with population genetics and phylogeny reconstruction. Expected: BIOL 0200 (or equivalent placement)

BIOL 0495. Statistical Analysis of Biological Data. A first course in probability distributions and the use of statistical methods for biological data. Topics covered will include describing data, statistical inference (hypothesis tests and confidence intervals), analyzing associations, and methods for categorical data (contingency tables and odds ratios). Methods will be applied to data drawn from genetics, ecology, and other areas of biological inquiry. For statistics or related science credit in Biology programs, Carries Lab credit. Enrollment limited to 40. Expected background: BIOL 0200 or equivalent, math equivalent to MATH 0100. This course is for related science credit only in Biological Sciences concentration programs. Instructor permission required

BIOL 0500. Cell and Molecular Biology. This course examines the structure and function of the basic unit of an organism, the cell. An experimental approach is used to examine cellular functions, ranging from gene transcription, cell division and protein secretion, to cell motility, and signal transduction. Relevance to health and disease will be considered. Expected: BIOL 0200 (or equivalent placement)

BIOL 0510. Introductory Microbiology. Introduces role of microbes in our understanding of biology at the cellular and molecular level. Focuses on microbial significance for infectious disease, public health, genetics, biotechnology, and biogeochemical cycles. Laboratory involves basic microbiological techniques and selection and identification of microbes and their genes. Expected: BIOL 0200 (or equivalent placement); CHEM 0330. Students MUST register for the lecture section and the lab. Enrollment limited to 72. Students should email Samantha_Plouffe@brown.edu to get on the waitlist

BIOL 0530. Principles of Immunology. Introduction to experimental and theoretical foundations of immunology. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; regulation of immune responses through cellular interactions. Applications of concepts to medically significant issues (vaccines, transplantation, inflammation, autoimmunity, cancer, HIV/AIDS) are discussed. Interpretative analysis of experimental data is emphasized. Expected: BIOL 0200 (or equivalent placement)

BIOL 0800. Principles of Physiology. Introduction to the function and integration of animal systems with an emphasis on mammals. Includes basic concepts in cell and organ system physiology as well as fundamentals of modern trends in physiological science. Emphasizes the application of physical and chemical principles to animal function at both the cellular and systemic levels. Sophomores seeking enrollment in the fall offering must sign-up on the waitlist as of Tuesday, April 23rd, from 2-5pm in Biomed 119. Expected: BIOL 0200 or equivalent

BIOL 0860. Diet and Chronic Disease. This course addresses the relationship of food to the development and treatment of chronic diseases. Chronic diseases discussed are obesity, dyslipidemia/heart disease, diabetes mellitus, cancers and osteoporosis. Dietary recommendations for these diseases are critically assessed. Geared toward students interested in nutrition, medicine, and public health. Prerequisites: BIOL 0030 and 0800, plus permission of the instructor. Enrollment limited to 20

BIOL 0950B. Topics in Science Communications: Science Journalism Practicum. Participants will understand how to read scientific research papers to interpret their findings and communicate these to a broader lay audience; analyze and understand best practices in science writing and the challenges of covering science for mass media; interviewing; fair and balanced coverage in reporting; give and receive peer feedback. Enrollment limited to 20. Instructor permission required. S/NC

BIOL 0960. Independent Study in Science Writing. Incorporates a nontechnical science journalism component into the BioMed curriculum. A series of four to six specific assignments are recommended, based on topics derived from another biology course taken previously by the student, whose instructor has agreed to serve as a BIOL 0960 sponsor. Assignments may include, for example, investigative or analytical reviews, or feature articles on ethical or social impacts of new
BIOL 1100. Biology of the Eukaryotic Cell.
Examine organelles and macromolecular complexes of eukaryotic cells with respect to structural and functional roles in major cellular activities. Emphasizes experimental basis for knowledge in modern cell biology using original literature, and discusses validity of current concepts. For advanced undergraduates and beginning graduate students. Complementary to BIOL 1270 and 1540. Prerequisites: BIOL 0280, 0470, 0500, or instructor permission. Graduate students register for BIOL 2050.

BIOL 1090. Polymer Science for Biomaterials.
Basic principles of polymer science and its application in medicine. Topics include basic polymerization chemistry, kinetics of polymerization and depolymerization with emphasis on bioerodible polymers, characterization of polymers by physical methods, bulk and surface properties, behavior of polymers in solution and in mixtures, and the application of polymers in medicine. The course will use a lecture and discussion format for major topic areas. Additionally, students will receive hands-on training in how to isolate, culture, and differentiate adult stem cells in a laboratory setting. Expected: CHEM 0330 and BIOL 0500 or an equivalent course in cell biology or physiology. Enrollment limited to 20. Instructor permission required.

BIOL 1160. Principles of Exercise Physiology.
Application of the basic principles of physiology to the study of the response mechanisms of the human body during exercise. Topics include muscle and neural control, metabolism, energy sources, cardiovascular and respiratory effects, thermoregulation, and special topics (e.g., exercising at high altitude). Student presentations based on scientific articles are included. Expected: BIOL 0800 or written permission of the instructor.

BIOL 1180. Comparative Animal Physiology.
Comparative approach to the function and regulation of animal systems with an emphasis on vertebrates. Topics include circulation, gas exchange, neuromuscular function, excretion, acid-base and ion regulation, and temperature regulation. Considers the unity and diversity of physiological processes in animals differing both in phylogeny and environmental adaptation. Original papers are discussed. Expected: BIOL 0800 or equivalent.

BIOL 1190. Synaptic Transmission and Plasticity.
Synapses are the means by which the nervous system communicates. In this seminar-style course, we will explore the molecular and physiological underpinnings of synaptic transmission. We will then examine ways in which synapses can modulate their strength during development, learning, and other adaptive processes. Expected: BIOL 0800 or NEUR 1020. Enrollment limited to 20. Instructor’s permission required.

BIOL 1200. Protein Biophysics and Structure.
Structural Biology is the science to determine three-dimensional structures of biomacromolecules, e.g., proteins, RNA and DNA. These structures enable biologists to understand and explore their function. Since proteins, RNA and DNA are the primary molecules of life, structural biology enables us to understand and influence these molecular machineries which form the basis of all biological process. Expected: BIOL 0280.

BIOL 1210. Synthetic Biological Systems.
A multidisciplinary course that combines science and engineering providing a solid foundation in a cutting edge field of biological engineering. Synthetic biology is a mixture of biology, chemistry, engineering, genetic engineering and biophysics. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts, that fit together to form complex systems. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level.

BIOL 1220. Synthetic Biological Systems in Theory and Practice.
A multidisciplinary laboratory, lecture, and discussion based course that combines several areas of science and engineering providing a foundation in the cutting edge field of synthetic biological engineering. The field of synthetic biology is centered around trying to make biology easier to engineer. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts that fit together making complex systems. This course will combine classes, guest lectures and discussion lab visits to give students the best possible tools for understanding and applying research in synthetic biology. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level, and permission of the instructor.

BIOL 1260. Physiological Pharmacology.
Covers the physiology of human disease (e.g., Heart failure and arrhythmia; cancer signaling pathways with a focus on breast cancer; neurological disorders such as schizophrenia and Parkinson’s disease) and discusses the pharmacology of the drugs used to treat disease. A group of the most commonly prescribed drugs is discussed in terms of their fundamental modes of action and clinical importance. Expected: BIOL 0800.
BIOL 1270. Advanced Biochemistry.
An advanced course in biochemistry, biochemical methods, and reading of the primary literature, featuring systematic coverage of the biochemistry of the central dogma, including DNA (replication, repair, recombination), RNA (regulation and mechanism of transcription, processing, turnover), and proteins structure, synthesis, modification, degradation, mechanisms of action, function). Expected: BIOL 0260, CHEM 0350, 0360. Graduate students register for BIOL 2270.

Provides a conceptual understanding of molecular events underlying development of human cancer. Focused on genetic changes leading to malignant transformation of cells. Covers cell cycle control, DNA damage, mutagenesis, cancer predisposition syndromes, oncogenic viruses, tumor immunology, metastasis, cancer chemotherapy and drug resistance. Lecture plus discussion of primary literature. Expected: BIOL 0260, 0470 or 0500.

BIOL 1310. Analysis of Development.
Explores molecular mechanisms underpinning development. We will focus on cellular programming during embryogenesis and the assembly of complex tissues and organisms. Specifically, we will discuss state-of-the-art experimental approaches used to investigate how cell signaling and the regulation of gene expression converge to control tissue specification and diversification. Finally, this course will emphasize developmental processes as a driving force in evolutionary biology and in the context of cellular reprogramming for use in cell-based therapies and disease. Expected: BIOL 0200 (or equivalent), and one course in genetics, embryology, cell biology or molecular biology.

This course is an advanced, seminar-based course. Primary literature is emphasized to complement the format of extensive student seminar presentations. It is essential that students have a strong background in biology in order to gain the most from this course. The emphasis of the course is student seminar presentation and extensive discussion on the material. This is often the first opportunity for students to present/discuss science in a seminar format. Expected background: a course in Cell Biology (e.g. BIOL 0500 or 0505), and two additional Biology courses above the introductory (BIOL 0200) level. Enrollment limited to 20.

BIOL 1410. Evolutionary Genetics.
This course will focus on selected topics in molecular population genetics, molecular evolution, and comparative genomics. Classic and current primary literature at the interface of evolution and genetics will be discussed in a seminar format. The laboratory involves wet lab exercises (allozymes, PCR-RFLP, sequencing), plus computer labs using DNA analysis packages. Students will prepare a final grant proposal on specific research interests. Expected: BIOL 0470 or 0480. Students MUST register for the lecture section and the lab. Enrollment limited to 20.

BIOL 1420. Experimental Design in Ecology.
An overview and discussion of the basic principles used to design lab and field experiments in ecology and environmental science. Topics include: replication and statistical power, appropriate use of factorial designs, nonparametric methods, post hoc tests, natural versus manipulative experiments, experimental artifacts and impact study design. Discussions based on primary literature and a new text. Expected: BIOL 0420.

BIOL 1425. Phylogenetic Biology.
This course is the study of the evolutionary relationships between organisms, and the use of evolutionary relationships to understand other aspects of organism biology. This course will provide a detailed picture of the statistical, mathematical, and computational tools for building phylogenies and using them to study evolution. Enrollment is by instructor permission. Students will present scientific papers in class and complete a final project consisting of their own phylogenetic analysis. Expected Background: Evolutionary Biology and quantitative methods (such as statistics, computation, or math). Open to juniors, seniors, and graduate students. Enrollment limited to 16.

BIOL 1430. The Computational Theory of Molecular Evolution.
This course employs intellectual traditions from computer science and biology to investigate the properties and principles of DNA sequence evolution. The roles of mutation, natural selection, population size and subdivision, and genetic recombination are explored. Lectures complemented by web-based computer exercises. Expected: either an introduction to evolution (BIOL 0200, 0480) or to computer science (CSCI 0150, 0160, 0170).

BIOL 1440. Marine Biology.
An examination of current topics in the ecology of marine organisms and communities. Current literature and ideas are analyzed in a seminar format (5hr/week). A class research project provides hands-on experience with designing and interpreting experimental field work. Prerequisites: BIOL 0410 and 0420. Instructor’s permission required.

BIOL 1460. Microbial Diversity and the Environment.
This is a lecture and discussion based course that focuses on the role of microbes in ecological, geological, and environmental processes. This includes: introductory concepts, origins of life, role in climate change, functional diversity of biogeochemical cycles, microbial communities and interactions, habitat specific examples, and applications in the environment and human health. Expected: BIOL 0200, CHEM 0330 and an intermediate science course (e.g., BIOL 0280, GEOL 0240, or ENVS 0480).

BIOL 1465. Human Population Genomics.
An introduction to human genomics and the evolutionary forces that shape observed genetic variation across humans today. Topics will include the relationship among humans and other primates, human population genetics and genomics, and examples of the concomitant evolution of both cultural traits and domesticated organisms. Assignments include a class presentation and reviewing papers on a selected topic. Expected background: BIOL 0470 or 0480, and BIOL 0485, PHIL 2500, or equivalent. Enrollment limited to 25. Instructor permission required.

BIOL 1470. Conservation Biology.
Conservation Biology is the scientific study of the phenomena that affect the maintenance, loss, and restoration of biological diversity. Topics covered include: 1) the impacts of global warming, species invasions, and habitat destruction on biodiversity, 2) strategies developed to combat these threats, and 3) a consideration of key economic and ethical tradeoffs. Special attention will be paid to current debate and controversy within this rapidly emerging field of study. Readings will include the primary literature. A term-paper will be required. Prerequisite: BIOL 0420 or instructor permission. Enrollment limited to 30.

BIOL 1475. Biogeography.
Will provide an overview of the field of biogeography--the study of geography of living organisms. Class meetings will be split between lectures and discussions. Each discussion will expose students to foundational papers, which set the context for the field's development, and more recent papers, which show where the field is headed. Each student will conduct a short (but time consuming) original research project on some topic in biogeography. Prerequisites: BIOL 0420 and 0480. Expected: one taxonomy-based course (e.g., BIOL 0410, 0430, or 0460). Enrollment limited to 15 juniors, seniors, and graduate students. Instructor permission required.

BIOL 1480. Terrestrial Biogeochemistry and the Functioning of Ecosystems.
Three fundamental multidisciplinary questions will be addressed: How do ecosystems work? What limits the growth of life on Earth? How are humans altering the framework in which all life exists? Earth is basically a closed chemical system, and the reactions that support life are fueled by sunlight. But added to this chemistry and physics is the tremendous influence of life. Life created an oxygen atmosphere; the evolution of biological nitrogen fixation exponentially increased how many organisms could exist, and the soils that support human food production developed only by biologically-mediated processes. Throughout Earth's 4.5 billion-year history changes in Earth's basic biogeochemical processes have been fairly slow. Under our inattentive stewardship, we have almost instantaneously altered all of the major element cycles. We will focus heavily on what these changes mean for life on Earth. Instructor permission required.

BIOL 1485. Climate Change and Health.
In this course, students will explore the linkages between climate change and health. They will come to appreciate the topic through the foundations of the primary disciplines relevant to the field including global health, environmental change, disease ecology, and others. Climate-
BIOL 1500. Plant Physiological Ecology.
An in-depth look at plant ecological strategy, focusing on the anatomical and physiological adaptations of plants to particular environments. Additional topics include plant-animal interactions, historical biogeography, and community assembly processes. A comparative, phylogenetic approach is emphasized. Lectures present a broad overview of topics, and discussions focus on current outstanding problems. Lab exercises provide hands-on experience in designing experiments, measuring plant performance, and scientific writing. Required laboratory hours to be arranged by the instructor. Expected: BIOL 0430 or BIOL 0440. Enrollment limited to 15.

BIOL 1520. Innate Immunity.
Innate immunity is the initial response to microbes that prevents infection of the host. It acts within minutes to hours, allowing the development of the adaptive response in vertebrates. It is the sole mechanism of defense in invertebrates such as insects. The components and mechanisms dictating this response are explored. Prerequisite: BIOL 0530. Expected background: any of BIOL 0280, 0470, or 0530 or instructor permission required.

BIOL 1540. Molecular Genetics.
Covers advanced genetic and molecular methods and their use in analysis of complex biological phenomena such as development, signaling, behavior, and disease. Discusses how these techniques are applied across an array of organisms, with special emphasis on the major eukaryotic genetic model systems (Drosophila, nematodes, mouse, yeast, Arabidopsis). Uses primary research literature to analyze the design of forward- and reverse-genetic approaches to discover novel gene function. For advanced undergraduates and beginning graduate students. Prerequisite for undergraduates: BIOL 0470 or instructor permission. Expected background: any of BIOL 0280, 0500, 1050, or 1310. Graduate students should register for BIOL 2540.

BIOL 1550. Biology of Emerging Microbial Diseases.
Emerging diseases influence the health of human populations in less developed countries and are expected to have similar effects worldwide. Rising incidence of "new" diseases underscores the need for knowledge of infection mechanisms and their outcomes. Focuses on biochemical, genetic, cellular and immunological events of emerging pathogens and host responses. Expected: BIOL 0470 or BIOL 0530.

BIOL 1560. Virology.
Emphasizes the understanding of molecular mechanisms of viral pathogenesis. Begins with a general introduction to the field of virology and then focuses on the molecular biology of specific viruses that are associated with human disease. Lectures based on current literature. Prerequisite: BIOL 0280, 0470, or 0530, or instructor permission required.

BIOL 1600. Development of Vaccines to Infectious Diseases.
Provides background on steps involved in vaccine development, from conceptualization to production to immunization. Considers infectious diseases and their associated vaccines in the context of community health. Appropriate for any student wanting to gain an understanding of vaccine science, and also provides a foundation for other advanced courses in immunology and infectious disease, biomedical research, or medical/graduate studies. Activities include an in-class presentation and a research paper on a topic chosen by the student. Expected: BIOL 0530 (or equivalent experience, to be vetted with instructor).

How and why do animals run, jump, swim and fly? Physiology, anatomy, ecology, and evolutionary history all influence, and are influenced by, the way animals move around. We will integrate analyses from many levels of biological organization - from molecular motors, through bone-muscle systems, to biogeography - with methods and approaches from mechanics, fluid dynamics, and robotics. Expected: BIOL 0800 and PHYS 0030. Instructor permission required.

BIOL 1820. Environmental Health and Disease.
Fundamental concepts relating to the adverse effects of chemical agents on human health. Topics include dose-response relationships, absorption, distribution, metabolism, excretion, mechanisms of toxicity, and the effects of selected environmental toxicants on organ systems. Many of these concepts will be reinforced through the use of a case-study approach where a pertinent environmental issue is incorporated into the ongoing lectures. Expected: BIOL 0500 or BIOL 0800. Advanced students have priority.

BIOL 1850. Environmental and Genetic Toxicology.
Human disease is produced by complex interactions between inherited genetic predisposition and environmental exposures. These interactions will be explored at the molecular, cellular, and systematic levels. Prototype diseases will include hereditary disorders of hemoglobin, hypercholesterolemia, birth defects, and cancer. Expected: Cell Biology.

BIOL 1870. Techniques in Pathobiology.
A methodology course featuring laboratory and lecture instruction in established and leading-edge technologies. Examples: flow cytometry (multi-parameter analysis, cell sorting, DNA analysis, apoptosis analysis); molecular biology (PCR, in situ hybridization, southern blotting, cytogenticism, gene cloning, bioinformatics); digital imaging (image acquisition, processing and analysis); light microscopy (confocal, immunohistochemistry); transmission electron microscopy (immuno/lectin/ enzyme cytochemistry); scanning electron microscopy (including x-ray microanalysis).

BIOL 1880. Comparative Biology of the Vertebrates.
The biology, structure, and evolutionary history of the vertebrates considered phylogenetically, emphasizing evolution of the major body systems. Stresses an evolutionary approach to the correlation of structure and function with environment and mode of life. Labs include dissection of several different vertebrates, comparative osteological material, and a museum trip. Recommended: BIOL 0320 or 0800. First-year students must obtain instructor permission to register. Enrollment limited to 32. Students MUST register for the lecture section and the lab.

BIOL 1890. Human History.
A comprehensive study of the structure and function of human tissues and organs providing a foundation for the understanding of pathologic alterations. Relationships are drawn to aspects of development, growth, physiology, and gross anatomy. For Pfizer students only.

BIOL 1920B. Health Inequality in Historical Perspective.
This seminar course takes a historical perspective to explore the fundamental causes of health inequality in the US. We will draw on a series of case studies from the 19th century to the present to examine the socio-political and economic context of health and disease, focusing specifically on how race, class, and gender shape the experience of health, notions of disease causality, and public health responses. Topics include the health consequences of immigration, incarceration, race-based medicine, the Chicago heat wave, and Katrina. BIOL 0200 and previous course work in Africana Studies and/or Science and Technology Studies preferred. Enrollment is restricted to second and third year students and is limited to 20 students. Written permission required. An application for entry will be distributed on the first day of class. Not for concentration credit as a biology course.

BIOL 1920C. Social Contexts of Disease.
What shapes our understandings of disease? What makes a disease real? How might we explain the demise of formerly prevalent diseases (e.g. neurasthenia) and the arrival of others (e.g., fibromyalgia)? How do politics, technologies, and institutions like hospitals affect conceptions of disease and structure their treatment? We will examine the impact of social context on patients' experiences of disease, as well as clinical, scientific, and public health approaches to disease. We will also consider disease in relation to important social relations such as the doctor-patient relationship, the power of the state to monitor and regulate disease, disparities in the burden of disease, and the cultural care of the body. Enrollment limited to 20 juniors and seniors, required instructor permission; AB Human Biology seniors intending this as capstone will have first priority; others by permission.
BIOL 1920D. Race, Difference and Biomedical Research: Historical Considerations.
Course examines the debate over race, health, and genetics in historical context. An overarching goal is to understand how the social world informs the scientific questions, the design of research studies, and the interpretation of findings. How have the theories and practices of biomedical science and technology produced knowledge of "race" and racial difference historically? How does race relate to gender and class? What are the implications for understanding health inequality? Previous course work in biomedical science, history of science, science and technology studies, and Africana Studies preferred. For advanced undergraduate and graduate students. Instructor permission required. Enrollment limited to 20. WRIT

BIOL 1940K. Global Change Biology.
This graduate level seminar will explore the global human footprint on Earth's biological and biogeochemical systems. Specific areas of discussion will include: climate change, alteration of the global nitrogen cycle, agricultural intensification, land use change and species invasions. Particular attention will be paid to the coupling of biogeochemical cycles, and how our understanding of those couplings informs predictions about future climate, agriculture production, and ecosystem properties. Readings will be drawn from the primary literature, and students will be expected to lead discussions regularly. Enrollment limited to 20. Instructor permission required.

BIOL 1940W. Genetics and Evolution of Complex Traits.
Many traits important for evolutionary adaptation, crop improvement, and human health are influenced by many genes as well as the environment. This seminar course will explore the genetic architecture and evolutionary dynamics of complex traits in a hands-on way by teaching analytical skills using real-world data. This course is aimed at upper level undergraduates and graduate students. Prerequisites: BIOL 0470 or BIOL 0400 or equivalents. Basic knowledge of statistics will be helpful.

Multicellularity has arisen independently about 20 times among living organisms. We will explore the theoretical issues involved in the origin of multicellularity, including multilevel natural selection and the division of labor, and then survey these themes in all known independent origins of multicellularity. Particular attention will be paid to the segregation of reproductive potential, including its evolution within these groups. Expected background: BIOL 0200 or its equivalent (AP,IB) and any two of the following: BIOL 0470, 0480, 0410, 0430, 0320, 0310, 0440, or 1310. Instructor permission required.

BIOL 1941A. Plants in a Changing Planet.
Plants are the foundation of Earth's ecosystems and essential to human survival and civilization. This seminar will examine the physiological, ecological, and evolutionary responses of plants to rapid environmental change, and the consequences for agriculture and the structure and function of natural systems. Expected background: at least one of the following courses - BIOL 0420, 0430, 0440, 0480, or ENVS 0490.

BIOL 1941E. Biotechnology and Global Health.
This course examines contemporary biotechnologies used to combat the predominant, worldwide problems in human health. Global health will be addressed from the scientific and engineering perspectives while integrating public health policy, health systems and economics, medical and research ethics, and technology regulation and management. This course is intended for graduate and advanced undergraduate students in biology, engineering, or related fields who have an interest in global health initiatives. Expected background: BIOL 0200 and BIOL 0800, or equivalents. Preference will be granted to graduate students in the Biotechnology and Biomedical Engineering programs. Enrollment limited to 20. Instructor permission required.

Directed research projects supervised by individual faculty members in the Division of Biology and Medicine. Required for Sc.B. programs in Biology, Biophysics, Marine Biology, Applied Math-Biology, Biochemistry and Molecular Biology, Bioengineering, Computational Biology, and Human Biology; optional for others. Opportunities are available in both campus and hospital-based settings. Projects can serve as basis for Honors theses. Information on specific opportunities and faculty research areas are found in a research database at bms.brown.edu/bug/pages/research.html. The site also offers a student manual, proposal forms, budget request forms, and information about Honors. Individual consultations can be scheduled with Dean Thompson. Required: A completed proposal form, sponsor's and concentration advisor's approval, and written permission and override from Dean M. Thompson (following review of proposal) prior to registering for any section of this course.

Please see description for BIOL 1950.

BIOL XLIST. Courses of Interest to Biology Concentrators.
Fall 2012
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Environmental Studies
ENVS 0455 Coastal Ecology and Conservation
ENVS 0490 Environmental Science in a Changing World

Biology (Graduate)

Chair
Edward Hawrot

Director of Graduate and Postdoctoral Studies
Elizabeth O. Harrington

Graduate Biological Sciences Education
The Division of Biology and Medicine offers multiple programs of advanced graduate study leading to the degrees of A.M., Sc.M., and Ph.D. These programs are thematically based: Biology, Molecular Biology, Cell Biology, and Biochemistry; Molecular Pharmacology and Physiology; Pathobiology, Ecology and Evolutionary Biology, Computational Biology, Biomedical Engineering, as well as Clinical and Translational Research. Brown’s research network, featuring advanced facilities situated on campus and at partner institutions, encourages discovery and innovation with state-of-the-art equipment and resources that include: Genomics and Proteomics Core, Bio-imaging facility, Mouse transgenic, and Knockout Core Animal Care Facilities, Plant Environmental Center, Water Flume, RI BioBank. More information about the Division’s Research Facilities can be found here: http://biomed.brown.edu/research/.

Students entering graduate programs generally have appropriate preparatory course work as well as significant research experience. Courses are chosen with the advice of program counselors, and may include, in addition to divisional offerings, courses offered by other university departments. As a part of the doctoral training most students will be required to participate in the teaching of one or more courses related to the program.

For further information on Graduate Study in the Biological Sciences at Brown, please visit the Office of Graduate and Postdoctoral Studies website: http://biomed.brown.edu/grad-postdoc/.

Biotechnology Graduate Program
Brown University offers both a Master of Science (Sc.M.) degree and a Doctor of Philosophy (Ph.D.) in Biotechnology. The graduate program is designed for students interested in a range of topics related to the field of biotechnology including drug and gene delivery, prosthetic devices, cancer therapeutics, vascular grafts, tissue engineering, disease diagnostic assays, and bioartificial organs.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biotechnology-0
Ecology and Evolutionary Biology Graduate Program

The graduate program in ecology and evolutionary biology is intended for highly qualified students who plan to pursue a career that includes research or teaching in ecology and/or evolutionary biology. Admission to graduate study is open to candidates for the Ph.D. degree. Individual programs are designed to meet each student’s needs and interests while providing a strong background in ecology, evolutionary biology and related disciplines. All students are expected to attain proficiency in ecological and evolutionary theory, quantitative research methods, statistical analysis, writing, and oral presentation. Depending on the student’s interests, they may be expected to demonstrate proficiency in other areas such as functional morphology or genetics and genomics. This proficiency may be attained through course work, seminars, independent reading, and laboratory and field programs.

For further information on admission and program requirements, please visit: [http://www.brown.edu/academics/gradschool/programs/biomed-ecology-and-evolutionary-biology](http://www.brown.edu/academics/gradschool/programs/biomed-ecology-and-evolutionary-biology)

Biomedical Engineering Graduate Program

The Biomedical Engineering program at Brown provides cutting-edge, interdisciplinary, graduate-level education at the interface of engineering, biology, and medicine. The program features an interdisciplinary approach in four complementary research areas: repair and regenerative medicine, neuro-engineering, motion sciences/biomechanics and biomedical devices and imaging. Research in these areas is advancing the understanding of fundamental problems in engineering, biology and medicine, while developing new therapies to improve the quality of life for people with medical problems. The program is distinguished by its quantitative rigor and strong collaborative connections between academic science, clinical medicine, and industry.

The Biomedical Engineering program offers both the Master of Science (Sc.M) degree and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit: [http://www.brown.edu/academics/gradschool/programs/biomedical-engineering](http://www.brown.edu/academics/gradschool/programs/biomedical-engineering)

Clinical and Translational Research Graduate Program

The goal of the Master of Science (Sc.M.) degree program in Clinical and Translational Research is to train clinicians and basic scientists to extend basic scientific research into the clinical arena, ultimately leading to improvements in individual and population health. By translating basic research into improved clinical outcomes, researchers and clinicians are able to provide new treatments to patients more efficiently and quickly.

For more information on admission and program requirements, please visit: [http://www.brown.edu/academics/gradschool/programs/biomed-clinical-and-translational-research](http://www.brown.edu/academics/gradschool/programs/biomed-clinical-and-translational-research)

Courses

BIOL 2010. Quantitative Approaches to Biology
Graduate level introduction to quantitative and computational methods in modern biology. Topics include Programming, Modeling, Algorithms, Bioinformatics, Applied Statistics, Structural Biology, Molecular Dynamics, Enzyme Kinetics, and Population and Quantitative Human Genetics. Preference is given to graduate students in Molecular Biology, Cell Biology and Biochemistry and Molecular Pharmacology, Physiology, and Biotechnology. Limited to 20 students. Instructor permission required

BIOL 2030. Foundations for Advanced Study in the Life Sciences
A double-credit graduate course on multidisciplinary experimental approaches to biological questions. Focusing on primary literature, the mechanism and regulation of basic cellular processes involving nucleic acids (synthesis, structure, maintenance and transmission) and proteins (synthesis, maturation, function) and their integration into more complex events (signaling, organelle biogenesis and inheritance, and cell cycle control) will be presented. Discussion sections complement lectures

BIOL 2050. Biology of the Eukaryotic Cell
(Undergraduate students should register for BIOL 1050.)

BIOL 2060. Ultrastructure/Bioimaging
This course examines microscopy and image analysis in the life sciences. Theoretical and practical aspects of microscopy will be discussed. Students will obtain hands-on experience with electron microscopy, light microscopy, fluorescence microscopy, and confocal microscopy. Students will learn to display images in 3D. For graduate students and advanced undergraduates. Instructor permission required

Pathobiology Graduate Program

The graduate program in pathobiology is an interdisciplinary and interdepartmental program leading to the Doctor of Philosophy (Ph.D.) degree. The program is devoted to biomedical research into the mechanisms of human diseases. The three major research and teaching thematic areas are Toxicology & Environmental Pathology, Immunology & Infectious Diseases, and Cancer biology. Training may be obtained in the areas of immunopathology, pulmonary pathology, chemical pathology, environmental and viral carcinogenesis, cancer biology, toxicologic pathology, extracellular matrix biology, hepatology and infectious diseases.

For further information on admission and program requirements, please visit: [http://www.brown.edu/academics/gradschool/programs/biomed-pathobiology](http://www.brown.edu/academics/gradschool/programs/biomed-pathobiology)

Molecular Biology, Cell Biology, and Biochemistry Graduate Program

The graduate program in molecular biology, cell biology, and biochemistry is intended for highly qualified students who plan to pursue a career which includes research in biology or medical sciences. Admission is generally limited to candidates for the Ph.D. degree. The program is interdisciplinary, focusing on molecular and cellular aspects of developmental biology, genetics, genomics and gene expression, signal transduction, oncogenesis, immunology, protein biochemistry, structural biology, proteomics, cell surface receptors, molecular modeling, DNA/RNA protein interactions, epigenetics, and virology.

Molecular Pharmacology and Physiology Graduate Program

The graduate program in molecular pharmacology and physiology offers advanced training appropriate for academic and research careers in the fields of biology and medical sciences that include molecular and structural pharmacology; neuropharmacology; cellular, comparative, and organ systems physiology; and chemical biology. Programs of study and research are developed individually in consultation with the student’s adviser and advisory committee and are designed to ensure expertise in the student’s principal field. Admission is ordinarily limited to applicants for the Ph.D.
BIOL 2110. Drug and Gene Delivery. Topics in drug delivery systems including history of the field, advantages of controlled release technology, stabilization and release of proteins, fabrication methods, regulatory considerations, economic aspects, patents and intellectual property rights, and more. Prepares students for research in industry and academia, and offers information for consultants in the field. Expected: BIOL 1090, 1120; CHEM 0350, 0360

BIOL 2130. Techniques in Molecular and Cell Science. This course provides hands-on laboratory training in state-of-the-art techniques in molecular and cellular sciences, and reinforces this training with didactic lectures that stress key principles, the quantitative approach and the most exciting applications of these technologies in the context of current research. Areas covered include cell culture, tissue engineering, DNA cloning, gene therapy, quantitative assays, microscopy and image analysis. Enrollment is limited to 12; written permission required. Permission will be granted after the first class. Students MUST register for the lecture section and a lab.

BIOL 2140. Principles in Experimental Surgery. An introduction to the principles and practice of surgery, sterile technique, anesthesia, and laboratory animal care. Intended to provide highly supervised, hands-on experience in techniques for humane handling and surgical management of experimental animal subjects. Emphasizes surgical technique, anesthesia technique, and laboratory animal medicine. Primarily for graduate students. Limited to 5. Students MUST register for the lecture section and the lab. Prerequisite: BIOL 0800 and instructor’s permission

BIOL 2150. Scientific Communication. Focused on the effective dissemination of scientific information. Through practical examples of activities common to the profession (writing a grant proposal, presenting research work orally, and preparing a critical review of a submitted scientific manuscript), students will develop the skills necessary to effectively communicate scientific ideas, experiments and results. Each of the activities will be dissected into key sets that will be individually developed with the aid of interactive discussions and peer review. Enrollment limited to 12 graduate students

BIOL 2156. Special Topics in Biotechnology Writing. Required sequel to BIOL 2155. It is intended for ScM students (Biotechnology) who are not doing lab-based research. Students choose from a list of topics and faculty mentors in the field biotechnology. Students conduct in depth research and writing with the goal of producing a final report and presentation equivalent to a professional consultant’s and worthy of a ScM thesis. Meet once per week with mentors to monitor progress plus weekly background lectures relevant to all projects. With permission of the instructor it is possible to start the two-semester sequence with BIOL 2153 in spring and BIOL 2155 the following fall semester. Prerequisite: BIOL 0280 and 1120; CHEM 0350/0360 or equivalent. Enrollment limited to 20

BIOL 2167. In Vitro Models for Disease. This course will use case studies to examine high burden diseases, their pathophysiology, treatment, and the models used to study the disease. Literature will be used to discuss the current models for the disease and the associated limitations of each of these models. The course will also cover the use of animals in research and how new in vitro models could be used to decrease their use. This course is intended for graduate students in biology, engineering, or related fields. Prerequisites: BIOL 0200 and 0800, or equivalent. Enrollment limited to 20 graduate students

BIOL 2170. Molecular Pharmacology and Physiology. Fundamental concepts in pharmacology and physiology from the cellular/molecular level to organ systems. Required of first-year graduate students in Molecular Pharmacology and Physiology

BIOL 2200A. Molecular Biology and Chemistry. A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission. Enrollment limited to 20

BIOL 2200B. Post–Transcriptional Regulations of Gene Expression. Enrollment limited to 20

BIOL 2200C. Current Topics in Biochemistry: Tuning the Central Dogma. A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission

BIOL 2200D. Current Topics in Biochemistry: Biochemical Genomics. A critical evaluation of current research in biochemistry and molecular biology focusing on the mechanism and regulation of transcription. Intensive reading, critical analysis, and discussion of the relevant literature in the context of student presentations in seminars. Advanced undergraduates with permission of the instructor. Enrollment limited to 20 students. Instructor permission required

BIOL 2210A. Molecular Mechanisms in Site–Specific Recombination and DNA Transposition. Enrollment limited to 20

BIOL 2210B. Ribosomes. Enrollment limited to 20

BIOL 2210C. Current Topics in Molecular Biology: Cellular Quality Control Mechanisms. Protein synthesis is a fundamental cellular process that is dependent upon the rapid and accurate synthesis of ten to twenty thousand ribosomes per generation to carry out the equally rapid and accurate synthesis of protein. Progress in understanding Ribosome structure and function, Ribosome evolution, Ribosome biogenesis and coordination of cell growth with cell division will be explored using the current literature with weekly student seminars and a final research proposal

BIOL 2230. Biomedical Engineering and Biotechnology Seminar. Required of all first- and second-year graduate students in the Biomedical Engineering and Biotechnology Seminar graduate program, and open to others. Concepts of drug delivery and tissue engineering, implantation biology, and cellular therapy, as well as the research projects directed by program faculty. Students present research seminars and participate in presentations by outside speakers. Includes Journal Club activities. Open to graduate students only

BIOL 2240. Biomedical Engineering and Biotechnology Seminar. See Biomedical Engineering and Biotechnology Seminar (BIOL 2230) for course description

BIOL 2260. Physiological Pharmacology. The objective is to present drugs in the context of the diseases they are used to treat. A list of the common medically prescribed drugs will be discussed in terms of their fundamental modes of action and clinical importance. Pertinent background biochemistry, physiology, and pathology is provided, e.g., the electrophysiology of the heart is discussed as a background to anti-arrhythmic drugs. Physiological pharmacology is relevant for students intending to go to medical school and suitable for students interested in careers, such as journalism, law, government, precollege teaching, biomedical research, and pharmacy. Expected: BIOL 0800 or equivalent course in physiology

BIOL 2270. Advanced Biochemistry. (Undergraduate students should register for BIOL 1270.)

BIOL 2290A. Mechanisms of Virus Entry, Replication, and Pathogenesis. This course will focus on the interactions between viruses and host cells that contribute to invasion, manipulation of viral and cellular gene expression, and manipulation of the host’s response to infection. We will address interactions between viruses infecting humans, as well as those of plants, fungi, and bacteria. Students will be evaluated on their ability to critically analyze data in published manuscripts, including presentations of primary papers, classroom discussion, and completion of a research proposal. Expected: at least two of the following: BIOL 1050, 1270, 1520, 1540, 1560. Advanced undergraduates with permission of the instructor

BIOL 2290B. Mechanisms of Protein Synthesis and Impact on Human Disease. This course will examine mechanisms central to the regulation of protein synthesis in both prokaryotes and eukaryotes. Targeting protein synthesis through ribosomes is a proven drug target commonly used to treat many infectious diseases. The regulation of protein synthesis in eukaryotes is
critical for myriad human conditions including aging and cancer, including the recently discovered role of microRNAs. This course will explore the common and unique mechanisms of regulation of protein synthesis between prokaryotes and eukaryotes and the importance of understanding these mechanisms for human health. For graduate students and advanced undergraduates with permission

BIOL 2290C. Neuronal Signaling meets the RNA World.
The concept of one gene, one protein is nowhere more violated than in protein encoding genes expressed in the nervous system. We will cover a variety of post-transcriptional processing events which serve to generate protein diversity in the nervous system including alternative splicing, trans-splicing, and RNA editing. We will also address non-coding RNAs and their roles, in particular, in regulating nervous system function. Since it is clear that nervous system complexity is not a function of gene number across large phylogenetic distances, the course will be aimed at instilling a greater understanding of how the regulation of shared "toolkit" genes results in organismal complexity. Advanced undergraduates with permission of the instructor

BIOL 2290D. Small RNA Regulation of Germ Cells and Development.
Enrollment limited to 20

BIOL 2290E. Signal Transduction.
Enrollment limited to 20

BIOL 2310. Analysis of Development.
Explores molecular mechanisms underpinning development. We will focus on cellular programming during embryogenesis and the assembly of complex tissues and organisms. Specifically, we will discuss state-of-the-art experimental approaches used to investigate how cell signaling and the regulation of gene expression converge to control tissue specification and diversification. Finally, this course will emphasize developmental processes as a driving force in evolutionary biology and in the context of cellular reprogramming for use in cell-based therapies and disease. Expected: BIOL 0200 (or equivalent), and one course in genetics, embryology, cell biology or molecular biology. Enrollment limited to 36. (Undergraduate students should register for BIOL 1310.)

BIOL 2320A. Neurogenetics and Disease.
Study of genetic mutations provides a powerful approach to dissect complex biologic problems. We will focus on fascinating discoveries from "forward genetic" studies – moving from nervous system phenotype to genetic mutation discovery. There will be an emphasis of neurologic disease phenotypes and the use of novel genomic methods to elucidate the central molecular and cellular causes for these conditions. The course will emphasize the use of "reverse genetics" – engineered mutations in model systems – to dissect nervous system function and disease mechanisms. Disorders to be covered include autism, intellectual disability, schizophrenia, epilepsy. Enrollment limited to 20. Instructor permission required

BIOL 2320D. The Biology of Aging.
Studying the mechanisms underlying the process of aging promises to be one of the next great frontiers in biomedical science. Understanding the biology of aging is important not only for the long-term possibility of increasing life span, but for the more immediate benefits it will have on age-related diseases. As demographics of industrialized countries have changed, age-related diseases such as cancer, cardiovascular disease, stroke, osteoporosis, arthritis and Alzheimer's disease have assumed epidemic proportions. A thorough understanding of the aging process is an important pre-requisite for designing rational therapeutic interventions for the treatment of these age-related disorders. We will focus on examining the biology of aging primarily through the examination of studies of a molecular, cellular, genetic and demographic nature. Lectures and presentations are based on reading of the primary and secondary literature. Advanced undergraduates with permission of the instructor

BIOL 2320E. Genetic Control of Cell Fate Decisions.
A cell’s fate is acquired in a process whereby largely uncommitted progenitor cells are instructed down a committed path that ultimately results in a specific cell type with distinct molecular and physiological properties. This process is critical for the establishment of all cell types and tissues and is poised to be a critical topic in cell-based therapeutic strategies. We will investigate the intrinsic and extrinsic mechanisms that manifest at the genetic level to impart cell fate decisions on progenitors. Advanced undergraduates with permission of the instructor

BIOL 2330B. Current Topics in Developmental Biology: Design the Ultimate Bio-Energy Crop.
Can we replace oil wells with corn fields? Join us (Profs. Sam Beale and Mark Johnson) for a thought experiment where we consider the limitations for using plants as energy sources and try to come up with strategies to overcome them. Developmental Biology Questions: What are the developmental pathways that control leaf shape and size? What are the developmental pathways that control CO2 uptake? Biochemical Questions: What are biochemical limits of photosynthetic carbon fixation? Can the chemical composition of plants be modified to yield more efficient plant fuel sources?

BIOL 2330C. To Be Determined.

BIOL 2430. Topics in Ecology and Evolutionary Biology.
Current literature in ecology, behavior, and evolutionary biology is discussed in seminar format. Topics and instructors change each semester. Representative topics have included: structuring of communities, biomechanics, coevolution, quantitative genetics, life history strategies, and units of selection. Expected: courses in advanced ecology and genetics

BIOL 2440. Topics in Ecology and Evolutionary Biology.
See Topics In Ecology And Evolutionary Biology (BIOL 2430) for course description

BIOL 2450. Exchange Scholar Program.

BIOL 2470. Current Topics in Genetics and Genomics.
A critical evaluation of research in genetics and genomics in a seminar/discussion format. Specific focus will vary and will reflect areas of interest to the field, faculty and students in the genetics and genomics. Topics may include mechanisms of genre regulation, evolutionary genetics and genomics, genetic dissection of development in complex organism, dosage compensation, genetic and genomic analysis of gene and protein regulatory networks, chromosome transmission, interactions between genetic and epigenetic mechanisms. Prerequisites: BIOL 0470 and BIOL 1540

BIOL 2480B. Dissection of Genetic and Molecular Mechanisms.
The transfer of traits from one individual to another is a fundamental process in biology. In this course, we will explore the diversity of molecular mechanisms underlying phenotypic inheritance through a critical evaluation of primary literature, with special emphasis on the design and implementation of novel strategies to study these processes. For graduate students and advanced undergraduates with a strong background in genetics. Expected: BIOL 0470 and BIOL 1540. Written permission required for undergraduates

BIOL 2480C. DNA Replication, Recombination and Repair.
Emphasizes critical reading and discussion of the primary literature as it relates to DNA transactions such as DNA replication and recombination in prokaryotic and eukaryotic cells. Class participation and oral presentations will be required and the basis for course grade determination. Topics of discussion will cover diverse model systems and may include: Epigenetic Regulation Via Chromatin Remodeling and Modification; Mechanisms of DNA Replication, Recombination and Repair; Transcriptional Regulation; Structural Basis of Epigenetic Regulation; RNA interference and antiviral therapeutics; Trinucleotide Repeat Expansions and Neurological Disease; and Mechanisms of Vertebrate Development. The course is open to graduate students; advanced undergraduates with permission of the instructor. Class will meet one, three hour period per week; to be arranged

BIOL 2480D. Molecular Neurogenetics.
Enrollment limited to 20. Instructor permission required

BIOL 2490A. Nuclear Hormone Receptors in Growth, Differentiation and Disease.
Key developmental and homeostatic hormones such as steroid hormones (e.g. estrogen, testosterone, glucocorticoids), and lipophilic non-steroids (e.g. retinoic acid, thyroid hormone) act through receptors that directly bind DNA and control gene expression. This course examines the activities, structures, functions, and mechanisms of action of these Nuclear Hormone Receptors and the consequences of alterations in protein or hormone
function. Approaches span genetics, biochemistry, genomics, proteomics, and developmental biology.

BIOL 2490B. To Be Determined.

BIOL 2540. Molecular Genetics. (Undergraduate students should register for BIOL 1540.)

BIOL 2640A. Viral Immunology
Viral Immunology is an advanced topics course in Microbiology and Immunology which will be focused on viral immunology. Weekly meetings will cover different issues concerning defense against viral infections and pathology related to viral infection, with focus on viral-host interactions. Topics will be selected to present either important basic concepts in the context of immune responses and/or major challenges in controlling viral infections. Recent advances in understanding virus-host interactions, host responses to viruses, cytokine regulation of immune responses or cytokine-mediated pathology during viral infections will be emphasized.

BIOL 2640B. Microbial Pathogenesis.
Examines microbial pathogens and the underlying mechanisms by which infectious organisms cause diseases. Bacterial, fungal, protozoal and viral pathogens will be studied using tools of modern biology. Also examined are the host's immune responses to infection and disease. Areas covered include mechanisms of pathogen internationalization and survival, immune responses, signal transduction and pathophysiology. Expected: BIOL 0510, 0530, or 1550.

BIOL 2640C. The Immune System.
Introduction to the experimental and theoretical foundations of immunology and the function of the mammalian immune system. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; and regulation of immune responses through cellular interactions. Application of concepts to medically significant issues (vaccines, transplantation, hypersensitivity, autoimmunity, cancer, immunodeficiency) is discussed. Interpretative analysis of experimental data is emphasized. Activities include written assignments that analyze a hypothetical immune system and a final paper addressing an immunological topic of the student's choosing. For Pfizer students only.

BIOL 2830H. Topics in Pathobiology: Biology of the Cell.
This course will cover selected topics in cell biology for consideration in depth. Topics are chosen, in part, to highlight the similarities among the behaviors of immune and tumor cells and should therefore be of broad interest. The emphasis of this course is on development of critical thinking and design of original experiments.

BIOL 2840B. Case Studies in Environmental Health and Technology.
Brown University has a cross-departmental Superfund Research Program grant funded by the National Institute of Environmental Health Sciences (NIEHS). This grant unites biomedical researchers and engineers in the joint pursuit of solutions to environmental pollution impacting human health. This special topics course provides a basic understanding of toxicology as related to human health and explores interdisciplinary approaches to environmental safety and health based on case studies related to toxic waste sites and Brown fields in Rhode Island. The target audience will be primarily graduate students and advanced undergraduates seeking to engage in an interdisciplinary approach to environmental pollution. Open to graduate students and advanced undergraduates in Biology, Environmental Studies, or Engineering. Instructor permission required.

BIOL 2840C. Cell Metabolism and Disease.
No description available.

BIOL 2840D. To Be Determined.

BIOL 2840E. Topics in Cancer Biology.
No description available.

BIOL 2840F. Pathobiological Basis of Disease: Intrinsic and Environmental Regulators.
No description available.

BIOL 2840G. Small Wonders: Science, Technology, and Human Health Impacts of Nanomaterials.
A multidisciplinary course focusing on nanomaterials as enabling components in emerging nanotechnologies. Covers major classes of nanomaterials, their synthesis, processing, and properties. The fundamental interactions of nanoscale structures with biological molecules, cells, and whole organisms will be explored. Suitable for students in engineering, physical sciences, or biology. Primarily for graduates. Undergraduate enrollment by written permission.

BIOL 2840H. Human Reproduction Biology and Toxicology.
This seminar is primarily intended for graduate students with a solid background in the life sciences and with some knowledge of human physiology. The course will review basic human female and male reproductive systems and methods in assessment of reproductive status. We will discuss assisted reproductive techniques and launch into the topics of various toxicants and their impact on reproductive development and function. Enrollment limited to 20.

BIOL 2840I. Human Health, the Environment, and Public Policy.
This course examines intersections between human health, collective action for environmental justice, and responses from public policy and professional institutions charged with protecting human and environmental health. We focus on case studies, including: uranium contamination, human health outcomes, and institutional response in the American Southwest; and outcomes in Libby, Montana, site of prolonged asbestos exposure and the nation's first declared 'public health emergency.' Throughout, we analyze the Environmental Protection Agency and Agency for Toxic Substances and Disease Registry responses. This course takes a critical sociological approach to related intersections. Organized as a seminar, students have an opportunity to shape class discussions. Expected core course background to include physiology or cell biology. Enrollment limited to 20.

BIOL 2850. Introduction to Research in Pathobiology.
Introduces incoming pathobiology graduate students with research opportunities in the laboratories of program faculty. Consists of seminars with individual faculty members in the graduate program in pathobiology. Required background reading of recent papers lead to a discussion of current research in the faculty member's laboratory. Additional discussions include safety and ethical issues in research. Open only to first-year graduate students in the program in pathobiology.

BIOL 2860. Molecular Mechanisms of Disease.
Examines research and modern techniques, emphasizing infectious disease and environmental exposures correlating histopathology with molecular pathogenesis: cell injury, inflammation, genetic disorders (including genetic research on diseases), and developmental and reproductive disorders. Expected: BIOL 1290, 2050 (other 1000-level biology course with approval). Textbook plus primary literature. Required for Pathobiology graduate students, written permission for other graduate or M.P.H. students.

BIOL 2930Z. Pharmaceutics Delivery in Biological Systems.
This course will address the historical perspectives and the science and technologies that form the basis of drug, protein and gene delivery systems. Presentations and interpretations of these advances in the lay press will also be reviewed and discussed. Therapeutic systems will be presented in the context of specific organ systems and associated pathophysiologies. Topics for discussion will include drug and gene therapies for cardiovascular disease, hormone therapies, bone and cartilage related therapies and genetically-based vaccines. The emerging areas of in utero and embryonic gene therapies will also be discussed. This course is designed for post-baccalaureate level students who are professionals in the pharmaceutical industry. Students are expected to have diverse backgrounds and varying levels of knowledge in Biology, Chemistry and Biochemistry. Previous undergraduate education in the Life Sciences that are equivalent to such courses as BIOL 0200, BIOL 0280 and CHEM 0350 are acceptable.

BIOL 2940A. Molecular Pharmacology and Physiology Seminar.
Professional development seminar required of all first year graduate students in the Molecular Pharmacology and Physiology Graduate Program, and open to graduate students in other programs. Topics include grants and funding, effective oral presentation skills, alternative careers in science, and others. All students will be required to present a research seminar during the scheduled class time. Instructor permission required for graduate students outside the Molecular Pharmacology and Physiology Graduate Program. Not intended for undergraduate students. 999999.
BIOL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

BIOL 2980. Graduate Independent Study.
Independent study projects at the graduate level. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

BIOL 2985. Graduate Seminar.
Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

BIOL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

BIOL 2995. Thesis.
Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

Public Health
Chair
Terrie T. Wetle

The Public Health program within the Division of Biology and Medicine offers graduate programs and comprehensive course work leading to the Mater of Public Health (M.P.H.); the ScM, AM, and PhD in Biostatistics; the ScM in Behavioral and Social Sciences Intervention; the ScM and PhD in Epidemiology and the PhD in Health Services Research.

The program’s unusually high faculty-to-student ratio gives students a great deal of interaction with instructors who are accessible, approachable, and encouraging of student involvement in critical projects.

For additional information regarding the above graduate programs administered through the Public Health program please visit: http://publichealth.brown.edu/graduate/prospective/

Community Health Concentration
Requirements
Community Health is an interdisciplinary concentration through which students examine a variety of issues, including population health and disease, health policy, cross-cultural and international aspects of health, the organizational and social structures through which health services are delivered and received, and the public health system. Courses in the concentration allow students to explore the ways in which the social, political, behavioral and biological sciences contribute to the understanding of patterns of population distributions of health and disease. The concentration also provides students with courses in basic research methods and statistics necessary for problem solving and critical thinking in the emerging emphasis on evidence-based health care and public health.

Required Courses:
- PHP 0310 Health Care in the United States 1
- PHP 0320 Introduction to Public Health 1
- PHP 1320 Survey Research in Health Care 1
- PHP 1910 Community Health Senior Seminar 1

Electives:
One elective from each of the following areas: 6
- Environmental Health
- U.S. Health Care Organization and Policy
- Global Health
- Social and Behavioral Science for Prevention
- Human Biology/Physiology

Master of Public Health Graduate Program
The Master of Public Health (M.P.H.) degree is designed to developing skilled professionals who are committed to improving the health of communities by translating rigorous scientific research into sound, evidence-based public health policy and practice.

For further information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-public-health

Biostatistics Graduate Program
The graduate program in Biostatistics offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The graduate programs in Biostatistics are designed to provide training in theory, methodology, and practice of statistics in biology, public health, and medical science. The program provides comprehensive training in theory and methods of biostatistics, but is highly interdisciplinary and requires students to acquire expertise in a field of application. The Ph.D. program is intended to enable graduates to pursue independent programs of research; the Sc.M. program provides training for application of advanced methodology in professional and academic settings.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-biostatics

Behavioral Social Sciences Intervention Graduate Program
The interdisciplinary Master of Science (Sc.M.) program in Behavioral and Social Sciences Intervention (BSSI) trains graduate students who are interested in analyzing the complex behavioral and social determinants of public health, and in developing interventions to change behaviors and improve social contexts related to public health.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-behavioral-and-social-sciences-intervention

Epidemiology Graduate Program
The graduate program in Epidemiology offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The graduate program in epidemiology is designed to provide methodologic and subject matter training in the study of the multiplicity of biological, behavioral, and social factors that influence the determinants of disease, its treatment, and its consequences and outcomes.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-epidemiology

Statistics
Two approved courses in the university that are health-related. 2

Total Credits 12

Honors. An Honors track is available. Honors track students are also required to enroll in both semesters of their senior year to write the honors thesis.

Note: A 5-year AB/MPH option is available, with the MPH accredited by the Council for Education on Public Health.

Inquiries: Sarah Hemond (Sarah_Hemond@brown.edu).
Health Services Research Graduate Program

The graduate program in Health Services Research offers comprehensive course work leading to a Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The program seeks to develop scientists experienced in the use of state-of-the-art experimental and non-experimental research methods to investigate how people obtain access to health care, the components and impacts of health care costs, and what happens to patients as a result of care. Health services research aims to identify the most effective ways to organize, manage, finance, and deliver high quality care to benefit population health.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-health-services-research

Courses

PHP 0030. Health of Hispaniola.
Two developing countries, Dominican Republic and Haiti, have widely differing health outcomes despite centuries of shared experience on the Caribbean Island of Hispaniola. This course will examine the history, politics, economics, culture, international relations, demography, and geography, as well as epidemiology and health services, to demonstrate that multiple factors, both recent and long-standing, determine the present health of these populations. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

PHP 0040. Addiction: The Causes, Cures and Consequences of Substance Abuse in Modern Society.
Addiction has been recognized by the psychological and medical community as a chronic, physical disease, affecting the body in ways which mirror the mechanisms of other neurological disorders. However, despite definitive research suggesting the genetic and physical roots of addiction disorders, the disease of addiction still faces significant prejudice from laws and societies seeking to place blame upon addicts themselves. Stereotypes and misconceptions that cast addicts as morally corrupt deviants lacking in will power still pervade cultural and political discourse, creating and maintaining powerful stigmas that prohibit addicts and their families from seeking care. Enrollment limited to 20 first year students. FYS WRIT

PHP 0310. Health Care in the United States.
Introduction to the health care delivery system. An overview of the U.S. health care financing, delivery and regulatory system. Considers the interaction between paying for and providing and assuring the quality of health services; changes in one component of the system inevitably affect the others. Addresses the balance between employer funded health insurance, publicly funded health insurance and the consequences of not being insured. Seven discussion sections arranged during the semester. Open to undergraduates only

PHP 0320. Introduction to Public Health.
An introductory overview of the U.S. Public Health System with an emphasis on the core functions of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. Presents a comprehensive overview of the environmental and behavior factors associated with health promotion and disease prevention

PHP 1010. Doctors and Patients- Clinical Communication in Medicine.
Communication is central to medical practice and interpersonal relationships between patients and physicians can often be powerful curative agents. This course reviews theory and research on physician-patient communication. In addition to lectures, readings, and discussions, students will have opportunities to observe physicians in clinical settings. Appropriate for students interested in communication sciences, health psychology, health education, pre-med and other clinical training, and medical anthropology. Enrollment limited to 20

PHP 1070. The Burden of Disease in Developing Countries.
Defines and critically examines environmental, epidemiologic, demographic, biomedical, and anthropological perspectives on health and disease in developing countries. Emphasis on changes in the underlying causes of morbidity and mortality during economic development. Focuses on the biosocial ecology of diseases. Guest lecturers cover different diseases and public health perspectives. Enrollment limited to 80. Instructor permission required. Special application form available at the International Health Institute website: bms.brown.edu/ih/ DVPS LILE WRIT

PHP 1100. Comparative Health Care Systems.
Focuses on principles of national health system organization and cross-national comparative analysis. Emphasizes application of comparative models to the analysis of health and health-related systems among nations at varying levels of economic development and health care reform. Addresses research questions related to population health and systems' performance. Questionnaire completion required. Enrollment limited to 30

PHP 1320. Survey Research in Health Care.
An introduction to the methodology of survey research as it is conducted by social scientists and epidemiologists. Provides an overview of all aspects of study design and instrument development as well as an introduction to statistical analysis of survey data. Prerequisite: PHP 0320. Students should fulfill the department's statistics requirement prior to taking, or concurrently with, this course

This course will focus on nutritional status and problems that influence health of low and middle income countries. It will cover both 1) undernutrition, including protein-calorie malnutrition and specific micronutrient deficiencies; and 2) overnutrition, including obesity. It will cover morbidity and mortality associated with both under- and overnutrition. Nutritional aspects of maternal and child health will be emphasized, and the association of nutritional exposures early in life and later adult health. Specific areas include nutritional status measurement, including body size and composition, dietary intake and physical activity, as well as household, community, and national, socioeconomic and political factors. Prerequisite: PHP 1070, 2120, 2150, or BIOL 0030

Problems and issues surrounding delivery of emergency medical services in U.S. Topics: cost of illness; rationing health care; living wills; malpractice and its effects; effects of alcohol and other risk behavior. Priority to community health concentrators and PLME students pursuing MPH degree. Enrollment limited to 60

PHP 1530. Case Studies in Public Health: The Role of Governments, Communities and Professions.
This course provides an integrated knowledge of the public health’s development, policy, practice and infrastructure and its relationship to medical care, social services and the environment. The matrix approach juxtaposes public health content (e.g., infectious disease) and public health tools (e.g., behavioral theory, policy/advocacy/epidemiology/quality improvement/program planning) using case studies. It aims to strengthen students’ capacity to apply a population-based viewpoint to public health practice. Prerequisite: PHP 0320. Enrollment limited to 40

PHP 1540. Alcohol Use and Misuse.
Reviews the epidemiology of alcohol use, abuse, and dependence and examines its neurobiological and behavioral underpinnings. Covers etiology including physiological, genetic, psychological and social cultural influences, and prevention, brief intervention and treatment considerations. Course background in psychology, sociology, or community health is recommended. Recommended prerequisites: PHP 0320 and PSYC 0010. Enrollment limited to 20 juniors, seniors, and graduate students

PHP 1680D. Ethical Perspectives in Environmental Health.
Introduction to ethical principles and concepts shaping emerging field of environmental ethics. Examines interfaces between policy, science, economic and social drivers attendant to ethical decision-making related to environmental issues. Environmental actions/decisions are used as case studies to identify, review and analyze ethical principles and approaches. Impact of national and international decisions are examined for their local impact. Enrollment limited to: 25

Brown University
PHP 1680H. Nutritional Problems in the Developing World. Research related to nutritional problems in the developing world including undernutrition (macronutrient and micronutrient deficiencies), the nutrition transition and emerging problems of obesity and chronic disease. A public health perspective considering nutritional issues through the lifecycle is applied. Contrasts diet and nutritional assessment at the individual and population level. Written permission required. Enrollment limited to 20.

PHP 1680L. Pathology to Power: Disability, Health and Community. This course offers a comprehensive view of health and community concerns experienced by people with disabilities. Guest speakers, site visits, and hands-on field research involving interactions with people with disabilities will facilitate the students gaining a multi-layered understanding of the issues faced by people with disabilities and their families.

PHP 1680J. The Race To Inner Space: Conflating Science, Politics, and Economics To Promote Brain Health. Provides an understanding of how funds are raised and spent for disease-targeted research; Provides hands-on experience and exposure to public and private decision-makers influencing healthcare policy related to diseases of the brain; Provides an understanding of issues, challenges, and opportunities related to neurological and psychiatric illness parity with other illnesses; Identifies lessons learned from health care research funding policy successes and failures; and, Identifies directions for future brain health policy research related to the measurement of program effectiveness and comparative effectiveness, economic benefit. Permission of primary instructor (J. Bentkover) required. Enrollment limited to 24 juniors, seniors, and graduate students.

PHP 1680K. Introduction to Conducting Clinical Research. This course is intended to help students become familiar with the design and implementation of clinical research, including ethical and logistical processes related to collecting data and interpretation of published medical literature. In addition to weekly sessions, the course requires 4-6 hours weekly in the Emergency Department at Rhode Island Hospital enrolling patients in clinical trials. As students will be directly exposed to patient and clinical care, the course is limited to 12 students for the semester. Interested students should contact the course director to be considered for enrollment (contact: tseigels@lifespan.org). Not open to first year students. Instructor permission required.

PHP 1680M. The Epidemiology of Violence and its Consequences. Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Intended as a junior/senior level course. Prerequisite: PHP 2120 or equivalent. Enrollment limited to 10.

PHP 1680N. Tobacco, Smoking, and the Evil Empire. Reviews the epidemiology of smoking and nicotine addiction and briefly examines its neurobiological and behavioral underpinnings. Covers prevention efforts and state-of-the-art treatment interventions with an emphasis on policy implications. Course background in psychology, sociology, or community health is recommended. Suggested prerequisites: PHP 0320 and CLPS 0010 (PSYC 0010). Restricted to juniors, seniors, and graduate students.

PHP 1680R. Obesity and Eating Disorders. This course examines two distinct yet overlapping health conditions, obesity and eating disorders. These are multi-factorial conditions, and material in psychology, medicine, nutrition, and exercise science, will be covered. This course will focus on addressing these conditions through primary, secondary, and tertiary prevention efforts at the individual and environmental level.

PHP 1680S. Bioethics at the Bedside. This course explores a variety of topics in biomedical ethics. Each class will begin with a vignette, short film, or speaker, followed by a short lecture. A large portion of class time will then be devoted to class discussion/debate. The course has four parts: introduction to medical ethics in which we consider what value we assign to individuals within various ethical constructs; discussion of bioethical issues at the beginning and end of life; examination of the duty of physicians; and selection of additional topics exploring ethical issues that arise from the social, economic, and cultural differences between physician and patient. Enrollment limited to 30.

PHP 1680T. Translation, Diffusion and Cultural Relevance of Health Promotion Interventions. Intended to help students become familiar with three key aspects of disease prevention/health promotion programs: (1) how findings from "basic" behavioral and social science (BSS) research are tested for effectiveness in real-life settings (translation); (2) how programs with demonstrated effectiveness, in one or more local settings, are introduced and adopted more broadly (diffusion); and (3) how cultural relevance is involved in both translation and diffusion. Translation and Diffusion will comprise the two main sections of the semester. Cultural relevance will be a theme integrated into each part of the course. Appropriate for BSSI, MPH, and advanced undergraduate students with coursework in public/community health. Open to juniors and seniors only.

PHP 1700. Current Topics in Environmental Health. This course is designed to introduce students to the field of environmental health, and demonstrate how environmental health is integrated into various aspects of our lives, both directly and indirectly. Topics to be covered include: toxic metals, vector-borne disease, food safety, water quality, radiation, pesticides, air quality, hazardous waste, risk assessment, and the role of the community in environmental health. Several topics will be presented by guest speakers so that students can learn from the expertise of professionals in the field. Enrollment limited to 40.

PHP 1740. Principles of Health Behavior and Health Promotion Interventions. Examines health behavior decision-making and elements for design of health promotion interventions. Covers theories of health behavior (focusing on primary and secondary prevention), principles of intervention design, and reading of research literature. Emphasizes psychological, social, and proximate environmental influences on individuals' health-related behaviors. Restricted to juniors, seniors, and graduate students. Prerequisite: PHP 0320 or equivalent. Enrollment limited to 25.

PHP 1910. Community Health Senior Seminar. Disparities in health and health care have been documented in the U.S. and globally. Students will develop a needs assessment relevant to health disparities at the local or global level; systematically review, synthesize, and critique a body of literature; use knowledge and tools from previous public health classes to pose a research question, and then find, create, and manipulate data to perform appropriate analysis; interpret and present study results; and learn to work collaboratively towards a specific public health research goal. Prerequisite: PHP 0310, 0320, and 1320. Open to Senior Community Health concentrators only.

PHP 1920. Social Determinants of Health. The course provides an overview of social determinants of health. Examples of topics include health effects of educational attainment, social integration, neighborhood socioeconomic characteristics, racial discrimination, gender, income inequality, childhood socioeconomic circumstances, parental neglect, and job strain. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Open to graduate students and advanced undergraduates.

PHP 1970. Independent Study. A special project may be arranged in consultation with an individual faculty sponsor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

PHP 2019. Measurement Issues in Health Care. Provides a theoretical and practical basis for measurement in health care. Introduces measurement theory, scale development, and criteria to be considered when choosing measures in clinical practice and research. Practical exercises include questionnaire development and a written research protocol for the development and validation of a new measure. Prerequisites: PHP 2120, 2130.
PHP 2020. Disability Over the Life Course. 
An overview of the epidemiology of physical and cognitive disability in America, associated patterns of medical and social service use, and current as well as "ideal" population-specific systems of formal and family care. Also explores medical, social, and psychological needs associated with the stage of life in which disability is experienced. Prerequisites for advanced undergraduates are BC 31 or SO 155, and introductory statistics

PHP 2030. Clinical Trials Methodology. 
We will examine the modern clinical trial as a methodology for evaluating interventions related to treatment, rehabilitation, prevention and diagnosis. Topics include the history and rationale for clinical trials, ethical issues, study design, protocol development, sample size considerations, quality assurance, statistical analysis, systematic reviews and meta-analysis, and reporting of results. Extensively illustrated with examples from various fields of health care research. Recommended prerequisites: introductory epidemiology and statistics. Pre-requisites: PHP 2120, and either PHP 2508, 2510, or 2520. Open to graduate students only

Emphasizes the theory of sampling and survey methods and their application to public health research. Topics include: survey design and planning; principles of sampling and survey terminology; questionnaire construction; protection of human subjects; data collection (including interviewing and data coding procedures); and application, presentation, and evaluation of results. Suggested prerequisites: PHP 2120, and PHP 2508 or 2510. Open to graduate students only

PHP 2050. Qualitative Methods in Health Research. 
Introduces qualitative approaches to data collection and analysis in health research. Methods covered include: participant observation, key-informant interviews, focus groups, innovative data collection strategies, and non-obtrusive measures. Students will use applied projects to develop skills in: qualitative data collection and management, interviewing, transcript analysis using computerized software, triangulation between qualitative and quantitative data, and report preparation for qualitative studies. Enrollment limited to 20 graduate students

PHP 2070. Public Health/Community Service Internship. 
The course is an introduction to the history, organization, resources, concepts and issues of public health and health care. Students will be matched according to their interests in a related practical experience in a health-related organization, with the expectation that they complete a project or produce a product of public health utility. This gives students an opportunity to critically apply knowledge and skills learned in didactic sessions. Instructor's permission required. S/NC

PHP 2075. MPH Analytic Internship. 
The primary objective of this course is to gain hands-on experience in using data to address public health questions. Concepts from previous courses will be re-enforced as students work through the steps of addressing a public health question. Both data analysis and data interpretation will be emphasized in the context of a public health question. STATA 9.0 will be used to analyze data. Prerequisites: PHP 2120, and either PHP 2500 or 2510. Open to graduate students in the MPH program only

Uses case study strategies to: identify key ethical principles, values, legal authorities and regulation relevant to public health practice and research; evaluate public health research designs in terms of ethical and legal principles; conduct ethical analyses of public health interventions by identifying potential ethical and legal concerns and conflicts; and employ strategies for working effectively with special populations, including the design of culturally appropriate interventions. Open to graduate students only

Addresses methodologic and operational issues associated with developing research studies in epidemiology (including clinical trials). Students prepare protocols for research studies in human populations with attention to ethical guidelines and regulations. Students critique completed proposals, are exposed to existing systems for submission and review of funding applications, as well as controversial issues such as conflict of interest. Prerequisite: PHP 2120. Enrollment limited to 10 graduate students. For Summer enrollment, students must be accepted to the Clinical and Translational Research Institute. S/NC

Epidemiology quantifies patterns and determinants of human population health, with a goal of reducing the burden of disease, injury, and disability. An intensive first course in epidemiological methods, students learn core principles of study design and data analysis through critiques of published epidemiological studies as well as hands on practice through weekly exercises and assignments. This is a graduate-level course aimed at masters and PhD students. The course is not open to first year students or sophomores but may be available for advanced undergraduates with the instructor’s permission

This course provides basic principles of human biology and its applications to public health. Examples of biology topics include the cardiovascular system, endocrine system, immune system, nervous system, genetics, cancer, cardiovascular disease, HIV/AIDS, and depression. Examples of applied topics include strengths and weaknesses of using biomarkers, accuracy and precision of biological measures, quality assurance and quality control methods for using biomarkers for public health research. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students

The overall objective of this course is to provide students with a strong foundation in epidemiologic research methods. This is the first of a two- or four-course sequence in epidemiologic methods aimed at students who expect to go on to conduct their own epidemiologic research. There will be a strong quantitative focus in this course. By the end of the foundations course, students should be sufficiently familiar with epidemiologic research methods to begin to apply these methods to their own work. Prerequisite: PHP 2507 or 2510 (either may be taken concurrently); the typical student will also have some introductory knowledge of epidemiology

PHP 2170. Injury As A Public Health Problem. 
Injury causes significant morbidity and mortality in the U.S and across the globe. However, injuries – both violent and non-violent – are eminently preventable. The overarching objective of this course is to enable students to understand the magnitude of the injury and violence problem and strategies to improve public health through injury prevention. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students

PHP 2180. Critical Epidemiology. 
This advanced graduate seminar is a critical history of epidemiologic concepts and methods, emphasizing 19th century to the present. Students build on teachings from PHP 2120 to understand and apply theoretical challenges of disease definitions and causal thinking. Weekly reading and writing assignments strengthen skills in awareness of belief systems and construction of facts within specific ideologic frameworks. Prerequisite: PHP 2120. Open to graduate students only

Reinforces the concepts and methods taught in PHP 2120, with in-depth instruction in study design, confounding, model construction, measurement error, estimation, effect modification, and causal inference. Prerequisites: PHP 2120 and 2510. Co-requisite: PHP 2511. Open to graduate students only

PHP 2210. Epidemiology of Chronic Disease. 
A survey of chronic conditions that have major disabling consequences. The focus is on epidemiologic and biologic features of these conditions and their social and biologic determinants such as smoking, poverty, occupational exposures, nutrition, and heredity. Methodological areas include classification, screening, lead time bias, time trends, etc. Seminar format. Students present reviews of selected topics. Open to graduate and advanced undergraduate students

PHP 2220A. Epidemiology of Violence and Its Consequences. 
Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and
the role of guns and substance use are examined. Prerequisite: PHP 2120 or knowledge of elementary epidemiologic methods. Enrollment limited to 10.

PHP 2220B. Nutritional Epidemiology
Although epidemiology is logically equipped to address the dietary causes of disease, the complex nature of diet has posed an unusually difficult challenge to this discipline. This course will focus on the methodological challenges that epidemiologists face in studying dietary factors as determinants of chronic diseases. Dietary assessment methods, biomarkers, and anthropometric measures will be reviewed. Substantive material and up-to-date issues will be used as examples. The course will consist of lectures and exercises to develop basic skills to allow students to have a strong grounding in this field. Open to graduate students only.

PHP 2220C. Perinatal Epidemiology
Provides an overview of topics related to reproduction, maternal and fetal outcomes of pregnancy, and longer term consequences of adverse pregnancy outcomes. Methodological issues unique to reproductive and perinatal epidemiology are discussed, as well as general epidemiologic methods that are applied to topics in reproductive and perinatal epidemiology. Students are expected to actively participate in class discussions, lead discussions related to selected topics by providing an overview of the biology, descriptive epidemiology, and known risk factors of the topic, along with a detailed critique of recently published articles on the topic. Open to graduate students only.

PHP 2220E. Topics in Environmental and Occupational Epidemiology
Introduces students to the subject matter of environmental and occupational epidemiology, focusing on the major environmental threats to health and provides the methodologic tools to evaluate and extend the evidence linking those exposures to disease through studies of populations. Key themes that are pertinent to the full spectrum of issues involve the challenge of assessing exposure to potential toxicants both in the workplace and community, isolating the effects of environmental agents from associated socioeconomic and lifestyle contributors to disease, and the application of epidemiologic evidence to environmental and occupational health policy. Open graduate students only. Prerequisite: PHP2120 or equivalent.

PHP 2220G. Methodological and Practical Issues in Global Health Research
This seminar-style course will develop critical thinking and writing about global health research among graduate students interested in population health. Reading and writing assignments are on key conceptual, methodological and practical issues. It is interdisciplinary in nature but will reflect public health and epidemiologic perspectives on measures of population health, health disparities, interactions of effects on health, and implementation research. It is suitable for graduate students in the public health sciences, health policy and public policy. Prior training in epidemiologic methods and global health, or their equivalents, are expected. Recommended prerequisite: PHP 2120. Open to graduate and medical students only.

PHP 2220H. Methodological Issues in the Epidemiology, Treatment and Prevention of HIV
The purpose of this graduate-level seminar is to use HIV as an example to introduce students to a variety of methodological issues in global chronic and infectious disease research. While we will study both the treatment and prevention of HIV in detail, emphasizing the current state of knowledge and reading, digesting and critiquing the most recent literature, this course aims to use HIV as a cutting-edge example as a means to better understand the variety and complexity of methodological issues in global infectious disease epidemiology today. Enrollment limited to 30 graduate students. Prerequisite: PHP 2120 or equivalent.

PHP 2230. Epidemiology of Infectious Diseases
From Black Death to Typhoid Mary to the more recent H1N1 pandemic, infectious disease epidemics have been recorded throughout written history. The top 5 infectious diseases cause more than 14 million deaths per year globally, accounting for roughly 25% of all deaths. This course will introduce students to the field of infectious disease epidemiology. Topics will include a history of infectious diseases, epidemiology and control of infectious diseases, analytic methods, study design, outbreak investigations, and statistical modeling. Prerequisite: PHP 2120. Instructor permission required. Enrollment limited to 15 graduate and medical students.

PHP 2240. Methods of Environmental Epidemiology
In this course, students will understand, implement, and interpret the design and analysis tools commonly used in environmental epidemiology. Topics to be discussed include cohort, time-series, case-crossover, and panel study designs, modeling of flexible dose-effect relationships, consequences of measurement error and missing data, and analyses of effects of exposures with unknown latencies. Although these methods will be presented in the context of estimating the health effects of environmental exposures, many of these methods are readily applied to other fields. Prerequisite: PHP 2200 or instructor permission. Open to graduate students only.

PHP 2250. Advanced Quantitative Methods in Epidemiologic Research
This course provides students with conceptual and quantitative tools based on counterfactual theory to make causal inference using data obtained from observational studies. Causal diagrams will be used to provide alternative definitions of and form counterfacing for common biases. Non-, semi-, and fully parametric methods for addressing these biases will be discussed. These methods include standard regression, instrumental variables, propensity scores, inverse probability weighting, and marginal structural models. Settings when such methods may not be appropriate will be emphasized. Prerequisite: PHP 2200 and 2511; or PHP 2200 and 2508 with instructor permission. Enrollment limited to 25 graduate students.

PHP 2300. Research Methods in Behavioral Science
This course provides students with fundamental principles of behavioral and social research methodology for understanding the determinants of public health problems, and for executing and testing public health interventions. We will focus on experimental methods, observational studies, and qualitative approaches. We will develop skills in understanding and interpreting data—both quantitative and qualitative. Throughout the course we will emphasize ethical, cultural, and professional issues for designing public health interventions. Prior coursework in research methodology and quantitative methods is recommended but not required. Open to graduate students and advanced undergraduates. Enrollment limited to 15.

PHP 2310. Physical Activity and Public Health
This course examines physical activity and health with an emphasis on the development of behavioral interventions to increase physical activity on health outcomes as well as differences in physical activity among subpopulations. They are introduced to behavioral theories, intervention design approaches, measurement issues, and methods that are relevant to physical activity. Through seminar discussions, a group project, and presentations, students engage with the material and gain skills in the development and evaluation of behavioral interventions. Students with an interest in behavioral interventions and physical activity will benefit from taking the course. Recommended prerequisites: PHP 1740, 2320, or 2360. Enrollment limited to 20. Open to graduate students and seniors concentrating in Community Health.

PHP 2320. Environmental and Policy Influences on the Obesity Epidemic
This course examines environmental influences on the obesity epidemic with an emphasis on the impact of the built environment and policy on physical activity. Through seminar discussions, literature reviews, policy briefs, and presentations, students will engage with the material and gain skills in the development of policy and environmental change strategies to impact physical inactivity and poor diet. Students with an interest in environmental change and policy to prevent obesity and increase physical activity will benefit from taking this course. Enrollment limited to 25.

PHP 2330. Behavioral and Social Approaches to HIV Prevention
This course examines concepts, approaches, and empirical findings from behavioral and social research aiming to prevent HIV transmission. Students will become familiar with behavioral theories, social epidemiological principles, intervention design and measurement issues, and debates within the field of HIV prevention. A particular focus of this course is on the state of empirical research and the linkages between science and HIV prevention practice/policy. Students will conduct weekly readings, engage actively in seminar discussions, and participate in small-
group presentations and research activities. Prior coursework in public health research methodology is recommended. Prerequisites: PHP 1740 and 2120. Enrollment limited to 25 graduate and medical students

PHP 2340. Behavioral and Social Science Theory for Health Promotion.
This course will help students become familiar with behavioral and social science theories commonly used for planning disease prevention/health promotion interventions. In addition to review of specific theories, topics to be discussed include: how theories are developed and tested; challenges and potential pitfalls in using theory for intervention planning; and creation of causal diagrams based on concepts from theories. Undergraduates need permission of instructor; priority will be for Community Health concentrators. Enrollment limited to 25

PHP 2350. Economics of Medical Therapies: Health Policy and Practice.
Introduces methods and applications of decision analysis, cost-effectiveness analysis, and benefit-cost analysis in public health policy and practice, including health care technology assessment, medical decision making, and health resource allocation. Examines technical features of these methods, problems associated with implementing them, and advantages and pitfalls in their application in setting public health policy. Open to juniors, seniors, and graduate students

PHP 2360. Designing and Evaluating Public Health Interventions.
Aims to develop skills in designing and evaluating public health interventions. Levels of intervention include the individual; families or small groups; organizations such as schools, worksites, health care settings; communities; social marketing and health communications; policy and environmental changes. Will identify personal and environmental factors that affect public health and discuss needs assessment, formative research, cultural sensitivity, behavior change theories, intervention mapping, process and impact/outcome evaluation and dissemination. Students will critique intervention studies and gain experience in developing a hypothetical behavior change intervention. Graduate students and AB-MPH undergraduates only. 999999

PHP 2370. Etiology of Substance Use Disorders.
This course will help students become familiar with behavioral, genetic, neurobiological, and cultural factors related to the onset and course of substance use disorders. In addition to review of specific theories, empirical evidence supporting models will be covered as will the integration of evidence across models. Priority will be given to postdoctoral fellows

PHP 2371. Psychosocial and Pharmacologic Treatment of Substance Use Disorders.
Intended to provide an overview of the history of the treatment of substance use disorders; assessment methods designed to determine progress in substance use treatment; and the current most common types of psychosocial and pharmacologic treatments for substance use. Enrollment limited to 20 graduate and medical students. Instructor permission required

This class will explore Health Communication, with a focus on behavioral and social science interventions delivered through health communication programs. The course is structured so that basic building blocks (i.e., definitions of health communication, public health context for health communications interventions, theories of health communication and health behavior change) are presented sequentially early in the semester. Students will synthesize knowledge and demonstrate their understanding of the role of health communication through a final research project. Seniors with concentration in Community Health may enroll with instructor's permission. Enrollment limited to 20 graduate and medical students

PHP 2390. Quantitative Methods for Behavioral and Social Sciences Intervention Research.
This course provides broad coverage of the quantitative methods used in behavioral intervention research ranging from descriptive data analysis to longitudinal methods. Students will learn to conduct, interpret, and write up a range of statistical procedures including basic psychometrics, t-tests and ANOVAs, correlations, and multiple regression. Students also will be introduced to more advanced techniques used for longitudinal data analysis in order to understand their common uses in behavioral intervention research. The course provides students in the Master’s program in Behavioral and Social Sciences Intervention the requisite skills to conduct analyses of behavioral data as part of their Master’s Thesis. Enrollment limited to 15 graduate students in the BSSI Master’s program and the MPH program

Reviews the development of the health care delivery, financing and regulatory control systems in the U.S. and reviews the literature on the relationship between health system structure and the services used and health outcomes that populations experience. A case-study approach is used to understand the inter-relationship between financing, delivery and regulatory components of the health system and their implication for public health by drawing on epidemiological, economic, political and sociological principals. Prerequisites: Graduate standing or PHP 0310 or PHP 0070 (not available to first year students or sophomores). Instructor permission required

PHP 2410E. Medicare: A Data Based Policy Examination.
This course will explore the role of Medicare as America’s health insurer for the elderly and disabled through the use of real Medicare insurance claims data, examining how Medicare policy changes in financing and regulation have affected the delivery and receipt of medical services. At the end of the course students will: 1) know the history of important Medicare policy changes; 2) be able to construct aggregated patient case mix acuity adjusted measures of provider quality using insurance claims data; 3) be able to conduct policy analyses using Medicare claims data that are sensitive to standardized coding schemes. Enrollment limited to 15 graduate students. Prerequisite: PHP 2120, 2508, or 2510. Instructor permission required

Students will learn an overview of evaluation methodologies using both primary data collection and administrative data. Evaluation methods will be taught in the context of published studies and guest speakers’ work covering a broad range of public health interest areas. Students will develop a proposal to evaluate a public health program that is ongoing or in the planning stage at the Rhode Island Department of Health or other public health-related human service agency. The proposed evaluation will be designed to balance scientific rigor with cost efficiency and viability

PHP 2430. Analysis of Population Based Datasets.
Epidemiologic, health services, and social research often conducts “secondary analysis” of existing population-based datasets. Benefits include their representative sampling frames allowing generalizability to larger populations, timeliness, and lower cost. In addition, computer technology makes it possible to link some databases providing richer sources of information. There are several technical and methodological concerns when conducting “secondary analysis.” Students will download, link, and analyze several data sets to understand the advantages of these data for health policy analysis as well as understand and apply different analytic methods. Familiarity with statistical analysis software is required. Prerequisites: PHP 2120, and either PHP 2508 (may be taken concurrently) or 2510. Open to graduate and medical students only

PHP 2440. Introduction to Pharmacoepidemiology.
The course will focus on substantive topics in pharmacoepidemiology, including relevant principles of pharmacology, inference from spontaneous case reports, study design considerations, premarketing pharmacoepidemiology, common data sources for pharmacoepidemiologic studies, drug utilization review, adherence, and the development, implementation, and assessment of therapeutic risk management policies. The course will also focus on issues in pharmacovigilance, including the legal and historical basis of pharmacovigilance, evaluation of individual adverse drug events, signal detection, active safety surveillance, and medication errors. A clinical background is not required. Prerequisites are PHP2120 and PHP2510 (or PHP2507) or permission of the instructor

PHP 2450. Measuring and Improving the Quality of Health Care.
The quality of health care in the United States is in urgent need of improvement. This course will focus on the science of measuring and improving the quality of health care. Topics will include quality assessment, patient safety, medical errors, public reporting, financial incentives, organizational change, and health care disparities. Students
will engage in a team-based quality improvement project. Open to graduate and medical students only.

**PHP 2451. Exchange Scholar Program.**

**PHP 2460. Research Methods in Clinical, Translational and Health Services Research.**

This course will take an applied approach to understanding research methods used in health research. Students will explore concepts, gain knowledge and develop skills in the following areas: 1. Developing and refining research questions; 2. Designing research projects and appropriately implementing research methodologies; 3. Understanding the strengths and weaknesses of different study designs in addressing specific research questions, including an understanding of threats to validity; 4. Identifying Data Sources, including primary and secondary sources; 5. Understanding research ethics, including IRB processes and HIPPA regulations. Students must be accepted to the Clinical and Translational Research Summer Institute to enroll.

**PHP 2470. Topics in Clinical, Translational and Health Services Research.**

Through a combination of mini-courses and seminars, students will explore concepts, gain knowledge and develop skills in a variety of public health areas. To receive a half credit for this course, students will be required to successfully complete 70 units. Must be pre-determined by the course instructor and the unit instructor. Units are generally based on the number of in-person contact hours and the number of outside of class/homeowrk hours required for a mini-course or seminar. Students must receive special permission from the instructor or be accepted to the Clinical and Translational Research Summer Institute to enroll.

**PHP 2500. Introduction to Biostatistics.**

The first in a two-course series designed for students who seek to develop skills in biostatistical reasoning and data analysis. Offers an introduction to basic concepts and methods of statistics as applied to diverse problems in the health sciences. Methods for exploring and presenting data; direct and indirect standardization; probability; hypothesis testing; interval estimation; inference for means and proportions; simple linear regression, etc. Statistical computing is fully integrated into the course. Not open to freshmen or sophomores.

**PHP 2501. Introduction to Multivariate Regression.**

The first in a series of two-half semester courses on regression methods, designed for students who seek to develop biostatistical reasoning and data analysis skills. This course provides an introduction to multiple linear and logistic regression models as applied to diverse problems in the health sciences. PHP 2500 or equivalent is a prerequisite.

**PHP 2502. Regression Analysis Discrete and Event Time Data.**

The second course in the sequence on Introductory Biostatistics methods. This course will focus on regression methods (multiple linear regress, ANOVA, ANCOVA) and their natural extensions such as Logistic and Poisson regression in applications to diverse problems in the health sciences. Additionally, this course will cover regression methods for time to event data such as Cox regression for survival data. PHP 2500 or equivalent is a prerequisite.

**PHP 2507. Biostatistics and Applied Data Analysis I.**

The objective of the year long, two-course sequence is for students to develop the knowledge, skills and perspectives necessary to analyze data in order to answer a public health questions. The year long sequence will focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, data analysis, data interpretation and the presentation of results. Through lectures, labs and small group discussions, this fall semester course will focus on identifying public health data sets, refining research questions, univariate and bivariate analyses and presentation of initial results. Prerequisite: understanding of basic math concepts and terms; basic functional knowledge of Stata. Enrollment limited to 50 MPH, CTR, and BSSI students. Instructor permission required.

**PHP 2508. BioStatistics and Data Analysis II.**

Biostatistics and Applied Data Analysis II is the second course in a year-long, two-course sequence designed to develop the skills and knowledge to use data to address public health questions. The courses are specifically for students in the Brown MPH program, and the training programs in Clinical and Translational Research. The sequence is completed in one academic year, not split across two years. The courses focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: acquisition, analysis, interpretation and presentation of results. Prerequisite: PHP 2507. Enrollment limited to 48. Instructor permission required.

**PHP 2510. Principles of Biostatistics and Data Analysis.**

Intensive first course in biostatistical methodology, focusing on problems arising in public health, life sciences, and biomedical disciplines. Summarizing and representing data; basic probability; fundamentals of inference; hypothesis testing; likelihood methods. Inference for means and proportions; linear regression and analysis of variance; basics of experimental design; nonparametrics; logistic regression. Open to advanced undergraduates with permission from the instructor.

**PHP 2511. Applied Regression Analysis.**

Applied multivariate statistics, presenting a unified treatment of modern regression models for discrete and continuous data. Topics include multiple linear and nonlinear regression for continuous response data, analysis of variance and covariance, logistic regression, Poisson regression, and Cox regression. Prerequisite: APMA 1650 or PHP 2510. Open to advanced undergraduates with permission from the instructor.

**PHP 2520. Statistical Inference I.**

First of two courses that provide a comprehensive introduction to the theory of modern statistical inference. PHP 2520 presents a survey of fundamental ideas and methods, including sufficiency, likelihood based inference, hypothesis testing, asymptotic theory, and Bayesian inference. Measure theory not required. Open to advanced undergraduates with permission from the instructor.

**PHP 2530. Bayesian Statistical Methods.**

Surveys the state of the art in Bayesian methods and their applications. Discussion of the fundamentals followed by more advanced topics including hierarchical models, Markov Chain Monte Carlo, and other methods for sampling from the posterior distribution, robustness, and sensitivity analysis, and approaches to model selection and diagnostics. Features nontrivial applications of Bayesian methods from diverse scientific fields, with emphasis on biomedical research. Prerequisites: APMA 1650, PHP 2510, PHP 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

**PHP 2540. Advanced Methods for Multivariate Analysis.**

Survey of modern statistical methods for analysis of multivariate and high-dimensional data. Topics include inference for multivariate normally distributed data, methods for data reduction, classification and clustering, multiple comparisons for high-dimensional data, analysis of multidimensional contingency tables, and functional data analysis. Applications to diverse areas of scientific research, such as genomics, biomarker evaluation, and neuroscience will be featured. Prerequisites: APMA 1650 and 1660; or PHP 2520. Open to advanced undergraduates with permission from the instructor.

**PHP 2580. Statistical Inference II.**

This sequence of two courses provides a comprehensive introduction to the theory of modern inference. PHP 2580 covers such topics as non-parametric statistics, quasi-likelihood, resampling techniques, statistical learning, and methods for high-dimensional Bioinformatics data. Prerequisite: PHP 2520. Open to advanced undergraduates with permission from the instructor.

**PHP 2601. Linear and Generalized Linear Models.**

Generalized linear models provide a unifying framework for regression. Important examples include linear regression, log-linear models, and logistic regression. GLMs for continuous, binary, ordinal, nominal, and count data. Topics include model parameterization, parametric and semiparametric estimation, and model diagnostics. Methods for incomplete data are introduced. Computing with modern software is emphasized. Prerequisites: APMA 1650 or PHP 2520. Open to advanced undergraduates with permission from the instructor.

**PHP 2602. Analysis of Lifetime Data.**

Comprehensive overview of methods for inference from censored event time data, with emphasis on nonparametric and semiparametric approaches. Topics include nonparametric hazard estimation, semiparametric proportional hazards models, frailty models, multiple event processes, with application to biomedical and public health data.
Computational approaches using statistical software are emphasized. Prerequisites: PHP 2510 and 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

**PHP 2603. Analysis of Longitudinal Data.**
Comprehensive coverage of methods for drawing inference from longitudinal observations. Theoretical and practical aspects of modeling, with emphasis on regression methods. Topics include: multilevel and marginal models; estimation methods; study design; handling dropout and nonresponse; methods for observational data (e.g. time-dependent confounding, endogeneity, selection bias). SAS and S-Plus software are used. Prerequisite: Statistical inference (APMA 1650-1660 at minimum), regression (PHP 2511), working knowledge of matrix algebra (e.g. MATH 0520). Open to advanced undergraduates with permission from the instructor.

**PHP 2604. Statistical Methods for Spatial Data.**
An overview of statistical methodology for analyzing spatially-referenced data, including social network data. Statistical inference methods of modeling, estimation, testing and prediction will be covered. Classical and Bayesian hierarchical approaches to inference will be introduced. Lectures and assignments will blend relevant theory and applications, with emphasis on applications from public health and the social sciences. Prerequisites: APMA 1650-1660 or PHP 2510-2511, MATH 0520, some experience with scientific computing.

**PHP 2610. Causal Inference and Missing Data.**
Systematic overview of modern statistical methods for handling incomplete data and for drawing causal inferences from "broken experiments" and observational studies. Topics include modeling approaches, propensity score adjustment, instrumental variables, inverse weighting methods and sensitivity analysis. Case studies used throughout to illustrate ideas and concepts. Prerequisite: MATH 1610 or PHP 2511. Open to advanced undergraduates with permission from the instructor.

**PHP 2620. Statistical Methods in Bioinformatics, I.**
Introduction to statistical concepts and methods used in selected areas of bioinformatics. Organized in three modules, covering statistical methodology for: (a) analysis of microarray data, with emphasis on application in gene expression experiments, (b) proteomics studies, (c) analysis of biological sequences. Brief review and succinct discussion of biological subject matter will be provided for each area. Available software will be introduced. Intro level statistics (PHP 2507/2508 or PHP 2510/2511) recommended. Other students should contact instructor. Intro to software R and Bioconductor tools provided in lab. Open to advanced undergraduates with permission from the instructor.

**PHP 2680. Research Methods in Biostatistics.**
This course is designed to cover essential elements of preparing for a career in research in biostatistics. The course will cover: methods of statistical research, with a focus on problem solving in real applications; key elements of communicating research, including writing for academic publication, writing and collaborating on grant proposals, and preparing and delivering oral presentations; and professional and research ethics, with emphasis on ethics of statistical practice in multidisciplinary collaborations. Enrollment limited to 15 graduate students in Biostatistics. Students must be in research phase of program of study.

**PHP 2690A. Advanced Topics in Biostatistics.**
Seminars and topics course on advanced methods or applications of biostatistics, or new and innovative research. Pre-requisites: Typically intended for advanced PhD students in biostatistics, public health, and fields where advanced methods are directly applicable. Prerequisites will typically include PHP 2130 and 2160 at minimum.

**PHP 2690B. Introduction to Bayesian Inference: Hierarchical Models and Spatial Analysis.**
Intended as a first introduction to Bayesian inference. Relevant theoretical background will be reviewed, and the Bayesian paradigm will be introduced, including choice of prior distributions and calculation of posterior distributions. Main emphasis will be on how to use Bayesian thinking to develop models for data with complex structure. Hierarchical models, meta-analysis, Bayesian design and shrinkage estimation will be covered. The benefits of hierarchical modeling will be applied to spatial data analysis as a special topic. Students will be introduced to Bayesian computing and WinBUGS, which is a necessary skill for many modern analyses. Prerequisites: PHP 2510 and 2511, or equivalent. Additional exposure to statistical inference, statistical computing, and a course in calculus would be useful. Open to graduate students only.

**PHP 2950. Doctoral Seminar in Public Health.**
The purpose of this seminar is to facilitate discussions of current scientific literature in epidemiology, biostatistics, health services, and public health in general. The main goal is to expose students to current methodological issues and controversies in epidemiology, biostatistics, health services, and public health, in an effort to integrate knowledge across disciplines. This seminar is by instructor permission only and is only open to doctoral students in Epidemiology, Biostatistics and Health Services Research.

**PHP 2980. Graduate Independent Study and Thesis Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2985. MPH Independent Study for Thesis Preparation and Research.**
This optional half credit course may be taken up to two times during preparation for the MPH degree. It provides MPH students with self-directed thesis research and preparation time under the guidance of a thesis advisor. Prior to taking this course the student and advisor must reach agreement as to what constitutes satisfactory completion of the course (e.g., completion of a satisfactory literature review, attainment of specific thesis benchmarks, or completion of the thesis). Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2990. Thesis Preparation.**
No description available

**PHL XLIST. Courses of Interest to Concentrators in Community Health.**

**Neuroscience**

**Chair**
Barry William Connors

Neuroscience encompasses those fields of knowledge important to an understanding of the function of the nervous system, particularly the brain. It brings together neurobiology (anatomy, physiology, biochemistry, molecular biology, genetics) with elements of psychology and cognitive science, as well as mathematical and physical principles involved in modeling neural systems.

The Department of Neuroscience offers an undergraduate concentration leading to the Sc.B. degree and a graduate program leading to the Ph.D. degree. In addition to the courses offered by the department, these programs include courses taught in several allied departments. The Department of Neuroscience has modern facilities for conducting research in a broad range of areas from molecular mechanisms to animal behavior and undergraduate students are encouraged to pursue research projects.

For additional information, please visit: [http://neuroscience.brown.edu/](http://neuroscience.brown.edu/)

**Neuroscience Concentration Requirements**

Neuroscience is an interdisciplinary field that seeks to understand the functions and diseases of the nervous system. It draws on knowledge from neurobiology as well as elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. Through the Neuroscience concentration, students develop foundational knowledge through courses in biology, chemistry, and mathematics as well as three core courses in neuroscience. They are also required to develop facility with research methodologies (through courses in statistics and laboratory methods) before moving into specific topics in the field (e.g., visual physiology, neurochemistry and behavior, and synaptic transmission and plasticity). Members of the Neuroscience faculty are affiliated with the Brown Institute for Brain Science, a multi-disciplinary program that promotes collaborative research about the brain. Prospective
concentrators should contact Heather_Shalvey@brown.edu in order to have a faculty advisor assigned to them.

Standard program for the Sc.B. degree

The concentration combines a general science background with a number of specific courses devoted to the cellular, molecular, and integrative functions of the nervous system. The concentration allows considerable flexibility for students to tailor a program to their individual interests. Elective courses focus on a variety of areas including molecular mechanisms, cellular function, sensory and motor systems, neuropharmacology, learning and memory, animal behavior, cognitive function, bioengineering, theoretical neuroscience and computer modeling.

The concentration in neuroscience leads to an Sc.B. degree. The following background courses, or their equivalent, are required for the degree:

Neuroscience Graduate Program

The graduate program in Neuroscience offers graduate study leading to the Doctor of Philosophy (Ph.D) degree. The program is designed to educate and train scientists who will become leaders in the field and contribute to society through research and teaching. The core of the training involves close interaction with faculty to develop expertise in biological, behavioral, and theoretical aspects of neuroscience. Graduate research and training are carried out in the laboratories of the program’s faculty. These faculty lead outstanding well-funded research programs that use cutting edge technology to explore the brain.

For more information on admission and program requirements, please visit: http://www.brown.edu/academics/gradschool/programs/biomed-neuroscience

Courses

NEUR 0010. The Brain: An Introduction to Neuroscience

Introduction to the mammalian nervous system with emphasis on the structure and function of the human brain. Topics include the function of nerve cells, sensory systems, control of movement and speech, learning and memory, emotion, and diseases of the brain. No prerequisites, but knowledge of biology and chemistry at the high school level is assumed

NEUR 0050. Biology of Hearing

Examines the sensory and perceptual system for hearing; the external, middle, and inner ears; the active processes of the cochlea; sound transduction and neural coding; neural information processing by the auditory system; and the nature of auditory perception and its biological substrate. Prerequisite: an introductory course in Neuroscience, Cognitive Science, Physics, Engineering or Psychology

NEUR 0700. Psychoactive Drugs and Society

Will examine psychoactive drugs from two perspectives: (1) biological mechanisms of drug action and (2) the impact of psychoactive drug use on society and society attitudes towards psychoactive drug usage. Drugs to be discussed will include alcohol, opiates, cocaine, marijuana, LSD, nicotine and caffeine, as well as drugs used therapeutically to treat psychiatric disorders. This course will benefit students who are interested in exploring both the biological and social aspects of psychoactive drug use. Prerequisite: NEUR 0010 or equivalent

NEUR 1020. Principles of Neurobiology

A lecture course covering fundamental concepts of cellular and molecular neurobiology. Topics include structure of ion channels, synaptic transmission, synaptic development, molecular mechanisms of synaptic plasticity, learning and memory and neurological diseases. Prerequisite: NEUR 0010. Strongly recommended: BIOL 0200 or equivalent

NEUR 1030. Neural Systems

This lecture course examines key principles that underlie the function of neural systems ranging in complexity from peripheral receptors to central mechanisms of behavioral control. Prerequisite: NEUR 0010 or the equivalent. First year students require instructor approval

NEUR 1040. Developmental Neurobiology

Explores the fundamental mechanisms underlying neural development. Topics include patterning of the nervous system, birth and death of neurons, axon guidance, and the formation, maintenance, and plasticity of synaptic connections. Emphasizes the cellular, molecular, and genetic basis of these events and how these basic processes interact with experience to shape the brain. Illustrations are drawn from systems ranging from worms to humans. Requirements: NEUR 1020 and BIOL 0200, or written permission

NEUR 1540. Neurobiology of Learning and Memory

Exploration of learning and memory from the molecular to the behavioral level. Topics will include declarative and procedural memory formation and storage, associative and non-associative learning, cellular and molecular mechanisms for learning, and disorders affecting learning and memory. Examples will be drawn from numerous brain areas and a variety of model systems, including humans. Students will gain experience interpreting experiments from primary literature. Prerequisite: NEUR 1020

NEUR 1600. Experimental Neurobiology

Intensive laboratory experience in neuroscience appropriate for students with basic background in Neurobiology. Learn and employ the classical neurophysiological techniques of extracellular recording, intracellular recording and receptive field mapping using a variety of animal species. Examples will include recordings of sensory signals in the cochroach leg; frog sciatic nerve and sciatic nerve/muscle preparation; intracellular recording of neurons in Aplysia; receptive field mapping in frog skin; and visual field mapping in the frog tectum. Labs are supplemented by informal lectures. Prerequisites: NEUR 0010, 1020, and PHYS 0030; or equivalent. Instructor permission required; enrollment limited to 18. Sign up sheet in Sidney Frank Hall, Room 315, beginning November 6, 2012

NEUR 1650. Structure of the Nervous System

Combined lecture and laboratory course on the anatomy of the central nervous system. Lectures survey the circuitry of the major neural systems for sensation, movement, cognition, and emotion. Laboratory exercises (Mon. 10:30-12:30) include brain dissections, microscopy of neural tissue, and discussion of clinical cases. Prerequisites: NEUR 0010, 1020, and PHYS 0030; or equivalent. Instructor permission required

NEUR 1660. Neural Basis of Cognition

Lecture course. Emphasizes the systems approach to neuroscience and examines several neural systems that mediate perception, action, higher visual and motor processing, learning, memory, attention, emotion, consciousness and sleep. The course focuses on experiments involving behavioral electrophysiology and discusses mechanisms mediating neural activity that mediates cognition. Prerequisites: NEUR 0010 and NEUR 1030, or instructor permission

NEUR 1670. Neuropharmacology and Synaptic Transmission

Synaptic transmission will be studied from a biochemical and pharmacological point of view. We will explore the factors regulating neurotransmitter synthesis, storage, release, receptor interaction, and
A lecture and computing lab course providing an introduction to quantitative analysis of neural activity and encoding, as well as modeling of neurons and neural systems. Emphasizes Matlab-based computer simulation. Prerequisites: NEUR 0010, 1020 or 1030; APMA 0410 or 1650, or equivalent. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 6, 2012. Instructor permission required

NEUR 1740. The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders.

The goals of this course are to illustrate what basic science can teach us about neurological disorders and how these pathologies illuminate the functioning of the normal nervous system. Consideration will be given to monogenic diseases (e.g. Fragile X Syndrome, Duchenne Muscular Dystrophy and Tuberous Sclerosis) as well as genetically complex disorders, such as Autism, Schizophrenia and Alzheimer’s Disease. Emphasis will be on the cellular and molecular basis of these disorders and how insights at these levels might lead to the development of therapies. Prerequisites: NEUR 1020. BIOL 0470 suggested

This critical reading course will investigate the behavioral and neural mechanisms of motor learning. Readings will focus on work done with neuroimaging, neural recording and neuropsychological approaches that have addressed how the brain organizes and controls different forms of motor learning including simple conditional, practice-related changes and sensory-motor associations. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent

NEUR 1930B. From Neurophysiology to Perception.

This seminar will use readings from the research literature to explore the neural basis of perception. There will be an emphasis on vision, though other sensory modalities may be discussed. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent

NEUR 1930D. Cells and Circuits of the Nervous System.

Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Appropriate for graduates and undergraduates with strong neuroscience background. Offered alternate years. Previously offered as BN 215

NEUR 1930E. Great Controversies in Neurobiology.

This upper-level course examines some of the great controversies in the history of neurobiology. Reading material is drawn primarily from the primary scientific literature, so students are expected to already be familiar with reading scientific papers. Each theme will focus on a particular controversy, examining experimental evidence supporting both sides of the issue. Prerequisites: NEUR 0010 and NEUR 1020. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 17, 2012. Instructor permission required

NEUR 1930F. Brain Interfaces for Humans.

Seminar course will cover developing and existing neurotechnology to restore lost human neurological functions. It will cover stimulation technologies to restore hearing, vision and touch, recording technologies to return function for persons with paralysis. The course will also cover devices to modulate brain function (e.g. deep brain stimulators). We will discuss early brain technologies, the present state neural sensors technologies to restore hearing, vision and touch, recording technologies. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030; 1 year of physics, calculus. Enrollment restricted to 20 Neuroscience Concentrators and Graduate Students. Sign-up sheet in Sidney Frank Hall, room 315 beginning April 20, 2010

NEUR 1930G. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.

The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructors permission required. Enrollment limited to 15. Sign-up Sheet in Sidney Frank Hall 318 beginning April 21, 2011

NEUR 1930M. Neural Dynamics.

What is Neural Dynamics? The ability of the same brain system (e.g., a neuron, cortical column, striosome or cortic- striatal loop) to demonstrate substantial differences in its range of operations (e.g., changes in response gain) and/or perform multiple computations (e.g., detection or discrimination, motor control or sequence learning). The term ‘dynamics’ in this context indicates that this brain system can shift between these computational modes or ranges of operation on a millisecond to seconds time scale. Prerequisite: NEUR 0010. Enrollment limited to 15

NEUR 1940B. Neuroethology.

Neuroethology is concerned with the neural systems serving such naturally occurring behaviors as orientation in the environment, finding food, predator detection, social communication, circadian and seasonal rhythms, and locomotion and tracking. This seminar will examine selected examples of the neuroethological approach to analysis of brain function, which sometime leads to conclusions different from those of laboratory-based experiments on traditional animal models. Sign-up sheet in Sidney Frank Hall, room 315 beginning November 6, 2012. Instructor permission required

NEUR 1940C. Topics in Visual Physiology.

Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Appropriate for graduate students and undergraduates with a strong neuroscience background. Offered in alternate years. (Previously offered as BN 212.)

NEUR 1940D. Higher Cortical Function.

This reading course examines a series of high-level neurocognitive deficits from the perspectives of popular science and basic neuroscience. Prerequisite: NEUR 1030. Instructor permission required. Sign-up sheet in Sidney Frank Hall, Room 318 beginning November 4th

NEUR 1940E. Molecular Neurobiology: Genes, Circuits and Behavior.

In this seminar course, we will discuss primary research articles, both recent and classical, covering topics ranging from the generation of neuronal diversity to the control of behavior by specific neural circuits. Instructor permission required; enrollment limited to 15. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 2, 2010

NEUR 1940G. Drugs and the Brain.

This is a seminar course devoted to the reading and analyzing of original research articles dealing with the interaction between drugs and the brain. This will include drugs used to analyze normal brain function, as well as drugs of abuse and drugs used for therapeutic purposes. This course is intended for undergraduate and graduate students with a strong background in neuropharmacology. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required

NEUR 1940I. Neural Correlates of Consciousness.

This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up sheet in Sidney Frank hall, Room 315 beginning November 1, 2011. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required

Laboratory-oriented research in neuroscience, supervised by staff members. A student, under the guidance of a neuroscience faculty member, proposes a topic for research, develops the procedures for its investigation, and writes a report of the results of his or her study. Independent study may replace only one required course in the neuroscience concentration. Prerequisites include NEUR 0010, 1020 and 1030. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Permission must be obtained from the Neuroscience Department
NEUR 2010. Graduate Proseminar in Neuroscience.
A study of selected topics in experimental and theoretical neuroscience. Presented by neuroscience faculty, students, and outside speakers. A required course for all students in the neuroscience graduate program.

See Graduate Pro-Seminar In Neuroscience (NEUR 2010) for course description.

NEUR 2030. Advanced Molecular and Cellular Neurobiology I.
Focuses on molecular and cellular approaches used to study the CNS at the level of single molecules, individual cells and single synapses by concentrating on fundamental mechanisms of CNS information transfer, integration, and storage. Topics include biophysics of single channels, neuronal transmission and synaptic function. Enrollment limited to graduate students

NEUR 2040. Advanced Molecular and Cellular Neurobiology II.
This course continues the investigation of molecular and cellular approaches used to study the CNS from the level of individual genes to the control of behavior. Topics include patterning of the nervous system, generation of neuronal diversity, axonal guidance, synapse formation, the control of behavior by specific neural circuits and neurodegenerative diseases. Enrollment is limited to graduate students.

Focuses on systems approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major sensory, regulatory, and motor systems. Enrollment limited to graduate students.

NEUR 2060. Advanced Cognitive Neuroscience.
Focuses on cognitive approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major cognitive systems, including perception, decisions, learning and memory, emotion and reward, language, and higher cortical function. Instructor permission required.

NEUR 2120. Topics in Visual Physiology.
Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Primarily for graduate students with a strong background in neuroscience and a working knowledge of the anatomy and physiology of the mammalian visual system. Offered in alternate years. Instructor permission required.

NEUR 2150. Cells and Circuits of the Nervous System.
Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Primarily for graduate students with a background in basic neurobiology, or undergraduates with permission. Offered alternate years.

NEUR 2160. Neurochemistry and Behavior.
Examines behavior from a neurochemical perspective via readings and discussions based on original research articles. Intended primarily for graduate students with a strong background in neurochemistry and neuropharmacology and advanced undergraduates with an appropriate background. Offered alternate years. Sign-up sheet in Sidney Frank Hall, Room 315 beginning November 6, 2012.

NEUR 2930C. Historical Foundations of the Neurosciences.
Two year sequence starting Fall 2010; students register for one year at a time. The first year (2010-2011) will examine the history of basic neuroscientific concepts from the late Greeks (Galen) to the later 19th century, up to Cajal (neuron doctrine) and Sherrington (reflexes and integration). Since the seminar meets only monthly, it must be taken in the Fall and Spring semesters to receive a semester’s credit. For credit, a substantial paper (approximately 15 pages) is required at the end of the Spring semester. Primarily for graduate students in neuroscience, cognitive science, and psychology. Others may be admitted after discussion with the instructor. Auditors are welcome if they share in the rotating duty of presenting seminars. Sign-up sheet in Sidney Frank Hall, Room 315 beginning April 20, 2010.

NEUR 2930E. Bench to Bedside: Unraveling Diseases of the Nervous System.
Enrollment restricted to graduate students.

NEUR 2930F. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.
The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructor permission required. Enrollment limited to 15 Graduate students. Sign-up sheet in Sidney Frank Hall 318 beginning April 22nd.

NEUR 2940A. Advanced Molecular Neurobiology.
No description available.

NEUR 2940G. Historical Foundations of the Neurosciences II.
Continuation of a two year sequence focusing on the conceptual foundations in the history of neuroscience, from the late nineteenth century to the present. Primarily for graduate students in neuroscience, cognitive science, and psychology, but senior undergraduates may be admitted with written permission from the instructor. Seminar meets monthly, and must be taken for the full year to receive one semester credit.

NEUR 2940H. Ethics and Skills Workshop.
The ethics and skills workshops will be lead by faculty trainers in the Neuroscience Graduate Program. We will cover the following or similar topics over a two year period: Plagiarism, scientific accuracy, data ownership, expectations of advisory committees and mentors, authorship disagreements, and conflicts among lab members. Enrollment restricted to graduate students.

NEUR 2940L. Neural Correlates of Consciousness.
Will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead the discussions. Primarily for graduate students. Senior undergraduates neuroscience concentrators and others may be admitted after discussion with the instructor. Instructor permission required. S/NC.

NEUR 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

NEUR 2980. Graduate Independent Study.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC.

NEUR 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
The School of Engineering

Dean

Lawrence E. Larson

Brown University’s School of Engineering educates future leaders in the fundamentals of engineering in an environment of world-class research. We stress an interdisciplinary approach and a broad understanding of underlying global issues. Collaborations across the campus and beyond strengthen our development of technological advances that address challenges of vital importance to us all.

Along with our associations with the other scholarly disciplines – biology, medicine, physics, chemistry, computer science, the humanities and the social sciences – our co-operations bring unique solutions to challenging problems. The School focuses on unique and innovative clustering of faculty; in terms of research groups, engineers of all types team together with non-engineers to tackle some of the biggest problems facing engineering and science today. Our talents and expertise lie in the interdisciplinary domain where the seemingly diverse disciplines converge.

The School of Engineering offers courses and programs leading to the Bachelor of Science (Sc.B) degree. For example, the following courses are all engineering courses can be used to satisfy the engineering course requirement for the A.B. degree. For additional information please visit the department’s website at: http://www.engin.brown.edu/undergrad/guide/index.html.

The Master of Science in Innovation Management and Entrepreneurship program offers one standard A.B. program and six ABET-accredited Sc.B. degree programs: biomedical and chemical, civil, computer, electrical, materials, and mechanical engineering. In addition, one interdisciplinary degree program, engineering and physics, is offered. These programs are described in detail in the booklet, Engineering Undergraduate Programs (available online at http://www.engin.brown.edu/undergrad/guide/index.html).

Students without one year of secondary school level preparation in mathematics should take MATH 0990, MATH 0100 in their first year. These students need to be familiar with multivariable calculus for ENGN 0510, which is often taken during the first semester of the sophomore year. Such students are urged to acquire the necessary math background through self-study, by taking a summer course, or by deferring ENGN 0510 until additional mathematics has been taken. In addition, all students must successfully complete a minimum of four courses in the humanities and/or social sciences. See the entry under ‘Biomedical Engineering’ and computer engineering for course requirements for these degree programs.

The program of each student must be approved by the Engineering Concentration Committee, which issues more detailed guidelines and program suggestions.

Standard programs for the Sc.B. degree

Standard programs for the Sc.B. degree include seven ABET-accredited degree programs: biomedical engineering, a stand-alone interdisciplinary concentration; and six different tracks in Engineering: chemical and biochemical, civil, computer, electrical, materials, and mechanical engineering. In addition, one interdisciplinary degree program, engineering and physics, is offered. These programs are described in detail in the booklet, Engineering Undergraduate Programs (available online at http://www.engin.brown.edu/undergrad/guide/index.html).

Students without one year of secondary school level preparation in mathematics should take MATH 0990, MATH 0100 in their first year. These students need to be familiar with multivariable calculus for ENGN 0510, which is often taken during the first semester of the sophomore year. Such students are urged to acquire the necessary math background through self-study, by taking a summer course, or by deferring ENGN 0510 until additional mathematics has been taken. In addition, all students must successfully complete a minimum of four courses in the humanities and/or social sciences. See the entry under ‘Biomedical Engineering’ and computer engineering for course requirements for these degree programs.

The program of each student must be approved by the Engineering Concentration Committee, which issues more detailed guidelines and program suggestions.

Chemical and Biochemical Track:

1. Core Courses:

</table>

One additional elective Chemistry course with a significant laboratory component 1

3. One approved, upper-level elective course in the natural sciences, to be selected from the four specific areas of chemistry, physics, life sciences, and materials science. 2

Total Credits: 21

1 For example: CHEM 0360, CHEM 0400, CHEM 0500, CHEM 1170, etc.

2 For suggestions of acceptable courses, see the Concentration Advisor.
ENGN 0810 Fluid Mechanics 1
CHEM 0330 Equilibrium, Rate, and Structure 1
MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
MATH 0200 Intermediate Calculus (Physics/Engineering) 1
APMA 0330 Methods of Applied Mathematics I, II 1
APMA 0340 Methods of Applied Mathematics I, II 1
CSCI 0040 Introduction to Scientific Computing and Problem Solving 1

2. An advanced sciences course 1

3. Seven additional courses (six credits), depending on the area of interest:

3 a. For students interested in Structures, the following courses are required:
ENGN 1300 Structural Analysis
ENGN 1340 Water Supply and Wastewater Treatment
ENGN 1360 Soil Mechanics and Principles of Foundation Engineering
ENGN 1380 Design of Civil Engineering Structures
ENGN 1930C Civil Engineering Project
ENGN 1930D Civil Engineering Project

Plus one additional course from the following:
ENGN 1370 Advanced Engineering Mechanics
ENGN 1740 Computer Aided Visualization and Design
ENGN 1750 Advanced Mechanics of Solids
ENGN 1860 Advanced Fluid Mechanics
ENGN 1130 Phase and Chemical Equilibria
ENGN 1300 Structural Analysis
ENGN 1340 Water Supply and Wastewater Treatment
ENGN 1360 Soil Mechanics and Principles of Foundation Engineering
ENGN 1930C Civil Engineering Project
ENGN 1930D Civil Engineering Project

Total Credits 21

1 For example, GEOL 1580 or GEOL 1590.
2 ENGN 1930C and ENGN 1930D are each .5 credits and together count for one course credit.
3 Attention is called to the following courses as particularly relevant technical electives: ENGN 1110, ENGN 1380, ENGN 1710, ENGN 1740, and ENGN 1860.

Computer Engineering Track:
The concentration shares much of the core with the other engineering programs, but is structured to include more courses in computer science, and a somewhat different emphasis in mathematics.

1. Core Courses:
ENGN 0030 Introduction to Engineering 1
ENGN 0040 Dynamics and Vibrations 1
ENGN 0510 Electricity and Magnetism 1
ENGN 0520 Electrical Circuits and Signals 1
Select one of the following Series:
MATH 0190 & MATH 0200 Advanced Placement Calculus (Physics/Engineering) and Intermediate Calculus (Physics/Engineering)
MATH 0170 & MATH 0180 Advanced Placement Calculus and Intermediate Calculus
APMA 0330 Methods of Applied Mathematics I, II 1
or APMA 0350 Methods of Applied Mathematics I, II
APMA 1650 Statistical Inference I 1
CHEM 0330 Equilibrium, Rate, and Structure 1
or BIOL 0200 The Foundation of Living Systems
or ENGN 0720 Thermodynamics
or ENGN 0410 Materials Science
Select one of the following series:
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
& CSCI 0160 and Introduction to Algorithms and Data Structures
CSCI 0170 Computer Science: An Integrated Introduction
& CSCI 0180 and Computer Science: An Integrated Introduction
CSCI 0040 Introduction to Scientific Computing and Problem Solving
& CSCI 0190 and Accelerated Introduction to Computer Science

2. Advanced Core:
MATH 0520 Linear Algebra 1
or CSCI 1570 Design and Analysis of Algorithms
CSCI 0310 Introduction to Computer Systems 1
ENGN 1570 Linear System Analysis 1
ENGN 1630 Digital Electronics Systems Design 1

3. Specialty Courses:
3 a. For the Computer Specialty:
ENGN 1620 Analysis and Design of Electronic Circuits
ENGN 1640 Design of Computing Systems
Select one of the following:
ENGN 1580 Communication Systems
ENGN 1600 Design and Implementation of Very Large-Scale Integrated Systems
ENGN 1650 Embedded Microprocessor Design
ENGN 1680 Design and Fabrication of Semiconductor Devices
ENGN 2910A Advanced Computer Architecture
ENGN 2910P Nano-system Design
ENGN 2910W Synthesis of VLSI Systems
ENGN 2911C Digital Integrated Circuit Testing and Hardware Security
ENGN 2911G Physical Design of Digital Integrated Circuits
ENGN 2911X Reconfigurable Computing: Accelerate Your Algorithms
ENGN 2911Y Verification, Test, Synthesis

Other ENGN courses subject to approval
Select two of the following:
CSCI 0320 Introduction to Software Engineering
CSCI 1260 Introductory Compiler Construction
CSCI 1480 Building Intelligent Robots
CSCI 1570 Design and Analysis of Algorithms
CSCI 1670 Operating Systems
CSCI 1730 Introduction to Programming Languages
CSCI 1760 Introduction to Multiprocessor Synchronization
CSCI 1900 Software System Design
Other Computer Science courses subject to approval of the Engineering Concentration Committee.
3 b. For the Multimedia Signal Processing Specialty:
APMA 1170 Introduction to Computational Linear Algebra
Select two of the following:
ENGN 1580 Communication Systems
ENGN 1610 Image Understanding
ENGN 2500 Medical Image Analysis
ENGN 2520 Pattern Recognition and Machine Learning
ENGN 2530 Digital Signal Processing
### Electrical Engineering Track:

1. **Core Courses:**
   - ENGN 0030 Introduction to Engineering
   - ENGN 0040 Dynamics and Vibrations
   - ENGN 0410 Materials Science
   - ENGN 0510 Electricity and Magnetism
   - ENGN 0520 Electrical Circuits and Signals
   - ENGN 0720 Thermodynamics
   - ENGN 0310 Mechanics of Solids and Structures
   - ENGN 0810 Fluid Mechanics
   - CHEM 0330 Equilibrium, Rate, and Structure
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering)
   - MATH 0200 Intermediate Calculus (Physics/Engineering)
   - APMA 0330 Methods of Applied Mathematics I
   - APMA 0340 Methods of Applied Mathematics II
   - CSCI 0040 Introduction to Software Engineering
   - ENGN 1000 Projects in Engineering Design
   - CHEM 0330 Equilibrium, Rate, and Structure
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering)
   - MATH 0200 Intermediate Calculus (Physics/Engineering)
   - APMA 0330 Methods of Applied Mathematics I
   - APMA 0340 Methods of Applied Mathematics II
   - CSCI 0040 Introduction to Software Engineering

2. **Four courses from the following:**
   - ENGN 1570 Linear System Analysis
   - ENGN 1620 Analysis and Design of Electronic Circuits
   - ENGN 1630 Digital Electronics Systems Design
   - ENGN 1000 Projects in Engineering Design
   - or ENGN 1970 Independent Studies in Engineering
   - or ENGN 1971 Independent Study in Engineering

3. The student shall choose the other three courses to satisfy requirements of a selected specialty area: Bioelectrical Engineering, Communications Systems, Computer Engineering, Multimedia Signal Processing, Microelectronic Systems, or Solid State Electronics and Photonics.

### Materials Engineering Track:

1. **Core Courses:**
   - ENGN 0030 Introduction to Engineering
   - ENGN 0040 Dynamics and Vibrations
   - ENGN 0410 Materials Science
   - ENGN 0510 Electricity and Magnetism
   - ENGN 0520 Electrical Circuits and Signals
   - ENGN 0720 Thermodynamics
   - ENGN 0310 Mechanics of Solids and Structures
   - or ENGN 0810 Fluid Mechanics
   - CHEM 0330 Equilibrium, Rate, and Structure
   - MATH 0190 Advanced Placement Calculus (Physics/Engineering)
   - MATH 0200 Intermediate Calculus (Physics/Engineering)
   - APMA 0330 Methods of Applied Mathematics I
   - APMA 0340 Methods of Applied Mathematics II
   - CSCI 0040 Introduction to Scientific Computing and Problem Solving

2. **Upper level courses recommended to satisfy requirements of a selected specialty area:**
   - ENGN 1450 Properties and Processing of Electronic Materials
   - ENGN 1470 Structure and Properties of Nonmetallic Materials
   - ENGN 1480 Metallic Materials
   - ENGN 1490 Biomaterials

### Mechanical Engineering Track:

#### Core Courses:
- ENGN 0030 Introduction to Engineering
- ENGN 0040 Dynamics and Vibrations
- ENGN 0410 Materials Science
- ENGN 0510 Electricity and Magnetism

#### Materials Engineering Track:
- ENGN 1000 Projects in Engineering Design

#### Mechanical Engineering Track:
- ENGN 1570 Linear System Analysis
- ENGN 1620 Analysis and Design of Electronic Circuits
- ENGN 1630 Digital Electronics Systems Design
- ENGN 1000 Projects in Engineering Design
- or ENGN 1970 Independent Studies in Engineering
- or ENGN 1971 Independent Study in Engineering
Physics Concentration Requirements

The Sc.B. degree program in Engineering-Physics, sponsored jointly by the Division of Engineering and the Department of Physics, provides students with an in-depth understanding of the fundamental principles underlying modern technology. Specifically, it gives those who are interested in applied technical problems a strong background in physics and mathematics beyond that given in the standard engineering program. Students take a significant part of the usual engineering and physics programs, obtain substantial laboratory experience, and take several upper-level courses focusing on applied physics. The program allows students to take either the standard physics or engineering programs during their first two years and then switch to this combined program.

The total number of physical science courses required for the program is 19. (We assume that a student begins his or her mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 or equivalent are encouraged but not required to take an additional upper-level mathematics course.)

The courses are as follows:

Select one of the following Series: 2

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 0050</td>
<td>Foundations of Mechanics</td>
</tr>
<tr>
<td>&amp; PHYS 0060</td>
<td>and Foundations of Electromagnetism and Modern Physics</td>
</tr>
<tr>
<td>PHYS 0070</td>
<td>Analytical Mechanics</td>

<tr>
<td>APMA 0340</td>
<td>Methods of Applied Mathematics I, II</td>
</tr>
<tr>
<td>An approved computer science course</td>
<td></td>
</tr>
<tr>
<td>PHYS 0790</td>
<td>Physics of Matter (recommended for all options except Biomechanics, for which it is BIOL 0800)</td>
</tr>
</tbody>
</table>

Total Credits: 21

1. Students should consult the Engineering Undergraduate Programs booklet regarding specific details for each specialty area (available online at http://www.engin.brown.edu/undergrad/guide/index.html).

Biomedical Engineering Concentration Requirements

Biomedical Engineering is an interdisciplinary concentration through which students learn to apply the methods and tools of engineering to the subject matter of biology and the life sciences. Jointly administered by the Division of Engineering and the Division of Biology and Medicine, biomedical engineering offers students the unique opportunity to master much of the essential material and methodologies of two different disciplines. The program emphasizes strong biomedical engineering fundamentals, while allowing students to personalize their curriculum based upon their intellectual and career interests. Students must learn broadly in engineering and life sciences. Thus, a large number of courses are required across several fields. Because of its highly interdisciplinary nature, at least one semester of research collaboration with a faculty member is also required, though two semesters of research is strongly recommended. The biomedical engineering concentration culminates in the Bachelor of Science degree.
Standard program for the Sc.B. degree

Foundation Courses (all required)
- ENGN 0030 Introduction to Engineering 1
- ENGN 0040 Dynamics and Vibrations 1
- MATH 0190 Advanced Placement Calculus (Physics/Engineering) 1
  or MATH 0170 Advanced Placement Calculus 1
- MATH 0200 Intermediate Calculus (Physics/Engineering) 1
  or MATH 0180 Intermediate Calculus 1
- BIOL 0200 The Foundation of Living Systems 2
  or NEUR 0010 The Brain: An Introduction to Neuroscience 1
- APMA 0330 Methods of Applied Mathematics I, II 1
- CHEM 0330 Equilibrium, Rate, and Structure 1
- CHEM 0350 Organic Chemistry 1
- APMA 0650 Essential Statistics 1
  or APMA 1650 Statistical Inference I
  or SOC 1100 Introductory Statistics for Social Research
- ENGN 0050 Electricity and Magnetism 1
- ENGN 0070 Thermodynamics 1
- ENGN 0080 Fluid Mechanic 1
- ENGN 1230 Instrumentation Design 1
- BIOL 0800 Principles of Physiology 1

Upper Level Bioengineering Courses (all required)
- ENGN 1110 Transport and Biotransport Processes 1
- ENGN 1210 Biomechanics 1
- ENGN 1490 Biomaterials 1

Three Additional Upper Level Bioengineering Courses
Select at least one of the following: 1
- BIOL 1140 Tissue Engineering 1
- BIOL 1150 Stem Cell Engineering 1
- ENGN 1220 Neuroengineering 1
- ENGN 1400 Analytical Methods in Biomaterials 1
- ENGN 1930B Photonics and Biophotonics 1
- ENGN 1930R Molecular and Cell Biology for Engineers 1

Select at most two of the following: 2
- BIOL 1220 Synthetic Biological Systems in Theory and Practice 1
- BIOL 1800 Animal Locomotion 1
- BIOL 2110 Drug and Gene Delivery 1
- BIOL 2130 Techniques in Molecular and Cell Science 1

Other courses with approval of concentration advisor.

Capstone Design course (required):
- ENGN 1930L Biomedical Engineering Design, Research and Modeling 1

Independent Research (one recommended):
Select one of the following:
- BIOL 1950/1960 Directed Research/Independent Study 1

Total Credits 21

1 Advanced students can replace one math course with CHEM 0360.
2 Advanced students (premeds) can replace with BIOL 0470, BIOL 0530, or other biology courses.

Engineering Graduate Program

The School of Engineering directly offers graduate programs leading to the Master of Science (Sc.M.) degree; the Master of Science in Innovation Management and Entrepreneurship (Sc.MIME); and the Doctor of Philosophy (Ph.D.) degree.

In addition, the School of Engineering in collaboration with the Division of Biology and Medicine offers an interdisciplinary graduate program leading to the Master of Science (Sc.M.) and Doctor of Philosophy (Ph.D.) in Biomedical Engineering.

For more information on admission and program requirements for the Sc.M. or Ph.D. in Engineering, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/engineering

For more information on admission and program requirements for the Program in Innovation Management and Entrepreneurship Engineering (PRIME), please visit the following website:

For more information on admission and program requirements for Biomedical Engineering, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/biomedical-engineering

Courses

This course will address the impact that technology has on society, the central role of technology on many political issues, and the need for all educated individuals to understand basic technology and reach an informed opinion on a particular topic of national or international interest. The course will begin with a brief history of technology.

ENGN 0030. Introduction to Engineering.
An introduction to various engineering disciplines, thought processes, and issues. Topics include computing in engineering, engineering design, optimization, and estimation. Case studies in engineering are used to illustrate engineering fields and scientific principles, including in-depth studies of statics and optics. Laboratories and design projects are included. Prerequisite: one of the following: APMA 0330, 0340, 0350, 0360, MATH 0100, 0170, 0180, 0190, 0200, 0350, 0520, 0540, which may be taken concurrently.

Students MUST register for the course lecture (M01) and one of the sections during the SAME registration session. Banner will not allow a student to register for one component without registering for the other at the same time. Further, if you drop one component of the course on Banner, both components will be dropped.

ENGN 0040. Dynamics and Vibrations.
Study of the kinematics and dynamics of particles and rigid bodies. Principles of motion of mechanical systems. Concepts of inertia, work, kinetic energy, linear momentum, angular momentum, and impact. Applications to engineering systems, satellite orbits, harmonic vibrations of one and two degree of freedom systems. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030. Corequisite: MATH 0200 or 0180.

ENGN 0090. Management of Industrial and Nonprofit Organizations.
Exposes students to the concepts and techniques of management. Topics include marketing, strategy, finance, operations, organizational structure, and human relations. Guest lecturers describe aspects of actual organizations. Lectures and discussions.

ENGN 0120A. Crossing the Consumer Chasm by Design.
Technologies have shaped human life since tools were sticks and flints and define their business mode. By plotting their course across the chasm, business strategies?
we confront the cross-disciplinary barriers to realizing benefits from technology. Enrollment limited to 18 first year students. Instructor permission required. FYS WRIT

ENGN 0120B. Crossing the Space Chasm Through Engineering Design
Five decades of human activity in space has provided the world community with benefits including instant global communications and positioning, human and robotic exploration of the moon, planets and sun, and a perspective of earth which continues to inform and influence our relationship with our environment.

Unlike other technical revolutions of the 20th century space has not transitioned to a commercial, consumer market commodity. Rather its users and applications remain primarily large and institutional.

To experience the challenges of engineering design and of changing an industrial paradigm, we will work in one or several groups to identify a use of space, and a plan for its implementation, that could help transition space from its status as a niche technology. Through the process of design, we will confront the technical, economic, societal and political barriers to obtaining increased benefits from technologies in general, and space in particular, and to making new technologies beneficial to a wider range of users. Enrollment limited to 18 first year students. Instructor permission required. FYS WRIT

ENGN 0120C. Power: From Early Engines to the Nuclear-Powered Artificial Heart
Mechanical and electrical power have been source of major changes in civilization in last 250 years. This course starts from introduction to animal muscle power and harnessing nature to steam and later sources of power and applications, examining not only the technologies but also the people who developed them and the social and political impacts, ranging up to the nuclear-powered artificial heart. Enrollment limited to 20 first year students. FYS

ENGN 0120D. Strategies for Creative Process: Design Topics.
There is no one simple methodology for creative thinking. Creative thinking is a critical response to the world around us - to our curiosities and interests, to the questions our observations generate, to the ways we frame problems, and to the strategies we develop for translating what we imagine into objects and experiences. Working as artist/designers, making things within a studio environment, we will examine various approaches for the development and refinement of our creative processes as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 15 first year students. FYS

ENGN 0230. Surveying.
Theory and practice of plane surveying; use of the tape, level, transit, stadia, and plane table; triangulation and topography. Lectures, field work, and drafting. Recommended for students interested in civil engineering. Hours arranged. Time required, about 10 hours. Audit only

ENGN 0260. Mechanical Technology
A basic machine shop course that, with the help of an instructor, teaches students how to fabricate a few simple objects using hand tools and some basic machines. This course is designed to introduce the student to the machining process and environment. Audit only

Mechanical behavior of materials and analysis of stress and deformation in engineering structures and continuous media. Topics include concepts of stress and strain; the elastic, plastic, and time-dependent response of materials; principles of structural analysis and application to simple bar structures, beam theory, instability and buckling, torsion of shafts; general three-dimensional states of stress; Mohr’s circle; stress concentrations. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030

ENGN 0410. Materials Science.
Relationship between the structure of matter and its engineering properties. Topics: primary and secondary bonding; crystal structure; atomic transport in solids; defects in crystals; mechanical behavior of materials; phase diagrams and their utilization; heat treatment of metals and alloys; electrical, optical, and magnetic properties of materials; strengthening mechanisms in solids and relationships between microstructure and properties; corrosion and oxidation. Lectures, recitations, laboratory

ENGN 0510. Electricity and Magnetism.
Fundamental laws of electricity and magnetism and their role in engineering applications. Concepts of charge, current, potential, electric field, magnetic field. Resistance, capacitance, and inductance. Electric and magnetic properties of materials. Electromagnetic wave propagation. Lectures, recitation, and laboratory. Prerequisites: ENGN 0030 or PHYS 0070; ENGN 0040 or PHYS 0160 (previously 0080); MATH 0180 or 0200; and APMA 0330 or 0350 (may be taken concurrently)

ENGN 0520. Electrical Circuits and Signals.
An introduction to electrical circuits and signals. Emphasizes the analysis and design of systems described by ordinary linear differential equations. The frequency domain is introduced, including the effects of sampling and windowing in computer simulations. Other topics include transient analysis, Fourier series, and Laplace transform. Laboratories apply concepts to real problems in audio and controls. Lectures, recitation, and laboratory. Prerequisite: APMA 0330 or 0350

ENGN 0720. Thermodynamics.
An introduction to thermodynamics and some of its engineering applications. Presents basic concepts related to equilibrium, and the zeroth, first and second laws for both closed and open systems. Examples include analysis of engines, turbines, and other engineering cycles, phase equilibrium and separation processes, chemical reactions, surface phenomena, magnetic and dielectric materials. Lectures, recitations, and laboratory. Prerequisites: ENGN 0030 or ENGN 0040. Recommended: ENGN 0410 or CHEM 0330

ENGN 0900. Managerial Decision Making.
Ways of making effective decisions in managerial situations, especially situations with a significant technological component; decision analysis; time value of money; competitive situations; forecasting; planning and scheduling; manufacturing strategy; corporate culture. Lectures and discussions. Prerequisite: ENGN 0090 or MATH 0100

ENGN 0930A. Appropriate Technology.
Our goal for this course is that you leave it with the ability to think and act rationally and concretely on issues of technology and the human condition. We will provide background on useful technologies (e.g. wind, solar, hydro), techniques to fabricate them, and an opportunity to explore the obstacles to their implementation

ENGN 0930C. DesignStudio.
DESIGNSTUDIO is a course open to students interested in learning through making. Working in a studio environment, we will iteratively design, build, and test projects, as we imaginatively frame design problems, and develop novel strategies for addressing those problems. We will explore design thinking, creative collaboration, exploratory play, ideation, iteration, woodworking, prototyping, CNC milling and laser cutting – in addition to other strategies that enhance our creative processes - as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 16. Instructor permission required

ENGN 1000. Projects in Engineering Design.
Projects in design for concentrators in chemical, electrical, materials, and mechanical engineering. Students generally work in teams on projects that are defined through discussions with the instructor. An assembled product or detailed design description is the goal of the semester’s effort. Prerequisite: completion of engineering core program. Enrollment limited to 40

Entrepreneurship is innovation in practice: transforming ideas into opportunities, and, through a deliberate process, opportunities into
commercial realities. These entrepreneurial activities can take place in two contexts: the creation of new organizations, and within existing organizations. This course will present an entrepreneurial framework for these entrepreneurial processes, supported by case studies that illustrate essential elements. Successful entrepreneurs and expert practitioners will be introduced who will highlight practical approaches to entrepreneurial success. Enrollment limited to 35. WRIT

**ENGN 1110. Transport and Biotransport Processes.**

Aim: To develop a fundamental understanding of mass transport in chemical and biological systems. The course includes: mechanism of transport, biochemical interactions and separations; mass transport in reacting systems; absorption; membrane and transvascular transport; electroophoretic separations; pharmacokinetics and drug transport; equilibrium stage processes; distillation and extraction. Other features: design concepts; modern experimental and computing techniques; laboratory exercises

**ENGN 1120. Chemical and Biochemical Reactor Design.**

Stoichiometry, thermodynamics, mechanisms, and rate expressions of homogeneous and heterogeneous chemical and biochemical systems. Basic concepts in homogeneous chemical and bioreactor design and ideal reactor models. Chemostats and enzymatic reactors. Optimization. Temperature and energy effects in reactors. Introduction to heterogeneous chemical and bioreactor design. Co- or prerequisite: ENGN 0810. Offered in alternate years

**ENGN 1130. Phase and Chemical Equilibria.**

Application of the first and second laws of thermodynamics and conservation of mass to the analysis of chemical and environmental processes, phase and chemical equilibria and partitioning of species in multiphase, nonreactive and reactive systems. Thermodynamic properties of fluid mixtures-correlation and estimation. Applications and examples drawn from chemical processing and environmental problems. Prerequisite: ENGN 0720

**ENGN 1140. Chemical Process Design.**

Chemical process synthesis, flow charting, and evaluation of design alternatives. Process equipment sizing as determined by rate phenomena, economics, and thermodynamic limitations. Introduction to optimization theory. Applications of these principles to case studies. Prerequisites: ENGN 1110, 1130; ENGN 1120 (may be taken concurrently)

**ENGN 1210. Biomechanics.**

**ENGN 1220. Neuroengineering.**

Course Goals: To develop an advanced understanding of how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be harnessed to design devices to assist people with neurologic disease or injury. Fundamental topics in neuronal and neural signal generation, recording methods, and stimulation methods. Clinical/Translational topics include multiple clinically available and emerging neurotechnologies. Prerequisites: NEUR 0010 and ENGN 0510; or instructor permission, which may be provided after discussion with course faculty

**ENGN 1230. Instrumentation Design.**

Sensors for pressure, temperature, blood flow, muscle and neural activity. Amplifiers, filters, and A/D-D/A converters. The use of computers in monitoring and controlling physiological processes. Feedback controllers for temperature, flow rate, and experimental stimuli. Intended as a design course primarily for biomedical engineers. Lab times to be arranged. WRIT

**ENGN 1300. Structural Analysis.**

A unified study of truss, beam, frame, plate, and shell structures. Emphasis on principles of virtual work and numerical methods of elastic structural analysis by matrix methods. Includes calculation of deflections and reactions in beam structures, beam vibrations, and column buckling. Theorems of plastic limit analysis. Plate bending. Membrane stresses and local bending effects in axially symmetric shells. Prerequisite: ENGN 0310

**ENGN 1340. Water Supply and Wastewater Treatment.**

The hydrological cycle, surface water hydrology, ground water hydrology. Emphasis on the formulation of mathematical models of various flow problems and their solution by analytical or numerical means. Typical problems: open channel and river flows; flood routing; ground water flow in aquifers and into wells. Topics in wastewater treatment plant design: mixing, residence time, aeration, and, bacteriological and chemical treatment processes. Prerequisite: ENGN 0810. Enrollment limited to 40

**ENGN 1360. Soil Mechanics and Principles of Foundation Engineering.**

Classification and identification of geological materials; mechanical and physical properties and methods of testing. Elements of the analysis of stress and strain in rock and soil masses; theories of failure, theory of seepage. Problems of building foundations; consolidation and settlement; stability of earth slopes and embankments. Includes geotechnical laboratory. Prerequisite: ENGN 0310

**ENGN 1370. Advanced Engineering Mechanics.**

A unified study of the dynamics of particles, rigid bodies, and deformable continua. Generalized coordinates and Lagrange's equations; variational principles; stability of equilibrium; vibrations of discrete systems and of elastic continua, and wave propagation. Prerequisites: ENGN 0040, APMA 0340, or equivalent

**ENGN 1380. Design of Civil Engineering Structures.**

This course provides an introduction to the design of steel and reinforced concrete structures using ultimate strength methods. Lectures will cover key concepts of design theory, building codes, and standards using examples from real structures. Students will apply concepts through computer labs, homework problems, and a design project. Lectures plus lab. Prerequisite: ENGN 1300

**ENGN 1400. Analytical Methods in Biomaterials.**

Analytical methods and instrumentation currently used to characterize biomaterials. Specific methods/instrumentation covered include: molecular scale analysis (NMR, FTIR, UV-Vis spectroscopy); surface analysis (AFM, SEM, XPS, contact angle goniometry, ellipsometry, quartz crystal microbalance, electrochemistry, grazing angle IR); bulk analysis (DSC, mechanical testing) and biological analysis (bioassays, florescence and confocal microscopy). Prerequisites: CHEM 0330, CHEM 0350, ENGN 0040 and BIOL 0200. Enrollment limited to 40

**ENGN 1410. Physical Chemistry of Solids.**

Application of physical chemistry and solid state chemistry to the structure and properties of engineering solids as used in solid state devices, ceramics, and metallurgy. Equilibrium and free energy of heterogeneous systems, thermodynamics of solutions, chemical kinetics, diffusion, catalysis and corrosion, solid state transformations. Case studies taken from industrial practice. Prerequisites: ENGN 0410, 0720

**ENGN 1420. Kinetics Processes in Materials Science and Engineering.**

This course introduces the basic principles and formulations that describe kinetic processes in materials science and engineering. These are divided into the following principle types of mechanisms: solid state diffusion, reactions at surfaces and interfaces, and phase transformations. The final section of the course applies these principles to several relevant materials processing systems. Prerequisites: ENGN 0410, 0720, 1410 or equivalent

**ENGN 1440. Mechanical Properties of Materials.**

Focuses on the science of electronic materials, the materials at the heart of modern microelectronics and optoelectronics. Discusses fundamental issues controlling their properties, processing, and reliability. Topics include band structure of semiconductors, basic devices structures (junctions and transistors), sputter deposition, molecular beam epitaxy, chemical vapor deposition, ion implantation, oxidation, and issues affecting reliability. Materials challenges that must be resolved for future generations of electronic devices
ENGN 1470. Structure and Properties of Nonmetallic Materials. A study of the structure and properties of nonmetallic materials such as glasses, polymers, elastomers, and ceramics. The crystal structure of ceramics and polymers, and the noncrystalline networks and chains of glasses, polymers, and elastomers and the generation of microstructures and macrostructures are considered. The mechanical, chemical, electrical, magnetic, and optical properties and their dependence on structure are developed. Laboratory. Prerequisite: ENGN 0410

ENGN 1480. Metallographic Materials. The microstructure of metals, microstructural evolution during processing, and the relationships between the microstructure and the physical properties of the material. Crystallography and x-ray diffraction. Crystalline defects, dislocations, grain boundaries, and their effects on mechanical and other properties. Solid state diffusion and solid state phase transformations. Oxidation and corrosion. Laboratory. Prerequisite: ENGN 0410, 1410

ENGN 1490. Biomaterials. Biomaterials science, the study of the application of materials to problems in biology and medicine, is characterized by medical need, basic research, and advanced technological development. Topics covered in this course include materials used in bone and joint replacement, the cardiovascular system, artificial organs, skin and nerve regeneration, implantable electrodes and electronic devices, drug delivery, and ophthalmology. Enrollment limited to 40

ENGN 1560. Applied Electromagnetics. Developing a good understanding of the principles of electromagnetics and applying them to contemporary EM topics, through examples in today’s applications: Antenna (from iPhone, to insects, and to RFID); Display optics (from LCD to Peacock feather); Guided waves (from microwave circuits to microwave oven); Diffractions and Interferences (from optical lithography limit to antireflection in solar cell and photodetector); and EM and optical properties of materials and nanostructures. Prerequisite: ENGN 0510 or PHYS 0470, or equivalent

ENGN 1570. Linear System Analysis. Analysis of discrete and continuous electrical signals and systems in both time and frequency domains. Modulation, sampling, spectral analysis, analog and digital filtering. Fourier, Laplace and z-transforms, the state-space approach, stability of linear systems. Prerequisite: ENGN 0520

ENGN 1580. Communication Systems. Analysis and design of modern digital communication systems. Includes: sampling theorem; entropy measure of signal information content; pulse code modulation; amplitude and single sideband modulation; review of probability theory; stochastic processes and their use in communication systems; detection of signals buried in noise; communication channel capacity; coding principles; communication networks. Laboratory projects. Prerequisite: ENGN 1570. APMA 1650 or MATH 1610 helpful but not required

ENGN 1590. Introduction to Semiconductors and Semiconductor Electronics. An introduction to the physics of fundamental electronic processes that underlie the operation of semiconductor devices on a microscopic scale. Basic electronic properties of semiconductors and effects at interfaces heterogeneous media, such as pn junctions and hetero-structure barriers and quantum wells. These junctions, barriers and wells are used as building blocks for devices, focusing on bipolar and field-effect transistors. Modern trends in micro- and opto-electronic devices are discussed. A brief fabrication lab will introduce pn junction fabrication technology. Prerequisites: ENGN 0410 and 0510

ENGN 1600. Design and Implementation of Very Large-Scale Integrated Systems. VLSI (Very Large Scale Integration) CMOS (Complementary Metal Oxide Semiconductor) technology is the main driver of our digital revolution. The goal of the course is to learn how to design and implement VLSI digital circuits and optimize them with respect to different objectives such as area, speed, and power dissipation. Design and analysis will be carried out using computer-aided tools. Prerequisite: ENGN 1630, or instructor permission

ENGN 1610. Image Understanding. Image processing is a technology experiencing explosive growth; it is central to medical image analysis and transmission, industrial inspection, image enhancement, indexing into pictorial and video databases, e.g., WWW, and to robotic vision, face recognition, and image compression. This senior-level undergraduate course covers theoretical underpinnings of this field and includes a series of practical MATLAB image processing projects. ENGN 1570 is recommended but not required

ENGN 1620. Analysis and Design of Electronic Circuits. Elementary device physics and circuit characteristics of semiconductor diodes, bipolar junction transistors (BJTs), and field effect transistors (FETs). Analysis and design of practical circuits using discrete semiconductor devices. Constraint on and techniques for linear integrated circuit (IC) design and the use of linear ICs as circuit building blocks. Laboratory. Prerequisites: ENGN 0510, 0520 or equivalent

ENGN 1630. Digital Electronics Systems Design. Fundamentals of digital logic design including: Boolean algebra, gates, truth tables, logic families, flip-flops, finite state machines, memory, and timing. More advanced topics include A-D conversion, binary arithmetic, CPU organization, programmable logic (CPLDs and FPGAs), and VHDL. Extensive laboratory requirement. Not open to first-year students; permission required for sophomores

ENGN 1640. Design of Computing Systems. This course introduces the main concepts and techniques for designing computing systems. Topics covered include assembly language, instruction set design, pipelining, super scalar and VLIW processor design, memory subsystem design, and I/O interfacing. Laboratory topics include programmable logic devices, hardware definition languages, and implementation of a bootable version of the pipelined MIPS processor. Laboratory emphasizes design optimizations with respect to speed and design area. Prerequisite: ENGN 1630 or passing of a quiz on basic digital logic concepts, or instructor permission

ENGN 1650. Embedded Microprocessor Design. This is a combined lecture and design project course offering experience in the open-ended design of an electronic product or system employing an embedded microprocessor by small-group design teams. Activity includes product specification, circuit design, programming, printed circuit layout, construction, packaging, and economic assessment. Teams are expected to produce functional products. Lecture topics will be adjusted to reflect the chosen design problems. Emphasis is placed on the criteria for choosing processors and on the interfaces and programming requirements of the system. Primarily for senior concentrators. Experience with C programming is helpful but not required. Prerequisite ENGN 1630 or permission of the instructor

ENGN 1660. Design and Fabrication of Semiconductor Devices. Contemporary practice in the design and fabrication of semiconductor devices. The realization of basic electronic device functions on the semiconductor platform is a central theme in a coordinated lecture and laboratory course. Topics include product specification, circuit design, layout, and design scaling rules for integrated circuits; and techniques in semiconductor and thin film processing as they apply to ULSI circuit manufacturing. Prerequisite: ENGN 1590 or permission

ENGN 1690. Photonics and Applications. Science and engineering principles of photonics and optoelectronics, that provide foundation to a broad range of technologies from internet to lighting, from lasers to DVD, from satellite images to computer display, from solar cells to single molecule detection. Topical content: light as waves in media, on surface, and through holes; interference and waveguiding; light generation by spontaneous emission or by stimulation; LED, Laser, Photodetector, Optical amplifier and modulator, etc. Prerequisite: ENGN 0510 or equivalent

ENGN 1700. Applied Thermodynamics. Control volume formulations of thermodynamic principles applied to the study of compressible fluids as working fluids in engines and thermodynamic devices. Applications include compressors and turbines, gas turbines, jet, ramjet and rocket engines, steam plants, refrigeration, and internal combustion engines. Combustion and flames are also considered. Prerequisites: ENGN 0720 and 0810
Heat conduction: steady and unsteady heat conduction equation with heat generation in two and three dimensions; numerical solutions. Radiant heat transfer: Kirchhoff’s Law and the perfect emitter, radiation intensity and surface emissive power, real surface radiation; view factors for black and gray surfaces. Convective heat transfer: laminar and turbulent flow heat transfer. Mass transfer. Lectures, section, and lab. Prerequisite: ENGN 0810

ENGN 1720. Design of Engines and Turbines.

ENGN 1740. Computer Aided Visualization and Design.
Provides instruction in the application of computers to the design methods in engineering. Hands-on experience in use of CAD/CAE software packages for geometric modeling, visualization, and drafting. Emphasis on applications to solids and structural problems. Independent design projects are carried out. Course counts as an ABET upper-level design course for mechanical and civil engineering concentrators. Prerequisite: ENGN 0310

Design of mechanical devices utilizing techniques developed in ENGN 1750. Additional subjects include material failure criteria, vibration of multimass systems, and control systems. Corequisite: ENGN 1370. Please contact Professor Rick Fleet for special permission.

Please see this video describing the course in more detail: http://www.youtube.com/watch?v=CYVsH2Q9dyY&feature=mfu_in_order&list=UL

Aims to give mechanical engineering students a deeper and more thorough grounding in principles and basic applications. Topics include review of the conservation principles; inviscid flow; viscous flow, including aerodynamics lubrication theory; laminar boundary layers; wave motions and wave drag. Lectures, assignments, computational projects, and laboratory. Prerequisites: ENGN 0720 and 0810

Students examine and engage with the decision making process in the modern enterprise, including investment, negotiation, and opportunity creation. This is done in an entrepreneurial context. Teams research and present orally and in writing on major class themes. Case studies, Socratic discussion models, readings, guest lectures, metric and writing fellows support for videotaped oral and written business plans are utilized. Enrollment limited to 35

ENGN 1930A. 3D Photography.
By 3D photography we refer to a number of processes that use cameras and lights to capture the shape and appearance of 3D objects. In this course we will first study and build basic 3D techniques and systems, and then cover several closely related methods based on signal processing techniques, constrained energy minimization, and the solution of diffusion differential equations to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Applications include computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality

ENGN 1930B. Photonics and Biophotonics.
Biophotonics deals with interactions between light and biological matter that combine lasers, photonics, nanotechnology, and biotechnology. The course will introduce the biology/photonics interface and discuss topics like photobiology, biosensors, bioimaging techniques, light activated therapy, microarray technology, tissue engineering with light, and bionanophotonics. Prerequisites: science and engineering background

ENGN 1930C. Civil Engineering Project.
Provides a major design experience for civil engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in civil engineering concentration. Intended for students in their senior year. Offered as a half-credit course each semester

ENGN 1930D. Civil Engineering Project.
Provides a major design experience for civil engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in civil engineering concentration. Intended for students in their senior year. Offered as a half-credit course each semester

ENGN 1930F. Entrepreneurship and Good Work: Engineering Dreams.
In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of ‘good work’. Using a combination of relevant case studies, readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one’s working years. Enrollment limited to 24. Written permission required

ENGN 1930G. Entrepreneurship I.
Teams of students from Engineering, COE and other technical and non-technical disciplines form simulated high tech startup companies working on mentor-defined opportunities, from conception to commercialization. Intellectual property, marketing, definition of a product requirements document, human factors (including team building), safety and environmental concerns, and legal concerns are emphasized. Students in the COE Technology Management Track should complete ENGN 1010 prior to this course. Enrollment in the course is limited and students must fill out a formal application (though COE tech track seniors are automatically approved). The course meets TR from 2:30-3:50, and other outside meeting hours will be arranged. WRIT

ENGN 1930H. Entrepreneurship II.
Please see ENGN 1930G for course description. Enrollment limited to 24. WRIT

ENGN 1930I. Ethics and Professionalism.
Issues of ethics and professionalism for the engineer and for members of other professions. The principal objectives are to examine the responsibility a person accepts when practicing his or her profession and to provide opportunities for students to explore the ethical aspects of their profession, become comfortable and confident discussing and using value systems, and practice effective expression of ideas in oral and written form

ENGN 1930K. High-Performance Sensors and Multimedia.
Design, construction, and implementation of embedded systems with system-on-chip processors, and audio/visual sensors for real-time applications. Design and implementation of distributed audio/visual applications. Hands-on project oriented hardware/software course

ENGN 1930L. Biomedical Engineering Design, Research and Modeling.
This course introduces students to design, modeling and analysis of biological systems. The first portion of the course focuses on linear systems. Research projects in design will be analyzed. The course also introduces students to the Matlab programming language, which allows them to implement the design models discussed in class. For seniors only

ENGN 1930M. Industrial Design.
Brown engineering and RISD industrial design faculty lead product development teams through a design cycle. Engineers explore industrial design, designers gain some insight into engineering, and both groups can apply their skills to challenging problems. Frequent presentations, field trips, critiques, and labs. Preference given to seniors. Prerequisites: completion of engineering core. Enrollment limited to 15 students

ENGN 1930N. Introduction to Magnetic Resonance Imaging and Neuroimaging.
Magnetic resonance imaging (MRI) is a powerful tool for investigating the biological structure and functional dynamics across an incredibly broad
spatial and temporal scale. This course will provide an understanding of the basic physical principles of magnetic resonance, including signal generation, detection and contrast mechanisms; as well as image acquisition techniques and reconstruction methods. This course is aimed at undergraduate and graduate students from a variety of disciplines, including: Engineering, Computer Science, Applied Mathematics, Physics, Cognitive Science and Neuroscience as well as medical students and residents. Students should have a basic understanding of matrix mathematics and familiarity with the concepts of magnetism and waves.

ENGN 1930O. MicroElectroMechanical Systems (MEMS). Integrated analysis and design of MicroElectroMechanical Systems (MEMS), which are highly integrated micron-scale devices used in many applications: sensors, energy (engines), optics, bioengineering, chemical processing, etc. Provides an introduction to the science and art of design, fabrication, performance, and use of MEMS in all disciplines of engineering.

ENGN 1930P. Solid Biomechanics. Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: EN 4 or equivalents, AM 33

ENGN 1930R. Molecular and Cell Biology for Engineers. Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330

ENGN 1930S. Land Use and Built Environment: An entrepreneurial view. Through the use of readings, group discussions, student presentations and guest lectures, students examine and challenge the analytical and structural frameworks which underlie and support public and private land and use the urban and suburban built environments. Students build an understanding and theory of how social, political, governmental and economic forces interact with society’s present and future physical space needs.

ENGN 1930U. Renewable Energy Technologies. Analysis of the thermodynamics, physics, engineering and policy issues associated with renewable and non-renewable energy technologies with applications appropriate to both the developed and the developing world. Specific technologies that will be studied include fossil fuels, wind, solar, hydro, biomass and nuclear. Energy consumption technologies, such as power generation and transportation will also be studied. Some technical background, such as ENGN 0030, 0040 and 0720, is strongly recommended.

ENGN 1930W. The Art and Science of Light. This studio course explores artificial light from both artistic and scientific perspectives. Laboratory demonstrations on optics and new light emitting materials will be counterbalanced by presentations on the historical and contemporary integration of these materials within the fields of architecture, industrial design, and sculpture. Students will be asked to reimagine the light bulb by developing artistic design alternatives to conventional lighting. Extensive outside work is expected. Written permission required.

ENGN 1930X. Entrepreneurship and New Ventures: A Socratic Approach to Innovation Analysis and Application. Taught via Socratic method, this course explores essential elements of the entrepreneurial process: Defining Entrepreneurship; Recognizing Opportunities and Developing Business Models; Assembling The Team; Raising Financial Resources; Managing Uncertainty; Managing the Growing Venture; and Realizing Value. Guest will include successful entrepreneurs and expert practitioners who will highlight practical approaches to entrepreneurial success.

Please note that beginning with the very first class, students MUST read the session’s case study and supplemental readings, to be ready for participation in discussions. For the first day’s assignment, please contact Professor Warshay directly at Daniel_Warshay@brown.edu. Enrollment limited to 35. WRIT.

ENGN 1930Y. Social Enterprises. This course will provide an overview of the state of the art of solar energy harvesting, solar cell designs and characterization. Recommended prerequisites: Good knowledge of basic physics and electromagnetism concepts; proficiency in ENGN 0510 or PHYS 0470; familiarity with Mathematica and/or Matlab. This course is designed for undergraduate and graduate students interested in the field of alternative energy with a focus in solar cell technologies. Enrollment limited to 24.

ENGN 1931A. The Physics of Solar Cells. To help students build a solid knowledge of the fundamental physical processes occurring in conventional and unconventional solar cells. This seminar course will provide an overview of basic machine components and manufacturing processes from the perspective of a design engineer in a contemporary industrial setting. The objective of which being to provide students the background necessary to create mechanical assemblies from blank-page concepts through to production ready designs. Coursework will include both theoretical and experimental exercises as well as two group projects working on a mechanical assembly produced via high volume manufacture. Prerequisite: ENGN 0310, 1740. Enrollment limited to 20.

ENGN 1931D. Design of Mechanical Assemblies. An introduction to the design and development of mechanical assemblies suitable for production over a range of volumes, from prototypes to high volume manufacture. The course is intended to present an overview of basic machine components and manufacturing processes from the perspective of a design engineer in a contemporary industrial setting. The objective of which being to provide students the background necessary to create mechanical assemblies from blank-page concepts through to production ready designs. Coursework will include both theoretical and experimental exercises as well as two group projects working on a mechanical assembly produced via high volume manufacture. Prerequisite: ENGN 0310, 1740. Enrollment limited to 20.

ENGN 1931E. Writing Science. This seminar focuses on communicating scientific and technical information to a lay audience in ways that engage and inform. The focus is on writing about new findings, scientific disputes and policy debates, along with producing profiles, feature articles, op-eds and blog posts. Students who complete this seminar will learn how to turn a collection of facts into a story, ways of explaining complex topics in simple terms, and how to differentiate between crucial technical details and clutter. Proficiency in English is assumed. Permission from the instructor is required. Preference will be given to seniors and graduate students. Enrollment limited to 15. WRIT.

ENGN 1931F. Introduction to Power Engineering. An introduction to the generation, distribution and use of electrical energy in three-phase balanced systems. Topics include: properties of magnetic fields and materials; magnetic reluctance circuits; phasors and the properties of balanced three-phase voltage and current lines; brushless DC motors; power semiconductor switches; generators, transformers, and transmission lines; induction motors; and the properties of solar photovoltaic sources and microinverters. Laboratory project. Prerequisites: ENGN 0510 and 0520.

ENGN 1971. Independent Study in Engineering. Independent Study in Engineering. Instructor permission required after submitting online proposal (http://brown.edu/academics/engineering/content/independent-study). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

ENGN 2100. Mathematical Methods in Engineering and Physics I. An introduction to methods of mathematical analysis in physical science and engineering. The first semester course includes linear algebra and tensor analysis, analytic functions of a complex variable; integration in the complex plane; potential theory. The second semester course includes probability theory; eigenvalue problems; calculus of variations and extremum principles; wave propagation; other partial differential equations of evolution.

ENGN 2280. Topics in Continuum Mechanics. Topics chosen to one or more additional topics in continuum mechanics not covered in detail by the regular courses. Examples are: nonlinear viscoelastic constitutive equations, strain gradient and micropolar viscoelasticity.
theories of elasticity, coupled mechanical and thermal or electromagnetic phenomena, and continuum thermodynamics

**ENGN 2290. Plasticity.**
Theories of plasticity and their applications to metallic behavior. Evaluation of plastic stress-strain relations. Variational principles for incremental plasticity. Uniqueness. Upper and lower bound theorems of limit analysis and shakedown. Slip line theory. Representative problems in structural analysis, metal forming, indentation, strain and stress concentrations at notches, and ductile failure

**ENGN 2320. Experimental Mechanics.**
The design and evaluation of experiments in solid mechanics. Considers methods for experimental stress analysis and for the mechanical testing of materials. Topics covered include photoelasticity, creep and relaxation tests, high-speed testing, stress wave propagation, fatigue, and fracture. Techniques, instrumentation, and recording systems for the static and dynamic measurement of mechanical parameters such as forces, displacements, velocities, accelerations, and strains

**ENGN 2340. Computational Methods in Structural Mechanics.**
Fundamentals of the finite element method of structural analysis. Nodal points, element design, and consistent formulation for assumed functions. Principle of virtual work, formulation of element stiffness and master stiffness matrices. Relation to variational and minimum principles. Linear elastic analysis for static problems; direct and iterative procedures. Nonlinear static analysis with piecewise linearization; elastic-plastic behavior, large geometry changes. Time dependent behavior

**ENGN 2370A. Thin Films.**
No description available

**ENGN 2370B. Topics in Solid and Structural Mechanics.**
Devoted to one or more advanced topics in solid and structural mechanics not covered in detail by the regular courses, such as: numerical methods in sold mechanics, theory of optimal design, shell structures and instability, or other topics of interest to the staff or visitors

**ENGN 2380. Fracture Mechanics.**

**ENGN 2400. Electron Microscopy in Materials Science.**
Theory of electron optics and principles of transmission electron microscopy, including dynamical theory of electron diffraction and image contrast. Applications to materials analysis including defect, boundary, and phase analysis. Analytical electron microscopy including convergent beam diffraction, energy dispersive x-ray analysis, and energy loss spectroscopy. Intensive laboratory exercises

**ENGN 2410. Thermodynamics of Materials.**

**ENGN 2420. Kinetic Processes and Mechanisms in Materials Science.**
Continuum and atomistic descriptions of diffusion in solids. Reactions involving surfaces and interfaces, including evaporation, adsorption, grain growth, and coarsening. Phase transformation kinetics, including nucleation, growth, solidification, spinodal decomposition, and martensitic transformations. Analysis of systems with multiple kinetic mechanisms, particularly the examples include oxidation, crystal growth, and sintering. Prerequisite: background in basic thermodynamics. Recommended: ENGN 1410 or 2410 or equivalent

**ENGN 2430. Deformation Behavior of Materials.**
Linear elasticity as applied to isotropic and anisotropic materials; yield criteria including Von Mises, Tresca, Mohr-Coulomb, and Hill. Plastic deformation and slip. Dislocation theory. Mechanisms of hardening, Microstructural models of ductile, intergranular, and cleavage fracture. Toughening mechanisms. Creep. Fatigue. Prerequisites: ENGN 0410 and ENGN 1440 or equivalent

**ENGN 2440. Strength of Solids.**
Mechanical behavior of solids as interpreted through atomistic mechanisms. Theory and characteristics of dislocations in continuous and crystalline media. Intrinsic and extrinsic stacking faults, extended dislocations, point defects, nodes and networks, disclinations, crystal boundaries. Applications of dislocation theory to single and polycrystal plasticity, work-hardening, stress-corrosion, creep, fatigue, hardening mechanisms, etc

**ENGN 2490A. Crystal Structures and Crystallography.**
The study and experimental analysis of solid structures from crystallography and crystal chemistry viewpoints. Electronic structure of the atom as related to core level chemical analysis techniques in material science, atomic arrangements in solids, form crystallography, crystal symmetry and symmetry of finite objects, and experimental techniques in x-ray diffraction

**ENGN 2490B. To Be Determined.**

**ENGN 2500. Medical Image Analysis.**
Explosive growth in medical image analysis has enabled noninvasive methods to diagnose and treat diseases. The course will first discuss the fundamentals of formation of medical images such as CT, MRI, ultrasound, and nuclear imaging; then consider clinical constraints and discuss methods in image guided therapy/surgery, techniques to detect, delineate, measure, and visualize medical organs and structures

**ENGN 2501. Digital Geometry Processing.**
Three-dimensional geometric models are fundamental for applications in computer vision, computer graphics, medical imaging, computer aided design, visualization, multimedia, and many other related fields. This course includes the study of basic data structures and algorithms for representing, creating, manipulating, animating, editing, and analyzing digital geometry models, such as point clouds and polygon meshes, as well as state-of-the-art material from the current scientific literature. This is a project oriented course with several programming assignments and a final project. Students are expected to have successfully completed an introductory computer graphics/vision course or have an equivalent background. Instructor permission required. Open to seniors and graduate students

**ENGN 2502. 3D Photography.**
In 3D Photography, cameras and lights are used to capture the shape and appearance of 3D objects represented as graphical models for applications such as computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality. This course covers 3D capture techniques and systems, surface representations and data structures, as well as methods to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Instructor permission required

**ENGN 2520. Pattern Recognition and Machine Learning.**
This course covers fundamental topics in pattern recognition and machine learning. We will consider applications in computer vision, signal processing, speech recognition and information retrieval. Topics include: decision theory, parametric and non-parametric learning, dimensionality reduction, graphical models, exact and approximate inference, semi-supervised learning, generalization bounds and support vector machines. Prerequisites: basic probability, linear algebra, calculus and some programming experience

**ENGN 2530. Digital Signal Processing.**
An introduction to the basics of linear, shift-invariant systems and signals. Quantization and sampling issues are introduced. Discrete time and DFT properties, fast DFT algorithms, and spectral analysis are discussed. IIR and FIR digital filter design is a focus; stochastic and deterministic signals are introduced. MATLAB exercises are a significant part of the course

**ENGN 2540. Speech Processing.**
The basics for speech production and hearing are introduced. PDEs and simplified vocal-tract models are derived. LPC, DFT filterbank and time varying signal processing for speech recognition analysis are discussed in mathematical detail. Dynamic programming, vector quantization, hidden
Markov modeling, and neural-network pattern recognition for speech are introduced. Offered every other year

ENGN 2560. Computer Vision.
An interdisciplinary exploration of the fundamentals of engineering computer vision systems (e.g., medical imaging, satellite photo interpretation, industrial inspection, robotics, etc.). Classical machine vision paradigms in relation to perceptual theories, physiology of the visual context, and mathematical frameworks. Selections from Gestalt psychology, Gibsonian approach primate visual pathways, edge-detection, segmentation, orientation-selectivity, relaxation-labeling, shading, texture, stereo, shape, object-recognition.

The study of stochastic processes and a number of applications central to electrical engineering. Analysis of continuous and discrete time Gaussian and second order stochastic processes. Stochastic calculus. Innovations and spectral representations. Markov random fields. Applications to Kalman filtering, the detection of signals in the presence of noise, and two-dimensional image processing. MATLAB projects. Prerequisite: an undergraduate level course in probability or statistics.

ENGN 2600. Electronic Processes in Semiconductors.
Electronic processes primarily in semiconductors with tetrahedral bonding (Si, Ge, GaAs compounds). Topics include phonon spectra, band structure, impurity states, electron and hole distributions, optical properties, electron plasma, scattering processes, excess and hot carriers, semiconductor-metal transitions, one- and two-dimensional electron gas, and amorphous semiconductors. Prerequisite: PHYS 2410 or equivalent

Current and proposed semiconductor devices: bipolar transistors (silicon and heterojunction); field effect transistors (MOSFETs, heterostructure, and submicron FETs); hot-electron and quantum-effect devices; and photonic devices (LEDs, semiconductor lasers, and photodetectors). Prerequisites: EN 159 or equivalent introductory device course; some quantum mechanics helpful but not required

ENGN 2620. Solid State Quantum and Optoelectronics.
Incorporates the study of interaction of radiation with matter emphasizing lasers, nonlinear optics, and semiconductor quantum electronics. Q-switching and mode-locking, electro- and acousto-optic interactions, harmonic generation and parametric processes, self-focusing and phase modulation, stimulated Raman and Brillouin scattering, ultrashort pulse generation, nonlinear processes of conduction electrons in semiconductors, bulk and surface polaritons. Prerequisite: ENGN 2600 or equivalent

ENGN 2630. Electro-Optical Properties of Materials and Biomolecules.
Fundamental ideas and principles relevant to the understanding of the electrical and optical properties of materials and bio-molecules are emphasized. The mathematics is deliberately kept to a minimum. Topics include metals, semiconductors dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, photosynthesis and redox proteins. Prerequisites: EN 51 and PH 47

ENGN 2640. Classical Theoretical Physics II (PHYS 2040).
Interested students must register for PHYS 2040 S01

ENGN 2660. Physics and Technology of Semiconductor Heterostructures.
Covers, largely from an experimental point of view, topics of current interest in semiconductor heterostructure physics and technology; magnetotransport in two-dimensional electron gas; integer and fractional quantum Hall effects; resonant tunneling and superlattice transport; optical and transport properties of quantum wires and dots; heterostructure-based devices; other topics of student interest. Prerequisites: PHYS 1410 or equivalent quantum mechanics, ENGN 1590 or introductory device course helpful but not required

ENGN 2730. Advanced Thermodynamics I.
Fundamental principles of macroscopic equilibrium; thermodynamic stability; Gibbs relations and chemical thermodynamics; applications to various systems, including fluids, solids, and magnetic and dielectric materials. Fundamental principles of macroscopic nonequilibrium thermodynamics (irreversible processes). Entropy production; Curie's principle; Onsager-Casimir reciprocal relations; applications to transport and relaxation phenomena in continuous systems.

For fall 2012, interested students must register for CHEM 2010 S01 (CRN 15017).

ENGN 2740. Advanced Thermodynamics II.
Introduction to the statistical mechanics of equilibrium phenomena for classical and quantum-mechanical systems. Ensemble theory; fluctuations; statistical interpretation of the laws of thermodynamics; applications to ideal gases, chemical equilibrium, simple crystals, magnetic and dielectric materials, radiation, and condensation phenomena.

For spring 2013, interested students must register for CHEM 2020 S01 (CRN 24927).

ENGN 2760. Heat and Mass Transfer.

ENGN 2810. Fluid Mechanics I.
Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

For fall 2012, interested students must register for APMA 2410 S02 (CRN 15353).

ENGN 2820. Fluid Mechanics II.
Introduction to concepts basic to current fluid mechanics research: hydrodynamic stability, the concept of average fluid mechanics, introduction to turbulence and to multiphase flow, wave motion, and topics in inviscid and compressible flow

ENGN 2880A. Chemical Reaction Engineering.
Elements of chemical rate processes; steady-state and transient behavior of continuous-flow chemical reactors; uniqueness, multiplicity, and stability in chemical reactor systems and individual catalyst particles; heterogeneous chemical reactor analysis focusing packed beds (continuum and discrete models) and fluidized beds (deterministic and stochastic models)

ENGN 2910A. Advanced Computer Architecture.
Investigates computer architecture with a particular focus on microprocessor design. Topics include instruction fetching, out-of-order issue, branch prediction, and memory dataflow. Students are expected to participate in discussions, prepare a comprehensive survey of the current state of the art in a specific topic, and construct a series of simulations to explore trade-offs in architecture design. Prerequisite: EN 164 or permission of instructor

ENGN 2910B. Advanced Process in Materials: Thin Film Processing and Characterization.
No description available

ENGN 2910C. Advanced Processing of Materials.
This course will present a detailed consideration of processing of specific types of materials. In this particular offering, electronic materials will be the focus of the discussion. Detailed state of the art methods of processing will be described and the relationship between processing and the resulting properties will be discussed

ENGN 2910D. Engineering and Design I.
No description available

ENGN 2910E. Complex Fluids.
Complex fluids comprise a large class of "soft" microstructured materials which are encountered extensively in engineering applications and biological systems. This course will explore the interrelation between the microscale physics, microstructure and macroscopic properties of complex fluids. Topics include surfactants and self-assembly, intermolecular forces
and stability of colloidal suspensions, polymer solutions, ordered phases and liquid crystals, electrokinetic phenomena, rheology.

**ENGN 2910F. Nano and Micro Mechanics of Solid Interfaces.**
This course covers the topics: Mechanics of intermolecular forces and surface forces; Adhesion and friction of hydrophobic and hydrophilic surface complexes; Mechanics aspect of chemical etching and chemical reactions on solid surfaces; Interface energetics and kinetics with anisotropic elasticity and diffusion equations; Micromechanics of grain boundaries and interface fracture Nano and micro mechanics of singleasperity and rough-surface contact friction

**ENGN 2910G. Topics in Translational Research and Technologies.**
To improve human health, engineering and scientific discoveries must be explored in the context of application and translated into human/societal value. Translational research is creating a fundamental change in the way basic science and engineering research has operated for decades, breaking down the literal and figurative walls that separate basic scientists/engineers and clinical researchers. Such discoveries typically begin at "the bench" with basic research—and in the case of medicine—then progress to the clinical level, or the patient's "bedside." This seminar course will utilize case studies to demonstrate to students how the translational research unfolds. Lectures will be delivered by clinicians, medical researchers, engineers, and entrepreneurs, with case studies focused on topics ranging from value creation, IRB, HIPAA, FDA approval, etc.

**ENGN 2910H. Flat Panel Display.**
No description available

**ENGN 2910I. Mechanics of Entropic Forces in Biological Adhesion.**
Course will cover fundamental concepts of entropic force and its significance in mechanical systems involving "soft matter." A prominent example is cell adhesion which plays a central role in cell migration, spreading, differentiation and growth. For such problems, the importance of mechanics and mechanical forces has been widely recognized and are currently under intensive research. This course is also aimed to stimulate live discussions on potential research topics and opportunities at the interface between solid mechanics and biological mechanics, with emphasis on cell-substrate, cell-cell and cell-particle interaction. Fundamental concepts to be discussed include Brownian motion, fluctuation, diffusion, dissipation, ligand-receptor bonds, single molecule mechanics, stochastic dynamics of binding/rebinding, elasticity, stress fibers, cytoskeleton, focal adhesion and endocytosis

**ENGN 2910J. Mechanics and Surface Science of Nanostructures.**

**ENGN 2910K. Cell Mechanics.**
Course is designed for students with a strong background that want to learn more about mathematical and mechanical descriptions of the cell and its functions. It will include an overview of cell biology emphasizing locomotion, mitosis (cell division), intracellular transport, cellular mechanotransduction, and biological material properties. The course will draw examples from recent theoretical and experimental research investigations, and teach quantitative tools commonly used by engineers in the field

**ENGN 2910L. Chemical and Transport Processes in the Environment.**
This course will cover fundamental properties and processes that are important for the fate and transport of chemicals in the environment. Topics will include acid/base speciation, complexation, sorption, phase-partitioning, and solution chemistry. Emphasis will be placed on natural and engineered environmental systems, including a range of environmentally relevant media (e.g. water, air, soil/sediments, plants, organisms). Conceptual understanding of chemical structure and its role in environmental transport will be highlighted, while quantitative approaches will be used to solve problems.

This course is relevant for graduate students interested in environmental pollution chemistry. Undergraduates need permission of the instructor to register

**ENGN 2910M. Biosensors and Applied Microfluidics.**
This course will acquaint students with two modules: 1) new approaches to detection and quantification of biological molecules for diverse purposes ranging from medical diagnostics to food safety to defense, 2) processes at the microscale which can be translated into applications. The topics will include sensing platforms, devices, instrumentation, biomolecular engineering of probe molecules, quantitative evaluation, separations, sample stacking, DNA/protein sizing and diagnostic devices for use in developing countries. Lectures, assignments, a group design project and a laboratory will acquaint students with the state-of-the-art in biosensors and applied microfluidics. The course is relevant to physicists, chemists, biologists and engineers

**ENGN 2910N. Molecular and Cellular Biomechanics.**
Mechanics and statistical mechanics applied to biological systems. Topics will include semiflexible polymers (DNA, microtubules, actin, flagella), membranes, and molecular motors. We will cover fundamentals including Brownian motion, random walks, diffusion, the fluctuation-dissipation theorem, and electrostatics of ions in solutions

**ENGN 2910O. Molecular Simulation Methods in Mechanics and Physics.**
Random numbers in molecular simulations, Monte Carlo methods applied to equilibrium systems, Kinetic Monte Carlo methods, Molecular dynamics with simple potentials - equilibrium properties in various ensembles (E, N, V, T, NVT, NPT, Nosé-Hoover), and non-equilibrium properties. Simulations with three-body potentials and EAM potentials. Molecular statics. Introduction to quantum mechanical methods. Application to the above methods to defect interactions in solids, structure of surfaces, crystal growth and structure of nanostructures

**ENGN 2910P. Nano-system Design.**
The goal of this course is to provide a broad understanding of the many fields that are involved in electronic nanotechnology. The material will focus on considering how new basic devices intended to replace silicon-based transistors, such as single-molecule organic switches and nanotube electron conduits, will impact VLSI, computer architecture, and how we may design systems to take advantage of the opportunities they offer. Class will include a mix of lectures and discussion on assigned reading of recent publications. Students will be responsible for leading and participating in these discussions. A course project will also be required. Prerequisites: EN 164 and EN 160 are helpful, but not required

**ENGN 2910R. Advanced Topics in NeuroEngineering.**
The field of Brain-Computer Interfaces is in its infancy. With the goal of restoring lost neurologic function, interdisciplinary groups of clinicians, engineers, neuroscientists, computer scientists, and others are working to develop novel devices that will reliably improve communication, mobility, and independence for people with paralysis, limb loss, or other diseases or injuries. This course will critically evaluate classical and cutting edge research in BCIs and related fields, emphasizing students’ ability to work together to understand, discuss, and present aspects of BCI research and development outside the traditional boundaries of their concentration or degree program. Intended for Advanced Graduate Students in Engineering or Neuroscience. Advanced Graduate students in Computer Science or Applied Mathematics may also enroll with permission of the instructor

**ENGN 2910T. Physics of Materials.**
No description available

**ENGN 2910U. Quantum, Statistical and Continuum Mechanics.**
No description available

**ENGN 2910V. Simulation Methods in Physics and Mechanics.**
No description available

**ENGN 2910W. Synthesis of VLSI Systems.**
Promotes understanding of the algorithms used in designing many of today’s CAD tools used for VLSI. Topics include synthesis of two-level and multi-level logic, logic testability and automatic test pattern generation, technology mapping, and sequential synthesis. Also introduces efficient manipulation algorithms for logic functions (based on Binary Decision Diagrams). Prerequisites EN 163. EN 160 is helpful

**ENGN 2910X. Video Processing.**
This special topic course will address the rapidly evolving technologies involved in representing and processing video data, including compression, tracking and 3-D modeling. The course will involve projects
to implement live and file-based video processing algorithms as well as periodic quizzes. Projects will be carried out primarily in C++

**ENGN 2910Z. Small Wonders: The Science, Technology, and Human Health Impacts of Nanomaterials.**
Survey course focusing on nanomaterials as enabling components in emerging nanotechnologies. Covers scaling laws for physicochemical properties, synthesis routes, manipulation and characterization tools, and example applications in sensors, composites, advanced energy devices, and nanomedicine. Impacts of nanomaterials on environment and health, including the interactions between nanoscale structures and biological molecules, cells, and whole organisms. Undergraduate enrollment by permission. 

**ENGN 2911A. Nanoelectronics.**
Review and analysis of novel and exotic electronic devices, and proposals for extending scaling into the nanometer regime. Contemporary research and development in areas such as nonclassical CMOS; single-electron and nanocrystal memories; 1D nanotube and nanowire transistors, qubits, quantum dots, spin transistors, molecular electronics; and the realization of such elements in arrays and biologically inspired networks.

**ENGN 2911B. Electrical and Optical Properties of Materials and Biomolecules.**
Fundamental ideas and basic principles relevant to the understanding of the electrical and optical properties of solid-state materials and biomolecules are emphasized. Topics, including metals, semiconductors, dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, and redox proteins, are selected in order to explain the operation of devices having current or future applications in engineering and biological research.

**ENGN 2911C. Digital Integrated Circuit Testing and Hardware Security.**
Testing of digital integrated circuits has historically focused on the detection and diagnosis of manufacturing defects. However, in the past few years, testing for security has become an important hot topic. This class will cover testing fundamentals along with new approaches for the detection of hardware Trojans (malicious circuitry inserted into a design by an adversary). Related topics in hardware security and authentication, including physically unclonable functions, will also be discussed. Prerequisite: ENGN 1630 or equivalent or permission of instructor.

**ENGN 2911D. Engineering and Design II.**
No description available.

**ENGN 2911E. New Frontiers of Solid Mechanics in Nano- and Bio-Research.**
Course will cover fundamental concepts and methods in continuum, atomistic and statistical modeling of nanoscale and hierarchical materials in engineering and biology. Various systems and phenomena, including thin films, nanocrystalline materials, fracture, hierarchical tissue structures of bone and cell, collagen and collagen-like, carbon nanotubes and biomolecular assembly, are selected to stimulate discussions at the forefront of solid mechanics research.

**ENGN 2911F. Topics in Emerging and Breakthrough Technologies.**
No description available.

**ENGN 2911G. Physical Design of Digital Integrated Circuits.**
This class investigates the physical principles and algorithmic methodologies that are used in physically designing and implementing state-of-the-art digital circuits and high-performance processors. We'll also survey the main available design implementation tools in the market and examine new directions for innovative solutions.

**ENGN 2911H. Computer Architecture.**
No description available.

**ENGN 2911J. Computational Electromagnetics.**
This course will introduce numerical techniques for solving practical and theoretical problems in optical science. Using MatLab and Mathematica, students will develop a toolkit for physical optics and build an intuition for wave propagation (e.g. transfer matrices), Fourier optics (beam propagation methods, normal mode analysis), light emission/absorption (surface- and cavity-enhanced lifetimes) as well as general finite difference schemes (frequency and time domain). Prerequisites: ENGN 0510 or PHYS 0470; APMA 0330 or APMA 0350; MATH 0520 or MATH 0540; or equivalent courses.

**ENGN 2911K. Biological Impacts of Nanomaterials.**
This course will emphasize advancements nanomaterials have made in several fields. In doing so, this course will cover fundamentals of nanomaterial synthesis and biological responses of nanomaterials if ingested, inhaled, or implanted. Biological concepts (immune response, cellular toxicity, etc.) will be combined with engineering concepts (manufacturing and property control) to understand the relationship between manufacturing and biological impacts of nanomaterials.

**ENGN 2911L. Environmental Technologies and Human Health.**
No description available.

**ENGN 2911M. Reconfigurable Computing: Accelerate Your Algorithms.**
Driven by recent innovations in Field-Programmable Gate Arrays (FPGAs), reconfigurable computing offers unique ways to accelerate key algorithms. FPGAs offer a programmable logic fabric that provides the necessary hardware and communication assets to exploit parallelism opportunities arising in various algorithms. By mapping algorithms directly into programmable logic, FPGAs accelerators can deliver 10X-100X performance increases over generic processors for a large range of applications domains. The class will describe FPGA architectures, reconfigurable systems, languages (SystemC) and design tools. The class will show a class of algorithmic techniques (e.g., dynamic programming) that are particularly attractive targets for reconfigurable computing. Mapping specific algorithms from different domains will also be described. These include computer vision, image and signal processing, network security, and bioinformatics algorithms. The class requires basic hardware and programming languages knowledge.

**ENGN 2911N. Verification, Test, Synthesis.**
This course will provide an overview of algorithms and techniques in electronic design automation relating to the synthesis, verification, and test of digital integrated circuits. Some topics covered will include synthesis of two-level and multi-level circuits, logic minimization, representations of combinational and sequential circuits for design automation, ordered binary decision diagrams, equivalence checking, verification coverage, assertions, and automatic test pattern generation. Classic techniques and recent state-of-the-art research advances will both be discussed.

**ENGN 2911Z. Principles of Nano-Optics.**
The goal of this course is to help students build an intuition for light-matter interactions at the nanoscale, especially when optically active elements are located near complex surfaces. The course will begin with a review of the theoretical foundations of macroscopic electrodynamics, but will continue on to discuss specific experimental techniques for investigating microscopic behavior. Topics will include near-field optical microscopy, quantum dots and single molecule spectroscopy, surface plasmon polaritons, local density of states, and photonic crystals.

**ENGN 2912A. Toxicity of Nanoparticles.**
This course will emphasize advancements nanoparticles have made in several medical fields such as preventing, diagnosing, and treating various diseases. This course will integrate fundamental knowledge of toxicity into such applications. In particular, the course will cover current results in terms of nanoparticle applications and potential toxicity. Toxicity in such organs as the lungs, blood, kidneys, liver etc. will be emphasized. Biological concepts will be combined with engineering concepts to understand the relationship between manufacturing and nanoparticle toxicity.

**ENGN 2912B. Scientific Programming in C++.**
Introduction to the C++ language with examples from topics in numerical analysis, differential equations and finite elements. As a prerequisite, some programming knowledge, e.g., MATLAB projects. The course will cover the main C++ elements: data types; pointers; references; conditional expressions; streams; templates; Standard Template Library(STL); design and debugging techniques.

**ENGN 2912C. Future Directions in Computing: From Bio and Quantum to Nano and 3D.**
Silicon-based electronics is the foundation of computing devices. The computer industry is reaching an important milestone, where physical limits arising from using optical lithography manufacturing techniques can...
stop the evolution of computational power as predicted by Moore's law. In this class, we explore some of the alternatives that can be used for future computing devices. Topics covered include: quantum computing, bio-based computing, spin-based computing, nanotube-based computing, computing with light and 3D chips.

**ENGN 2912D. Networks and Network-on-Chip Design.**
Network-on-Chip communication fabrics are a very recent approach to multi-core system-on-chip design. This class will cover state-of-the-art research in the design and test of network-on-chip communication hardware and will compare these on-chip communication networks to more traditional networks. Additional aspects of system-of-chip design and test will also be explored. Prerequisites: ENGN 1630 and ENGN 1640 or equivalent experience in digital design.

**ENGN 2912E. Low Power VLSI System Design.**
This course deals with the design of digital systems for low power dissipation. Issues that will be addressed include CMOS power dissipation, analysis and design tools used for lower power digital circuits, design methodologies for low power CMOS circuits, low power architecture designs, and a discussion on future challenges in low power digital design. Prerequisites: familiarity with basic MOSFET structure and computer architecture principles; some circuit analysis helpful.

**ENGN 2912F. Soft Matter.**
This course is a special topics graduate course on soft matter, treating polymers, liquid crystals, surfactants, and colloids. The different topics will be unified by a common approach using statistical mechanics.

**ENGN 2912H. Interfacial Phenomena.**
This course is an introduction to various open problems in interfacial dynamics. Topic include capillarity and wetting, surface adhesion, stress singularities at moving contact lines, geometric and topological singularities in the interface, interfacial hydrodynamics, surfactant and Marangoni effects, evaporation and electrokinetics. Prerequisites: ENGN 2010, 2020, 2210, or 2810.

**ENGN 2912I. Selected Topics in Physics of Locomotion (PHYS 2610E).**
Interested students must register for PHYS 2610E S01.

**ENGN 2912J. Asymptotic and Perturbation Methods.**
In this introductory course to perturbation methods, topics covered are inspired by problems in solid mechanics (e.g. ridges and and kinks in thin plates), fluid mechanics (e.g. viscous boundary layers), electrical circuits (van der Pol oscillator), and include regular and singular perturbations, methods of strained coordinates, multiple scales, averaging, WKB, Laplace’s method and the method of steepest descent for approximating integrals, and solutions of partial differential equations. Prerequisite: ENGN 2010 and 2020.

**ENGN 2920A. Complex Fluids: Particles and Interfaces.**
Introduces dispersive systems (colloidal suspensions, emulsions, surfactant solutions, blood) with special attention to the thermodynamics and mechanics of interfaces. The course will bridge the physico-chemical and mechanical perspectives in the study of these materials. The intended audience is graduate students in Engineering, Physics, Chemistry, and Applied Mathematics. Prerequisite: We will sometimes use material from ENGN 2010/2020, such as differential equations, Fourier and Laplace transforms, elementary differential geometry, basic probability, vector calculus. Knowledge of basic solid/fluid mechanics will be helpful.

**ENGN 2920B. Mechanics of Energy Storage Materials.**
This course introduces the students to the mechanics aspects of battery materials and some of the current research problems. It will consist of a series of lectures by experts from academia and industry, which will cover the state of the art in lithium ion batteries, the role of mechanics in advancing the field, experimental studies, continuum modeling, ab initio modeling and practical design issues. There will be approximately one lecture each week (150 min); each lecture will focus on a specific aspect of battery materials, giving an in-depth treatment of scientific problems, the current state of understanding and future challenges.

**ENGN 2920D. Environmental Technologies and Human Health.**
This course explores interdisciplinary approaches to environmental safety and health drawing from Brown University faculty and other affiliated experts. Topics include history of environmental regulation and waste management; origin and chemistry of pollutants; biological impacts of exposure and risk assessment; pollutant dispersion, transport and bioaccumulation; and remediation technologies. Emphasis is placed on how scientific research impacts regulatory and engineering decisions regarding cleanup and management of contaminated sites. The target audience is graduate students and advanced undergraduates (permission required) with prior coursework in engineering, biology, or environmental studies. Enrollment limited to 30.

**ENGN 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ENGN 2980. Special Projects, Reading, Research and Design.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ENGN 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
Continuing Education

Continuing Education at Brown University offers multiple, high quality programs in the areas of:

• Adult & Professional Studies
• Undergraduate Summer Session for academic credit
• Non-credit Pre-College programs for students who wish to prepare for college life and experience life on an Ivy-League campus

In addition, in partnership with the Graduate School the division of Continuing Education administers an Executive Master of Healthcare Leadership program.

For further information on any of the programs offered through Continuing Education please visit their website at: http://www.brown.edu/ce/

Executive Masters Program

Executive Master of Healthcare Leadership

The Brown University Executive Master of Healthcare Leadership prepares visionary leaders to transform healthcare. This 16-month intensive degree program is designed for clinicians, executives, and senior administrators who have significant responsibility in the healthcare industry; including those from health care delivery, public health, drug and product manufacturing, health care consulting, health management systems, insurance, patient advocacy, and from legal, policy and regulatory settings. It is a blend of on-campus and online learning that allows participants to work full time while pursuing an advanced degree.

The faculty and participants in the program have a depth of experience in the healthcare industry and are fully engaged in addressing the gaps and constraints of the current system. The course of study is tailored to this industry and leadership development is purposefully considered in the healthcare context.

Course of Study

• Creating the Learning Healthcare Organization
• Data-Driven Decision Making: The structure, conduct, review, and evaluation of research
• Financial Decisions in the Changing Healthcare Landscape
• Healthcare Policy: Yesterday, today, and tomorrow
• Information-empowered Patient Care: Electronic health records, health information technology, and medical information systems
• Management and Marketing Skills for Transforming Healthcare
• Navigating the Regulatory Maze
• Strategic Planning and Value Creation in Integrated Healthcare
• The Critical Challenge

For further information including admission criteria and tuition and fees please visit: http://www.brown.edu/ce/executive/healthcare-leadership/
Center for Advanced Materials Research
The Center for Advanced Materials Research was established in 1989 as an independent academic unit at Brown. Its goal is to coordinate and facilitate research and education in materials sciences across the campus, as well as to foster inter-institutional scholarship and study of modern materials by advanced experimental and theoretical tools. The center is an umbrella organization, presently anchored within several engineering disciplines and the departments of physics and chemistry at Brown, with developing links to biology and biomedical sciences.

The organizational and administrative purpose of the center is threefold:
1. To catalyze and enable multi-investigator, interdisciplinary faculty research teams in modern materials sciences, to enhance the development of such programs, and to provide effective operation within a block research grant framework.
2. To administer several central research laboratory facilities, including the Electron Microscope Facility, Microelectronics Facility, and the Joint Engineering Physics Instrument Shop (JEPIS machine shop). These facilities provide essential resources for undergraduate courses from several science departments and for Ph.D. thesis research.
3. To explore the development of interdepartmental educational programs in modern materials science education both on and off campus. These include the Institute for Elementary and Secondary Education’s annual institute “Thinking with Stuff.” In addition, the center sponsors an educational outreach program through the National Science Foundation Materials Research Science and Engineering Center (MRSEC) block research program. This MRSEC program currently includes a summer research experience for undergraduates and a K–12 school visitation program offering advanced materials science demonstrations.

The center welcomes inquiries, especially in the areas of scientific issues and the availability of its sophisticated laboratory facilities. The Center for Advanced Materials Research is directed by Professor William Curtin, Professor of Engineering.

For additional information, please visit the center’s website at: http://www.brown.edu/Departments/Advanced_Materials_Research/

Africana Studies
Chair
Corey D. B. Walker

Located in the historic Churchill House on the campus of Brown University, the Department of Africana Studies is the intellectual center for faculty and students interested in the artistic, historical, literary, and theoretical expressions of the various cultures of Africa and the African Diaspora. Central to the intellectual work of the department is the close collaboration of artists and scholars in examining relationships between academic and artistic knowledge about the world and human experience. Our commitment to rigorous scholarship and robust student and community development is grounded in a truly global understanding of the reach and implications of the Africana World.

For additional information, please visit the department’s website: http://brown.edu/Departments/Africana_Studies/

Africana Studies Concentration Requirements

The concentration in Africana Studies critically examines the artistic, historical, literary, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Central to the work of students and faculty in the concentration is the close collaboration of artists, scholars, and writers in examining relationships between academic and artistic knowledge about the world and human experience. Concentrators work closely with faculty members in developing new knowledge about the world and human existence through the critical and comprehensive study of the peoples and cultures of Africa and the African Diaspora.

Concentrators are encouraged to study abroad in Africa, the Caribbean, and/or Latin America and to acquire language competency in a language other than English spoken in Africa and the diaspora.

In order to develop requisite competency, Africana Studies concentrators must complete eight (8) semester-long courses offered by or cross-listed with the Department. Concentrators may also petition the Department to accept other appropriate courses.

Of these courses, the following two Africana Studies courses are required:
- AFRI 0090 An Introduction to Africana Studies (Fall ONLY)
- AFRI 1360 Africana Studies: Knowledge, Texts and Methodology– Senior Capstone Seminar (Spring ONLY)

The Department encourages foreign study in Africa, the Caribbean, and Latin America, during the student’s junior year. While the department actively supports programs in South Africa, Tanzania, Ethiopia, Brazil, and the English-Speaking Caribbean, concentrators must complete at least six (6) courses in residence at Brown.

The Department also encourages the acquisition of language competencies, in addition to English, which are spoken in Africa and the Diaspora. Since no continental African language is currently offered at Brown, concentrators who study abroad and acquire certified competency in any African language are welcome to petition the department for competency credit.

Honors
Africana Studies’ concentrators with outstanding records may be admitted to the department’s Honors Program. Prior to the end of the concentrator’s junior year and while working in consultation with a faculty advisor, the student must prepare a work plan. This plan, not to exceed three (3) typewritten pages, must be approved and signed by the faculty advisor who is to direct the Honor’s thesis. At the onset of the senior year, the Honor’s candidate is expected to have become familiar with the secondary works in the field. Secondary readings should be extensive and be incorporated into the work plan. The Honor’s candidate is also expected to complete a research paper of distinguished quality while enrolled in a 1000-level seminar. Participation in the Africana Studies senior-level capstone seminar AFRI 1360 is required.

For students completing graduation requirements by the end of Semester I (Fall), projects must be submitted by December 1st. For students completing graduation requirements by Semester II (Spring), the project should be submitted by April 20th. By the end of the fourth (4th) week of the concentrator’s seventh (7th) semester, a written proposal approved by the advisor and a secondary reader must be submitted to the concentration advisor. A progress report, prepared and signed by the student and countersigned by the faculty advisor must be presented to the concentration advisor.

Africana Studies Graduate Program
The department of Africana Studies offers a graduate program leading to the Ph.D. in Africana Studies.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/africana-studies-0
Courses

AFRI 0090. An Introduction to Africana Studies.
This course introduces students to the vibrant and contested field of Africana Studies by critically exploring and analyzing the links and disjunctures in the cultural, political, and intellectual practices and experiences of people of African descent throughout the African diaspora. Beginning with a critical overview of the history, theoretical orientations, and multiple methodological strategies of the discipline, the course is divided into three thematic units that examine intellectuals, politics, and movements; identity construction and formation; and literary, cultural, and aesthetic theories and practices in the African diaspora. DVPS LILE WRIT

AFRI 0100A. Playwriting I (TAPS 0100).
Interested students must register for TAPS 0100 S03

History is characterized by many forms of gross injustice, as well as by efforts to prevent, redress, or make amends for them. This seminar examines a series of case studies in retrospective justice, including war crimes tribunals, truth and reconciliation commissions, national apologies, and reparations movements, as well as the work of Brown’s recent Steering Committee on Slavery and Justice

AFRI 0110B. The Last Professors.
Addresses the profound effects of contemporary economic, political, and social changes on the role and function of the university in the 21st century. A primary concern of the seminar is to critically analyze how and in what ways the transformations in the broader society challenge, constrain, and, at times, frustrate critical intellectual activity. The seminar will draw on a broad and diverse set of readings ranging from classic statements by Cardinal Newman and W.E.B. DuBois to contemporary critical analyses by Henry Giroux and Adolph Reed, Jr. Enrollment limited to 20 first year students. FYS

AFRI 0110C. Autobiography of the Civil Rights Movement.
Most of the rich written history of the civil rights movement originates from first-hand accounts documented in oral histories and autobiographies. This interdisciplinary course plots the milestones of the civil rights movement through the lens of several autobiographies. The aim is to critique autobiography as a historical document as well as use it to tell the stories of the civil rights movement. We will compare and contrast different texts, analyze content and map a history of the era. Students will work with a writing fellow to develop one critical paper and one autobiographical paper. Enrollment limited to 20 first year students. FYS

AFRI 0120. Philosophy of Race and Gender.
Prejudice of many kinds, such as racism and sexism is so embedded in our modern social institutions, and so traditional and pervasive that we often fail to notice it. Furthermore, race and gender have been used repeatedly to explain differences. This course is a rigorous examination of the philosophical meanings of race and gender, from a variety of historical, anthropological and feminists perspectives

AFRI 0160. Twentieth-Century Africa.
An introduction to recent African history, the course combines chronological and topical approaches. It is organized around the major epochs of colonialism, decolonization and post-colonial independence, but within those periods, we will concentrate on themes such as health, environment, development, the state and artistic expression. Readings draw heavily on primary sources. Three exams and two projects, including group work

AFRI 0170. Afro-American History and Society Before 1800.
Focuses on the history of Africans and persons of African descent in the part of North America that now constitutes the U.S. Centers on the 18th century, but gives some attention to the 17th and 19th centuries as well. Most of the readings are devoted to the English colonies, but some concern themselves with Dutch, French, and Spanish settlements

AFRI 0190. Caribbean History and Society Before 1800.
Examines some of the themes important in the transatlantic societies of the Caribbean from the 17th through the early years of the 19th century. Explores Creole societies, plantation economies, ethnicity, maroon societies, class and racial divisions, acculturation, syncretic religions, and patterns of slave resistance. Danish, Dutch, English, French, and Spanish settlements are studied

AFRI 0200. Modern Caribbean History and Society.
This course will critically examine five themes in modern Caribbean history and society: What is the Caribbean? Nationalism, religion, economic development, and popular culture. These themes will be discussed with reference to the different geographical, racial, cultural and political spaces, which comprise the Caribbean

AFRI 0210. Afro Latin Americans and Blackness in the Americas.
This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present-day. Emphasis is on a multidisciplinary engagement with issues and the exposure of students to the critical discussion of national images and realities about blackness and Africa-descended institutions and practices. The role of racial issues in national and transnational encounters and the consequences of migration of people and ideas within the hemisphere are explored

AFRI 0220. From Emancipation to Obama: Journeys in African American History.
This course explores African American History through the lens of black freedom struggles. The struggles take all forms, between black and white from local to national levels, within and between black communities, and between men and women. This course assumes some familiarity with basic U.S. History and will utilize a variety of primary sources from autobiographical material to visual art and music as well as the usual monographs and articles. Aside from reading, students will be required to work with a writing fellow on 2 papers. There are also 2 exams

AFRI 0280. Race, Slavery, Modernity and Knowledge.
This course will review some of the central texts that constitute the different meanings of modernity and discuss how these texts became part of our framework for thinking about modernity, the human self and its different representations. The course will also engage texts that make attempts to complicate the meanings of modernity through a set of engagements with the issues of slavery, colonialism and race. Some key words in the course are: modernity, knowledge production, double-consciousness, social construction of race, racial slavery, coloniality. First Year Seminar

AFRI 0330. Mande Dance, Music and Culture (TAPS 0330).
Interested students must register for TAPS 0330 S01 (CRN 26754)

AFRI 0560. Psychology of the Black Experience.
This course is designed to facilitate understanding of African American psychological experiences. We begin by critically reviewing historical approaches to the psychological study of Black people. We then shift to an examination of the themes, and research currently being generated by those involved in the quest for scholarly self-definition and for redefinition of the psychological fabric of the Black experience

AFRI 0570. 20th Century Black Feminist Thought and Practice in the U.S.
This course will explore the ways that black women in the U.S. have experienced racial and gendered discrimination as well as what sorts of strategies (e.g., political, intellectual, narrative, and creative) black women have devised in response. We will be especially concerned with elements of African-American feminist thought and its articulation in writings, music, literature and practice/activism in the 20th century U.S. Enrollment limited to 80

AFRI 0580. Black Theology.
In this era of Black Power... theology cannot afford to be silent." This lecture course will plunge the depths of James H. Cone's statement by critically interrogating the cultural, political, and theoretical dimensions of the development and evolution of Black Theology. The course will consider the nature and task of theology with particular reference to its contested role in American public life, the complex relation between theology, race, and radical politics, and the connections and disjunctures between Black Theology and the fields of history, literature, and philosophy

AFRI 0600. Race, Gender, and Urban Politics.
This course will introduce students to the methods and practice of studying black urban life with a primary focus on US cities. We will critically examine the urban cultural studies debates concerned with race, gender, class and sexuality. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and
AFRI 0650. Eighteenth-Century Art—Imagining the Global Eighteenth
ideas that have conventionally constructed a particular version of Africa
about these three issues outside of the dominant set of images, tropes and
Trauma and Public Memory in some African societies. We will undertake
current issues in African societies: War, Violence and Sovereignty; the
Using an interdisciplinary methodology this course will examine three
conceptual formulation and political articulation of Black Power including
AFRI 0640. Contemporary Issues in African Politics and Culture:
with the subject of war
revolution should be love inspired”. This course will plumb the depths
AFRI 0630. Drama and War in Africa: New Voices.
This course is an historical, political and topical examination of the subject
of War on the African continent as seen through the lens of artistic
response. Class discussions will be based on the different Stage, Screen
and Radio Dramas that will serve as course materials. We will analyze
reflections by African artists and scholars on the violent conflicts that
have characterized the region’s recent history, as well as closely related
international perspectives, such as those evident in Hotel Rwanda and
The Last King of Scotland. We will also explore how political actors have
used performative techniques, and will specifically examine the ways
that other members of society (especially women and children) deal with
such crises. Canonical African dramatists like Fugard, Ngugi, Soyinka
and Ousmane Sembene will be referred to, but emphasis will be laid upon the New
Voices emerging from a range of African nations, including Rwanda, Uganda, Congo, Senegal, Sudan and South Africa, that have engaged
AFRI 0640. Contemporary Issues in African Politics and Culture:
Thinking Africa Differently.
Using an interdisciplinary methodology this course will examine three
current issues in African societies: War, Violence and Sovereignty; the
Politics of Gender in the African postcolonial and the meanings of History, Trauma and Public Memory in some African societies. We will undertake
this examination by “thinking about Africa differently,” that is by thinking
about these three issues outside of the dominant set of images, tropes and
ideas that have conventionally constructed a particular version of Africa
AFRI 0650. Eighteenth-Century Art—Imagining the Global Eighteenth-
Century (HIAA 0650).
Interested students must register for HIAA 0650 S01
AFRI 0700. Freedom Films.
Freedom Films” is a First Year Seminar which will focus on historical
documentary films related to the Southern Civil Rights Movement of the
1960s. We will analyze how these films reflect, change and inform
our views of the traditional Civil Rights Movement and how some offer
contrasting narratives of that movement. We will also examine how and
in what ways the films accurately and adequately reflect the historical
realities of the Southern Civil Rights Movement based on readings and
research. Enrollment limited to 20 first year students. DVPS FYS
AFRI 0710A. Racial and Gender Politics in Contemporary Brazil.
Brazil is commonly understood as an example of a “racially democratic”
nation, but as scholars have recently shown, racism permeates all aspects
of Brazilian society. This course traces the development of the theorization
of race, racial identity and race relations in contemporary Brazil. The
approach of the course will be interdisciplinary, drawing upon works
from anthropology, literature, history, music, and film. Topics will include
colonialism and enslavement, nationalism, social activism and popular
culture. We will also consider how Brazilian social relations differ from or
conform to other racialized patterns in other nation-states in the Americas.
Particular attention will be placed on the intersectionality between race,
gender, class, and nation. WRIT
AFRI 0710B. Ethics of Black Power.
In his now classic text Blood in My Eye, George Jackson writes “All
revolution should be love inspired”. This course will plunge the depths
of Jackson’s remark by critically interrogating the ethical dimensions of
the Black Power concept and the cultural, ideological, and political
interventions influenced by the conceptual revolution. We will assess the
ethical parameters of the various ideological tendencies that influenced the
formal conceptualization and political articulation of Black Power including
Black Nationalism, Feminism, Liberalism, Marxism-Leninism-Maoism and
Pan-Africanism
AFRI 0760A. Rastafarianism.
This course explores the philosophy, history, politics, and theology of
Rastafari, one of the Caribbean’s most influential and misunderstood
liberation movements
AFRI 0760B. Raggae, Rastafari and Revolution.
Bob Marley in the song Revolution declares, “Revolution Reveals.”
Beginning from this frame this course will examine the history of Rastafari
since it was formed in the late 1930s as an Afro-Caribbean religious
practice. It will examine how the emergence of ragga music in Jamaica in
the late 1960s mixed and then became one central ingredient of what has
been called “conscious music” in the period of the flowering of anti-colonial
and black radicalism in the 20th century. This course will explore how
ragga music became a form of subaltern language rethinking questions of
nation and history in the Caribbean and Africa
AFRI 0800B. African American Literature and the Legacy of Slavery
(ENGL 0800B).
Interested students must register for ENGL 0800B S01
AFRI 0850. The Politics of Gender in the Caribbean Novel.
This course will examine 20th Century Caribbean Literature as a genre,
which poses challenges to colonialism and raises profound questions of
sovereignty. It will examine how Contemporary Caribbean Literature
contributes to the world of literature in general
AFRI 0880. Hip Hop Music and Cultures.
This course will explore both the history of the emergence of Hip Hop
and the heated debates that surround it: aesthetics, censorship, sexism,
violence, musical theft, originality, authenticity, the politics of cross-racial
exchanges, urban black nihilism, and corporate influences on culture.
These debates will be framed by our consideration of urban black life,
African-American cultural formations, gender, representation, technology,
commodification, pleasure and politics. Enrollment limited to 200
AFRI 0890. Narratives of Power.
Close readings and critical discussion of some of the most influential
discussions of power in the past two centuries. Seeks to develop an
appreciation of the complexity and elusiveness of discourses of power
AFRI 0901A. Unruly Crossings: Queerness, Race and Globalization
(MCM 0901A).
Interested students must register for MCM 0901A S01
This course examines the ways in which literature is influenced by major
historical events with special reference to the literatures of the Caribbean.
Students will undertake a critical examination of the fictional representation
of Europe’s encounter with Africa and Asia in the Americas
AFRI 0980. Fela Anukalpo Kuti and the Social, Cultural, Political, and
Aesthetic Implications of AfroBeat.
Fela! The social, cultural, political and aesthetic implications of
Afrobeat. This course will examine how all of the above converge in the
development and evolution of Afrobeat, with a particular focus on the
impact of "colonialism* on African society and culture. Interested students
should have an interest in cross-cultural analysis, music appreciation, and
the willingness to explore and investigate West African/Nigerian/Yoruba
society and culture
AFRI 0990. Black Lavender: Black Gay/Lesbian Plays/Dramatic
Constructions in the American Theatre.
An interdisciplinary approach to the study of plays that address the
identities and issues of black gay men and lesbians and offers various
perspectives from within and without the black gay and lesbian artistic
communities. Focuses on analysis of unpublished titles. Also includes
published works by Baraka, Bullins, Corbitt, Gibson, Holmes, West, and
Pomo Afro Homos. Some evening screenings of videotapes. Enrollment
limited to 40. WRIT
AFRI 1020A. Black Cultural Studies.
No description available
AFRI 1020B. Freedom in Africana Political Thought.
This course will be a comparative analysis of freedom as a central value in
political thought. It will do this by comparing the knowledge and practices
of freedom to slaves in the Haitian Revolution, the ideas of freedom in the
Civil Rights Movement, and then finally, the conceptions of freedom in South Africa. Enrollment limited to 30

AFRI 1020C. The Afro-Luso-Brazilian Triangle.
Examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. Enrollment limited to 40.

AFRI 1020D. Race, Rights, Rebellion.
Provides an in-depth examination of different kinds of social movements. Emphasis will be placed on the theoretical and methodological distinctions among the various kinds of social protests and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, key concepts will include power, resistance, subaltern, hegemony, identity politics and consciousness.

AFRI 1050A. Advanced RPM Playwriting.
Third level of RPM Playwriting; for students that have successfully completed RPM Playwriting and Intermediate RPM Playwriting (workshop). Instructor permission.

AFRI 1050B. Africana Feminism.
No description available.

AFRI 1050D. Intermediate RPM Playwriting.
Second level of RPM Playwriting; for students that want to continue developing their RPM plays or want to begin a new project (workshop).

AFRI 1050E. RPM Playwriting.
Research-to-Performance Method (RPM) Playwriting guides students through the process of developing new plays that are informed by scholarly research (workshop).

AFRI 1050G. Narrating the Radical Self.
How black women in the United States and elsewhere have written about their lives in autobiographies will be the focus of this course. We will discuss black women’s use of autobiographical writing to document their own individual experiences in political movements as well as to provide key insights into how black people throughout the black diaspora have organized in recent history. Enrollment limited to 20.

AFRI 1050H. Introduction to Post-Colonial African and African Diasporic Theatre.
This class will explore plays/theatrical works and ideologies of a selected group of playwrights from Africa, the Caribbean, and the United States. Explores Culture, Creativity and Theatre practices, the course will focus on the ways in which these artists have syncretically responded to varied forms of colonization and creolization. This class will also pay attention to the Post Colonial Social and historical context that continues to impact and influence these modes of artistic production.

AFRI 1050K. Special Topics in RPM Playwriting: Playwriting Strategies From Contemporary Black Theatre.
A study of Aristotle’s Poetics in relation to Dubois’ four principles of black theatre and Audre Lorde’s essay “The Master’s Tools.” What makes black theatre “black”? We will analyze plays from the 20th Century African-American canon as sites of aesthetic resistance to “normative” American Theatre; and write our own one-act plays based upon our discoveries. Prerequisite: Course is restricted to students who have taken any Africana Studies RPM Playwriting course, Theatre Arts Introduction to Playwriting, Literary Arts Intermediate or Advanced playwriting courses, or has playwriting experience.

AFRI 1050L. RPM Playwriting: Advanced and Staging.
AFRI 1050M. Roots of African American Fiction: Oral Narrative through Richard Wright.
This course will employ a variety of narrative forms -- oral folktales, WPA narratives, slave narratives, short stories by European and American writers -- will also investigate the multiple traditions of African American fiction.

AFRI 1050P. Art and Civic Engagement: Creativity/Reality.
The primary objective of this course is to learn about and reflect upon public art and communities. This course will use selected public art and artists’ ideologies as a framework for exploring culture, creativity, politics and practices and focus on the ways in which these public art works and artists’ responses to varied forms of internal and external operators and stimuli successfully and unsuccessfully give voice to aspects of the environment, history, culture, social justice, health, politics and the imagination. This course will also pay attention to arts organizations, government agencies, history, power relations, human resources as well as leadership and the political that continues to influence public modes of artistic production.

This seminar examines various examples of creative and poetic non-fiction, pertaining to race and the African American experience. While touching upon historic examples and precedent, emphasis will be on contemporary works, including the genres of poetry, drama, the narrative, the memoir, the travelogue and the personal essay. The course will explore what these works offer to the knowledge, popularization and perception of black history and to the shaping of cultural dialogue on blackness and race. Enrollment limited to 25.

AFRI 1050R. The History of Afro Futurism and Black Science Fiction.
Any class called The History Of Afro Futurism and Black Science Fiction automatically begs the question -- “Well, what isn’t futuristic about being Black in America?” The entire history of Black America can be seen as a fundamentally futurological and science fiction enterprise -- a perpetual bidding on hope and struggling for change endeavor that frequently employs far flung visions of tomorrow and other more oblique speculative stratagems in pursuit of outcomes barely foreseeable in the near-present. Enrollment limited to 25.

AFRI 1060A. Africa Since 1950.
This seminar offers a survey of post-colonial African history, while probing the challenges of writing post-colonial history. Readings and discussions will focus on histories that bridge the colonial and post-colonial periods. How robust are these periods? What can historians draw from post-colonial theory? How can historical narratives account for both the colonial legacy and post-colonial dynamism. Enrollment limited to 20; instructor permission required. Students with a background in African history or contemporary African social science will be given priority. Interested students should email the professor at Nancy_Jacobs@brown.edu. DVPS.

AFRI 1060C. Contemporary African Philosophy.
An examination of some of the most influential work on problems of identity and being, theology and theodicy, time and history, method and evaluation, race and racism, postcoloniality and liberation in contemporary African philosophy. Readings include the work of Anthony Appiah, Frantz Fanon, Kwame Gyekeye, Pauline Hountondji, D. A. Masolo, John Mbiti, Kwame Nkrumah, Léopold Senghor, Tsenay Serequeberhan, among others.

AFRI 1060D. Harlem Renaissance.
Explores the literature, music, and art of the so-called Harlem Renaissance, within the context of broader transformations in African American and American culture and politics in the decade of the 1920s. Readings include books by Langston Hughes, Zora Neale Hurston, Nella Larsen, Alain Locke, Wallace Thurman, and Claude McKay; contemporary essays, reviews and manifestoes; and recent critical studies.

AFRI 1060E. West African Writers and Political Kingdom.
Do West African writers have a role to play in the changing political landscape of their countries? An examination of the ways and means through which a select group of West African writers have dealt with issues that relate to the role of the state in the management of individual and group relations, the politics of gender, civil and military relations, and the construction of new forms of civil society. Enrollment limited to 20.

AFRI 1060F. Philosophy and Race.
This advanced seminar in Africana philosophy will examine critical texts and thinkers that articulate the problems, methods, and techniques for interrogating the interrelationships between the discourse of philosophy and modern conceptions of race. The seminar will move to consider contemporary engagements in this area by drawing on readings and thinkers from analytical, continental, feminist, marxist, and pragmatist philosophical traditions.
AFRI 1060G. Black Radical Tradition
This advanced seminar in Africana philosophy will explore the contours of insurgent forms of Africana social and political philosophy. With a temporal focus on the twentieth century, we will concern ourselves with explicating the dominant themes, theoretical orientations, and methodological understandings that in/form constructions and articulations of the varities of Africana feminism/womanism, black nationalism, Marxism-Leninism-Maoism, Pan-Africanism, and radical democracy. Enrollment limited to 20

AFRI 1060H. Racial Frontier in South African History
This seminar will focus on racial categories in South Africa. We will explore the historical and cultural dimensions of race and race relations and the subjugated or Caliban tradition of Native Americans and African Americans, Euro-Americans and African Americans over the legitimacy of the hegemony that Euro-Americans were establishing over increasing portions of North America. This course views American philosophy as having within it two opposing traditions that have been engaged in ongoing angry dialogues: the dominant or Prosperous tradition of Euro-Americans and the subjugated or Caliban tradition of Native Americans and African Americans

AFRI 1060K. African Literature After Achebe: Emerging African Writers
In this course we will analyze how contemporary, emerging and marginally-read African writers contest the traditional and widely-held interpretations, understanding and assumptions of African literature. We will read and think about African literature in the contemporary post-colonial and post apartheid moment in Africa. Authors discussed include Dambudzo Marechera, Zoe Wicomb and Binyavanga Wainaina, among others

AFRI 1060L. Varieties of American Philosophical Experience
In contrast to Pragmatist and Eurocentric-oriented views of American philosophy, this course will emphasize the colonial dimensions and features of American philosophy that emerged out of the colonial soil of early America. Out of this soil sprang extended debates between Native Americans, Euro-Americans and African Americans over the legitimacy of the hegemony that Euro-Americans were establishing over increasing portions of North America. This course views American philosophy as having within it two opposing traditions that have been engaged in ongoing angry dialogues: the dominant or Prosperous tradition of Euro-Americans and the subjugated or Caliban tradition of Native Americans and African Americans

AFRI 1060M. African Environmental History
This seminar will be devoted to the study of the environment and power in the history of sub-Saharan Africa. The goals for this class are that you learn more about the history of Africa, about the ways that relations with the environment shaped its human history, about the construction of environmental knowledge and its repercussions, and about historical research.

This course also has an applied dimension. Eight African environmental professionals visiting Brown through the Watson Scholars of the Environment (WISE) program will also participate in the class. In their final course project, students will conduct research of use to the WISE fellows on historical cases related to their training at Brown. (For more information see http://www.watsoninstitute.org/ge/watson_scholars/).

This course qualifies as a capstone seminar in the history department. Enrollment limited to 20 students. Instructors permission required. Interested students should email the instructor at Nancy_Jacobs@brown.edu with a description of their interests and background

AFRI 1060P. African Literature: Chinua Achebe
We will analyze the works of Chinua Achebe. In particular, we will explore how Chinua Achebe’s novels and essays contest the traditional and widely-held interpretations, understanding and assumptions of African people and literature. We will read and consider his work in both pre and post colonial African contexts. In addition to the sessions held by the instructor, Professor Chinua Achebe, himself, will join the class for several sessions to engage in conversation with students

This course explores the endurance and erosion of the apartheid legacy, as expressed in historical and fictional narratives. We begin with transition to majority rule and continue with the administrations of Mandela, Mbeki, and Zuma, connecting the formative histories of these leaders with the changing dynamic of politics. We end with narratives about the ways that ordinary people experienced new times. The syllabus includes scholarly works in history and politics, biography, fiction and film. Two short writing assignments and a major research paper. Enrollment limited to 20 juniors and seniors. DVPS WRIT

AFRI 1070. RPM: Traditional and Contemporary Elements of Intertribal Indigenous Theater in America
Utilizes Rites and Reason Theater’s research-to- performance method of developing new play scripts to examine the development and relationship of the colonial Euro-American art form, theatre, to its existence within the Indigenous intertribal (Native American Indian) communities in America

AFRI 1080. The Life and Work of W. E. B. Du Bois
From the publication of The Souls of Black Folk in 1903 until his death in Ghana sixty years later, W. E. B. Du Bois remained one of America’s most penetrating analysts of what he called “the color line.” Students read and discuss a selection of Du Bois’s writings from his career as journalist, essayist, sociologist, historian, poet, political leader, and pioneering Pan-Africanist. Prerequisite: one course in AC, AF or US History

AFRI 1090. Black Freedom Struggle Since 1945
Lecture course that examines the extended history of the mass civil rights movement in the U.S. Starting at World War II, we consider the roles of the courts, the federal and state governments, organizations, local communities, individuals and various activist strategies in the ongoing struggle for African American equality, focusing on African American agency, particularly in the South, but also in Boston, Mass. Sources include photographs, documentaries, movies, letters, speeches, autobiographies, and secondary readings. Requirements: Weekly readings, documentary viewings, 4 short papers, 2 exams
AFRI 1110. Voices Beneath the Veil.
Thirty plays, written by Afro-American playwrights and presented on the American stage between 1858 and the 1990s, are examined as cultural and historical documents of Afro-American realities. Supplementary readings from the humanities and social sciences provide critical framework for in-class discussions and student papers. Instructor permission required. WRIT

AFRI 1110L. Aspects of Contemporary Prose Practice (LITR 1110L).
Interested students must register for LITR 1110L S01

Interested students must register for ANTH 1110 S01

AFRI 1120. African American Folk Traditions and Cultural Expression.
A research, development, and performance workshop designed to explore, examine, and articulate various folk traditions and cultural expressions of African Americans. Readings include slave narratives, folktales, and the works of Hughes, Hurston, Bass, and Baraka. Topics covered are music as the African American language of choice, Africanisms in Afro-American culture; and race, color, class, and culture. Instructor permission required

AFRI 1140. Women and the State and Violence.
Examines the role of black women in 20th-century political movements, including with the turn-of-the-century antilynching campaigns, the southern civil rights movement, the black liberation movement, and contemporary educational activism for human rights. Central concerns include history of American radicalism and analyses of antiracist experiences, and the politics stemming from African American women’s leadership. Prerequisites: AF 150 and/or AF 125

AFRI 1150. Afro-Caribbean Philosophy.
An introduction to the field of Afro-Caribbean philosophy. The first half focuses on the history of the field, identifying its African background and surveying some of its major schools, such as the Afro-Christians, the poeticon, the historicists, and existentialists. The second half consists of a more intensive comparative focus on the ontologies and epistemologies of two of these schools

AFRI 1150F. Home and Abroad (LITR 1150F).
Interested students must register for LITR 1150F S01

Examines the ways in which medical knowledge has been produced in sub-Saharan Africa. Treats all medical discourses and practices—including biomedicine and “indigenous” and pluralist medicines—as culturally-based systems of knowledge production. Explores the political economy of health and disease and the role of medicine and medical practices (hygiene, epidemiology, demography) in producing and maintaining power in both the colonial and postcolonial periods

Recovers black women’s history and renegotiates American history. Throughout the seminar, discussions will analyze the various tensions that complicate black women’s lives, from accommodation to resistance, or gender issues versus racial issues, or the class tensions that pervade the African American community. Through the series of readings loosely hinged around themes and concepts, students will gain knowledge and understanding of the rich social, intellectual, political and economic networks and activities that African American women undertook on a daily basis in order to survive, progress and uplift. The course encourages the development of a broader and more comprehensive grasp of the complexities American, racial and gender histories. Must have taken at least one Women’s History course and one U.S. history course. Enrollment limited to 20. DVPS LILE WRIT

AFRI 1180. Visual Cultures of the Afro-Americas.
This course will examine how the visual modalities of power operate to ascribe, authenticate, and contest meaning within the Afro-Americas, understood here to include Afro-Caribbean, Afro-Latin American and African-American cultures. We will query the complex histories and technologies that constitute the social life of vision in the Afro-Americas, while cognizant of the fact that the field of visibility cannot be understood from single point of view. We will consider images made of and images made by peoples of African descent throughout the Americas as we attend to the reception, interpretation and reproduction of images, as well fields of invisibility. Enrollment limited to 20 juniors and seniors

This course will examine the dual Haitian Revolution as a pivotal moment in the making of the modern world. It will review the various historical interpretations of the Haitian events, examine how these events contribute to or troubles our ideas about modern politics and notions of freedom as well as our conceptions of revolution. The course will engage in these issues by working through three archives: Vodou Religion; The Art of the Revolution and the conventional historiography about the revolution, and will be tied to the hosting of a joint Brown/RISD exhibition on Haitian Art. Enrollment limited to 15 juniors and seniors concentrating in Africana Studies, Visual Art, or History; and 15 RISD students

Interested students must register for MCM 1200D S01

AFRI 1210. Afro-Brazilians and the Brazilian Polity.
Explores the history and present-day conditions of Afro-Brazilians, looking specifically at the uses of Africana in contemporary Brazil, political and cultural movements among Afro-Brazilians, domestic politics and its external dimensions, and Brazilian race relations within a global comparative framework. Texts from a variety of disciplines. A reading knowledge of Portuguese is not required but students so advantaged should inform the instructor

AFRI 1250. Women in the Civil Rights Movement.
This seminar focuses on women in the civil rights movements, spanning the years of 1955-1968. This course examines issues of gender, race, sexuality, social protest, nonviolent civil disobedience and self-defense during the height of activism against apartheid in the United States and for civil rights

AFRI 1260. The Organizing Tradition of the Southern Civil Rights Movement.
This seminar aims to fill in some of the gaps of the official canon by emphasizing that the modern (1954-1966) southern civil rights movement was not as it is mainly portrayed, a movement of mass protest in public spaces led by charismatic leaders; but rather, a movement of grassroots community organizing - quiet day-to-day work. Enrollment limited to 40

AFRI 1280. Writing About Race in the Post Civil Rights Era.
This seminar is an explanation of the transformation of racial policies, relations and rhetorics since the end of the civil rights era in the United States. We will examine the complex ways race has remained central to US society and yet has dramatically shifted- examining terms such as: color-blind society; integration; political race, racialized (and gendered) community formation. Enrollment limited to 20. WRIT

AFRI 1360. Africana Studies: Knowledge, Texts and Methodology.
This course will explore the issues of Africana Studies as a discipline by engaging in a series of critical readings of the central texts, which laid the protocols of the discipline. The course will also raise issues of knowledge production and methodologies. This course is a senior capstone seminar. Open to all senior Africana Studies concentrators; others by instructor permission only. Enrollment limited to 25. DVPS LILE

This course will examine the dual Haitian Revolution as a pivotal moment in the making of the modern world. It will review the various historical interpretations of the Haitian events, examine how these events contribute to or troubles our ideas about modern politics and notions of freedom as well as our conceptions of revolution. The course will engage in these issues by working through three archives: Vodou Religion; The Art of the Revolution and the conventional historiography about the revolution, and will be tied to the hosting of a joint Brown/RISD exhibition on Haitian Art. Enrollment limited to 15 juniors and seniors concentrating in Africana Studies, Visual Art, or History; and 15 RISD students

AFRI 1470. Southern African History.
This course examines major themes of the history of southern Africa from the earliest times until 1994, with a heavy emphasis on historiographical
debates. Our discussions of the South African past will always be informed by a consideration of the approach of the scholars who have interpreted and presented it as history. Our major questions concern the origins of historical change and the creation of racial groups. We will probe the significance of race in South African history but also the limitations of its explanatory power. Readings are arranged at three levels. First, we will be reading primary sources, to gain experience in working with the evidence that informs historical work. Second, we will be working through a concise textbook that summarizes the major themes of South African history. Third, we will be reading specialized scholarly books and articles, chosen to illustrate recent discussions about the interpretation of South Africa’s past. The course will meet twice a week for lecture and discussion groups will meet once a week

AFRI 1500. Incarceration, Education, and Political Literacy.
This seminar (w/out audits) in politics and social justice is open to juniors/ seniors. Captivity has become a critical political-social phenomenon in U.S. democracy, given that the United States has over two million people in prison/jails/INS detention centers. This two-part, one-year long course examines and maps (using cyber technology) captivity and criminality in the United States, focusing on race, gender, politics and literacy. Students are strongly urged to take both semesters; the second semester course as practicum, with training in cyber-technology and community-based learning/illiteracy, is open only to those who complete the fall course (PI I) and the grade option for the second part of the course will be S/NC. Pre-Semester writing assignment required; see syllabus on WebCT for details

AFRI 1540. Black Popular Cultures.
This course is an historical and topical examination of the development of black popular cultures. We will explore the debates about popular culture and specifically examine the ways that race (as well as gender, sexuality and class) shape these debates. In addition we will explore specific black popular cultural practices (music, dance, film, radio, theater, etc.) as well as the larger contexts for their production and reception. Instructor permission required

The aim of the course is to introduce students to novels like Head’s A Question of Power, El Saadawi’s God Dies by the Nile, Adochie’s Half of a Yellow Sun and other major prose works by contemporary African women writers. It will present the African woman as a writer, her environment and her commitments. The emphasis is on the writing of continental African women, but will include works of other women writers. For a brief but necessary historical background to the course, it will be introduced with selections from Margaret Busby’s Daughters of Africa. Enrollment limited to 25

AFRI 1600. History, Nation, Popular Culture and Caribbean Politics.
Examines Jamaican popular music as an ideological site of resistance to Creole nationalist versions of Caribbean history and politics. It grapples with the meanings of race, history, and nation-state as contested notions in Jamaican/Caribbean society tracing an alternative genealogy of Caribbean history and politics

Interested students must register for ARCH 1615 S01 (CRN 16437)

Examines the development of a unique African/American cultural and political identity in New Orleans. The seminar focuses on the development of the Faubourg Treme, the oldest free black community in the United States, and covers the period from 1718 until 1809. Topics include: slavery and resistance; relations between enslaved and free blacks; social and political agitation; and the resulting early development of the nation’s Civil Rights movement and legislation. There is discussion also of the formation and continued tradition of artists’ and artisans’ guilds; Creole language (e.g., Creole slave songs, proverbs); NOLA relationship to the Caribbean and Latin America. Enrollment limited to 20. DVPS

Focus on origins of Modernism among Africana authors of the Americas, with emphasis on the poetry, poetics and poetry movements of Brazil and Latin America, the Caribbean and US from 1888 through the first half of the 20th century. Begins with an overview of innovations wrought by Ruben Dario of Nicaragua, arguably the first modernist poet, and continues with the Harlem Renaissance of the 1910’s and 20’s: the Brazilian writers at the center of the Week of Modern Art of 1922; Caribbean writers of the Negriismo and Negritude movements; concludes with the work of such US and Anglophone Caribbean poets as Gwendolyn Brooks, Robert Hayden and Martin Carter. Enrollment limited to 20. DVPS

This course on the history of Africa begins as European empire unraveled after the Second World War and ends with a look toward the future. Development was high on the international and national agenda in the mid-twentieth century, but the most conspicuous outcome of the following decades was dependency and decline. Yet the story is more mixed than has been represented in American headlines; it was not one of pre-determined and constant failure. More than ever, at the beginning of this new millennium, conditions across the continent have diverged. What are current signs for future development or continuing crisis? WRIT

AFRI 1710A. Political Visions and Community Formations.
This course aims to consider the depths of connection between forms of racialized, gender, class and sexual oppression as a vis a vis the creation and maintenance of community and intimate social bonds among the oppressed. We will read sociologists, historians and others who have worked at this intersection and musicians and writers such as: Morrison, Barbbara, Baldwin, Hil-Collins, Hansberry, soul and neosoul artists. Instructor permission required. Enrollment limited to 20

AFRI 1710H. Black Internationalism and African American Literature (ENGL 1710H).
Interested students must register for ENGL 1710H S01

AFRI 1710I. Harlem Renaissance: The Politics of Culture (ENGL 1710I).
Interested students must register for ENGL 1710I S01

Interested students must register for ENGL 1710J S01

AFRI 1710P. The Literature and Culture of Black Power Reconsidered (ENGL 1710P).
Interested students must register for ENGL 1710P S01

A lecture course examining the history of Eastern Africa from earliest times until 1963. The area includes the Great Lakes region, the Horn of Africa, Madagascar, and the East African Coast. The major topics are: precolonial interactions, the development of states and stateless societies, contact with other Indian Ocean people, the slave trade, colonial rule, and independence movements

AFRI 1760B. Contemporary African American Literature and the End(s) of Identity (ENGL 1760B).
Interested students must register for ENGL 1760B S01

AFRI 1760T. Literary Africa (ENGL 1760T).
Interested students must register for ENGL 1760T S01

AFRI 1800. Race, Empire and Modernity.
Taking Cicero’s notion of empire as “ways of life”, this course will survey the history of empires as forms of rule. It will explore how race has been deployed in the various types of empire. The course will pay particular attention to empires in modernity since 1492. The course will think about the various technologies of rule and their discourses of power

This course examines some contemporary responses to the human condition in Africa. Topics will include Democracy, human rights, instability, social justice, identity, community and solidarity. These topics will be approached through the works of Canonical figures such as Leopold Senghor, K. Nkrumah, Frantz Fanon, Steve Biko and the recent analytical (T. Kiros), Hermeneutical (T. Serequebarhan), Existential (L. Gordon) Historicism and poeticism (P. Henry) and Postcolonial Mislocation (M. Diawara)

AFRI 1850. The Civil Rights Movement: History and Legacy.
Explores the origins, conduct and complex legacy of the Civil Rights Movement. Topics include: historical roots of the movement; the campaign against legal segregation; the birth of S.N.C.C.; Black Power; the impact of the Cold War; Vietnam and the coming of African independence; and
the movement’s impact on other political struggles, including movements among women, Latinos, and Native Americans

AFRI 1890G. Contemporary Art of Africa and the Diaspora (AFRI 1890G).
Interested students must register for HIAA 1890G S01

AFRI 1900A. Senior Seminar in Science and Society (SCSO 1900).
Interested students must register for SCSO 1900 S01

AFRI 1900T. The Postcolonial and the Postmodern (ENGL 1900T).
Interested students must register for ENGL 1900T S01

AFRI 1905D. African American Musical Theatre (MUSC 1905D).
Interested students must register for MUSC 1905D S01

Interested students must register for BIOL 1920A S01

AFRI 1920B. Health Inequality in Historical Perspective (BIOL 1920B).
Interested students must register for BIOL 1920B S01

AFRI 1920D. Race, Difference and Biomedical Research: Historical Considerations (BIOL 1920D).
Interested students must register for BIOL 1920D S01

This is a thematic course on the philosophical and literary themes which emerge from the Caribbean novel and writing in general

AFRI 1955. History and Memory in Africana Literature.
Focuses on the close reading of nine works by writers of African descent - encompassing a variety of eras, forms and genres, stretching from the slave narrative to more contemporary settings. The thrust is to examine how each writer wrestles with issues of history and memory, with particular attention to the sometimes explicit, sometimes implicit interest in ideas and modes of expression that are rooted in African culture. Enrollment limited to 20 sophomores, juniors, and seniors; preference given to Africana Studies and English concentrators

Interested students must register for HIST 1965 S01

AFRI 1970. Independent Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Interested students must register for HIST 1971X S01

This course will be a close reading of the various ideas, theories and practices of the thinkers, writers, artists and activists whose work and practice have constituted an Africana intellectual tradition. In conducting this review we will examine questions around the formation and the history of thought and intellectual traditions in general. We will also think about the various fields of knowledge which have shaped Africana thought. The course therefore will spend some time working through the different meanings of intellectual work and critical thought and theory. Enrollment limited to 12 graduate students

A preoccupation of Africana Studies involves the central yet highly contested role of the notion of what constitutes black culture in the modern world. To what degree can we claim aesthetic and other distinctions between black cultures in the Diaspora and other modern western cultural practices and expressive forms? What role did enslavement, forced migration and segregation play in shaping Africana culture in the modern west? These cultural debates which played a central role in literary, musical, philosophical, aesthetic, historical and sociological analyses of the culture of people of African descent frame this course. Enrollment limited to 12 graduate students

Race and the Modern World is a team taught interdisciplinary graduate seminar that critically examines the intersections of ideas, institutions, ideologies, and practices that have defined race and processes of racialization in the modern era. The seminar will closely examine the theoretical and methodical issues in the critical study of race; the politics and political theories of race; the imbrications of discourses of race, culture, and public life; the political economy of race; and the intellectual history of the discourse of race with an emphasis on the university as a key site in the production of racial knowledge. Enrollment limited to 20

AFRI 2101. Africana Studies and Interdisciplinarity.
This graduate seminar brings together various methodological and theoretical approaches to interpreting Africana life, culture, thought, and politics. Placing special emphasis on emergent scholarship that shapes and reshapes the discipline of Africana Studies, we examine a selection of humanistic and social scientific studies of various local, national, and international contexts. The texts demonstrate the ways in which innovative interdisciplinary methods are crucial for understanding the complexity of the Africana world. We will give attention to the strategies scholars utilize to formulate their research questions, design their methodologies, and create new ideas that contribute to the advancement of Africana Studies scholarship. Enrollment limited to 20

AFRI 2102. Interdisciplinary Methods and Africana Studies.
This graduate seminar focuses on interdisciplinary methodology and Africana Studies. The seminar explores how students and scholars in Africana Studies use interdisciplinary methods developed in the social sciences and the humanities in novel and innovative ways. Students will critically examine key methodological issues in Africana Studies and how and in what ways these issues are similar to and differ from such disciplines as economics, history, sociology, and literature. Prerequisite: a prior undergraduate or graduate level methods in Humanities or Social Sciences. Enrollment limited to 20

AFRI 2110. Anthropological Theories in Africa (ANTH 2110).
Interested students must register for ANTH 2110 S01

This class is a topical, upper-level elective seminar on African American women and Performance Theory, with an emphasis on common readings and individual research projects. Enrollment limited to 20

AFRI 2450. Exchange Scholar Program.

AFRI 2760U. Reading the Black Masses in Literature and Critical Practice (ENGL 2760U).
Interested students must register for ENGL 2760U S01

AFRI 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z).
Interested students must register for ENGL 2760Z S01

AFRI 2970C. Rethinking the Civil Rights Movement (HIST 2970C).
Interested students must register for HIST 2970C S01

American Studies

Chair
Robert George Lee

The Department of American Studies at Brown remains committed to the interdisciplinary study of the American experience, drawing on a range of methodologies and practices to understand American society and cultures. As one of the oldest departments of American Studies, Brown’s program has an almost seventy year history of activist teaching faculty fully engaged in research; prize-winning and productive graduate students who now teach their own students around the world; and curious and exciting undergraduates who use their educations in a wide range of fields from medicine to law; from social work to library science. In recent years, American Studies has begun a new MA in Public Humanities and based our revitalized undergraduate curriculum on the idea of a publicly engaged scholarship. Faculty and students have together pioneered new avenues in transnational research, exploring the role of the United States in the world and the importance of the world in the United States, and expanded our research and teaching into digital scholarship.

For additional information, please visit the department's website: http://www.brown.edu/Departments/AmCiv/
American Studies Concentration Requirements

The concentration in American Studies seeks to understand American society and cultures as emerging from historical and contemporary processes at work in local, national, and global contexts. Concentrators study for four broad themes: social structure and the practices of identity, space and place, production and consumption of culture, and science, technology, and everyday life. The concentration is predicated on the ideal of scholarly engagement with the public, so students take junior seminars that span some aspect of the public humanities such as public policy, memorialization, community studies or civic engagement. Study abroad is supported and encouraged.

A concentrator in American Studies will be able to:

• Analyze texts, contexts, and data from multiple disciplinary and historical perspectives
• Synthesize research as verbal, visual and/or digital presentations
• Explore the theory and/or practice of the engagement of scholarship with a broader public
• Understand how American society and cultures have been and are being shaped by global flows of people, goods and ideas
• Experiment with new media as critical tools for scholarship

Concentrators have gone on to a vast variety of careers, including law, public humanities, politics, public service, academics, business, creative arts, and medicine.

Each concentrator will take 10 courses including a Junior Seminar as one of four seminars. Courses are organized by the four themes and four approaches that define American Studies at Brown. Each concentrator will use this framework to create an individual focus in consultation with the Concentration Advisor.

The focus is the flexible core of the concentration. Here each student builds a coherent and dynamic interdisciplinary structure of related courses that develops his or her compelling interest in some aspect of American experience. The four themes and four approaches provide the foundation on which each student builds a unique concentration in American Studies.

All seniors in the class of 2013 forward will be required to do a capstone electronic portfolio. Some concentrators may elect to do an Honors Thesis.

Study abroad is supported and encouraged.

Four Themes and Four Approaches

American Studies at Brown is concerned with four broad themes:

• Social Structures and the Practices of Identity: How do communities and individuals come to define themselves, and how do others define them, in terms of, among other categories, nation, region, class, race, ethnicity, gender, sex, religion, age and sexuality? How do organizations and institutions function socially and culturally? What are the roles of social movements, economic structures, politics and government?

• Space and Place: How is space organized, and how do people make place? This includes the study of natural and built environments; local, regional, national and transnational communities; and international and inter-regional flows of people, goods, and ideas.

• Production and Consumption of Culture: How do people represent their experiences and ideas as culture? How is culture transmitted, appropriated and consumed? What is the role of artists and the expressive arts, including literature, visual arts and performance?

• Science, Technology, and Everyday Life: How does work and the deployment of science and technology shape American culture? How do everyday social practices of work, leisure and consumption provide agency for people?

How we study

American Studies at Brown emphasizes four intersecting approaches that are critical tools for understanding these themes:

• Cultural and Social Analysis: Reading and analyzing different kinds of texts, including literary, visual, aural, oral, material objects and landscapes. Examining ethnic and racial groups, institutions, organizations and social movements.

• Global/International Contextualization: Comprehending the United States as a society and culture that has been shaped by the historical and contemporary flows of people, goods and ideas from around the world and in turn, learning about the various ways in which America has shaped the world.

• New Media Understandings: Understanding the creation of new forms of discourse, new ways of knowing and new modes of social organization made possible by succeeding media revolutions. Using new media as a critical tool for scholarship.

• Publicly Engaged Scholarship: Connecting the theory and the practice of publicly-engaged research, understanding and presentation, from community-based scholarship to ethnography, oral history, and museum exhibits. Civic engagement might include structured and reflective participation in a local community or communities or the application of general theoretical knowledge to understanding social issues.

American Studies Graduate Program

The department of American Studies offers graduate programs leading to the Master of Arts (A.M.) in American Studies; the Master of Arts (A.M.) in Public Humanities; and the Doctor of Philosophy (Ph.D.) in American Studies.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/american-studies

Courses

AMST 0150B. Boston: A City Through Time.
This interdisciplinary seminar for first year students will examine the City of Boston from its seventeenth-century origins to the present day. Among the topics covered will be architecture, city planning, physical expansion, political leadership, urban renewal, historical preservation, park development, racial and ethnic tensions, and suburban sprawl. Includes a Boston tour. Enrollment limited to 20 first year students. FYS

AMST 0150D. The West in the American Imagination.
No region has such a purchase on Americas’ collective imagination as the West. No region is so drenched in misrepresentation and mythology. In this seminar, we will use fiction, film, and works of history to explore the American West as both historical reality and wellspring of collective myth. Enrollment limited to 20 first year students. FYS

AMST 0150F. What Does A Woman Want?.
This course is an introduction to psychoanalysis and its vexed and productive relationships to women and feminism. Freud asked his famous question: “What does a woman want?” after years of clinical practice and theoretical speculation. Woman’s desire remained a mystery to him, but the attempt to solve it has given rise to a rethinking of human sexuality, of gender, of social structures, and of creativity. We will read foundational texts by Freud and by feminist disciples and critics of psychoanalysis theories. The literary texts will be read as critiques of theoretical positions, as well as examples of particular historical constructions of gender. The course is broadly interdisciplinary and explores the boundaries and intersections of different disciplinary practices and frameworks. Enrollment limited to 20 first year students. FYS

AMST 0150G. Women / Writing / Power.
An introduction to American women’s writing and to the development of feminist literary practice and theory. This course will cover a broad historical range from the colonial poets Anne Bradstreet and Phillis
Wheatley to contemporary writers Toni Morrison, a Nobel Laureate, and Marilynne Robinson, a Pulitzer Prize winner. Attention to the effects of racial, class, and cultural differences will inform this course that will focus on gender and literature. Enrollment limited to 20 first year students. FYS

AMST 0150H. China in the American Imagination. Since Columbus, China has held special place in the American imagination. Americans from different vantage points have imagined China as a source of wealth, labor, or souls to save, as a victim, a revolutionary model, factory and bank. Using literature, material culture, and film, we will seek to understand how different groups of Americans, including merchants, workers, women, African Americans and Chinese Americans, have constructed “China”. Enrollment limited to 20 first year students. DVPS FYS

AMST 0150I. Race, Sex, and Biology: A Cultural History of Differences. Are your race, gender, and sexual orientation biologically pre-determined? This course traces the history and cultural implications of theories of racial and sexual differences. We examine three “scientific” theories – Darwinism, eugenics, and genetics – in popular culture, public policies and social movements, and consider how these social constructs both empowered and disempowered women, homosexuals, and racial minorities. Enrollment limited to 20 first year students. FYS WRIT

AMST 0150J. The Boy Problem. Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and has constructed an image of the teenage boy as both symptomatic of and responsible for the nation’s ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 first year students. FYS

AMST 0190A. Selling Love, Selling Sex: Romance in Popular Culture. Where do our beliefs about love and romance come from? Is it true that “sex sells”? This course examines representations of love in advertising and popular culture from the 1920s, 1950s, 1980s and the present. We’ll compare texts such as Lady’s Home Journal, I Love Lucy, and Dynasty to Maxim, Desperate Housewives, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190B. Histories of Memory/Memories of History. This course examines the role of historical narratives in popular culture and politics, using memoir, films, newspapers, political cartoons, and scholarship to think about how such narratives build and break local, national, and transnational communities, serve and interrupt different kinds of political agendas, and reform the way we orient ourselves to the way we live and to those with whom we live. How is the past made? By whom? Topics will include the Holocaust, the Vietnam War, Columbus, memorials, and holidays. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190C. American (Mass)culinities: Sexuality, Race and Aesthetics. This course explores masculinity in American popular cultures since 1945. Starting with theories of homosociality, racial and gender formation at the turn of the century, to modern and post-modern cultural productions that visualize or narrativize “masculinity” including novels, films, and video. Through frameworks of psychoanalytic theory, queer theory and critical race theory we think about masculinity as narrative, as a set of discourses, an epistemology, an aesthetic and privileged form of American. How do we understand the politics of race and sexuality through images of male bodies? What it means to decouple masculinity and men? What are the relationships between gender/genre? Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190D. Popular Music and the City. This course will examine the relationship between popular music and its sociocultural context by concentrating on three urban music forms: blues, soul, and hip hop. Readings will focus on: (1) concepts such as audience, the music industry, cultural infrastructure, and race; (2) processes such as urbanization, demographic change, and the politicization of popular music. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190E. It’s the End of the World As We Know It: Zombie and Apocalypse Narratives in American Pop Culture. Zombie narratives originated as part of racist colonial ideologies prevalent in Haiti and the Caribbean, and have since become a means of social and political critique. This course charts how the zombie has been re-appropriated and re-deployed in American culture. Taking an interdisciplinary approach, we examine zombie and apocalypse narratives in film, literature, comics, and video games. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190F. Beyond the Tourist Trap: The Past, Present, and Future of Asian American Urban Spaces. Beyond the lure of the “exotic” food, cultural festivals, and distinctive architecture of Chinatowns, Little Tokyos, Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are at once historical remnants of an exclusionary past and the current embodiment of the diversity of ethnic communities. This class seeks to understand such spaces by considering the people involved — those within and outside of the community — and the complex relationships among community groups. Texts will include histories, maps, works by urban planners, and a field trip to Boston's Chinatown. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States. This course traces nativist anti-immigrant movements and violence in the United States. Starting in the colonial period and ending with contemporary issues, the course demonstrates how anti-immigrant movements occur across place and time and serve to police the boundaries of U.S. citizenship. The course relies on fiction, documentary films and other historical texts to highlight continuing violent conflicts. We focus on the use of “vigilante” violence and put contemporary discussions of immigration in a new frame. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190H. Junkies, Robots, and Fight Clubs: Revisiting the “American Dream” in US Popular Culture. From fembots to fightclubs, this course explores our obsession with revisions of the American Dream. We examine film and literary translations of three recycled stories—Rags-to-Riches, the Open Road, and Domestic Bliss—to better understand how we narrate the “American” experience and consider how these nationalizing narratives construct race, class, and gender. Films and texts include *Stepford Wives,* "Easy Rider," and "Wall Street.” Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190K. The American War/Vietnam War: Politics, Struggle, and the Construction of History in the US/Vietnam. What Americans call the "Vietnam War," the Vietnamese remember as the "War of Resistance against the United States for National Salvation." This class seeks to explore multiple American and Vietnamese perspectives on an aestheticized conflict that profoundly shaped the nations’ political, social, and cultural landscapes. We focus on differences and similarities in Vietnamese and American interpretations of the origins, conduct and denouement of the war. We examine war memories through memoirs, monuments, movies, documentaries, magazines, and newspapers, as well as in foreign and domestic policies. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190S. Los Angeles Plays Itself: Culture and Critique in the City of Angels. Explores the history of culture produced in and about Los Angeles during the last century, examining representations of the city in literature, film, television, music, and theory. Texts ranging from detective novels to teen dramas to hip-hop songs will reveal the ongoing conversations and conflicts among Los Angeles’s diverse inhabitants that have shaped its physical, cultural, and social landscapes. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190T. Talking Social Reform: From Populism and Progressivism to Obama and McCain. This course argues that two broad “languages” of social reform, coming out of the Populist and Progressive Movements of the late nineteenth century, have shaped the ways in which Americans understand politics. Students consider how the possibilities for contemporary reform and change have been informed by these languages. We will examine political texts discussing the New Deal, the eugenics movement, the Cold War,
liberalism, and the New Left, among others. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190U. Sports Mediated: Athletics and the Production of Culture in 20th Century America. When we watch sports, we’re watching more than a game. Newspapers, radio, television, and the internet produce athletic spectacles within certain cultural boundaries determined by profits, as well as by race, gender and class. The course questions how sports media played a generative role in late twentieth century American culture through three case studies: Michael Jordan’s rise to sports stardom; the emergence of skateboarding as an “alternative” sport; and controversies surrounding transgender and transsexual athletes. Non-sports fans are welcome and encouraged! Enrollment limited to 17 first year students and sophomores. Instructor permission required. WRIT

AMST 0190V. Reading the City: Literary Tourism in New York, Los Angeles, Santo Domingo and Manila. What shapes our conception of a city we haven’t visited? Is it the novels we read or the films we watch? How do our ideas change when we tour or live there? This course investigates New York, Los Angeles, Santo Domingo, and Manila through the various social, political and sexual experiences portrayed in novels, creative nonfiction, poetry, and film. Mindful of our own role as reader-tourists, we will compare depictions of reading, visiting, touring, and living in cities especially with regards to issues of identity and its transformation. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190W. Displaying Activism Then and Now: Making an Exhibition for Social Justice. We will investigate the possibilities for activism and social relevance through museum exhibitions. We will create an exhibition at the John Hay Library that displays historical and contemporary activism, based on student choices of possible movements including queer rights, animal rights, and environmental concerns. Students choose objects, write labels, and act as curators for the exhibit. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy. Today’s women workers migrate at a historically unprecedented rate. This class looks at Third World women who migrate for work in global cities. We examine their experiences through the intersectional lens of gender, race, class, and nationality. We also question the social, political, and economic forces that drive migration and draw women workers to specific destinations. Finally, we will look at the multiple inequalities these workers confront and the ways in which they negotiate and challenge them. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190Y. Dead or Alive?: The American West in Popular Culture. This course traces the imagined Western frontier as seen in television, film, photographs, films, and personal narratives beginning during the war in the 20th Century. We will investigate the possibilities for activism and social relevance through museum exhibitions. We will create an exhibition at the John Hay Library that displays historical and contemporary activism, based on student choices of possible movements including queer rights, animal rights, and environmental concerns. Students choose objects, write labels, and act as curators for the exhibit. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0190Z. Are You Creative?: The Rise of a Modern Virtue. Are you creative, or, even, a “creative”? Do you plan to be an entrepreneur, a writer, or an artist? Today, “creativity” is championed by education activists, fringe artists, and corporate CEOs alike. This course gives a critical perspective by tracing the biography of an idea through various fields. We will look everywhere for signs of creativity and focus on the relationship between creativity, work, and economic development, taking of Providence, RI, the “Creative Capital” as an example. We will talk to people involved in various aspects of the city’s creative strategy to investigate how these films interact and intersect with other cultural texts and narratives of race, criminality, sexuality, and the American dream. Films studied include “Colors”; “New Jack City”; “Clockers”; “Boyz’n the Hood”; and “Menace II Society”; while readings come from film studies, sociology, history, memoir, and policy studies. Enrollment limited to 17 first-year students and sophomores. WRIT

AMST 0191A. Race, Sex, and Biology: A Cultural History of Differences. Are your race, gender, and sexual orientation biologically pre-determined? This course traces the history and cultural implications of theories of racial and sexual differences. We examine three “scientific” theories -- Darwinism, eugenics, and genetics -- in popular culture, public policies and social movements, and consider how these social constructs both empowered and disempowered women, homosexuals, and racial minorities. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191B. TV on History: Representations of the American Past on Commercial Television. This course explores commercial television’s influence on our understanding of the American past and the way that this sense of history, in turn, helps audiences to form cultural and political identities. We will discuss foundational methods for critical analysis of television as we use this inquiry to examine some of the guiding themes of American Studies. This class, which has a significant viewing component, traces the evolution of history-based programming in many genres and considers the message and impact of programs such as Ken Burns’ Civil War, Roots, Colonial House, and Mad Men. Enrollment limited to 17 first year students and sophomores. WRIT

AMST 0191C. TV on History: Representations of the American Past on Commercial Television. This course explores commercial television’s influence on our understanding of the American past and the way that this sense of history, in turn, helps audiences to form cultural and political identities. We will discuss foundational methods for critical analysis of television as we use
for collective memory and mass consumption. The course works to
decenter the United States and takes into account long-range ramifications
and multiple voices. Enrollment limited to 17 first year students and
sophomores. WRIT

What does it mean to be Korean American? This course explores the historical and contemporary experiences of people of Korean descent in the United States. In the broader context of U.S.-Korean/Asian relations and through the lenses of race, ethnicity, class, and gender, this course will examine the connections and differences in the lives of diverse Korean populations. The composition of these populations ranges from adoptees, military wives, and entrepreneurs to secondary migrants from Latin America. Throughout the semester, students will be familiarized with the central themes in immigration and ethnic studies such as diaspora, transnationalism, racial formation, and community formation. Enrollment limited to 17 first years and sophomores

AMST 1010. Introduction to American Studies: American Icons.
Why do certain American photos, novels, and films become ‘iconic?’ What does the very word ‘icon’ mean? Studying a collection of American images, texts, places, and practices, this course investigates the key themes of American Studies. DVPS LILE

AMST 1250A. American Folk Art.
Examines material expressions of folk culture in America from the 18th century to the present. Focuses on the study of regionally idiosyncratic artifacts decorated beyond necessity and emphasizes the importance of the cultural context in which they were made and used. Visits to local burying grounds and museum collections during class and a Saturday field trip. Concludes with an original research project and final paper

AMST 1250B. Gravestones and Burying Grounds.
Students examine gravestones and burying grounds as material evidence of American cultural history. Themes include the forms of written language and visual imagery in colonial New England, changing roles of women and minorities in society, historical craft practices, implications of stylistic and visual imagery in colonial New England, changing roles of women and minorities in society, historical craft practices, implications of stylistic and visual imagery in colonial New England. Throughout the semester, students will be familiarized with the central themes in immigration and ethnic studies such as diaspora, transnationalism, racial formation, and community formation

AMST 1250E. The Neoclassical Ideal in America, 1775-1840.
This course examines the art, architecture, and domestic furnishing of America in the early national period. It focuses on visual culture as a reflection of the new nation’s self image as a democratic and enlightened society. Includes class visits to local burying grounds and museum collections, and a Saturday Boston field trip

AMST 1250F. Topics in Material Culture: Houses and Their Furnishings in Early America.
Old houses and the objects used to furnish them are interpreted as material evidence of domestic life in colonial and early national America. Through slide lectures and field trips, this class examines Providence’s historic buildings, museum collections, and public archives as primary documents in the study of cultural history. WRIT

AMST 1250G. Topics in Material Culture Studies: The Arts and Crafts Movement in America 1880-1920.
In the 1880s an international movement to reform the design of buildings and their furnishings took hold in America. Its proponents wanted to improve visual culture in America by advocating the pride and honesty of craftsmanship and by embracing the ideal of unity of design, but more important, they hoped to change the way Americans lived and worked. This course examines the architecture, furniture, silver, ceramics, and printed works of the Arts & Crafts Movement in America from 1880 –1920. Understanding and interpreting material life is emphasized through local field trips and first-hand experience with the collections of the RISD Museum

AMST 1520. Technology and Material Culture in America: The Urban Built Environment.
A slide-illustrated lecture course that examines the development of the urban landscape. Covers American building practices and the effects of rapid urbanization on our culture. Examines technological and behavioral aspects of architectural design and urban development. Topics include housing, factories, commercial buildings, city plans, transportation networks, water systems, bridges, parks, and waterfronts. A companion course to AMST 1530

Examines the cultural significance of the automobile. Employs materials and methodologies from various disciplines to study this machine and the changes it has produced in our society and our landscape. Slide-illustrated lectures cover such topics as the assembly line, automobile design, roadside architecture, suburbs, auto advertisements, and the car in popular culture.

A survey of the skills required for public humanities work. Presentations from local and national practitioners in a diverse range of public humanities topics: historic preservation, oral history, exhibition development, archival and curatorial skills, radio and television documentaries, public art, local history, and more. Enrollment limited to 50

This 8-week summer course begins with four weeks in Hong Kong, exploring the ways that private individuals, institutions, and government have preserved the city’s cultural heritage, examining the conflict and negotiation of economic and political interests in urban renewal and heritage conservation and preservation. The second four weeks are in Providence, where students will explore the history and present-day philosophy and politics of preserving sites and stories from Colonial times to the present, exploring historical archaeology, historic preservation, museum exhibition, and oral history. This is a double credit course. Enrollment limited to nine Brown students and nine from Hong Kong. S/NC

AMST 1570. Site- Specific Writing in Brown’s Historical Spaces.
Using on-site writing techniques, students will write, workshop, and direct research-based site-specific short plays to be performed by local actors in historic Providence mansions. Class discussion will explore local history (class includes a walking tour), performance texts, and types of site-specific work. Students will emerge having written and directed a research-based work in a National Historical Landmark. Enrollment limited to 13. S/NC

AMST 1610A. American Advertising: History and Consequences.
Traces the history of American advertising, particularly in the 20th century, to understand the role advertising plays in our culture. Topics include the rise of national advertising, the economics of the advertising industry, the relation of advertising to consumption, the depiction of advertising in fiction and film, and broadcast advertising.

AMST 1610C. American Popular Culture.
This interdisciplinary course examines the history of popular culture in the industrialized United States, drawing on methodologies from different fields, and using a variety of evidence, including minstrel song sheets, amusement parks, television, and romance novels. We look at the audience, the producers and the texts presented by American popular culture both domestically and internationally.

AMST 1610F. Asian America Since 1945.
Since the end of WWII the Asian American community has undergone radical transformations. This course will examine the shifting political and cultural status of Asians in America, the demographic revolution in Asian America ushered in with the Immigration Reform Act of 1964, Asian Americans and globalization of the US economy, and Asian Americans in contemporary US race relations.

AMST 1610G. Asian American History.
This course focuses on Asian America as a historical subject and on Asian Americans as makers of their own histories. It is loosely chronological but principally organized around the emergence of an Asian American historical voice. Films, personal accounts, and historical analyses will be read. Many of the texts feature photographs, which we will engage primarily as historical documents. Examining the material realities they represent or suggest, we will also probe their political, economic and cultural dimensions. As weapon, commodity and heirloom, photography has been integral to shaping Asian Americans’ visibility and therefore their social position in the United States.
AMST 1610H. Asian Immigration to the Americas.
Asian America is an extremely diverse community including fifth generation Californians and yesterday’s arrivals: Hmong from Laos, Indians from Guyana, Japanese from Brazil, native born Americans, immigrants, refugees, adoptees, doctors, garment workers, physicists, poets, and storekeepers. The patterns of migration and settlement from Asia to the Americas-U.S. and Canada, the Caribbean and Latin America over the past two hundred years are examined.

AMST 1610I. Beyond Chinatown: Asian Communities in the United States.
From Manila villages in 18th-century Louisiana, to Punjabi-Mexican families in early 20th-century California, to today’s “little Saigons” and Asiamam cyberspace, Asian Americans have built a diverse array of communities in the U.S. The historical circumstances, social forces, and political movements that have shaped these communities are examined. Particular attention paid to the dynamics of race, ethnicity, class, gender, and sexuality in the development of these communities.

Examines the history of women/gender in relation to discourses about sexuality (both physical and mental) in the era of the Civil War through the progressive era. It samples a variety of ideas and movements, including efforts to regulate sexuality and initiatives to advance women into the medical and “helping” professions. Specialization is given to issues of class, race and ethnicity. DVPS.

Examines the evolution of child welfare in the United States from its origins in the late 19th century through its purported crisis in the late 20th. Specifically, will trace the history of policies and programs aimed at providing support for dependent children, and at dealing with deviant or delinquent children. Emphasis will be on understanding the social, cultural, and political contexts in which child welfare was formed and transformed during this century.

AMST 1610M. Childhood and Adolescence in American Literature and Culture.
A survey of how changing ideas of childhood and the “new” construction of the category of adolescence are mirrored in American fiction and poetry from the Puritans to the present. Among the writers considered are Anne Bradstreet, Harriet Beecher Stowe, Mark Twain, Henry James, and J. D. Salinger. Provides a comparative cultural perspective by studying works by Wordsworth, Dickens, Pater, and Kosinski.

AMST 1610N. Citizenship, Race, and National Belonging in the Americas.
What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, this course compares the racial and social experience of the U.S. Latinos with that of the populations in various countries in the hemisphere.

AMST 1610O. Civil Rights and the Legacy of the 1960s.
Recent mainstream interpretations of the 1960s tend to neglect the presence and participation of Chicanos and Puerto Ricans in the various movements for civil rights. Using an interdisciplinary approach and drawing on historical, autobiographical and contemporary texts, films, and documentaries, this course examines the Latino experience during the Civil Rights period and explores its legacy today in the lives of Latino and other racial minorities.

AMST 1610P. Class, Culture, and Politics.
Surveys the working class and radical movements that have challenged the ruling economic, political, and cultural systems. Major topics include the railroad uprising of 1877, the Knights of Labor, sexual utopianism and spiritualism, black nationalism, the Socialist and Communist parties, women’s and gay liberation, and the modern ecology movement. Emphasizes cultures. Prerequisite: At least one semester of a college-level course in U.S. history or literature. LiLE.

AMST 1610R. History of Sexuality in the United States.
This course introduces students to the history of sexuality in America from the colonial era to the present. This is not only a history of gay and lesbian communities. Rather it builds on those histories to create a portrait of how Americans, gay and straight, lived sexual lives in relationship to disciplines of knowledge, cultural and political institutions, and popular culture.

AMST 1610S. Immigration to the United States from the Sixteenth Century to the Present.
Explores 350 years of immigration to what is now the U.S. Organization is both chronological and topical. We will reconstruct and compare the major waves of immigration, consider causal theories of migration, examine U.S. immigration policy over time, debate the economic impact of immigration, and discuss the institutions and strategies that immigrants have designed to facilitate adaptation.

AMST 1610U. Introduction to Latino Studies.
A survey of the ways that aspects of the histories and cultures of the U.S. and Latin America have contributed to shape public policy issues and to differentiate the experiences of U.S. Latinos. Among the questions guiding class discussions: What are the implications of grouping nationally, racially, and socially heterogeneous populations under one term, such as Hispanic or Latino? To what extent do “ethnic labels” foster alliances among different ethnic or racial groups? DVPS LiLE.

AMST 1610V. Introduction to Latino Studies II: Culture and Identity.
Explores the ways in which gender roles and intergenerational expectations-diversified by race, class, national identity, and citizenship status-shape the varied identities and cultural experiences of Latinos and Latinas in different decades of the post-WWII period in the U.S.

AMST 1610W. Latino Immigration in the 20th Century.
The purpose of this course is to examine the political, economic, cultural and social impact of Latina/o immigration in the 20th Century and on Latina/o identity formation. We examine the intimate and personal history of the United States in relation to Latin America, Central America, the Caribbean, and Mexico that established interdependent relationships between nations and its people.

AMST 1610X. Latino Popular Music and Culture.
This course explores the various forms of popular culture associated with U.S. Latino communities. It focuses on the production, dissemination, and consumption of mass mediated cultural forms, primarily music, television, film and journalism, but it also examines other cultural expressions such as vernacular art, food, festivals, and folklore. Prerequisite: At least one semester of college-level course in U.S. history or literature.

AMST 1610Y. Latinos and Film.
Examines the ways Latinos have been constructed-and misrepresented-in Hollywood film from the silent era to the present, and compares these images with contemporary Latino-made films that counteract Hollywood stereotypes with more accurate and complex images of their own histories and cultures. Readings introduce students to film criticism from a Latino perspective. Weekly screenings in and outside class.

AMST 1610Z. American Popular Culture.
Popular culture is part of everyday life, but also an important site to examine how American identities have been both shaped and reflected through film, television, music, performance, and fashion. We trace American popular culture from the nineteenth century to the present, paying particular attention to the development of different media, and looking at the production and reception of popular culture, as well as cultural texts themselves. WRIT.

Examines the literature of first and second generation immigrant/ethnic writers from 1900 to the 1970’s. Attempts to place the individual works (primarily novels) in their literary and sociocultural contexts, examining them as conscious works of literature written within and against American and imported literary traditions and as creative contributions to an ongoing national discourse on immigration and ethnicity. DVPS.

AMST 1611C. Pacific Rim in American History.
This course is a comparative study of Filipino, Chinese, Japanese, Korean and Indian settlement in the United States. It begins in the 1700s when Filipino seamen first settled in what is now Louisiana and Texas and concludes with the end of World War II. Attention will be given to immigration from Asia and its relationship to the development of the capitalist world system, the role that Asian American labor played in class and racial formation in America the political economies of Asian American communities, and the various social movements and legislative efforts to exclude Asians from American society and Asian resistance to exclusion.
AMST 1611E. Popular Culture in the United States.
Focusing on popular culture since industrialization, the course will examine particular forms (broadcasting, romance novels, amusement parks, sports) we will as look at the producers of, and the audiences for, those forms. Requirements include three papers based on outside readings and a final project.

AMST 1611F. Race, Gender, and Community in Latina Autobiography.
Examines how Latinas chronicle their identities in transitions vis-à-vis markers of race and gender. Through autobiography, memoir, literary criticism, and theoretical readings emphasizing the negotiations of self, place and community via social and geographical locations including family, region, and the nation. Engages in critical interpretation of the socio-cultural and political worldviews of Latina self-discovery and self-authorship.

AMST 1611G. Race, Ethnicity, Religion and Community.
This course examines the intersection of religion and community for communities of color in the United States. A survey of these communities is guided by the desire to discover the collective stories and memories that socialize social and ethnic identities, and serve as a source of personal and political transformation. Out point of entry for understanding the sacred is at "ground level" perspective.

AMST 1611H. Religion and Society in the United States.
Offers a sociological perspective on theories of the relationship between religion and societies that will help us understand and analyze current religious practices and trends, both inside and outside of religious institutions. Students will conduct several observations in religious institutions and create religious rituals of their own.

AMST 1611J. Sex, Love, Race: Miscegenation, Mixed Race and Interracial Relations.
This class will explore the conditions and consequences for crossing racial boundaries in North America. We will take a multidisciplinary approach, exploring literary, anthropological, and historical writings along with several feature and documentary film treatments of the subject.

Examines the evolution of U.S. child welfare from its origins in the late 19th century through its purported crisis in the late 20th century. Traces the history of policies and programs aimed at: providing support for dependent children; improving infant and child survival and health; protecting children from exploitation and abuse; and dealing with deviant and delinquent children.

AMST 1611L. Trauma and the Shame of the Unspirable: The Holocaust, Slavery, and Childhood Sexual Abuse.
The problem of representing traumatic experience has been raised by philosophers, artists, and survivors. This course compares three historical situations by reading histories, memoirs, fictions, poems; viewing photographs and film; and analyzing the material cultural artifacts such as memorials. Readings will include Freud, Harriet Jacobs, La Capra, Primo Levi, Toni Morrison and "Maus" by Art Spiegelman.

AMST 1611O. Early American Film.
American film-making from its origins as a technological amusement to the period of classic Hollywood cinema. Particular attention given to representations of gender, race, and ethnicity with comparisons to the evolution of European film. The Birth of a Nation (1915) by D.W. Griffith will be a key text in dialogue with African-American director Oscar Micheaux's Within Our Gates (1920).

AMST 1611Q. The Asian American Case: Race, Immigration and the Law.
The central historical themes are exclusion, citizenship rights, and equal protection. The experience of Chinese and Japanese Americans dominates the historiography but we will use that scholarship to help us think about a wider range of issues across time.

AMST 1611R. Bourgeois Blues: Class Conflict in African American and Caribbean Literature and Film.
This course investigates class differentiation and its effects in African-diaspora novels, autobiographies, and films (such as The Good Negress, Brothers and Keepers, Crick Crack Monkey, and "Sugar Cane Alley"). Alongside these literary works and films, we will read a wide range of critical/theoretical essays on class and class conflict and the intersection between class and race, gender, sexuality, and nationality.

AMST 1611U. History of American Technology.
Examines in depth the period of immigration that stretched from the 1820s through the 1920s and witnessed the migration of over 36 million Europeans, Asians, Canadians, and Latin Americans to the United States. Explores causal theories of migration and settlement, examines the role of family, religion, work, politics, cultural production, and entertainment in immigrant/ethnic communities, and traces the development and impact of federal immigration policy.

AMST 1611V. Color Me Cool: A Survey of Contemporary Graphic Novels.
Surveys a variety of comic books and graphic novels, both mainstream and independent. The emphasis, however, will be on the independent graphic novel. Students will also read history and criticism to understand better the context from which the books emerge and to grasp more firmly their visual and textual aesthetics. Must attend first three lectures to be eligible for enrollment.

AMST 1611W. Asian Americans and Popular Culture.
From the Fu Manchu to Lucy Liu, Asian Americans have long been the objects of loathing, terror and desire, in American popular culture. This course looks Asian Americans in popular literature, music, theater, film and television as subjects, producers and consumers.

AMST 1611X. Narratives of Liberation.
This course investigates the relationship between popular music and technologies. This course examines the invention, introduction and use of new machines and systems, with a focus on infrastructure, manufacturing, and information and communication technologies. Special attention paid to labor, business, political and cultural contexts of technological change.

AMST 1612A. Chicago and America.
This course explores the history of Chicago, but also uses the city as a way to think about issues in American history. Sources include novels, memoirs, popular histories, film, and music.

AMST 1612B. Celluloid Americans.
The American motion picture developed as a unique art form in the late 19th century and its enduring cultural and social significance is irrefutable. In this course, we will explore US history using cinema to explore the cultural values represented within and shaped by the medium. Topics include the invention of the moving image, the rise and fall of the Hollywood studio system, and the emergence and evolution of film genres and styles (i.e. westerns, film noir, musicals, etc.) as a means of economically appealing to the masses and cultivating viewership domestically and abroad.

AMST 1612C. Growing Up in America.
This course will consider American narratives of adolescence and coming of age from the nineteenth century to the present. We will examine the archetypal aspects of coming of age with maturity and the world, class and gender roles, and the invention of "adolescence" as a new psychological category. International perspectives will be provided by reading some British and Japanese works. Authors covered will include Dickens, Melville, Twain, Alcott, Keroauc, Hemingway, Baldwin, Mishima and Tan, among others. Lectures, class discussions and student reports.

AMST 1612D. Cities of Sound: Place and History in American Pop Music.
This course investigates the relationship between popular music and cities. We will look at a number of case studies from the history of music in the twentieth century. We will try to tease out the ways that certain places
produce or influence certain sounds and the ways that musicians reflect on the places they come from in their music. Accordingly, we will consider both the social and cultural history of particular cities and regions—New Orleans, Memphis, Chicago, New York, Washington DC, and others—and aesthetic and cultural analyses of various forms of music—including blues, jazz, punk, hip-hop, and others

AMST 1612G. Henry James Goes to the Movies.
This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - *Washington Square, The Turn of the Screw, The Portrait of a Lady, The Golden Bowl* - and study the narrative and visual choices as interpretations of James’s texts. Critical readings on the art of fiction and the art of film will also be introduced

AMST 1612K. Immigrant America and Its Children.
With a focus on the experiences of the immigrant second generation, this course seeks to expose students to the recent social science literature on contemporary immigration to the United States, including discussions on its origins, adaptation patterns, and long-term effects on American society. We will closely examine patterns of assimilation and adaptation for the children of immigrants, address the challenges they confront when trying to straddle two cultures, describe their ethnic identity formation, and interrogate the effects of their increasing presence on U.S. schools and society in general. The experiences of the second generation will be examined in various institutions including the family, labor markets, schools, and community, and we will suture these institutions in both national and transnational spheres. The course will consist of lectures by the instructor combined with class discussion of assigned texts. This course will also provide students with an analytic framework to address questions of multiculturalism. The course will also help students develop a better understanding of the dynamics of race, class, gender, and sexuality in society

AMST 1612L. Eating Cultures: Food and Society.
This course will look at various ways to understand the complex role of food in society. We will look at issues of food production and consumption, and how our relationship to food contributes to the political and social structures that we live with. Our approach will be historical and pay special attention to the ways in which communities of color and immigrants have shaped, and have been shaped by, the food they cultivate, harvest, consume, and market. Field trips and readings explore how food creates ways for people to form bonds of belonging while also creating bonds of control and regimes of inequality. Enrollment limited to 20

AMST 1612M. Children of Immigrants.
Gives an overview of the experiences of the children of contemporary immigrants in the United States. It looks at their experiences in key social institutions including schools, the family and ethnic community. The course will examine the integration of immigrant children and how factors of race, class, and gender shape their experiences. To address the integration of immigrant children, the course will look at their process of assimilation, maintenance of transnational ties, and lastly the formation of youth identity

AMST 1612N. Political Theatre of the Americas (TAPS 1610).
Interested students must register for TAPS 1610 S01

AMST 1612O. 21st Century American Drama (TAPS 1650).
Interested students must register for TAPS 1650 S01

AMST 1612P. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805). Interested students must register for HIST 1805 S01

AMST 1612Q. Women / Writing / Power.
An introduction to American women’s writing and to the development of feminist literary practice and theory. This course will cover a broad historical range from the colonial poets Anne Bradstreet and John Dryden to contemporary writers Toni Morrison, a Nobel Laureate, and Marilynne Robinson, a Pulitzer Prize winner. Attention to the effects of racial, class, and cultural differences will inform this course that will focus on gender and literature. LILE

AMST 1612R. Race, Inequality, and the American City since 1945.
This course will explore the dynamics of race and class in American cities during the post-World War II period. The readings and discussions will focus on suburbanization, the decline of central cities, conflict over the use and definition of urban space, urban governance, spatial fortification, and popular dissent. The cities examined will include Buenos Aires, Chicago, Detroit, Liverpool, Los Angeles, New York City, São Paulo, and St. Louis

AMST 1612S. Introduction to American Indian Studies (ETHN 1890H).
Interested students must register for ETHN 1890H S01 (CRN 24626)

AMST 1612T. Slackers and Hipsters: Urban Fictions, 1850-Present.
Slackers and Hipsters surveys the cult of the cool and disaffected in literature and film over two centuries. Beginning with Melville’s “Bartleby the Scrivener,” but also sampling works as varied as Chatterjee’s English August and Kunkel’s *Incendium*, we will examine both the aesthetic and political implications of the “slacker” in his/her ironic, apathetic, and peculiarly alienated view of the world

AMST 1612U. Religion, Politics, and Culture in America, 1865-Present (HIST 1801).
Interested students must register for HIST 1801 S01 (CRN 15289)

AMST 1612V. History of Religion in America, 1600-1865 (HIST 1800).
Interested students must register for HIST 1800 S01 (CRN 24755)

AMST 1612W. Rethinking Women’s Bodies and Rights: Transnational Reproductive Politics.
This course examines the issues and debates surrounding women’s reproduction in the United States and beyond. It pays special attention to how knowledge and technology travel across national/cultural borders and how women’s reproductive functions are deeply connected to international political events and cultural narratives. Topics include: birth control, eugenics, population control, abortion, prostitution, reproductive hazards, genetic counseling, new reproductive technologies, midwifery, breastfeeding, and menstruation. Students will analyze historical and contemporary materials concerning women’s reproductive roles, as well as read scholarly studies on reproductive issues in various parts of the world

AMST 1700B. Death and Dying in America.
No description available. Open to juniors and seniors concentrating in American Studies

AMST 1700C. Slavery in American History, Culture and Memory.
Nearly four centuries have passed since the first enslaved Africans arrived in what is today the United States. More than 400 years have passed since American slavery was abolished. Yet slavery remains a palpable presence in the United States. In this interdisciplinary course, we will examine slavery as a problem in American history, culture, and memory, exploring the institution and its legacies in such arenas as history, literature, cinema, visual arts, and heritage tourism. Open to juniors and seniors concentrating in American Studies

AMST 1700F. American Publics.
Americans worry about the quality of their civic life and fear its decline. This junior seminar examines an important concept, the public sphere, in its popular and political dimensions as well as looking at the challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet—and offers a range of possible final projects. Not open to first year students or sophomores.

Enrollment limited to 20. WRIT

AMST 1700G. Public Memory: Narratives of 9/11.
This junior seminar focuses on narratives concerned with the events of 9/11 and their aftermath: documentary, testimony, stories, memoirs, novels, graphic novels and feature films. We will also study and visit some of the memorial museums and museums that have been proposed or created in connection to 9/11 and consider them in the context of public memory and public art. Course work will require a project or research paper that engages the question of the role of the humanities in the creation of the public memory of catastrophic events. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1700I. Community Engagement with Health and the Environment.
This junior seminar explores how local community organizations are taking up issues of health and the environment in culturally relevant contexts. We will examine issues of environmental justice, health disparities and the basic tenets of community based participatory research. We will then partner with a local community organization and, depending on need, assist in the design, implementation, and/or evaluation of a program designed to improve the local environment and/or health status of the
community. Enrollment limited to 20 junior and senior American Studies concentrators. WRIT

AMST 1900. Honors Seminar.
This seminar is for second-semester junior American Studies concentrators who are interested in writing an honors thesis in their senior year. The outcome of this course will be a proposal for the honors thesis along with a bibliography and a research plan and schedule. Topics covered will be the research methods associated with different disciplines; how to make the thesis interdisciplinary; integrating public projects and new media into a thesis. Open to juniors concentrating in American Studies. Enrollment limited to 20. S/NC

AMST 1900B. America and the Asian Pacific: A Cultural History.
From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DVPS LILE

AMST 1900D. America as a Trans-Pacific Culture.
From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors. DVPS LILE

AMST 1900F. Transnational Popular Culture.
This course looks at popular culture as a transnational phenomenon. Taking up issues of cultural imperialism, globalization, domestication, and the economics of the culture industry, the course considers the history of cultural flows, from nineteenth century topics such as Chinese opera in the U.S. and Wild West shows in Europe to twenty-first century fast food, anime, sports, Disney, and music. We will consider both the consumers and producers of popular culture in Europe, South America, Asia and Africa, as well as those in the United States. Enrollment limited to 20 juniors and seniors.

AMST 1900J. Race, Immigration and Citizenship.
Who can become an American?” is a central question in American society. This seminar examines the construction of national identity, citizenship as a legal and cultural status, and the struggle for equal protection of the law. The experience of excluded Asian and Latino immigrants are key to understanding this historical and ongoing process. Enrollment limited to 20 juniors and seniors.

AMST 1900K. China in the American Imagination.
Since Columbus, China has occupied a special place in the way America has been imagined and in the ways Americans have imagined their place in the world. This seminar will explore the relationship between China and America from Columbus to the present. While politics and diplomacy play an important role, the emphasis will be on trade, immigration and culture. Enrollment limited to 20 juniors and seniors.

AMST 1900L. Cold War Culture The American Culture in the Cold War.
This seminar will explore domestic politics, social movements, family life, sexuality, gender roles and relations, intellectual currents, and popular culture in the United States during the Cold War years. Special topics include adolescence, “conformity”, and the rise of television. Sources include historical monographs, memoir, film, and fiction. Enrollment limited to 20 juniors and seniors.

AMST 1900N. Ethnicity, Identity and Culture in 20th Century New York City.
Explores the processes by which 20th-century New Yorkers created a self-consciously modern, urban, and ethnic American culture. Focuses on literary and artistic representations of life in 20th-century New York as manifested in works by five ethnic groups of New Yorkers that immigrated or migrated to the city after 1800: Jews, African Americans, Italians, Chinese, and Puerto Picans. Enrollment limited to 20 juniors and seniors.

AMST 1900Q. From Perry to Pokemon: Japan in the United States, the United States in Japan.
This course traces the cultural interactions between Japan and the United States beginning with Matthew Perry is 1854 voyage. Topics include Japanese scrolls depicting Perris arrival; paintings, architecture and musical forms that traveled between the two countries; the U.S. occupation of Japan after World War II; the popularity of anime and other Japanese films in the U.S.; and the importance of American popular culture in post-war Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900R. Gender, Race, and Class in the United States.
Focuses on the emergent feminist scholarship that both empirically and theoretically analyzes how the intersection of race, class, gender, sexual preference, and age shapes the lives of women, men, and transgendered people in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900S. Green Cities: Parks and Designed Landscapes in Urban America.
Examines the cultural meaning and public use of greenspace in American towns and cities. Covers city parks and metropolitan park systems; the landscaping of riverfronts, streets, cemeteries, and company property; and the contributions of landscape architects such as Frederick Law Olmstead and Warren Manning to the field of urban planning. Begins in the 17th century with the creation of Boston Common and ends by reviewing the latest greenway plans for Providence. Enrollment limited to 20 juniors and seniors.

Between 1854 and 1965, Asian immigrants to the United States and other countries in the Americas were barred from immigration and citizenship. Circuit of ideas and political movements evolved to resist exclusion, disenfranchisement, and discrimination. We will examine: Chinese Americans and the Chinese revolution, the Ghadar movement among Indians of the Diaspora, and the Japanese American left and Japan. Enrollment limited to 20 juniors and seniors.

AMST 1900V. Immigrants, Exiles, Refugees, and Citizens in the Americas.
Focuses on populations who leave their homelands within the Americas. Examines the meaning of categories "refugee," "exile," "citizen," and "immigrant" in the postwar period. Explores the experience and reasons of people who leave their homelands, the relations between their countries of origin and their new society, and their access to rights in both countries. Questions the extent of population movements in the Americas as redefining conceptions of citizenship, rights, nation, and national identity in the U.S. Enrollment limited to 20 juniors and seniors.

AMST 1900W. Latina/o Literature: The Shifting Boundaries of Identity.
Focuses on the relationship between national identity and ethnic identity in narratives by and about Mexican American, Puerto Rican, Cuban, Dominican and Central and South American women in the U.S. Texts by and about women from other ethnic and minority groups. Readings from Gloria Anzaldua, Judith Ortiz Cofer, Dolores Prida, Cristina Garcia, Julia Alvarez, among others. Enrollment limited to 20 juniors and seniors.

AMST 1900X. Latina/o Religions: Encounters of Contestation and Transformations.
The purpose of this seminar is to survey and review the literature in the new and emerging field of Latina/o Religions. We seek to define the Latina/o religious experience and identify its unique qualities and expressions in relation to other religious movements and expressions in the Americas. Enrollment limited to 20 juniors and seniors.

AMST 1900Y. Latino New York.
The Latino population of NYC in the present generation has generated new lines of inquiry for the study of diasporas in contemporary urban settings. This course undertakes an analysis of this experience from diverse interdisciplinary perspectives, with a focus on cultural expressions.
and representations and with a view toward new ethnographic and historical approaches. Enrollment limited to 20 juniors and seniors

**AMST 1900Z. Latinos and Film.**
Analyzes the ways that Latino ethnicities have been constructed and misrepresented in Hollywood films from the silent era to the present, and examines contemporary work by Latino directors, producers, screenwriters, and actors who produce films that counteract the negative stereotypes of Hollywood films with more accurate, complex, and positive images of their own histories and cultures. Weekly screenings both in and out of class and readings that introduce a new body of film criticism from a Latino perspective. Enrollment limited to 20 juniors and seniors

**AMST 1901A. Latinos in Black and White: Race, Ethnicity and Identity in the Americas.**
This seminar looks critically at traditional models of "race relations" in the Americas, the historical development and expressions of "blackness," "brownness" and "whiteness" at regional, national and international levels, and their contemporary articulations and ramifications. A primary focus will be the social and political dimensions of "ethnicity" and "race" in relations between Caribbeans and African Americans in New York City. Enrollment limited to 20 juniors and seniors

**AMST 1901C. Making America: The Immigrant Experience in Literature.**
Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurship. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors

**AMST 1901D. Motherhood in Black and White.**
Focuses on American motherhood with respect to race: under slavery; at the turn of the 20th century; and in contemporary society. Texts include fiction, film, history, feminist and psychoanalytic theory, e.g. "Uncle Tom's Cabin," "Incidents in the Life of a Slave Girl," "Imitation of Life," and "The Reproduction of Mothering." Enrollment limited to 20. Instructor permission required. DVPS WRIT

**AMST 1901F. Orientalias: The Representation of Asians in American Popular Culture.**
This is a research seminar designed to explore questions relating to the cultural construction of Asians as a racial group in the United States. The seminar will interrogate the ideas of race, ideology, Orientalism and popular culture. The seminar will then analyze various moments in the formation of dominant images of Asians in American Culture. Enrollment limited to 20 juniors and seniors

**AMST 1901G. Race and Art in America.**
How do art and space function as a critical practice, a tool of resistance, and a form of self-determination in racialized 20th-century America? This course will introduce students to ways of looking at and analyzing examples of visual, performance, and mixed-media artwork by African American, Asian American, and Chicano artists who resist, challenge, deform, and subvert traditional concepts of art. Enrollment limited to 20 juniors and seniors

**AMST 1901H. Race and Poststructuralism.**
Poststructuralism continues to be a major preoccupation in the discourse of the academic left, but relatively few courses consider how poststructuralist interrogations of subjectivity and history can help us to think about race in a U.S. context. This seminar begins with an overview of key poststructuralist concepts, then moves to poststructuralist texts which take up race as a primary object, and finally takes up the collision between poststructuralist thought and racial identity politics. Enrollment limited to 20 juniors and seniors

**AMST 1901L. Reading Latina/o History through Fiction.**
Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurship. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors

**AMST 1901M. Making America: The Immigrant Experience in Literature.**
Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurship. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors

**AMST 1901N. Researching the History of Children and Childhood.**
Explores how to research and interpret the ways that race, class, gender, and region have shaped the social organization, cultural meaning, and experiences of American children and childhood. Focus is on the possibilities and challenges posed by various types of evidence: visual and literary representations, memoirs, child rearing advice, toys and play, children’s literature, clothing, and protective and restrictive laws. Enrollment limited to 20 juniors and seniors. DVPS

**AMST 1901O. Rivers in the Industrial City.**
Rivers promote industrial development and serve as important resources and cultural amenities for communities that have a substantial manufacturing base. This interdisciplinary seminar looks at the use and abuse of rivers in American industrial cities from the 18th century to the present. Enrollment limited to 20 juniors and seniors

**AMST 1901Q. Screening Men: Hollywood Masculinities, 1944-Present.**
Surveys Hollywood representations of dominant masculinity with the aim of interrogating these representations. Considers how such representations have changed over time and how changes may be read in relation to contemporary social, economic, and political pressures. In addition, considers how these texts interact with theoretical issues of representation, identification, and spectatorship. Enrollment limited to 20 juniors and seniors

**AMST 1901R. Social Movements of the 1960s.**
This course examines U.S. social movements from 1954 through 1974, concentrating on the 1960s. Drawing on primary and secondary sources, we examine such topics as the Civil Rights Movement and the emergence of Black Nationalism, the antiwar movement, the relationship between the New Left and second-wave feminism, and the movement for gay liberation. The course also pays attention to how the ‘sixties’ are represented in contemporary culture. Enrollment limited to 20 juniors and seniors

**AMST 1901S. Society and Identity: A Comparative Approach to the Colonial Americas.**
Compares New Spain, the British North American mainland, and the Caribbean from initial colonization in the 16th century to 18th-century wars of independence. Focuses on the complex interplay of class, gender, race, and ethnicity that defined social formations and shaped identities. Reading biographies of ordinary people as well as synthetic histories, engages the past on different levels and connects individual identity and action to broader historical processes. Enrollment limited to 20 juniors and seniors

**AMST 1901U. The Charm of Anticipated Success: Varieties of the American Dream in U.S. History.**
The American Dream is one of the great myths of our national history--not "myth" in the sense of a falsehood, but rather a widely-held belief whose validity cannot be definitively proved or disproved (like "all men are created equal"). Using sermons, fiction, songs, and other cultural forms, this research seminar explores the complexities of the myth from the time of the Puritans to the present. Enrollment limited to 20 juniors and seniors
AMST 1901V. The Contested City: Urban Culture in America, 1880-1940.

Focusing on the popular culture of American cities, this course examines the evolution, commercialization, uses, and struggles over vaudeville, jazz, and early film, and leisure activities such as dancing, nightclubs, drinking, and shopping. Consideration will be given to the gendered, class-based, and racialized nature of leisure activities and spaces, reform efforts, and the dynamics of social change. Prerequisite: At least one semester of college-level course in U.S. history or literature. Enrollment limited to 20 juniors and seniors

AMST 1901W. The Development of Black Feminism.

Beginning with the participation of black women in the abolition movement and ranging forward to current black women novelists and feminist theorists, this course will examine the intellectual development of black feminism. We will pay particular attention to black feminism as an area of critical study, and will explore the concepts of representation, ideology, discourse, race, gender, and sexuality. Enrollment limited to 20 juniors and seniors

Will examine the origin and design, at the beginning of this century, of the U.S. child welfare system. The separation of child from adult welfare, the definition of a special relationship between children and the state; foster care versus institutional care; the juvenile justice system; child labor; infant and maternal welfare; aid to children in families; and school-based welfare are some of the topics to be covered. Enrollment limited to 20 juniors and seniors

AMST 1901Z. Radio: From Hams to Podcasts

This seminar reviews the theoretical literatures on diaspora and transnationalism. We then place Asian migrations to the Americas (North America, Hawaii, the West Indies, Central and Latin America) in the context of migrations out of and within Asia in the 19th and 20th centuries. Finally, we consider transnationalism as an analytical framework for understanding the process of Asian-American community formation. Enrollment limited to 20 juniors and seniors

AMST 1902A. The Politics of Asian American Culture.

From Bret Harte's "Heathen Chinese" to Bill Clinton's John Huang, Asian Americans have been represented as aliens in American culture. The task of Asian American cultural production has been to create a space for an Asian American citizenship. This course looks at autobiography, fiction, drama, film, and cultural criticism to understand how Asian American culture makers have sought to combat imposed stereotypes, subvert structural hegemony, and undermine self-imposed orthodoxies. Enrollment limited to 20 juniors and seniors

Confronts the notion of Latinos as "foreign" by demonstrating historical depth and geographic breadth of the Hispanic/Latino experience in what is now U.S. territory-from colonial Florida, California, and the Southwest, to early 20th-century Puerto Rican and Cuban communities in New York. Explores contrasting Hispanic and Anglo views of the presence of Hispanics via such diverse sources as historical chronicles and autobiographies, Hollywood films, romance novels, and popular music. Enrollment limited to 20 juniors and seniors

AMST 1902D. Topics in Asian American History and Culture: Diasporas and Transnationalisms

This seminar reviews the theoretical literatures on diaspora and transnationalism. We then place Asian migrations to the Americas (North America, Hawaii, the West Indies, Central and Latin America) in the context of migrations out of and within Asia in the 19th and 20th centuries. Finally, we consider transnationalism as an analytical framework for understanding the process of Asian-American community formation. Enrollment limited to 20 juniors and seniors

What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, the racial and social experience of U.S. Latinos are compared with that of the populations in various countries in the hemisphere. Theoretical readings and empirical examples. Enrollment limited to 20 juniors and seniors

This course examines the multiple ways of knowing and understanding Latina/o cultural identity and expression in the Americas. The story of a Latina/o cultural identity is mapped out as place and sentiment in both historical and contemporary periods. We utilize theory and method from both the social sciences and the humanities to uncover and better understand the story of Latina/o identity and ourselves. Enrollment limited to 20 juniors and seniors

AMST 1902O. Urban Borderlands

This course analyzes changing patterns of immigration from Latin America to the U.S. by comparatively examining the emergence of various Latino communities and cultures in selected cities. It explores intersecting relations among the various Latino communities, as well as Latinos' interactions with other racial and ethnic groups. The cities to be considered are Los Angeles, New York, Miami, San Antonio, Washington DC, and Providence-the last of which will be explored via student projects in the community. Enrollment limited to 20 juniors and seniors

AMST 1902Q. Chicano Studies Seminar.

Explores the culture and politics of Mexican people in the United States leading up to and through the 1960s and 1970s, and the post-nationalist period that continues to the present. Our approach will be interdisciplinary, including readings and films that explore the history, sexuality, art, music, labor, and gendered identities of this diverse community. Prerequisite: Introduction to American/Ethnic Studies recommended. Enrollment limited to 20 juniors and seniors

AMST 1902R. The Old/New Immigration

AMST 1902S. Women and American Modernism, 1900-1940.

No description available. Enrollment limited to 20 juniors and seniors

AMST 1902T. Henry James and The American Scene.

A study of James’s representation of the American read in the context of the cultural changes of the late nineteenth century: Daisy Miller, The American, The Portrait of a Lady, The Golden Bowl and selections from his travel writings, including The American Scene. Writings by James’s contemporaries, W. E. B. Du Bois and Thorstein Veblen will also be studied. Enrollment limited to 20 juniors and seniors

AMST 1902U. The Black Female Body in American Culture.

This course on gender and representation will use the black female body as an example of the ways in which images, both verbal and visual, of women of color are utilized within American culture. Through literature, film, visual art, and popular culture, we will consider the legacy of slavery, the persistence of stereotypes, sexual violence, and black women's resistance. Enrollment limited to 20 juniors and seniors

AMST 1902V. Urban Borderlands

This course analyzes changing patterns of immigration from Latin America to the U.S. by comparatively examining the emergence of various Latino communities and cultures in selected cities. It explores intersecting relations among the various Latino communities, as well as Latinos' interactions with other racial and ethnic groups. The cities to be considered are Los Angeles, New York, Miami, San Antonio, Washington DC, and Providence-the last of which will be explored via student projects in the community. Enrollment limited to 20 juniors and seniors

AMST 1902W. Radio: From Hams to Podcasts

This course examines the history of radio broadcasting and asks if a consideration of radio’s historic flexibility can predict the future of this interesting medium. Readings will focus on the exciting new field of radio studies, emphasizing economics, structures, and listeners. Topics include radio’s ability to cross borders, create racial and gender categories, and change programming possibilities. Enrollment limited to 20 juniors and seniors. WRIT

AMST 1903A. Alien-nation: Latina/o Im/migration in Comparative Perspective.

Explores how Latina/o immigration to the United States has reshaped the meaning of “America” over the last hundred years. We will study Latina/os in comparison to other im/migrants and examine how US immigration policy has created a nation partly composed of “alien” residents, some citizens, others not, who have constructed alternative notions of belonging. Enrollment limited to 20 juniors and seniors

AMST 1903B. City of the American Century: The Culture and Politics of Urbanism in Postwar New York City.

This seminar will investigate the life, history and culture of New York City from World War II to the fiscal crisis of the mid 1970’s, with a particular interest in transformations in the built environment of the city and region. We will primarily focus on the cultural representations, intellectual visions, and political struggles that arose around these transformations, but will...
also consider their effects on everyday life. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies

AMST 1903F. Topics in Asian American History: Migration, Race and Citizenship.

This seminar will explore the relationship between Asian Americans and the US State in three historical moments; the era of exclusion, WWII internment, and the post-civil rights era. We will look at citizenship as a cultural signifier that organizes race, gender, sexuality and class as well as a legal status. Enrollment limited to 20 juniors and seniors

AMST 1903G. Oral History and Community Memory.

Students in this seminar will conduct oral history interviews and archival research to create an audio and visual history of one Providence neighborhood. Collected materials will be prepared for public presentation as a walking tour and web site. Enrollment limited to 20 juniors and seniors

AMST 1903P. Please, Please Me.

This seminar will investigate theories of pleasure and its representation in a range of fictional texts. What is it that makes a text pleasing and for whom? How do we talk about pleasure and explain it to others? I am especially interested in the representation of pleasure from the 1970s on. Enrollment limited to 20 juniors and seniors

AMST 1903Q. Out of Place: Regional Boundaries and their Transgression in Novels, Photography, Public Humanities.

This class explores the meaning of "region" in contemporary American culture. Focusing primarily on the West, we’ll examine the construction and transgression of geographical and ideological regional boundaries. Questions considered include: What does crossing boundaries tell us about the stability and meaning of region? What role do race, gender, and nationality play in moving across regional lines? What do shifting regional identities tell us about the possibilities and problems in ways of transforming identity? Sources include fiction, essays, websites, and photography. We use skills and ideas built over the semester to consider the ways museums and other public sites construct regional boundaries. Enrollment limited to 20 juniors and seniors, with priority given to American Studies concentrators

AMST 1903R. Big Business, the Bomb, and Smokey Bear: Cold War Origins of Today’s Environmental Movement.

Beginning with the psychological, cultural, and environmental changes brought by the Atomic Bomb, this seminar traces Americans’ growing environmental awareness and concern with corporate power. We will look at classics like Aldo Leopold’s Sand County Almanac and Rachel Carson’s Silent Spring, as well as films, poetry, popular texts, and histories complicating traditional notions of the origins and conduct of the contemporary environmental movement. Students will have the opportunity to explore an aspect of environmentalism or the environment in depth through a semester writing project. Enrollment limited to 20 juniors and seniors

AMST 1903T. The Materiality of History: Material Culture Theory and Practice.

Focusing on Native American, early American, and contemporary US material culture, this course develops critical methods for analyzing historic materials, not as legible monuments to the past, but as legible research materials for scholarly work. Who studies ‘things’, and with what methods? From the invisible to the living to the monumental, what are the limits of “thingness”? What is the role of commodification and American consumerism? Through selected readings and site visits, we will identify ‘best practices’ for integrating artifacts, collectibles, and everyday things with documentary research in narrating and exhibiting the past. Enrollment limited to 20 juniors and seniors

AMST 1903V. Asian and Latino Immigration.

This seminar examines the ways in which the histories of Asian and Latino immigration parallel and intersect each other throughout US history. Capitalist development and labor migrations; wars and refugees; immigration policies and changing racial formations will be among the topics we explore. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies and Ethnic Studies. DVPS

AMST 1903W. The Boy Problem: Male Adolescence as Social Pathology.

Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation’s ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 juniors and seniors

AMST 1903X. Style and the Man: Masculinity in Fashion and U.S. History.

This course will focus on two clothes that have played in constructing notions of masculinity and manhood from the mid-19th century to the present. We will take seriously the oft-heard comment, "the clothes make the man," by studying the sartorial circumstances around the formation of men’s fashion. These circumstances include class, ethnicity, race, gender, sexuality, and generation. Our study will be episodic and privilege New York and Los Angeles; though other locations will be considered comparatively. Enrollment limited to 20 juniors and seniors concentrating in American Studies

AMST 1903Y. American Publics.

Americans worry about the quality of their civic life and fear its decline. We examine the public sphere’s popular and political dimensions as well as challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet. Taught simultaneously with the same course at the University of Melbourne, Australia, students will be linked digitally for discussion and collaborative writing. Enrollment limited to 20 juniors and seniors

AMST 1903Z. Shrine, House or Home: Rethinking the House Museum Paradigm.

This seminar will examine historic house museums within the context of American culture from the founding of Mount Vernon in 1853 to their present decline in popularity and relevance. Utilizing sources from a variety of disciplines including literature, women’s and family history, and museum and preservation theory and practice, students will re-examine the prevailing historic house museum paradigm and develop interpretation plans for house museums in the Providence area. Enrollment limited to 20. If oversubscribed, priority is given to students in the Public Humanities Programs and Department of American Civilizations. No prerequisites

AMST 1904A. Memories, Memorials, Collections and Commemorations.

To understand how American culture thinks about the past, we will explore a range of texts including museum exhibits, historical society collections, memorials, and civic celebrations. These sites and objects, the material culture of memory, help us understand the construction of national, community and personal identity. Students will also undertake practical projects in memorialization and commemoration, among them designing the program for a new memorial to the Rhode Island slave trade. Enrollment limited to 20 juniors and seniors

AMST 1904B. Henry James Goes to the Movies.

This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - Washington Square, The Turn of the Screw, The Portrait of a Lady, and The Golden Bowl - and study the narrative and visual choices as interpretations of James’s texts. Critical readings on the art of fiction and the art of film will also be included. Enrollment limited to 20. WRIT

AMST 1904C. The Pacific Rim in American History.

Investigates the circuits of people, goods and ideas between Asia and the Americas. Although these flows have been at work for the past half millennium, this course will focus primarily on three historical moments: the trading world of the 17th and 18th centuries; colonialism and their critics in the late 19th and early 20th centuries; and the “American Century” in the late 20th century. Enrollment limited to 20 juniors and seniors

AMST 1904D. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative.

In 1893, Historian Frederick Jackson Turner declared "the closing of the American frontier," touching off an argument among historians about the meaning and significance of European expansion and settlement in the area west of the Mississippi River. Historians, filmmakers, television producers and photographers have continued the debate in their writings.
images, and drama that will be the subject of this class. We will consider the various ways The West has "ended" in popular culture and academia, and consider how these narratives shape our present perceptions of the region and the people and cultures that inhabit and border it. Enrollment limited to 20 juniors and seniors

AMST 1904F. The American Experience: The Southeast Asian Refugees/Americans. Explores the complexity of the American experience, the displacements and diasporas of the Vietnamese, Cambodians, Hmong, the Lao, and the Lu Mien in America through multiplicity of perspectives and interdisciplinary approach. Special emphases are on the reinvention of new lives in New World, the American-born generation, how the American-ness and the sense of "home" are constructed, defined, and contested through literary and cinematic works, self-representations, and cultural productions written and produced by these new Asian Americans themselves. Enrollment limited to 20. DVPS

AMST 1904G. Museums, Identities, Nationhood. Will explore the national museum as a cultural institution in a range of contrasting contexts, revealing how these museums have been used to create a sense of national self, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, postcolonialism and multiculturalism which have come to the fore in national politics in recent decades. Enrollment limited to 20 juniors, seniors, and graduate students

AMST 1904H. The Teen Age: Youth, Society and Culture in Early Cold War America. An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 20 juniors and seniors

AMST 1904I. Art/Place. This course surveys the many ways in which contemporary artists respond to, remake, and intervene in places, and teaches students to articulate their own creative responses to place. We will be working intensively in Providence's Jewelry District, collaborating with the nonprofit Artists in Context to create a public artwork, and developing each person's creative practice in response to the narrative and aesthetic prompts of this contested space. The course will culminate in a final exhibition of student projects curated by the students themselves. Enrollment limited to 14. LILE

AMST 1904J. The Asian American Movement: Communities, Politics and Culture. In 1969 students at S.F. State College invented a new social category; they called it Asian America. This seminar begins with an examination of the Asian American Movement, its origins and aspirations, its ideological and theoretical perspectives, with particular attention to the ways its cognitive and social mechanics of cultural capital formation to project development techniques in simulation and prototyping that derive from movie production, interaction design, game development and architecture. Students from a broad spectrum of arts and science backgrounds, including specifically those from museum curation and computer science, are welcome. Enrollment limited to 15. LILE

AMST 1904S. Ethnic American Folklore: Continuity and the Creative Process. The course examines how folklore and the oral culture of diverse cultural groups have transformed within their texts and in their creative representations and meanings. It looks into the dynamics of cultural continuity and the creative process involved, from oral narratives, foodscape, family lore, the senses of place, and the senses of home. At the juncture of the oral, the written, the popular, and the high tech, what are the new cultural forms, new cultural products, communication milieu and venues negotiated and contested. Anthropological field research methods and training will be a major emphasis of the course. Enrollment limited to 20

AMST 1904T. Work, Gender, and Race in the Contemporary U.S. This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits, and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments

AMST 1904U. Museum Collecting and Collections. This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits, and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments

AMST 1904V. Decolonizing Minds: A People's History of the World. This seminar will explore the knowledge-production and military-financial infrastructures that maintain empires, as well as the means through which people have either resisted or embraced empire. While some attention will be made to the 19th and early 20th century colonial context, the bulk of the course will focus on the Cold War liberal era to the neoliberal regime that continues today. Possible topics include: popular culture and ideology, the Cold War university, area studies, international anti-war networks, transnational labor activism, the anti-colonial radical tradition, and the Arab Spring/Occupy Movements. Weekly readings; evaluation based on focus will be on Providence, particularly during the tenure of Charles Chapin as Superintendent of Health. Will result in the mounting of an exhibit illustrating and explaining one of facet of the movement. Enrollment limited to 20 juniors and seniors

AMST 1904N. The Korean War in Color (ENGL 1761V). Interested students must register for ENGL 1761V S01

AMST 1904O. Native American Environmental Health Movements (ETHN 1890J). Interested students must register for ETHN 1890J S01

AMST 1904P. Queer Relations: Aesthetics and Sexuality (ENGL 1900R). Interested students must register for ENGL 1900R S01

AMST 1904Q. Engendering Empire (ETHN 1890K). Interested students must register for ETHN 1890K S01

AMST 1904R. New Narratives: New Media: New Museums. This course explores the challenges to narrative modes, institutional patterns, and models for studies in material culture that are posed by emerging digital media practices. This course will focus on the example of the collections and resources of the Haffenreffer Museum of Anthropology. Readings in brain science and anthropology that focus on the cognitive and social mechanics of cultural capital formation to project development techniques in simulation and prototyping that derive from movie production, interaction design, game development and architecture. Students from a broad spectrum of arts and science backgrounds, including specifically those from museum curation and computer science, are welcome. Enrollment limited to 15. LILE
participants and analytical essays. Enrollment limited to 20 juniors and seniors. DVPS
AMST 1904W. Native American Environmental Health Movements (ETHN 1890J)
Interested students must register for ETHN 1890J S01 (CRN 15276)
AMST 1904X. China in the American Imagination
Since Columbus, China has held special place in the American imagination. Americans from different vantage points have imagined China as a source of wealth, labor, or souls to save, as a victim, a revolutionary model, factory and bank. Using literature, material culture, and film, we will seek to understand how different groups of Americans, including merchants, workers, women, African Americans and Chinese Americans, have constructed "China". Enrollment limited to 20. DVPS
AMST 1904Y. Lincoln, Whitman, and The Civil War (ENGL 1561O)
Interested students must register for ENGL 1561O S01 (CRN 24715)
AMST 1904Z. Old Media New Artists: Innovation and Contingency in African American Culture.
What are the defining characteristics of newness in twentieth-century African American culture? How have black creative artists repurposed their respective disciplines in accordance with and against the shifting proclivities of African American social politics? Through an interdisciplinary focus that considers music, literature, visual arts, and interactive media, this seminar proposes several alternative epistemological frameworks for recognizing the emerging artistry of our time. Enrollment limited to 20 juniors and seniors
AMST 1905A. Crises in American Capitalism.
We are now in the midst of what is commonly called the Great Recession—the biggest economic crisis since the Great Depression. This course investigates these two crises in American capitalism: how they were caused, resisted, represented, and remembered. Students will be asked to interrogate the meanings of these economic crises, and to consider their various political and cultural uses. Assigned texts will include history, fiction, journalism, film, memoir, and photography. Enrollment limited to 20 sophomores, juniors, and seniors
AMST 1905B. Media and Modern Childhood (GNSS 1960S)
Interested students must register for GNSS 1960S S01 (CRN 25468)
AMST 1905D. African American Musical Theatre (MUSC 1905D)
Interested students must register for MUSC 1905D S01
AMST 1970. Independent Reading and Research.
Required of all honors candidates in the senior year. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC
AMST 2010. Introduction to Interdisciplinary Methods.
Introduction to interdisciplinary studies required of all first-year graduate students in American Studies. Graduate students from other departments may enroll with permission of the instructor
AMST 2220A. Topics in American Civilization: Digital Scholarship.
This course examines how scholarship, principally that dealing with the American experience, has changed as a result of the information revolution. We will discuss the impact of digital media on the nature and structure of scholarly work, particularly as it intertwines with public presentation and pedagogy. Students will plan and critique digital projects in public scholarship and pedagogy and explore the use of current digital tools
AMST 2220B. Culture, Politics and the Metropolitan-Built Environment.
This interdisciplinary readings seminar will provide graduate students with an introduction to recent scholarly work on 20th century and contemporary cities and suburbs. Readings will be drawn from cultural, political, social, and intellectual history, American Studies, political science, sociology, and ethnography. They will investigate the interconnections between urban and suburban development and the role of ideology, class, gender, race, and globalization in shaping planning, architecture, culture, policy, politics, and social movements. This class is open to students in American Studies, History, Sociology, Political Science, Anthropology, and other disciplines who find themselves interested in multi-disciplinary approaches to the study of cities and suburbs
AMST 2220D. Museums in Their Communities.
This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc.) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed. Open to graduate students only
AMST 2220E. American Orientalism and Asian American Literary Criticism (ENGL 2760Y)
Interested students must register for ENGL 2760Y S01 (CRN 24795)
AMST 2450. Exchange Scholar Program.
AMST 2500. Museum Interpretation of the American Experience.
A seminar examining methods of museum interpretation, the ways that museums convey information to the public with exhibits, tours, demonstrations, films, video tapes, slide shows, interactive computer programs, publications, and other techniques. We will visit museums that have an historical or anthropological focus and read theoretical and critical writings on the public interpretation of American material culture
AMST 2510. Industrial Archaeology.
No description available. S/NC
Examines the methodological and theoretical underpinnings of current and past American studies scholarship. Enrollment limited to graduate students with preference given to American Studies graduate students. S/NC
AMST 2550A. Asian American Political Movements to 1970.
This research seminar will examine political movements in Asian immigrant communities in the United States and the Caribbean before the emergence of "Asian America" in the late 1960s
AMST 2550B. The Japanese in the Americas.
A research seminar on the comparative historical experience of Japanese in Hawaii, mainland U.S., Brazil, and Peru. Open to undergraduates with permission of instructor
AMST 2550C. Advanced Seminar on Asian American History.
Advanced seminar on Asian-American history, diaspora studies and globalization
This seminar presents and analyzes contemporary institutional initiatives and policies relating to culture, including public art, tourism, historic preservation, and museums. It demonstrates how political, social, cultural, advocacy, and media organizations from the local to international level shape policies designed to protect and present cultural sites and activities in society. Enrollment limited to 10 graduate students
AMST 2650. Introduction to Public Humanities.
This class, a foundational course for the MA in Public Humanities with preference given to American Studies graduate students, will address the theoretical bases of the public humanities, including topics of history and memory, museums and memorials, the roles of expertise and experience, community cultural development, and material culture. Enrollment limited to 20 graduate students
AMST 2651. The Responsive Museum.
This course considers the many kinds of experiences available to people in art museums. Although art museums have tended to embrace the values of art history, visitors use them in surprising, personally meaningful, powerful ways. Among the topics we will activate: building community, stimulating creativity, evoking memory and associations, learning about the self and others, healing, and crossing cultural boundaries. Enrollment limited to 15 graduate students
AMST 2652. Community Documentary and Storytelling.
This class focuses on ways that documentary methodologies and storytelling help individuals articulate and negotiate issues of race, ethnicity, gender and social class in local and regional communities. Through readings, discussions, and presentations by guest speakers, students will examine written, digital, visual, video/film, and oral presentations and performances as ways to express community stories. We will also consider how such projects can facilitate civic engagement. The class will involve participation in a community documentary project. Enrollment limited to 15 graduate students
The course offers an opportunity for RISD and Brown students to work together to understand the growing interdisciplinary field of public art. We will explore the potential of working in the public realm as artists and/or arts administrators. Topics include: pivotal events and artworks that formed the history of public art from the early 20th century to the present; approaches to site-specificity; ideas of community and audience; current debates around defining the public and public space; temporary vs. permanent work; controversies in public art: memorials, monuments, and anti-monuments; case studies; public art administration models, among others. It is both a seminar and a studio; students work individually and together on research, presentations, proposals and public projects. Contact the instructor Janet Zweig (janetzweig@earthlink.net). Enrollment limited to 12 seniors and graduate students. Instructor permission required

AMST 2654. Designing Heritages: From Archaeological Sensitivities to Relational Heritages.
Do you believe in the past? This course takes as its starting assumption that pasts are not temporarily distant from today. They are contemporary experiences whose structure and mediation impact how we live in our shared world. This course will explore the intellectual history of archaeological thought and the development of heritage theory. While simultaneously exploring practical design skills, it will provide context to contemporary synergies between art, archaeology and heritage studies through interdisciplinary studies of architecture, art history, cultural criticism, heritage studies and archaeological theory. Enrollment limited to 18 seniors and graduate students

Cultural policy is the aggregate of governmental activities in the arts, humanities, and heritage. This seminar explores its history and public/private context and offers practical insights about how to influence cultural policy decisions, especially methods to achieve public consensus through planning. Students discuss contemporary issues, examine policy planning principles, and learn practical methods through case study to develop policy recommendations. Enrollment limited to 20 seniors and graduate students

AMST 2657. Museum Interpretation Practices.
Examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception; the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop an interpretive practice through a series of workshops, exercises, site visits and critical discussions. Enrollment limited to 14: seven seniors and graduate students, along with seven RISD students

AMST 2658. Releasing the Imagination in Public Humanities Practice.
Designed to stimulate and nourish creative approaches to work in museums and other venues of public humanities practice. Students will be invited into a series of creative adventures drawing on essential skills of close looking, deep listening, persuasive writing, and creative production. Essays from Maxine Greene’s “Landslapes of Learning” and “Releasing the Imagination,” as well as an array of personal essays, exhibition catalogues, fiction, and research from the fields of education, sociology, and psychology. Enrollment limited to 15 graduate students; undergraduates may be admitted with instructor permission

The course offers an in-depth exploration of the radical roots and continual transformations of the academic discipline of American Studies within particular historical contexts, beginning in the early 20th century into the present. We will read seminal texts responsible for the formation of defining moments in the discipline’s history, including the "myth & symbol school,” “American exceptionalism,” multiculturalism, post-nationalism and transnational American Studies. Students will produce reviews of current texts and reflect on future possibilities for a mature and globalized American Studies. Enrollment limited to 15 graduate students

AMST 2660. Projects in Public Humanities.
Devoted to one or more advanced projects in Public Humanities not covered in detail by the regular courses. Projects in public humanities provide practical, hands-on project and group project management experience that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty advisor to project completion. Written permission and topic description required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. This course is repeatable for credit. Prerequisite: AMCV 2650 or demonstrated ability of equivalent experience. Instructor permission required

AMST 2670. Practicum in Public Humanities.
Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester’s or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program

AMST 2680. Practicum in Public Humanities.
Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester’s or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program

AMST 2690. Management of Cultural Institutions.
This course explores public humanities institutions as an organizational system that interacts with broader community systems. Students will emerge with an understanding of the realities of the managerial, governance and financial structures of public humanities institutions and how those structures interact with mission, programming and audience. The course is designed to help those who work on the program side of public humanities and cultural institutions—as educators, librarians, curators, interpreters, exhibit designers, public programming coordinators, grand makers, etc.—engage more strategically with those aspects of their institutions that encompass planning, organizational behavior, revenue generation, finance, marketing, and governance

AMST 2691. Poetry in Service to Schools and the Community.
Poetry in service to the community honors a connection between poetry and wisdom, assumes that poetry is a wisdom medium (vehicle, vessel, conveyance) toward more enlightened thinking and practice. In this way, it is also an ideal medium for extending our study and practice beyond Brown, conducting workshops in schools, community centers, youth detention facilities and elsewhere. The class emphasizes community building, in teaching pairs and classes and workshops throughout Providence, in Renga and workshop groups. Poetry is the connective tissue; building relationships is at the heart of the practice. Students will write and teach. Enrollment limited to 16

AMST 2693. Community Arts with Young People.
Blurring the boundaries between artist and audience, practitioners of community arts have engaged underrepresented audiences who have traditionally relegated to more passive forms of participation, including young people with little access to arts education. This class provides students the opportunity to research and/or to conduct their own community arts projects with youth in Providence. Students will develop a deeper and more critical understanding of theorizing and implementing community arts projects with youth; will examine how to create pedagogic conditions with youth through the arts and humanities, as well as ways to systematically observe, document, and analyze these pedagogies. Enrollment limited to 15

AMST 2695. Museum as Idea.
What should museums be in the 21st ce? Are museums of today relevant to cultural historical, scientific, artistic, political and educational purposes? How can they provide more meaningful encounters with objects to inspire curiosity and to honor their creators? How can museums relate to their diverse communities today? Must they own objects to be museums? Growing from the historical basis for museum theory, We'll suggest alternative directions, create platforms for new perspectives. We'll rely on readings, discussion, and meetings with museum leaders, and on independent creative research. All will be challenged to invent their own concept of "museum". Enrollment limited to 12

AMST 2697. Museum Interpretation Practices.
This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention
and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15

**AMST 2699. Digital Storytelling.**

Digital storytelling takes the traditional craft and attributes of telling stories and merges it with diverse digital media. The digital media becomes integral to how and why stories are told. The course will explore digital storytelling in its many forms, including narrated film shorts, movement capture, locative media, digital timelines, DJing, electronic novels, audio documentaries, narrative computer games, podcasting, and blogging among others. The purpose of the course is to introduce students to a broad set of digital tools that will expand their capability to engage diverse publics in the construction and dissemination of knowledge in the arts and humanities. Enrollment limited to 15

**AMST 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z).**

Interested students must register for ENGL 2760Z S01

**AMST 2920. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2921. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2922. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2923. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2990. Thesis Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

---

**Annenberg Institute for School Reform**

The Annenberg Institute for School Reform develops, shares, and acts on knowledge that improves the conditions and outcomes of schooling in America, especially in urban communities and in schools serving disadvantaged children. The institute’s programs focus on three broad areas that, together, significantly impact equity and excellence in schooling: (1) teaching and learning supports – offering strategies and tools to help educators examine and improve instructional practices in ways that enhance student achievement; (2) systems support – helping districts build capacity for supporting high-performing schools systemwide and form local partnerships to expand educational opportunities; and (3) civic supports – bringing municipal leaders and community members to the forefront of local efforts to transform their public schools. In collaboration with other education reform organizations, the institute conducts research and development, convenes stakeholders on issues of urban education, catalyzes and supports local action, and disseminates the results of its work.

Established at Brown in 1993, the institute received that same year a gift of $50 million as part of Ambassador Walter H. Annenberg’s $500-million “challenge” to public education. The institute is accountable to a board of overseers appointed by the University Corporation. Some 45 professional and administrative staff work at the institute. Warren Simmons is the executive director. Additional information may be found at: [http://www.annenberginstitute.org/](http://www.annenberginstitute.org/)

---

**Anthropology**

**Chair**
Daniel J. Smith

The Department of Anthropology at Brown is a vibrant, award-winning group of scholars in the subfields of cultural anthropology, archaeology, and anthropological linguistics. Our research and teaching cover a wide range of the field, with special strengths in anthropological demography, political anthropology, medical anthropology, language and culture, ethnicity, gender, ancient writing and representation, early urbanism, historical and forensic archaeology, and Latin American studies.

As a discipline, Anthropology works at the crossroads of the social sciences and the humanities, and it works to understand human experience in all of its fullness. Unlike other departments, Anthropology does not restrict itself to a single aspect of human social life, such as the political or the aesthetic. Conversations in our classrooms and seminar rooms attempt to put behavior in the broadest contexts of meaning, power, institutions, and history. They cast a global net, ranging from discussions of the transnational process of foreign aid between Japan and Latin America to the hieroglyphic system of the ancient Mayan people to the relationship between Islamic ethics and organ transplant in Egypt. In a world of increasing specialization and fragmentation of knowledge, Anthropology provides an opportunity to look at the big picture and find it in the locally meaningful. In a world of manifold crises, it provides opportunities for applying the knowledge it produces, and in a world of increasingly global connection, the discipline provides many roadmaps.

For additional information, please visit the department’s website: [http://www.brown.edu/Departments/Anthropology/](http://www.brown.edu/Departments/Anthropology/)

---

**Anthropology Concentration Requirements**

Anthropology is the study of human beings from all times and all places, offering holistic, comparative, international, and humanistic perspective. In studying and interpreting the vast range of similarities and differences in human societies and cultures, anthropologists also seek to understand how people themselves make sense of the world in which they live. The Department of Anthropology at Brown is a vibrant, award-winning group of scholars working primarily in the subfields of cultural anthropology, archaeology, and anthropological linguistics. The concentration provides students with a broad introduction to the discipline and includes the major subdisciplines of the field: sociocultural anthropology, archaeology, anthropological linguistics, and biological anthropology.

Concentrators should select their courses in anthropology in consultation with the concentration advisor. At least nine courses in anthropology are required, including:

Select one of the following sociocultural/linguistic anthropology classes:

- ANTH 0100 Introduction to Cultural Anthropology
- ANTH 0200 Culture and Human Behavior
- ANTH 0300 Culture and Health
- ANTH 0800 Sound and Symbols: Introduction to Linguistic Anthropology

Select one of the following biological anthropology/archaeology classes:

- ANTH 0310 Human Evolution
ANTH 0500 Discovering the Past: Introduction to Archaeology and Prehistory
Select one of the following, normally taken in junior or sophomore year:
ANTH 1900 History of Anthropology: Anthropological Theories
ANTH 1940 Ethnographic Research Methods
ANTH 1950 Archaeological Field Work
ANTH 1621 Material Culture Practicum
A course from the ANTH 1910 Series (Normally taken in senior year) 1
Five additional Anthropology courses. 5
Total Credits 9

1 Of the required courses, at least five courses counted toward the concentration must be offered at the 1000-level or above and one course must be on a particular world area.

Honors
Candidates for honors should apply to the concentration advisor by the end of his or her 6th semester, but no later than the 4th week of the 7th semester. An application consists of a brief statement addressing the focus of a proposed thesis and the names and signatures of two faculty members from the Department of Anthropology who have agreed to serve as the student’s honors committee—one as honors thesis advisor, the other as a reader. Candidates for honors are required to:
1. Fulfill the standard concentration requirements.
2. Take two additional courses, usually, which may be used for thesis preparation.
3. Have a majority of A’s in the concentration.
4. Submit an approved honors thesis.

Field Work
Concentrators interested in archaeology are urged to obtain training in field archaeology by participating in Brown-sponsored field research, or by participating in an archaeological field school elsewhere.

Anthropology Graduate Program
The department of Anthropology offers a Doctor of Philosophy (Ph.D.) program as well as a Master of Arts (A.M.) program.
For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/anthropology

Courses
ANTH 0066A. Politics of Race and Culture.
Addressing the subjects of race, culture and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach

ANTH 0066B. Mythscapes.
An experimental seminar that will combine classroom discussion with visits to field sites within walking distance of the Brown campus. The aim will be to acquaint students with some fundamentals of symbolic analysis and to apply these fundamentals to interpreting the moral and historical messages suffused in the landscapes around us. Readings will include sources on the anthropological interpretation of myth combined with historical sources on Brown and its neighboring communities and institutions. Students will acquire a deeper sense of the mythic qualities of this place and some analytical tools for understanding mythscapes elsewhere. Enrollment limited to 20 first year students. FYS

ANTH 0066C. Population and Culture.
This seminar for first year students examines the relationship between individuals and population and the impact of culture on population. How do the lives and actions of individuals cumulate to the characteristics of a population? How do the characteristics of a population affect the lives of the people in it? For first year students only

ANTH 0066D. Who Owns the Past?
Examines the role of the past in the present. Using examples from the U.S. and other parts of the world, we will look at how archaeological evidence is implicated in contemporary cultural and political issues. Students will learn that the past is not just the focus of archaeologists’ interest and scientific inquiries, but is also a subject romanticized by antiquarians, mobilized in nation-building, marketed for profit, re-enacted as entertainment, consumed by tourists, and glorified in commemoration. Understanding these different and compelling valuations, claims, and uses of the archaeological past will provide an introduction to why the past matters in the present and to the future. Enrollment limited to 20 first year students. FYS DVPS

ANTH 0066E. Colonial Cities.
This course attempts to understand the nature of colonialism in Africa and India. Comparative methodological approach to the study of colonial cities introduces the students to a multiple and interlocking idea and symbols used by colonial power to create in their images, cities which reflect their own image. For first year students only

ANTH 0066F. Families and Households.
This course explores the diversity of families and households, both between cultures and within cultures; changes in family forms over time, changing experiences of family over the life course, the course, the diverse meanings, metaphors, and values of “family”; and current controversies about what families are and what they should be. Enrollment limited to 20 first year students. Instructor permission required. FYS

ANTH 0066G. Explorers and Cultural Encounters.
Looks at famous land and sea expeditions, including Marco Polo, Cheng Ho, James Cook, Samuel Hearne, Elisa Kane, Ernest Shackleton and others. Whether the voyage was inspired by a specific intellectual inquiry, mapping, exploration of a new land, establishing a new trade route, friendly alliance, or a colonial expansion, for example, these expeditions changed the views people had about the world, peoples, and places

ANTH 0066H. Human Trafficking.
Examines from an anthropological perspective efforts to address global poverty that are typically labeled as “development.” The enterprise of development is considered critically, both with regard to the intentions and purposes that underlie the actions of wealthy countries, donor organizations, and expatriate development workers and with regard to the outcomes for the people who are the intended beneficiaries. Privileging the perspectives of ordinary people in developing countries, but also looking carefully at the institutions involved in development, the course relies heavily on ethnographic case studies that will draw students into the complexity of one of the greatest contemporary global problems: social inequality. Enrollment limited to 20 first year students. FYS DVPS LILE

ANTH 0066K. International Perspectives of Women’s Agency and Inequality.
Enrollment limited to 20 first year students. Enrollment limited to 20. FYS LILE

ANTH 0066L. Beyond World Music: Singing and Language.
An introduction to music and language in cultural context. Drawing on case studies from around the world, we consider how music and language are intimately connected. Topics covered include cannibal’s singing in colonial Brazil, music and electoral politics in Texas, working class culture and country music, singing and society in the Amazon, whistle speech and
songwriting in indigenous Mexico, Apache identity and popular music, modernity and classical Indian music, music and mass advertising in the United States, and the politics of Zulu music production in South Africa. Reserved for First Year students. Enrollment limited to 20

ANTH 006M. Holy Wars.
No description available.

ANTH 006N. Peoples and Cultures of Greater Mexico.
This course will focus on the cultural area known as Greater Mexico, incorporating Mexicans resident south of the Rio Grande, as well as the approximately 25 million Mexicans living permanently or for a time in the United States. Specific topics to be covered in the class include: urban peasants and rural proletarians, recent challenges to gender conventions, national and international migration, nationalism and the changing meanings of the Conquest and colonial periods, land and indigenous rights, everyday violence, machismo, popular culture, and protest and rebellion. Limited to first-year students

ANTH 006O. How to do Things With Gifts: Charity, Corruption and Friendship Across Cultures.
In all human societies, people exchange goods and services. From Adam Smith onwards, economists have emphasized the central importance of the "free" market, where self-interested individuals strike bargains, and simultaneously expand humanity's "common stock." Yet costly practices-expensive weddings, charitable donations, corporate hospitality-still flourish, which appear designed to build human relationships rather than generate hard profits. And in today's global economy, personal gifts remain an essential part of doing business in places like China, Japan, Nigeria and Saudi Arabia. Where mainstream economistic analysis sees inefficiency or corruption, this course explores classic and contemporary alternative understandings of gift-giving's cultural significance

ANTH 006P. Transnational Lives: Anthropology of Migration and Mobilities.
In an era characterized by globalization, by the increasing and rapid flows of ideologies, information, money, goods, and people across national borders, how do individuals, families, and communities grapple with the new forms of existence brought forth by migration? This course will go beyond macro-economic explanations of why migration happens to explore what migration does: the effects of mobility on a range of practices that include parenting, health, gender roles, marriage, politics, and anthropological research itself. We will consider three overlapping issues: the everyday practices of transnational living in a variety of cross-cultural settings; the theory and methodology anthropologists use to better understand local experiences of migration; and the ways in which migration has been effectively politicized. Enrollment limited to 20 first year students. FYS LILE WRIT

ANTH 006Q. Crisis of Identities in the Global Order.
The seminar is intended to engage first-year students in discussion and analysis of one of the perplexing questions of the modern age. Why, with globalization and an attendant world-view shaped by the technological revolution of our times, has the question that appeal to modernities, we find more emphasis on local differences, more conflicts related to identities determined by opposition to "the other"? A concordant question will be: how do different disciplines address the concept of identity? Enrollment limited to 20 first year students. FYS

ANTH 006R. Child and Youth Cultures.
This first year seminar addresses childhood from two linked but distinctive theoretical perspectives. First, what is childhood? Rather than assuming it is a universal category, we will explore how childhood has been constructed differently through history and across cultures, in opposition to infancy, youth, and adulthood. Second, who are children? In contrast to conventional representations of young people as passive objects of socialization, we will review anthropological conceptions of children and youth as social actors with respect to identity formation, cultural expression, and political economy. Enrollment limited to 20 first year students. DVPS FYS WRIT

ANTH 006S. Contemporary Egypt in Revolution.
On January 25, 2011 protestors in Egypt amassed in Tahrir Square in Cairo with basic demands: Bread, Freedom, Social Equality, and Human Dignity. After hundreds of peaceful protesters were killed at the hands of riot police and hired thugs, eighteen days later, President Husni Mubarak resigned. Yet since then, hundreds more have been killed, Egypt's revolution continues, and the basic demands are as crucial today as they were at its inception. We will read contemporary Egypt from the perspectives of anthropologists and social historians, and discuss the value of social theory and analysis for understanding current political turmoil. Enrollment limited to 20 first year students. DVPS FYS. S/NC

ANTH 0100. Introduction to Cultural Anthropology.
This course provides an introduction to cultural anthropology, surveying its defining questions, methods, and findings. We will examine the history and utility of anthropology's hallmark method, ethnography, the long-term immersion of the researcher in the culture under study. We will compare cultural anthropology's findings and comportment in other cultures to its conclusions and conduct in our own. No prerequisites

ANTH 0110. Anthropology and Global Social Problems: Movements, Mobilities, Migration.
The course introduces anthropological approaches to some of the central problems we face in the globalizing twenty-first century. We will trace both large- and small-scale movements of people, commodities, borders, and pollution to improve our understanding of the complex international, transnational, and local social phenomena that shape the human experience today

ANTH 0125. Violence and the State.
This course allows students the opportunity to interrogate the relation between violence and the state. Students will be introduced to a variety of analytical frames through which to understand both the concept of violence and that of the state from an anthropological perspective. Through diverse case studies we will consider topics such as what it means to see and be seen by the state, the rationalization of "exceptional" violence, and domination through symbolic violence. The course has no prerequisites, but a foundational course in the social sciences is recommended

ANTH 0200. Culture and Human Behavior.
The goal is to challenge our beliefs about some taken for granted assumptions about human behavior and psyche by examining cultures with different conceptions of self and cognition. We will examine the issues of the role of nature and nurture in development, the nature of intelligence, coming of age, the association of psychological characteristics with gender and the naturalness of emotions

ANTH 0300. Culture and Health.
An introduction to the field of Medical Anthropology. Lecture reading and discussion will examine the social context of health and illness, looking at the diverse ways in which humans use cultural resources to cope with disease and develop medical systems. The course will provide an introduction to the overall theoretical frameworks that guide anthropological approaches to studying human health related behavior. Medical anthropology offers a unique and revealing perspective on the cultural diversity that characterizes human experiences of sexuality, disease, aging, mental illness, disability, inequality and death. DVPS LILE WRIT

ANTH 0301. Gender and Politics.
This course focuses on ideologies of gender and sexuality cross-culturally and how they influence peoples' involvement in political processes. We begin with a broad working definition of politics-power dynamics and arrangements whereby groups are affected by one another. The course looks at the circumstances under which peoples' gender and sexual identities are mobilized into social movements, and the conditions and social consequences of public visibility. Our broader aim is to understand ways in which gendered inequalities produce—and are produced by—forms of political exclusion, as well as innovative ways in which people transform existing structures of power

ANTH 0302. Anthropology of Gender and Globalization.
We live in a global world in which the movements of people, goods, and ideas cause productive frictions, transforming the prevailing formations of gender and sexuality. This course examines the intersections of gender and globalization by looking at how globalization shapes cultural constructions and political configurations of gender, and exploring how an ethnographic focus on gender sheds light on various aspects of globalization. Topics covered include anthropological theory of gender and sexuality, gender and global capital, gender and the (colonial) state, and
gender and global politics (including gender activism, human rights, and development). Open to undergraduates only. DVPS LILE

ANTH 0310. Human Evolution.
Examination of theory and evidence on human evolution in the past, present and future. Topics include evolution and adaptation, biocultural adaptation, fossil evidence, behavioral evolution in primates, human genetic variation and contemporary human biological variation. WRIT

Explores the complex issues of growing up as an ethnic, bicultural, or a multicultural person and how these dual or multiple identities affect or interact with individual behavior, priorities, the sense of self, and how individual identity is formulated and defined. Cross-cultural and inter disciplinary approaches combining anthropology, comparative human development, inter ethnic communication, life history, and literary works are used. Instructor permission required

ANTH 0450. Two Billion Cars: Humans, Markets, Cultures, and the Automobile.
The global car population is predicted to reach two billion by the year 2020. The social, political, health, and environmental consequences are immense. These, as well as the cultural and political economic explanations for the car population explosion, will be explored in this class, as will alternative futures for transit

ANTH 0500. Discovering the Past: Introduction to Archaeology and Prehistory.
This course is an introduction to the biological origins and cultural developments of mankind over the past 4 millions years. In particular we shall address the following: human evolution, the methods and aims of archaeological research, human dispersal throughout the world, first from Africa to Eurasia, and from there to North and South America, Australia and the Pacific. We will look into hunting and fishing and gathering lifeways. We will study the beginnings and results of settled life, agriculture, and animal domestication, the evolution of complex societies and rise (and fall) of Civilization

ANTH 0510. Who Owns the Past?
This class examines the relationship between the Western world and African indigenous cultures, heritage, and ideas of the past. By looking at the history of science in reference to the treatment of Africans and African material culture, we will question who owns the rights to an indigenous past

The figure of the pirate is an all-time favorite in Western imagination. It has inspired some of the most popular narratives of the past, solidly grounded in classic literature and contemporary visual culture. Focusing on the mid-17th century, the golden age of piracy in the Atlantic World, this course will use historical and archaeological data to investigate the way in which the image of the pirate has been constructed in the West, as an embodiment of cultural, legal, moral and sexual transgression, and as an object of both fascination and fear which is still current in the contemporary, global world. DVPS LILE

ANTH 0520. Classic Mayan Civilization.
Examines the history, culture, and society of the Classic Maya, with special emphasis on Preclassic precursors, dynasties, environmental adaptation, imagery, architecture, urban form, and the Maya Collapse

ANTH 0680. Foragers, Farmers, Feasts, and Famines: An Anthropology of Food.
An exploration of the human experience of food and nutrition from evolutionary, archaeological, and cross-cultural perspectives. The course will review the various approaches employed by anthropologists and archaeologists to understand diet and subsistence in the past and present. Starting with the evolutionary roots of the human diet in Plio-Pleistocene Africa, we will trace patterns of human subsistence to the present, including the social and health implications of the agricultural revolution. We will then explore modern foodways in cross-cultural perspective, focusing on the interplay of ecology, politics, technology, and cultural beliefs. LILE

ANTH 0800. Sound and Symbols: Introduction to Linguistic Anthropology.
This introduction to the study of language and culture considers how language not only reflects social reality but also shapes it. We'll examine specific cases of broad current relevance, in the process learning how an analytical anthropological approach to language use lays bare its often hidden power. We'll consider how language creates and reinforces social inequality and difference, how language promotes and resists globalization, and how language is used creatively in performance, literature, film, advertising, and mass media. We'll also consider how language does important social work in specific contexts, such as classrooms, courtrooms, medical settings, and political campaigns. DVPS LILE

ANTH 1020. AIDS in Global Perspective.
Communities around the world are affected in different ways by the HIV-AIDS pandemic. This course is concerned with cross-cultural variation in knowledge, perception, and treatment of AIDS in a global context. Twenty-five years into the global epidemic, how does social and cultural variation influence the continued spread or management of the disease? In addition to reading significant anthropological works related to the meaning of AIDS in cultural contexts, the course will address major public health initiatives related to the global AIDS pandemic, and offer an anthropological critique of their design, implementation and success. Enrollment limited to 40

ANTH 1100. Circumpolar Ethnography.
An examination of the traditional and modern lifeways of native peoples across the Arctic and subarctic from European Lapland through Siberia, Alaska, Canada, and Greenland. Topics covered are society; ethnic relations; religion (Shamanism); art; and politics, including issues of land claims and home rule

In this course we engage with anthropological literature and films on the diverse ethnicities, cultures, and "traditions" of sub-Saharan Africa. We trace the histories and the processes of cultural, social, and political change, beginning with colonialism and ending with the contemporary period. We will deconstruct and debunk dominant Western ideas of Africa that present it as primitive and characterized by poverty, AIDS, famine, and violence. We will learn about how Africans see and represent themselves through reading ethnographies, engaging with African popular culture, and watching documentary films

ANTH 1119. Andean Anthropology.
The area studies paradigm continues to provide solid information about "culture areas," and the rich ethnography and archaeology of Andean societies is no exception. Particular strengths emerging from this literature include studies of land use, religious syncretism, textiles, and collateral themes: continuities and recognizable features of "Andean culture" (to andino), gender relations, migration, and politics. Throughout, we will analyze the ways that history, ecology, and the broad notion of reciprocity (ayni) cross-cut each of these. The result will be a close and in-depth study of cultural practices within three Andean countries (Peru, Ecuador, and Bolivia), the majority populations of which continue to be indigenous (preeminently Quechua- Ayarmara-speaking). These are countries within which recent political and social changes have produced far-reaching transformations. Prerequisite: one course in either Anthropology or Classics

ANTH 1120. Peoples and the Cultures of the Americas.
Examines the diverse cultures and history of the Americas - especially Brazil, Peru, Mexico, and the Caribbean. Topics include the organization of labor, cultural and artistic practices, changing conventions of gender and family, international migration, national and local identities, indigenous rights, and protest and rebellion

ANTH 1121. From Coyote to Casinos: Native North American Peoples and Cultures.
An anthropological overview on the history and cultures of Native North American peoples from the prehistoric times to the present. Where did Native North Americans come from? What were their traditional lives like? What was their relationship with newcomers of European extraction, including anthropologists? What challenges do they face today? Indigenous and anthropological insights will be brought to bear on these and other questions

ANTH 1122. American Indian Art and Artifacts.
Drawing on the rich North American Indian collections of the Haffenreffer Museum of Anthropology, the goal of this course is to examine theoretical approaches to the artifacts of indigenous people and analytical strategies
for their research and interpretation. Insights from anthropology, art history, American Indian perspectives, and conservation are explored. Meets at the museum

ANTH 1123. Native North Americans in the Twenty-first Century
An examination of the process of land alienation of Native Americans through the enactment of federal laws to settle the frontiers and protect the wilderness. Through the use of oral history, ethnographies, film, historical documents, and the public record, the course compares Native American and Euro-American perspectives on the ownership of land and rights to resources.

ANTH 1124. United States Culture
The United States is often described as "multi-cultural". This course examines dominant cultural values such as equality, choice, privacy, and responsibility. It also investigates aspects of the social structure of the United States such as inequality, power, race/ethnicity, kinship, and gender. Individual lives illustrate the ways that people living in the United States negotiate cultural values and confront social institutions. Enrollment limited to 40. Instructor permission required. DVPS LIIE

ANTH 1130. Peoples and Cultures of Southeast Asia
An introduction to the anthropological study of Southeast Asia. Emphasis is placed on understanding the diversity of cultures and societies through both space and time.

We will cover anthropological issues and themes about contemporary India, aspects of Hinduism and Islam, and the role of ideology in the social structure. Using anthropological ethnographic texts and discourse, we will discuss and explore different Indian communities, family and kinship relations, class and the caste system, political and religious organizations. The course will adopt a multidisciplinary approach to the understanding of India. For comparative purposes we will use select Indian novels and documentary films as a teaching tool to supplement the reading materials.

ANTH 1133. Ethnonationalism- The Asian Arena.
Three Asian countries-China, Thailand, and Myanmar-are unique national arenas to examine and compare specific definitions, representations, and contentions among nationalistic discourse, ethnic legitimization, and ethnonationalism as they are played out in response to cultural politics, national ideology, European colonial expansion, religious identity, and ethnic identity. Nationalistic movements, ethnic nationalism, and transnational politics are explored.

ANTH 1140. European Ethnography.
Familiarizes students with the societies and cultures of Europe from an anthropological perspective. Historical material provides for the understanding of current cultural, linguistic, religious, and ethnic variation. Major emphasis on the analysis of a range of contemporary communities from peasant to urban, from East to West, and from North to South.

ANTH 1150. Middle East in Anthropological Perspective.
A seminar focusing on anthropological methods of analyzing and interpreting Middle Eastern cultures and societies. Emphasizes the study of kinship, tribal structure, social organization and gender relations, ethnic groups relations, and urban-rural distinctions. Draws upon insights from these topics as a basis for understanding contemporary social, economic, and political dynamics in the region.

ANTH 1151. Ethnographies of the Muslim Middle East.
An introduction to ethnographic studies of Middle East, focus on: religion, language, modernity, gender, and political culture. Students will engage in critical examination which anthropologists sought to capture Middle Eastern life, and problems that have pervaded anthropological representation, methodologically and theoretically. You will learn, through the ways anthropologists approach the peoples, ideas, and cultures of the region in ways that complement and contrast the knowledge production of other disciplines, the processes we come to understand cultural difference, and ways this encounter sheds light on our selves and practices. Previous course in Anthropology/ Middle East studies is suggested. Enrollment limited to 25. DVPS LIIE

ANTH 1210. Culture and Cognition.
Are there cultural differences in thought and perception? If so, what are these differences and to what are they attributable? Reviews the history of the controversy on "primitive thought," the influence of culture and environment on perception and concept formation, the development of cognitive operations, and differences in logical processes and decision making in other cultural contexts.

ANTH 1211. Cross Cultural Perspectives on Children.
Explores how the behavior and psychological functioning of children are shaped by culture and how different cultures tend to produce children with characteristic personalities, selves, thought patterns and behaviors. Every cultural community provides developmental pathways for children. These pathways are shaped by history and by the goals of parents, communities and children themselves. The course will focus on how human knowledge is transmitted through multiple cultural channels in both informal and formal contexts. This is a service-learning course in which students provide a needed service: Mentoring and tutoring Libertarian young people in a literacy program. This will serve as a basis for conducting research on this refugee population and the final paper will be the recording of oral histories from teenagers. Enrollment limited to 30.

ANTH 1212. The Anthropology of Play.
Play enters all fields, from physics to human development, art to scientific experimentation. In all cultures, play figures centrally in rites of passage, child development, learning, and times of celebration. Central to this course is an understanding of the rules of play, its intentions in work, functions throughout human history, and role in formal education.

ANTH 1220. Comparative Sex Roles.
Covers specific cross-cultural issues of gender, cultural roles, the status of women, and their structural position in society. Themes of gender representations in the field of economics, ritual, and politics underlie the concerns of the course. Though African and Asian communities are the primary focus, aspects of American society are drawn into consideration when relevant.

ANTH 1221. Anthropology of Masculinity.
Contemporary anthropological and historical study of masculine identities and practices throughout the world, focusing on topics such as the cultural economies of masculinity, cultural regions and images of manhood, male friendship, machismo, embodied masculinity, violence, power, and sexual fault lines.
Prerequisite: Prior course in Social Science or instructor’s permission required

In all cultures people see themselves as related more closely to some people than to others and they usually experience that relation in terms of some shared substance such as blood. Beyond these generalizations there is an enormous variety of ways in which people live in, build, and maintain connections with others - in nuclear and extended families, peer groups, friends, ethnic groups, and so on. This course is about kinship as an idea, as an experience, and as an institution. In the midst of divorce and blended families, new reproductive technologies, and adoption we will investigate kinship and connection in our own lives, in a range of other cultures, and within the discipline of Anthropology.

ANTH 1223. Gender, Nature, the Body.
This course is an interrogation of the ways in which gender difference comes to be conceived of as "natural" in modern science, popular science, and in popular culture. What is the connection between the science of gender difference and the colonial encounter? What are some different ways of imagining gender difference? How are gender inequalities structured and perpetuated by science and political economy? Through careful reading of historical and anthropological texts, we will learn about various ways in which gender systems are constructed and resisted, how science is used to construct gender, but also how gender politics influence scientific outcomes and practices. Case studies that we will read about include: the colonial encounter and scientific taxonomy, the medicalization of childbirth and labor, historical understandings of male-female continuities, the emerging science of sex difference and sexual orientation, gender inequality and ecological exploitation.

Designed to give students an opportunity to engage in transnational research on social issues through an extended case study of a new generation of international norms that identify and combat "human
Have Anthropologists been looking for Utopia? What does Anthropology contribute to the design of good societies?

Anthropology: observation and description of societies. A wide-ranging representation capture their complex interactions and "culture," and explore how effectively different genres of research and studies, the course will analyze evolving understandings of "globalization" and "culture," and focus on ethnographies and films about science and culture, covering topics such as the social implications of genetic testing, bioprospecting and the environment, the development of pharmaceuticals, and repercussions of nuclear technologies.

Anthropology of Disasters
This course examines the relationship between religion and its larger social context. Course readings and lectures use political economic, cultural, and feminist approaches to understand war and its effects on social life. Case studies will be drawn from several eras and areas of the globe, including the Rwandan genocide, Central American counterinsurgency wars of the 1980s, and the war in Iraq.

Ethnographies of Global Connection: Politics, Culture, and International Relations.
Historically, IR and Anthropology examined interactions within and among bounded objects, whether sovereign states or small-scale societies. Increasingly, through, they explore flows, circulations and exchanges across borders, and their impact on different societies. Through case-studies, the course will analyze evolving understandings of "globalization" and "culture," and explore how effectively different genres of research and representation capture their complex interactions.

Anthropology and Utopia.
Utopia: designs for good societies and efforts to create them; Anthropology: observation and description of societies. A wide-ranging reading and discussion class that will address such questions as: Does Anthropological description contribute to the design of good societies? Have Anthropologists been looking for Utopia? What does Anthropology suggest is wrong with existing societies? Whose job is it to judge societies? How would Utopias be like to live in? How have people tried to build Utopias? Have they failed completely? Is failure inevitable? Is a better world possible? What would it look like? How would we get there?

Urban Life: Anthropology in and of the City.
This course examines how anthropologists have worked in the city to understand dwelling and lived experience from the center to the margins of society; as well as how anthropologists have contributed to the study of the city -- conceptualizing the city itself in relation to its inhabitants, and working to understand how cities develop, decline, or are sustained. Anchored in key theory, classic texts, and contemporary ethnography, the course traces also the history, present, and possible futures of the discipline. Students learn the methods of urban ethnography, and gain hands-on experience through local field exercises and related writing assignments.

Religion and Culture.
Looking at religion as a mode of thought, we examine theories that attempt to explain the origins, world-wide manifestation, and vitality of myths, rituals, magic, witchcraft, and other ways of thinking and acting that are typically associated with (or against) the concept of religion. Collaterally, we examine the methodologies by which we hope to understand the meaning of these concepts.

Science and Culture.
This course is an introduction to methods and topics in the anthropology of science and technology, including: social inequalities in science, race, gender, post-colonially, and the globalization of bio-technologies. The course will focus on ethnographies and films about science and culture, covering topics such as the social implications of genetic testing, bioprospecting and the environment, the development of pharmaceuticals, and repercussions of nuclear technologies.

Bioethics and Culture.
This course is an introduction to the work of medical anthropologists who have engaged with social and ethical implications of medical practice and biotechnologies. In this class we will look at bioethical problems as ways to understand larger social questions and look at the ways in which society as a whole influences bioethical questions and decisions. Particular emphasis will be on questions about the beginnings and ends of life, genetic testing, pharmaceuticals, psychiatry, health inequalities, and organ transplantation. Prerequisites for the course are: a previous course in medical anthropology (e.g. Culture and Health) or a previous course in science studies.

Religion and Secularism: Affinities and Antagonisms.
Global events in recent years seem to defy simple ideas of the confines of religion to a wholly private, non-modern or otherworldly domain, in ways that compels scholars across a range of disciplines in the social sciences, critical theory and philosophy to rethink the category of secularism, and the relationship between religion and politics. Is secularism a failed ideal? In what ways are ideas of the secular being contested and reformulated in different global contexts? This course seeks to familiarize students with recent debates on secularism, working towards a more nuanced understanding of the relationship between religion and politics. DVPS LILE

Film and Anthropology: Identity and Images of Indian Societies.
The course examines representation of Indian society in film and anthropological literature. We compare how gender, national identity, religious practices, and historical events are portrayed in films and anthropological literature. We will explore the relationship between visual and textual, showing how film reflect and make comprehensible anthropological concepts of Indian culture, and creates different images of the society.

Violence and the Media.
The role of media in shaping perceptions of violent conflict. Analysis of constructions of the "violent other," "victims", and "suffering", the use of culture, ethnicity, and psychopathology as tropes for articulating the motivations of violent perpetrators. Multiple subject positions and political interests will be considered. Case studies include the Cold War, conflicts, insurgencies urban riots, the genocide, and terrorism. Pre-requisite: a previous course in Anthropology, or permission of the instructor

Anthropology of Disasters.
This course examines disasters from an anthropological perspective. We focus on how disasters have been defined and understood, and work more broadly to see what they tell us about human conditions, vulnerabilities,
and capacities for resilience building, survival, and long-term sustainability. Drawing on and comparing case studies from around the world, we also examine the nature of destructive agents; degrees of impact and injury; rescue, relief, and humanitarian responses; and the often slow and uneven process of recovery and resilience building.

**ANTH 1260. Indigenous People and Nature: Birds.**

An exploration of intersections of indigenous peoples with the natural world; this semester with the avian world. Through a sustained focus on one class of living things, the hope is to gain access to a range of issues concerning the relationship between people and the environment.

**ANTH 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture.**

Medicine is arguably the most humanistic of the hard sciences, one that strives to ensure the basic dignity of individuals. In our increasingly globalized world, access to medical care is recognized as a fundamental human right. However, there continues to be considerable debate over the "best" ways to provide medical services to economically and culturally diverse communities across the globe, given the complex ways that people prioritize and perpetuate their health. Drawing on a range of disciplines, this seminar explores the multifaceted relationships between biomedicine and cultural understandings of illness, both in the US and worldwide. Instructor permission required. Enrollment limited to 25 juniors and seniors.

**ANTH 1310. International Health: Anthropological Perspectives.**

This upper-level medical anthropology course focuses on the social and cultural complexity of health problems in developing nations, employing anthropological approaches to public health. International health issues such as HIV/AIDS, malaria, tuberculosis, leprosy, reproductive health, violence, and mental illness will be examined. The historical, political and socio-cultural dimensions of international health problems will be explored through reading ethnographic case studies.

**ANTH 1320. Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress.**

Examines international development from an ethnographic perspective, looking critically at issues of poverty and progress from local points of view. Course is organized around the premise that culture is central to understanding processes of development. Broad development themes such as public health, agriculture, democracy, and the environment will be explored through readings representing a wide range of regions and cultures.

**ANTH 1321. Impact on Colonialism: Gender and Nationalism in India.**

This course is designed to look into colonial and post-colonial identities within the disciplines of history of literary studies. We will adopt an anthropological approach to those subjects, taking the cultural anthropology and construction of gender as the guideline for the analysis. Topics will include: orientalism, and gender; nationalism and religion.

**ANTH 1322. Human Rights, Social Justice, and Humanitarian Intervention: The Anthropology of Global Aid.**

From child soldiers to starving refugees, Americans are inundated with media images of violent suffering in the developing world. Our politicians frequently present international humanitarian intervention as an unequivocal good, without examining the actual outcomes of aid initiatives. This course uses tools from anthropology to explore the motivations for global aid, along with the concrete—and often unexpected—effects it produces on the ground. Foregrounding an ethnographic approach, we seek to understand the enduring influence of the concept of “rights,” the ways that local populations both welcome and resent humanitarian work, and the successes and failures of international charitable organizations. First-year students require an instructor override to register.

**ANTH 1323. The Culture and Politics of Colonial Cities: Migration, Markets and the Diaspora.**

Two colonial powers (British Empire and Portuguese) form the basis for this comparative approach to unravel and comprehend how the colonial policies differed in the two regions. Colonial cities have a special mystique, and studying them in the present unravels socio-historical and political connections to make the present more meaningful. For the post-colonialism, we address migration and the Diaspora, the participation of the groups under analysis in transnational economy and in local and global markets. In focusing on the Diaspora, we will seek to tie the history and cultural development to the wider issue of Diaspora and the displacement of people, the search for opportunities, migration and the global markets.

**ANTH 1324. Money, Work, and Power: Culture and Economics.**

Economic activities take place within cultural contexts which define appropriate values and goals, and in societies varying in scale, technology, and organization. Looking cross-culturally, and at economic activities in societies such as the United States, this course examines the production, distribution, and consumption of material goods, analyzing these as essentially social activities—properly understood only when we take account of social relations and cultural values. Consequently, the course also investigates the extent to which the words commonly used to describe economic life, such as "market", "wealth", "price", "profit", "work", and "money", are culturally specific rather than universally applicable. At least one previous course in Anthropology or another social science is strongly recommended. WRIT.

**ANTH 1325. Business and Entrepreneurship in Global Perspective.**

In a world of free trade, government downsizing, and the rapid movement of people and ideas, business and entrepreneurialism have become central to many peoples' economic livelihoods and social identities. Anthropologists have most often treated business and entrepreneurship as reflections of culture and social life, rather than sites of production in their own rights. Corporate workplaces, small businesses, and trade encounters are starting points for understanding myriad different social outcomes: novel forms of intercultural relations, new patterns of transnational labor migration, changing class configurations, and forums through which socially marginalized groups participate in society. DVPS LILE.

**ANTH 1330. Women in Socialist and Developing Countries.**

A seminar, jointly taught by a sociologist and an anthropologist, exploring the changing role of women in the former socialist countries of Eastern Europe and developing countries in Africa and Asia. Includes women's position, ideologies, and choices within these societies, and the transitions that are taking place. Contributes to a better understanding of the role of women in our own society.

**ANTH 1400. Race, Culture, and Ethnic Politics.**

A seminar addressing the subjects of race, culture, and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach.

**ANTH 1410. Reconstructing Multiraciality.**

An examination of, first, the racial and social history of interracial and interethnic relations in the U.S. and different parts of the world, then, the contemporary American situation and changing trends in these cross-group relations. Exploratory and interdisciplinary-intended to open a dialogue on multiple issues involved, diachronically as well as synchronically.

**ANTH 1411. Nations within States.**

Examines the interactions between small-scale indigenous societies (often referred to as Fourth World Nations) and the modern states within which they now exist. The relationship is obviously asymmetrical, yet these ethnic or "racial" minorities have the support of world opinion and international organizations. The sociocultural, economic, and political structure of these nations within states is the focus of the course.

**ANTH 1412. Anthropology of State Power and Powerlessness.**

How do we conceptualize state power? Is Power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of state power through classic texts of anthropology and political theory including Foucault, Weber, Hobbes, Locke and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities. DVPS LILE.

**ANTH 1420. Ethnicity, Race, and Gender in the Americas.**

The historical and contemporary ethnography of ethnicity, race, and gender in the Americas. Topics include racism, multiculturalism, affirmative action, immigration, nationalism, acculturation, cultural autonomy, slavery, colonization, and genocide.
ANTH 1421. Ethnic American Folklore: Continuity and the Creative Process.
An investigation of the dynamics of cultural continuity and the creative process involved in ethnic American folklore from oral narratives, life history, to foodways, and the senses of place. How do these cultural forms intersect with ethnicity, gender, group activism, and transnational contacts and exchanges? What are the new cultural forms, communication milieus, and venues negotiated or contested in contemporary America?

ANTH 1422. The American Experience-Southeast Asian Refugees/Americans.
Explores the diaspora of the Cambodian, the Hmong, the Lao, and the Vietnamese American from their initial exodus from their war-torn countries to their strategies for reconstructing new lives. Topics include socioeconomic changes, changing family life, gender roles, life choices, and the growing American generation. Materials used include films, songs, and autobiographies written by the refugees/Americans themselves.

ANTH 1450. Living with Conflict.
Exploration into ways in which cultural groups perceive and approach situations of conflict and how these situations in turn shape cultural practices, beliefs, and norms within the group. Examples are taken from ethnographies of different parts of the world and include a discussion of customs that help mitigate conflict among members of the group as well as conflict between groups.

ANTH 1530. American Indian Archaeology.
Traces the development of North American Indian cultures through the comparative study of prehistoric archaeological remains. Topics include the origins of Native Americans, Native American hunting-gathering lifeways, and the rise of the Native American agricultural societies. Emphasizes analyses of subsistence modes, settlement patterns, and symbolic systems.

ANTH 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia.
A course survey of the pre- and protohistoric archaeology of the eastern half of Asia. Topics include the origins and evolution of agricultural societies, the emergence of village and urban life, and the rise of states and kingdoms. The early states were often characterized and even reinforced by elaborate symbolic and religious systems expressed through ritual, art, and architecture-topics also covered by the course.

ANTH 1550. Ancient Environments.
This course teaches students how scientists investigate ancient environments and climate change and how these are related to ancient people and culture history. Students will learn about methods ranging from pollen and soil analysis to climate reconstruction and ecology. The class will look at a number of archaeological case studies in which climate or environment are believed to have been integral in past cultural developments. Case studies include the Levant, Mesopotamia, Polynesia, the American Southwest, and the Maya area. Students will be evaluated on class participation, weekly writing assignments, and final research papers. Prerequisites: ANTH 0500 or instructor permission.

ANTH 1555. Environmental Anthropology.
Environmental anthropology is the study of how people interact with environments, past and present. This course explores how humans have affected their environments over time and how environmental shapes human culture, employing an interdisciplinary anthropological perspective to illuminate these reciprocal interactions. This course uses a variety of approaches to understand how people interact with environments, employing cultural, biological, linguistic, and archaeological methods. This course covers human adaptation to environmental change from earliest prehistory up to the present day and students will have the opportunity to explore the practical and interpretive dilemmas of environmental challenges of the 21st century and beyond. Enrollment limited to 20 sophomores, juniors, and seniors.

ANTH 1570. American Indian Archaeology.
This course traces the development of North American Indians and culture through a comparative study of prehistoric archaeological remains. Some of the questions addressed will be: When and why did people first migrate into North America? Were these people responsible for the mass animal extinction at the end of the last Ice Age? What accounts for the similarities and differences in the politics and adaptations of Native Americans?

ANTH 1590. Archaeology of the Ancient Near East.
A survey of archaeological sites in the ancient Near East from the Neolithic period to the early Roman Empire. Archaeology allows us to explore the development of agriculture, cities, and urban-based culture, as well as to make comparisons between cultures and examine issues of trade and commerce. We evaluate sites in relation to theoretical and methodological issues in anthropological archaeology.

ANTH 1600. Hunter-Gatherer Adaptations.
Addresses the question: to what extent can the concept of the ecosystem, as developed in evolutionary biology, explain variability in human behavior? Examines the literature on contemporary hunting and gathering societies, both human and nonhuman, as well as relevant findings in archaeology and human biology. Background in general biology and anthropology is helpful, but not required.

ANTH 1620. Global Historical Archaeology.
The course examines historical archaeology as a multidisciplinary approach to the study of the historic past. Draws in recent research from different parts of the world, including North America, South Africa, Australia, the Caribbean, and South America, to illustrate historical archaeology’s contributions to interpreting peoples’ everyday lives and the diversity of their experiences in the post-1500 era.

ANTH 1621. Material Culture Practicum.
Combines theory with hands-on study of artifacts from historical archaeological contexts in North and Latin America. Students will gain skills and experience in artifact identification, dating, recording, analysis, and interpretation, and will conduct individual or team research projects on material things as products of everyday life and history. Enrollment limited to 15. LILE.

ANTH 1623. Archaeology of Death.
Examines death, burial, and memorials using comparative archaeological evidence from prehistory and historical periods. The course asks: What insight does burial give us about the human condition? How do human remains illuminate the lives of people in the past? What can mortuary artifacts tell us about personal identities and social relations? What do gravestones and monuments reveal about beliefs and emotions? Current cultural and legal challenges to the excavation and study of the dead are also considered.

ANTH 1624. Indians, Colonists, and Africans in New England.
The course explores the colonial and capitalist transformation of New England’s social and cultural landscapes following European contact. Using archaeology as critical evidence, we will examine claims about conquest, Indian Extinction, and class, gender and race relations by studying the daily lives and interactions of the area’s diverse Native American, African American, and European peoples.

ANTH 1625. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World.
Archaeology of slavery, and particularly that of enslaved African-American communities in what came to be the United States, has been one of the fastest growing areas of archaeological research in the last few decades. This course will look into both classic and current literature on the archaeology of Atlantic slavery in order to understand the development of this archaeological subfield, from an initial focus on the living conditions of slaves on plantation sites to later interests in the processes of consolidation of African-American ethnicities. What are current challenges faced by those investigating the material constitution of African Diaspora through time? DVPS LILE.

ANTH 1630. The City, the Market, and the Mass Grave.
How has archaeology contributed to our understanding of the past in the former Spanish colonies? How has this knowledge been presented and made socially relevant in present-day Latin America? This course proposes a critical insight into the achievements and future challenges of historical archaeology in Spanish speaking America, exploring the diverging trajectories that the discipline has had in different countries of the region, and the way in which archaeological knowledge about the colonial, republican, and contemporary periods has been either ignored or assimilated into the development of specific policies of cultural heritage at the local level. LILE.
Mexican and Central American gods and goddesses are the cradles of the world's most enduring cultural traditions. The modern identity of the region was forged in these ancient traditions and their influence is apparent around the world over, particularly in the area of agricultural domesticates (corn, chocolate, and chilies). Their cities (Teotihuacan, Monte Alban, Chichen Itza, etc.) rank among the greatest of the ancient world. This course offers a survey of Pre-Columbian Mexico and Central America, from the early monumental centers of the Olmec to the great Aztec city of Tenochtitlan, and explores how anthropologists and archaeologists investigate Middle America’s indigenous past.

ANTH 1650. Ancient Maya Writing.
Nature and content of Mayan hieroglyphic writing, from 100 to 1600 CE. Methods of decipherment, introduction to textual study, and application to interpretations of Mayan language, imagery, world view, and society. Literacy and Mesoamerican background of script.

Course addresses the burgeoning literature on the human body, especially the meanings attached to it through time and across cultures. Anthropology, history, and archaeology offer the principal sources of evidence for this introduction to past ideas about the body.

A seminar providing the basic information on the prehistory of the Circum Artic of Northern Fennoscandia, Russia, and North America. Not open to first year students.

ANTH 1680. Foragers, Farmers, Feasts, and Famines: An Anthropology of Food.
An exploration of the human experience of food and nutrition from evolutionary, archaeological, and cross-cultural perspectives. The course will review the various approaches employed by anthropologists and archaeologists to understand diet and subsistence in the past and present. Starting with the evolutionary roots of the human diet in Plio-Pleistocene Africa, we will trace patterns of human subsistence to the present, including the social and health implications of the agricultural revolution. We will then explore modern foodways in cross-cultural perspective, focusing on the interplay of ecology, politics, technology, and cultural beliefs.

ANTH 1700. Evolutionary Theory and Human Behavior.
An introduction to the field of human behavioral ecology, the course provides an overview of the application of the theory of natural selection to the study of behavior in an ecological setting. Focus is on anthropological topics related to reproduction such as issues of mating and parenting, sex ratios and sex preferences, and timing of life histories events.

This course examines the fossil record of human ancestors and evidence for cultural origins in relation to evolutionary theory in biology. We will review studies of living primates as well as modern genetic and DNA research for measures of contemporary human variability. Finally, we will explore forensic applications and case studies.

ANTH 1720. The Human Skeleton.
More than simply a tissue within our bodies, the human skeleton is gateway into narratives of the past—from the evolution of our species to the biography of individual past lives. Through lecture and hands-on laboratory, students will learn the complete anatomy of the human skeleton, with an emphasis on the human skeleton in functional and evolutionary perspective. We will also explore forensic and bioarchaeological approaches to the skeleton. By the course conclusion, students will be able to conduct basic skeletal analysis and will be prepared for more advanced studies of the skeleton from medical, forensic, archaeological, and evolutionary perspectives. Enrollment limited to 20. Not open to first year students. Instructor permission required. LILE.

ANTH 1764. Campus Culture.
This course presents and anthropological perspective on American colleges and universities from the past to present. In particular, it will address the emerging relationships between curriculum, governance, funding sources, academic values, and campus life. Readings will include theoretical sources on higher education, historical and ethnographic accounts of particular institutions, and recent essays regarding the purpose, practices and criticism of contemporary colleges and universities. DVPS LILE.

ANTH 1800. Sociolinguistics, Discourse and Dialogue.
An investigation of the study of language and language behavior. Centers on the study of variation in language as seen in the social and cultural context of language use. This course will feature practice in writing fictional and dramatic dialogue based on real-life discourse. Presupposes some familiarity with basic linguistics (ANTH 0800, CLPS 0030, or equivalent).

ANTH 1810. Language and Power.
This course considers how language and power relate to each other in social life. We first consider theoretical approaches to the politics of language use, such as Foucault on discursive formations, Bourdieu on language as social capital, and Bakhtin on the oppression inherent in standard languages. We then consider specific issues, including joking as linguistic resistance, language death and revitalization, the cochlear implant debate, and racializing discourses. We end with language use in the U.S. "culture wars," covering such topics as the Ebonics controversy, language and electoral politics, hate speech, and English language legislation.

ANTH 1870A. Reproductive Health and Sexuality.
No description available.

ANTH 1880. From Magic Mushrooms to Big Pharma: Anthropology of Drugs.
This course considers the social, political, and medical issues associated with illegal and pharmaceutical drugs. Some of the topics we consider are debates over the commercialization and criminalization of hallucinogenic plants such as marijuana, the politics of antiretroviral distribution, the ethics of medical and ethnic tourism, the legacies of colonialism and botanical migrations, "biopiracy" and indigenous knowledge, and critiques of modern food production, including the "locavore movement" and opposition to genetically modified foods. Through it all, we consider how the ways people talk and write about these issues affect concrete realities in daily life. Enrollment limited to 20 juniors and seniors. DVPS LILE.

Looks at the way anthropological methods and theories have interfaced through history to understand the dominant concerns in present-day anthropology. What were the important issues that influenced the discipline’s history? Who were the significant, and not so well known, historic personalities who shaped anthropological practice and gave it its identity? Enrollment limited to 20.

ANTH 1901. Anthropology in/of the Museum.
This course provides an introduction to the history, purposes, transformations, and workings of museums from an anthropological perspective. Topics include collecting and cultural property, politics of representation, identity and belonging, and community engagement. Assignments involve work with collections at the Haffenreffer Museum of Anthropology. The course focuses on museums dedicated to natural and cultural history and on anthropological concerns, but provides a theoretical and practical grounding for thinking about and working in other institutions. It covers the relevance of anthropological training to careers in the museum field, as well as the importance of conducting anthropological investigations in the museum environment. Enrollment limited to 20.

ANTH 1910A. Anthropological Approaches to World Issues.
Capstone seminar for Anthropology concentrators that explores how anthropology can challenge conventional or dominant wisdom about global social problems. Original research project required. Prerequisite: ANTH 1900.

ANTH 1910B. Anthropology of Place.
The anthropology of place serves as a unifying theme for the seminar by bridging anthropology’s subdisciplines and articulating with other fields of knowledge. Through readings and discussion, students will explore how place permeates people’s everyday lives and their engagement with the world, and is implicit in the meanings they attach to specific locales, their struggles over them, and the longings they express for them in rapidly changing and reconfigured landscapes. Enrollment limited to 20.

ANTH 1910C. Campus Culture.
Colleges and universities are normative microcosms of the societies they serve. They create, partition, validate and communicate knowledge to rising generations. Their architectures, landscapes, daily routines, yearly...
cycles, and centennial celebrations are infused with symbolic meanings. Degree awarding ceremonies are among the most attended pilgrimages in our culture. Colleges and universities are gateways to society’s essential professions and portals to a succession of alumni/ae bound by tradition. We will look at these institutions, their values, symbols, communities, governance, financial sources, academic structures, tensions, and adaptive strategies through the seeing eye of anthropology. Enrollment limited to 20

ANTH 1910D. Faces of Culture.
The seminar is designed to allow you as anthropology majors to question to debate and examine some of the assumptions of the discipline, and critically explore the multifaceted uses of the concept. We will contextualize the study of culture with the history of anthropology and across other disciplines in the humanities and the social sciences. Limited to 20. Prerequisite: ANTH 1900

ANTH 1910E. Media and the Middle East.
Media anthropology is a reinvented field within the discipline, emerging from critical engagements with ethnographic film and the crisis of representation of the 1980s. We will explore the development of an anthropological approach to mass media studies by focusing on research conducted and theories derived from a particular region: the Middle East. Enrollment limited to 20 senior Anthropology concentrators. Prerequisite: ANTH 1621, 1900, 1940, or 1950

ANTH 1910F. Social Construction.
No description available. Enrollment limited to 20

ANTH 1910G. Senior Seminar: Politics and Symbols.
Examination of the role of symbols, myth, and ritual in politics. We examine how symbols, myths, and rituals are used to win support, to create political reality, and to form political groups, whether in defense of the status quo or creating movements seeking to overthrow it. The 2012 U.S. presidential and congressional election campaigns receive special attention. Students, in part working in groups, will engage in their own original research both on the 2012 American elections and on a wide variety of other historical and contemporary political developments, from the Arab Spring to the Occupy Wall Street movement. Enrollment limited to 25. Prerequisites: ANTH 1621 or 1900; and either ANTH 1940 or 1950

ANTH 1940. Ethnographic Research Methods.
To understand the different theoretical assumptions that shape research efforts; to examine how hypotheses and research questions are formulated; and to appreciate the ethical and scientific dimensions of research by hands-on experience in fieldwork projects. Prerequisite: One Anthropology course

This course brings design thinking into conversation with anthropological research methods, examining the elements of a comprehensive perspective of context. It introduces students to design research methods, ethnographic methods, and how they work together. Students will learn how to use these methods to identify and engage in ‘deep hanging out’ with the problem, gap or inefficiency in question. They will then move on to patient, contextualized opportunity identification for meaningful innovation. By the end of the course, students will have developed a process for effective context analysis. This course is relevant for designers of products, services, organizations, and experiences. Enrollment limited to 40. LILE

Training in archaeological lab and field techniques for archaeologists. Topics include the nature of field archaeology, tools of the trade, interdisciplinary field techniques, ethics, excavations methodology, survey and GIS, systematic vs. ad hoc excavation, artifact analysis, site and artifact preservation. Students gain experience as practicing archaeologists through the active investigation of local historical and archaeological sites in the College Hill area

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

A seminar investigating some themes in the history of anthropological theory. Starting with the delineations of the scope and nature of social science by Marx, Durkheim, and Weber, the seminar then considers various explorations of the concepts of structure, function, and agency, concluding with Bourdieu’s reformulation of social anthropology for a new generation in the form of practice theory

A seminar exploring fundamental theoretical and ethnographic currents in 20th-century cultural anthropology

Contributes to anthropological understandings of globalization, political and urban anthropology, with a focus on one particular theoretical orientation that may guide research design and/or analysis. In addition to studying this particular philosophy through which they might understand culture, this course offers a model for the adoption of any given theoretical lens that might be taken up, critiqued, and otherwise put to use in cultural analysis

A seminar on the methodological problems associated with field research in social and cultural anthropology. Designed to help students prepare for both summer and dissertation research

The purpose of this seminar is to help graduate students conceptualize ethnographic research, formulate a research problem, develop a research design, consider its ethical implications, design appropriate methodologies and prepared the proposal for IRB approval. The methodologies will be discussed with a view to arriving at a critical understanding of the ethical, political and theoretical issues embedded in them and the way in which they fit into our conception of anthropological practice

ANTH 2030. Advanced Field Methods.
A seminar for advanced graduate students returning from field research or preparing for dissertation field work. Case studies are used for a critical examination of research design and data analysis

ANTH 2035. Professional Preparation for Anthropologists.
This course covers research ethics and politics, writing of proposals, theses, and articles, publishing, public speaking, CVs and resumes, and the job search

ANTH 2040. Advanced Social Theory.
This seminar is for graduate students who have taken ANTH 2000 and ANTH 2010 or equivalent graduate introductory courses in anthropological theory. Topics to be explored in this seminar include contemporary theories of globalization, hybridity, the politics of identity, class, cultural citizenship, democracy, social suffering, structural violence, agency, human rights, militarization, the body, multisited ethnography, and writing culture

ANTH 2050. Ethnography.
Each week this class will study classic and contemporary ethnographies. We will carefully examine the methods involved in research for the books and how the ethnographies were written. Ethnographies will be chosen for their importance in the field of anthropology and will cover a broad range of topical and geographic fields. We will also read some social history

ANTH 2100A. Contemporary Ethnography on Latin America and Beyond.
This graduate seminar addresses contentious and creative issues in anthropology by focusing on the science and art of ethnography. Readings feature new transnational ethnographic writers. Topics: alternative research framing, the relation of field research to writing, representing violence and porous borders in practice

ANTH 2100B. People of the Andes.
No description available

Focuses on debates over significant social and cultural issues in Africa. Historical and cultural continuities are premised as a way of understanding political, economic, and religious complexities in present-day Africa

ANTH 2200A. International Health.
This graduate seminar (upper-class undergraduates may seek permission from the instructor) focuses on the social and cultural complexity of health problems in developing nations, exploring anthropological approaches to public health. International health issues will be investigated using historical, ecological, epidemiological, political-economic, and
anthroMed perspectives, and the role of "applied" anthropology will be explored.

ANTH 2210. Analysis of Social Structure.
This course will discuss the analysis of kinship and the construction of the person cross culturally.

ANTH 2240. Anthropological Approaches to the Body.
This course is an in-depth exploration of theoretical and analytical approaches to the body in socio-cultural anthropology. Topics covered include: the body as site and sign of the social order; theories of embodiment and the cultivation of the self; bodily order and social ritual; the senses; the relationship between bodily epistemology and socio-political structures; the commodification of the body; technological intervention in the body; the visualization of the bodily interior; and state interventions and regulations of bodily processes.

ANTH 2250A. Psychology of Gender.
This course critically examines the role of gender in development and maturation, or the psychological differentiation of males and females, in the context of their socio-cultural environment.

ANTH 2255. Gender, Liberalism, and Postcolonial Theory.
What makes gender useful to think with? What work is it charged with doing--in the "real" world and in scholarship? What is the explanatory and analytical potential of a category that has been appropriated to divergent ends? Drawing on multiple disciplines in the humanities and social sciences, this course operates at two registers throughout: it offers students a productive set of analytical tools for theorizing gender and sexuality in culture and society; and it constructs a genealogy of anthropological analysis of gender and sexuality from a postcolonial perspective, exploring how ethnography and postcolonial theory have challenged liberal feminism. Open to seniors and graduate students. S/NC

ANTH 2260. Politics and Symbolism: At the Interface of Anthropology and History.
An examination of the theoretical roots of the symbolic analysis of politics and the application of these perspectives to both contemporary and historical study of political life.

ANTH 2261. Globalisms: Empires and Social Movements.
This seminar explores globalization in two of its contemporary forms, including empires and global networks of social movements. Focuses on theories of empire and on their implications for anti-war and anti-corporate movements in particular.

ANTH 2262. Social Analysis, Public Goods and Social Movements.
This seminar explores some of the political, ethical, and social issues and dilemmas involved in using social analysis to advance public interests.

ANTH 2263. Colonialism and Neocolonialism.
A seminar addressing the concepts of colonialism, postcolonialism, and nationalism. The nature of colonial "rule of law," the stages of the dissolution and formation of "African" native states, and the notion of "traditional" power are all examined in a comparative context using Francophone and Anglophone case studies in Africa.

ANTH 2264. Ethnicity, Race, and Nationalism.
Study of key issues debated by anthropologists regarding ethnicity, race, and nationalism, with examination of concepts such as identity, cultural citizenship, transnationalism-globalization, gender, home, and acculturation-hybridity.

ANTH 2270. Ethnography and Women's Literature of Non-Western Societies.
Interdisciplinary and cross-cultural exploration of representation in ethnographic and literary texts. Confronts the apparent analytical opposition of objectivity and subjectivity and addresses the challenge in the academy of "writing culture." Encourages connections between women writers in the Third World and American minority discourse to deepen understanding of global politics and the poetics of culture.

ANTH 2300. Anthropological Demography.
A seminar devoted to the investigation of the interface of anthropology (especially sociocultural anthropology) and demography. A wide variety of demographic topics-fertility, mortality, marriage, migration-are considered, and the links between anthropological and demographic writings on and approaches to these areas are examined.

ANTH 2301. Interdisciplinary Perspectives on Population.
Brown University's 10 year of excavations has created a lens through which to examine the complexities of the Nabateans and their culture. The main information about the Nabateans comes primarily from their extant monuments. There are also literary and epigraphic sources. This seminar will create a constellation of readable ideas, although we will still be left with many open questions about these people.

ANTH 2302. Field Methods for Anthropological Demography.
Concentrates on methods for collecting or producing data that bear on demographic issues and that are suitable for demographic analyses. Topics include: fertility histories, life histories, genealogies, household surveys, networks, and social units. Particular emphasis on the social contexts of data production, local meanings, and discovering appropriate categories and units of analysis.

ANTH 2303. Anthropology of Fertility and Reproduction.
A seminar examining the social significance and cultural meanings of human fertility and reproduction, including the social and cultural consequences of different fertility levels, the variety of people involved in decisions about reproduction, the allocation of responsibility for parenthood, and the political implications of contemporary debates about the meanings of biological and social reproduction.

ANTH 2304. Issues in Anthropology and Population.
This seminar is intended for graduate students and postdoctoral fellows interested in anthropological approaches to population issues and is normally taken as the second course in a two-course sequence that begins with ANTH 2300. The overarching theme of the seminar is the contributions that sociocultural anthropology can make to the understanding of population processes.

ANTH 2301A. Violence, Governance, and Transnationalism.
This seminar deals with contemporary anthropological approaches to violence, governance, and transnationalism. As faculty and graduate students, we have worked together to identify important ethnographic experiments that provide novel anthropological framings of major global issues. Our goal is to interrogate anthropological writing, explore its relation to field research, and trace anthropological appropriations of contemporary social theory from a variety of sources. Prerequisites: three previous courses in Anthropology.

ANTH 2301B. Violence, Governance and Transnationalism.
Deals with contemporary anthropological approaches to intersection of violence, human rights, law, and transnationalism. Readings will focus on the development of a new generation of research in the anthropology of human rights and its implication for rethinking legal anthropology. Anthropology has moved beyond the "cultural relativism" paradigm on to new projects which analyze the appropriation and use of human rights discourse and international norms as political tools for a variety of national and local agendas. Anthropologists have produced ethnographies that focus on the institutional grounding of legal discourse and practice in community and neighborhood politics, social movements, and ethnic nationalist projects. They have studied the radical reworking of rights discourse in different parts of the world and debated the ways in which these technologies for legal redress in the face of violence are politically empowering and/or disempowering in particular historical and cultural circumstances.

ANTH 2320. Ideology of Development.
An examination of different development theories and their relationship to field application. The analysis of project preparation and implementation is used to question the goals and objectives of Western and indigenous notions of progress and change within a social and economic context. Third World countries are utilized as case studies to address related issues, such as the meaning of development.

ANTH 2321. Coming to Terms with India: Anthropology of Colonialism and Nationalism.
This course is designed to look into the impact of colonialism, nationalism and the postcolonial identities of the person in India. In addition to the primacy of the anthropological focus, the seminar will also draw from cultural studies and history. Our engagement will be with topics of nationalism, religion, and caste and class formation during colonial and post colonial rule. Additional topics using the anthropological approach will include orientalism and gender; the location of national minorities within...
the Indian democracy and the future of fundamentalism; post-colonialism and the emerging new person

ANTH 2400. Museums and Material Culture.
This seminar discusses anthropological approaches to material culture in museum contexts, by developing themes, selecting objects, and preparing a preliminary script for an exhibition in Manning Hall. This year, "Humans and Nature." (ANTH 2400 is followed by ANTH 2410. Students can enroll in each course independently). Instructor permission required

ANTH 2410. Exhibitions in Museums.
The goal of this seminar is to implement in Manning Hall an exhibition script developed in ANTH 2400, on “Humans and Nature” (see that course). Topics discussed and put into practice include: representation of cultures in modern museum displays; thematic development; interpretation; handling, and mounting of objects in contextually rich and engaging museum environments; conservation; audience assessment

ANTH 2420. Museums in Their Communities.
This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed

ANTH 2450. Exchange Scholar Program.

ANTH 2500A. Problems in Archaeology: Culture Contact and Colonialism.
Explores the theoretical discourses shaping anthropological approaches and defining archaeological projects on culture contact and colonialism. Attention will be given to examining colonial encounters between Europeans and indigenous peoples as ongoing processes rather than particular historical moments, and to looking at recent efforts at decolonizing archaeological practice

ANTH 2500B. Problems in Archaeology: The Archaeology of Empires.
Empires have been among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as considering the specific and unique contributions archaeology and art history can offer to the understanding of empire. A variety of case studies will be explored, with selections depending on student interest

ANTH 2500C. GIS and Remote Sensing in Archaeology.
This course will train advanced students in the laboratory methods needed for the successful application of GIS and remote sensing technologies in archaeology. We will conduct an exhaustive literature review of spatial research in archaeology to place GIS and remote sensing within a broader conceptual framework. Each student will design their own geodatabase that they will be able to build upon in future research

ANTH 2501. Principles of Archaeology.
Examines theoretical and methodological issues in anthropological archaeology. Attention is given to past concerns, current debates, and future directions of archaeology in the social sciences

ANTH 2510. CircumArctic Archaeology.
A specialized course dealing with advanced problems in Arctic archaeology. Although primarily oriented toward the northern specialist, the seminar is designed to present, by example, methodological and analytic problems that are applicable to most archaeological areas and to hunting, fishing, and gathering societies

ANTH 2520. Mesoamerican Archaeology and Ethnohistory.
Seminar focusing on current issues in the archaeology and history of Mesoamerica, including Mexico and Northern Central America. Draws on rich resources at Brown, including the John Carter Brown Library

ANTH 2530. Archaeology of Tribes and States.
Explores concepts of complexity and inequality and how these have been used to study the origins and development of complex society. Categories such as tribes, chiefdoms, the state, etc. are evaluated as conceptual tools for understanding the rise of civilizations and early state formation, as well as transformations in later historical contexts

ANTH 2540. Historical Archaeology: From Colony to City.
Examines historical archaeology as a complex field of inquiry that engages multiple sources of evidence and incorporates a wide range of theoretical and methodological approaches. The seminar will consider the range of evidence available to historical archaeologists, and draw on examples from colonies and cities around the world to explore how the richness and diversity of the evidence is used

ANTH 2541. Ethnohistory.
Seminar topic: "Comparative Ethnohistory of the Americas." Examines Indian/European encounters and interactions in North America and Latin America. Explores the conjunction of anthropology and history, combining both theoretical orientations from and methodology of the two disciplines, with particular emphasis on the problems posed by comparative analyses

ANTH 2550. Archaeological Research Methods, Theory and Practicum.
The seminar is designed to help the student development good research and analytical skills in archaeology. By focusing on research design, analytic techniques, the relationship between theory and methodology, and the development of research proposal and/or reports, we shall examine how both scientific and humanistic theoretical concerns can be sources of meaningful archaeological questions, and how these questions can be transformed into viable research problems

ANTH 2560. Lived Bodies, Dead Bodies: The Archaeology of Human Remains.
Bioarchaeology is the study of human remains from archaeological contexts. We will survey the "state of the art" in bioarchaeology, while exploring its relevance and application to the archaeology of complex societies. We will survey a range of bioarchaeological methods and applications, including paleopathology, stable isotope analysis, population affinities, DNA, perimortem trauma, and body modification. In turn, we will explore how bioarchaeology can be used to approach a wide range of archaeological problems relative to complex societies, including subsistence, economy, migration, urbanism, social inequality, conflict and warfare, and identity. Open to graduate students only. S/NC. LILE

ANTH 2570. Archaeology of Ritual.
Many essential theoretical perspectives in anthropology have been built from the study of ritual. For archaeologists, evidence for ancient ritual is abundant, yet the reconstruction of ritual practice and meaning is both challenging and is often neglected in practice. We will take a comparative look at the archaeology of ritual in a global perspective. We will explore a variety of relevant anthropological and archaeological topics including, ritual practice, performance, the sacred (objects, sites, architecture, and landscape), ritual and power, domestic ritual, rites of the dead, sacrifice, and war. And of course, we will probe the question of what exactly constitutes "ritual"

ANTH 2800. Linguistic Theory and Practice.
An introduction to theoretical and methodological issues in the study of language and social life. We begin by examining semiotic approaches to language. We turn to classical research on language as a structured system - covering such topics as phonology and grammatical categories - but we focus on the implications of such work for broader social scientific and humanistic research. We then consider areas of active contemporary research, including cognition and linguistic relativity, meaning and semantics, pronouns and deixis, deference and register, speech acts and performativity, interaction, verbal art and poetics, reported speech, performance, and linguistic ideology

ANTH 2810. Performance Theory.
Explores the concept of performance as used in several social science and humanities disciplines: linguistics, anthropology, folklore, ethnomusicology, and theater. Also addresses practical problems of conducting research on performance forms. Seminar

ANTH 2900. Teaching Practicum.
No description available

ANTH 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

ANTH 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course
Applied Mathematics

Chair
Bjorn Sandstede

Associate Chair
John Mallett-Paret

The Division of Applied Mathematics at Brown University is one of the most prominent departments at Brown, and is also one of the oldest and strongest of its type in the country. The Division of Applied Mathematics is a world renowned center of research activity in a wide spectrum of traditional and modern mathematics. It explores the connections between mathematics and its applications at both the research and educational levels. The principal areas of research activities are ordinary, functional, and partial differential equations; stochastic control theory; applied probability, statistics and stochastic systems theory; neuroscience and computational molecular biology; numerical analysis and scientific computation; and the mechanics of solids, materials science and fluids. The effort in virtually all research ranges from applied and algorithmic problems to the study of fundamental mathematical questions. The Division emphasizes applied mathematics as a unifying theme. To facilitate cooperation among faculty and students, some research programs are partly organized around interdepartmental research centers. These centers facilitate funding and cooperative research in order to maintain the highest level of research and education in the Division. It is this breadth and the discovery from mutual collaboration which marks the great strength and uniqueness of the Division of Applied Mathematics at Brown.

For additional information, please visit the department’s website: http://www.dam.brown.edu/

Applied Mathematics Concentration

Requirements

The concentration in Applied Mathematics allows students to investigate the mathematics of problems arising in the physical, life and social sciences as well as in engineering. The basic mathematical skills of Applied Mathematics come from a variety of sources, which depend on the problems of interest: the theory of ordinary and partial differential equations, matrix theory, statistical sciences, probability and decision theory, risk and insurance analysis, among others. Applied Mathematics appeals to people with a variety of different interests, ranging from

those with a desire to obtain a good quantitative background for use in some future career, to those who are interested in the basic techniques and approaches in themselves. The standard Applied Mathematics concentration leads to either the A.B. or Sc.B. degree. Students may also choose to pursue a joint program with biology, computer science or economics.

Both the A.B. and Sc.B. concentrations in Applied Mathematics require certain basic courses to be taken, but beyond this there is a great deal of flexibility as to which areas of application are pursued. Students are encouraged to take courses in applied mathematics, mathematics and one or more of the application areas in the natural sciences, social sciences or engineering. Whichever areas are chosen should be studied in some depth.

Standard program for the A.B. degree.

Prerequisites

MATH 0090 & MATH 0100 Introductory Calculus, Part I and Introductory Calculus, Part II

Or their equivalent

Program

Ten additional semester courses approved by the Division of Applied Mathematics. These classes must include:

MATH 0180 Intermediate Calculus
MATH 0520 Linear Algebra
APMA 0350 & APMA 0360 Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II

Select one course on programming from the following:

APMA 0090 Introduction to Mathematical Modeling
APMA 0160 Introduction to Scientific Computing
CSCI 0040 Introduction to Scientific Computing and Problem Solving
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170 Computer Science: An Integrated Introduction

Five additional courses, of which four should be chosen from the 1000-level courses taught by the Division of Applied Mathematics.

Total Credits

10

1 Substitution of alternate courses for the specific requirements is subject to approval by the division.
2 Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
3 APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
4 Concentrators are urged to complete their introductory programming course before the end of their sophomore year.

Standard program for the Sc.B. degree.

Program

Eighteen approved semester courses in mathematics, applied mathematics, engineering, the natural or social sciences. These classes must include:

MATH 0090 & MATH 0100 Introductory Calculus, Part I and Introductory Calculus, Part II
MATH 0180 Intermediate Calculus
MATH 0520 Linear Algebra
APMA 0350 & APMA 0360 Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II

Select one senior seminar from the APMA 1930 or APMA 1940 series, or an approved equivalent.

Select one course on programming from the following:

APMA 0090 Introduction to Mathematical Modeling

APMA 0160 Introduction to Scientific Computing
CSCI 0040 Introduction to Scientific Computing and Problem Solving
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170 Computer Science: An Integrated Introduction

Five additional courses, of which four should be chosen from the 1000-level courses taught by the Division of Applied Mathematics.

Total Credits

10

1 Substitution of alternate courses for the specific requirements is subject to approval by the division.
2 Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
3 APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
4 Concentrators are urged to complete their introductory programming course before the end of their sophomore year.
Brown University

Applied Mathematics-Biology
Concentration Requirements

Applied Mathematics-Biology is an interdepartmental concentration in which students learn to use quantitative methods, including probability, statistical inference, and system dynamics in the study of problems in the biological sciences. With the growth of large-scale genomics data and the use of high throughput technologies, mathematics is becoming an essential analytical tool for biological research. As such, coursework in Applied Math-Biology requires students to gain a strong foundation in mathematical and statistical sciences through courses in the departments of Mathematics and Applied Mathematics. In addition, students must take basic science courses in physics and chemistry. Along with these foundational courses, students work with a faculty advisor to develop an area emphasis in biology (e.g. biochemistry, neurosciences, genetics, etc.). Students earn the Sc.B. degree upon completion of the Applied Mathematics-Biology concentration.

Standard program for the Sc.B. degree

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

Requirements:

Select one of the following sequences:

| APMA 0350 | Methods of Applied Mathematics I, II |
| APMA 0360 | and Methods of Applied Mathematics I, II |
| APMA 0330 | Methods of Applied Mathematics I, II |
| APMA 0340 | and Methods of Applied Mathematics I, II |

PHYS 0060 Foundations of Electromagnetism and Modern Physics (or equivalent)

Four biology courses agreed upon by the student and advisor, for example:

Biochemistry
- BIOL 0280 Introductory Biochemistry
- BIOL 1270 Advanced Biochemistry

CHEM 0350/0360 Organic Chemistry

CHEM 1230 Chemical Biology

CHEM 1240 Biochemistry

Cells, Tissues, and Organs

- BIOL 0800 Principles of Physiology
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1190 Synaptic Transmission and Plasticity

and/or appropriate bioengineering courses, such as:
- BIOL 1090 Polymer Science for Biomaterials
- BIOL 1120 Biomaterials
- BIOL 1140 Tissue Engineering
- BIOL 1150 Stem Cell Engineering

Neurosciences

- APMA 0410 Mathematical Methods in the Brain Sciences

Population Biology and Ecology

- BIOL 0380 The Ecology and Evolution of Infectious Disease
- BIOL 0420 Principles of Ecology
- BIOL 0430 The Evolution of Plant Diversity
- BIOL 0480 Evolutionary Biology
- BIOL 1410 Evolutionary Genetics
- BIOL 1420 Experimental Design in Ecology
- BIOL 1430 The Computational Theory of Molecular Evolution
- BIOL 1460 Microbial Diversity and the Environment

Genetics

- BIOL 0470 Genetics
- BIOL 1410 Evolutionary Genetics

Two additional courses in applied math, biology, chemistry, math, or physics. At least one of these must be a directed research course that reflects the theme of this program, for example:

- APMA 1970 Independent Study
- BIOL 1950/1960 Directed Research/Independent Study

Total Credits 18

1 It is recommended that some concentrators take organic chemistry or biochemistry.

Applied Mathematics-Computer Science
Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government.
Requirements for the Standard Track of the Sc.B. degree.

Prerequisites - two semesters of Calculus, for example

</table>

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650/1660.

A capstone course: a one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) uses a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Total Credits: 17

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Economics

Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks of the applied mathematics-economics concentration have A.B. degree versions and Sc.B. degree versions.

1. APMA 0330 and APMA 0340 may be substituted with advisor approval.
2. Or ECON 1110 with permission.
3. No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

**Applied Mathematics Graduate Program**

The department of Applied Mathematics offers graduate programs leading to the Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/applied-mathematics
Courses

APMA 0070. Introduction to Applied Complex Variables.
Applications of complex analysis that do not require calculus as a prerequisite. Topics include algebra of complex numbers, plane geometry by means of complex coordinates, complex exponentials, and logarithms and their relation to trigonometry, polynomials, and roots of polynomials, conformal mappings, rational functions and their applications, finite Fourier series and the FFT, iterations and fractals. Uses MATLAB, which has easy and comprehensive complex variable capabilities.

APMA 0090. Introduction to Mathematical Modeling.
We will explore issues of mathematical modeling and analysis. Five to six self-contained topics will be discussed and developed. The course will include seminars in which modeling issues are discussed, lectures to provide mathematical background, and computational experiments. Required mathematical background is knowledge of one-variable calculus, and no prior computing experience will be assumed.

APMA 0120. Mathematics of Finance.
The current volatility in international financial markets makes it imperative for us to become competent in financial calculations early in our liberal arts and scientific career paths. This course is designed to prepare the student with those elements of mathematics of finance appropriate for the calculations necessary in financial transactions.

For students in any discipline that may involve numerical computations. Includes instruction for programming in MATLAB. Applications discussed include solution of linear equations (with vectors and matrices) and nonlinear equations (by bisection, iteration, and Newton’s method), interpolation, and curve-fitting, difference equations, iterated maps, numerical differentiation and integration, and differential equations. Prerequisite: MATH 0100 or its equivalent.

Mathematics is the foundation of our technological society and most of its powerful ideas are quite accessible. This course will explain some of these using historical texts and Excel. Topics include the predictive power of “differential equations” from the planets to epidemics, oscillations and music, chaotic systems, randomness and the atomic bomb. Prerequisite: some knowledge of calculus.

APMA 0330. Methods of Applied Mathematics I, II.
Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or AP68 or AP68 for a minimum score of 5.

APMA 0340. Methods of Applied Mathematics I, II.
Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or AP68 or AP68 for a minimum score of 5.

APMA 0350. Methods of Applied Mathematics I, II.
Covers the same material as APMA 0330, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics, mathematics, physics, engineering, etc. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or AP68 or AP68 for a minimum score of 5.

APMA 0360. Methods of Applied Mathematics I, II.
Covers the same material as APMA 0340, albeit of greater depth. Intended primarily for students who desire a rigorous development of the mathematical foundations of the methods used, for those students considering one of the applied mathematics concentrations, and for all students in the sciences who will be taking advanced courses in applied mathematics, mathematics, physics, engineering, etc. Three hours lecture and one hour recitation. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or AP68 or AP68 for a minimum score of 5.

Basic mathematical methods commonly used in the neural and cognitive sciences. Topics include: introduction to probability and statistics, emphasizing hypothesis testing and modern nonparametric methods; introduction to differential equations and systems of differential equations, emphasizing qualitative behavior and simple phase-plane analysis. Examples from neuroscience, cognitive science, and other sciences. Prerequisite: MATH 0100 or equivalent.

APMA 0650. Essential Statistics.

APMA 1070. Quantitative Models of Biological Systems.
Quantitative dynamic models help understand problems in biology and there has been rapid progress in recent years. The course provides an introduction to the concepts and techniques, with applications to population dynamics, infectious diseases, enzyme kinetics, aspects of cellular biology. Additional topics covered will vary. Mathematical techniques will be discussed as they arise in the context of biological problems. Prerequisites: APMA 0330, 0340 or 0350, 0360, or written permission.

APMA 1080. Inference in Genomics and Molecular Biology.
Sequencing of genomes has generated a massive quantity of fundamental biological data. We focus on drawing traditional and Bayesian statistical inferences from these data, including: alignment of biopolymer sequences; prediction of their structures, regulatory signals; significances in database searches; and functional genomics. Emphasis is on inferences in the discrete high dimensional spaces. Statistical topics: Bayesian inference, estimation, hypothesis testing and false discovery rates, statistical decision theory. Prerequisite: APMA 1650 or MATH 1610; BIOL 0200 recommended; Matlab or programming experience. Enrollment limited to 20.

APMA 1170. Introduction to Computational Linear Algebra.
Focuses on fundamental algorithms in computational linear algebra with relevance to all science concentrators. Basic linear algebra and matrix decompositions (Cholesky, LU, QR, etc.), round-off errors and numerical analysis of errors and convergence. Iterative methods and conjugate gradient techniques. Computation of eigenvalues and eigenvectors, and an introduction to least squares methods.

APMA 1180. Introduction to Numerical Solution of Differential Equations.

Basic probabilistic problems and methods in operations research and management science. Methods of problem formulation and solution. Markov chains, birth-death processes, stochastic service and queueing systems, the theory of sequential decisions under uncertainty, dynamic programming. Applications. Prerequisite: APMA 1650 or MATH 1610, or equivalent.

An introduction to the basic mathematical ideas and computational methods of optimizing allocation of effort or resources, with or without
models for the insurance company and its portfolio of policies as a
treats the Collective Theory of Risk, which constructs mathematical
The course consists of two parts: the first treats life contingencies, i.e. the
calculus-based probability
Examination of probability theory and mathematical statistics from
or equivalent. Offered in alternate years
The course emphasizes methods for analysis in the frequency domain,
with many applications to signal processing, econometrics, geology, etc.
APMA 1670. Statistical Analysis of Time Series
or equivalent, basic linear algebra
APMA 1680. Advanced Matrix Theory.
Canonical forms of orthogonal, Hermitian and normal matrices: Rayleigh
quotients. Norms, eigenvalues, matrix equations, generalized inverses.
Banded, sparse, non-negative and circulant matrices. Prerequisite: AM 34
or MA 52 or 54, or permission of the instructor
APMA 1930A. Actuarial Mathematics.
A seminar considering selected topics from two fields: (1) life
contingencies-the study of the valuation of life insurance contracts; and
(2) collective risk theory, which is concerned with the random process
that generates claims for a portfolio of policies. Topics are chosen from
Actuarial Mathematics, 2nd ed., by Bowers, Gerber, Hickman, Jones, and
Nesbitt. Prerequisite: knowledge of probability theory to the level of AM
165 or MA 161. Particularly appropriate for students planning to take the
examinations of the Society of Actuaries
APMA 1930B. Computational Probability and Statistics.
Examination of probability theory and mathematical statistics from
the perspective of computing. Topics selected from: random number
generation, Monte Carlo methods, limit theorems, stochastic dependence,
Bayesian networks, probabilistic grammars
APMA 1930C. Information Theory.
Information theory is the mathematical study of the fundamental limits of
information transmission (or coding) and storage (or compression). This
course offers a broad introduction to information theory and its real-world
applications. A subset of the following is covered: entropy and information;
the asymptotic equipartition property; theoretical limits of lossless data
compression and practical algorithms; communication in the presence
of noise-channel coding, channel capacity; source-channel separation;
Gaussian channels; Lossy data compression
APMA 1930D. Mixing and Transport in Dynamical Systems.
Mixing and transport are important in several areas of applied science,
including fluid mechanics, atmospheric science, chemistry, and particle
dynamics. In many cases, mixing seems highly complicated and
unpredictable. We use the modern theory of dynamical systems to
understand and predict mixing and transport from the differential equations
describing the physical process in question. Prerequisites: AM 33,34 or
AM 35,36
APMA 1930E. Ocean Dynamics.
Works through the popular book by Henry Stommel entitled A View of
the Sea. Introduces the appropriate mathematics to match the physical
concepts introduced in the book
APMA 1930G. The Mathematics of Sports.
Topics to be discussed will range from the determination of who
won the match, through biomechanics, free-fall of flexible bodies
and aerodynamics, to the flight of ski jumpers and similar unnatural
phenomena. Prerequisites: AM 11 and AM 34 or their equivalents, or
permission of the instructor
APMA 1930H. Scaling and Self-Similarity.
The themes of scaling and self-similarity provide the simplest, and yet
the most fruitful description of complicated forms in nature such as
the branching of trees, the structure of human lungs, rugged natural landscapes, and turbulent fluid flows. This seminar is an investigation of some of these phenomena in a self-contained setting requiring little more mathematical background than high school algebra.

Topics to be covered: Dimensional analysis; empirical laws in biology, geosciences, and physics and the interplay between scaling and function; an introduction to fractals; social networks and the "small world" phenomenon.

APMA 1930I. Random Matrix Theory.
In the past few years, random matrices have become extremely important in a variety of fields such as computer science, physics and statistics. They are also of basic importance in various areas of mathematics. This class will serve as an introduction to this area. The focus is on the basic matrix ensembles and their limiting distributions, but several applications will be considered. Prerequisites: MATH 0200 or 0350; and MATH 0520 or 0540; and APMA 0350, 0360, 1650, and 1660. APMA 1170 and MATH 1010 are recommended, but not required.

APMA 1930J. Mathematics of Random Networks.
An intro to the emerging field of random networks and a glimpse of some of the latest developments. Random networks arise in a variety of applications including statistics, communications, physics, biology and social networks. They are studied using methods from a variety of disciplines ranging from probability, graph theory and statistical physics to nonlinear dynamical systems. Describes elements of these theories and shows how they can be used to gain practical insight into various aspects of these networks including their structure, design, distributed control and self-organizing properties. Prerequisites: Advanced calculus, basic knowledge of probability. Enrollment limited to 40.

Basic stability and instability analysis of differential equations will be covered. Various examples of physical and biological applications will be studied and shared with the class.

APMA 1940A. Coding and Information Theory.
In a host of applications, from satellite communication to compact disc technology, the storage, retrieval, and transmission of digital data relies upon the theory of coding and information for efficient and error-free performance. This course is about choosing representations that minimize the amount of data (compression) and the probability of an error in data handling (error-correcting codes). Prerequisite: A knowledge of basic probability theory at the level of AM 165 or MA 161.

APMA 1940B. Information and Coding Theory.
Originally developed by C.E. Shannon in the 1940s for describing bounds on information rates across telecommunication channels, information and coding theory is now employed in a large number of disciplines for modeling and analysis of problems that are statistical in nature. This course provides a general introduction to the field. Main topics include entropy, error correcting codes, source coding, data compression. Of special interest will be the connection to problems in pattern recognition. Includes a number of projects relevant to neuroscience, cognitive and linguistic sciences, and computer vision. Prerequisites: High school algebra, calculus. MATLAB or other computer experience helpful. Prior exposure to probability theory/statistics helpful.

APMA 1940C. Introduction to Mathematics of Fluids.
Equations that arise from the description of fluid motion are born in physics, yet are interesting from a more mathematical point of view as well. Selected topics from fluid dynamics introduce various problems and techniques in the analysis of partial differential equations. Possible topics include stability, existence and uniqueness of solutions, variational problems, and active scalar equations. No prior knowledge of fluid dynamics is necessary.

APMA 1940D. Iterative Methods.
Large, sparse systems of equations arise in many areas of mathematical application and in this course we explore the popular numerical solution techniques being used to efficiently solve these problems. Throughout the course we will study preconditioning strategies, Krylov subspace acceleration methods, and other projection methods. In particular, we will develop a working knowledge of the Conjugate Gradient and Minimum Residual (and Generalized Minimum Residual) algorithms. Multigrid and Domain Decomposition Methods will also be studied as well as parallel implementation, if time permits.

APMA 1940E. Mathematical Biology.
This course is designed for undergraduate students in mathematics who have an interest in the life sciences. No biological experience is necessary, as we begin by a review of the relevant topics. We then examine a number of case studies where mathematical tools have been successfully applied to biological systems. Mathematical subjects include differential equations, topology and geometry.

APMA 1940F. Mathematics of Physical Plasmas.
Plasmas can be big, as in the solar wind, or small, as in fluorescent bulbs. Both kinds are described by the same mathematics. Similar mathematics describes semiconducting materials, the movement of galaxies, and the re-entry of satellites. We consider how all of these physical systems are described by certain partial differential equations. Then we invoke the power of mathematics. The course is primarily mathematical. Prerequisites: AM 34 or 36, MA 18 or 20 or 35, and PH 6 or PH 8 or EN 51.

APMA 1940G. Multigrid Methods.
Multigrid methods are a very active area of research in Applied Mathematics. An introduction to these techniques will expose the student to cutting-edge mathematics and perhaps pique further interest in the field of scientific computation.

APMA 1940H. Numerical Linear Algebra.
This course will deal with advanced concepts in numerical linear algebra. Among the topics covered: Singular Value Decompositions (SVD) QR factorization, Conditioning and Stability and Iterative Methods.

APMA 1940I. The Mathematics of Finance.
The mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis placed on the evaluation of risk and its role in decision-making under uncertainty. Prerequisite: basic probability.

APMA 1940J. The Mathematics of Speculation.
The course will deal with the mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis will be placed on the evaluation of risk and its role in decision making under uncertainty. Prerequisite: basic probability.

APMA 1940K. Fluid Dynamics and Physical Oceanography.
Introduction to fluid dynamics as applied to the mathematical modeling and simulation of ocean dynamics and near-shore processes. Oceanography topics include: overview of atmospheric and thermal forcing of the oceans, ocean circulation, effects of topography and Earth's rotation, wind-driven currents in upper ocean, coastal upwelling, the Gulf Stream, tidal flows, wave propagation, tsunamis.

APMA 1940L. Mathematical Models in Biophysics.
Introduction to reaction models for biomolecules, activation and formation of macro-molecules, stochastic simulation methods such as Langevin models and Brownian dynamics. Applications to blood flow, platelet aggregation, and interactions of cells with blood vessel walls.

APMA 1940M. The History of Mathematics.
The course will not be a systematic survey but will focus on specific topics in the history of mathematics such as Archimedes and integration, Oresme and graphing, Newton and infinitesimals, simple harmonic motion, the discovery of 'Fourier' series, the Monte Carlo method, reading and analyzing the original texts. A basic knowledge of calculus will be assumed.

APMA 1940N. Introduction to Mathematical Models in Computational Biology.
This course is designed to introduce students to the use of mathematical models in biology as well as some more recent topics in computational biology. Mathematical techniques will involve difference equations and dynamical systems theory, ordinary differential equations and some partial differential equations. These techniques will be applied in the study of many biological applications such as: (i) Difference Equations: population dynamics, red blood cell production, population genetics; (ii) Ordinary Differential Equations: predator-prey models, Lotka-Volterra model, modeling the evolution of the genome, heart beat model/cycle, transmission dynamics of HIV and gonorrhea; (iii) Partial Differential Equations: tumor growth, modeling evolution of the genome, pattern formation. Prerequisites: AM 33 and 34 (APMA 0330 and 0340).
APMA 1940O. Approaches to Problem Solving in Applied Mathematics.
The aim of the course is to illustrate through the examination of unsolved (but elementary) problems the ways in which professional applied mathematicians approach the solution of such questions. Ideas considered include: choosing the "simplest" nontrivial example; generalization; and specification. Ways to think outside convention. Some knowledge of probability and linear algebra helpful. Suggested reading. How to solve it*, G. Polya
Nonplussed*, Julian Havil

APMA 1940P. Biodynamics of Block Flow and Cell Locomotion.

APMA 1940Q. Filtering Theory.
Filtering (estimation of a "state process" from noisy data) is an important area of modern statistics. It is of central importance in navigation, signal and image processing, control theory and other areas of engineering and science. Filtering is one of the exemplary areas where the application of modern mathematics and statistics leads to substantial advances in engineering. This course will provide a student with the working knowledge sufficient for cutting edge research in the field of nonlinear filtering and its practical applications. Topics will include: hidden Markov models, Kalman and Wiener filters, optimal nonlinear filtering, elements of Ito calculus and Wiener chaos, Zakai and Kushner equations, spectral separating filters and wavelet based filters, numerical implementation of filters. We will consider numerous applications of filtering to speech recognition, analysis of financial data, target tracking and image processing. No prior knowledge in the field is required but a good understanding of the basic Probability Theory (APMA1200 or APMA2630) is important.

APMA 1940R. Linear and Nonlinear Waves.
From sound and light waves to water waves and traffic jams, wave phenomena are everywhere around us. In this seminar, we will discuss linear and nonlinear waves as well as the propagation of wave packets. Among the tools we shall use and learn about are numerical simulations in Matlab and analytical techniques from ordinary and partial differential equations. We will also explore applications in nonlinear optics and to traffic flow problems. Prerequisites: MATH 0180 and either APMA 0330-0340 or APMA 0350-0360. No background in partial differential equations is required.

APMA 1940S. Topics in Applied Differential Equations.
The course will cover several topics of ordinary differential equations arising from other disciplines such as physics, chemistry, biology, and engineering, with an emphasis on the modeling of various underlying equations. The course will also be supplemented with a use of computer algebra systems like MATHMATIC.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

APMA 2110. Real Analysis.
Provides the basis of real analysis which is fundamental to many of the other courses in the program: metric spaces, measure theory, and the theory of integration and differentiation.

APMA 2120. Hilbert Spaces and Their Applications.
A continuation of APMA 2110: metric spaces, Banach spaces, Hilbert spaces, the spectrum of bounded operators on Banach and Hilbert spaces, compact operators, applications to integral and differential equations.

Calculus of asymptotic expansions, evaluation of integrals. Solution of linear ordinary differential equations in the complex plane, WKB method, special functions.

Topics vary according to interest of instructor and class.

APMA 2210. Topics in Nonlinear Dynamical Systems.
Topics to be covered in this course may vary depending on the audiences. One of the goals that is planned for this course is to discuss the boundary layers and/or the boundary value problems that appear and play a very important role in the kinetic theory of gases; in particular, in the theory of the Boltzmann equations. Students are encouraged to attend and participate in the kinetic theory program offered by the ICERM institute in the Fall 2011 semester. This course may be taken twice for credit.

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

Please note, for fall 2012, interested students must register for MATH 2370 S02 (CRN 14791).

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

Please note, for spring 2013, interested students must register for MATH 2380 S02 (CRN 24295).
APMA 2260. Introduction to Stochastic Control Theory.

The course serves as an introduction to the theory of stochastic control and dynamic programming technique. Optimal stopping, total expected (discounted) cost problems, and long-run average cost problems will be discussed in discrete time setting. The last part of the course deals with continuous time deterministic control and game problems. The course requires some familiarity with the probability theory.

APMA 2410. Fluid Dynamics I.

Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits. 999999

APMA 2420. Fluid Dynamics II.

Course covers concepts and techniques relevant to fluid dynamics research for both high and low Reynolds number flows together with an introduction to the dynamics of complex fluids. Topics covered include: boundary layers and secondary flows, perturbation methods, flow stability and transition phenomena, surface tension effects, mixing and dispersion, overview of suspension flows and non-Newtonian fluids. Prerequisite: APMA 2410, ENGN 2810 or equivalent.

Please note, for spring 2013, interested students must register for ENGN 2820 S01 (CRN 25226).

APMA 2450. Exchange Scholar Program.

APMA 2470. Topics in Fluid Dynamics.

Initial review of topics selected from flow stability, turbulence, turbulent mixing, surface tension effects, and thermal convection. Followed by focussed attention on the dynamics of dispersed two-phase flow and complex fluids.

APMA 2480. Topics in Fluid Dynamics.

No description available.

Finite difference methods for solving time-dependent initial value problems of partial differential equations. Fundamental concepts of consistency, accuracy, stability and convergence of finite difference methods will be covered. Associated well-posedness theory for linear time-dependent PDEs will also be covered. Some knowledge of computer programming expected.

APMA 2560. Numerical Solution of Partial Differential Equations II.

An introduction to weighted residual methods, specifically spectral, finite element and spectral element methods. Topics include a review of variational calculus, the Rayleigh-Ritz method, approximation properties of spectral end finite element methods, and solution techniques. Homework will include both theoretical and computational problems.

APMA 2570A. Numerical Solution of Partial Differential Equations III.

We will cover spectral methods for partial differential equations. Algorithm formulation, analysis, and efficient implementation issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2580A. Computational Fluid Dynamics.

An introduction to computational fluid dynamics with emphasis on compressible flows. We will cover finite difference, finite volume and finite element methods for compressible Euler and Navier-Stokes equations and for general hyperbolic conservation laws. Background material in hyperbolic partial differential equations will also be covered. Algorithm development, analysis, implementation and application issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

APMA 2610. Recent Applications of Probability and Statistics.

This is a topics course, covering a selection of modern applications of probability and statistics in the computational, cognitive, engineering, and neural sciences. The course will be rigorous, but the emphasis will be on application. Topics will likely include: Markov chains and their applications to MCMC computing and hidden Markov models, Dependency graphs and Bayesian networks, parameter estimation and the EM algorithm, Nonparametric statistics ("learning theory"), including consistency, bias/variance tradeoff, and regularization; Gibbs distributions, maximum entropy, and their connections to large deviations. Each topic will be introduced with several lectures on the mathematical underpinnings, and concluded with a computer project, carried out by each student individually, demonstrating the mathematics and the utility of the approach.

A one-semester course that provides an introduction to probability theory based on measure theory. The course covers the following topics: probability spaces, random variables and measurable functions, independence and infinite product spaces, expectation and conditional expectation, weak convergence of measures, laws of large numbers and the Central Limit Theorem, discrete time martingale theory and applications.

A one-semester course in probability that provides an introduction to stochastic processes. The course covers the following subjects: Markov chains, Poisson process, birth and death processes, continuous-time martingales, optional sampling theorem, martingale convergence theorem, Brownian motion, introduction to stochastic calculus and Ito’s formula, stochastic differential equations, the Feynman-Kac formula, Girsanov’s theorem, the Black-Scholes formula, basics of Gaussian and stationary processes. Prerequisite: APMA 2630 or equivalent course.

APMA 2660. Stochastic Processes.

Review of the theory of stochastic differential equations and reflected SDEs, and of the ergodic and stability theory of these processes. Introduction to the theory of weak convergence of probability measures and processes. Concentrates on applications to the probabilistic modeling, control, and approximation of modern communications and queueing networks; emphasizes the basic methods, which are fundamental tools throughout applications of probability.

APMA 2670. Mathematical Statistics I.

This course presents advanced statistical inference methods. Topics include: foundations of statistical inference and comparison of classical, Bayesian, and minimax approaches, point and set estimation, hypothesis testing, linear regression, linear classification and principal component analysis, MRF, consistency and asymptotic normality of Maximum Likelihood and estimators, statistical inference from noisy or degraded data, and computational methods (E-M Algorithm, Markov Chain Monte Carlo, Bootstrap). Prerequisite: APMA 2630 or equivalent.

APMA 2680. Mathematical Statistics II.

The course covers modern nonparametric statistical methods. Topics include: density estimation, multiple regression, adaptive smoothing, cross-validation, bootstrap, classification and regression trees; nonlinear discriminant analysis, projection pursuit, the ACE algorithm for time series prediction, support vector machines, and neural networks. The course will provide the mathematical underpinnings, but it will also touch upon some applications in computer vision/speech recognition, and biological, neural, and cognitive sciences. Prerequisite: APMA 2670.

APMA 2720. Information Theory.

APMA 2810A. Computational Biology.

Provides an up-to-date presentation of the main problems and algorithms in bioinformatics. Emphasis is given to statistical/probabilistic methods for various molecular biology tasks, including: comparison of genomes of different species, finding genes and motifs, understanding transcription control mechanisms, analyzing microarray data for gene clustering, and predicting RNA structure.

APMA 2810B. Computational Molecular Biology.

Provides an up-to-date presentation of problems and algorithms in bioinformatics, beginning with an introduction to biochemistry and molecular genetics. Topics include: proteins and nucleic acids, the genetic code, the central dogma, the genome, gene expression, metabolic transformations, and experimental methods (gel electrophoresis, X-ray
crystallography, NMR). Also, algorithms for DNA sequence alignment, database search tools (BLAST), and DNA sequencing

APMA 2810C. Elements of High Performance Scientific Computing. No description available

APMA 2810D. Elements of High Performance Scientific Computing II. No description available

APMA 2810E. Far Field Boundary Conditions for Hyperbolic Equations. No description available

APMA 2810F. Introduction to Non-linear Optics. No description available

APMA 2810G. Large Deviations. No description available

APMA 2810H. Math of Finance. No description available

APMA 2810I. Mathematical Models and Numerical Analysis in Computational Quantum Chemistry. We shall present on some models in the quantum chemistry field (Thomas Fermi and related, Hartree Fock, Kohn Sham) the basic tools of functional analysis for the study of their solutions. Then some of the discretization methods and iterative algorithms to solve these problems will be presented and analyzed. Some of the open problems that flourish in this field will also be presented all along the lectures

APMA 2810J. Mathematical Techniques for Neural Modeling. No description available

APMA 2810K. Methods of Algebraic Geometry in Control Theory I. Develops the ideas of algebraic geometry in the context of control theory. The first semester examines scalar linear systems and affine algebraic geometry while the second semester addresses multivariable linear systems and projective algebraic geometry

APMA 2810L. Numerical Solution of Hyperbolic PDE’s. No description available

APMA 2810M. Some Topics in Kinetic Theory. No description available

APMA 2810N. Topics in Nonlinear PDEs. No description available

APMA 2810O. Stochastic Differential Equations. No description available

APMA 2810P. Perturbation Methods. Basic concepts of asymptotic approximations with examples with examples such as evaluation of integrals and functions. Regular and singular perturbation problems for differential equations arising in fluid mechanics, wave propagation or nonlinear oscillators. Methods include matched asymptotic expansions and multiple scales. Methods and results will be discussed in the context of applications to physical problems

APMA 2810Q. Discontinuous Galerkin Methods. In this seminar course we will cover the algorithm formulation, stability analysis and error estimates, and implementation and applications of discontinuous Galerkin finite element methods for solving hyperbolic conservation laws, convection diffusion equations, dispersive wave equations, and other linear and nonlinear partial differential equations. Prerequisite: APMA 2550

APMA 2810R. Computational Biology Methods for Gene/Protein Networks and Structural Proteomics. The course presents computational and statistical methods for gene and protein networks and structural proteomics; it emphasizes: (1) Probabilistic models for gene regulatory networks via microarray, chromatin immunoprecipitation, and cis-regulatory data; (2) Signal transduction pathways via tandem mass spectrometry data; (3) Molecular Modeling for ligand-receptor coupling and docking. The course is recommended for graduate students

APMA 2810S. Topics in Control. No description available

APMA 2810T. Nonlinear Partial Differential Equations. This course introduces techniques useful for solving many nonlinear partial differential equations, with emphasis on elliptic problems. PDE from a variety of applications will be discussed. Contact the instructor about prerequisites

APMA 2810U. Topics in Differential Equations. No description available

APMA 2810V. Topics in Partial Differential Equations. The course will cover an introduction of the L_p theory of second order elliptic and parabolic equations, finite difference approximations of elliptic and parabolic equations, and some recent developments in the Navier-Stokes equations and quasi-geostrophic equations. Some knowledge of real analysis will be expected

APMA 2810W. Advanced Topics in High Order Numerical Methods for Convection Dominated Problems. This is an advanced seminar course. We will cover several topics in high order numerical methods for convection dominated problems, including methods for solving Boltzman type equations, methods for solving unsteady and steady Hamilton-Jacobi equations, and methods for solving moment models in semi-conductor device simulations. Prerequisite: AM 255 or equivalent knowledge of numerical analysis

APMA 2810X. Introduction to the Theory of Large Deviations. The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, PDE, weak convergence, etc.), and basic examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover the Wentsel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control and Monte Carlo methods. Prerequisites: APMA 2630 and 2640

APMA 2810Y. Discrete high-D Inferences in Genomics. Genomics is revolutionizing biology and biomedicine and generated a mass of clearly relevant high-D data along with many important high-D discrete inference problems. Topics: special characteristics of discrete high-D inference including Bayesian posterior inference; point estimation; interval estimation; hypothesis tests; model selection; and statistical decision theory

APMA 2810Z. An Introduction to the Theory of Large Deviations. The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentsel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: AM 263 and 264

APMA 2811A. Directed Methods in Control and System Theory. Various general techniques have been developed for control and system problems. Many of the methods are indirect. For example, control problems are reduced to a problem involving a differential equation (such as the partial differential equation of Dynamic Programming) or to a system of differential equations (such as the canonical system of the Maximum Principle). Since these indirect methods are not always effective
APMA 2811B. Computational Methods for Signaling Pathways and Protein Interactions.
The course will provide presentation of the biology and mathematical models/ algorithms for a variety of topics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs and structural aspects of protein docking problems. Prerequisites: The course is recommended for graduate students. It will be self-contained; students will be able to fill in knowledge by reading material to be indicated by the instructor.

APMA 2811C. Stochastic Partial Differential Equations.
SPDEs is an interdisciplinary area at the crossroads of stochastic processes and partial differential equations (PDEs). The topics of the course include: geneses of SPDEs in real life applications, mathematical foundations and analysis of SPDEs, numerical and computational aspects of SPDEs; applications of SPDEs to fluid dynamics, population biology, hidden Markov models, etc. Prerequisites: familiarity with stochastic calculus and PDEs (graduate level).

APMA 2811D. Asymptotic Problems For Differential Equations And Stochastic Processes.
Topics that will be covered include: WK method: zeroth and first orders; turning points; Perturbation theory: regular perturbation, singular perturbation and boundary layers; Homogenization methods for ODE’s, elliptic and parabolic PDE’s; Homogenization for SDE’s, diffusion processes in periodic and random media; Averaging principle for ODE’s and SDE’s. Applications will be discussed in class and in homework problems.

This course gives an introduction to the basic concepts of a posteriori estimates of finite element methods. After an overview of different techniques the main focus will be shed on residual based estimates where as a starting point the Laplace operator is analyzed. Effectivity and reliability of the error estimator will be proven. In a second part of the course, students will either study research articles and present them or implement the error estimates for some specific problem and present their numerical results. Recommended prerequisites: basic knowledge in finite elements, APMA 2550, 2560, 2570.

The purpose of the course is to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BSDF methods). We shall also discuss efficient implementation strategies using Newton-type methods and hybrid techniques such as Rosenbruck methods. The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. Time permitting, we shall also discuss more specialized topics such as symplectic integration methods and parallel-in-time methods. A key component of the course shall be the discussion of problems and methods designed for the discretization of ODE systems originating from PDE’s in mind. Topics include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods. Part of the class will consist of student presentations on more advanced topics, summarizing properties and known results based on reading journal papers.

APMA 2811G. Topics in Averaging and Metastability with Applications.
Topics that will be covered include: the averaging principle for stochastic dynamical systems and in particular for Hamiltonian systems; metastability and stochastic resonance. We will also discuss applications in class and in homework problems. In particular we will consider metastability issues arising in chemistry and biology, e.g. in the dynamical behavior of proteins. The course will be largely self contained, but a course in graduate probability theory and/or stochastic calculus will definitely help.

APMA 2811H. Survival Analysis.

APMA 2811I. An Introduction to Turbulence Modeling.

APMA 2811J. Topics in Stochastic Processes.
The course provides an introduction to several topics related to stochastic processes on graphs, with a special emphasis on applications in statistical mechanics, computational biology, machine learning and combinatorics. Mathematical theory will be intertwined with algorithms and applications, and open problems will be described. Topics that will be covered include Markov random fields, graphical models, Gibbs measures, phase transitions, reconstruction and mean field models. Prerequisites: Background in real analysis and probability.

An organizational meeting will be held on Wednesday, September 5th, 11:30am-12:30pm at 182 George Street, room 110.

APMA 2811K. Computational/Statistical Methods for Signaling Pathways and Protein Interactions.
The course will cover the main mathematical/computational models/ algorithms for a variety of tasks in proteomics and structural proteomics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs, and (3) structural aspects of protein docking problems on the basis of NMR data. Open to graduate students only.

APMA 2811L. Topics in Homogenization: Theory and Computation.
Topics that will be covered include: Homogenization methods for ODE’s, for elliptic and parabolic PDE’s and for stochastic differential Equations (SDE’s) in both periodic and random media; Averaging principle for ODE’s and SDE’s. Both theoretical and computational aspects will be studied. Applications will be discussed in class and in homework problems. Prerequisites: Some background in SDE’s and probability will be helpful, even though the class will be largely self contained.

APMA 2811M. Topics in Discontinuous Galerkin Methods.
In this seminar course we will cover several topics in discontinuous Galerkin finite element methods, from algorithm formulation, stability analysis and error estimates, to implementation and applications. The emphasis is on time dependent convection dominated partial differential equations, including hyperbolic equations, convection diffusion equations, dispersive wave equations, and other linear and nonlinear partial differential equations. Prerequisite: APMA 2550.

APMA 2811N. Topics in Random Processes.
APMA 2820A. A Tutorial on Particle Methods.
No description available.

APMA 2820B. Advanced Topics in Information Theory.
Expedoes classical and recent results in information theory. Topics chosen from: multi-terminal/network information theory; communication under channel uncertainty; side information problems (channel, source, and the duality between them); identification via channels; and multi-antenna fading channels. Prerequisite: AM 171 or basic knowledge of information theory.

APMA 2820C. Computational Electromagnetics.
No description available.

APMA 2820D. Conventional, Real and Quantum Computing with Applications to Factoring and Root Finding.
No description available.

APMA 2820E. Geophysical Fluid Dynamics.
No description available.

APMA 2820F. Information Theory and Networks.
No description available.

APMA 2820G. Information Theory, Statistics and Probability.
No description available.

APMA 2820H. Kinetic Theory.
We will focus on two main topics in mathematical study of the kinetic theory: (1) The new goal method to study the trend to Maxwellians; (2) various hydrodynamical (fluids) limits to Euler and Navier-Stokes equations. Main emphasis will be on the ideas behind proofs, but not on technical details.

APMA 2820I. Multiscale Methods and Computer Vision.
Course will address some basic multiscale computational methods such as: multigrid solvers for physical systems, including both geometric and algebraic multigrid, fast integral transforms of various kinds (including a fast Radon transform), and fast inverse integral transforms. Basic problems in computer vision such as global contour detection and their completion over gaps, image segmentation for textural images and perceptual grouping tasks in general will be explained in more details.

APMA 2820J. Numerical Linear Algebra.
Solving large systems of linear equations. The course will use the text of Trefethen and BAO that includes all the modern concepts of solving linear equations.

We discuss the construction and general theory of multistep and multistage methods for numerically solving systems of ODE’s, including stiff and nonlinear problems. Different notions to stability and error estimation and control. As time permits we shall discuss more advanced topics such as order reduction, general linear and additive methods, symplectic methods, and methods for DAE. Prerequisites: AM 219 and AM 255 or equivalent. Some programming experience is expected.

APMA 2820L. Random Processes in Mechanics.
No description available.

APMA 2820M. Singularities in Elliptic Problems and their Treatment by High-Order Finite Element Methods.
Singular solutions for elliptic problems (elasticity and heat transfer) are discussed. These may arise around corners in 2-D and along edges and vertices in 3-D domains. Derivation of singular solutions, characterized by eigenpairs and generalized stress/flux intensity factors (GSIF/GFIFs) are a major engineering importance (because of failure initiation and propagation). High-order FE methods are introduced, and special algorithms for extracting eigenpairs and GSIF/GFIFs are studied (Steklov, dual-function, ERR method, and others).

APMA 2820N. Topics in Scientific Computing.
No description available.

APMA 2820O. The Mathematics of Shape with Applications to Computer Vision.
Methods of representing shape, the geometry of the space of shapes, warping and matching of shapes, and some applications to problems in computer vision and medical imaging. Prerequisite: See instructor for prerequisites.

APMA 2820P. Foundations in Statistical Inference in Molecular Biology.
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and functional genomics. Statistical topics: parameter estimation, hypothesis testing, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

APMA 2820Q. Topics in Kinetic Theory.
This course will introduce current mathematical study for Boltzmann equation and Vlasov equation. We will study large time behavior and hydrodynamic limits for Boltzmann theory and instabilities in the Vlasov theory. Graduate PDE course is required.

APMA 2820R. Structure Theory of Control Systems.
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

APMA 2820S. Topics in Differential Equations.
A sequel to AM 221 concentrating on similar material.

APMA 2820T. Foundations in Statistical Inference in Molecular Biology.
In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and tiled arrays. Statistical topics: parameter estimation, hypothesis testing, recursions, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

APMA 2820U. Structure Theory of Control Systems.
The course deals with the following problems: given a family of control systems S and a family of control systems S’, when does there exist an appropriate embedding of S into S’? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

Course begins with self-contained introduction to theory of “hyperbolic conservation laws”, that is quasilinear first order systems of partial differential equations whose solutions spontaneously develop singularities that propagate as shock waves. A number of recent developments will be discussed. Aim is to familiarize the students with current status of the theory as well as with the expanding areas of applications of the subject.

APMA 2820W. An Introduction to the Theory of Large Deviations.
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change¿of¿measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentsel¿Friedlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk¿sensitive control; weak convergence methods; Hamilton¿Jacobi¿Bellman equations; Monte Carlo methods. Prerequisites: AM 263 and 264.

APMA 2820Y. Approaches to Problem Solving in Applied Mathematics.
TBA.

APMA 2820Z. Topics in Discontinuous Galerkin Methods.
The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov’s and Cramer’s Theorems). We then will cover large deviations for diffusion processes and the Wentsel-Friedlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: AM 263 and 264.

No description available.
APMA 2821B. To Be Determined.
APMA 2821C. Topics in Partial Differential Equations.
The course will start by reviewing the theory of elliptic and parabolic equations in Holder spaces. Then we will discuss several topics in nonlinear elliptic and parabolic equations, for instance, the Navier-Stokes equation and Monge-Ampere type equations. This course is a sequel to APMA 2810V, but APMA 2810V is not a prerequisite.

APMA 2821D. Random Processes and Random Variables.
APMA 2821E. Topics in Variational Methods.
This course consists of two parts: a general introduction to variational methods in PDE, and a more focused foray into some special topics. For the former we will cover the direct method in the calculus of variations, various notions of convexity, Noether’s theorem, minmax methods, index theory, and gamma-convergence. For the latter we will focus on several specific problems of recent interest, with emphasis on the Ginzburg-Landau energy functional.

APMA 2821F. Computational Linear Algebra.
The course will cover basic and advanced algorithms for solution of linear and nonlinear systems as well as eigenvalue problems.

APMA 2821G. High-Performance Discontinuous Galerkin Solvers.
Addresses strategies and algorithms in devising efficient discontinuous Galerkin solvers for fluid flow equations such as Euler and Navier-Stokes. The course starts with an introduction to discontinuous Galerkin methods for elliptic and hyperbolic equations and then focuses on the following topics: 1) Serial and parallel implementations of various discontinuous Galerkin operators for curvilinear elements in multiple space dimensions. 2) Explicit, semi-explicit and implicit time discretizations. 3) Multigrid (multi-level) solvers and preconditioners for systems arising from discontinuous Galerkin approximations of the partial differential equations.

This course covers fundamental topics in High Performance Computing, with emphasis on Parallel Computing: basics in programming with C++; compilation and optimization; high performance scientific numerical libraries (LAPACK, BLAS, ScaLapack); MPI and OpenMP. The focus will be on load balancing, efficient design of communication and multilevel parallelism. We will use: 1) the new IBM computer of Brown University; 2) IBM BlueGene/P; 3) SGI UV 1000 cc-NUMA shared-memory system; 4) CRAY XT5; 5) Sun Constellation Linux Cluster. We will have lectures and hands-on tutorials. Grades are based on 5-6 home assignments/mini-projects and a final project with presentation. Please visit the course website: http://www.dam.brown.edu/people/igrinb/APMA2821/HPC_CLASS.html

APMA 2821I. Formulation and Approximation of Linear and Nonlinear Problems of Solid Mechanics.
The formulation and approximation will be based on the Finite Element Method (FEM) of linear and non-linear problems of Solid Mechanics. The formulation of problems is based on the Virtual Work Principle (VWP). Increasing complexity problems will be considered such as simple bar under traction, beams, plates, plane problems and solids with linear and hyperelastic materials. All problems are formulated using the same sequence of presentation which includes kinematics, strain measure, rigid body deformation, internal work, external work, VWP and constitutive equations. The approximation of the given problems is based on the High-order FEM. Examples will be presented using a Matlab code.

APMA 2821J. Some Topics in Kinetic Theory.
In this advanced topic course, we will go over several aspects of recent mathematical work on kinetic theory. Graduate level PDE is required.

APMA 2821K. Probabilistic and Statistical Models for Graphs and Networks.
Many modern data sets involve observations about a network of interacting components. Probabilistic and statistical models for graphs and networks play a central role in understanding these data sets. This is an area of active research across many disciplines. Students will read and discuss primary research papers and complete a final project.

APMA 2821L. Introduction to Malliavin Calculus.
The Malliavin calculus is a stochastic calculus for random variables on Gaussian probability spaces, in particular the classical Wiener space. It was originally introduced in the 1970s by the French mathematician Paul Malliavin as a probabilistic approach to the regularity theory of second-order deterministic partial differential equations. Since its introduction, Malliavin’s calculus has been extended beyond its original scope and has found applications in many branches of stochastic analysis; e.g. filtering and optimal control, mathematical finance, numerical methods for stochastic differential equations. This course will introduce, starting in a simple setting, the basic concepts and operations of the Malliavin calculus, which will then be applied to the study of regularity of stochastic differential equations and their associated partial differential equations. In addition, applications from optimal control and finance, including the Clark-Ocone formula and its connection with hedging, will be presented.

APMA 2821M. Some Mathematical Problems in Materials Science.
We will study a variety of mathematical models for problems in materials science. Mainly we will consider models of phase transformation, static and dynamic. Some of the topics to be treated are: (1) models of phase transformation; (2) gradient flows; (3) kinetic theories of domain growth; (4) stochastic models; (5) free boundary problems. A working familiarity with partial differential equations is required.

The course seeks to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/Boff methods). The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. We also discuss more specialized topics such as symplectic integration methods, parallel-in-time methods, include splitting methods, methods for differential-algebraic equations (DAE) and Reduced Basis Methods.

APMA 2821O. Topics in Posteriori Error Estimations: Finite Element and Reduced Basis Methods.
The course will contain two related parts. An introduction of different types of a posteriori error estimations for various finite element methods, certified reduced basis method, where a posteriori error estimations play an important role. Emphasize both the theory and implementation. Related Matlab programs. Residual-type, local-problem type, and recovery-type error estimators for conforming, mixed, non-conforming, and discontinuous galerkin finite element methods for different types of equations. Reduced basis methods, offline-online procedure, greedy algorithm, error estimator, empirical interpolation method, and successive constraint method will be discussed. Goal-Oriented primal-dual approach for both FEM and RB methods will be covered. Objective: To learn various theoretical and practical results of adaptive finite element methods and reduced basis methods.

Bézier polynomials are the foundation for many of the computer visualisation techniques and have a number of interesting properties. The same properties might be used for high order and adaptive finite element algorithms. We pursue this idea. A basic working knowledge of the finite element method applied to simple elliptic partial differential equations such as the Poisson problem will be assumed. The course will be of interest to those working in visualisation or in high order and adaptive finite element methods.

APMA 2970. Preliminary Examination Preparation.
Graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

APMA 2980. Research in Applied Mathematics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

APMA 2990. Thesis Preparation.
Graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
Artemis A.W. and Martha Sharp Joukowsky Institute for Archaeology and the Ancient World

Director
Susan E. Alcock

The Artemis A.W. and Martha Sharp Joukowsky Institute for Archaeology and the Ancient World promotes the investigation, understanding, and enjoyment of the archaeology and art of the ancient Mediterranean, Egypt, and Western Asia. The Institute’s faculty and facilities provide a campus hub for research and teaching in this complex and compelling part of the world, including active fieldwork projects, diverse graduate and undergraduate curricula, and public outreach activities.

For additional information, please visit the department’s website: http://brown.edu/Departments/Joukowsky_Institute/

Archaeology and the Ancient World Concentration Requirements

The concentration in Archaeology and the Ancient World provides an opportunity to explore the multi-faceted discipline of archaeology while examining the critical early civilizations of the so-called Old World that is, the complex societies of the Mediterranean, Egypt, and Ancient Western Asia. Depending on the course of study, concentrators become proficient in an ancient language and are encouraged to demonstrate proficiency in a modern language. Concentrators may pursue capstone research opportunities through summer fieldwork, museum experience, or independent study projects.

The concentration, with its three distinct but overlapping tracks, is intended to allow students flexibility in structuring their own path through this diverse field of study. The concentration is also designed to allow students to build progressively upon what they have learned, moving from introductory courses to upper level seminars.

The three tracks are: Archaeology and the Ancient World; Classical Archaeology, and Egyptian and Ancient Western Asian Archaeology. Archaeology and the Ancient World is the most exploratory of the concentration tracks, and this option emphasizes material culture studies across the full spectrum of the ancient world. Classical Archaeology is intended for those interested chiefly in the ‘classic’ civilizations of the Mediterranean (Greece and Rome), as well as for those interested in both earlier (prehistoric) and later (medieval) periods in that geographic region. Egyptian and Ancient Western Asian Archaeology is intended for those interested chiefly in the cultures of Egypt and Ancient Western Asia (the ancient ‘Near East’ – Anatolia, the Levant, Mesopotamia), from prehistoric through Islamic times.

Required Courses:
The student must take a total of 10 courses, including:

Core Requirements:
One introductory course in archaeological methodology, history and/or theoretical approaches, for example:

- ARCH 0050 Archaelogical Field Work
- ARCH 0100 Field Archaeology in the Ancient World
- ANTH 1600 Hunter-Gatherer Adaptations

One introductory course in the methodology, history and/or theoretical approaches of ancient art history, for example:

- ARCH 0030 Art in Antiquity: An Introduction
- ARCH 0420 Archaeologies of the Greek Past
- ARCH 0520 Roman Archaeology and Art
- HIAA 0010 Introduction to the History of Art and Architecture

Two cognate courses, not listed primarily by the Joukowsky Institute, which EITHER relate to the study of the ancient world OR to the discipline of archaeology. Outside courses are chosen with the approval of the concentration advisor from appropriate 1000-level (or above) offerings in other departments such as, but not limited to: Anthropology, Classics, Early Cultures, Egyptology and Ancient Western Asian Studies, Environmental Studies, Geological Sciences, History, History of Art and Architecture, Religious Studies. One term of language study, in any ancient language, may also be counted toward this requirement.

Track Requirements:

Archaeology and the Ancient World
Two courses in Egyptian or Ancincnt Western Asian archaeology and Art. 1
Two courses in Mediterranean (prehistoric, Greek, Roman, medieval) archaeology and art. 1
Two additional courses, in EITHER Mediterranean (prehistoric, Greek, Roman, medieval) archaeology OR Egyptian or Ancienct Western Asian archaeology and art, at or above the 1000-level.

Classical Archaeology:
One course in Egyptian or Ancient Western Asian archaeology and art.
Three courses in Mediterranean (prehistoric, Greek, Roman, medieval) archaeology and art, at least two of which must be at or above the 1000-level.

One course in ancienct Greek or Roman history, for example:

- CLAS 1210 The History of Greece from Archaic Times to the Death of Alexander
- CLAS 1220 The History of Greece from Archaic Times to The Death of Alexander
- CLAS 1310 Roman History I: The Rise and Fall of an Imperial Republic
- CLAS 1320 Roman History II: The Roman Empire and Its Impact

One course in either Ancient Greek or Latin, at a level beyond the first year of study, for example:

- GREEK 0300/0400 Introduction to Greek Literature
- LATIN 0300/0400 Introduction to Latin Literature

Egyptian and Ancient Western Asian Archaeology:
One course in Mediterranean (Bronze Age, Greek, or Roman) archaeology and art.
Three courses in Egyptian and Near Eastern archaeology and art, at least two of which must be at or above the 1000-level.

Two terms of course work in a pertinent ancient language (e.g. Aramaic, Akkadian, Coptic, Classical Hebrew, Middle Egyptian).

Total Credits 10

1 At least two of the courses selected to satisfy these requirements must be at or above the 1000-level.

Capstone Experience and Study Abroad

For each of the tracks, a capstone experience may be substituted for one of these required courses. With the permission of the concentration advisor, up to three successfully completed courses, from relevant and accredited study abroad programs, may be counted towards the concentration requirements.

Honors Concentrations

An Honors concentration in any of these tracks requires the successful completion of all the standard requirements with the addition of an Honors thesis. For the preparation of this thesis, students will ordinarily enroll in ARCH 1970 during the first semester of the senior year and ARCH 1990 during the second semester of the senior year (these courses may not be taken SINC, nor may they be used to satisfy the standard requirements.

1
of the concentration). In order to qualify for honors, students must have received more A’s than B’s in concentration courses completed.

Honors concentrations are recommended for students considering graduate work in the discipline of archaeology. Any student interested in a course of graduate study should speak to the undergraduate concentration advisor as soon as possible, not least for advice about additional forms of preparation. Graduate work in the archaeology of the ancient world, for example, requires knowledge of appropriate ancient, as well as modern, languages. Students should start work on acquiring these skills as early as possible.

The Honors Thesis

The Honors thesis is an extended essay, usually of between 40 and 60 pages in length, written under the supervision of a faculty advisor and second reader. (Where appropriate, the advisor or the reader, but not both of them, may be in a unit other than the Joukowsky Institute for Archaeology and the Ancient World.) The specific topic and approach of the thesis are worked out between the student and the thesis advisor, with assistance from the student’s second reader. This process should begin in the latter part of the student’s junior year. Details on deadlines for a thesis prospectus, for thesis drafts and for a final public presentation of the thesis are available on request to the Director of Undergraduate Studies. The completed thesis will be evaluated by the advisor and second reader, who will discuss its strengths and weaknesses with the student; they will also agree a grade for ARCH 1970 and ARCH 1990.

Evaluation

The Director of Undergraduate Studies will review the student’s overall record, in addition to the thesis evaluations. If all requirements have been successfully met, the recommendation will be made that the student graduates with Honors.

Archaeology and the Ancient World

Graduate Program

The Joukowsky Institute offers graduate study leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) in Archaeology and the Ancient World.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/archaeology-and-ancient-world-0

Courses

ARCH 0030. Art in Antiquity: An Introduction.
What went into the creation of the Parthenon? Who lived in the Tower of Babel? Why do we still care? This course offers an introduction to the art, architecture, and material culture of the ancient world. Things of beauty and of power will be explored, from Egyptian pyramids and Near Eastern palaces, to the ‘classical’ art of Greece and Rome

ARCH 0033. Discovering the Past: Introduction to Archaeology and Prehistory (ANTH 0500).
Interested students must register for ANTH 0500 S01

ARCH 0050. Archaeological Field Work.
Focuses on the aims, scope, and tools of field archaeology, and the nature of archaeological evidence. Emphasizes interdisciplinary field work techniques and the composition, function, and responsibilities of an excavation staff. Examines systematic versus ad hoc excavations and their respective problems of preservation. Students excavate model sites in a laboratory and present a team report upon completion

ARCH 0100. Field Archaeology in the Ancient World.
Always wanted to be Indiana Jones? This course, focusing on the Mediterranean world and its neighbors in antiquity, interprets field archaeology in its broadest sense. In addition to exploring "how to do" archaeology - the techniques of locating, retrieving, and analyzing ancient remains - we will consider how the nature of these methodologies affects our understanding of the past

ARCH 0150. Introduction to Egyptian Archaeology and Art.
An introductory survey of the archaeology, art and architecture of ancient Egypt, ranging in time from the prehistoric cultures of the Nile Valley through the period of Roman control. While the course will examine famous features and characters of ancient Egypt (pyramids, mummies, King Tut!), it will also provide a wide-ranging review of the archaeology of this remarkable land

ARCH 0155. People Without History: Archaeology of Atlantic Africa and the Diaspora.
To what extent do ‘Western’ historical narratives consider Africans and African Diasporans as ‘People Without History’. Such a notion also refers to peoples who cultures do not, or possess few formally written histories. This class employs archaeological evidence in order to dismantle the colonial library, exploring local histories that have been erased, silenced and marginalized, investigating histories of imperialism, colonialism, genocide, slavery, resistance and black nationalism. Enrollment limited to 50

ARCH 0160. Buried History, Hidden Wonders: Discovering East Asian Archaeology.
What do Peking Man, human sacrifice, buried armies, lost cities, silk routes and treasure fleets have to do with one another? All are part of the rich and varied legacy of East Asian archaeology, which is today being re-written by spectacular new discoveries little known in the West. Beginning with Asia’s earliest hominid inhabitants, this course will explore the emergence of agriculture, early cities, empires, and world trade, in a colorful palimpsest of archaeological discovery

ARCH 0162. Introduction to Chinese Art and Culture (HIAA 0040).
Interested students must register for HIAA 0040 S01

ARCH 0163. Ancient China: Art and Archaeology (HIAA 0110).
Interested students must register for HIAA 0110 S01

ARCH 0200. Sport in the Ancient Greek World.
Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education

ARCH 0201. Sport in the Ancient Greek World (CLAS 0210).
Interested students must register for CLAS 0210 S01

ARCH 0201L. Who Owns the Classical Past? (CLAS 0210L).
Interested students must register for CLAS 0210L S01

ARCH 0203. Who Owns the Past? (ANTH 0066).
Interested students must register for ANTH 0066 S01 (CRN 14682)

ARCH 0250. Intimate Stories.
Images tell stories that carry us to imaginary worlds other than our own. An arresting story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity many architectural monuments displayed pictorial narratives that animated public spaces and enthralled broad audiences. This course explores cultural aspects of visual narrative imagery from Western Asian and Mediterranean worlds

ARCH 0270. Troy Rocks! Archaeology of an Epic.
What do Brad Pitt, Julius Caesar, Dante, Alexander the Great, and countless sports teams have in common? The Trojan War! This course will explore the Trojan War not only through the archaeology, art, and mythology of the Greeks and Romans but also through the popular imaginings of cultures ever since, to figure out what “really” happened when Helen ran off and Achilles got angry and the Greeks came bearing gifts. Enrollment limited to 20 first year students. FYS

The manufacture of artifacts distinguishes us from all other species. However, archaeologists often struggle with interpreting material culture. This course will use case-studies to examine the artifacts that archaeologists most commonly recover: lithics, pottery and metallurgy, as well as glass, wood and bone. Students will consider the importance of archaeological material culture and the technological processes that
produce these artifacts in aiding us to comprehend our human past. Enrollment limited to 20.

The course will explore a range of approaches -- material culture studies, science studies, design studies, consumption studies, the sociology of technology, archaeology, phenomenology -- in dealing with 13 things: the wheel, a Neolithic Megalith, an Ancient Greek perfume jar, the castle of Acrocorinth, Greece, a Moroccan watermill, a map, the pocket watch, barbed wire, the light bulb, a surgical blade, the portable radio, a Leica IIIc 35mm camera, and the personal computer. Returning to the etymology of a thing, the course argues that things are best conceived as gatherings of achievements that are neither wholly exclusive to any single era nor any immediate set of relations.

ARCH 0302. Object Histories: The Material Culture of Early America (HIST 0980D).
Interested students must register for HIST 0980D S01.

Glass is unquestionably a fundamental part of modern life, but what is the story of glass and what makes it special? We will trace the 5000-year history of glass, from its discovery in the third millennium BC to its mass production in the 19th-20th centuries, exploring themes like technology, innovation, and craft. Archaeological and art historical evidence will be combined with anthropological and ethnographic approaches, including discussions with artisans, museum visits, and trips to the RISD “hot shop” to see glassblowers in action. Enrollment limited to 20.

ARCH 0311. Death and the Afterlife in the Ancient World (RELS 0750).
Interested students must register for RELS 0750 S01.

ARCH 0315. Heritage In and Out of Context: Museum and Archaeological Heritage.
We understand the past in part through a complex blend of artifacts, monuments, and landscapes. Yet each of these categories poses major issues regarding their preservation, conservation and curation, and how we use them to educate and to indoctrinate. This course will not preach any specific line, but encourage students to debate these highly complicated issues. Case studies will include the international diaspora of antiquities from the Enlightenment to the present, the impact of war and revolution, and numerous aspects of museum practice. Enrollment limited to 50.

ARCH 0320. Media in Archaeology, or Archaeology in Media?.
Indiana Jones, Lara Croft, the Discovery Channel: media has, to an unprecedented degree, shaped public perceptions of the discipline of archaeology, its practices and its values. This course will build critical awareness of how the media uses archaeology and how archaeologists use the media, for good and ill. Students will create digital narratives from their own research, and become competent ambassadors for presenting archaeological research and work in a scientific and engaging way. Enrollment limited to 40.

ARCH 0325. Dead White Guys: Greco-Roman Civilization and American Identity.
Why does classical antiquity matter? How did a group defined as white and European come to represent America’s ancestors? And by emphasizing this “heritage,” who do we exclude? This course looks at film, popular non-fiction, education policy, public art, architecture, and archaeology, to understand how the myth of Greco-Roman origins was adopted by America’s founders, and how this affects issues of race and belonging today.

ARCH 0330. Archaeology Under the Volcano.
The volcano has come to represent a modern western conception of wild nature -- unpredictable and dangerous, ‘red in tooth and claw’ -- in authors from Byron to Freud, Derrida to Dickens. Archaeologists have brought similar attitudes to the study of volcanic eruptions such as Vesuvius and Thera in the Mediterranean world, and Xitl and Popocatepetal in Mexico. This course will begin with these literary and archaeological interpretations of volcanoes, then explore other non-western and indigenous perspectives. Our deeply embedded assumption of a sharp divide between ‘nature’ and ‘culture’ will be explored and questioned.

ARCH 0332. Classic Mayan Civilization (ANTH 0520).
Interested students must register for ANTH 0520 S01.

ARCH 0335. Archaeology of the Andes.
Provides a survey of the archaeology of the Andean region of South America (parts of modern-day Peru, Bolivia, Ecuador, Chile, Colombia, and Argentina). From the arrival of the first Americans to the transformation of indigenous societies under Spanish rule, the course will introduce vital “new World” civilizations such as the Moche and Inka. The course will also explore the politics and practice of archaeological research in the region today. Enrollment limited to 55.

ARCH 0351. Introduction to the Ancient Near East (AWS 0800).
Interested students must register for AWS 0800 S01 (CRN 15126).

ARCH 0360. East Meets West: Archaeology of Anatolia.
The crossroads between East and West in the ancient Mediterranean, Anatolia (modern Turkey) gave rise to the great Hittite Empire, the legendary kings Croesus and M_idas, and was the scene of battles between Greeks, Persians, Romans, Byzantines, and Turks for world supremacy. In this course, we survey the archaeological history of human settlement in Anatolia from the Ice Age to the Middle Ages, tracing changes in art, economy, landscape, and religion.

ARCH 0370. Archaeology of Mesopotamia.
A cultural and historical survey of Mesopotamia, tracing its origins and developments from prehistory to 6th-century Babylon. Both archaeological sites and literature are examined, as are works of art and sources for social and political history. Prerequisite: AE 3 or equivalent background in archaeology.

ARCH 0380. Archaeology of Iran.
An archaeological survey of the origins and development of the Iranian civilizations. Analysis of settlements, history, art, architecture, and characteristics of specific archaeological sites and their artifacts ranging from prehistoric to the Hellenistic period.

ARCH 0390. Archaeology of Palestine.
Traces the prehistory of Palestine (modern Israel, Syria, Lebanon, Jordan) from its beginnings in the Paleolithic to the end of the Byzantine period. Surveys history of archaeological research in this area, emphasizing significant excavations and their artifacts. Develops an understanding of the art, architecture, and modes of life of humankind from age to age, the changes introduced from one period to another, and causes and effects of those changes.

ARCH 0400. City and Sanctuary in the Ancient World.
Examines the physical dimensions of the ancient city and the ancient sanctuary through archaeological evidence with special attention to aesthetic planning, urban planning and management, and the concept of public monumental art as developed in the ancient world.

ARCH 0404. Cathedrals and Castles (HIAA 0420).
Interested students must register for HIAA 0420 S01 (CRN 15237).

ARCH 0405. State of Siege! Walls and Fortifications in the Greek and Roman World.
Warfare was endemic in the ancient world, and walls were therefore ubiquitous. This course will examine the most spectacular fortifications of the Graeco-Roman world, from Bronze Age citadels in Greece to the Roman frontiers. We will learn how to build walls and fortresses, how to defend them, and how to breach them by studying some of the best walls and famous sieges of Antiquity. Enrollment limited to 50.

ARCH 0410. Mediterranean Bronze Age.
Snake goddesses and bull leaping, labyrinths and gold masks, Linear B and Homeric heroes: these are only some of the most famous things about the Minoan and Mycenaean cultures of Bronze Age Crete and Greece. This class will also explore questions about the historicity of the Trojan War, trade and exchange; ritual landscapes; the origins of writing; death and burial; the eruption of the Theran volcano; and the collapse of the Mycenaean palaces.

ARCH 0420. Archaeologies of the Greek Past.
The Onion once reported that ancient Greek civilization was a complete modern myth, since obviously no one culture could have invented so much, not least all that Great Art and Architecture. But they did. This course will explore the material world of ancient Greece, from the
monumental (the Parthenon) to the mundane (waste management), and everything in between. LILE
ARCH 0423. Monuments and Monsters: Greek Literature and
Archaeology (COLT 0811H).
Interested students must register for COLT 0811H S01
ARCH 0425. The Agora: History at the Heart of Athens.
Part city hall, part church, part mall, part stadium, part law court, part red
light district, the Agora of ancient Athens has seen it all, from Neolithic to
modern times. This "marketplace" is most famous for its Classical history,
when figures such as Pericles, Socrates, and Demosthenes walked and
talked there. This course, however, will consider the long life and impact
of this civic space, including its ongoing and often problematic archaeological
heritage. Enrollment limited to 50
ARCH 0440. Archaeologies of the Ancient "Middle East".
What were Neanderthals really like? Why stop hunting and start farming?
This course will explore these and other questions through an examination
of the earliest archaeologies of the Middle East. Topics will include the
evidence for the first hominids and humans in the region, the nature of
hunter-gatherer existence, the origins of cultivation and pastoralism, and
the rise of social inequality
ARCH 0450. Archaeology of Jerusalem.
Examines the archaeology of the city of Jerusalem from David’s conquest
in 1000 B.C.E. through the Crusaders’ defeat in 1187 A.D. The
contemporary literary sources as well as the more recent scholarly
debates and discoveries help us understand the material remains of the
relevant periods
ARCH 0451. Jewish Art and Architecture from Antiquity to Modernity
(JUDS 0080).
Interested students must register for JUDS 0080 S01
ARCH 0520. Roman Archaeology and Art.
Anyone who has ever watched ‘Gladiator’, ‘Spartacus’, ‘Life of Brian’
or ‘Bugs Bunny: Roman Legion Hare’ has some image of Rome, the
Romans and their empire. This course, while exploring and assessing
these influential popular preconceptions, introduces a more balanced view
of Roman archaeology and art, examining not only the ‘eternal city’
of Rome, but its vast and diverse imperial domain
ARCH 0521. Roman Art and Architecture: From Hadrian to Late
Antiquity (HIAA 0380).
Interested students must register for HIAA 0380 S01
ARCH 0522. Roman Art and Architecture: Spectacles and
Entertainment (HIAA 0320).
Interested students must register for HIAA 0320 S01
ARCH 0523. Roman Art and Architecture: From Julius Caesar to
Hadrian (HIAA 0340).
Interested students must register for HIAA 0340 S01
ARCH 0530. Hannibal ad Portas! Fact and Fiction on Carthage and
the Punic World.
Hannibal stands at the gates”: Roman parents would terrify their children
with these words. And many others have been haunted by Hannibal
Barca: the Carthaginian general still fascinates the European imagination,
not least his epic trek over the Alps with three dozen elephants. This
course explores fact and fiction about Hannibal and his world, holding
up historical and mythical records against hard archaeological evidence.
Enrollment limited to 50
ARCH 0540. Ancient Rome: Art, Archaeology and Civic Life from
the End of the Republic through the Early Empire.
This survey course will familiarize students with the art and architecture
of Rome during the early Imperial era (ca. 40 BC – AD 140), through
investigation of significant sites, monuments and museum collections
in Rome and locations throughout southern Italy. Items considered
will include both monumental and domestic architecture, wall painting,
mosaics, sculpture, coins, epigraphic evidence, as well as maps and
ancient sources
ARCH 0542. The Visual Culture of Early Modern Rome (HIAA 0560).
Interested students must register for HIAA 0560 S01
ARCH 0550. Late Roman and Early Christian Art and Architecture.
An introduction to the relationship between Roman art and the art of
emerging Christianity. The course begins with the Pantheon and ends with
the Hagia Sophia
ARCH 0600. Archaeologies of the Muslim World.
Muslim societies are built upon a rich archaeological heritage that spans a
region from Spain to China. Since the spread of Islam in the 7th century,
its legacy of cities, monuments, and artifacts trace more than a millennium
of cultural transformations among the various peoples and traditions of
the Mediterranean, Middle East and beyond. Through discussion of major
sites and hands on work with a collection of artifacts this course explores
that heritage for what it can tell us about the social practices and historical
processes that have formed the Muslim world
ARCH 0650. Islamic Civilizations.
This introduction to early Islamic civilization will examine the
interrelationship between the emerging Islamic religious tradition and the
development of specifically Muslim social institutions, the role of
ethnic and religious minorities, and the flowering of Islamic thought and
material culture. Students will study archaeology, political and social
histories, visual arts, and textual traditions to explore the evolution and
institutionalization of Islam from Spain to Central Asia
ARCH 0666. Cult Archaeology: Fantastic Frauds and Meaningful
Myths of the Past.
The pyramids and Stonehenge built by aliens? The power of the Mummy’s
Curse? These myths couldn’t be true... or could they? Cult Archaeology
examines popular and fantastic interpretations of archaeological remains
presented in the press and popular media. This course finds the logical
flaws in pseudoscientific explanations and the biases that underlie them.
Discover the "truth" about archaeology!
ARCH 0677. Pirates! Archaeologies of Piracy in the Atlantic World
(ANTH 0515).
Interested students must register for ANTH 0515 S01 (CRN 16218)
ARCH 0678. Underwater in the Mediterranean: An Introduction to
Maritime Archaeology.
Shipwrecks, sunken cargoes, coastal ports: all contribute to our
understanding of the maritime world of the past, not least that of the
Mediterranean Sea. This course will explore the Mediterranean’s
ancient seafaring heritage over time, in particular by studying ancient
ships and harbors as remarkable examples of social and technological
innovation and enterprise. The methodological challenges faced by
archaeologists working on underwater and coastal ‘sites’ will also be
examined. Enrollment limited to 50
ARCH 0680. Water, Culture and Power.
Water is the source of life. In the midst of global climate change,
environmental crises over water resources, and increasingly ubiquitous
political debates over water, we are beginning to recognize humans’
complete dependence on water. This course investigates our long-term
attachment and engagement with water using archaeology, environmental
history, and visual, literary and historical sources. From sacred spaces
around springs to ancient cities by the sea, we will explore the cultural
and political aspects of water beginning with the Last Ice Age and ending with
late antiquity. Enrollment limited to 50 undergraduates
ARCH 0770. Food and Drink in Classical Antiquity.
Everybody eats - but patterns of eating (and drinking) vary dramatically
from culture to culture. This course traces the mechanics of food
production and consumption in the ancient Mediterranean world, considers
how diet marked symbolic boundaries and gender differences, and in
general explores the extent to which the ancient Greeks and Romans
"were what they ate"
ARCH 0771. Foragers, Farmers, Feasts, and Famines: An
Anthropology of Food (ANTH 0680).
Interested students must register for ANTH 0680 S01 (CRN 14685)
ARCH 0800. Alexander the Great and the Alexander Tradition.
This course focuses on a single historical figure, Alexander the Great,
using him as a point of departure for exploring a wide range of problems
and approaches that typify the field of Classical Studies. How knowledge
of Alexander has been used and abused provides a fascinating case study
in the formation and continuous reinterpretation of the western Classical tradition.

ARCH 0801. Alexander the Great and the Alexander Tradition (CLAS 0810A).
Interested students must register for CLAS 0810A S01

ARCH 1010. Archaeology’s Dirty Little Secrets.
Admit it -- you wanted to be an archaeologist when you grew up... This course builds on that enthusiasm, while radically expanding your notions about just what archaeology is and just what archaeologists do. This class is a hands-on introduction to the often-fraught process of doing archaeology, and a hands-on collaborative workshop to develop one of Brown’s three pilot on-line classes for Coursera, to be offered free to the world in summer 2013. Enrollment limited to 12

ARCH 1050. Old World and New World Perspectives in Archaeology.
This course examines how archaeologists working on different sides of the world study the past. Archaeology in the Old World and New World has developed on parallel, but separate, trajectories. While these approaches share methods and theories, they often interpret archaeological data in alternative or even contradictory ways. In this course we will view archaeological topics from both perspectives, using examples from the Mediterranean and Mesoamerica, to try to better understand, and perhaps bridge the gap between, some of our differences. Prerequisite: An introductory course in archaeology, either through the Joukowsky Institute or the Anthropology department

ARCH 1052. Global Historical Archaeology (ANTH 1620).
Interested students must register for ANTH 1620 S01 (CRN 24050)

Interested students must register for ANTH 1670 S01

ARCH 1054. Indians, Colonists, and Africans in New England (ANTH 1624).
Interested students must register for ANTH 1624 S01

ARCH 1100. Archaeology in the Age of Augustus.
Rome’s first Emperor, Gaius Octavianus Augustus, ruled an empire stretching from Spain to Syria, from Britain to Egypt. Students will explore the social, artistic, and political successes and failures of this "golden age" of Rome’s past. The course will assess a broad range of topics -- such as the creation of empire, art as propaganda, and the role of women -- within the context of Augustan ideology and history

Interested students must register for CLAS 1120T S01

ARCH 1120. Pompeii.
Pompeii is a dead city. Or is it? This course will explore what we can learn from Pompeii, and the neighboring communities also destroyed by the eruption of Vesuvius in AD 79. We will look at art, architecture (public and domestic), and all the many remains of "daily life" so uniquely preserved in these buried, but not forgotten, places

ARCH 1120L. Archaeology of Feasting (CLAS 1120L).
Interested students must register for CLAS 1120L S01

ARCH 1128. The Long Fall of the Roman Empire (HIST 1030).
Interested students must register for HIST 1030 S01 (CRN 15822)

ARCH 1150. Urbanism in the Archaeological Record.
This course investigates ancient cities in the comparative context of several archaeological regions. Considering contemporary approaches to urban space, we will explore urbanism in the ancient Near East, Egypt, and Aegean with comparative examples from pre-hispanic Mexico and China. We will explore the spatial and socio-economic structuring of cities in relation to festivals, state spectacles, monumental building projects, and other commemorative practices, investigating layered urban topographies saturated with collective pasts. Enrollment limited to 15

ARCH 1155. Cities, Colonies and Global Networks in the Western Mediterranean.
Urban life as we know it in the Mediterranean began in the Iron Age, a period that witnessed the rise of long-distance networks and the foundation of colonies by several Mediterranean powers. What happened when new settlers, visiting traders, and local inhabitants came into direct and unprecedented contact? This course will explore this and other transformations in the West Mediterranean during the first half of the first millennium BC. Enrollment limited to 20

ARCH 1160. The World of Museums: Displaying the Sacred.
This course will examine critically the collection and display of ancient objects, especially those of a sacred nature. Through functional, historical, material and aesthetic lenses an analysis of the relationships between the cultural contexts of objects will be examined. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, and ethical implications of displaying archaeological objects. Enrollment limited to 15 undergraduates

ARCH 1162. Anthropology in/of the Museum (ANTH 1901).
Interested students must register for ANTH 1901 S01 (CRN 25034)

ARCH 1163. The Art of Curating (MCM 1700R).
Interested students must register for MCM 1700R S01

Interested students must register for AMST 1550 S01

ARCH 1200A. Early Italy.
Focuses on the Bronze Age background to the emergence of Greek, Roman, and Etruscan Italy in the Iron Age. Emphasizes the results of recent excavations, the problems of contact between the Aegean and Tyrrhenian areas in the Bronze Age, Greek colonization, and the urban development of the Etruscan/Latian region

ARCH 1200B. Pompeii (HIAA 1200D).
Interested students must register for HIAA 1200D S01

ARCH 1200C. Roman Iberia.
The archaeology, art, and architecture of Iberia during the Roman presence from the Punic Wars to the beginning of the Arab conquest. The artifacts and monuments discussed will not only represent artistic production from Roman administrative expressions, but also a mixture of styles between indigenous art (such as Celtic) or expressions of syncretism or other cultural symbioses

ARCH 1200D. The Portrait.
Study of portraits from the ancient civilization of the Mediterranean and portraits that were inspired by or reacted to the ancient portrait from the 16th to the 20th century. Also investigates the style, iconography, function, physiognomy, and psychology with which one can look at portraits

ARCH 1200E. Topography and Monuments of Rome.
Rome has been the scene of notable recent discoveries. This course will concentrate on the evidence for the so-called "regal period" but other topics, among them commemorative arches, the topography of the Campus Martius, and Christian basilicas, will also be taken up. A reading knowledge of Italian is highly recommended

ARCH 1200F. City and the Festival: Cult Practices and Architectural Production in the Ancient Near East.
This course will explore urbanization, formation of urban space, and architectural projects in relation to cult practices and commemorative ceremonies in the Ancient Near East. Investigating case studies from early cities of fourth millennium BC Mesopotamia to Iron Age Syria and Anatolia, we will study the processes of the making of urban and extra-urban landscapes in the socio-religious context of festivals

This course will survey the archaeology and history of the Arabs and Arabia from before their emergence in the historical record to the modern period. Our particular focus concerns their relationship with the rise of Islam as well as the imperial politics of the pre-Islamic Near East. A major issue that frames these inquiries is the concept of ethnicity and its projection into the past

ARCH 1200H. Islamic Landscapes: Cities, Frontiers and Monuments.
This course will examine the built environments of the Islamic Period Middle East through the growing archaeological and historical record of its cities, monuments, and other spaces. We will explore what these landscapes tell us about the diverse nature of Muslim societies, relations between Muslim and non-Muslim inhabitants, and ways in which cultures engage with space and place through their physical, emotional, and intellectual resources. Prerequisites: At least two courses in either archaeology, anthropology, art history, or Middle East studies
ARCH 1200I. Material Worlds: Art and Agency in the Near East and Africa
This course investigates technological processes of artifact production in the material culture of ancient and contemporary Near East and Africa. Archaeological and ethnographic case studies will be explored to understand the social relations behind skilled craftsmanship in architecture and "art." Circulation of craft knowledge, cultural biography of artifacts, constitution of cultural identities and memory through material processes will be central topics. Enrollment limited to 20.

ARCH 1201. Mosaics (HIAA 1200C)
Interested students must register for HIAA 1200C S01

ARCH 1202. Hellenistic Art: From Alexander to Cleopatra (HIAA 1200I)
Interested students must register for HIAA 1200I S01

ARCH 1212. Charlemagne: Conquest, Empire, and the Making of the Middle Ages (HIST 1976Z)
Interested students must register for HIST 1976Z S01 (CRN 15429)

ARCH 1213. The Medieval Monastery (HIAA 1440B)
Interested students must register for HIAA 1440B S01

The world of Byzantium is often considered as a dark age separating the glories of Rome and the Renaissance. Yet Byzantium was among the longest living empires in world history, with an artistic and cultural impact felt far beyond its borders. The course will introduce students to a series of art works, architectural masterpieces, and archaeological discoveries that illuminate our understanding of the much underestimated, and much misunderstood, Byzantine Empire. Enrollment limited to 50. WRIT

ARCH 1231. Kings, Courts, and Aristocracy (ANTH 1231)
Interested students must register for ANTH 1231 S01

ARCH 1232. The City, the Maroon and the Mass Grave (ANTH 1630)
Interested students must register for ANTH 1630 S01

ARCH 1233. Ancient Maya Writing (ANTH 1650)
Interested students must register for ANTH 1650 S01 (CRN 14687)

ARCH 1236. Maize Gods and Feathered Serpents: Mexico and Central America in Antiquity (ANTH 1640)
Interested students must register for ANTH 1640 S01

ARCH 1250. Minoans and Mycenaeans: Greece in the Bronze Age.
This class offers an introduction to the archaeology and art of the civilizations that arose on mainland Greece, Crete, the Aegean and Cyprus in the third and (especially) the second millennium B.C. The principal emphasis is on understanding the rise and collapse of palatial/state-level societies in these regions, with consideration of their sociopolitical, ideological and economic organization, and their interactions with neighboring cultures.

ARCH 1300. Greek Architecture.
This course will trace the history of Greek Architecture from the Bronze Age through the Hellenistic Period. Emphasis is placed on the Archaic and Classical Periods and on the formation and implementation of the three major Greek orders (Doric, Ionic, Corinthian). Importance is placed on understanding construction techniques and the intricate relationship between form and function of the Greek orders.

ARCH 1310. Ancient Painting.
Examines selected topics in ancient painting with emphasis on the remains of ancient fresco decoration. Topics are Palaeolithic Painting, Aegean Bronze Painting, Etruscan Painting, Greek Painting of the Fifth and Fourth Centuries (text evidence), Roman Painting, Roman Painting as reflected in Mosaic.

ARCH 1430. The Philistines.
The Philistines were long considered to be trouble-makers and uncultured; however, recently their true character has been revealed. The origin, culture, social organization, political affiliations, religion, artwork, and technology of the Philistines, who inhabited Palestine during the Iron Age (ca. 1200-734 B.C.E.), will be elucidated through the examination of archaeological data and some textual evidence and pictorial representations.

ARCH 1436. The Archaeology of Jerusalem (JUDS 1390).
Interested students must register for JUDS 1390 S01

ARCH 1437. The Archaeology of Palestine (JUDS 1400).
Interested students must register for JUDS 1400 S01

ARCH 1440. Synagogues, Churches, and Mosques.
Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development.

ARCH 1441. Ancient Synagogues, Churches, and Mosques in Palestine (JUDS 1440).
Interested students must register for JUDS 1440 S01 (CRN 23672)

ARCH 1443. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).
Interested students must register for RELS 1520 S01

ARCH 1450. Qumran and the Dead Sea Scrolls.
Examines the scholarly interpretations of the site and the scrolls. Attempts to determine the relationship between the archaeological and textual evidence.

Please note, for fall 2012, interested students must register for JUDS 1450 S01 (CRN 14228).

ARCH 1475. Petra: Ancient Wonder, Modern Challenge.
The rose-red city of Petra in southern Jordan is a movie star (Indiana Jones and the Last Crusade). It is a tourist mega-hit (over half a million visitors annually). It was recently voted one of the New 7 Wonders of the World. This class will explore the history and archaeology of Petra and debate how best to present and preserve the site, as well as discussing (and planning!) Brown's ongoing fieldwork at this beautiful, but fragile, place. Enrollment limited to 15. Not open to first or second year students.

ARCH 1482. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).
Interested students must register for ANTH 1540 S01

ARCH 1483. Arts of Imperial Song (HIAA 1040A).
Interested students must register for HIAA 1040A S01

ARCH 1484. Attachment to Objects in Chinese Literature (EAST 1950P).
Interested students must register for EAST 1950P S01

ARCH 1490. The Archaeology of Central Asia: Alexander in Afghanistan, and Buddhas in Bactria.
Central Asia (from ca. 500 BC to AD 200) has tended to be treated as the ultimate frontier zone -- on the fringes of the Mediterranean, the Near East, and India. Scholarly perspectives today are radically changing, with Central Asia emerging as a cultural and political entity in its own right. This course will explore the archaeology, art, and history of what is today modern Afghanistan and the formerly Soviet Central Asian Republics, considering the region’s development under the Persian empire, the rule of Alexander the Great, and finally of his Greek-named successor kings.
Enrollment limited to 50

ARCH 1500. Classical Art in the RISD Museum.
The RISD Museum’s collection of Greek, Etruscan and Roman art will be studied firsthand and in light of recent scholarship in art history, archaeology and museum studies. The course will explore original contexts for museum objects; issues of cultural property and museum ethics; conservation and restoration; design and education components of exhibitions; and notions of historical interpretation in museum display.
Enrollment limited to 15

From Antarctica to Zimbabwe, cultural heritage encompasses the very old and the still in use, the man-made and the natural, the permanent and the ephemeral -- even the invisible and the edible. This course will explore issues of modern threats to cultural heritage such as tourism and development, questions of authenticity and identity, and archaeology’s intersection with law, ethics, public policy, and economics.
ARCH 1550. Who Owns the Classical Past?
The purpose of this course is to offer a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.)

ARCH 1551. Who Owns the Classical Past? (CLAS 11200).
Interested students must register for CLAS 11200 S01 (CRN 16018)

Now more than ever we are in need of new perspectives on the value and meaning of money. This course examines the origins of a metal-based financial system in ancient Mesopotamia and the development of finance over time -- including not only the valuation of metal but also of gifts and other commodities. We will prioritize archaeological and anthropological approaches as a way to offer both time depth and insight into today’s troubled financial climate. Enrollment limited to 50

Interested students must register for CLAS 1930E S01

ARCH 1600. Archaeologies of the Near East.
Writing, urbanism, agriculture, imperialism: the ancient Near East is known as the place where earliest agriculture flourished, cities were developed and writing was invented. This course offers a detailed examination of the region’s archaeological history and current archaeological practice, in connection with its political engagements including Western colonialism and the formation of nation states. The social and cultural history of the Near East from prehistory to the end of Iron age (300 BC) will also be discussed. Studying the material remains of the ancient past, we will investigate various interpretive approaches and concepts used within Near Eastern archaeology. The main goal of the course is to develop a critical understanding of ancient societies and their material culture from an interdisciplinary, post-colonial perspective.

ARCH 1606. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (AWAS 1100).
Interested students must register for AWAS 1100 S01

ARCH 1607. Divination in Ancient Mesopotamia (AWAS 1750).
Interested students must register for AWAS 1750 S01

The course introduces students to the central ideas and controversies in African art and material culture (pre-colonial, colonial and post-colonial). We will explore visual and spatial representations of Africa, such as personal adornment, utilitarian objects, sculpture, textiles, painting, masquerade, rock art, and architecture. Paying attention to issues such as identity, religion, politics, collecting practices, and activist art, students will examine African material culture through the multiple lenses of cultural biography, primitive art, tourist art, heritage ethics, and repatriation. Students will have the opportunity to study, handle, and curate African objects from the Haffenreffer Museum’s collections. Enrollment limited to 20. First year students require permission to enroll

ARCH 1621. History of Egypt I (EGYT 1430).
Interested students must register for EGYT 1430 S01

ARCH 1623. Ancient Egyptian Art and Architecture (EGYT 1500).
Interested students must register for EGYT 1500 S01

ARCH 1625. Temples and Tombs: Egyptian Religion and Culture.
Religion was central to life in ancient Egypt, and this course will examine Egyptian religion through its material culture. Students will explore temples and tombs as the physical settings for priestly ritual and private devotion, including feeding and clothing the gods and communication with the dead. The course will also address evidence for private domestic cult and the overlap between religious and magical practice.

ARCH 1630. Fighting Pharaohs: Ancient Egyptian Warfare.
When and why did the ancient Egyptians engage in war? Who was fighting? What were their weapons like and what were their military strategies? What were the political situations that caused them to go to war? How did warfare impact Egyptian society? In studying Egyptian history and society through the pervasive motif of war, we will gain an understanding of the forces that shaped Egyptian culture.

ARCH 1635. The Great Heresy: Egypt in the Amarna Period.
At the height of Egypt’s power in the New Kingdom, King Amenhotep IV initiated a religious revolution that affected all aspects of Egyptian high culture. Declaring the sun-disc, Aten, to be the sole god, this king changed his name to Akhenaten and moved the capital city to a new site at Amarna. Along with this move came massive shifts in everything from temple worship to art, international relations to funerary religion. This course will set the Amarna period in its context, examining remains from the region before Akhenaten to the restoration of traditional Egyptian religion under his immediate successors, including King Tutankhamun. Enrollment limited to 50. Not open to graduate students

ARCH 1637. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods (EGYT 1470).
Interested students must register for EGYT 1470 S01

ARCH 1650. The Etruscans: Italy before the Rise of the Romans.
The Etruscan people dominated the Italian peninsula for centuries before the Romans became a Mediterranean power, but left behind little textual evidence of their culture. Focusing on architecture, artistic production, and funerary practice, we will study the "enigmatic" Etruscans and their contacts with the Greeks and early Romans, and consider their impact on Rome and on modern Italian archaeological scholarship.

What would Times Square or Rockefeller Center have looked like in antiquity? What would have been advertised, and by whom? This course examines the themes, style, and contexts of the sculptural programs that decorated public buildings from the Greco-Roman world, their connections to other visual media and to the landscape, and their reflections of different cultural, civic, and elite identities.

Interested students must register for HMAN 1970D S02 (CRN 15735)

ARCH 1710. Architecture and Memory.
Buildings and monuments have been mediators of the past, with their powerful presence and often turbulent histories. Stories cling to their stones, which become residues of the human lives that shape them. Memories, imaginations and experiences, collectively shared or individual, give meaning to architectural spaces. This course explores the intersections of memory and architecture through various archaeological case studies from the ancient world.

ARCH 1715. Building Big! Supersized Architectural and Engineering Structures From Antiquity.
Sometimes size does matter. The need and desire to "build big", to create colossal architectural or sculptural things, was a constant feature of antiquity, from temples to portraits, from tunnels to fortifications. Who and what lay behind this apparent architectural megalomania? What practical challenges to construction had to be overcome? And how have such monuments affected our understanding, both of the ancient world and of modern means of self-representation? Enrollment limited to 50

ARCH 1720. How Houses Build People.
Archaeologists usually worry about how people in the past built houses. This course will flip the question on its head and ask: how do houses build people? Just what is a ‘house’? What is a ‘home’? Making use of an array of regional case studies, from different time periods, we will question how cultural values and norms can be extracted from, and explore the idea of the domestication of humans through architecture. Enrollment limited to 50. Not open to first year students

ARCH 1770. Grave Matters: The Archaeology of Death, Decay, and Discovery.
How do archaeologists study coffins, tombs, and human remains to learn about ancient societies? This course will explore the theory and practice of the archaeology of death. Topics will include the inference of social organization from mortuary remains, the experience of death and dying, social memory, identity, and others. Students will learn approaches to mortuary excavation and consider the politics and ethics of conducting burial archaeology globally. Enrollment limited to 55. Not open to first year students

ARCH 1771. Archaeology of Death (ANTH 1623).
Interested students must register for ANTH 1623 S01
ARCH 1772. The Human Skeleton (ANTH 1720). Interested students must register for ANTH 1720 S01 (CRN 24048)

ARCH 1775. Animals in Archaeology. Food, foe, friend: animals play all these roles, and more, in their relationship to humans, in the past as well as the present. This course will explore how zooarchaeology — the study of animal remains (bones, teeth, and shells) — allows us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and analytical techniques, including hands-on sessions for the identification and quantification of faunal remains. Enrollment limited to 20. Not open to first year students

ARCH 1780. Violence and Civilization: A Deep History of Social Violence. Why do we do violence to one another? This course will foster a sustained and critical reflection on social violence, history and humanity. We will explore social orders through time, together with their practices and moral economies of permissible and impermissible violence. Different conceptions of violence ("symbolic," "structural," and "routine") will be considered, in conjunction with their intersections with the many, ambivalent meanings of "civilization." No prerequisites required

ARCH 1790. The Nature and Culture of Disaster. Our view of nature forms the basis of environmental studies, ecotourism, heritage management, and contemporary debates over global warming that impact both public policy and the very way we lead our lives. This course draws from theorists (such as Douglas, Latour, Strathern and Spivak), as well as recent anthropological test cases from Amazonia, Papua New Guinea, and South Africa to look at how humans in the 21st century view nature in terms of stability, instability and disaster. How should we assess the 'risk culture' in which we currently live?

ARCH 1793. Slavery in the Ancient World (HIST 1080). Interested students must register for HIST 1080 S01

ARCH 1794. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World (ANTH 1625). Interested students must register for ANTH 1625 S01

ARCH 1800. Contemporary Issues in Archaeological Theory. This course will explore how archaeologists have placed material remains in the context of human practices, cultural processes and long-term history. Following a brief review of the history of the discipline as a social science, contemporary issues such as social complexity, technology and agency, ideology and narrative, gender and sexuality, production of space and construction of landscapes will be discussed. Case studies of archaeological materials will be drawn mostly from the ancient Western Asian and Mediterranean worlds. Enrollment limited to 15

ARCH 1810. Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East. Present-day political ideologies profoundly impact our understanding of the past. Here we will explore the use and abuse of archaeological pasts in the modern nation states of the Middle East. What do pharaohs mean to modern Egyptians? Why did Saddam Hussein consider himself the last Babylonian king? This course will explore the role of imagined ancient pasts and cultural heritage in the making of collective identities and state ideologies

ARCH 1816. The Ancient Body: Past Ideas about Human Physicality (ANTH 1660). Interested students must register for ANTH 1660 S01

ARCH 1817. Ancient Christianity and the Sensing Body (RELS 1300). Interested students must register for RELS 1300 S01

ARCH 1820. The Location of Theory in Archaeology. Does archaeology matter to the world today? Can it accommodate divergent voices and agendas for the study of the past, the theorizing of material culture, and the production of cultural heritage? This course will explore recent trends in archaeology that engage the work of social theorists, political thinkers, activists, and artists in the critical analysis of society, past and present. The course runs in conjunction with the upcoming Theoretical Archaeology Group (TAG) conference to be held at Brown

ARCH 1822. Anthropology of Place (ANTH 1910B). Interested students must register for ANTH 1910B S01

ARCH 1823. From Worlds in Miniature to Miniature Worlds: Theming and Virtuality (HIAA 1890F). Interested students must register for HIAA 1890F S01

ARCH 1835. Inventing the Past: Amulets, Heirlooms, Monuments, Landscapes. Long before archaeology and art-history were academic disciplines, individuals and communities manipulated the physical traces of the past in order to imagine and explain their own antiquity. Who cared about these objects and why? What did pre-modern excavations, catalogues, and collections look like and what do they tell us about our own engagements with antiquities? This course delves into the origins of antiquarianism and archaeology, from pre-history to the Renaissance. Enrollment limited to 50

ARCH 1850. Comparative Empires and Material Culture. The political, military, and cultural unit of "empire" has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires, that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of a range of different empires -- the Roman, the Chinese, the British, and the American -- and their unique political, social, and cultural contexts. Enrollment limited to 25

ARCH 1852. Material Culture Practicum (ANTH 1621). Interested students must register for ANTH 1621 S01 (CRN 25151)

ARCH 1855. Archaeology and Craft: Experimental Archaeology and the Materials Science of Ancient Technologies. How did people in the past make the things that archaeologists find today? How can archaeologists learn about processes of design, engineering and technological change from ancient objects? Students will approach production questions cross-culturally through firsthand involvement with craft processes and materials analysis - from raw materials to finished objects. Practicums will range from participation in blacksmithing and kiln design to learning about pyrotechnology, mechanical properties, and architectural techniques. The final class project will be an exhibit affiliated with the Haffenreffer Museum. Enrollment limited to 15. First year students require instructor permission

ARCH 1860. Engineering Material Culture: An Introduction to Archaeological Science. Unlikely bedfellows? No way! This course demonstrates how well archaeology (the humanities) and engineering (the hard sciences) can do business together. An introduction to the world of archaeological science, presented from the dual perspectives of material culture studies and materials science. Students will be introduced to a range of methodologies, instrumentation, and interpretive approaches through a combination of hands-on laboratory work, guest lectures, and interdisciplinary group research. Student must have already completed at least two university courses in archaeology, engineering, or any related discipline. Enrollment is limited to 20. Priority will be given to admitting an equal number of students from archaeology, engineering and related fields

ARCH 1870. Environmental Archaeology. How has climate change affected the development of human society? How have people changed or destroyed their environments in the past? What does “sustainability” mean over the long term? Environmental archaeology is the study of these questions and more through the use of scientific techniques to analyze soils, plants, and animal remains from ancient archaeological contexts. A combination of class and hands-on teaching will introduce these methods and how they allow us to interpret human-environmental interactions in the past. Enrollment limited to 50

ARCH 1880. Archaeo-Geophysical Survey and Visualization. Geophysical survey data act as primary information for locating archaeological sites, and contribute new perspectives when investigating existing sites. This course will develop students’ understanding of basic geophysical processes, through hands-on field-based data acquisition with ground penetrating radar, magnetometry, and resistance survey techniques. We will also experiment with approaches to data management and visualization. The course will conclude with students conducting a comprehensive multi-technique field survey of an archaeological site. Enrollment limited to 20 juniors, seniors, and graduate students.
ARCH 1883. Global Environmental Remote Sensing (GEOL 1330). Interested students must register for GEOL 1330 S01

ARCH 1900. The Archaeology of College Hill. A training class in field and laboratory techniques. Topics include the nature of field archaeology, excavation and survey methodologies, archaeological ethics, computer technologies (such as GIS), and site and artifact analysis and conservation. Students will act as practicing archaeologists through the investigation of local historical and archaeological sites in the College Hill area (e.g., the First Baptist Church of America and the John Brown House). Prerequisite: A previous course in Archaeology and the Ancient World or Anthropology is required. Restricted to sophomores, juniors, and seniors, except by permission of the instructor. Enrollment limited to 15

ARCH 1902. Material Culture Practicum (ANTH 1621). Interested students must register for ANTH 1621 S01

ARCH 1904A. Memories, Memorials, Collections and Commemorations (AMST 1904A). Interested students must register for AMST 1904A S01

ARCH 1970. Individual Study Project in Old World Archaeology and Art. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ARCH 1990. Senior Honors Thesis in Archaeology and the Ancient World. Honors students in Archaeology and the Ancient World who are completing their theses should enroll in this course in their final semester. The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ARCH 2000. Research Methods in Archaeology. Familiarizes beginning old world archaeology and art graduate students and graduate students from neighboring disciplines, as well as advanced undergraduate students, with the methods, history, and bibliography of the field

ARCH 2006. Principles of Archaeology (ANTH 2501). Interested students must register for ANTH 2501 S01 (CRN 14694)

ARCH 2010A. Ancient Numismatics. Deals with problems in ancient numismatics from these topics: introduction of coinage, major coinages of archaic Greece, coinage of 4th C.B.C. in the Greek west and Roman coinage of 3rd C.B.C

ARCH 2010B. Approaches to Archaeological Survey in the Old World. Recent decades have witnessed a marked development of interest in regional approaches to the ancient world and its landscapes. This seminar will explore the history of this development, as well as survey’s impact on the work of both ancient historians and archaeologists. Topics to be covered include survey design and methodology, and the wider implications and lessons of regional analysis

ARCH 2010C. Architecture, Body and Performance in the Ancient Near Eastern World. This seminar investigates the relationship between bodily practices, social performances, and production of space, using case studies drawn from ancient Mesopotamia, Anatolia, and Syria. Employing contemporary critical theories on the body, materiality, and social practices, new theories of the making of architectural spaces and landscapes will be explored with respect to multiple geographical, historical contexts in the Ancient Near East

ARCH 2010D. Archaeology and Religion: Excavating the Sacred from Prehistory to Islam. This course explores methodological approaches and theoretical underpinnings of scholarly (and sometimes unpopular) interpretations of the archaeological record as evidence for the religious life of past societies, considering how archaeologists have treated the analytical categories of ritual, religion, ideology, and the sacred. These discussions will be examined through Mediterranean case studies as a key region in the archaeology of religion

ARCH 2010E. Archaeology in the Information Age. Archaeology must circulate the material past in two dimensions. The right combination of image (maps, plans, photographs) and text has long defined professional archaeology. However, the current explosion of digital media has spurred profound shifts in all domains of archaeological practice and documentation. This course encourages reevaluation of archaeological media, which pertains to information technology across the humanities and sciences

ARCH 2010F. GIS and Remote Sensing: Advanced Applications in Archaeology. Geographical Information Systems (GIS) and various forms of remote sensing are increasingly essential components of good archaeological practice. This advanced course is intended primarily for students with some background in GIS software, and who have evolved a relevant research project to develop over the course of the term. Less advanced graduate students may enroll with permission of the instructor and will be provided with additional tutorial instruction

ARCH 2010G. Ethical Issues in Archaeology. Graduate students will certainly confront ethical, legal, and professional issues in the course of their own doctoral research and subsequent careers. This seminar offers a forum for open, but well-informed, discussion of a variety of significant ethical problems and dilemmas currently facing the discipline of archaeology worldwide. We will give attention to practical matters arising from archaeological field research, as well as a wide range of difficult questions concerning ownership and presentation of the past. Open to graduate students only

ARCH 2020A. Greek Vase Painting. No description available

ARCH 2020B. Topography of the City of Athens. No description available

ARCH 2020C. Pausania’s Guidebook to Greece. No description available

ARCH 2020D. Greek Painting. Major developments in the history of Greek painting with special emphasis on archaic and classical Greek culture as reflected in vase painting. There will be field trips to area museums which may take longer than class time

ARCH 2020E. Economy and Trade in the Later Bronze Age Aegean and East Mediterranean. Beginning with an examination of the workings of the Mycenaean palace economy, including the evidence of Linear B documents, this seminar will then turn to a more inclusive consideration of trade and exchange involving Aegean states and their counterparts further east, and of the nature and extent of cultural interaction between them during the later Bronze Age (ca. 1600-1100 BC)

ARCH 2030A. Late Roman and Early Christian Mosaics. Study of Christian, Jewish, and secular mosaics of the Late Roman period

ARCH 2030B. Problems in Roman Portraiture. No description available

ARCH 2030C. Roman Copies of Greek Sculpture. Copies of masterpieces of Greek sculpture have become famous through Roman copies. The relationship between copy and original will be investigated along with its relevance to Roman taste

ARCH 2030D. Roman Historical Relief. The scope of this seminar will not be limited to traditional examples of ‘Roman historical relief’ that is, architectural reliefs charged with historical and political significance, but will also embrace media such as cameos and silver plate that similarly carry such messages. We will be examining monuments dating from the Roman Republic through Late Antiquity

ARCH 2030E. Roman Sculpture in East Coast Museums. No description available

ARCH 2030F. The Archaeology of Constantinian Rome. Selected topics related to the monuments of Constantinian Rome, both secular and ecclesiastical

ARCH 2030G. Wall Paintings from Pompeii. Interpreting the Campanian frescoes
ARCH 2040A. The Cities of the Decapolis. Examine the archaeological evidence of the Decapolis, an administrative district or region of Greek cities located in northern Transjordan, southern Syria, and northern Palestine. The sites of most Decapolis cities have been surveyed and several have been extensively excavated. Excavation reports and their scholarly evaluations will form the basis for this course.

ARCH 2040B. The Parthenon. No description available.

ARCH 2040C. Value and Exchange. No description available.

ARCH 2040D. Genealogies of Complexity in East Asia (3000-221 BCE). Despite East Asia’s rich archaeological and historical record, its early political (pre)histories have been more sites for theoretical projection than theoretical innovation. Focusing on mainland East Asia, we will engage political theory and its applications in case studies from the Neolithic to the first Empires. Topics will range from mortuary rituals to practices of social violence and sources include both material culture and text.

ARCH 2040E. International Cultural Heritage: Creating a Future for the Past. From the Parthenon to Puccini to pizza, cultural heritage can be defined as places, objects, and ideas from the past that have survived to the present. This course will examine the theories, methods, and questions that shape the effort to protect and interpret cultural heritage today as well as responses to them. We will explore issues such as current threats to cultural heritage, the role of tourism and impacts of development, questions of authenticity and identity, international law, ethics, and emerging and non-traditional areas of the field.

ARCH 2040F. Public Culture and Heritage in Postapartheid South Africa. This course examines the complex processes whereby issues of culture, race, identity/subjectivity, globalization, memory and heritage are being reframed and rethought in post-apartheid South Africa. We will be guided by three broad themes: public histories; archives and knowledge; and questions of performance. Of all possible settings, post-apartheid South Africa may present one of the most challenging - at times troubling - contexts through which to consider such public negotiations and meanings.

ARCH 2040G. Designing Heritages: From Archaeological Sensibilities to Relational Heritages (AMST 2654). Interested students must register for AMST 2654 S01.

ARCH 2040H. Imperial Cities. What does Athens have to do with Jerusalem? Tenochtitlan with London? Beijing with Rome? Cuzco with Persepolis? All are capital cities of imperial systems, each shaping and reflecting the nature of the empire, its ruling ideology, and its social and economic infrastructure. The category of “imperial cities”, however, must extend beyond these primate centers, to consider the urban networks in play across each empire’s territorial reach, and beyond.

ARCH 2041. Mesoamerican Archaeology and Ethnohistory (ANTH 2520). Interested students must register for ANTH 2520 S01 (CRN 24060).

ARCH 2050. Glimpses of Mesopotamian History and Archaeology. A course dealing with the country’s ancient history through the ages, giving an account of the most prominent discoveries made and reviewing the leading problems of Mesopotamian archaeology.

ARCH 2100. Things! The Material Worlds of Humanity. This course explores the relationships between people and things. From archaeology to material culture studies, from philosophy to science studies, we will examine a wide variety of approaches to the world of objects, artifacts, and material goods. Perspectives will include materialist approaches, consumption studies (including notions of fetish), phenomenology, social constructivism, cognitive approaches, actor-network-theory, and more.

ARCH 2105. Ceramic Analysis for Archaeology. The analysis and the interpretation of ceramic remains allows archaeologists to accomplish varied ends: establish a time scale, document interconnections between different areas, and suggest what activities were carried out at particular sites. The techniques and theories used to bridge the gap between the recovery of ceramics and their interpretation within anthropological contexts are the focus of this seminar.

ARCH 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F). Interested students must register for GREK 2110F S01.

ARCH 2112. Roman Epigraphy (LATN 2120A). Interested students must register for LATN 2120A S01.

ARCH 2114. Archaeologies of Text (AWAS 2800). Interested students must register for AWAS 2800 S01.

ARCH 2140. The Marriage of Archaeological Science and Social Theory. What do ceramics, lithics, building materials and metals tell us about the people who used them? Do high-tech analytical methods contribute to a deeper understanding of the past or simply muddy the waters? Theoretically, we will challenge the objectivity of ‘science’ and the value of archaeological taxonomies, as they relate to the construction of archaeological narratives. The ultimate objective in this course is to access the symmetrical social relationships between people and things, through the medium of the archaeological materials, as understood through the application of scientific techniques. Enrollment limited to 15.

ARCH 2142. Facture: East and West (HIAA 2870F). Interested students must register for HIAA 2870F S01.

ARCH 2145. Technology and Production in Archaeology: Anthropological Foundations and Contemporary Theory. An intensive focus on theoretical approaches to technology and production that have shaped archaeological thinking over the past century and have formed the basis of many of the contemporary issues in the field. Students will read and critically assess key works about concepts of production and technology in various cross-cultural archaeological contexts. Seminar themes include political economy, specialization, technology transfer, cross-craft production, power dynamics, ritual, and tool use. Enrollment limited to 20 seniors and graduate students.

ARCH 2150. Theoretical Issues in Archaeology. The goal of this seminar is to examine the state of archaeological theory, with special emphasis on archaeological practice and interpretation in the Mediterranean, Egypt and ancient Western Asia. While providing some measure of historical overview, the class chiefly offers an opportunity for students to read and critique recent works that exemplify the variety of contemporary approaches to this subject.

ARCH 2160. The Archaeology of Democracy: Social Transformations in Ancient Greece, ca. 900-323 BCE. Between 900 and 600 BCE, profound social transformations took place in Greece, setting the stage for a revolution in political form: by 500, Athens was collectively govern by its citizen body. This course engages with the everyday materialities underlying Greek democracy of this era. Focusing on relationships among people and things, students will reassess the composition of the demos from the ground up.

ARCH 2165. The "Second Sophistic": Archaeological and Literary Approaches. The cultural phenomenon of the “Second Sophistic” affected both the material fabric and the intellectual life of the eastern Roman empire of the second/third centuries CE. This course will examine how awareness of “Greek” learning (paideia) and the “Greek” past informed people’s literary and artistic tastes, as well as their responses to changing political and religious pressures, affecting everything from civic coinage to elite dining habits and even bodily comportment. Enrollment limited to 15.

ARCH 2170. Archaeology of Greek and Punic Colonization. This course investigates cultural interaction at local and regional scales between ‘colonists’ and locals, introducing students to a range of case study material across the Mediterranean. This will focus on material from the eighth to sixth centuries BC from Iberia, France, Italy, North Africa, and the Black Sea. Examples of Etruscan colonization will also be explored. The concept of ‘colonization’ will be critically examined, along with how it has been treated by archaeologists and ancient historians over the past century. Enrollment limited to 15 juniors, seniors, and graduate students.
ARCH 2200. Evolution of Old World States and Civilizations in Comparative Perspective.
The origins, evolution, and nature of ancient states have always constituted central problems of interest to archaeologists and anthropologists, but in recent years they have undergone radical critique. This seminar will consider modern studies on state formation, social structure and change in early states, with a primary emphasis on so-called ‘Old World’ cases, for example on ancient Mesopotamia and Greece.

ARCH 2240. Key Issues in Mediterranean Prehistory.
This course’s scope is the entire Mediterranean basin, from its first peopling until ca. 500 BC. The focus is on key transformations in economic, social, and political structures and interactions; on explanations for these changes; and on current issues where fresh data or new approaches are transforming our understanding. This seminar is intended for students both with and without prior knowledge of this field, and particularly for those preparing for the Joukowsky Institute’s Mediterranean Prehistory field exam. Enrollment limited to 15 juniors, seniors, and graduate students.

ARCH 2245. Rural Landscapes and Peasant Communities in the Mediterranean.
The broad aim of this course is to explore rural settlement and agrarian production in the Mediterranean, both in the ancient and the recent past. The archaeological starting-point is provided by the numerous scatters of surface remains that archaeological surveys across the Mediterranean have collected and that are usually interpreted as ‘farmlands’ broadly datable to Classical Antiquity. We will look well beyond these scatters to examine the social and economic significance of rural settlement through comparison with ethnographic and historical rural studies from across the Mediterranean and to explore household and community organisation as well as agrarian production in Classical Antiquity. Enrollment limited to 15.

ARCH 2250. Island Archaeology in the Mediterranean.
The Mediterranean is a world of islands, par excellence, and the island cultures that have developed there over the millennia have great archaeological distinctiveness. This seminar will consider the concept of insularity itself, in cross-cultural archaeological, anthropological, and historical perspective. We will then turn to the rich, specifically Mediterranean literature on island archaeology (exploring issues of colonization, settlement, interaction).

ARCH 2255. Coastal Values: Archaeology and Paleocology of Coastal and Island Environments.
People like to live by the water. What characteristics (social, economic, environmental) make coastal environments so attractive? What are the effects of human settlement on these environments? How do societies adapt (or not) to changing coastal environments? This seminar takes an interdisciplinary approach to these questions, applying the lessons of the past to the challenges of the present through an explicitly diachronic, cross-cultural, and data-driven approach to examining human-environmental interaction in coastal settings. Enrollment limited to 15.

ARCH 2300. The Rise of the State in the Near East.
A seminar on the origins of food production and complex societies in the period from ca. 9000 to 2200 B.C. Topics will include: the first domestication of plants and animals, the earliest village communities in the Levant, Anatolia, and Mesopotamia, and the economic and social transformations accompanying the emergence of urbanized state societies in fourth and third millennia B.C. Mesopotamia.

ARCH 2330. Roman Asia Minor: The Empire Goes East.
If one is curious about the dynamics of life within the Roman empire, the province of Asia makes an excellent case study. Its numerous urban centers and rural landscapes were socially and economically differentiated and frequently monumentally elaborated, as an increasing amount of varied archaeological data reveal. Asia offers a rich laboratory for exploring issues of provincial development, and ultimately decline, over the course of the empire.

ARCH 2335. In the Wake of Empire: Anatolia after the Hittites, before Alexander.
Kings Croesus, Midas, and the much lesser known Warpalawas... Who were these people, when and where did they rule, and why does any of this matter? During the first millennium BCE, Anatolia was an astonishingly varied, multicultural and multilingual environment. This course will tackle head on the myriad archaeological, historical, and even linguistic challenges posed by this fascinating, but often-overlooked period in the history of the region. Enrollment limited to 15 juniors, seniors, and graduate students.

ARCH 2340. The Archaeology of the Assyrian Empire: Cities, Landscapes and Material Culture.
Ritual, war and conquest! The Assyrian Empire was a powerhouse in the ancient Near East with fearsome military expeditions, sumptuous cult festivals, grand cities, and complex governing systems. This course investigates the archaeology of Assyria from the trading center of Ashur in the second millennium BCE to the collapse of the empire in the 7th c. BCE. Using published excavations, surveys, and texts, we will explore Assyria’s material culture, landscape, cult practices and state ideology. Enrollment limited to 15 seniors and graduate students.

ARCH 2350. Archaeology of the Caucasus.
The goal of this seminar is to provide students with an overview of the long-term archaeological record from the Caucasus and its near neighbors, as well as an understanding of the history of research in this area during Imperial Russian, Soviet, and contemporary times. Readings will cover a range of periods, prehistoric and historic, following the interests of the class.

Innumerable cultures, past and present, have singled out specific locales and even whole landscapes as powerful vectors for communicating with the divine. This course will analyze such spaces for their ability to transform body, escape the material plane, and reconstitute social relations and bodily practice. Case studies will largely be drawn from the Mediterranean world and will employ an archaeological attention to the materiality of these sacred spaces. Key concepts will include: ritual practice, landscape production, memory and agency. Prerequisites: three upper-level courses in Archaeology and the Ancient World, Religious Studies, or Anthropology.

ARCH 2404. Archaeology of Ritual (ANTH 2570).
Interested students must register for ANTH 2570 S01.

ARCH 2410. Archaeologies of Place.
Places are understood as sites of human interaction in and with the material world. This course explores how archaeological and ethnographic research addresses material complexities and cultural meanings of places in the context of broader landscapes. We will investigate critical theories of place and landscape, while working with fieldwork data from the ancient Near East, particularly Hittite Anatolia. Enrollment limited to 20.

ARCH 2450. Comparative Empires and Material Culture.
The political, military, and cultural unit of “empire” has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires, that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of four different empires - the Roman, the Chinese, the British, and the American - and their unique political, social, and cultural contexts. The creation of a “virtual exhibit” of a range of illustrative artifacts is currently envisioned as an outcome of the class.

ARCH 2500. Art and Archaeology of Civic Identity.
Every urban community in the Greco-Roman world presented itself in a specific way to other communities and to foreign entities. Looking at coins, public monuments, programmatic sculpture, and epigraphic and textual evidence, we will address different concerns related to the formation and propagation of civic identities. Comparative material from other historical periods and theoretical and anthropological literature on group identity, social cohesion, and empire will contextualize the visual and archaeological evidence. Prerequisites: three previous courses in Archaeology and the Ancient World.

ARCH 2501A. Problems in Archaeology: Culture, Contact and Colonialism (ANTH 2500A).
Interested students must register for ANTH 2500A S01 (CRN 14693).
ARCH 2501C. GIS and Remote Sensing in Archaeology (ANTH 2500C).
Interested students must register for ANTH 2500C S01

ARCH 2502. Historical Archaeology: From Colony to City (ANTH 2540).
Interested students must register for ANTH 2540 S01

ARCH 2511. Circumpolar Archaeology (ANTH 2510).
Interested students must register for ANTH 2510 S01

ARCH 2540. Roman, Byzantine and Early Islamic Jerusalem.
Jerusalem constitutes one of the most important archaeological sites connected to the origins of Judaism, Christianity, and Early Islam. Early and recent studies and discoveries, as well as old and new theories, will be examined in the seminar with special emphasis on the Roman, Byzantine, and Early Islamic periods. Prerequisite: knowledge in archaeological methodology

ARCH 2550. Qumran and its Archaeological Context.
This course is structured as a seminar on the archaeology of Qumran and the Dead Sea Scrolls. The site will be examined in its larger geographical, historical, and archaeological context. The goal is to become familiar with the different scholarly interpretations of the site. Prerequisites: solid background in at least one of three fields: archaeology, Judaism, and Early Christianity

ARCH 2551. Archaeological Research Methods, Theory and Practicum (ANTH 2550).
Interested students must register for ANTH 2550 S01

ARCH 2552. Museums in Their Communities (AMST 2220D).
Interested students must register for AMST 2220D S01

ARCH 2600. Gender and Sexuality in Roman Art.
The study of the body and embodiment in Roman art encourages us to make use of multiple theoretical models for interrogating both the art and the bodies involved. Gender and sexuality provide the lenses through which this course will explore a variety of topics (for example, the homoerotic gaze, sexualized spectacles of pain, gendered architectural typologies, and the body in rabbinic imagery) in Roman imperial art. Open to graduate students only

ARCH 2620. All Italia: City and Country in Ancient Italy.
This seminar approaches the urban and rural landscapes of peninsular Italy from the Early Iron Age until the Gothic Wars, with the goal being to examine key points of intersection (and departure) between the spheres of ‘town’ and ‘country’. Overall the seminar aims to contextualize Italian landscapes across both time and space to that end we will consider issues pertaining to urbanism, economy, production, infrastructure, administration, architecture, and iconography. Enrollment limited to 20 seniors and graduate students

ARCH 2710. The Archaeology of Nubia and Egypt.
Egypt and Nubia share the distinction of ancient civilizations along the Nile river, but Nubia remains much more poorly known than Egypt. This seminar will examine the archaeology of Nubia, including its relationship to Egypt, from the introduction of ceramics and agriculture to the medieval period. This long-term perspective will allow comparative study of issues such as state formation, imperialism and religious change. Enrollment limited to 15 graduate students

ARCH 2851. Skills Training in Material Culture Studies I.
When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes; what techniques are appropriate in what cases? How should all this information be securely stored and promulgated? This "hands on" class, intended for students in multiple disciplines, will consider the study of particular types of material or bodies of evidence (e.g., pottery, lithics, epigraphy, numismatics). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC

ARCH 2852. Skills Training in Material Culture Studies II.
When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes, what are the appropriate techniques? How should all this information be securely stored and promulgated? This "hands on" class, intended for students in multiple disciplines, will revolve around techniques of documentation and analysis (e.g. architectural drawing, GIS [Geographic Information Systems], data bases and digital media). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC

ARCH 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

ARCH 2980. Individual Reading.
Section numbers vary by instructor. Please check Banner for the correct added number and CRN to use when registering for this course

ARCH 2981. Thesis Research.
Individual reading for the Master’s degree. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ARCH 2982. Individual Reading for Dissertation.
Reading leading to selection of the dissertation subject. Single credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ARCH 2983. Dissertation Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ARCH 2990. Thesis Preparation.
For graduate students who are preparing a thesis and who have met the tuition requirement and are paying a registration fee to continue active enrollment

Brown Institute for Brain Science

The Brown Institute for Brain Science (BIBS) advances multidisciplinary research, technology development, and training in the brain sciences and works to establish Brown University as an internationally recognized leader in brain research. BIBS unites more than 100 faculty from a diverse group of departments at Brown, spanning basic and clinical departments, and physical and biological sciences. BIBS provides a mechanism to advance interdisciplinary research efforts among this broad group. BIBS provides essential support to obtain and administer multi-investigator grants for research, infrastructure, and training. The Institute actively seeks new training funds to support interdisciplinary education that transcends that available in individual academic departments.

As one of its core missions, the Institute is developing and supporting a series of interdisciplinary research centers that focus on established or emerging areas of excellence in brain research at Brown. Each center bridges the physical and life sciences, and encompasses basic and translational research, including clinical application. The Center for Vision Research (http://cvr.brown.edu/aboutcvr.html) was created in 2007. Initiatives in Neurotechnology and in Synaptic and Neurodegenerative Disease are underway. BIBS has also established an MRI Research Facility and an Behavioral Analysis Core Facility.

The existence of Brain Science as an overall organizing entity for a series of research centers and core facilities demonstrates the university’s ongoing support for brain science research at Brown. This commitment will help to attract top faculty and students to Brown, enable higher quality research and establish Brown as a worldwide leader in brain science.

Brain Science Graduate Program

The graduate program in Brain Science is a unique interdisciplinary program formed to tackle one of the greatest mysteries of man.

The program was designed to promote collaborative theoretical and experimental study of the brain from the molecular to the behavioral and cognitive level. It unites faculty who study the fundamental mechanisms of nervous-system function and those who seek to create devices with brain-like functions that can assist mankind. The faculty are also committed to translating fundamental knowledge for the diagnosis and treatment of the devastating effects of disease and trauma of the nervous system. Brown is a leader in related research and offers exceptional training and coursework for those interested in pursuing careers in brain science. The
Brown Technology Partnerships

Brown Technology Partnerships (BTP), under the direction of the Vice President for Research, acts as Brown’s vehicle for technology transfer. BTP focuses on actively communicating with faculty about technology transfer opportunities and policies and provides service to faculty to help with potential commercialization. The office works to forge alliances with the corporate, venture, public, and government communities needed for successful commercialization. BTP connects its efforts to relationship-building activities in the University, such as Advancement, Public Affairs and Government Relations and explores with our affiliated hospitals the potential for significant collaborations in technology transfer and related activities, both to effectively develop and to avoid duplication of our effort and costs. Brown Technology Partnerships also helps implement the University’s policies on intellectual property.

Brown Technology Partnerships is available to assist any organization wishing to undertake cooperative research programs or to license existing technology. Organizations may contact BTP directly at (401) 863-2780. For additional information please visit http://www.research.brown.edu/btp/.

Business, Entrepreneurship, Organizations (BEO)

The C.V. Starr Program in Business, Entrepreneurship, and Organizations is an interdisciplinary academic program that supports research, teaching and practice in the field of commerce. Its sponsoring departments of Economics and Sociology and the School of Engineering provide a unique scholarly foundation based upon economics, organizational studies, and entrepreneurship and technology management. Without a business school at Brown, the Business, Entrepreneurship and Organizations Program allows faculty and students a unique perspective on the critical issues facing businesses and organizations today.

An important component of BEO is a multidisciplinary, multi-track undergraduate concentration. This program:

• Provides students with a rigorous and synergistic program in the study of commercial activity grounded in Economics, Sociology and Engineering.
• Focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, and management and organizational theory. Concentrators seek to understand the basic principles, approaches and vocabulary relevant to the study of entrepreneurship from the disciplines of economics, organizational sociology and engineering. Building on this multidisciplinary base, students develop specialized expertise in one of the three disciplinary approaches, with special emphasis on critical reasoning and quantitative research methods. In senior year capstone projects, students apply and integrate multi-disciplinary learning by working in groups on real world projects, including the creation of new ventures.
• Is supported by interdisciplinary research that provides an academic grounding for the curriculum and keeps it innovative and fresh.

For more information, please visit the BEO website (http://coe.brown.edu).

Business, Entrepreneurship and Organizations Concentration Requirements

Business, Entrepreneurship and Organizations (BEO), formerly Commerce, Organizations and Entrepreneurship (COE) is a multidisciplinary concentration that provides a rigorous and synergistic program in thestudy of commercial activity grounded in economics, sociology and engineering. BEO focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, and management and organizational theory. Concentrators seek to understand the basic principles, approaches and vocabulary relevant to the study of entrepreneurship from the disciplines of economics, organizational sociology and engineering. Building on this multidisciplinary base, students develop specialized expertise in one of the three disciplinary approaches, with special emphasis on critical reasoning and quantitative research methods. In senior year capstone projects, students apply and integrate multi-disciplinary learning by working in groups on real world projects, including the creation of new ventures.

The three tracks of the concentration are as follows:

1. Business Economics
2. Organizational Studies, or
3. Entrepreneurship and Technology Management.

Upon completion of all concentration requirements, students receive the Bachelor of Arts (A.B.) degree in Business, Entrepreneurship and Organizations.

The Curriculum

Business Economics Track

Foundation Courses

| ECON 0110 | Principles of Economics | 1 |
| ECON 1110 | Intermediate Microeconomics | 1 |
| SOC 1311 | Micro-Organizational Theory: Social Behavior in Organizations | 1 |
| SOC 1315 | Macro-Organizational Theory: Organizations in Social Context | 1 |
| ENGN 0020 | Transforming Society-Technology and Choices for the Future | 1 |
| or ENGN 0030 | Introduction to Engineering | 1 |
| ENGN 1010 | The Entrepreneurial Process: Innovation in Practice | 1 |

Math and Statistics Options

Choose from the following:

| MATH 0070 | Calculus with Applications to Social Science | 1 |
| MATH 0090 | Introductory Calculus, Part I | 1 |
| MATH 0050/0060 | Analytic Geometry and Calculus | 1 |
| ECON 1620 | Introduction to Econometrics | 1 |

Track Requirements

| ECON 0710 | Financial Accounting | 1 |
| ECON 1210 | Intermediate Macroeconomics | 1 |
| ECON 1710 | Investments I | 1 |
| ECON 1720 | Corporate Finance | 1 |

One Data Methods-intensive course from the following list:

| ECON 1310 | Labor Economics | 1 |
| ECON 1360 | Health Economics | 1 |
| ECON 1390 | Research Methods for Economists | 1 |
| ECON 1510 | Economic Development | 1 |
| ECON 1520 | The Economic Analysis of Institutions | 1 |
| ECON 1630 | Econometrics I | 1 |
| ECON 1640 | Econometrics II | 1 |
| ECON 1650 | Financial Econometrics | 1 |
| ECON 1750 | Investments II | 1 |
| ECON 1759 | Data, Statistics, Finance | 1 |
| ECON 1765 | Finance, Regulation, and the Economy: Research | 1 |

One 1000-level economics course, including a second data methods intensive course from the list above

A one-semester required capstone from the BEO 1930 series

Total Credits 15
### Organizational Studies Track

#### Math and Statistics Options

Choose one of the following:

- MATH 0070 Calculus with Applications to Social Science
- MATH 0090 Introductory Calculus, Part I
- MATH 0050/0060 Analytic Geometry and Calculus
- SOC 1100 Introductory Statistics for Social Research
- or APMA 0650 Essential Statistics
- ECON 1620 Introduction to Econometrics

#### Track Requirements

Select one of the following introduction to Research Methods courses: 1

- SOC 1050 Methods of Research in Organizations
- SOC 1020 Methods of Social Research

Select one of the following Advanced Research Methods courses: 1

- SOC 1120 Market and Social Surveys
- SOC 1260 Market Research in Public and Private Sectors
- SOC 1871F Principles and Methods of Geographic Information Systems
- SOC 2020 Multivariate Statistical Methods II
- SOC 2220 Advanced Quantitative Methods of Sociology Analysis
- SOC 2240 Event History Analysis
- SOC 2260E Structural Equation Models in the Social Sciences
- ANTH 1940 Ethnographic Research Methods
- ECON 1390 Research Methods for Economists
- ECON 1630 Econometrics I
- EDUC 1100 Introduction to Qualitative Research Methods
- EDUC 1160 Evaluating the Impact of Social Programs
- PHP 1320 Survey Research in Health Care
- PPAI 1200 Policy Analysis and Program Evaluation

Select one of the following Advanced Research Studies Courses: 1

- SOC 1060 Leadership in Organizations
- SOC 1080 Groups in Organizations
- SOC 1540 Human Needs and Social Services
- SOC 1870A Investing in Social Change
- SOC 1871M Theories of the Third Sector and Civil Society
- SOC 1871O Law, Innovation and Entrepreneurship
- SOC 2060 Complex Organizations and Health Policy
- SOC 2960M Sociology of Organizations Graduate Seminar
- CLPS 1730 Psychology in Business and Economics
- PPAI 1700V Nonprofit Organizations
- PPAI 1700Y Crisis Management
- PPAI 2170 Leadership and Organization
- PPAI 2550 Managing and Leading in Public Affairs

Select two of the following Organization-Relevant Electives: 2

- Any from the Advanced Research Methods or Advanced Organization-Studies lists.
- SOC 1114 Law and Society
- SOC 1410 Aging and the Quality of Life
- SOC 1550 Sociology of Medicine
- SOC 1870L The Myth of Markets: Exploring the Social Side of Economics
- SOC 1871C Sociology of the Legal Profession
- AMST 1610A American Advertising: History and Consequences
- EDUC 1020 The History of American Education
- EDUC 1040 Sociology of Education
- EDUC 1150 Education, the Economy and School Reform
- EDUC 1200 History of American School Reform
- EDUC 1650 Policy Implementation in Education
- EDUC 1730 American Higher Education in Historical Context
- ETHN 1890C Business, Culture, and Globalization: An Ethnographic Perspective
- PHP 2400 The U.S. Health Care System: Case Studies in Financing, Delivery, Regulation and Public Health
- POLS 1150 Prosperity: The Ethics and Economics of Wealth Creation
- POLS 1240 Politics, Markets and States in Developing Countries
- POLS 1820W Market Liberalism: Origins, Principles and Contemporary Applications
- PPAI 1520 Law and Economic Development: Theory, Policy, and Institutions
- PPAI 1700B Social Welfare Policy in the United States
- PPAI 1700K Health Policy Challenges
- PPAI 1700N Legal Policy Challenges: Federalism and Separation of Powers Issues Under the U.S. Constitution
- PPAI 1700R Urban Revitalization: Lessons from the Providence Plan
- PPAI 1701C Corporate Power and Global Order: Regulation and Policy in the Transnational Economic Sphere
- PPAI 1701D Aging and Public Policy: The Impact of an Aging Society on Public and Private Sector Organizations
- PPAI 1910 Social Entrepreneurship

**Capstone**: one-semester required from the BEO 1930 series 1

**Total Credits**: 15

Or an optional two-semester capstone from the BEO 1930 and 1940 series.

#### Track Requirements

Select two of the following Organization-Relevant Electives: 2

- Any from the Advanced Research Methods or Advanced Organization-Studies lists.
Courses

BEO 1930A. Social Entrepreneurship Capstone I.
This is the first in a two-semester course sequence designed as an option to fulfill the Integrative Senior Experience for seniors in the Organizational Studies track of BEO. The course will build on concepts studied in SOC 1030 and 1090, and will lead students to synthesize knowledge at several levels: synthesizing across disciplines, across theoretical understanding and practical application, and across private and public sector experiences of entrepreneurship. Students will be organized into client-mentored teams to work on social entrepreneurship projects. This course is designed as a senior synthesis experience

BEO 1930C. BEO Capstone.
Teams of BEO seniors will be tasked with solving problems of existing business, simulating a group of consultants. Projects will span from recommending appropriate finance for new investments to project evaluation and pricing of new services. Each student team will have a mentor from the business that seeks to resolve its challenge. Student teams will apply, synthesize and integrate their studies in economics, finance, organizational studies, and entrepreneurship. They will apply not only the analytical frameworks of the disciplines in BEO but they will also hone in their writing, presentational, leadership and organizational skills.

WRIT

BEO 1940A. Social Entrepreneurship Capstone II.
Continuation of Semester 1, Social Entrepreneurship Capstone I: completion of client-mentored team projects begun in Semester 1. Registration requires an application and instructor approval if student did not complete Semester 1

Chemistry

Chair
Matthew B. Zimmt

The Department of Chemistry maintains pedagogical and research strengths in organic, inorganic, theoretical and experimental physical chemistry, analytical chemistry, chemical biology and nanochemistry. Faculty, post-doctoral fellows, graduate and undergraduate students collaboratively pursue interdisciplinary research within the department, enhanced by the partnerships with colleagues in the medicine, biology, geology, physics and engineering.

For additional information, please visit the department’s website: http://www.brown.edu/academics/chemistry/

Chemistry Concentration Requirements

The Chemistry concentration offers courses and research opportunities that range from fundamental studies involving the characterization and preparation of synthetic and naturally occurring molecules, to interdisciplinary studies at the interfaces of chemistry with biology, medicine, physics, engineering, and nanoscience. As early as their first year, undergraduates are able to work one-on-one or in small groups with faculty members on cutting edge research projects. The Sc.B. degree provides a thorough foundation for further graduate study or for entry-level technical positions in each area. Students seeking the Sc.B. may either pursue the standard Chemistry concentration or one of the two optional tracks: Chemical Biology or Materials Chemistry. Students may also pursue the A.B. degree in Chemistry, which provides a core education in the discipline.

Standard program for the A.B. degree

CHEM 0330 Equilibrium, Rate, and Structure 1
CHEM 0350 Organic Chemistry 1
CHEM 0360 Organic Chemistry 1
CHEM 0500 Inorganic Chemistry 1
CHEM 1140 Physical Chemistry: Quantum Chemistry 1
CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics 1
CHEM 1160 Physical Chemistry Laboratory 1

Two advanced science/math electives. 2

Total Credits 9

1 Note that the physical chemistry courses (CHEM 1140, CHEM 1150, CHEM 1160) have mathematics and physics prerequisites.
2 At least one must be a chemistry course. BIOL 0280 is credited as an elective for the chemistry concentration.

Standard program for the Sc.B. degree

The Chemistry Department offers three tracks for the Sc.B. Chemistry Concentration – a Chemistry track, a Chemical Biology track and a Materials Chemistry track. These tracks are not separate concentrations – your degree will still be an Sc.B. in Chemistry. The Chemical Biology track is designed for students who have a strong interest in the interface of chemistry with biology. The Materials Chemistry track is designed for students who have a strong interest in the interface of chemistry with nanoscience and materials science.

Concentrating in Chemistry – Three tracks

The required/recommended courses for the three tracks are given below.

• Chemistry Track:
  • CHEM 0330 Equilibrium, Rate, and Structure 1
  • CHEM 0350 Organic Chemistry 1
  • CHEM 0360 Organic Chemistry 1
  • CHEM 0500 Inorganic Chemistry 1
  • CHEM 0970 Undergraduate Research 1
  • CHEM 0980 Undergraduate Research 1
  • CHEM 1140 Physical Chemistry: Quantum Chemistry 1
  • CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics 1
  • CHEM 1160 Physical Chemistry Laboratory 1
  • Two Math courses 2
  • Two Physics courses 2
  • Seven electives (at least three must be in Chemistry) 1

Total Credits 20

1 Note that the physical chemistry courses (CHEM 1140, CHEM 1150, CHEM 1160) have mathematics and physics prerequisites.
2 At least one must be a chemistry course. BIOL 0280 is credited as an elective for the chemistry concentration.

• Chemical Biology Track:
  • CHEM 0330 Equilibrium, Rate, and Structure 1
  • CHEM 0350 Organic Chemistry 1
  • CHEM 0360 Organic Chemistry 1
  • CHEM 0400 Biophysical and Bioinorganic Chemistry 1
  • CHEM 0970 Undergraduate Research 1
  • CHEM 0980 Undergraduate Research 1
  • CHEM 1140 Physical Chemistry: Quantum Chemistry 1
  • CHEM 1230 Chemical Biology 1
  • CHEM 1240 Biochemistry 1
  • BIOL 0280 Introductory Biochemistry 1
  • Two Math courses 2

Total Credits 20
Two Physics courses 2
Select three of the following: 3
- BIOL 0470 Genetics
- BIOL 0500 Cell and Molecular Biology
- BIOL 0510 Introductory Microbiology
- BIOL 0530 Principles of Immunology
- BIOL 0800 Principles of Physiology
- NEUR 1020 Principles of Neurobiology

Three other electives 1 3

Total Credits 20

- Materials Chemistry Track:
  - CHEM 0330 Equilibrium, Rate, and Structure 1
  - CHEM 0350 Organic Chemistry 1
  - CHEM 0360 Organic Chemistry 1
  - CHEM 0500 Inorganic Chemistry 1
  - CHEM 0970 Undergraduate Research 1
  - CHEM 0980 Undergraduate Research 1
  - CHEM 1060 Advanced Inorganic Chemistry 2 1
  - CHEM 1140 Physical Chemistry: Quantum Chemistry 1
  - CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics 2
  - CHEM 1700 Nanoscale Materials: Synthesis and Applications 1

Two Math courses 2
Two Physics courses 2 2
 BIOL 1090 Polymer Science for Biomaterials 1

Five electives, at least two must be chemistry courses. 1 5

Total Credits 20

1. BIOL 0280 is credited as an elective for the chemistry concentration.
2. For students with a more Engineering bent, the following substitutions can be made - ENGR 0030/ENGR 0040 can be substituted for PHYS 0030/0040; PHYS 0410 can be substituted for CHEM 1060; PHYS 0720 for CHEM 1150.

In each of these cases, CHEM 0970/CHEM 0980 should be carried out with a faculty member with an appointment in the Chemistry Department. Research with faculty advisors outside Chemistry may be allowed in some special cases. In this event, the student should a) prepare a proposal for the research to be carried out and b) identify a faculty member in the Chemistry Department who will serve as a second advisor and the second reader for the thesis. A thesis is required to be eligible for graduation with Honors.

Biochemistry & Molecular Biology Concentration Requirements

Biochemistry is the study of the chemistry of living organisms. Biochemistry and Molecular Biology is an interdisciplinary program drawing on the methods of biology and chemistry to examine how life works at the molecular level, and is applicable across areas within the biomedical sciences including neuroscience, developmental biology, immunology, pharmacology, and synthetic biology. Concentrators in Biochemistry and Molecular Biology begin their learning with foundational courses in biology, mathematics, chemistry, and physics as well as three courses in biochemistry. Elective courses in biology expose students to a variety of additional topics. Students are also expected to become familiar with research methodologies in the field. This is accomplished through two semesters of independent research in collaboration with a concentration advisor.

Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Select two semester courses of independent research approved by a concentration advisor:

- BIOL 1950/1960 Directed Research/Independent Study
- CHEM 0970/0980 Undergraduate Research

Total Credits 20

1. Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.

Standard program for the Sc.B. degree

Twenty semester courses in biology, chemistry, mathematics, and physics, including the following core requirements:

Three courses in physical and organic chemistry, beginning with: 3
- CHEM 0330 Equilibrium, Rate, and Structure

Three courses in mathematics, statistics and/or computer science, typically including MATH 0090, MATH 0100, or equivalent) 1
- Two courses in physics, typically: 1
  - PHYS 0030 Basic Physics
  - PHYS 0040 Basic Physics

One course in biophysical chemistry:
- CHEM 0400 Biophysical and Bioinorganic Chemistry

Three courses in biochemistry:
- BIOL 0280 Introductory Biochemistry
- BIOL 1270 Advanced Biochemistry
- CHEM 1230 Chemical Biology or CHEM 1240 Biochemistry

Select four of the following electives: 4
- BIOL 0200 The Foundation of Living Systems
- BIOL 0470 Genetics
- BIOL 0500 Cell and Molecular Biology
- BIOL 0530 Principles of Immunology
- BIOL 1050 Biology of the Eukaryotic Cell
- BIOL 1090 Polymer Science for Biomaterials
- BIOL 1100 Cell Physiology and Biophysics
- BIOL 1260 Physiological Pharmacology
- BIOL 1290 Cancer Biology
- BIOL 1310 Analysis of Development
- BIOL 1540 Molecular Genetics
- BIOL 1560 Virology
- A course from the BIOL 2200 series
- A course from the BIOL 2210 series
- NEUR 1020 Principles of Neurobiology
- NEUR 1670 Neuropharmacology and Synaptic Transmission
- CHEM 0500 Inorganic Chemistry
- CHEM 1140 Physical Chemistry: Quantum Chemistry
- CHEM 1220 Computational Tools in Biochemistry and Chemical Biology
- CHEM 1230 Chemical Biology
- CHEM 1240 Biochemistry
- CHEM 1450 Advanced Organic Chemistry

Select two electives from any quantitative science or mathematics course relevant to biochemistry (including courses on the preceding list) and approved by a concentration advisor.

Select two semester courses of independent research approved by a concentration advisor:

- BIOL 1950/1960 Directed Research/Independent Study
- CHEM 0970/0980 Undergraduate Research

Total Credits 20

1. Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.

Chemistry Graduate Program

The department of Chemistry offers graduate programs leading to the Master of Arts (A.M.); the Master of Science (Sc.M.); a the Doctor of Philosophy (Ph.D.) degree.
For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/chemistry

Courses

CHEM 0080A. First Year Seminar- Energy.
An introductory study of the scientific foundation of energy, fundamental physical, chemical, and thermodynamic aspects of common (fossil, nuclear) as well as novel (fuel cells, solar, wind, etc.) energy sources. Concentrates on scientific principles, but includes discussion on resources and reserves, environmental impact, current usage, and future needs. For students of all disciplines who are interested in obtaining an understanding of scientific principles of energy. Enrollment limited to 20 first year students. FYS LILE

CHEM 0080B. Molecular Structures in Chemistry and Biology.
This course will consist of a survey of historical developments and concepts of three dimensional structures of molecules. The course will conclude with a survey of the current state of the art of structure determination and 3D structure motifs for small molecules, nanomaterials and biological macromolecules. This freshman only seminar will be strictly limited to a maximum of 20 students. FYS

CHEM 0080C. Drug Discoveries in the Pharmaceutical Industry.
A Freshman seminar that provides a survey of past and current approaches that enable the discovery and development of therapeutic agents. Topics ranging from target validation to the development of therapeutic concepts of three dimensional structures of molecules. The course will conclude with a survey of the current state of the art of structure determination and 3D structure motifs for small molecules, nanomaterials and biological macromolecules. This freshman only seminar will be strictly limited to a maximum of 20 students. FYS

Explores the electronic structure of atoms and molecules, thermodynamics, solution equilibria, electrochemistry, chemical kinetics, and reaction mechanisms. Three hours of lecture and five hours of prelaboratory and laboratory per week. Required background: CHEM 0100 or AP Chemistry 4 or CHEM Placement Test 8 or IBC Chemistry. Students MUST register for all four components of this course (the common meeting, lecture, lab and conference) during the SAME registration session. Banner will not allow a student to register for one component without registering for the other three at the same time. Further, if one component of the course is dropped, all four components will be dropped. This course is offered in both Fall and Spring semesters.

If you previously completed CHEM 0330 laboratory but received a grade of no credit in the course, please register for lab section 9 (spring 2013 only)

CHEM 0330L. Equilibrium, Rate, and Structure Lab.
Please see course description for CHEM 0330

CHEM 0350. Organic Chemistry.
Sequel to CHEM 0330. Examines aspects of physical and inorganic chemistry relevant to modern organic chemistry. Laboratory work is concerned with the identification and characterization of organic compounds, including modern instrumental methods. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0330.

Students MUST register for a common meeting, a lecture section, a lab and a conference.

If you previously completed CHEM 0350 laboratory but received a grade of no credit in the course, please register for lab section 11

CHEM 0350L. Organic Chemistry Lab.
Please see course description for CHEM 0350

CHEM 0360. Inorganic Chemistry.
Sequel to CHEM 0350. Examines aspects of physical and inorganic chemistry relevant to modern inorganic chemistry. Laboratory work is concerned with the identification and characterization of inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0350.

Students MUST register for a lecture section and a lab.

CHEM 0360L. Organic Chemistry Lab.
Please see course description for CHEM 0360

CHEM 0400. Biophysical and Bioinorganic Chemistry.
Examines aspects of physical and inorganic chemistry relevant to modern biochemistry. Three hours of lecture and five hours of laboratory. Prerequisite: CHEM 0360 and MATH 0110 or 0170. Prerequisite or corequisite PHYS 0040 or 0060.

Students MUST register for a lecture section and a lab.

CHEM 0500. Inorganic Chemistry.
Examines aspects of physical and inorganic chemistry relevant to modern inorganic chemistry. Laboratory work is concerned with the identification and characterization of inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0360.

Students MUST register for a lecture section and a lab.

CHEM 0500. Undergraduate Research.
Permission: permission of the staff. Permission should be requested before the end of the preceding semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

CHEM 0970. Undergraduate Research.
See Undergraduate Research (CHEM 0970) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

CHEM 1060. Advanced Inorganic Chemistry.
Examines aspects of physical and inorganic chemistry relevant to modern inorganic chemistry. Laboratory work is concerned with the identification and characterization of inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0500

CHEM 1140. Physical Chemistry: Quantum Chemistry.
Examines aspects of physical and inorganic chemistry relevant to modern inorganic chemistry. Laboratory work is concerned with the identification and characterization of inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0500

Students MUST register for all four components of this course (the common meeting, lecture, lab and conference) during the SAME registration session. Banner will not allow a student to register for one component without registering for the other three at the same time. Further, if one component of the course is dropped, all four components will be dropped. This course is offered in both Fall and Spring semesters.

If you previously completed CHEM 0330 laboratory but received a grade of no credit in the course, please register for lab section 9 (spring 2013 only)
Examines the question: Where does chemical equilibrium come from?
Focuses on macroscopic perspectives on chemical systems and the
molecular origins of macroscopic behavior along with elements of
statistical mechanics, the laws of thermodynamics, and the relationships
between the two. Prerequisite: CHEM 1140 or written permission of the
instructor.

CHEM 1160. Physical Chemistry Laboratory.
An introduction to modern instrumentation and experimental techniques
as applied to physical chemistry. Experiments will emphasize application
of the ideas of spectroscopy, kinetics, statistical mechanics, and
thermodynamics to systems of chemical and biochemical interest.
Required course for concentrators in chemistry. One to two afternoons
of laboratory per week. Prerequisites: CHEM 1140 or permission of the
instructor.

CHEM 1170. Environmental Chemistry.
A laboratory course using analytical methods to help in the study and
description of several realistic environmental problems. Illustrates
scientific methodology and measurement techniques as they apply to
these important problems. A problem-solving course employing a kind
of environmental chemical detective work. Two laboratory sessions per
week. Prerequisites: MA 0100 or the equivalent, or permission of the
instructor. Enrollment limited to 8. Written permission required.

Introduction to computational tools used to analyze protein sequences and
structures, DNA sequence analysis, RNA structure, biochemical pathways
and the analysis of microarray data. Extensive use of programs such as
AMBER, BLAST, PSIBLAST and a discussion of their limitations.

CHEM 1230. Chemical Biology.
This course covers topics at the interface of chemistry and biology
and, specifically, the use of chemical tools to probe biological systems.
Using examples from the recent literature, we will discuss using the
central methods of chemistry, namely the ability to design and synthesize
compounds with a particular set of properties, to analyze biological
problems. Specific topics include molecular recognition of DNA, artificial
enzymes, small molecule sensors, and in vivo imaging of proteins, nucleic
acids, and cell-surface carbohydrates. Prerequisites: CHEM 0350, CHEM
0360, and BIOL 0280 OR BIOL 1270. If enrollment exceeds the limit, permission to enroll will be allotted in the order: 1) first year graduate students, 2) senior concentrators in Chemistry or Biochemistry, 3) junior concentrators, 4) other students. Students who have registered or have permission to enroll must attend the first three classes or risk losing their places to someone on the waiting list.

CHEM 1240. Biochemistry.
Examines the chemical, mechanistic, and structural basis for enzymatic
catalysis. Uses examples from the recent literature to examine how the
experimental and conceptual tools of chemical synthesis, isotopic labeling,
stereochemistry, enzymology, kinetics, and protein structure can be
brought to bear to unravel the chemical and physical principles underlying
the enormous catalytic acceleration and exquisite structural specificity of
enzyme-catalyzed reactions. Prerequisites: Strong background in organic
chemistry (CHEM 0350-0360, A or B performance preferable) plus at least
one semester of Biochemistry (BIOL 0280, BIOL 1270). Enrollment limited
to 25 students, written permission required.
If enrollments exceed the limit of 25 students, permission to enroll for
students who meet the course prerequisites will be allotted in the order:
a) first year Chemistry graduate students, b) undergraduate senior
concentrators in Chemistry, Biochemistry or Chemical Biology, c) junior
concentrators in Chemistry, Biochemistry or Chemical Biology, d) other
students. Students who have permission to enroll must attend the first
three classes or risk losing their places to someone on the Course waiting list.

CHEM 1450. Advanced Organic Chemistry.
Lectures cover topics of current interest in organic reaction mechanisms,
synthesis, and structure determination. Laboratory emphasizes
spectroscopic and separation techniques and modern synthetic methods.
Prerequisite: CHEM 0360.

Students MUST register for a lecture section and a lab.
CHEM 1560A. Molecular Modeling.
No description available.

CHEM 1560B. Techniques in Inorganic Chemistry.
No description available.

CHEM 1560C. Advanced Spectroscopy.
No description available.

CHEM 1560D. Chemistry and Biology of Naturally Occurring Antibiotics.
Small molecules produced by organisms for chemical defense have long
been exploited in medicine, biotechnology, and biological research. 1560D
will examine the origins, uses, modes of action, and preparations of some
of the most important and useful of these "antibiotic" molecules. Given the
inter-disciplinary nature of this topic, this course is open to students with
backgrounds in the biological and/or physical sciences. Familiarity with
concepts of organic chemistry and biochemistry will be assumed.

CHEM 1560E. Chemical Mass Spectrometry.
This seminar course will survey the instrumentation, methods, and
applications of modern biological mass spectrometry. Through lecture
and interactive discussions, we will explore the fundamentals of mass
spectrometry. We will then proceed to cover a series of topics relevant
to protein and peptides analysis. The seminar will conclude with an
exploration of recent developments in instrumentation or application of
particular interest to the participants. Recommended pre-requisites: CHEM
0360, BIOL 0280, PHYS 0040. Enrollment limited to 20.

CHEM 1560F. Organic Structure Analysis.

CHEM 1560G. Nuclear Magnetic Resonance.
These special topics courses cover the basics of modern NMR spectroscopy. Topics to be included are as follows: modern Fourier
transform methodology, modern NMR instrumentation, and a
comprehensive discussion of one and two dimensional experiments that
are routinely performed. Topics such as coherence transfer and pulsed
field gradients will also be included. Experimental methods covered
in detail include COSY, TOCSY, HSQC, HMBC, NOSEY, ROSEY,
EXSY and DOSY methodology. This course will not focus on structure
determination or spectral interpretation but rather on experimental
methodology.

CHEM 1560H. Chemical Glycobiology.
This course examines the chemistry and biology of carbohydrates
in living systems. Topics to be covered may include - principles of
carbohydrate recognition, enzymes involved in synthesis and modification
of carbohydrates, carbohydrates in bacterial/viral and other cellular
interactions, glycomics, carbohydrate synthesis. Prerequisites: CHEM
0360 and BIOL 0280. Instructor permission required. Attendance at the
first class meeting is required for enrollment.

CHEM 1560I. DNA Damage and Repair.
This course analyzes the chemistry of DNA damaging agents and the
molecular mechanisms of DNA replication and DNA repair. We will
also analyze the mutagenic and toxic consequences of modifications
to DNA structure. Specific topics include the reactions of alkylating
agents, ultraviolet radiation, and oxidizing radicals with DNA; additionally,
chemotherapeutics that modify DNA will be discussed. Multiple cellular
repair pathways will be covered including base excision repair, nucleotide
excision repair, mismatch repair, and direct reversal. Prerequisites: CHEM
0350, CHEM 0360, BIOL 0280, BIOL 1270, or by permission.

CHEM 1560J. Topics in Bioinorganic Chemistry.
Covers current topics of bioinorganic chemistry with review of fundamental
inorganic and biological chemistry. Topics include metal ion transport
and storage, oxygen metabolism, electron transfer, respiration and
photosynthesis, metal ion receptors and signaling, hydrolytic chemistry,
metallo-neurochemistry, and medicinal bioinorganic chemistry. Students
are strongly urged to complete both CHEM 0500 and CHEM 0360 prior to
this special topics course.

CHEM 1560K. Computational Chemistry.
Introduction to computational tools for studying the structure of molecules,
chemical bonding and chemical reactions. A survey of computational
approaches for calculating electron distribution such as molecular
mechanics, semi-empirical and ab initio methods (Hartree-Fock,
configuration interaction, perturbation theory and density functional theory will be given. Methods for calculating dynamics of atoms in molecular vibration and chemical reactions will be covered. The course is intended for seniors and graduate students in all subdivisions of chemistry. The goal is to make students capable of using research level tools and carry out simple calculations related to their research interests.

**CHEM 1560L. Modern Natural Product Biosynthesis.**
This course will cover the biosynthesis of the major classes of natural products - polyketides, non-ribosomal peptides, including beta-lactam antibiotics, terpenes, alkaloids and vitamins. The readings from original literature will cover the chemical logic and mechanisms of biosynthetic pathways and individual reactions, including isotopic labeling for whole-cell feeding experiments, stable isotopic NMR analysis, and mass spectrometry. Modern topics include genomics of natural product biosynthesis, genome mining, and pathway engineering. Prerequisites: CHEM 0350 and 0360. Recommended: CHEM 1230, 1240, or 1450. Enrollment limited to 25 juniors and seniors.

**CHEM 1620A. Photoacoustics.**
Prerequisite: CHEM 1140 or equivalent.

**CHEM 1620B. Spectroscopy.**
Prerequisite: CHEM 1140 or equivalent.

**CHEM 1620C. Topics in Modern Physical Chemistry.**
No description available.

**CHEM 1660. Instrumental Analysis with Environmental Applications.**
This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid chromatography, and electrochemical methods. Prerequisite: CHEM 0330 or GEOL 1370. Enrollment limited to 20. Instructor permission required.

**CHEM 1700. Nanoscale Materials: Synthesis and Applications.**
Focuses on synthesis, properties, and applications of nanoscale materials. It begins with the introduction to size-dependent properties and to general characterization methods of nanomaterials. It then outlines the synthesis, surface chemistry and self-assembly of nanomaterials. It further reviews catalytic, optical, and magnetic properties of nanomaterials. Finally, the course highlights the applications of nanomaterials in information storage, energy conversion, and biomedicine.

**CHEM 2010. Advanced Thermodynamics.**
Fundamental principles of macroscopic equilibrium thermodynamics. The three laws of thermodynamics, the thermodynamic potentials, temperature scales, heat engines and refrigerators, entropy, kinetic theory, and transport phenomena. Applications to solids, fluids, and magnetic systems; Gibbs relations, first and second order phase transitions, thermal radiation, gas expansions.

**CHEM 2020. Statistical Mechanics.**
Introduction to modern equilibrium statistical mechanics, including the classical and quantum descriptions of ideal gases, the molecular basis of thermodynamics, the concepts of ensembles and fluctuations, and the implications of quantum mechanical indistinguishability. Applications include chemical and phase equilibria, the transition-state theory of chemical reaction rates, and the theory of liquids.

**CHEM 2210. Chemical Crystallography.**
Introduces the principles of crystallography (plane groups, point groups, space groups, Bravais lattice, crystal classes), crystallographic methods (single-crystal, powder XRD, macromolecular), strategies for data collection, methods for data reduction, and structure interpretation; reviews modern crystal structure databases (CSD, ICSD) and search engines; reviews the historical development of crystallography and the scope, potential and application of X-ray analysis.

**CHEM 2310. Advanced Inorganic Chemistry.**
Comprehensive survey of topics in synthetic and mechanistic organometallic chemistry.

**CHEM 2320. Physical Inorganic Chemistry.**
The bonding and structures of inorganic compounds, including transition metal containing compounds and organometallics, and their spectroscopic properties are covered along with the group theoretical, quantum chemical, and physical methods employed. Prerequisites: CHEM 0500 and 1140 or equivalents or written permission. Recommended for seniors and first-year graduate students.

**CHEM 2410. Physical Organic Chemistry.**
Detailed examination of organic reaction mechanisms, reactive intermediates, and the methods employed for their characterization (e.g., kinetics, free energy relationships, isotope effects, molecular orbital theory, spectroscopy, and product distributions). Topics may include concerted, free radical, elimination, and photochemical reactions, and the chemistry of radicals, carbocations, carbanions, and carbenes. Prerequisites: CHEM 0500, CHEM 1140.

**CHEM 2420. Organic Reactions.**
Study of organic reactions and reaction mechanisms. Discussion and analysis of organic transformations. Topics can include arrow pushing strategies and synthetic methods.

**CHEM 2430. Synthetic Organic Chemistry.**
Methods, strategies, and mechanisms. Topics may include the chemistry of anions, cations, and radicals, concerted reactions, conformational analysis, and stereochemistry.

**CHEM 2770. Quantum Mechanics.**
Semester I: Time independent quantum mechanics and its application to atomic and molecular problems. Discussions of modern theories of electronic structure, chemical bonding, and molecular spectroscopy. Prerequisite: CHEM 1140 or equivalent.

**CHEM 2780. Quantum Mechanics.**
Semester II: Lectures consider the theory and application of time-dependent quantum mechanical methods in chemical physics. Both few and many-body methods are described and discussions include the correlation function formulation of chemical dynamics. Numerical path integral methods for equilibrium and dynamical problems are introduced. Prerequisite: CHEM 2770.

**CHEM 2810. Departmental Seminars.**
No description available.

**CHEM 2820. Departmental Seminars.**
No description available.

**CHEM 2870. Departmental Colloquia.**
No description available.

**CHEM 2880. Departmental Colloquia.**
No description available. Open to graduate students only.

**CHEM 2920A. Chemistry and Physics of Amorphous Materials.**
No description available.

**CHEM 2920B. Organic Spectroscopic Methods.**
No description available.

**CHEM 2920C. Topics in Modern Spectroscopy.**
No description available.

**CHEM 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**CHEM 2980. Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHEM 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

**CHEM XLIST. Courses of Interest to Students wishing to Study Chemistry.**

**Fall 2012**
The following course may be of interest to students desiring to know more about Chemistry. Please check the course listing for the time and location.

**Spring 2013**
The following course may be of interest to students desiring to know more about Chemistry. Please check the course listing for the time and location.
Classics Concentration Requirements

Classics focuses on ancient languages, literature, history, and culture. It provides specialized training for students intending to enter graduate school, and a broad liberal education for those with more general interests. Students may choose to study Ancient Greek, Latin, Sanskrit, or Modern Greek and gain knowledge in literature, mythology, ancient history, philosophy, and religion. Students may either pursue the standard Classics concentration - the most popular choice - or they may pursue one of the four optional tracks: Greek, Latin, Greek and Latin, or Sanskrit. Their studies culminate in a seminar for juniors and seniors and in the composition of a senior thesis or other capstone project.

All tracks except "Greek and Latin" and "Sanskrit" require the satisfactory completion of eight courses as described below. Programs are flexible and students are encouraged to discuss their plans with the concentration advisor. The introductory courses in Greek and Latin may not usually be counted toward a concentration.

Concentrators are strongly encouraged to integrate their studies in various fields of Classics by writing a senior thesis (which can, but need not, be an honors thesis; is more demanding than an ordinary term paper; and preferably transcends the subject matter of one particular subdiscipline of classics); by participating in a seminar for juniors and seniors (which is designed to provide insight into the relationships among various parts of ancient studies); or by undertaking another kind of senior project that achieves the same goals and is acceptable to the department.

Classics

One course in Greek or Latin on the 1000-level or above. Select one of the following series: 2

Honors

Students may earn honors in each concentration by presenting a satisfactory thesis, for the preparation of which they will ordinarily enroll in the relevant 1970 and 1990 courses; these courses may not be used to satisfy the standard requirements for a concentration. In order to qualify for honors, students must maintain a B average overall.
Courses

Classics

**CLAS 0010. The Greeks.**

For centuries Western civilizations have seen the Greeks as their intellectual and spiritual ancestors. The 'Greek miracle' is explored by reviewing its major achievements and discoveries: poetry (heroic epic, tragedy, political comedy), philosophy, historical research, political analysis and institutions, science. All texts read in English. Enrollment limited to 20 first year students. FYS LILE WRIT

**CLAS 0020. The Romans.**

Statesmen exposed republican conspiracies; historians chronicled imperial intrigue; playwrights "Greeked-it-up" with toga parties; epic poets sang of Rome's rise (and fall); moralizers bemoaned gladiators' beauty habits; and a novelist recounted the adventures of a man turned into an ass. This course tracks the development of literary culture at Rome from its beginnings to the end of the Empire, with an emphasis on the major genres, authors, and works of Roman literature. Intended for all students desiring an introduction to Roman literary culture and its masterpieces. All texts read in English; no previous experience in Roman history or Latin required. LILE WRIT

**CLAS 0150. Ancient Philosophy.**

Ancient Greek views about the prospects and limits of reason in the human being's search for a good and valuable life. What the best life is; how, and how far, reason can provide for its realization; what social/ political conditions it requires; how vulnerable it is (and should be) to uncontrollable happenings. Authors include Euripides, Thucydides, Plato, Aristotle, Epicurus, Lucretius, Augustine, and Dante

**CLAS 0180. Indian Civilization through Its Literature.**

An examination of various historical, geographical, social, scientific, and literary aspects of Indian civilization through the reading of translations of original works of Indian culture such as the short story collection **Bṛhatkathāslokasamgraha**. Each topic that comes up in the story is explored in greater depth in supplementary material

**CLAS 0200X. Greece: Ideas and Cultures from Antiquity to Modernity.**

The course offers a diachronic examination of the major intellectual achievements and ideas of Hellenism and its legacies, beginning with the 5th Century BC; to today. Three interconnected seminars situate the study of the civilization, politics and cultures of the Greeks, as well as their reception, in historical frameworks that span 2500 years. The course will include examination and discussion of the concepts of democracy and citizenship, the ethics of warfare, religious controversies, the idea of nation, perceptions of gender. Instruction will be enhanced by visits to archeological sites, museums, monasteries and Byzantine churches in Athens, Istanbul, Delos, Naxos and Paros. DVPS LILE

**CLAS 0210A. Alexander the Great and Alexandria.**

No description available

**CLAS 0210B. Death in Ancient Greece.**

Examines how ancient Greeks understood, described, and experienced death. Making use of sources in translation, considers how death is anticipated, imagined, feared, and sometimes sought. Also contrasts classical ideas with current experiences in our own society in order to see whether and how our assumptions concerning death are culturally determined. Enrollment limited to 20 first year students. FYS LILE WRIT

**CLAS 0210E. The Family in the Classical World.**

It has been said that the household, not the individual, was the core of classical society. Using primary sources, we examine such questions as parental (and paternal) authority, the status of women, the role of private property, extended kinship, the physical structure of houses, the experience of childhood, etc. Comparisons are drawn with other societies, including our own

**CLAS 0210F. The Meaning of History in the Ancient World.**

The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The course will (a) focus on the great historians Herodotus, Thucydides, Polybius, Livy, Sallust, and Tacitus, and examine what purposes they pursued in writing history; (b) investigate the origins and development of historical writing in Greece and Rome; (c) look briefly at forms of historical reflection and writing in other ancient civilizations. For first year students only

**CLAS 0210G. Themes in Ancient Science.**

The ideas of ancient scientists are apt to seem both oddly familiar and utterly strange. Examines the major developments in ancient physics, biology, medicine, mathematics, technology, anthropology, and astronomy. Pays particular attention to the tensions between observation and theory, science and society, and the reappearance of ancient notions in modern beliefs

**CLAS 0210H. Thucydides: History and Cultural Context.**

Thucydides' history of the Peloponnesian War is a magnificent and profound study of the growth and deterioration of Athenian imperialism. We shall examine his history against the background of concurrent intellectual achievement in drama, philosophy, and rhetoric

**CLAS 0210I. How Women were Seen.**

Classical literature offers a wide array of representations of women, from loyal wives like Penelope to murderesses like Medea, from powerful queens like Dido to helpless slaves like the women of Troy after the destruction of their city. Through a selection of poems and prose texts, almost all composed by men, we shall attempt to gain insight into the place of women in the ancient Greek and Roman imagination

**CLAS 0210J. Homer - The 'Big Bang' of Western Literature?.**

The history of Western Literature seems to begin with a 'Big Bang', the **Iliad** and the **Odyssey**. A primary goal of this First Year Seminar will be to become thoroughly familiar with the many fascinating and highly influential characteristics of the two epics and their plots by means of close reading (in English translation). At the same time, we will examine the key factors which made this 'miraculous beginning' possible. This includes a question that has received much attention in recent scholarship: the influence of literature from the Middle East. Looking in the other direction, Homer's enormous and lasting influence on literature and art will also be discussed. Enrollment limited to 20 first year students. FYS WRIT

**CLAS 0210L. Who Owns the Classical Past?.**

This course offers a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.). Enrollment limited to 20 first year students. FYS

**CLAS 0210M. Seneca: A Philosopher in Politics.**

The Stoic philosopher Seneca led a fascinating life; a man who preached the importance of mind over matter but begged for return from exile, and a philosopher compromised by his relationship with the emperor Nero, his pupil and his murderer. At least his end was heroic: ordered to commit suicide in 65 AD, he modeled his death on that of Socrates, discussing calmly about philosophy with his friends as the blood drained out of his veins. In this course we'll read broadly in his writings and try to come up with some answers about this complex and fascinating figure and the philosophy of living for which he stood

**CLAS 0210O. Sport in the Ancient Greek World.**

Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education. Enrollment limited to 20 first year students

**CLAS 0280. Latin in English/Latinate English.**

The influence of Latin not only on the English vocabulary but on English style. Topics include: word building from Latin (and some Greek), Latin words and phrases in English, English lexicography, translations into
the body and sexuality as a site for power. The limitations imposed by the
will cover both social history and gender discourse, focusing especially on
used these categories as a vehicle for social and political criticism. We
Greeks and Romans defined normative gender categories and how they
and Roman women in various sources, from Homeric epics and public
Examines, in translation, the three masterpieces of Virgil, central poet
Examines, in translation, the three masterpieces of Virgil, central poet
of the golden age of Latin literature. In particular, considers his epic,
theAeneid, against the background of the Rome of the emperor Augustus.
Subjects for discussion include the relation of poetry and power, the
connection between the imagination and historical reality, and the tension
between intellectual freedom and the constraints of society
CLAS 0520. Religion and Magic in Ancient Greece.
Examines the sacred or supernatural realm that pervaded ancient Greek
culture, considering both public and private practices. Topics include belief
in the gods; aspects of polytheism; sacrifice; pollution; athletic and civic
festivals; oracles; mystery cults; death and afterlife; hero cults; religion and
gender; curses, spells, and charms; ancient atheism and agnosticism
CLAS 0560. War and Society in the Ancient World.
In a broad survey of ancient societies (from Egypt and Mesopotamia
to late antiquity), but with a strong focus on the Greco-Roman world,
this course examines the sociology of war in prem modern societies: we
investigate how in each case warfare and military organization interacted
with social, economic, and political structures and how each society dealt
with the challenges, gains, and costs of war. Readings in English
CLAS 0600. The Worlds of Late Antiquity.
A survey of Western culture in all its variety-social, political, economic,
literary-in those centuries when the Roman Empire supposedly fell,
leaving in its wake the so-called Dark Ages. Emphasizes the dialectic of
continuity and change that leads from Imperial Rome to the vast Empire of
Charlemagne
CLAS 0620. Greek Tragedy.
An investigation of many of the surviving plays of the Greek tragedians
Aeschylus, Sophocles, and Euripides. Considers the diverse aspects of
ancient drama: the context, both religious and sociopolitical; issues of
theatrical production, the poetic texture of the plays; and the influence of
classical drama on later drama and western thought. Additional readings
may include Aristophanes' Frogs and Thesmophoriazusae and selections
from Aristotle's Poetics, the earliest criticism of Greek tragedy. LILE WRIT
CLAS 0660. The World of Byzantium.
Caught between the East and West, the culture of Byzantium inherited
the ancient worlds of Greece, Rome, and Jerusalem, nurturing many a
modern ideology, conflict, and identity. Byzantium is explored through
its history, texts, and art. We examine the foundation and history of
Constantinople, Iconoclasism, the Crusades, medieval Christianity and
Islam, Byzantine court life, concepts of gender, self, and sexuality
CLAS 0750. Gender and Sexuality in Classical Antiquity.
This course will analyze a part of any culture, Greek and Roman society
and literature. Using gender as a critical tool, we will examine Greek
and Roman women in various sources, from Homeric epics and public
inscriptions to scathing Roman satire. These sources show how the
Greeks and Romans defined normative gender categories and how they
used these categories as a vehicle for social and political criticism. We
will cover both social history and gender discourse, focusing especially on
the body and sexuality as a site for power. The limitations imposed by the
source materials, both literary and non-literary, will be a topic of discussion
throughout, as well as the relation of these ideas to contemporary
constructions of gender.
CLAS 0760. Ancient Utopias/Imaginary Places.
Literary depictions of idealized imaginary societies already had a long
tradition when Thomas More produced his Utopia in 1516. This course
explores the ancient Greco-Roman utopian tradition, examining both
literary depictions of mythological or fantastic utopias (or dystopias),
including representations of societies remote in time (the Golden Age)
or place (e.g., Homer's Phoenicia), and works that critique contemporary
values or attempt to describe idealized possible societies (e.g., Plato's
Republic). These Greco-Roman depictions in turn provided the foundation
for the utopian (and dystopian) tradition as it continued through the
Medieval age and into modernity, and we will also follow that tradition.
DVPS LILE WRIT
CLAS 0800. Religious and Philosophical Thought in Ancient India.
The historical development of the main themes of ancient Indian religious
and philosophical thought. Part I: The rise of monism in tension with
polytheism, the efficacy of Vedic words and Vedic rites, and early
Brahminic cosmology and psychology. Part II: The rise of the non-
Brahminic traditions (Jainas, AţiVikas, and Buddhists) challenging Vedic
revelation and everything based upon it (mainly the rites and authority of
brahmins). Part III: The ensuing 'conversations' among the competing
traditions, conversations that developed new world-views and new
methods for effecting human well-being in the cosmos
CLAS 0810A. Alexander the Great and the Alexander Tradition.
This course focuses on a single historical figure, Alexander the Great,
using him as a point of departure for exploring a wide range of problems
and approaches that typify the field of Classical Studies. How knowledge
of Alexander has been used and abused provides a fascinating case study
in the formation and continuous reinterpretation of the western Classical
tradition
CLAS 0820. Epics of India.
An introduction to Indian epic literature with reading and analysis of one or
more of India's grand and powerful epics, such as the Mahabharata, the
Rāmāyana, the Cilappadikaram, and others
CLAS 0850. Mythology of India.
Reviews major myths from religions of India in order to understand how
the peoples of India imagined their relation to the divine world, to nature,
and to other human beings. Considers connections between myths and
religious practices, social structures, historical events, and psychological
and aesthetic dimensions of Indian cultural life. Reading of mythic
narratives will be accompanied by analysis from selected theoretical
disciplines. DVPS
CLAS 0855. The Bhagavad Gītā.
This course will study and discuss the teachings of the Bhagavad Gītā in
the context of its literary, theological, and philosophical origins in ancient
India. We will read the text itself (in English, not Sanskrit), parts of the epic
Mahābhārata in which the Gītā is situated, and collateral texts, such as
Upanisads, Indian myths, Buddhist sermons, or even modern novels,
that may shed light on why and how this text has exercised such far-reaching
influence across the ages, inside India and beyond. Enrollment limited to
20 first year students. DVPS FYS
CLAS 0900. Greek Mythology.
Reviews major myths along with some lesser known variations, in order to
understand how ancient Greeks imagined their relation to the divine world,
to nature, and to other human beings. Considers connections between
myth and cult or ritual, and also to the psychological, social, historical,
and aesthetic aspects of classical myths. Examines adaptations of classical
myths in later societies and comparative materials from other cultures
CLAS 0990. Concepts of the Self in Classical Indian Literature.
Examination of the great Indian epic Mahābhārata and related mythology
introducing the context for the most ancient speculations of the Rgyveda
and the subtle teacher-student dialogues about the self contained in the
Bhagavadgītā and Upanishads. We will also examine the more systematic
Indian philosophical texts and note their resonance in ancient and modern
European conceptions of self.
CLAS 1120A. Dreams, Love and Confession. The Middle Ages are notorious for their love of bizarre locales, hauntings, fear of demons, and superstitions. But the outlook of the medieval world also encouraged a love of hidden and of internal, spiritual space. This world-view attended to dreams, a complex anatomy of human love and confessions. In this course, we will examine the social and literary context of these three modes of communication in the classical and, especially, the medieval period. We will read classical and medieval poetry (Horace, Propertius, Ovid, Lucretius, Cambridge Songs, Alan de Lille, Bernardus Silvestris), late antique dream books (Aelius Aristides), medieval bestiaries and fables, vernacular Romances and lays, and the medieval confessional mode (Augustine, Guibert); we will also examine visual evidence, where possible

CLAS 1120B. Epic Poetry from Homer to Lucan. Traces the rich history and manifold varieties of the genre of epic poetry in the literatures of ancient Greece and Rome beginning with Homer’s Iliad and Odyssey (VII c. B.C.) and ending with Lucan’s Civil War (I. c. A.D.). Masterpieces such as Virgil’s Aeneid and Ovid’s Metamorphoses are included. Original sources read in translation. LILE WRIT

CLAS 1120D. Myth and Origins of Science. Examinations of various explanations of the origin of the cosmos, of human beings, and human institutions, with readings from literary, philosophical, and scientific texts. What constitutes a scientific explanation and in what respects ancient science was similar to and different from our own? Authors include Hesiod, Aeschylus, Plato, Aristotle, Hippocratic medical writings and the Presocratic fragments. Read in English translation

CLAS 1120E. Slavery in the Ancient World. Examines the institution of slavery in the ancient world, from Mesopotamia and the Near East to the great slave societies of classical Greece and (especially) imperial Rome; comparison of ancient and modern slave systems; modern views of ancient slavery from Adam Smith to Hume to Marx to M.I. Finley. Readings in English

CLAS 1120G. The Idea of Self. Literature gestures us toward a certain kind of knowledge not quite psychological, not quite philosophical. We read widely in the classical and medieval traditions in order to gauge the peculiar nature of what this knowledge tells us about experience and the ways in which expressions of selfhood abide or are changed over time. Authors include Sappho, Catullus, Horace, Virgil, Lucan, Anselm, Heloise, Hildegard, Caminha Burana, Abelard. LILE WRIT

CLAS 1120H. The Invention of Literature: Literary Theory from Antiquity to the Renaissance. Literature is a recent concept. We study the prehistory of its invention in Antiquity and the Middle Ages focusing on ideas about authorship, fiction, and practices of reading. The course is based on close reading of primary texts from classical Greco-roman and medieval Byzantine, Latin, and Arabic authors. Beyond theoretical discussions, primary readings include contemporary premodern literary texts

CLAS 1120J. Essaying the Essay. This course explores the personal essay as a vehicle for self-expression. Examining self-reflective essays from a variety of cultures and time periods—ancient, modern, East, and West—we trace the theme of friends as dialectical others against whom individuals define themselves. Our investigations will lead us to a provisional definition of the essay genre, keeping in mind its unique placement between fiction and non-fiction, and its relationship with non-Western forms such as the suibì and the xiaoqin wen. First year students need instructor permission to enroll

CLAS 1120K. Skeptical Traditions East and West. The skeptical project begins and ends in doubt and the refusal to affirm any belief dogmatically. While these ideas are most frequently associated with the writings of Cicero and Sextus Empiricus, they also appear in early Buddhist and Daoist texts. The course examines several strands of skeptical philosophy as they appear in writings from ancient Greece, Rome, China, and India. It further explores literary enactments, appropriations, and critiques of skepticism evident in the skeptical revival of the European Renaissance and in Zen koans

CLAS 1120L. Archaeology of Feasting. No description available

CLAS 1120M. Plato. A close reading of Plato’s major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. Students wishing to read the texts in the original Greek should make arrangements with the instructor

CLAS 1120N. Games and Spectacles of Ancient Greece and Rome. Will examine games and spectacles of the ancient Greek and Roman worlds, from the early Olympic contests to the popular chariot races of late antiquity. By using a variety of sources, including archaeological evidence, we will explore not only the historical development of sports in the classical world, but also its ongoing political, social and cultural importance. By seeking to understand both participants and spectators, we also hope to connect the significance of games to other facets of Greco-Roman society, including women and religion. We will not only discuss the limitations of the primary sources, but also make relevant comparisons to the role of sports in contemporary society. WRIT

CLAS 1120Q. Seven Wonders of the Ancient World. Everyone has heard of the Seven Wonders of the World,” wrote Philo of Byzantium two millennia ago, and it’s still true today. But what is a “Wonder”? And why seven of them? Why make such a list anyway, then or now? This class will use ancient texts, explorers’ accounts, and archaeological investigations to travel through several thousand years of history in the Mediterranean and Near Eastern world. We will consider how the Seven Wonders captured past imaginaries; the aura of technological achievements; the intersections of history, memory, invention, and myth; and how members of one culture view another culture’s monuments. LILE

CLAS 1120R. Social Conflict and Political Factions in the Roman Republic. Traces the evolution of social conflict and political factions at Rome from the foundation to the dissolution of the Republic (CS-C1 BCE). Roman armies secured a vast empire of territory, raw materials, and manpower governed by the senate and the people of Rome itself. The influx of resources, however, destabilized Rome’s constitution and upset political power balances at the city of Rome. How did the Romans—elites and masses—compete amongst themselves for the bounty of empire abroad and confront their own internal conflicts at home? Was concord possible, or were the developments of empire inconsistent with the constitution of the Republic?

CLAS 1120T. Age of Augustus: Topography, Architecture, and Politics. Augustus Caesar boasted that he had found Rome a city in brick, but left it in marble. This course explores the transformation of Rome from an undorned village to the capital of an empire. Was Rome’s first emperor trying to fashion himself a Hellenistic monarch on the model of Alexander and his successors? Was he simply operating within republican traditions, which had been established through centuries of aristocratic competition at Rome? Our source materials will include ancient works of art and architecture, literary accounts, maps, and critical urban theory

CLAS 1140. Classical Philosophy of India. This course introduces the classical traditions of philosophy in India. After presenting a general overview of this discourse and its basic Brahmnic, Buddhist, and Jain branches, the course will examine selected traditions and themes from both the several schools concerned entirely with gaining ultimate beatitude (the Highest Good) (the schools known as Sāṃkhya, Yoga, Theravada Buddhism, Mahāyāna Buddhism, Jainism, and Vedānta) and the schools that concentrate on issues of logic, metaphysics, and language and hermenetics (Nyāya, Vaśeshika, and Pūrva Mīmāṃsā, respectively). DVPS
CLAS 1160. Classics of Indian Literature.
This course will introduce, in English translations, the most powerful examples of the literature of India. The course will introduce students to India’s unparalleled literary richness by reading selections of the best poetry, drama, and narrative literature of Indian civilization from any of its many languages (Sanskrit, Tamil, Hindi, Bengali, etc., and English), ancient and modern. DVPS

CLAS 1210. The History of Greece from Archaic Times to the Death of Alexander.
A detailed examination of the history of the Greeks-political, economic, and social-from Homer’s time to the establishment of the Hellenistic monarchies by the successors of Alexander the Great. The ancient sources are closely and critically studied (in translation)

CLAS 1220. The History of Greece from Archaic Times to The Death of Alexander.
See The History Of Greece From Archaic Times To The Death Of Alexander (CLAS1210) for course description

CLAS 1260. The Roman Reception of Greek Literature.
Reading a number of shorter poems and excerpts in both Greek and Latin, paying particular attention to how Roman writers respond to Greek examples. Readings include Catullus and Sappho, Horace and Pindar, Virgil and Theocritus, and others, with a view to the interactions of meter, genre, and language

CLAS 1310. Roman History I: The Rise and Fall of an Imperial Republic.
The social and political history of Ancient Rome from its origins to the death of Augustus in 14 CE. Focuses on the social conflicts of the early Republic; the conquest of the Mediterranea and its repercussions; the breakdown of the Republic and the establishment of monarchy. Readings emphasize ancient sources in translation. WRIT

CLAS 1320. Roman History II: The Roman Empire and Its Impact.
The social and political history of the Roman Empire (14-565 CE). Focuses on expansion, administration, and Romanization of the empire; crisis of the 3rd century; militarization of society and monarchy; the struggle between paganism and Christianity; the end of the Empire in the West. Special attention given to the role of women, slaves, law, and historiography. Ancient sources in translation

CLAS 1350. Comparative Grammar of Greek and Latin I.
An introduction to the histories of the Greek and Latin languages within the frame of their Indo-European antecedents. Addresses the sound systems of the two languages and applies our knowledge of them to a consideration of the semantics (etymology) of words in the languages. For those who know Greek and Latin well, though no specific prerequisites can be listed. Students of classics and linguistics are the main audiences addressed

CLAS 1410. Roman Religion.
Explores the religions of Rome, from the animism of King Numis to the triumph of Christianity. Topics include: concepts of religion and the sacred; sacred law; ritual space and the function of ritual; festivals; divination; magistrates and priests; the imperial cult; death and the afterlife; mystery cults; astrology and magic

CLAS 1750A. Caesar’s Failure and Augustus’ Success.
Both Caesar and Augustus reached sole power in the Roman empire by winning civil wars. Both initiated broad reform programs, but Caesar was soon assassinated, while Augustus lived for another 45 years. We will analyze their reforms and examine the causes and historical significance of Caesar’s failure and Augustus’s success

CLAS 1750B. Justice.
An inquiry into notions and definitions of justice. Plato’s Republic is the basic reading. Considers a wide variety of novels, poems, and plays as examples

CLAS 1750C. Undergraduate Seminar: Emotions.
Were the emotions of the ancient Greeks and Romans identical to our own? When a Greek felt pity, or a Roman was angry, were the causes and the manifestations the same as ours? This senior seminar examines how Greeks and Romans defined the emotions, and checks their descriptions against literary texts. One year of either Greek or Latin required

CLAS 1750D. Philosophy of Socrates.
In this class we will read and discuss various ancient portraits of Socrates (in Aristophanes’ Clouds, Plato’s Apology and Symposium, and Xenophon’s Apology) and several Platonic dialogues representing Socrates in action discussing moral questions, including the Crito, Laches, Charmides, Lesser Hippias, Protagoras, and Gorgias. We will focus on questions about the historical Socrates (as distinct from the portraits), his avowals of ignorance, irony, methods of argument, and interest in definition, as well as the moral questions explored in the dialogues. All readings will be in English translation. Enrollment limited to 20

CLAS 1750E. Writing History in the Ancient World.
The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history; investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations

CLAS 1750H. Heroes and Heroism in Graeco - Roman Antiquity and Beyond.
Examines the concept of hero, an ancient Greek word, which had a wide variety of meanings and was employed to designate a series of diverse characters of myth. We will trace the evolution of this idea through a detailed analysis of its uses in Greek and Roman texts, and also contrast its ancient sense with present day conceptions of the hero and heroism. All readings will be in English. The course is open to all undergraduates, but preference will be given to juniors and seniors. Enrollment limited to 25. WRIT

CLAS 1750I. Highways and Byways in Antiquity.
This seminar will explore the construction and development of pathways of communication and contact in the ancient (primarily Mediterranean) world. Emphasis will be placed upon major routes (highways) and the state-level powers that instituted and controlled them, but also on more modest roads and paths and the communities they promoted. The scope of the course is thus quite extensive, embracing both terrestrial and maritime roadways, and all forms of activity that took place on and along them (trade, pilgrimage, ‘strip development’, imperial postal and spy systems, ports, etc.). Some previous study of antiquity is desirable. Please note: CLAS1750I is being team-taught by Susan Alcock and John Bodel

CLAS 1750J. Ancient Revenge Dramas.
We shall study revenge tragedies composed in ancient Athens and Rome and also some composed during the Renaissance. We shall examine formal characteristics of the tragedies as well as the conceptual constellations (historical, political, social, theatrical, legal) under which they operated for the three periods; an important question will be whether and how this medium permits us to understand how law and the notion of justice operates in a given society

CLAS 1750K. Madwomen and Lovers.
Ancient Greeks and Romans were fascinated by the figure of the distressed mythological heroine, and from the Classical period onward their literature showcases women tormented by love (often for a forbidden object), but able to give voice to their desires and dilemmas. We will look at examples from different types of ancient literature (especially drama and epic), focusing on the blend of victimization and self-expression in their portrayal, and on their sometimes surprising role in the literature of love, mythology, and national history

CLAS 1750L. Erotic Desire in the Premodern Mediterranean.
Erotic desire may be a universal human phenomenon. How we explain, depict, express, or experience desire is, however, not a universal, uniform matter. The premodern Mediterranean (from roughly the fifth century BCE to the fifteenth century CE) gives us a variety of forms of sexual experience and expression. We will study the history of these forms through texts, images, and objects: from Platonic love or eros to Roman tales of romance, from Judeo-Christian mysticism to Islamic literature, from sexual diets to erotic amulets. Enrollment limited to 25

CLAS 1750M. Stage from Page: Ancient Greek Drama in Performance.
This seminar will offer students an interdisciplinary approach to ancient drama, combining the study of classics and theater with an interrogation of performance theory and historical problems of interpretation. Beginning with a crash course on the development of Greek poetry and the
practicalities of the Athenian stage, we will cover Athenian tragic production from the earliest surviving play of Aeschylus to the posthumous productions of works by Sophocles and Euripides. We will also address theoretical questions surrounding Athenian drama: problems of dramatic (re)interpretation (even in Antiquity), the concepts of re-performance and rewriting, and the importance of the festival context. Enrollment limited to 20.

CLAS 1770. Ancient Law, Society and Jurisprudence.
After a brief survey of modern legal systems (USA, common and civil law systems), we return to Athens and Rome. Topics: sources of law, its evolution, (e.g., feuding societies); procedural law (e.g., how to bring cases); legal reasoning; rhetoric; substantive law (e.g., regarding marriage, religion, homicide). Different approaches are used: historical, comparativist, anthropological, case-law study.

CLAS 1930A. Introduction to Greek and Latin Meters.
We will survey the major metrical systems of Greek and Roman verse by reading a wide range of short poems and brief extracts. The main concerns will be, first, how to scan poems correctly, and second, how to evaluate metrical and rhythmic choices. Prerequisite: GREK/LATN 0400, or demonstration of equivalent ability in Greek and Latin.

CLAS 1930B. Dying God.
The figure of the dying god (like Adonis, Osiris, or Attis), embodying both beauty and tragedy, has exerted a fascination from ancient times to the present day. His worship was sometimes central to the community, sometimes marginal, yet compelling in its "outsider" status. His myths invited meditations on love and death in various modes from comedy to epic. This course, through the great mythological texts of Greece and Rome as well as modern literature and art, will explore the figure in all its variety, along with Christian adaptations and recent interpretations. There will be writing assignments.

CLAS 1930C. Parasites and Hypocrites.
The course is a study of the many forms of toadying, groveling, feigning friendship, flattery, ass-kissing, and so on, that were such a large source of concern — and comedy — in antiquity. The anxieties over hypocrisy in a democracy and parasites in client-patron systems will be explored historically, in literary representations, and in their social, political, and economic contexts. Authors to be read include Aristophanes, Plutarch, Lucian, Plautus, Horace, and Petronius.

What was the material underpinning of Greek Society? How did the production and distribution of resources connect individuals and states on an ancient mentality and ideologies governed this exchange? New scholarly approaches and new evidence have drastically changed how we understand the ancient economy in recent decades. This course will survey key issues in the ancient economy such as Mediterranean ecology, trade, the invention of coinage, taxation, consumption, agriculture, slavery, and connectivity. In the process, we focus closely on the primary sources, in the form of literacy, archeological, numismatic, and epigraphic evidence, while also considering current scholarly methodologies and controversies.

CLAS 1970. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please check banner for the correct section number and CRN to use when registering for this course.

Introduction to standard research methods and tools in major subdisciplines of classical philology and ancient history. Required of entering graduate students. Survey of various subdisciplines in order to become familiar with field and scholarly principles.

CLAS 2010A. Mysteries Documents.
No description available.

CLAS 2010M. Problems in Old World Archaeology: The Archaeology of Empires.
They were big, they were bad, they were beautiful... Cradles of civilization, wreckers of havoc, empires rank among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as the specific and unique contributions that archaeology and art history can offer to the understanding of empire.

CLAS 2080A. Seminar: Allusion/Intertextuality/Influence.
We will study the full career of allusion (from Homer to hip-hop) to gain a sense of its origins and development, especially in antiquity and late antiquity; to understand allusion functionally, (and to measure the durability of that function across time); and to read extensively in the allusive practices of one ancient author.

CLAS 2080B. Seminar: Social Conflicts in the Roman Republic.
This seminar, open to upperclassmen with experience in Roman history, will analyze the causes, impact, and results of social conflicts in the early (the "struggle of the orders") and late Roman Republic (Tiberius Gracchus, the Catilinarian Conspiracy), and the latters' contribution to the demise of the Republic. Sources in translation.

CLAS 2080C. The Emperor Tiberius.
No description available.

CLAS 2110A. Graduate Seminar: The Book.
This seminar examines the relationship between ancient literary forms and the media in which they were presented. Specifically, it considers the connections between the ways in which ancient books were published and distributed—in papyrus rolls and bound codices, individually and in groups, privately and commercially—and the cultural conventions of reading and literary appreciation in antiquity. Chronologically the seminar focuses on the late Roman Republic and early Empire (ca. 100 BCE - 200 CE), but attention is devoted also to new papyrological evidence for the development of poetry books during the Hellenistic period. A reading knowledge of Greek and Latin is required.

CLAS 2930A. Alexandrian Poetry.
We will read extensive selections in the original languages from Hellenistic Greek poetry and Latin poetry with Hellenistic influence, with an eye to their historical and cultural context and to their intertextual dimension.

CLAS 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CLAS 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLAS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CLAS XLIST. Courses of Interest to Classics Concentrators.
Fall 2012
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Spring 2013
The following courses may be taken for concentration credit. Please see the sponsoring department for the time and location of each course.

Philosophy
PHIL 2150G Aristotle's Metaphysics

Greek

GREF 0100. Essentials of the Greek Language.
A two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

GREF 0100X. Ancient Greek Language and Culture.
This course will introduce students to Ancient Greek, more specifically the form of Greek language known as Attic Greek, which was used in Athens of the 5th and 4th centuries BCE. During a period of four weeks we will work through Book 1 of the textbook Athenaeus, focusing on grammar, vocabulary, and reading comprehension, all along situating language within the social and cultural coordinates of Ancient Greece. DVPS
GREEK 0100. Introduction to Ancient Greek.
Intensive, one-semester introduction to Greek. No previous knowledge of Greek is required

GREEK 0200. Essentials of the Greek Language.
Second half of a two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required

GREEK 0300. Introduction to Greek Literature.
Introduction to Greek literature through intensive reading. Prerequisite: GREK 0200, GREK 0110, or the equivalent. We will work on grammar skills while reading extensively in the Histories of Herodotus, who is not only the "father of history" but also a great (and delightful) artist in prose

GREEK 0310. Grammar Review and Composition.
Half-credit course with attention to student's individual needs

GREEK 0400. Introduction to Greek Literature.
Prerequisite: GREK 0300 (or the equivalent). Review of grammar of the Attic dialect through rapid reading of texts by Lysias, Plato, or Xenophon. Emphasis on syntax and style

GREEK 1010. Introduction to Greek Drama.
Both for students who have recently finished GR 30 and 40 and for those who have little or no experience of translating Greek drama. Begins with a brief review of Attic grammar with readings in Plato. Then turns to Greek drama with students reading a play of one of the dramatists and focusing on philological analysis and meters

GREEK 1050A. Aristophanes.
Addresses students with at least an intermediate-level command of Ancient Greek, but previous knowledge of Aristophanic language and poetry is not required. We will read in the original language Aristophanes' Frogs, and study different aspects (language, meter, historical background, theatrical performances, literary interpretations, etc.) of this play and of Aristophanic comedy generally. Frogs, composed towards the end of the Peloponnesian War, is one of Aristophanes' most puzzling plays. It presents a fantasy (and comic!) vision of the afterlife and, indirectly, informs us about the literary criticism of the time

GREEK 1050B. Euripides.
Introduction to the study of Athenian tragedy. Thorough translation of one drama with attention to literary analysis. Rapid survey of other Euripidean plays

GREEK 1050C. Sophocles.
An introduction to the study of Athenian tragedy. Thorough translation of one drama, with attention to literary analysis. Rapid survey of other Sophoclean plays

GREEK 1050D. Homer: iliad.
No description available

GREEK 1050E. Greek Satyr Play.
How are we to understand the dramatic genre of satyr play? Was satyr play more like tragedy, more like comedy, or entirely its own form? In this course we will read the only surviving satyr play (Euripides’ “Cyclops”), substantial fragments of lost plays (including Socrates’ “Trackers”), as well as Euripides’ “Acestis”, a play that seemed to combine elements of both the tragic and satyrinc genres. All primary texts will be read in the original Ancient Greek; those readings will also be supplemented by readings in modern scholarship. Prerequisite: GREK 0400 or equivalent

GREEK 1060. Herodotus.
What does it mean to be "the father of history?" We will read the last book of the Histories in Greek, supplemented with related texts (some in English translation), as we discuss how this illuminating, entertaining masterpiece spoke to its intended audience and to modern readers as well

GREEK 1080. Attic Orators.
No description available

GREEK 1100. Advanced Homer: The Odyssey.
It is hard to imagine a more joyful way to acquire excellent control of Homeric Greek than by reading, in its entirety (if possible), Homer’s wonderful and captivating work, the Odyssey. Though it can be a little time-consuming initially, students quickly become familiar with the syntax and the vocabulary, and find great pleasure in immersing themselves in this thrilling masterpiece

GREEK 1100B. Plato, Phaedrus.
We will read in Greek Plato's dialogue Phaedrus on love and rhetoric. We will attempt to understand the dialogue as a unified whole, discussing such questions as the link between love and the art of persuasion, Plato's denigration of writing, and the relationship between rhetoric and philosophy

GREEK 1110C. Plato: Statesman.
Reading of Plato’s Statesman in Greek and discussion of the questions: What is special about the Statesman’s expertise? How (if at all) does his expertise differ from that of the philosopher? How is the Statesman related to the philosopher-kings in Plato’s Republic? Discussion of Plato’s later philosophical method, a topic central of the Statesman

GREEK 1110D. Plato: Symposium.
Readings in Greek Plato’s Symposium, his beautiful dialogue about love and philosophy

GREEK 1110E. Greek Erotic Literature: From Plato to the Medieval.
No description available

GREEK 1110F. Poetry of Gods and Heroes.
Readings in early Greek hymns, creation myths (especially Hesiod’s Theogony), and short poems about human struggle and values

GREEK 1110G. Selections from Greek Authors: Mysteries.
We shall read documents pertaining to the Eleusinian Mysteries. In the first part of the course, we focus on orations (Andocides 6, “On the Mysteries”; Lysias 6, Against Anocides for impiety). In the second part, we read inscriptions (including ‘sacred laws’) pertaining to the Mysteries

GREEK 1110H. The Odyssey.
No description available

GREEK 1110I. Selections from Greek Authors: Thucydides.
No description available

GREEK 1110J. Plato: Theaetetus.
Theaetetus is in many ways Plato’s most modern dialogue. The central question is: what is it to know something? Is knowledge some sort of skill? Is it perception? True judgment? Some sort of account together with true judgment? We will read the dialogue in Greek and discuss Plato’s fascinating investigation of knowledge

GREEK 1110K. Early Byzantine Literature.
No description available

GREEK 1110L. Aeschylus’ Agamemnon.
No description available

GREEK 1110M. Selections from Greek Authors: Plato, Sophist.
No description available

GREEK 1110N. Menander.
Thanks to a series of remarkable discoveries over the last century, we can now read several comedies by Menander. In this course, we shall investigate the nature of New Comedy, its typical plot structures and characters, the conditions of its performance, and its relation to the Hellenistic world in which it was composed

In this class we will read Books I, II, III, and X of Aristotle’s Nichomachean Ethics and discuss his treatment of the highest human good, moral virtue, the doctrine of the mean, and his theory of action

GREEK 1110P. Sophocles.
Close reading of one tragedy by Sophocles. Rapid survey of his other works

GREEK 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances.
Survey of desire in Greek writing, with an emphasis on post-classical texts. Exploration of Platonist love, Roman Greek literature on eros, friendship in late antique and medieval rhetoric and letter-writing, erotic epigrams from Imperial to Middle Byzantine times, depictions of the erotic in hagiographical texts, and, finally, the twelfth-century revival of romantic fiction. Four semesters of Greek required
GREK 1110R. Characters and Characterization in Greek Literature.
We will read passages from a wide range of Greek literature, both verse (epic, drama, lyric, epigram) and prose (history, oratory, biography, the character sketch), as well as ancient criticism, with our attention focused on the representation of character, individuality, and self-hood, especially in relation to genre

GREK 1110S. Xenophon.
The writings of Xenophon are among the most varied of any ancient author: they include Socratic dialogues, a continuation of Thucydides’ history, the story of the march upcountry of the 10,000 Greeks stranded in Persia, a biography, a hunting manual, and the earliest surviving historical novel. All are written in an elegant and highly accessible Attic prose. We will read selections from the dialogues, the Anabasis, and some other works

In a series of notable dialogues, Plato delineated a distinction between two professions that were to define future intellectual history: philosophy and rhetoric. We will be exposed to the science of speaking juxtaposed to the art of speaking. We will study the transformations of this distinction in four exceptional contexts: Classical Athens, Imperial Rome, Late Antique Alexandria, and Medieval Constantinople. We will discuss the basics of a variety of educational curricula (Aristotle’s Academy, Second Sophistic, Neoplatonism), the social position and self-definition of ancient intellectual figures, and the ever-fluid boundaries between content and form, thought and style; ultimately, between philosophy and literature

GREK 1110U. Survey of Post-Classical Greek (2nd-12th century CE).
This course will study the development of post-classical Greek language and literature with an emphasis on three traditions—the Second Sophistic, late antique discourse (4th-5th centuries), and writing in medieval Constantinople (9th-12th centuries)—through a close reading of texts from a variety of styles, authors, and genres. The selections will be tailored to the needs of the participants. Prior knowledge of Greek (an equivalent of 2 years) is required. Prerequisite: GREK 0400 or instructor permission. Enrollment limited to 20

GREK 1110V. Greek Funeral Orations.
Survey of classical Greek funeral orations; authors to be covered include Thucydides, Plato, Demosthenes, and other fourth century prose writers. The emphasis of the course will be on Greek grammar and techniques of prose translation, though throughout the semester we will also be discussing the nature of ancient Greek commemorative discourse, particularly in classical Athens. Some background on Greek lament and other funerary genres will be provided, and short supplementary texts may range from Homeric excerpts to inscribed epitaphs. Students should have already have four semesters of ancient Greek (completion of GREK 0400) or the equivalent

GREK 1110W. Persia in the Greek Historians.
This course will explore Greek encounters with Persia in the 5th and 4th centuries. Following the epoch-making conflict between Greece and Persia, the Persian empire assumed a major place in the historical, literary, cultural, and artistic production of the Greek world. We will access this world primarily though the Greek historians, principally Xenophon, Herodotos, and Ctesias, including Herodotus’ histories, Xenophon’s Cyropaedia and Anabasis, and Ctesias’ Persika. While the focus of the course will be on reading these texts in Greek, we will also engage with modern scholarship on Persia and issues of cultural contact and exchange between these cultures. Recommended prerequisite: Three semesters of Ancient Greek

GREK 1110X. Aristotle’s Politics.
Aristotle’s Politics is a landmark in the history of political thought: the first systematic study of political life. Thinkers from Aquinas to Agamben and Foucault have taken the Politics as the foundation of their own political theories. In this course, we will read Book 1 of the Politics in its entirety, as well as selections from Books 3, 5, 7 and 8. We will address stylistic, philosophical and political questions raised by the text, as well as reflecting on larger interpretive questions

GREK 1110Z. Greek Texts in the Postclassical Tradition.
A treasure of unedited or insufficiently edited as well as untranslated or little studied Greek texts exists in the postclassical tradition (especially from the Roman period onward). The course will introduce graduate and qualified undergraduate students into this large body of later Greek literature as well as provide training in the study of manuscripts and the preparation of critical editions, translations, and commentaries. Participation in a joint publication project is possible

GREK 1140. Introduction to Greek Linguistics.
Examines changes that took place in Greek from the time of its separation from its parent language (Proto-Indo-European) to the dialects of Classical times (5th-4th C. B.C.). This course is also an introduction to the methodology of historical linguistics, concentrating on phonology. Proficiency in ancient Greek is required

GREK 1150. Greek Prose Composition.
Survey of Greek grammar and an opportunity to reflect on problems of translation. Main goals: to improve students’ command of prose syntax (both in reading and writing), and to develop a keen sensitivity towards issues of translation. A variety of texts written in Attic prose are read and analyzed in class. Students are expected to write two to three compositions a week in good Attic prose. Advanced knowledge of ancient Greek is a prerequisite for this course

GREK 1260. Plato and Aristotle.
No description available

GREK 1260A. Plato’s Protagoras.
Plato’s Protagoras is a literary and philosophical masterpiece representing a great gathering of intellectuals, including Socrates and the sophist Protagoras. The two men try to out-wit each other on such topics as political theory, literary criticism, and education. Major questions throughout the discussion are: What is the role of knowledge in a successful life, and how can we acquire knowledge that leads to success? We will read the dialogue in Greek. Prerequisite: two years of Greek (GREK 0400) or demonstrated equivalent ability

GREK 1810. Early Greek Literature.
Surveys early Greek literature. Works studied include the Iliad, Odyssey, the Hesiodic poems, and archaic lyric and elegiac poetry. Emphasis on literary interpretation, the interpretive problems inherent in the study of archaic poetry, and the poetics of oral poetry. Extensive readings in the original

GREK 1820. Fifth Century Survey.
We begin with Pindar and read poetry and prose literature composed throughout the fifth century, with attention to its historical development styles, and the intellectual ideas that drive it

GREK 1910. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

GREK 1930A. Euripides.
The plays of Euripides and related works, subject to consultation with students

GREK 1930B. Greek Epigraphy.
Practical (making and reading squeezes, identifying letters, locating inscriptions, etc.) and analytical aspects of epigraphy will be pursued. The major focus will be legal inscriptions from the Greek world

GREK 1930C. Introduction to Greek Papyrology.
During the 20th century, papyrology has become the most important source for new literary texts, with three substantial discoveries in the last decade (Simoneides, Empedokles, Poseidippos). Provides an introduction to the basic techniques of this comparatively young discipline: material evidence, decipherment, dating, interpretation, restoration, editing, etc. Focus on literary texts, but documentary papyri will also be examined

GREK 1930D. Rapid Reading in Plutarch.
No description available

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

GREK 2000A. Aristophanes.
No description available

GREK 2000B. Greek Epigraphy.
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but
also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g., regarding historical context) will be explored

Rapid reading of selections from Plutarch's Lives and from from his Moralia.

No description available

GREK 2000E. Greek Epigraphy: Literacy, Memory, and Recordkeeping.
This course examines broadly the inter-related concepts of literacy, orality, and memory and more specifically considers how the keeping of records, especially inscribed texts, both the construction and aids in our construction of those very same concepts. Students will work in epigraphical corpora of different cities, of Athens and elsewhere. Topics include: the symbiotic relationship of literacy and orality; the epigraphic habit and its relationship to democracy and oligarchy in different Greek cities; the way documents and the monuments on which they are inscribed memorialize the past; the impact of writing on social institutions, the emergence and function of archives

GREK 2020A. Sophocles.
No description available

GREK 2020B. Herodotus.
Books 3 to 5

GREK 2020C. Pindar.
No description available

GREK 2020D. Thucydides.
Books I and VIII: language, mode of thought, and methodology; how the work was composed, historical problems; supplementary sources: epigraphical, literary

GREK 2050A. Demosthenes.
No description available

GREK 2050B. Documents: Religious Cults and Sacred Laws.
In the first half of the course we shall read documents pertaining to the Eleusinian mysteries in Athens, including (a) two orations, Andocides 1 "On the Mysteries," and Lysias 6 "Against Andocides for impiety," (b) a variety of inscriptions published by Clinton (in Eleusis, The Inscriptions on Stone: Documents of the Sanctuary of the Two Goddesses and Public Documents of the Deme), and (c) the grand inscription of Adnania (ca. 92 B.C., not Eleusinian but related). In the second half of the course, we shall read inscribed sacred laws from Greece and Asia Minor, from the fifth to the first century B.C

GREK 2070B. Seminar: Hellenistic Poetry.
In this course, we will read extensive selections of Theocritus, Apollonius of Rhodes, and Callimachus, supplemented by readings in Herodas and Hellenistic epigrams. We shall investigate the nature of the Hellenistic aesthetic, the relation of Hellenistic to archaic and classical poetry, and the way Hellenistic poetry is a reflection of its time and place. Please note: GREK2070B is being team-taught by David Konstan and Pura Nieto Hernandez

GREK 2100A. Herodotus.
No description available

GREK 2100B. Making Memory: Simonides, Herodotus, and Greek Identity.
No description available

GREK 2100C. Drama and the Polis.
No description available

GREK 2100D. Ancient Literary Criticism.
Survey of ancient literary theory, with an emphasis on Greek sources. Topics to be covered include the representation of poets, the nature of inspiration, the elements of literary style, the moral and ethical uses (and dangers) of poetry, mimesis, the relationship between poetry and citizenship, literature and education, etc. We will read, in Greek, excerpts from (e.g.) Aristophanes: Frogs, Plato's writings on poetry, Aristotle's Poetics, Plutarch's How a young man should study poetry, and pseudo-Longinus' On the Sublime. Students will be evaluated on the basis of in-class presentations, two translation exams, and a seminar paper

GREK 2110A. Homer.
A close reading of the entire Odyssey, exploring all aspects of the poem, from its oral composition, language, and style to its background myths and social dimensions. Homer's text will be read in Greek, and extensive secondary sources in several languages will be used

GREK 2110B. Literary Criticism in Greek Scholia.
No description available

GREK 2110C. Plato's Republic and its Neoplatonic Reception.
A close reading of Plato's Republic together with Proclus' fifth-century CE commentary. The main focus is Plato's discussion of poetry and mimesis (books 2, 5, and 10), his appropriation of myth and dramatic technique (books 7 and 10), and Proclus' attempt at reconciling Plato with Homer, namely Plato's anti-mimetic stance with his overt theatrics and myth-making. Brings together classical writing with its post-classical readings, broaches such topics as the notion of mimesis and the reception of Plato as well as Homer in Antiquity, and introduces students to late antique allegory and what has been termed the birth of the symbol

GREK 2110D. Greek Epigraphy.
An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g., regarding historical context) will be explored

GREK 2110E. Aeschines and Demosthenes, "Crowning Speeches".

GREK 2110F. Greek Palaeography and Premodern Book Cultures.
Introduction to pre-modern Greek book culture and the study of Greek literary scripts from classical antiquity to the Renaissance. Students become acquainted with the history of books, the context and agents of their production, and the transmission of Greek (classical as well as post-classical) literature. Training is provided in reading and dating different scripts and in editing ancient texts

GREK 2110G. Political Trials: Treason and Accountability in Fourth Century Athens.
In studying trials of treason and accountability, we shall examine the democratic ideologies and political factionalism that fueled the trials and also the legal armature that rendered them possible. Our sources for the most part are speeches written by the Attic orators (Demosthenes, Aeschines, Lycourgos, Deinarchos, and Hyperides) and include impeachment trials for treason by commission of adultery, for having the wrong dream in the Amphaireon, for leaving Athens in wartime; an accountability trial for treasonous conduct while serving on an embassy; and trials (including the prosecution of Demosthenes) for accepting bribes from Alexander's agent, Harpalos

A seminar in the study of Greek manuscripts, the transmission history of texts, text criticism, and the preparation of critical editions, accompanied by translation and commentary. The course provides a unique opportunity for students (both graduates and qualified undergraduates) to conduct individual publication projects and participate in collaborative editorial and translation work. 4 semesters of Greek required

GREK 2120A. Graduate Seminar: Greek Autobiography: From Plato to the Middle Ages.
An exploration of autobiographical narratives written in Greek from classical to Byzantine times, focusing on the relation between changing notions of the self and the development of autobiography as a literary genre. Authors examined: Plato, Demosthenes, Nicolaus of Damascus, Marcus Aurelius, Aelius Aristides, Lucian, Gregory of Nazianzus, Libanius, Synesius, Michael Psellos, Michael Attaleiates, and Anna Commena

_GREK 2150. Plato's Theaetetus._
See PHIL 2150I for course description

_GREK 2970. Preliminary Exam Preparation._
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination
Grek 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required

Grek 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Latin

Latin 0100. Essentials of the Latin Language.
An intensive two-semester approach to Latin with special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required

Latin 0110. Introduction to Latin.
Intensive, one-semester introduction to Latin. No previous knowledge of Latin is required

Latin 0200. Essentials of the Latin Language.
Second course in an intensive two-semester approach to Latin. Special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required

Latin 0300. Introduction to Latin Literature.
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: Latin 0100, 0200 or 0110 (or equivalent)

Latin 0310. Grammar Review and Composition.
Half-credit course with attention to student's individual needs

Latin 0400. Introduction to Latin Literature.
Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: Latin 0100, 0200 or 0110 (or equivalent)

Latin 0510A. Latin Mystical Writing.
We read variously in Latin those authors (Cicero, Horace, Augustine, Anselm, Hildegard) who articulate the best traditions of mysticism in the West: a longing for transcendence, alienation, unity through participation with divinity and culture. Prerequisite: A knowledge of Latin at the intermediate level (one or two years)

Latin 0510B. Medieval Latin Lyric.
Open to students with two years of Latin

Latin 1010. Latin Lyric: Catullus and Horace.
Introduction to Latin lyric poetry through the poems of its finest representatives, Catullus and Horace. Emphasis placed on careful reading of the poems, which will be considered individually, as parts of a collection, and as representatives of the poetry we call lyric. The primary objective of the course is to improve students' ability to read Latin lyric poetry fluently, in terms of meter, grammar, syntax, and literary-critical appreciation. We will also read and discuss a selection of seminal articles on ancient lyric, and students will get experience (and guidance) writing scholarly criticism

Latin 1020A. De Oratore.
No description available

Latin 1020B. Cicero, Verrines.

Latin 1020C. Cicero's Republic.
As one of the only texts that articulates a "Roman" political philosophy, Cicero's De Re Publica is indispensable for students with an interest in Roman history or classical political thought. In this class, we will address the text from both these perspectives; but we will also read it as a work of literature that remakes the genre conventions of the Platonic dialogue for a Roman readership. We will also address the complex relationship between the text of De Re Publica and the troubled times in which it was written

Latin 1040A. Virgil: Eclogues and Georgics.
Virgil, most famous as the poet of the Aeneid, began his career with two smaller masterpieces: a collection of ten bucolic poems (Eclogues) modeled on the Idylls of the Hellenistic poet Theocritus, and a didactic work on agriculture in four books, the Georgics, which found its inspiration both in Hellenistic models and in more recent Roman antecedents (including Lucretius' De Rerum Natura) and is viewed by many as the poet's finest achievement. We will read selections from both works, concluding with the epyllion at the end of Georgics Four, which relates the tragic love story of Orpheus and Eurydice

Latin 1040B. Virgil: Aeneid.
Close reading of selections from all twelve books of Virgil's epic

Latin 1060A. Latin Prose: Further Readings in Roman Historiography.
No description available

Latin 1060B. Sallust.
A study of the nature and themes of Roman historical writing through reading one of its major representatives: "Catilinarian Conspiracy" and selections from Sallust's other works. Comparison with other authors writing on the same topics

Latin 1060C. Sallust and Livy.
Two major Roman historians provide a basis for study of style, intent, veracity, and stature

Latin 1060D. Sallust, Livy, and Tacitus.
Three major Roman historians provide a basis for study of style, intent, veracity, and stature

Latin 1060E. Livy.
Close readings of Livy's history of Rome, From the Foundation of the City. As we read selections from Books 1, 5, and 21, we will explore several historiographical aspects of Livy's text. We will consider both the historical tradition Livy was adapting and the influence and intrusion of the Augustan regime upon Livy's particular construction of the past. We will pay special attention to the roles played by myth, legend, and history. We will also discuss the text as literature and examine how the historian structures and crafts his work into individual books, sets of books, and a coherent multi-volume whole

Latin 1060F. Ovid.
Reading of selections from Ovid's poetry, with emphasis placed both on close reading and on the texts' engagement with poetic issues (genre and intertextuality) and with the wider political and cultural issues of Augustan Rome

Latin 1060G. Tacitus.
Will examine the literary and historical significance ofTacitus' Annales. In addition to reading the entire Annales in English, we will focus on books 1 and 4 of the Latin text, translating 6-8 pages per week (time permitting, we will also practice some sight-translations from book 14). In an effort to understand Tacitus' place in the ancient historiographical tradition, we will read several secondary sources, many of which respond to (or build on) Ronald Syme's monumental work. Not open to first year students

Latin 1060H. Caesar and Tacitus.
Caesar's account of the Gallic Wars reconstructs his conquests, defeats, and ultimate victory. We will consider the great general's aims and objectives in launching such a major military campaign and in writing a history of these endeavors. Was he simply seeking greater glory for the Roman people? After the midterm, we will turn our critical attention to the life of another Julius: Cn. Iulius Agricola, the Imperial general largely responsible for Rome's conquest of Britain. In this moral biography of his father-in-law, Tacitus mixes panegyric and invective to reveal the less savory aspects of imperialism: Rome's rapacity, corruption, greed, and despotism

Latin 1060I. Senecan Tragedy.
Close reading and thorough translation of two Senecan revenge tragedies, the Medea and Thyestes. Emphasis will be on translation of the Latin, but as time permits we will also be discussing the two plays in their mythological, cultural, historical, and performance contexts. Students should already have four semesters of Latin (Latin 0400) or the equivalent

Latin 1110A. Apuleius.
No description available

Latin 1110B. Augustine, Confessions.
We will read the Confessions in the light of Augustine's use of ancient scriptural and pagan language, attending to the ways in which diction impinges on meaning in the autobiographical portions of the work. We will also read excerpts from some of the works written prior to it as a control and on our understanding of the Confessions
LATN 1110C. Caesar: Bellum Gallicum.  
No description available.

LATN 1110D. Civil War Literature.  
Reading of Latin works that deal with the reality and experience of civil war, focusing primarily on the civil war of 49-48 B.C.E.: Caesar's Civil War, Cicero's letters of the time, Cicero's Caesarian orations, and selections from Suetonius and Lucan. Additional readings in translation.

LATN 1110E. Comedy.  
No description available.

LATN 1110F. Fortunatus.  
Wide reading in the occasional poetry of the most prolific writer of the early Middle Ages, attending to diction, meter, imagery, allusion, and paying special attention to the (homo- and hetero-) erotic pieces written to the poet’s friends.

LATN 1110G. Latin Love Elegy.  
Reading of representative selections from each of the Roman elegists: Tibullus, Propertius, and Ovid. Discussion also of the origins and development of love elegy at Rome and exploration of the themes and topos that define the genre. Follows the poets’ negotiations with various discourses and ideologies in Augustan Rome: literary, social, sexual, and political.

LATN 1110H. Literature at the Court of Charlemagne.  
We will read widely in the Latin literature of the eighth and ninth centuries, paying attention to genre, meter, patronage, and the shifting uses put to poetry in the decades in which Charlemagne ruled.

LATN 1110I. Lucretius.  
Lucretius’ De Rerum Natura, a long philosophical poem, is both a major source for Epicurean philosophical thought and an example of the ambitious Latin poetry of the late Roman Republic. We will read extensive selections from the poem in Latin. Our aim will be to make a detailed exploration of these sections through close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

LATN 1110J. Petronius.  
Close reading of Petronius’s comic masterpiece, the Satyricon, with emphasis on questions of form, narrative technique, and literary intention.

LATN 1110K. Selections from Latin Authors: Ausonius.  
We will read widely in the poetry of Ausonius, aiming for depth and breadth, but focusing especially on those poems that speak to the ways in which the poet transformed or transferred the classical Latin tradition to his successors.

LATN 1110L. Medieval Latin Lyric.  
Close reading of a representative sampling of the personal poetry of the Latin Middle Ages, paying attention to what constitutes the lyric mode in the fourth through the twelfth centuries, developments in metrics, the effects of Christianity on vision and voice, the pressures of vernacular traditions, lyric rhetoric.

LATN 1110M. Plautus.  
We shall read two or three plays of the comic genius of ancient Rome, with focus on Plautus’ language and cultural background.

LATN 1110N. Latin Comedy: Terence.  
We shall read several plays of Terence. This course is ideal for freshman who have studied Latin for three or four years in high school and who are taking their first college course and for students returning to Latin after an interval without Latin.

LATN 1110O. Roman Satire.  
Survey of the genre of Roman verse satire, with special attention to Horace and Juvenal and additional readings in Lucilius and Persius.

LATN 1110P. Lucan’s Civil War.  
We shall read closely Books 1 and 2 plus further selections from all ten books of Lucan’s epic. Focus will be on translation of the Latin as well as consideration of the poem in its literary and historical context. Neronian Rome. Topics of discussion will include Lucan’s choice and treatment of his historical subject (the Civil War between Caesar and Pompey), his use of highly rhetorical (and often gruesome) language, and his relationship with the epic tradition and, more specifically, with his most significant epic predecessor, Vergil. We shall also read the entire poem in English translation.

LATN 1110R. Catilines: Cicero and Sallust.  
Close readings of selections from Cicero’s Catilinarians and Sallust’s Bellum Catilinae. We will explore how two contemporary authors responded to the same historical event: the Catilinarian conspiracy. We will consider not only the differences of genre (political speech v. historical monograph), but also the ways in which each author’s involvement affected the content of his presentation. Additionally, we will examine Sallust’s and Cicero’s distinctive positions on Latin diction and stylistics. Prerequisite: Knowledge of elementary Latin grammar and intermediate Latin reading skills.

LATN 1110S. Catullus.  
We will read all the extant poetry of Catullus with an emphasis on close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

LATN 1110T. The Poetry of Praise.  
The art of praising powerful men and women comes into Roman poetry from Greek encomium, particularly of the Hellenistic period; it begins in the late Republic, but comes into full flower with Augustus’ consolidation of his own rule. Are we dealing with straightforward praise of rulers? With ironic or tendentious critiques? With texts that can perform both functions? We will study examples drawn from a number of Latin authors, mainly Augustan, as well as a few Greek texts in English translation. Enrollment limited to 20.

LATN 1110X. Selections from Latin Authors: Ovid, Ars Amatoria.  
This course will cover Ovid’s Ars Amatoria, Book One, as well as other selections from Ovid. Our aim will be a detailed exploration of this poetry through close reading of the Latin text and discussion of linguistic, literary, and cultural questions. Quizzes, exams, and a 7 to 10-page term paper will be required.

LATN 1110Y. Latin Epistolography (Cicero, Pliny).  
The personal correspondences of Cicero and of Pliny the Younger offer insight into the social and political workings of Rome in two critical periods: the final decades of the Republic and the decades just before the Empire reached its greatest extent. Selections from Cicero, composed for a private audience, expose the statesman’s inner hopes and anxieties regarding his family, his friends, and his state. Selections from Pliny, self-consciously published by the author himself, not only recount exciting moments in Roman history (such as the early persecution of Christians and Vesuvius’ eruption), but also play with the very genre of epistolography.

LATN 1110Z. Dying in the Republic.  
For those who witnessed the bloody violence and brutal butchering of the late Republic, death and dying were everywhere. What did these Romans believe happened to the dead? Was there an afterlife? This course explores two texts (Virgil and Cicero) that deal with visions from of and the spheres beyond the realm of the living. Discussion of supplementary material from other authors, religious studies, and material evidence further develop our notions of what it meant to die in the Republic.

LATN 1120A. Literary Culture in the Latin Middle Ages.  
This course will survey the genres relevant to the Latin Middle Ages (beast poetry, hymns, sequences, tropes, miracle and passion plays, prosimetrum) and older forms in their medieval incarnations (epic, lyric, elegy, pastoral). We will also do some work in manuscript production, including the interplay of visual and textual modes. Work in selected medieval vernaculars is possible for students so inclined. We will focus on the tenth through the thirteenth centuries.

LATN 1120B. Poetry at the End of the Roman World.  
Edward Gibbon thought the “fame of Ausonius condemned the taste of his age.” Study of the taste of Ausonius’ age, surveying Latin literature written during and after the so-called fall of Rome. Focus on some masterworks of Silver Latinity as a bridge to our period. Sampling of literature from the 4th, 5th, and 6th centuries. Authors include Prudentius, Ausonius, Paulinus of Nola, Sidonius, Avitus, and Fortunatus.

LATN 1120C. Survey of Late and Medieval Latin.  
A study of the masterworks of the Latin language written between 350 C.E. and 1300 C.E., with special emphasis on the 4th, 8th, and 12th centuries. The historical development of Latin literature; changes in Latin grammar, syntax, and morphology; innovations in genre, prosody, and stylistics; and the relationship of writings (manuscripts) to art and music.
LATN 1120D. Alcuin.
Alcuin lived a life of wide variety and accomplishment, not least as an important member of Charlemagne’s inner circle and, like many at court, he wrote widely and in multiple genres. From his enormous output this course will focus on the large collections of poetry and letters. We will attend in both gatherings to theme, tone, style, and allusivity and, where appropriate, we will provide alternate readings in a collection that has not been edited since the late nineteenth century

LATN 1150. Latin Prose Composition.
Review of the basic tenets of Latin syntax, composition, and style. English to Latin translation exercises will shore up composition skills, as we study the stylistic traits of seven Roman authors: Cato, Caesar, Cicero, Sallust, Livy, Seneca, and Tacitus. The course will proceed chronologically according to author. Class time will be spent on translation exercises and review, as well as the identification of the stylistic and syntactic characteristics of the seven authors under study

LATN 1250. Law and Literature.
No description available

LATN 1810. Survey of Republican Literature.
Our purposes in this survey of Latin literature are to acquire a comprehensive historical perspective on Latin poetry and prose until the end of the Republic and a sense of its phases and the dynamics of its tradition; and to read different styles of Latin poetry and prose with confidence and ease

LATN 1820. Survey of Roman Literature II: Empire.
This course will survey the major authors of Latin literature in chronological order from the end of the Republic and a sense of its phases and the dynamics of its tradition; and to read different styles of Latin poetry and prose with confidence and ease

LATN 1930A. Cicero: De Oratore.
Close reading of Cicero’s de Oratore

LATN 1930B. Ammianus Marcellinus.
In brilliant if idiosyncratic language, Ammianus Marcellinus, last of the major Latin historians, records the exciting and fateful events of his own times, the fourth century A.D., including therein his personal and dramatic involvement in events. We will chiefly read his famous account of the deeds of the emperor Julian (“the Apostate”). The course is intended for advanced students

LATN 1970. Special Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

LATN 2000A. Senecan Tragedy.
LATN 2010A. Catullus in Horace.
No description available

LATN 2010B. Horace’s Epistles.
No description available

LATN 2010C. Ovid, Metamorphosis.
No description available

LATN 2010D. Seminar: Roman Comedy.
We start with a couple of plays of Menander and fragments of New Comedy; we then read representative comedies of Plautus and Terence in depth

No description available

LATN 2010F. Ovid: Tristia.
Close examination of the eleven poems that comprise the first book of Ovid’s Tristia

LATN 2010G. Roman Agricultural Writers.
No description available

LATN 2010H. Varro.
Survey of the works of Rome’s greatest scholar, the polymath M. Terentius Varro, with focus on De Re Rustica, De Lingua Latina, Antiquitates, and the Menippean satires

LATN 2030B. Ammianus Marcellinus.
LATN 2030D. Epigrams.
No description available

LATN 2030G. Augustine: Confessions.
A close reading of selected books of the Confessions against the backdrop of its pagan and Christian sources. Part of the seminar will be devoted to re-constructing the readerly and writerly spaces Augustine inhabits, how those spaces impinge on his engagement of his sources, and what sort of readerly competencies the imply

LATN 2030H. Graduate Seminar: Caesar, Bellum Civile.
No description available

LATN 2040. Seminar: Roman Literature.
No description available

LATN 2080A. Late Latin Literary Culture.
No description available

LATN 2080B. Lucan.
No description available

LATN 2080C. Late Latin Poetry.
We will read widely and quickly in a selection of poets (Prudentius, Claudian, Sidonius, etc.) but focus our work on the poetry of Fortunatus and Alcuin, paying attention especially to textual issues and the history of scholarship, such as it is, of select poems. Reading knowledge of French required. The seminar will convene for one week at the conference on late Latin poetry to be held in October 2011 on campus. Open to graduate students; advanced undergraduates may enroll with instructor permission

LATN 2080D. Late Latin Poetry.
We will read selectively in the fourth (Ausonius, Prudentius) and the sixth (Fortunatus) centuries, paying attention to the ancient Latinity informing the compositional habits of these poets, and focusing on the collective writing of a commentary on one book of Fortunatus’ collection. There will be regular reports and some guest lecturers

LATN 2090A. Elegy.
No description available

LATN 2090B. Lucretius.
In this seminar, we will read Lucretius’ De rerum natura entire, and discuss it both as a work of Epicurean philosophy and as one of the world’s greatest works of didactic poetry and a masterpiece of Latin literature. Background texts will be assigned from time to time

LATN 2090C. Ovid: Exile Poetry.
No description available

LATN 2090D. Propertius.
We will concentrate especially on the elegist’s third book, which has been viewed both as a work of closure (a farewell to the erotic themes dominant in the earlier books) and as transitional (as the poet moves toward the more overtly Callimachean stance and political themes that will characterize the fourth book). While our primary interest will be literary-critical, including especially the elegist’s engagement with his Roman contemporaries, we will also engage seriously with textual criticism, employing Heyworth’s Cynthia and the new Oxford commentary on Book 3 (in addition to the other major commentaries)

LATN 2090F. Tibullus.
No description available

LATN 2090G. Epigrams.
No description available
Modern Greek

MGRK 0100. Introduction to Modern Greek.
Designed for students with little or no prior knowledge of Modern Greek. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0100X. Modern Greek: Introduction to Language and People.
An accelerated course, taught over 4 weeks in Greece. It places equal emphasis on the acquisition of the four language skills, an understanding of language structures and grammar and insights into Modern Greek society and culture. Through various resources, students are given the opportunity to express themselves in speech and writing, listen, read and respond to different types of spoken and written language, as well as acquire an understanding of contemporary Greece and acquaint themselves with authentic cultural materials of relevance. Class time will expand to include guided and free immersion in situations encountered in daily life on the island.

MGRK 0200. Introduction to Modern Greek.
A continuation of MGRK 0100. New students may place into it, after special arrangement with the instructor. The course continues on an integrative skills approach and aims to develop language skills, within a framework of specific topics and functions. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

MGRK 0300. Intermediate Modern Greek.
Develops linguistic and cultural competence and may be taken by anyone who has completed MGRK 0200 or after consultation with the instructor and/or a placement exam. It focuses on further development of the four language skills as well as knowledge and understanding of various aspects of Greek society. It employs a variety of materials, including film, digital stories, internet based sources, music, art, and literature.

MGRK 0400. Intermediate Modern Greek.
A continuation of MGRK 0300. New students may place into it, after special arrangement with the instructor. It aims to enhance language skills within a variety of registers and themes; enable the students to master, use and understand effectively essential linguistic structures; examine a variety of expressive forms within an authentic cultural context.

MGRK 0500. Advanced Modern Greek.
May be taken by students who have completed the previous sequences or by anyone who places successfully into the course. The course places emphasis on the improvement of writing and oral skills, via presentations, collaborative projects, conversations and assignments based on topics and texts, drawn from a variety of sources and cultural forms of expression.

MGRK 0600. Advanced Modern Greek.
A continuation of MGRK 0500. Students who have not taken the previous sequence may take a placement test, after consultation with the instructor. The course aims to promote range, accuracy and fluency and enable students to develop ease and spontaneity with the language. Authentic materials drawn from a range of sources inform the content of the course and include films, literature, media, testimonies, music and internet based sources. The development of transcultural competence will be an essential component of the course.

MGRK 1910. Special Topics in Modern Greek.
No description available.

Sanskrit

SANS 0100. Elementary Sanskrit I.
This course introduces Sanskrit to students who have no prior knowledge of any language other than English. Students quickly learn to read the Devanāgarī script and study the basics of the sound-system of Sanskrit. The course rapidly surveys the basics of Sanskrit grammar while using adaptations of classical Indian myths and stories as reading exercises.

SANS 0200. Elementary Sanskrit II.
This course continues the survey of grammar and the reading exercises of SANS 100. The second half of this course reads selected passages of the Bhagavad Gītā and the beginning of the classic story of Nala and Damayantī from the Mahābhārata. Prerequisite: SANS 0100.

SANS 0300. Sanskrit Epic Narrative.
Consolidates and extends the knowledge of Sanskrit grammar introduced in first year Sanskrit; acquaints students first-hand with basic themes of ancient Indian culture, and cultivates the reading and interpretive skills necessary to read epic and closely related Sanskrit narrative with comprehension and increased fluency. Prerequisite: SANS 0200.

SANS 0400. Classical Sanskrit Story Literature.
Introduces students to the more challenging Sanskrit of classical story literature and continues to extend the knowledge of Sanskrit grammar introduced in first year Sanskrit and developed in SANS 0300, as well as present basic Indian cultural themes. Prerequisite: SANS 0300.

SANS 1020. Early Sanskrit Philosophy and Religion.
Reading in Sanskrit of selections from the Upanishads, Bhagavad Gītā, Dīnamsātras, etc. Prerequisite: SANS 0200.

SANS 1080. The Critical Episodes of the Mahābhārata.
A guided tour of the structure of the Mahābhārata, "The Great Epic of India," through the reading in Sanskrit of selected critical passages.

SANS 1100. Vedic Sanskrit.
Introduction to reading the Rīg Veda and later Vedic literature, with particular attention to the grammar of Vedic Sanskrit.

SANS 1400. The Sanskrit Grammatical Tradition.
Introduction to the Sanskrit tradition of vyākaraṇa (grammatical derivation and analysis) through reading Pāṇini’s Astādhyāyī and commentaries upon it.

SANS 1600. Sanskrit Belles Lettres.
Introduction to kāvya (classical Sanskrit belles lettres)—poetry, drama, and prose narrative—through the reading of authors of the Classical Period as well as works on aesthetics and commentaries upon them.

SANS 1800. Classical Schools of Indian Philosophy.
Introduction to the classical Brahminic darsanas (comprehensive, rationalized systems of philosophy and, or, theology dealing with Hermeneutics and Philosophy of Language, Logic, Metaphysics, and Ultimate Beatitude) and to corresponding Buddhist and Jain traditions through reading, in Sanskrit, of selected works. Prerequisite: SANS 0400.
Cognitive Neuroscience Concentration Requirements

Cognitive neuroscience is the study of higher cognitive functions in humans and their underlying neural bases. It is an integrative area of study drawing primarily from cognitive science, psychology, neuroscience, and linguistics. There are two broad directions that can be taken in this concentration - one is behavioral/experimental and the other is computational/modeling. In both, the goal is to understand the nature of cognition from a neural perspective. The standard concentration for the Sc.B. degree requires courses on the foundations, systems level, and integrative aspects of cognitive neuroscience as well as laboratory and elective courses that fit within a particular theme or category such as general cognition, vision, language or computational/modeling. Concentrators must also complete a senior seminar course or an independent research course. Students may also participate in the work of the Brown Institute for Brain Science, an interdisciplinary program that unites ninety faculty from eleven departments.

Standard Program for the Sc.B. Degree

Concentration Courses

A total of 16 courses are required for the concentration. Each student is required to pass 9 courses designed to introduce students to the foundations (5), systems level and integrative aspects (4) which uniquely define cognitive neuroscience; two laboratory courses; four elective courses; and either a senior seminar course CLPS 1900 or an independent research course. The laboratory and elective courses should fit within a particular theme or category such as general cognition, vision, language, or computational/modeling. The design of the concentration and selection of courses should be made in consultation with the faculty advisor.

Four additional courses around a particular theme.  

Primarily behavioral/experimental:

CLPS 0040 Mind and Brain: Introduction to Cognitive Neuroscience (formerly COGS 0720)
CLPS 0210 Human Thinking and Problem-Solving (formerly COGS 0480)
CLPS 0220 Making Decisions (formerly COGS 0500)
CLPS 0410 Principles of Behavioral Neuroscience (formerly PSYC 0750)
CLPS 0500 Perception and Mind (formerly COGS/PSYC 0440)
CLPS 0600 Child Development (formerly PSYC 0810)
CLPS 0800 Language and the Mind (formerly COGS 0450)
CLPS 1100 Animal Cognition (formerly PSYC 1800)
CLPS 1130 Psychology of Timing (formerly PSYC 1790)
CLPS 1140 Psychophysiology of Sleep and Dreams (formerly PSYC 1020)
CLPS 1180B Biology of Communication (formerly PSYC 1750A)
CLPS 1200 Thinking (formerly COGS 1520)
CLPS 1210 Human Memory and Learning (formerly COGS 1560)
CLPS 1220 Concepts and Categories (formerly COGS 1870)
CLPS 1230 Seminar in Decision Making (formerly COGS 1860Y)
CLPS 1240 Reasoning and Problem Solving (formerly COGS 1880)
CLPS 1241 Causal Reasoning (formerly COGS 1860C)
CLPS 1320 The Production, Perception, and Analysis of Speech (formerly COGS 1230)
CLPS 1470 Mechanisms of Motivated Decision Making
CLPS 1500 Ecological Approach to Perception and Action (formerly COGS 1380)
CLPS 1510 Human Sensory Processing (formerly PSYC 1190)
CLPS 1520 Computational Vision (formerly COGS 1200)
CLPS 1530 3D Shape Perception (formerly COGS 1860B)
CLPS 1590 Visualizing Vision (formerly COGS 1440)
CLPS 1610 Cognitive Development (formerly COGS 1180)
CLPS 1611 Cognitive Development in Infancy (formerly COGS 1620)
CLPS 1620 Developmental Cognitive Neuroscience (formerly COGS 1190)
CLPS 1650 Child Language Acquisition (formerly COGS 1430)
CLPS 1800 Language Processing (formerly COGS 1410)
CLPS 1810 Syntactic Theory and Syntactic Processing (formerly COGS 1420)
CLPS 1820 Language and the Brain (formerly COGS 1480)
CLPS 1821 Neuroimaging and Language (formerly COGS 1840B)
NEUR 0650 Biology of Hearing
NEUR 1680 Computational Neuroscience
NEUR 1740 The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders
NEUR 1930A Cognitive Neuroscience: Motor Learning
NEUR 1930B From Neurophysiology to Perception
NEUR 1930F Brain Interfaces for Humans

Primarily Computational/Modeling:

APMA 1360 Topics in Chaotic Dynamics
CLPS 1291 Computational Cognitive Science (formerly COGS 1280)
CLPS 1470 Mechanisms of Motivated Decision Making
CLPS 1492 Computational Cognitive Neuroscience (formerly COGS 1460)
CLPS 1550 The Psychology of Aversion (formerly PSYC 1520)
CSCI 1410 Introduction to Artificial Intelligence
CSCI 1430 Introduction to Computer Vision
CSCI 1460 Introduction to Computational Linguistics
CSCI 1480 Building Intelligent Robots
CSCI 1950A Computational Modeling and Algorithmic Thinking
ENGN 1220 Neuroengineering
ENGN 1610 Image Understanding
NEUR 1680 Computational Neuroscience

One senior seminar course CLPS 1900 or an independent research course.

Total Credits: 16

1 Note: Students wishing to pursue a computational/modeling track are encouraged to take APMA 1650.
2 Please note that due to enrollment limits in some lab courses, priority may be given to concentrators in that department. Students should therefore be prepared to choose from the other laboratory options.
3 May be used for only one laboratory credit
4 Normally only one elective course that is below the 1000-level may count towards the elective courses required. An appropriate (but additional) laboratory course may be used in lieu of one of the four elective courses. Appropriate Topics course offerings (not listed above) may also count as electives with the approval of the concentration advisor.
5 Students are advised to take APMA 0330 (Methods of Applied Analysis I) and APMA 0340 (Methods of Applied Analysis II) as their two supporting science courses. Note that MATH 0100 is a prerequisite for these courses. See CLPS listings (above) for other computational/modeling courses. See CLPS topics listing for other computational/modeling courses.

Honors
Students who would like to pursue a degree with honors are normally expected to have half of their grades as A (or equivalent) within the concentration and are required to satisfactorily complete a written thesis and an oral presentation.

Cognitive Science Concentration Requirements

The field of Cognitive Science uses scientific methods of experimentation, computational modeling, and brain imaging to study mental abilities such as perception, action, memory, cognition, speech, and language, as well as the development and evolution of those processes. Students must become knowledgeable in four areas of emphasis: perception, cognition, language, and cognitive neuroscience, as well as a set of methods relevant to Cognitive Science research. Students then create their own focus area of study, potentially integrating coursework from a diverse subset of fields including Anthropology, Applied Math, Education, Neuroscience, and Philosophy as well as the core disciplines present in the Cognitive, Linguistic, and Psychological Sciences Department.

The A.B. program is primarily for students interested in studying human mental processes. The Sc.B. program is designed for students who wish to develop a stronger background in Cognitive Science and a research orientation to the study of the mind.

The A.B. program requires 13 credits and is primarily for students interested in studying human mental processes. The Sc.B. program requires 18 courses and is intended for students who want to pursue an
avenue(s) of study at a deeper level. We recommend that prospective concentrators register for CLPS 0020 or one of the other core courses preferably in their first or second year.

I. Standard program for the A.B. degree: 13 courses

**Total Credits:** 13

1. Note: Students cannot use an AP Statistics course in lieu of this requirement.
2. In most cases, electives must be at the 1000-level and must show coherence and provide the concentrator with depth in one or more focus areas. Only one course below the 1000-level can be included in this list, and only with permission of the concentration advisor. Students are strongly encouraged to work out their program of electives with the concentration advisor.

At least one semester of Independent Study CLPS 1970, OR participation in a directed reading related to Cognitive Sciences (CLPS 1880) OR participation in an ISP or GISP related to Cognitive Science (subject to approval from the concentration advisor). See Section IV for more details.

A coherent program of at least four (4) additional courses in the life sciences (e.g., cognitive science, psychology, or biology), physical sciences, mathematics, and/or applied mathematics that supports the student’s area(s) of study.

### Total Credits
18

### III. Degrees with Honors

Students interested in honors under either the A.B. or Sc.B. programs should identify a faculty honors sponsor and sign up with the concentration advisor during Semester 6. Although there is no minimum grade point average to enter the program, admission to the program is limited to students who have accumulated a strong academic record and is at the discretion of the department. It is expected that honors candidates will conduct a year-long research project under the direction of a faculty sponsor in the CLPS department culminating in a written thesis and oral examination at the end of Semester 8. Students doing honors work may enroll for CLPS 1970 or CLPS 1980 for two terms.

### IV. Independent Study

Independent Study is encouraged for the A.B. degree and required for the Sc.B. degree. Students should sign up for CLPS 1970 or CLPS 1980 with a faculty advisor who is a member of the CLPS Department. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8.

Cognitive Science concentrators may use at most two credits of CLPS 1970 or CLPS 1980 towards their degree. Students in the A.B. program can use these two credits to satisfy electives. Students in the Sc.B. program must use one of these credits to satisfy the Independent Study requirement (Requirement B in Section II above), and may use the second to satisfy an elective or one of the four additional courses (Requirement C in Section II).

### V. Comments

Both the A.B. and the Sc.B. programs in Cognitive Science reflect recent national trends in the field and the breadth of the course offerings and faculty research interests at Brown. A broadly trained cognitive scientist must possess certain methodological skills, including knowledge of computational methods and research methods (statistics and laboratory techniques), which are incorporated in our skills and methodology requirement. In addition, a cognitive scientist must be conversant in the four major focus areas studied in the field: perception, cognition, languages and cognitive neuroscience. Electives ensure that concentrators have the opportunity to investigate at least one particular area in depth. Finally, the concentration provides an integrative experience to all of its concentrators through the capstone senior seminar. The program is designed to provide the flexibility for each student to design a program that will meet her/his needs and interests.

The Sc.B. program is designed for students who wish to bring a stronger background in general science and a research orientation to their study of cognitive science. Sc.B. candidates must also acquire first-hand experience in doing cognitive science research through an independent study project.

### Linguistics Concentration Requirements

The concentration in linguistics is designed both for students interested in the discipline itself and for those wishing to use their understanding of linguistic structure to pursue other disciplines. Linguists are concerned with such issues as the commonalities of human languages, why languages change, how our linguistic abilities interact with our cognitive abilities, how language is learnable, and developing formal models of linguistic structure. Fields as diverse as anthropology, legal reasoning, language pathology, technical writing and editing, and Artificial Intelligence (AI) all rely heavily upon methods and models developed in linguistics. Required courses examine linguistic theory, phonology, syntax, and semantics, while electives may focus on computational, mathematical, or

Total Credits: 10

---

1. It is recommended that students take CLPS 1310 and CLPS 1330 before higher level courses.
2. Only 2 may be below 1000-level courses. The listings here are not inclusive of the possible electives; students should consult with the concentration advisor about the appropriateness of other courses.

**Degrees with Honors (12 Courses)**

Candidates for Honors in Linguistics will take a minimum of 10 courses for the concentration which will consist of all requirements for the standard program plus 2 additional courses in Linguistics or related disciplines. One of these courses may be an independent study project upon which the thesis is based. Honors candidates should formalize their projects in consultation with their advisors by the end of Semester 6.

Although no specific grade-point average has been set for acceptance into the Honors Program, only students with a good record and an advisor willing to work with them will be allowed into the Honors Program.

**Independent Study**

Independent study is encouraged for the A.B. degree. Students should sign up for CLPS 1970 with a faculty advisor who is a member of the Department of Cognitive and Linguistic Sciences. Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8.

**Comments:**

Foreign language courses will generally not count towards the concentration requirements, except those which focus on the structure or history of the language. Students are, however, advised to gain familiarity with a foreign language, and are encouraged to take at least one course which deals with the structure of a language other than English.

It is strongly recommended that students take CLPS 1310 and CLPS 1330 before Semester 7.

**Psychology Concentration Requirements**

Psychology encompasses a range of phenomena and levels of analysis in pursuit of three goals: to deepen understanding of cognitive and neural mechanisms of sensation, perception, learning, and emotion; to probe the biological and evolutionary foundations of animal behavior; and to clarify the social perception and assessment of individuals and groups. The concentration offers an array of course options, including study in quantitative methods, laboratory techniques, and senior seminars on specialized topics. Students take upper-level courses in the fields major sub-disciplines, including perception and cognition, behavioral neuroscience, and social psychology. The concentration in Psychology prepares students for careers in clinical psychology, business, policy-related research positions, law, and education.

**Concentration Requirements**

**Introductory Psychology:** Planning a concentration and choosing elective courses requires general knowledge about the topics psychologists study. Introductory Psychology (CLPS 0010) is required for the concentration. Students may satisfy the Introductory Psychology requirement by submitting AP (score of 4 or 5) or IB (score of 5 or above) test credit or by transferring Introductory Psychology course credits from other 4-year institutions.

**Quantitative:** Because careers in Psychology and related fields require familiarity with statistics. Therefore, the Psychology concentration requires Quantitative Methods in Psychology (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. The department does not grant concentration credit for AP Statistics, regardless of score. Students who feel that CLPS 0900 is too elementary can complete APMA 1650 for concentration credit.

**Course Distribution:** Concentrators must take at least one laboratory course, which provides students with hands-on experience with research methods in a substantive area of psychology. Because the laboratory serves as the basis for independent research and is a prerequisite for the
Honors program, concentrators should plan to take their lab before their senior year. This course must be taken in CLPS. Independent study or laboratory courses in other departments will not fulfill this requirement.

**Advanced Seminar:** Both A.B. and Sc.B. concentrators are required to take one advanced limited-enrollment seminar/critical readings course. The list of approved seminars varies yearly. Contact one of the concentration advisors for details.

**AP and Transfer Credits:** Students receiving AP credit for Introductory Psychology can place out of CLPS 0010, and can enroll directly in higher-level psychology courses. AP credits are not accepted for other concentration requirements. Students transferring from another college or university, or students studying abroad or at another US institution, may receive transfer credits for other concentration requirements. Please refer to our departmental policy on applying AP and transfer credits.

The A.B. degree requires 12 courses. The Sc.B. degree requires 17 courses. (Concentrators should complete either the A.B. or Sc.B. Concentration Worksheet before meeting with their Concentration Advisor.)

An advanced seminar/critical readings course in CLPS, numbered above 1000 4

Two elective courses, with approval of the concentration advisor 5

**Total Credits:** 12

1 Or advanced placement with a score of 4 or 5, or transfer credit. If placement for CLPS0010 is granted on the basis of AP or IB test scores, then another CLPS course (at any level) must be substituted.

2 The pre-approved courses in each area are listed on the concentration worksheets. A laboratory course or seminar (indicated on the worksheet) may be used to meet the area requirement only if it is the student's second lab course or second seminar. Independent study courses cannot be used for this requirement. First year seminars outside of CLPS cannot be counted for the area requirement.

3 The workshops (http://www.brown.edu/Departments/CLPS/undergrad/psychology) include up-to-date lists of labs. Independent study courses and laboratory courses outside of CLPS cannot be used to satisfy this requirement.

4 Consult one of the concentration advisors for lists of approved courses.

5 The electives should complement the student’s main area of interest in Psychology. These courses can be taken outside of CLPS. Only courses that carry concentration credit in the home department can be used for this requirement. In addition, independent study and GISP courses will not fulfill this requirement.

Six supporting science courses should be selected from the following areas: Applied Mathematics, Biology, Chemistry, Computer Sciences, Engineering, Mathematics, Neuroscience, or Physics 5

CLPS 1980 Directed Research in Cognitive, Linguistic and Psychological Sciences (formerly PSYC 1990) 6

**Total Credits:** 17
Cognitive, Linguistic and Psychological Sciences Graduate Program

The department of Cognitive, Linguistic, and Psychological Sciences is a unique multidisciplinary department that offers Doctor of Philosophy (Ph.D.) degrees in three fields: Cognitive Science, Linguistics, and Psychology. While the department offers transitional Master’s degrees en route to the Ph.D., it does not accept applicants into non-Ph.D. programs.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/cognitive-linguistic-and-psychological-sciences

Courses
Cognitive, Linguistic and Psychological Sciences

CLPS 0010. Elementary Psychology: An Introduction to Mind and Behavior (formerly PSYC 0010).
A survey covering the roles of inherited and environmental determinants of human behavior. Topics include sensation, perception, learning, memory, motivation, emotion, neural processes, language, social development, personality assessment, obedience, interpersonal attraction, and the diagnosis, origins, and treatment of mental illness. Laboratory sections illustrate methodologies used to study these issues. Topic selection varies with instructor.
behavior. Drawing on the work of biologists, ethologists, and psychologists in the field and in the lab, we will critically evaluate the evidence that animals have minds and debate the thesis that their minds are qualitatively indistinguishable from our own. Enrollment limited to 20 first year students.

CLPS 0050F. Offaction and Human Behavior (formerly PSYC 0190C). In this first year seminar we will explore how our sense of smell is involved in a variety of psychological processes, including: emotion, learning, memory, language, and social behavior. Topics such as olfaction in health, technology and marketing will also be critically examined. Students will acquire the basics of olfactory physiology and perception-cognition through course reading, projects and discussions. Enrollment limited to 20 first year students.

CLPS 0050G. Pidgins, Creoles, and the Emergence of Language. Pidgins and creoles are language systems that arise in situations of contact between groups without a common language. Their study has informed models of language change and has inspired theorizing about the origins of language, in particular the role children play as agents of language creation and language change. In the last twenty years, however, the field has seen significant upheavals, as foundational assumptions have been challenged and in some cases overturned. This course will consider pidgins and creoles within their socio-historical context, with primary emphasis on what pidgins and creoles can tell us about language emergence and language change. Enrollment limited to 20 first year students. FYS LILE WRIT

CLPS 0050L. Art and Science of Learning. The course will emphasize normal adult learning, in comparison with learning of special populations, nonhuman animals, and computers. Topics will include perceptual learning, memorization, search, conditioning in changing environments, and motor learning. The role of types and amount of practice, motivation, and talent in the development of expertise in art, music, dance, science, sports, and games will be examined. Readings will be based on laboratory experiments and case histories of experts in a range of fields. Enrollment limited to 20 first year students. FYS

CLPS 0100. Learning and Conditioning (formerly PSYC 0900). Presents classical and contemporary approaches to the study of the prediction and control of behavior. Emphasizes theories and data derived from studies of Pavlovian conditioning and instrumental learning with nonhuman animals, but also considers implications for human behavior (e.g., drug-dependent behaviors, eating disorders, behavior modification and psychotherapy). No prerequisites.

CLPS 0110. Mechanisms of Animal Behavior (formerly PSYC 0500). An examination of physiological and evolutionary mechanisms underlying species-specific behavior in both vertebrate and invertebrate animals. Topics include: evolution and mechanisms of sensory systems, modes of locomotion, orientation and navigation, communication, and cognitive capacities of animals.

CLPS 0120. Introduction to Sleep (formerly PSYC 0550). Uses sleep as the focal point for describing complex behavioral phenomena. How is sleep measured and defined? How does sleep differ across species? What accounts for the timing of sleep? How does sleep change with age? What are the behavioral, physiological, and cognitive concomitants of different states of sleep? How can dreaming be understood? What can go wrong with sleep? Recommended prerequisite: CLPS 0010, CLPS 0020 or NEUR 0010; or an AP course in psychology or physiology.

CLPS 0200. Human Cognition (formerly COGS 0420). Introduction to theoretical issues and empirical findings motivating controversies in human cognition. Basic issues in cognition - including attention, memory, categorization, reasoning, decision making and problem solving will be examined. Emphasis will be on experimental methods and formal theories.

CLPS 0210. Human Thinking and Problem-Solving (formerly COGS 0480). An inter-disciplinary introduction to adult human thinking and reasoning. Covers logical thinking, computational models, reasoning and the scientific method, creativity, intelligence, visual thinking, problem solving in a group setting, and methods of teaching “thinking skills.” Students will learn about research findings on these topics and will practice methods for improving their own skills.

CLPS 0220. Making Decisions (formerly COGS 0500). Life is full of decisions. Some decisions are made rationally, others could be improved. This course considers the psychology of human decision-making, the analysis of optimal decision-making, and implications for individual action and social policy. Topics include: chance and preference (e.g., how do consumers weigh attributes when making purchases?); the value of information (e.g., when should physicians order expensive diagnostic tests?); risky choice (e.g., is it rational to play the lottery?).

CLPS 0330. The Grammar of English. English probably has greater international utility and importance today than any other human language. This no-prerequisite course takes seriously the idea that we should be able to describe its structure accurately. Challenging two hundred years of myths and mistakes, it attempts to offer students a rigorous basis for understanding sentence structure. Enrollment limited to 40.

CLPS 0400. Brain Damage and the Mind (formerly PSYC 0470). Brain damage in human subjects can produce dramatic and highly selective impairments in cognitive functioning. This course provides an overview of the major neuropsychological disorders of perception, language, memory, thought, and action. Emphasizes the development of human information processing models for understanding the cognitive deficits observed in brain-damaged patients and the implications of neuropsychological findings for models of normal cognition.

CLPS 0410. Principles of Behavioral Neuroscience (formerly PSYC 0750). A lecture course that covers the bodily systems that underlie motivated behavior. Topics include the autonomic nervous system, drugs and behavior, hormones and behavior, reproductive physiology/behavior, homeostasis, biological rhythms, emotions and stress, the neurobiology of mental disorders, and biological perspectives on learning and memory. Does not cover synaptic transmission or sensory processing and perception. Prerequisite: background in psychology, neuroscience, or linguistic/cognitive science including an introductory course (CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010).

CLPS 0500. Perception and Mind (formerly COGS/PSYC 0440). How do the mind and the brain take physical energy such as light or sound and convert it into our perception of the world? This course examines the behavioral and biological bases of human and animal perceptual systems, including vision, audition, smell, taste, and touch. Particular emphasis is placed on high-level perception and how it relates to other cognitive systems.

CLPS 0510. Perception, Illusion, and the Visual Arts (formerly COGS 0110). Visual art can be viewed as an exploration of perceptual questions. This course considers the representation of space and time in painting and film from the viewpoint of the science of visual perception. Topics include Renaissance linear perspective, picture perception across cultures, color, form, shape, abstraction, how film editing constructs events, and why Godzilla looks phony. Slide lectures and visual exercises.

CLPS 0530. Making Visual Illusions. Visual illusions are vivid examples of the mistakes our visual systems make. This interdisciplinary course is designed for art and science students with interests in visual perception to explore how and why visual processing sometimes fails. Course work will include hands-on laboratory experiments and art construction exercises. Topics will include color, brightness, and geometric illusions. Enrollment limited to 15. LILE WRIT

CLPS 0600. Child Development (formerly PSYC 0810). Children’s behavior and development from infancy through adolescence. Major topics include learning, perception, parent-child attachment, language, intelligence, motivation, emotional development, and peer relations. Major developmental theories, including psychoanalytic, ethological, social learning, and cognitive, are considered as organizers of these phenomena and as a source of testable hypotheses.

CLPS 0610. Children’s Thinking: The Nature of Cognitive Development (formerly COGS 0630). An examination of children’s thinking and cognitive development from infancy to middle childhood. Considers a range of topics including...
memory, reasoning, categorization, perception, and children's understanding of concepts such as space, time, number, mind, and biology. Major theories of cognitive development are described and evaluated in light of the available psychological data. LILE

CLPS 0640. Developmental Psychopathology (formerly PSYC 0940).
A comprehensive introduction to child and adolescent psychological disorders. Focuses on risk, vulnerability, and protective factors in order to probe why some children develop significant psychological problems when others do not. Emphasis on how biological, psychological, and sociocultural factors interactively contribute to the development of psychopathology. Examines effective treatments, as well as educational and social policy implications. Prerequisite: CLPS 0100, 0200, or 0600

CLPS 0700. Social Psychology (formerly PSYC 0210).
Examines the theories, findings, and methods of social psychology. Topics include: social cognition (person perception, attitudes), social influence (cultural sources of attitudes, conformity), and social relations (aggression, altruism, prejudice). Students become better informed consumers of empirical research and acquire a new framework for interpreting social behavior. Applications to historic and current events

CLPS 0701. Personality (formerly PSYC 0300).
A survey of the major perspectives (psychoanalytic, behavioral, humanistic, etc.) within theories of personality. Particular emphasis is placed on the integration of research and theory

CLPS 0800. Language and the Mind (formerly COGS 0450).
Explores fundamental issues in psycholinguistics: what is the nature of language; what are its biological underpinnings; how does the mind process speech, recognize words, parse sentences, comprehend discourse; what do effects of brain injuries on language reveal about the organization of language in the mind? Syntheses of results from multiple modes of analysis – linguistic, psychological, computational, and neurophysiological – are emphasized

CLPS 0810. The Biology and Evolution of Language (formerly COGS 0320).
Human language is made possible by specialized anatomy and brains that can regulate speech production, complex syntax, and acquiring and using thousands of words. This course examines Darwin’s theory of evolution and the archaeological and fossil records of human evolution; studies of chimpanzee communication, culture, and language which provide insights on human evolution; the physiology of human speech; and recent studies of the brain bases of human language and thought

CLPS 0900. Quantitative Methods in Psychology (formerly COGS/ PSYC 0900).
A survey of statistical methods used in the behavioral sciences. Topics include: graphical data description, probability theory, confidence intervals, principles of hypothesis testing, analysis of variance, correlation, and regression, and techniques for categorical data. Emphasizes application of statistical methods to empirical data

CLPS 1080A. Intentionality (formerly COGS 1860R).
The purpose of this seminar course is to familiarize students with the topic of "theory of mind" - how we understand other’s mental states. In particular, we will focus on how children develop an understanding of others intentions and beliefs. While the majority of the reading will be in developmental psychology, cognitive, social, clinical and comparative literatures will also be examined

CLPS 1080C. Evolution of the Brain Bases of Creativity (formerly COGS 1860Z).
Humans share virtually all of our genes with chimpanzees, yet you are reading this sentence on a device that no chimpanzee could have made. For that matter, your grandparents would have been baffled had they encountered email. Creativity - the drive to think of new concepts, new ways of doing things, and new things - marks us. In this vein, we will read and discuss the findings of new studies that are exploring the neural bases and evolution of human creativity. We will also consider the alternative, that we are ruled by genes that evolved more than 50,000 years ago. Enrollment limited to 40

This advanced laboratory course will cover research design issues geared for students interested in the Psychology Honors Research program but is open to others. Methods covered will include observation, experimentation, interview, questionnaire, rate scales, content analysis, and case study. Students will design and conduct research projects, give oral presentations, and prepare written reports. Prerequisites: CLPS 0100 (PSYC 0100) and CLPS 0900 (PSYC/COGS 0900). Enrollment limited to 25

CLPS 1092. Psychological Theory (formerly PSYC 1070).
An examination of types of explanations used in psychology, with an emphasis on quantitative models of perception, learning, and motivation. Students implement models on a computer and compare theoretical predictions to observed facts. No previous experience with computers assumed; students will learn to implement and develop theories based upon spreadsheets

CLPS 1100. Animal Cognition (formerly PSYC 1800).
A seminar focusing on the experimental analysis of animal mental processes such as perception, attention, learning, memory, and decision-making. Some specific topics include navigation, visual search, working memory, time perception and memory, song learning in birds, and concept formation. Prerequisite: advanced lab

CLPS 1110. Behavior Modification (formerly PSYC 1700).
Examines basic principles of learning theory as applied to the development and change of human behavior. Topics include: experimental design in clinical research, addictive behavior, fear and anxiety reduction, cognitive behavior modification, self management, child behavior modification, and clinical therapy. Prerequisites: CLPS 0701 (PSYC 0300) or CLPS 1700 (PSYC 1330). Enrollment limited to 50

CLPS 1120. Physiological Psychology (formerly PSYC 1870).
Research articles focusing on the neural regulation of behavior are discussed, with an emphasis on experimentation in animal models. Topics vary from year to year but may include the neural and molecular mechanisms regulating social behaviors, the mechanisms and site of action of drugs of abuse, development of neural systems, sensory information processing and genetic analysis of behavior. Prerequisites: CLPS 0410 (PSYC 0750) or NEUR 0010. Enrollment limited to 25

CLPS 1130. Psychology of Timing (formerly PSYC 1790).
Topics include temporal perception, memory, and preferences; cognitive, biological, and quantitative theories of timing; biological rhythms; pharmacological influences on time perception and timed performance; altered timing in abnormal states; and timing in sports and music. Enrollment limited to 20

CLPS 1140. Psychophysiology of Sleep and Dreams (formerly PSYC 1020).
Overview of sleep, biological timing, dreaming, and sleep disorders. Topics include physiology of NREM and REM sleep, circadian rhythms, developmental, ecological, and evolutionary perspectives. The uses of experimental studies of daytime sleepiness, development and phylogeny, dreaming, and sleep functions. Biological bases and behavioral concomitants of sleep disorders are assessed. Prerequisites: CLPS 0100 (PSYC 0100) and NEUR 0010, or CLPS 1110 (PSYC 0500), or other background in NREM science or physiology. Students who have taken CLPS 0120 (PSYC 0550) should not take this course. Not open to Freshmen or Sophomores

CLPS 1180A. Canine Behavior (formerly PSYC 1750B).
Topics include canine perception, cognition, vocalization and social behavior. The behavior of wolves and other wild canids is also explored to facilitate our understanding of the domestic dog. This is an advanced seminar for concentrators in Psychology. It is also intended for anyone interested in animal behavior, especially Biology and Neuroscience concentrations. Prerequisites: CLPS 0050E (PSYC 0190A), CLPS 1191 (PSYC 1450), or BIOL 0450. Not open to first year students

CLPS 1180B. Biology of Communication (formerly PSYC 1750A).
The study of animal communication systems from mechanistic, developmental, ecological, and evolutionary perspectives. The uses of auditory, chemical, and visual cues for mediating intraspecific communication in both vertebrate and invertebrate animals. Recommended prerequisites: CLPS 0110 (PSYC 0500), CLPS 1192 (PSYC 1200), BIOL 0450, or equivalent

CLPS 1190. Techniques in Physiological Psychology (formerly PSYC 1030).
Laboratory course in behavioral neuroscience for advanced students of psychology or neuroscience. The goal is to gain "hands on" research
experience with a variety of behavioral assays used to assess the effects of genetic mutations on behavior. Over the course of the semester, students will examine the behavioral phenotype of three mouse models of human disease and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 (PSYC 0750) or NEUR 0010, and CLPS 0900 (PSYC/COGS 0090).

CLPS 1191. Animal Behavior Laboratory (formerly PSYC 1450). This course is designed for students with a serious interest in animal behavior research. Topics include methods in lab and field research, enrichment programs for captive species and conditioning procedures for managing zoos and shelter animals. Prerequisite: CLPS 0900 (COGS/ PSYC 0090). Enrollment limited to 12; not open to first year students.

CLPS 1192. Experimental Analysis of Animal Behavior and Cognition (formerly PSYC 1200). A laboratory course on the prediction, control, and explanation of the behavior of animals in simple environments. Prerequisite: CLPS 0900 (PSYC/COGS 0090).

CLPS 1193. Laboratory in Genes and Behavior (formerly PSYC 1040). Laboratory course in behavioral neuroscience designed to provide research experience in assessing effects of genetic alterations on behavior. Students examine the behavioral phenotype of a mouse model of human disease. Mice are tested on behavioral batteries to assess, for example cognitive, affective, and sensorimotor behavior. Recent classes tested models of early life stress, Fragile X Mental Retardation, and Alzheimer’s Disease. Students will test the mice, analyze the data, and prepare a manuscript suitable for publication in a scientific journal. Prerequisites: CLPS 0410 or NEUR 0010, and CLPS 0900, or instructor permission. Enrollment limited to 16; not open to first-year students. WRIT

CLPS 1194. Sleep and Chronobiology Research (formerly PSYC 1060). Part of a summer immersion in behavioral science research in human sleep and chronobiology. Instruction in human sleep and circadian rhythms, research techniques in basic physiology, laboratory skills, ethics of research, and basic CPR. Research seminars explore other techniques and career paths. Recommended prerequisite: CLPS 0100 (PSYC 0010) is preferred; NEUR 0010 is also acceptable. Enrollment limited to 15. Course open only to students admitted to the Sleep and Chronobiology Research Apprenticeship. Must apply here: www.sleepforscience.org/academic/apprenticeship.php (http://www.sleepforscience.org/academic/apprenticeship.php)

CLPS 1194 has a commitment from May 30-August 25, 2011

CLPS 1200. Thinking (formerly COGS 1520). An investigation of conceptual structure, judgment, and inferential processes. The focus is on the relation between empirical evidence, theories, and models of cognitive process and structure. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1210. Human Memory and Learning (formerly COGS 1560). How does human memory work and why are some things easier to learn and remember than others? This course covers experimental and behavioral studies of human memory including long- and short-term memory for text, pictures, spatial information, and autobiographical events. Emphasis on real-world situations, including education, in which memory and learning play a role. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1211. Human and Machine Learning (formerly COGS 1680). How is human memory like a search engine? Is human knowledge like the internet? What can artificial intelligence and machine learning tell us about the mind? This seminar explores parallels between human cognition and contemporary research in computer science, emphasizing common problems. In addition to the above, topics include simplicity, randomness, coincidences, and causality

CLPS 1220. Concepts and Categories (formerly COGS 1870). Our knowledge of the world is organized into concepts and categories. What is the basis of this organization? What information is used to make category judgments? How do children acquire concepts and categories? How are our concepts related to the language we speak? This course will examine these questions from an interdisciplinary perspective, combining relevant work in cognitive and developmental psychology, philosophy, linguistics, and computational modeling. Recommended prerequisite: CLPS 0200 (COGS 0420).

CLPS 1230. Seminar in Decision Making (formerly COGS 1860Y). No description available

CLPS 1240. Reasoning and Problem Solving (formerly COGS 1880). How do people reason about informal events in everyday life and more formal subject domains? What are the fallacies that people endorse and how can they be avoided? What are some strategies for developing critical reasoning skills? A presentation of theories of human reasoning and problem solving and their applications to educational practice. Prerequisite: CLPS 0200 (COGS 0420).

CLPS 1241. Causal Reasoning (formerly COGS 1880C). This seminar will concern the principles and processes by which people learn causal knowledge and engage in causal inference, including prediction, explanation, and counterfactual reasoning. Some emphasis will be on probabilistic models of causal inference and on the development of causal reasoning in young children. Enrollment limited to 20 juniors, seniors, and graduate students.

CLPS 1280A. Moral Reasoning (formerly COGS 1860C). A review of research on how people make moral judgments. We will discuss and attempt to integrate diverse perspectives and research on cognition, action, and emotion from cognitive science, cognitive neuroscience, and philosophy.

CLPS 1280F. Dual Systems in Human Cognition. Distinctions between cognitive systems that support different kinds of processing have been proposed to explain how people reason and make decisions. The most common distinction is between systems that support what correspond at least roughly to deliberation and intuition. In this seminar, we will weigh the evidence for and against this kind of dual processing proposal. We will focus on how the systems interact as well as the role of affect and emotion in the two kinds of processing and how to represent the distinction computationally. Evidence will come from behavioral studies and cognitive neuroscience. Implications for cognitive science, philosophy, and social policy will be discussed. Enrollment limited to 20 juniors and seniors.

CLPS 1290. Laboratory in Cognitive Processes (formerly COGS 1530). Presents the experimental way of thinking by pursuing several topics in an interactive computer-based laboratory. Students run experiments as a class and, by the end of the course, run their own experiment. Focus is on experimental design, procedure, analysis, and reporting. Topics include attention, visual imagery, memory, and reasoning. Prerequisite: CLPS 0900 (COGS/PSYC 0090), and either CLPS 0200 (COGS 0420) or CLPS 0600 (COGS 0440); or permission of the instructor.

CLPS 1291. Computational Cognitive Science (formerly COGS 1280). A detailed introduction to computational modeling of cognition, summarizing traditional approaches and providing experience with state-of-the-art methods. Covers pattern recognition approaches, shallow and hierarchical networks including Bayesian probabilistic models, and illustrates how they have been applied in several key areas in cognitive science, including visual perception and attention, object and face recognition, learning and memory as well as decision-making and reasoning. Focuses on modeling simple laboratory tasks from cognitive psychology. Connections to contemporary research in computer science will be emphasized highlighting how computational models may motivate the development of new hypothesis for experiment design in cognitive psychology.

CLPS 1310. Introduction to Phonological Theory (formerly COGS 1210). Examines some of the classic and current issues regarding sound structure in the world’s languages and introduces the theoretical tools needed to solve them. After a brief introduction to articulatory phonetics and phonemic analysis, it focuses on phonological analysis of different languages, discussing segmental phonology, syllable structure, autosegmental representations, stress systems, and prosodic word structure. Implications for language learning and language change are discussed. Prerequisite: CLPS 0030 (COGS 0410).
CLPS 1341. Lexical Semantics (formerly COGS 1120).

An introduction to a variety of issues in linguistic semantics and in the related philosophical literature. Topics include: the nature of semantic representations; the relationship between meaning and the world; truth-conditionality; "logical" semantics; word meaning; the interaction of semantics and pragmatics; presupposition; the interaction of semantics with syntax.

CLPS 1342. Formal Semantics (formerly COGS 1130).

Model-theoretic approaches to the study of the semantics of natural languages. Develops the tools necessary for an understanding of "classical" formal semantics (the lambda calculus, intensional logic; Montague's treatment of quantification, etc.); then applies these tools to the analysis of natural language semantics; and finally turns to recent developments in formal semantic theory. Prerequisite: some familiarity with syntax or semantics or basic set theory and logic.

CLPS 1350. Introduction to Mathematical Linguistics (formerly COGS 1720).

Introduction to basic concepts and goals of mathematical linguistics with emphasis on implications for theories of natural languages. Investigates the properties of regular, context-free, and context-sensitive languages; categorial grammar and combinators and the properties of natural language in light of the results on formal grammars. Recommended prerequisite: CLPS 0300 (COGS 0410) and/or a background in basic theory and logic; familiarity with syntax is recommended.

CLPS 1381. Topics in Phonetics and Phonology: Intonational Phonology.

This course is an in-depth study of intonation—the manipulation of pitch and length to signify sentence-level meaning—in English as well as in other languages. This course will have two components, which will overlap considerably. In the laboratory skills component, you will learn how to collect, transcribe, measure, and analyze intonational data in Praat (a program for acoustic analysis), while in the theoretical component, you will read and test the claims of various theories of intonation. With these skills, you will conduct independent research over the course of the semester. The course will also cover the interface between intonation and syntax/semantics, including the realization of focus in prosody.

CLPS 1382. Sounds of the World’s Languages.

This course will introduce you to phonetics: the study of the physical aspects of speech. You will learn how to produce, perceive, describe, and transcribe the sounds of the world’s languages. You will learn the fundamentals of acoustic and articulatory phonetics to better understand the properties of and mechanisms behind each speech sound. You will also gain practical skills in recording and measuring acoustic data, transcribing data in the International Phonetic Alphabet (IPA), and producing both familiar and foreign sounds in isolation as well as in real and hypothetical words. Prerequisite: CLPS 0300 or equivalent.

CLPS 1383A. The Boundary of Semantics and Pragmatics.

This course will examine some recent controversies regarding the question of just what is accounted for by grammatical apparatus as opposed to what can be accounted for by "Gricean" pragmatics (i.e., inferences that listeners draw that are not encoded in the grammar). Particular attention will be paid to topics surrounding negation, including the distribution of "Negative Polarity Items". Prerequisite: CLPS 1330, 1340, or 1341. Enrollment limited to 40.

CLPS 1385. Topics in Language Acquisition: Language Acquisition and Cognitive Development.

What is the relationship between how we think and how we speak? This course explores the concurrent development of children’s linguistic and cognitive abilities. Topics include the relationship between word meanings and concepts, the structure of the mental lexicon, pragmatic development, and the Whorfian hypothesis (whether speakers of different languages think differently). Students will read and discuss empirical and theoretical articles, and complete a set of writing assignments and problem sets. Prerequisite: CLPS 0610 or equivalent, or permission of the instructor. Appropriate for students interested in developmental/cognitive psychology, linguistics, and applied fields such as speech-language pathology.

CLPS 1387. Topics in Neurolinguistics.

No description available.

CLPS 1389. Topics in Language Processing (formerly COGS 1840).

Over the last two decades psychologists have converged on a generally accepted framework for describing how humans process language at the sentence level. Much less is understood, however, about processing at the discourse level, where multiple sentences are understood to form a coherent whole. In this course we take an in-depth look at the question of discourse processing. We begin with a review of early models of discourse and narrative structure, turning next to findings from the sentence processing literature which implicate discourse structure. We consider both behavioral and neuro-imaging data in a critical analysis of past and current theories.

CLPS 1400. The Neural Bases of Cognition (formerly PSYC 1880).

Research using animal models has informed and guided many of the recent advances in our understanding of the brain mechanisms underlying cognition. This seminar course will address topics related to animal models of human cognition. Students learn about how different aspects of the neural bases of cognition are modeled in animals by reviewing the primary research literature. The course is divided into three sections, each addressing one animal model in one cognitive domain. Selected papers will emphasize learning, memory, and attention, but may also address other aspects of cognition, for example decision-making, or cognitive impairment associated with neuropathology or aging. Prerequisite: CLPS 0400 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 1190 (PSYC 1200), CLPS 1191 (PSYC 1450), CLPS 1192 (PSYC 1200), or NEUR 1600; or instructor permission. Enrollment limited to 20. Not open to first year students.

How do we make decisions? This course considers the factors and mechanisms involved in motivated decision making, as informed by cognitive, neuroscientific, and computational modeling approaches. Readings will span a range of populations (e.g., healthy adults, adults with acquired brain damage, monkeys) and methods (e.g., behavioral, genetic, pharmacological and neuroimaging studies, electrophysiological recordings). Computational models will be prominently featured as a means for formalizing decision making theories across multiple levels of analysis, some focusing on high-level cognitive computations and others on neural mechanisms. Prerequisite: CLPS 0101, 0040, 1291, 1400, 1491, 1492, or NEUR 0010. Enrollment limited to 20. Not open to first year students.

CLPS 1480A. Cognitive Neuroscience of Emotion (formerly PSYC 1880).

Topics discussed in this course include: visual attention, awareness, emotional perception, and emotional memory. Classes will be structured around the discussion of current papers in the literature. Active participation in class is required, including the presentation of papers from the literature. Enrollment limited to 20.
CLPS 1480B. Cognitive Aging and Dementia (formerly PSYC 1830). This seminar examines the cognitive changes associated with normal aging and age-related dementia (e.g., Alzheimer’s Disease). Topics covered will include changes in the neurocognitive systems mediating memory, perception, and attention. The course is primarily intended as an advanced seminar for junior and senior concentrators in Psychology, but is also intended for other students interested in aging and the neuropsychology of cognition. Recommended prerequisite: An introductory course in cognitive neuroscience (CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470)) or permission of the instructor. Preference will be given to senior concentrators in Psychology and related areas. Enrollment limited to 20

CLPS 1480C. Cognitive Control Functions of the Prefrontal Cortex. No description available

CLPS 1480D. Cognitive Neuropsychiatry. Will provide a broad survey of the field of cognitive neuropsychiatry. The approach taken is based upon the knowledge of brain-behavior-cognition relationship and allows explaining psychiatric phenomena in terms of deficits in normal cognitive mechanisms, as well as drawing conclusions about normal cognitive functioning based on patterns of impaired and intact cognition observed in clinical populations. Topics surveyed include delusions, hallucinations, social-emotional symptoms of schizophrenia, thought and language disorders, conversion disorder, obsessive-compulsive disorder, bipolar disorder, major depression, Parkinson’s and Alzheimer’s Disease. Recommended prerequisite: CLPS 0040 or 0400, or instructor permission. Enrollment limited to 25 juniors, seniors and graduate students concentrating in Cognitive, Linguistic and Psychological Sciences. WRIT

CLPS 1490. Functional Magnetic Resonance Imaging: Theory and Practice (formerly PSYC 1840). This course will train students in the practice and use of functional magnetic resonance imaging (fMRI) as a cognitive neuroscience methodology. Topics covered include MRI physics, the physiological basis of the BOLD signal, experimental design, data collection, statistical analysis, and inference. A practical component of the course includes the opportunity to collect and analyze fMRI data at the Brown MRF. Prerequisites: CLPS 0040 (COGS 0720), CLPS 0400 (PSYC 0470), or NEUR 0010; and CLPS 0900 (PSYC/COGS 0090), or instructor permission. Enrollment limited to 20

CLPS 1491. Neural Modeling Laboratory (formerly COGS 1020). Numerical simulations of cognitively oriented nervous system models. Discussion of parallel, distributed, associative models: construction, simulation, implications, and use. Prerequisites: MATH 0090, 0100, or NEUR 0010; and CLPS 0900 (PSYC/COGS 0090), or instructor permission. Enrollment limited to 20

CLPS 1492. Computational Cognitive Neuroscience (formerly COGS 1460). We explore neural network models that bridge the gap between biology and cognition. Begins with basic biological and computational properties of individual neurons and networks of neurons. Examines specialized functions of various brain systems (e.g., parietal cortex, frontal cortex, hippocampus, ganglia) and their involvement in various phenomena, including perception, attention, memory, language and higher-level cognition. Includes a lab component in which students get hands on experience with graphical neural network software, allowing deeper appreciation for how these systems work. Prerequisites: CLPS 0020 (COGS 0010) or CLPS 0200 (COGS 0420); and CLPS 0410 (PSYC 0750) or NEUR 0010

CLPS 1500. Ecological Approach to Perception and Action (formerly COGS 1380). The ecological approach treats perceiving and acting as activities of agent-environment system rather than an isolated "mind," and offers an alternative to the prevailing computational/representational view. Topics include inferential and direct perception, perception of the 3D environment, visual control of action, dynamics of motor coordination, and self-organization of behavior. Lecture and discussion. Prerequisite (any one of the following): CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), CLPS 0500 (COGS/PSYC 0440), or CLPS 0510 (COGS 0110)

CLPS 1510. Human Sensory Processing (formerly PSYC 1190). A combination of lecture and laboratory introducing modern empirical methods of studying human perception. Uses the perception of sounds as examples. Lectures develop the theoretical bases for understanding hearing while laboratories demonstrate particular auditory phenomena. Throughout, stresses the relationship of overt sensory phenomena to their underlying neural bases. Recommended prerequisite: CLPS 0010 (PSYC 0010) or NEUR 0010. Students seeking permission must sign up in the psychology department office (Hunter 273)

CLPS 1520. Computational Vision (formerly COGS 1200). A detailed introduction to computational models of biological and machine vision summarizing traditional approaches and providing experience with state-of-the-art methods. Topics include low-level vision (color, motion, depth and texture), segmentation, face, object and scene recognition. Connections to contemporary research in computer vision and computational neuroscience will be emphasized highlighting how computational models may motivate the development of new hypothesis for experiment design in cognitive psychology

CLPS 1530. 3D Shape Perception (formerly COGS 1860B). Our ability to move in the environment, recognize and grasp objects, depends enormously on the capacity that the brain has in organizing the visual stimulation in the perceived 3D layout. 3D objects in the world project on the human retina flat images. How does the brain re-transform these flat images into a 3D representation? Enrollment limited to 40

CLPS 1540. Human Factors (formerly COGS 1160). The application of knowledge of human characteristics to the design of equipment, facilities, and environments for human use. Research on attention, perception, learning, and decision making will be applied to problems in various areas including: aviation, highway safety, industrial safety, consumer products, human-computer interaction, and aging. Enrollment limited to 25

CLPS 1550. The Psychology of Aversion (formerly PSYC 1520). Explores what is aversive to us and why. In particular, the ways in which sensory preception (e.g., smell, taste, vision), cognition, culture, personal experience and neurobiology mediate our avoidance responses will be analyzed. The purpose of avoidance from an evolutionary perspective and how the emotion of disgust is uniquely human will be a theme throughout the course. Topics will range from neuropsychological disorders to our social behavior and morality. Additionally, why we are attracted to stimuli that “should” inspire avoidance (e.g., horror movies, roller coaster rides) will be examined. Students will acquire a broad knowledge of the psychology of aversion through course readings, discussions, projects and active participation. In addition to presentations and discussion, class time activities may include completing questionnaires, watching videos and assessing various sensory stimuli. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 20 students. Not open to first year students

CLPS 1580A. Visually-Guided Action and Cognitive Processes. One of the main purposes of encoding visual information is to perform visually-guided actions to directly interact with the external world. This seminar will shed light on the behavioral and underlying neural mechanisms involved in integrating perception and cognitive processes, and converting them into action. We will also explore how visual-motor behavior can provide a useful tool to study a wide range of conscious and unconscious cognitive processes including the current locus of attention, the nature of language representation, spatial representation of number, and high-level decision-making. Prerequisite: CLPS 0010 (PSYC 0010), CLPS 0020 (COGS 0010), or NEUR 0010. Enrollment limited to 40

CLPS 1590. Visualizing Vision (formerly COGS 1440). This course provides hands-on experience in studying vision using computer graphics combined with visual psychophysics. Students will gain a better understanding of how images are formed, how one employs properties of image formation in the experimental study of vision, and how the perception of complex images function in biological systems. Labs will rely on matlab and several computer graphics packages (e.g. Lightwave). Enrollment limited to 20

CLPS 1600. History and Theories of Child Development (EDUC 1710). Interested students must register for EDUC 1710 S01
CLPS 1610. Cognitive Development (formerly COGS 1180).
How do infant and preschoolers learn about the world? We will examine children’s understanding of the physical world, psychological kinds, biological entities, number, objects, and space. Students are expected to read and comment on both empirical and theoretical primary source articles, to participate in weekly discussions, and complete a set of writing assignments. Prerequisites: CLPS 0600 (PSYC0810), CLPS 0610 (COGS0630), or EDUC0800

CLPS 1611. Cognitive Development in Infancy (formerly COGS 1620).
The acquisition of knowledge during the first year of life. Special attention to the infant’s emerging concepts of space, objects, intermodal sensory connections, and speech as well as to such issues as the role of innate knowledge and the nature of the infant’s concepts and categories

CLPS 1620. Developmental Cognitive Neuroscience (formerly COGS 1190).
This course will examine fundamental topics in cognitive development from the point of view of the developing brain. Topics of interest will include developing abilities in perception, attention, action, object concepts, memory, learning, planning, language, and social cognition. Typical and atypical brain development will be considered. Prerequisite: One of CLPS 0600 (PSYC 0810), CLPS 0610 (COGS 0630), EDUC 0800, or permission of the instructor. Enrollment limited to 40

CLPS 1621. The Developing Brain (formerly PSYC 1750C).
Analysis of brain development, focusing on neural substrates of psychological processes in both animals and humans. Prerequisites: CLPS 0010 (PSYC 0010) or NEUR 0010. Not open to first year students or sophomores. Instructor permission required

CLPS 1630. Perceptual Development.
No description available.

CLPS 1640. Relationships and Human Development (formerly PSYC 1740).
Explores formation and maintenance of relationships across childhood and early adulthood, as well as their importance for the development of social-emotional competence. Topics include: early caregiver-child relationships, peer relationships emerging in the school years, relationships with significant adults outside the family, family relationships and functioning, and marital relationships. Also considers approaches to intervention, particularly with respect to peer relationships. Instructor permission required. Enrollment limited to 20 senior or graduate-level Psychology concentrators

CLPS 1650. Child Language Acquisition (formerly COGS 1430).
All normally developing children acquire language, yet there is little agreement about how this takes place. This class explores the course of language acquisition from birth to babbling and first words to the use of complex syntax, discussing philosophical, theoretical, and methodological approaches to the problem. Includes practical experience analyzing child language data. Prerequisite: CLPS 0030 (COGS 0410) or CLPS 0800 (COGS 0450), or permission of the instructor

CLPS 1670. Cross-Cultural Perspectives on Child Development (EDUC 1580).
Interested students must register for EDUC 1580 S01

CLPS 1680A. Topics in Development: Social Learning.
How do we learn from other people? If a child was raised in the absence of any social interaction, what cognitive structures would he/she have and what cognitive structures would be absent? This course will focus on what (and more importantly) how children learn from others, including concepts like language, rituals, religion, and conventions that can only be learned from others as well as concepts like biology, and psychology that can be discovered through interaction with the world, but are aided by social construction. Emphasis will also be on “selective trust” - whether we focus on the neurobiological substrates of disorder, associated cognitive impairments, and clinical symptoms. We will then focus on specific disorders include Autism, ADHD, Dyslexia, Learning Disabilities etc. Enrollment limited to 20. Prerequisite: CLPS 0040, 0600, or 0610. WRIT

CLPS 1690. Laboratory in Developmental Psychology (formerly COGS 1610).
Conceptual and methodological foundations of research design and analysis in developmental psychology, with particular reference to techniques commonly used in studying cognitive development. We will cover general principles of experimental design, measurement and assessment, and strategies of data analysis. Practical and ethical issues involved in conceiving, designing, executing, interpreting, and presenting research will be considered. Recommended prerequisites: CLPS 0610 (COGS 0630), and CLPS 0900 (COGS/PSYC 0900) or equivalent. Enrollment limited to 15

CLPS 1700. Abnormal Psychology (formerly PSYC 1330).
The study of anxiety, stress, and neurotic disorders, psychosomatic disorders, deviant social behavior, affective disorders, and schizophrenia. Considers theories of etiology (causes) and methods of therapeutic treatment, case studies, experimental research, and clinical research

CLPS 1701. Controversial Issues in Mental Health Practice (formerly PSYC 1500).
Examination of controversies involving scientific, clinical and social practices concerning mental health and illness. Topics will include: classification and diagnosis, biases in psychiatric research and practice, specific conditions (e.g., gender identity disorder, ADHD, depression), treatment issues (e.g., ECT, medicating children with psychiatric drugs), screening for mental illness in public schools, and social-legal issues (e.g., insanity defense, duty to warn, involuntary treatment). Enrollment limited to 20

CLPS 1710. Political Psychology (formerly PSYC 1730).
This seminar explores topics at the intersection of psychology and political science. Topics include political attitudes, perceptions and behaviors. The psychology of ordinary individuals, political leaders, and groups will be studied in contexts where their interests do and do not coincide. As conflicts among these agents are particularly interesting, this course will stress psychological aspects of wars, oppression, and terrorism. Enrollment limited to 20

This course explores answers to the question of what enables some individuals to escape the worst psychological consequences of extreme personal disruption caused by a range of human-made and natural disasters. It examines personal accounts, pertinent psychological research, theoretical discussions, and the creative works of catastrophe survivors. Enrollment limited to 20

CLPS 1730. Psychology in Business and Economics.
The goal of this course is to explore emerging themes at the intersection of psychological science, business, and behavioral economics. Psychologists are primarily interested in detecting limits to human rationality, whereas economics tends to proceed within the rational-actor model. In business, questions arise of how theoretical models and empirical findings related to the practice of managerial decision-making. Investigations of power and the psychological impact of money are relatively recent additions to the suite of research topics. New methodologies, such as neuro-imaging have led to advances not represented in the traditional framework of organizational psychology. Enrollment limited to 20 junior and senior Psychology concentrators

Interested students must register for EDUC 1750 S01

CLPS 1790. Personality and Clinical Assessment (formerly PSYC 1110).
Examines methods used in the study of child and adult personality, including microanalysis of social interactions, observer report, self report, test data, and life outcome data. Standardized personality assessment instruments will be examined in the context of their reliability, predictive and construct validity. Students will design research projects using these methods, collect and analyze data, give oral presentations, and prepare a written report of their research. Prerequisites: CLPS 0701 (PSYC 0300),
and CLPS 0900 (PSYC/COGS 0900) or equivalent. Enrollment limited to 27.

CLPS 1791. Laboratory in Social Cognition (formerly PSYC 1540). Examines principles of experimental design and analysis in the context of classic and contemporary research in social cognition. Students replicate and extend several studies on topics such as person perception, social stereotyping, or judgment and decision making. Students will participate in the design of these studies, gather their own data, analyze them, and report the findings in oral presentations and written reports. Prerequisites: CLPS 0010 (PSYC 0010), CLPS 0700 (PSYC 0210), and CLPS 0900 (PSYC/COGS 0900). Enrollment limited to 27.

CLPS 1800. Language Processing (formerly COGS 1410). Explores the nature of language processing with the goal of understanding how we produce and comprehend language. Topics include speech production and speech perception, lexical processing, and syntactic processing. Experimental investigations are studied in an attempt to understand the processes and mechanisms employed in the everyday use of language. Prerequisite: one of CLPS 0020 (COGS 0010), CLPS 0030 (COGS 0410), or CLPS 0800 (COGS 0450).

CLPS 1810. Syntactic Theory and Syntactic Processing (formerly COGS 1420). The interface between work in theoretical syntax and psycholinguistic research on syntactic processing. Consideration of how results in psycholinguistics support various models of human language processing. Recommended prerequisite: CLPS 1330 (COGS 1310).

CLPS 1820. Language and the Brain (formerly COGS 1480). This course will examine the neural systems underlying language processing. Major focus will be on effects of brain injury on speaking and understanding in left hemisphere-damaged patients who have aphasia, right hemisphere-damaged patients, and split-brain patients. Behavioral, electrophysiological and neuroimaging evidence will be investigated.

CLPS 1821. Neuroimaging and Language (formerly COGS 1840B). Examines neuroimaging approaches to language processing including fMRI, PET, TMS, and ERP. Consideration of the neural systems underlying speaking and understanding. Topics include neural basis of speech, lexical/semantic, and syntactic processing, mirror neurons and language, multisensory integration, meanings of words, literacy, and special populations. Recommended: either NEUR0010, CLPS 0020 (COGS0010) or CLPS 0800 (COGS0450) and one of the following: CLPS 0040 (COGS0720), CLPS 0400 (PSYC0470), CLPS 0410 (PYSC0750), CLPS 1820 (COGS1480), CLPS 1822 (COGS1500), NEUR1030, NEUR1660, or by permission.

CLPS 1822. Subcortical Brain Bases of Language and Thought (formerly COGS 1500). Recent studies indicate that the neural bases of human language and thought derive from a complex network of circuits within and connecting subcortical and cortical structures. Students prepare to evaluate published papers, noting the relationships that hold between data and theories. Relates neurophysiologic studies to current linguistic and cognitive theories and provides the background for independent research. Prerequisites: CLPS 0810 (COGS 0320), CLPS 1820 (COGS 1480), CLPS 1821 (PSYC 1100), or NEUR 0010.

CLPS 1880A. Speech Prosody (formerly COGS 1840C). The broad aim of this seminar is to discuss the various ways in which linguistic and paralinguistic meanings can be conveyed by the way that speakers produce their utterances. The topics will include the effect of pitch variation and phrasing on pragmatic meanings and discourse functions; turn-taking strategies; cue phrases and filled pauses, new-given information, or prosody of deceptive speech. Recommended prerequisite: CLPS 0030 (COGS 0410).

CLPS 1880B. Cognitive Neuroscience of Language Acquisition. The ability to acquire language is unique to humans. This course explores our language-specific biological endowments. Topics include: Genetics and evolution of language; the brain-basis of acquisition; effects of age on language learning ability; effects of environmental differences (such as growing up blind or deaf) on acquisition; and language in special populations such as autism. Students will read and discuss empirical and theoretical articles, and complete writing assignments and problem sets. Prerequisite: CLPS 0600, 0610, 0800, or EDUC 0800, or instructor permission. Enrollment limited to 20. Not open to first year students. WRIT

CLPS 1890. Laboratory in Psycholinguistics (formerly COGS 1450). An advanced course in methodological approaches to the study of psycholinguistics. Processes (e.g. with adult lexical access, sentence processing, corpus linguistics, etc.) Recommended prerequisites: CLPS 0800 (COGS 0450) and CLPS 0900 (COGS/PSYC 0900), or equivalent.

CLPS 1891. Research Methods in Physiologic and Acoustic Phonetics (formerly COGS 1240). Introduction to laboratory techniques and the analysis of data relevant to physiologic and acoustic phonetics. Emphasis on the use and interpretation of wave-form and spectrum analysis, electromyography, cineradiography, high-speed motion pictures, computer modeling of oral tract output, and experimental techniques involving the perception of synthetic and natural speech.

CLPS 1900. Senior Seminar in Cognitive Science (formerly COGS 1950). Examines general philosophical and theoretical issues that cut across cognitive science. Each student writes a substantial paper on a topic in cognitive science. Required of cognitive science concentration students. Enrollment limited to concentrators in the 7th semester or beyond, and, by permission, to others who have significant course background in cognitive science.

CLPS 1970. Directed Reading in Cognitive, Linguistic and Psychological Sciences (formerly COGS 1980). Independent study or directed research in cognitive science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 1980. Directed Research in Cognitive, Linguistic and Psychological Sciences (formerly PSYC 1940). Required of all ScB concentrators and Honors students in psychology. Instructor permission required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CLPS 2000. Graduate Proseminar (formerly COGS 2000). Introduces students to the CLPS Department and the University; provides a brief history of the disciplines, philosophical foundations, and ethical treatment of human subjects; provides professional training, such as preparation of CV and research statement, practice in grant writing, and foundations in scientific writing and presentation; and supports students’ early stages of developing a first-year project.

CLPS 2001. Graduate Proseminar II. No description available. Open to graduate students only.

CLPS 2091. Graduate First Year Project Research (formerly PSYC 2000). Please check Banner for the correct section number and CRN to use when registering for this course.

CLPS 2092. Graduate First Year Project Research (formerly PSYC 2010). Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2095. Practicum in Teaching (formerly COGS/PSYC 2050). Each student will assist a designated faculty member in teaching a course in cognitive science or related discipline. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

CLPS 2096. Directed Graduate Research (formerly COGS 2980/2981, PSYC 2300). No description available. Instructor permission required.

CLPS 2100. Core Topics in Animal and Comparative Behavior (formerly PSYC 2070). No description available.

CLPS 2132. Graduate Seminar in Learning (formerly PSYC 2320). Advanced topics in animal and human learning. Topics vary from year to year; examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes.
CLPS 2180. Duration Discrimination (formerly PSYC 2320A).
No description available

CLPS 2181. Adventure Topics in Animal and Human Learning (formerly PSYC 2320B).
Topics vary from year to year, examples include theories of associative learning, animal cognition, computational models of learning and performance, and neurobiological models of basic associative processes. Open to graduate students only

CLPS 2200. Core Topics in Cognition (formerly COGS 2200A).
No description available

CLPS 2210. Current Topics in Memory Research (formerly PSYC 2270).
A graduate seminar addressing selected topics in memory, including theories of normal and pathological memory, animal models of human memory, and the neural substrates of memory. Topics vary from year to year. Permission required for undergraduates

CLPS 2400. Core Topics in the Neural Basis of Behavior (formerly PSYC 2270).
Seminar on comparative aspects of brain evolution and function, with implications for behavior. Open to graduate students only

CLPS 2410. Auditory Neuroscience.
An in-depth analysis of the neural bases of audition. Topics include development, structure and function of the inner ear; ascending and descending neural circuitry for processing of complex sounds; and physiological correlates of auditory phenomena. Prerequisite: CLPS 2400 or NEUR 2050

CLPS 2450. Exchange Scholar Program (formerly COGS 2450).

CLPS 2455. The Mind Asleep (formerly PSYC 2550).
Seminar on selected topics in sleep, incorporating the core disciplines of psychology (Behavioral Neuroscience, Sensation and Perception, Cognitive Processes, and Social). Discussion-based classes will examine sleep and affect/mood, dreaming, sleep and learning and memory, sensation/perception processes during sleep, effects of sleep deprivation and sleep disorders

CLPS 2500. Core Topics in Perception (formerly COGS 2200C, PSYC 2400).
No description available. Open to graduate students only

CLPS 2510. Graduate Seminar in Vision (formerly PSYC 2100).
Selected topics in vision, including optics of the eye, anatomy of the visual system, photobiophysics of vision, psychophysics of color, acuity, models of color vision, and light as a visual stimulus. Specific topics vary

CLPS 2700. Core Topics in Social Psychology (formerly PSYC 2200).
A survey of classic and contemporary research in social psychology, including attitude formation and change, person and self perception, stereotyping, and intergroup relations. Open to graduate students only

No description available.

CLPS 2770. Moral Psychology.
A survey of contemporary research in moral psychology. Covers various psychological mechanisms supporting moral judgment and behavior, their development, their neural basis, and models of the biological and cultural evolution of morality. Enrollment by advanced undergraduates is contingent upon permission of the instructor. Enrollment limited to 15

CLPS 2800. Core Topics in Language (formerly COGS 2200B).
No description available. Open to graduate students only

CLPS 2902. Quantitative Methods in Research (formerly PSYC 2020).
No description available.

CLPS 2906. Experimental Design (formerly PSYC 2060).
The course designed for students at the intermediate level or above and will cover t-tests, power analysis, correlation, simple and multiple linear regression, logistic regression, analysis or variance, non-parametric tests, randomization and bootstrapping, among others. Instructor permission required. Open to graduate students only

CLPS 2908. Multivariate Statistical Techniques (formerly PSYC 2080).
This course covers the basic multivariate techniques currently used in psychology and related sciences: multiple regression, logistic regression, principal components and factor analysis, multivariate analysis of variance, discriminant function analysis, and log-linear analysis. Students will learn these techniques' conceptual foundations, their proper selection for a given data set, and the interpretation of computer output from statistical analysis packages (primarily SPSS). Enrollment limited to 20 graduate students

CLPS 2910. Doing Bayesian Data Analysis.
A tutorial introduction to doing Bayesian statistics for data analysis, starting from the basics of probabilities and Bayes' theorem. Part 1 of the course will work through contemporary Monte Carlo methods in the context of simple analyses, building up to simple linear regression and Bayesian versions of single-factor ANOVA. In Part 2, null hypothesis significance testing will be contrasted with Bayesian approaches to null value assessment and Bayesian approaches to power. A variety of more complicated realistic applications will be tackled, covering Bayesian versions of multiple linear regression, logistic regression, analysis of variance, etc., including consideration of repeated measures designs. Prerequisite: CLPS 2906 or equivalent. Enrollment limited to 15

CLPS 2970. Preliminary Examination Preparation (formerly COGS/PSYC 2970).
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

CLPS 2990. Thesis Preparation (formerly COGS/PSYC 2990).
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

Linguistics

LING 0030. Introduction to Linguistic Theory (CLPS 0030).
Interested students must register for CLPS 0030 S01 (CRN 15095)

LING 0330. The Grammar of English (CLPS 0330).
Interested students must register for CLPS 0330 S01 (CRN 16080)

LING 0800. Language and the Mind (CLPS 0800).
Interested students must register for CLPS 0800 S01 (CRN 24531)

LING 0810. The Biology and Evolution of Language (CLPS 0810).
Interested students must register for CLPS 0810 S01

LING 1310. Introduction to Phonological Theory (CLPS 1310).
Interested students must register for CLPS 1310 S01

LING 1320. The Production, Perception, and Analysis of Speech (CLPS 1320).
Interested students must register for CLPS 1320 S01

LING 1330. Introduction to Syntax (CLPS 1330).
Interested students must register for CLPS 1330 S01 (CRN 24534)

LING 1340. Introduction to Semantics (CLPS 1340).
Interested students must register for CLPS 1340 S01

LING 1341. Lexical Semantics (CLPS 1341).
Interested students must register for CLPS 1341 S01 (CRN 15203)

LING 1342. Formal Semantics (CLPS 1342).
Interested students must register for CLPS 1342 S01

LING 1350. Introduction to Mathematical Linguistics (CLPS 1350).
Interested students must register for CLPS 1350 S01

LING 1381. Topics in Phonetics and Phonology: Intonation Phonology (CLPS 1381).
Interested students must register for CLPS 1381 S01 (CRN 24535)

LING 1383. Topics in Syntax and Semantics (CLPS 1383).
Interested students must register for CLPS 1383 S01

LING 1383A. The Boundary of Semantics and Pragmatics (CLPS 1383A).
Interested students must register for CLPS 1383A S01 (CRN 25237)

LING 1385. Topics in Language Acquisition (CLPS 1385).
Interested students must register for CLPS 1385 S01

LING 1387. Topics in Neurolinguistics (CLPS 1387).
Interested students must register for CLPS 1387 S01
LING 1389. Topics in Language Processing (CLPS 1389). Interested students must register for CLPS 1389 S01
LING 1650. Child Language Acquisition (CLPS 1650). Interested students must register for CLPS 1650 S01
LING 1800. Language Processing (CLPS 1800). Interested students must register for CLPS 1800 S01 (CRN 15242)
LING 1810. Syntactic Theory and Syntactic Processing (CLPS 1810). Interested students must register for CLPS 1810 S01
LING 1820. Language and the Brain (CLPS 1820). Interested students must register for CLPS 1820 S01
LING 1821. Neuroimaging and Language (CLPS 1821). Interested students must register for CLPS 1821 S01
LING 1822. Subcortical Brain Bases of Language and Thought (CLPS 1822). Interested students must register for CLPS 1822 S01
LING 1880A. Speech Prosody (CLPS 1880A). Interested students must register for CLPS 1880A S01
LING 1890. Laboratory in Psycholinguistics (CLPS 1890). Interested students must register for CLPS 1890 S01
LING 1891. Research Methods in Physiologic and Acoustic Phonetics (CLPS 1891). Interested students must register for CLPS 1891 S01

Cogut Center for the Humanities

Director
Michael P. Steinberg

Brown University has long offered a unique focus and quality in the humanities, combining the preservation of knowledge with a spirit of innovation and adventure. The humanities today include ever-vital traditional disciplines such as history, philosophy, language and literary studies, and religious studies. They also include the newer disciplines of art history, musicology, the interpretive dimensions of social sciences such as anthropology and political science, and more recently, interdisciplinary initiatives such as media studies and gender and sexuality studies.

Named for Craig M. Cogut ’75 and Deborah Cogut in recognition of their generous support, the Cogut Center for the Humanities was launched in the fall of 2003 as the Brown Humanities Center to support collaborative research among scholars in the humanities. Today, through its fellowship, grant, and distinguished visitors programs, and regularly scheduled events, the Cogut Center strives to:

• Foster innovative work in the humanities and related disciplines
• Sustain and nurture international perspectives at Brown in an era of increasing globalization
• Explore the history and effects of the rapid growth of technologies of information and visualization
• Examine the public role of the humanities in the context of recent challenges and pressures
• Enrich relations between the humanities and the studio and performing arts
• Investigate the re-emergence of pressing issues of ethics and aesthetics
• Reinvigorate the concept of critique and the role of critical theory in the humanities

The Cogut Center is poised to build on the strengths of Brown University at a moment of unique institutional distinction and growth, and at a time of particular national and global urgency. The Cogut Center is providing multiple programs to bring Brown faculty and students into regular and innovative contact with each other, as well as with national and international scholars and scholarship. In fulfilling its mission to the University and to the field of humanities, the Cogut Center supports and enhances Brown’s stellar reputation in the humanities.

For additional information please visit the Center’s website at: http://www.brown.edu/Departments/Humanities_Center/

Courses

HMAN 1200. Making Choices: Ethics at the Frontier of Global Science (UNIV 1200). Interested students must register for UNIV 1200 S01
HMAN 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture (ANTH 1305). Interested students must register for ANTH 1305 S01
HMAN 1700A. Religion, Secularization, and the International. For the past several decades (but especially since 2001), internationalists have been increasingly preoccupied by the perceived "return of religion." Religion is often proclaimed to pose the single greatest threat to a liberal legal/political order and, less often, to be the greatest hope for that order. We will explore genealogies of the three key terms at stake in this conundrum – "religion," "secularization," and "the international." We begin from the proposition that none of these terms refer to ahistorical essences, but have been subject to continual theoretical/practical contestation/reconfiguration. We focus on that contestation as it has emerged in "modernity." Enrollment limited to 20 juniors, seniors, and graduate students

HMAN 1700B. The Question of the Animal. This course is built around the question of the animal as a difficulty posed to representation and thought at a time when animals have largely disappeared from humans’ living environment, but proliferate as strange protagonists, specters or figures of ambiguity in literature and philosophy. We will consider a range of texts and films that "cast" the animal critically, that is, as a body that strains or scrambles meaning (interruption, irony, illegibility, haunting) and forces us to reconsider the work of language and narrative (indeed, of the "human"). Authors include Kafka, Coetzee, Hofmannsthal, Kofman, Chevillard, Darrieussecq, Denida, Agamben, de Fontenay, Herzog. Enrollment limited to 20 juniors and seniors

HMAN 1700C. Modern Arab Thought: The Arab Renaissance. This course introduces students to the 19th/early 20th century Arab thought - the "Nahda" (Arab Renaissance). Through primary and secondary English texts, we will explore questions raised by thinkers of this epoch pertaining to perceived civilizational crisis, and examine the diagnoses/proposals offered by them. The course underlines the changes and continuities in these concerns under the impact of dramatic socio-political events of the epoch. We will discuss the strengths/weaknesses of "Nahda" thought that continues to inform/preoccupy contemporary Arab debates on culture, democracy, gender and Islam. We will examine the significance of this legacy in today’s Arab world. Enrollment limited to 20 juniors and seniors

HMAN 1700D. Places of Healing: Memory, Miracle, and Storytelling. From antiquity to our day, therapeutic landscapes such as: mineral and thermal springs; shrines and churches built at sacred springs; volcanic and geothermal landscapes; rocky landscapes emitting odoriferous gasses; and ponds filled with medicinal leeches, attract health pilgrims who search for healing. Storytelling transformed these into places of memory and pilgrimage. This seminar investigates places of bodily healing and miracle from a cultural studies perspective. The case studies will be drawn from the Mediterranean world and Western Asia (including Lourdes in France, Hierapolis in Southeastern Turkey and the Agiasma churches of Byzantine Istanbul). Enrollment limited to 20 juniors and seniors

HMAN 1700E. The Precarious University. The intensification of student protest-occupy movements across the country particularly in California, and the proliferation of the OWS movements across the world have rejuvenated social movements against cutbacks for the people and kickbacks for the wealthy. In this seminar, we will address the epistemic shifts and intellectual costs of these ongoing upheavals, particularly the fight against the U.S. university’s neoliberalization. We will imagine the kind of progressive university that is sustainable for the arts and humanities, and how the precarious work of artists and humanists are fundamental to 21st century global universities. Enrollment limited to 20 juniors and seniors

Does pain and reflection on pain teach us something about ourselves, the world, our relation to it? This seminar approaches the question by examining the meaning of pain in Russian/Polish literature/theory of the 20th century. Our concern is with pain's resistance to language and representation. The works analyzed offer a variety of responses to problem of pain as it appears in theology, experimental medicine, discussions of materialism, the philosophy of Schopenhauer, and above all, the giants of Russian literature, Dostoevsky and Tolstoy, in whom these debates are dramatized; they also form the ground on which Russian and Polish literature meet. Enrollment limited to 20 juniors and seniors

HMAN 1970G. International Perspectives on NGOs, Public Health, and Health Care Inequalities

Non-governmental and other non-state organizations play an expanding role in the provision of health care across much of the globe. Growth and internationalization of the non-governmental sector, contraction of post-socialist and advanced industrial welfare states, and sub-contracting of state-funded services have all contributed. The seminar focuses on this expansion, critically assessing texts on NGOs and health and drawing comprehensively from sources across disciplinary and interdisciplinary boundaries. We will address issues of human welfare, political citizenship and identity, replacement and displacement of states, new forms of health care inequalities, and the self-concepts, missions, and roles of non-profit sector workers around the globe. Enrollment limited to 20 juniors and seniors

Comparison, which posits a likeness between the dissimilar, is always profoundly haunted by the question of its ground and judgment. This seminar will examine the comparative logic of capitalist modernity in the works of Marx, Weber, Adorno and Horkheimer, Foucault, Heidegger, and Benjamin. We will ask the following questions: How is equivalence established between nonequivalent objects? How are actual social relations quantified and measured, and is there an ethics to modern forms of comparability? How does language reflect and produce these operations? Or, to put it differently: What are the forms through which difference "haunts" us? We will pay special attention to figures of the double and the ghost in Hoffmann and Freud. Other topics to be covered include rationalization and the disenchantment of the world, the modern uncanny, "mediauras," colonial comparison, and the ethics of incommensurability

What happens when a particular "orthodoxy" becomes able to impose itself on others? This course examines the imposition of post-Constantinian catholicism on Jews, Samaritans, other Christians (Arians, Miaphysites, etc.) and the remaining ancient Mediterranean populace (4th-7th centuries) to consider a larger cultural phenomenon. We'll draw on ancient authors and legal sources (in translation), archaeological data, and contemporary studies. Half the course entails communal exploration of the late antique Mediterranean. Student research presentations, including studies of comparable situations from other cultural and historical contexts, comprise the second half. Useful prior coursework includes: RELS 400, RELS 410, CLAS 600, CLAS 660, CLAS 1320. Enrollment limited to 20 juniors and seniors

HMAN 1970J. Miniature: An Introduction to Cognitive Cultural Studies

Why do we take pleasure in small-scale objects? What is their history and what purposes do they serve? How do the technology and the aesthetics of the small contribute to human cognition? To find answers to these and other questions, the seminar explores the cultural, literary and cognitive significance of miniatures. We will explore productive relationships between three areas of research: imaginative texts produced during the eighteenth century, the period’s prolific but insufficiently studied production of small-scale versions of everyday objects, and recent developments in cognitive theory about the role of size-perception in the developing brain. Enrollment limited to 20 juniors and seniors

In an arguably "post-secular" age, conflicts over the relationship between religion and law have again moved to the forefront of international debate. In our multicultural and globalized world, such conflicts often provoke contestation over the very possibility of universal definitions of either "religion" or "law," let alone their proper relationship. Our interdisciplinary inquiries on these questions will include concrete legal disputes in domestic and international courts; theoretical debates over the construction of "religion" in fields such as anthropology, religious studies, and philosophy; and historiographical controversies about the relationship between "secularization" and sovereignty, particularly in light of the legacy of colonialism. Enrollment limited to 20 juniors and seniors

Modern aesthetics emerged in the eighteenth century at the intersection of different disciplines, discourses, cultures, and European nations. Contributors to the new field came not only from academic philosophy but also from the arts, literature, history, theology, and other fields. Aesthetics was thus and remains primary among interdisciplinary disciplines. Readings for this course will be drawn from British, German, and French authors such as Shaftesbury, Du Bos, Addison, Hutcheson, Hume, Burke, Kames, Diderot, Mendelssohn, Lessing, Kant, Schiller, and Herder. Enrollment limited to 25 freshmen and seniors

Doomsday predictions/apocalyptic themes have become commonplace. Between "End of History" theses/Mayan Calendar predictions/posthumanist theories/the Rapture, and environmental/financial collapse, it seems we are living in what many believe to be End Times. This course will examine some principal clusters of ideas around finality: posthumanism/singularity, environmental collapse, patriarch survivalism, and post-politics. We will look at a number of cultural products: traditional fiction/non-fiction, blogs/podcasts/films. It will be less important to establish whether the Mayan calendar calculations are accurate than seeing the connections between those claims and the claims of survivalists/Rapture theorists. Taken together, what do all these claims say about this moment in history? Enrollment limited to 25 freshmen and seniors

HMAN 1970N. The Israeli-Palestinian Conflict in the Global Scene.

Dominant narratives of Israeli/Palestinian conflict obscure influential forces taking place outside the boundaries of Israel/Palestine, stories we believe are unique/historically peculiar. We will see how groups have been inspired by/have inspired both peoples’ struggles for survival/self-determination. We examine case studies revealing connectivity/reciprocity: Zionism’s inspiration for Garvey’s U.S.-back-to-Africa movement; adoption of Fanonian/Maoist/Guevarian thought in Middle East; Black Panther Party’s support for Palestinians/tueir enforcement of an Israeli Black Panther Party in the 1970s; South Africa/Latin America’s economic/military ties to Israel; Palestinian call for international Boycott Divestment Sanctions; and examine how struggles for self-determination negotiate between seeking territorially bounded independence/globally networked liberation, in the region/beyond. Enrollment limited to 20 juniors and seniors

HMAN 1970O. Testimonies as Historical Documents: Interethnic Relations at a Time of Genocide.

Though the bulk of the testimonies in question will be by perpetrators, and the Polish and Ukrainian inhabitants of the same region, we believe are unique/historically peculiar. We will see how groups have been inspired by/have inspired both peoples’ struggles for survival/self-determination. Our concern is with pain's resistance to language and representation. The works analyzed offer a variety of responses to problem of pain as it appears in theology, experimental medicine, discussions of materialism, the philosophy of Schopenhauer, and above all, the giants of Russian literature, Dostoevsky and Tolstoy, in whom these debates are dramatized; they also form the ground on which Russian and Polish literature meet. Enrollment limited to 20 juniors and seniors

This course studies how Spain’s exploration and conquest of the Americas tested European understandings of the natural world; of nature’s bearing on human psycho-physiology and, thereby, on culture; and of the balance between politics, the philosophy of Science in the natural and human domains. Topics range from changing theories about the distribution of land and life around the globe to "natural" and "moral" histories implicated in a
debate over Spain’s rights to the Americas and its peoples. We also consider current reassessments of Spain’s contribution to the acquisition of natural and ethnographic knowledge in the early phases of the Scientific Revolution. Enrollment limited to 20. Not open to first year students or sophomores

**HMAN 1970Q. Muzak, Art, and Society.**
This seminar will weave together a history of muzak and a history of minimalist music, considering both in relation to the development of performance arts (with an emphasis on the work and philosophy of John Cage). The course aims to examine and analyze the intersections and conflicts between art and muzak in terms of modern social engineering. Questions to be addressed include, notably: the regulation of collective and individual conduct; the design of coercive or emancipatory environments; the transition from disciplinary society to society of control.

**HMAN 1970R. Literature and the Arts in Today’s Cuba.**
Cuba today is home to writers, musicians and artists who engage with new media and a global audience against the backdrop of a socialist revolution. This seminar will exploreesthetic and political dimensions of contemporary Cuban culture with authors who will speak to us directly through a video link with Casa de las Américas in Havana. Knowledge of Spanish required.

**HMAN 1970S. Ethics and the Humanities.**
This seminar will engage with ethical issues in a broad range of humanities disciplines. We will survey historical and thematic perspectives on ethics, and will consider the ethical implications of authorship and possession of texts and objects; translation as an ethical problem; data and open access; the perspective of the human subject; public humanities, public intellectuals and community-based research; and ethical issues in popular culture. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970T. Music, New Media, and Virtual Performance.**
We’ll investigate how new media technologies shape musical practices (and vice versa). Topics will include DJ cultures, digital music distribution and related intellectual property issues, digital gameplay, music videos, popular music reception, online music lessons, and virtual communities. We’ll give equal attention to production, circulation, and reception practices, as well as to their increasing convergence. Readings will include both contemporary and historical studies. The course will require critical engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media production and consumption practices. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970U. Botanic Verses: Plants, People, and Words that Bind Them.**
This course considers how language mediates between plants and people. It's organized around key themes: discourses about diversity; regimes of naming; "multispecies ethnographies" and environmental crises; colonialism and botanical migrations; "biopiracy" and indigenous knowledge; controversies over plants used in medicinal settings; the commercialization and marketing of hallucinogenic plants; and critiques of modern food production, including the "locavore movement" and opposition to genetically modified foods. The course will draw from a wide range of sources – scholarly, popular, literary, cinematic, and cyber – and we'll use them to illuminate both explicit and hidden facets of how language shapes plant-people relations. Enrollment limited to 20 juniors and seniors.

**HMAN 1970V. Pragmatic Medical Humanities.**
The question, "What is medical humanities?" has flummoxed the very experts who ardently argue for its importance to medical education and the professional and personal growth of health care providers. The interdisciplinary nature of medical humanities, engaging in conversations with persons who possess different expertise, knowledge and approaches, provides opportunities for insight unavailable elsewhere. Students will investigate alternative meanings, interpretations and purposes embedded in the term "medical humanities." They will develop their own personal relationship to this term/field of study, and its utility as a tool for understanding and responding to the profound experiences of clinical medicine, illness and health. Enrollment limited to 20. Not open to first year students or sophomores. This is a half-credit course.

**HMAN 1970W. Medicine and Colonialism in the Atlantic World: A View from the South.**
This seminar examines the role of disease, medicine, and health in the history of the Atlantic World. Our analysis will be centered on events that took place in Latin America, the Caribbean, and Sub-Saharan Africa, during the era of European colonial expansion (1490-1940). In these four and a half centuries, the West became the dominant force in global geopolitics and Western medicine emerged as the hegemonic form of health worldwide. This seminar explores the complex relationship between these two historical developments. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Y. Politics and Authority in Islamic Law and Society.**
Few courses offer insight into the genesis of Islamic political theory in light of the social and historical circumstances of the medieval period. This seminar seeks to address major trends in political thought of classical Islam. In addition to reading secondary scholarship on social and political aspects of early Muslim societies, we will also examine primary sources in translation (Prolegomenon, Book of Ordinances); literary genres, including official state epistles from the medieval period; and the work of Ibn Taymiyya. Finally we will address issues of authority, ethics and gender in contemporary analyses. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Z. Knowledge Networks and Information Economies in the Early Modern Period.**
This course is designed to introduce students to major topics in the developing historical literature on the relationships between intellectual and economic history, and their implications for European culture, mainly in the first two centuries after Columbus and Da Gama. Enrollment limited to 20 juniors and seniors.

**HMAN 2970A. Accounting for Silence: Anthropology of Law and Narrativity.**
Explores the role of law in redressing the past, specifically in cases of postwar compensation for the Second World War. We look at the convergence of two processes, the breaking of long-held silence by victims through various forms of testimony inside and outside the courtroom, and the legal process of redress. Cases for this course arise primarily from the Japanese use of wartime slave labor in East Asia. Since the 1990s, large number of Chinese and Korean war victims, such as former forced laborers and the so-called "comfort women" to name but a few, have filed lawsuits against the Japanese government and corporations. In the process, they give voice to their long silenced, traumatic experiences. Through anthropological approaches to law and testimonial practices, we shall examine such questions as: what kind of legal space is created through compensation lawsuits; what kind of "performance" is produced both inside and outside the courtroom; what kinds of power dynamics underlie the recounting of testimony; and, what does it mean to account for silence in pursuit of the politics of redress? Even though the course draws examples primarily from East Asia, students are encouraged to pursue their own choice of cases elsewhere in their final paper project. Limited to 20 graduate students.

**HMAN 2970B. And What About the Human?**
This course will think about the question posed by radical anti-colonial thought: and what about the Human? Through the writings of Foucault, Arendt, Heidegger, Fanon, Wynter and Cesaire, as well as the novels of Lamming and Vera, we will examine the meaning of the "death of Man" in contemporary critical thought and theory, and the ways in which western anti-humanism thought claims to replace the figure of the human with discourse and language, while also contrasting the ways in which radical anti-colonial thought has constructed the figure of the human. Enrollment limited to 20.

**HMAN 2970C. Concepts of Space and Time in Media Discourses.**
No description available. Enrollment limited to 20 graduate students.

**HMAN 2970D. Biological Issues in Cultural Theory.**
Contemporary culture is increasingly preoccupied by biological themes and issues—genomes, brain images, biotechnology, the natural environment, etc.—and, not unrelatedly, by a wave of new biological determinisms: "gay genes," "God genes," mental "hardwiring," etc. At the same time, ongoing work in fields such as developmental biology, ethology, neuroscience and science studies increasingly challenges classic dualisms of nature/culture and mind/body along with traditional.
assumptions about the nature of biological entities and the operations of scientific knowledge. The seminar will focus on a selection of these issues and developments especially relevant to the interests of humanities scholars and students of culture and cultural theory. Enrollment limited to 20 graduate students

HMAN 2970E. Pain, Medicine and Society.
We take on the big question of pain as an interdisciplinary enterprise, drawing on the rich and varied faculty of Brown University and Alpert Medical School. We will examine acute/chronic/physical/psychic pain, the nature of suffering, and why some might find value in place in pain and suffering. We will examine representations of pain in literature, art and music; look at the shifting conceptions of pain and suffering across cultural/ethnic/religious communities, and the actual/perceived barriers to effective treatment of pain. Most importantly, we will foster sensitivity and impart tools that will improve our understanding and treatment of individuals suffering from pain. Enrollment limited to 20 students in Medical Humanities and graduate Humanities fields. Honors undergraduates and PLMJs may enroll with instructor permission

HMAN 2970F. Nationalism, Colonialism, Religion, and International Law.
This seminar explores the internationalism of the past century in terms of its relationship to separatist nationalism, anti-colonialism, and religious radicalism. It takes as its point of departure the dramatic political, cultural, and intellectual transformations that followed in the wake of World War I. A guiding hypothesis of the seminar is that internationalism cannot be understood apart from its complex relationship to "identity" broadly conceived – identity of local/transnational groups as well as the identity of internationalists themselves. Readings will be drawn from law, cultural studies, politics, and postcolonial theory. Enrollment limited to 20 graduate students. Advanced juniors/seniors by permission only

HMAN 2970H. Realism, Idealism, and Modernity I: From Early Modernity through German Idealism.
Debates between realism and idealism are central to modernity. The opposition between them might seem straightforward, realism being the philosophy of the scientific worldview, idealism the philosophy of more traditional religion and morality. But sometimes idealism has been the philosophical basis for modern science and moral autonomy, and realism the basis for more traditional worldviews. The philosophical debate between realism and idealism is thus part of the larger struggle over science, religion, morality and politics in modern culture. This course will begin a two-semester study of this complex dialectic from the seventeenth to the twentieth centuries. Enrollment limited to 20

HMAN 2970I. Habits of Living: Affect and New Media.
How have we become habituated to and inhabitants of new media, and what are the effects of this voluntary and involuntary habituation? Focusing on the relationship between new media and affects—environmentally-provoked, non-conscious responses, central to the formation of individual / group perception—this course investigates new media networks as structures created through constant human and non-human actions. Enrollment limited to 20. This course is for Graduates only. Upperclass undergraduates require instructor’s permission. Students must register for the primary meeting and the film screening

Comparative Literature

Acting Chair
Susan Bernstein

Comparative literature is the study of literature and other cultural expressions across linguistic and cultural boundaries. At Brown, the Department of Comparative Literature is distinct in its conviction that literary research and instruction must be international in character. The department performs a role similar to that of the study of international relations, but works with languages and artistic traditions, so as to understand cultures "from the inside." Both the department's undergraduate and graduate programs are held to be among the finest in the country.

For additional information, please visit the department's website: http://www.brown.edu/Departments/Comparative_Literature/

Comparative Literature Concentration

Requirements

The concentration in Comparative Literature enables students to study literature in cross-cultural perspectives. The aim of the program is to encourage students to study a varied and illustrative range of literary topics rather than the total development of a single literary tradition. True to the spirit of Brown's New Curriculum, a concentration in Comparative Literature affords great academic freedom. For example: advanced courses in any literature department at Brown count for concentration credit; although English is commonly one of the languages that students apply to their Comparative Literature studies, basically any language--ancient or modern--supported at Brown may form part of a Comparative Literature concentration program. In essence, concentrators study a generous range of literary works—from Western cultures, both ancient and modern, to Chinese, Japanese, and Arabic—and develop a focused critical understanding of how cultures differ from one another. Comparative Literature differs from other literature concentrations largely through its international focus and its broad-gauged view of art and culture in which the study of languages is combined with the analysis of literature and literary theory. All students take a course in literary theory and have the opportunity to complete a senior essay.

There are three concentration tracks in Comparative Literature, as follows:

Track 1: Concentration in Comparative Literature with two languages
- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  - A. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  - B. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  - C. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
    - Antiquity
    - Middle Ages
    - Renaissance/Early Modern
    - Enlightenment
    - Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

Track 2: Concentration in Comparative Literature with three languages
- Complete prerequisites(s) for taking 1000-level courses in your two languages by Semester V (students working in non-European languages may be allowed more latitude; be sure to consult a concentration advisor about constructing an individualized plan).
- Complete the same requirement for your third language before Semester VII (the above proviso for students working in non-European languages also holds here).
- Comparative Literature 1210, Introduction to the Theory of Literature.
- TEN advanced literature courses (generally 1000-level courses), including Comparative Literature 1210 and:
  - A. At least TWO courses in the literature of each of your languages, and the remainder drawn chiefly from among the offerings of Comparative Literature and English, and other national literature departments.
  - B. ONE COURSE chiefly devoted to EACH of the three major literary genres: poetry, drama and narrative.
  - C. ONE literature course chiefly devoted to EACH OF THREE of the following five historical periods:
Track 3: Concentration in Literary Translation

- Antiquity
- Middle Ages
- Renaissance/Early Modern
- Enlightenment
- Modern. Please note that the 19th, 20th, and 21st centuries count as one period, the Modern Period.

**Courses**

**COLT 0510A. Best-sellers.**

Study of seven novels published within the last decade that have enjoyed broad success with reading publics in different places. What pleasures of thought and imagination do we derive from these books, and how can we express clearly our responses? What is the appeal of these best-sellers first to their home audience, then to readers in other social environments and cultures? How may we reshape our own horizons of thought in order to appreciate them? Students will be encouraged to develop their skills of literary analysis, interpretation, and critical discussion. Two lectures and one discussion section per week. Several short papers, quizzes, and a final exam.

**COLT 0510B. Caribbean Re-writes.**

Through close readings of canonical European texts and rewritings of them in the twentieth-century Caribbean, we explore the literary possibilities and political implications of writing the old in a new language. Readings include Columbus’s diaries alongside Carpentier’s *The Harp and the Shadow* (Cuba); Shakespeare’s *Tempest* with that of Aimé Césaire (Martinique); and Jane Eyre and *Wuthering Heights* alongside novels by Jean Rhys (Dominica) and Maryse Condamé (Guadeloupe).

**COLT 0510C. The World of Lyric Poetry.**

Lyric poetry is the prime mode for conveying emotion in many cultures, from ancient times to the present day. This course will survey the variety of forms and themes from the earliest texts from Greece, Rome, China and Japan, then the glories of the Renaissance and the Tang Dynasty, then move to the challenges for lyric expression in the modern world. Enrollment limited to 20 first-year students. FYS

**COLT 0510D. Poetry and Music.**

We will read the collaboration between poets and composers in the twentieth century. It will primarily focus on Modern Greek composers (Hadjidakis, Theodorakis, Lagios and others) and their collaboration with numerous poets (Garcia Lorca, Gatsos, Eliot, Neruda, Ritsos and others). These works will also be examined in depth from a literary and theoretical perspective. Enrollment limited to 20 first-year students. FYS

**COLT 0510F. Che Guevara, The Man and the Myths.**

We will read Guevara’s political and philosophical writings alongside the literary, visual and filmic representations that have made him one of the twentieth century’s most iconic figures and a symbol for vastly diverging interests. From a cultural studies perspective, we will compare the development of Guevara’s theories to posthumous uses of his work and image, particularly in and in relation to present-day Cuba. Enrollment limited to 20 first-year students. Instructor permission required. FYS

**COLT 0510G. “The Grand Tour; or a Room With a View”: Italy in the Imagination of Others.**

Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this “grand tour.” We will read texts (both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, as well as view films (such as “A Room With a View”): all in order to determine the ways in which Italy “means” for the cultural imagination of Western civilization. For first-year students only. FYS

**COLT 0510I. Virgil and Milton.**

We will read the *Aeneid* and *Paradise Lost* with interpretive patience. The study of fate, character, and poetry will be wedded to investigations of beauty, wonder, and nationhood. Enrollment limited to 20 first-year students. FYS

**COLT 0510J. Modern Arabic Literature.**

An introduction to the canonical and not-so-canonical texts—poetry as well as prose—of modern Arabic literature. Our study will be guided by an interrogation of each term in the course title: what does “modern” mean in the context of Arabic literary history? Is all “Arabic” literature written in Arabic, and how is this topic treated in the texts themselves? Finally, is the Arabic “adab” the same as the English “literature”? Readings by al-Muwaiylihi, Mahfouz, Habibi, Ghali, Cossery, Salih, Shammas, Darwish, Adonis, and others. DVPS

**COLT 0510K. The 1001 Nights.**

Explores the origins, performance, reception, adaptation, and translation of the 1001 Nights, one of the most beloved and influential story collections in world literature. We will spend the semester in the company of genies, princes, liars, slaves, mass murderers, orientalists, and Walt Disney, and...
will consider the Nights in the context of its various literary, artistic, and cinematic afterlives.

COLT 0610L. What is Tragedy?.
Introduction to tragedy. Readings may include Sophocles, Shakespeare, Hegel, Chekhov, Chan-wook Park, and Jia Zhangke. Enrollment limited to 20 first year students. FYS

COLT 0510M. Early Modern Selves: From Soliloquy to Self-Portraiture.
We will study the early modern self through its manifestation in the soliloquy (Shakespeare), philosophical treatise (Descartes), early modern poetry, and self-portraiture (Rembrandt). After examining Hamlet’s “To be or not to be” speech and other Shakespearean soliloquies as moments in which characters represent themselves in speech, we will turn to Descartes’ view of man’s essence as his thinking nature. We will then read metaphysical poetry to understand the influence of religion on the early modern self. Readings include Hamlet, Richard II and III, Taming of the Shrew, Discourse on Method, Meditations, and poetry by John Donne.

COLT 0610A. The Far Side of the Old World: Perspectives on Chinese Culture.
A survey of traditional Chinese culture focusing on the major literary and artistic achievements of six major periods in Chinese history, including philosophical texts, poetry, various forms of the fine arts, and vernacular fiction and drama. A broad range of primary materials will give the student greater insight and appreciation of Chinese culture in general and also provide a foundation for further study of East Asia in other disciplines.

COLT 0610C. Banned Books.
An examination of literary censorship in which we read various texts forbidden for putatively violating social, religious, and political norms in particular historical and cultural contexts. We also analyze the secondary literature surrounding the banning of these ostensibly "dangerous" texts in order to theorize questions and assumptions about the power of art and the ironies generated by these debates.

COLT 0610D. Rites of Passage.
Examines a seemingly universal theme-coming of age-by focusing on texts from disparate periods and cultures. Proposes that notions of “growing up” are profoundly inflected by issues of class, gender and race, and that the literary representation of these matters changes drastically over time. Texts from the Middle Ages to the present; authors drawn from Chrétien de Troyes, Quevedo, Prévost, Balzac, Brontë, Twain, Faulkner, Vesaas, Rhy's, Satrapi and Foer. Enrollment limited to 20 first year students. FYS.

COLT 0610E. Crisis and Identity in Mexico, 1519-1968.
Examines four moments of crisis or critical moments for the forging of Mexican identity: the Conquest, the hegemonic 17th century, the Mexican Revolution, the “Mex-hippies” of the 1960s. We especially explore how key historical, essayistic, and literary writings have dealt with Mexico’s past and present, with trauma and transformation. Excellent preparation for study in Mexico. In English. No prerequisites. WRIT.

COLT 0610G. Literature and the American Presidency.
We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a dictional source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film. Enrollment limited to 20 first year students. FYS LILE.

COLT 0610H. Renaissance Epic.
Explores Renaissance attempts to renew, parody, and question the classical epic tradition. The study of poetics, narrative, and imagination will be wedded to investigations of beauty, wonder, and nationhood. Authors will include Ariosto, Tasso, Erriella, Spenser, Camões, du Bartas, and Milton.

COLT 0610I. Introduction to Cultural Studies.
We live in a cultural saturated with information. The messages we register, the meanings we deduce, and the knowledge upon which we ground our actions and choices require critical examination if we are to engage as thoughtful actors in our personal and civic lives. This class will encourage students to reflect on their initial impressions of and reactions to various media and will give them critical tools to examine how formal and thematic strategies work to shape and elicit our sympathies, our desires, our fears, and our beliefs. Focusing primarily on visual and written texts drawn from popular culture—video, print, film, and Web sources—students will practice their analytical skills by evaluating these texts in classroom discussions, several short writing assignments, and one longer essay. Reading the work of several cultural theorists, students will learn to analyze persuasive argumentation through an attention to rhetorical and framing devices and to recognize and decipher visual cues, enabling them to interpret texts and images and to produce coherent critical positions of their own. This class will prepare participants for college courses that require them to process knowledge and not simply acquire information.

COLT 0610J. Holocaust Literature (JUDS 0390).
Interested students must register for JUDS 0390 S01.

Interested students must register for MCM 0901A S01.

Examines the narrative of detection, beginning with the great dramatic whodunit (and mystery of identity) Oedipus Rex. Literary texts which follow a trail of knowledge, whether to establish a fact (who killed Laos?) or reveal an identity (who is Oedipus?) follow in Sophocles’ footsteps. We read Sophocles’ intellectual children. Readings include: Hamlet, The Murders in the Rue Morgue, The Woman in White, and other classic novels and plays. We also analyse seminal films of the genre, including Laura and Vertigo. Will include the twentieth-century detective story, with particular attention to women writers and the genre of the female private eye.

COLT 0610M. The Israeli-Palestinian Conflict: Contested Narratives (UNIV 0980).
Interested students must register for UNIV 0980 S01.

COLT 0610N. Being There: Bearing Witness in Modern Times (ENGL 0800F).
Interested students must register for ENGL 0800F S01 (CRN 14839).

COLT 0610O. The Death of the Subject in Twentieth and Twenty-first Century Literature.
Examines the condition of the subject in Western novels and plays written after 1945. Traditional markers of identity in works of literature are being eroded by globalization, split families, the invasion of science in genetics, and increased mobility. Signs of this crisis include loss of agency and individuality, various pathologies including schizophrenia, and the replacement of humans with clones. We will investigate the intricacies of the derailment of the subject and how literary form is affected in novels by Beckett, Coetzee, W. G. Sebald, Kazuo Ishiguro, Michel Houellebecq, Chuck Palahniuk, and in plays by Caryll Churchill.

COLT 0710A. Women’s Words: Writing in Medieval Europe and Japan.
An introduction to women poets, dramatists, and prose writers from medieval court cultures, with an emphasis on what these authors show us about their educational, social, moral/spiritual environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary tradition and their own vernacular speech? Readings may include works by Christine de Pizan, Dhuoda, Heloise, Hildegard of Bingen, Hrotsvitha, Julian of Norwich, Margery Kempe, Marie de France, Murasaki Shikibu, Chaucer, Margery Kempe, Marie de France, Murasaki Shikibu, Sei Shonagon, and Trotula plus shorter texts written by both men and women. Instructor permission required. DVPS

COLT 0710C. Introduction to Scandinavian Literature.
An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Kierkegaard, Ibsen, Strindberg, Munch, Hamsun, Josephson, Südergran, Lagerkvist, Vesaas, Cronqvist, August and Vinterberg, as well as children’s books by Astrid Lindgren and Tove Jansson.

COLT 0710D. Inventing the Renaissance.
The invention of the Renaissance as a cultural formation and as a part of the western cultural imaginary. We will consider the so-called “discovery of man,” humanism and the recovery of the classical past, the production of scriptural identity or the “bibliographic ego,” courtiership, the formation of the early modern state and the discovery of the “new world” through readings of major English and continental writers of the period.
COLT 0710E. Japanese Literature and Society: Historical Survey of Japanese Literature
A reading of the major literary monuments, from early waka to Genji to the fiction of Ōe Kenzaburō. Surveys Japanese literary production from the 8th century to the present, examining the formation of literary genres, aesthetic values, and reading habits of successive eras in the context of political, social, and cultural development. No prerequisites

COLT 0710F. Latin America: The French Connection
Raises questions of intertextuality between French and Latin American literature, focusing on how each represents the other. Beginning in the late nineteenth century, questions aesthetic categories of the real, the surreal and the marvelous/magical real; and literary responses to World War II and the Dirty War, the 1968 student protests in Paris and Mexico City, feminist movements, and globalization

COLT 0710H. Mexican letras, 1519-1968.
The course approaches the history of ideas in Mexico by examining four critical moments/moments of crisis in the country's development. We focus on the issues and burdens of the past as conceptualized in historical, essayistic, and literary writings of the Conquest, the Baroque, the Mexican Revolution, and the iconoclastic 1960s. In English

COLT 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America.
An interdisciplinary journey-combining history, literature, art, film, architecture, cartography-through representations of the many worlds that comprised the colonial Hispanic New World. We traverse the paradisical Antilles, the U.S. Southwest, Tenochtitlan/Mexico City, Lima, Potosí. We read European, indigenous, and Creole writers, including: Columbus, Las Casas, Bernal Díaz, Aztec poets, Guaman Poma, Sor Juana. In English. Excellent preparation for study abroad in Latin America. Enrollment limited to 20 first year students. FYS WRIT

COLT 0710L. Storytelling: Verbal Art as Performance.
This course offers a comparative selection of oral and written folktales from Arabic, Chinese, African, North American, and European traditions in translation in order to study the formation and reception of storytelling in different socio-cultural contexts (Western and non-Western, contemporary and traditional). We will consider storytelling and associated performance practices in the light of a variety of theoretical disciplines (e.g., rhetoric, folklore, sociolinguistics, performance studies, literary criticism, narratology). There will be lectures, presentations, and videorecordings

COLT 0710P. Women and Writing in Medieval France and Japan.
An introduction to women poets and prose writers from early court cultures, with emphasis on what these authors show us about their social environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? What kinds of literary approaches and conventions were perfected by them? How did they view their personal social status? What educational, moral, and spiritual concerns did they voice? Readings: works by Murasaki Shikibu, Sei Shōnagon, Heloise, Marie de France, Christine de Pizan, plus shorter texts written by both men and women between 700 and 1450 C.E

COLT 0710Q. Odyssey in Literature.
Examines the reincarnations of the Homeric figure of Odysseus in contemporary literatures. It approaches the texts historically, culturally and literary. How is the Odysseus myth altered from culture to culture (Greece, Rome, Ireland, the Caribbean), how is it re-adapted in different historical periods, how does Odysseus change as the genre changes (epic, poetry, the novel, film, drama)?

This survey course on Japanese literature will introduce works ranging from the 7th century AD to the present. This course will provide a historical survey of classic and modern texts, while paying attention to the close relationship Japanese literature has had with visual culture from the calligraphic poems of the Heian period to the postwar influence of manga upon literature

COLT 0710T. Classics of Indian Literature (CLAS 0830).
Interested students must register for CLAS 0830 S01

While Zen, sushi and anime have become commonplace in contemporary American parlance, Japanese literature and culture remain static enigmas, conjuring up visions of tearful Madame Butterfly, stolid-faced samurai, and post-modern dystopias. In this survey of Japanese literature from the 8th century to the present, we will examine the development of literary, both poetry and prose, and aesthetics in specific social contexts in Japanese cultural history. In addition to our readings of literary texts, we will on occasion view films/anime and examine manga

COLT 0710V. The Arab World Writes Itself: Contemporary Arabic Literature.
In his seminal work Orientalism, Edward Said paraphrases Marx, and suggests that Orientalist attitudes towards the Middle East have produced a discourse in which the East must always be spoken for, and not allowed to represent itself. Said's argument has become even more relevant in the past decade, given the growing interest in the Middle East as a region in the US, coupled with a growth of spaces where voices from the region can offer their own narratives. Designed as an introductory course to contemporary Arabic Literature, this course includes a variety of readings in translation and films from across the Arab world; it foregoes an intense exploration of one national literature for a more varied survey of the textual output of several countries. We will attempt to situate each literature within its national context and the larger pan-Arab, regional and international context while being sensitive to the political, geographical, and historical foci that have influenced these texts, including the rise of Arab nationalism and the independence struggles of the mid-twentieth century, and immigration. We will also examine--and hopefully question--some of the discursive themes and conceptual frames that have traditionally used to think about contemporary Arabic literature. Enrollment limited to 20. LILE

COLT 0810A. Ancient Greek Myth in Modern Poetry.
Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek. Considers how poets since 1800 have approached, rewritten, or subverted the classical version of myths, such as those of Euridyce, Helen, Orpheus, Persephone, Penelope, and Ulysses. Emphasizes the challenges posed by the past, issues of cultural and political context, and questions of gender. Readings in English

COLT 0810C. Arthurian Tales and Romances of the Middle Ages.
Why did stories of King Arthur, his knights, and their ladies fascinate writers and audiences throughout Europe? What can Arthurian quests, marvels, and love adventures tell us about successive pre-modern societies that shaped them? What are our responses to their cultural beliefs and forms of playful make-believe? Readings (in modern translation) of medieval Latin, French, English, Welsh, and German texts. LIL

COLT 0810D. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works will be brought to the foreground

COLT 0810E. Confession, Autobiography, Testimony.
Does writing a life give it coherence and veracity, or create a fiction? What is the relationship between first-person narrative and truth, and between authorship and authority? How does the form of a first-person text -- a religious confession, a personal journal, a political denunciation, a collective memoir -- affect the telling? Must the reader of such an account be "you" to the teller's "I", and how does the intimacy of this relationship shape the experience of reading? In this course, we test the limits of self-narration against ethical and physical limits, reading first-person narratives that purport to be non-fictional. We will read accounts of different experiences -- social and sexual transgression, suffering and perpetrating violence, slavery -- and explore both the possibilities and duplicitics of writing as "I"

COLT 0810F. Desire and the Marketplace.
Studies love and desire as the interplay between men, women, and money in mercantilized societies, in seventeenth century Japan, eighteenth
COLT 0810G. Equity: Law, Literature, and Philosophy.
Justice, rigorously applied, yields injustice. This paradox has haunted Western aspirations toward legal and political justice from antiquity to the Renaissance. It necessitated the formulation of a complementary principle, equity, whose job it was to correct or supplement the law in cases where the strict application of it would lead to unfairness. We will read Sophocles, Shakespeare, Dickens, Kafka, and others.

COLT 0810H. How Not to Be a Hero.
Shakespeare wrote two great and intense plays about ancient characters who were irredeemable failures: Coriolanus and Timon of Athens. What can failure teach us when no good comes of it? What kind of strength may a language of failure possess? We will also read the ancient sources themselves (Livy, Lucian, Plutarch), and modern adaptations of these stories (Bertolt Brecht, T. S. Eliot, Günter Grass, Wyndham Lewis).

COLT 0810I. Tales and Talmakers of the Non-Western World.
Examines many forms of storytelling in Asia, from the Epic of Gilgamesh and the Arabian Nights Entertainments to works of history and fiction in China and Japan. The material is intended to follow the evolution of non-western narratives from mythological, historical and fictional sources in a variety of cultural contexts. Topics will include myth and ritual, the problem of epic, tales of love and the fantastic, etc.

COLT 0810J. The Colonial and Postcolonial Marvelous.
A celebration and critique of the marvelous in South American and related literatures (U.S., Caribbean). We follow the marvelous from European exoticizing of the New World during the colonial period to its postcolonial incarnations in ‘magical realism’ and beyond. We attend particularly to the politics and marketing of the marvelous, in writers including Borges, Camoens, Columbus, Garcia Márquez, Fuguet. Reading in English or Spanish.

COLT 0810M. Uncanny Tales: Narratives of Repetition and Interruption.
Close readings of short narratives with special attention to how formal and thematic elements interact to produce the effects of uncertainty, anxiety and incoherence peculiar to “the uncanny.” Topics include: the representation of the self in images of the arts; the representation of speech; instabilities of identity and spatial and temporal boundaries; doubles, monsters, and automata. Texts selected from: Walpole, Shelley, Hoffmann, Kleist, Poe, Dostoevsky, Freud, Wilde and Kafka.

COLT 0810O. Civilization and Its Discontents.
Investigates the age-old tension between order and chaos as a central dynamic in the making and interpretation of literature. Texts will be drawn from drama, fiction and poetry from Antiquity to the present. Authors include Sophocles, Shakespeare, Racine, Beckett, Prevost, Bronte, Faulkner, Morrison, Blake, Whitman, Dickinson, and Rich.

COLT 0810P. Moderns and Primitives.
Modernism has been called a ‘Renaissance of the Archaic.’ We will read from the major works of Anglo-American modernism (Eliot, Joyce, Lawrence, Pound), focusing on their attitudes toward the primitive and the archaic. In addition, we will examine anthropological theories from the Victorian period to Durham, explore primitivism in modernist music and painting, and read about recent controversies surrounding modernism and primitivism.

COLT 0810U. Lovers, Slaves, Kings and Knaves: Major Plays in Western Literature.
This course will introduce students to representative tragedies and comedies, focusing in particular upon their development as literary genres; continuities and variations of character, plot, and theme; stage and performance conventions; and the classical tradition. Readings will include Aeschylus, Sophocles, Euripides, Aristophanes, Shakespeare, Racine, Eilde, Ibsen, and Vogel.

COLT 0810W. Caribbean Fiction.
Through fiction and film originally in Spanish, French or English and theories of the postcolonial and postmodern, we explore how images of the Caribbean have been constructed and complicated: as lands of abundance, scenes of historical violence and natural disaster, destinations for colonial and modern-day tourists. Readings include Carpenter, Benitez Rojo, Santos Febres, Chamoiseau, Condé, Kincaid, Brathwaite.

COLT 0810X. European Renaissances.
Just what is the European renaissance and when and how did it happen and who decided? Let’s look at the renaissances of Petrarch, Boccaccio, and Giotto, of Erasmu, and Thomas More and Holbein, of Machiavelli and Castiglione and Raphael. Are these renaissances intellectual, aesthetic, visual, rhetorical? Did they happen in the fourteenth century, the fifteenth, the sixteenth? Or in the nineteenth when they were first clearly described?

COLT 0810Z. Myth and Literature.
Authors throughout the ages have been fascinated by ancient mythology and have incorporated elements of it into their texts, often modifying commenting on or even destroying the original myth in the process. This course will investigate the values, dangers and limitations of myth-making/using in literature. Primary texts will include major works by Milton, Goethe, Kleist, Racine and Kafka. Texts will be supplemented by secondary readings and multimedia elements. Students will learn to question and engage critically with the historical, cultural, literary and scientific frontiers that separate myth and reality. Assignments will include two short papers and a final paper.

Interested students must register for ENGL 0610F S01.

COLT 0811B. Believers, Agnostics, and Atheists in Contemporary Fiction (JUDS 0050A).
Interested students must register for JUDS 0050A S01.

COLT 0811C. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).
Interested students must register for POBS 0810 S01.

COLT 0811D. The Bible as Literature (JUDS 0260).
Interested students must register for JUDS 0260 S01.

COLT 0811E. Media and/as Ethnography (MCM 0900W).
Interested students must register for MCM 0900W S01.

COLT 0811F. Writing War (ENGL 0800C).
Interested students must register for ENGL 0800C S01.

COLT 0811G. Literature, Trauma, and War (ENGL 0410L).
Interested students must register for ENGL 0410L S01.

COLT 0811I. Classical Mythology and the Western Tradition.
Reads classical texts that expound the fundamental mythological stories and elements of the Western tradition, then will read selected texts from the Renaissance through the twentieth century that utilize these myths. Ancient texts covered will include the Epic of Gilgamesh, Hesiod’s Theogony and Works and Days, Ovid’s Metamorphoses, and plays by Aeschylus, Sophocles, and Euripides. Later texts will include Shakespeare’s Venus and Adonis and Rape of Lucrece, Milton’s “Lycidas,” and lyric poetry by Keats, Shelley, Browning, Swinburne, Rilke, Auden, and Yeats. This course is suitable for anyone wishing to understand the classical background to Western literature. LILE.

COLT 0811K. Literature, Trauma, and War (ENGL 0910F).
Interested students must register for ENGL 0910F S01.

COLT 0811L. Catastrophic Communities (ENGL 0800K).
Interested students must register for ENGL 0800K S01.

COLT 0811M. Planes, Trains, and Automobiles: Travel and Transport in Modern Literature and the Arts.
This course studies how new modes of transportation and the experiences they enabled stood as symbols of both the fears and joys of rapid modernization in 19th- and 20th-century literature, film, and visual art. How did the speeding locomotive, the plane’s aerial view, and the personal freedom of the automobile transform the ways people traversed space, experienced time, traded, and came into contact with one another? In formal terms, how did these experiences inspire innovations in the media we examine by Whitman, Kipling, Baudelaire, Marineti, Brecht, Woolf, Huxley, Stein, Rittman, Wegman, Picabia, Duchamp and others? No prerequisites.
COLT 0811N. Poetics of Madness: Aspects of Literary Insanity. Surveys a wide range of literary texts aiming primarily to trace the long process of transition from pre-modern to modern conceptions of madness, and to codify the symbolic logic and discursive modalities underlying its respective representations. Spanning several centuries of artistic preoccupation with the alienated mind, these texts will serve as guides in an intense exploration of the relationship between insanity and literature, as it has been shaped by a set of social impulses, cultural assumptions, or scientific developments. Authors include Euripides, Shakespeare, Cervantes, Hoffmann, Flaubert, Nerval, Maupassant, Gogol, Dostoyevsky, Stevenson, James, Woolf, Breton, and Kazantzakis.

COLT 1210. Introduction to the Theory of Literature. An historical introduction to problems of literary theory from the classical to the postmodern. Issues to be examined include mimesis, rhetoric, hermeneutics, history, psychoanalysis, formalisms and ideological criticism (questions of race, gender, sexuality, postcolonialism). Primarily for advanced undergraduates. Lectures, discussions; several short papers.

COLT 1310A. The Classical Arabic Literary Tradition. Introduces the classical Arabic literary tradition, from the poetic masterpieces of pre-Islamic Arabia to the courtly romances and story collections of the medieval period. Topics include: literature and the Qur'an; poetic and prose genres; aesthetics and the divine; Hellenistic influences; popular literature; the medieval "novel"; and the intersections of literature and law, medicine, and historiography. We will also discuss different critical approaches to the study of classical Arabic literature, including structuralism, folkloristics, and narratology.

COLT 1310B. Classics of Indian Literature (CLAS 1160). Interested students must register for CLAS 1160 S01 (CRN 15538).

COLT 1310C. Twentieth-Century Western Theatre and Performance (TAPS 1250). Interested students must register for TAPS 1250 S01 (CRN 25016).

COLT 1410A. All the World's a Stage: Seventeenth-Century Drama. Readings of representative English and continental plays of the 17th century including Shakespeare, Jonson, Corneille, Molière, Tasso, Calderón, and others. How do dramatists represent and negotiate oppositions between art and nature, imagination and reason, myth and history, freedom and fate through dramatic form and metaphor? Why is the stage such a powerful metaphor for the world?

COLT 1410B. Chinese Opera: Aesthetics and Politics of the Performing Body. Explores traditional Chinese drama, which has always been a music theater, from the perspective of contemporary cultural theory, and in a comparative and interdisciplinary context. Analyzing classical plays in relation to their staging in today's regional operas, this course will first examine the dialectics of "prettiness and artistry" in traditional Chinese theater aesthetics and its implications in gender politics. It will then move on to investigate issues of cross-dressing and erotic desire in Chinese drama of the late imperial period in comparison with that of early modern England. Lastly, the ramifications of Chinese opera as a national imagination in modern cultural politics, as embodied in the playM. Butterfly, the film Farewell My Concubine, and the Beijing opera version ofTurandot, will be addressed.

COLT 1410C. Chinese Theatre in the Mao Years. This course focuses on two major issues: policing traditional theater and "model revolutionary drama" as "a new proletarian culture." The course will begin with a study of Mao Zedong's ideas on literature and art in the light of contemporary cultural theory. It will then look at examples of the "new opera" and "new history play," examining them in relation to a complex of censorship issues concerning the exercise of political power in administering human life and the body, literature and drama as political representation, and the hermeneutics of censorship.

COLT 1410D. Dramatic Literature and Theoretical Practice in Eighteenth-Century England. An introduction to the dramatic literature of 18th-century England in the context of contemporary theatrical conventions and innovations. Plays read alongside treatises on acting techniques, stage design, and contemporary theatrical pamphlet-debates. The sociopolitical contexts of the London patent theaters and the coexistent "illegitimate" entertainments are explored, as well as the influential effects of Continental theatrical theory and innovation.

COLT 1410E. Japanese Theatre: from Dengaku to De Sade. Surveys traditional Japanese theatre from the lofty medieval Nō drama to the more popular genres of Jōruri (puppet theatre) and Kabuki in the Edo period (1600-1868). Through playscripts, related secondary criticism, videotapes, and films, we will examine the function of spectacle and theatre, the problem of representation or mimesis, the notion of audience, and the relation of text to performance. Concludes with more recent examples of Japanese drama and performance.

COLT 1410F. Medieval Drama. How drama developed in northwestern Europe between the tenth and early sixteenth century—from liturgical tropes and miracle plays to mystery cycles and morality plays, from popular feasts and minstrel performances to fool’s plays, farces, and other secular comedies. Emphasis on the cultural context and social functions of dramatic games and performances in premodern Europe.

COLT 1410K. European Early Modern Drama. An introduction to early modern drama in the French, Italian, Spanish, and English traditions. The goal is to explore a wide range of imaginative impulses in the Renaissance and Baroque periods. Readings will include plays by Corneille, Racine, Calderón, Lope de Vega, Shakespeare, Machiavelli, and Molière.

COLT 1410L. Philosophy and Tragedy. Explores the intersection of philosophy and tragedy in western literature. Readings include Aeschylus, Sophocles, Seneca, Plato, Aristotle, Racine, Calderón, Descartes, Pascal, Kant, Schelling, Hölderlin, Hegel, Nietzsche, and Heidegger.

COLT 1410M. Shakespeare and Philosophy. Explores the relationship between Shakespeare and philosophy. Readings include philosophers who have written about Shakespeare (Hegel, Nietzsche, Cavell, and others), as well as philosophers who may illuminate interpretive problems in Shakespeare (Plato, Seneca, Spinoza, and others).

COLT 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan. Contrastng the demands of the text versus the screen, we will read eight to ten works of modern Japanese literature and view the film versions of each in order to discuss the problem of translation from one medium to another. Possible works for inclusion are Rashomon, Harp of Burma, Woman in the Dunes, and The Makioka Sisters. Finally, we will consider manga (the graphic novel) and its adaptation into anime.

COLT 1410O. Shakespeare and anime. Canon formation and disciplinary divisions have deformed the way in which we read Shakespeare. Frequentely presented as a post-romantic singular "author," cut off from the sources, texts and genres on which he drew and the collaborators with whom he worked, Shakespeare looks, reads and performs differently in relation to the rich contexts in which the plays were produced and through which they are produced today. We will read plays and other materials with attention to formal and historical questions including genre, the Shakespearean text, gender, sexuality, status, degree, and nation.

COLT 1410P. Shakespeare. We will read a number of Shakespeare's plays from The Comedy of Errors to The Winter's Tale in relation to the sources, analogues, and genres (classical, continental and English) on which he drew. We will consider both formal and historical questions. Issues to be addressed include genre, the Shakespearean text, gender, sexuality, status, degree, and nation. Some attention to what has come to be called "global" Shakespeare. Written work to include a mid-term and two papers.

COLT 1410R. Hamlet: Translation, Adaptation, Appropriation. Shakespeare's Hamlet is perhaps the most widely read, performed, adapted, parodied and imitated literary text of the western tradition. In this course we will begin by reading/re-reading the play before going on to consider a number of appropriations of Shakespeare, both in the west and non-west, in order to address social and aesthetic issues including questions of meaning and interpretation, intertextuality and cultural...
relativism. Prerequisite: Previous study of Shakespeare. Enrollment limited to 20.

COLT 1410S. Classical Tragedy. This course will read the great Greek tragedies of Aeschylus, Sophocles, and Euripides, and some Senecan tragedy. We will then read Renaissance and later tragedies that use the classical world as a setting, such as Antony and Cleopatra, Julius Caesar, and tragedies that rewrite classical themes, including O'Neill's Mourning Becomes Electra.

COLT 1410T. Tragedy from Sophocles to The Wire. Explores tragedy from Athens to Baltimore. Readings will include Sophocles, Shakespeare, Hegel, Chekhov, Jia Zhangke, Chan-Wook Park, Marx, Trotsky, and the deindustrialized American city. Open to juniors and seniors. Instructor permission required.

COLT 1410U. Shakespeare in Perspective. We study Shakespeare together with selections from other writers or thinkers, including those who have written about Shakespeare (e.g. Nietzsche, Emerson, Coleridge), and those who can illuminate interpretive problems in Shakespeare (e.g. Plato, Melville).

COLT 1410V. Russian Theatre and Drama (TAPS 1430). Interested students must register for TAPS 1430 S01 (CRN 15459).

COLT 1410W. mujeres ARRIBA! Feminist Playwrights in Spanish Theater (TAPS 1281R). Interested students must register for TAPS 1281R S01 (CRN 16579).

COLT 1420A. The Tale of Genji and its Legacy. The Tale of Genji (circa 1000 CE), authored by Murasaki Shikibu, a woman of the Heian court, has been canonized over the centuries as the greatest work of Japanese literature. No work in the Japanese tradition has exerted as much literary influence as this mammoth work of prose fiction detailing the private lives of Genji, the brilliant son of the emperor, those with whom he consorts, and his descendants. We will read Genji in its entirety, along with antecedent works, other texts of the period, works influenced by Murasaki's opus, other historical materials, and secondary commentary. There are no prerequisites for this course and it is open to all undergraduates.

COLT 1420B. A Mirror for the Romantic: The Tale of Genji and The Story of the Stone. In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court, and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: CO 71, RS 83 or 88, or permission of the instructor.

COLT 1420F. Fantastic and Existentialist Literatures of Argentina, Uruguay and Brazil. Jorge Luis Borges proclaimed that South American writers can "wield all themes" without superstition, with irreverence. This course examines the ways in which 20th century writers from Argentina, Uruguay and Brazil appropriated European fantastic and existentialist fictions, taking them in new directions. Readings, in English or original languages, include Borges, Cortázar, Onetti, Lispector. Prerequisite: previous college literature course(s).

COLT 1420G. Fictions of the Caribbean. The Caribbean has inspired conflicting cultural and political claims, and a wealth of visual images. We will rethink the formation, representation, and self-presentation of the Caribbean countries, steering our explorations through postcolonial and postmodern theory to questions of appropriation, language and identity. Readings from Columbus and Shakespeare to Danticat, Santos Febres and Kincaid; essays by Glissant, James Benítez Rojo and others.

COLT 1420K. Masterworks of Chinese Fiction. Focuses on three acknowledged classics of Chinese fiction—Three Kingdoms, The Journey to the West, and The Dream of the Red Chamber—works which demonstrate the range of the genre as they represent historical, fantastical, and sociopsychological subjects. Topics include the role of fiction in Chinese society, the masterworks as mirrors of Chinese culture from the 14th through 18th centuries, and the comparative theory of the novel.

COLT 1420L. Modern Japanese Fiction. Narrative fiction from the Meiji Period (1868-1912) to the present in the context of modern Japanese cultural and intellectual history. In addition to more canonical writers such as Natsume Sōseki and Mori Ōgai, examines the legacy of women writers such as Higuchi Ichiyō and Enchi Fumiko; proletarian writers such as Hayama Yoshiki, Kobayashi Takiji, and Hayashi Fumiko; and more contemporary mass-audience writers such as Yoshimoto Banana and Yamada Eimi.

COLT 1420N. Postcolonial Faulkner. How is it that Faulkner became one of the most influential North American authors in the Third World? To answer this, we read Faulkner’s “The Bear” against two of his citational novels, Absalom, Absalom! and The Sound and the Fury. We then turn toward a number of Faulknerian novels from the Arab world and Latin America. We discuss theoretical texts that describe the legacies of various colonialisms.

COLT 1420Q. The Bildungsroman. Readings of novels in the Bildungsroman tradition and the theoretical questions of the genre: the historicity and constitution of the self; problems of the representation of a life; the category of the unity of a life as a factor of identity; notions of progress, development and completion. Considerations of the successes and failures of this model. Readings to be selected from Rousseau, Chateaubriand, Sterne, Goethe, Novalis, Flaubert, Musil, Keroauc.

COLT 1420S. The Captivity Narrative. Because the captivity narrative implies both a feminized subject and a writing subject, it provides a link among political, social, and literary phenomena common to all modern Western cultures. Examines various novels consumed by members of such cultures (including gothic romances, Bildungsroman, boys books, girl books, ethnographic journeys, and prison diaries) as versions of the captivity narrative.

COLT 1420T. The Fiction of Relationship. Explores the manifold ways in which narrative literature sheds light on the relationships that we have in life, both knowingly and unknowingly. The novel form, with its possibilities of multiple voices and perspectives, captures the interplay between self and other that marks all lives. Authors include Laclos, Melville, Brontë, Kafka, Woolf, Faulkner, Borges, Burroughs, Vesaas, Morrison, and Coetzee.

COLT 1420U. The South: Literatures of the U.S. South and South America. For Jorge Luis Borges, in his story of the same title, the South is a spectral region, hovering between imagination and reality. The literatures of the U.S. South and South America enact his notion of the South. We examine the remarkable similarities between the two literatures-similarities that result from literary influence and from social, cultural, and historical circumstances. Prerequisites: previous upper-level literature course(s), relevant to your studies at Brown. Instructor permission is required and will be given after second class.

COLT 1420V. Visionary Fictions. Visionary and apocalyptic writing, subversive of modes of perception and understanding as well as of political doctrines and systems, from Blake and Novalis to mid-nineteenth century French writers (Nerval, Rimbaud, Lautréamont), Surrealism and William Burroughs’ Naked Lunch.

COLT 1420X. The European Novel From Goethe to Proust. Readings of major European novels of the 19th century as literary reflections on philosophical questions such as aesthetic and ethical judgment, subjectivity, mimesis, memory and the novel itself as a genre. Authors include Goethe, Stendhal, Balzac, Dickens, Flaubert and Proust. Selections from Kant, Hegel, Marx, Lukács and Benjamin.
COLT 1420Y. Gigantic Fictions. What is the relation between literary gigantism and mimesis? How do 'gigantic fictions' threaten to break their literary bounds? What holds these mammoth narratives together? We will address these questions and others through a close reading of three works: Murasaki Shikibu's The Tale of Genji, Tolstoy's War and Peace and James Joyce's Ulysses.

COLT 1421F. Esthers of the Diaspora: Female Jewish Voices from Latin America (POBS 1500H). Interested students must register for POBS 1500H S01.

COLT 1421G. Dickens and Others (ENGL 1511G). Interested students must register for ENGL 1511G S01.

COLT 1421I. The Paternalistic Thriller and Other Studies in Colonial Fiction. The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T. E. Lawrence, E. M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1421K. Faulkner (ENGL 1710G). Interested students must register for ENGL 1710G S01.

COLT 1421L. "Terrible Beauty": Literature and the Terrorist Imaginary (ENGL 1760I). Interested students must register for ENGL 1760I S01.

COLT 1421M. Conrad and Naipaul: The Supremacy of the Visible? (ENGL 1761T). Interested students must register for ENGL 1761T S01.

COLT 1421N. Kafka's Writing (GRMN 1340M). Interested students must register for GRMN 1340M S01.

COLT 1421O. W. G. Sebald and Some Interlocutors (ENGL 1761Q). Interested students must register for ENGL 1761Q S01.

COLT 1421Q. Word and Image: Ekphrasis, the Iconic Narrative, and the Graphic Novel. An examination of the tradition of illustrated narratives from the pre-modern to the modern periods: the ancient Indian epic the Ramayana, the early eleventh-century Japanese Genji Monogatari, the medieval English Canterbury Tales, the late eighteenth century Marriage of Heaven and Hell, as well as the contemporary graphic novel Persepolis and examples of Japanese manga. Discussion will focus on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Instructor permission required.

COLT 1421R. The European Novel from Richardson to Goethe. This course studies the rise of the novel in eighteenth-century England, France, and Germany, focusing on the development of epistolary fiction, but with side-glances at the picaresque and sentimental tradition. Texts to be read include Richardson's Pamela, Fielding's Shamela and Joseph Andrews, Rousseau's Julie, Laclos's Les liaisons dangereuses, perhaps Bernardin de Saint-Pierre's Paul et Virginie, perhaps Sade's Justine, and definitely Goethe's Sorrows of Young Werther. LILE

COLT 1421S. The Poetics of Confession (ENGL 1561J). Interested students must register for ENGL 1561J S01.

COLT 1421T. Mediterranean Fictions. Sun-drenched, seductive, and bewildering, the Mediterranean has always been a focal point of contact, interaction, and conflict. And more than that: a cradle of civilizations; a timeless repository of memories and aspirations; a porous, protean world; a sea of many horizons, histories, and identities. We will embark on an intensive exploration of some of the basic aspects of Mediterranean culture by means of discussing a wide range of texts on Greece, Turkey, Italy, France, Egypt, Tunisia, and Algeria. Writers include Seferis, Kazantzakis, Papadimitris, Galanaki, Camus, Gide, Pirandello, Lampedusa, and Pamuk. All readings in English translation.

COLT 1421U. Words Like Daggers: The Epistolary Novel. Letters as novels, novels in letters: this course traces the development of the epistolary novel, as it was cultivated in Europe from the seventeenth to the twentieth centuries. Through focused discussions of seminal, as much as fascinating, specimens of the genre, we will study the major impact that epistolary fiction had on the stylistic and conceptual evolution of the novel in general, also exploring its interactions with a range of established or shifting social structures, gender roles, discursive practices, and modes of consciousness. Authors include Montesquieu, Laclos, Goethe, Hölderlin, Stoker, Foscolo, Tabucchi, Alexandrou, and Galanaki.

COLT 1421V. Modernisms North and South: Ulysses in Dublin, Paris, and Buenos Aires. This course will read three of the key texts of modernism, the avant-garde, and postmodernism respectively: James Joyce's Ulysses (Ireland, 1922), André Breton's Nadja (Paris, 1928), and Julio Cortázár's Hopsotch (Argentina, 1963). We will explore how all three of these novels, despite belonging to different moments and outposts of literary modernity, circle obsessively around questions of modernization, city life, mass and high culture, national and global identity, and the impact of all of these on minds and bodies, on the constitution of the individual subject, and on the formation of local communities and traditions.

COLT 1430A. Ancient Greek Myth in Modern Poetry. Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek poets. Considers how the classical version of myths, such as those of Helen, Oedipus, Orpheus, Persephon, Penelope, and Ulysses, are approached, rewritten, or subverted in poetry since 1800. Emphasizes the challenges posed by the past, issues of cultural and political context, and on questions of gender. Readings in English.

COLT 1430C. Classical Japanese Poetry. A historical study of various poetic forms of waka or Japanese poetry from the 8th-century anthology, the Man'yōshū, to the advent of modern verse, including the yūushi or free verse, in the latter part of the 19th century. Focuses on the relationship of poetry to religion, the political implications of waka, and the dominant aesthetic governing poetic conventions in different periods.

COLT 1430D. Critical Approaches to Chinese Poetry. Examination of works of Chinese poetry of several forms and periods in the context of Chinese poetic criticism. Knowledge of Chinese not required, but provisions for working with original texts will be made for students of Chinese language.

COLT 1430H. Poetry, Art, and Beauty. What does it mean to be beautiful in poetry and art? How is beauty defined from Plato to the blog? What is aesthetics in relation to beautiful practice? A workshop in the reading of lyric poetry and visual art from cave painting to modernism. The three written exercises on text, image, and aesthetics, with creative practice in translation. No final examination. Texts include Sappho, Plato, Aristotle, Catullus, Horace, Petrarch, Goethe, Kant, Wordsworth, Baudelaire, Rilke, Benjamin, Stevens, Derrida, and Danto. LILE

COLT 1430I. Post-War Europe and its Poetry: Montale, Celan, Hill. A close reading of three books of poems in their entirety: Montale's La Balera e altro, Celan's Die Niemandsrose, and Hill's Canaan. These books are in their different ways concerned with the historical meaning and possible survival of Europe after the Second World War, as well as with the betrayals and self-betrayals of the period; we will read them in that light.

COLT 1430J. Readings in Poetry and Poetics. Concentrated readings of Hölderlin, Shelley, Baudelaire, and Yeats in conjunction with theoretical texts by Heidegger, Derrida, De Man, and Benjamin. Texts include poetry, essays, novels, and dramas of the poets in a critical and philosophical context. Focuses on the relationship between figurative and expository language, the limits of commentary, and the concept of criticism as repetition and translation. French or German required. Frequent writing and oral presentations.

COLT 1430K. The Classical Tradition in English Poetry. We will read a number of famous short poems from antiquity in conjunction with the major English writers who later translated, imitated, and reworked them. We will pay special attention to the question of creative innovation. We will read Horace, Theocritus, Virgil, Dryden, Pope, Tennyson, and others.
COLT 1430L. Voices of Romanticism.
Readings of lyric poetry in the European Romantic tradition. Focus on problems of lyric subjectivity and representation, and the rhetoric of "voice." Emphasis on formal features of poetry. The course will be based on close reading and frequent writing assignments. Readings from Wordsworth, Shelley, Keats, Goethe, Novalis, Hugo, Nerval, Lamartine, Baudelaire and others. Knowledge of French or German required, or by permission

Readings in French, German, British and American poetry of the nineteenth century. Texts selected from: Hölderlin, Mörike, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments

COLT 1430Q. Poetry and the Sublime (GRMN 1440C).
Interested students must register for GRMN 1440C S01

COLT 1430S. Latin American Death Trip (LITR 1230K).
Interested students must register for LITR 1230K S01

COLT 1430T. Leaves of Words: Japanese Poetry and Poetics.
A historical study of various forms of waka (Japanese poetry) from the 8th century anthology the Man'yōshū to the advent of modern verse in the latter part of the 19th century. We will examine the significance and functions of poetry historically as well as the relationship of poetry to religion and society, the political implications of waka, and the dominant aesthetic governing poetic conventions in different periods

Rhythm, intonation and their written forms measure poetic matter. This workshop introduces prosody through exercises in theory and practice: the line; metrical and stanzaic form; rhyme; music and performance; free verse; language writing; and the task of translation (form). Even monkeys, Darwin wrote, express strong feelings in different tones. Enrollment limited to 20

COLT 1430V. Comparative Modernisms.
An introduction to modemist poetry and poetics in comparative perspective. Though modernism is often considered a uniquely European and American phenomenon, we will read poetry and theoretical texts from Mexico City, Beirut, Buenos Aires, and Beijing. Among the questions we will ask are these: Where are modernism's geographical and historical limits? What is the relation of modernism to politics? What is the role of translation in modernism's origins and development? Readings by Baudelaire, Pound, H.D., Borges, Perse, Paz, Adonis, Berman, and others

COLT 1430W. Inventions of Farewell.
The elegy, a poem of mourning, is one of the oldest and most widespread genres of literature. It is found in classical Greek and Latin poetry as well as the verse of pre-Islamic Arabia. It is also a vital contemporary genre. How do these very different poems respond to the common fact of death? How are loss and absence converted into verbal presence, a text for reading? We will read a range of verse, from disparate periods and cultures, including poems by Virgil, al-Khansa', Milton, Lorca, Ann Carson, and Breyten Breytenbach. Critical texts include readings by Freud, Sacks, and Ramazani

COLT 1440A. Storytelling in The Wire.
The Wire has received attention from fields like sociology and urban studies, which tend to read the work as a fictionalization of their observations about cities. It has not received as much attention from departments of literature, although it should. In our course, traditional categories of literary study (including character, story telling, fiction, and tragedy) will be wedded to the investigation of contemporary problems that emerge from the work (including class, race, neoliberalism, the disappearance of work, and the death and life of American cities)

COLT 1440B. Killer Love: Passion and Crime in Fiction and Film.
Discusses textual and cinematic representations of criminal passion and its ambiguous relationship to religious, moral, and social norms. We will focus on extreme forms of intimacy both as a thematic choice of cultural production and as a symbolic medium of communication. Why is it that art so often explores sanctioned emotions and deviant behaviors? What is at stake when narratives capitalize on violent manifestations of desire? In what ways is the semantics of excessive love related to conceptions of subjectivity, sociability, and sexuality? What role does it play in the creative process itself?

COLT 1440C. Photography and Human Rights (MCM 1503R).
Interested students must register for MCM 1503R S01 (CRN 25592)

COLT 1610B. Irony.
A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focuses on the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, White, De Man

COLT 1610C. Japanese Aesthetics and Poetics.
Focuses on the historical development of aesthetic values and their relation to social culture, religion, and national identity in Japan from the Nara period to the 20th century, with particular emphasis on the literary arts. Readings from Fujiwara Teika, Zeami Motokiyo, Sen no Rikyū, Okakura Tenshin, and others. A background in critical theory/philosophy and in East Asian studies helpful

COLT 1610D. Theory of Lyric Poetry.
Through readings of recent critical discussions of the lyric genre, we will explore general methodological problems of literary theory. Discussions include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry and history; the function of reading: and the problematic "objectivity" of criticism. Readings from Hölderlin, Shelley, Baudelaire, Yeats, Jakobson, Benveniste, Riffatone, Jauss, Johnson, De Man

COLT 1610E. Aesthetics and Politics (ENGL 1900E).
Interested students must register for ENGL 1900E S01 (CRN 14571)

COLT 1610F. New Theories for a Baroque Stage (TAPS 1280N).
Interested students must register for TAPS 1280N S01

COLT 1610G. Mikhail Bakhtin (RUSS 1895).
Interested students must register for RUSS 1895 S01 (CRN 25981)

COLT 1710A. Introduction to Literary Translation: Translation as Art.
Includes discussion of the history and theory of translation, but mainly involves practice in translating poetry or imaginative prose. Conducted as a workshop

COLT 1710B. Advanced Translation (LITR 1010F).
Interested students must register for LITR 1010F S01 (CRN 24221)

A consideration of various genres of women's writing from 700 to 1450 C.E. focusing on such issues as literary conventions, the relationship to the vernacular, the role of religion in education, and questions of gender and social class. Writers may include Berthguth, Murasaki Shikibu, Sei Shōnanon, Héloïse, Marie de France, the comtesse de Dia, Ladu Njō, Julian of Norwich, Christine de Pisan, and various anonymous women

COLT 1810B. Aesthetics in the Colonial Frame.
Draws together works from a wide range of contexts and genres-Enlightenment philosophy, romantic travel literature, Arabic novels and poems-to compose a conversation about aesthetics in the colonial context of Egypt, Senior Seminar

COLT 1810C. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works are foregrounded

COLT 1810E. Dwellers Amid the Clouds: the Literature of the Court.
A survey of three court traditions-Heian Japan, medieval Iceland, and early modern England-in which the relationship between the literary genres and the specific social context from which they emerge is highlighted in the form of particular literary conventions. Topics include the question of patronage, the function of particular literature as shibboleth, the idea
of spectacle and play, the politics of literature, and the trope of irony as courtly emblem.

COLT 1810F. Enlightenment and Anti-Enlightenment in Eighteenth-Century Germany.

Some of the most intractable questions of contemporary philosophy were vigorously debated in eighteenth-century Germany. What are the limits of reason? Does it support neutrality and universality mask its own set of prejudices? Are there any universally valid claims in truth or ethics? How, why, should Christian, Jew, and Muslim tolerate their differences? We will read literary and philosophical works by Hamann, Herder, Jacobi, Kant, Lessing, and Mendelssohn.

COLT 1810G. Fiction and History.

How the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors considered include Grass, Doctorow, DeLillo, Garcia-Márquez, Allende, Danticat and Augealusa. Theoretical texts by White, LaCapra, Benjamin, Ricoeur, and Chartier. Films such as The Official Story and Europa, Europa will be viewed and incorporated into the discussions. Conducted in English. Prerequisite: two previous courses in literature. Enrollment limited to 30. Instructor permission required

COLT 1810H. Tales of Two Cities: Havana - Miami, San Juan - New York.

In this course, we will explore representations of Havana and San Juan in contemporary fiction and film to literary inscriptions of Cuban Miami and Pueblo Rican New York. We will explore the city as mapping the city as mapping identity and city-writing, reconstruction and creation, viewing through the eyes of children, tourists, and urban detectives. Authors include Antonio José Ponte, Roberto G. Fernández, Mayra Santos Febres and Ernesto Quiñones. Good preparation for study abroad on the Brown-in-Cuba program. Not open to first year students. DVPS LILE

COLT 1810I. Gates of Asia.

An exploration of the growth of European knowledge of Asia from the rise of the Mongol empire through the Great Game and its aftermath. Primary sources include three kinds of accounts provided by travelers who set their hearts on Asian exploration: personal narratives, official reports and dispatches, and scholarly studies of the exotic cultures. Enrollment limited to 20

COLT 1810J. History and Aesthetic Form.

In this course, we will examine the co-articulation of theories of history with theories of language and aesthetics. Focus will be on the interdependence between an emerging interest in history and the origin of language, and approaches to literary history, genre definition, and general aesthetic categories. Readings to be selected from Vicé, Rousseau, Herder, Lessing, Schiller, Hegel, Novalis, Lukacs, Adorno, Derrida and De Man

COLT 1810L. Housing Problems.

Examines architectural figures in a variety of texts, looking at how images of buildings structure texts and outline spaces for subjectivity. Themes include houses, foundations, monuments, ruins, walls, and doors. Texts selected from Descartes, Goethe, Hegel, Austen, Coleridge, Poe, Baudelaire, Hawthorne, Huysmans, Pater, and Kafka

An examination of the tradition of illustrated narratives in several premodern cultures: the early 11th-century Japanese Genji Monogatari, the medieval English Canterbury Tales, and the ancient Indian epic the Mahābhārata. Discussion focuses on the nature of iconography and symbolism; the historical privileging of text over image; the signification of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Seminar

COLT 1810N. Freud: Writer and Reader.

A broad survey of Freud's writings, with particular emphasis on psychoanalysis' relevance to literary theory and cultural analysis. Readings include Freud's major works, as well as secondary sources focused on applications to literary studies

COLT 1810O. Latin American Literature in Dialogue with France.

Complicates the question of influence in Latin American literary and intellectual self-fashioning, specifically with regard to France. Explores the productivity and perplexity of this relationship through romanticism and articulations of the real (as realism, surrealism and magical realism). Approaching the twenty-first century, considers Latin American perspectives on French theories of feminism, postmodernism and globalization

COLT 1810P. Literature and Medicine.

The purpose of this course is to examine a number of central issues in medicine-disease, pain, trauma, madness, the image of the physician--from the distinct perspectives of the sciences and the arts. Literary texts will be drawn from authors such as Sophocles, Hawthorne, Buchner, Strinberg, Gilman, Tolstoy, Kafka, Anderson, Hemingway, Ionesco, and K. Harrison; theorists will include Foucault, Sontag, Scarry and others. Senior seminar. Reserved for: Seniors. Preference given to concentrators in Comparative Literature, English, Modern Culture and Media. Instructor permission required. Enrollment limited to 25

COLT 1810Q. Literature and Money in the Age of Paper.

Focuses on the complex and highly ambivalent relationship between literature and money in nineteenth-century European literature. Works by Poe, Balzac, Dickens, Baudelaire, Stevenson, Hardy, and Zola. Relevant philosophical writing by Smith, Marx, Nietzsche, and Derrida

COLT 1810S. Literature and the City.

Literature's obsession with the modern city, in 19th- and 20th-century American, English, and French fiction and poetry, in writers such as Blake, Whitman, Balzac, Dickens, Baudelaire, Rimbaud, Eliot, Williams, Bellow, Morrison. Opportunities for work in other literatures and genres, e.g., in Germany, Brecht

COLT 1810T. Literature and the Culture of Capitalism.

This course will examine the literary responses to capitalism in terms of five organizing tropes: regionalism, urbanization, consumerism, aestheticism, and modernism. Our investigation will begin sometime in the early 19th-century with the moment that consolidated conditions favorable for industrialization and conclude in the first decade of the 20th-century with literary modernism and the collapse of the cultural myths of progressive enlightenment and democracy. Readings include texts by Wordsworth, Mal’tus, Sue, Mayhew, Marx, H. Rider Haggard, Stowe, Carroll, Zola, Wilde, Stoker, Freud. Three papers and a final essay

COLT 1810U. Angela’s Ashes and What Went Before: Irish Immigration and Literary Creation.

Readings in the major works of Joyce, Beckett and Farrell, without forgetting Jonathan Swift and William Butler Yeats

COLT 1810V. Marx and Modern Literature.

A contrastive and integrative study of the range of Marx’s writings and works by writers such as Shakespeare, Dickens, Baudelaire, Flaubert, Woolf, and Stevens. Examines Marx’s leading concepts in philosophy, history, economics, ideology, and aesthetics in relation to the particularities of literary forms. One or two short papers and a longer final study of a literary work chosen from the student’s major field. Enrollment limited to 30

In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: COLT 0710, RELS 0040 (0088) or 0100 (0006), or permission of the instructor. DVPS

COLT 1810Y. Modern Japanese Women Writers.

An examination of women's writing from the Meiji Period (1868-1912) to the present. Readings include works from such writers as Higuchi Ichiyô, Miyamoto Yuriko, Enchi Fumiko, and Tsushima Yûko. Topics include the relation of 'woman' to the modern, the legacy/construction of the past, the implications of joryū bungaku (women's literature), and the problem of resistance and subversion

COLT 1810Z. Nietzsche.

Intensive and extensive reading of Nietzsche and some of the reception that has made him so prominent in contemporary literary and cultural theory. Topics include Nietzsche's aesthetics, theory of history, the concept of the eternal return, European decadence, misogyny and anti-Semitism. Texts will be selected from Nietzsche, Heidegger, Horkheimer
and Adorno, Deleuze, Derrida, Irigaray, de Man, Kofman, Lacoue-Labarthe, Foucault, Hamacher, Ronell, etc.

COLT 1811B. Postcolonial Theory and Fiction
There is hardly a place in the contemporary world which has not somehow been touched by the histories and consequences of colonialism. What does it mean, then, to speak about the postcolonial? Should the postcolonial be seen as a new periodization in the study of world literatures, a recent trend in critical theory, or another type of minority discourse involving previously colonized peoples?

COLT 1811D. Reading Revolution, Representations of Cuba, 1959- The Present.
Considers the cultural and ideological impact of the Cuban revolution inside and outside Cuba. Starting in the 1960s, reads Latin American "boom" novels, European theorists and U.S. civil rights activists. Moving to today, addresses post-Cuban Cuba’s literary production and its role in an international imaginary. Fiction, film and essays by Castro, Sartre, García Márquez, Reinaldo Arenas, Antonio José Ponte and others. This course is excellent preparation for the Brown in Cuba study abroad program

COLT 1811F. The "Tenth Muse" Phenomenon.
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, María de Zayas

What does it mean to be beautiful in classical and European literature? How is beauty defined by thinkers from Plato to Benjamin? Readings from the classical, medieval, Renaissance, and modern periods are brought into question by works concerning the problems of aesthetics. Works by Plato, Aristotle, Horace, Augustine, Dante, Petrarch, Shakespeare, Racine, Tolstoy and others in addition to readings from the history of aesthetics from Kant through the present

COLT 1811J. The Paternalistic Thiller and other Studies in Colonial Fiction.
The course examines the work of four major Scandinavian artists. As key figures in the development of modern theater, painting and film, these four figures share a number of common concerns: challenging the pieties of bourgeois mores; reconceiving the relations between the sexes; moving from the social to the metaphysical; undermining the unitary view of the self; and forcing an artistic "language" through which the in-dwelling power of the psyche can be revealed

COLT 1811K. The Paternalistic Thiller and other Studies in Colonial Fiction.
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T.E. Lawrence, E.M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings

COLT 1811L. Travel and Tourism through the Ages.
The travel diary, whether prompted by pleasure, pilgrimage, official duty, scientific exploration, or profit, emerges as a prominent genre in virtually all times and cultures. Readings include literary accounts of actual travels, such as the autobiographical "slave narratives" recounting involuntary all times and cultures. Readings include literary accounts of actual travels, such as the autobiographical "slave narratives" recounting involuntary

COLT 1811N. Persons and Portraits: Self in Early Modern Europe.
Challenges the presumed supremacy of the "modern subject," the sovereign rational mind personified by Descartes. Rival theories of self in Machiavelli, Luther, Montaigne, Hobbes, Pascal, and Spinoza are explored alongside the richly embodied "persons" pictured in painting (Titian, Rembrandt, Velázquez), conduct literature (Castiglione, La Rochefoucauld), drama ( Milton, Molière, Calderón), psychological fiction (La Fayette), and satiric prose (La Bruyère)

COLT 1810O. Modernism: From Paris to Athens, 1900s - 1950s
The course examines Modernism as it developed in major European cities. Apart from focusing on major venues of modernism (Zurich, Berlin, Paris) it centers on marginal geographical spaces with specific emphasis on Athens, Greece. It further explores the rise of such movements as Cubism, Futurism, Dadaism and Surrealism and proceeds to explore the reaction of Greek modernists to these movements

COLT 1811Q. Poisonous or Prophetic?
Wright’s Native Son, Burrough’s Naked Lunch, Derrida’s Specters of Marx, and Rimbaud

COLT 1811S. Philosophy and Literature of German Romanticism.
A fertile collaboration between philosophy and literature was centered in Germany roughly between 1788 (Schiller’s ‘Gods of Greece’) and 1807 (Hegel’s Phenomenology of Spirit). A survey of the major literature of this period, organized thematically, will serve as an introduction to this complex phenomenon. Authors include (in translation) Fichte, Goethe, Hölderlin, Novalis, Schelling, Schiller, and Tieck

Explores the literary and filmic imagination of three Eastern Mediterranean cities, Alexandria, Istanbul, and Athens. It examines the history, culture and politics of these cities and the ways in which they emerge in literature, film, poetry and travelogues. How is the city defined in these works? How are social tensions addressed, such as those between Greeks and Turks and Arabs or between Christians, Muslims and Jews? How are thematic and historical issues resolved, such as those involving antiquity and modernity, tradition and modernization, colonialism and nationalism, religion and secularism? How are these cities defined in the works of western writers? Enrollment limited to 30. DVPS

COLT 1811U. Literature and the Arts.
Readings in the apparitions and articulations of the arts in fiction, philosophy, criticism and poetry. Focus on the interaction between language and other media, the figure of the artist, problems of expression and performance. Readings from Diderot, Hegel, Balzac, Hoffmann, Baudelaire, Poe, Nietzsche, Wagner and Mann

COLT 1811V. Visual Obsessions: Japanese Film, Fiction, and Modernity.
The pervasiveness of visual obsessions in contemporary Japanese culture prompts us to rethink the impact of modernity in terms of visuality. Through the examination of a wide range of filmic, literary, and visual art forms produced in Japan from the 1920s to the 2000s, this course explores the question of visuality as a historically and technologically conditioned way of seeing. The issues to be considered in this class include: the construction of “Japanese” aesthetics, orientalism, ocularcentrism, the problems of interiority and the subject, the relation between habit and the everyday, and cultural nationalism. This course will introduce important theoretical concepts about vision and modernity, asking students to interrogate these concepts through the close examination of specific Japanese texts and films discussed in class. Writers, filmmakers, and visual artists include: Tanizaki Jun’ichirō, Edogawa Rampo, Abé Kōbō, Karanati Kōjin, Ozú Yasujiro, Kurosawa Akira, Ichikawa Kon, Suzui Seijun, and Murakami Takashi

COLT 1811X. Marx and his Critics.
This course will focus on a close study of the work of Karl Marx and its legacy for critical theory. The first part of the course will be dedicated to a reading of Marx’s most important texts, with special emphasis given to his theories of economy, of ideology, alienation and fetishism. The second part will be dedicated to a reading of some of Marx’s most important readers: Lukacs, Gramsci, Althusser, Zizek and Derrida. Instructor’s permission required

COLT 1811Y. Genius and Melancholia in the Renaissance.
Explores Renaissance accounts of genius, genial inspiration, and melancholia, and their accompanying ideas of intellecution and immunity. Primary materials include Dürer, Montaigne, Rabelais, Fécor, Ariosto, Erasmus, Saint Teresa, and Luther. Secondary or contemporary texts include Warburg, Panofsky, Saxl, Klibansky, Wind, Benjamin, Kierkegaard, and Sebald

COLT 1811Z. Literature and the American Presidency.
We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a fictional source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film
COLT 1812A. Literatures of Immigration
Why do people migrate? How do literary genres, including poetry, fiction, autobiography and memoir, characterize immigrant experiences? How is the experience of "coming from somewhere else" similar and different for each subsequent generation of immigrants? How does literature indicate the impacts of migration on the culture, politics and economics of the countries of immigration and emigration? How do literatures of immigration imagine the past, present and future of networks and communities of immigrants? Focusing on twentieth-century literary texts and the socio-historical context of mass migration, the first half of the course examines immigration literature in the U.S., the second half of the course explores literatures of immigration beyond the U.S., and the course concludes with an inquiry into immigration in our presently globalizing age

COLT 1812B. Aesthetics and Politics (ENGL 1900E).
Interested students must register for ENGL 1900E S01

COLT 1812C. The Ethics of Romanticism (ENGL 1560Y).
Interested students must register for ENGL 1560Y S01

COLT 1812F. Violence and Representation.
Traces diverse genealogies from which to theorize violence and its relation to aesthetics. We will identify a disciplinary philology for "violence" as a signifier within visual culture, art practice and literature; historicize key transitions in varied invocations of violence in representation; study texts (photography, film, novel, installation) that create a space where violence can be discussed as both everyday and extraordinary. Some issues to be considered: representability in moments of historical crisis (war, colonialism, genocide); the efficacy of genres and artistic movements in representing violence (tragedy, surrealism, theater of cruelty); and the violence of representation (surveillance, spectatorship, voyeurism)

COLT 1812H. "Women's Literary Make-up": Mirrors, Maquillage and the Tenth Muse.
Focuses on the problem of creative inspiration for women writers and how the pursuit of aesthetic perfection, both somatic and literary as well as their interrelation, becomes a recurring motif in women's writing from various traditions. Readings will include fiction and poetry from the English, Japanese, and Arab traditions, both modern and pre-modern. This is an undergraduate seminar open to juniors and seniors. Prerequisite: coursework in literature and at least one course in gender studies/ women's studies. Instructor permission required

COLT 1812L. Collective Struggles and Cultural Politics in the Global South.
Traces the historical and ideological mapping of the North-South axis and the regional mythologies informed by racism, empire and nationalism. We will examine the ways in which imagined geographical hierarchies continue to shape cultural and political struggles and the vectors of globalization. Along with readings on imperial histories, liberal and neoliberal political economies, and postcolonialism this class seeks to establish connections between resistant narratives and collective struggles in the Global South. We will discuss political philosophies of Marx, Gramsci, Arendt, Fanon, Harvey and Schwarz, as well as the works of Achebe, Hurston, Kincaid, Rushdie, Roy, Sembene, and Wright. First year students require instructor permission

COLT 1812J. Poetry and Ethics.
If history is, as Charles Olson claims, a "form of attention" and we are all participants in a collective reality relative to our capacity for language use, what ethical issues come to bear on what the poet chooses to attend to--not only as subject matter but as form? Can poetic language be sufficiently responsive to the challenge of empathy? Is there an ethics of attention? Guided by philosophical texts, we shall investigate ethical possibilities in a range of world poetrys. WRIT

COLT 1812K. European Intellectual and Cultural History: Exploring the Modern, 1880-1914 (HIST 1220).
Interested students must register for HIST 1220 S01

COLT 1812L. European Intellectual History: Exploding the Modern (HIST 1230).
Interested students must register for HIST 1230 S01

COLT 1812M. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).
Interested students must register for CLAS 1750L S01

COLT 1812N. Culture and Anarchy (ENGL 1511I).
Interested students must register for ENGL 1511I S01

COLT 1812O. Lying, Cheating, and Stealing (ENGL 1760V).
Interested students must register for ENGL 1760V S01

COLT 1812P. Essaying the Essay (CLAS 1120J).
Interested students must register for CLAS 1120J S01

COLT 1812S. Violence and the Multiple Responses of Medieval France
Examines violence and its representations from a variety of perspectives: literary, historical, psychological, etc. Different literary forms (11th - 13th) introduce conflicts between competing value systems, problems raised by militant religion, vendettas and the pursuit of justice. Across the gamut of appetites and emotions, violence takes a variety of shapes, producing broken hearts and broken heads. The beautiful seductiveness of violence, despite its horrors, is frequently transformed into artistic and literary expression, from the highest forms of Western tradition to the cheap exploitations of pulp fiction. What can the Middle Ages teach us about violence, yesterday and today? Not open to first year students

COLT 1812T. On Being Bored (ENGL 1511L).
Interested students must register for ENGL 1511L S01

COLT 1812U. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).
Interested students must register for ENGL 1900R S01 (CRN 14572)

COLT 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas.
This course addresses the relationship among language, war and the arts from the mid-twentieth century on. Even as armies engage in combat around the globe, the term "war" legitimates a much broader spectrum of situations, lending them the structure of organized hostility and the moral opposition of right to wrong. From the "Cold War" to the "War on Terror", to Argentina's "Dirty War" and Cuba's "War on Imperialism", literature, cinema, visual arts and community-based projects have responded to real and rhetorical declarations of "war." Drawing from U.S. and Latin American contexts, we will explore a range of responses and challenges. DVPS

Interested students must register for RUSS 1450 S01

COLT 1812X. Literature and History: Russian Historical Imagination in the European Context (RUSS 1600).
Interested students must register for RUSS 1600 S01

COLT 1812Y. Central Europe: An Idea and its Literature (SLAV 1790).
Interested students must register for SLAV 1790 S01

COLT 1812Z. The City and the Arts.
Examines selected representations of urban life from 16th century to our time, by consulting the testimony of literature, painting, architecture and writers and artists including Defoe, Hogarth, Balzac, Whitman, Dostoevsky, Baudelaire, Toulouse-Lautrec, Hopper, Brecht, F.L. Wright, Le Corbusier, Calvino and Auster; films include "Metropolis," "Man with a Movie Camera," "Alphaville," "Midnight Cowboy," "Chinatown" and others

COLT 1813A. What Went Wrong? Narratives of Decline in Arabic Literature.
The concept of civilizational decline is a central theme of classical and modern Arabic literature. From the Mongol sack of Baghdad in 1258 to rise of European and American hegemony in the Middle East, Arabs have spent centuries lamenting, debating, and reflecting upon their perceived fall from grace and the rise of other world powers to take their place. In this course, we will trace the question of decline through several centuries of literary and intellectual history. Readings include Ibn Khaldun, Ilyas al-Mawsili, Ibn Battuta, al-Shidyaq, Gibran, Munif, Salih, Said, Lewis, Hourani, and others

COLT 1813B. Dying God (CLAS 1930B).
Interested students must register for CLAS 1930B S01 (CRN 15514)

COLT 1813C. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).
Interested students must register for CLAS 1750L S01 (CRN 24868)

COLT 1813D. Issues in World Literature (ENGL 1761Y).
Interested students must register for ENGL 1761Y S01 (CRN 15334)
COLT 1813E. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B). Interested students must register for EAST 1950B S01 (CRN 23677)

COLT 1813F. Communication Culture and Literary Politics (MCM 1503Q). Interested students must register for MCM 1503Q S01 (CRN 16459)

COLT 1813G. What is Revolution? Olympe de Gouges, Hanna Arendt and C.L.R. James. Much has been written about the participation of women and non-white people in revolutionary events in the 18th century. But adding hitherto unrecognized actors to the story of the "major" revolutions is not enough for a new understanding of these events that would also illuminate the present. A thorough revision of the very concept of revolution is called for. The study of three authors writing in different periods and genres -- de Gouges, Arendt and James -- will help us in this task

COLT 1813H. God, Sex and Grammar: Literary Ethics in Medieval Europe.
What does it mean to read and write ethically? While modern culture values intellectual property, many medieval texts celebrated what we call plagiarism. On the other hand, medieval thinkers saw serious consequences in literature, which could lead authors and readers to heaven or hell. But then as now, ethics were rarely clear-cut, subject to forces as diverse as religion, sexual desire, capitalism, and even language itself. Reading some of the great authors of the period, as well as modern critical reflections, we will explore the ethical dimension of literary production in the medieval world and in our own society

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

COLT 2450. Exchange Scholar Program.

COLT 2520A. City (B)Lights: Interdisciplinary Approaches to the Study of the City.
Literary texts from the U.S., England, France, and Germany, together with substantial readings in the social sciences and selected works of art and cinema. Intended as a laboratory for interdisciplinary studies in an expansive educational spectrum for humanities Ph.Ds.

COLT 2520B. Dark and Cloudy Words: Metaphor and Poetry.
An examination of the philosophical significance of metaphor and its literary function in poetry ranging from makurakotoba in the Man’yōshū to kennings in Skaldic poetry, to the use of the trope in a number of modern poets. Critical writings include works by Aristotle, Ki no Tsurayuki, Shelley, Christiane Brooks-Rose, Max Black, Donald Davidson, Paul Ricoeur, and Jacques Derrida

COLT 2520C. Irony: Language and Failure.
A study in the trope of irony and the ways in which it complicates the possibility of understanding. Focus on Socratic irony, the dialogue, and Romantic irony. We will also consider the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Quintillian, Diderot, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida

COLT 2520D. The Literature of the Americas.
Forsaking the dominant Eurocentrism in comparative literary studies, this seminar will search for the common links between the diverse literatures of North and Latin America, approached in relation to one another rather than to "Old World" models. Authors to be considered include Margaret Atwood, Julio Cortázar, Carlos Fuentes, William Faulkner, Gabriel García-Márquez, Clarice Lispector, Machado de Assis, Toni Morrison and João Guimarães Rosa

COLT 2520E. Dialectics of Word and Image.
Explores how proximities and interactions of text and image construct and complicate meaning. It brings together a constellation of theoretical and historical readings that have bearing on particular problems generated at the nexus of word and image. Readings by Horace, Abd al-Qahir Jurjani, Lévi-Strauss, Ricoeur, Derrida, Mitchell and others will anchor a cross-disciplinary investigation of European and non-European paradigms of the relationship between text and image in various literary and visual cultures since late antiquity. We will examine specific examples of the interaction between word and image in several Islamic manuscripts

COLT 2520F. Theories of the Lyric.
Through readings of recent critical discussions of the lyric genre, we will explore more general methodological problems of literary theory. Questions to be raised include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry, history and politics; the function of reading; and the problematic "objectivity" of criticism. Readings from Jakobson, Benveniste, Jauss, Johnson, De Man, Lacoue-Labarthe, Agamben and Badiou. Focus on poets Baudelaire, Shelley, Yeats, Hölderlin, Celan

COLT 2540C. Romanticism and Cultural Property (ENGL 2560Y). Interested students must register for ENGL 2560Y S01

COLT 2540D. After Postmodernism: New Fictional Modes (ENGL 2760X). Interested students must register for ENGL 2760X S01

COLT 2540E. Political Romanticism (GRMN 2320E). Interested students must register for GRMN 2320E S01

COLT 2540F. Romanticism and Cultural Property (ENGL 2560Y). Interested students must register for ENGL 2560Y S01

COLT 2650A. Comparative Literature and Its Others.
Is there such a thing as comparative literacy? This course examines the history and practices of Comparative Literature as a major discipline, including its self conceptualizations, its relations with national literatures and with other disciplines, and its evolving methods of reading. Texts include literary as well as theoretical ones

COLT 2650C. Romantic Theory: Theirs and Ours.
Recent criticism will serve as the point of departure for looking into the relation of literary criticism to its Romantic history. Emphasis on how "Romantic" problems inform contemporary criticism on such topics as periodization, literature and history, theory of symbol and allegory, and the relation between literature and philosophy. Texts will be selected from Benjamin, M.H. Abrahms, de Man, McGann, Lacoue-Labarthe and Nancy. Chase, et. al.; Fichte, Schelling, Coleridge, Wordsworth, Schlegel, Novalis

COLT 2650D. Theory of Comparative Literature.
Designed to introduce students to some of the central theoretical issues that define the discipline of Comparative Literature through the study of twelve central texts in the field. We will begin with Erich Auerbach's foundational text Mimesis, and end with Gayatri Spivak's Death of a Disciplene. In between the authors to be read and analyzed will be Bakhtin, Lukács, Barthes, Derrida, DeMan, Jameson, Greenblatt and others. Open to graduate students, and to undergraduates by permission of the instructor

COLT 2650E. Theory of Lyric Poetry.
No description available

COLT 2650F. Irony.
A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focus on the epistemological implications of irony and the role it plays in the philosophical tradition and in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida

COLT 2650G. Literary Readings in Aesthetic Theory.
The seminar will examine not just the major themes but also the rhetorical complexities of a number of powerful texts in the history of aesthetic theory. Authors to be considered include Plato, Aristotle, Longinus, Burke, Kant, Hegel, Nietzsche, Heidegger, Benjamin, Adorno. Literary texts will be considered in conjunction with these texts, sometimes by way of famous arguments or exchanges (e.g., Heidegger and Staelig on Mörke)
COLT 2650H. On the Sublime (GRMN 2660A).
Interested students must register for GRMN 2660A S01

COLT 2650I. Late Heidegger: Art, Poetry, Technology (GRMN 2660J).
Interested students must register for GRMN 2660J S01

COLT 2650J. Genealogy: Nietzsche, Foucault, and After.
Genealogy was one of the most fruitful twentieth-century critical methods. We will begin our investigation by reading Nietzsche’s ‘Use and Abuse of History for Life’ and The Genealogy of Morals, with attention to the contexts and traditions in which Nietzsche was working. The central part of the class will be devoted Foucault’s large ouevre, where at different stages of his career developed very different versions of genealogy. We will then consider Alasdair MacIntyre, Bernard Williams, and Raymond Geuss on genealogical forms of moral inquiry, and we will conclude with recent work in science studies

COLT 2720A. Advanced Practicum in Literary Translation.
Readings in theory of translation, and in monuments of literary translation from Renaissance times to the present, will be assigned to students needing further background in these areas. Students will each complete two projects: (1) by mid-semester, a critical treatment of a published translation or a comparison of such translations; (2) for the final seminar presentation and paper, the student’s own translation into English from some literary text in a language familiar to the student

COLT 2720B. Theory and Practice of Literary Translation.
Readings in the history and theory of translation from the Renaissance to the present, along with selected major examples of literature in English translation. Students will write two papers: (1) an analysis of a theoretical issue in translation, with ample attention to the historical context of that issue; and (2) either a discussion of an important translation as a criticism of the original work; or a critical comparison of several translations of an original work; or an annotated translation into English of a literary text from a language familiar to the student

COLT 2720C. Literary Translation.
Study and practice of translation as art and a potent form of literary criticism. Translation is an act of interpretation, which informs the language of the translator and the text as a whole: context, intent, and language. Discussion will include the impact of cultural difference, tone and time on translation, and the role of analytical as well as intuitive understanding of the original in the translator’s endeavor

COLT 2820B. Fiction and History.
Focuses on how the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors to be considered include E. L. Doctorow, Gabriel Garcia-Marquez, Günter Grass, José Saramago, Isabel Allende, Lidia Jorge, Cooke. Attention will also be paid to theoretical texts by Hayden White, Dominic LaCapra, Walter Benjamin, Linda Hutcheon, and Roger Chartier

COLT 2820D. The "Tenth Muse" Phenomenon.
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas

COLT 2820E. What was Enlightenment?.
Emphasizes two of the Enlightenment’s most durable artists-Mozart and Jane Austen-situating them in the context of other writers of their times (such as Kant, Casanova, and Adam Smith) and modern appropriations of their work (in criticism and performance). Sub-themes are desire, reason, education, and forms of otherness. Class hours include viewing time

COLT 2820F. Latin America and Theory.
Explores the engagement of Latin American literature and criticism with non-Latin American bodies of literary and cultural theory (including poststructuralism, postcolonialism, postmodernism and cultural studies), addressing tensions between the autochthonous production of theoretical frameworks and their import from other contexts. Readings include the Latin American Subaltern Studies group, Revista de Crítica Cultural, Rama, García Canclini, Sarto, Richard and current new media theorists. Open to graduate students and qualified seniors

COLT 2820H. The Politics and Aesthetics of Masochism.
Masochism is defined as a, aestheticized positive, consensual investment in power relations. As such, it directly engages the relationship between politics and aesthetic forms, but as a sexualized relationship. Masochism articulates relations of gender in ways that seem to challenge traditional structures. Readings include novels and films, as well as theoretical engagements with masochism

COLT 2820I. Literature and the State of Exception.
This course takes as its point of departure Walter Benjamin’s famous diagnosis of modernity as a paradoxical condition under which the exception has become the rule. We will consider the aesthetic and political implications of such a state of exception in nineteenth-century literature. Authors include Baudelaire, DeQuincey, Arnold, Melville, Whitman, Benjamin, Derrida, Nancy and Agamben

COLT 2820L. Moderns and Primitives.
Major writers, artists, and theorists of European modernism put a new emphasis on the status of primitive society and archaic pre-history. We will consider the works of Durkheim, Eliot, Joyce, Picasso, and others with reference to the anthropology and ethnography of their period, and to subsequent post-colonial critique and controversy

COLT 2820M. Discourses of the Senses.
A comparative study of a variety of discourses dealing with the relation among the senses, the arts, and the problems of comparativity, interdisciplinarity, and intermediality. Topics will include phrenology, synaesthesia, mysticism and the theory of correspondence, the Gesamtkunstwerk, and the limits between media. Readings from Condillac, Lessing, Kant, Swedenborg, the German Romantics, Baudelaire, Wagner, Balzac, Lacoue-Labarthe, Nancy, Panofsky, Tschumi and others

COLT 2820N. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images. American cities and literary works are foregrounded

COLT 2820O. Jacques Derrida’s Grammatology.
This course is an introduction to the thought of the French philosopher Jacques Derrida. We will focus on his most important work, his "Grammatology", through a series of some of his essays will also be part of the readings. Other readings will include the works of authors crucial to Derrida’s thought and to an understanding of the "Grammatology": Heidegger, Nietzsche, Freud, Saussure, Rousseau and Levi-Strauss

COLT 2820P. Aesthetics and the Eighteenth Century Subject.
The debates about taste, judgment, beauty, sentiment, and sensation in the eighteenth century gave rise to the discourse of aesthetics as we know it today, but they also exerted a powerful influence on how knowledge, virtue, and subjectivity were imagined in the post-enlightenment period. In this course, we will examine some of the founding texts of aesthetic theory from the era (including Locke, Smith, Burke, Lessing, and Kant), and then turn to consider how aesthetic questions informed and were taken up by Goethe’s narrative of subject-formation in his Bildungsroman, Wilhelm Meister’s Apprenticeship. In English

COLT 2820Q. Culture and Politics in Cuba and the Caribbean.
Complicating standard narratives about intellectuals and the Cuban Revolution, explores writings whose relationship to the state is neither affirmative nor oppositional. Focusing on journals and on recent work in cultural theory, history, anthropology, and political science, addresses the evolution and potential of civil society; articulations of marginality; revisions of socialism and the Soviet legacy; and the mobility of theory. Spanish required

COLT 2820R. Postcolonial Melancholia.
Figures of loss and defeat proliferate widely in the accounts of colonization, national liberation, and decolonization in South Asia, Africa, the Arab world, and the Americas. We will attend to the particularity of loss
by juxtaposing readings in literature and postcolonial theory with readings on mourning and melancholia, drawn from a range of disciplines.

**COLT 2820S. Poetry after Kant.**

Begins with the intensive study of a selection of writings by Immanuel Kant focused especially on force and conflict in politics and aesthetics. This study, along with relevant readings from more recent work, will provide the basis for an approach to this topic in nineteenth-century poetry. Readings of Kant (Critique of Judgment, "Toward Eternal Peace." The Conflict of the Faculties), Walter Benjamin, Jacques Derrida, and Giorgio Agamben and will lead to several "case studies" of nineteenth-century poetry, including works by Friedrich Hölderlin, Charles Baudelaire, and Matthew Arnold.

**COLT 2820T. Universals.**

Explores the status of universals in classical, Hellenistic, Scholastic, and Renaissance metaphysics. Also explores the literary implications of this philosophico problem. Readings include Plato, Aristotle, Chrysippos, Augustine, Cicero, Seneca, Abelard, Avicenna, Aquinas, Scotus, Ficino, Cusanus, Pico, and Suarez.

**COLT 2820U. Literature and Judgment.**

Investigates the intersections between acts of literature and acts of judgment, between language and the law. How is literature to be judged, when is it "good" or "bad"? Does literature lie, and if so, does it matter? Does it hide a crime? And, in turn: does literature provide its own particular kind of judgment, one that may make evident the very fictional status of the law? Readings span from the Bible to contemporary post-colonial readings (Rousseau, Tolstoy, Zola, Freud, Kafka, Arendt, Benjamin, Henry James, Primo Levi, Coetzee, Sadegh Hedayati).

**COLT 2820V. Nietzsche, Foucault, Latour (ENGL 2900K).**

Interested students must register for ENGL 2900K S01.

**COLT 2820W. Ethical Turns (ENGL 2900N).**

Interested students must register for ENGL 2900N S01.

**COLT 2820X. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B).**

Interested students must register for ENGL 2561B S01.

**COLT 2820Y. Shakespeare and Justice: The Merchant of Venice and Measure for Measure.**

We will read The Merchant of Venice and Measure for Measure with patience and attention. Thematic concerns that emerge from the work (including problems of justice, violence, and the law) will be wedded to slow, detailed examination of the primary texts.

**COLT 2820Z. The Encyclopedic Imagination from Pliny to Google Books.**

Considers the history of encyclopedic activity in various classical, medieval, and modern contexts. We will explore issues of encyclopedic epistemology, book history, the classification of knowledge, and the obsession to collect, compile, and document everything knowable and unknowable in both real and fictional encyclopedias. Readings will include selections from Pliny, Isidore de Seville, Vincent de Beauvais, the Ikhwan al-Safa’, al-Jahiz, Avicenna, Rabelais, Diderot, Flaubert, Calvino, Borges, Foucault, and others. Enrollment limited to 40.

**COLT 2821A. Representing London circa 1600 (COLT 2360T).**

Interested students must register for ENGL 2360T S01 (CRN 24793).

**COLT 2821B. Memory/Commemoration/Testimony.**

An investigation of the mnemonic functions of poetry from the elegy to historical witnessing in the Romantic and post-romantic period. We will study the creative and performative function of memory as well as processes of repetition, recollection, trauma and canon-formation. Theoretical and poetic texts will be studied together. Authors will include: Rousseau, Wordsworth, Hölderlin, Lamartine, Baudelaire, Dickinson, H.D., Rilke, Celan, Reznikoff; Heidegger, Freud, Arendt, Adorno, Derrida, de Man, Ronell.

**COLT 2830C. Literature and the Arts.**

An investigation of the discourse of the arts in the modern European tradition. Topics include the relation between the Ancients and the Moderns, evaluations of the possibilities and limitations of differing media, the role of language in discussions of the "other" arts, and conceptions of synaesthesia and correspondence. Texts selected from Perrault, Winckelmann, Lessing, Diderot, Rousseau, Kant, Hegel, Hoffman, Baudelaire, and others.

**COLT 2830F. Walter Benjamin and Modern Theory.**

An intensive reading of selected essays by Walter Benjamin on language, literature, aesthetics, and politics will be paired up with the study of the interpretation and impact of this work on contemporary work in literary theory and philosophy. In addition to Benjamin, we will also read Jacques Derrida, Philippe Lacoue-Labarte, Samuel Weber, Giorgio Agamben, and Peter Fenves. German and/or French helpful but not required. Open to graduate students only.

**COLT 2830G. The Problem of Mimesis in Modern Literary and Cultural Theory (MCM 2310F).**

Interested students must register for MCM 2310F S01.

**COLT 2830H. Cultural Translation: Theory and Practice.**

Across a range of disciplines, "cultural translation" today stands for the dynamic interactions among cultures. Derived from cultural anthropology and linguistic translation, the metaphor of translation (already a metaphor: trans+laterre, to bear across) is used increasingly to analyze how cultures are transmitted through the operations of colonial expansion, diaspora and immigration. Though cultural globalization is assumed to be a 20th century phenomenon, the result of an expansion and acceleration in the movement and exchange of ideas, commodities and capital, this seminar considers a longer historical frame for understanding cultural competition. Theoretical texts including Schleiermacher, Jakobson, Benjamin, Derrida, Spivak, and a "case study." Shakespeare.

**COLT 2830I. Histories of the Early Modern Body.**

This seminar considers the production of knowledge about the body in the early modern period. The institution of science and how the emerging "science" of the body was visualized; discourses of the erotic, the scientific and the religious; the body in varied cultural performances including the blason, devotional texts, erotica, drama etc. Texts include theoretical work on gender and sexuality. Open to graduate students only.

**COLT 2830J. Ontology of Life: Reading Heidegger's Being and Time with Derrida (GRMN 2660K).**

Interested students must register for GRMN 2660K S01 (CRN 16321).

**COLT 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COLT 2980. Thesis Preparation.**

For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis.

---

**Center for Computation and Visualization**

At the Center for Computation and Visualization (CCV), we develop and maintain parallel computing and Virtual Reality display resources for use by the University research community, and engage in research in graphics, visualization and computational research. An adjunct activity is assistance and support in developing applications for our technologies in Brown’s curricula. By establishing a matrix for multi-discipline computational research, visualization research and research visualization, we will stimulate intellectual dialogue and foster new collaboration, broadening and adding new academic structure to the University’s programs of research and science instruction.

The center maintains and is developing immersive and semi-immersive display devices. These include a TAN VR-Cube (also known locally as a "Cave"), a tiled stereo wall and desk-style displays. The Cave is our 8’ cube wherein the floor and three walls are projected to provide a virtual environment. Special glasses allow 3D stereo depth-perception, and a variety of tracking devices allow software to track the position of a user’s hand, head, wrist, etc. The Cave also allows sound-based interaction. We maintain several parallel computing resources. The 98-processor Intel Xeon parallel rendering cluster can be used for parallel computation, and there are two other clusters, a 106-processor AMD Athlon cluster and a 26-processor Intel Xeon cluster, that are dedicated to parallel computation. In addition, we have a 72-processor IBM SP system that is dedicated to parallel computation, and maintain several clusters dedicated to particular research groups. A Lustre parallel filesystem provides 40 terabytes of...
Center for Computational Molecular Biology

The mission of the Center for Computational Molecular Biology (CCMB) is to make breakthrough discoveries in the life sciences through the development and application of novel computational, mathematical, and statistical techniques. Research in the Center aims to exploit the opportunities from technological advances in genomics and proteomics. The Center for Computational Molecular Biology (CCMB) at Brown is a world-class center for research and scholarship in this new discipline. The extraordinary progress of molecular biology in the last several decades has yielded an enhanced understanding of biological processes, while the growth of high-dimensional data generated by genomic and proteomic technologies has brought an entirely new data-driven paradigm to the life sciences. The interdisciplinary interaction of biology and computational and mathematical sciences has already contributed to this understanding, and has led to the recognition of Computational Molecular Biology as a cutting-edge and rapidly-expanding discipline.

The center concentrates its efforts on a number of fundamental biological themes: algorithmic methods and statistical inference in genomics, comparative genomics and evolution, gene regulatory networks, regulatory genomics, mathematical models of genetic variation, genome-wide association studies, and cancer genomics.

For more information please visit the CCMB website (http://www.brown.edu/research/projects/computational-molecular-biology).

Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and therefore requires that students begin their learning with prerequisite and core courses in computer science, applied mathematics, statistics, chemistry, and biology (e.g., biochemistry, molecular biology, genetics, ecology, evolution, anatomy, and neuroscience and visualization). From this broad foundation in the sciences, students are well prepared to pursue one of four possible tracks: computational genomics, biological sciences, molecular modeling, and applied mathematics and statistical genomics.

Standard program for the Sc.B. degree

General Core Course Requirements

| CHEM 0330 Equilibrium, Rate, and Structure | 1 |
| BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent) | 1 |
| BIOL 0280 Introductory Biochemistry       | 1 |
| or BIOL 0500 Cell and Molecular Biology   | 1 |
| CSCI 0150 Introduction to Object-Oriented Programming and Computer Science (no prerequisite) | 1 |
| CSCI 0160 Introduction to Algorithms and Data Structures (prerequisite CSCI 0150) | 1 |
| or CSCI 0170 Computer Science: An Integrated Introduction | 1 |
| CSCI 0180 Computer Science: An Integrated Introduction (prerequisite CSCI 0170) | 1 |
| or CSCI 0190 Accelerated Introduction to Computer Science | 1 |
| CSCI 1810 Computational Molecular Biology (prerequisites: CSCI 0160, or CSCI 0180, or CSCI 0190) | 1 |
| APMA 1080 Inference in Genomics and Molecuar Biology | 1 |

Six courses in one of the following four tracks: 6

Computational Genomics Track: 1

Three of the following:
- CSCI 1230 Introduction to Computer Graphics
- CSCI 1270 Database Management Systems
- CSCI 1410 Introduction to Artificial Intelligence
- CSCI 1550 Probability and Computing: Randomized Algorithms and Probabilistic Analysis
- CSCI 1570 Design and Analysis of Algorithms
- or other Computer Science courses approved by the concentration advisor

Three of the following:
- CSCI 0310 Introduction to Computer Systems
- CSCI 0320 Introduction to Software Engineering
- CSCI 1950L Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Biological Sciences track: 2

At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.

Select two courses from the following:
- CSCI 1950L Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Molecular Modeling Track: 3

- CHEM 1560A Molecular Modeling
- At least three courses from the following:
  - CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics
  - CHEM 1230 Chemical Biology
  - or CHEM 1240 Biochemistry
  - or BIOL 1270 Advanced Biochemistry
  - BIOL 0530 Principles of Immunology
  - BIOL 1260 Physiological Pharmacology
  - BIOL 1540 Molecular Genetics

Two courses from the following:
- CSCI 1950L Algorithmic Foundations of Computational Biology
- PHP 2620 Statistical Methods in Bioinformatics, I
- APMA 1660 Statistical Inference II
- BIOL 1430 The Computational Theory of Molecular Evolution

Applied Mathematics and Statistical Genomics Track: 4

At least three courses from the following:
- APMA 1660 Statistical Inference II
- APMA 1690 Computational Probability and Statistics
- CSCI 1410 Introduction to Artificial Intelligence
- APMA 0340 Methods of Applied Mathematics I, II
- APMA 0360 Methods of Applied Mathematics I, II

At least three of the following:
- BIOL 1430 The Computational Theory of Molecular Evolution
- CSCI 1950L Algorithmic Foundations of Computational Biology
Computer Science Concentration

Requirements

Computer science is now a critical tool for pursuing an ever-broadening range of topics, from outer space to the workings of the human mind. In most areas of science and in many liberal arts fields, cutting-edge work depends increasingly on computational approaches. The undergraduate program at Brown is designed to combine breadth in practical and theoretical computer science with depth in specialized areas. These areas range from traditional topics, such as analysis of algorithms, artificial intelligence, databases, distributed systems, graphics, mobile computing, networks, operating systems, programming languages, robotics and security, to novel areas including games and scientific visualization.

Requirements for the Standard Track of the Sc.B. degree

Prerequisites (1 or 2 courses)
Two semesters of Calculus, for example:
- MATH 0090 & MATH 0100
- MATH 0170

Concentration Requirements (15 courses)

Core-Computer Science:
Select one of the following introductory course Series:

<table>
<thead>
<tr>
<th>Series</th>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>CSCI 0150 &amp; CSCI 0160</td>
<td>Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures</td>
</tr>
<tr>
<td>B</td>
<td>CSCI 0170 &amp; CSCI 0180</td>
<td>Computer Science: An Integrated Introduction</td>
</tr>
<tr>
<td>C</td>
<td>CSCI 0190</td>
<td>Accelerated Introduction to Computer Science</td>
</tr>
</tbody>
</table>

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0220</td>
<td>Introduction to Discrete Structures and Probability (math)</td>
</tr>
<tr>
<td>CSCI 0320</td>
<td>Introduction to Software Engineering (systems)</td>
</tr>
<tr>
<td>CSCI 0330</td>
<td>Introduction to Computer Systems (systems)</td>
</tr>
<tr>
<td>CSCI 0450</td>
<td>Introduction to Probability and Computing (math)</td>
</tr>
<tr>
<td>CSCI 0510</td>
<td>Models of Computation (math)</td>
</tr>
</tbody>
</table>

Additional Computer Science Courses:
Select one theoretical computer science course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 1490</td>
<td>Introduction to Combinatorial Optimization</td>
</tr>
<tr>
<td>CSCI 1510</td>
<td>Introduction to Cryptography and Computer Security</td>
</tr>
<tr>
<td>CSCI 1550</td>
<td>Probability and Computing: Randomized Algorithms and Probabilistic Analysis</td>
</tr>
<tr>
<td>CSCI 1570</td>
<td>Design and Analysis of Algorithms</td>
</tr>
<tr>
<td>CSCI 1590</td>
<td>Introduction to Computational Complexity</td>
</tr>
<tr>
<td>CSCI 1760</td>
<td>Introduction to Multiprocessor Synchronization</td>
</tr>
<tr>
<td>CSCI 1950H</td>
<td>Computational Topology</td>
</tr>
<tr>
<td>CSCI 1950J</td>
<td>Introduction to Computational Geometry</td>
</tr>
<tr>
<td>CSCI 1950L</td>
<td>Algorithmic Foundations of Computational Biology</td>
</tr>
</tbody>
</table>

Select one artificial intelligence course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 1600</td>
<td>Introduction to Artificial Intelligence</td>
</tr>
<tr>
<td>CSCI 1610</td>
<td>Machine Learning</td>
</tr>
<tr>
<td>CSCI 1620</td>
<td>Natural Language Processing</td>
</tr>
</tbody>
</table>

Honors:

To be a candidate for honors, a student must have a course record judged to be excellent by the concentration advisor and must complete a thesis judged to be outstanding by the faculty member supervising the work.

Computational Biology Graduate Program

This doctoral program (Ph.D.) is jointly administered by four academic units: Applied Mathematics, Computer Science, Ecology and Evolutionary Biology, and Molecular Biology, Cell Biology, and Biochemistry. The Ph.D. degree will be conferred by one of the participating departments and four corresponding tracks have been defined with discipline-specific course requirements. Students must specify the track for which they wish to be considered in their application.

For more information on application and program requirements, please visit:
http://www.brown.edu/academics/gradschool/programs/computational-biology

Computer Science

Chair

Roberto Tamassia

Since our inception in 1979, the Computer Science Department at Brown has forged a path of innovative information technology research and teaching at both the undergraduate and graduate levels. From our modest beginnings as an interest group within the Divisions of Applied Mathematics and Engineering in the 1960s to its current stature as one of the nation’s leading computer science program, the Computer Science Department has continuously produced prominent contributors in the field. Computer Science combines the intellectual challenge of a new discipline with the excitement of an innovative and rapidly expanding technology. The department resides in Brown’s Center for Information Technology; this striking building houses many of the university’s computing activities, as well as the department’s instructional computing facilities and research labs. Faculty, staff and students are provided state-of-the-art computing facilities managed by the department’s own technical staff.
Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Requirements for the Professional Track of the A.B. degree.

Prerequisites

Two semesters of Calculus, for example:

- MATH 0090 Introductory Calculus, Part I & MATH 0100 and Introductory Calculus, Part II
- MATH 0170 Advanced Placement Calculus

Concentration Requirements (9 courses)

Core Computer Science:

Select one of the following series:

Series A

CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
& CSCI 0160 Introduction to Algorithms and Data Structures

Series B

CSCI 0170 Computer Science: An Integrated Introduction
& CSCI 0180 Computer Science: An Integrated Introduction

Series C

CSCI 0190 Accelerated Introduction to Computer Science
and an additional CSCI course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CSCI course, or a 1000 level course)

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:

CSCI 0220 Introduction to Discrete Structures and Probability (math)

CSCI 0320 Introduction to Software Engineering (systems)

CSCI 0330 Introduction to Computer Systems (systems)

CSCI 0450 Introduction to Probability and Computing (math)

CSCI 0510 Models of Computation (math)

CSCI 0530 Directions: The Matrix in Computer Science (math)

Four additional courses in computer science or related areas are required.

Total Credits: 15

Requirements for the Professional Track of the A.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs.
Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

### Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

### Requirements for the Standard Track of the Sc.B. degree.

Interested students may contact concentration advisors in either the Department of Computer Science or in the Department of Economics.

**Prerequisites (3 courses):**

- **MATH 0100** Introductory Calculus, Part II
- **MATH 0520** Linear Algebra
  or **MATH 0540** Honors Linear Algebra
  or **CSCI 0530** Directions: The Matrix in Computer Science
- **ECON 0110** Principles of Economics

**Required Courses (17 courses):**

1. **Series A**
   - **CSCI 0450** Introduction to Probability and Computing 1
   - **or APMA 1650** Statistical Inference I
   - Select one of the following Series: 2

2. **Series B**
   - **CSCI 0170** Computer Science: An Integrated Introduction 2
   - **& CSCI 0180**

**Series C**

- **CSCI 0190** Accelerated Introduction to Computer Science
- and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course)

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented: one must be math-oriented and one systems-oriented:

- **CSCI 0220** Introduction to Discrete Structures and Probability (math)
- **CSCI 0310 or CSCI 0330** Introduction to Computer Systems (systems)
- **CSCI 0320** Introduction to Software Engineering (systems)
- **CSCI 0510** Models of Computation (math)

A pair of CS courses with a coherent theme. 1 2

An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements.

- **ECON 1130** Intermediate Microeconomics (Mathematical) 2 1
- **ECON 1210** Intermediate Macroeconomics 1
- **ECON 1630** Econometrics I 1

Three courses from the "mathematical economics" group, as follows: 3

- **ECON 1170** Welfare Economics
- **ECON 1465** Market Design: Theory and Applications
- **ECON 1470** Bargaining Theory and Applications
- **ECON 1640** Econometrics II
- **ECON 1650** Financial Econometrics
- **ECON 1750** Investments II
- **ECON 1759** Data, Statistics, Finance
- **ECON 1810** Economics and Psychology
- **ECON 1820** Behavioral Economics
- **ECON 1850** Theory of Economic Growth
- **ECON 1860** The Theory of General Equilibrium
- **ECON 1870** Game Theory and Applications to Economics

and any graduate Economics course

Two additional 1000-level Economics courses 2

**Capstone Course in either Computer Science or Economics** 1

Total Credits 17

1 A list of pre-approved pairs may be found at the approved-pairs web page (http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies.

2 Or ECON 1110, with permission.

3 A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

### Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.
On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Requirements for the Standard Track of the A.B. degree:

Interested students may contact concentration advisors in either the Department of Computer Science or in the Department of Economics.

**Prerequisites (3 courses):**

- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science
- ECON 0110 Principles of Economics

**Required Courses (13 courses):**

- Would you recommend your summer experience to other Brown students? Explain.

### Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government.
Requirements for the Standard Track of the Sc.B. degree.

Prerequisites - two semesters of Calculus, for example

<table>

<td>Introduction to Probability and Computing (math)</td>
</tr>
<tr>
<td>CSCI 0510</td>
<td>Models of Computation (math)</td>
</tr>
</tbody>
</table>

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650/1660.

A capstone course: a one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Total Credits 17

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track ([http://www.cs.brown.edu/ugrad/concentrations/professional.track.html](http://www.cs.brown.edu/ugrad/concentrations/professional.track.html)) of the ScB program in Mathematics-Computer Science.

Requirements for the Standard Track of the Sc.B. degree.

Total Credits 17
The requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you if your summer had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Computer Science Graduate Program

The department of Computer Science offers two graduate degrees in computer science. The Master of Science (Sc.M.) degree for those who wish to improve their professional competence in computer science or to prepare for further graduate study, and the Doctor of Philosophy (Ph.D) degree.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/computer-science

Concurrent ScB (NUS) and ScM in Computational Biology (Brown University)

The School of Computing at National University of Singapore and The Department of Computer Science at Brown have established a concurrent Bachelor’s and Master’s degree program in Computational Biology. After having first completed four years of undergraduate study at National University of Singapore (NUS), qualified students will attend Brown University to complete their fifth and final year of study in computational biology. After the successful completion of requirements set forth by both universities, the students will simultaneously earn both their Sc.B. and Sc.M. degrees. The Sc.B will be awarded by the National University of Singapore, while the Sc.M. is awarded by Brown University.

Courses

CSCI 0020. The Digital World.
Removes the mystery surrounding computers and the ever-growing digital world. Introduces a range of topics including the World Wide Web and many aspects of multimedia, along with the underlying digital technology and its relevance to our society. Other topics include artificial intelligence, IT security, ethics and economics of computing as well as the effects of its pervasiveness in today’s world. Introductory programming and analytic skills are developed through HTML, Photoshop, Access and Python assignments. CSCI 0020 is a good introduction to a wide range of CS topics that have broad relevance in our society. No prerequisites. LILE

CSCI 0040. Introduction to Scientific Computing and Problem Solving.
An introduction to computer programming and software design in a high-level language. Emphasizes fundamental techniques and strategies for solving scientific problems with computers. Illustrates abstract concepts through a wide range of exemplary applications from engineering, the sciences, and the humanities. Intended for students who want a single application-oriented programming course. This course is not intended for computer science concentrators. No prerequisites

CSCI 0081. TA Apprenticeship: Full Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0081 or its half-credit version (CSCI 0082) is taken is up to the professor of the course being TA’d. Instructor permission required

CSCI 0082. TA Apprenticeship: Half Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to the professor of the course being TA’d. Instructor permission required

CSCI 0150. Introduction to Object-Oriented Programming and Computer Science.
Emphasizes object-oriented design and programming in Java, an effective modern technique for producing modular, reusable, internet-aware programs. Also introduces interactive computer graphics, user interface design and some fundamental data structures and algorithms. A sequence of successively more complex graphics programs, including Tetris, helps provide a serious introduction to the field intended for both potential concentrators and those who may take only a single course. No prerequisites

CSCI 0160. Introduction to Algorithms and Data Structures.
Introduces fundamental techniques for problem solving by computer that are relevant to most areas of computer science, both theoretical
and applied. Algorithms and data structures for sorting, searching, graph problems, and geometric problems are covered. Programming assignments conform with the object-oriented methodology introduced in CSCI 0150. Prerequisite: CSCI 0150 or written permission

**CSCI 0170. Computer Science: An Integrated Introduction.**

CSCI0170/0180 is an introductory sequence that helps students begin to develop the skills, knowledge, and confidence to solve computational problems elegantly, correctly, efficiently, and with ease. The sequence is unique in teaching both the functional and imperative programming paradigms—the first through the languages Scheme and ML in CSCI0170; the second through Java in CSCI0180. The sequence requires no previous programming experience. Indeed, few high school students are exposed to functional programming; hence even students with previous programming experience often find this sequence an invaluable part of their education.

Although students are taught to use programming languages as tools, the goal of CSCI0170/0180 is not merely to teach programming. On the contrary, the goal is to convey to students that computer science is much more than programming! All of the following fundamental computer science techniques are integrated into the course material: algorithms, data structures, analysis, problem solving, abstract reasoning, and collaboration. Concrete examples are drawn from different subareas of computer science: in 0170, from arbitrary-precision arithmetic, natural language processing, databases, and strategic games; in 0180, from discrete-event simulation, data compression, and client/server architectures.

**CSCI 0180. Computer Science: An Integrated Introduction.**

A continuation of CSCI 0170. Students learn to program in Java while continuing to develop their algorithmic and analytic skills. Emphasis is placed on object-oriented design, imperative programming, and the implementation and use of data structures. Examples are drawn from such areas as databases, strategy games, web programming, graphical user interfaces, route finding, and data compression. Lab work done with the assistance of TAs. Prerequisite: CSCI 0170

**CSCI 0190. Accelerated Introduction to Computer Science.**

This course is a one-semester introduction to computer science for students with strong prior computer science background. It covers core data structures, algorithms, and analysis techniques similar to those of the two-course introductory sequences (CSCI 0150-0160 and CSCI 0170-0180), integrated with programming. Students who wish to take this course should have programming experience, including: CSCI 0150, CSCI 0160, and CSCI 0170. Students who wish to take this course should have programming experience, including: CSCI 0150, CSCI 0160, and CSCI 0170. Prerequisite: CSCI 0150 or CSCI 0170 and complete additional work in that course. CSCI 0190 will branch off from CSCI 0170 after approximately one month. Students will be permitted to enroll by permission of the instructor.

**CSCI 0220. Introduction to Discrete Structures and Probability.**

Introduces students to the functions of operating systems. Prerequisite: CSCI 0150, CSCI 0160 or CSCI 0190

**CSCI 0230. Introduction to Computer Systems.**

Basic principles of computer organization. Begins with machine representation of data types and logic design, then explores architecture and operations of computer systems, including I/O, pipelining, and memory hierarchies. Uses assembly language as an intermediate abstraction to study introductory operating system and compiler concepts. Prerequisite: CSCI 0150 or CSCI 0170 (or CSCI 0190 recommended).

**CSCI 0320. Introduction to Software Engineering.**

Advanced programming techniques including Java, threads, web-applications, user interfaces and XML. Covers software design including object-oriented design, systems design, web application design and user interface design. Software engineering including modeling, analysis, testing, debugger reuse, the software lifecycle, tools and project management. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. CSCI 0220 is recommended

**CSCI 0330. Introduction to Computer Systems.**

High-level computer architecture and systems programming. The course covers the organization of computer systems (in terms of storage units, caches, processors, and I/O controllers) and teaches students assembly-language programming and C-language programming. Extensive programming exercises introduce students to systems-level programming on Linux systems, as well as to multi-threaded programming with POSIX threads. Students will learn the basics of how compilers work and will be introduced to the functions of operating systems. Prerequisite: CSCI 0150, 0180, or 0190

**CSCI 0450. Introduction to Probability and Computing.**

Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major roles in first machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of statistical inference. Enrollment limited to 45

**CSCI 0510. Models of Computation.**

The course introduces basic models of computation including languages, finite-state automata and Turing machines. Proves fundamental limits on computation (incomputability, the halting problem). Provides the tools to compare the hardness of computational problems (reductions). Introduces computational complexity classes (P, NP, PSPACE and others). Prerequisite: CSCI 0220 or 0450

**CSCI 0530. Directions: The Matrix in Computer Science.**

Introduces vectors, matrices and their role in computer science. Consists of three components: (1) concepts, theorems, proofs, (2) procedures and programs, (3) applications and working with data. Revolves around weekly labs where students apply concepts to real tasks with real data. Lab topics include transformations in 2-d graphics, error-correcting codes, image compression using wavelets, synthesizing new perspectives in a photo, face recognition, news story categorization, cancer diagnosis using machine learning, matching airplanes to destinations, Google's PageRank method. Other topics include linear programming, zero-sum games, rudimentary cryptographic methods, linear regression, and discrete linear dynamical systems. Prior exposure to computer programming expected. 999999

**CSCI 0931. Introduction to Computation for the Humanities and Social Sciences.**

Introduces students to the use of computation for solving problems in the social sciences and the humanities. We will investigate a series of real-world problems taken from the news, from books such as *Freakonomics*, and from current research. Topics covered include data gathering, data analysis, web-based interfaces, security, algorithms, and scripting. Enrollment limited to 25. Instructor permission required.

To be added to the class waitlist, please sign up here: https://docs.google.com/a/brown.edu/spreadsheet/viewform?formkey=dG5GT3hid21YRHRiNFVSZE9EMHFIeFE6MQ#gid=0

Notes: you must use your Brown login. Requests for access for other email addresses will be ignored

**CSCI 1230. Introduction to Computer Graphics.**

Fundamental concepts in 2D and 3D computer graphics, e.g., 2D raster graphics techniques, simple image processing, and user interface design. Focuses on geometric transformations, and 3D modeling, viewing and rendering. A sequence of assignments in C++ culminates in a simple geometric modeler and ray tracer. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Strongly recommended: CSCI 0530, CSCI 0320, or MATH 0520 (may be taken concurrently). Students who don’t know C++ should take the minicourse offered during the first week of the semester

**CSCI 1250. Introduction to Computer Animation.**

Introduction to 3D computer animation production including story writing, production planning, modeling, shading, animation, lighting, and compositing. Students work independently to learn basic skills, then in groups to create a polished short animation. Emphasis is on in-class critique of ongoing work, which is essential for learning the cycle of evaluating work, determining improvements, and implementing them for further evaluation. Students should attend first class to receive instructor’s written permission
CSCI 1260. Introductory Compiler Construction.
Lexical analysis, syntactic analysis, semantic analysis, code generation, code optimization, translator writing systems. Prerequisites: CSCI 0220 and 0320: 0510 is recommended

CSCI 1270. Database Management Systems.
Introduction to database structure, organization, languages, and implementation. Relational model, query languages, query processing, query optimization, normalization, file structures, concurrency control and recovery algorithms, and distributed databases. Coverage of modern applications such as the Web, but with emphasis on Database Management Systems internals. Recommended: CSCI 0220 and 0310

CSCI 1280. Intermediate 3D Computer Animation.
Continues work begun in CSCI 1250 with deeper exploration of technical and artistic aspects of 3D computer animation including more sophisticated shading and lighting methods and character modeling, rigging, animation, and dynamics. After a series of individual exercises, students pursue an independent topic and then, working alone or in pairs, create a polished demonstration. Emphasis is on in-class critique of ongoing work. Prerequisite: CSCI 1250. Students may contact the instructor in December for permission

CSCI 1290. Computational Photography.
Describes the convergence of computer graphics and computer vision with photography. Its goal is to overcome the limitations of traditional photography using computational techniques to enhance the way we capture, manipulate, and interact with visual media. Topics covered: cameras, human visual perception, image processing and manipulation, image based lighting and rendering, high dynamic range, single view reconstruction, photo quality assessment, non photorealistic rendering, the use of Internet-scale data, and more. Students are encouraged to capture and process their own data. Prerequisites: previous programming experience, basic linear algebra, calculus, and probability; previous knowledge of computer graphics or computer vision. Strongly recommended: CSCI 1230, CSCI 1430, ENGN 1610

Covers the fundamental concepts, principles, and abstractions that underlie the design and engineering of computer systems. Topics include computer systems organization, modularity, virtualization, communications, atomicity, fault tolerance, security, and performance. Combined lectures and presentation and discussion of case studies. Several hands-on labs and written assignments, as well as a semester-long project that is incrementally worked on throughout the semester. Prerequisites: CSCI 0160, 0180, or 0190, or permission of the instructor

This course covers all aspects of web application development, including the initial concept, user-centric design, development methodologies, front and back end development, databases, security, testing, load testing, accessibility, and deployment. There will be a substantial team project. The course is designed for students with a programming background (equiv CSCI 0320/CSCI 0330) who want to learn how to build web applications, and for students with a background in web design, including HTML and Javascript, who are interested in learning how to extend design techniques to incorporate the technologies needed in modern web applications. Project teams will consist of students with both backgrounds

Explores the visual and human-computer interaction design process for scientific applications in Brown’s immersive virtual reality Cave. Joint with RISD, Computer Science and design students learn how to work together effectively; study the process of design; learn about scientific problems; create designs applications; critique, evaluate, realize and iterate designs; and demonstrate final projects. Instructor permission required

CSCI 1380. Distributed Computer Systems.
Explores the fundamental principles and practice underlying networked information systems, first we cover basic distributed computing mechanisms (e.g., naming, replication, security, etc.) and enabling middleware technologies. We then discuss how these mechanisms and technologies fit together to realize distributed databases and file systems, web-based and mobile information systems. Prerequisite: CSCI 0320

CSCI 1410. Introduction to Artificial Intelligence.
Theoretical and practical approaches to designing intelligent systems. Example tasks range from game playing to hardware verification. Core topics include knowledge representation, search and optimization, and automated reasoning. Application areas include natural language processing, machine vision, machine learning, and robotics. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; and CSCI 0220

CSCI 1430. Introduction to Computer Vision.
How can we program computers to understand the visual world? This course treats vision as inference from noisy and uncertain data and emphasizes probabilistic and statistical approaches. Topics may include perception of 3D scene structure from stereo, motion, and shading; segmentation and grouping; texture analysis; learning, object recognition; tracking and motion estimation. Strongly recommended: basic linear algebra, calculus, and probability

CSCI 1460. Introduction to Computational Linguistics.
Introduction to computational linguistics (also known as natural-language processing) including the related mathematics and several programming projects. Particular topics include: language modeling (as used in e.g., speech recognition, machine translation), machine translation, part-of-speech labeling, syntactic parsing, and pronoun resolution. Mathematical techniques include basic probability, noisy channel models, the EM (Expectation-Maximization) algorithm, hidden Markov models, probabilistic context-free grammars, and the forward-backward algorithm. Not open to first year students

CSCI 1480. Building Intelligent Robots.
How do robots function autonomously in dynamic, unpredictable environments? This course focuses on programming mobile robots, such as the iRobot Roomba, to perceive and act autonomously in real-world environments. The major paradigms for autonomous control and robot perception are examined and compared with robotic notions in science fiction. Prerequisites: CSCI 0150, CSCI 0170 or CSCI 0190. Recommended: CSCI 1410 or CSCI 1230. Enrollment limited to 20

CSCI 1490. Introduction to Combinatorial Optimization.
This course covers the algorithmic aspects of optimizing decisions in fully observable, non-changing environments. Students are introduced to state-of-the-art optimization methods such as linear programming, integer programming, local search, and constraint programming. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0510; and CSCI 0530 or MATH 0520 or MATH 0540

CSCI 1510. Introduction to Cryptography and Computer Security.
This course studies the tools for guaranteeing safe communication and computation in an adversarial setting. We develop notions of security and give provably secure constructions for such cryptographic objects as cryptosystems, signature schemes and pseudorandom generators. We also review the principles for secure system design. Prerequisites: CSCI 0220 and CSCI 0510

This course introduces students to applications of probabilistic and statistical methods to the design and analysis of algorithms, in particular randomized algorithms and probabilistic analysis of algorithms. The course covers basic probabilistic techniques such as tail bounds, martingales, coupling, etc., and presents applications of randomized and probabilistic analysis techniques in areas such as graph algorithms, data structures, communication, and Monte Carlo simulations. No prior knowledge of probability theory is assumed. CSCI 1570 recommended but not required

CSCI 1570. Design and Analysis of Algorithms.
A single algorithmic improvement can have a greater impact on our ability to solve a problem than ten years of incremental improvements in CPU speed. We study techniques for designing and analyzing algorithms. Typical problem areas addressed include numerical computing, hashing, searching, dynamic programming, graph algorithms, network flow, and string parsing and matching. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190, and CSCI 0220

CSCI 1580. Information Retrieval and Web Search.
Covers traditional material as well as recent advances in information retrieval (IR), the study of indexing, processing, and querying of textual data. The focus will be on newer techniques geared to hypertext
CSCI 1590. Introduction to Computational Complexity. Introduction to serial and parallel models of computation; time and space complexity classes on these models; the circuit model of computation and its relation to serial and parallel time complexity; space-time tradeoffs on serial computers; area-time tradeoffs on the VLSI computational model; interactive and probabilistically checkable proofs; the definition of NP in terms of probabilistically checkable proofs; hardness of approximations to solutions to NP-hard problems. Prerequisite: CSCI 0510

CSCI 1600. Introduction to Embedded and Real-Time Software. Comprehensive introduction to the design and implementation of software for programmable embedded computing systems, those enclosed in devices such as cellular phones, game consoles, and car engines. Includes the overall embedded real-time software design and development processes, as well as aspects of embedded hardware and real-time, small-footprint operating systems. Major project component. Prerequisites: CSCI 0320 or 0360

CSCI 1610. Building High-Performance Servers. In depth study of modern server design. Considers architectures for building high-performance, robust, scalable, and secure network servers. We will consider all aspects of "mission-critical" servers. Topics include multithreaded and asynchronous programming techniques, database access, performance profiling, security, and redundancy. Teams will build significant projects. Prerequisite: CS 32 or 36. CS 167 or 168 is recommended

CSCI 1660. Introduction to Computer Systems Security. This course teaches principles of computer security from an applied viewpoint and provides hands-on experience on security threats and countermeasures. Topics include code execution vulnerabilities (buffer overflow, sandboxing, mobile code), malware (trojans, viruses, and worms), access control (users, roles, policies), cryptosystems (hashing, signatures, certificates), network security (firewalls, TLS, intrusion detection, VPN), and human and social issues. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190

CSCI 1670. Operating Systems. Covers not just the principles of operating systems but the intricacies of how they work. Topics include multithreaded programming, managing threads and interrupts, managing storage, processor scheduling, operating-system structure, virtualization, security, and the design of file systems (both local and distributed). Extensive examples are taken from actual systems, including Linux and Windows. Students are expected to complete both problem sets and programming assignments (in C). Prerequisite: CSCI 0320

CSCI 1680. Computer Networks. Covers the technologies supporting the Internet, from Ethernet and WiFi through the routing protocols that govern the flow of traffic and the web technologies that are generating most of it. A major concern is understanding the protocols used on the Internet: what the issues are, how they work, their shortcomings, and what improvements are on the horizon. Prerequisite: CSCI 0320, CSCI 0360, or consent of instructor

CSCI 1690. Operating Systems Laboratory. Half-credit course intended to be taken with CSCI 1670. Students individually write a simple operating system in C. Serves to reinforce the concepts learned in 1670 and provides valuable experience in systems programming. Corequisite: CSCI 1670

CSCI 1730. Introduction to Programming Languages. Explores the principles of modern programming languages by implementation. Examines linguistic features, especially control operators such as first-class functions, exceptions, and continuations. Studies data and their types, including polymorphism, type inference, and type soundness. Examines compiler and run-time system topics: continuation-passing style and garbage collection. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. Preferred: CSCI 0220, CSCI 0310 and CSCI 0510, or instructor's permission

CSCI 1760. Introduction to Multiprocessor Synchronization. This course examines the theory and practice of multiprocessor synchronization. Subjects covered include multiprocessor architecture, mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, load balancing, concurrent data structures, and transactional synchronization

CSCI 1780. Parallel and Distributed Programming. Covers the practical aspects involved in designing, writing, tuning, and debugging software designed to run on parallel and distributed systems. Topics might include client-server computation, threads, networks of workstations, message passing, shared memory, partitioning strategies, load balancing, algorithms, remote procedure call, and synchronization techniques. Prerequisites: CS 22 and either 32 or 36; 51 recommended

CSCI 1800. Cybersecurity and International Relations. The global Internet shortens distances, makes businesses more efficient and facilitates greater social interaction. At the same time, it exposes vital national resources to exploitation and makes it easier for the international criminal element to prey on innocent Internet users. Cybersecurity is concerned with making the Internet a more secure and trustworthy environment. In this course, we study this topic from the technological and policy points of view. The goal is to facilitate communication across the divide that normally characterizes the technological and policy communities. Enrollment limited to 30. LILE WRIT

CSCI 1810. Computational Molecular Biology. Processing molecular biology data (DNA, RNA, proteins) has become central to biological research and a challenge for science research. Important objectives are molecular sequence analysis, recognition of genes and regulatory elements, molecular evolution, protein structure, comparative genomics. This course models the underlying biology in the terms of computer science and presents the most significant algorithms of molecular computational biology. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190, and CSCI 0220, or consent of instructor

CSCI 1820. Algorithmic Foundations of Computational Biology. The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP's variation. The course is open to computer and mathematical sciences students as well as biological and medical sciences students. Prerequisites: CS 22 and either 32 or 36; 51 recommended

CSCI 1900. Software System Design. Students identify, design, and implement significant software applications and learn and practice techniques of project management, requirements, specification, analysis, design, coding, documentation, testing, maintenance, and communication. Prerequisite: CSCI 0320

CSCI 1950A. Computational Modeling and Algorithmic Thinking. In this course you will learn how to apply tools from statistics and computer science to build computational models of physical and biological systems. Example applications include modeling and then simulating the behavior of a collection of genes, the spread of disease in a population, a single neuron in isolation or the complex of neurons comprising the primate visual cortex

CSCI 1950B. Computational Topology and Discrete Geometry. This course will investigate (through a mixture of lectures and student presentations of recent papers) topics in computational topology, including Morse theory and discrete differential geometry. Other possible topics are knot polynomials, simplicial homology, and geometric probability theory. Some mathematical sophistication and programming skills required. No prerequisites

CSCI 1950C. Advanced Programming for Digital Art & Literature. This workshop will explore advanced tools and techniques for the creation of innovative and expressive works of digital art. Lectures will address the application of best practices from the software design community to the context of artistic practice. In the first section of the course, students will exercise their aesthetic, conceptual, and technical skills on a set of "mini-projects" exploring the analysis, generation and presentation of computationally-augmented literary texts. Assignments will include web-text mining, feature extraction, grammars, generative algorithms, and
statistical techniques. During the second half of the course, students will focus on a larger work of their own design, participating in regular critiques throughout the development cycle. Though assignments will focus on digital literature, a wide range of artistic media will be explored, including sound, image, video, 3D and installation. Collaboration is encouraged. Instructor permission required. Enrollment limited to 18.

**CSCI 1950F. Introduction to Machine Learning.**
How can artificial systems learn from examples, and discover information buried in massive datasets? This course explores the theory and practice of statistical machine learning. Topics include parameter estimation, probabilistic graphical models, approximate inference, and kernel and nonparametric methods. Applications to regression, categorization, and clustering problems are illustrated by examples from vision, language, communications, and bioinformatics. Prerequisites: CSCI 0160, 0180, or 0190, and comfort with basic probability, linear algebra, and calculus.

**Summer only:** Students taking this course during the summer semester must also enroll in the summer version of MATH 0350.

**CSCI 1950H. Computational Topology.**
We will study various algorithmic problems that arise in the study of topological phenomena, such as winding number, turning number, knot polynomials, topology of covering spaces (especially Riemann surfaces), and discrete Morse theory. The mathematical topics will be briefly introduced before we move to computations, but some a priori mathematical sophistication will make the course more valuable to the student. Prerequisite: CSCI 0160, 0180, or 0190.

**CSCI 1950J. Introduction to Computational Geometry.**
Geometric algorithms in two and three dimensions. Algorithmic and geometric fundamentals. Point location, convex hulls, proximity (Voronoi diagrams, Delaunay triangulations), intersections, the geometry of rectangles. Prerequisites: CSCI 0160, 0170, or 0190; and CSCI 0220.

**CSCI 1950K. Innovating Game Development.**
A project-centered course focused on technological, paradigm, and design innovations for game development. As teams, students will propose and implement a project demonstrating a novel technology for gaming. Examines the current state and future of game development through a seminar of speakers active in game development and research. A strong computer science or engineering background is recommended.

**CSCI 1950L. Algorithmic Foundations of Computational Biology.**
The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP's variation. The course is open to computer and mathematical sciences students as well as biological and medical students.

**CSCI 1950M. Advanced Practical Combinatorial Algorithms.**
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

**CSCI 1950N. 2D Game Engines.**
2D Game Engines covers core techniques used in the development 2D game engines. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

**CSCI 1950Q. Programming for the Humanities and Social Sciences.**
A principled introduction to programming for students whose primary interest lies in the humanities and social sciences. Students will propose a substantial project related to their concentrations. They will learn sufficient programming skills to carry out the project, presenting it at the end of the course. The course is a continuation of CSCI 0931, “Introduction to Computation for the Humanities and Social Sciences.” Prerequisite: CSCI 0931. Instructor permission required.

**CSCI 1950R. Compiler Practice.**
This class covers the practice of compiler writing, including lexical analysis, parsing, semantic analysis, code generation, and code optimization. Students design and implement a full compiler modularly for a modern functional language using a modern intermediate representation and modular backend. Instructor permission required. 9999999

**CSCI 1950T. Advanced Animation Production.**
Students will apply knowledge and skills gained in previous animation courses to produce a high quality short animated film as a group. Production will follow the industry standard pipeline that includes modeling, texturing, lighting, animating, rendering, and post production. Interested students will perform preproduction story and concept design prior to beginning of course. Prerequisite: CSCI 1250. Enrollment limited to 15. Instructor permission required.

**CSCI 1950Z. Computational Methods for Biology.**
This course will introduce algorithms from machine learning and combinatorial optimization with a focus on their application to biological data. Topics will include problems in phylogenetic inference, population genetics, and biological interaction networks.

**CSCI 1970. Individual Independent Study.**
Independent study in various branches of Computer Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CSCI 2240. Interactive Computer Graphics.**
Important current topics in computer graphics. Course includes reading and discussing current research papers, multiple assignments and preliminary projects in which students implement recent papers, and a demanding final integrative project done in small groups. Prerequisite: CSCI 0320 or CSCI 0360, and CSCI 1230.

**CSCI 2270. Topics in Database Management.**
In-depth treatment of advanced issues in database management systems. Topics vary from year to year and may include distributed databases, mobile data management, data stream processing and web-based data management. Prerequisite: CSCI 1270.

**CSCI 2310. Human Factors and User Interface Design.**
Covers current research issues involving the implementation, evaluation and design of user interfaces, while also providing a basic background in the fundamentals of user interface evaluation, programming, tools, and techniques. A possible topic is programming and designing device-independent interfaces. Previous topics have included the development of pervasive internet-based interfaces and software visualization. Prerequisite: Consent of instructor.

**CSCI 2330. Programming Environments.**
Programming tools; control and data integration; software understanding and debugging; environments for parallel and distributed programming; reverse engineering; configuration management and version control and debugging. Emphasis on current research areas. Prerequisite: consent of instructor.

**CSCI 2340. Software Engineering.**
Topics in the design, specification, construction and validation of programs. Focus will be on tools to support each of these stages. Course will pay special attention to the concerns raised by the properties of modern software systems including distribution, security, component-based decomposition and implicit control. Recommended: CSCI 1900 or other upper-level systems coursework.

**CSCI 2370. Interdisciplinary Scientific Visualization.**
The solution of scientific problems using computer graphics and visualization. Working in small multidisciplinary groups, students identify scientific problems, propose solutions involving computational modeling and visualization, design and implement the solutions, apply them to the problems, and evaluate their success. Examples include interactive software systems, immersive CAVE applications, or new applications of existing visualization methods. Prerequisites: all; programming experience; CS students: graphics experience; others: problem ideas. Instructor permission required.

**CSCI 2410. Statistical Models in Natural-Language Understanding.**
Various topics in computer understanding of natural language, primarily from a statistical point of view. Topics include: hidden Markov models,
word-tagging models, probabilistic context-free grammars, syntactic disambiguation, semantic word clustering, word-sense disambiguation, machine translation and lexical semantics. Prerequisite: CS 141 (CSCI 1410)

CSCI 2430. Topics in Machine Learning.
Machine learning from the artificial intelligence perspective, with emphasis on empirical validation of learning algorithms. Different learning problems are considered, including concept learning, clustering, speed-up learning, and behavior learning. For each problem a variety of solutions are investigated, including those from symbolic AI, neural and genetic algorithms, and standard statistical methods. Prerequisite: CS 141 or familiarity with basic logic and probability theory

CSCI 2440. Game-Theoretic Artificial Intelligence.
This course surveys recent developments in an emerging area known as game-theoretic artificial intelligence (AI), which incorporates fundamental principles of game theory into AI. Research in this area is motivated by game-theoretic applications, such as auction design and voting, as well as AI application areas, such as multiagent systems. Students will conduct theoretical, empirical, and experimental investigations, asking fundamental questions such as: can the behavior of computational learning agents converge to game-theoretic equilibria? Prerequisite: Consent of instructor

CSCI 2500A. Advanced Algorithms.
Typically, an algorithm solves one problem, whereas a well-designed data structure can help implement algorithms for a wide variety of problems. We will study the design, analysis and implementation of advanced data structures. Focus is on data structures that are fast, both theoretically and empirically. Prerequisite: CSCI 1570 or the equivalent

CSCI 2500B. Optimization Algorithms for Planar Graphs.
Planar graphs arise in applications such as road map navigation and logistics, graph drawing and image processing. We will study graph algorithms and data structures that exploit planarity. Our focus will be on recent research results in optimization. Prerequisite: CSCI 1570 or the equivalent

CSCI 2510. Approximation Algorithms.
Approximation Algorithms deal with NP-hard combinatorial optimization problems by efficiently constructing a suboptimal solution with some specified quality guarantees. We study techniques such as linear programming and semidefinite programming relaxations, and apply them to problems such as facility location, scheduling, bin packing, maximum satisfiability or vertex cover. Prerequisite - one of the following: CSCI 1510, 1550, 1810, 1950J, 1950L, any graduate-level course on algorithms (including 2500A, 2500B, 2580)

CSCI 2520. Computational Geometry.
Algorithms and data structures for fundamental geometric problems in two and three dimensions. Topics include point location, range searching, convex hull, intersection, Voronoi diagrams, and graph drawing. Applications to computer graphics, circuit layout, information visualization, and computer-aided design are also discussed. Prerequisite: CS 157 or written permission

CSCI 2530. Design and Analysis of Communication Networks.
A theory seminar focusing on algorithmic and combinatorial issues related to the design and analysis of communication networks for parallel and distributed systems. Topics include packet routing, circuit switching, distributed shared memory, fault tolerance, and more. Prerequisites: CS 155, 157, or equivalent

CSCI 2531. Internet and Web Algorithms.
This advanced graduate course/seminar focuses on the mathematical foundations of algorithms for handling large amounts of data over networks. We will read and discuss recent papers in information retrieval, search engines, link analysis, probabilistic modeling of the web and social networks, and more. Recommended: CSCI 1550 and CSCI 1570, or equivalent courses

Advanced topics in applications of probabilistic methods in design and analysis of algorithms, in particular to randomized algorithms and probabilistic analysis of algorithms. Topics include the Markov chains Monte Carlo method, martingales, entropy as a measure for information and randomness, and more. Prerequisites: CS 155. Recommended but not required: CS 157

The theoretical foundations of parallel algorithms. Analysis of the most important models of parallel computation, such as directed-acyclic computation graphs, shared memory and networks, and standard data-exchange schemes (common address space and message-passing). Algorithmic techniques with numerous examples are cast mostly in the data-parallel framework. Finally, limitations to parallelizability (P-completeness) are analyzed. The content of the course is likely to change as technology evolves

CSCI 2560. Advanced Complexity.
Advanced topics in computational complexity, such as: the polynomial hierarchy, interactive proofs, pseudorandomness, derandomization, probabilistically checkable proofs. 999999

CSCI 2570. Introduction to Nanocomputing.
Nanoscale technologies employing materials whose smallest dimension is on the order of a few nanometers are expected to replace lithography in the design of chips. We give an introduction to computational nanotechnologies and explore problems presented by their stochastic nature. Nanotechnologies based on the use of DNA and semiconducting materials will be explored. Prerequisite: CSCI 0510

The theory of combinatorial optimization and how it is embodied in practical systems. Explores issues encountered in implementing such systems. Emphasizes the wide variety of techniques and methodologies available, including integer programming, local search, constraint programming, and approximation algorithms. Problems addressed may include: scheduling, coloring, traveling salesman tours, and resource allocation. Prerequisites: CSCI 0320 and basic knowledge of linear algebra

CSCI 2590. Advanced Topics in Cryptology.
Semitinal-style course on advanced topics in cryptography. Example topics are zero-knowledge proofs, multi-party computation, extractors in cryptography, universal composability, anonymous credentials and ecash, interplay of cryptography and game theory. May be repeated for credit. Prerequisite: CSCI 1510 or permission of the instructor

CSCI 2730. Programming Language Theory.
Theoretical models for the semantics of programming languages and the verification of programs. Topics include operational semantics, denotational semantics, type theory and static analyses. Recommended prerequisite: CSCI 1730. Instructor permission required

CSCI 2750. Topics in Parallel and Distributed Computing.
CSCI 2750 is a graduate seminar that will consider an advanced topic (to be determined) in distributed computing. May be repeated for credit

CSCI 2820. Medical Bioinformatics.
Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required

CSCI 2890. Comprehensive Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination

CSCI 2950C. Topics in Computational Biology.
This course will investigate active and emerging research areas in computational biology. Topics include cancer genomics; genome rearrangements and assembly; and protein and regulatory interaction networks. The course will be a mixture of lectures and student presentations of recent conference and journal papers

CSCI 2950D. Sensor Data Management.
Sensor networks combine sensing, computing, actuation, and communication in a single infrastructure that allows us to observe and respond to phenomena in the physical and cyber world. The sensors
range from tiny “smart dusts” to dime-sized RFID tags and large-scale weather sensors. This course will cover the state-of-the-art in designing and building sensor networks, focusing on issues that revolve around data and resource management. No prerequisites

CSCI 2950E. Stochastic Optimization.
This advanced graduate course/seminar will focus on optimization under uncertainty, or optimization problems where some of the constraints include random (stochastic) components. Most practical optimization problems are stochastic (subject to future market conditions, weather, faults, etc.), and there has been substantial research (both theoretical and experimental) in efficient solution for such problems. We’ll read and discuss some of the recent works in this area

CSCI 2950F. Implementing Web-Based Software Systems.
CSCI 2950G. Large-Scale Networked Systems.
Exploring widely-distributed systems that take advantage of resources throughout the Internet. The systems leverage their large size and geographic diversity to provide bandwidth scalability, rapid responses, fault-tolerance, high-availability and diverse data collection. Topics include overlay networks, peer-to-peer systems, content distribution networks, distributed file systems and wide-scale measurement systems

CSCI 2950H. Advanced Cryptography.
CSCI 2950I. Computational Models of the Neocortex.
This course addresses the problem of modeling the perceptual neocortex using probabilistic graphical models, including Bayesian and Markov networks, and extensions to model time and change such as hidden Markov models and dynamic Bayesian networks. The emphasis is on problems of learning, inference, and attention. Sources include the literature in computational and cognitive neuroscience, machine learning, and other fields that bear on how biological and engineered systems make sense of the world. Prerequisites: basic probability theory, algorithms and statistics

In this graduate seminar we will learn about models of human cognition and perception, and explore potential implications of the models on how computers and humans can interact effectively when performing scientific analyses. Participants will be responsible for reading assigned materials, taking turns guiding discussions of the readings, and preparing a final paper and presentation. It is recommended that participants have some background in at least one of the areas of study

CSCI 2950K. Special Topics in Computational Linguistics.
Every year will cover different topics in computational linguistics, from a statistical point of view, including parsing, machine translation, conference, summarization, etc. Prerequisites: CSCI 1460 or permission of the instructor

CSCI 2950L. Medical Bioinformatics: Disease Associations, Protein Folding and Immunogenomics.
Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required

CSCI 2950M. Computer Science, Algorithms and Economics.
Course investigates the interplay of economic theory and computer science. It is suitable for advanced senior undergraduates and for graduate students. We will study topics such as: algorithms for selfish routing; competitive combinatorial auctions; Multicast cost sharing and cooperative games; graphical models for games; and related topics. This course will be organized around the presentation of recent research papers. Prerequisites: CS 157 or equivalent

CSCI 2950N. Special Topics in Autonomous Robotics.
No description available

CSCI 2950O. Topics in Brain-Computer Interfaces.
Introduces the mathematical and computational foundations of brain-computer interfaces. Statistical learning, Bayesian inference, dimensionality reduction, information theory, and other topics are presented in the context of brain interfaces based on neural implants and EEG recordings. Prerequisites: Basic knowledge of probability, statistics and linear algebra (e.g., CS 155, AM 40, AM 165, AM 169, or AM 264). Enrollment limited to 20 students

CSCI 2950P. Special Topics in Machine Learning.
This seminar course explores current research topics in statistical machine learning. Focus varies by year, and may include Bayesian nonparametrics; models for spatial, temporal, or structured data; and variational or Monte Carlo approximations. Course meetings combine lectures with presentation and discussion of classical and contemporary research papers. Students will apply some of this material to a project, ideally drawn from their own research interests

CSCI 2950Q. Topics in Computer Vision.
This course will cover current topics in computer vision by focusing on a single real problem in computer vision. Recent courses have focused on forensic video analysis of an unsolved murder and three-dimensional object recognition for a mobile robot. Readings from the literature are integrated with group projects to solve problems beyond the state of the art. Strong mathematical skills (probability, linear algebra, calculus) and previous exposure to computer vision (e.g. CSCI 1430) are essential

CSCI 2950R. Special Topics in Advanced Algorithms.
We will study an advanced topic in the design and analysis of algorithms. Prerequisite: CSCI 1570 or the equivalent

CSCI 2950S. Advanced Practical Combinatorial Algorithms.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission

CSCI 2950T. Topics in Distributed Databases and Systems.
This course explores data and resource management issues that arise in the design, implementation, and deployment of distributed computing systems by covering the state of the art in research and industry. Typical topics include cloud computing and sensor networks. Recommended: CSCI 0320 or equivalent

CSCI 2950U. Special Topics on Networking and Distributed Systems.
Explores current research topics in networking, distributed and operating systems. Specific topics may include wireless and sensor networking, Internet-scale distributed systems, cloud computing, as well as the core problems, concepts, and techniques underlying these systems. The course has two components: reading and discussion of current and classical research papers, and a research project related to the topic but ideally drawn from students’ own research interests. This is a graduate-level course, undergrads can join with the consent of the instructor

CSCI 2950V. Online Algorithms.
Decisions must often be made before the entire data is available. Online algorithms solve problems in which commitments must be made as the data is arriving. Choosing which items to evict from a cache before knowing future requests, which advertisers to consider for displaying ads alongside the result of a search, or which most representative data to store when computing statistics about a huge stream of information. We will discuss the worst-case model, which hinges against the worst possible future data, and some stochastic and game-theoretic models

CSCI 2950X. Topics in Programming Languages and Systems.
Examines contemporary research topics in software construction from the perspectives of programming languages, software engineering and computer-aided verification. The primary goals are to understand which theory applies to which problems and to convert that theory into tools. Topics include security, modularity, and new paradigms in software composition. Prerequisite: CSCI 1730 or written permission of the instructor

CSCI 2950Y. Theorem Proving.
This course explores computer-assisted theorem proving with the Coq Proof Assistant. The course will teach students to formally specify software and model mathematical theories. We will then study techniques for mechanically proving theorems about these Coq. Prerequisites: CSCI 1730 or CSCI 0170 and permission of the instructor
CSCI 2950Z. Robot Learning and Autonomy.
This seminar course will cover current research topics related to perceiving and acting in the real world. These topics will be pursued through independent reading, class discussion, and project implementations. Papers covered will be drawn from robotics, computer vision, animation, machine learning, and neuroscience. Special emphasis will be given to developing autonomous control from human performance. No prerequisites

CSCI 2951A. Robots for Education.
This seminar will explore the potential for robotics to engage future generations of scientists and engineers, with a particular focus on broadening participation in computing across society. Academic papers describing existing models, systems, courses, and evaluation for teaching robotics at undergraduate and secondary levels will be covered through student presentations. A group project will be conducted to find viable and accessible "off-the-shelf" technology solutions suited to teaching robotics without requiring a technical background. Instructor permission required

CSCI 2951B. Data-Driven Vision and Graphics.
Investigates current research topics in image-based graphics and vision. We will examine data sources, features, and algorithms useful for understanding and manipulating visual data. We will pay special attention to methods that harness large-scale or Internet-derived data. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing and image-based rendering. These topics will be pursued through independent reading, class discussion and presentations, and state-of-the-art projects. Strong mathematical skills and previous imaging (vision or computational photography) courses are essential

CSCI 2951C. Autonomous Agents and Computational Market Design.
An important area of research in artificial intelligence is how to effectively automate decision making in time-critical, information-rich environments. Electronic markets are a prime example of such environments. In this course students will create their own simulated electronic market as well as autonomous agents that trade in their market simulation. Application domains will include supply chain management, the Dutch flower auctions, and ad auctions, such as those run by Google and Facebook. Enrollment limited to 40 graduate students

CSCI 2951E. Topics in Computer Systems Security.
This course explores advanced topics and highlights current research in computer security from a systems perspective. Topics include vulnerabilities and defenses for automotive, computing, medical, and industrial control devices, intrusion detection, botnets, secure network protocols, web spam, tracking of web users, JavaScript sandboxing, attacks and defenses for web applications, and security and privacy issues in cloud computing. Research papers and industry reports will be presented and discussed. Also, hands-on experiments and system demonstrations will be performed. CSCI 1660 or equivalent background is essential. Enrollment limited to 12. Instructor permission required

CSCI 2951F. Learning and Sequential Decision Making.
The course explores automated decision making from a computer-science perspective. It examines efficient algorithms, where they exist, as approaches to learning near-optimal decisions from experience. Topics will include Markov decision processes, stochastic and repeated games, partially observable Markov decision processes, and reinforcement learning. Of particular interest will be issues of generalization, exploration, and representation. Each student will be expected to present a published research paper and will participate in a group programming project. Prerequisite: a graduate-level computer science course and some exposure to reinforcement learning from a previous computer-science class or seminar

CSCI 2951G. Computational Protein Folding.
This course investigates the challenges of protein folding from an algorithmic perspective. A mixture of lectures, discussions, and demonstrations is targeted at computer science graduate students (and advanced undergrads) with an interest in biology and physics but no prior experience necessary; students from other departments with expertise in the subject are welcome. This course is forward-looking, and aims to get students rapidly up to speed to conduct research projects

CSCI 2951H. Algorithms for Big Data.
As advances in technology allow for the collection and storage of vast amounts of data, the task of efficiently analyzing the data and assessing the significance of the discoveries has become a major challenge in algorithms’ design. This graduate course/seminar deals with algorithmic tools and techniques for the organization, manipulation and processing of large amounts of data. This course focuses on mathematically well founded algorithmic and statistical techniques

CSCI 2955. The Design and Analysis of Trading Agents.
The Dutch Flower Auctions (DFA) clear over 100,000 auctions per day, each lasting on average between 3 and 5 seconds! This semester, we’ll study the mechanism through which the DFA distribute 2/3 of the world’s flowers, focusing on both the sellers’ and buyers’ decision-making processes. More generally, we’ll research ways to automate and optimize decision-making in time-critical, information-rich environments, like the DFA. Undergraduate students require instructor permission, and should have already completed CSCI 0190, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180

CSCI 2956A. Design of Agents for Bidding in Sponsored Search Auctions.
This course investigates the new field of sponsored search auctions. Although students will be exposed to the field from the point of view of both the search engine and the advertiser, the course’s focus is on advertising bidding algorithms. The students will implement novel bidding agents, and the course will culminate in a competition among the students’ agents. Undergraduate students who obtained permission from the instructor or completed CSCI 0910, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180 can register for the course. CSCI 1410 is a co-requisite

CSCI 2956R. Multiplicative-Weights/Packing-Covering Method for Approximating Linear and Semidefinite Programs.
We will study the method called, variously, multiplicative weights and packing-covering. We will in particular investigate the use of this method for finding approximately optimal solutions to linear programs and semidefinite programs. Prerequisite: A graduate-level course on algorithms. Enrollment limited to 10. Instructor permission required

CSCI 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

CSCI 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

CSCI XLIST. Courses of Interest to Concentrators in Computer Science.
Fall 2012
The following courses may be of interest to students concentrating in Computer Science. Please check with the sponsoring department for times and locations.

Spring 2013
The following courses may be of interest to students concentrating in Computer Science. Please check with the sponsoring department for times and locations.

Development Studies
Development Studies is an interdisciplinary program whose main mission is to provide students with the knowledge, critical perspectives and skills they need to reflexively engage with the issues and problems of international development, especially as they relate to the Global South. Drawing on a range of disciplines, from anthropology to economics, from comparative literature to engineering, concentrators design their own programs, combining courses that offer local and historical knowledge with those that explore transnational dimensions of development.

For additional information, please visit the program’s website: http://www.watsoninstitute.org/ds/
Development Studies Concentration Requirements

Development Studies examines the interaction of social, economic and political development in contemporary societies and is therefore, necessarily an interdisciplinary enterprise. Development Studies concentrators develop the skills and knowledge best suited to their chosen geographical area of interest, emphasizing what is historically and culturally distinctive about the region and how its development reflects general processes of socio-economic change. While the concentration produces graduates with expertise in the study of development, most concentrators combine their course work with first-hand experience in the developing world. Course selection should balance analytic training with local and historical knowledge. Therefore, courses must be taken in at least three social science disciplines to achieve an interdisciplinary approach to these processes of change.

Since study abroad is a potentially important part of the concentration, the possibility of spending part or all of the junior year in a developing world country should be discussed with concentration advisors and the Office of International Programs at the earliest possible time. Acquisition of relevant foreign language skills is also considered an important part of training in the study of development, although language courses cannot count for concentration.

All Development Studies concentrators are required to demonstrate competency in a foreign language to the 0600 level and to incorporate their language into the senior project.

Disciplinary courses deal with the theory and study of development within a given discipline. Students will take at least two of these by the end of the junior year, focusing on different developing regions. Substitutions must be approved by the Deputy Director. The advanced seminar course related to development will focus on the developing world; if that is not possible, DS concentrators are encouraged to write course papers that make the link with development.

At least TWO of the elective courses on developing regions must focus specifically on regions in the developing world. A list of pre-approved electives will be provided.

All concentrators must produce a senior project. Students should enroll in (with their primary advisor as their instructor) while working on their thesis. Group projects undertaken by up to three students can constitute a senior project but are not eligible for honors. The non-thesis senior research project can consist of a video or audio documentary, provided that documentary is based on an analytical framework and a background chapter. If the senior thesis contains a documentary, by the end of the junior year students are required to take two of the following courses in Modern Culture and Media:

- MCM 0100 Introduction to Modern Culture and Media
- MCM 0710 Introduction to Filmmaking: Time and Form
- MCM 1700D Reframing Documentary Production: Concepts and Questions
- MCM 0780 Soundtracks: Sound Production and Visual Media

Other forms of non-thesis projects are subject to the approval of the Director. Approval should be obtained by the end of the first semester of the junior year. If a senior thesis requires the use of quantitative methods, students should take at least one course in statistics for social sciences in any of the following departments: economics, political science, or sociology, by the end of the junior year.

Courses

DEVL 1000. Seminar in Development Studies.
Provides an interdisciplinary introduction to Development Studies. Students will read classic and contemporary texts that present development issues and theories from the perspectives of anthropology, economics, history, political science, and sociology. Efforts to connect theoretical debates to understanding contemporary problems will be encouraged. Reserved for sophomore and junior Development Studies concentrators. If not a DS concentrator, please contact the instructor to obtain an override.

Please note: for spring 2013, interested students must register for SOC 1871D S01 (CRN 23760).

DEVL 1500. Methods in Development Research.
An introduction to the various techniques of research in Development Studies, with a focus on qualitative and field methods. Open to all Development Studies concentrators

DEVL 1600. Tools for Development: From Theory to Practice.
Course gives students a platform to define their roles in the field of development, through hands-on skills building, case studies, and conversations with development practitioners and guest lecturers. This course will prepare students to volunteer for small, grassroots development organizations abroad or in the U.S. in a summer experience following the course. Throughout the semester, students will prepare for their summer experiences by working with their host organizations to design their role descriptions, planning their summer travel and living arrangements, gaining appropriate cultural competency, etc. Prerequisite: DEVL 1000 or SOC 1871D (may be taken concurrently). Enrollment limited to 15 Development Studies concentrators. Instructor permission required

An integrative seminar designed for concentrators working on senior theses. Others with comparable backgrounds may enroll with written permission. Begins with a review of theoretical and methodological literature on development studies. Written and oral presentations of thesis research will be the central focus of the latter part of the course. Reserved for Development Studies seniors

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Reserved for Development Studies seniors

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions

DEVL 2010. Theory and Research in Development II.
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions

DEVL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

DEVL XLIST. Courses of Interest to Concentrators in Development Studies.

Fall 2012
The following courses may be of interest to Development Studies concentrators. Please see the Development Studies website for a list of approved courses.

Spring 2013
The following courses may be of interest to Development Studies concentrators. Please see the Development Studies website for a list of approved courses.
Lefschetz Center for Dynamical Systems

The Lefschetz Center for Dynamical Systems was established by Solomon Lefschetz and J. P. LaSalle at Brown University in the fall of 1964 to carry out a program of basic research and advanced study in the theory and applications of differential equations, dynamical systems and stochastic processes and systems theory. Within its areas, it is one of the leading centers in the world. Areas of application include theoretical mechanics, oceanography, nonlinear optics, plasma physics, stochastic control, and communication theory. Permanent members of the center serve on faculties of the Division of Applied Mathematics, the Division of Engineering, and the Department of Mathematics.

The center attracts distinguished visiting scientists and promising young scientists from the United States and abroad, and has an extensive postdoctoral program.

Members of the center have been supported in their research efforts by the Air Force Office of Scientific Research, the United States Army Research Office, the Office of Naval Research, the National Science Foundation and NASA. The center was dedicated to the memory of Solomon Lefschetz in August, 1974.

For additional information please visit the Center’s website at: http://www.dam.brown.edu/lcds/

Early Cultures

The Program in Early Cultures (until recently called the Program in Ancient Studies) was founded in the late 1970s, when faculty in various academic units sought new ways to foster collaboration and promote the study of ancient civilizations among Brown's students. It is a Program of rich collaboration, critical exploration, and truly interdisciplinary scholarship that seeks to bring together all those at Brown (faculty, graduate students, undergraduates, and staff) who are interested in the cultures, religions, and histories of ancient civilizations. Geographically, the “ancient world” represented at Brown comprises early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds as well as the Pre-Columbian Mesoamerican civilizations.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Early_Cultures/

Early Cultures Concentration Requirements

The Program in Early Cultures is an interdisciplinary concentration that integrates the cultures, religions, and histories of ancient civilizations. Geographically, the ancient world includes early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds, and the Pre-Columbian Mesoamerican civilizations. Students in Early Cultures gain in-depth knowledge of the history, religions, languages, and literatures of two or more ancient civilizations. In consultation with a concentration advisor, students design their own areas of study. Examples of possible topics include: cultural contacts between Greece and Egypt/West Asia; animal sacrifice in Greece and Israel; comparative legal studies: Israel, Hatti, and Mesopotamia; gender roles in Rome and Egypt; Wisdom literature in Egypt, Israel, and Mesopotamia; and the historiography of the exact sciences in India and Greece.

Faculty from a variety of academic units (Anthropology, Classics, Comparative Literature, Egyptology, History, History of Art and Architecture, the Joukowsky Institute for Archaeology and the Ancient World, Judaic Studies, Philosophy, Religious Studies) offer courses relevant to Early Cultures.

Concentration patterns:
1. Ancient History (standard and honors)
2. Ancient Religions (standard and honors)
3. Languages and Literatures of Greece, Rome, North Africa, pre-Islamic West and South Asia (honors only)

General Requirements

Each nonhonors concentrator will choose to focus on one or two ancient history or ancient religions and will complete the Concentrators Seminar (ERLY 1000) in both the junior and the senior years, and eight other courses, four in each of two civilizations, or eight in a variety of civilizations.

Honors Requirements:
1. Ancient History or Ancient Religions (total of up to 12 courses)
   A. The Concentrators Seminar (ERLY 1000) in both the junior and senior years
   B. Two courses on the history or religions of two civilizations (four courses)
   C. Two courses in one ancient language
   D. Two related courses
   E. The honors thesis (one or two courses)
2. A. Languages and Literatures of Greece, Rome, North Africa, pre-Islamic West and South Asia (total of up to 12 courses)
   i. The Concentrators’ Seminar (two courses)
   ii. Two 1000-level courses requiring knowledge of Greek or Latin; and two courses requiring knowledge of Egyptian, Hebrew, Aramaic, Akkadian, Sanskrit, or Phoenician (Four courses: two of each of two languages)
   iii. Two courses in the literature or culture associated with each of the two languages (For one of these languages, the two courses must be at the advanced level)
   iv. The honors thesis (one or two courses)
B. Languages and Literatures of North Africa and pre-Islamic West, South, or East Asia (total of up to 12 courses)
   i. The Concentrator’s Seminar (two courses)
   ii. Two courses requiring knowledge of two different North African, West or South Asian languages: Egyptian, Hebrew, Aramaic, Akkadian, Phoenician, Sanskrit or Chinese. For one of these languages, the two courses must be at the advanced level. (Four courses: two of each of two languages.)
   iii. Two courses in the literature or culture associated with each of the two languages (four courses: two each for two languages),
   iv. The honors thesis (one or two courses)

Courses

Interested students must register for AWAS 0300 S01

ERLY 0530. Judaism, Christianity, and the Bible (JUDS 0530).
Interested students must register for JUDS 0530 S01

ERLY 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).
Interested students must register for CLAS 0990 S01

ERLY 1000A. Writing History in the Ancient World.
The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history, investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations. Instructor permission required
The Department offers several tiers of instruction in Chinese and economic ties extend throughout the globe. A vibrant community whose civilizations reach back several millennia and whose cultural and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vitally important corner of the world, and medival (German, French, Hispanic, and Slavic) worlds. Additional issues to be discussed include orality and literacy, cultural memory, and the social function of poetry in changing conditions. Texts in translation

ERLY 1000D. Highways and Byways in Antiquity. No description available

ERLY 1000E. The Gift in Antiquity (RELS 1880A).
Interested students must register for RELS 1880A

ERLY 1120G. The Idea of Self (CLAS 1120G).
Interested students must register for CLAS 1120G S01

ERLY 1410. Ancient Egyptian Literature (EGYT 1410).
Interested students must register for EGYT 1410 S01

ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420).
Interested students must register for EGYT 1420 S01

ERLY 1500. Ancient Babylonian Magic and Medicine (AWAS 1500).
Interested students must register for AWAS 1500 S01

ERLY 1700. Astronomy, Divination and Politics in the Ancient World (AWAS 1700).
Interested students must register for AWAS 1700 S01

ERLY 1750K. Madwomen and Lovers (CLAS 1750K).
Interested students must register for CLAS 1750K S01

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Required of seniors in the honors program. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ERLY 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).
Interested students must register for GREK 2110F S01

East Asian Studies

Chair
Kerry Smith

The 21st century has turned to Asia as a center of international trade, culture, and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vitally important corner of the world, whose civilizations reach back several millennia and whose cultural and economic ties extend throughout the globe. A vibrant community of teachers and undergraduates who work closely together in the spirit of free inquiry, the Department of East Asian Studies embodies Brown’s unique mission “to serve the community, the nation and the world.”

The Department offers several tiers of instruction in Chinese, Japanese and Korean, with courses designed to accommodate students ranging from those who have never taken a class in the language before to those hoping to hone their abilities at the highest levels. East Asian Studies also offers Brown students the opportunity to explore the visual, textual and religious cultures of East Asia through introductory and advanced courses on literature, film, pilgrimage and translation, among others.

For additional information, please visit the department’s website: http://www.brown.edu/academics/east-asian-studies/

East Asian Studies Concentration Requirements

East Asian Studies is a multidisciplinary concentration designed for students wishing to attain reasonable fluency in Chinese, Japanese, or Korean with specialized exposure to selected East Asian subjects. It serves students with two types of interests: those who aim to pursue active professional careers related to the East Asian region; and those who want to pursue graduate study in the humanities or social sciences with particular emphasis on China, Japan or Korea. Students in East Asian Studies will gain language proficiency and a familiarity with East Asia through advanced courses in a variety of disciplines. Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters. The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean.

Concentrators’ academic experiences should culminate in their senior project. Concentration advisors will guide and supervise in the planning of individual concentrations to ensure the development of coherent programs of study.

The Language Requirement

The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean. For the purposes of the concentration, proficiency is determined to be consistent with successful completion of the Department’s third-year course sequence in either Chinese or Japanese (0500-0600), or its equivalent. Native speakers of those languages may, for example, demonstrate competency such that language courses may be unnecessary. Department language instructors may also determine that course work completed at one of the language-intensive study abroad programs attended by our undergraduates is comparable to courses offered at Brown. Because the Department normally only offers the first two years of Chinese, students wishing advanced instruction in that language must normally do so as part of a study abroad program. Note that we do not equate completion of third-year Chinese, Japanese, or Korean with fluency in these languages. Rather, we believe that students who have demonstrated the skills associated with third-year Chinese, Japanese, or Korean can acquire a foundational understanding of the languages’ grammar, vocabularies, and conversational patterns, such that they are able to make themselves understood in everyday situations, and to understand both spoken and written communication.

For the purposes of the concentration, language courses through the third-year are treated as an accompanying requirement.

Required Introductory Surveys

All concentrators are required to complete successfully both HIST 0410 “Introduction to East Asian Civilization: China” and HIST 0420 “Introduction to East Asian Civilization: Japan”. Both courses are offered annually by the History Department; HIST 0410 in the fall, and HIST 0420 in the spring. These courses offer chronologically broad surveys of Chinese and Japanese history. They are required for concentrators in order to provide them with common frameworks for thinking about historical change in East Asia, and to raise an awareness of issues and developments outside of their particular geographical or temporal areas of focus. Department faculty are also aware that many undergraduates come to Brown with backgrounds in “Western Civilization” and North American history, but little if any exposure to the histories and cultures of East Asia, and believe that these courses play an important role in addressing those deficits. We encourage students to take these introductory courses early in their careers at Brown.

Content/Topics Courses

The revised concentration requires seven courses in addition to HIST 0410 and HIST 0420. At least one elective must fall outside the primary focus of the concentrator’s course of study, which may be defined in linguistic, chronological, thematic or cultural terms. One of the seven electives may, with the consent of the concentration advisor, be a course typically unrelated to East Asia, but beneficial to the student’s disciplinary and/or theoretical interests.
As is common for interdisciplinary concentrations, a wide range of courses, including many taught by faculty in other departments, may be counted toward the concentration. These include courses offered by East Asian Studies faculty, faculty with courtesy appointments in the Department, and courses with a significant focus on East Asia offered in such disciplines as Archeology, Anthropology, Economics, International Relations, and others.

**Advanced seminars**

At least one of the seven elective courses must be an advanced research seminar, typically taken in the junior or senior year. The research seminar will normally provide students with the opportunity to develop a project or paper focusing on one or more of their areas of inquiry within the concentration. Students are strongly encouraged to find ways to incorporate the use of Chinese, Japanese or Korean language materials in their research and learning in these courses. Courses falling into this category include but are not limited to the East Asian Studies 1950 series and History 1970 series. The Department will provide a list of pre-approved advanced seminars every semester. Students wishing to add courses to that list must submit their requests in writing to the Undergraduate Advisor at the start of the semester.

**Summary of requirements:**

- Language study through the level of 0600 or the equivalent of Chinese, Japanese, or Korean (normally as part of a study abroad program)
- HIST 0410 Introduction to East Asian Civilizations: China
- HIST 0420 Introduction to East Asian Civilizations: Japan
- Seven elective courses
- At least one of the seven must be an advanced seminar
- At least one of the seven must fall outside the primary focus of the concentrator’s course of study
- EAST 1930 - EAST 1940 (Senior Thesis seminar) for Honors candidates only

Students who are interested in developing a double concentration, including East Asian Studies as one of the two concentrations, should bear in mind that normally no more than two courses may be double-counted toward satisfying the course requirements of either of the two concentration programs involved.

Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters during their undergraduate years. Course credits earned abroad are generally transferable to Brown. However, a maximum of three courses taken abroad, of genuine intellectual substance and significantly related to East Asian Studies, may be considered for concentration credit.

**Courses**

**Chinese**

**CHIN 0100. Basic Chinese.**

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of course work in CHIN 0200 covers the entire year and is recorded as the final grade for both semesters.

**CHIN 0150. Advanced Beginning Chinese.**

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in CHIN 0250 covers the entire year and is recorded as the final grade for both semesters.

**CHIN 0200. Basic Chinese.**

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the second half of a year-long course. Students must have taken CHIN 0100 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0100. If CHIN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**CHIN 0250. Advanced Beginning Chinese.**

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the second half of a year-long course. Students must have taken CHIN 0150 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0150. If CHIN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**CHIN 0300. Intermediate Chinese.**

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

**CHIN 0400. Intermediate Chinese.**

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0300 or permission of instructor.

**CHIN 0500. Advanced Modern Chinese I.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0250 or CHIN 0400 or permission of instructor.

**CHIN 0600. Advanced Modern Chinese I.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0500 or permission of instructor.

**CHIN 0700. Advanced Modern Chinese II.**

This course is designed to enhance the Chinese proficiency of those who have taken Advanced Modern Chinese I (CHIN 0600) or the equivalent. All four language skills are emphasized through selected authentic materials. At the end of the year, students should be able to express their ideas with sophistication and nuance. Drills on complex sentence patterns will be conducted when necessary. Prerequisite: CHIN 0600 or permission of Instructor.

**CHIN 0800. Advanced Modern Chinese II.**

See Advanced Modern Chinese II (CHIN 0700) for course description. Prerequisite: CHIN 0700 or permission of instructor.

**CHIN 0910A. Academic Chinese I.**

This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Through reading and discussing literature, newspaper and magazine articles, and academic writings, students will gain a better understanding of traditional and modern China. Prerequisite: CHIN 0800 or permission of the instructor.

**CHIN 0910B. Introduction to Classical Chinese.**

A course aiming to provide the basics of reading Classical Chinese, its grammar, syntax, vocabulary, and word usage. As much as possible, we will use modern Chinese to explicate and discuss classical texts. Readings are original passages from texts dating from the Eastern Zhou to Former Han, 770 BCE to 25 AD, that introduce students to the cultural world of early China. Prerequisite: CHIN 0600 or permission of the instructor.
CHIN 0910C. Introduction to Modern Chinese Prose.
Students will pursue their ability to appreciate and use various Chinese writing styles by reading and analyzing modern Chinese prose classics. Classes include lecture, discussion and group or individual presentations. By the end of the semester, students will be familiar with the development of modern Chinese prose, understand the language and meaning of each text, be comfortable with different writing styles and techniques, and have a deeper understanding of Chinese thought, society, and culture via the writers and their masterpieces. Conducted in Mandarin Chinese; designed for students with advanced language skills. Prerequisites: CHIN 0800 or the equivalent

CHIN 0920A. Advanced Reading and Writing in Chinese.
This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Masterpieces by statesmen, economists, historians, scientists, literary critics, and sociologists will be analyzed and discussed. Focus will be on the training of both analytical ability and writing skills. Prerequisite: CHIN 0800 or permission of the instructor

CHIN 0920B. Classical Chinese.
This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century CE. Prerequisite: CHIN 0910B. Instructor permission required

In order to develop advanced reading proficiency and formal oral and writing communication skills, students will listen to and read current news reports and commentaries from various Chinese media sources, such as TV broadcasts, newspapers, magazines, and websites. Through reading and discussion, students will gain a better understanding of a wide range of current issues in a rapidly changing China, including: economics, politics, education, and popular culture. General knowledge of Chinese newspapers, Chinese journalistic writing styles and basic vocabulary and grammatical structures used in the press will also be introduced throughout the course. Course format varies from lecture, discussion, and debate, to interviews and group or individual presentations. Prerequisites: CHIN 0800 or the equivalent. Enrollment limited to 18

CHIN 0920D. Business Chinese.
Business Chinese focuses on practical language skills that are most useful in business interactions in Chinese-speaking communities. Classroom activities are largely based on authentic documents and correspondence as well as a textbook. Through intensive practice in the listening, speaking, reading and writing of the Chinese language for business purposes, this course aims at enhancing students' linguistic knowledge in a business context. Classes are conducted in Chinese. Prerequisite: CHIN 0800 or instructor permission. Enrollment limited to 18

CHIN 1040. Modern Chinese Literature.
Introduces students to the most representative writers in 20th century China. Emphasizes textual and historical analyses. Major issues include Westernization, nationalism, revolution, class, gender, and literary innovations. Designated primarily as a literature course, rather than a language class, and conducted entirely in Mandarin Chinese. Prerequisite: CHIN 0800. Instructor permission required

CHIN 1041. Modern and Contemporary Chinese Literature and Film.
Through reading primary texts and watching Chinese films, this course presents history and politics of modern and contemporary China in complex interaction with literature and art. This develops students’ skills of processing primary materials through reading, listening, speaking and writing and promote their understanding of 20th century China. Students must have the language skills necessary to read primary texts and watch films in Chinese. Not open to first year students

CHIN 1910. Independent Study
Reading materials for research in Chinese. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

CHIN 2450. Exchange Scholar Program.

East Asian Studies

EAST 0020. Introduction to Chinese Art and Culture (HIAA 0040).
Interested students must register for HIAA 0040 S01

Interested students must register for RELS 0040 S01

EAST 0100. Introduction to Buddhism (RELS 0100).
Interested students must register for RELS 0100 S01

EAST 0110. Ancient China: Art and Archaeology (HIAA 0110).
Interested students must register for HIAA 0110 S01

Interested students must register for ARCH 0160 S01

This course is an introduction to Japanese culture and aesthetics as represented in pre-modern literature, drama, visual arts, tea practices, and martial arts. Recurring themes include Japanese attitudes toward the natural world; religious elements in traditional conceptions of beauty; and the function of ritual and mindfulness in artistic cultivation. The course is designed for students who have no previous exposure to Japanese studies at the college level; no prerequisites

Interested students must register for RELS 0190 S01

EAST 0200. Chinese Scholar Ink Painting (HIAA 0200).
Interested students must register for HIAA 0200 S01

EAST 0210. Chinese Painting during the Song Dynasty (HIAA 0210).
Interested students must register for HIAA 0210 S01

EAST 0290E. Engaged Buddhism (RELS 0290E).
Interested students must register for RELS 0290E S01

EAST 0410. Introduction to East Asian Civilization: China (HIST 0410).
Interested students must register for HIST 0410 S01

EAST 0420. Introduction to East Asian Civilization: Japan (HIST 0420).
Interested students must register for HIST 0420 S01

EAST 0540. Introduction to Contemplative Studies (UNIV 0540).
Interested students must register for UNIV 0540 S01

EAST 0610A. The Far Side of the Old World: Perspectives on Chinese Culture (COLT 0610A).
Interested students must register for COLT 0610A S01

Interested students must register for COLT 0710U S01

Interested students must register for JAPN 0910D S01

EAST 0950A. Turning Japanese: Constructing Nation, Race and Culture in Modern Japan.
This first year seminar focuses on Japan’s experiences with historical processes and concepts which have transformed the modern world. These include the creation of the nation as the fundamental structure for social and political organization, as well as the evolution and implications of beliefs and practices associated with race, culture and tradition. Participants will work with primary sources and scholarly analysis from diverse disciplinary perspectives. Enrollment limited to 20 first year students. FYS WRIT

EAST 0950B. The Floating World.
An exploration of selected literary, artistic, and religious works with an eye to understanding Japanese culture and thought of the early modern period (1600-1868). Materials include merchant tracts, samurai codes, Buddhist sermons, Confucian disquisitions, woodblock prints, drama, and fiction. No prerequisites. Enrollment limited to 20 first year students. FYS

EAST 0971C. China in the Literature of Travel (HIST 0971C).
Interested students must register for HIST 0971C S01
EAST 0980A. Taiwan: Crossroads of World History (HIST 0980A). Interested students must register for HIST 0980A S01

EAST 1010. From Basho to Banana: Four Centuries of Japanese Literature. This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them—Edo merchant culture, modernism, the avant-garde, mass culture and postmodernism, among others. Writers covered will include Ibara Saikaku, Jippensha Iku, Higuchi Ichiy, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites. Limited to 20.

EAST 1012. Expanding the Canon: A Survey of 20th Century Japanese Literature. An introduction to major and minor works of Japanese literature produced during the Japanese Empire as well as in post-WWII Japan. Covered writers include canonical novelists such as Tanizaki Junichiro, Kawabata Yasunari, and Oe Kenzaburo, as well as writers lesser known outside of Japan today, including women, queers, revolutionaries and colonial-resident Korean shoji DVP5 LILE.

EAST 1040A. Arts of Imperial Song (HIAA 1040A). Interested students must register for HIAA 1040A S01

EAST 1040H. The Shape of Good Fortune (HIAA 1040H). Interested students must register for HIAA 1040H S01

EAST 1040K. China and the Mongol Empire: Reconfiguring the Yuan Dynasty Paradigm (HIAA 1040K). Interested students must register for HIAA 1040K S01

EAST 1050. The Chinese Novel. The purpose of this course is to help us see how the Chinese novel took shape from popular sources, such as storytelling and drama, how the novel drew on history as well as legend, and how its authors and editors express a distinct world view. The class will cover the "masterworks" of the Chinese novel. Through intensive reading, students can explore notions of the hero and heroism, moral action and, more broadly, history and literature from a comparative perspective. All readings are in English translation. Limited to 20 freshmen and sophomores, or by instructor permission.

EAST 1070. China Modern: An Introduction to the Literature of Twentieth-Century China. A general introduction to modern and contemporary Chinese literature from the May Fourth Movement to contemporary Taiwan and the People's Republic of China. Emphasizes reading of literary works in relation to topics such as cultural tradition, modernity, nationalism, revolution, class, gender, region, cultural commodification, and literary innovations. Readings in English. No previous knowledge of Chinese required.

EAST 1071. Self, Gender, Society, and Nation: 20th Century Chinese Literature in Translation. This survey of 20th century Chinese literature progresses along a chronological ordering of Chinese literature across the late Qing and early Republican, the May Fourth, the Leftist 1930s, the Sino-Japanese war, the Cultural Revolution, and the "Greater China" era of contemporary mainland, Taiwan, and Hong Kong since the 1980s. It maintains historically sensitized on the one hand, and on the other capitalizes the fictional space of self, gender, society and nation that exceeds politics and ideology. Readings are in English; no knowledge of Chinese required.

EAST 1100. Korean Culture and Film. This course aims to introduce and explore various aspects of Korean history, culture and society. Students are expected to develop a comprehensive understanding of Korean culture by examining contemporary films that pertain to issues such as national identity, history, international relations, religion, Korean life style, and family life. Enrollment limited to 20.

EAST 1120J. Essaying the Essay (CLAS 1120J). Interested students must register for CLAS 1120J S01

EAST 1120K. Skeptical Traditions East and West (CLAS 1120K). Interested students must register for CLAS 1120K S01

EAST 1170. Women's Literature in Japan and Korea. This course focuses on Japanese and Korean women's literature from the modern period, giving particular attention to the historical issues and the narrative strategies that play out in celebrated works of women's fiction. The goal of the class is to deepen our understanding of the universal and particular aspects of women's writing in Japan and Korea and at the same time to learn an idiom with which to talk about literary form. Previous coursework in East Asian Studies or Literary Studies is suggested but not required. Instructor permission required.

EAST 1200. Pop, Political and Patrician: Culture in Japan and the Koreans. This course introduces students to the modern cultures of Japan and Korea through an examination of events, artifacts, and cultural practices. The overarching goal of the class is two-fold: to create an alternative narrative to the dominant Orientalized vision of East Asian culture and to deepen our knowledge of the overlapping cultural histories of Japan and Korea. With a broad understanding of culture as a general process of artistic and intellectual development, as a body of material artifacts, and as a social practice of ordinary life, we shall focus our attention on the implications of studying culture in relation to popular media and political activism in particular. Topics covered will include: colonial fiction, the re-creation of tradition, art and atrocity, the proletarian arts, postwar children's culture, the globalization of popular music, myth in the DPRK, shoji print culture, and East Asian activism.

EAST 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context (MCM 1202E). Interested students must register for MCM 1202E S01

EAST 1270. China Through the Lens: History, Cinema, and Critical Discourse. This is a critical introduction to the history of mainland Chinese film. It focuses on three dimensions of cinematic practice: the historical context of film productions, the specific context/form of each film, and the critical reception of Chinese films in film studies. Important themes such as nation, visual modernity, cinematic narrative, and commercialism will be studied across the three dimensions.

EAST 1271. Screening Modern China: Chinese Film and History. From the shadowplay in teahouses in 1896 to the transnational glamour in the global cultural industry, history of Chinese cinema bridges the two fin-de-siecles of the 20th and 21st centuries. The course of screening China interlinks the crisis points of history in relation to a number of topics such as revolution, nationhood, colonialism, and Chinese diaspora. The survey inspects how the representational technology of cinema is indigenized in building the national cinema of China as art of social engagement. Not open to first year students.

EAST 1370. Performances in the Asias (TAPS 1370). Interested students must register for TAPS 1370 S01

EAST 1380. Peasant Rebellion and Popular Religion in China (HIST 1380). Interested students must register for HIST 1380 S01

EAST 1410. Japan: Nature, Ritual and the Arts. This course is an introduction to Japanese cultural and aesthetic traditions as represented in premodern literature, drama, architecture, landscapes, tea practices, and the visual arts. Materials include Japanese aesthetic, literary and dramatic writings in translation; modern scholarly treatments; and selected visual works. The course is designed for students who have no previous exposure to Japanese studies at the college level.

EAST 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan (COLT 1410N). Interested students must register for COLT 1410N S01

EAST 1415A. Classical Daoist Thought (RELS 1415A). Interested students must register for RELS 1415A S01

EAST 1420. The Confucian Mind. This course explores the Neo-Confucian tradition, a pervasive influence in the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.
EAST 1430. Classics of East Asian Buddhism (RELS 1430).
Interested students must register for RELS 1430 S01

Interested students must register for COLT 1430C S01

EAST 1430T. Leaves of Words: Japanese Poetry and Poetics (COLT 1430T).
Interested students must register for COLT 1430T S01

Interested students must register for RELS 1440 S01

EAST 1510A. China’s Late Empires (HIST 1510A).
Interested students must register for HIST 1510A S01

EAST 1520B. Twentieth Century China (HIST 1520B).
Interested students must register for HIST 1520B S01

EAST 1530. Modern Korea (HIST 1530).
Interested students must register for HIST 1530 S01

EAST 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).
Interested students must register for ANTH 1540 S01

Interested students must register for COLT 1810X S01

EAST 1811L. Travel and Tourism through the Ages (COLT 1811L).
Interested students must register for COLT 1811L S01

EAST 1880A. Lao Tzu and Huai-nan Tzu.
This seminar will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the Huai-nan Tzu and will discuss the historical and philosophical origins of Lao Tzu’s Tao te ching, heretofore acknowledged as the foundational text of the Taoist tradition. Prerequisite: RS 88.18 or RS 88.23

EAST 1880C. Zen Meditation in China, Korea, and Japan.
An intensive study of the origin and development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Both kōan and silent illumination styles will be studied in depth. Weekly seminars will study representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students MUST register for the lecture section and a lab. Prerequisites: RELS 0100, RELS 0500, UNIV 0540; or instructor’s permission

EAST 1880D. Early Daoist Syncretism: Zhuang Zi and Huainan Zi.
The final phase of the classical Daoist tradition has been called "syncretist" by Graham, "Huang-Lao" by Lin. It is the version of Daoism carried into the Han dynasty and the one that transmitted the tradition’s earlier works. Casting a broad net we will examine a variety of works from this critical phase including the "Techniques of the Mind" texts in the Guanzi collection, the so-called "Huang-Lao" silk manuscripts from the Han tomb at Mawangdui, certain chapters of the Lushi chunqin, and selections from the Zhuangzi and Huainan Zi. We will examine the ways in which cosmology, self-cultivation, and political thought coalesce in these works

EAST 1910. Independent Study.
Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EAST 1930. Reading and Writing of the Honors Thesis.
Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EAST 1940. Reading and Writing of the Honors Thesis.
Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EAST 1950B. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives.
This seminar course is designed to critically re-evaluate (re)presentations of Chinese women, gender, and feminism in historical, literary, and academic discourses. It examines a diverse body of texts produced through different historical periods and in different geopolitical locations. It emphasizes gender as both a historical construct(s) among competing discourses and as a material process of individual embodiment and disembodiment. The goal of the course is to help advanced students understand Chinese history from a distinctly gendered perspective, to recognize women’s roles in history and writing, and to develop a reflective, cross-cultural approach to gender, politics, and the self

This seminar explores the practices and ideologies associated with the pursuit of justice, state-sanctioned punishment for wrongdoing, and social order in modern Japan (late 19th century to the present). In order to bring these practices and ideologies to light, we will examine precedent-setting criminal and civil trials within their historical contexts, and draw as well on both popular culture (film and fiction) and the rich scholarship on law and legal history in Japan. The course is intended for advanced undergraduates comfortable with the seminar format and workload. There are no specific prerequisites for admission to the seminar, but all things being equal, preference will be given to students with a background in the study of Japan and/or Japanese history. Enrollment limited to 20. Instructor permission required

EAST 1950F. The Karma of Words.
This course is an opportunity for students to further their understanding of East Asian Buddhist attitudes and values by investigating characteristic themes in literature as a whole, rather than by studying formal scriptures and doctrinal tracts. Participants will explore tensions between the religious and poetic impulses and learn to recognize Buddhist symbols in Chinese and Japanese poetry, fiction and plays. Recommended: a course in Asian religions. WRIT

Course focuses on mainland Chinese cultural and media production since the mid 1980’s, when China began transforming itself culturally and economically into a capitalist society with socialist characteristics. Traditional values, socialist legacy, commercial forces, and globalization have all played significant roles in the ongoing transformation. The goal of the course is to examine the complex interactions among diverse historical forces in a rapidly changing China. Course taught in Mandarin Chinese

EAST 1950H. Japanese Short Fiction, Film and Anime: Reading and Translation.
In this seminar/workshop students will read and discuss a broad range of narrative arts from the modern period, as well as practice the art of translating them in dialogue with canonical works of translation theory. Pre-requisites: JAPN 0600 or equivalent. Instructor permission required

EAST 1950I. Revolution and Culture, East Asia and Beyond.
This seminar investigates cultural practices enacted with the aim of social change. Topics include the Soviet avant-garde, race and the American cultural front, gender and proletarian literature in Japan and colonial Korea, as well as issues of propaganda and struggle in the DPRK and China. Instructor permission required

A study of the Chinese story in its social and historical context. The seminar will survey the broad story stereotypes and consider their earlier sources in the classical tale, storytelling, drama, and ritual. All readings are in English translation

EAST 1950K. Losing Yourself in Love in Pre-Modern Chinese Poetry, Fiction and Drama.
A seminar focused on larger-than-life loves in Chinese drama, fiction, and poetry. The course will explore how passion, feeling, and subjectivity was increasingly viewed as essential to human nature and society from the 15th century onward

EAST 1950N. The Love Letter, Fiction and Desire.
A study of the art of the love letter in China of the 16th to 18th centuries. The circulation of letter-writing manuals fueled the rise of letter fiction in China, as it did in Europe in the same period. The seminar will explore how desire serves as a motive for writing to someone far away, an element of the plot, and an end in itself, in comparative and theoretical perspectives. All readings are in English. Enrollment limited to 20
EAST 1950Q. The Art of Dissent.
This seminar investigates the relationship between activism and art in early modern and 20th century Japan and Korea. Historical topics to be discussed in relation to works of fiction, biography, poetry, film and graphic art include the Freedom and People’s Rights Movement, Japanese anarchism, pre-WWI communism, feminism, the Kwangju Uprising and the Minjung Munhak Movement

EAST 1950P. Attachment to Objects in Chinese Literature.
A seminar investigating interactions between objects and literary composition in China of the 12th to 16th century, exploring 3 core issues: 1st, what do writers about objects reveal about notions of literary art and artifice? 2nd, in what ways are material artifacts endowed with aesthetic and personal meaning? 3rd, what literary and extra-literary factors shaped exchanges of poetry and gift-giving as linked forms of social intercourse? Readings in English translation. Instructor permission required

A survey of the evolution of major forms of Chinese lyric poetry beginning with the Shijing (Book of Songs), the breakthrough to 5-character verse in the Han Dynasty, landscape (shanshui) and field and garden (tianyuan) poetry of the 6 Dynasties, and the flowering of the shi form during the Tang Dynasty. Readings will be in Chinese, discussions in English. Previous study of classical Chinese or permission of the instructor required

The swaying vision of 20th century Chinese literature subjugates literature under the command of China as a nation in peril. The strife between the communists and nationalists in China’s “domestic” politics adds another layer of determinism in perceiving literature of modern China. This seminar reflects upon such determinism through the bifocal lens of affect and idea and inspects how the trends of traditionalism, iconoclasm, nationalism and communism are mediated, diverted or subverted through affective experience in literary representation. Readings include creative and critical literature and three weeks engaging with cinema. No knowledge of Chinese required. Enrollment limited to 20 juniors and seniors. Instructor permission required

EAST 1950S. The History, Philosophy, and Practice of Rinzai Zen Buddhism.
Follows origins of Chan Buddhism in China from the legend of Bodhidharma through the Five Houses of Chan and its great flourishing during the Song dynasty to its arrival and developments in Japan and eventual transplanting to the West. Scope includes Daoist foundations, the Buddha-Daoist essays of Seng Zhao, Bodhidharma, the East Mountain Chan of Daonin and Hongren, Huineng and Shenhui, Huangbo, Linji, Dahai and the development of koan, Kanzen Egan in Japan, Ikkyu, Bankei, Hakuin, and Sasaki Joshu. Practices of each of these teachers will be studied in meditation labs. Prerequisites: coursework in Buddhism at Brown; permission of instructor. Enrollment limited to 20

EAST 1950U. South Korean Cinema: From Golden Age to Korean Wave.
This seminar explores the cinema of South Korea, proceeding chronologically and thematically, interrogating the key problematics of gender and genre. We will think about cinema’s role—as a medium for visual storytelling and as a site for producing cultural norms and values—in assessing the consequences of historical events and in helping to construct official histories. Across films from Korean cinema’s “golden age” (1950s and 60s) to post-authoritarian realist cinema to the contemporary era of globalization, transnational genre films, we will map the questions, themes, and debates on the formation and effects of South Korea’s cinematic imaginary of nation. Enrollment limited to 20 juniors and seniors

EAST 1950X. Queer Japan: Culture, History and Sexuality.
This seminar investigates cultural practices enacted by Japanese gays and lesbians, or otherwise related to same-sex attraction. How have sexual identities traditionally been constructed in Japan, and how has the modern period transformed them? How has same-sex sexuality become figured in the Japanese art, literature and popular culture of the 20th century; and how have the forces of a global LGBT culture interacted with the specific experiences of a same-sex community in Japan? This class explores questions about queer history, writing and cultural practice by looking at particular moments in the Japanese past and present

EAST 1950Z. Turning East.
An exploration of pilgrimage and religious quest as it pertains to East Asia, including historical journeys to sacred sites, transformative travel experiences, and literary pilgrimages. Students learn to identify Buddhist paradigms of pilgrimage by reading classic and modern accounts by or about pilgrims, literary works inspired by imagined sites of enlightenment (the proverbial Shangri-la), and case studies of contemporary practices. Some attention to the Orientalism critique, anthropology of pilgrimage, and intersections with tourism. Emphasis on close reading, discussion, analysis. A previous course in Asian culture is helpful, but not required. Counts for concentrations in East Asian Studies and Religious Studies. Enrollment limited to 20 sophomores, juniors, and seniors

Interested students must register for HIST 1970R S01

Interested students must register for HIST 1972Z S01

Interested students must register for HIST 1973J S01

Interested students must register for HIST 1973M S01

EAST 1990. Senior Reading and Research: Selected Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EAST 2450. Exchange Scholar Program.

EAST XLIST. Courses of Interest to Concentrators

Fall 2012
East Asian Studies is a highly interdisciplinary concentration. The following courses in other departments can be taken for concentration credit. Please check the listing of the appropriate department for the time and location of each course.

History
HIST 0410 Introduction to East Asian Civilization: China
HIST 1530 Modern Korea
HIST 1973E Cities and Urban Culture in China, Past and Present
HIST 1973M Outside the Mainstream

Modern Culture and Media
REL 1202i Gangsters, Renegades, Warriors, and Misanthropes: Violence and Sociality in Asian Genre Cinemas

Religious Studies
REL 0120 The Foundations of Chinese Religion
REL 0190 Japanese Religious Traditions
REL 1441 Zen Meditation in China, Korea and Japan

Spring 2013
East Asian Studies is a highly interdisciplinary concentration. The following courses in other departments can be taken for concentration credit. Please check the listing of the appropriate department for the time and location of each course.

Comparative Literature
COLT 1420J The Tale of Genji and its Legacy
COLT 1421O Word and Image: Epiphaxis, the Iconic Narrative, and the Graphic Novel

History
HIST 0420 Histories of East Asia: Japan
HIST 1510A China’s Late Empires
HIST 1540 Samurai and Merchants
HIST 1973J Korea: North and South
HIST 1977J Dream of the Red Chamber and Late Imperial Chinese Society

Religious Studies
REL 0530 Lao Tzu and Tao Te Ching
REL 1430 Classics of East Asian Buddhism

University Courses
UNIV 0540 Introduction to Contemplative Studies

Japanese

JAPN 0100. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. No prerequisites. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade
submitted at the end of the course work in JAPN 0200 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the second half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0250 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email

JAPN 0200. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. This is the second half of a year-long course. Students must have taken JAPN 0100 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0100. If JAPN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana and some Kanji. Placement test required. This is the second half of a year-long course. Students must have taken JAPN 0150 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0150. If JAPN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email

Further practice of patterns and structures of the language. Readings are introduced on aspects of Japanese culture and society to develop reading and writing skills, enhance vocabulary, and provide points of departure for conversation in Japanese. Prerequisite: JAPN 0200 or equivalent. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email

See Intermediate Japanese (JAPN 0300) for course description. Prerequisite: JAPN 0300 or equivalent. Enrollment limited to 18

Continued practice in reading, writing, and speaking. Emphasizes the development of reading proficiency and speaking in cultural contexts. Students read actual articles and selections from Japanese newspapers. Course includes translation, with writing and discussion in Japanese. Films and video tapes are shown as supplementary materials. Prerequisite: JAPN 0400 or equivalent

See Advanced Japanese (JAPN 0500) for course description

Reading of articles from Japan’s press with discussion in Japanese. Focuses on explanations and drills on the fine points in grammar and vocabulary as well as on the practice of writing in various styles. Movies and video tapes are used as supplementary materials. Prerequisite: JAPN 0600 or equivalent

See Advanced Readings in Japanese (JAPN 0700) for course description

JAPN 0910A. Classical Japanese.
This is an introductory course to pre-modern Japanese. It will explore the lifestyle and philosophy of samurai in 17th century Japan through reading the book, Gorin no Sho. The book comprises Miyamoto Musashi’s thoughts on swordplay, winning, and mind training. The course includes reading background information in English and viewing films and dramas. Enrollment limited to 20

The goal of this course is to develop the ability to use Japanese source materials for research in social sciences. Course covers lifestyles in two contrasting cities, Tokyo and Kyoto. Topics include topography, environmental issues, houses, urban life-styles, and natural habitation. We will ask questions: why houses are so compact in cities; why crows and boars pick on garbage, etc. Information sources are films, videos, and websites in addition to textbooks. Prerequisite: JAPN 0600 or equivalent. Enrollment limited to 20

JAPN 0910C. Japanese Linguistics.
This course will provide a structural overview of the Japanese language. Students will learn how to develop skills for analyzing the language through looking at sounds, meaning, and grammar. Topics include linguistic analysis of various sentence structures that students often find difficult to use, learning to choose words and sentences in appropriate situations, looking at the relation between language and culture

A traditional Japanese readings course with content both canonical and unconventional. It allows students with three years of Japanese to read from a diverse selection of 20th century Japanese novels, short stories and graphic novels. Our main focus will be on understanding the original Japanese, but some translation into English will be involved as well. In addition to selections from well-known modernists such as Natsume Soseki, Tanizaki Jun’ichi and Mishima Yukio, readings may also include works by Edogawa Rampo, Inagaki Taruho, Yoshiya Nobuko, Yamaji Ebiné, Hoshi Shin’ichi, Murakami Ryū, and others to be determined by student interest. All readings in Japanese. Prerequisite: JAPN 0600 or instructor permission

JAPN 0920A. Business Japanese.
Designed to teach post-advanced level Japanese language, with the focus on effective oral and written communication in business situations, this course emphasizes vocabulary building in the areas of business and economics, use of formal expressions, business writing, and conversation and presentation skills, as well as familiarizing students with Japanese corporate culture, protocol, and interpersonal relationships. Prerequisite: JAPN 0700 or equivalent. Enrollment limited to 20. Instructor permission required

JAPN 0920B. Modern Japanese Poetry.
This course is an introduction to modern Japanese poetry, which includes pre-war and post-war poetic forms. We will explore issues of modernity and identity as well as poets through a close examination of several poems each week. We will work on translations of the poems as part of the exercise of reading. The course includes reading background information in English. No prerequisites required

JAPN 1010. Readings in Contemporary Japanese Fiction.
Introduces contemporary short stories and novellas by award winning writers published after 2000. Authors include Yoko Ogawa, Natsuo Kirino, Jiro Asada, Bin Konno. We will analyze why the great many readers are drawn into these literary works through socio cultural background of urban communities. Prerequisites: JAPN0700 or instructor permission
Introduces a linguistic analysis of Japanese language to attain an overview of structure and a foundation for understanding how grammar relates to various modes of communication. Topics include discourse analysis, pragmatics, communicative intention, communication strategies, and intercultural communication gaps. Linguistic data is drawn from films and fiction. Prerequisite: basic knowledge of Japanese grammar, vocabulary, and linguistics. Enrollment limited to 20.

JAPN 1910. Independent Study.
Reading materials for research in Japanese. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Korean
KREA 0100. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. No prerequisite. Enrollment limited to 18. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in KREA 0200 covers the entire year and is recorded as the final grade for both semesters

KREA 0200. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. Enrollment limited to 18. This is the second half of a year-long course. Students must have taken KREA 0100 to receive credit for this course. The final grade for this course will become the final grade for KREA 0100. If KREA 0100 was taken for credit then this course must be taken for credit, if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

KREA 0300. Intermediate Korean.
An intermediate course in Korean designed to further communicative competence in spoken Korean and to provide additional reading practice in stylistically higher level materials that are progressively integrated into the given dialogues. Discussions on various aspects of Korean culture and society. Four classroom hours per week. Prerequisite: KREA 0200 or instructor permission.

See Intermediate Korean (KREA 0300) for course description. Prerequisite: KREA 0100-0200 or equivalent

KREA 0500. Advanced Korean.
Aims to help students develop an advanced level of communicative competence, with special focus on enhancing their reading comprehension, essay writing, and discourse (discussion and presentation) skills. Authentic reading materials from a variety of sources will be used to introduce various topics and issues pertaining to Korean society and culture, thus students’ cultural understanding will also be enhanced. Prerequisite: KREA 0400 or equivalent or permission of instructor

KREA 0600. Advanced Korean.
See Advanced Korean (KREA 0500) for course description. Prerequisite: KREA 0500 or equivalent or permission of instructor

KREA 0910B. Media Korean.
Develop linguistic competence in Korean and deepen cultural understanding through exposure to a variety of media sources both print and visual. Built on the Content-based Instruction model and Genre-based Approach. Discuss current Korean affairs and core issues of culture based on assigned materials. Develop reading and listening comprehension skills through pre-class activities, oral proficiency through in-class discussion and presentation, and writing proficiency through assigned essays writings, in addition to engaging in various integrative tasks. Tuesday classes will focus on comprehending the text and source materials, Thursday classes will focus on related tasks and activities. Enrollment limited to 20. Conducted entirely in Korean

KREA 0920A. Korean Culture and Society.
Develops oral proficiency in Korean language through a variety of readings on Korean culture and society. By reading about and discussing important aspects and core issues of Korea, students enhance their speaking competence and cultural understanding. Prerequisites: KREA 0300 and 0400 or permission of instructor. Enrollment limited to: 15

KREA 0920B. Business Korean.
For students who are interested in Korean culture in general and business culture in particular, and in improving their Korean language skills in a business context. The course not only focuses on business and economy-related words and expressions, but also on developing learners’ confidence in business writing, conversation and presentations in Korean. Enrollment limited to 15. Prerequisite: KREA 0400 or instructor’s permission

KREA 1910. Independent Study.
Reading materials for research in Korean. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

Economics
Chair
Roberto Serrano
Economics is the study of how individuals, businesses, and governments choose to allocate resources to best satisfy their objectives. The study of economics serves a number of purposes: it helps students understand the functioning of markets, of firms, and of financial organizations; it helps students understand public debate about economic policy, including taxation and government expenditure, trade and globalization, health and welfare; it prepares students for graduate study in fields like business and law; and it prepares students for graduate study leading to careers in teaching and research in economics; and it serves as a direct stepping stone towards employment in business, finance, non-profit, and government organizations.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Economics/

Economics Concentration Requirements
Economics is the study of how individuals, businesses, and governments allocate resources to satisfy their objectives. The study of economics helps students understand markets, firms, financial organizations, and public debate about economic policy, including taxation, government expenditure, trade, globalization, health, and welfare. The concentration in Economics prepares students for graduate study in fields such as business and law, for graduate study leading to teaching and research in economics, and can be a stepping stone to employment in business, finance, non-profit, and government organizations.

Students are required to begin with ECON 0110, an introductory course that stresses the economic problems of our society, and the vocabulary and principles of economic analysis. Intermediate level courses in microeconomics (ECON 1110), macroeconomics (ECON 1210), and econometrics (ECON 1620) round out the list of foundation courses for the concentration. Economics students must also fulfill a calculus requirement.

The economics department sponsors a number of alternative concentration options. The most popular is the standard economics concentration, described below. Three additional concentration options are administered jointly with other departments and are described separately under their respective titles. They are the concentrations in applied mathematics–economics, in mathematical economics, and in computer science–economics. The first two are especially recommended for students interested in graduate study in economics.
The department offers many of the required courses in an interdepartmental concentration called Business, Entrepreneurship and Organizations (BEO). BEO is jointly run by the departments of economics and sociology, and the division of engineering. BEO has three possible "tracks," of which the business economics track is most closely related to economics. Please contact the BEO administrator for more details, including information about advising in that concentration.

Standard Economics Concentration (for students prior to and including the Class of 2015)

Mathematics Course Requirements (select one of the following):  
MATH 0060 Analytic Geometry and Calculus 1 1
MATH 0070 Calculus with Applications to Social Science 1 1
MATH 0090 Introductory Calculus, Part I 1
A higher-level math course.

Economics Course Requirements:
ECON 0110 Principles of Economics 1
ECON 1110 Intermediate Microeconomics 1
or ECON 1130 Intermediate Microeconomics (Mathematical) 1
ECON 1210 Intermediate Macroeconomics 1
ECON 1620 Introduction to Econometrics 1
or ECON 1630 Econometrics I 1
at least five additional 1000-level ECON courses 5

Total Credits 10

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than , without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

Standard Economics Concentration (for students in the Class of 2016 and after)

Mathematics Course Requirements:  
MATH 0100 Introductory Calculus, Part II 1
or a higher-level math course.

Economics Course Requirements:
ECON 0110 Principles of Economics 1
ECON 1110 Intermediate Microeconomics 1
or ECON 1130 Intermediate Microeconomics (Mathematical) 1
ECON 1210 Intermediate Macroeconomics 1
ECON 1620 Introduction to Econometrics 1
or ECON 1630 Econometrics I 1
At least five other 1000-level Economics courses. 5

Total Credits 11

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than , without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

All concentrators in economics programs are encouraged to consult their concentration advisors regularly. Economics concentrators who wish to study abroad should consult first with the department transfer credit advisor.

Honors
Students who wish to enroll in the honors program in economics should consult the department’s undergraduate guide (available on its web site) to obtain a complete description of the requirements. See the description of Capstone Projects there, as well. Courses taken to prepare an honors thesis are in addition to the regular concentration requirements.

Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks of the applied mathematics-economics concentration have A.B. degree versions and Sc.B. degree versions.

Standard program for the A.B. degree (Advanced Economics track):

Prerequisites:
MATH 0100 Introductory Calculus, Part II
MATH 0520 Linear Algebra

Course Requirements:
Applied Math Requirements
(a) 1
APMA 0350 Methods of Applied Mathematics I, II 1
& APMA 0360 and Methods of Applied Mathematics I, II 2
Select one of the following: 1
APMA 1200 Operations Research: Probabilistic Models
APMA 1210 Operations Research: Deterministic Models
APMA 1650 Statistical Inference I 1

(b) 1
Select one of the following: 1
APMA 1200 Operations Research: Probabilistic Models
APMA 1210 Operations Research: Deterministic Models
APMA 1660 Statistical Inference II
APMA 1670 Statistical Analysis of Time Series
APMA 1680 Nonparametric Statistics
APMA 1690 Computational Probability and Statistics
APMA 1700 The Mathematics of Insurance
MATH 1010 Analysis: Functions of One Variable

Economics Requirements:
ECON 1130 Intermediate Microeconomics (Mathematical) 3 1
ECON 1210 Intermediate Macroeconomics 1
ECON 1630 Econometrics I 1
Two 1000-level economics course from the "mathematical-economics" group, below: 2
ECON 1170 Welfare Economics
ECON 1465 Market Design: Theory and Applications

2 These courses may be used to fulfill the requirements for concentrations in applied mathematics and economics.
Standard program for the Sc.B. degree (Advanced Economics track):

Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

Course requirements:

Applied Mathematics requirements:

(a)  
APMA 0350 Methods of Applied Mathematics I, II  
& APMA 0360 Methods of Applied Mathematics I, II  
Select one of the following:
- APMA 0160 Introduction to Scientific Computing
- CSCI 0040 Introduction to Scientific Computing and Problem Solving
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170 Computer Science: An Integrated Introduction

(b)  
Select two of the following:
- APMA 1200 Operations Research: Probabilistic Models
- APMA 1210 Operations Research: Deterministic Models
- APMA 1650 Statistical Inference I

Economics requirements:
- ECON 1130 Intermediate Microeconomics (Mathematical)  
- ECON 1210 Intermediate Macroeconomics  
- ECON 1630 Econometrics I  
Three 1000-level economics courses from the "mathematical-economics" group, below:
- ECON 1170 Welfare Economics
- ECON 1465 Market Design: Theory and Applications
- ECON 1470 Bargaining Theory and Applications
- ECON 1640 Econometrics II

One additional 1000-level economics course.  

Total Credits 12

1 No course may be used to simultaneously satisfy (a) and (b).
2 APMA 0330 and APMA 0340 may be substituted with advisor approval.
3 Or ECON 1110 with permission.

Standard program for the A.B. degree (Mathematical Finance track):

Prerequisites:
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra

Requirements:

Applied Mathematics requirements:

(a)  
APMA 0350 Methods of Applied Mathematics I, II  
& APMA 0360 Methods of Applied Mathematics I, II  
Select one of the following:
- APMA 0160 Introduction to Scientific Computing
- CSCI 0040 Introduction to Scientific Computing and Problem Solving
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170 Computer Science: An Integrated Introduction
- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV  
- APMA 1660 Statistical Inference II  
- APMA 1670 Statistical Analysis of Time Series  
- APMA 1680 Nonparametric Statistics  
- APMA 1690 Computational Probability and Statistics  
- APMA 1700 The Mathematics of Insurance  
- APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
- MATH 1010 Analysis: Functions of One Variable

(b)  
Select one of the following:
- APMA 1180 Introduction to Numerical Solution of Differential Equations
- APMA 1330 Methods of Applied Mathematics III, IV  
- APMA 1660 Statistical Inference II  
- APMA 1670 Statistical Analysis of Time Series  
- APMA 1680 Nonparametric Statistics  
- APMA 1690 Computational Probability and Statistics  
- APMA 1700 The Mathematics of Insurance  
- APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
- MATH 1010 Analysis: Functions of One Variable

Economics Requirements:
- ECON 1130 Intermediate Microeconomics (Mathematical)  
- ECON 1210 Intermediate Macroeconomics  
- ECON 1630 Econometrics I  
Select two 1000-level economics courses from the "financial economics" group:  
- ECON 1650 Financial Econometrics  
- ECON 1710 Investments I  
- ECON 1720 Corporate Finance  
- ECON 1750 Investments II  
- ECON 1759 Data, Statistics, Finance
ECON 1760 Financial Institutions
ECON 1770 Fixed Income Securities
ECON 1790 Corporate Governance and Management
Select one 1000-level economics course from the "mathematical economics" group: 
ECON 1170 Welfare Economics
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics
Total Credits 12
1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

Standard program for the Sc.B. degree (Mathematical Finance track):

Prerequisites:
MATH 0100 Introductory Calculus, Part II
MATH 0520 Linear Algebra

Course requirements:
Applied Mathematics requirements:
(a) APMA 0350 and APMA 0360 Methods of Applied Mathematics I, II 2
Select one of the following: 1
APMA 0160 Introduction to Scientific Computing
CSCI 0040 Introduction to Scientific Computing and Problem Solving
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
CSCI 0170 Computer Science: An Integrated Introduction
APMA 1200 Operations Research: Probabilistic Models 1
APMA 1650 Statistical Inference I 1
(b) Select two of the following: 2
APMA 1180 Introduction to Numerical Solution of Differential Equations
APMA 1330 Methods of Applied Mathematics III, IV
APMA 1660 Statistical Inference II
APMA 1670 Statistical Analysis of Time Series
APMA 1680 Nonparametric Statistics
APMA 1690 Computational Probability and Statistics
APMA 1700 The Mathematics of Insurance
APMA 1720 Monte Carlo Simulation with Applications to Finance (most preferred in this list)
MATH 1010 Analysis: Functions of One Variable

Economics requirements:
ECON 1130 Intermediate Microeconomics (Mathematical) 2
ECON 1210 Intermediate Macroeconomics
ECON 1630 Econometrics I 1
Select three 1000-level economics courses from the "financial economics" group, below: 3
ECON 1650 Financial Econometrics
ECON 1710 Investments I
ECON 1720 Corporate Finance
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1760 Financial Institutions
ECON 1770 Fixed Income Securities
ECON 1790 Corporate Governance and Management
Select two 1000-level economics courses from the "mathematical economics" group: 
ECON 1170 Welfare Economics
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics
Total Credits 15
1 APMA 0330 and APMA 0340 may be substituted with advisor approval.
2 Or ECON 1110 with permission.
3 No course may be used to simultaneously satisfy the "financial economics" and the "mathematical economics" requirements.

Computer Science-Economics Concentration Requirements
The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department’s writing requirement by passing a course that involves significant expository writing.

Requirements for the Standard Track of the Sc.B. degree.
Interested students may contact concentration advisors in either the Department of Computer Science or in the Department of Economics.

Prerequisites (3 courses):
MATH 0100 Introductory Calculus, Part II
MATH 0520 Linear Algebra
or MATH 0540 Honors Linear Algebra
or CSCI 0530  Directions: The Matrix in Computer Science
ECON 0110  Principles of Economics

**Required Courses (17 courses):**

Two additional 1000-level Economics courses 2

Capstone Course in either Computer Science or Economics 3 1

**Total Credits** 17

1 A list of pre-approved pairs may be found at the approved-pairs web page ([http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html](http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html)). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies.

2 Or ECON 1110, with permission.

3 A one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

**Requirements for the Professional Track of the Sc.B. degree.**

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student’s concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

**Requirements for the Standard Track of the A.B. degree:**

Interested students may contact concentration advisors in either the Department of Computer Science or in the Department of Economics.

**Prerequisites (3 courses):**

Introduction to Software Engineering (systems)
Econometrics II
Game Theory and Applications to Economics
Functions Of Several Variables
Theory of Economic Growth
Investments II
Probability
Market Design: Theory and Applications
Econometrics II
Theory of Economic Growth
Investments II

The Mathematical Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself.

Course Requirements:

Economics
ECON 1310 Labor Economics 1
Or ECON 1110 with permission
ECON 1210 Intermediate Macroeconomics 1
ECON 1630 Econometrics I 1

At least three other 1000-level economics courses, at least two must be chosen from the following "mathematical-economics" group:

ECON 1170 Welfare Economics
ECON 1465 Market Design: Theory and Applications
ECON 1470 Bargaining Theory and Applications
ECON 1640 Econometrics II
ECON 1650 Financial Econometrics
ECON 1750 Investments II
ECON 1759 Data, Statistics, Finance
ECON 1810 Economics and Psychology
ECON 1820 Behavioral Economics
ECON 1850 Theory of Economic Growth
ECON 1860 The Theory of General Equilibrium
ECON 1870 Game Theory and Applications to Economics

Mathematics
At least two calculus courses through MATH 0180 or its equivalent.

MATH 0520 Linear Algebra 1
or MATH 0540 Honors Linear Algebra

Select one of the following Options:

Option A
MATH 1610 Probability
MATH 1620 Mathematical Statistics
One course from the "advanced mathematics" group, as follows:
MATH 1010 Analysis: Functions of One Variable
MATH 1110 Ordinary Differential Equations
MATH 1120 Partial Differential Equations
MATH 1130 Functions of Several Variables
MATH 1140 Functions Of Several Variables

Option B
APMA 1650 Statistical Inference I
Two courses from the "advanced mathematics" group, as follows:
MATH 1010 Analysis: Functions of One Variable
MATH 1110 Ordinary Differential Equations
MATH 1120 Partial Differential Equations
MATH 1130 Functions of Several Variables
MATH 1140 Functions Of Several Variables

Economics Graduate Program

The department of Economics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

The department also offers a one-year Master of Arts (A.M.) program. However, applicants to the A.M. program should apply to the Ph.D. program, and are evaluated using the same criteria as applicants to the Ph.D. program. Students in the A.M. program are not funded by Brown. A.M. students who take the core examination and pass it will continue in the Ph.D. program and receive funding. In addition, Ph.D. students can earn the A.M. on the way to the Ph.D. or can receive the A.M. if they choose not to complete the Ph.D. program. The A.M. requires passing eight courses in the areas of Microeconomics, Macroeconomics, and Econometrics.
For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/economics

Courses

ECON 0110. Principles of Economics.
Extensive coverage of economic issues, institutions, and vocabulary, plus an introduction to economic analysis and its application to current social problems. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session)

ECON 0180A. Economics on a Broad Canvas.
Where economics fits into the broader pattern of the social sciences, history, and philosophy. Topics include: the world economy from pre-history to the present; the history and varieties of economic thought; comparative economic systems; challenges facing less developed countries; positive and normative perspectives on income inequality and redistribution; and the economy and the quality of life, including the environment. Enrollment limited to 20 first year students. FYS

Introduction to the economic aspects of the major welfare programs provided by government in American Society; Social Security, Health Care and Insurance, Education, Environmental Control. The focus of the course will be on the benefits and costs of each program and proposals for altering the scope of the public sector. Enrollment limited to 20 first year students. FYS

ECON 0180C. Punishment and Inequality in America.
This seminar will use social theory and social science evidence to understand how punishment works as a mechanism to produce inequality in American society. The institution of incarceration as a generator of social stigma is examined in this light. Zero-tolerance policing practices and racial profiling are discussed from this point of view as well. Questions about authority, legitimacy, deviancy, power and social cognition will guide the discussion. Enrollment limited to 20 first year students. FYS Writt

We will explore the ethical and economic foundation of Human Rights and its relationship to the Cosmopolitanism View. In particular, we will explore the question of whether people should have not just human rights to liberty, life and security, but also to a basic level of economic subsistence. Prerequisites: Microeconomics (ECON 0110), Enrollment limited to: 20

A course designed primarily for students who do not plan to concentrate in economics but who seek a basic understanding of the economics of less developed countries, including savings and investment, health and education, agriculture and employment, and interactions with the world economy, including trade, international capital flows, aid, and migration. Prerequisite: ECON 0110. Enrollment limited to 100

Basic accounting theory and practice. Accounting procedures for various forms of business organizations

We will examine what role economic theory plays and/or ought to play in political theory and on our conception of politics more broadly. Topics include particular political philosophies and economic concepts such as rationality and efficiency

This is a seminar that focuses on issues of ethics that arise in the context of business and economics. Learning occurs primarily through guided student discussions in class. Other economics courses, especially 11, 111, 134 and 179 are highly recommended

ECON 1110. Intermediate Microeconomics.
Tools for use in microeconomic analysis, with some public policy applications. Theory of consumer demand, theories of the firm, market behavior, welfare economics, and general equilibrium. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement

ECON 1130. Intermediate Microeconomics (Mathematical).
Microeconomic theory: Theories of the consumer and firm, competitive equilibrium, factor markets, imperfect competition, game theory, welfare economics, general equilibrium. May not be taken in addition to ECON 1110. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement

ECON 1160. Managerial Economics.
Analysis for making policy decisions within a firm. Goals of the firm, analytical methods for optimizing under constraints. Production decisions, pricing strategies, and investment plans. Advertising, diversification, and research and development. Effect of nonmarket constraints, governmental and self-imposed. Treatment of risk and uncertainty. Prerequisites: EC 111 or 113

ECON 1170. Welfare Economics.
A survey of theories of economic optimality. Topics covered include efficiency and competition, externalities, social welfare functions, majority voting, the Arrow impossibility theorem, compensation criteria and an introduction to the problems of mechanism design and implementation. Prerequisites: EC 111 or 113

ECON 1185. The Welfare State.
The course will include analyses of Health Care, Social Security, Medicare, Medicaid, Immigration Control, and Environmental Control. The focus will be on the extent to which the programs meet their goals without straining the federal budget. Both existing and alternative programs will be evaluated in terms of costs, benefits, as well as their present and future demands on tax revenue and user fees. Prerequisite: ECON 1110 and 1620. Enrollment limited to 30 senior concentrators in Economics, Mathematical Economics, Applied Math-Economics, Computer Science Economics, and COE

ECON 1210. Intermediate Macroeconomics.
The economy as a whole: Level and growth of national income, inflation, unemployment, role of government policy. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110

ECON 1220. Monetary and Fiscal Policy.
Relation of monetary and fiscal policy to inflation, to aggregate employment, and to the financing of the public sector. The political economy of monetary and fiscal policy. Contemporary and historical applications, including the economic expansion of the 1990s and the subsequent recession in the United States, the prolonged economic slump in Japan, the economic crisis in Argentina. Prerequisite: EC 121

This is an advanced macroeconomics senior seminar course for undergraduate students. The course is concerned with macroeconomic policy in the United States, with special focus on the recent economic crisis. The main objective of the course is to introduce students to the type of models and methods used in current research in macroeconomics both in the scholarly literature but also in the practice of central banks and major policy institutions. Events of the financial crisis and the economic recession of 2007-2009 will serve to illustrate the challenges confronted by macroeconomic analysis. Prerequisites: ECON 1110 or 1130; and MATH 0090. Enrollment limited to 30

ECON 1300. Education, the Economy and School Reform (EDUC 1150).
Interested students must register for EDUC 1150 S01

ECON 1301. Economics of Education I.
This course teaches students how to use microeconomics to analyze a broad array of education policy issues. The departure of this course from ECON 1110 is the emphasis on studying microeconomics in applied settings, and in particular, using microeconomic concepts to think about, analyze, and solve policy questions in education. Prerequisite: ECON 1110

ECON 1305. Economics of Education: Research.
This course will cover academic research in the Economics of Education. Topics include production of student achievement, measuring student
achievement, funding of public education, and school choice and school vouchers. Prerequisites: ECON 1110 and ECON 1620 or 1630. Enrollment limited to 25 juniors, seniors, and graduate students

**ECON 1310. Labor Economics.**
Labor supply, human capital, income inequality, discrimination, immigration, unemployment. Prerequisite: ECON 1110 or 1130; and 1620 or 1630. Enrollment limited to 100

**ECON 1350. Environmental Economics and Policy (ENVS 1350).**
Interested students must register for ENVS 1350 S01 (CRN 14886)

**ECON 1355. Economics of the Environment in Developing Countries (ENVS 1355).**
Interested students must register for ENVS 1355 S01 (CRN 24188)

**ECON 1360. Health Economics.**
This course introduces students to the issues, theory and practice of health economics in the U.S. Topics include the economic determinants of health, the market for medical care, the market for health insurance and the role of the government in health care. Course work includes data analyses using the program STATA. Prerequisites: ECON 1110 or 1130; and ECON 1620, 1630, or APMA 1650 or other statistics background. Enrollment limited to 24

**ECON 1370. Race and Inequality in the United States.**
We examine racial inequality in the United States, focusing on economic, political, social and historical aspects. Topics include urban poverty, employment discrimination, crime and the criminal justice system, affirmative action, immigration, and low wage labor markets. Black/white relations in the US are the principle but not exclusive concern. Prerequisite: ECON 1110 or 1130. Enrollment limited to 25

**ECON 1380. Economics and the Law.**
Examines the economic basis for legal decisions. Cost-benefit analysis, social costs, the Coase Theorem, and the assignment of property rights. The economics of property and contracts, tort law, and criminal law. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

**ECON 1390. Research Methods for Economists.**
This course is designed to prepare students to undertake empirical research in economics. Students thinking of writing an honors thesis or conducting independent research are especially urged to take it during their junior year. We will answer such questions as what does an empirical research paper look like? How do we formulate a hypothesis to test? How can we use data to test our hypothesis? Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630

**ECON 1410. Urban Economics.**
The first part of the course covers the set of conceptual and mathematical models widely used to understand economic activity both between and within cities. The second part of the course examines various urban policy issues including urban transportation, housing, urban poverty, segregation and crime. The course makes extensive use of empirical evidence taken primarily from the United States. Prerequisites: ECON 1110 or 1130, and ECON 1620 or 1630. Enrollment limited to 100

**ECON 1420. Urbanization in China.**
Examines urbanization processes and urban public policy in China. Also draws on historical and recent experience in the U.S. Policy areas including policies affecting urbanization, migration, and industrial location; policies affecting housing, land use, and urban reform; and policies affecting fiscal decentralization and infrastructure investments such as transportation. Prerequisites: ECON 1110 or ECON 1130, Open to juniors and seniors. DVPS

**ECON 1430. Population Economics.**
An introduction to the economic approach to demography. Applies the theoretical and empirical frameworks of economics to topics such as fertility, migration (both domestic and international), investments in health and human capital, life-cycle labor supply, intergenerational transmission of economic status, the distribution of income and wealth, and the interaction of population growth with the standard of living. Prerequisite: ECON 1110 or 1130

**ECON 1440. Economic Theories of Firms.**
Examines theories of why firms exist, their internal organizations and employment relations, ownership and control, efficiency versus conflict approaches, and alternative organizational forms (e.g., employee ownership). Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

**ECON 1450. Economic Organizations and Economic Systems.**
Positive and normative study of the organizations that comprise and the institutional structures that characterize a modern mixed market economy. Theoretical efficiency and potential limitations of private enterprises and markets including (a) why some market actors are organizations (e.g., companies), (b) effort elicitation problems in organizing, (c) the problem of cooperation in traditional versus behavioral economics, and (d) alternative kinds of organization (including proprietorships, corporations, nonprofits, government agencies). Roles of government, and problems of government failure, including the collective action problem of democracy. State-market balance and contemporary controversies over the economic system in light of the 2008 financial crisis. Enrollment limited to 100 juniors and seniors. Prerequisite: ECON 1110 or 1130

**ECON 1460. Industrial Organization.**
A study of industry structure and firm conduct and its economic/antitrust implications. Theoretical and empirical examinations of strategic firm interactions in oligopolistic markets, dominant firm behaviors, and entry deterrence by incumbents. Also economics of innovation: research and development activities and government patent policies. Prerequisite: ECON 1110 or 1130. Some knowledge of calculus required. Enrollment limited to 100

**ECON 1465. Market Design: Theory and Applications.**
This course studies the design of organized markets, focusing on efficient organization and the incentives created by market rules. The analysis relies on a mix of documenting the rules of real-world markets, game theoretic analysis, empirical analysis, and experimental work. Applications include: online auction markets (e.g., eBay, Amazon); ad auctions (e.g., Google); matching markets, including matching students to schools, matching workers to jobs (e.g., medical residents to hospitals, lawyers to clerkship positions), matching kidney donors to recipients, and online dating. Prerequisites: ECON 1110 or 1130; MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; or instructor permission. Enrollment limited to 25 juniors, seniors, and graduate students

**ECON 1470. Bargaining Theory and Applications.**
Bargaining theory is emerging as an important area within the general rubric of game theory. Emphasis is on providing a relatively elementary version of the theory in order to make it accessible to a large number of students. Covers introductory concepts in game theory, strategic and axiomatic theories of bargaining and their connections, applications to competitive markets, strikes, etc. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

**ECON 1480. Public Economics.**
An analysis of the role of government in the allocation of resources. Topics include welfare economics (a review), problems of social choice, the evaluation of public expenditures, and taxation. Prerequisite: ECON 1110 or 1130

**ECON 1485. Social Security Reform.**
The course looks at the economics of social security reform with particular focus on possible policy responses to the increasing fraction of the population that is elderly in OECD countries. Among the topics that will be considered are pay as you go funding, defined benefits versus defined concentrations, privatization, labor market effects of pensions, retirement decisions, labor supply by couples, and macroeconomic effects. Prerequisite: ECON 1110. Enrollment limited to 30. Not open to first-year students

**ECON 1500. Current Global Macroeconomic Challenges.**
Analysis of current economic challenges in the U.S. and China. Topics include fiscal and monetary policies, international trade, capital flows and exchange rate policy, and policies for long-run growth. Emphasis on macroeconomic policies in China and the U.S., including their global impact. Prerequisites: ECON 1210. Also recommended: ECON 1550 and 1850. Enrollment limited to 100
ECON 1540. International Trade
The economic problems of less developed countries and the theory of economic development, with emphasis on the roles played by agriculture, industry, and foreign trade. Also: education, health, employment, and migration; capital accumulation; income distribution; institutional aspects; the role of price distortions; trade policies; social discount rates, investment criteria, and the general issue of state intervention. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630. Enrollment limited to 100

ECON 1520. The Economic Analysis of Institutions
This course deals with the economic analysis of institutions, with a focus on developing countries. The first section covers institutions in traditional agrarian societies. Topics include consumption smoothing and the organization of land, labor and credit markets. The second section focuses on the role of the community in facilitating economic activity. Institutions include cooperatives, networks, marriage and the family. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630; or equivalent

ECON 1530. Health, Hunger and the Household in Developing Countries
Microeconomic analysis of household behavior in low income societies emphasizing the economic determinants of health and nutrition and the evaluation of policy. The relationship among health, nutrition, fertility, savings, schooling, labor productivity, wage determination, and gender-based inequality. Emphasizes theoretically-based empirical research. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

ECON 1540. International Trade
Theory of comparative advantage, trade, and income distribution. Welfare analysis of trade: gains from trade, evaluation of the effects of trade policy instruments-tariffs, quotas, and subsidies. Trade under imperfect competition. Strategic trade policy. Trade, labor markets, preferential trade agreements, and the world trading systems. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

ECON 1550. International Finance
The balance of payments; identification and measurement of surpluses and deficits; international monetary standards; the role of gold and paper money; government policies; free versus fixed exchange rates; international capital movements; war and inflation; the International Monetary Fund. Prerequisite: ECON 1210. Enrollment limited to 100

ECON 1560. Economic Growth
A theoretical and empirical examination of economic growth and income differences among countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200 or 0350. Enrollment limited to 100

ECON 1580. Comparative Economic Systems
Recent histories, institutional structures, and performance of industrialized economies of the U.S., Europe and Asia. The Marxian critique of capitalism; the theory of centrally planned economies; the Soviet economy; and problems of reform and transition. Workers’ self-management as an alternative industrial order. Prerequisite: EC 111 or 113

ECON 1590. The Economy of China since 1949
This course examines the organization, structure, and performance of the economy of mainland China, with a focus on urban and regional development. The course analyzes the changing economic system including the roles of planning and markets and government economic strategy and policies. The pre-reform period (1949-78) receives attention in its own right, but especially as it influences developments in the market-oriented reform period since 1978. Topics covered include rural and urban development, industrialization and FDI, housing and land markets, rural-urban migration, income inequality and growth, and the evolving spatial structure of cities. Both analytical and descriptive methods are used. Prerequisite: ECON 1110 or 1130. ECON 1210 and 1410 are helpful but not required

ECON 1600. Economics of the Middle East
A survey of the economies of the Middle East. Examines various aspects of the economic realities of the region, including economic and human development, water and food security, the economics and politics of oil, population growth and labor mobility, education, the role of the state, economic reform, the political economy of conflict and peace, and the prospects for regional integration. Prerequisite: ECON 1110 or 1130 (EC 111 or 113)

ECON 1620. Introduction to Econometrics
Probability and statistical inference. Estimation and hypothesis testing. Simple and multiple regression analysis. Applications emphasized. Prerequisite: ECON 0110. Weekly one-hour computer conference required

ECON 1629. Applied Research Methods for Economists
This class will cover the basics of applied research in economics. We will cover how we use economic theory to formulate a hypothesis to test and how we use data to test our hypothesis. As part of the coursework, students will be exposed to topics across multiple fields of applied economic research (e.g., health, labor, political economy, urban economics, development, etc.) that can be explored in greater detail in more advanced classes. Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 and 1620

ECON 1630. Econometrics I
Advanced introduction to econometrics with applications in finance and economics. How to formulate and test economic questions of interest. The multivariate linear regression model is treated in detail, including tests of the model’s underlying assumptions. Other topics include asymptotic analysis, instrumental variable estimation, and likelihood analysis. Convergence concepts and matrix algebra are used extensively. Prerequisites: ECON 1110 or 1130; and APMA 1650, MATH 1620, or ECON 1620; or equivalent

ECON 1640. Econometrics II
Continuation of ECON 1630 with an emphasis on econometric modeling and applications. Includes applied topics from labor, finance, and macroeconomics. Prerequisite: ECON 1630. Enrollment limited to 100

ECON 1650. Financial Econometrics
Financial time series, for example, asset returns, options and interest rates, possess a number of stylized features that are analyzed using a specific set of econometric models. This course deals with an introduction to such models. It discusses time series models for analyzing asset returns and interest rates, (GARCH) models to explain volatility, models to explain extreme events which are used for the Value at Risk and models for options prices. Prerequisite: ECON 1630 or instructor permission. Enrollment limited to 100

ECON 1710. Investments I
The function and operation of asset markets; the determinants of the prices of stocks, bonds, options, and futures; the relations between risk, return, and investment management; the capital asset pricing model, normative portfolio management, and market efficiency. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650

ECON 1720. Corporate Finance
A study of theories of decision-making within corporations, with empirical evidence as background. Topics include capital budgeting, risk, securities issuance, capital structure, dividend policy, compensation policy, mergers and acquisitions, real options, financial engineering, securitization. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650

ECON 1750. Investments II
Individual securities: forwards, futures, options and basic derivatives, pricing conditions. Financial markets: main empirical features, equity premium and risk-free rate puzzles, consumption based asset pricing models, stock market participation, international diversification, and topics in behavioral finance. Prerequisites: ECON 1110 or 1130; ECON 1620 or 1630; or APMA 1650; ECON 1710. Enrollment limited to 100

ECON 1759. Data, Statistics, Finance
An experimental course that prepares students for research of the type conducted in academic finance, hedge funds, and some advanced consulting firms and i-Banks. Nothing like this is offered at any other university as far as the instructor knows. Students that do well in this
The course should have a head start in academic finance PhD programs, as well as in MBA programs, quantitatively oriented investment funds, finance companies, and consulting firms. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650. CSCI0040 or equivalent also recommended as background. Enrollment limited to 20. SNC

ECON 1760. Financial Institutions.
This course analyzes the role of financial institutions in allocating resources, managing risk, and exerting corporate governance over firms. After studying interest rate determination, the risk and term structure of interest rates, derivatives, and the role of central banks, it takes an international perspective in examining the emergence, operation, and regulation of financial institutions, especially banks. Prerequisites: ECON 1110 and 1210, or 1130. Enrollment limited to 100

Analyzes the role of financial markets and institutions in allocating resources and exerting governance over firms, how regulation shapes finance, and how finance influences the enactment and impact of financial regulation. The class will use economic theory to develop a solid conceptual framework for understanding how finance affects economic growth, income distribution, and stability; empirical evidence to assess theory; and history to put the role of finance into a long-term framework. Current events will be continuously used to keep the class relevant. Prerequisites: ECON 1110 or 1130, and ECON 1210, and ECON 1630, and ECON 1720 (EC 111 or 113; EC 162 or 163; EC 172). Enrollment limited to 30 senior concentrators in Economics, COE, Applied Math-Economics, Computer Science-Economics, and Math-Economics

ECON 1770. Fixed Income Securities.
The fixed income market is much larger than the stock market in the U.S. Topics covered in this course include basic fixed income securities, term structure, hedging interest rate risk, investment strategies, fixed income derivatives, mortgage-backed securities and asset-backed securities. Prerequisite: ECON 1110 or 1130, and ECON 1620 or 1630 or APMA 1650, and ECON 1710 or 1720. Enrollment limited to 100

ECON 1780. Corporate Strategy.
This course teaches analysis of strategic decisions facing an organization. We cover traditional strategy topics such as capabilities and sustainability, as well as modern game theory models of competition. A central integrating idea is anticipating the response of other actors in the economy and recognizing that often an organization’s profits depend on the actions of other actors. Prerequisites: ECON 1110 or 1130; ECON 1620 or 1630; and ECON 1720 (EC 111 or 113; EC 162 or 163; EC 172)

ECON 1790. Corporate Governance and Management.
A corporation’s economic success depends on access to human capital and other resources, effective management of these resources, and a governance system that ensures effective decision making. The course offers policy prescriptions in economic incentives and regulatory rules that attempt to align management with investors. Prerequisites: ECON 1110 or 1130; ECON 1620 or 1630; or APMA 1650; ECON 1720; ECON 0710. Enrollment limited to 40

This course examines how legislation and regulation influences the structure of financial markets and how players in these markets intervene in the political process to create or modify legislative and, regulatory outcomes. Particular emphasis will be placed on the environment in the United States. International comparisons will also be present. Prerequisites: ECON 1110 or 1130; ECON 1770

ECON 1810. Economics and Psychology.
This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a “richer psychology” than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as “Bayesian statisticians”. Special emphasis will be put on the implications of “psychologically richer” models on market behavior. Prerequisite: ECON 1110 or 1130; and MATH 0100 or 0170 or 0180 or 0190 or 0200 or 0350; and ECON 1620 or 1630 or APMA 1650 or MATH 1610. Enrollment limited to 100

ECON 1820. Behavioral Economics.
This course provides a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality, happiness and neuroeconomics. For each area of study we begin with the standard model of rational decision making, and discuss what behavior this model can explain. We then discuss the experimental evidence that indicates that the standard model is missing something important, and the models that have sprung up to account for these violations. Finally, we will look at the implications of these new models for our understanding of how the economy operates. Prerequisite: ECON 1110 or 1130; and MATH 0090

ECON 1850. Theory of Economic Growth.
Analysis of the fundamental elements that determine economic growth. It examines the role of technological progress, population growth, income inequality, and government policy in the determination of (a) the pattern of economic development within a country, and (b) sustainable differences in per capita income and growth rates across countries. Prerequisites: ECON 1210 and either APMA 0330 (or equivalent) or MATH 0180, 0200, or 0350 (or equivalent). Enrollment limited to 100

Existence and efficiency of equilibria for a competitive economy; comparative statistics; time and uncertainty. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100

ECON 1870. Game Theory and Applications to Economics.
Study of the elements of the theory of games. Non-cooperative games. Repeated games. Cooperative games. Applications include bargaining and oligopoly theory. Prerequisites: ECON 1110 or 1130; and MATH 0100, or 0170, or 0180, or 0190, or 0200, or 0350; and ECON 1620 or 1630 or APMA 1650, or MATH 1610. Enrollment limited to 100

ECON 1880. Introduction to Two-Sided Matching Markets.
First, we will discuss the several elements that characterize a two-sided matching market and will model several of these markets under the game-theoretic approach. Then, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets. Prerequisites: ECON 1110 or 1130; and ECON 1870

The purpose of this seminar is to bring to the undergraduates concentrating in economics, applied math-economics, mathematical economics and computer science-economics a taste of the first-rate research that is being done in the economics department at Brown. Prerequisites: ECON 1110 or 1130; ECON 1210; ECON 1620. Enrollment limited to 30

Students intending to write an honors thesis in economics must register for this class. The goal is to help students with the process of identifying and defining feasible topics, investigating relevant background literature, framing hypotheses, and planning the structure of their thesis. Each student must find a thesis advisor with interests related to their topic and plan to enroll in ECON 1970 during the final semester of senior year

Section numbers vary by instructor. Please check Banner for the correct number and CRN to use when registering for this course

An opportunity for seniors in economics to pursue a research project in the areas of applied economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration

An opportunity for seniors in economics to pursue a research project in the areas of Applied Economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester
ECON 2060. Microeconomics II
Social choice and implementation.
Equilibrium and welfare economics: the Arrow-Debreu-McKenzie model.
Decision theory: consumer's and producer's theory; general competitive.

ECON 2070. Microeconomics I.
Decision theory: consumer's and producer's theory; general competitive equilibrium and welfare economics: the Arrow-Debreu-McKenzie model; social choice and implementation.

ECON 2080. Microeconomics II.
Economics of imperfect information: expected utility, risk and risk aversion, optimization under uncertainty, moral hazard, and self-selection problems. Economics of imperfect competition: monopoly; price discrimination; monopolistic competition; market structure in single shot, repeated and stage games; and vertical differentiation.

ECON 2090. Topics in Microeconomics: Decision Theory and Evidence.
Decision theory is the use of axiomatic techniques to understand the observable implications of models of choice. It is central to the incorporation of psychological insights into economics, and provides a vital link between theory and experimental economics. This course covers standard economic models of choice in different domains - choice under risk, choice under uncertainty and intertemporal choice. It looks at key topics from behavioral economics: choice with incomplete information, reference dependent preferences, temptation and self control, the Allais paradox, ambiguity aversion and neuroeconomics. In each case it relates the predictions of theory to experimental data on behavior.

ECON 2100. General Equilibrium Theory.
No description available.

ECON 2102. Topics in Economic Theory.
No description available.

ECON 2100. Topics on Game Theory.
First, we will discuss the several elements that characterize a two-sided matching market and the concept of setwise-stability versus core. Then, we will model several of these markets (one-to-one, many-to-one and many-to-many, in the discrete and continuous cases) under the game-theoretic approach and will define for all of them the stability concept, establishing its relationship with the core and the competitive equilibrium concepts. Afterwards, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets.

ECON 2109E. Topics in Economics: Economics and Psychology.
This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers' behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as "Bayesian statisticians". Special emphasis will be put on the implications of "psychologically richer" models on market behavior.

ECON 2110. Economic Policy.
An introduction to analytic tools for formulating and evaluating economic policy. The emphasis is on the analysis of economic growth and development. Economic growth is represented by a continuous process of increasing productivity, while economic development is defined as the process of improving the economic welfare of a country's population. The course emphasizes the interaction between the process of economic growth and development and the process of economic policy making. The course also emphasizes the interaction between the process of economic growth and development and the process of economic policy making.

ECON 2111. Monetary Economics.
Focus on the sensible application of econometric methods to empirical problems in economics and policy research -- particularly labor and population economics. The course examines issues that arise when analyzing non-experimental data and provides a guide for tools that are useful for applied research. The course also emphasizes how a basic understanding of theory and institutions can help inform the analysis. By the end of the course, students should have a firm grasp of the types of research designs and methods that can lead to convincing analysis and be comfortable working with large-scale data sets.

ECON 2112. Topics in Labor Economics.
The course introduces students to procedures used to extract evidence from data and to perform rigorous causal inference in order to evaluate public policy on issues such as schooling, the return to education and returns on late intervention programs. Econometric methods, such as Instrumental Variable, Matching, Control Functions, Self Selection Models and Discrete Choice as well as Panel Data Methods, are discussed in detail.

ECON 2113. Economics of Health and Population.
An introduction to current research in the economics of health and population. Focuses on studies of empirically-tractable and tested models of individual, household, and firm behaviors and how these behaviors interact through markets and other institutions. Among the subjects considered are the economics of fertility and marriage, the operation of the health services sector, and the implications of population aging.

ECON 2114. Inequality: Theory and Evidence.
This course uses economic theory to study the problems of inequality. The emphasis is two-fold: (1) to explain persistent resource disparities between individuals or social groups; and, (2) to assess the welfare effects.
of various equality-promoting policies. Topics include racial stereotypes, residential segregation, distributive justice, incentive effects of preferential policies, dysfunctional identity, and endogenous inequality due to the structure of production and exchange.

**ECON 2410. Urbanization.**
The first part of the course covers social interactions, productivity spillovers, systems of cities models, urban growth, and rural-urban migration. The second part of the course covers topics such as durable housing, land market regulation and exclusion, and local political economy. Besides covering basic theoretical models, emphasis is placed on working through recent empirical papers on both the USA and developing countries. Prerequisites: ECON 2050 and 2060

**ECON 2420. The Structure of Cities.**
This course covers standard urban land use theory, urban transportation, sorting across political jurisdictions, hedonics, housing, segregation and crime. Empirical examples are taken primarily from the United States. After taking the course, students will have an understanding of standard urban theory and of empirical evidence on various important applied urban topics. In addition, students will gain practical experience in manipulating spatial data sets and simulating urban models

**ECON 2450. Exchange Scholar Program.**

**ECON 2470. Industrial Organization.**
Monopolistic competition, market structure and entry, nonprice competition, economics of information

**ECON 2480. Public Economics.**
Theoretical and empirical analysis of the role of government in private economies. Topics include welfare economics, public goods, externalities, income redistribution, tax revenues, public choice, and fiscal federalism

**ECON 2510. Economic Development I.**
This course covers issues related to labor, land, and natural resource markets in developing countries, in partial and general equilibrium settings. Topics covered include: The agricultural household model, under complete and incomplete market assumptions; household and individual labor supply, migration, self-employment, and the informal sector; rental market frictions and sharecropping arrangements; and environmental externalities (e.g., pollution, water usage, etc.), and sustainable development

**ECON 2520. Economic Development II.**
This course deals with the economic analysis of institutions, with a particular focus on community-based institutions in developing countries. Institutions covered include: cooperatives, ROSCAS, networks, marriage and the family

**ECON 2530. Behavioral and Experimental Economics.**
An introduction to the methodology of experimental economics with an emphasis on experiments designed to illuminate problems in organizational design and emergence of institutions, and experiments investigating the operation of social and social-psychological elements of preference such as altruism, inequality aversion, reciprocity, trust, concern for relative standing, envy, and willingness to punish norm violators. Experiments studied will include ones based on the prisoners' dilemma, dictator game, ultimatum game, and especially the voluntary contribution mechanism (public goods game) and the trust game

**ECON 2580. International Trade.**
General equilibrium analysis of the theory of international trade and trade policy under perfect competition; trade under imperfect competition; strategic trade policy; trade and growth; and the political economy of trade policy determination. Empirical analysis of trade theories and policy. Additional topics include the theory of preferential trading areas, trade and labor, and the analytics of trade policy reform

**ECON 2590. Topics in International Economics.**
Advanced theoretical and empirical research topics in international economics emphasizing positive and normative analysis of trade, trade policy and international trading agreements, policy reform and stabilization, exchange rate determination, sovereign debt and currency crises and optimum currency areas

**ECON 2610. Applied Econometrics.**
Topics in applied econometrics. Both cross-sectional and time series issues will be discussed. Special emphasis will be placed on the link between econometric theory and empirical work

**ECON 2630. Econometric Theory.**
Standard and generalized linear models, simultaneous equations, maximum likelihood, Bayesian inference, panel data, nonlinear models, asymptotic theory, discrete choice, and limited dependent variable models

**ECON 2640. Microeconometrics.**
Topics in microeconometrics treated from a modern Bayesian perspective. Limited and qualitative dependent variables, selectivity bias, duration models, panel data

**ECON 2660. Macroeconometrics and Financial Econometrics.**
Method of Moments (GMM) and Empirical Likelihood (EL) Kernel methods for density and regression estimation. Optimal instruments and local EL. Applications to non-linear time series models, Euler equations and asset pricing. 999999

**ECON 2820. Discrete Dynamical Systems and Application to Interpersonal Economics.**
This course will focus on the qualitative analysis of discrete dynamical systems and their application for Intertemporal Economics

**ECON 2830. Dynamic Optimization and Economic Growth.**
The role of human capital, income distribution, population growth, technological progress, and international trade in the determination of differences in growth performance across countries. Inequality and economic growth. Technological progress and wage inequality. The transition from stagnation to sustained growth. Evolution and growth

**ECON 2840. Empirical Analysis of Economic Growth.**
Examines economic growth, focusing on the effects of technological change, fertility, income inequality, and government policy. ECON 2830 is strongly recommended

**ECON 2850. Theory of Innovation-Based Growth.**
Issues concerning innovation-based growth theory, including scale effects and effects of research and development versus capital accumulation. Interactions between growth and phenomena such as fluctuations, unemployment, natural resources, competition, regulation, patent policy, and international trade

**ECON 2890A. Topics in Macroeconomics, Development and Trade.**
This is a graduate class that covers selected topics at the intersection of macroeconomics, economic development and trade. The leading theme of the class will be the determinants of the observed cross-country differences in income per capita and growth rates. We will start by reviewing aggregative theories, prominently the neoclassical growth model and endogenous growth models, focusing on their successes and pitfalls. We will then move to non-aggregative theories, placing special emphasis on theories of financial frictions. At this point, we will spend some time studying the stochastic growth model with partially uninsurable idiosyncratic risk

**ECON 2920A. Advanced Econometrics - Microeconometrics from a Semiparametric Perspective.**
This course is concerned with a rigorous, state-of-the-art introduction to Micro-econometrics. In particular, we will review many of the more recent contributions in Microeconometric Theory. While the focus of this course is theoretical, we will also be concerned with applications and the applicability of these methods. More specifically, we will consider nonparametric regression and density estimation methods, as well as methods and models for binary and categorical dependent variables, for limited dependent variables in general, and for models of selection. We will also discuss more general nonparametric IV models. Prerequisites are: Introductory Econometrics (at the level of the Wooldridge (2002)

**ECON 2920B. Topics in Game Theory.**
No description available

**ECON 2930. Workshop in Applied Economics.**
No description available

**ECON 2950. Workshop in Econometrics.**
No description available

**ECON 2960. Workshop in Macroeconomics and Related Topics.**
No description available

**ECON 2970. Workshop in Economic Theory.**
No description available
ECON 2971. Race and Inequality Seminar.
This is a workshop primarily for graduate students and faculty in the Department of Economics where original research on issues of race and inequality are presented by external visitors, along with Brown faculty and graduate students. No course credit

ECON 2980. Reading and Research.
Individual research projects. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

ECON 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis

Education
Chair
Kenneth K. Wong
The Department of Education focuses its scholarly and teaching efforts on the study of human learning and development, the history of education, teaching, school reform, and education policy; students study education from a variety of disciplinary perspectives, including anthropology, economics, history, political science, psychology, and sociology. The Department offers a wide range of courses designed for students seeking an understanding of the many facets of education from multi-disciplinary perspectives.

For additional information, please visit the department's website: http://www.brown.edu/academics/education/

Education Studies Concentration
Requirements
Education Studies offers a broad liberal arts background coupled with a focus on the study of human learning and development, the history of education, teaching, school reform, and education policy. Concentrators choose a focus in either History/Policy or Human Development. History/Policy provides the historical underpinnings and intellectual skills for students to think critically about education issues in a number of settings. Concentrators in Human Development learn about psychological, social, and cultural processes in a variety of contexts, including schools, families, peer groups, and neighborhoods, particularly in urban settings. Additionally, the department offers teacher certification programs in elementary and secondary education.

Education Studies concentrators design a program that includes ten courses, of which at least eight are taken in the Education Department at Brown University. Within Education Studies, concentrators choose one of the two tracks, each designed to enable students to develop critical and creative skills for addressing issues surrounding children, schools, and education.

At least five Education courses in the chosen area of emphasis. 5
At least two Education courses outside the chosen area of emphasis. 2
Two additional, related courses. 2

Total Credits 10

Honors

Concentrators seeking to graduate with honors must meet all requirements for the concentration, including a grade-point average established by the Department, and state their plans in writing by the end of their sixth semester. Finally, they must successfully complete EDUC 1990 -EDUC 1991 (Research and Writing in Education) in which they write a 60–70 page thesis under the guidance of a thesis advisor.

Undergraduate Teacher Education Program
Note: The Undergraduate Teacher Education Program is not a concentration. It consists of a series of courses which will prepare students for secondary teacher certification.

The Department of Education, in cooperation with other departments, offers a program of study in teacher education leading to certification in secondary school teaching: the Undergraduate Teacher Education Program (UTEP). This program is offered in English, History/Social Studies, Science (Biology, Chemistry, or Engineering/Physics), and leads to state certification for public school teaching in these fields.

The Undergraduate Teacher Education Program consists of three components: courses in educational theory, courses in the teaching field, and student teaching. These are designed to complement and enhance the liberal education derived from concentration courses and electives.

Students who are interested in completing the Undergraduate Teacher Education Program must confer with the Education Department as early as possible in order to plan a coherent program. The program includes a methods course, offered during the summer in conjunction with teaching at Brown Summer High School, between Semesters VI and VII.

Courses in the teaching field
Because the program emphasizes the importance of knowledge in the teaching field, students are required to complete an academic concentration in the subject which they are preparing to teach or a closely related field. This does not mean that a student must elect a standard concentration in the field. However, such a student must, as part of or in addition to his/her chosen concentration, elect a substantive number of courses in his/her teaching field. Students considering the program should consult with advisors both in the academic department and in the Education Department to design an appropriate program of study that meets Rhode Island state certification requirements and those of many other states.

All of the required courses in education must be taken at Brown. None can be transferred for credit from other institutions. Requirements of the program include:

An Education elective.

Education Graduate Program
The department of Education Studies offers graduate programs leading to the Master of Arts in Teaching (M.A.T.) in both Elementary Education and Secondary Education, as well as a Master of Arts (A.M.) in Urban Education Policy.

The two M.A.T programs are Certification eligible for Rhode Island state teacher certification in elementary (grades 1-6) or secondary education...
(grades 7-12). Rhode Island is a member of the Interstate Certification Compact (ICC) (http://www.state.ri.us/ EducatorQuality/Certification-Reciprocity.aspx), which has reciprocal agreements with 44 states. For more information on M.A.T. admission, program requirements, and state certification requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/education-master-arts-teaching

For more information on the A.M. in Urban Education Policy admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/education-urban-education-policy

Courses

EDUC 0400. The Campus on Fire: American Colleges and Universities in the 1960’s.
Ole Miss, Berkeley, Columbia, and Kent State: just a few of the campus battlegrounds where conflicts over civil rights, the Vietnam War, and other major issues were fought in the 1960’s. Students consult primary and secondary sources about higher education’s role in these conflicts, and why the consequences of its involvement still linger today. Enrollment limited to 20 first year students. FYS WRIT.

EDUC 0410A. New Faces, New Challenges: Immigrant Students in U.S. Schools.
What challenges do immigrant students face in adapting to a new system of education? By comparing and contrasting the perspectives education stakeholders—students, teachers, administrators, and parents—this course examines a number of key contributions to the study of the immigrant experience in education, as well as a selection of memoirs and films about the pathways these newcomers take in navigating school and (trans)forming their developing identities. Enrollment limited to 20 first year students. FYS WRIT.

Introduces perspectives on education based in history, economics, sociology, and political science. Students engage foundational texts in each of these fields, using the insights gained to examine controversial issues in American education policy, including policies to address ethnic disparities in student achievement, test-based accountability, class-size reduction, and school choice. Enrollment limited to 20 first year students. FYS.

EDUC 0410C. The Literature of Children and Young Adults.
This course considers the literary, dramatic, and visual qualities of the literature of young readers since the 18th century, with a dominant, but not exclusive, focus on literature in English. Topics covered will include dominant themes in visual and textual aspects of these literatures, as well as their history and relationships to societal economics and valuations of children, schooling, and moral codes. Enrollment limited to 20 first year students. FYS.

EDUC 0410D. Brown v. Board of Education.
Using sources in history, education, and law this course will explore the landmark Supreme Court case of Brown v. Board of Education which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in Brown and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of Brown and analyze its impact on the civil rights movement, schooling, law, and politics in the late twentieth century and consider its implications for the future. Enrollment limited to 20 first year students. FYS DVPS WRIT.

EDUC 0410E. Empowering Youth: Insights from Research on Urban Adolescents.
Together, we consider the design, analysis, and interpretation of research on youth in urban settings. In doing so, we examine the roles of power, privilege, and multiculturalism in research. In the experiential component of the course, students engage in fieldwork in a local school or community-based youth organization. As part of their fieldwork, students design and undertake a research project, thereby bridging theory with practice. Reserved for First Year students. Enrollment limited to 20 first year students. Instructor permission required. FYS DVPS WRIT.

EDUC 0410F. The Mind, Brain, and Education.
What do the brain and body have to do with learning? How can research findings from the brain and biological sciences inform educational practices? This first-year seminar will involve discussion of current research from multiple disciplines (e.g., education, neuroscience, neuropsychology, psychology) on topics such as brain development, stress, sleep, rhythms, and emotion/motivation. Mini-lectures will provide students with a basic appreciation of the brain and basic bioregulatory systems. Students will gain an understanding of methods for studying brain/behavior interactions and explore implications of new biological/brain findings for learning and education during the preschool, elementary, middle-school, and high-school years. Enrollment limited to 20 first year students. FYS.

EDUC 0450. The University: Defining Ideals and Ideas.
The course examines the concept of the university and the college in America, their foundations and development, and society’s expectations of them and their leaders. Philosophical and religious heritage, ethical and moral issues, and major themes, changes, pressures, and their role of presidents embedded in the landscape and contributions of the univeristy and its shape and future will be addressed.

EDUC 0800. Introduction to Human Development and Education.
Introduces the study of human development and education from infancy through young adulthood. Provides a broad overview of scientific understanding of how children develop and how research is generated in this field. Major topics include biological foundations, mind, cognition, language, emotion, social skills, and moral understanding based on developmental theories and empirical research. The educational implications of research on human development are discussed. WRIT.

EDUC 0840. Public Policy and Public School Reform.
Will examine and assess the strategies and policies fashioned—particularly at the state and district level—to address the complex and intractable issues facing public schools.

EDUC 0850. History of Intercollegiate Athletics.
This team-taught course traces the changing place of intercollegiate athletics on the American college campus over the past 150 years. Topics examined include, among others, the historical relationship between academic and athletic pursuits; commercialization and professionalism; the role of the NCAA and of the media; the cult of the coach; and the significance of race, gender, and class. Emphasis on critical reading, active participation in discussion, and developing research and writing skills. The course will meet twice weekly, sometimes as a whole and sometimes in smaller groups, to discuss readings, films, and guest presentations. Enrollment limited to 30.

EDUC 0900. Fieldwork and Seminar in Secondary Education.
Combines study of current educational issues with extensive fieldwork that allows the student to observe how these issues translate themselves into reality on a daily basis. Each student reads and discusses recent writing about educational history, theory, and practice, and observes a class in a local school for 32 hours. The final paper synthesizes reading and observations.

EDUC 1010. The Craft of Teaching.
What is the "craft of teaching"? A wide variety of texts are used to investigate the complexity of teaching and learning. Considering current problems as well as reform initiatives, we examine teaching and learning in America from the perspectives of history, public policy, critical theory, sociology, and the arts. Weekly journals and reading critiques; final portfolio presented to the class.

EDUC 1020. The History of American Education.
This course is an introduction to the history of American education with an emphasis on K-12 public schooling. Using primary and secondary sources, we will explore the development of public schools and school systems, debates over aims and curriculum, conflicts over school governance and funding, and struggles for equity and inclusion over time. We will analyze the relationship between schooling, capitalism, and democracy. Finally, in exploring how different generations have defined and tried to...
solve educational dilemmas, we’ll consider how this history might help us approach education today

**EDUC 1030. Comparative Education.**
National systems of formal education, over the past two centuries, have proliferated massively. International organizations, governmental and nongovernmental, have long promoted the universal provision of mass education as central goals in the modern way of life. At the same time, the way children are raised, and the kinds of adults they become, varies considerably. Comparative education seeks to explore this interplay of variety and uniformity. Enrollment limited to 40

**EDUC 1040. Sociology of Education.**
The eclectic sociological imagination is turned upon that crucial modern institution: education. Considers formal education as a contemporary institution and schools as organizations both in comparative perspective and in more microscopic ways. Asks what schools and schooling means to society and to children from different social and economic circumstances. Enrollment limited to 50

**EDUC 1050. History of African-American Education.**
This course will examine the history of African-American education with particular emphasis on the twentieth century. We will explore African-Americans’ experiences with schooling under slavery and segregation, the struggle for desegregation and equity North and South, and the place of education in African-Americans’ quest for equal rights. We will also consider how the African-American experience with public schooling makes us rethink major narratives of American education, democracy, and equality of opportunity and how an historical understanding of these issues may help us engage contemporary debates

**EDUC 1060. Politics and Public Education.**
Who exercises power in public education? This course examines the key institutions (e.g. school districts, states, Congress, and the courts) and actors (e.g. parents, teachers, interest groups, and the general public) shaping American K-12 education in order to understand recent policy trends and their consequences for students. Major policies discussed include school finance, textbook adoption, school accountability, and school choice. Particular attention is given to the federal No Child Left Behind Act of 2001 and debates over its reauthorization. Previous coursework in American politics or public policy is suggested but not required

**EDUC 1070A. Student Teaching: English.**
S/NC

**EDUC 1070B. Student Teaching: History and Social Studies.**
S/NC

**EDUC 1070C. Student Teaching: Science.**
S/NC

**EDUC 1080A. Analysis of Teaching: English.**
S/NC

**EDUC 1080B. Analysis of Teaching: History and Social Studies.**
S/NC

**EDUC 1080C. Analysis of Teaching: Science.**
S/NC

**EDUC 1090. Adolescent Literature.**
This course will present a general overview of the historical, socio-cultural, academic, and political issues that provide context for the use and availability of adolescent literature today. Particular attention is paid to issues of reading engagement for striving adolescent readers, issues of access to literacy through adolescent literature, ways that adolescent literature can be paired with the classics, and issues of censorship in American public school classrooms and public libraries. Several special guest speakers from public schools, non-profit organizations, and libraries will join us literally and virtually to add to our perspectives on the debates surrounding adolescent literature. Not open to first-year students

**EDUC 1100. Introduction to Qualitative Research Methods.**
Designed for sophomores or juniors concentrating in education studies, but also open to other undergraduates interested in qualitative research methods. Through readings, class exercises and discussions, and written assignments, examines issues related to the nature of the qualitative research methods that are commonly used in education, psychology, anthropology, and sociology. Enrollment limited to 20

**EDUC 1110. Introductory Statistics for Education Research and Policy Analysis.**
Introduction to the key ideas underlying statistical and quantitative reasoning. A hands-on pedagogical approach utilizing examples from education research and public policy analysis. Topics include the fundamentals of probability, descriptive and summary statistics, statistical inference, bivariate and multivariate regression, correlation, and analysis of variance. Computer-based data analysis reinforces statistical concepts. Enrollment limited to 24

**EDUC 1120. History of American School Reform.**
Examines a century of efforts to improve schooling in the U.S., from John Dewey to Theodore Sizer and E.D. Hirsch, from "social efficiency" to charter schools and No Child Left Behind. How have these movements been affected by the historical contexts in which they operated? Have they produced any lasting results? How, if at all, should current reform movements be informed by the experiences of the past? Enrollment limited to 40. Instructor permission required

**EDUC 1130. Economics of Education I.**
How do we attract good teachers to public schools? What are the economic returns to early-childhood intervention programs? These are just two examples of important education policy questions. This course introduces key concepts of microeconomic theory and uses them to analyze these and other policy questions. Organized around a structured sequence of readings. First year students require instructor permission. WRIT

**EDUC 1140. Education for Liberation.**
Does education challenge inequality, or (re)produce it? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions at different levels—the classroom, the school, the community, the nation, and the global society. We first examine the proposition that education can be a tool of oppression, and then consider how communities have organized struggles to demand and define a liberatory education. Rather than evaluate any technical school "reform" efforts, we consider attempts at revolutionary alternatives to dehumanizing educational conditions and institutions. Enrollment limited to 25. S/NC

**EDUC 1150. Education, the Economy and School Reform.**
Changes in the economy have had dramatic negative consequences for those without a college degree. This seminar explores the impact of these changes on workplace organization and the demand for skills, on what is taught in schools, and on school reform. Prerequisites: Education and PP concentrators, EDUC 1130 and EDUC 1110 (or equivalent); Economics concentrators, ECON 1110 or ECON 1130, and ECON 1620. Enrollment limited to 20

**EDUC 1160. Evaluating the Impact of Social Programs.**
Does a GED improve the earnings of dropouts? Do stricter gun laws prevent violent crime? Such "causal" questions lie at the heart of public policy decisions. This course examines both the difficulties involved in answering causal policy questions, and research designs that can overcome these difficulties. Prerequisite: EDUC 1110, POLS 1600, ECON 1630, SOC 1100 or equivalent. Enrollment limited to 32

**EDUC 1180. Education for Liberation.**
Does education challenge inequality, or (re)produce it? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions at different levels—the classroom, the school, the community, the nation, and the global society. We first examine the proposition that education can be a tool of oppression, and then consider how communities have organized struggles to demand and define a liberatory education. Rather than evaluate any technical school "reform" efforts, we consider attempts at revolutionary alternatives to dehumanizing educational conditions and institutions. Enrollment limited to 25. S/NC

**EDUC 1200. History of American School Reform.**
Examines a century of efforts to improve schooling in the U.S., from John Dewey to Theodore Sizer and E.D. Hirsch, from "social efficiency" to charter schools and No Child Left Behind. How have these movements been affected by the historical contexts in which they operated? Have they produced any lasting results? How, if at all, should current reform movements be informed by the experiences of the past? Enrollment limited to 40. Instructor permission required

**EDUC 1220. The Anthropology of Education.**
Designed to introduce students to the many forms of "education" across the life-span and in different cultures, this course will call on students to step beyond their own schooling. Of particular importance will be the uses of materials, experts, space and time in different educational settings. Film and print materials will allow students to rethink the idea of "learner" and "teacher" in terms of varying needs, goals, and situations

**EDUC 1230. Urban Teachers and Educational Change in Historical Perspective.**
Will explore the history of American teachers in the urban context from the rise of the common schools in the mid-nineteenth century to the present. Through the analysis of rich primary and secondary sources, students will examine the ways in which teachers have experienced and, in turn, shaped the schools. Focusing on public elementary and secondary school teachers of the nation's urban centers, this historical inquiry draws from the history of education, labor history, and the history of identity
EDUC 1260. Emotion, Cognition, Education.
Provides an understanding of the role of emotions in influencing cognitive and social development. Reviews selected topics in the growing area of emotions and social cognition. Discussions focus on critical reviews of the literature and the application of the literature to education. Basic knowledge of the area is not assumed, so students in various areas are invited to participate.

EDUC 1270. Adolescent Psychology.
Provides systematic treatment of the psychological, biological, and sociocultural nature of the adolescent. Both an individual and a collective perspective on the nature of the adolescent and adolescence are used to provide an analytical and comprehensive understanding of the complex environment and psyche of the adolescent. Readings include theoretical and empirical papers from such areas as psychology, sociology, anthropology, and education.

EDUC 1280. International Perspectives on Informal Education.
Internationally, informal learning figures centrally from early childhood through the lifespan. Voluntarily chosen areas of expertise, societally necessary tasks, and interpersonal relationships lead individuals, corporations, and communities to undertake informal education. Central to this course is examination of major means and conditions of such learning in international contexts through four primary themes—play, everyday science, social entrepreneurship, and community collaborations.

EDUC 1290. From Theory to Practice in Engaged Scholarship: Creating Community Based Learning Courses.
This course will explore theories of community-based learning and engaged scholarship within the context of higher education. The course is designed to provide students with an understanding of the possibilities in the teaching and learning exchange to address significant social concerns. Enrollment limited to 20.

EDUC 1430. The Psychology of Race, Class, and Gender.
Focuses on the social construction of race, class, and gender and how this construction influences an individual’s perception of self and other individuals. Topics include identity development, achievement, motivation, and sociopolitical development. Enrollment limited to 30. WRIT

EDUC 1450. The Psychology of Teaching and Learning.
Seeks both to demystify the process of teaching and to illuminate its complexities. Assists students with such questions as: What shall I teach? How shall I teach it? Will my students respond? What if I have a discipline problem? Focuses on the teaching-learning process and student behavior, as well as research, theory, and illustrations concerned with classroom applications of psychological principles and ideas. Prerequisites: EDUC 0800 or EDUC 1710. Enrollment limited to 50.

EDUC 1560. Philosophy of Education: Educational Thought and Practice.
Consideration of different philosophies of education (classical, progressive, radical, feminist, multicultural). This iterative inquiry-based collaboration locates knowledge constructively and relationally, emphasizing classroom discussion and presentation, careful reading and writing (including on-line), school-site observation, and midterm and final projects on our philosophies and praxes of education. Enrollment limited to 20. DVPS LILE WRIT

EDUC 1580. Cross-Cultural Perspectives on Child Development.
Focus on role of culture in child development, infancy to young adulthood. Reviews contemporary theories and empirical research to examine various age periods and domains of development. Major topics: infant care, parenting, socialization, gender roles, cognition, moral development, affect, adolescence, and education and schooling in formal and informal settings. Enrollment limited to 50.

Combines intensive study of primary and secondary sources from American history and literature between 1945 and 1980 with extensive consideration of how to teach these topics to secondary school students. Topics include the Cold War, McCarthyism, consumer society, civil rights, the women’s movement, Vietnam, and Watergate, often studied through unconventional sources such as popular music, movies, television shows, and fiction. Recommended prerequisite: HIST 0520 or equivalent. Enrollment limited to 20. Instructor permission required.

Despite expending significant energy on education reform in this country and globally, most efforts fail to achieve their lofty ambitions, due to their reliance on “silver bullet” strategies and/or poor execution. This course will focus on management approaches to improving school system performance, enabling students to (a) explore key education reform strategies; (b) adopt a senior management mindset through weekly discussion of case studies; and (c) broaden their perspective through use of domestic and global school system examples. The course is appropriate for juniors, seniors and graduate students, who bring an interest in education and a commitment to active classroom discussion. Enrollment limited to 24.

EDUC 1650. Policy Implementation in Education.
This course offers an "analytical foundation" for students interested in public policy implementation, with particular emphasis on education. Drawing on social science research, the course examines strengths and limitations of several frameworks, including the "policy typology" school of thought, the rational actor paradigm, the institutional analysis, the bargain model, the organizational-bureaucratic model, and the "consumer choice" perspective. Enrollment limited to 20. WRIT

EDUC 1690. Literacy, Community, and the Arts: Theory into Practice.
An exploration of ways to improve student literacy skills through the performing arts in area schools. Students read about the theory and practice of literacy and the arts, research national and local initiatives, engage in arts activities, and spend time in area classrooms working with local teachers and artists to draft curriculum materials to be used in summer and school-year programs. Enrollment limited to 20.

EDUC 1710. History and Theories of Child Development.
An examination of child development from a historical and theoretical perspective, including key historical figures such as Darwin, Hall, Baldwin, Binet, Freud, Watson, Piaget, Vygotsky, Gesell, McGraw, Bowling, and Bayley. Explores theoretical conceptualizations of children and adolescents and investigates the representations of children in popular culture, governmental legislation, education, and public policy.

EDUC 1720. Urban Schools in Historical Perspective.
Why did urban schools, widely viewed as the best in the nation in the early twentieth century, become a "problem" to be solved by its end? How have urban schools been shaped by social, economic, and political transformations in cities and by other public policies? How have urban schools changed over time? This course will ask these and other questions to explore how historical perspective can help us better understand urban schools today. We will analyze the impact of changes in demographics, urban renewal and suburban development, the political economy of cities, educational expectations, and demands for equity. Enrollment limited to 20.

EDUC 1730. American Higher Education in Historical Context.
A study of 350 years of American higher education. The first part traces the growth and development of American higher education from premodern college to the modern research university. The second part examines issues facing higher education today and places them in historical context. Particular attention is given to: the evolution of curriculum; professionalism; student life; and the often competing priorities of teaching, research and service.

EDUC 1740. Academic Freedom on Trial: A Century of Campus Controversies.
Inside and outside the classroom—for professors, students, administrators, and others—academic freedom has been contested by forces external and internal to the university. This course focuses on challenges to and changes in the definition and application of "academic freedom" from the end of the 19th century to the present day, with particular attention to academic freedom during times of crisis, especially wartime, and includes consideration of current issues such as speech codes, corporate and government funding of research, and the place of religion on campus. Enrollment limited to 40. WRIT

EDUC 1750. Contemporary Social Problems: Views from Human Development and Education.
Explores social problems in terms of contemporary theories and research in human development and education. The class chooses issues for discussion and researches their mechanisms and possible solutions.
Demands basic knowledge of theory and research in psychology, sociology, or anthropology, and background in educational issues. Prerequisite: EDUC 0800, 1270, or 1710; or any other two social science courses

EDUC 1850. Moral Development and Education.
Examines contending approaches to moral development and its fostering in the home, school and peer group. Topics include philosophical underpinnings of moral theory, cognitive and behavioral dynamics of moral growth, values climate of contemporary American society, the role of schooling, and variations attributable to culture and gender. Prerequisites: EDUC 0800, 1270, or 1710, or CLPS 0610 (COGS 0630), or CLPS 0600 (PSYC 0810). Enrollment limited to 30. S/NC

EDUC 1860. Social Context of Learning and Development.
Focuses on the social environment that contributes to the development of children’s minds, language, self-understanding, relations with others, affect, and attitudes toward learning. Examines the period from birth through young adulthood. Topics include children’s social interactions, parental expectations and socialization practices, and the influences of family, peers, school, and media. Prerequisites: EDUC 0800, EDUC 1270, EDUC 1430, EDUC 1580, EDUC 1710, CLPS 0610 (COGS 0630), or equivalent. Enrollment limited to 30.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EDUC 1990. Independent Reading and Research.
Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 2060A. Methods of Teaching: English.
S/NC

EDUC 2060B. Methods of Teaching: History and Social Studies.
S/NC

EDUC 2060C. Methods of Teaching: Science.
S/NC

EDUC 2070A. Student Teaching: English.
S/NC

EDUC 2070B. Student Teaching: History and Social Studies.
S/NC

EDUC 2070C. Student Teaching: Science.
S/NC

EDUC 2080A. Analysis of Teaching: English.
No credit course

EDUC 2080B. Analysis of Teaching: History and Social Studies.
No credit course

EDUC 2080C. Analysis of Teaching: Science.
No credit course

EDUC 2090. Literacy Across the Curriculum.
Focuses on three major areas of pedagogy: literacy across the curriculum, special education, and teaching English Language Learners. Topics include: current theory and practice in the three areas, legal requirements for special education, planning for differentiated instruction, assessment and diagnosis of student skill levels, measuring and reporting student achievement, adapting content for ELLs, selecting and working with texts, and effective vocabulary instruction. Open to MAT students only. S/NC

EDUC 2110. Summer Practicum and Analysis.
Introduces MAT students to elementary school students through work in a unique summer enrichment program for inner city Providence children: Summer Prep readings and seminar meetings focus on arts education; introductions to the teaching of literacy, math and science; curriculum and lesson planning; creating a community of learners; issues of diversity; and physical education. S/NC

EDUC 2120. Practicum and Seminar in Elementary Education.
Students participate in an elementary classroom for 2 1/2 days a week for 12 weeks, participating in all aspects of the school day. Students assume responsibility for individualized instruction, small groups and some daily routines. Examines topics in child development; race, class, ethnic and linguistic diversity; assessment; teaching and learning as well as topics arising from the experiences in classrooms. S/NC

EDUC 2130. Issues and Trends in Education.
Introduces students to a range of topics that define the current debates in education; the competing purposes of state sponsored education; the standards movement; diversity issues and educational outcomes; the reading wars; standardized testing; multicultural and bilingual education; school choice; teacher unions and teacher professionalism. Students read about these issues from multiple perspectives and form their own views of the debates. Open to undergraduate enrollment

Using a developmental approach, students are introduced to the major concepts and teaching methods used in elementary math and science classrooms. S/NC

EDUC 2150. Language and Literacy in the Elementary School Classroom.
An introduction to Comprehensive Literacy instruction in reading and writing, including strategies for teaching interactive read alouds; shared reading and shared writing; phonics and word work; independent reading workshop; guided reading; writer’s notebooks; writing workshop; and children’s literature via an author study. S/NC

EDUC 2270. Student Teaching.
Provides no fewer than 180 hours of student teaching and observation-equivalent to six semester hours of credit in institutions operating on a semester-hour basis and fulfills the supervised student teaching requirements for elementary school teaching certification in Rhode Island and in ICC member states. S/NC

EDUC 2280. Seminar: Principles of Learning and Teaching.
A critical analysis of the activity of teaching, restricted to and required of students taking EDUC 2270. The course requires curriculum and lesson planning, reflective analyses of student learning and classroom teaching, and places learning and teaching in context with attention to issues of diversity of schools and their student bodies. S/NC

EDUC 2300. Structures and Systems in Urban Education.
The aim of this course is to prepare future education policy leaders to understand, have the tools to investigate and be effective in the context of the many organizations that affect the well-being and ultimate success of urban students. Throughout the course, the city of Providence, along with nearby cities, will be a major “text

EDUC 2310. Introduction to Educational Research.
Intensive six-week course designed to prepare future leaders in urban education policy with a fundamental understanding of basic concepts, techniques and strategies of social science research. The goal is for students to acquire skills and knowledge that enable them to inform the design, implementation and ultimate use of applied research in a policy setting and to appreciate its limitations

EDUC 2320. Quantitative Research Methods and Data Analysis.
The goal of this course is to provide students in the Urban Education Policy program with a fundamental understanding of basic concepts, techniques and strategies of social science research. The goal is for students to acquire skills and knowledge that enable them to inform the design, implementation and ultimate use of applied research in a policy setting and to appreciate its limitations

This course is a requirement for students of the MA in Urban Education Policy program. It deals with the political science and public policy central question of: How can public institutions be redesigned to improve accountability? Particular attention will be given to the governance and politics in urban public school systems
EDUC 2340. Human Development and Urban Education.  
In this course we will learn relevant theories and research in the academic field of Human Development to urban education practice and policy from preschools to high schools. Special emphasis will be placed in areas where there is research convergence and that are relevant to urban populations and settings. Recommended prerequisites: EDUC 0800 or EDUC 1710 or EDUC 1750

EDUC 2350. Economics of Education II.  
Introduces students to the main economic theories and related applied work that inform education policy analysis. In so doing, the course combines economic theory, econometric studies, and education and institutional literature in an examination of current issues in U.S. education, particularly those issues that are most relevant to urban education. The course begins with examinations of key concepts and theories from microeconomics, labor economics, and public economics that are most relevant for studying questions in education. After laying this theoretical foundation the course then examines how these theories can illuminate and aid policy analysis around key topics in U.S. education. Open to graduate students only

EDUC 2360. Policy Analysis and Program Evaluation for Education.  
Informed education policymaking requires reliable information about the causal effects of government programs and other factors shaping educational outcomes. This course offers an overview of education policy analysis with an emphasis on econometric strategies for measuring program impacts. It aims to make students critical consumers of policy evaluations and to equip them with tools to conduct their own research. Topics covered include the political context for policy research, social experiments, alternative strategies for making causal inferences, and cost-benefit analysis. Prerequisites: EDUC 1110, POLS 1600, SOC 1100, or written permission of the instructor

EDUC 2370. Internship.  
Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization

EDUC 2380. Internship.  
Students in the Urban Education Policy Master’s Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization

EDUC 2450. Exchange Scholar Program.  
EDUC 2890. Studies in Education.  
Independent study; must be arranged in advance. Section numbers vary by instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EDUC 2990. Thesis Preparation.

EDUC XLIST. Courses of Interest to Concentrators in Education.  
Fall 2012  
The following related courses in Education Studies are offered. Please check with the sponsoring department for times and locations.

Spring 2013  
The following related courses in Education Studies are offered. Please check with the sponsoring department for times and locations.

**Education Alliance for Equity and Excellence in the Nation’s Schools**

The Education Alliance works in collaboration with states, districts, schools, professional organizations, and communities to effect systemic change in education. As an applied research, development, and technical assistance department, The Education Alliance staff applies research findings to advance educational improvement in areas such as professional development, first and second language acquisition, educational leadership, instructional technology, and cultural and linguistic diversity. With over thirty years of experience, The Education Alliance builds the capacity of educational systems to provide equitable opportunities for all students to succeed. Funded annually through federal, state, local, and foundation grants and contracts, the Alliance is an established professional resource for high quality evaluation, development, and technical assistance services.

The Education Alliance conducts over twenty-five rigorous evaluation projects each year that provide educators and policy-makers with quantitative and qualitative information needed to strengthen programs and improve teaching and learning. It also operates the New England Equity Assistance Center (NEEAC), which assists schools in solving equity problems in education. The NEEAC provides training, technical assistance, support, and resources to educators and school systems in New England. In collaboration with the department of Portuguese and Brazilian Studies, the Alliance oversees the masters program in two areas: English as a Second Language and Cross-Cultural Studies (bulletin.brown.edu/divisionsdepartmentscentersprogramsandinstitutes/portugueseandbrazilianstudies), and Portuguese Bilingual Education and Cross-Cultural Studies. These programs incorporate current research in language acquisition, multiculturalism, and clinical experiences.

The Executive Director of The Education Alliance is Dr. Adeline Becker. For additional information please visit: http://www.alliance.brown.edu/

**Egyptology and Ancient Western Asian Studies**

**Chair**  
James P. Allen

The Department of Egyptology and Ancient Western Asian Studies is a new department designed to explore what is sometimes called the birthplace of Western civilization. It builds on the strengths of Brown’s former Department of Egyptology, widening the intellectual focus from ancient Egypt to all of Ancient Western Asia, also known as the Ancient Near East, where and when societies first began exhibiting more complex forms of organization such as writing. As a field of higher learning, Egyptology and Ancient Western Asian Studies is represented at most of the world’s great universities. Its establishment at Brown, beginning the 2005-06 academic year, is a product of Brown’s Plan for Academic Enrichment, a commitment to higher learning in the humanities and the sciences.

For additional information, please visit the department’s website: http://www.brown.edu/academics/egyptology/

**Egyptology and Ancient Western Asian Studies Concentration Requirements**

The concentration in Egyptology and Ancient Western Asian Studies offers students a choice of two tracks: Ancient Western Asian Studies or Egyptology. The department promotes collaborations with other academic units at Brown devoted to the study of antiquity including Archaeology, Classics, Judaic Studies, and Religious Studies. Egyptology and Ancient Western Asian Studies also collaborates with Brown’s Joukowsky Institute for Archaeology and the Ancient World.

**Ancient Western Asian Studies Track**

Also known as the Near East or Middle East, Western Asia includes present-day Iraq, Syria, Turkey, and other neighboring states, a broad geographic area that was connected in antiquity with the wider world—the Mediterranean, North Africa, the Arabian Peninsula, Central Asia, and the Asian subcontinent. Students will be exposed to the critical study of the ancient cultures of this region (ca. 3400 B.C.E.–100 C.E.) using the tools of archaeology, epigraphy, and historical inquiry. A variety of interdisciplinary, comparative, and theoretical approaches will be
introduced to give students the tools and methods to explore this region’s ancient languages and literatures, political and socio-economic modes of organization, art and architecture, religious traditions and other systems of knowledge, such as early science. The Ancient Western Asian Studies (AWAS) track requires a total of at least ten (10) courses that are determined in the following way:

**Introductory courses:**
- AWAS 0800 Introduction to the Ancient Near East
- or ARCH 0370 Archaeology of Mesopotamia
- or ARCH 1600 Archaeologies of the Near East
- AWAS 0200 Introduction to Akkadian
- AWAS 0210 Intermediate Akkadian

**Foundational Courses (at least one course from each of the following three areas):**
- History and Culture of Ancient Western Asia: 
  - AWAS 1100 Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (WRIT)
  - AWAS 2310B Assyriology I (WRIT)
  - AWAS 2310C Assyriology II (WRIT)
  - AWAS 1500 Ancient Babylonian Magic and Medicine
  - AWAS 2600 Topics in Cuneiform Studies

- Ancient Scholarship in Western Asia: 
  - AWAS 1600 Astronomy Before the Telescope
  - AWAS 1650 Time in the Ancient World (WRIT)
  - AWAS 1700 Astronomy, Divination and Politics in the Ancient World (WRIT)
  - AWAS 1750 Divination in Ancient Mesopotamia (WRIT)
  - AWAS 2310A Ancient Scientific Texts: Akkadian

- Archaeology of Ancient Western Asia: 
  - ARCH 1200F City and the Festival: Cult Practices and Architectural Production in the Ancient Near East (WRIT)
  - ARCH 1200I Material Worlds: Art and Agency in the Near East and Africa
  - ARCH 1810 Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East (WRIT)
  - ARCH 2010C Architecture, Body and Performance in the Ancient Near Eastern World (WRIT)
  - ARCH 2300 The Rise of the State in the Near East

**Depth Courses:**
- AWAS 1700 Astronomy, Divination and Politics in the Ancient World (WRIT)
- AWAS 1750 Divination in Ancient Mesopotamia (WRIT)
- AWAS 2310A Ancient Scientific Texts: Akkadian
- AWAS 2310C Assyriology II (WRIT)
- AWAS 2600 Topics in Cuneiform Studies

**Elective Courses:**
- At least one elective course must be approved by the undergraduate concentration advisor.

This list contains possible offerings but should not be considered exhaustive.

### Egyptology Track

The Egyptology track requires a total of at least ten courses. Six of these must be taken by all concentrators, but the remaining four can be chosen from a fairly broad range of courses, to suit individual interests.

**Introductory Courses:**
- AWAS 1310 Introduction to the Ancient Near East
- or ARCH 0370 Archaeology of Mesopotamia
- or ARCH 1600 Archaeologies of the Near East
- AWAS 0200 Introduction to Akkadian
- AWAS 0210 Intermediate Akkadian

**Foundational Courses (at least one course from each of the following three areas):**
- History and Culture of Ancient Western Asia: 
  - AWAS 1100 Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (WRIT)
  - AWAS 2310B Assyriology I (WRIT)
  - AWAS 2310C Assyriology II (WRIT)
  - AWAS 1500 Ancient Babylonian Magic and Medicine
  - AWAS 2600 Topics in Cuneiform Studies

- Ancient Scholarship in Western Asia: 
  - AWAS 1600 Astronomy Before the Telescope
  - AWAS 1650 Time in the Ancient World (WRIT)
  - AWAS 1700 Astronomy, Divination and Politics in the Ancient World (WRIT)
  - AWAS 1750 Divination in Ancient Mesopotamia (WRIT)
  - AWAS 2310A Ancient Scientific Texts: Akkadian

- Archaeology of Ancient Western Asia: 
  - ARCH 1200F City and the Festival: Cult Practices and Architectural Production in the Ancient Near East (WRIT)
  - ARCH 1200I Material Worlds: Art and Agency in the Near East and Africa
  - ARCH 1810 Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East (WRIT)
  - ARCH 2010C Architecture, Body and Performance in the Ancient Near Eastern World (WRIT)
  - ARCH 2300 The Rise of the State in the Near East

**Depth Courses:**
- AWAS 1700 Astronomy, Divination and Politics in the Ancient World (WRIT)
- AWAS 1750 Divination in Ancient Mesopotamia (WRIT)
- AWAS 2310A Ancient Scientific Texts: Akkadian
- AWAS 2310C Assyriology II (WRIT)
- AWAS 2600 Topics in Cuneiform Studies

**Elective Courses:**
- At least one elective course must be approved by the undergraduate concentration advisor.

This list contains possible offerings but should not be considered exhaustive.

---

### Capstone

All students pursuing either the Ancient Western Asian Studies or Egyptology tracks are required to complete a capstone project. The project can take many forms, but the common feature shared among all possible projects will be a public presentation. Typically in the final semester before graduating, the concentrator will give this capstone presentation before faculty, fellow students, and other interested audiences. If the concentrator is writing an undergraduate honors thesis, the procedure for which is detailed below, this work should provide the content for the capstone presentation. Students not writing an honors thesis will base their presentation on a research project more in depth than a class project, though the topic may stem from a course project or paper. The format of the presentation may vary; suggestions range from a video or an installation presented with discussion. Both the content and the format of the capstone project should be discussed with and agreed upon by the concentration advisor no later than the end of the first semester of the senior year.

### Honors

It is possible for students to receive the A.B. in Ancient Western Asian Studies or Egyptology with departmental honors. To do so students will need to write a senior honors thesis according to the criteria and procedure outlined below.

---

**Eligibility and Approval**

At the beginning of the second semester of the junior year, the student should begin thinking about potential topics and consult with the department’s concentration advisor. Students seeking to graduate with honors will have received strong grades in concentration courses. In practice this means a preponderance of grades of ‘A’ in concentration courses. Students who are considering graduating with honors are
strongly encouraged to take concentration courses for a letter grade. If the concentration advisor agrees that a senior honors thesis may be undertaken, the student must obtain (1) the agreement of two faculty members (at least one from the department) to serve as readers as well as (2) the approval of the department chair. If all parties agree that an honors thesis may be undertaken, the student must submit a working bibliography to the potential readers by the end of the semester (due 5/15).

Procedure
1. In the first semester of the senior year, the student will register for Individual Study Project. Note that this course is in addition to the ten courses required for the concentration. The student will submit a working title and outline, as well as a one-page abstract of the intended project by the end of the first month of the semester (due 9/30). The student will then work with the readers to prepare a detailed outline of the thesis with accompanying bibliography. Both readers must approve the thesis plan, and the student must then submit a partial draft (at least one major section) before the end of the Fall semester (due 12/15).
2. In the second semester of the senior year, the student will register for Individual Study Project. Note that this course is in addition to the ten courses required for the concentration. This stage will normally involve meetings with the first reader twice a month, and with the second reader monthly, to discuss the on-going research and writing of the thesis.
3. A complete draft of the thesis must be submitted to the honors committee by 5/15. As a rule of thumb, the thesis should be not more than 100 pages in length, including bibliography.
4. Three bound copies of the final version of the honors thesis must be deposited by 4/15.
5. During a half-hour session during the final exam period, the student will give a capstone presentation defending the thesis in front of the thesis committee as well as any other faculty and students who wish to attend.

Egyptology and Ancient Western Asian Studies Graduate Program

The Department of Egyptology and Ancient Western Asian Studies offers two tracks leading to one Doctor of Philosophy (Ph.D.) degree: Ancient Western Asian Studies and Egyptology. The department offers a Master of Arts (M.A.) degree as an option after two years of study, but does not admit applicants into the non-Ph.D. program.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/egyptology-and-ancient-western-asian-studies

Courses

Ancient Western Asian Studies

AWAS 0200. Introduction to Akkadian.
This course is an intensive introduction to the writing system, grammar and vocabulary of Akkadian, the language of ancient Mesopotamia (modern Iraq). Akkadian is the earliest known Semitic language (related to Arabic and Hebrew), first written over four thousand years ago, and the language of some of the oldest written myths, historical documents, omen, magical formulas and even love poems in the world. Students will learn the classic Old Babylonian dialect (ca. 1800 BCE), and read selections from texts in the original language. No prerequisites

AWAS 0210. Intermediate Akkadian.
This course is the second semester of an intensive, yearlong introduction to the Akkadian (Babylonian/Assyrian) language. Students will deepen their knowledge of the cuneiform writing system and continue to develop their grasp of Akkadian grammar. Readings from Mesopotamian texts in the original language will include, among others, selections from the Laws of Hammurapi, Assyrian historical texts (such as the accounts of Sennacherib’s siege of Jerusalem), and the story of the Flood from the Standard Babylonian Epic of Gilgamesh. Prerequisite: Introduction to Akkadian (AWAS0200) or permission of the instructor

From the Hanging Gardens of Babylon to the Tower of Babel to Babylon 5, the city of Babylon in ancient Iraq holds an important place in contemporary culture. But how much of what is commonly known of Babylon is true? In this course we will explore the ancient city of Babylon through its texts and archaeological remains and investigate the ways Babylon has been viewed over the past two thousand years. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

AWAS 0800. Introduction to the Ancient Near East.
This course offers an introduction to the study of the political, social and cultural history of the ancient Near East, from prehistory to the end of the Iron age (ca. 330 BC). Both literary sources and archaeological evidence are examined as relevant. Near East is understood here in its widest geographic extent, including primarily the Mesopotamian lowlands, Iranian and Syro-Anatolian highlands, as well as the Levantine coast. The course offers a broad survey of the cultural and religious developments in the region, but also addresses the broader methodological and historiographic problems involved in Near Eastern studies. State formation and the development of complex societies, cult practices and cuneiform literary traditions, art, architecture and material culture, issues of landscape and settlement systems, agricultural production, regional and interregional trade, and craft production will constitute the central issues in the course. WRIT

AWAS 1100. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia.
Creation, the Flood, the Tower of Babel--well-known myths such as these have their origins in ancient Mesopotamia, the land between the Tigris and Euphrates Rivers. Using both ancient texts in translation and archaeology, this course will explore categories of Mesopotamian culture labeled "myth" and "religion" (roughly 3300-300 BCE), critically examining the ancient evidence as well as various modern interpretations. Topics will include myths of creation and the flood, prophecy and divination, death and the afterlife, ritual, kingship, combat myths and apocalypses, the nature and expression of ancient religious experience, and representations of the divine. There are no prerequisites. WRIT

The course will focus on the cult of the gods and religious-historical interpretation of physical displacements among sacred places, including urban processions, visits to temples and journeys to sacred places within the context of the Ancient Near Eastern religions. We will attempt to sketch a map of the holy centers and cultic itineraries, focusing on case studies from Babylonia, Assyria and Syria from the third to the first millennium BC as well as comparative case studies from surrounding cultures. These topics will be explored with an emphasis on how written and archaeological sources can be interpreted with the help of theoretical literature

AWAS 1500. Ancient Babylonian Magic and Medicine.
A survey of ancient magic and medicine focusing on Mesopotamia (present-day Iraq, ca. 2500-300 BCE), with an emphasis on beliefs about the body, health, illness, and the causes of disease, such as witchcraft or angry gods. Topics will include the training of healers, exorcists, and herbalists; concepts of contagion and plague, modalities of treatment, incubations, prayers, and empirical remedies like prescriptions; ancient perceptions of problems like sexual dysfunction, the perils of pregnancy, tooth decay, epilepsy, and mental illness. Readings will be drawn from ancient texts (in translation), archaeology, and parallels with ancient Egypt, Greece, Rome, and the Bible. No prerequisites. Not open to first year students. WRIT

AWAS 1600. Astronomy Before the Telescope.
This course provides an introduction to the history of astronomy from ancient times down to the invention of the telescope, focusing on the development of astronomy in Babylon, Greece, China, the medieval Islamic world, and Europe. The course will cover topics such as the invention of the zodiac, cosmological models, early astronomical instruments, and the development of astronomical theories. We will also
explore the reasons people practiced astronomy in the past. No prior knowledge of astronomy is necessary for this course.

AWAS 1570. Divination in Ancient Mesopotamia.
The interpretation of natural events as portents of good or bad outcomes played an important role in religious, political, scholarly and everyday life in ancient Mesopotamia. In this course we will study Mesopotamian omens literature from textual, scientific, philosophical and cultural viewpoints in order to understand how divination operated and what it was used for.

AWAS 1800. Scribes and Scholarship in the Ancient Near East.
This course will explore the development of written traditions among the scribes of the Ancient Near East. Topics covered include the mechanics of writing on clay tablets, the training of scribes and the school curriculum, the status of scribes in society, the development of literary and scholarly traditions, the creation of tablet archives, and the range of scholarship (eg science, medicine, ritual, literature) found in the ancient near east.

AWAS 2120. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler. Prerequisite: AWAS 0200. Open to graduate students only.

AWAS 2130. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler.

AWAS 2310A. Ancient Scientific Texts: Akkadian.
Readings and analysis of a major scientific text in Akkadian. Prerequisite: AWAS 0200 or 0210. Open to graduate students only.

AWAS 2310B. Assyriology I.
The kings of Babylonia and Assyria took every opportunity to boast about their military victories, successful hunts, the completion of new cities, and the building and decoration of temples and palaces. But is theirs the only possible version of Mesopotamian history? This course examines episodes in the history of Babylonia and Assyria (ca. 2400-500BCE) by looking at the political and social relationships among kings, political elites, entrepreneurs, and commoners; emphasis is placed on reading Akkadian texts both in the original and in translation, with a focus on letters, royal inscriptions, and astrological reports. Prerequisite: AWAS0210 or instructor’s permission. WRIT

AWAS 2310C. Assyriology II.
This seminar will focus on selected topics of Neo-Assyrian history (1000-612 BC), including: the royal family; the queen and her influence; celebrating New Year’s festivals; hunting lions; conquering a city; constructing and decorating palaces and temples; urban renewal and the founding of new cities; the substitute king ritual; and scholarly life. Assyria in the first millennium BC will be examined principally from Assyrian texts in translation. WRIT

AWAS 2310D. Ancient Scientific Texts: Cuneiform Literature.

AWAS 2500. Readings in Sumerian.
Advanced readings in Sumerian cuneiform texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Sumerian cuneiform is required. A reading knowledge of both German and French is strongly recommended but not required.

AWAS 2600. Topics in Cuneiform Studies.
Advanced readings in Akkadian and Sumerian cuneiform texts in the original script and language(s). The focus of this course will be on the close reading of a specific genre, period, and/or dialect. A rotating cycle of topics to be covered may include the following with a synchronic and/or diachronic approach: historical texts and royal inscriptions, legal and administrative texts, letters, literary and religious texts, medical texts, or scholastic texts. May be repeated for credit. Prerequisite: AWAS 0210 or instructor permission. Open to juniors, seniors, and graduate students.

AWAS 2700. Special Topics in Ancient Sciences.
This course will be a topics course containing a detailed technical and cultural study of an area of science in a culture of the ancient world. Although intended for graduate students, undergraduate students who have taken EGYT 1600 or AWAS 1600 or a similar course may be admitted at the instructor’s discretion.

AWAS 2750. Art and Visual Culture in the Ancient Near East.
Peoples of the Ancient Near East from prehistory to the Hellenistic period produced a unique corpus of production technologies and visual culture. Cultures from Anatolia to the Iraqi southern alluvium, from the Levant to Iran and the Caucasus shared this common pictorial language in a variety of ways. In this seminar, we will investigate bodies of archaeological, architectural and pictorial evidence from the Near East while also debating relevant art and architecture historical methodologies and discourses in direct relationship to that material. Conceptual issues such as narrative, representation, perspective, agency, technology, style, symbolism, landscape, space, and power will be explored. Enrollment limited to 15.

AWAS 2900. Introduction to Hittite Language and Literature.
This course is an introduction to Hittite language, literature, and culture. Hittite, the earliest attested Indo-European language (thus related to Greek, Latin, and Sanskrit) was used in Anatolia during the second millennium BCE. It survives in tens of thousands of tablets written in cuneiform script. Students will learn the basic grammar of the language and read in the original or in translation specimens from the fascinating textual legacy of the Hittites, which includes myths, prayers, laws, diplomatic texts as well as formal and informal letters. They will also become familiar with the cultural environment in which those texts were composed.

AWAS 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

AWAS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

AWAS XLIST. Courses of Interest to Concentrators in Ancient Western Asian Studies.

Fall 2012
The following courses may be of interest to Ancient Western Asian Studies concentrators. Please see the sponsoring department for the time and location of each course.

Humanities

HMAN 1970D Places of Healing: Memory, Miracle, and Storytelling

Spring 2013
The following courses may be of interest to Ancient Western Asian Studies concentrators. Please see the sponsoring department for the time and location of each course.

Egyptology

EGYT 1200. Archaeology of Ancient Egypt.
A general survey of the archaeology of ancient Egypt in prehistoric and Pharaonic times. Covers such areas as the development of private and
royal funerary monuments, private and royal dwellings, and temples. Attention is also paid to the principles of Egyptian art and architecture and, where appropriate, to archaeological connections with the surrounding cultures. Offered in alternate years

EGYT 1210. Archaeology of Ancient Egypt.
See Archaeology of Ancient Egypt (EG0120) for description

EGYT 1310. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I).
Much of this two-semester sequence is spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology—essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. No prerequisites

EGYT 1320. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II).
Continuation of a two-semester sequence spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology—essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. Prerequisite: EGYT 1310

EGYT 1330. Selections from Middle Egyptian Hieroglyphic Texts.
Readings from the various genres of classical Egyptian literature, including stories and other literary texts, historical inscriptions, and religious compositions. Students will be expected to translate and discuss assigned texts. Prerequisite: EGYT 1310, 1320

EGYT 1340. Selections from Middle Egyptian Hieratic Texts.
Introduction to the hieratic script and readings from a variety of hieratic documents, including literary compositions, letters, and religious texts. Students will be expected to translate and discuss assigned texts. Prerequisite: EG 131, 132 (EGYT 1310, 1320)

EGYT 1410. Ancient Egyptian Literature.
A survey of one of the most intriguing aspects of ancient Egyptian culture. Readings (in translation) of many of the most significant literary documents that survive from Egypt. Presentation of a reasonable amount of historical perspective. Class discussions concerning the nature, purpose, quality, and effectiveness of the works read. Two term papers. No prerequisites. Offered in alternate years. WRIT

EGYT 1420. Ancient Egyptian Religion and Magic.
An overview of ancient Egyptian religion from both a synchronic and diachronic perspective. Examines such topics as the Egyptian pantheon, cosmology, cosmogony, religious anthropology, personal religion, magic, and funerary beliefs. Introduces the different genres of Egyptian religious texts in translation. Also treats the archaeological evidence which contributes to our understanding of Egyptian religion, including temple and tomb architecture and decoration. Midterm and final exams; one research paper. WRIT

EGYT 1430. History of Egypt I.
A survey of the history and society of ancient Egypt from prehistoric times to the end of the Eighteenth Dynasty (ca. 5000-1300 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history. WRIT

EGYT 1440. History of Egypt II.
A survey of the history and society of ancient Egypt from the Ramesside Period to the Roman conquest (ca. 1300-30 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history

Continuation of EGYT 1430, 1440 (not prerequisites). Covers the Third Intermediate and Late Periods (ca. 1000-332 B.C.E.), from the end of the New Kingdom to Alexander’s conquest. Characterized by internal conflict and long intervals of foreign domination, this era, is often described as a period of decline, but closer study shows it to be eventful and rich in documentation. Offered in alternate years

The course will cover Egypt’s 25th Dynasty (728-657 BC), when rulers of Nubia, located in the region of modern Sudan, added Egypt to their territories. Using a wide range of textual and archaeological evidence, students will learn about the history of famous ‘black pharaohs’ such as Taharqa and study some of Africa’s most impressive archaeological remains. This fascinating period is not well understood and has often been afflicted in the past by racist, colonialist scholarship; using primary sources and recent theory on ethnic identity, this class will re-examine the complex and changing relationship between Egypt and Nubia

EGYT 1460. History of Egypt IV. The Age of Cleopatra.
Continuation of EGYT 1430, 1440, and 1450 (not prerequisites). A survey of the history and society of ancient Egypt from Alexander’s conquest to the Arab Conquest, ca. 332 B.C.E.-A.D. 600. Covers the Ptolemaic (323-30), Roman (30 B.C.E.-ca. A.D. 300), and Byzantine (ca. A.D. 300-640) periods. Focal point and pivot is the Ptolemaic period, from Alexander the Great to Cleopatra (332-30 B.C.E.). Offered in alternate years

EGYT 1470. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods.
The history of Egypt may be famous for the tombs, pyramids and mummies of Pharaonic periods. This course, however, offers a vision of a different Egypt, a later Egypt; one that evolved from the traditions of the past but was infused by Christianity, Islam, Arabic, and the emergence of one of the world’s great cities: Cairo. Students will experience the heritage of Egypt that is contained in the mosque of al-Azhar, the monasteries of the Egyptian desert, and the pageantry and ritual of a new set of ruling elites. At the same time they will understand the continuities of this land which Egyptians refer to as Umm al-Duniya “Mother of the World”

EGYT 1480. Egypt in the Global World.
From the 4th to the 2nd millennium BC we see Ancient Egypt as part of a wider world in the Eastern Mediterranean. Egypt had diplomatic and trade contacts with the major powers and smaller political entities of this period as well as armed conflicts. These contacts left an abundance of material evidence in Egypt in the archaeological and epigraphical records such as foreign luxury items and pottery, and depictions of foreigners in Egyptian tombs and temples. The course will shed light on the varying intensity and character of the relationship between Egypt and her neighbors in the Levant, Nubia and Libya and wider Eastern Mediterranean world

EGYT 1490. Calendars and Chronology in Ancient Egypt and the Ancient World.
Time is the dimension of history. Chronology studies how we know when events happened. Chronology is much more important to "BC history" than to "AD history." History books state that the great Ramses II ruled around the thirteenth century B.C.E. But how do we know this? The focus of this class is on the answers to such questions through the study of the foundations of the history of Egypt specifically and of the ancient world in general. Some prior knowledge of Egyptian language or civilization might be handy but is by no means required

EGYT 1500. Ancient Egyptian Art and Architecture.
Ancient Egyptian art and architecture had a remarkably long history, and much that was produced is amazingly well preserved. This course will focus on the inception and development of these material expressions of high culture through detailed studies of monumental buildings and decorated private tombs, as well as the sculpture, painting, and minor arts from the Predynastic period through the end of the Middle Kingdom (c. 3700-1790 BC). Enrollment limited to 20

EGYT 1510. Ancient Egyptian Art II.
Considers the art of ancient Egypt’s New Kingdom or Empire Period (1500-1100 B.C.). The relief carving and painting of Theban temples and tombs are studied in detail, and the developments leading to the revolutionary Amarna style of art is carefully analyzed. Decorative arts, Tutankhamun’s treasures, and recent exciting discoveries are all surveyed. WRIT
EGYT 1520. The Archaeology of Ancient Egyptian Household and Settlement
Survey of the primary settlement remains from the Pharaonic Period of ancient Egypt, addressing the practices and problems in settlement and household archaeology. Not open to first-year students.

EGYT 1550. Ethnic Identity in Graeco-Roman Egypt
Egypt under Greek and Roman rule (from c. 332 BC) was a diverse place, its population including Egyptians, Greeks, Jews, Romans, Nubians, Arabs, and even Indians. This course will explore the sometimes controversial subject of ethnic identity and its manifestations in the material and textual record from Graeco-Roman Egypt, through a series of case studies involving individual people and communities. Topics will include multilingualism, ethnic conflict and discrimination, legal systems, and gender, using evidence from contemporary texts on papyrus as well as recent archaeological excavations and field survey projects.

EGYT 1910. Senior Seminar
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EGYT 1920. Senior Seminar
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course

EGYT 2210. Introduction to Coptic
Coptic, the last stage of the ancient Egyptian language, was written with essentially Greek alphabetic characters. An introduction to Sahidic, which is perhaps the best represented of the Coptic dialects. Sahidic grammar is explained, and some texts, mainly of a biblical and patristic nature, are read. Open to undergraduates with the consent of the instructor. No prerequisites, but knowledge of Middle Egyptian or Greek would be helpful.

EGYT 2310. History of the Ancient Egyptian Language
Diacronic survey of ancient Egyptian from Old Egyptian through Coptic, covering changes in phonology and grammar and analyzing the processes through which these changes took place. Course requirements are short research papers to be presented in class and a final examination. Previous course work in at least one stage of the Egyptian language required; knowledge of Late Egyptian, Demotic (grammar) or Coptic preferable. Prerequisites: EGYT 1310 and EGYT 1320, plus either EGYT 2210, EGYT 2410 or EGYT 2610

EGYT 2410. Late Egyptian
Introduction to the grammar of the third historical phase of ancient Egyptian and readings from its various genres, including literary texts, letters, historical inscriptions, and tomb-robbing papyri. Students will be expected to translate and discuss assigned texts. Prerequisites: EGYT 1310, 1320.

EGYT 2510. Social Life in Ancient Egypt
This course will provide a valuable opportunity to link theory and data innovatively. Taking the lifecycle as its structure, it covers Egyptian life from conception to death and the afterlife, drawing together a range of data sources, such as material culture, iconography, textual data, and human remains. WRIT

EGYT 2610. Introduction to Demotic
Begin with discussions and exercises in the grammar and peculiar script of this late stage of the Egyptian language, followed by readings of actual ancient texts, including The Instructions of Onkhseshonkh, The Petition of Petiese, and The Story of Setne Khaemwas. Knowledge of Demotic remains essential for a proper understanding of Egypt during the Saite, Persian, Ptolemaic, and Roman periods. Open to undergraduates with consent of instructor. Prerequisites: EGYT 2410 or 2210

EGYT 2810. Old Egyptian
Introduction to the grammar of the first historical phase of ancient Egyptian and readings from its two primary genres, the Pyramid Texts and autobiographical inscriptions. Students will be expected to translate and discuss assigned texts. Prerequisites: EG 131, 132 (EGYT 1310, 1320).

EGYT 2970. Preliminary Examination Preparation
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

EGYT 2980. Reading and Research
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 2990. Thesis Preparation
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

EGYT XLIST. Courses of Interest to Concentrators in Egyptology
Fall 2012
The following courses may be of interest to Egyptology concentrators. Please see the sponsoring department for the time and location of each course.

Humanities
HMAN 1970D Places of Healing: Memory, Miracle, and Storytelling
Spring 2013
The following courses may be of interest to Egyptology concentrators. Please see the sponsoring department for the time and location of each course.

English
Chair
Philip Gould
Our department fosters the open understanding of literatures and cultures in English. We promote original work on new questions of history, criticism, theory, and analysis. We invite practices of reading and writing that challenge the ongoing creation of knowledge in our fields. English is among the largest undergraduate concentrations at Brown, and graduates of our Ph.D. program are recognized for their scholarship across the globe. Our nonfiction writing program opens up the useful diversity of styles and modes of writing.

For additional information, please visit the department’s website: http://www.brown.edu/academics/english

English Concentration Requirements
The English concentration introduces students to the study of literature written in English in a range of national and historical contexts. Concentrators will learn to analyze and think critically about a literary text as both a formal and historical document. They will also study the ways in which literary shapes, and is shaped by, issues in the contemporary world. Concentrators take one course providing them with historical grounding in English literature across three broad periods: 1) Medieval and Early Modern, 2) Enlightenment, Romantic, and Post-Romantic, and 3) 20th and 21st Century. The curriculum includes courses from the entire range of literature in English and a special “track” in Nonfiction Writing, which helps students strengthen their skills in critical writing, the research paper, journalism, creative writing, and nonfiction writing. One of the largest humanities concentrations at Brown, English may be pursued as the strong foundation for a liberal education and as a preparation for professional school and for graduate work in literature or other disciplines.

About the Concentration
Through the study of literature in English, concentrators develop skills in critical reading, thinking, and writing in preparation for a wide range of professions and careers including teaching, writing, publishing, media, medicine, law, and business. The concentration requirements aim to provide students with a coherent sense of the history of English literature from Anglo-Saxon times to the present. English concentrators have considerable latitude to choose the specific courses that will meet the requirements and we expect these choices to be informed by consistent consultation with a faculty advisor. Writing skills are an especially important focus of the English concentration. Through a variety of exercises from the short analytical essay to the longer research paper English concentrators are given a range of opportunities to sharpen their writing. We encourage students interested in concentrating in English to come into the department offices at 70 Brown Street and speak with a concentration advisor. Students in English courses who are considering an
English concentration are welcome to make an appointment to speak with their instructor.
Concentration programs must be approved by a concentration advisor. To declare a concentration, students who have not previously filed a paper concentration form must fill out an online Concentration form via ASK, as well as the English Department's Concentration Advising Plan (pdf). Students who declared their English Concentration in 2010-2011 or earlier may choose to fulfill the requirements for the previous version of the concentration (for details please see the English Department website).

Concentration Requirements (10 courses at the level of 0210 or above):

Area I: Medieval and Early Modern Literatures and Cultures:
- One course from the ENGL 0210 series
- One additional course in Medieval and Early Modern Literatures and Cultures

Area II: Enlightenment and the Rise of National Literatures and Cultures:
- One course from the ENGL 0410 series.
- One additional course in Enlightenment and the Rise of National Literatures and Cultures

Area III: Modern and Contemporary Literatures and Cultures:
- One course from the ENGL 0610 series.
- One additional course in Modern and Contemporary Literatures and Cultures
- One theory course
- Three electives

Total Credits: 10

1 Five courses must be 1000-level courses. With advisor approval, two of the ten required courses may be taken in departments other than English.
2 As many as two 1000-level courses dealing primarily with the practice of writing, rather than the interpretation of literature, may be counted as electives.

All substitutions and/or exceptions must be approved by the concentration advisor in consultation with the Director of Undergraduate Studies. A substitution or exception is not approved until specified in writing to the student's concentration file housed in the English Department.

English Concentration -- Nonfiction Writing Track (11 courses at the level of 0210 or above)
The English concentration also includes a Nonfiction Writing Track. The requirements are the same as above plus one English literature course emphasizing the genre of nonfiction writing and three 1000-level Nonfiction Writing courses for a total of eleven courses.

Honors in English
Requirements are the same as those for the regular concentration, with the following additions:
Honors candidates must complete at least three upper-level seminars or comparable small courses and complete ENGL 1991 and ENGL 1992. Honors candidates must also earn more A's than B's in courses taken as part of the English concentration (or receive the equivalent faculty evaluation on a Course Performance Report for courses taken S/NC).
Applicants for Honors must have two letters of recommendation submitted to the Honors Advisor, a writing sample, and a one-page description of their proposed topic signed by the faculty member who has agreed to serve as the director of their thesis.

Honors in Nonfiction Writing
Requirements are the same as those for the Nonfiction Writing Track. Eligible Honors applicants must have completed three upper-level seminars, two of which must be nonfiction writing seminars. Honors candidates must successfully complete ENGL 1993 and ENGL 1994. Honors candidates must also earn more A's than B's in courses taken as part of the English concentration (or receive equivalent faculty evaluation in a Course Performance for courses taken S/NC).

Applicants for Honors in Nonfiction Writing must have two letters of recommendation submitted to the Nonfiction Honors Advisor, a writing sample, and a one-page description of their proposed topic signed by the faculty member who has agreed to serve as the director of the thesis.

English Graduate Program
The department of English offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree. For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/english

Courses

ENGL 0100. Introduction of Modernism.
Designed to introduce students to literary modernism, this course will approach modernism as a formative social, historical and artistic moment. Students will both read modernist literary works and explore the culture of modernism. Questions asked will be: what is the interaction between the visual arts and literature? How can we think about the relationships between modernism and political movements of the early-twentieth century, especially Fascism? And, finally, how can we track the influences and echoes of modernism throughout the twentieth century? Authors include T.S. Eliot, Virginia Woolf, James Joyce and Katherine Mansfield.

ENGL 0110. Critical Reading and Writing I: The Academic Essay.
An introduction to university-level writing. Students produce and revise multiple drafts of essays, practice essential skills of paragraph organization, and develop techniques of critical analysis and research. Readings from a wide range of texts in literature, the media, and academic disciplines. Assignments move from personal response papers to formal academic essays. Fall sections 01, 02, 08, and 11 are reserved for first-year students. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0130. Critical Reading and Writing II: The Research Essay.
For the confident writer. Offers students who have mastered the fundamentals of the critical essay an opportunity to acquire the skills to write a research essay, including formulation of a research problem, use of primary evidence, and techniques of documentation. Individual section topics are drawn from literature, history, the social sciences, the arts, and the sciences. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0160. Journalistic Writing.
An introduction to journalistic writing that focuses on techniques of investigation, reporting, and feature writing. Uses readings, visiting journalists, and field experience to address ethical and cultural debates involving the profession of journalism. Writing assignments range from news coverage of current events to investigative feature articles. Writing sample required. Class list will be reduced to 17 after writing samples are reviewed during the first week of class. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0180. Introduction to Creative Nonfiction.
Designed to familiarize students with the techniques and narrative structures of creative nonfiction. Reading and writing focus on personal essays, memoir, science writing, travel writing, and other related subgenres. May serve as preparation for ENGL 1180. Writing sample may be required. Fall sections 02 and 04 are reserved for first-year students. Enrollment limited. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0200V. Shakespeare Rewrites Shakespeare.
How did Shakespeare’s drama develop thematically, rhetorically, and historically over the span of his literary career? This course offers students...
a representative introduction to Shakespeare’s work, paying particular attention to how later plays reinvent linguistic, historical, and theatrical materials worked out in earlier plays. Plays include Othello and The Winter’s Tale; Romeo and Juliet and Two Gentlemen of Verona; and Titus Andronicus and Hamlet. Requirements include critical essays, an in-class presentation, and a final examination

ENGL 0201B. Rebels with a Cause: The Figure of the Rebel from Marlowe to Milton.
Examines representations of the rebel in early modern literature as a figure who is fundamental to definitions of social order. To what extent is the rebel integral to the social, political, and sexual structures s/he challenges? What do God and Satan, king and traitor, Puritan and sodomite have in common? Readings include Marlowe, Kyd, Shakespeare, Middleton, Webster, Marvell, Hobbes, and Milton. Enrollment limited to 17 undergraduate students. Instructor permission required

ENGL 0201C. Birds, Beasts, and Bots: American Literature between the Wild and the Wired.
19th- and 20th-century American writers have often contemplated the relation of human beings to nature and machinery. This course examines the diverse ways American writers of this period have represented human interactions with natural elements (animals, wilderness) and artificial components (robots, factories, cities). We will focus especially on the question of whether human life is characterized in these texts as increasingly natural or programmed. Readings include works by Thoreau, Dickinson, Crane, London, Sinclair, Stevens, Eliot, Bradbury, Dick, and Dillard. Enrollment limited to 17 undergraduate students

ENGL 0201D. Feeling Queerly.
Explores “queerness” in all of its connotations in American and European literature from the late nineteenth to the mid-twentieth century. Analyzes the ways that a range of embodied feelings and emotional states (like shame, disgust, envy, embarrassment, and passivity) shapes formal aspects of literary works and effectively hinders speech, action, and self-expression. Authors include Melville, Woolf, Stein, Beckett, Baldwin, Crane, Genet. Enrollment limited to 17 undergraduate students

ENGL 0201E. World Wide: Globalization from Shakespeare to Rushdie.
Explores the idea of globalization and its resonances with 17th and 18th century conceptions of a global network. How did early modern authors treat the ideas of cosmopolitanism, competing loyalties between home and the world, conflicts between self and other? How do contemporary authors take up or respond to these issues? Readings include Shakespeare, Milton, Dryden, Swift, Kant, Amitav Ghosh, and Salman Rushdie. Enrollment limited to 17 undergraduate students

ENGL 0201F. Ravishing Verse: The Lyric and Spiritual Crisis.
This seminar explores the tension between the language of the spiritual and the language of the sensual in lyric poetry. How does a poet’s inner struggle over questions of belief engage the individual with the larger community; how does this struggle confront the lyric tradition? Poetry and prose readings will include Spenser, Donne, Herbert, Marvell, Milton, Hopkins, Mahon, and Longley. Enrollment limited to 17 undergraduate students

ENGL 0201G. Killing them Softly: Satire and Stereotype in African-American Literature.
Examines the possibilities and limitations of satire within the field of 20th-century African-American literature. We will consider the ways in which the satirical form is deployed by writers seeking to examine questions of authenticity, community, and stereotypical representation. Authors include Schuyler, Ellison, Killens, Reed, Beatty, and Everett. Screenings of works by Spike Lee and Dave Chappelle. Enrollment limited to 17 undergraduate students

ENGL 0201H. Green Shakespeare: Literature, Ecology, and the Nonhuman.
How did Renaissance writers conceive of nature, human autonomy, and the nonhuman agencies of the environment? What ecological futures might they invite us to imagine? This course seeks to address these and other questions by exploring the strange and paradoxical writings of some of English literature’s earliest ecological thinkers. Readings will include a variety of materials from plays (The Tempest, Titus Andronicus, The Winter’s Tale) to poetry (Donne, Milton, Marvell), history, and theory (eco-criticism, animal studies, science studies). Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201J. Shakespeare’s Secret Agents.
Whether it’s women playing men or kings playing paupers, Shakespeare’s characters frequently use the art of disguise to right wrongs and wield authority in critical situations. But how far is “too far” for a disguised maiden pursuing her true love’s hand in marriage, or for an undercover ruler seeking to unify his fractured country? When do their well-intentioned deceptions blur into reality, and at what personal and political cost? Using a combination of historical and critical approaches, this course will explore how secret identities test the boundaries between public good and private deception across Shakespeare’s dramatic genius

ENGL 0201K. Mad in America.
Examines the figure of madness in nineteenth and twentieth century American literature. Mad characters and mad writers raise questions about the vexed relation between self and society, desire and excess, form and disorder, and liberty and the institution. Authors include Poe, Brown, Melville, Gilman, Nabokov, Kesey, Plath, and films by Forman, Kubrick. Enrollment limited to 17. WRIT

An examination of novels and other works of literary prose from American protest novels concerned with the struggle of groups defined in terms of race or class to postmodern narratives characterized by formalist attempts to transcend the unbridgeable gap between politics and writing. Authors may include Stowe, Sinclair, Hammett, Agee, Ellison, Pynchon, and Reed. Enrollment limited to 17. WRIT

ENGL 0201M. No Futures: Extinction and the Nation in American Literature.
American literature often narrates the achievement of national identity as an organic process that will be realized in the future. Yet many authors obsess over broken blood lineages, atavism, lost property, and various forms of extinction. This course examines this tension, and asks why the disruption of “futurity” provokes such persistent aesthetic reflections. Readings include Whitman, Hawthorne, Cather, Faulkner, McCarthy. Enrollment limited to 17. WRIT

ENGL 0201N. Reading Against the Grain in Nineteenth-Century Literature.
Examines literature that leads the reader to identify and empathize with what the text says, yet also to be suspicious and distrustful about what the text leaves unsaid. How do we reconcile these two conflicting ways of reading? We will explore how nineteenth-century works use this tension to express anxieties of industrial modernity. Works include Coleridge, James, Hardy, Dickens, Melville, Freud, Hitchcock. Enrollment limited to 17. WRIT

ENGL 0201O. Kids on the Run: Literary Outcasts and Outsiders.
How do we grow, and when do we “grow up”? This seminar focuses on uneasy transitions from childhood into adulthood in literature. From paupers to punks, we will re think alienation, gender and normalcy through changing conceptions of adolescence across two centuries. Authors will include Dickens, Bellow, Nabokov, Welch, Clowes, Haddon and Aira. Screenings of The 400 Blows, Ratcatcher and Dogtooth. Enrollment limited to 17. WRIT

ENGL 0201P. Disabling Desire: The Erotics of Impairment in Literature and Film.
By alternatingly demonizing, sentimentalizing, and fetishizing the disabled body throughout modern history, has Western society misrepresented the erotic desires of the physically impaired? Could these desires, if represented, in turn disable “normal” desire? Authors include Milton, Shakespeare, Tennessee Williams, and Ursula LeGuin. Screenings include John Cameron Mitchell’s Hedwig and the Angry Inch and Mark and Michael Polish’s Twin Falls Idaho. Enrollment limited to 17. WRIT

What formal possibilities were available to poets working after the experimental period of High Modernism? How do their departures from the Modernist definition of the lyric encourage us to re-think the idea of “the poetic”? This course will examine late modern texts that blur the lines between poetry, fiction, and non-fiction. Texts include Berryman, Plath, Merrill, Ashbery, Howe, contemporary writers. Enrollment limited to 17. WRIT
ENGL 0210F. Beowulf to Aphra Behn: The Earliest British Literatures. Major texts and a few surprises from literatures composed in Old English, Old Irish, Anglo-Norman, Middle English, and Early Modern English. We will read texts in their historical and cultural contexts. Texts include anonymously authored narratives like Beowulf and Sir Gawain and the Green Knight, selected Canterbury Tales by Chaucer, and texts by Sir Thomas Malory, Spenser, Shakespeare, and Aphra Behn. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows.

ENGL 0210G. Angels and Demons, Heavens and Hells: The Otherworld from the Middle Ages to the Early Modern Era. Wonder about what happens after death is among the most fascinating and gripping subjects of human inquiry. We will explore concepts of heaven, hell, purgatory, Satan, angels, ghosts, the soul, virtue and vice, the poetry of salvation, and the power of melancholy. Texts will include Old and Middle English Otherworld narratives, and writings by Dante, Milton, Browning, Marlowe, and others. Enrollment limited to 30.

ENGL 0210H. New Selves, New Worlds. How did pre-modern and early modern writers imagine the self? How were these notions of the self transformed when individuals traveled to unfamiliar places? How do these new selves inspire certain fundamental questions, such as the power one has to control one's emotions, social environment, and ultimate fate. Authors may include Chaucer, Shakespeare, and Milton. Enrollment limited to 50.

ENGL 0210I. The Arrival of English: Medieval, Renaissance, Early Modern. In these literary periods, something arrives in England, whether it is the Anglo Saxon invaders, Christianity, French medieval romance, or the continental example of renaissance. Readings include Beowulf, Wanderer, Dream of the Rood, Chaucer's Canterbury Tales, Spenser's Shepherds Calendar and Faerie Queene, and Milton's Paradise Lost. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows. LILE WRIT.

ENGL 0250A. Elizabeth I: The Queen and the Poets. Queen Elizabeth I, a poet herself, adored her aging body as the symbolic object of desire for a circle of ambitious male poets. Considers the poetic means by which Sidney, Spenser, and Shakespeare overcome the obvious obstacles to desire presented by her uncertain health and imperious temperament and court their Virgin Queen.

ENGL 0250D. Objects of Beauty in Renaissance Culture. What made a poem or a play as beautiful in 16th-century England as a hat or the right pair of shoes? Literary history and aesthetics from Wyatt, Surrey, and More, through Sidney, Shakespeare, Jonson, and Donne.

ENGL 0250E. The Medieval King Arthur. Where did stories of King Arthur come from and how did they develop in the Middle Ages? We will read the earliest narratives of King Arthur and his companions, in histories and romances from Celtic, Anglo- Norman, and Middle English sources, to examine Arthur's varying personas of warrior, king, lover, thief. Enrollment limited to 20 first-year students.

ENGL 0250F. Shakespeare's Present Tense. Shakespeare in Love suggests how Shakespeare was clued in to elite and popular cultures. Current adaptations like O and 10 THINGS I HATE ABOUT YOU demonstrate how Shakespeare provides anachronistic clues to issues of the present. This course will trace such clues by examining the cultural origins and ongoing adaptations of Romeo and Juliet, Hamlet, Othello, Twelfth Night, Henry V, and the sonnets. Enrollment limited to 20 English concentrators. FYS.

ENGL 0250G. The Green Renaissance. Modern ecological crises suggest that nature is a powerful agent, but that such views were prevalent in the renaissance, when empirical science was transforming nature into an object, needs investigation. How did renaissance poets and dramatists figure their own relationship to the natural world? We will seek answers by reading Shakespeare, Donne, Milton, and Marvel, among other writers. Enrollment limited to 20 first-year students. FYS WRIT.

ENGL 0400A. Introduction to Shakespeare. This course will explore issues of concern to Shakespeare's audiences from his time to ours--love, war, race, sex, good and evil--through a representative selection of plays. Lectures will discuss historical contexts,
ENGL 0400C. Matters of Romance.
Narratives (1100-1500) of men, women, and elves seeking identity on the road, in bed, and at court. Readings in modern English include Arthurian romances, Havelok, lais by Marie de France, and Chaucer’s “Wife of Bath’s Tale.” Primarily for freshmen and sophomores. Students should register for ENGL 0400C S01 and may be assigned to conference sections by the instructor during the first week of class. LILE WRIT

ENGL 0400D. Violence, Sacrifice, and Medieval Narrative.
This course will introduce students to medieval prose and poetry that centralize the problematic nature of violent conflict and its attendant horrors. We will study literature from medieval England, Wales, Ireland, and Iceland, including Beowulf, two Old Icelandic sagas and Eddic poetry, Irish and Welsh texts, and part of Malory’s Morte Darthur. Topics will include sacrifice, religion, chivalry, horror, and contemporary critical approaches. Open to undergraduates only

ENGL 0410A. Literature and the Fantastic.
Considers the changing ways Renaissance, Romantic, Victorian, and late-nineteenth-century authors incorporate non-realistic and fantastic themes and elements in literature. Special attention to the relationship between realism and fantasy in different genres. Readings include stories (gothic, ghost, and adventure), fairy tales, short novels, plays, and poems. Shakespeare. Swift, Brothers Grimm, Blake, Wordsworth, Coleridge, Keats, Tennyson, Robert Browning, Christina Rossetti, Stoker, Lewis Carroll, Dickens, Henry James. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows. LILE WRIT

ENGL 0410B. Introduction to British and American Romanticism.
An exploration of “Romanticism” in literature written and read on both sides of the Atlantic between 1775 and 1865. Poetry, fiction, and essays by writers such as Blake, Wollstonecraft, Wordsworth, Coleridge, Byron, Percy Shelley, Mary Shelley, Keats, Thoreau, Emerson, Fuller, Hawthorne. Enrollment limited to 30

ENGL 0410C. Inventing America.
Even before there was a United States, American authors argued over just what distinguished “America” from other communities. For what, they wondered, did or should America stand? Examines the rhetorical battles waged in some key pre-Civil War American literary texts over the meaning and/or meanings of America. Authors studied may include Bradstreet, Franklin, Douglass, and Melville. Enrollment limited to 30

ENGL 0410E. Foundations of the Novel.
Introduces students to the first stages of novel writing in England and to historical and theoretical issues relating to the novel’s “rise” to the dominant genre of the modern era. Eighteenth-century works of fiction are long; however, texts selected for this course are less long. They include Defoe’s Moll Flanders, Richardson’s Pamela and Fielding’s Joseph Andrews. Enrollment limited to 30

ENGL 0410F. Devils, Demons, and Do Gooders.
Who hasn’t struggled with the problem of good and evil? Who hasn’t wondered what lurks in the dark recesses of the soul? We will investigate how Milton, Mary Shelley, Melville, Poe, and Hawthorne, among others, grapple with these fundamental questions of judgment. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows

ENGL 0410G. Literature and Revolutions, 1640-1840.
Key developments in British and American literature understood in relation to the historical and cultural forces that produced the English Revolution, the American Revolution, the French Revolution, and the Industrial Revolution. Readings in major writers such as Milton, Paine, Blake, Wollstonecraft, Emerson, Barrett Browning, and Dickens, and in some of their non-canonical contemporaries. Focus on the emergence of a transatlantic literary culture. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows.

ENGL 0410H. Mariners, Renegades, and Castaways: American Fiction and the Romance of the Sea.
Examines one of the most distinctive of literary genres: the sea novel. Ostensibly stories of mystery and adventure, these texts are also meticulous accounts of working life at sea. Reads a number of well-known and lesser known American tales of the sea, including Poe’s The Adventures of A. Gordon Pym, Melville’s Moby-Dick, London’s The Sea-People, and Crane’s “The Open Boat.” Enrollment limited to 30

ENGL 0410I. The Literature and Politics of Friendship.
Considers changing concepts of friendship as a key to major developments in British and American literature from the Renaissance through the 19th century. Special attention given to the ways the literary history of friendship intersects with leading political questions of the day. Shakespeare, Donne, Milton, Defoe, Wordsworth, Keats, Percy and Mary Shelley, Dickens, Poe, Melville, and Henry James. Enrollment limited to 30

ENGL 0410J. The Literature of Identity.
This course will explore various conceptions of personal identity, with an emphasis on Romanticism. We’ll read Anglo-American philosophical and literary texts (mostly poetry) from the Renaissance through the 19th century, taking some excursions into contemporary theory (queer, feminist, post-structuralist). Writers will include Shakespeare, Montaigne, Locke, Hume, Rousseau, Wordsworth, Keats, Emerson, Browning, and Wilde. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows

ENGL 0410K. The Transatlantic Novel: Robinson Crusoe to Connecticut Yankee.
How does the “American” novel change if we read it across national borders? This course reads novels written in/about America with this question in mind, focusing on such topics as slavery, exploration, seduction, and cosmopolitan ideals. Readings range from Aphra Behn to Mark Twain. Enrollment limited to 30. Students should register for ENGL0410K S01 and may be assigned to conference sections by the instructor during the first week of class

ENGL 0410L. Literature, Trauma, and War.
This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war—glorifying it, and representing its horrors. We’ll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Enrollment limited to 30. Open to undergraduates only

ENGL 0450A. Hawthorne and James.
An introduction to a pair of writers whose work continues to shape our understanding of American literature and American identity. Focusing on much of their most important work, our aim will be to understand how their conceptions of the relationship between writing and history both complicate and complement each other. Limited to 20 first-year students. FYS LILE WRIT

ENGL 0450B. Lincoln, Whitman, and The Civil War.
An introduction to the literature of the American Civil War: Whitman, Lincoln, Melville, Stowe, and other autobiographical and military narratives

ENGL 0450C. Literature of The American South.
The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of “the South.” Explores the sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Faulkner

ENGL 0450D. The Simple Art of Murder.
A survey of the role of criminal enterprise in American literary history. Authors to be considered include Poe, Hawthorne, Harper, Chandler, Alcott, Twain, Hammett, Highsmith, and Wright. Limited to 20 first-year students. FYS

ENGL 0450E. Inventing America.
One of the distinguishing features of American literature may be its seemingly constant struggle with the idea of America itself. For what, these authors wonder, does/should America stand? We will examine the rhetorical battles waged in some major works over the meaning and/or meanings of America’s national identity. Authors may include Franklin,
Hawthorne, and Fitzgerald. Limited to 20 first-year students. Instructor permission required. FYS LILE Writt

ENGL 0450F. Man and Machine. Examines the fascination with "human" machines and "mechanical" humans in the 18th, 19th, and 20th centuries. What hopes and what fears are associated with human machines? How has the automaton challenged fundamental concepts such as "subjectivity," "intelligence," "consciousness," and "progress"? Authors include Henry David Thoreau, Henry Adams, Thomas Carlyle, Mary Shelley, H.G. Wells, E.M. Forster, William Gibson. Enrollment limited to 20 first-year students

ENGL 0450G. The Transatlantic American Novel. This course reads American literature across national boundaries, focusing on the novel genre and the question of "American" identity as a problem in itself. The course takes up this problem in a wide array of novels spanning the period between the late eighteenth and twentieth centuries. Writers include Crevecoeur, Susanna Rowson, Poe, Melville, Twain, and Nella Larsen. Limited to 20 first-year students

ENGL 0600A. Literature and Print Culture. The cultural impact of widely circulating printed material -- books of poetry, essays, and fiction but also newspapers, stock certificates, and advertisements -- makes the period 1660-1740 the first technologically enabled information age. The production and consumption of published texts changed the world for the restored monarch and his licentious court, for the rising bourgeoisie, and for the newly literate classes. We will follow several controversies, experiments, and innovations of the print revolution in works as apparently diverse as Milton's epic poetry, Manley's erotic secret histories, and the ads in The Spectator. Other canonical and non-canonical writers include Rochester, Behn, Dryden, Swift, Manley, Haywood, and Defoe

ENGL 0600B. The Gothic. The course will investigate the origins and development of Gothic literature from its invention during the eighteenth century to its postmodern forms. We will consider conventional figures (monsters, distressed heroines, moldering castles), common themes (fear, horror, the supernatural, the irrational, the transgressive), and the cultural work they do. Readings include Walpole, Lewis, Radcliffe, Shelley, James, and King

ENGL 0600C. The Victorian Novel. Considers the Victorian novel with an emphasis on its many forms, including the social-problem novel, bildungsroman, sensation novel, detective novel, and multiplot novel. Topics covered include the nature of realism, serial publication, emprise, the "new woman," industrialization, the "condition of England," science and technology, and the role of the artist. Novels by Charlotte Brontë, Charles Dickens, Elizabeth Gaskell, George Eliot, Wilkie Collins, Thomas Hardy, Anthony Trollope. Students should register for ENGL 0600C S01 and may be assigned to conference sections by the instructor during the first week of class. Banner registrations after classes begin require instructor approval

ENGL 0600D. Mark Twain's America. A course for all kinds of readers of Twain and his contemporaries. Close readings of fiction and essays that focus on race, slavery, capitalism, and the development of "modern" literature. Works include Pudd'nhead Wilson, Huck Finn, and Connecticut Yankee

ENGL 0600E. British Romanticism. Readings in British Romantic writing, canonical and noncanonical, emphasizing how historical and political change, philosophical disposition, and subjective consciousness become articulated in verse and prose. Literary representations of and responses to the French Revolution, the Industrial Revolution, the struggle against black slavery. Blake, Wordsworth, Coleridge, Percy Shelley, Mary Shelley, Byron, Keats, Clare

ENGL 0600H. Victorian Self and Society. This multi-genre course is an introduction to literature and culture of the Victorian period, looking at the changing ideas of society and the individual's place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, the "great stink" of London, women's suffrage and the condition of women, and the Great Exhibition of 1851. Readings will include Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll

ENGL 0600K. Fictions and Frauds: Literature and the Historical Imagination. How does fiction reinvent history? What makes autobiography "true"? Readings focus on the slave narrative, Hawthorne, historical novels, and Jack Kerouac's "On the Road." Limited to undergraduates

ENGL 0600L. The Simple Art of Murder. A survey of the history of criminal enterprise in American literature. Authors to be considered include Poe, Melville, Hawthorne, Twain, Chandler, Wright, Petyr, Highsmith, Miller, Harris, and Mosley. Students who have taken ENGL0450D may not register for this course. Students should register for ENGL0600L S01 and may be assigned to conference sections by the instructor during the first week of class. Instructor permission required

ENGL 0600M. Madness and Enlightenment: Literature 1660-1800. The term "enlightenment" has been used to emphasize the power of reason in the development of intellectual freedom, democracy, capitalism, class mobility, and other aspects of 18th-century experience. However, the period's major writers were fascinated by unreason, by aberrant states of mind from love melancholy to outright madness. Readings include Swift's Tale of a Tub, Pope's Dunciad, Johnson's Rasselas, Sterne's Tristram Shandy, Boswell's Hypochondriack, and Godwin's Caleb Williams

ENGL 0600N. Victorian Modernity: Literature 1880-1900. Modernity in the fin-de-siècle period meant progress, the "march of the intellect," technological innovation, urban growth, female emancipation, but it also meant fears of degeneration, moral decline, the rise of the crowd, and the degradation of the individual. This course considers how these contradictions come to a climax in the literature, art, and culture of the 1880s and 1890s. Authors include G. B. Shaw, Oscar Wilde, Thomas Hardy, Charles Algernon Swinburne, H. G. Wells, Olive Schreiner, George Egerton

ENGL 0600O. American Fiction and the Sea. This class examines one of the most distinctive of literary genres: the sea tale. These narratives are interested not only in how we know what we know, but in the ways we imagine what we don't know. Novels and films to be discussed will include Moby-Dick; Lord Jim; Aguirre, the Wrath of God; Apocalypse Now; The Witness

ENGL 0600P. Fiction from Dickens to James. An introduction to nineteenth-century fiction in English by eight major authors--four British and four American. Emphasis will be placed on the careful reading and interpretation of the novels and short stories in historical context. Issues to be addressed include the rise of the mass media, transatlantic literary relations, literature and ethics, and aestheticism. Works by Dickens, Poe, Eliot, Melville, Stevenson, Twain, Wilde, and James. Students should register for ENGL 0600P S01 and may be assigned to conference sections by the instructor during the first week of class

ENGL 0600Q. Unstable Subjects: Race and Meaning in Contemporary African American Literature. What are the stakes involved in continuing to define (African) American literature through a racial lens? This course familiarizes students with those contemporary writers who employ the idea of blackness as a speculative trope in order to question modes of racial knowing. Authors include but are not limited to James Baldwin, Norman Mailer, and David Henry Hwang. DVPS

ENGL 0610A. Introduction to African American Literature, 1742-1920. Surveys African American writing from the beginnings to the Harlem Renaissance, reading both poetry and prose (primarily slave narratives, speeches, essays, and fiction). Attention to how African American authors have shaped a literature out of available cultural and aesthetic resources. Enrollment limited to 30

ENGL 0610B. Introduction to African American Literature, 1920-Present. All genres of literature from the Harlem Renaissance to the present, tracing the development of an African American literary tradition. Enrollment limited to 30
ENGL 0610C. Twentieth-Century American Fiction
Through detailed readings of a variety of novels from almost every decade, this class explores the various ways fiction responded to what has been called the American century. Our main emphasis will be on the relationship between aesthetic and national representation. Writers to include Wharton, Fitzgerald, Faulkner, Ellison, Kingston, and Delillo. Enrollment limited to 30. Students will be assigned to conference sections by the instructor during the first week of class.

ENGL 0610E. Postcolonial Literature
Examines fiction, drama, poetry, travel writing, and cultural theory by contemporary writers from former colonies of the British Empire. We study works by Anglophone African, Caribbean, and South Asian writers. Issues include: nationalism and globalization; cultural identity and diaspora; individual interiority and collective aspirations; literary form and the very idea of "postcolonial" literature. Authors include: J. M. Coetzee, Amitav Ghosh, V. S. Naipaul, Michael Ondaatje, Caryl Phillips, Derek Walcott, Zoë Wicomb. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows. DVPS

ENGL 0610F. Introduction to Modernism: Past, Future, Exile, Home
An introduction to European Modernism with an emphasis on British Literature. We will address ideas of personal and national history through literary and aesthetic innovations of the first half of the 20th century, as well as the relationship—literary, cultural, historical and psychological—between constructions of home and abroad. Texts include James, Conrad, Forster, Joyce, Proust, Woolf, Faulkner, Waugh, and Freud, as well as films by Sergei Eisenstein and Fritz Lang. Enrollment limited to 30. Students should register for ENGL 0610F S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0610G. American Fiction and Mass Culture
How have American fiction writers responded to the growing national influence of mass culture industries such as recorded music, film, and television? This course will consider this question by assessing how writers have imagined the impact of mass culture on American life and how the style of literary writing has evolved in relation to popular media. Authors include F. Scott Fitzgerald, Nathanael West, Toni Morrison, Colson Whitehead, and Michael Chabon. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows.

ENGL 0610H. Cultures and Countercultures: The American Novel after World War II
A study of the postwar American novel in the context of the intellectual history of the 1950s, 1960s, and 1970s. We will read the postwar novel in relation to the affluent society, the vital center, the lonely crowd, the power elite, the one-dimensional man, the post-industrial society. Authors to be considered include Baldwin, Bellow, Ellison, Highsmith, McCarthy, O'Connor, Petry, Pynchon, and Roth. Two lectures and one discussion meeting weekly. Enrollment limited to 30. Students should register for ENGL 0610H S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0610J. Contemporary British Fiction
This course is an introduction to the study of 20th century literature in English. We consider central terms of and approaches to literary criticism by reading some of the most important British writers of the last fifty years. We will also take into account theories of culture, ideology and nationhood, and attempt to bring into focus a Britain defined as much by its ways of looking as by historical and geopolitical situation. Readings include Kingsley Amis, Greene, McEwan, Zadie Smith, Spark, Kelman, Banville, Naipaul and Sebald. Enrollment limited to 30.

ENGL 0610K. 20th-Century Literatures in English
This course offers a broad introduction to a range of literatures written in English, tracing shifts in the formal conventions of fiction and poetry. We examine ongoing debates about what literature is and what social role it plays. We consider how these debates respond to historical changes such as industrialization, the collapse of global empires, and movements for social equality. Writers include Dreiser, Woolf, Eliot, Hughes, Toomer, Cather, Morrison, Hwang, Rushdie. Enrollment limited to 30. Students should register for ENGL 0610K S01 and will be assigned to conference sections by the instructors during the first week of class. DVPS

ENGL 0610L. Make It New: American Literature 1900-1945
Introductory survey of a major—perhaps the major—period of American literature. Genres will include poems, plays, short stories, and novels; writers will include Willa Cather, Raymond Chandler, T. S. Eliot, William Faulkner, F. Scott Fitzgerald, Robert Frost, Ernest Hemingway, Nella Larsen, Eugene O'Neill, Ezra Pound, Gertrude Stein, Wallace Stevens, and Richard Wright. Enrollment limited to 20 juniors and seniors.

ENGL 0610M. Realism, Modernism, Postmodernism: American Novel and its Traditions, 1830-2000
A survey of the history of the novel in the United States from nineteenth-century realism through early twentieth century modernism and later twentieth postmodernism on to the present, with an emphasis upon the relation between the novel and broader aesthetic and intellectual developments. Writers to be considered: Melville, Twain, James, Chesnutt, Hurston, Wharton, Cather, Faulkner, Ellison, Pynchon, Reed, Morrison. Enrollment limited to 30 English concentrators. Others by permission of the instructor, if space allows.

ENGL 0650A. "Model Minority" Writers: Cold War Fictions of Race and Ethnicity
Explores the construction of race and ethnicity in U.S. writings of the 50s, paying particular attention to how literary texts negotiate the ideological demands of Cold War anti-communism. Writers studied may include Saul Bellow, Carlos Bulosan, Ralph Ellison, Jack Kerouac, Norman Mailer, John Okada, and Jade Snow Wong.

ENGL 0650B. Black Atlantic Narratives of Africa
We will study fiction, drama, and autobiography by black writers who have used the motif of a literal or symbolic journey to Africa to explore in powerful ways issues of the trans-Atlantic slave trade, Africa as land and concept, individual and collective memory. Writers will include Maryse Condé, Charles Johnson, George Lamming, Pauline Marshall, Toni Morrison, and Derek Walcott.

ENGL 0650C. Englishness and Britishness in Contemporary Fiction
How have writers of fiction responded to recent developments in British political culture? How has the category of Englishness changed during that period? This course offers an overview of some of the most important British writers of the last twenty years and an introduction to theories of culture and ideology. Readings include Ishiguro, Kelman, Caryl Phillips, Zadie Smith.

ENGL 0650D. Is There a Theory of the Short Story?
This course considers the question in the title by looking at works of short fiction by Melville, Conrad, Bierce, Joyce, Lawrence, Kafka, Wicomb, Paley, O'Connor, Beckett, White, and literary theories by figures such as Lukács, Bakhtin and Deleuze. Enrollment limited to 20 first-year students. Banner registrations after classes begin require instructor approval. FYS

ENGL 0650H. Realism and Modernism
The novel as a genre has been closely identified with the act of "reality" in powerful ways issues of the trans-Atlantic slave trade, Africa as land and concept, individual and collective memory. Writers will include Maryse Condé, Charles Johnson, George Lamming, Pauline Marshall, Toni Morrison, and Derek Walcott.

ENGL 0650I. The Problem of Women's Writing
Combines a survey of British and American women writers with an interrogation of the concept of women's writing. Authors will include Austen and Bronte, Walker and Viramontes; theoretical topics will include the figure of the author, subjectivity and ideology, the concept of a separate women's canon or tradition, and the complex differences within "feminine" writing and "feminist" reading.

ENGL 0650J. The Roaring Twenties
The 1920s helped solidify much of what we consider modern in 20th-century U.S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to think about the period's important topics: the rise of mass culture and public relations, changes in women's position, consumerism, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker.
ENGL 0800A. Believers, Agnostics, and Atheists in Contemporary Fiction (JUDS 0050A).
Interested students must register for JUDS 0050A S01

ENGL 0650M. History, Literature and the Caribbean Novel (AFRI 0950).
Interested students must register for AFRI 0950 S01

ENGL 0800H. Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre (AFRI 0990).
Interested students must register for AFRI 0990 S01

ENGL 0800I. Global South Asia.
This course provides an introduction to contemporary fiction by South Asia and its diaspora. We will read novels written in North America, the Caribbean, Australia, Africa, the United Kingdom, and of course South Asia, paying particular attention to issues of identity, ethnicity, and transnational circulation. Authors include Adiga, Hanif, Lahiri, Meeran, Mishry, Naipaul, Roy, Rushdie, Selvadurai, and Sinha. DVPS

ENGL 0800J. Introduction to Asian American Literature.
This course is intended to familiarize students with key issues that have shaped the study of Asian American writings and to provide a sense of the historical conditions out of which those works have emerged. As a literature course, it will focus on textual analysis—on how particular texts give representational shape to the social, historical and psychological experiences they depict. Readings consist primarily of works that have a canonical status within Asian American literary studies but also include newer works that suggest new directions in the field. It also strives to provide some coverage of the major ethnic groups. DVPS

ENGL 0800K. Catastrophic Communities.
What becomes of communities and individuals in a catastrophe? This course considers the different literary, social and ethical formations that arise or are destroyed in disaster, and examines what it means to be both an individual and part of a collective in times of unprecedented upheaval. Readings by Blanchot, Camus, Sebald, Duras, Freud, Arendt, Jaspers, Orwell, and Eggers. WRIT

ENGL 0910A. How To Read A Poem.
It is difficult/To get the news from poems/Yet men die miserably every day/For lack/Of what is found there. These lines from William Carlos Williams begin to articulate the purpose of this course. The human species for thousands of years has found ways to intensify and order experience through the language of poetry. The ability to read this kind of language well is an enduring life skill. Designed for non-concentrators and English concentrators, the course addresses both conceptual and practical issues of understanding poetry. Readings draw on a wide range of British and American writers, including Wyatt, Shakespeare, Donne, Blake, Keats, Dickinson, Cummings, Frost, Bishop, and Heaney

ENGL 0910B. The Bible as Literature (JUDS 0260).
Interested students must register for JUDS 0260 S01

ENGL 0910C. God and Poetry (JUDS 0980B).
Interested students must register for JUDS 0980B S01

ENGL 0910E. Holocaust Literature (JUDS 0390).
Interested students must register for JUDS 0390 S01

ENGL 0910F. Literature, Trauma, and War.
This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war—glorifying it, and representing its horrors. We’ll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Limited to undergraduates. Students should register for ENGL 0910F S01 and may be assigned to conference sections by the instructor during the first week of class

ENGL 0910G. How Not to Be a Hero (COLT 0810H).
Interested students must register for COLT 0810H S01 (CRN 14404)

ENGL 1140A. The Literary Scholar.
Why does literature need critical study? And does critical study inevitably undermine the pleasures of reading? To address those questions, we
will examine the histories of literary criticism (Wimsatt, Brooks, et alii),
literary theory (Saussure, Foucault, Derrida, et alii), and English literature
(from Beowulf to Philip Larkin); we will examine literary texts through
reader response theory, stylistics, literary linguistics, rhetorical theory,
and philology. Writing in this seminar will range from reforming conventional
literary critical discourse to experimenting with nontraditional forms.
Prerequisite: ENGL 0130, 0160, or 0180. S/NC

ENGL 1140B. The Public Intellectual.
This course offers advanced writers an opportunity to practice
sophisticated, engaged critical writing in academic, personal, and civic
modes. Emphasis will be on writing "public" essays (general audience
essays that do intellectual work or academic essays that address public
topics), ideally in fluid, "hybrid," audience-appropriate forms. Areas
of investigation will include (but are not limited to) the review essay,
the cultural analysis essay, literary documentary, and the extended
persuasive/analytic essay. It will include some brief "touchstone"
investigations into rhetorical theory, with the aim of helping to broaden
our concepts of audience, analyze the constitutive and imaginative effects
of language, increase the real-world effectiveness of our own language
practices, and situate our writing within current political, cultural, aesthetic
and intellectual debates. Students must have sophomore standing or
higher in order to be admitted to the class. A writing sample will be
administered on the first day of class. Prerequisite: ENGL 0130, 0160,
or 0180. Class list will be reduced to 12 after writing samples are reviewed
during the first week of classes. Preference will be given to English
concentrators. Banner registrations after classes begin require instructor
approval. S/NC

ENGL 1160A. Advanced Feature Writing.
For the advanced writer. Nothing provides people with more pleasure than
a "good read." This journalism seminar helps students develop the skills
to spin feature stories that newspaper and magazine readers will stay with
from beginning to end, both for print and on-line publications. Students
will spend substantial time off-campus conducting in-depth interviews
and sharpening their investigative reporting skills. The art of narrative
storytelling will be emphasized. Prerequisite: ENGL 0160 or published clips
submitted before the first week of classes. Class list will be reduced to 17
after writing samples are reviewed. Preference will be given to English
concentrators. Banner registrations after classes begin require instructor
approval. S/NC

ENGL 1160B. Editors/Producers.
On-site workshop for editors/producers of campus or local journalism that
aspires to professional standards. Students must be chosen by peers
to edit a campus publication such as the BDH, or to produce a radio
show at WBSR or WBRU; or they must have an internship at a local
newspaper or radio station. Required: Minimum 20 hours a week
editing/producing; participation in skill-building workshops for staff. All
issues/shows evaluated. Enrollment limited to 17. Instructor permission
required. S/NC

ENGL 1160C. Radio Nonfiction.
For advanced writers only. Introduction to radio writing and producing.
Students find and research stories, interview, draft, edit and fine-
tune for radio presentation. Genres include news, profile, feature
and personal narratives, editorial and review. Weekly labs focus on recording
equipment, digital editing and mixing, and music use. Final project: half-
hour radio feature ready for broadcast. Preference given to students who
have taken ENGL 0160, advanced nonfiction writing courses, English
concentrators, or students who have worked at WBSR or WBRU. A writing
sample will be administered on the first day of class. Class list will be
reduced to 12 after writing samples are reviewed. Banner registrations
after classes begin require instructor approval. S/NC

ENGL 1160D. The Common Critic.
For the advanced writer. Aimed at the cultivated consumer of books,
magazines and newspapers-- what has traditionally been called the
common reader. Students will attend films, plays, art shows, concerts
or dance performances and write weekly reviews based on these
experiences. Readings include Orwell, Woolf, Shaw, Kael, Tynan, Clive
James, Tzigiouli Herbert, and current reviews. Writing samples submitted
at first class; also a previous sample, if possible, submitted at the same
time. Class list will be reduced to 12 after writing samples are reviewed
during the first week of classes. Banner registrations after classes begin
require instructor approval. S/NC

ENGL 1160E. Advanced Journalism: Investigative and Online Reporting.
The goal of this class is to rigorously test and improve the reporting
and nonfiction writing abilities of students seriously considering a career in
journalism. By reading award-winning articles; reporting and writing five
nonfiction pieces on campus or in Providence; and rigorously critiquing
each other's writing, students will gain a sense of the promise and pitfalls
of journalism. Prerequisite: ENGL 0160. Enrollment limited to 17

ENGL 1180A. Crime Writing.
This course offers students the opportunity to study crime reportage.
We will read and analyze excerpts from classics in the genre, magazine
articles, and newspaper accounts. Students will develop semester-long
individual writing projects covering a particular crime, and can work
either with Providence and Brown University police on a local incident, or
research a case through secondary source material

ENGL 1180B. Digital Nonfiction.
Digital Nonfiction is an advanced creative nonfiction class that will explore
writing in a host of digital environments such as wordprocess, twitter,
aumented reality apps, slideshows, etc. Through a series of writing
assignments and workshops we will see how the tools we use can enrich
and hobble our traditional narrative strategies. Prerequisite: ENGL 0130,
0160, or 0180. Enrollment limited to 17. Instructor permission required. S/
NC

ENGL 1180C. Advanced Creative Nonfiction: Writing with Food.
This advanced course examines food's representation in writing and how
writing affects food culture. Food's relationship to the pen will be explored
through reading, writing in and out of class, guest lecturers, and tours.
The goal is to achieve personal voice and classic style in menus, recipes,
memoir, history, reportage, and the lyric essay. Prerequisite: ENGL 0130,
0160, 0180, or any 1000-level nonfiction writing course. Class list will be
reduced to 17 after writing samples are reviewed during the first week
of classes. Preference will be given to English concentrators. Banner
registrations after classes begin require instructor approval. S/NC

ENGL 1180D. Concealing and Revealing: Writing the Unsaid.
We'll read and write works that voice what often goes unvoiced, challenge
taboo or build silence into their structures. Creative and critical writing
assignments, class discussions reading responses and in-class writing
will allow us to enter and question these texts, their motives, and their
methods. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level
nonfiction writing course. Class list will be reduced to 17 after writing
samples are reviewed during the first week of classes. Preference will be
given to English concentrators. Banner registrations after classes begin
require instructor approval. S/NC

ENGL 1180E. Lifewriting.
Features theoretical and practical study of lifewriting's various forms--
memoir, diary, essay, and autobiography-- and the crafting of personal
narrative. Students read books, view films, and keep an electronic diary
and paper notebook. Requirements include a personal critical essay and
autobiography. Writing sample required. Prerequisite: ENGL 0130, 0160,
0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing
samples are reviewed during the first week of classes. Preference will be
given to English concentrators. Banner registrations after classes begin
require instructor approval. S/NC

ENGL 1180F. Literary Journalism.
Focusing on the craft of literary techniques in a range of journalistic
modes, we will read John McPhee, Diane Ackerman, Ian Frazier, Susan
Orlean and Tracy Kidder, among others. Workshops and conferences on
student work, which can include personal essays, immersion journalism,
researched argumentative essays and magazine-style feature articles.
Complete and polish several shorter pieces and one longer feature-length
article

ENGL 1180G. Lyricism and Lucidity.
For the advanced writer. This course will explore two subsets of the
personal essay that blur or cross boundary lines--the lyric essay and the
photographic essay-- in both traditional and experimental formats. Writing
sample required. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-
level nonfiction writing course. Not open to first year students. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

ENGL 1180H. Satire and Humor Writing.
For the advanced writer. This course will introduce students to the practice of writing satirical and humorous essays. Readings will include works by Jonathan Swift, Mark Twain, Garrison Keillor, Bill Bryson, David Foster Wallace, David Sedaris, and others, and students will develop skills in analyzing, writing, and workshops. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

ENGL 1180J. Tales of the Real World.
For the advanced writer, this section offers a chance to practice the pleasures and challenges of nonfiction analysis and story-telling in the forms of literary journalism, historical narrative, and personal essay or memoir. Instead of writing traditional essays, students will research, interviewing, redrafting, and editing. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

ENGL 1180K. The Art of Literary Nonfiction.
For the advanced writer. Based on Roland Barthes’ notion of the fragment, this workshop features an incremental, literary approach to writing nonfiction, in both traditional and experimental formats. In response to daily assignments, students will produce numerous short pieces and three extended essays, to be gathered into a chapbook at the end of the course. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Not open to first year students. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

ENGL 1180L. Travel Writing: In the Domain of the Other.
For the advanced writer. Huck Finn’s intention “to light out for the Territory” reflects a pervasive desire to be somewhere else. Restless curiosity about the Other, effects travel, and shows traces in memoir, travel essay, and travel writing. Will concentrate on contemporary travel writers (Heat-Moon, Didion, Jonathan Swift, Mark Twain, Garrison Keillor, Bill Bryson, David Foster Wallace, David Sedaris, and others, and students will develop skills in analyzing, writing, and workshops. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

ENGL 1180M. Special Delivery: Letters and Diaries.
For the advanced writer. While letters and diaries are constrained by "dailiness"—the writer’s informal situation in time—they often form the basis of more formal communications, including the novel. We will keep diaries as self-conscious intellectual enterprises and write letters to address their roles in various literary modes. The final project will be an epistolary essay incorporating structures and motifs from both sub-genre. Writing sample required. Prerequisite: ENGL 0130, 0160, or 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission.

ENGL 1180N. The Longer Literary Essay.
We will focus on reflective essays and researched investigations for the non-scholarly reader, like those in The New Yorker, Science Times, and Harper’s. Students learn to develop longer pieces, translate technical information, and sustain reader interest. Class consists of discussion of readings, workshops, and occasional visits by professional writers. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval.
older ways of portraying the life cycle of a person, idea, place, or thing. Writing exercises will use biography as a method of inquiry as well as of presentation of self. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1190D. Writing About Sports in America.**
For the advanced writer. Writing about any sport involves one in complex cultural issues that transcend the sport itself. We'll examine work by such authors as Bissinger, Halberstam and Maraniss for voice, craft, and research methods. Students will be required to produce their own pieces of sports writing that explore, through critical research and analysis, the place of sports within the larger culture. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1190E. Environmental and Nature Writing.**
For the advanced writer. Helps students build skills in writing about the environment and the natural world, both to convey scientific information and for social advocacy. Texts will include the best of environmental nonfiction as well as films, and the course will feature in-class discussions, frequent conferences, and writing workshops. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1190F. My So-Called Life: The Art of the Literary Memoir.**
The literary memoir offers students inspiration and warning as to the possibilities and limits of using their own experience as text. We study personal essays, narratives, and prose poems by a variety of writers. Advanced writers only. Writing sample required on first day of class. S/NC

**ENGL 1190G. Science as Writing, Scientists as Writers.**
For the advanced writer. Investigates the ways science, scientists, and science-related issues have been represented in fiction and nonfiction written for general audiences. Writing assignments include an informal online journal, literary/cultural analyses, fiction or personal essay, and scientific journalism. Readings from literary, journalistic, and scientific writers. A background in science is useful but not required. Science and humanities students welcome. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: ENGL 0130, 0160, or 0180. Banner registrations after classes begin require instructor permission. S/NC

**ENGL 1190H. Writing Science, Writing the Sacred.**
Explores the relationships between two dominant intellectual paradigms-science and religion-and asks students to respond by writing their own "sacred" and science-related texts. Genres to read and write will be poetry and critical/literary nonfiction.
Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC

**ENGL 1190I. Writing the Southeast Asian War.**
It was the Vietnam War, the American War, the Southeast Asian diaspora. By reading varied genres responding to the experience of the war in Southeast Asia and its aftermath, we will study how any experience is multitudinous and how genres manipulate experience in different ways. Analysis and practice of memoir, fiction, poetry, and oral history. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC

**ENGL 1190J. Narrative Poetics.**
A study of literary language from the writer's perspective that draws on Chomsky's universalist linguistics to refashion structuralist poetics and narratology. Small written experiments with literary word choice and literary sentence structure prepare for a final experiment with narrative structure. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: EL 13, 16, 18, 114, 118, or 119 (ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190). S/NC

**ENGL 1190K. Literary Biography.**
For the advanced writer. How does one narrate the twists and turns of a life while simultaneously doing justice to whatever literature the subject managed to produce as he or she plodded through each day? We will examine examples of literary biography for voice, form, and research methods. Students will be required to produce their own pieces of literary biography. Prerequisite: ENGL 0130, 0160, or 0180. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission. S/NC

**ENGL 1190L. Creative Nonfiction: Practice and Criticism.**
For advanced writers. What is Creative Nonfiction? Writers have flocked to it; scholars have questioned it. Does it harm the truth? Is it narrative with too much "I" and too little "Eye"? What makes it significant? To help us explore persistent questions about form, point of view, method, and ethics, readings will include historical examples, recent practitioners, editors, and critics. Intensive reading responses, research, drafting, and revision. Two critical essays: one choice of creative nonfiction. Prerequisite: ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1190M. The Teaching and Practice of Writing: Writing Fellows Program.**
For students accepted as Writing Fellows, this course offers the study of literary essays and composition theory to help develop their own writing with a critical awareness of the elements of an essay. Students will write essays throughout the semester and will confer with each other for every paper, thereby gaining experience in peer tutoring and becoming better writers through the help of an informed peer. They will also respond to the writing of a cohort of students in another designated Writing Fellows class. Enrollment is restricted to undergraduates who have been accepted into the Writing Fellows Program in the preceding July. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1190N. Brown: Writing the Archive.**
The archives at and around Brown are primary sources for discovering stories--institutional, historical, personal--of our life across time through local history, personal memory, biography, and cultural critique, combining scholarship, media, and the arts. What opportunities for new writing lie beyond doors to be opened across the street? Writing sample required. Prerequisite: ENGL0130, 0160, or 0180. Banner registrations after classes begin require instructor permission. S/NC

**ENGL 1190O. Revolutions and Manifestos: The Discourse of Change.**
This seminar studies the relationship between manifestos and change and interrogates how manifestos both lead to change and record change. An historical range of political, artistic, and cultural manifestos will demonstrate how form, tone, and language work in discourse of change. Writing will range from critical exposition to original compositions. Prerequisite: ENGL 0130, 0160, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC

**ENGL 1200. Independent Study in Nonfiction Writing.**
Tutorial instruction oriented toward some work in progress by the student. Requires submission of a written proposal to a faculty supervisor. Section numbers vary by instructor. Instructor permission required

**ENGL 1210. History of the English Language.**
Provides an introduction to the study of the English language from a historical, linguistic, and philological perspective, and an overview of the
ENGL 130A. "Firing the Canon": Early Modern Women Writers.
Rediscovery and reconsideration of works by early modern women have changed the literary canon: works by women are becoming mainstream, and they are changing the way we read "traditional" texts. This course includes poetry, drama, fiction, letters, diaries, and essays by writers including Lanyer, Wroth, Cavendish, Behn, Manley, Haywood, Scott, Fielding, and Montagu.

ENGL 130B. American Degenerates.
Colonial British-Americans were called, among other names, monstrous, wild, impotent, and grotesque. They could not, it was said, produce writing worth reading. We will explore the ways in which American writers embraced and/or challenged these charges of cultural and bodily degeneracy. In the process, we will examine the development of modern notions of literature and identity. Students should register for ENGL 130B S01 and may be assigned to conference sections by the instructor during the first week of classes. WRIT

ENGL 130C. Arguments of Form in Renaissance Poetry.
In the literatures of the European Renaissance, stylistic innovation is a marker of cultural change. The production of sonnets, of neoclassical epigrams, and of poems aspiring to be Ovidian or Vergilian opens up a theoretical space for arguments about faith, thought, words, the self, and society. Readings from Wyatt, Surrey, Gascoigne, Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and others.

ENGL 130D. Between Gods and Beasts: The Renaissance Ovid.
Ovid's Metamorphoses, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton.

ENGL 130E. Border Crossings in Renaissance Drama.
Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe's Tamburlaine, Fletcher's Island Princess, Heywood's Fair Maid of the West, the anonymous Stukeley play, Shakespeare's Othello, and Daborne's A Christian Turned Turk to observe what dangers and freedoms these plays ascribe to specific geographies.

ENGL 130F. Early Modern Utopias.
Why does the early modern period witness a flourishing of utopias from More to Milton? We will explore this question, in reading a range of utopias by writers such as Montaigne, More, Raleigh, Bacon, Hall, and Cavendish, engaging them not just as visions of ideal societies, but as efforts at reform of English and Englishness.

ENGL 130H. The Origins of American Literature.
Where does American literature begin? Can it be said to have a single point of origin? Can writings by people who did not consider themselves American be the source of our national literary tradition? Does such a tradition even exist and, if so, what are its main characteristics? Authors may include Columbus, de Vaca, Shakespeare, Bradstreet, and Native American tales.

ENGL 130J. Imagining the Individual in Renaissance England.

ENGL 130N. Renaissance Drama.
An introduction to the great classics and some less-known gems of a stellar period in English drama. Plays by Marlowe, Jonson, Webster, Middleton, and Ford, in the context of urban culture, English nationhood, gender and sexuality, playhouses and playing companies, and forms of theatricality.

ENGL 1310. Restoration and Early Eighteenth-Century Literature.
A survey of writing and cultural history in England between 1660 and 1750, emphasizing innovation and experimentation in drama, satire, poetry, and fiction. Readings include work by Behn, Rochester, Swift, and Defoe.

ENGL 1310S. Women and the Book in the Middle Ages.
We will read texts authored by medieval women such as Marie de France, Marjorie Kempe, Julian of Norwich, and Christine de Pizan, and we will explore other textual roles of women, including book ownership and patronage, translation and scribal transmission. The result? A complex picture of mediated and mediating female participants in manuscript culture. Some readings in Middle English.

ENGL 1310T. Chaucer.
Texts in Middle English by Geoffrey Chaucer including the romance Troilus and Criseyde; dream vision poems Book of the Duchess, House of Fame, and Parliament of Fowls; Chaucer's translation of Boethius's Consolation of Philosophy; his shorter poems; and two Canterbury Tales. Prior knowledge of Middle English not required. Not open to first-year students.

ENGL 1310U. Monsters, Giants, and Fantastic Landscapes in Early American Literature.
Monsters, giants, "exotic natives," and unknown continents fill the pages of early American writing. Examines how the well-known and obscure writers of early America used the strange and the fabulous to suggest new ways of being normal.

ENGL 1310V. Chaucer: The Canterbury Tales.
Middle English narratives by Geoffrey Chaucer's band of fictional pilgrims, read in their 14th-century historical and literary contexts. Prior knowledge of Middle English not required. Not open to first-year students.

ENGL 1310W. English Poetry and the Renaissance.
The names of Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and other poets inscribe a golden age of poetry in the cultural mythography of English-language literature. Who are these poets and what stories are told about them? In their time? During the long eighteenth century? By Wordsworth and Browning? By Eliot, the high modernists, and postmoderns?

ENGL 1310Y. Besides Paradise Lost: Milton's Other Poems.
A study of Milton's lyric and dramatic poetry, including the sonnets, Latin verse epistles and L'Allegro, Il Penseroso, the Nativity Ode, Lycidas, Comus, the verse epistles and Samson Agonistes.

ENGL 1310Z. Three Great Poets: Shakespeare, Donne, Milton.
We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. It is recommended that students should have already taken a course in reading poetry, such as ENGL0910A How to Read a Poem or ENGL0400A Introduction to Shakespeare. Students who have taken ENGL0210E may not register for this course. LILE

ENGL 1311A. Milton's Paradise Lost: Poetry and Belief.
Milton, Blake wrote, was of the devil's party without knowing it, and this course offers close reading of the language of Paradise Lost as poetry of belief: how does the poetry of Milton's major poem embody belief and doubt for him, in history, and for his readers?

ENGL 1311B. Medieval Zoographies and the Origins of the Human.
This course engages with medieval texts and contemporary theory to attempt to understand the shifting boundaries between humans and animals, as we examine the premodern roots of the discussion over what it has historically meant to be human, and what might come next. Topics will include beast fables and epics, nature and artifice, emotions, the soul, simulacra, sacrifice, and hunting.

ENGL 1311C. Milton.
A close examination of the poetry and prose of John Milton, from the early lyrics to the polemical prose writings of the 1640s and 50s, to the masterpieces Paradise Lost, Paradise Regained, and Samson Agonistes. Not open to first-year students.

ENGL 1311D. Shakespeare (COLT 1410P).
Interested students must register for COLT 1410P S01.
ENGL 1360A. The Stage as Globe in Renaissance Drama
Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe’s Tamburlaine, Fletcher’s Island Princess, Heywood’s Fair Maid of the West, the anonymous Stukeley play, Shakespeare’s Othello, and Dabone’s A Christian Turned Turk to observe what dangers and freedoms these plays ascribe to specific geographies. Enrollment limited. LILE

ENGL 1360B. Inventing Britain.
Focuses on the internal colonization of the British Isles as represented by chronicle histories, drama, masques, and epic and lyric poetry: How do the English define themselves as a crating to incorporate the British periphery? Authors may include Spenser, Shakespeare, King James I, Bacon, Jonson, Milton, and Marvel

ENGL 1360C. Language and Form in Shakespearean Studies.
Shakespeare’s poems and plays are a working dictionary of early modern English and an inventory of the possibilities of formal invention in early modern culture. How can we reach a historically informed awareness of form and formality in Shakespeare? What is the history of formalism in Shakespearean studies? What new modes of inquiry issue from questions of form?

ENGL 1360D. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.
How to read a medieval manuscript. Students will learn to transcribe and date 9th- through 16th-century scripts in Old and Middle English and some Latin texts, and will learn about interpretive methods. Prior course work in Middle English recommended, and acquaintance with Latin and/or Old English and/or Old French and/or medieval Spanish helpful

ENGL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives.
Medieval texts explored ideas of self, love, rite-of-passage, spirituality, and group identity through narratives of travel, both imagined and real. We will read romance quests that foray to fairylands and wastelands, visionary journeys to hell, pilgrimages of self discovery, an epic exodus that founds King Arthur’s nation, and a 14th-century round-the-world travelogue. Chaucer, Malory, Kempe, Mandeville, Layamon, Anonymous, Middle English readings. Not open to first-year students. Enrollment limited

ENGL 1360H. Seminar in Old English Literature.
This course will offer a thorough introduction to the earliest period of English language and literature, and allow students, by the end of the course, to read and appreciate a language that is both intrinsically foreign and importantly familiar. We will start with an extensive coverage of grammar and syntax, before reading short texts, and Old English poetry, including excerpts from Beowulf. Enrollment limited to 20. Not open to first-year students

ENGL 1360J. Literatures of Medieval England.
In the multilingual society of medieval England, the choice to write in English was culturally loaded. We read, in their cultural contexts, lyrics, romances, debate poems, dream visions, Breton lays, Arthurian histories, women’s devotional writings, and saints’ legends written in Middle English between 1100 and 1485. Readings are in Middle English. Not open to first-year students. LILE

ENGL 1360K. Shakespeare and Company.
Shakespeare belonged to a community of actors and playwrights who competed for audiences in a fledgling entertainment industry. How do his plays compare to those of Marlowe or Jonson, Middleton or Webster? Reading Shakespeare in tandem with his contemporaries, we will consider the genres, sources, styles and conventions they shared, the issues that concerned them, and their differing artistic perspectives. Prerequisite: ENGL0400A or equivalent. Enrollment limited to 20 juniors and seniors

ENGL 1360M. Spenser, Milton, and the Politics of the English Epic.
We will read the literary and political writings of England’s two major authors of epic -- Spenser and Milton -- assessing their investment in contemporary debates about nation and conquest, rule and liberty, and sexuality and selfhood. Along with the major poems, we will read these authors’ shorter literary and political writings

ENGL 1360N. Shakespeare and European Culture.
How do Shakespeare’s works embody and transform the cultures of Europe? What is his relationship to ancient Greece and Rome? To the moral and political philosophies of the sixteenth century? To contemporary literary fashion?

ENGL 1360O. The Ties that Bind: Renaissance Revenge Plays.
From revenge plays to domestic tragedies, family is a value to kill and die for in Renaissance drama. This course considers the cultural pressures such violence responds to, the contaminations it guards against, and explores the political life of these violent domestic affairs. Works by Kyd, Shakespeare, Heywood, Webster, and Middleton. Not open to first-year students. Enrollment limited to 20

ENGL 1360P. Shakespearean Tragedy.
We will read in depth early, middle and late tragedies by Shakespeare, attending to the genre as understood in the Renaissance and as Shakespeare developed it, along with critical readings that explore tragic form. Oral presentations, short papers, and a final research paper. Prerequisite: ENGL 0400A or equivalent. Enrollment limited to 20 juniors and seniors. WRIT

Did human nature become modern in the seventeenth century or did modern people just think so? This course will study style, science, politics and cultural transactions in this period of revolution and restoration, examining such texts as Donne’s satires and epistles and Eliot’s high modernist essays on the division of human nature in this period. Enrollment limited to 20

ENGL 1360S. Between Gods and Beasts: The Renaissance Ovid.
Ovid’s Metamorphoses, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton. Students who have taken ENGL 1310D may not register for this course. Enrollment limited to 20. LILE WRIT

ENGL 1360T. Eco-Shakespeare.
Do Shakespeare’s plays register and respond to the ecological crises of his day, including deforestation, land enclosure, climate change, and animal exploitation? Or, are they complicit in the ideologies that instated these practices? What kind of relation do Shakespeare’s plays envision as underpinning the natural and the cultural realms and how does this differ from modern conceptions? We will seek answers to such questions by considering the plays’ use of pastoral tropes and green worlds, but also by analyzing the inter-animating dynamics they stage between subject and environment. Enrollment limited to 23. Not open to first-year students. LILE

ENGL 1360U. Europe in the Vernacular.
Why did a few early medieval European authors write not in Latin or Arabic but in vernacular languages like Castilian, Early Middle English, Old Icelandic, or Old French? We will read primary texts by Layamon, Alfonso X, Dante, troubadours and anonymous others, and assess previous claims about the “rise of the individual” and various proto-nationalisms as we rewrite the story of how, why, and for whom multilingual vernacular writings came to be. Readings in modern English supplemented by medieval languages. Enrollment limited to 20 students. Not open to first-year students. Sophomores require instructor permission to register

ENGL 1360V. Shakespeare in Perspective (COLT 1410U).
Interested students must register for COLT 1410U S01 (CRN 14406)

ENGL 1400. Undergraduate Independent Study in Medieval and Early Modern Literatures and Cultures.
Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor permission required

ENGL 1410. American Poetry I: Puritans through the Nineteenth Century.
Survey of the invention and development of American poetic traditions. Readings include Bradstreet, Taylor, Wheatley, Freneau, Bryant, Emerson, Poe, Whitman, Melville, Dickinson, and Frost

ENGL 1510A. By a Lady: Jane Austen and Her Predecessors.
Before turning to an in-depth consideration of Austen’s major work, this course takes a visionary view of the rise of the novel by studying fiction by women writers from Aphra Behn to Mary Wollstonecraft. Readings include Haywood’s Love in Excess, Inchbald’s A Simple Story, Burney’s Evelina, and, of course, Austen’s Northanger Abbey, Pride and Prejudice, Emma, Mansfield Park, and Persuasion
ENGL 1510B. Liberalism and American Culture
A course in the relationship between the rise of liberalism and American literary history. Writings from Franklin, Jefferson, Emerson, Fuller, Rowson, Twain, and Charlotte Perkins Gilman

ENGL 1510D. The Literature of the American South.
The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of "the South." Explores sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Twain

ENGL 1510E. American Renaissance
An intensive reading in American literature between 1820 and 1860, with special attention to Romanticism, race and slavery, and the historical novel

ENGL 1510H. Why the Novel Happened
Readings in "early" novels of 18th-century England and in more recent explanations of the novel's rise to dominance as a popular modern genre. How have changing ideas of truth, virtue, gender, money, politics, history, or the human subject interacted with the practices of narrative fiction? Writers to be considered include Behn, Haywood, Defoe, Richardson, Fielding, Sterne, Lewis, Watt, Lukacs, McKeon, and Bakhtin

ENGL 1510I. The Novel from Defoe to Austen
How and why did the novel become the dominant literary mode? This course considers the "rise" of the novel during the "long" eighteenth century. Beginning with Behn and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin

ENGL 1510J. Eighteenth-Century Women Writers.
Rediscovery and reconsideration of works by women during the eighteenth century are changing the literary canon: works by women are becoming mainstream, and they are changing the way we read 'traditional' texts. This course includes poetry, drama, fiction, letters, diaries, and essays by writers including Manley, Haywood, Centlivre, Scott, Fielding, Montagu, Sheridan, Burney, Radcliffe, and Wollstonecraft

ENGL 1510L. Fiction and Mass Media in Nineteenth-Century England and America.
Exposes critiques of the mass media from Carlyle and Arnold to Benjamin and McLuhan by way of a reading of important works of popular Anglo-American fiction of the 19th century. Criticism includes essays by Carlyle, Arnold, Benjamin, and McLuhan; literature includes fiction by Poe, Dickens, Melville, Stevenson, and James

A survey of American fiction in the latter half of the nineteenth century. We will examine the ways narrative form helped shape modern America's increasingly fractured sense of identity, focusing specifically on questions of imitation and authenticity, race and nationalism. Writers will include Twain, Stein, Wharton, Crane, Chopin, and Chessnutt

ENGL 1510O. Inventing Race in America.
What is "race"? Where does it come from? This course argues that categories of racial difference far from being fixed or natural have emerged from within writing. We trace the emergence of "race" in America from the late 16th century to the present day by reading 17th-century British colonial writing, 18th-century racial scientists, Jefferson, Crevecour, Melville, Faulkner, Mukherjee, and Silko

ENGL 1510R. Location and Dislocation in the Late Nineteenth-Century American Novel.
Focuses on the two dominant literary modes of the late 19th century: realism and naturalism. We try to generate working definitions of these two methods in order to understand the ways narrative form shaped Americans' increasingly fractured sense of identity. Writers include Twain, James, Crane, Cahan, Jewett, Chopin, and Chessnutt

ENGL 1510S. Pre-Raphaelites, Aesthetes, and Decadents.
Looks at both Pre-Raphaelite literature and painting, and the reading includes Browning, the Rossettis, Morris, and Swinburne. The painters include both early hard-edge photographic Pre-Raphaelites and the erotic medievalism of Rossetti, Burne-Jones, and the followers. The course will focus on the tensions in Pre-Raphaelitism between realism and fantasy, fact and symbol, body and spirit

ENGL 1510T. Swift and His Contemporaries.
Swift's works are central to this course's investigation of literature, politics, and society. Anglo-Irish relations, and the great outpouring of satire in English in the early 18th century. Irony, parody, and mock-heroes inventively transform genres while challenging "abuses" of learning, government, religion, colonialism, and even love. Other writers include Congreve, Manley, Addison, Steele, Montagu, Pope, and Gay

ENGL 1510V. Civil Rights and American Literature.
An examination of the relations between legal theory and practice and literature, with a particular emphasis on the nature and significance of those relations in the historical development of American discourses of civil rights. Readings include Thoreau, Douglass, Wright, and Perry, and legal theorists such as Dworkin, Unger, Cardozo, and Fish

ENGL 1510W. George Eliot.
The course will study George Eliot's major works, including Adam Bede, Middlemarch, and Daniel Deronda, as well as examples of her essays and criticism. We will consider her experiments with literary realism, which helped secure for the novel form a position as high art. Giving attention to George Eliot's emphasis on conflicting ethical systems, from sympathy, utilitarian economics, and theology, to theories of physiological necessity, we will also examine the question of choice--including personal, women's social, professional, and marriage choices--that lies at the heart of many of her novels

ENGL 1510X. The Early American Novel.
A reading of diverse genres of the early American novel, between 1790 and 1860, including the seduction novel, frontier romance, historical fiction, and the antislavery novel. What was the novel's cultural role? Writers include Susanna Rowson, Brockden Brown, Hawthorne, Stowe, and William Wells Brown

ENGL 1510Z. American Fiction at the Turn of the Century.
An investigation of the varied styles and methods adopted by writers as diverse as James, Crane, Dreiser, and Chesnutt in order to do justice to the dizzying changes taking place in American society at the turn of the century. Our aim will be twofold: first, to create working definitions of some of the period's most well-known fictional modes--most notably realism and naturalism; second, to question whether such definitions are ultimately of use in understanding the complex relationship between literature and its historical context

ENGL 1511A. American Literature of The Civil War.
An examination of the way the Civil War is represented in American literature from Reconstruction to the present. Authors to be considered include Grant, Twain, Dixon, Chessnutt, DuBois, Faulkner, Morrison, Ellison

ENGL 1511B. The Victorian Novel.
Challenges the notion of a Great Tradition or mainstream Victorian novel by looking at the proliferation of subgenres--e.g., sensation fiction, crime fiction, thug fiction, colonial adventures stories--for which the period is known. Includes novels by Mary Shelley, the Brontës, Dickens, Mrs. Henry Wood, Eliot, Hardy, Stevenson, Haggard, Stoker, and Wilde

ENGL 1511C. Lincoln, Whitman, and The Civil War.
A literary and cultural history of the Civil War with special emphasis on Whitman's poetry and Lincoln's addresses and letters. It focuses on issues of race, democracy, and modernity

ENGL 1511E. Monsters, Giants, and Fantastic Landscapes.
Monsters, giants, and exotic landscapes fill the pages of much writing in English before 1900. We will examine the ways in which a number of writers before 1900 use the strange and the fabulous to suggest new ways of understanding what it means to be normal. Authors may include Columbus, Shakespeare, Mary Shelley, and Poe

ENGL 1511G. Dickens and Others.
An introduction to the novels of Charles Dickens (1812-1870) that considers these works in relation to other important intellectual, historical, and literary developments of mid-19th-century England. Special attention given to the political, social, and philosophical significance of "others" in Dickens's writing and in related works from the period. In addition to a set of Dickens's novels, readings include selections from Mill, Arnold, Marx, Tennyson, Eliot, and others
ENGL 1511H. Literature of the American Renaissance
A survey of the major figures of mid-19th-century American literature, with a particular emphasis on how the writers of the period engaged the political and legal issues informing the sectional conflict on the eve of the Civil War. Authors to be considered include Poe, Hawthorne, Melville, Dickinson, Stowe, Douglass, Brown, Jacobs, and Whitman. Students who have taken ENGL 0600F may not register for this course

ENGL 1511I. Culture and Anarchy
This course will trace the development of the concept of culture from its origin in conflict generated by the universalizing mission of the Enlightenment into a variety of literary and philosophical writings in 19th-century British literature. Readings from Rousseau, Kant, Herder, Burke, Wordsworth, Percy Shelley, Carlyle, Thoreau, Emerson, Tennyson, Arnold, and George Eliot

ENGL 1511J. The Rise of American Realism.
Realist fiction is traditionally associated with France (Honoré Balzac, Émile Zola) and England (Jane Austen, Charles Dickens, George Eliot). We will read a number of important American realist writers (including Stephen Crane, Edith Wharton, Henry James, and Theodore Dreiser) in order to understand what might be distinctive about American realism and what it might owe to its European forerunner

ENGL 1511K. Gothic Novels and Romantic Poems.
The difference between “high Romantic” poetry and Gothic popular fiction blurs when we look closely at these haunted and haunting texts. This seminar will examine some major Romantic poems by Wordsworth, Coleridge, Keats, Shelley, and Byron in tandem with Gothic novels by Ann Radcliffe, Matthew Lewis, Jane Austen, and Mary Shelley

ENGL 1511L. On Being Bored.
This course explores texts/films that represent and formally express states of non-productivity or non-desire. Beginning with the Enlightenment and romantic periods, we will reflect on narratives with neither progress nor plot, characters that resist characterization, and poems that deny assertion and revelation. Authors include: Kleist, Kant, Rousseau, Coleridge, de Quincey, Keats, Blanchot, Levinas, Beckett, Schuyler

ENGL 1511M. Victorian Self and Society.
This multi-genre course studies literature and culture of the Victorian period, looking at the changing ideas of society and the individual’s place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, women’s suffrage and the condition of women, and the Great Exhibition of 1851. Readings (essays, poems, stories, plays, and novels) by Carlyle, Charlotte Bronté, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll

ENGL 1511N. Liberalism, Empire, and the American Novel.
An historical consideration of how the novel in the United States addresses the relations between American liberalism and the projection of US sovereign authority into international contexts. Topics to be considered include: Manifest Destiny and the frontier; Reconstruction and the rise of imperial America; World War I and the Cold War; and the United States at the end of History

ENGL 1511S. The Victorian Novel and/as the History of Sexuality.
Might the modern hetero- and homosexual be Victorian constructions that have really “stuck”? We will explore how the Victorian novel contributed to the cultural labor of joining sexuality to a sense of the self, and then pitched in on the effort to meld romance, love, and sexuality into marital relationships. Domesticity, obsession, heterophobia, the Malthusian unconsciousness, and the aesthetic versus romantic friendship will be some of the issues discussed. We will also branch out into issues of pleasure and desire more broadly in Victorian culture. Authors will include Bronté, Dickens, Eliot, Hardy, Charlotte Yonge, and Wilde

ENGL 1560A. Jane Austen and George Eliot.
A survey of the major novels of Austen and Eliot. Readings will also include contemporary reviews and responses, letters, and Eliot’s critical prose, as well as literary theory and criticism addressing questions such as novelist’s form, realism and narrativity, the problem of the subject, the politics of aesthetics, and the changing status of the woman writer in the 19th century. Enrollment limited to 20 seniors and juniors. Instructor permission required. LILE

ENGL 1560B. Melville.
A seminar looking closely at the relation between the life and literary work of Herman Melville, with an extended reading of his masterpiece, Moby-Dick. The course will look at the history of writing and publishing during Melville’s era and consider some of his contemporaries like Hawthorne and Harriet Beecher Stowe. Enrollment limited to 20

ENGL 1560E. The Modern Self and Its Others.
How do eighteenth-century representations of personal and public identity mark the emergence of the modern ‘subject’ as defined by gender, race, nation, language, and the body? Readings will include selections by Swift, Pope, Montague, Stern, Johnson, and Bernay

ENGL 1560F. Nineteenth-Century American Imperialism.
