COLT 1610N. Ecological Thought. This course will serve as an introduction to the new interdisciplinary field of the environmental humanities. Discussing an exciting range of texts and films—from Mary Shelley, Virginia Woolf, and Arundhati Roy to Ridley Scott and Werner Herzog—we will investigate how literary and cinematic works make ecological crisis perceptible. The following topics will be central to our discussions: garbology (especially hoarding, collecting, and the relation between trash and modern poetry); “slow violence” and postcolonial environmentalism; queer ecology; biopolitics; the representation of non-human animals; the effects of 24/7 consumerism; and the political uses of ecological nostalgia, disgust, grief, and wonder.

COLT 1610P. Holocaust Literature (JUDS 1820). Interested students must register for JUDS 1820.

COLT 1610Q. Gender Theory and Politics in France (FREN 1420C). Interested students must register for FREN 1420C.

COLT 1610R. Visions of Liberation: African Decolonization Now?. If, as many African thinkers contend, the acquisition of formal national independence did not signify liberation, it is necessary to imagine decolonization now. In “Visions of Liberation,” we will examine ideas, particularly those of Césaire and Fanon, that have shaped decolonial thinking in Africa. What is the contemporary relevance of notions of freedom imagined by thinkers of the early and mid-twentieth century? How have postcolonial and post-apartheid writers conceived of freedom? What does it mean to call Mali a “postcolony” or “neocolony,” or to state that South Africa is not postcolonial? Previous knowledge of the topic is not required. DPLL

COLT 1710A. Introduction to Literary Translation. This is a workshop course introducing the history and theory of literary translation, with demonstrations and exercises translating poetry and prose. All languages welcome, but students must be proficient to the level of reading literature in the original language. Foreign language through 0600 or permission of the instructor.

COLT 1710B. Advanced Translation (LITR 1010F). Interested students must register for LITR 1010F.

COLT 1710C. Literary Translation. Exercises and investigations in the history, theory, and practice of literary translation. Prerequisite: at least one foreign-language course in literature at 1000-level (or equivalent).

COLT 1810A. Onnade: The Woman’s Hand in Classical Japanese and Medieval Western Literature. A consideration of various genres of women’s writing from 700 to 1450 C.E. focusing on such issues as literary conventions, the relationship to the vernacular, the role of religion in education, and questions of gender and class. Writers may include Berthgyth, Murasaki Shikibu, Sei Shônagon, Héloïse, Marie de France, the comtesse de Dia, Ladu Niño, Julian of Norwich, Christine de Pisan, and various anonymous women.

COLT 1810B. Aesthetics in the Colonial Frame. Discussing an exciting range of texts and poems—to compose a conversation about aesthetics in the colonial context of Egypt. Senior Seminar.

COLT 1810C. City (B)Lights. Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works are foregrounded.

COLT 1810E. Dwellers Amid the Clouds: the Literature of the Court. A survey of three court traditions—Heian Japan, medieval Iceland, and early modern England—in which the relationship between the literary genres and the specific social context from which they emerge is highlighted in the form of particular literary conventions. Topics include the question of patronage, the function of particular literature as shibboleth, the idea of spectacle and play, the politics of literature, and the trope of irony as curiously emblematic.
COLT 1810F. Enlightenment and Anti-Enlightenment in Eighteenth-Century Germany.
Some of the most intractable questions of contemporary philosophy were vigorously debated in eighteenth-century Germany. What are the limit of reason? Does its supposed neutrality and universality mask its own set of prejudices? Are there any universally valid claims in truth or ethics? How, why, should Christian, Jew, and Muslim tolerate their differences? We will read literary and philosophical works by Hamann, Herder, Jacobi, Kant, Lessing, and Mendelssohn.

COLT 1810G. Fiction and History. How the historical fiction that has flourished over the past four decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors considered include Grass, Doctorow, Dellilo, Garcia-Márquez, Allende, Danticat and Gordimer. Theoretical texts by White, LaCapra, Benjamin, Ricoeur, and Chartier. Films such as The Official Story and Europa, Europa will be viewed and incorporated into the discussions. Prerequisite: two previous courses in literature. Enrollment limited to 25. Instructor permission required.

COLT 1810H. Tales of Two Cities: Havana - Miami, San Juan - New York. In this course we will compare representations of Havana and San Juan in contemporary fiction and film to literary inscriptions of Cuban Miami and Puerto Rican New York. We will explore mapping the city as mapping identity and city-writing as reconstruction and creation, viewing through the eyes of children, tourists, and urban detectives. Authors include Antonio José Ponte, Roberto G. Fernández, Mayra Santos Febres and Ernesto Quiñones. Good preparation for study abroad on the Brown-in-Cuba program. Not open to first year students. DPLL

COLT 1810I. Gates of Asia. An exploration of the growth of European knowledge of Asia from the rise of the Mongol empire through the Great Game and its aftermath. Primary sources include three kinds of accounts provided by travelers who set their hearts on Asian exploration: personal narratives, official reports and dispatches, and scholarly studies of the exotic cultures. Enrollment limited to 20.

COLT 1810J. History and Aesthetic Form. In this course, we will examine the co-articulation of theories of history with theories of language and aesthetics. Focus will be on the interdependence between an emerging interest in history and the origin of language, and approaches to literary history, genre definition, and general aesthetic categories. Readings to be selected from Vice, Rousseau, Herder, Lessing, Schiller, Hegel, Novalis, Lukacs, Adorno, Derrida and De Man.

COLT 1810L. Housing Problems. Examines architectural figures and problems of containment and construction in a variety of literary and theoretical texts. We will consider how images of buildings structure texts and outline spaces for subjectivity. Themes include the gothic, haunted houses, foundations, ruins, walls, and doors. Texts selected from Descartes, Derrida, Goethe, Hegel, Austen, Coleridge, Poe, Baudelaire, Melville, Hawthorne, Kafka, Tschumi and Borges.

COLT 1810M. Image and Text: the Reconstitution of Narrative. An examination of the tradition of illustrated narratives in several premodern cultures: the early 11th-century Japanese Genji Monogatari, the medieval English Canterbury Tales, and the ancient Indian epic the Mahābhārata. Discussion focuses on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Seminar.

COLT 1810N. Freud: Writer and Reader. A broad survey of Freud's writings, with particular emphasis on psychoanalysis' relevance to literary theory and cultural analysis. Readings include Freud's major works, as well as secondary sources focused on applications to literary studies.

COLT 1810O. Latin American Literature in Dialogue with France. Complicates the question of influence in Latin American literary and intellectual self-fashioning, specifically with regard to France. Explores the productivity and perplexity of this relationship through romanticism and articulations of the real (as realism, surrealism and magical realism). Approaching the twenty-first century, considers Latin American perspectives on French theories of feminism, postmodernism and globalization. DPLL

COLT 1810P. Literature and Medicine. The purpose of this course is to examine a number of central issues in medicine-disease, pain, trauma, madness, the image of the physician-from the distinct perspectives of the sciences and the arts. Texts will be drawn from authors such as Sophocles, Hawthorne, Gilman, Tolstoy, Kafka, Anderson, O'Neill, Hemingway, Ionesco, Verghese, Barker, Sacks, Foucault, Sontag, Scarry, Gawande and others. Open enrollment course: lecture + section.

COLT 1810S. Literature and the City. Literature's obsession with the modern city, in 19th- and 20th-century American, English, and French fiction and poetry, in writers such as Blake, Whitman, Balzac, Dickens, Baudelaire, Rimbaud, Eliot, Williams, Bellow, Morrison. Opportunities for work in other literatures and genres, e.g., in Germany, Brecht.

COLT 1810T. Literature and the Culture of Capitalism. This course will examine the literary responses to capitalism in terms of five organizing tropes: regionalism, urbanization, consumerism, aestheticism, and modernism. Our investigation will begin sometime in the early 19th-century with the moment that consolidated conditions favorable for industrialization and conclude in the first decade of the 20th-century with literary modernism and the collapse of the cultural myths of progressive enlightenment and democracy. Readings include texts by Wordsworth, Malthus, Sue, Mayhew, Marx, H. Rider Haggard, Stowe, Carroll, Zola, Wilde, Stoker, Freud. Three papers and a final essay.

COLT 1810V. Marx and Modern Literature. A contrastive and integrative study of the range of Marx's writings and works by writers such as Shakespeare, Dickens, Baudelaire, Flaubert, Waugh, and Stevens. Examines Marx's leading concepts in philosophy, history, economics, ideology, and aesthetics in relation to the particularities of literary forms. One or two short papers and a longer final study of a literary work chosen from the student's major field. Enrollment limited to 30.

COLT 1810X. Mirror for the Romantic: The Tale of the Genji and The Story of the Stone. In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cyonsure of the medieval Japanese court and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: COLT 0710, RELS 0040 (0088) or 0100 (0006), or permission of the instructor.

COLT 1810Y. Modern Japanese Women Writers. An examination of women's writing from the Meiji Period (1868-1912) to the present. Readings include works from such writers as Higuchi Ichiyö, Miyamoto Yuriko, Enchi Fumiko, and Tsushima Yōko. Topics include the relation of 'woman' to the modern, the legacy/construction of the past, the implications of joryū bungaku (women's literature), and the problem of resistance and subversion.
COLT 1810Z. Nietzsche.
Intensive and extensive reading of Nietzsche and some of the reception that has made him so prominent in contemporary literary and cultural theory. Topics include Nietzsche's aesthetics, theory of history, the concept of the eternal return, European decadence, misogyny and anti-semitism. Texts will be selected from Nietzsche, Heidegger, Horkheimer and Adorno, Deleuze, Derrida, Irigaray, de Man, Hofman, Lacoue-Labarthe, Foucault, Hamacher, Ronell, etc.

COLT 1811B. Postcolonial Theory and Fiction.
There is hardly a place in the contemporary world which has not somehow been touched by the histories and consequences of colonialism. What does it mean, then, to speak about the postcolonial? Should the postcolonial be seen as a new periodization in the study of world literatures, a recent trend in critical theory, or another type of minority discourse involving previously colonized peoples?

COLT 1811D. Reading Revolution, Representations of Cuba, 1959-The Present.
Considers the cultural and ideological impact of the Cuban revolution inside and outside Cuba. Starting in the 1960s, reads Latin American "boom" novels, European theorists and U.S. civil rights activists. Moving to today, addresses post-Soviet Cuba's literary production and the impact of new technologies on culture, as well as political change under Raúl Castro. Fiction, film and essays by Castro, Sarre, García Márquez, Reinaldo Arenas, Antonio José Ponte, Fernando Pérez and others. Excellent preparation for the Brown-in-Cuba program. DPLL

COLT 1811F. The "Tenth Muse" Phenomenon.
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muse," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

What does it mean to be beautiful in classical and European literature? How is beauty defined by thinkers from Plato to Benjamin? Readings from the classical, medieval, Renaissance, and modern periods are brought into question by works concerning the problems of aesthetics. Works by Plato, Aristotle, Horace, Augustine, Dante, Petrarch, Shakespeare, Racine, Tolstoy and others in addition to readings from the history of aesthetics from Kant through the present.

COLT 1811I. The Nordic Legacy: Ibsen, Strindberg, Munch and Bergman.
This course examines the work of four major Scandinavian artists. As key figures in the development of modern theater, painting and film, these four figures share a number of common concerns: challenging the pieties of bourgeois mores; reconceiving the relations between the sexes; moving from the social to the metaphysical; undermining the unitary view of the self; and forging an artistic "language" through which the in-dwelling power of the psyche can be revealed.

COLT 1811J. The Paternalistic Thriller and other Studies in Colonial Fiction.
The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T.E. Lawrence, E.M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

COLT 1811L. Travel and Tourism through the Ages.
Why do we go away to find ourselves? How does the self constitute itself "elsewhere"? This course considers the genre of travel writing and its theory and how it has treated roots, routes, and rootlessness in divers racial, spiritual, sexual, national, and imperial encounters. Today, when cosmopolitanists, intellectuals, or erotic and exotic adventurers share the same beach as downtrodden, abject refugees, what are the cultural, ethical and political implications of leisurely seeking out (self-) discovery, disappearing authenticity, and commodified otherness? Readings include Herodotus, Equiano, Chatwin, Kingsley, Montagu, Darwin, Twain, Kazantzakis, Miller, Durrell, Phillips, Iyer, Houellebecq, Woolf, Thompson, Theroux, Baudrillard.

COLT 1811N. Persons and Portraits: Self in Early Modern Europe.
Challenges the presumed supremacy of the "modern subject," the sovereign rational mind personified by Descartes. Rival theories of self in Machiavelli, Luther, Montaigne, Hobbes, Pascal, and Spinoza are explored alongside the richly embodied "persons" pictured in painting (Titian, Rembrandt, Velázquez), conduct literature (Castiglione, La Rochefoucauld), drama (Milton, Molière, Calderón), psychological fiction (La Fayette), and satiric prose (La Bruyère).

COLT 1811Q. Poisonous or Prophetic?
Wright's Native Son, Burrough's Naked Lunch, Derrida's Specters of Marx, and Rimbaud.

COLT 1811S. Philosophy and Literature of German Romanticism.
A fateful collaboration between philosophy and literature was centered in Germany roughly between 1788 (Schiller's 'Gods of Greece') and 1807 (Hegel's Phenomenology of Spirit). A survey of the major literature of this period, organized thematically, will serve as an introduction to this complex phenomenon. Authors include (in translation) Fichte, Goethe, Hölderlin, Novalis, Schelling, Schiller, and Tieck.

Explores the literary and filmic imagination of three Eastern Mediterranean cities, Alexandria, Istanbul, and Athens. It examines the history, culture and politics of these cities and the ways in which they emerge in literature, film, poetry and travelogues. How is the city defined in these works? How are social tensions addressed, such as those between Greeks and Turks or Arabs or between Christians, Muslims and Jews? How are thematic and historical issues resolved, such as those involving antiquity and modernity, tradition and modernization, colonialism and nationalism, religion and secularism? How are these cities defined in the works of western writers? Enrollment limited to 30. DPLL

COLT 1811U. Literature and the Arts.
Readings in the apparitions and articulations of the arts in fiction, philosophy, criticism and poetry. Focus on the interaction between language and other media, the figure of the artist, problems of expression and performance. Readings from Diderot, Hegel, Balzac, Hoffmann, Baudelaire, Poe, Nietzsche, Wagner and Mann.
COLT 1811W. Visual Obsessions: Japanese Film, Fiction, and Modernity.
The pervasive innovativeness of visual obsessions in contemporary Japanese culture prompts us to rethink the impact of modernity in terms of visuality. Through the examination of a wide range of films, literary, and visual art forms produced in Japan from the 1920s to the 2000s, this course explores the question of visuality as a historically and technologically conditioned wave of seeing. The issues to be considered in this class include: the construction of “Japanese” aesthetics, orientalism, ocularcentrism, the problems of interiority and the subject, the relation between habit and the everyday, and cultural nationalism. This course will introduce theoretical concepts about vision and modernity, asking students to interrogate these concepts through the close examination of specific Japanese texts and films discussed in class. Writers, filmmakers, and visual artists include: Tanizaki Jun’ichirō, Kurosawa Akira, Ichikawa Kon, Suzuki Seijun, and Murakami Takashi. DPLL

COLT 1811X. Marx and his Critics. This course will focus on a close study of the work of Karl Marx and its legacy for critical theory. The first part of the course will be dedicated to a reading of Marx's most important texts, with special emphasis given to his theories of economy, of ideology, alienation and fetishism. The second part will be dedicated to a reading of some of Marx's most important readers: Lukács, Gramsci, Althusser, Zizek and Derrida. Instructor's permission required.

COLT 1811Y. Genius and Melancholia in the Renaissance. Explores Renaissance accounts of genius, genial inspiration, and melancholia, and their accompanying ideas of intellect and immortality. Primary materials include Dürer, Montaigne, Rabelais, Ficino, Ariosto, Erasmus, Saint Teresa, and Luther. Secondary or contemporary texts include Warburg, Panofsky, Saxl, Klubansky, Wind, Benjamin, Kierkegaard, and Sebald.

COLT 1811Z. Literature and the American Presidency. We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a discursive source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film.

COLT 1812A. Literatures of Immigration. Why do people migrate? How do literary genres, including poetry, fiction, autobiography and memoir, characterize immigrant experiences? How is the experience of “coming from somewhere else” similar and different for each subsequent generation of immigrants? How does literature indicate the impacts of migration on the culture, politics and economics of the countries of immigration and emigration? How do literatures of immigration imagine the past, present and future of networks and communities of immigrants? Focusing on twentieth-century literary texts and the socio-historical context of mass migration, the first half of the course examines immigration literature in the U.S., the second half of the course explores literatures of immigration beyond the U.S., and the course concludes with an inquiry into immigration in our presently globalizing age.

COLT 1812B. Aesthetics and Politics (ENGL 1900E). Interested students must register for ENGL 1900E.

COLT 1812C. The Ethics of Romanticism (ENGL 1560V). Interested students must register for ENGL 1560Y.

COLT 1812F. Violence and Representation. Traces diverse genealogies from which to theorize violence and its relation to aesthetics. We will identify a disciplinary philology for “violence” as a signifier within visual culture, art practice and literature; historicize key transitions in varied invocations of violence in representation; study texts (photography, film, novel, installation) that create a space where violence can be discussed as both everyday and extraordinary. Some issues to be considered: representability in moments of historical crisis (war, colonialism, genocide); the efficacy of genres and artistic movements in representing violence (tragedy, surrealism, theater of cruelty); and the violence of representation (surveillance, spectatorship, voyeurism).

COLT 1812H. "Women's Literary Make-up": Mirrors, Maquillage and the Tenth Muse. Focuses on the problem of creative inspiration for women writers and how the pursuit of aesthetic perfection, both somatic and literary as well as their interrelation, becomes a recurring motif in women's writing from various traditions. Readings will include fiction and poetry from the English, Japanese, and Arab traditions, both modern and pre-modern. This is an undergraduate seminar open to juniors and seniors. Prerequisite: coursework in literature and at least one course in gender studies/ women's studies. Instructor permission required.

COLT 1812I. Collective Struggles and Cultural Politics in the Global South. Traces the historical and ideological mapping of the North-South axis and the regional mythologies informed by racism, empire and nationalism. We will examine the ways in which imagined geographical hierarchies continue to shape cultural and political struggles and the vectors of globalization. Along with readings on imperial histories, liberal and neoliberal political economies, and postcolonialism this class seeks to establish connections between resistant narratives and collective struggles in the Global South. We will discuss political philosophies of Marx, Gramsci, Arendt, Fanon, Harvey and Schwarz, as well as the works of Achebe, Hurston, Kincaid, Rushdie, Roy, Sembene, and Wright. First year students require instructor permission.

COLT 1812J. Poetry and Ethics. If history is, as Charles Olson claims, a “form of attention” and we are all participants in a collective reality relative to our capacity for language use, what ethical issues come to bear on what the poet chooses to attend to—only not as subject matter but as form? Can poetic language be sufficiently responsive to the challenge of empathy? Is there an ethics of attention? Guided by philosophical texts, we shall investigate ethical possibilities in a range of world poetries. WRIT

COLT 1812M. Erotic Desire in the Premodern Mediterranean (CLAS 1750L). Interested students must register for CLAS 1750L.

COLT 1812N. Culture and Anarchy (ENGL 1511I). Interested students must register for ENGL 1511I.

COLT 1812O. Lying, Cheating, and Stealing (ENGL 1760V). Interested students must register for ENGL 1760V.

COLT 1812P. Essaying the Essay (CLAS 1120J). Interested students must register for CLAS 1120J.

COLT 1812S. Violence and the Multiple Responses of Medieval France. Examines violence and its representations from a variety of perspectives: literary, historical, psychological, etc. Different literary forms (11th - 13th) introduce conflicts between competing value systems, problems raised by militant religion, vendettas and the pursuit of justice. Across the gamut of appetites and emotions, violence takes a variety of shapes, producing broken hearts and broken heads. The beautiful seductiveness of violence, despite its horrors, is frequently transformed into artistic and literary expression, from the highest forms of Western tradition to the cheap exploitations of pulp fiction. What can the Middle Ages teach us about violence, yesterday and today? Not open to first year students.

COLT 1812T. On Being Bored (ENGL 1511L). Interested students must register for ENGL 1511L.

COLT 1812U. Queer Relations: Aesthetics and Sexuality (ENGL 1900R). Interested students must register for ENGL 1900R.
COLT 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas.
This course addresses the relationship among language, war and the arts from the mid-twentieth century on. Even as armies engage in combat around the globe, the term "war" legitimates a much broader spectrum of situations, lending them the structure of organized hostility and the moral opposition of right to wrong. From the "Cold War" to the "War on Terror", to Argentina’s "Dirty War" and Cuba's "War on Imperialism", literature, cinema, visual arts and community-based projects have responded to real and rhetorical declarations of "war." Drawing from U.S. and Latin American contexts, we will explore a range of responses and challenges. DPLL

Interested students must register for RUSS 1450.

COLT 1812X. Literature and History: Russian Historical Imagination in the European Context (RUSS 1600).
Interested students must register for RUSS 1600.

COLT 1812Y. Central Europe: An Idea and its Literature (SLAV 1790).
Interested students must register for SLAV 1790.

COLT 1813B. Dying God (CLAS 1930B).
Interested students must register for CLAS 1930B.

COLT 1813C. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).
Interested students must register for CLAS 1750L.

COLT 1813D. Issues in World Literature (ENGL 1761Y).
Interested students must register for ENGL 1761Y.

COLT 1813E. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B).
Interested students must register for EAST 1950B.

COLT 1813F. Communication Culture and Literary Politics (MCM 1503Q).
Interested students must register for MCM 1503Q.

COLT 1813H. God, Sex and Grammar: Literary Ethics in Medieval Europe.
What does it mean to read and write ethically? While modern culture values intellectual property, many medieval texts celebrated what we call plagiarism. On the other hand, medieval thinkers saw serious consequences in literature, which could lead authors and readers to heaven or hell. But then as now, ethics were rarely clear-cut, subject to forces as diverse as religion, sexual desire, capitalism, and even language itself. Reading some of the great authors of the period, as well as modern critical reflections, we will explore the ethical dimension of literary production in the medieval world and in our own society.

COLT 1813I. The Colonial and the Postcolonial Marvelous.
A celebration and critique of the marvelous—as the strange, wondrous, magical, or unreal—as it has been wielded in Spanish American and related literatures (French Caribbean, Brazilian). We follow the marvelous from European exoticizing of the New World during the colonial period to its postcolonial incarnations in "magical realism" and beyond. We attend particularly to the political, ideological, social, and commercial implications of the marvelous in writers including Carpenter, Chamoiseau, Columbus, Esquivel, Sor Juana Inés de la Cruz, and García Márquez. Readings in English, though you may read texts in the original French, Spanish, or Portuguese.

COLT 1813K. The Problem of the Vernacular.
It has been said that a language is a dialect with an army and a navy. Under what conditions do dialects, vernaculars, creoles, and slangs become mediums for literary and artistic expression? How have writers in different cultures managed the relationship between their "official" national languages and their more intimate mother tongues? This course explores this problem in a variety of literary traditions, including Chinese, Arabic, Greek, Hebrew, Scots, Latin and the Romance vernaculars, and a variety of other languages. WRIT

COLT 1813M. Early Modern Women’s Writing.
Interested in women writers, feminism? If so, it’s vital to understand their early modern origins. This course explores the rich feminist tradition enacted in the often edgy texts of women writing on the cusp of modernity. We study writers from England, France, Latin America, North America, and Spain, focusing on self-fashioning, gender and sexuality, love and marriage, imagined worlds, religion, eccentricity, and writing and fame. Authors include Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana Inés de la Cruz, Mme de Lafayette, María de Zayas. Enrollment limited to 20. Texts and class in English.

COLT 1813O. Adventures of the Avant-Garde.
In the early years of the twentieth century, a series of artistic movements rippled across the Western hemisphere, exploding conceptions of art and culture while reconfiguring international relations. Explores those movements, from their predecessors (Baudelaire, Rimbaud, Mallarmé), through overlapping -isms (Cubism, Futurism, Constructivism, Vorticism, Expressionism, Dada, Surrealism), to avatars in the Americas. In keeping with the avant-garde’s cross-pollinating spirit, we study texts from a variety of traditions, forms, and genres: from poetry through prose to manifestoes, from painting and photography to film, music, and dance, touching on questions of translation and translatability between languages, cultures, and art-forms. Enrollment limited to 25.

COLT 1813P. Captive Imaginations: Writing Prison in the Middle Ages.
Many great works of the Middle Ages were written in prison or about the experience of imprisonment. Reading some of these masterpieces, we will discover why the medieval prison was such a fruitful space for poetic creation, and how the perspective of incarcerated writers helped to shape a diversity of literary traditions. Topics will include fortune and free will, sexual and cultural difference, and the construction of the individual. We will also explore the nature of medieval systems of captivity, which differed greatly from those of modern society. Selected authors: Boethius, Mas’ud Sa’d Salman, Juan Ruiz, Chaucer, François Villon.

COLT 1813Q. Literature and Judgement.
There exists a close but complex relationship between the acts of making literature and making judgments. This course will explore some of these relationships and ask, for instance: how does judgment weigh upon the literary act? how do literary considerations bear on our making judgments? what criteria are called forth in both of these moments? Texts treated will be literary, critical-analytical, legal, and cinematic, and include such authors as Arendt, Benjamin, Derrida, Freud, Henry James, Kafka, Kant, Primo Levi, Nietzsche, Tolstoy and Verga.

COLT 1813R. The Ekphrastic Mode in Contemporary Literature (ENGL 1762B).
Interested students must register for ENGL 1762B.

COLT 1813V. The Cash Nexus: Economy and Literature.
At a time when human existence is grounded with unprecedented conviction in a rigid set of utilitarian principles and materialistic values, the relationship between literature and various modes of economic exchange presents itself as a richly rewarding field of research. The texts we will focus on offer rare insights into the ways monetary factors affect personal identity, interpersonal relationships, and social life in general. These works reflect a diachronic tension between human interactions and financial transactions that will be the basis of our critical engagement with a series of issues and questions that are more pertinent today than ever before.

COLT 1813X. Getting Emotional: Passionate Theories (ENGL 1560W).
Interested students must register for ENGL 1560W.

COLT 1813Y. Soil: The Earth and Environmental Writing.
Why do people fight over soil? In an increasingly urbanized world, how have the ways we talk about soil, earth, and land shifted? In this class, we will explore the politics and aesthetics of writing about soil in its particular relations to ecology, homeland, geography, and race. Readings include Homer’s Odyssey, Derek Walcott’s Omeros, and ecological criticism from ancient China to Rachel Carson and Ramachandra Guha and beyond. Limited to 20.

COLT 1814A. Fashion and Power (GNSS 1960Y).
Interested students must register for GNSS 1960Y.
Interested students must register for GRMN 1891.

Blanchot, Derrida (GRMN 1891) suffering affect us? and art that engages animals in order to reconsider what and how these

In this course, we will draw on the vast archive of literature, philosophy, themselves; at the same time, they challenge such boundaries. Thinking

Nonhuman animals constitute the limit against which humans define

interested students must register for CLAS 1750L.

Interested students must register for CLAS 1750L.

COLT 1814G. Political Commitment in Arabic Literature. This course will explore the history of and debates surrounding political consciousness and commitment in modern Arabic literature from the mid-20th century to the present. Through close readings of mainly novels, novellas, and short stories, we will ask how, why, and with what consequences Arab authors have challenged political realities with literary expression. We will trace the diverse strategies by which authors articulated their criticisms and envisioned justice grounded in their political context. Topics and themes will include socialist realism, resistance literature, alienation, self-criticism, and responses to colonialism and censorship. No knowledge of Arabic required.

COLT 1814L. Apartheid in Post-Apartheid South African Literature. In this course, we explore the political stances that contemporary South African writing articulates towards the apartheid regime. We bring particular attention to the textual emergence of queer subjectivities. During apartheid (1948-1994), South Africa became a global symbol of racial injustice, and several South African writers became famous for their anti-apartheid literary production. Since 1994, critics have looked for new frames in which to analyze a “new” literature. In the search for “newness,” however, we may forget to consider how the “old”—apartheid—reappears in frames in which to analyze a “new” literature. In the search for newness,” however, we may forget to consider how the “old”—apartheid—reappears in the context of our research.

COLT 1814M. Postcolonial Literature + Thought in the Middle East and North Africa. This course examines postcolonial literature and thought in the Middle East and North Africa through literature, theory and film. During the early and mid-20th century, anticolonial movements transformed the region’s cultural landscape, igniting new intellectual circles and literary scenes. We will study these movements as a launching ground for regional culture, interrogating local anti-colonial thought in works by writers such as Memmi and Fanon, and examining its evolution from the 1960’s-1990’s in work from Egypt, Algeria, Tunisia, Lebanon, Syria, Israel, Morocco and Palestine. How did intellectuals and artists articulate issues like national liberation, Westernization, radical culture, feminism, Marxism and Orientalism? DPLL

COLT 1814Q. Species Matters: Animals in Literature, Film, and Theory. Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this course, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us?

COLT 1814Y. Posthumanism and the Ends of Man.
Have we ever been human? As mechanical implants, virtual extensions, and organic interdependencies challenge self-contained conceptualizations of human being, posthumanist theories invite us to rethink our self-understanding. In this course, we will explore the human as a fluid category in perpetual motion. Focusing on female and gender nonconforming bodies, which have traditionally been situated at the limits of the human, we will analyze the critical potential of hybrids, androids, and cyborgs. Readings among others by Ovid, the Brothers Grimm, E.T.A. Hoffmann, Han Kang, and Octavia Butler; films will include Metropolis, Mad Max: Fury Road, and the series West World.

COLT 1814Z. Alexander to Cleopatra: Greek Literature and Culture (CLAS 1120Y).
Interested students must register for CLAS 1120Y.

COLT 1815. Kafka and the Philosophers (GRMN 1892).
Interested students must register for GRMN 1892.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

Special work or preparation of honors theses under the supervision of a member of the staff. Open to honors students and to others. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

COLT 2450. Exchange Scholar Program.

COLT 2520A. City (B)Lights: Interdisciplinary Approaches to the Study of the City.
Literary texts from the U.S., England, France, and Germany, together with substantial readings in the social sciences and selected works of art and cinema. Intended as a laboratory for interdisciplinary studies in an expansive educational spectrum for humanities Ph.Ds.

COLT 2520B. Dark and Cloudy Words: Metaphor and Poetry.
An examination of the philosophical significance of metaphor and its literary function in poetry ranging from makurakotoba in the Man'yōshū to kemiingar in Skaldic poetry, to the use of the trope in a number of modern poets. Critical writings include works by Aristotle, Ki no Tsurayuki, Shelley, Christine Brooke-Rose, Max Black, Donald Davidson, Paul Ricoeur, and Jacques Derrida.

COLT 2520C. Irony: Language and Failure.
A study in the trope of irony and the ways in which it complicates the possibility of understanding. Focus on Socratic irony, the dialogue, and Romantic irony. We will also consider the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Quintillian, Diderot, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

COLT 2520D. The Literature of the Americas.
Forsaking the dominant Eurocentrism in comparative literary studies, this seminar will search for the common links between the diverse literatures of North and Latin America, approached in relation to one another rather than to "Old World" models. Authors to be considered include Margaret Atwood, Julio Cortázar, Carlos Fuentes, William Faulkner, Gabriel García-Márquez, Clarice Lispector, Machado de Assis, Toni Morrison and João Guimarães Rosa.

COLT 2520E. Dialectics of Word and Image.
Explores how proximities and interactions of text and image construct and complicate meaning. It brings together a constellation of theoretical and historical readings that have bearing on particular problems generated at the nexus of word and image. Readings by Horace, Abd al-Qahir Jurjani, Lévi-Strauss, Ricoeur, Derrida, Mitchell and others will anchor a cross-disciplinary investigation of European and non-European paradigms of the relationship between text and image in various literary and visual cultures since late antiquity. We will examine specific examples of the interaction between word and image in several Islamic manuscripts.

COLT 2520F. Theories of the Lyric.
Through readings of recent critical discussions of the lyric genre, we will explore more general methodological problems of literary theory. Questions to be raised include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry, history and politics; the function of reading; and the problematic "objectivity" of criticism. Readings from Jakobson, Benveniste, Jauss, Benjamin, Johnson, De Man, Lacoue-Labarthe, Agamben, Badiou and Derrida. Focus on poets Hölderlin, Baudelaire and Celan.

COLT 2540C. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2540D. After Postmodernism: New Fictional Modes (ENGL 2760X).
Interested students must register for ENGL 2760X.

COLT 2540E. Political Romanticism (GRMN 2320E).
Interested students must register for GRMN 2320E.

COLT 2540F. Romanticism and Cultural Property (ENGL 2560Y).
Interested students must register for ENGL 2560Y.

COLT 2540J. Proseminar in Comparative Literature.
Designed for both Comparative Literature graduate students and the Comp-Lit-curious, this seminar will explore numerous approaches to and theories of Comparative Literature, together with a few key texts. Through collaborative discussions and guest sessions led by faculty in the department and beyond, we will investigate the many practices encompassed in this heterogenous discipline, as well as how it interacts with others (history, philosophy, cultural and area studies, etc.). We'll pay special attention to recent debates around world literature, planetaryity, and their discontents. For the final seminar paper, students will be asked to produce a manifesto for a "new" comparative literature.

COLT 2650A. Comparative Literature and Its Others.
Is there such a thing as comparative literary? This course examines the history and practices of Comparative Literature as a major discipline, including its self conceptualizations, its relations with national literatures and with other disciplines, and its evolving methods of reading. Texts include literary as well as theoretical ones.

COLT 2650C. Romantic Theory: Theirs and Ours.
Recent criticism will serve as the point of departure for looking into the relation of literary criticism to its Romantic history. Emphasis on how "Romantic" problems inform contemporary criticism on such topics as periodization, literature and history, theory of symbol and allegory, and the relation between literature and philosophy. Texts will be selected from Benjamin, M.H. Abrams, de Man, McGann, Lacoue-Labarthe and Nancy, Chase, et. al.; Fichte, Schelling, Coleridge, Wordsworth, Schlegel, Novalis.

COLT 2650D. Theory of Comparative Literature.
Designed to introduce students to some of the central theoretical issues that define the discipline of Comparative Literature through the study of twelve central texts in the field. We will begin with Erich Auerbach's foundational text *Mimesis*, and end with Gayatri Spivak's *Death of a Discipline*. In between the authors to be read and analyzed will be Bakhtin, Lukács, Barthes, Derrida, DeMan, Jameson, Greenblatt and others. Open to graduate students, and to undergraduates by permission of the instructor.

COLT 2650E. Theory of Lyric Poetry.
No description available.

COLT 2650F. Irony.
A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focus on the epistemological implications of irony and the role it plays in the philosophosical tradition and in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.
COLT 2650G. Literary Readings in Aesthetic Theory.
The seminar will examine not just the major themes but also the rhetorical complexities of a number of powerful texts in the history of aesthetic theory. Authors to be considered include Plato, Aristotle, Longinus, Burke, Kant, Hegel, Nietzsche, Heidegger, Benjamin, Adorno. Literary texts will be considered in conjunction with these texts, sometimes by way of famous arguments or exchanges (e.g., Heidegger and Staiger on Mörise).

COLT 2650H. On the Sublime (GRMN 2660A).
Interested students must register for GRMN 2660A.

COLT 2650N. Hamlet: Appropriation, Mediation, Theory (ENGL 2360X).
Interested students must register for ENGL 2360X.

COLT 2650R. The New Foucault: Between Antiquity and Neoliberalism.
Since the publication and translation of his final lectures, a “new” Foucault has emerged, requiring a radical revision in our understanding of his work. Moving beyond his study of sexuality and biopolitics, Foucault turned to antiquity in order to investigate the diverse practices by which the self has been constituted and obliged to bear truth burdens. The exercise of political power is intimately connected with these exercises. In the seminar, we will read Foucault’s last works on truth-telling and the hermeneutics of the subject, in the dual context of emergent neo-liberalism and a new understanding of antiquity.

COLT 2650S. Thinking Tradition: Heidegger, Arendt, Adorno (GRMN 2661K).
Interested students must register for GRMN 2661K.

COLT 2720A. Advanced Practicum in Literary Translation.
Readings in theory of translation, and in monuments of literary translation from Renaissance times to the present, will be assigned to students needing further background in these areas. Students will each complete two projects: (1) by mid-semester, a critical treatment of a published translation or a comparison of such translations; (2) for the final seminar presentation and paper, the student’s own translation into English from some literary text in a language familiar to the student.

COLT 2720B. Theory and Practice of Literary Translation.
Readings in the history and theory of translation from the Renaissance to the present, along with selected major examples of literature in English translation. Students will write two papers: (1) an analysis of a theoretical issue in translation, with ample attention to the historical context of that issue; and (2) either a discussion of an important translation as a criticism of the original work; or a critical comparison of several translations of an original work; or an annotated translation into English of a literary text from a language familiar to the student.

COLT 2720C. Literary Translation.
Study and practice of translation as art and a potent form of literary criticism. Translation is an act of interpretation, which informs the language of the translator and the text as a whole: context, intent, and language. Discussion will include the impact of cultural difference, tone and time on translation, and the role of analytical as well as intuitive understanding of the original in the translator's endeavor.

COLT 2720D. Translation: Theory and Practice.
This seminar will address the theory and practice of translation, and their place in the Humanities. Essays by translators, authors and scholars will be drawn from a range of languages and contexts, as will literary and historical texts. Each participating student will work on a substantial translation project over the course of the semester. The seminar is open only to graduate students; a strong knowledge of at least one language other than English is required.

COLT 2820B. Fiction and History.
Focuses on how the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors to be considered include E. L. Doctorow, Gabriel García-Marquez, Günter Grass, José Saramago Isabel Allende, Lidia Jorge, Coover. Attention will also be paid to theoretical texts by Hayden White, Dominick LaCapra, Walter Benjamin, Linda Hutcheon, and Roger Chartier.

COLT 2820D. The "Tenth Muse" Phenomenon.
The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed “Tenth Muses,” these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

COLT 2820E. What was Enlightenment?.
Emphasizes two of the Enlightenment’s most durable artists-Mozart and Jane Austen-situating them in the context of other writers of their times (such as Kant, Casanova, and Adam Smith) and modern appropriations of their work (in criticism and performance). Sub-themes are desire, reason, education, and forms of otherness. Class hours include viewing time.

COLT 2820F. Latin America and Theory.
Explores the engagement of Latin American literature and criticism with non-Latin American bodies of literary and cultural theory (including poststructuralism, postcolonialism, postmodernism and cultural studies), addressing tensions between the autochthonous production of theoretical frameworks and their import from other contexts. Readings include the Latin American Subaltern Studies group, Revista de Crítica Cultural, Rama, García Canclini, Sarlo, Richard and current new media theorists. Open to graduate students and qualified seniors.

COLT 2820H. The Politics and Aesthetics of Masochism.
Masochism is defined as a, aestheticized positive, consensual investment in power relations. As such, it directly engages the relationship between politics and aesthetic forms, but as a sexualized relationship, Masochism articulates relations of gender in ways that seem to challenge traditional structures. Readings include novels and films, as well as theoretical engagements with masochism.

COLT 2820I. Literature and the State of Exception.
This course takes as its point of departure Walter Benjamin's famous diagnosis of modernity as a paradoxical condition under which the exception has become the rule. We will consider the aesthetic and political implications of such a state of exception in nineteenth-century literature. Authors include Baudelaire, DeQuincey, Arnold, Melville, Whitman, Benjamin, Derrida, Nancy and Agamben.

COLT 2820L. Moderns and Primitives.
Major writers, artists, and theorists of European modernism put a new emphasis on the status of primitive society and archaic pre-history. We will consider the works of Durkheim, Eliot, Joyce, Picasso, and others with reference to the anthropology and ethnography of their period, and to subsequent post-colonial critique and controversy.

COLT 2820M. Discourses of the Senses.
A comparative study of a variety of discourses dealing with the relation among the senses, the arts, and the problems of comparativity, interdisciplinarity, and intermediality. Topics will include ekphrasis, synaesthesia, mysticism and the theory of correspondence, the Gesamtkunstwerk, and the limits between media. Readings from Condillac, Lessing, Kant, Swedenborg, the German Romantics, Baudelaire, Wagner, Balzac, Lacoue-Labarthe, Nancy, Panofsky, Tschumi and others.

COLT 2820N. City (B)Lights.
Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images. American cities and literary works are foregrounded.

This course is an introduction to the thought of the French philosopher Jacques Derrida. We will focus on his most important work, his “Grammatology”, though a series of some of his essays will also be part of the readings. Other readings will include the works of authors crucial to Derrida’s thought and to an understanding of the “Grammatology”: Heidegger, Nietzsche, Freud, Saussure, Rousseau and Levi-Strauss.
COLT 2820P. Aesthetics and the Eighteenth Century Subject. The debates about taste, judgment, beauty, sentiment, and sensation in the eighteenth century gave rise to the discourse of aesthetics as we know it today, but they also exerted a powerful influence on how knowledge, virtue, and subjectivity were imagined in the post-enlightenment period. In this course, we will examine some of the founding texts of aesthetic theory from the era (including Locke, Smith, Burke, Lessing, and Kant), and then turn to consider how aesthetic questions informed and were taken up by Goethe’s narrative of subject-formation in his Bildungsroman, Wilhelm Meister’s Apprenticeship. In English.

COLT 2820Q. Culture and Politics in Cuba and the Caribbean. Complicating standard narratives about intellectuals and the Cuban Revolution, explores writings whose relationship to the state is neither affirmative nor oppositional. Focusing on journals and on recent work in cultural theory, history, anthropology, and political science, addresses the evolution and potential of civil society; articulations of marginality; revisions of socialism and the Soviet legacy; and the mobility of theory. Spanish required.

COLT 2820R. Postcolonial Melancholia. Figures of loss and defeat proliferate widely in the accounts of colonization, national liberation, and decolonization in South Asia, Africa, the Arab world, and the Americas. We will attend to the particularity of loss by juxtaposing readings in literature and postcolonial theory with readings on mourning and melancholia, drawn from a range of disciplines.

COLT 2820S. Poetry after Kant. Begins with the intensive study of a selection of writings by Immanuel Kant focused especially on force and conflict in politics and aesthetics. This study, along with relevant readings from more recent work, will provide the basis for an approach to this topic in nineteenth-century poetry. Readings of Kant (Critique of Judgment, "Toward Eternal Peace," The Conflict of the Faculties), Walter Benjamin, Jacques Derrida, and Giorgio Agamben and will lead to several "case studies" of nineteenth-century poetry, including works by Friedrich Hölderlin, Charles Baudelaire, and Matthew Arnold.

COLT 2820U. Literature and Judgment. Investigates the intersections between acts of literature and acts of judgment, between language and the law. How is literature to be judged, when is it “good” or “bad”? Does literature lie, and if so, does it matter? Does it hide a crime? And, in turn: does literature provide its own particular kind of judgment, one that may make evident the very fictional status of the law? Readings span from the Bible to contemporary post-colonial readings (Rousseau, Tolstoy, Zola, Freud, Kafka, Arendt, Benjamin, Henry James, Primo Levi, Coetzee, Sadegh Hedaya).

COLT 2820V. Nietzsche, Foucault, Latour (ENGL 2900K). Interested students must register for ENGL 2900K.

COLT 2820W. Ethical Turns (ENGL 2900N). Interested students must register for ENGL 2900N.

COLT 2820X. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B). Interested students must register for ENGL 2561B.

COLT 2821C. From Hegel to Nietzsche: Literature as/and Philosophy (GRMN 2660O). Interested students must register for GRMN 2660O.

COLT 2821L. Postcoloniality and Globalism (ENGL 2900Z). Interested students must register for ENGL 2900Z.

COLT 2821Q. Not With The Master’s Tools: Freedom, Enslavement, Emancipation, and Reparations. Focusing on the era of reconstruction - and reading texts of various genres and orientations including diaries, novels, Freedmen’s bureau records, enslaved petitions, newspapers, architectonic plans and photographs) and different theoretical accounts by W.E.B.DuBois, Frantz Fanon, C.L.R.James, Audre Lorde, Hannah Arendt, and Olympe de Gouges we will study slavery as a condition that impacted enslaved people, enslaving agents and other members of the communities and continue to impact their descendants. We will also explore categories such as abolition, ownership, rights, reparations, expertise knowledge, master’s tools and master pieces and use archives as sources and tools.

COLT 2821R. What Was Europe? (HMAN 2400E). Interested students must register for HMAN 2400E.

COLT 2830C. Literature and the Arts. An investigation of the discourse of the arts in the modern European tradition. Topics include the relation between the Ancients and the Moderns, evaluations of the possibilities and limitations of differing media, the role of language in discussions of the “other” arts, and conceptions of synaesthesia and correspondence. Texts selected from Perraute, Winkelman, Lessing, Diderot, Rousseau, Kant, Hegel, Hoffman, Baudelaire, and others.

COLT 2830F. Walter Benjamin and Modern Theory. An intensive reading of selected essays by Walter Benjamin on language, literature, aesthetics, and politics will be paired up with the study of the interpretation and impact of this work on contemporary work in literary theory and philosophy. In addition to Benjamin, we will also read Jacques Derrida, Philippe Lacoue-Labarthe, Samuel Weber, Giorgio Agamben, and Peter Fervens. German and/or French helpful but not required. Open to graduate students only.

COLT 2830H. Cultural Translation: Theory and Practice. Across a range of disciplines, "cultural translation" today stands for the dynamic interactions among cultures. Derived from cultural anthropology and linguistic translation, the metaphor of translation (already a metaphor: trans+latere, to bear across) is used increasingly to analyze how cultures are transmitted through the operations of colonial expansion, diaspora and immigration. Though cultural globalization is assumed to be a 20th century phenomenon, the result of an expansion and acceleration in the movement and exchange of ideas, commodities and capital, this seminar considers a longer historical frame for understanding cultural competition. Theoretical texts including Schleiermacher, Jakobson, Benjamin, Derrida, Spivak, and a "case study," Shakespeare.

COLT 2830I. Histories of the Early Modern Body. This seminar considers the production of knowledge about the body in the early modern period. The inscription of science and the emerging "science" of the body was visualized; discourses of the erotic, the scientific and the religious; the body in varied cultural performances including the blason, devotional texts, erotica, drama etc. Texts include theoretical work on gender and sexuality. Open to graduate students only.

COLT 2830L. Economies of the Visual (The Reverse of Images). In The Time-Image, Deleuze wrote: "Money is the reverse of all the images that the cinema shows and edits on the obverse, so that films about money are already, if implicitly, films within the film or about the film." What are the implications of this sentence for the economy of images (what Susan Buck-Morss terms their iconomy)? From The Big Store (Marx Brothers) to Peter Jackson’s King Kong, we will trace various mobilizations of the gaze, leading from the proto-cinematographic elevators and escalators to the actual developments of eye-tracking technologies, allowing for an increasing commodification of the gaze itself.

COLT 2830M. Potential History of Photography: Collaboration (MCM 2100R). Interested students must register for MCM 2100R.

COLT 2980. Reading and Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
COLT 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing a thesis.

Center for Computation and Visualization
The Center for Computation and Visualization (CCV) strives to build and foster an environment that enables teaching, learning, research, and creative undertakings that involve and rely on the use and development of advanced computing and visualization technology. CCV provides high-performance computing, highly reliable research data storage, visualization resources, physical and virtual server hosting, high-performance backup and archival services, as well as outstanding collaborative scientific support to empower computational research, scholarship, creativity, and innovation for the entire Brown community.

The computing platform comprises a 700+ high performance computing node system, some with extra large memory and some with GPUs for accelerated computing, for a total core count of over 7,000, and peak performance of roughly 125 Teraflops. A GPFs parallel filesystem provides roughly 400 Terabytes of disk storage and 40 Gigabits per second Infiniband connectivity is used for all parallel applications messaging and I/O. The storage system is integrated with a 2 Petabyte Tivoli TSM backup/archival system. CCV also maintains a high end visualization lab with large scale immersive visualization capabilities. This includes a fully immersive 360 degree YURT, a 3-wall Cave system, and a multi-projector stereo flat display wall. Custom visualization solutions for software and hardware needs are available.

For additional information please visit the center’s website at: http://www.ccv.brown.edu/.

Center for Computational Molecular Biology
The mission of the Center for Computational Molecular Biology (CCMB) is to make breakthrough discoveries in the life sciences through the development and application of novel computational, mathematical, and statistical techniques. Research in the Center aims to exploit the opportunities from technological advances in genomics and proteomics. For more information please visit https://www.brown.edu/academics/computational-molecular-biology/

Computational Biology Concentration Requirements
Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience, and visualization.

Students may pursue a Bachelor of Arts or a Bachelor of Science. Students pursuing the ScB have the option of electing a concentration in Computational Biology with one of three focus areas: Computer Sciences, Biological Sciences, or Applied Mathematics & Statistics. Both programs require a senior capstone experience that pairs students and faculty in creative research collaborations.

Standard program for the A.B. degree

Prerequisites:
- MATH 0100 or MATH 0170 - Introductory Calculus, Part II or Advanced Placement Calculus
- BIOL 0200 - The Foundation of Living Systems

General Core Requirements: Biology
- BIOL 0470 - Genetics

General Core Requirements: Chemistry
- CHEM 0330 - Equilibrium, Rate, and Structure or CHEM 0350 - Organic Chemistry

General Core Requirements: Computer Science
- CSCI 0150 & CSCI 0160 - Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures OR
- CSCI 0170 & CSCI 0180 - Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction OR
- CSCI 0190 & CSCI 0180 - Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction & CSCI 0320 - Introduction to Software Engineering and Introduction to Computer Systems and Theory of Computation

General Core Requirements: Probability & Statistics
- APMA 1650 - Statistical Inference I OR
- CSCI 1450 - Probability and Computing OR
- MATH 1610 - Probability

Comp Bio Core Course Requirements
- CSCI 1810 - Computational Molecular Biology or APMA 1080 - Inference in Genomics and Molecular Biology

AND two of the following:
- CSCI 1820 - Algorithmic Foundations of Computational Biology
- BIOL 1430 - Population Genetics or BIOL 1465 - Human Population Genetics
- CSCI 1420 - Machine Learning or APMA 1690 - Computational Probability and Statistics
- APMA 1660 - Statistical Inference II

Additional course with Director approval

Total Credits: 12

University Writing Requirement:
As part of Brown’s writing requirement, all students must demonstrate that they have worked on their writing both in their general studies and their concentration. There are a number of ways for Computational Biology concentrators to fulfill these requirements:
- Writing an Honors Thesis
- Taking a "WRIT" course in the final two years

Capstone Experience
Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. The requirements are either one semester of reading and research with a CCMB Faculty member or approved advisor, or a 2000-level Computational Biology course.

Standard program for the Sc.B. degree

Prerequisites
Computer Science Track:
Six courses in one of the following three tracks:

**General Core Course Requirements: Biology**
- BIOL 0470 Genetics (prerequisite BIOL 0200 or equivalent)
- BIOL 0280 Biochemistry
- or BIOL 0500 Cell and Molecular Biology

**General Core Course Requirements: Chemistry**
- CHEM 0330 Equilibrium, Rate, and Structure
- or CHEM 0350 Organic Chemistry

**General Core Course Requirements: Computer Science**
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
- CSCI 0190 Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction
- or CSCI 0180 Computer Science: An Integrated Introduction
- CSCI 0220 Introduction to Discrete Structures and Probability

**General Core Requirements: Probability & Statistics**
- APMA 1650 Probability and Computing or CSCI 1450 Probability and CSCI 1610 Probability

**General Core Requirements: Computational Biology**
- CSCI 1810 Computational Molecular Biology
- APMA 1080 Inference in Genomics and Molecular Biology

**Capstone Experience**
- BIOL 1950/1960 Directed Research/Independent Study
- CSCI 1970 Individual Independent Study

**Six courses in one of the following three tracks:**

**Computer Science Track:**
- Three of the following:
  - CSCI 1230 Introduction to Computer Graphics
  - CSCI 1270 Database Management Systems
  - CSCI 1410 Artificial Intelligence
  - CSCI 1550 Probabilistic Methods in Computer Science
  - CSCI 1570 Design and Analysis of Algorithms
  - or other Computer Science courses approved by the concentration advisor

- Three of the following:
  - CSCI 0330 Introduction to Computer Systems (or CSCI 0320 Introduction to Software Engineering)
  - CSCI 1820 Algorithmic Foundations of Computational Biology
  - PHP 2620 Statistical Methods in Bioinformatics, I
  - APMA 1660 Statistical Inference II
  - BIOL 1430 Population Genetics

**Biological Sciences track**
At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.

**Applied Mathematics & Statistics Track:**
At least three courses from the following:
- APMA 1660 Statistical Inference II
- APMA 1690 Computational Probability and Statistics
- CSCI 1810 Algorithmic Foundations of Computational Biology
- APMA 0340 Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II
- OR
- APMA 0360 Applied Partial Differential Equations I
- OR
- APMA 0350 Applied Ordinary Differential Equations

**Honors:**
In order to be considered a candidate for honors, students will be expected to maintain an outstanding record, with no "C's" in concentration courses and with a minimum of an "A-" average in concentration courses. In addition, students should take at least one semester, and are strongly encouraged to take 2 semesters, of reading and research with a CCMB faculty member or approved advisor. Students must submit to a public defense of their theses to be open to the CCMB community.

- Students seeking honors are advised to choose a Thesis Advisor prior to the end of their Junior year
- Students must complete the Registration form for Comp Bio and submit it to CCMB@BROWN.EDU

Any deviation from these rules must be approved by the director of undergraduate studies, in consultation with the student's advisor.

**Computational Biology Graduate Program**
The Center for Computational Molecular Biology (CCMB) offers a Ph.D. program in Computational Biology to train the next generation of scientists to perform cutting edge research in the multidisciplinary field of computational biology. During the course of their Ph.D. studies students will develop and apply novel computational, mathematical, and statistical techniques to problems in the life sciences.

The Ph.D. program in Computational Biology encompasses three individual training programs with a core of common requirements and specific requirements from individual departments of Computer Science, Molecular, Cell Biology & Biochemistry (MCB), and Ecology and Evolutionary Biology (EEB). Applicants should state a preference for one of these three programs. In addition, students interested in the intersection of Applied Mathematics and Computational Biology are encouraged to apply directly to the Applied Mathematics & Statistics Track. (http://www.brown.edu/...)

Chair
Ugur Cetintemel

Vice Chair and Director of Undergraduate Studies
Thomas W. Doeppner

Director of Graduate Studies
Shriram Krishnamurthi

Since our inception in 1979, the Computer Science Department at Brown has forged a path of innovative information technology research and teaching at both the undergraduate and graduate levels. From our modest beginnings as an interest group within the Divisions of Applied Mathematics and Engineering in the 1960s to its current stature as one of the nation’s leading computer science programs, the Computer Science Department has continuously produced prominent contributors in the field. Computer Science combines the intellectual challenge of a new discipline with the excitement of an innovative and rapidly expanding technology. The department resides in Brown’s Center for Information Technology; this striking building houses many of the university’s computing activities, as well as the department’s instructional computing facilities and research labs. Faculty, staff and students are provided state-of-the-art computing facilities.

We are a diverse community of scholars engaged in all aspects of research, teaching and mentoring in computer science and its related interdisciplinary disciplines. Realizing the importance of computing and algorithmic thinking in so many scientific, social and technological endeavors, we collaborate extensively with colleagues in archaeology, applied mathematics, biology, cognitive and linguistic sciences, economics, engineering, mathematics, medicine, physics and neurosciences.

Our undergraduate offerings reflect the department’s multidisciplinary orientations, with joint concentrations in mathematics, applied mathematics, computational biology and economics. We have strong undergraduate research groups and a long history of involving undergraduates in projects that span disciplinary boundaries.

For additional information, please visit the department’s website: http://www.cs.brown.edu/
A capstone course 5
Math: Two semesters of Mathematics or Applied Mathematics
MATH 0520 Linear Algebra
MATH 0540 Honors Linear Algebra
CSCI 0530 Directions: The Matrix in Computer Science

Total Credits 15

1. Normally these advanced courses must be at the 1000-level or higher, though an intermediate-level course not used to satisfy a core requirement may be used.
2. These courses must include two pairs of courses with each pair forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.
3. Five of the eight courses must be from CS. In addition to those listed above, students can choose:

- CSCI 1270 Database Management Systems
- CSCI 1300 User Interfaces and User Experience
- CSCI 1320 Creating Modern Web Applications
- CSCI 1380 Distributed Computer Systems
- CSCI 1600 Real-Time and Embedded Software
- CSCI 1660 Introduction to Computer Systems Security
- CSCI 1670 Operating Systems
- CSCI 1680 Computer Networks
- CSCI 1730 Design and Implementation of Programming Languages
- CSCI 1900 csciStartup

Four additional advanced computer science or related courses.

Five of the eight courses must be computer science courses. Among the eight courses may be approved 1000-level courses in Mathematics, Applied Mathematics, Biology, Engineering, Economics, Music, Cognitive, Linguistic, and Psychological Sciences, Neuroscience, and other departments that cover material relevant to the student's concentration.

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

- Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Requirements for the Standard Track of the A.B. degree

Prerequisites
Two semesters of Calculus, for example:

MATH 0100 Introductory Calculus, Part II
MATH 0170 Advanced Placement Calculus

Concentration Requirements (9 courses)
Core Computer Science:
Select one of the following series:

Series A
CSCI 0150 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
& CSCI 0160

Series B
CSCI 0170 Computer Science: An Integrated Introduction
& CSCI 0180 Computer Science: An Integrated Introduction

Series C

1. No course may be used to satisfy more than one area requirement.
2. CSCI 1010 may be used either as a math-oriented intermediate course or as an advanced course, but not both. It was formerly known as CSCI 0510.
3. CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course, but not both. CSCI 1450 was previously known as CSCI 0450. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.
4. Capstone: a one-semester course, normally taken in the student’s last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.
Requirements for the Professional Track of the A.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- CSCI 0530 Directions: The Matrix in Computer Science (math)
- CSCI 1010 Theory of Computation (math)
- CSCI 1450 Probability and Computing (math)

Four additional 1000-level courses in computer science or related areas are required. 3 of the 4 courses must be in CS.

Total Credits: 9

1 CSCI 1010 may be used as either a math-oriented intermediate course or as an advanced course, but not as both. It was formerly known as CSCI 0510.

2 Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

- CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450; they are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.

**Computer Science-Economics Concentration Requirements**

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department's writing requirement by passing a course that involves significant expository writing.

**Standard Program for the Sc.B. degree.**

**Prerequisites (3 courses):**

- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science
- ECON 0110 Principles of Economics

**Required Courses (17 courses):**

- CSCI 1450 Probability and Computing
- or APMA 1650 Statistical Inference I
- or APMA 1655 Statistical Inference I

Select one of the following Series:

- **Series A**
  - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
  - & CSCI 0160 and Introduction to Algorithms and Data Structures

- **Series B**
  - CSCI 0170 Computer Science: An Integrated Introduction
  - & CSCI 0180 Computer Science: An Integrated Introduction

- **Series C**
  - CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course.)

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented.

- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- CSCI 1010 Theory of Computation (math)

A pair of CS courses with a coherent theme.

An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement.

- ECON 1130 Intermediary Microeconomics (Mathematical)

---

1 CSCI 1010 may be used as either a math-oriented intermediate course or as an advanced course, but not as both. It was formerly known as CSCI 0510.

2 Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

- CSCI 1450 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450; they are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.
Standard Program for the A.B. degree:

Prerequisites (3 courses):
- MATH 0100 Introductory Calculus, Part II
- MATH 0520 Linear Algebra
- or MATH 0540 Honors Linear Algebra
- or CSCI 0530 Directions: The Matrix in Computer Science
- ECON 0110 Principles of Economics

Required Courses (13 courses):
- CSCI 1450 Probability and Computing
- or APMA 1650 Statistical Inference I
- or APMA 1655 Statistical Inference I
- Select one of the following series:

  **Series A**
  - CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
  - CSCI 0160 Introduction to Algorithms and Data Structures

  **Series B**
  - CSCI 0170 Computer Science: An Integrated Introduction
  - CSCI 0180 Computer Science: An Integrated Introduction

  **Series C**

and any graduate Economics course

Two additional 1000-level Economics courses 2

Capstone Course in either Computer Science or Economics 3

Total Credits 17

1 A list of pre-approved pairs may be found at the approved-pairs web page (http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the CS director of undergraduate studies. CSCI 1450 may not be used to satisfy this requirement.

2 Or ECON 1110, with permission.

3 A one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
• In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
• Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
• What did you learn from the experience that probably could not have been picked up from course work?
• Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
• Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

Requirements for the Standard Track of the Sc.B. degree.

| CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course) ) | 3 |

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems
- CSCI 1010 Theory of Computation

Three 1000-level Computer Science courses. These three courses must include a pair of courses with a coherent theme. A list of approved pairs may be found at the approved-pairs web page. You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650 or 1655/1660.

A capstone course: a one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Note: CSCI 1450 may be used either as a math-oriented core course or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or Applied Math 1655 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650, 1655 and CSCI 1450.

Total Credits: 17

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

• Which courses were put to use in your summer's work? Which topics, in particular, were important?
• In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
• Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
• What did you learn from the experience that probably could not have been picked up from course work?
• Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
• Would you recommend your summer experience to other Brown students? Explain.
Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (http://www.cs.brown.edu/ugrad/concentrations/professional.track.html) of the ScB program in Mathematics-Computer Science.

Requirements for the Standard Track of the Sc.B. degree.

**Prerequisites**

- Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350
- MATH 0520 or MATH 0540 or MATH 0550

**Core Courses**

- MATH 1530
- Select one of the following series:
  - **Series A**
    - CSCI 0150 & CSCI 0160
    - Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
  - **Series B**
    - CSCI 0170 & CSCI 0180
    - Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
  - **Series C**
    - CSCI 0190
    - Accelerated Introduction to Computer Science
    - and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 088, an intermediate-level CS course, or a 1000-level CS course
    - CSCI 0320
    - Introduction to Software Engineering
    - or CSCI 0330
    - Introduction to Computer Systems
    - CSCI 0220
    - Introduction to Discrete Structures and Probability
    - or CSCI 1010
    - Theory of Computation

Three 1000-level Mathematics courses

Three advanced courses in Computer Science

Three additional courses different from any of the above chosen from Mathematics, Computer Science, Applied Mathematics, or related areas

A capstone course in Computer Science or Mathematics

Note: CSCI 1450 may be used either in place of CSCI 220 or 1010 in the core courses or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650, Applied Math 1655, and CSCI 1450.

Total Credits: 19

---

1. These courses must be at the 1000-level or higher. The three courses must include a pair of courses with a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to the pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.
2. These must be approved by a concentration advisor.
3. A one-semester course, normally taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

---

Computer Science Graduate Program

The department of Computer Science offers two graduate degrees in computer science. The Master of Science (Sc.M.) degree for those who wish to improve their professional competence in computer science or to prepare for further graduate study, and the Doctor of Philosophy (Ph.D) degree.

For more information on admission, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/computer-science

Ph.D. Requirements

Requirements for the Ph.D. program can be found at https://cs.brown.edu/degrees/doc Lomb/or/reqs/reqs_phd.2015.pdf

Requirements for the Masters Degree

The requirements consist of a basic component and an advanced component. All courses must be at the 1000 level or higher. All courses must be completed with a grade of B or better.

The courses in student's program must be approved by the director of the Master's program (as well as by the student's advisor).

Basic Component

The basic component consists of six courses. None of these courses may be reading and research courses such as CSCI 1970 and CSCI 2980.

The six courses are chosen as follows:
• Two must be CS courses that form a coherent major. Examples of such pairs are listed at http://cs.brown.edu/degrees/undergrad/concentrations/approvedpairs/.
• One must be a CS course (the "breadth" course) that does not form a pair (according to the approved-pairs web page) with either of the courses chosen as the major.
• The three additional courses must be in CS or related areas.

Advanced Component

The advanced component requires the student to complete one of the following five options. Reading and research courses (such as CSCI 2980) may be used as part of options 1, 2, 3, and 4, but not as part of options 5 and 6. An "advanced course," as used below, is either a 2000-level CS courses or a 1000-level CS courses that includes a Master's supplement. Master's supplement are nominally half-credit courses, but students may do the work of these courses without officially registering for them. Examples of such supplements are CSCI 1234 (supplementing 1230), CSCI 1690 (supplementing 1670), and 1729 (supplementing 1730).

"Internships", as used below, must be approved by the student's advisor and are paid work in the area of the student's master's studies. They may be full, or part time. A full-time internship must last at least two months but no more than four months. A part-time internship must last at least four months but no more than six months. Normally the internship will be performed between the student's second and third semesters in the program.

The six options are:
1. Complete a thesis supervised by her or his advisor and approved by a committee consisting of the advisor and at least one other faculty member.
2. Complete a thesis supervised by her or his advisor and approved by a committee consisting of the advisor and at least one other faculty member, and complete an internship.
3. Complete a project supervised and approved by her or his advisor, and complete an internship.
4. Complete a project supervised and approved by her or his advisor, and complete an internship.
5. Complete two advanced courses.
6. Complete two advanced courses and complete an internship.

Rationale

Students entering the Master's program typically have one of two goals: they intend to pursue research in Computer Science and are preparing themselves to enter Ph.D. programs, or they intend to become professional computer scientists and pursue careers in industry. In both cases, students should take collections of courses that not only give them strength in particular areas of Computer Science, but also include complementary areas that familiarize them with other ways of thinking about the field. For example, a student whose interests are in the practical aspects of designing computer systems should certainly take courses in this area, but should also be exposed to the mindset of theoretical computer science. In a rapidly changing discipline, there is much cross-fertilization among areas and students should have some experience in doing advanced work in areas not directly related to their own.

A student whose goal is a research career should become involved as quickly as possible with a research group as part of their Master's studies, and demonstrate and learn about research by participating in it. The resulting thesis or project report will serve to establish her or his suitability for entering a Ph.D. program.

A student whose goal is to be a professional computer scientist should have some professional experience as part of her or his preparation. A certain amount of coursework is required before a student can qualify for a pedagogically useful internship. Students with limited experience in Computer Science should take a few advanced Computer Science courses before embarking on an internship. Other students, particularly those whose undergraduate degrees were at Brown, will have had internship experiences while undergraduates. Internships provide insights for subsequent courses and project work at Brown. Students without such experiences are at a disadvantage with respect to their peers. Thus we strongly encourage students who have not had such experience to choose of options 2, 4, and 5, for which internships are required.

Note that these internships are not courses and the work is not evaluated as it would be for a course. Students' advisors will assist them in choosing and obtaining internships, but it is up to students themselves to ensure that they get as much benefit as possible from their experiences. They must be able to take advantage of these experiences while completing their Master's projects – we expect as high-quality work from them as we do from students who entered the program with prior internship experiences.

A Master's degree normally requires three to four semesters of full-time study, depending upon one's preparation.

Concurrent ScB (NUS) and ScM in Computational Biology (Brown University)

The School of Computing at National University of Singapore and The Department of Computer Science at Brown have established a concurrent Bachelor’s and Master’s degree program in Computational Biology. After having first completed four years of undergraduate study at National University of Singapore (NUS), qualified students will attend Brown University to complete their fifth and final year of study in computational biology. After the successful completion of requirements set forth by both universities, the students will simultaneously earn both their Sc.B. and Sc.M. degrees. The Sc.B will be awarded by the National University of Singapore, while the Sc.M. is awarded by Brown University.

Courses

CSCI 0020. The Digital World.
Removes the mystery surrounding computers and the ever-growing digital world. Introduces a range of topics and many aspects of multimedia, along with explanations of the underlying digital technology and its relevance to our society. Other topics include artificial intelligence, IT security, ethics and the economics of computing as well as the effects of its pervasiveness in today’s world. Introductory programming and analytic skills are developed through HTML, Photoshop, Excel and Python assignments. CSCI 0020 is a good introduction to a wide range of CS topics that have broad relevance in our society. No prerequisites.

CSCI 0030. Introduction to Computation for the Humanities and Social Sciences.
Introduces students to the use of computation for solving problems in the social sciences and the humanities. We will investigate a series of real-world problems taken from the news, from books such as Freakonomics, and from current research. Topics covered include data gathering, analysis, and visualization; web-based interfaces; algorithms; and scripting. Enrollment limited to 20. Instructor permission required.

Please go to https://docs.google.com/a/brown.edu/forms/d/1qiv9SC_KmB_yePSSWb4YLcJx_nCzz7Bx3-J9U-W4/viewform to be added to the waitlist. You must use your Brown login to access the waitlist; requests to give access to non-Brown addresses will be ignored.

CSCI 0040. Introduction to Scientific Computing and Problem Solving.
CSCI0040 provides an introduction to using computers to solve STEM (Science, Technology, Engineering and Mathematics) data analysis, visualization and simulation problems from engineering, neuroscience, biology, mathematics and finance.

Students will access and analyze a number of "real world" data sets while becoming fluent MATLAB programmers. Other tools utilized may include Excel, Wolframalpha and Python.

By course end, students should be able to use MATLAB to solve a large variety of scientific data analysis, visualization and simulation problems. No prior programming experience is required (MATLAB is easy and fun to use).

CSCI 0050. A Data-Centric Introduction to Programming.
An introduction to computer programming with a focus on skills needed for data-intensive applications. Topics include core constructs for processing both tabular and structured data; decomposing problems into programming tasks; data structures; algorithms; and testing programs for correct behavior.

CSCI 0080. A First Byte of Computer Science.
Introduces non-CS concentrators to the academic discipline of computer science, its thought processes, and its relevance to other fields and modern life more generally. The target audience is students who are interested in learning more about what computer science is about and the ideas it has to offer tomorrow’s citizens and scholars. Topics include the basics of computation and programming, a taste of theoretical computer science and algorithms, and an introduction to codes and artificial intelligence. Although students will learn to read and understand short programs, the course will not teach or require advanced programming skills.

CSCI 0081. TA Apprenticeship: Full Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0081 or its half-credit version (CSCI 0082) is taken is up to the professor of the course being TA’d. Instructor permission required.

CSCI 0082. TA Apprenticeship: Half Credit.
Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one’s future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course’s instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to the professor of the course being TA’d. Instructor permission required.
CSCI 0100. Data Fluency for All.
This course is intended to introduce Brown students to computational techniques that data scientists use to tell stories. Data fluency encompasses both data literacy, the basics of statistics and machine learning, and data communication, which relies heavily on principles of design. Students will gain hands on experience using statistical tools such as R to analyze real world data sets, and 'ggplot' to visualize them. Sample application domains include just about every field, since the only requirement is data, which there almost always are (e.g., the complete works of Shakespeare is a sample data set).

CSCI 0130. User Interfaces and User Experience.
Topics include understanding when to use different interfaces, modeling and representing user interaction, principles of user experience design, eliciting requirements and feedback from users, methods for designing and prototyping interfaces, and user interface evaluation. Students interested in learning the process behind building a user interface and gaining hands-on experience designing a user interface should take this course. Programming experience is unnecessary. There will be assignments, readings, and design labs. CSCI 0130 is the same lecture, labs, and readings as CSCI 1300 but half of the assignments will be different (CSCI 1300 will have assignments with computer science prerequisites). Website: http://cs.brown.edu/courses/csci1300/

CSCI 0150. Introduction to Object-Oriented Programming and Computer Science.
Emphasizes object-oriented design and programming in Java, an effective modern technique for producing modular, reusable, internet-aware programs. Also introduces interactive computer graphics, user interface design and some fundamental data structures and algorithms. A sequence of successively more complex graphics programs, including Tetris, and culminating in a significant final project, helps provide a serious introduction to the field intended for both potential concentrators and those who may take only a single course. No prerequisites, no prior knowledge of programming required.

CSCI 0160. Introduction to Algorithms and Data Structures.
Introduces fundamental techniques for problem solving by computing that are relevant to most areas of computer science, both theoretical and applied. Algorithms and data structures for sorting, searching, graph problems, and geometric problems are covered. Programming assignments conform with the object-oriented methodology introduced in CSCI 0150. Prerequisite: CSCI 0150 or written permission.

CSCI 0170. Computer Science: An Integrated Introduction.
CSCI0170/0180 is an introductory sequence that helps students begin to develop the skills, knowledge, and confidence to solve computational problems elegantly, correctly, efficiently, and with ease. The sequence is unique in teaching both the functional and imperative programming paradigms—the first through the languages Scheme and ML in CSCI0170; the second through Java in CSCI0180. The sequence requires no previous programming experience. Indeed, few high school students are exposed to functional programming; hence even students with previous programming experience often find this sequence an invaluable part of their education.

Although students are taught to use programming languages as tools, the goal of CSCI0170/0180 is not merely to teach programming. On the contrary, the goal is to convey to students that computer science is much more than programming! All of the following fundamental computer science techniques are integrated into the course material: algorithms, data structures, analysis, problem solving, abstract reasoning, and collaboration. Concrete examples are drawn from different subareas of computer science: in 0170, from arbitrary-precision arithmetic, natural language processing, databases, and strategic games; in 0180, from discrete-event simulation, data compression, and client/server architectures.

CSCI 0180. Computer Science: An Integrated Introduction.
A continuation of CSCI 0170. Students learn to program in Java while continuing to develop their algorithmic and analytic skills. Emphasis is placed on object-oriented design, imperative programming, and the implementation and use of data structures. Examples are drawn from such areas as databases, strategy games, web programming, graphical user interfaces, route finding, and data compression. Lab work done with the assistance of TAs. Prerequisite: CSCI 0170 or CSCI 0190.

CSCI 0190. Accelerated Introduction to Computer Science.
A one-semester introduction to CS covering programming integrated with core data structures, algorithms, and analysis techniques, similar to the two-course introductory sequences (CSCI 0150 - CSCI 0160 and CSCI 0170 - CSCI 0180). Students wishing to take CSCI 0190 must pass an online placement exam. Though the exam is most appropriate for students who have had some prior programming experience, all are welcome to try learning the material and doing the exam. Exam information can be found here: http://cs.brown.edu/courses/cs019/2017/. The exam must be taken before summer ends; students who have not passed the exam won't be allowed to register.

CSCI 0220. Introduction to Discrete Structures and Probability.
Seeks to place on solid foundations the most common structures of computer science, to illustrate proof techniques, to provide the background for an introductory course in computational theory, and to introduce basic concepts of probability theory. Introduces Boolean algebra, logic, set theory, elements of algebraic structures, graph theory, combinatorics, and probability. No prerequisites.

CSCI 0310. Introduction to Computer Systems.
Basic principles of computer organization. Begins with machine representation of data types and logic design, then explores architecture and operations of computer systems, including I/O, pipelining, and memory hierarchies. Uses assembly language as an intermediate abstraction to study introductory operating system and compiler concepts. Prerequisite: CSCI 0150 or CSCI 0180 or CSCI 0190.

CSCI 0320. Introduction to Software Engineering.
Techniques for designing, building, and maintaining large, scalable, and reusable systems. We will cover advanced programming techniques using Java and Javascript. Course assignments will familiarize students with software testing, relational databases, concurrency techniques such as threads, and software engineering tools like git, profilers, and debuggers. A major component of the course will be a group software project of your own design.
Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0220 is recommended.

CSCI 0330. Introduction to Computer Systems.
High-level computer architecture and systems programming. The course covers the organization of computer systems (in terms of storage units, caches, processors, and I/O controllers) and teaches students assembly-language programming and C-language programming. Extensive programming exercises introduce students to systems-level programming on Unix systems, as well as to multi-threaded programming with POSIX threads. Students will be introduced to the functions of operating systems. Prerequisite: CSCI 0150, 0180, or 0190.

CSCI 0530. Directions: The Matrix in Computer Science.
Introduces vectors, matrices and their role in computer science in three components: (1) concepts, theorems, and proofs, (2) procedures and programs, (3) applications and working with data. Weekly lab sessions where students apply concepts to a real task with real data. Example labs: transformations in 2-d graphics, error-correcting codes, image compression using wavelets, synthesizing a new perspective in a photo, face recognition, news story categorization, cancer diagnosis using machine learning, matching airplanes to destinations, Google's PageRank method. Other topics as time allows. Skills in programming and prior exposure to reading and writing mathematical proofs required.
CSCI 1010. Theory of Computation.
The course introduces basic models of computation including languages, finite-state automata and Turing machines. Proves fundamental limits on computation (incomputability, the halting problem). Provides the tools to compare the hardness of computational problems (reductions). Introduces computational complexity classes (P, NP, PSPACE and others). Prerequisite: CSCI 0220 or 1450.

Fundamental concepts in 2D and 3D computer graphics, e.g., 2D raster graphics techniques, simple image processing, and user interface design. Focuses on geometric transformations, and 3D modeling, viewing and rendering. A sequence of assignments in C++ culminates in a simple geometric modeler and ray tracer. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Some knowledge of basic linear algebra is helpful but not required. Strong object-oriented programming ability (e.g., in C++, Java or Python) is required.

CSCI 1234 is a half-credit course intended to be taken concurrently with CSCI 1230 and provides students with a greater understanding of the material by having them extend each of 1230’s assignments to greater depth.

CSCI 1250. Introduction to Computer Animation.
Introduction to 3D computer animation production including story writing, production planning, modeling, shading, animation, lighting, and compositing. The first part of the course leads students through progressive exercises that build on each other to learn basic skills in 2D and 3D animation. At each step, student work is evaluated for expressiveness, technical correctness and aesthetic qualities. Students then work in groups creating a polished short animation. Emphasis on in-class critique of ongoing work which is essential to the cycle of visually evaluating work in progress, determining improvements, and implementing them for further evaluation.

Please see course website for application procedure.

CSCI 1260. Compilers and Program Analysis.
Lexical analysis, syntactic analysis, semantic analysis, code generation, code optimization, translator writing systems. Prerequisites: CSCI 0220 and 0320; 0510 is recommended.

CSCI 1270. Database Management Systems.
Introduction to database structure, organization, languages, and implementation. Relational model, query languages, query processing, query optimization, normalization, file structures, concurrency control and recovery algorithms, and distributed databases. Coverage of modern applications such as the Web, but with emphasis on Database Management Systems internals. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190. One of CSCI 0330 or CSCI 0320 is strongly recommended.

CSCI 1280. Intermediate 3D Computer Animation.
Continues work begun in CSCI 1250 with deeper exploration of technical and artistic aspects of 3D computer animation including more sophisticated shading and lighting methods and character modeling, rigging, animation, and dynamics. After a series of individual exercises, students pursue an independent topic and then, working alone or in pairs, create a polished demonstration. Emphasis is on in-class critique of ongoing work. Prerequisite: CSCI 1250. Students may contact the instructor in December for permission.

CSCI 1290. Computational Photography.
Describes the convergence of computer graphics and computer vision with photography. Its goal is to overcome the limitations of traditional photography using computational techniques to enhance the way we capture, manipulate, and interact with visual media. Topics covered: cameras, human visual perception, image processing and manipulation, image based lighting and rendering, high dynamic range, single view reconstruction, photo quality assessment, non photorealistic rendering, the use of Internet-scale data, and more. Students are encouraged to capture their own data. Prerequisites: previous programming experience, basic linear algebra, calculus, and probability; previous knowledge of computer graphics or computer vision. Strongly recommended: CSCI 1230, CSCI 1430, ENGN 1610.

CSCI 1300. User Interfaces and User Experience.
Topics include understanding when to use different interfaces, modeling and representing user interaction, principles of user experience design, eliciting requirements and feedback from users, methods for designing and prototyping interfaces, and user interface evaluation. Students interested in learning the process behind building a user interface and gaining hands-on experience designing a user interface should take this course. There will be assignments, readings, and design labs. CSCI 1300 and CS 0130 share the same lecture, labs, and readings but half of the assignments will be different (CSCI 1300 will have assignments with computer science prerequisites). Website: http://cs.brown.edu/courses/csci1300/

Covers the fundamental concepts, principles, and abstractions that underlie the design and engineering of computer systems. Topics include computer systems organization, modularity, virtualization, communications, atomicity, fault tolerance, security, and performance. Combined lectures and presentation and discussion of case studies. Several hands-on labs and written assignments, as well as a semester-long project that is incrementally worked on throughout the semester. Prerequisites: CSCI 0160, 0180, or 0190, or permission of the instructor.

This course covers all aspects of web application development, including the initial concept, user-centric design, development methodologies, front and back end development, databases, security, testing, load testing, accessibility, and deployment. There will be a substantial team project. The course is designed for students with a programming background (equiv CSCI 0320/CSCI 0330) who want to learn how to build web applications, and for students with a background in web design, including HTML and Javascript, who are interested in learning how to extend design techniques to incorporate the technologies needed in modern web applications. Project teams will consist of students with both backgrounds.

CSCI 1340. Innovating Game Development.
What technologies will shape the next generation of video games? This project-centered course focuses on computational innovations for game development. Students examine innovative game technology through case studies of existing games and talks by industrial and academic game professionals. In teams, students propose and implement a project demonstrating a novel technology for gaming. Recommended: strong computational or engineering background.

Explores the visual and human-computer interaction design process for scientific applications in Brown’s immersive virtual reality Cave. Joint with RISD. Computer Science and design students learn how to work together effectively; study the process of design; learn about scientific problems; create designs applications; critique, evaluate, realize and iterate designs; and demonstrate final projects. Instructor permission required.

CSCI 1380. Distributed Computer Systems.
Explores the fundamental principles and practice underlying networked information systems, first we cover basic distributed computing mechanisms (e.g., naming, replication, security, etc.) and enabling middleware technologies. We then discuss how these mechanisms and technologies fit together to realize distributed databases and file systems, web-based and mobile information systems. Prerequisite: CSCI 0320 or CSCI 0330.

CSCI 1410. Artificial Intelligence.
Practical approaches to designing intelligent systems. Topics include search and optimization, uncertainty, learning, and decision making. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190; and either CSCI 0220 or one of CSCI 0450 or CSCI 1450.
We explore the theory and practice of statistical machine learning, focusing on computational methods for supervised and unsupervised data analysis. Specific topics include Bayesian and maximum likelihood parameter estimation, regularization and sparsity-promoting priors, kernel methods, the expectation maximization algorithm, and models for data with temporal or hierarchical structure. Applications to regression, categorization, clustering, and dimensionality reduction problems are illustrated by examples from vision, language, bioinformatics, and information retrieval.

CSCI 1430. Computer Vision.
How can we program computers to understand the visual world? This course treats vision as inference from noisy and uncertain data and emphasizes probabilistic and statistical approaches. Topics may include perception of 3D scene structure from stereo, motion, and shading; segmentation and grouping; texture analysis; learning, object recognition; tracking and motion estimation. Strongly recommended: basic linear algebra, calculus, and probability.

Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major roles in machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of Bayesian and frequentist statistical inference. Basic programming experience required for homework assignments. Pre-Requisites: Two semesters of college-level calculus, at the level of Math 0990 and Math 0100.

The application of computational methods to problems in natural-language processing. In particular we examine techniques due to recent advances in deep learning: word embeddings, recurrent neural networks (e.g., LSTMs), sequence-to-sequence models, and generative adversarial networks (GANs). Programming projects include parsing, machine translation, question answering, and chat-bots. The prerequisite of CS147 (or the equivalent background) is very important.

Deep learning is the name for a particular version of neural networks—a version that emphasizes multiple layers of networks. Deep learning, plus the specialized techniques that it has inspired (e.g. convolutional features and word embeddings) have lead to rapid improvements in many applications such as computer vision, machine translation, and computer Go. This course intends to give students a practical understanding of deep learning as applied in these and other areas. It also teaches the Tensorflow programming language for the expression of deep learning algorithms. (The primary API for Tensorflow is from Python.)

CSCI 1480. Building Intelligent Robots.
How do robots function autonomously in dynamic, unpredictable environments? This course focuses on programming mobile robots, such as the iRobot Roomba, to perceive and act autonomously in real-world environments. The major paradigms for autonomous control and robot perception are examined and compared with robotic notions in science fiction. Prerequisite: CSCI 0150, CSCI 0170 or CSCI 0190. Recommended: CSCI 1410 or CSCI 1230.

CSCI 1490. Introduction to Combinatorial Optimization.
This course covers the algorithmic aspects of optimizing decisions in fully observable, non-changing environments. Students are introduced to state-of-the-art optimization methods such as linear programming, integer programming, local search, and constraint programming. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0510; and CSCI 0530 or MATH 0520 or MATH 0540.

CSCI 1510. Introduction to Cryptography and Computer Security.
This course studies the tools for guaranteeing safe communication and computation in an adversarial setting. We develop notions of security and give provably secure constructions for such cryptographic objects as cryptosystems, signature schemes and pseudorandom generators. We also review the principles for secure system design. Prerequisites: CSCI 0220 and CSCI 0510.

Randomization and probabilistic techniques play an important role in modern computer science, with applications ranging from combinatorial optimization and machine learning to communications networks and secure protocols. This course introduces the most fundamental probabilistic techniques used in computer science applications, in particular in randomized algorithms, probabilistic analysis of algorithms and machine learning.
Prerequisite: Basic background in probability theory course such as CSCI 1450.

CSCI 1570. Design and Analysis of Algorithms.
A single algorithmic improvement can have a greater impact on our ability to solve a problem than ten years of incremental improvements in CPU speed. We study techniques for designing and analyzing algorithms. Typical problem areas addressed include hashing, searching, dynamic programming, graph algorithms, network flow, and optimization algorithms including linear programming. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190, and one of CSCI 0220 or CSCI 1450.

CSCI 1580. Information Retrieval and Web Search.
Covers traditional material as well as recent advances in information retrieval (IR), the study of indexing, processing, and querying of textual data. The focus will be on newer techniques geared to hypertext documents available on the World Wide Web. Topics include efficient text indexing; Boolean and vector space retrieval models; evaluation and interface issues; Web crawling, link-based algorithms, and Web metadata; text/Web clustering, classification; text mining.

CSCI 1590. Introduction to Computational Complexity.
Introduction to serial and parallel models of computation; time and space complexity classes on these models; the circuit model of computation and its relation to serial and parallel time complexity; space-time tradeoffs on serial computers; area-time tradeoffs on the VLSI computational model; interactive and probabilistically checkable proofs; the definition of NP in terms of probabilistically checkable proofs; hardness of approximations to solutions to NP-hard problems. Prerequisite: CSCI 0510.

CSCI 1600. Real-Time and Embedded Software.
Comprehensive introduction to the design and implementation of software for programmable embedded computing systems, those enclosed in devices such as cellular phones, game consoles, and car engines. Includes the overall embedded real-time software design and development processes, as well as aspects of embedded hardware and real-time, small-footprint operating systems. Major project component. Prerequisites: CSCI 0320 or 0330.

CSCI 1610. Building High-Performance Servers.
In depth study of modern server design. Considers architectures for building high-performance, robust, scalable, and secure network servers. We will consider all aspects of "mission-critical" servers. Topics include multithreaded and asynchronous programming techniques, database access, performance profiling, security, and redundancy. Teams will build significant projects. Prerequisite: CSCI 0320 or 0360. CSCI 1670 or 1680 is recommended.

CSCI 1620 is a half-credit laboratory course intended to be taken concurrently with CSCI 1660 and provides students with a deeper understanding of the material by doing additional assignments, which include extensions of the 1660’s assignments. Instructor permission required.
CSCI 1650. Software Security and Exploitation.
Covers software exploitation techniques and state-of-the-art mechanisms for protecting (vulnerable) software. It begins with a summary of prevalent software defects, typically found in applications written in memory unsafe languages, like C/C++, and proceeds with studying traditional and modern exploitation techniques, ranging from classical code-injection and code-reuse up to the newest goodides (just-in-time code reuse). For the most part, it focuses on defenses against certain vulnerability classes and exploitation methods. Students will learn about the boundaries and effectiveness of virtualization, stack and heap protections, and address space randomization, and analyze advanced exploitation techniques and countermeasures.

This course teaches principles of computer security from an applied viewpoint and provides hands-on experience on security threats and countermeasures. Topics include code execution vulnerabilities (buffer overflow, sandboxing, mobile code), malware (tropjans, viruses, and worms), access control (users, roles, policies), cryptosystems (hashing, signatures, certificates), network security (firewalls, TLS, intrusion detection, VPN), and human and social issues. Prerequisites: one of CSCI 0160 or CSCI 0180 or CSCI 0190; and CSCI 0330.

Covers not just the principles of operating systems but the intricacies of how they work. Topics include multithreaded programming, managing threads and interrupts, managing storage, processor scheduling, operating-system structure, virtualization, security, and the design of file systems (both local and distributed). Extensive examples are taken from actual systems, including Linux and Windows. Students are expected to complete both problem sets and programming assignments (in C). Prerequisite: CSCI 0330.

CSCI 1680. Computer Networks.
Covers the technologies supporting the Internet, from Ethernet and WiFi through the routing protocols that govern the flow of traffic and the web technologies that are generating most of it. A major concern is understanding the protocols used on the Internet: what the issues are, how they work, their shortcomings, and what improvements are on the horizon. Prerequisite: CSCI 0330 or consent of instructor.

CSCI 1690. Operating Systems Laboratory.
Half-credit course intended to be taken with CSCI 1670. Students individually write a simple operating system in C. Serves to reinforce the concepts learned in 1670 and provides valuable experience in systems programming. Corequisite: CSCI 1670.

CSCI 1729. Programming Languages Lab.
Half-credit course intended to be taken concurrently with CSCI 1730. Students individually implement a full programming language chosen by the course. Reinforces the concepts learned in CSCI 1730 and provides valuable experience in implementing programming languages. Corequisite: CSCI 1730.

CSCI 1730. Design and Implementation of Programming Languages.
Explores the principles of modern programming languages by implementation. Examines linguistic features, especially control operators such as first-class functions, exceptions, and continuations. Studies data and their types, including polymorphism, type inference, and type soundness. Examines compiler and run-time system topics: continuation-passing style and garbage collection. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. Preferred: CSCI 0220, either CSCI 0320 or CSCI 0330, and CSCI 0510.

CSCI 1760. Multiprocessor Synchronization.
This course examines the theory and practice of multiprocessor synchronization. Subjects covered include multiprocessor architecture, mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, load balancing, concurrent data structures, and transactional synchronization. Prerequisites: CSCI 0330.

CSCI 1780. Parallel and Distributed Programming.
Covers the practical aspects involved in designing, writing, tuning, and debugging software designed to run on parallel and distributed systems. Topics might include client-server computation, threads, networks of workstations, message passing, shared memory, partitioning strategies, load balancing, algorithms, remote procedure call, and synchronization technologies. Prerequisites: CSCI 0220 and either 0320 or 0360; 0510 recommended.

CSCI 1800. Cybersecurity and International Relations.
The global Internet shortens distances, makes businesses more efficient and facilitates greater social interaction. At the same time, it exposes vital national resources to exploitation and makes it easier for the international criminal element to prey on innocent Internet users. Cybersecurity is concerned with making the Internet a more secure and trustworthy environment. In this course we study this topic from the technological and policy points of view. The goal is to facilitate communication across the divide that normally characterizes the technological and policy communities. WRIT

CSCI 1810. Computational Molecular Biology.
High-throughput experimental approaches now allow molecular biologists to make large-scale measurements of DNA, RNA, and protein, the three fundamental molecules of the cell. The resulting datasets are often too large for manual analysis and demand computational techniques. This course introduces algorithms for sequence comparison and alignment; molecular evolution and phylogenetics; DNA/RNA sequencing and assembly; recognition of genes and regulatory elements; and RNA and protein structure. The course demonstrates how to model biological problems in terms of computer science. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190, or consent of instructor.

The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP’s variation. The course is open to computer and mathematical sciences students as well as biological and medical students.

CSCI 1900. csciStartup.
In csciStartup, you will incorporate and run a startup. Apply as a team to be part of a prototype class to remove the mystery from starting a company and to focus entirely on a product you’re passionate about. Teams will incorporate, build a product for real customers, advertise their product, and improve it week after week. We’ll spend half our class meetings with individual attention to each group’s progress and how to improve your offerings. Assignments will be designed to apply to any company, with enough flexibility to ensure you’re always working on things that make sense for your business.

CSCI 1950A. Computational Modeling and Algorithmic Thinking.
In this course you will learn how to apply tools from statistics and computer science to build computational models of physical and biological systems. Example applications include modeling and then simulating the behavior of a collection of genes, the spread of disease in a population, a single neuron in isolation or the complex of neurons comprising the primate visual cortex.

CSCI 1950B. Computational Topology and Discrete Geometry.
This course will investigate (through a mixture of lectures and student presentations of recent papers) topics in computational topology, including Morse theory and discrete differential geometry. Other possible topics are knot polynomials, simplicial homology, and geometric probability theory. Some mathematical sophistication and programming skills required. No prerequisites.
We will study various algorithmic problems that arise in the study of topological phenomena, such as winding number, turning number, knot polynomials, topology of covering spaces (especially Riemann surfaces), and discrete Morse theory. The mathematical topics will be briefly introduced before we move to computations, but some a priori mathematical sophistication will make the course more valuable to the student. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950J. Introduction to Computational Geometry.
Geometric algorithms in two and three dimensions. Algorithmic and geometric fundamentals. Point location, convex hulls, proximity (Voronoi diagrams, Delaunay triangulations), intersections, the geometry of rectangles. Prerequisites: CSCI 0160, 0170, or 0190; and CSCI 0220.

CSCI 1950K. Innovating Game Development.
A project-centered course focused on technological, paradigm, and design innovations for game development. As teams, students will propose and implement a project demonstrating a novel technology for gaming. Examine the current state and future of game development through a seminar of speakers active in game development and research. A strong computer science or engineering background is recommended.

CSCI 1950M. Advanced Practical Combinatorial Algorithms.
We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 1950N. 2D Game Engines.
2D Game Engines covers core techniques used in the development of the software that drives computer games and other interactive software. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engine. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1950R. Compiler Practice.
This class covers the practice of compiler writing, including lexical analysis, parsing, semantic analysis, code generation, and code optimization. Students design and implement a full compiler modularly for a modern functional language using a modern intermediate representation and modular backend. Instructor permission required.

CSCI 1950T. Advanced Animation Production.
Students will apply knowledge and skills gained in previous animation courses to produce a high quality short animated film as a group. Production will follow the industry standard pipeline that includes modeling, texturing, lighting, animating, rendering, and post production. Interested students will perform prepredition story and concept design prior to beginning of course. Prerequisite: CSCI 1250. Enrollment limited to 15. Instructor permission required.

CSCI 1950U. Topics in 3D Game Engine Development.
Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the Qt framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisites: CSCI 1230 and one of CSCI 0320 or CSCI 1950N. Enrollment limited to 25.

CSCI 1950X. Software Foundations.
Software Foundations will be a project-based course focusing on the challenges and techniques involved in proving non-trivial properties about real-world systems. We will base our exploration around formal development in a proof environment. Roughly half of the course will be a guided tutorial of proof techniques using one or more theorem provers; in the remainder, students will apply this knowledge to existing systems. No prior experience with theorem provers or proof assistants is necessary, but familiarity with and aptitude for functional programming will be a huge bonus. Prerequisite: CSCI 1730 or equivalent; mathematical maturity.

The course will focus on proving properties about systems and programs. We will study the distinction between programs and specifications, and check for whether the former obey the latter. We will work with tools that have extensive automation such as model constructors, model checkers, and proof assistants. Problems and projects will apply to real-world systems. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Preferred but not required: CSCI 0220 and CSCI 0510, or instructor’s permission.

CSCI 1950Z. Computational Methods for Biology.
This course will introduce algorithms from machine learning and combinatorial optimization with a focus on their application to biological data. Topics will include problems in phylogenetic inference, population genetics, and biological interaction networks.

CSCI 1951A. Data Science.
Mastering big data requires skills spanning a variety of disciplines: distributed systems over statistics, machine learning, and a deep understanding of a complex ecosystem of tools and platforms. Data Science refers to the intersection of these skills and how to transform data into actionable knowledge. This course provides an overview of techniques and tools involved and how they work together: SQL and NoSQL solutions for massive data management, basic algorithms for data mining and machine learning, information retrieval techniques, and visualization methods. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190. One of CSCI 0330 or CSCI 0320 strongly recommended.

CSCI 1951B. Virtual Citizens or Subjects? The Global Battle Over Governing Your Internet.
The Internet began as a U.S. government research project, progressed to an open network run by free-spirited geeks, and transitioned in the late 1990s to a unique governance model in which nations, corporations, and civil society were supposed to all have a voice. Where are the real decisions being made? Who is making them? How can you and citizens of other nations influence these decisions? The global battle to run the Internet, brewing for years, has broken wide open with revelations of American spying on a massive scale.

CSCI 1951C. Designing Humanity Centered Robots.
Offered by Brown’s Computer Science department under the auspices of the Humanity Centered Robotics Initiative. It is focused on the iterative design process and how it can be used to develop robots for solving tasks that help people. It will expose students to a suite of fabrication and prototyping technologies sufficient for creating a functioning robotic system.

https://www.youtube.com/watch?v=Dbvis_j_B78

The course has two tracks, one intended for CS concentrators, and one intended for non-concentrators with previous design experience. The non-concentrator track cannot be used toward fulfilling a Computer Science concentration requirement.

Who is the Big Brother that we most fear? Is it the NSA -- or is it Google and Facebook? Rapidly changing social mores and the growing problem of cybersecurity have all contributed to a sense that privacy is dead. While the laws that protect privacy and civil liberties are stuck in the analog age, the capabilities for mass digital surveillance continue to advance rapidly. This course will put current controversies in historical context and explore possible reforms. WRIT

CSCI 1951G. Optimization Methods in Finance.
Optimization plays an important role in financial decisions. Many computational finance problems range from asset allocation to risk management, from option pricing to model calibration can be solved efficiently using modern optimization techniques. This course discusses several classes of optimization problems (including linear, quadratic, integer, dynamic, stochastic, conic, and robust programming) encountered in financial models. For each problem class, after introducing the relevant theory and efficient solution methods, we discuss problems of mathematical finance that can be modeled within this problem class. Prerequisites: CSCI 1450 or APMA 1650, and CSCI 1570.
CSCI 1951J. Interdisciplinary Scientific Visualization.
Students will learn about solving scientific problems using computer graphics and visualization. Projects will involve the solution of scientific problems using computer graphics, modeling, and visualization. Working in small groups, students will identify scientific problems, propose solutions involving computational modeling and visualization, evaluate the proposals, design and implement the solutions, apply them to the problems, evaluate their success, and report on results. Example projects might include interactive software systems, immersive virtual reality cave applications, quantitative analysis tools, or new applications of existing visualizations methods. The focus will be on applications in the new virtual reality cave.

CSCI 1951R. Introduction to Robotics.
Each student will learn to program a small quad-rotor helicopter. We will provide each student with their own robot for the duration of the course. The course will cover PID controllers for stable flight, localization with a camera, mapping, and autonomous planning. At the end of the course, the aim is for students to understand the basic concepts of a mobile robot and aerial vehicle.

Independent study in various branches of Computer Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CSCI 1971. Independent Study in 2D Game Engines.
2D Game Engines covers core techniques used in the development 2D game engines. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

CSCI 1972. Topics in 3D Game Engine Development.
Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the Qt framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisite: CSCI 1230 and one of the following CSCI 0320, CSCI 0330, CSCI 1950N, OR CSCI 1971.

Important current topics in computer graphics. Course includes reading and discussing current research papers, multiple assignments and preliminary projects in which students implement recent papers, and a demanding final integrative project done in small groups. Prerequisite: Instructor's permission or both CSCI 0320 AND CSCI 1230.

CSCI 2270. Topics in Database Management.
In-depth treatment of advanced issues in database management systems. Topics vary from year to year and may include distributed databases, mobile data management, data stream processing and web-based data management. Prerequisite: CSCI 1270.

CSCI 2310. Human Factors and User Interface Design.
Covers current research issues involving the implementation, evaluation and design of user interfaces, while also providing a basic background in the fundamentals of user interface evaluation, programming, tools, and techniques. A possible topic is programming and designing device-independent interfaces. Previous topics have included the development of pervasive internet-based interfaces and software visualization. Prerequisite: Consent of instructor.

CSCI 2330. Programming Environments.
Programming tools; control and data integration; software understanding and debugging; environments for parallel and distributed programming; reverse engineering; configuration management and version control and debugging. Emphasis on current research areas. Prerequisite: Consent of instructor.

CSCI 2340. Software Engineering.
Topics in the design, specification, construction and validation of programs. Focus will be on tools to support each of these stages. Course will pay special attention to the concerns raised by the properties of modern software systems including distribution, security, component-based decomposition and implicit control. Prerequisite: CSCI 0320 or CSCI 0330.

CSCI 2370. Interdisciplinary Scientific Visualization.
How to do research on using computer graphics, visualization, and interaction applied to scientific problems. Working in small multidisciplinary groups, students identify scientific problems, propose solutions involving computational modeling and visualization, design and implement the solutions, apply them to the problems, and evaluate their success. For 2014, immersive CAVE applications will be a focus, but other interaction or visualization projects are possible. Prerequisites: all: programming experience; CS students: graphics experience; others: problem ideas. Instructor permission required.

CSCI 2410. Statistical Models in Natural-Language Understanding.
Various topics in computer understanding of natural language, primarily from a statistical point of view. Topics include: hidden Markov models, word-tagging models, probabilistic context-free grammars, syntactic disambiguation, semantic word clustering, word-sense disambiguation, machine translation and lexical semantics. Prerequisite: CSCI 1410.

CSCI 2420. Probabilistic Graphical Models.
Probabilistic graphical models provide a flexible framework for modeling large, complex, heterogeneous collections of random variables. After a brief introduction to their representational power, we provide a comprehensive survey of state-of-the-art methods for statistical learning and inference in graphical models. We discuss a range of efficient algorithms for approximate inference, including optimization-based variational methods, and simulation-based Monte Carlo methods. Several approaches to learning from data are explored, including conditional models for discriminative learning, and Bayesian methods for controlling model complexity. Programming experience required for homeworks and projects, which integrate mathematical derivations with algorithm implementations. PREREQUISITES: CSCI1420 or APMA1690.

CSCI 2430. Topics in Machine Learning.
Machine learning from the artificial intelligence perspective, with emphasis on empirical validation of learning algorithms. Different learning problems are considered, including concept learning, clustering, speed-up learning, and behavior learning. For each problem a variety of solutions are investigated, including those from symbolic AI, neural and genetic algorithms, and standard statistical methods. Prerequisite: CSCI 1410 or familiarity with basic logic and probability theory.

CSCI 2440. Game-Theoretic Artificial Intelligence.
This course surveys recent developments in an emerging area known as game-theoretic artificial intelligence (AI), which incorporates fundamental principles of game theory into AI. Research in this area is motivated by game-theoretic applications, such as auction design and voting, as well as AI application areas, such as multiagent systems. Students will conduct theoretical, empirical, and experimental investigations, asking fundamental questions such as: can the behavior of computational learning agents converge to game-theoretic equilibria? Prerequisite: Consent of instructor.

CSCI 2450. Exchange Scholar Program.
CSCI 2500A. Advanced Algorithms.
Typically, an algorithm solves one problem, whereas a well-designed data structure can help implement algorithms for a wide variety of problems. We will study the design, analysis and implementation of advanced data structures. Focus is on data structures that are fast, both theoretically and empirically. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2500B. Optimization Algorithms for Planar Graphs.
Planar graphs arise in applications such as road map navigation and logistics, graph drawing and image processing. We will study graph algorithms and data structures that exploit planarity. Our focus will be on recent research results in optimization. Prerequisite: CSCI 1570 or the equivalent.
CSCI 2510. Approximation Algorithms. Approximation Algorithms deal with NP-hard combinatorial optimization problems by efficiently constructing a suboptimal solution with some specified quality guarantees. We study techniques such as linear programming and semidefinite programming relaxations, and apply them to problems such as facility location, scheduling, bin packing, maximum satisfiability or vertex cover. Prerequisite - one of the following: CSCI 1510, 1550, 1810, 1950J, 1950L, any graduate-level course on algorithms (including 2500A, 2500B, 2580).

CSCI 2520. Computational Geometry. Algorithms and data structures for fundamental geometric problems in two and three dimensions. Topics include point location, range searching, convex hull, intersection, Voronoi diagrams, and graph drawing. Applications to computer graphics, circuit layout, information visualization, and computer-aided design are also discussed. Prerequisite: CSCI 1570 or instructor permission.

CSCI 2530. Design and Analysis of Communication Networks. A theory seminar focusing on algorithmic and combinatorial issues related to the design and analysis of communication networks for parallel and distributed systems. Topics include packet routing, circuit switching, distributed shared memory, fault tolerance, and more. Prerequisites: CSCI 1550, 1570, or equivalent courses.

CSCI 2540. Advanced Probabilistic Methods in Computer Science. Advanced topics in applications of probabilistic methods in design and analysis of algorithms, in particular to randomized algorithms and probabilistic analysis of algorithms. Topics include the Markov chains Monte Carlo method, martingales, entropy as a measure for information and randomness, and more. Prerequisite: CSCI 1450. Recommended but not required: CSCI 1570.

CSCI 2550. Parallel Computation: Models, Algorithms, Limits. The theoretical foundations of parallel algorithms. Analysis of the most important models of parallel computation, such as directed-acyclic computation graphs, shared memory and networks, and standard data-exchange schemes (common address space and message-passing). Algorithmic techniques with numerous examples are cast mostly in the data-parallel framework. Finally, limitations to parallelizability (P-completeness) are analyzed. The content of the course is likely to change as technology evolves.

CSCI 2560. Advanced Complexity. Advanced topics in computational complexity, such as: the polynomial hierarchy, interactive proofs, pseudorandomness, derandomization, probabilistically checkable proofs.

CSCI 2570. Introduction to Nanocomputing. Nanoscale technologies employing materials whose smallest dimension is on the order of a few nanometers are expected to replace lithography in the design of chips. We give an introduction to computational nanotechnologies and explore problems presented by their stochastic nature. Nanotechnologies based on the use of DNA and semiconducting materials will be explored. Prerequisite: CSCI 0510.

CSCI 2580. Solving Hard Problems in Combinatorial Optimization: Theory and Systems. The theory of combinatorial optimization and how it is embodied in practical systems. Explores issues encountered in implementing such systems. Emphasizes the wide variety of techniques and methodologies available, including integer programming, local search, constraint programming, and approximation algorithms. Problems addressed may include: scheduling, coloring, traveling salesman tours, and resource allocation. Prerequisites: CSCI 0320 and basic knowledge of linear algebra.

CSCI 2590. Advanced Topics in Cryptography. Seminar-style course on advanced topics in cryptography. Example topics are zero-knowledge proofs, multi-party computation, extractors in cryptography, universal composability, anonymous credentials and ecash, interplay of cryptography and game theory. May be repeated for credit. Prerequisite: CSCI 1510 or permission of the instructor.

CSCI 2730. Programming Language Theory. Theoretical models for the semantics of programming languages and the verification of programs. Topics will be drawn from operational semantics, denotational semantics, type theory and static analyses. Recommended prerequisite: CSCI 1730, CSCI 1950Y or instructor permission.

CSCI 2750. Topics in Parallel and Distributed Computing. CSCI 2750 is a graduate seminar that will consider an advanced topic (to be determined) in distributed computing. May be repeated for credit.

CSCI 2820. Medical Bioinformatics. Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required.

CSCI 2890. Comprehensive Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

CSCI 2950C. Topics in Computational Biology. This course will investigate active and emerging research areas in computational biology. Topics include cancer genomics; genome rearrangements and assembly; and protein and regulatory interaction networks. The course will be a mixture of lectures and student presentations of recent conference and journal papers.

CSCI 2950D. Sensor Data Management. Sensor networks combine sensing, computing, actuation, and communication in a single infrastructure that allows us to observe and respond to phenomena in the physical and cyber world. The sensors range from tiny "smart dusts" to dime-sized RFID tags and large-scale weather sensors. This course will cover the state-of-the art in designing and building sensor networks, focusing on issues that revolve around data and resource management. No prerequisites.

CSCI 2950E. Stochastic Optimization. This advanced graduate course/seminar will focus on optimization under uncertainty, or optimization problems where some of the constrains include random (stochastic) components. Most practical optimization problems are stochastic (subject to future market conditions, weather, faults, etc.), and there has been substantial research (both theoretical and experimental) in efficient solution for such problems. We'll read and discuss some of the recent works in this area.

CSCI 2950F. Implementing Web-Based Software Systems. Explores widely-distributed systems that take advantage of resources throughout the Internet. The systems leverage their large size and geographic diversity to provide bandwidth scalability, rapid responses, fault-tolerance, high-availability and diverse data collection. Topics include overlay networks, peer-to-peer systems, content distribution networks, distributed file systems and wide-scale measurement systems.
CSCI 2950H. Advanced Cryptography.

CSCI 2950I. Computational Models of the Neocortex.

This course addresses the problem of modeling the perceptual neocortex using probabilistic graphical models, including Bayesian and Markov networks, and extensions to model time and change such as hidden Markov models and dynamic Bayesian networks. The emphasis is on problems of learning, inference, and attention. Sources include the literature in computational and cognitive neuroscience, machine learning, and other fields that bear on how biological and engineered systems make sense of the world. Prerequisites: basic probability theory, algorithms and statistics.

In this graduate seminar we will learn about models of human cognition and perception, and explore potential implications of the models on how computers and humans can interact effectively when performing scientific analyses. Participants will be responsible for reading assigned materials, taking turns guiding discussions of the readings, and preparing a final paper and presentation. It is recommended that participants have some background in at least one of the areas of study.

CSCI 2950K. Special Topics in Computational Linguistics.

Every year will cover a different topic in computational linguistics, from a statistical point of view, including parsing, machine translation, conference, summarization, etc. Prerequisites: CSCI 1460 or permission of the instructor.

CSCI 2950L. Computer Science, Algorithms and Economics.

Course investigates the interplay of economic theory and computer science. It is suitable for advanced senior undergraduates and for graduate students. We will study topics such as: algorithms for selfish routing; competitive combinatorial auctions; Multicast cost sharing and cooperative games; graphical models for games; and related topics. This course will be organized around the presentation of recent research papers. Prerequisite: CSCI 1570 or equivalent.

CSCI 2950M. Special Topics in Autonomous Robotics.

No description available.

CSCI 2950N. Special Topics in Autonomous Robotics.

Introduces the mathematical and computational foundations of brain-computer interfaces. Statistical learning, Bayesian inference, dimensionality reduction, information theory, and other topics are presented in the context of brain interfaces based on neural implants and EEG recordings. Prerequisites: Basic knowledge of probability, statistics and linear algebra (e.g., CSCI 1550, APMA 1650, APMA 1690, or APMA 2640). Enrollment limited to 20 students.

CSCI 2950P. Special Topics in Machine Learning.

This seminar course explores current research topics in statistical machine learning. Focus varies by year, and may include Bayesian nonparametrics; models for spatial, temporal, or structured data; and variational or Monte Carlo approximations. Course meetings combine lectures with presentation and discussion of classical and contemporary research papers. Students will apply some this material to a project, ideally drawn from their own research interests.

CSCI 2950Q. Topics in Computer Vision.

This course will cover current topics in computer vision by focusing on a single real problem in computer vision. Recent courses have focused on forensic video analysis of an unsolved murder and three-dimensional object recognition for a mobile robot. Readings from the literature are integrated with group projects to solve problems beyond the state of the art. Strong mathematical skills (probability, linear algebra, calculus) and previous exposure to computer vision (e.g. CSCI 1430) are essential.

CSCI 2950R. Special Topics in Advanced Algorithms.

We will study an advanced topic in the design and analysis of algorithms. Prerequisite: CSCI 1570 or the equivalent.

CSCI 2950S. Advanced Practical Combinatorial Algorithms.

We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

CSCI 2950T. Topics in Distributed Databases and Systems.

This course explores data and resource management issues that arise in the design, implementation, and deployment of distributed computing systems covering the state of the art in research and industry. Typical topics include cloud computing and sensor networks. Strongly recommended: CSCI 0320, CSCI 1270, or CSCI 1951A.

CSCI 2950U. Special Topics on Networking and Distributed Systems.

Explores current research topics in networking, distributed and operating systems. Specific topics may include wireless and sensor networking, Internet-scale distributed systems, cloud computing, as well as the core problems, concepts, and techniques underlying these systems. The course has two components: reading and discussion of current and classical research papers, and a research project related to the topic but ideally drawn from students' own research interests. This is a graduate-level course, undergrads can join with the consent of the instructor.

CSCI 2950W. Online Algorithms.

Decisions must often be made before the entire data is available. Online algorithms solve problems in which commitments must be made as the data is arriving. Choosing which items to evict from a cache before knowing future requests, which advertisers to consider for displaying ads alongside the result of a search, or which most representative data to store when computing statistics about a huge stream of information. We will discuss the worst-case model, which hinges against the worst possible future data, and some stochastic and game-theoretic models.

CSCI 2950X. Topics in Programming Languages and Systems.

Examines contemporary research topics in software construction from the perspectives of programming languages, software engineering and computer-aided verification. The primary goals are to understand which theory applies to which problems and to convert that theory into tools. Topics include security, modularity, and new paradigms in software composition. Prerequisite: CSCI 1730 or written permission of the instructor.

CSCI 2950Y. Theorem Proving.

This course explores computer-assisted theorem proving with the Coq Proof Assistant. The course will teach students to formally specify software and model mathematical theories. We will then study techniques for mechanically proving theorems about these Coq. Prerequisites: CSCI 1730 or CSCI 0170 and permission of the instructor.

CSCI 2950Z. Robot Learning and Autonomy.

This seminar course will cover current research topics related to perceiving and acting in the real world. These topics will be pursued through independent reading, class discussion, and project implementations. Papers covered will be drawn from robotics, computer vision, animation, machine learning, and neuroscience. Special emphasis will be given to developing autonomous control from human performance. No prerequisites.

CSCI 2951A. Robots for Education.

This seminar will explore the potential for robotics to engage future generations of scientists and engineers, with a particular focus on broadening participation in computing across society. Academic papers describing existing models, systems, courses, and evaluation for teaching robotics at undergraduate and secondary levels will be covered through students presentations. A group project will be conducted to find viable and accessible “off-the-shelf” technology solutions suited to teaching robotics without requiring a technical background. Instructor permission required.
CSCI 2951B. Data-Driven Vision and Graphics.
Investigates current research topics in image-based graphics and vision. We will examine data sources, features, and algorithms for understanding and manipulating visual data. We will pay special attention to methods that use crowd-sourcing or Internet-derived data. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing and image-based rendering. These topics will be pursued through independent reading, class discussion and presentations, and a semester long research project. Strong mathematical skills and previous imaging (vision or computational photography) courses are essential.

CSCI 2951C. Autonomous Agents and Computational Market Design.
An important area of research in artificial intelligence is how to effectively automate decision making in time-critical, information-rich environments. Electronic markets are a prime example of such environments. In this course students will create their own simulated electronic market as well as autonomous agents that trade in their market simulation. Application domains will include supply chain management, the Dutch flower auctions, and ad auctions, such as those run by Google and Facebook. Enrollment limited to 40 graduate students.

CSCI 2951E. Topics in Computer Systems Security.
This course explores advanced topics and highlights current research in computer security from a systems perspective. Topics include vulnerabilities and defenses for automotive, computing, medical, and industrial control devices, intrusion detection, botnets, secure network protocols, web spam, tracking of web users, JavaScript sandboxing, attacks and defenses for web applications, and security and privacy issues in cloud computing. Research papers and industry reports will be presented and discussed. Also, hands-on experiments and system demonstrations will be performed. CSCI 1660 or equivalent background is essential. Enrollment limited to 12. Instructor permission required.

CSCI 2951F. Learning and Sequential Decision Making.
The course explores automated decision making from a computer-science perspective. It examines efficient algorithms, where they exist, for single agent and multiagent planning as well as approaches to learning near-optimal decisions from experience. Topics will include Markov decision processes, stochastic and repeated games, partially observable Markov decision processes, and reinforcement learning. Of particular interest will be issues of generalization, exploration, and representation. Each student will be expected to present a published research paper and will participate in a group programming project. Prerequisite: a graduate-level computer science course and some exposure to reinforcement learning from a previous computer-science class or seminar.

CSCI 2951K. Topics in Collaborative Robotics.
Practical approaches to designing intelligent systems. Topics include search and optimization, uncertainty, learning, and decision making. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCI 1410, 1420, 1460, 1480, or 1950F; or instructor permission.

CSCI 2951M. Advanced Algorithms Seminar.
Students in this course will read, present, and discuss recent breakthrough papers on the topic of algorithms, and the related areas needed to analyze algorithms. This course is aimed at current and potential future graduate students who want to gain technical depth and perspective on the field of algorithms. Topics will roughly alternate by year, with even years emphasizing fundamental techniques, and odd years emphasizing applications such as machine learning. Suggested prerequisites: CSCI 1570 and mathematical maturity. Instructor permission required. Enrollment will be limited to 24 students, based on an application that will be described on the first day of class. Ideal students will have a mix of the following: 1) motivation to learn how to read papers, 2) technical skills and background, 3) willingness to participate and contribute to discussions.

CSCI 2951N. Advanced Algorithms in Computational Biology.
This is a full-lecture, graduate course on algorithms and biomedical applications. The Foundations lectures are an introduction to the biological and medical genomics application areas. Each Algorithm section is devoted to an algorithmic method presented in rigorous depth, followed by an important open problem in the application area, together with the current most effective algorithmic solutions to the problem. Graduate students and advanced undergraduates in computational and mathematical sciences and engineering are welcome. Biological, life sciences and medical students and faculty are welcome as well and will be able to participate more in the applications areas.

CSCI 2951O. Foundations of Prescriptive Analytics.
We are undoubtedly in the middle of an Analytics Revolution that enabled turning huge amounts data into insights, and insights into predictions about the future. At its final frontiers, Prescriptive Analytics is aimed at identifying the best possible action to take given the constraints and the objective. To that end, this course provides students with a comprehensive overview of the theory and practice of how to apply Prescriptive Analytics through optimization technology. A wide variety of state-of-the-art techniques are studied including: Boolean Satisfiability, Constraint Programming, Linear Programming, Integer Programming, Local Search Meta-Heuristics, and Large-Scale Optimization. Pre Requisites: One of CSCI 0320 or CSCI 0330 and recommended: one of CSCI 0530, CSCI 1570, MATH 0520 or MATH 0540.

CSCI 2951S. Distributed Computing through Combinatorial Topology.
Although computer science itself is based on discrete mathematics, combinatorial topology and its applications may still be unfamiliar to many computer scientists. For this reason, this course provides a self-contained, elementary introduction to the concepts from combinatorial topology needed to analyze distributed computing. Conversely, while the systems and models used here are standard in computer science, they may be unfamiliar to students with a background in pure or applied mathematics. For this reason, this course also provides a self-contained, elementary description of standard notions of distributed computing. CSCI 0220 required, CSCI 1760 recommended.

CSCI 2951T. Data-Driven Computer Vision.
Investigates current research topics in data-driven object detection, scene recognition, and image-based graphics. We will examine data sources, features, and algorithms useful for understanding and manipulating visual data. We will pay special attention to methods that harness large-scale or Internet-derived data. There will be an overview of the current crowdsourcing techniques used to acquire massive image datasets. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing. These topics will be pursued through independent reading, class discussion and presentations, and projects involving current research problems in Computer Vision.

This course investigates the state-of-the-art in software exploitation and defense. Specifically, the course is structured as a seminar where students present research papers to their peers. We will begin with a summary of prevalent software defects, typically found in applications written in memory unsafe languages, and proceed to surveying what we are up against: traditional and modern exploitation techniques, ranging from classical code injection and code reuse up to the newest goodies (JIT-ROP, Blind ROP). For the bulk part, we will focus on the latest advances in protection mechanisms, mitigation techniques, and tools against modern vulnerability classes and exploitation methods.

CSCI 2951W. Creative Artificial Intelligence for Computer Graphics.
How can artificial intelligence help us create visual content? In this seminar course, we will explore how to use tools such as probabilistic graphical models, probabilistic programs, and neural networks to generate content, explore design spaces, and support creativity for 2D and 3D graphics applications. Each week, we will read recent papers from the graphics and AI literatures and discuss their contributions, connections, and limitations. Students will also complete a collaborative, open-ended final project. Throughout, the course will emphasize key academic skills such as critical paper-reading and how to give clear and compelling presentations.
CSCI 2955. The Design and Analysis of Trading Agents.
The Dutch Flower Auctions (DFA) clear over 100,000 auctions per day, each lasting on average between 3 and 5 seconds! This semester, we'll study the mechanism through which the DFA distribute 2/3 of the world's flowers, focusing on both the sellers' and buyers' decision-making processes. More generally, we'll research ways to automate and optimize decision-making in time-critical, information-rich environments, like the DFA. Undergraduate students require instructor permission, and should have already completed CSCI 0190, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180.

CSCI 2956A. Design of Agents for Bidding in Sponsored Search Auctions.
This course investigates the new field of sponsored search auctions. Although students will be exposed to the field from the point of view of both the search engine and the advertiser, the course's focus is on advertiser's bidding algorithms. The students will implement novel bidding agents, and the course will culminate in a competition among the students' agents. Undergraduate students who obtained permission from the instructor or completed CSCI 0910, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180 can register for the course. CSCI 1410 is a corequisite.

CSCI 2956R. Multiplicative-Weights/Packing-Covering Method for Approximating Linear and Semidefinite Programs.
We will study the method called, variously, multiplicative weights and packing-covering. We will in particular investigate the use of this method for finding approximately optimal solutions to linear programs and semidefinite programs. Prerequisite: A graduate-level course on algorithms. Enrollment limited to 10. Instructor permission required.

CSCI 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

CSCI 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

CSCI XLIST. Courses of Interest to Concentrators in Computer Science.

Data Science Initiative

Brown’s Data Science Initiative (DSI) is a cross-disciplinary collaboration between four core departments (Applied Mathematics, Biostatistics, Computer Science, and Mathematics) to catalyze data-enabled science and scholarship across the campus. The collaborations between these departments deepens Brown’s the data science expertise, and creates new opportunities for innovation in both the methods and the applications of Data Science.

Our academic programs will offer a rigorous, innovative, and reflective approach to learning and collaboration for anyone seeking a distinctive professional profile on which to build a career in data-enabled fields. As our initial step, we offer a one-year Masters Program that prepares students from a wide range of disciplinary backgrounds.

For additional information, please visit the initiative’s website: http://dsi.brown.edu/

Data Science Graduate Program
Master of Science in Data Science

The Data Science Initiative at Brown offers a new master's program (ScM) that will prepare students from a wide range of disciplinary backgrounds for distinctive careers in Data Science. Rooted in a research collaboration among four very strong academic departments (Applied Mathematics, Biostatistics, Computer Science, and Mathematics), the master's program will offer a rigorous, distinctive, and attractive education for people building careers in Data Science and/or in Big Data Management. The program's main goal is to provide a fundamental understanding of the methods and algorithms of Data Science. Such an understanding will be achieved through a study of relevant topics in mathematics, statistics and computer science, including machine learning, data mining, security and privacy, visualization, and data management. The program will also provide experience in important, frontline data-science problems in a variety of fields, and introduce students to ethical and societal considerations surrounding data science and its applications.

The program's course structure, including the capstone experience, will ensure that the students meet the goals of acquiring and integrating foundational knowledge for data science, applying this understanding in relation to specific problems, and appreciating the broader ramifications of data-driven approaches to human activity. Moreover, our strong industry partnerships will help you better learn about industry's needs and directions, and will expose you to novel and unique opportunities. In addition, several professors from all across the different department's groups work closely with industry (regional and beyond) and the government, so you will be able to sharpen your skills here on problems that bring research ideas and methods to bear on problems of practical value.

The program will be conducted over one academic year plus one summer, with the option for an additional pre-program summer for students who lack one or more of the basic prerequisites. The regular program includes two semesters of coursework and a one-semester (5-10 week) capstone project focused on data analysis in a particular application area.

There are nine credits unites required to pass the program: four in each of the academic year semesters, and one (the capstone experience) in the summer. The nine credit-units divide as follows:
3 credits in mathematical and statistical foundations,
3 credits in data and computational science,
1 credit in societal implications and opportunities,
1 elective credit to be drawn from a wide range of focused applications or deeper theoretical exploration, and
1 credit capstone experience.

We also offer an option as a 5-th Year Master's Program if you are an undergraduate at Brown. This allows you to substitute maximally 2 credits with courses you have already taken.

1 For their capstone experience, students will work on a project with real data, potentially in any one of the areas covered by the elective course. A faculty member from one of the four departments will oversee the capstone course, although each student may collaborate with an additional faculty member, postdoc, or industry partner on his/her project.

For more information on admission and program requirements, please visit the following website: https://www.brown.edu/academics/gradschool/programs/data-science
Courses
After a fast-paced review of fundamentals the course will focus principally on four topics: random number generators and their applications (including Monte Carlo integration and importance sampling); high-dimensional data analysis (clustering, projections, principle and independent component analysis, multiple hypothesis testing and false discovery); regression, density estimation, and classification (linear, semi-parametric, and non-parametric, bias and variance, bootstrapping, cross validation); graphical models and exponential families (latent variables, dynamic programming, belief propagation, hidden Markov models, Markov chain Monte Carlo, expectation maximization). Assignments will include a mix of analytic problems and computational experiments.

DATA 1030. Introduction to Topics in Data and Computation Science.
Mastering big data requires skills spanning a variety of disciplines: distributed systems over statistics, machine learning, and a deep understanding of a complex ecosystem of tools and platforms. Data Science refers to the intersection of these skills and how to transform data into actionable knowledge. This course provides an overview of techniques and tools involved and how they work together: SQL and NoSQL solutions for massive data management, basic algorithms for data mining and machine learning, information retrieval techniques, and visualization methods.

Prerequisites: A course equivalent to CSCI 0050, CSCI 0150 or CSCI 0170 are strongly recommended.

Development Studies
Chair
Patsy P. Lewis
Development Studies is an interdisciplinary concentration whose main mission is to provide students with the knowledge, critical perspectives and skills they need to engage with the issues of economic and social development, especially as they relate to the Global South. The concentration is grounded in the social sciences – anthropology, sociology, political science, and economics – but it also heavily draws from history, art, and other disciplines in the humanities. The requirements are designed with three goals in mind: first, provide concentrators a solid foundation in the question of development; second, allow concentrators to develop expertise in a specific region that is of interest to them; third, give concentrators access to a wide range of courses in a large number of disciplines of interest to them. Concentrators are encouraged to do their own original field research. During the senior year, concentrators complete a capstone experience tailored to their interests in some aspect of international development. Towards this end, they benefit from extensive faculty and peer support.

Research Methods and Design
DEVL 1500 | Methods in Development Research (junior year) |

Regional Courses
Two courses that focus on the same region of the developing world. Should complement the student's foreign language.

Elective Courses
Three courses chosen from a list of pre-approved electives or by special approval.

Foreign Language
Equivalent of three full years of university study or above.

Senior Capstone
a. Thesis option: DEVL 1980 (fall senior year) and DEVL 1990 (spring senior year), or
b. Capstone seminar option: approved senior seminar in Development Studies, with seminar-length paper requirement.

See the Development Studies website (http://brown.edu/academics/development-studies/) for the list of pre-approved elective courses.

Courses
Interested students must register for ECON 0510.

Interested students must register for SOC 1871D.

DEVL 1020. Comparative Development (SOC 1600).
Interested students must register for SOC 1600.

DEVL 1100. Globalization and Social Conflict (SOC 1620).
Interested students must register for SOC 1620.
DEVL 1120. Economic Development (ECON 1510). Interested students must register for ECON 1510.

DEVL 1130. Explaining China's Rise: Development and Accumulation in Contemporary China (SOC 1870P). Interested students must register for SOC 1870P.

DEVL 1500. Methods in Development Research. An introduction to various techniques of research in Development Studies, with a focus on qualitative and field methods. Open to all Development Studies concentrators.

DEVL 1550. The Political Economy of African Development. This course takes an interdisciplinary approach to introduce contemporary development issues in Africa. Drawing on literatures from political sciences, economics, sociology, it explores the challenges of development in the continent since independence. It investigates the influences of governance, institutions, conflicts and external forces in African development trajectories. This is an applied course that uses theoretical and policy analytical approaches to examine the political and socioeconomic dynamism in contemporary Africa.

DEVL 1600. Tools for Development: From Theory to Practice. Course gives students a platform to define their roles in the field of development, through hands-on skills building, case studies, and conversations with development practitioners and guest lecturers. This course will prepare students to volunteer for small, grassroots development organizations abroad or in the U.S. in a summer experience following the course. Throughout the semester, students will prepare for their summer experiences by working with their host organizations to design their role descriptions, planning their summer travel and living arrangements, gaining appropriate cultural competency, etc. Prerequisite: DEVL 1000 or SOC 1871D (may be taken concurrently). Enrollment limited to 15 Development Studies concentrators. Instructor permission required.

DEVL 1650. Urbanization in China: Megacities, Mass Migration, and Citizenship Struggles. With a focus on the post-1978 reform period, we will examine what features of China's urbanization are in line with historical patterns, as well as the things that make the country's experience unique. Additionally, the course will consider the relationship between development, broadly conceived, and urbanization. While urbanization has played an important role in poverty alleviation and improving livelihoods, Chinese cities are also engines of massive inequality, political discontent, and ecological destruction. Considering possibilities for a more equitable, just and sustainable Chinese city will be a central concern of the course.

DEVL 1700. Beyond Sun, Sea and Sand: Exploring the Contemporary Caribbean. For many people, their image of the Caribbean is the tourist brochure and television advertisement representation of sun, sea and sand. This course challenges that through a broad introduction to the real society, economy and politics of the Caribbean region. Using literature, film and traditional texts, it captures the cultural and linguistic complexity of the region through the exploration of a range of central themes such as ethnicity, color, class, politics, as well as more specific, targeted areas including economic inequality, migration, and tourism. FYS DPLL.

DEVL 1801. Participatory Development. This Development Studies seminar will provide students with the opportunity to think critically about power relations within various contexts of development; more specifically, in relation to the condition of how development projects work in practice. The course will take a multilevel approach to the analysis of developmental interactions. We'll look at the power relations between the global south and the global north. We will examine crucial issues having to do with local communities, gender, the state/citizen paradigm and interaction between NGOs and communities. We will connect PD to other concepts, such as empowerment, civic engagement and inequality. WRIT.

DEVL 1802. The Politics of Food Security (POLS 1822R). Interested students must register for POLS 1822R.

DEVL 1802R. The History and Politics of Development in the Middle East. This course examines from a critical perspective the impact and legacies of development projects in the Middle East. After considering the historical emergence of development as a concept and some general critiques, we will explore its more specific deployment in the context of the Middle East. Readings will address its discursive frameworks as well as the economic, political, environmental, and social dynamics it has shaped through its definition of instrumental categories, objects, and spaces. We will also consider how these dynamics have contributed to the recent uprisings in the region. Priority given to DS seniors. WRIT.

DEVL 1802S. Human Security and Humanitarian Response: Increasing Effectiveness and Accountability. Disasters, natural and anthropogenic, pose significant threats to human security. Effective humanitarian action is important for both short and long-term responses to complex emergencies. The array of factors contributing to the economic and human losses experienced in both natural disasters and complex humanitarian emergencies are vast and complicated, and the strategies employed to mitigate and heal the damage caused by these disturbances must be equal to the task. This course covers diverse topics including the role of NGOs, UN agencies, local governments, peacekeepers and military in humanitarian response; economic impact of humanitarian aid; the evidence base for humanitarian interventions.

DEVL 1802T. Migration and Development in Theory and Practice. The primary theme of this course rests on a query standing at the center of a growing debate: in what ways are migrants linked to development? This course examines several theoretical debates and policies and programs focused on the migration-development nexus. Students examine scholarly interpretations of how migration is linked to development. They also employ a transnational lens to further explore what development means and how it is carried out in an increasingly mobile and connected world. The class examines how grassroots organizations have engaged in community development, and the roles states and non-governmental agencies are playing in on-the-ground interventions. WRIT.

DEVL 1803R. Bringing Small States in: How and Why They Matter. Small states enter the imagination as sites of exoticism. Pristine beaches, flanked by swaying coconut trees are marketed as ideal for honeymooners and others seeking a refuge from stress-filled lives. This course centers small states, in particular, small island states, as a group of countries, with unique and interesting features, meriting academic scrutiny. We explore a wide range of issues introducing students to these diverse and complex states, including historical origins, globalization and effects on development, theoretical approaches to studying small states, issues in governance, migration, climate change, food security, sports and culture, gender and sexuality, among others. WRIT.

DEVL 1803S. The Politics of Health and Disease (POLS 1295). Interested students must register for POLS 1295.

DEVL 1810. Information Technology and Governance. The use of information and technology in governance is a vexed subject. Civil society clamors for release of information about the state (openness) while the State wants more information about its citizens (surveillance). Technology plays a role in amplifying these respective intentions resulting in an unprecedented gathering and release of information, thereby bringing the issue of information, technology and its role in governance to sharp focus. This course provides an intensive introduction to the field of information technology and global development. Enrollment limited to 20. Preference given to DS juniors and Seniors. WRIT.

DEVL 1890. Thesis Writing in Development Studies. An integrative seminar designed for concentrators working on senior theses. Others with comparable backgrounds may enroll with written permission. Begins with a review of theoretical and methodological literature on development studies. Written and oral presentations of thesis research will be the central focus of the latter part of the course. Reserved for Development Studies seniors. WRIT.

DEVL 1990. Senior Thesis Preparation. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Reserved for Development Studies seniors.
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

This course will introduce students to the fundamental political, institutional, and technical issues associated with public finance reform and sub-national governance in the developing world. The course requires no prior experience with fiscal issues or with intergovernmental finance.
The course aims to lay the foundations for a better understanding of how politics and policy shape the way national and sub-national governments provide, finance, manage, and regulate public services.

DEVL 2010. Theory and Research in Development II.
Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

DEVL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

DEVL XLIST. Courses of Interest to Concentrators in Development Studies

Lefschetz Center for Dynamical Systems
The Lefschetz Center for Dynamical Systems (LCDS) was established by Solomon Lefschetz and J. P. LaSalle at Brown University in the fall of 1964 to carry out a program of basic research and advanced study in the theory and applications of differential equations, dynamical systems, stochastic processes and systems theory. Within its areas, LCDS is one of the leading research centers in the world. Areas of application include developmental biology, traffic flow prediction, data assimilation for oceanic fluid flow, nonlinear optics, and pattern formation and dynamics in chemical and physical systems.

Current members of the center serve on the faculties of the Division of Applied Mathematics and the Department of Mathematics. The center attracts distinguished visiting scientists and promising young scientists from the United States and abroad.

Members of LCDS have been supported in their research efforts by the Air Force Office of Scientific Research, the United States Army Research Office, the Office of Naval Research, the Department of Energy, the National Science Foundation and NASA.

The center was named in honor of Solomon Lefschetz (1884-1972), one of the outstanding mathematicians of this century, in August, 1974.

For additional information please visit the center’s website at: http://www.brown.edu/research/projects/dynamical-systems/home.

Early Cultures
The Program in Early Cultures (until recently called the Program in Ancient Studies) was founded in the late 1970s, when faculty in various academic units sought new ways to foster collaboration and promote the study of ancient civilizations among Brown's students. It is a Program of rich collaboration, critical exploration, and truly interdisciplinary scholarship that seeks to bring together all those at Brown (faculty, graduate students, undergraduates, and staff) who are interested in the cultures, religions, and histories of ancient civilizations. Geographically, the "ancient world" represented at Brown comprises early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds as well as the Pre-Columbian Mesoamerican civilizations.

For additional information, please visit the department's website: http://www.brown.edu/Departments/Early_Cultures/

Courses
ERLY 0680. Judaism, Christianity, and the Bible (JUDS 0680).
Interested students must register for JUDS 0680.

ERLY 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).
Interested students must register for CLAS 0990.

ERLY 1000A. Writing History in the Ancient World.
The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history, investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations. Instructor permission required.

ERLY 1000B. Geography, Ethnography, and Perceptions of the World in Antiquity.
Curious about the shape and limits of the earth and the variety of cultures, ancient Greeks and Romans explored and described the world, drew maps, and interpreted the customs of others in fascinating ways. We will discuss relevant texts (Homer, Herodotus, Strabo, Tacitus, etc., in translation) and compare the Graeco-Roman world with that of other ancient civilizations (China, Mesopotamia, Aztecs).

ERLY 1000C. Epic and History in the Ancient and Medieval Worlds.
This seminar will focus on the question of preservation, transformation, and distortion of historical memory in epic poetry from various parts of the ancient (Mesopotamian, Hittite, Greek, and Roman) and medieval (German, French, Hispanic, and Slavic) worlds. Additional issues to be discussed include orality and literacy, cultural memory, and the social function of poetry in changing conditions. Texts in translation.

ERLY 1000D. Highways and Byways in Antiquity.
No description available.

ERLY 1000E. The Gift in Antiquity (REL 1880A).
Interested students must register for RELS 1880A.

ERLY 1120G. The Idea of Self (CLAS 1120G).
Interested students must register for CLAS 1120G.

From the blood-soaked amphitheatres of the Roman Empire to tattooing and other forms of body modification, this course will explore how people, ancient and modern, view animals and what looking at animals reveals about what it means to be human. Examining evidence from a variety of disciplines (archaeology, religious studies, history, philosophy, art, and literature), we will investigate the problematic boundary between “man” and “animal” and challenge the presumed superiority of the “human”.

WRIT

In the past, as in the present, humans and animals were city dwellers, living side by side in urban environments. This course will focus on five ancient cities – in India, China, Egypt, Italy and Mexico – to examine the places where human and animal lives intersected in these early metropolises. We will explore how these complex relationships had a pervasive influence on nearly every aspect of urban life: from religious practices, to city planning, to entertainment, to health.

WRIT

ERLY 1410. Ancient Egyptian Literature (EGYT 1410).
Interested students must register for EGYT 1410.

ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420).
Interested students must register for EGYT 1420.

ERLY 1750K. Madwomen and Lovers (CLAS 1750K).
Interested students must register for CLAS 1750K.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Required of seniors in the honors program. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ERLY 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).
Interested students must register for GREK 2110F.

Earth, Environmental and Planetary Sciences

Chair
Greg Hirth

Students in Earth, Environmental, and Planetary Sciences develop a comprehensive grasp of principles as well as an ability to think critically and creatively. Formal instruction places an emphasis on fundamental principles, processes, and recent developments, using lecture, seminar, laboratory, colloquium, and field trip formats. Undergraduates as well as graduate students have opportunities to carry out research in current fields of interest.

The principal research fields of the department are geochemistry, mineral physics, igneous petrology; geophysics, structural geology, tectonophysics; environmental science, hydrology; paleoceanography, paleoclimatology, sedimentology; and planetary geosciences. Emphasis in these different areas varies, but includes experimental, theoretical, and observational approaches as well as applications to field problems. Field studies of specific problems are encouraged rather than field mapping for its own sake. Interdisciplinary study with other departments and divisions is encouraged.

For additional information, please visit the department’s website: http://www.brown.edu/academics/earth-environmental-planetary-sciences/

Geological Sciences Concentration

Requirements

Geological science involves the study of the Earth (and other planetary bodies), including their compositions and histories and the physical chemical and biological processes that shape them. The geosciences are highly interdisciplinary, thus students must take some supporting mathematics and science courses. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. Students may choose an AB (total of 13 courses) or an ScB (19 total courses, including one semester of research). There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as deformation and properties of geological materials, deciphering the geologic history of some local rocks, or analysis of planetary images.

Standard program for the A.B. degree

This program provides a broad introduction to the geological sciences. Recommended for students seeking a liberal education and a general understanding of Earth processes and Earth history. Especially attractive for double concentrations, such as geology and economics as a career path to law or business, or geology and English as a career path to journalism or technical writing.

Oceanography, and global change. Students for careers in environmental science, geology, ecology, global environmental change and Earth history. The program prepares Earth processes, including the evolution of climate and the environment, for students seeking a liberal education and a general understanding of processes that shape the Earth and our environment. It is recommended for students interested in graduate study and careers in the Earth, environmental, or biological sciences. It is relevant for students interested in environmental science, paleoclimate, Earth systems science, biogeochemistry, oceanography, or paleobiology.

**Standard program for the A.B. degree**

This program provides a broad introduction to the geologic and biologic processes that shape the Earth and our environment. It is recommended for students seeking a liberal education and a general understanding of Earth processes, including the evolution of climate and the environment, global environmental change and Earth history. **Geology-Biology Concentration Requirements**

Geology-Biology involves study of the interactions of the Earth and its hydrosphere and atmosphere with the great diversity of life forms, and how they have evolved and influenced one another over the entire history of the Earth. Many courses emphasize climate and biogeochemistry; this concentration is a good one for students interested in quantitative approaches to environmental science. Students take a basic suite of geoscience courses and at least 4 bio courses of their choosing, plus some supporting math and science courses; the AB degree requires a total of 14 courses and the ScB degree requires a total of 19, including one semester of research. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as determining the history of climate change during the recent ice age, investigating the causes of major extinctions, and using paleoenvironmental records to determine the vulnerability of different regions of the globe to droughts and other processes that strongly affect society.

**Standard program for the Sc.B. degree**

This program is recommended for students interested in graduate study and careers in the Earth, environmental, or Biological Sciences. It is relevant for students interested in environmental science, paleoclimate, Earth systems science, biogeochemistry, oceanography, or paleobiology.

**Five basic supporting science courses**

Three geological sciences courses from the following: 3

- GEOL 0580 Foundations of Physical Hydrology
- GEOL 1110 Estuarine Oceanography
- GEOL 1120 Paleocenography
- GEOL 1130 Ocean Biogeochemical Cycles
- GEOL 1150 Limnology: The Study of Lakes
- GEOL 1330 Global Environmental Remote Sensing
- GEOL 1350 Weather and Climate
- GEOL 1370 Environmental Geochemistry
- GEOL 1380 Environmental Stable Isotopes
- GEOL 1510 Introduction to Atmospheric Dynamics

Three additional courses from upper level geological sciences, mathematics, or supporting sciences with approval from the concentration advisor 3

- GEOL 1970 Individual Study of Geologic Problems (Senior Research Thesis) 1

Total Credits 19

**Geology-Chemistry Concentration Requirements**

Geochemistry involves two different emphases. Low-temperature geochemistry involves study of chemical and biochemical processes on and near Earth's surface, including land, oceans and freshwater bodies, and how the geochemical record reflects climate conditions. High-temperature geochemistry includes study of formation and evolution of the Earth and other planets, magma formation and properties, volcanic activity, and metamorphism. The AB degree requires a total of 14 courses, including 5 geoscience courses and 4 chemistry courses, and a few supporting math and physics courses. The ScB degree requires a total of 20 courses, including 7 geoscience courses and 4 chemistry courses, either with an organic or an inorganic focus, plus some supporting math and physics courses and one research course. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work for pay during the academic year or in the summer, in areas such as experimental studies of magma formation, and analyzing lunar rock samples for water content.

**Standard program for the A.B. degree**

Recommended for students seeking a liberal education and interested in applying physical and chemical principles toward an understanding of Earth history, Earth processes, and environmental and resource issues.

**Basic supporting science courses**

Select two courses in mathematics at the level of: 2

- MATH 0090 Introductory Calculus, Part I (or more advanced)
- MATH 0100 Introductory Calculus, Part II (or more advanced)
- CHEM 0330 Equilibrium, Rate, and Structure
- PHYS 0050 Foundations of Mechanics (or a more advanced course, or advanced placement.)
- or ENGN 0030 Introduction to Engineering

**Concentration courses**

- GEOL 0220 Physical Processes in Geology
- GEOL 0230 Geochemistry: Earth and Planetary Materials and Processes
- GEOL 0240 Earth: Evolution of a Habitable Planet
- GEOL 1410 Mineralogy
- GEOL 1420 Petrology

Three additional chemistry courses 3

Select one of the following Series: 2

- GEOL 1410 Mineralogy
- & GEOL 1420 Petrology

**Standard program for the Sc.B. degree**

This program is recommended for students interested in graduate study and careers in geochemistry and related fields.

**Basic Supporting Science Courses:**

Select two courses in mathematics at the level of: 2

- MATH 0090 Introductory Calculus, Part I (or more advanced)
- MATH 0100 Introductory Calculus, Part II (or more advanced)
- CHEM 0330 Equilibrium, Rate, and Structure

Select one of the following series: 2

- PHYS 0050 & PHYS 0060 Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics
- ENGN 0030 & ENGN 0040 Introduction to Engineering and Dynamics and Vibrations
- or a more advanced course

**Concentration Courses:**

Either the geochemistry/inorganic option or the geochemistry/organic option: 10

**Geochemistry/Inorganic Option:**

- GEOL 0220 Physical Processes in Geology
- GEOL 0230 Geochemistry: Earth and Planetary Materials and Processes
- GEOL 0240 Earth: Evolution of a Habitable Planet
- GEOL 1130 Ocean Biogeochemical Cycles
- or GEOL 1370 Environmental Geochemistry
- GEOL 1410 Mineralogy
- GEOL 1420 Petrology

Plus one from:

- GEOL 1240 Stratigraphy and Sedimentation
- GEOL 1330 Global Environmental Remote Sensing
- GEOL 1450 Structural Geology

Three from:

- CHEM 0350 Organic Chemistry
- CHEM 0500 Inorganic Chemistry
- CHEM 1060 Advanced Inorganic Chemistry
- CHEM 1140 Physical Chemistry: Quantum Chemistry
- CHEM 1150 Physical Chemistry: Thermodynamics and Statistical Mechanics

**Geochemistry/Organic Option:**

- GEOL 0220 Physical Processes in Geology
- GEOL 0230 Geochemistry: Earth and Planetary Materials and Processes
- GEOL 0240 Earth: Evolution of a Habitable Planet
- GEOL 1130 Ocean Biogeochemical Cycles
- GEOL 1370 Environmental Geochemistry
- GEOL 1410 Mineralogy

Plus one from:

- GEOL 1240 Stratigraphy and Sedimentation
- GEOL 1330 Global Environmental Remote Sensing
- GEOL 1380 Environmental Stable Isotopes

Three Chemistry courses:

- CHEM 0350 Organic Chemistry
Geology-Physics/Mathematics

Concentration Requirements

Geophysics involves the application of physics and mathematics to the study of processes that operate on and within the Earth and other planets, over short and long timescales. The AB degree requires a total of 14 courses, including 6 geoscience courses, 3 physics or engineering courses, and 3 math and applied math courses. The ScB degree requires a total of 20 courses, including 8 geoscience courses, 4 physics or engineering courses, and 3 math and applied courses; students can choose courses from both solid Earth geophysics and climate science themes. Geoscience courses emphasize an analytical and process-oriented approach, with hands-on experiences in labs and on field trips. Active and collaborative learning is encouraged, as is practice in written and oral communication. There are many opportunities for students to engage in research (typically in paid positions) during the academic year or in the summer, in areas such as analysis of seismic waves in subduction zones, theoretical modeling of convection in the Earth’s mantle, modeling the effects of the warming climate in the oceans and atmosphere, and remote sensing of how climate change affects vegetation.

Standard program for the A.B. degree

Recommended for students seeking a liberal education and interested in applying physical and mathematical principles toward an understanding of the processes affecting planets, Earth, and the environment and how they are modeled. Some course requirements may be flexible based on consultation with concentration advisor.

PHYS 0470 Electricity and Magnetism
PHYS 0500 Advanced Classical Mechanics
PHYS 1600 Computational Physics
ENGN 0510 Electricity and Magnetism
ENGN 0810 Fluid Mechanics
ENGN 1370 Advanced Engineering Mechanics
GEOG 1820 Geophysical Fluid Dynamics
Three courses in mathematics including
APMA 0330 Methods of Applied Mathematics I, II
or APMA 0340 Methods of Applied Mathematics I, II
Two additional courses from upper-level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor.³
CHEM 0330 Equilibrium, Rate, and Structure
GEOL 1970 Individual Study of Geologic Problems

Total Credits 20

¹ One course cannot be used to satisfy two requirements
² ENGN 0810 or GEOG 1820 are recommended for those completing the Climate Science theme.
³ In addition to courses listed elsewhere, in the Geology-Physics/Math concentrations, these courses are of particular relevance: GEOG 0810, GEOG 1320, GEOG 1710, GEOG 1960A.

Geological Sciences Graduate Program
The department of Geological Sciences offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.
For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/geological-sciences

Courses
GEOL 0010. Face of the Earth.
Study of Earth's surface (e.g., mountains, rivers, shorelines) and processes which have created and modify it (e.g., glaciation, floods, volcanism, plate tectonics, earthquakes). The goals are to increase appreciation and enjoyment of our natural surroundings and provide a better understanding of environmental problems, natural resources, land use, and geologic hazards. Four labs, plus a field trip. For nonscience concentrators (science concentrators should take GEOL 0220). Students MUST register for both components of this course (the lecture and one of the labs) during the SAME registration session. Enrollment limited to 100.

Do you know how the Earth and its processes affect you? If you want to learn how geology influences the lives of everyone on Earth, this is the course for you. We will use case studies, like the Tohoku earthquake that displaced 200,000 people, to guide our exploration. Along the way, you will learn to critically evaluate how science is presented in the media. Ten years from now you might not remember how to tell gneiss from schist, but because of this class you should be able to tell your neighbor how geology affects the lives of everyone in the world.

GEOL 0030. Climate and Climate Change.
This course is designed to provide students with an understanding of the climate system on Earth, changes in Earth's climate over time, and interactions between climate change and human society. Topics will include: global energy balance; the structure, composition and role of the atmosphere and oceans; the influence of the global carbon cycle on climate; the social, economic and political drivers of human perturbations to the carbon cycle; and societal vulnerability, resilience and adaptive capacity in the face of environmental changes. No prerequisites; course open to all levels. WRIT

GEOL 0050. Mars, Moon, and the Earth.
Space exploration has revealed an astonishing array of surface features on the planets and their satellites. Why are atmospheres on the planets different from Earth's atmosphere? Do other planets represent our past or future environment? Is there life on other planets? The planets and their histories are compared to gain insight and a new perspective on planet Earth.

GEOL 0070. Introduction to Oceanography.
Examines the ocean's role in Earth's global environment, emphasizing the dynamical interaction of the ocean with the atmosphere, biosphere, cryosphere, and lithosphere. Focus on physical/chemical/biological systems' interconnections needed to understand natural and anthropogenic variability on various time and space scales, from El Niño to global warming. Three lectures, written exercises on oceanographic problems; two field trips to study estuarine and coastal processes.

GEOL 0160B. Global Change: Ecology and Climate.
Examines in ways in which global change will affect ecosystems, considering how temperature, rainfall, and land use can modify the distribution of organisms in the future, and reduce biodiversity. Examine how biotic feedbacks to global change can modify climate change through their effects on the carbon cycle, absorption of sunlight at the land surface, and retention of water in soils. Enrollment limited to 20 first year students. FYS

GEOL 0160C. Global Environmental Change.
Examination of evidence that supports or refutes various perspectives on global environmental change, with a foundation in the principles that govern the fundamental underlying processes. Example topics include climate change (warming, cooling, neutral), population growth (how many, how fast), and loss of natural resources (diversity). Topics explored through selected readings from the natural and social sciences. Enrollment limited to 20 first year students. FYS
GEOL 0160D. Living Within the Landscape.
Physical processes that shape the Earth’s surface provide an inescapable context for human activity. We will examine the physical principles that govern erosion and sedimentation, slope stability, river and coastal flooding, and groundwater flow, and analyze how these processes affect land-use philosophies and decision-making. Enrollment limited to 20 first year students. FYS

GEOL 0160E. Volcanoes, Windows into the Deep Earth.
Examines the physical and chemical principles controlling the generation of volcanoes and their different styles of eruption. Investigates where and why volcanoes occur, and what volcanic lavas can tell us about the composition and evolution of the Earth and other planets. Evaluates volcanic hazards and their environmental impacts and the economic benefits and cultural aspects of volcanism. Two-day field trip. Enrollment limited to 20 first year students. FYS

The shapes of plants and animals, of mountains and shorelines arise because nature dissipates energy as rapidly as possible. These morphological patterns allow description of the “energy” landscape that produced them. Societies and economies show temporal and spatial patterns as well; does the “flow rate” of ideas and of money cause these patterns? We will explore just how “entropy rules.” CAP course. Enrollment limited to 20 first year students. FYS WRIT

GEOL 0160G. Energy Resources.
Most of our energy comes directly from the Earth - predominantly as fossil fuels, but also from geothermal, wind, and hydro sources. Developing technologies for alternative energy such as solar, nuclear, biomass and fuel cells also rely on Earth resources. The potential for these energy sources will be discussed. The science behind their utilization and environmental impact (e.g. carbon sequestration and nuclear waste disposal) will be introduced and the trade-offs in making decisions for the future will be explored. CAP course. Enrollment limited to 20 first year students. FYS WRIT

GEOL 0160H. Chicken Little or Armageddon? Past and Future Cosmic Threats.
Explore the probability of the next impact on the Earth and assess the possible consequences through historic times (incidents), folklore/legends, examples in recent geological time (last 10 million years), and the catastrophic consequences 65 million years ago. Strategies for searching and possible mitigation of the next “big one” will be considered. This seminar will explore the realities of various predictions, consider public policy, investigate strategies for prevention, and assess the role of the press in shaping perceptions. Enrollment limited to 20 first year students. FYS

GEOL 0160I. Diamonds.
Examines both the science and human history of diamonds, and shows how they have interacted over the years. Investigates how and where diamonds are formed in nature and what they tell us about the Earth. At the same time, explores the role diamonds have played in our history and culture. Enrollment limited to 12 first year students. FYS WRIT

GEOL 0160J. The Natural History of Great Writers: From Goethe to Steinbeck.
Many great and influential writers have also been natural historians. This course examines selections from the writing of such authors as the romantic and naturalist Johann Wolfgang von Goethe, the rationalist Benedict de Spinoza, the intuitive thermodynamicist William Blake, the naturalist novelist John Steinbeck, the lepidopterist novelist Vladimir Nabokov, the amateur paleontologist Arthur Conan Doyle, the proto-ecologist Henry David Thoreau, and the philosopher and sociologist Herbert Spencer. We will examine in a modern scientific context how facts and theories of natural history informed their writing and influenced their worldviews. Specific topics in this seminar will include: man’s place in nature and the importance of the discovery of this deep time perspective, Darwinian evolution and its impact on sociology, and the emerging science of ecology in 19th century American literature. Enrollment limited to 20 first year students. FYS

GEOL 0160M. Natural Disasters.
This First Year Seminar will explore natural disasters: the physical processes that cause them, and their effects on human life. Types of natural disasters covered include earthquakes, volcanoes, tsunamis, hurricanes, tornadoes, and floods. The focus of the course will be case studies of specific disasters, allowing us to discuss both the science of natural hazards and the vulnerability of human populations to those hazards. It will provide a broad overview of the Earth Sciences, including geology and geophysics, meteorology, oceanography, and climatology. FYS

GEOL 0160N. Monsters of the Abyss: Oceanography and Sea Tales.
We will read from the logbooks of Cook, Darwin, Wallace, and Nansen. Their discoveries and expeditions inspired and were inspired by fiction that we will also read, including Moby Dick and 20,000 Leagues Under the Sea. The daring successes and canibalistic dooms of the Essex, Beagle, Terror, Challenger, and Fram inspired 19th century writers to imagine what lay far across and deep beneath the oceans. These retellings—fictional, narrative, and scientific—helped formulate and fund further research. Who risks their life for a bird, a map, a widow, or an eclipse? How would these scientists and their ideas do today? Enrollment limited to 20 first year students. FYS WRIT

GEOL 0200. Physical Processes in Geology.
Introduction to the physical and chemical processes that shape the Earth’s surface, govern the structure of its interior, cause natural hazards and affect the human environment. Topics include interior processes (plate tectonics, mountain building, volcanism, earthquakes, and flow of solid rocks) and environmental processes (climate, atmospheric and oceanic circulation, flow of rivers, glaciers, and groundwater). Four labs and two field trips arranged. Intended for science concentrators or those wishing in-depth treatment. CAP course. Enrollment limited to 100. After pre-registration, instructor permission is required to register or get on wait-list. Please see or email instructor (Jan_Tullis@brown.edu).

Introduction to the chemical and mineralogical nature of the Earth, Moon, and meteorites, and the role of chemical processes in their evolution. Topics include: composition of rock-forming minerals; origin of crustal and mantle rocks; stable and radiogenic isotopes; models of nucleosynthesis, planet formation and differentiation. Weekly laboratory and two field trips. Intended for science concentrators. Prerequisites: basic chemistry and GEOL 0210 or 0050 or 0220, or instructor permission. Labs will meet Tuesdays from 7:00 pm to 9:00 pm.

Introduces Earth’s surface environment evolution - climate, chemistry, and physical makeup. Uses Earth’s carbon cycle to understand solar, tectonic, and biological cycles’ interactions. Examines the origin of the sedimentary record, dating of the geological record, chemistry and life on early Earth, and the nature of feedbacks that maintain the “habitable” range on Earth. Two field trips; five laboratories arranged. Prerequisite: GEOL 0220 or 0230, or instructor permission. WRIT

GEOL 0250. Computational Approaches to Modelling and Quantitative Analysis in Natural Sciences: An Introduction.
Application of numerical analysis to mathematical modelling in the natural sciences including topics such as ground water and glacier flow, earthquakes, climate models, phase equilibrium, and population dynamics. Numerical methods will include the solution of linear algebraic systems of equations, numerical integration, solution of differential equations, time series analysis, statistical data analysis tools. Development of computer programming skills in the Matlab programming environment. Suggested prerequisites: MATH 0090, 0100; PHYS 0030, 0040, or 0050, 0060.
GEOl 0310. Fossil Record.
Integrated view of the history of life; biogeochemical cycles, biodiversity, evolution by natural selection, ecology, and physiology along a multiplicity of scales from the microbial to the planetary, as recorded in the fossil record. Attention is given to how biotic systems, in contrast to just physical systems, have changed through time maintaining the chemical and thermodynamic non-equilibrium state of the Earth's surface. Two lectures per week; several labs including dissections for paleobiological comparisons and one field trip to fossil localities and museum collections in Connecticut and Massachusetts. Prerequisites: GEOl 0220 or 0230 or 0240, BIOL 0200, or instructor permission.

Intended for undergraduates concentrating in geological and physical sciences or engineering, especially those interested in the quantitative study of Earth. Problem sets will cover common approaches to quantifying the dynamics and chemistry of solids and fluids in nature. Mathematical topics to be introduced include linear algebra, vectors and tensors, differential equations, dynamical systems, eigenvalues and eigenvectors, empirical orthogonal functions, fractals, chaos, and statistics. Applications include waves in the oceans, atmosphere, and solid earth, convective and conductive heat flow, reaction rates, gravitational potential energy, Newton’s laws on a rotating planet, measuring coastlines and ranges, and dating errors in stratigraphy.

GEOl 0580. Foundations of Physical Hydrology.
Qualitative introduction to the dynamics of watersheds and groundwater flow from an intuitive perspective. Lays the foundations for understanding the physical mechanisms by which water is transported throughout a hydrologic system. Provides background for future studies, but is primarily designed to enable informed citizens to thoughtfully critique water management practices and public policy. Pre-college math and physics background is expected.

GEOl 0810. Planetary Geology.
This introductory level course will examine the evolution of our Solar System and the geology of planetary bodies, including Mercury, Venus, the Moon, Mars, asteroids, and the moons of Jupiter and Saturn. We will discuss the origin of the Solar System from a geological perspective and explore how scientists combine observations from extraterrestrial samples such as meteorites with data returned by satellites and rovers to develop and test hypotheses related to planetary evolution. Emphasis will be on comparing geologic processes on these bodies to well-understood processes on Earth, results from past, current, and upcoming planetary missions, and the future of human and robotic exploration of space.

GEOL 1100. Estuarine Oceanography.
Examines physical, chemical, and biological characteristics of local estuaries using field measurements, analysis of field data, and interpretation of processes; field investigation results will be prepared as a cooperative class report. Topics include: tidal and circulation processes, salinity and freshwater fluxes, watershed pollutants, estuary flushing rates, and estuary ecosystems. Primarily for students with experience in the sciences. MATH 0090, 0100, or equivalent, recommended. Enrollment limited to 20. WRIT

 Labs will be held on Fridays from 1-5pm, with fieldwork through mid-October.

GEOL 1120. Paleoceanography.
An examination of the Cenozoic history of the world ocean with attention to the processes which have acted to change its circulation, climate, geometry, and biology. Develops a strategy to use marine sediments and microfossils to identify and understand past variations in the oceans. Class projects analyze and interpret various types of paleoceanographic data. Laboratory arranged. Offered alternate years.

GEOL 1130. Ocean Biogeochemical Cycles.
A quantitative treatment of the cycling of biologically important elements in the world ocean. Special attention paid to the carbon system in the ocean and the role that organisms, in conjunction with ocean circulation, play in regulating the carbon dioxide content of the atmosphere through exchange with the surface ocean. For science concentrators. Offered alternate years. Prerequisite: CHEM 0330 or equivalent, or instructor permission. WRIT

GEOL 1150. Limnology: The Study of Lakes.
This course will provide an interdisciplinary overview of the physics, chemistry, biology, and geology of lakes. Areas of emphasis will include the origin of lake basins, water circulation patterns, heat and water budgets, biogeochemical processes, lake ecosystems, and the stratigraphic record of lakes. We will also discuss human and climatic impacts on lakes. Prerequisites: GEOl 0220 and 0240, or instructor permission. Enrollment limited to 20. WRIT

GEOL 1240. Stratigraphy and Sedimentation.
Introduction to depositional environments and processes responsible for formation of sedimentary rocks. Major sedimentary environments in the Recent are discussed, general models are proposed, and stratigraphic sequences in older sediments are examined in the light of these models. The Phanerozoic stratigraphic record is examined from the perspective of Earth system history. Laboratory arranged. Prerequisites: GEOl 0220 or 0240, or instructor permission. GEOl 0310, 1410 are also recommended. WRIT

The goal of this class is to understand the physical principles and processes of the global water cycle. Topics include the climatic importance of water, circulation of atmospheric water vapor, formation of rain and snow, availability of soil water, plant-water relations, mass balance of glaciers, and ongoing and expected changes in the water cycle. Additional goals: become familiar with the current research literature, practice clear and concise science writing, and to use simple programming in Python to plot and analyze actual data sets.

Students are expected to have taken at least one geology-related course. Programming experience recommended, but not necessary.

GEOL 1320. Introduction to Geographic Information Systems for Environmental Applications.
Introduction to the concepts of geospatial analysis and digital mapping. The principles of spatial data structures, coordinate systems, database development and design, and techniques of spatial analysis are learned. This is an applied course, primarily using ESRI-based geographic information system software. Focal point of class is the completion of student-selected research project employing GIS methods. Enrollment limited to 10 in each section. Permission by an application provided by the instructor (to be requested through email). S/NC.

Introduction to physical principles of remote sensing across electromagnetic spectrum and application to the study of Earth's systems (oceans, atmosphere, and land). Topics: interaction of light with materials, imaging principles and interpretation, methods of data analysis. Laboratory work in digital image analysis, classification, and multi-temporal studies. One field trip to Block Island. Recommended preparation courses: MATH 0090, 0100; PHYS 0060; and background courses in natural sciences.

GEOL 1350. Weather and Climate.
Weather phenomena occur on short time scales, and form the basis for understanding climate, the study of changes over longer time scales. This course aims to provide an understanding of the processes that drive weather patterns, the general circulation of the atmosphere, and climate on Earth. Topics include: structure and composition of the atmosphere; sources of energy driving atmospheric processes; weather forecasting; the hydrological cycle; the forces that create severe weather; the influence of humans on the atmosphere; and factors that influence climate, climate variability and climate change. MATH 0090, 0100; PHYS 0050, or equivalent recommended. Enrollment limited to 30. WRIT
GEOL 1370. Environmental Geochemistry.
The course will examine the biogeochemical cycling, fate and transport of chemicals in the atmospheric and aquatic environments. Topics such as chemical weathering, natural water pollution and remediation, acid deposition, global warming and air pollution will be examined through natural ecosystem examples from rivers, lakes, estuaries, and ocean. Field trips and laboratory arranged. Prerequisites: CHEM 0100 or 0330, or instructor permission.

GEOL 1380. Environmental Stable Isotopes.
Introduction to the concepts, analytical methods, theory and environmental applications of stable H, O, C, N and S isotopes. Emphasis will be placed on theory and applications of light isotopes in paleoclimate studies, environmental hydrogeology and biogeochemistry. Prerequisites: CHEM 0100, GEOL 0220 or 0230 recommended, or instructor permission.

This course is designed to introduce students a variety of physical and chemical processes that shape and sculpt the surfaces of solid planetary bodies (asteroid, comets, moons, & terrestrial planets). We will learn how the ways mountains can form and how their topography is supported (is Venus’ 11 km high Maxwell Montes the result of a rising mantle plume?, among other questions). This course will cover the processes of faulting, tectonics, volcanism, impact cratering, landslides, and weathering from wind, and water. These processes will be explored from a physical quantitative perspective. Recommended background: One or more GEOL intro courses (e.g. GEOL 0050, GEOL 0081, GEOL 0220).

GEOL 1410. Mineralogy.
Introduction to mineralogical processes on Earth’s surface and its interior. Topics include crystallography, crystal chemistry, nucleation, crystal growth, biomineralization, environmental mineralogy, and mantle mineralogy. Laboratory study devoted to optical identification of rock-forming minerals. Prerequisites: GEOL 0230, CHEM 0100 or 0330, or equivalent.

GEOL 1420. Petrology.
Introduction to the origin of igneous and metamorphic rocks. Emphasis on principles and understanding rather than facts and memorization. Principles are used to extract information concealed in the rocks about their formation, processes, sources and evolution with time. Laboratory work focuses on rock hand samples and microscopic textures. Field trips, laboratory arranged. Prerequisites: GEOL 1410, or instructor permission.

GEOL 1430. Principles of Planetary Climate.
This course provides the physical building blocks for understanding planetary climate. Topics include thermodynamics applied to planetary atmosphere, basic radiative transfer, energy balance in the atmosphere, and climate variability. In-class exercises and homework problems are designed to strengthen the understanding of basic concepts and to improve problem-solving skills.

GEOL 1450. Structural Geology.
Introduction to the geometry, kinematics and mechanics of rocks deformed by brittle fracture or faulting and ductile solid state flow, on scales from microscopic to mountain ranges. The emphasis is on using concepts to interpret the formation, strain history and rheology of deformed rocks in terms of the operative grain-scale processes, material properties and environmental conditions. Weekly 2 hour lab involving hands-on experience closely related to class topics. Two field trips. Prerequisites: GEOL 0220 or instructor permission. WRIT

GEOL 1510. Introduction to Atmospheric Dynamics.
The objective of GEOL1510 is to understand the fundamental physical principles that govern the motion of the atmosphere. Students will explore the dynamics of the atmosphere and the mathematical laws governing weather and climate. Topics include the fundamental equations of motion in rotating fluids, hydrostatic, geostrophic and thermal wind balance, and vorticity, as applied to phenomena, including sea breezes, planetary waves, midlatitude cyclones, fronts, and the global general circulation. The emphasis will be on physical interpretation of the equations but facility with vector calculus is critical. Enrollment limited to 30.

GEOL 1520. Ocean Circulation and Climate.
Examines physical characteristics, processes, and dynamics of the global ocean to understand circulation patterns and how they relate to ocean biology, chemistry, climate change. Assignments address ocean’s role in the climate system; ocean observations and models; the origin, distribution, and dynamics of large-scale ocean circulation and water masses; energy and freshwater budgets; and variability of the coupled system on seasonal to centennial timescales e.g. El Niño. Intended for geological and physical sciences undergraduates and graduate students with qualitative skills and an interest in oceans, climate, paleoclimate. Pre-requisites: GEOL0350 or PHYS0720 or APMA 0340. Offered alternate years, previously offered as GEOL1100. WRIT

GEOL 1560. Global Tectonics.
Plate tectonic theory and the evolution of continents and the seafloor. Emphasis on the structure and tectonics of western U.S. considering geological, geophysical, and geochemical constraints as well as direct geodetic observations of plate motions from GPS measurements. Prerequisite: GEOL 0220 and 0230. Three or more of GEOL 0220, 0230, 1240, 1410, 1420, 1450 and 1610 are recommended.

GEOL 1580. Quantitative Elements of Physical Hydrology.
Physical hydrology with emphasis on fundamental physical principles and mathematical tools. Topics include precipitation, surface runoff, groundwater flow, water quality and contaminant transport. Prerequisites: APMA 0340; and ENGN 0510 or PHYS 0470; ENGN 0810 is recommended; or instructor permission.

A quantitative overview of selected topics at the advanced undergraduate and beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0470, or ENGN 0510.

GEOL 1590A. Quantitative Modeling of Hydrologic Processes.
A quantitative overview of selected topics at the advanced undergraduate, beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0070, or ENGN 0510.

GEOL 1600. Environmental and Engineering Geophysics.
A hands-on introduction to non-invasive geophysical methods applied to subsurface investigations of soil and bedrock conditions, groundwater, geotechnical engineering, forensics, archaeology and other environmental applications. Students will use ground penetrating radar, seismic, gravity resistivity, electromagnetic and magnetic methods in the field one afternoon a week to investigate relevant environmental and geotechnical problems. A background in geology is not expected. Prerequisites: APMA 0340 and PHYS 0470, or ENGN 0510, or instructor permission.

GEOL 1610. Solid Earth Geophysics.
A survey of basic geophysical techniques for determining the structure and dynamics of Earth’s interior. Topics include: global structure from seismic waves; gravity, magnetic field, and shape of the Earth; thermal processes within the Earth; structure of continental and oceanic lithosphere. Recommended courses: GEOL 0220, PHYS 0470, APMA 0330. No prerequisites.

GEOL 1615. The Environmental Policy Process.
The diminishing quantity and quality of the resources of the Earth carries profound implications for the fulfillment of human rights and aspirations. But even as we understand better the intrinsic interdependencies between humans and the environment, policy gridlock persists. Indeed, the findings of fundamental environmental science are regularly contested on political grounds. The purpose of this course is to learn how to apply knowledge to map the relevant policy context in environmental issues, and to develop the tools and approaches to address any problem of decision in the environmental arena more creatively, effectively, and responsibly. WRIT
GEOL 1620. Continuum Physics of the Solid Earth.
Physics of the Earth with emphasis on fundamental physical principles and mathematical tools. Topics include application of: conductive and convective heat transfer to cooling of the Earth; potential theory to interpretation of gravity anomalies; solid mechanics to deformation of Earth's lithosphere; fluid mechanics to flow in the Earth's interior and in porous media. Recommended courses: GEOL 0220; APMA 0340; PHYS 0470 or ENGN 0510.

GEOL 1650. Earthquake Seismology.
Topics include: location of earthquakes in space and time; measures of size and intensity of shaking; body waves, surface waves, and free oscillations; structure of the interior of the Earth from wave propagation; earthquake faulting and relationship to tectonic processes. Recommended course: GEOL 0161. Offered in alternate years.

GEOL 1660. Instrumental Analysis with Environmental Applications.
This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid chromatography, and electrochemical methods. Prerequisite: CHEM 0330 or GEOL 1370. Enrollment limited to 20. Instructor permission required.

Geologic applications of remotely sensed information derived from interaction of electromagnetic radiation (X-ray, gamma-ray, visible, near-IR, mid-IR, radar) with geologic materials. Applications emphasize remote geochemical analyses for both terrestrial and extraterrestrial environments. Several spectroscopy and image processing labs. GEOL 1410 (Mineralogy), PHYS 0060, or equivalent recommended.

Evolution of planetary bodies based on geological and geophysical evidence derived from planetary exploration of the solar system. Includes the study of physical processes responsible for volcanism and deformation on the surface as well as the state and structure of the interior of planets. Prerequisites: GEOL 0050; PHYS 0030, 0040 or 0050, PHYS 0060; MATH 0090, 0100, or instructor permission. Offered alternate years.

Explores theories of the large-scale ocean and atmosphere, including quasigeostrophic, planetary geostrophic, and shallow water equations. Topics will vary to focus on features of the general circulation and climate system (e.g. thermocline, westward intensification, jet stream dynamics, polar vortex, meridional overturning circulations), instabilities and waves (e.g. gravity, Rossby, and Kelvin), or rotating stratified turbulence. May be repeated with permission of instructor. Pre-requisites: Pre-requisite: GEOL0350 or PHYS0720 or APMA 0340 and GEOL1510 or GEOL1520.

A comparative planetology course that examines the origin and evolution of materials on the Earth, Moon, and Mars through sample analyses, spacecraft observations, and modeling approaches. Recommended courses: GEOL 1410, 1420. No prerequisites.

GEOL 1950D. Field and Tectonics Seminar.
Development of field mapping and interpretive skills used in the evolution of complex orogenic terranes. Structural field mapping is carried out in highly deformed metamorphic and igneous rocks in the New England Appalachians, the site of a continental collision associated with the formation of the supercontinent Pangea. Expected: GEOL 0230 and GEOL 1450, or equivalent, and field mapping experience (generally a summer geological mapping course). Students are required to arrive one week prior to the start of classes for the beginning of field work. Instructor permission required.

GEOL 1950F. Geomicrobiology.
Microbes were the predominant form of life for most of Earth's history and continue to drive many of the elemental cycles that sustain life in our contemporary biosphere. By taking this course students will learn about the phylogenetic and metabolic diversity of microbes in the environment and their influence on global biogeochemical cycles. Students will gain hands-on experience with molecular and environmental microbiological techniques and the bioinformatics tools required to analyze and interpret the resulting data. There are 2 sections or topical areas: Phylogenetic and ecological diversity of microbes; Microbial and metabolic diversity of biogeochemical cycling. Prerequisite: BIOL 0415 or 1460 or 1480 or GEOL 1130. Enrollment limited to 12. Instructor permission required.

Astrophysical and Dynamical Processes in Planetary Sciences is a course that challenges students to use physical and geophysical analysis to construct a quantitative understanding of the formation and evolution of the Sun, the solar system's planets and small bodies, and extrasolar planets. The goal is to provide senior undergraduate and first-year graduate students with core knowledge of facts and current theories in the planetary sciences. Through lectures, problem sets, and exams, the students will construct quantitative framework on which to evaluate, and place into context, hypotheses and theories discussed in upper-level graduate courses. Prerequisites: MATH 0100; and one of GEOL 0050, PHYS 0210, 0220, or 0270. APMA 0330 is desirable but not required.

Examines the processes, dynamics, and consequences of geoenkineering, or intentional climate intervention, approaches to controlling climate change. Through assignment students will create a series of referenced, researched, public wikipedia pages summarizing the state of the art understanding (i.e., a geoenkineering hackathon). Intended for undergraduate and graduate students with interests in oceans, climate, paleoclimate, engineering, and climate change policy. Pre-requisite: GEOL 0240 or ENVS 0490 or GEOL 1350 recommended; permission of instructor required. Enrollment limited to 30.

GEOL 1960A. Rheology of the Crust and Mantle.
Introduces the principals of rock mechanics and uses them to describe brittle and ductile deformation processes in the crust and mantle. Each topic will review experimental constraints on deformation mechanisms and introduce the theories that support their application to geological conditions. Analyze microstructural observations in real rocks to link what is learned in the lab to what actually is seen in the Earth. Topics to be covered include: brittle fracture and crack propagation, frictional sliding, the brittle/plastic transition, viscous deformation mechanisms, microstructural analysis of deformed rocks, and the scaling and extrapolation of laboratory flow laws. The class will also feature a field trip to well-exposed crustal faults and shear zones. Several class periods and a class project will focus on microstructural observations of rocks collected during the field trip. Pre-requisite: GEOL 1450 or permission of instructor. Enrollment limited to 20.

The shapes of plants and animals, of mountains and shorelines arise because nature dissipates energy as rapidly as possible. These morphological patterns allow description of the energy "landscape" that produced them. Societies and economies show temporal and spatial patterns as well: does the "flow rate" of ideas and of money cause these patterns? We will explore just how "entropy rules." Enrollment limited to 16. Instructor permission required.

GEOL 1960H. The Early Earth.
Primary focus on evolution of the solid Earth (core, mantle, crust) but will also include discussion of the Archean hydrosphere, atmosphere and biosphere. Reading and discussing current literature, with lectures. Intended for graduate students and upper level undergraduates with advanced petrology and/or geophysics. Enrollment limited to 20.
GEOL 1960J. Reactions and Rheology: Chemical and Mechanical Kinetics in Mineral Systems
Characterization of atomic diffusion and dislocation motion responsible for chemical and physical reactions and plastic rheology in ionic solids. Topics include: point-defect thermodynamics; atomic diffusion (physical and mathematical); solid-solution formation; solid-state compound formation; dislocation structures; grain boundary structure and chemical segregation; plasticity. Recommended three or more of GEOL 1410, GEOL 1420, or ENGN 0410, ENGN 1410, or CHEM 0330, CHEM 1060. Enrollment limited to 20.

GEOL 1960K. Carbon Cycle Seminar
Consideration of quantitative models of the cycling of carbon between various reservoirs near Earth's surface. Topics include: mass balance models of carbon sedimentation; carbon chemistry in the ocean; exchange of carbon between atmosphere, ocean, and biosphere; and consumption of carbon in weathering reactions with rocks. Special emphasis will be placed on the use of isotopic tracers (d13C, 14C) to estimate present and past dynamics of the carbon cycle. Instructor's permission required. Enrollment limited to 20.

GEOL 1960M. Lab and Field Methods in Hydrology
A series of hands-on opportunities for students to characterize the hydrologic properties of soils and simple hydrologic systems in the lab, combined with selected outdoor exercises using standard hydrologic tools in the field. High school math and physics recommended. Enrollment limited to 20.

One semester is required for seniors in Sc.B. and honors program. Course work includes preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Enrollment is restricted to undergraduates only.

GEOL 2300. Mathematical and Computational Earth Sciences.
For graduate students interested in quantitative study of the Earth in geological, physical, or engineering sciences. Mathematical topics to be introduced include tensor analysis, asymptotic and perurbation theory, analysis of differential equations, numerical integration of differential equations, basis functions and pattern recognition, fractals and multifractals, and statistics. Applications will vary by offering, but examples include: statistics of turbulence and earthquakes, advection-reaction-diffusion systems, boundary layers, development of shocks and singularities, climate change, carbon sensitivity, and dimensional reduction of geophysical data. Intensive review of introductory mathematical methods through leading discussions in a lower level class. Earth, fluid, or solid science background recommended.

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical properties from remotely sensed data. Emphasis on radiative transfer theory and modeling of spectra and spectral mixtures from optical constants. Advanced methods of digital image processing. Methods of integrating remotely sensed data into a GIS framework will be introduced. Recommended preparation course: GEOL 1330 or 1710; MATH 0100; PHYS 0600.

GEOL 2350. Quaternary Climatology Seminar
Discussion of current problems in paleoclimatology and global climate change. Students analyze the primary literature, and do original analyses of their own on published data. Topics include: theories of ice ages, millennial-scale climate variability, the influence of greenhouse gases and radiative forcing on climate, and historical and future climate changes. Prerequisites: graduate student status; or GEOL 0240, 0310, and 1240; or instructor permission.

Emphasizes kinetic theories and their geological applications. Topics include: rate laws of chemical reaction, rates of chemical weathering; fundamentals of diffusion, nucleation, crystal growth, and dissolution; transport theory. Recommended prerequisite: GEOL 2460 or equivalent.

GEOL 2430. Igneous Petrology
Study of mineral equilibria in igneous rocks in relation to theoretical and experimental studies in silicate systems. Principles of the origin and evolution of igneous rocks in space and time. Offered alternate years.

GEOL 2440. Petrogenesis of Metamorphic Rocks.
Study of metamorphic rocks with emphasis on mineral equilibria, metamorphic facies, and metamorphic facies series. Topics include: metasomatism, mobile components, partial anatexis, and petrogenetic grids. Prerequisite: GEOL 2460. Offered alternate years.

GEOL 2450. Exchange Scholar Program.

GEOL 2460. Phase Equilibria.
Principles of thermodynamics and phase equilibria in unary, binary, ternary, and multicomponent systems using analytical and graphical methods. Other topics include: solution theory, equations of state, and thermodynamics of surfaces.

Numerical methods for the solution of continuum physics problems arising in geophysics and geology. Basic theoretical formulations and algorithms implementing finite element, finite difference, and boundary element methods are developed. Applications include problems in viscous and plastic flow, elasticity, and heat and mass transport discussed within a geological framework. Course consists of lectures and a computer project applying the methods and concepts considered to a scientifically significant problem. Recommended: APMA 0330, 0340; ENGN 1750. Offered alternate years.

GEOL 2630. Interpretation Theory in Geophysics.
Use basic statistical theory and its matrix algebra representation and modern approaches for the optimum design of experiments, constructing model solutions to measurements, and describing nonuniqueness in models, with particular emphasis on generalized linear-inverse techniques. Introduction to stochastic processes and prediction. Recommended courses: GEOL 1610; MATH 0290, 0520, or APMA 0330, 0340, and computer programming skills. Offered alternate years.

GEOL 2650. Advanced Seismology.
The theory of modern seismology will be applied to imaging of Earth structure (from local to global scales) and determination of earthquake source models. Topics include elastic wave propagation, representation theorems, seismic tomography, moment tensors, source-time functions, and models of fault rupture. Offered alternate years.

GEOL 2730. Isotope Geochemistry.
A survey course emphasizing fundamental principles in isotope geochemistry, including nuclear systematics, nucleosynthesis, geochronological and stable isotope systems, and the application of radiogenic and stable isotopic tracers to geological problems. Prerequisites: GEOL 1410 and 1420, or instructor permission.

GEOL 2800. The Chemistry and Mineralogy of Mars.
Examination of the chemical and mineralogical composition of Mars as revealed from meteorites and spacecraft missions. Example topics include: SNC meteorites, origin and evolution of the crust, alteration processes, remote near- and thermal-infrared observations, remote gamma-ray and neutron measurements, and petrology of surface materials. Recommended courses: GEOL 1410, 1420, 1710, or equivalent. No prerequisites.

GEOL 2810. Planetary Science Seminar
New data for the Moon and Mercury from recent missions (including Chandrayaan-1, Lunar Reconnaissance Orbiter, GRAIL and MESSENGER) permit new insights into "The Crater to Basin Transition on the Moon and Mercury". In this seminar course we will examine this transition using these new data and recent developments in cratering theory and modeling. The course will feature research from the NASA SSERVI activity. Prerequisites: Instructor permission.

GEOL 2840. Asteroids and Meteorites.
Compositional and petrographic characteristics of meteorites are examined along with the physical and compositional diversity of asteroids and other small bodies of the solar system. Possible links between specific types of asteroids and meteorite groups will be evaluated in the context of early solar system evolution. Data from spacecraft encounters with asteroids will be critically reviewed.
Particulate material (regoliths) and soils develop on every planetary surface. Physical and chemical alteration of the uppermost surface results from interwoven active processes of specific environments. Understanding these processes and products is central to interpreting data returned from planetary surfaces. Regoliths reflect surface history over a variety of time scales. Several planetary environments are examined in detail. Prerequisites: GEOL 1410, 1710, 2880, or instructor permission.

GEO 2860. Planetary Volcanology.
An examination of volcanism using observations of features and deposits on planetary bodies, comparing them to predictions from the theory of magma ascent and emplacement. Attention to the influence of different variables (e.g. gravity, composition, temperature, pressure, and atmospheric effects). The history of planetary volcanism, its relation to thermal evolution, and comparative planetary volcanology are also addressed. Offered alternate years.

GEO 2870. Planetary Evolution: Phobos and Deimos.
Planetary Evolution in the Fall of 2015 will focus on the two moons of Mars, Phobos and Deimos. In conjunction with scientists from the NASA Solar System Exploration Science Virtual Institute (SSERVI), we will investigate the geology, mineralogy, internal structure, surface features, regolith, space weathering, orbital dynamics, dust environment, history, origin, relation to Mars, and potential as a human and robotic exploration destination. Individual lectures on these topics will be followed by extensive class discussion and individual projects to investigate different aspects of Phobos and Deimos.

GEO 2880. Planetary Cratering.
Impact cratering is arguably the most pervasive geologic process in the solar system. This course will study the physical process of impact cratering and its place in planetary science. The course will take a process oriented approach to understanding impact cratering with firm foundations in geologic observation and impact experiments. To explore the extreme process of impact cratering, we will use continuum/rock mechanics, thermodynamics, numerical modeling, experiments, and observations. Principal topics will include the formation of craters from contact of the projectile to final crater morphology; shock metamorphism; impact ejecta and products; cratered terrains; impacts and planetary evolution; and impact hazards.

GEO 2910A. Problems in Antarctic Dry Valley Geoscience.
The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change of millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed.

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical measurements from remotely sensed data. Advanced methods of digital image processing and data integration. Introduction to Geographical Information Systems (GIS) and methods of integrating remotely sensed data into a GIS framework. Prerequisites: GEOL 1330 or 1710; MATH 0100; PHYS 0060; or permission of the instructor.

This seminar course will survey the literature and discuss aspects of the marine, atmosphere, biosphere and geologic cycles of reactive nitrogen. Topics include general evaluation of the N cycle in these systems and records of changes in the N cycle through time, particularly on relevant climate change timescales.

GEO 2910E. Miocene: Prelude to the Ice Ages and Analogue to Future Climate Change.
The Miocene Epoch (~23 to 5 Ma) was characterized by a variety of interconnected changes including the tectonic evolution of various ocean gateways, changes in surface and deep-ocean circulation patterns and evolving ocean and atmospheric chemistry. In the Middle Miocene, these conditions resulted in reduced pole-to-equator temperature gradients and global mean annual surface temperatures of ~18°C, equivalent to warming predicted for the next century. These evolving conditions in the Late Miocene set the stage for the initiation of high amplitude northern hemisphere glacial cycles. Study of Miocene climate will yield insight into mechanisms relevant to past and future climate change.

GEO 2910F. Earthquake Mechanics, Rheology and Rock Friction.
Reading current literature, class discussion, lectures to explore current research in fault mechanics and rheology. Time in the lab examining microstructures in both experimental and natural samples. Topics will include: (1) Deformation mechanisms associated with slow slip and tremor; (2) Grain-size evolution processes and their geophysical implications; (3) Grain-size sensitive deformation processes and their geophysical implications. Prior to each class, students will submit (via email) at least 2 questions about the assigned reading. After class, there will be 3 or 4 questions to answer on topics covered in the reading and during class discussion.

GEO 2910G. Dynamics of Ice Sheets and Glaciers.
GEO 2910I. Marine Geophysical Techniques.
The goal of this course is to introduce students to the ocean worlds of the Solar System (excluding Earth). We will focus on the physical theories describing how the structures of planetary systems develop and how planets, moons, and other heavenly bodies form. We will also consider the relationship between these theories and observations (astronomical, geophysical, cosmochemical) of the Solar System and extrasolar planetary systems. This will include some discussion how the Solar System fits into our understanding of the veritable menagerie of planetary systems.

GEO 2920B. Special Topics: Ocean Worlds.
The goal of this course is to introduce students to the ocean worlds of the Solar System (excluding Earth). We will focus on the physical processes that shape the exteriors and interiors of these bodies. We will discuss the various geophysical and remote sensing observations that allow us to determine that oceans underlie the outer icy shells of these bodies. The class will also discuss the possible habitability of these bodies and how we can better constrain the thermo-mechanical state of their interiors.

GEO 2920C. The Sedimentary Rock Cycle of Mars and Earth.
This course consists of a mixture of instructor and student-led discussions on topics related to the sedimentary rock cycle on Mars as viewed through the lens of how we understand such processes on Earth. Topics: sediment transport and deposition, erosion processes and rates, lithification + diagenesis, water-rock interaction, and cyclicity in strata. Major goal: Assess how the sedimentary rock record of Mars can be used to understand changes in depositional processes and environmental conditions through time. Results from Mars satellite and rover data will be discussed, with an emphasis on fundamental processes as understood from detailed studies of Earth’s sedimentary rock record. Prerequisite: Undergraduate level sedimentology/stratigraphy, or permission of instructor.

GEO 2920D. Introduction to Geochemical Modeling.
Continuum descriptions of mass transfer in geochemical cycles. Topics include: fundamentals of diffusive and advective mass transfer, kinetics of weathering and early diagenesis, fluid flow in the Earth's crust and mantle, trace elements and isotopes in magmatic processes. Recommended: CHEM 0330, GEOL 1610 and APMA 0330, 0340.
GEOL 2920E. Introduction to Organic Geochemistry.
Mainly literature critiques and seminars, supplemented by introductory lectures. Topics include organic biomarkers, analytical methodologies, natural macromolecules, stable isotope ratios of biomarkers, application of organic geochemistry in studies of climatic and environmental change, fossil fuel exploration, and applied environmental research.

Emphasizes kinetic theories and their geological applications. Topics include: fundamentals of diffusion in crystals and melts, theories of nucleation and crystal growth, kinetics of melting and dissolving, theory of phase transformation. Prerequisite: GEOL 2480 or equivalent.

GEOL 2920H. Past Variations in the Global Carbon Cycle.
This course will examine variations in the earth's carbon cycle over multiple time scales. We will examine geological tools that measure rates of carbon storage and release, especially over the past one million years. Special emphasis will be given to monitoring rates of past biological carbon storage.

GEOL 2920J. The Source of Liquid Water in the Noachian History of Mars.
Fluvial valley networks, open-basin lakes and closed basin lakes are all testimony to the presence of abundant liquid water during earliest Mars history, but current climate models predict a “cold and icy” early Mars. What does the presence of these distinct geographic features imply about the nature and duration of liquid water flow, and how might it test existing end-member climate models?
In this seminar course, valley network systems will be examined individually and assessed for their relevance to testing these climate models.

GEOL 2920K. Special Topics in Geological Sciences: The Hydrological Cycle on Mars.
Evidence for the changing hydrological cycle on Mars, ranging from what appears to be an early warm and wet Mars, through history to the present very cold polar desert Antarctic-like environment will be examined. Ongoing rover exploration of Mars will be followed to assess what these new results are telling us about the hydrological cycle.

GEOL 2920L. Evolution of the Moon II.
A seminar on the thermal and chemical evolution of the Moon. In this part II of lunar seminar, we will focus more on petrological and geochemical observations of lunar samples, terrestrial layered intrusions, related geophysical observations, and lunar petrogenesis. Prerequisite: GEOL 1420, 2730, or 2920K.

GEOL 2920N. Problems Antarctic Dry Valley Geoscience.
The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change over millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed.

GEOL 2920O. Physics of Melt Migration.
A seminar course focusing on the physical processes and geochemical consequences of melt migration in the mantle. Topics include, but are not limited to: flow in porous media; compaction; adiabatic melting and melt-rock reaction; instabilities in melt migration; melt generation beneath mid-ocean ridge; and melt migration in other tectonic environments. Recommended course: GEOL 1620. Enrollment limited to 15. S/N Ce

GEOL 2920Q. Rheological Boundaries in the Earth.
The properties of lower crust control the coupling of mantle convection to shallow crustal dynamics, post-seismic creep and the chemical evolution of the Earth. On Earth we have xenoliths and exhumed lower crustal rocks to study and relate to geophysical, experimental and theoretical investigations. We will explore these avenues of research with the goal of synthesizing our understanding of the behavior of lower crust on Earth as well as other terrestrial planets.

GEOL 2920R. Evolution of the Moon.
Petrological, geochemical, and geophysical observations, physical and chemical processes relevant to the formation and evolution of the Moon.

GEOL 2920S. Continental Cratons.
The focus of this course is the formation, evolution, and structure of continental cratons. These topics will be explored through a survey of the observational constraints on cratons, including seismology, gravity, heat flow, geochemistry, and petrology. The use of dynamical models to investigate the assembly, destruction, and long-term stability of cratons will also be considered.

GEOL 2920T. Science Applications of Lunar Spectroscopy.
This course will focus on current science issues that are addressed with new lunar orbital or laboratory spectroscopy data. Each participant must identify a specific science topic (and data source) to be pursued and brought to completion during the term. Format will be seminar with very active participation by all attending. At the beginning of the term each participant will describe their chosen research topic. Subsequent sessions will critically examine issues that are associated with each topic in an iterative fashion, focusing on progress made, problems faced, solutions designed, insights found, and finally completed project. Prerequisites: GEOL 1710 and confirmation with instructor about the project.

GEOL 2920U. Climate Variations.
This course will examine the geologic record of lake basins on decadal to million-year time-scales. Students will gain hands-on experience with techniques in paleolimnology including sediment core acquisition, sediment description, petrography, sedimentology and environmental analysis, geochemistry, basic core scanning, and age determination, modeling, and time series analysis. The biotic content and interpretation of fossils will be stressed. The course will also cover theoretical aspects of paleolimnology and more specialized techniques according to student interests through student-led discussions and a course project on regional lake sediments. Graduate students only; enrollment limited to 20.

GEOL 2920V. Terrestrial Nitrogen and Carbon Cycling.
This course will examine aboveground/ belowground processes in the context of the global nitrogen and carbon cycles, and the impacts of both natural and anthropogenic disturbances. It will include discussion of processes such as (de)nitrification, N-fixation, respiration, photosynthesis, and decomposition and their relationship to soil properties; the coupling of N and C cycles in soils related to climate change and increasing N deposition. It will include emphasis on emerging new techniques to quantitatively process and C processes in the laboratory, field and through modeling, and field trip investigating current field studies. Prerequisites: BIOL 1480 or GEOL 1130 or equivalent biogeochemistry course. Enrollment limited to 15.

This seminar course will examine regional-scale climate model scenarios for past and future climate change in Southern New England. Reliable estimates of the trajectory and variability of climate change are needed to address specific climate impacts, adaptations, and mitigations. Global climate model simulations, based on a range of IPPC green house gas scenarios, need to be "downscaled" to achieve useful regional resolution. Understanding the generation of these high-resolution "downscaled" climate scenarios and compiling a number of observed and modeled climate variables to assess the trends and reliability of climate scenarios for Southern New England is the goal of the seminar.

GEOL 2920Z. The Evolution of Lacustrine Ecosystems.
Investigates macro- and micro-evolutionary patterns and processes in lakes. Will look at both cyclical and directional processes and interplay between intrinsic and extrinsic forcing in ecology and evolution of lakes in the geologic record, including changes in carbon flow or controls on biotic diversity and species composition. Students will have the opportunity to work with data from fossil and modern lacustrine strata and develop their own analysis of long lacustrine records, including Fourier analysis based on cores, outcrops, and geophysical logs that reveal Milankovitch cyclicity. A field component includes examination of Triassic and Jurassic Newark Supergroup of eastern North America.

GEOL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.
GEOL 2980, Research in Geological Sciences.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Enrollment is restricted to graduate students only.

GEOL 2990, Thesis Preparation.
For graduate students who have met the tuition requirements and are paying the registration fee to continue active enrollment while preparing a thesis.

East Asian Studies
Chair Fall 2017
Hye-Sook Wang
The 21st century has turned to Asia as a center of international trade, culture, and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vital, important corner of the world, whose civilizations reach back several millennia and whose cultural and economic ties extend throughout the globe. A vibrant community of teachers and undergraduates who work closely together in the spirit of free inquiry, the Department of East Asian Studies embodies Brown’s unique mission “to serve the community, the nation and the world.”

The Department offers several tiers of instruction in Chinese, Japanese, and Korean, with courses designed to accommodate students ranging from those who have never taken a class in the language before, to those hoping to hone their abilities at the highest levels. East Asian Studies also offers Brown students the opportunity to explore the visual, textual and religious cultures of East Asia through introductory and advanced courses on literature, film, pilgrimage and translation, among others.

For additional information, please visit the department’s website: http://www.brown.edu/academics/east-asian-studies/

East Asian Studies Concentration
Requirements
East Asian Studies is a multidisciplinary concentration designed for students wishing to attain reasonable fluency in Chinese, Japanese, or Korean with specialized exposure to selected East Asian subjects. It serves students with two types of interests: those who aim to pursue active professional careers related to the East Asian region, and those who want to pursue graduate study in the humanities or social sciences with particular emphasis on China, Japan or Korea. Students in East Asian Studies will gain language proficiency and familiarity with East Asia through advanced courses in a variety of disciplines. Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters. The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean.

The Language Requirement
The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean. For the purposes of the concentration, proficiency is determined to be consistent with successful completion of the Department’s third-year course sequence in Chinese, Japanese, or Korean (0500-0600), or its equivalent. Native speakers of these languages may, for example, demonstrate competency such that language courses through the third-year or 0600 level in one of the three languages may be taken for one semester. Department language instructors may also determine that course work completed at one of the language-intensive study abroad programs attended by our undergraduates is comparable to courses offered at Brown. Up to three upper level (700-999) may count as electives for concentration credit.

Note that we do not equate completion of third-year Chinese, Japanese, or Korean with fluency in these languages. Rather, we believe that students who have demonstrated the skills associated with third-year Chinese, Japanese, or Korean have acquired a foundational understanding of the languages’ grammar, vocabularies, and conversational patterns, such that they are able to make themselves understood in everyday situations, and to understand both spoken and written communication.

For the purposes of the concentration, language courses through the third-year are treated as an accompanying requirement.

Language Prerequisites (demonstrating proficiency through the third-year or 0600 level in one of the three languages below)

Electives

The concentration requires that students complete a total of eight electives tied to their course of study, which may be defined in linguistic, chronological, thematic, or cultural terms. Students should choose their courses with the following three requirements in mind.

- **EAST Requirement:** At least three of the eight electives must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement.
- **Breadth Requirement:** At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration's language requirement. A concentrator studying Chinese, for example, must choose at least one course that focuses on Korea and/or Japan.
- **Senior Seminar Requirement:** At least one of the eight elective courses must be an advanced research seminar, taken in the senior year.

As is common for interdisciplinary concentrations, a wide range of courses, including many taught by faculty in other departments, may be counted toward the concentration. These include courses offered by East Asian Studies faculty, faculty with courtesy appointments in the Department, and courses with a significant focus on East Asia offered in such disciplines as American Studies, Art History, Economics, International Relations, and many others.

For additional elective choices, visit [http://brown.edu/academics/east-asian-studies/courses/more-course-offerings](http://brown.edu/academics/east-asian-studies/courses/more-course-offerings).

Advanced Research Seminars

At least one of the eight elective courses must be an advanced research seminar, taken in the senior year. The research seminar will normally provide students with the opportunity to develop a project or paper focusing on one or more of their areas of inquiry within the concentration. Students are strongly encouraged to find ways to incorporate the use of Chinese, Japanese or Korean language materials in their research and learning in these courses. Courses falling into this category include the East Asian Studies 1950 series as well as designated seminars offered by faculty in such departments as History, Religious Studies, and Comparative Literature among others. The Department will provide a list of pre-approved advanced seminars every semester. Students wishing to add courses to that list must submit their requests in writing to the Director of Undergraduate Studies at the start of the semester.

Honors

East Asian Studies offers qualified students, in their senior year, the opportunity to undertake a sustained research and writing project that, ideally, will result not merely in a long term paper, but in a piece of original scholarship. To enroll in the Honors Program, the student must be a senior East Asian Studies concentrator, with at least a high B average in concentration courses. Candidates for Honors are required to have developed a competence in an East Asian language sufficient to allow them to use East Asian language materials in carrying out their research. Students must also successfully obtain the support of at least two faculty members who will agree to serve as primary and secondary advisors for the thesis. Prospective writers submit a thesis prospectus, brief bibliography, and completed application forms (with signatures), ordinarily late in the student’s six semester, to the Director of Undergraduate Studies, who provides the final permission to proceed. Synopses of successful thesis proposals will be distributed to Department faculty. Thesis writers enroll in advisor-specific sections of the thesis-writing course EAST 1930 (Fall) and EAST 1940 (Spring), meet regularly with their advisors over the course of both semesters, and submit final versions of their theses to the Department in mid-April. Advisors and students are required to provide updates of their progress to the Director of Undergraduate Studies at regular intervals.

The completed thesis is evaluated for Honors by the thesis director and by a second reader. In case of a difference of judgment between the two readers, a third opinion may be sought. The awarding of Honors in East Asian Studies will occur only if the Honors Thesis receives a final grade of A. If an A is not received, the student will still receive academic credit for EAST 1930-1940. Students are notified in mid-May whether the Department has recommended the awarding of Honors. Copies of readers’ comments are provided to the student.

All graduating concentrators will present the results of their senior theses in the department’s Senior Project Forum. The Forum will usually take place at the end of the spring semester, but may also occur at the end of the fall semester to accommodate mid-year graduates.

Double Concentrations

Students who are interested in developing a double concentration, including East Asian Studies as one of the two concentrations, should bear in mind that normally no more than two courses may be double-counted toward satisfying the course requirements of either of the two concentration programs involved.

Study Abroad

Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters during their undergraduate years. Course credits earned abroad are generally transferable to Brown. However, a maximum of three courses taken abroad, of genuine intellectual substance and significantly related to East Asian Studies, may be considered for concentration credit.

Summary of requirements:

- Language study through the level of 0600 or the equivalent of Chinese, Japanese, or Korean
- Eight elective courses
  - At least three of the eight must be East Asian Studies (EAST) courses; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement
  - At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration's language requirement. A concentrator studying China, for example, would choose at least one course that focuses on Korea and/or Japan.
  - At least one of the eight must be an advanced research seminar, taken in the senior year.
- **EAST 1930 (Senior Thesis, Semester 1)**: EAST 1940 (Senior Thesis, Semester 2) for Honors candidates only
Courses

Chinese

CHIN 0100. Basic Chinese.
A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of course work in CHIN 0200 covers the entire year and is recorded as the final grade for both semesters.

CHIN 0150. Advanced Beginning Chinese.
A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in CHIN 0250 covers the entire year and is recorded as the final grade for both semesters.

CHIN 0200. Basic Chinese.
A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the second half of a year-long course. Students must have taken CHIN 0100 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0100. If CHIN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

CHIN 0250. Advanced Beginning Chinese.
A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the second half of a year-long course. Students must have taken CHIN 0150 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0150. If CHIN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

CHIN 0300. Intermediate Chinese.
An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

This course is designed to enhance listening, speaking, reading, and writing skills for Chinese heritage students who have some prior knowledge of Chinese. Five classroom meetings weekly. Placement interview required.

CHIN 0400. Intermediate Chinese.
An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0300 or permission of instructor.

CHIN 0450. Advanced Chinese for Heritage Learners.
This course is primarily designed for Chinese heritage students who have successfully completed CHIN 0350. If you have not taken CHIN0350 please contact the instructor for a proficiency evaluation. Upon completing this course, you can take CHIN 0700 or equivalent, i.e. courses that have a prerequisite of CHIN 0600. This is an advanced-level course offering comprehensive work on all four language skills, with a focus on developing your ability to use sophisticated grammatical structures, vocabulary, and improving your reading and speaking skills. Materials used in this course will include a textbook, supplementary articles, and video clips.

CHIN 0500. Advanced Modern Chinese I.
An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0250 or CHIN 0400 or permission of instructor.

CHIN 0600. Advanced Modern Chinese I.
An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0500 or permission of instructor.

CHIN 0700. Advanced Modern Chinese II.
This course is designed to enhance the Chinese proficiency of those who have taken Advanced Modern Chinese I (CHIN 0600) or the equivalent. All four language skills are emphasized through selected authentic materials. At the end of the year, students should be able to express their ideas with sophistication and nuance. Drills on complex sentence patterns will be conducted when necessary. Prerequisite: CHIN 0600 or permission of instructor.

CHIN 0800. Advanced Modern Chinese III.
See Advanced Modern Chinese II (CHIN 0700) for course description. Prerequisite: CHIN 0700 or permission of instructor.

CHIN 0910A. Academic Chinese I.
This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Through reading and discussing literature, newspaper and magazine articles, and academic writings, students will gain a better understanding of traditional and modern China. Prerequisite: CHIN 0800 or permission of the instructor.

CHIN 0910B. Introduction to Classical Chinese.
This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary, and to catch a glimpse of ancient Chinese wisdom. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century. Prerequisite: CHIN 600. Instructor permission required.

CHIN 0910C. Introduction to Modern Chinese Prose.
Students will pursue their ability to appreciate and use various Chinese writing styles by reading and analyzing modern Chinese prose classics. Classes include lecture, discussion and group or individual presentations. By the end of the semester, students will be familiar with the development of modern Chinese prose, understand the language and meaning of each text, be comfortable with different writing styles and techniques, and have a deeper understanding of Chinese thought, society, and culture via the writers and their masterpieces. Conducted in Mandarin Chinese; designed for students with advanced language skills. Prerequisites: CHIN 0800 or the equivalent.

CHIN 0920B. Classical Chinese.
This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century CE. Prerequisite: CHIN 0910B. Instructor permission required.

This course is designed to help students develop advanced reading proficiency and formal oral and writing communication skills. Students will listen and read up-to-date news, reports and commentaries from various Chinese media sources, such as TV broadcasts, newspapers, magazines, and websites. Through reading and discussion, students will gain a better understanding of a wide range of current issues in a rapidly changing China, including economics, politics, education and popular culture. Class format varies from lecture, discussion, debate, and group and/or individual presentations. Prerequisites: CHIN0900 or the equivalent.
**CHIN 0920D. Business Chinese.**

Business Chinese focuses on practical language skills that are most useful in business interactions in Chinese-speaking communities. Classroom activities are largely based on authentic documents and correspondences as well as a textbook. Through intensive practice in the listening, speaking, reading and writing of the Chinese language for business purposes, this course aims at enhancing students' linguistic knowledge in a business context. Classes are conducted in Chinese. Prerequisite: CHIN 0800 or instructor permission. Enrollment limited to 18.

**CHIN 0920E. Two Sides of the Coin: Advanced Chinese Conversation.**

Many of us know about the trolley scenario: would you kill one to save five? What do you think about organ trade—is it immoral for wealthy people to buy organs from the poor in order to save their lives or those of their loved ones? Who are really responsible for the atrocious organ harvesting in China? What is your stance on the Affirmative Action? Did you know China has an affirmative action as well? The goal of this course is to develop students' communication skills in Chinese, with a focus on their listening and speaking skills, through in-depth discussions on controversial issues and moral dilemmas. Class materials will cover a broad range of topics and will not be limited to those unique to China. The majority of primary sources will be in Chinese. Prerequisite is CHIN0800 or equivalent.

**CHIN 0920G. Chinese Language in the Big Screen.**

This course is designed for advanced Chinese language students who have completed CHIN 0600 or equivalent. You will gain language and culture proficiency through studying different genres of movies that reflect Chinese history, social issues and Chinese people's values. The primary objective of this course is to further develop your language proficiency in meaningful and entertaining contexts. By conducting research into the films, creating video summary, and sharing your work with your fellow students, you will build up your interpretive and presentational skills. In place of a final written exam, you will be asked to produce a mini-film.

**CHIN 1040. Modern Chinese Literature.**

Introduces students to the most representative writers in 20th century China. Emphasizes textual and historical analyses. Major issues include Westernization, nationalism, revolution, class, gender, and literary innovations. Designated primarily as a literature course, rather than language class, and conducted entirely in Mandarin Chinese. Prerequisite: CHIN 0800. Instructor permission required.

**CHIN 1910. Independent Study.**

Reading materials for research in Chinese. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHIN 2450. Exchange Scholar Program.**

### East Asian Studies

**EAST 0350. Pop and Political: Modern Culture in Japan and Korea.**

This course introduces the modern cultures of Japan and Korea through an examination of events, artifacts, and cultural practices. With a broad understanding of culture as a general process of artistic and intellectual development, as a body of material artifacts, and as a social practice of ordinary life, we will focus our attention on the implications of studying culture in relation to popular media and political activism. Topics covered will include: colonial fiction, the re-creation of tradition, the proletarian arts, postwar children's culture, the globalization of popular music, myth in the DPRK, shoji print culture, and East Asian activism.

**EAST 0410. Introduction to East Asian Civilization: China (HIST 0410).**

Interested students must register for HIST 0410.

**EAST 0500. Childhood and Culture in Japan.**

This seminar offers students an interdisciplinary look at how children became central to social life in modern Japan. What set of historical and philosophical conditions made childhood newly visible in the late 19th century? In what ways has the relationship between the marketplace and childhood evolved over the past hundred years? How have class, gender, ethnicity and sexuality inflected the ways childhood has been experienced in Japan? Students will analyze different texts for and about children (early fairy tales, comic books, propaganda, animation) in relation to critical essays drawn from the disciplines of literature, history, anthropology, film, and social development. SOPH DPLL WRIT

**EAST 0530. Modern Korea: Politics, Culture, and Society.**

Korea has a long and rich history that often goes underappreciated in the U.S. and other parts of the world. At the same time, studying Korea provides a unique vantage point for understanding major processes in East Asia and the world, both in the present and the past. The aim of this introductory course is to use illuminating aspects of the Korean historical experience to set the path for an educational journey that encompasses not only learning about the Korean past, but also expanding our ability to approach cultural histories, as well as national cultures in general.

**EAST 0600. Literature and Social Inequality in Late Imperial China.**

This course explores the social inequality and resistant movements represented in fiction, prose and poetry written in late imperial China. We will read literary works to investigate the inequalities sustained or challenged in five social arenas, namely socioeconomic class, gender, urban/rural division, ethnic distinction, and China/foreign difference. The balanced selection of readings in three major literary genres, written by male and female authors, cover topics including a social uprising, religious cult, legal trial, civil examination, courtesan culture, urban market, multilingualism, diplomacy, and travel. Prerequisites: None.

**EAST 0610. Popular Culture across Media in Early Modern China.**

This course introduces popular culture at the intersection of literature, book illustration, and theatrical performance in early modern China. It provides ways for students to study Chinese popular culture through channels of self-expression, political action, ideological propaganda, community building, and religious ritual. The class combines a close analysis of literary and visual works with an introduction to the social and cultural milieu of their production and consumption. We will discuss writing topics including a middle-brow entrepreneur, polymath dramatist, scenes depicted in illustrations and on porcelain, regional theater, women's ballads, performances for deities, and court drama. DPLL

**EAST 0610A. The Far Side of the Old World: Perspectives on Chinese Culture (COLT 0610A).**

Interested students must register for COLT 0610A.

**EAST 0650. Language, Culture, and Society: Korea.**

This course aims to look into the interaction between language, culture and society. It will specifically examine the role of language in myriad social contexts with special focus on Korean society. Topics to be covered in this course include language contact (e.g. with Japan and China), language variation (e.g. regional, generational, gender), language and identity, language and social class, language perceptions and attitudes, language education in a social context, and so on. Knowledge of the Korean language is preferred but not required. FYS
Interested students must register for COLT 0710U.

Interested students must register for JAPN 0910D.

EAST 0950A. Turning Japanese: Constructing Nation, Race and Culture in Modern Japan.
This first year seminar focuses on Japan’s experiences with historical processes and concepts which have transformed the modern world. These include the creation of the nation as the fundamental structure for social and political organization, as well as the evolution and implications of beliefs and practices associated with race, culture and tradition. Participants will work with primary sources and scholarly analysis from diverse disciplinary perspectives. Enrollment limited to 20 first year students. FYS WRIT

EAST 0950B. The Floating World.
An exploration of selected literary, artistic, and religious works with an eye to understanding Japanese culture and thought of the early modern period (1600-1868). Materials include merchant tracts, samurai codes, Buddhist sermons, Confucian disquisitions, woodblock prints, drama, and fiction. No prerequisites. Enrollment limited to 20 first year students. FYS

EAST 0950C. Reading China: Texts and Contexts.
This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them—Edo merchant culture, modernism, the avant-garde, mass culture and postmodernity, among others. Writers covered will include Itagaki Taikan, Jippensha Ikku, Ichikawa Ichisaburo, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites.

EAST 1010. From Basho to Banana: Four Centuries of Japanese Literature.
This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them—Edo merchant culture, modernism, the avant-garde, mass culture and postmodernity, among others. Writers covered will include Itagaki Taikan, Jippensha Ikku, Ichikawa Ichisaburo, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites.

An introduction to major and minor works of Japanese literature produced during the Japanese Empire as well as in post-WWII Japan. Covered writers include canonical novelists such as Tanizaki Junichiro, Kawabata Yasunari, and Oe Kenzaburo, as well as writers lesser known outside of Japan today, including women, queers, revolutionaries and colonial/resident Koreans. DPLL

EAST 1050. The Chinese Novel.
The purpose of this course is to help us see how the Chinese novel took shape from popular sources, such as storytelling and drama, how the novel drew on history as well as legend, and how its authors and editors express a distinct world view. The class will cover the "masterworks" of the Chinese novel. Through intensive reading, students can explore notions of the hero and heroism, moral action and, more broadly, history and literature from a comparative perspective. All readings are in English translation. Limited to 20 freshmen and sophomores, or by instructor permission.

EAST 1060. Manly Men, Womanly Women, and Other Variations: The Quest for Becoming in Pre-Modern Chinese Lit.
In this, we will study representative works of Chinese poetry, historical narrative, fiction, and drama, translated into English, in order to understand how Chinese people through the ages approached the task of defining what it means to be human—what constitutes an ideal person, how the ideal changes with the person’s sex, and the degree to which individuals shape and are shaped by the collective they live in. We will read these texts as works of art while also using them to compose a picture of Chinese society as it evolved from the earliest times to the end of the Imperial era. DPLL

EAST 1070. China Modern: An Introduction to the Literature of Twentieth-Century China.
A general introduction to modern and contemporary Chinese literature from the May Fourth Movement to contemporary Taiwan and the People's Republic of China. Emphasizes reading of literary works in relation to topics such as cultural tradition, modernity, nationalism, revolution, class, gender, region, cultural commodification, and literary innovations. Readings in English. No previous knowledge of Chinese required.

EAST 1100. Korean Culture and Film.
This course aims to introduce and explore various aspects of Korean history, culture and society. Students are expected to develop a comprehensive understanding of Korean culture by examining contemporary films that pertain to issues such as national identity, history, international relations, religion, Korean life style, and family life. Enrollment limited to 20.

EAST 1120K. Skeptical Traditions East and West (CLAS 1120K).
Interested students must register for CLAS 1120K.

This course focuses on Japanese and Korean women’s literature from the modern period, giving particular attention to the historical issues and the narrative strategies that play out in celebrated works of women's fiction. The goal of the class is to deepen our understanding of the universal and particular aspects of women’s writing in Japan and Korea and at the same time to learn an idiom with which to talk about literary form. Previous coursework in East Asian Studies or Literary Studies is suggested but not required. Instructor permission required.

EAST 1200. Pop, Political and Patrician: Culture in Japan and the Koreas.
This course introduces students to the modern cultures of Japan and Korea through an examination of events, artifacts, and cultural practices. The over-arching goal of the class is two-fold: to create an alternative narrative to the dominant Orientalized vision of East Asian culture and to deepen our knowledge of the overlapping cultural histories of Japan and Korea. With a broad understanding of culture as a general process of artistic and intellectual development, as a body of material artifacts, and as a social practice of ordinary life, we shall focus our attention on the implications of studying culture in relation to popular media and political activism in particular. Topics covered will include: colonial fiction, the recreation of tradition, art and atrocity, the proletarian arts, postwar children's culture, the globalization of popular music, myth in the DPRK, shoji print culture, and East Asian activism.

EAST 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context (MCM 1202E).
Interested students must register for MCM 1202E.

EAST 1210. Imagining Modern China.
This course introduces students to the literary and cultural milestones in twentieth-century China, highlighting the capacity of literature as a form of historical engagement and ethical reasoning. Featuring masterpieces by mainland Chinese as well as Sinophone and ethnic minority writers, and translation works and critically acclaimed films, the course unpacks the multivalence of Chinese literary and cultural modernity as well as that of the very term “China.” Issues for discussion include translation and intercultural encounters, nationalism, tradition, gender, the revolutionary legacy, cultural identity, diaspora, and literary citizenship. All readings and discussions are in English. DPLL
EAST 1230. Edo Woodblock Printing.
This course provides an introduction to Japanese art and cultural history through a survey of woodblock print media from its emergence in the mid-17th century to the end of the early modern era. Topics for consideration include East Asian pictorial traditions, the publishing industry, censorship, social identity, and specialist print communities. The course will track the development of Japanese woodblock printing from its origins in printed books and monochrome prints, and the transition to hand-coloring and multi-colored printing that facilitated a highly nuanced media form, via the publishing industry’s shifting relationship with the authorities, and influences from China and the West. DPLL
This is a critical introduction to the history of mainland Chinese film. It focuses on three dimensions of cinematic practice: the historical context of film productions, the specific context/form of each film, and the critical reception of Chinese films in film studies. Important themes such as nation, visual modernity, cinematic narrative, and commercialism will be studied across the three dimensions.
EAST 1280. Introduction to Japanese Cinema.
This course examines the cinema of Japan, from the 1930s to the present. Students will learn to "read" film as a visual text through a study of the basics of film editing and shot composition and will gain an understanding of cinema as art form, commercial product, and ideological tool through selected articles on film theory and published analyses of the assigned films. In addition, we will place the films within their specific context through a study of Japanese history, religious thought, and cultural trends. DPLL
EAST 1370. Performances in the Asia (TAPS 1270).
Interested students must register for TAPS 1270.
This course treats major trends in Japanese thought and culture of the Tokugawa period (1600-1868), including debates among Confucian scholars; merchant culture; samurai ethics; the popularization of Buddhism; and the rise of nativism in the late period. Emphasis is on reading and analysis of primary texts in translation. Required: a course in East Asian culture or religion. Recommended but not required: RELS 0120. Enrollment limited to 20.
EAST 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan (COLT 1410N).
Interested students must register for COLT 1410N.
EAST 1415A. Classical Daoist Thought (RELS 1415A).
Interested students must register for RELS 1415A.
EAST 1420. The Confucian Mind.
This course explores the Neo-Confucian tradition, a pervasive influence in the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.
EAST 1430. Classics of East Asian Buddhism (RELS 1430).
Interested students must register for RELS 1430.
Interested students must register for COLT 1430C.
EAST 1430T. Leaves of Words: Japanese Poetry and Poetics (COLT 1430T).
Interested students must register for COLT 1430T.
Interested students must register for RELS 1440.
EAST 1500. Returnees in China’s Modernization.
This course examines the impact on contemporary China of returnees, people who have left China to study abroad have now returned home and become reintegrated into society. Focusing on a series of in-depth studies of returnees who have carved out professional identities in the commercial world, the state, and civil society. The returnee experience will be examined from 2 angles: the manner by which contemporary returnees negotiate Chinese tradition and Western learning, and the differences between this cohort’s experience and that of previous generations of returnees in China’s now century and a half long period of modernization.
This course traces the historical evolution of modern Chinese, commonly known as Mandarin. We will examine the uniqueness of Chinese characters, and explore their relationship to other features of the language, including word formation, phonology, grammar, and dialects. The goal will be to understand the manner by which the written script has become so central to the development of Chinese civilization.
EAST 1510A. China’s Late Empires (HIST 1510A).
Interested students must register for HIST 1510A.
EAST 1530. Modern Korea (HIST 1530).
Interested students must register for HIST 1530.
EAST 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).
Interested students must register for ANTH 1540.
EAST 1700. Global Korea: Modernity, Nation, and Belonging.
In this course we will explore important issues in the study of contemporary Korean society and ask how those themes can help us to better understand processes of globalization in East Asia and beyond. Although the Koreas are relatively small countries in Asia, their history of colonialism, the Korean War, coming of age in the Cold War, and struggling to rise to the top of the global stage makes them a productive region of the world for thinking about themes such as globalization, nationalism, belonging and modernity. We will look at issues such as the Korean diaspora, immigration, plastic surgery, and the “Korean Wave” of film, TV and music.
EAST 1701. Transnational Koreas: Gender, Family, and Sexuality.
From an economic basket case in 1963 to a successful producer of global cultural products such as Samsung phones and the “Korean Wave,” South Korea has become the envy of many developing nations. What are the gender and sexual politics that undergird this neoliberal success story? Utilizing the analytical lens of gender, “sexuality,” and “family,” this course will confront and interrogate the hypermasculine Korean state and its hetero-gendering of Korean citizenship by examining issues ranging from the cosmetic surgery boom for women and military conscription for men to the ongoing controversy around “comfort women” (military sex slaves for the Japanese imperial army).
Interested students must register for COLT 1810X.
EAST 1811L. Travel and Tourism through the Ages (COLT 1811L).
Interested students must register for COLT 1811L.
EAST 1880A. Lao Tzu and Huai-nan Tzu.
This seminar will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the Huai-nan Tzu, and will discuss the historical and philosophical origins of Lao Tzu’s Tao te ching, heretofore acknowledged as the foundational text of the Taoist tradition.
EAST 1880C. Zen Meditation in China, Korea, and Japan.
An intensive study of the origin and development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Both koan and silent illumination styles will be studied in depth. Weekly seminars will study representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students MUST register for the lecture section and a lab. Prerequisites: RELS 0100, RELS 0500, UNIV 0540; or instructor's permission.
EAST 1880D. Early Daoist Syncretism: Zhuang Zi and Huainian Zi. The final phase of the classical Daoist tradition has been called "syncretist" by Graham, "Huang-Lao" by Lin. It is the version of Daoism carried into the Han dynasty and the one that transmitted the tradition's earlier works. Casting a broad net we will examine a variety of works from this critical phase including the "Techniques of the Mind" texts in the Guanzi collection, the so-called "Huang-Lao" silk manuscripts from the Han tomb at Mawangdui, certain chapters of the Lushi chunqin, and selections from the Zhuangzi and Huainianzi. We will examine the ways in which cosmology, self-cultivation, and political thought coalesce in these works.

EAST 1910. Independent Study. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1930. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1940. Reading and Writing of the Honors Thesis. Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 1940A. Crafting Early Modern China: Handicraft, Witchcraft and Statecraft. This course examines how Chinese cultural industry was shaped by socio-political institutions and religious practice between 1400 and 1900 CE. The course highlights the concept of craft, broadly understood as the ways of making artifacts and building social community by using environmental resources and through micro-political negotiations in everyday life. The course aims to equip students in ways to decipher the political, religious and gendered significance embedded in cultural products, including literature and decorative arts. We will explore artifacts from the following categories: literary illustration, painting and calligraphy, seals, ceramics, furniture, and textiles. Prerequisites: None. DPLL

EAST 1950B. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives. This seminar course is designed to critically re-evaluate representations of Chinese women, gender, and feminism in historical, literary, and academic discourses. It examines a diverse body of texts produced through different historical periods and in different geopolitical locations. It emphasizes gender as both a historical construct(s) among competing discourses and as a material process of individual embodiment and disembodiment. The goal of the course is to help advanced students understand Chinese history from a distinctly gendered perspective, to recognize women's roles in history and writing, and to develop a reflective, cross-cultural approach to gender, politics, and the self.

EAST 1950G. Market Economy, Popular Culture, and Mass Media in Contemporary China. Course focuses on mainland Chinese cultural and media production since the mid 1980's, when China began transforming itself culturally and economically into a capitalist society with socialist characteristics. Traditional values, socialist legacy, commercial forces, and globalization have all played significant roles in the ongoing transformation. The goal of the course is to examine the complex interactions among diverse historical forces in a rapidly changing China. Course taught in Mandarin Chinese.

EAST 1950H. Translating Japanese: Short Fiction, Poetry, Film and Manga. This seminar/workshop discusses a broad range of narrative arts produced over the past 100 years in Japan, and practices the art of translating them. Drawing rigor from the field of linguistics and translation theory, we shall make central to our effort of analyzing Japanese cultural productions an attentiveness to the historicity of language and a self-consciousness of our roles as cultural interpreters. While the course will focus on mid-20th century Japanese short fiction, we will also work on poetry, music, manga, animation, and film, depending on the interests of enrolled students. Pre-requisites: JAPN 0600 or equivalent. Instructor permission required.

EAST 1950I. Revolution and Culture, East Asia and Beyond. This seminar investigates cultural practices enacted with the aim of social change. Topics include the Soviet avant-garde, race and the American cultural front, gender and proletarian literature in Japan and colonial Korea, as well as issues of propaganda and struggle in the DPRK and China. Instructor permission required.

EAST 1950J. The Chinese Story, Its Authors and Readers. A study of the Chinese story in its social and historical context. The seminar will survey the broad story stereotypes and consider their earlier sources in the classical tale, storytelling, drama, and ritual. All readings are in English translation.

EAST 1950N. The Love Letter, Fiction and Desire. A study of the art of the love letter in China of the 16th to 18th centuries. The circulation of letter-writing manuals fueled the rise of letter fiction in China, as it did in Europe in the same period. The seminar will explore how desire serves as a motive for writing to someone far away, an element of the plot, and an end in itself, in comparative and theoretical perspectives. All readings are in English. Enrollment limited to 20.

EAST 1950O. The Art of Dissent. This seminar investigates the relationship between activism and art in early modern and 20th century Japan and Korea. Historical topics to be discussed in relation to works of fiction, biography, poetry, film and graphic art include the Freedom and People's Rights Movement, Japanese anarchism, pre-WWII communism, feminism, the Kwangju Uprising and the Minjung Munhak Movement.

EAST 1950P. Attachment to Objects in Chinese Literature. A seminar investigating interactions between objects and literary composition in China of the 12th to 16th century, exploring 3 core issues: 1st, what do writers about objects reveal about notions of literary art and artifice? 2nd, in what ways are material artifacts endowed with aesthetic and personal meaning? 3rd, what literary and extra-literary factors shaped exchanges of poetry and gift-giving as linked forms of social intercourse? Readings in English translation. Instructor permission required.

EAST 1950Q. Early Chinese Poetry. A survey of the evolution of major forms of Chinese lyric poetry beginning with the Shijing (Book of Songs), the breakthrough to 5-character verse in the Han Dynasty, landscape (shanshui) and field and garden (tianyuan) poetry of the 6 Dynasties, and the flowering of the shi (wave) form during the Tang Dynasty. Readings will be in Chinese, discussions in English. Previous study of classical Chinese or permission of the instructor required.

EAST 1950U. South Korean Cinema: From Golden Age to Korean Wave. This seminar explores the cinema of South Korea, proceeding chronologically and thematically, interrogating the key problematic of genre and genre. We will think about cinema's role—as a medium for visual storytelling and as a site for producing cultural norms and values—in assessing the consequences of historical events and in helping to construct official histories. Across films from Korean cinema's "golden age" (1950's and 60') to post-authoritarian realist cinema to the contemporary era of globalized, transnational genre films, we will map the questions, themes, and debates on the formation and effects of South Korea's cinematic imaginary of nation. Enrollment limited to 20 juniors and seniors.

EAST 1950V. Contemporary Film and Media Cultures in East Asia. This course visits postwar film and television cultures in East Asia as a part of a larger narrative of contemporary media production and consumption. How can thinking about films' relationship with other media enhance our understanding of contemporary popular culture? How does it help us re-imagine narrative issues such as textuality, production, and representation? How does understanding the rich contexts of audience interaction with media affect our approaches to reading and meaning-making? To explore these questions, we will consider postwar Chinese and Japanese films, popular fiction, literature, television dramas, as well as manga/anime.
This course explores the theory and practice of translation in the context of Korean cultural production. Each week we shall grapple with a particular issue in translation studies in dialogue with a Korean-language text. By the end of this course students should be able to locate the tools necessary to carry out translations from Korean to English, to demonstrate an understanding of translation as a craft with its own standards, responsibilities, and complexities, and to have completed a significant translation project themselves. Advanced learners of the Korean language as well as native speakers of Korean are welcome. DPLL

EAST 1950X. Queer Japan: Culture, History and Sexuality.
This seminar investigates cultural practices enacted by Japanese gays and lesbians, or otherwise related to same-sex attraction. How have sexual identities traditionally been constructed in Japan, and how has the modern period transformed them? How has same-sex sexuality become figured in the Japanese art, literature and popular culture of the 20th century, and how have the forces of a global LGBT culture interacted with the specific experiences of a same-sex community in Japan? This class explores questions about queer history, writing and cultural practice by looking at particular moments in the Japanese past and present.

“Chinese opera” denotes several hundred regional variations of a performance art form that comprises sung arias with musical accompaniment, spoken dialogue, stylized movements, and elaborate costumes and make-up. Originating in the elite leisure spaces of early modern China, the best known versions of this art form are Peking opera and Kun opera. We will examine drama texts from the Yuan dynasty to the present, learn about the aesthetics and politics of these textual and performance traditions, and consider theater culture within its social, economic, and historical contexts. Prerequisite: Previous study of literature or theater at the college level. WRIT

EAST 1951. Literature and Technology in Early Modern China.
This course explores relations between Chinese literature and technical know-how from 1368 to 1911. Introducing recent scholarship in the history of science and technology, the course challenges students to re-define technology in the context of China’s changing Confucian education system, booming market economy, and the multiethnic empire. We will investigate the ways in which knowledge about medicine, handicrafts, and foreign lands transformed the form and content of poetry, novels, and belle-lettres. Topics include a merchant’s encyclopedia, carpenters’ spell, Confucian engineers’ autofiction, novel medicine, and female scholars. Prerequisites: None. DPLL

EAST 1951C. Picturing Korea: History and Memory in South Korean Cinema.
South Korean films have recently shown a thematic preoccupation with the nation’s tumultuous history by presenting diverse stories of past event and experience. They have also rendered different ways to address the issues related to important social developments and cultural phenomena. The aim of this seminar is to think about cinema’s role as a medium for visual storytelling and as a site for producing historical imaginations. Prior coursework on film and media and/or the history of East Asia is required, and students are expected to have a firm grounding in the methods of critical reading, textual analysis, and scholarly argumentation.

EAST 1990. Senior Reading and Research: Selected Topics.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EAST 2450. Exchange Scholar Program.

EAST XLIST. Courses of Interest to Concentrators.
Fall 2017
East Asian Studies is a highly interdisciplinary concentration. The following courses in other departments can be taken for concentration credit. Please check the listing of the appropriate department for the time and location of each course.

Modern Culture and Media
MCM 1203U East Asian Cinemas in a Global Frame

Religious Studies
RELS 0080 Japan: Nature, Ritual and the Arts

Japanese

JAPN 0100. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. No prerequisites. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0200 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0250 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

JAPN 0200. Basic Japanese.
Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. This is the second half of a year-long course. Students must have taken JAPN 0100 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0100. If JAPN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana and some Kanji. Placement test required. This is the second half of a year-long course. Students must have taken JAPN 0150 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0150. If JAPN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

Further practice of patterns and structures of the language. Readings are introduced on aspects of Japanese culture and society to develop reading and writing skills, enhance vocabulary, and provide points of departure for conversation in Japanese. Prerequisite: JAPN 0200 or equivalent. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

See Intermediate Japanese (JAPN 0300) for course description. Prerequisite: JAPN 0300 or equivalent. Enrollment limited to 18.
JAPN 0500. Advanced Japanese I.
Continued practice in reading, writing, and speaking. Emphasizes the development of reading proficiency and speaking in cultural contexts. Students read actual articles and selections from Japanese newspapers. Course includes translation, with writing and discussion in Japanese. Films and video tapes are shown as supplementary materials. Prerequisite: JAPN 0400 or equivalent.

JAPN 0600. Advanced Japanese I.
See Advanced Japanese I (JAPN 0500) for course description.

JAPN 0700. Advanced Japanese II.
Reading of articles from Japan's press with discussion in Japanese. Focuses on explanations and drills on the fine points in grammar and vocabulary as well as on the practice of writing in various styles. Movies and video tapes are used as supplementary materials. Prerequisite: JAPN 0600 or equivalent.

JAPN 0800. Advanced Japanese II.
See Advanced Japanese II (JAPN 0700) for course description.

JAPN 0910A. Classical Japanese.
This is an introductory course to pre-modern Japanese. It will explore the lifestyle and philosophy of samurai in 17th century Japan through reading the book, Gorin no Sho. The book comprises Miyamoto Musashii's thoughts on swordplay, winning, and mind training. The course includes reading background information in English and viewing films and dramas. Enrollment limited to 20.

The goal of this course is to develop the ability to use Japanese source materials for research in social sciences. Course covers lifestyles in two contrasting cities, Tokyo and Kyoto. Topics include topography, environmental issues, houses, urban life-styles, and natural habitation. We will ask questions: why houses are so compact in cities; why crows and boars pick on garbage, etc. Information sources are films, videos, and websites in addition to textbooks. Prerequisite: JAPN 0600 or equivalent. Enrollment limited to 20.

JAPN 0910C. Japanese Linguistics.
This course will provide a structural overview of the Japanese language. Students will learn how to develop skills for analyzing the language through looking at sounds, meaning, and grammar. Topics include linguistic analysis of various sentence structures that students often find difficult to use, learning to choose words and sentences in appropriate situations, looking at the relation between language and culture.

A traditional Japanese readings course with content both canonical and unconventional. It allows students with three years of Japanese to read from a diverse selection of 20th century Japanese novels, short stories and graphic novels. Our main focus will be on understanding the original Japanese, but some translation into English will be involved as well. In addition to selections from well-known modernists such as Natsume Soseki, Tanizaki Jun'ichi and Mishima Yukio, readings may also include works by Edogawa Ramp, Inagaki Takeo, Yoshida Nobuko, Yamauchi Ebine, Hoshi Shin'ichi, Murakami Ryu, and others to be determined by student interest. All readings in Japanese. Prerequisite: JAPN 0600 or instructor permission.

JAPN 0910E. Advanced Reading for Research.
This is an advanced reading course. Class activities include reading and translation of scholarly articles in the fields of students' interests, and of selected writings in humanities and social sciences in general or in broad perspectives. Readings include literary essays, fiction and short stories, articles from major newspapers, weekly and monthly journals/magazines. Prerequisite: JAPN0600 Advanced Japanese II. WRIT

JAPN 0920A. Business Japanese.
Designed to teach post-advanced level Japanese language, with the focus on effective oral and written communication in business situations, this course emphasizes vocabulary building in the areas of business and economics, use of formal expressions, business writing, and conversation and presentation skills, as well as familiarizing students with Japanese corporate culture, protocol, and interpersonal relationships. Prerequisite: JAPN 0700 or equivalent. Enrollment limited to 20. Instructor permission required.

JAPN 0920B. Modern Japanese Poetry.
This course is an introduction to modern Japanese poetry, which includes pre-war and post-war poetic forms. We will explore issues of modernity and identity as well as poets through a close examination of several poems each week. We will work on translations of the poems as part of the exercise of reading. The course includes reading background information in English. No prerequisites required.

This advanced Japanese class offers students the chance to read classic works of modern Japanese literature in the original as we work our way through each decade of the 20th century. We will consider both the formal properties of fiction and the historical pressures of gender, ethnicity, class, imperialism and globalization. Authors include Natsume Soseki, Akutagawa Ryunosuke, Yoshia Nobuko, Kubokawa Ineko, Mishima Yukiko and Murakami Haruki, as well as ethnic Korean writers Ch’oe Ch’ông-hŭi and Yan Sogiru, and others depending on student interest.

JAPN 1010. Readings in Contemporary Japanese Fiction.
Introduces contemporary short stories and novels by award winning writers published after 2000. Authors include Yoko Ogawa, Natsumo Kšino, Jiro Asada, Bin Konno. We will analyze why the great many readers are drawn into these literary works through socio cultural background of urban communities. Prerequisites: JAPN0700 or instructor permission.

Introduces a linguistic analysis of Japanese language to attain an overview of structure and a foundation for understanding how grammar relates to various modes of communication. Topics include discourse analysis, pragmatics, communicative intention, communication strategies, and intercultural communication gaps. Linguistic data is drawn from films and fiction. Prerequisite: basic knowledge of Japanese grammar, vocabulary, and linguistics. Enrollment limited to 20. WRIT

JAPN 1910. Independent Study.
Reading materials for research in Japanese. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

This advanced Japanese class offers students the chance to read classic works of modern Japanese literature in the original as we work our way through each decade of the 20th century. We will consider both the formal properties of fiction and the historical pressures of gender, ethnicity, class, imperialism and globalization. Authors include Natsume Soseki, Akutagawa Ryunosuke, Yoshia Nobuko, Kubokawa Ineko, Mishima Yukiko and Murakami Haruki, as well as ethnic Korean writers Ch’oe Ch’ông-hŭi and Yan Sogiru, and others depending on student interest.

Korean

KREA 0100. Korean.
Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. No prerequisite. Enrollment limited to 18. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in KREA 0200 covers the entire year and is recorded as the final grade for both semesters.
KREA 0200. Korean.

Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. Enrollment limited to 18. This is the second half of a year-long course. Students must have taken KREA 0100 to receive credit for this course. The final grade for this course will become the final grade for KREA 0100. If KREA 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

KREA 0300. Intermediate Korean.

An intermediate course in Korean designed to further communicative competence in spoken Korean and to provide additional reading practice in stylistically higher level materials that are progressively integrated into the given dialogues. Discussions on various aspects of Korean culture and society. Five classroom hours per week. Prerequisite: KREA 0200 or instructor permission.

See Intermediate Korean (KREA 0300) for course description. Prerequisite: KREA 0100-0200 or equivalent.

KREA 0500. Advanced Korean.

Aims to help students develop an advanced level of communicative competence, with special focus on enhancing their reading comprehension, essay writing, and discourse (discussion and presentation) skills. Authentic reading materials from a variety of sources will be used to introduce various topics and issues pertaining to Korean society and culture, thus students' cultural understanding will also be enhanced. Prerequisite: KREA 0400 or equivalent or permission of instructor.

KREA 0600. Advanced Korean.

See Advanced Korean (KREA 0500) for course description. Prerequisite: KREA 0500 or equivalent or permission of instructor.

KREA 0910B. Media Korean.

Develop linguistic competence and deep cultural understanding through exposure to a variety of media sources. Built on the Content-based Instruction model and Genre-based Approach. Discuss current Korean affairs and core issues of culture based on assigned materials. Develop reading and listening comprehension skills through pre-class activities, oral proficiency through in-class discussion and presentation, and writing proficiency through assigned essays writings, in addition to various integrative tasks. Tuesday classes will focus on comprehending the text and source materials, Thursday classes will focus on related tasks and activities. Enrollment limited to 20. Conducted entirely in Korean.

KREA 0920A. Korean Culture and Society.

Develops oral proficiency in Korean language through a variety of readings on Korean culture and society. By reading about and discussing important aspects and core issues of Korean, students enhance their speaking competence and cultural understanding. Prerequisites: KREA 0300 and 0400 or permission of instructor. Enrollment limited to: 15.

KREA 0920B. Business Korean.

For students who are interested in Korean culture in general and business culture in particular, and in improving their Korean language skills in a business context. The course not only focuses on business and economy-related words and expressions, but also on developing learners' confidence in business writing, conversation and presentations in Korean. Enrollment limited to 15. Prerequisite: KREA 0400 or instructor's permission.

The contemporary Korean society has undergone significant transformation in the past few decades, not only on the personal level, such as changes in personal life style and family structure, but also on the public level, such as economic development and political affairs. Various issues due to these changes have sparked a much heated debate within Korean society. This course will look into some of these major controversial issues with texts and media materials. Through this content-oriented advanced level language course, students will be able to improve their Korean language proficiency, as well as deepen their understanding of Korean culture and society. Prerequisite: KREA 0600. Enrollment limit to 18. Will replace current KREA 0900 course in schedule for Fall 2016.

KREA 1910. Independent Study.

Reading materials for research in Korean. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Interested students must register for EAST 1950W.

Economics

Chair
David N. Weil

Economics is a social scientific discipline that both studies economic activity in its narrower sense and develops methodologies for studying decision-making in a broader set of domains. Economic activity narrowly construed is that subset of people’s activities primarily concerned with the production and consumption of goods and services, the allocation of resources, goods and asset markets, the money supply, and taxation.

More broadly, economics provides a theory of rational choice that has been useful in fields ranging from the study of politics and healthcare to theoretical biology. In recent years, economists have been expanding their study of choice to also include the interaction of cognitive limitations, decision heuristics, and psychological and social influences with the rational aspects of choice.

For additional information, please visit the department's website: http://www.brown.edu/Departments/Economics/

Economics Concentration Requirements

Economics is the study of how individuals, businesses, and governments allocate resources to satisfy their objectives. The study of economics helps students understand markets, firms, financial organizations, and public debate about economic policy, including taxation, government expenditure, trade, globalization, health, and welfare. The concentration in Economics prepares students for graduate study in fields such as business and law, for graduate study leading to teaching and research in economics, and can be a steppingstone to employment in business, finance, non-profit, and government organizations. Students may choose either the standard or the professional track.

Students are required to begin with ECON 0110, an introductory course that stresses the economic problems of our society, and the vocabulary and principles of economic analysis. Intermediate level courses in microeconomics (ECON 1130), macroeconomics (ECON 1210), and econometrics (ECON 1620) round out the list of foundation courses for the concentration. Economics students must also fulfill a calculus requirement.

The economics department sponsors a number of concentration options. The most popular is the standard economics concentration, described below. Three additional concentration options are administered jointly with other departments and are described separately under their respective titles. They are the concentrations in applied mathematics–economics, in mathematical economics, and in computer science–economics. The first two are especially recommended for students interested in graduate study in economics.

The department offers many of the required courses in an interdepartmental concentration called Business, Entrepreneurship and
Organizations (BEO). BEO is jointly run by the departments of economics and sociology, and the school of engineering. BEO has three possible "tracks," of which the business economics track is most closely related to economics. Please contact the BEO administrator for more details, including information about advising in that concentration.

Standard Economics Concentration

<td>or ECON 1630</td>
<td>1</td>
</tr>
</tbody>
</table>

At least five additional 1000-level Economics courses. 2

Total Credits 11

1 Note that certain advanced economics courses may impose additional mathematical prerequisites. The standard mathematics requirement may be met through Advanced Placement tests, but "placing into" a higher level mathematics course than MATH 0100, without actually taking that higher level course, does not satisfy the requirement. The AP mathematics credit must appear on your Brown transcript.

2 Note that ECON 1960 (thesis) and ECON 1940 do not count for concentration credit.

3 If placing out of ECON 0110 with AP or IB test scores, one must take an additional 1000-level course (6 instead of 5).

All concentrators in economics programs are encouraged to consult their concentration advisors regularly. Economics concentrators who wish to study abroad should consult first with the department transfer credit advisor.

Honors

Students who wish to enroll in the honors program in economics should consult the department's undergraduate guide (available on its web site) to obtain a complete description of the requirements. See the descriptions of Capstone Projects there, as well. Courses taken to prepare an honors thesis are in addition to the regular concentration requirements.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

Economics Requirements:  
ECON 1130  Intermediate Microeconomics (Mathematical)  
ECON 1210  Intermediate Macroeconomics  
ECON 1630  Econometrics I  
Select three 1000-level courses from the "financial economics" group:  
ECON 1510  Financial Econometrics  
ECON 1710  Investments I  
ECON 1720  Corporate Finance  
ECON 1730  Venture Capital, Private Equity, and Entrepreneurship  
ECON 1750  Investments II  
ECON 1759  Data, Statistics, Finance  
ECON 1760  Financial Institutions  
ECON 1765  Finance, Regulation, and the Economy: Research  
ECON 1770  Fixed Income Securities  
ECON 1780  Corporate Strategy  
ECON 1790  Corporate Governance and Management  
Select two 1000-level courses from the "mathematical economics" group:  
ECON 1170  Welfare Economics and Social Choice Theory  
ECON 1225  Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies  
ECON 1465  Market Design: Theory and Applications  
ECON 1470  Bargaining Theory and Applications  
ECON 1640  Econometrics II  
ECON 1650  Financial Econometrics  
ECON 1660  Big Data  
ECON 1750  Investments II  
ECON 1759  Data, Statistics, Finance  
ECON 1810  Economics and Psychology  
ECON 1820  Behavioral Economics  
ECON 1850  Theory of Economic Growth  
ECON 1860  The Theory of General Equilibrium  
ECON 1870  Game Theory and Applications to Economics  
Select one 1000-level course from the "data methods" group:  
ECON 1305  Economics of Education: Research  
ECON 1310  Labor Economics  
ECON 1360  Health Economics  
ECON 1410  Urban Economics  
ECON 1510  Economic Development  
ECON 1520  The Economic Analysis of Institutions  
ECON 1530  Health, Hunger and the Household in Developing Countries  
ECON 1640  Econometrics II  
ECON 1650  Financial Econometrics  
ECON 1759  Data, Statistics, Finance  
ECON 1765  Finance, Regulation, and the Economy: Research  

Total Credits: 16

1 APMA 0330 and APMA 0340 may be substituted with advisor approval.

2 No course may be used to simultaneously satisfy the "financial economics," the "mathematical economics," or the "data methods" requirements.

3 Or ECON 1110 with permission.

Honors and Capstone Requirement

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain the approval of a faculty sponsor.

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?  
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?  
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?  
- What did you learn from the experience that probably could not have been picked up from course work?  
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.  
- Would you recommend your summer experience to other Brown students? Explain.
Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department's writing requirement by passing a course that involves significant expository writing.

Prerequisites (3 courses):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 0100</td>
<td>Introductory Calculus, Part II</td>
</tr>
<tr>
<td>MATH 0520</td>
<td>Linear Algebra</td>
</tr>
<tr>
<td>or MATH 0540</td>
<td>Honors Linear Algebra</td>
</tr>
<tr>
<td>or CSCI 0530</td>
<td>Directions: The Matrix in Computer Science</td>
</tr>
</tbody>
</table>

Required Courses (17 courses):

</tr>
<tr>
<td>or APMA 1655</td>
<td>Statistical Inference I</td>
</tr>
</tbody>
</table>

Select one of the following Series:

- **Series A**
  - CSCI 0150 & CSCI 0160: Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

- **Series B**
  - CSCI 0170 & CSCI 0180: Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction

- **Series C**
  - CSCI 0190: Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course.)

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented.

- CSCI 0220: Introduction to Discrete Structures and Probability (math)
- CSCI 0320: Introduction to Software Engineering (systems)
- CSCI 0330: Introduction to Computer Systems (systems)
- CSCI 1010: Theory of Computation
- A pair of CS courses with a coherent theme.¹
- An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement.

<table>

¹
On completion of each professional experience, the student must write a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

### Mathematics-Economics Concentration Requirements

The Mathematics Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself. Students may choose either the standard or the professional track, both award a Bachelor of Arts degree.

#### Standard Mathematics-Economics Concentration

### Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

### Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?

Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Behavioral Decision Sciences

Honors and Capstone Requirement:
Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain approval of a faculty sponsor.

Methods Classes:

Choose One From the Following: 1

- APMA 0650 Essential Statistics
- APMA 1650 Statistical Inference I
- CLPS 0900 Statistical Methods
- CSCI 0100 Data Fluency for All
- CSCI 1450 Probability and Computing
- ECON 1620 Introduction to Econometrics
- ECON 1629 Applied Research Methods for Economists

Plus One of the Following: 1

- CLPS 1791 Laboratory in Social Cognition
- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0170 Computer Science: An Integrated Introduction
- ECON 1630 Econometrics I
- PHIL 0540 Logic

Electives: 3

Students will choose three additional courses in consultation with a concentration advisor that will constitute an integrated specialization in some area of decision science. Such courses might include, but are not limited to:
A.M. students who take the core examination and pass it will continue in the Ph.D. program and receive funding. In addition, Ph.D. students can earn the A.M. on the way to the Ph.D. or can receive the A.M. if they choose not to complete the Ph.D. program. The A.M. requires passing eight courses in the areas of Microeconomics, Macroeconomics, and Econometrics.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/economics

Courses

ECON 0110. Principles of Economics.
Extensive coverage of economic issues, institutions, and terminology, plus an introduction to economic analysis and its application to current social problems. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session).

ECON 0170. Essential Mathematics for Economics.
This course teaches the mathematical skills useful for upper level Economics classes. Emphasis is on acquisition of tools, problem solving, intuition, and applications rather than proofs.

ECON 0180A. Economics on a Broad Canvas.
Where economics fits into the broader pattern of the social sciences, history, and philosophy. Topics include: the world economy from pre-history to the present; the history and varieties of economic thought; comparative economic systems; challenges facing less developed countries; positive and normative perspectives on income inequality and redistribution; and the economy and the quality of life, including the environment. Enrollment limited to 20 first year students.

Introduction to the economic aspects of the major welfare programs provided by government in American Society; Social Security, Health Care and Insurance, Education, Environmental Control. The focus of the course will be on the benefits and costs of each program and proposals for altering the scope of the public sector. Enrollment limited to 20 first year students. FYS

ECON 0180C. Punishment and Inequality in America.
This seminar will use social theory and social science evidence to understand how punishment works as a mechanism to produce inequality in American society. The institution of incarceration as a generator of inequality in American society. The institution of incarceration as a generator of inequality in American society. The institution of incarceration as a generator of inequality in American society.

Prerequisites:

ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session).

ECON 0180A. Economics on a Broad Canvas.
Where economics fits into the broader pattern of the social sciences, history, and philosophy. Topics include: the world economy from pre-history to the present; the history and varieties of economic thought; comparative economic systems; challenges facing less developed countries; positive and normative perspectives on income inequality and redistribution; and the economy and the quality of life, including the environment. Enrollment limited to 20 first year students.

Introduction to the economic aspects of the major welfare programs provided by government in American Society; Social Security, Health Care and Insurance, Education, Environmental Control. The focus of the course will be on the benefits and costs of each program and proposals for altering the scope of the public sector. Enrollment limited to 20 first year students. FYS

ECON 0180C. Punishment and Inequality in America.
This seminar will use social theory and social science evidence to understand how punishment works as a mechanism to produce inequality in American society. The institution of incarceration as a generator of social stigma is examined in this light. Zero-tolerance policing practices and racial profiling are discussed from this point of view as well. Questions about authority, legitimacy, deviancy, power and social cognition will guide the discussion. Enrollment limited to 20 first year students. FYS Writt

ECON 0180D. The Power of Data (and its Limits).
Open any newspaper, any magazine, any academic journal, you'll find claims which rely on data. Government policies, economic data, health recommendations – all of these are based on some underlying data analysis. Data used in this context has enormous power, but it also has limits. Understanding these limits is key to using – but not mis-using – the power of data.

This first-year seminar will focus on understanding where data comes from, what we can learn from it, and what the limitations are. The course will emphasize policy-relevant economic and public health applications.
We will explore the ethical and economic foundation of Human Rights and its relationship to the Cosmopolitanism View. In particular, we will explore the question of whether people should have not just human rights to liberty, life and security, but also to a basic level of economic subsistence. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 20.

ECON 0300. Health Disparities.
This seminar will examine the causes and consequences of racial and ethnic disparities in health in the United States, and their relationship to economic disparities. Although the course will be taught primarily from an economics perspective, it will draw on literature from sociology, demography and epidemiology. Enrollment determined by lottery. Prior completion of ECON 0110 or a higher-level economics course is required. SOPH

ECON 0390. Income, Wealth, and Health Inequality in the United States.
The course begins with issues of measurement and definition. We then turn to examine the economic underpinnings of inequality, including the relationship between education, skill, and income; the intergenerational transmission of wealth and economic status; and the causal relationship between health and income. The third part of the course looks at the driving forces behind the large rise in inequality that has occurred since roughly 1980 as well as differential trends in life expectancy and health behaviors among income groups over this period. The last section examines government policies that impact inequality and the political economy of redistribution.

A course designed primarily for students who do not plan to concentrate in economics but who seek a basic understanding of the economics of less developed countries, including savings and investment, health and education, agriculture and employment, and interactions with the world economy, including trade, international capital flows, aid, and migration. Prerequisite: ECON 0110 or advanced placement. Enrollment limited to 100.

Basic accounting theory and practice. Accounting procedures for various forms of business organizations.

We will examine what role economic theory plays and/or ought to play in political theory and on our conception of politics more broadly. Topics include particular political philosophies and economic concepts such as rationality and efficiency. Prerequisite: ECON 0110 or advanced placement.

This seminar is a seminar that focuses on issues of ethics that arise in the context of business and economics. Learning occurs primarily through guided student discussions in class. Other economics courses, especially ECON 0110, 1110, 1340 and 1790 are highly recommended.

ECON 1110. Intermediate Microeconomics.
Tools for use in microeconomic analysis, with some public policy applications. Theory of consumer demand, theories of the firm, market behavior, welfare economics, and general equilibrium. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1130. Intermediate Microeconomics (Mathematical).
Microeconomic theory: Theories of the consumer and firm, competitive equilibrium, factor markets, imperfect competition, game theory, welfare economics, general equilibrium. May not be taken in addition to ECON 1110. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1160. Managerial Economics.

This is an advanced microeconomic theory class for undergraduates. Building on the intermediate microeconomics course, the approach is more formal and mathematically more rigorous, presenting arguments and expecting students to carefully develop techniques in order to understand and produce logical proofs. Topics include the efficiency and coalitionability of optimal properties of markets, as well as other mechanisms to allocate resources. Market failures are discussed, including advanced treatments of externality, public goods, and asymmetric information. The second part of the course will discuss a number of topics in social choice theory, including different normative criteria of compensation, life and death choices, majority voting, Arrow’s impossibility theorem.

ECON 1185. The Welfare State.
The course will include analyses of Health Care, Social Security, Medicare, Medicaid, Immigration Control, and Environmental Control. The focus will be on the extent to which the programs meet their goals without straining the federal budget. Both existing and alternative programs will be evaluated in terms of costs, benefits, as well as their present and future demands on tax revenue and user fees. Prerequisite: ECON 1110 or 1130; and APMA 1650 or ECON 1620. Enrollment limited to 30 senior concentrators in Economics, Mathematical Economics, Applied Mathematics, Computer Science Economics, and BEO.

ECON 1210. Intermediate Macroeconomics.
The economy as a whole: Level and growth of national income, inflation, unemployment, role of government policy. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

ECON 1220. Monetary and Fiscal Policy.
This course is about macroeconomic policy with special focus on the recent economic crisis. Questions will be addressed such as: How do monetary policy affect the economy? What is the effect of government spending and tax cuts? What should the government do in the event of a financial crisis? The main objective of the course is to introduce students to the type of models and methods used in current research in macroeconomics both in the scholarly literature but also in the practice of central banks and major policy institutions.

The course is concerned with macroeconomic policy in the United States, with special focus on the recent economic crisis. The main objective of the course is to introduce students to the type of models and methods used in current research in macroeconomics both in the scholarly literature but also in the practice of central banks and major policy institutions. Events of the financial crisis and the economic recession of 2007-2009 will serve to illustrate the challenges confronted by macroeconomic analysis. Prerequisites: ECON 1110 or 1130; and MATH 0090, 0100, 0170, 0180, 0190, 0200, or 0350; or advanced placement. Enrollment limited to 30.

ECON 1275. History of Economic Thought.
Seminar explores economic thought from the classical Greek philosophers to mid-twentieth-century economists. It is not a course in economic history. Rather, it deals with the content of economic writings such as Adam Smith's Wealth of Nations and Karl Marx's Capital. This course provides you with an overview of the history of economic ideas as well as an in-depth exploration of six of major figures in the history of economics: Adam Smith, Thorstein Veblen, Alfred Marshall, Karl Marx, F. A. Hayek, and John Maynard Keynes. Prerequisites: ECON 1110 or 1130; 1210; and 1620 or 1630. Enrollment limited to 30. WRIT

ECON 1300. Education, the Economy and School Reform (EDUC1150).
Interested students must register for EDUC 1150.
ECON 1301. Economics of Education I.
This course teaches students how to use microeconomics to analyze a broad array of education policy issues. The departure of this course from ECON 1110 is the emphasis on studying microeconomics in applied settings, and in particular, using microeconomic concepts to think about, analyze, and solve policy questions in education. Prerequisite: ECON 1110 or 1130.

ECON 1305. Economics of Education: Research.
This course will cover academic research in the Economics of Education. Topics include production of student achievement, measuring student achievement, funding of public education, and school choice and school vouchers. Prerequisites: ECON 1100 or 1130; and APMA 1650 or CSCI 1450 or ECON 1620 or 1630. Enrollment limited to 25 juniors, seniors, and graduate students. WRIT DPLL

ECON 1310. Labor Economics.
Labor supply, human capital, income inequality, discrimination, immigration, unemployment. Prerequisite: ECON 1100 or 1130; and APMA 1650 or CSCI 1450 or ECON 1620 or 1630. Enrollment limited to 100. DPLL

The goal of the course is to help students to use economic theory and modern empirical methodology to think critically about the relative costs and benefits of health and education policies. By the end of the course students should feel comfortable critically evaluating proposals meant to increase human capital through school reforms, increased access to health care, or improved health environments.

ECON 1340. Economics of Global Warming.
The problem of global warming can be usefully be described with the following simple economic model. We face a tradeoff between current consumption, future consumption, and future climate, have preferences over consumption and future climate and would like to choose our optimal climate/consumption bundle. This course is organized around filling in the details required to make this model useful, characterizing the optimal climate/consumption path suggested by the model, and finally, investigating policies to achieve the optimal path.

This course equips students with theoretical and empirical tools to analyze environmental issues from the perspective of economics. First, we review when and why the markets fail, competing policy solutions (e.g., cap-and-trade), and cost-benefit analysis. Second, we survey methods to quantify the benefits of environmental regulations, including revealed and stated preference methods, a primer on climate-economic modeling, and a real-world application in a class research project. Third, we study the costs of environmental regulations. We conclude with advanced policy considerations (e.g., trans-boundary pollutants), private market solutions/corporate social responsibility, and select special topics (e.g., resources and economic development).

ECON 1355. Environmental Issues in Development Economics.
Examines environmental issues in developing countries, including air and water pollution, land use change, energy use, and the extraction of natural resources. Uses microeconomic models of households and firms, linking household/firm decision-making on environmental issues to choices in labor, land, and product markets. Develops basic empirical techniques through exercises and a project. For readings, relies exclusively on recent research to illustrate the roles of econometrics and economic theory in confronting problems at the nexus of the environment, poverty, and economic development. WRIT

ECON 1360. Health Economics.
This course introduces students to the issues, theory and practice of health economics in the US. Topics include the economic determinants of health, the market for medical care, the market for health insurance and the role of the government in health care. Course work includes data analyses using the program STATA. Prerequisites: ECON 1100 or 1130; and ECON 1620, 1629, 1630, or APMA 1650 or CSCI 1450 or other statistics background. Enrollment limited to 24. DPLL

ECON 1370. Race and Inequality in the United States.
We examine racial inequality in the United States, focusing on economic, political, social and historical aspects. Topics include urban poverty, employment discrimination, crime and the criminal justice system, affirmative action, immigration, and low wage labor markets. Black/white relations in the US are the principle but not exclusive concern. Prerequisite: ECON 1110 or 1130. Enrollment limited to 25. DPLL

ECON 1375. Inequality of Opportunity in the US.
This course examines empirical evidence on inequality of opportunity in the US. We cover recent work in economics that measures the importance of parents, schools, health care, neighborhoods, income, and race in determining children's long-term labor market success, and implications of these findings for US public policy. We will also place the empirical work in historical and philosophical context and cover a variety of statistical issues. Prerequisites: ECON 1100 or 1130; and ECON 1620, 1629, or 1630. Enrollment limited to 30 seniors.

This course provides an introduction to the important role played by legal rules for functioning of a market economy, and affecting economic activities. The tools and technique from economics will be used to make prediction about behaviour of individuals under various legal rules. The focus of the course is on the economic analysis of the contract law, the law of torts including accident and product liability laws, the property law including the intellectual property rights and the eminent domain, the litigation and the criminal law. Prerequisite: ECON 1100 or 1130. Enrollment limited to 100.

ECON 1390. Research Methods for Economists.
This course is designed to prepare students to undertake empirical research in economics. Students thinking of writing an honors thesis or conducting independent research are especially urged to take it during their junior year. We will answer such questions as what does an empirical research paper look like? How do we formulate a hypothesis to test? How can we use data to test our hypothesis? Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1100 or 1130; and APMA 1650 or CSCI 1450 or ECON 1620 or 1630.

ECON 1400. The Economics of Mass Media.
The mass media shape our culture and politics but are also shaped by their economic incentives. In this course we will use tools from microeconomics and econometrics to study the effects of mass media on economic, social and political behavior, and to study the factors that shape media content and availability. We will develop implications for business and public policy. Students will complete weekly readings, bi-weekly assignments, a take-home midterm, and a final paper and presentation. Class time will be devoted to a mix of lecture and discussion of readings and lecture topics. WRIT

ECON 1410. Urban Economics.
The first part of the course covers the set of conceptual and mathematical models widely used to understand economic activity both between and within cities. The second part of the course examines various urban policy issues including urban transportation, housing, urban poverty, segregation and crime. The course makes extensive use of empirical evidence taken primarily from the United States. Prerequisites: ECON 1100 or 1130; and APMA 1650 or CSCI 1450 or ECON 1620 or 1630. Enrollment limited to 100.

ECON 1420. Urbanization in China.
Examines urbanization processes and urban public policy in China. Also draws on historical and recent experience in the U.S. Policy areas including policies affecting urbanization, migration, and industrial location; policies affecting housing, land use, and urban reform; and policies affecting fiscal decentralization and infrastructure investments such as transportation. Prerequisites: ECON 1110 or ECON 1130. Open to juniors and seniors. DPLL
An introduction to the economic approach to demography. Applies the 
thoretical and empirical frameworks of economics to topics such as 
fertility, migration (both domestic and international), investments in health 
and human capital, life-cycle labor supply, intergenerational transmission 
of economic status, the distribution of income and wealth, and the 
interaction of population growth with the standard of living. Prerequisite: 
ECON 1110 or 1130.

ECON 1440. Economic Theories of Firms. 
Examines theories of why firms exist, their internal organizations and 
employment relations, ownership and control, efficiency versus conflict 
approaches, and alternative organizational forms (e.g., employee 
ownership). Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

Positive and normative study of the organizations that comprise and the 
institutional structures that characterize a modern mixed market economy. 
Theoretical efficiency and potential limitations of private enterprises 
and markets including (a) why some market actors are organizations 
(e.g., companies), (b) effort elicitation problems in organizations, (c) the 
problem of cooperation in traditional versus behavioral economics, and (d) 
alternative kinds of organization (including proprietorships, corporations, 
nonprofits, government agencies). Roles of government, and problems of 
government failure, including the collective action problem of democracy. 
State-market balance and contemporary controversies over the economic 
system in light of the 2008 financial crisis. Enrollment limited to 100 juniors 
and seniors. Prerequisite: ECON 1110 or 1130.

ECON 1460. Industrial Organization. 
A study of industry structure and firm conduct and its economic/antitrust 
implications. Theoretical and empirical examinations of strategic firm 
interactions in oligopolistic markets, dominant firm behaviors, and entry 
deterrence by incumbents. Also economics of innovation: research and 
development activities and government patent policies. Prerequisite: 
ECON 1110 or 1130. Some knowledge of calculus required. Enrollment 
limited to 100.

This course studies the design of organized markets, focusing on efficient 
organization and the incentives created by market rules. The analysis 
relies on a mix of documenting the rules of real-world markets, game 
theoretic analysis, empirical analysis, and experimental work. Applications 
include: online auction markets (e.g., eBay, Amazon); ad auctions (e.g., 
Google); matching markets, including matching students to schools, 
matching workers to jobs (e.g., medical residents to hospitals, lawyers 
to clerkship positions), matching kidney donors to recipients, and online 
dating. Prerequisites: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 
0100, 0170, 0180, 0190, 0200, 0350, or advanced placement; or instructor 
permission. Enrollment limited to 25 juniors, seniors, and graduate 
students.

Bargaining theory is emerging as an important area within the general 
rubric of game theory. Emphasis is on providing a relatively elementary 
version of the theory in order to make it accessible to a large number of 
students. Covers introductory concepts in game theory, strategic and 
axiomatic theories of bargaining and their connections, applications to 
competitive markets, strikes, etc. Prerequisite: ECON 1110 or 1130. 
Enrollment limited to 100.

ECON 1480. Public Economics. 
This course is an introduction to the economics of the public sector. We 
will cover theoretical and empirical tools of public economics and apply 
these tools to a wide range of issues including externalities, public goods, 
collective choice, social insurance, redistribution and taxation. The course 
will focus on questions such as: What should government do? How much 
should governments insure individuals against misfortune? How much 
should governments redistribute resources from high-income to low- 
icome households? Throughout the course we will emphasize real-world 
empirical applications rather than hypothetical examples. DPLL

The course looks at the economics of social security reform with particular 
focus on possible policy responses to the increasing fraction of the 
population that is elderly in OECD countries. Among the topics that 
will be considered are pay as you go funding, defined benefits versus 
defined concentrations, privatization, labor market effects of pensions, 
retirement decisions, labor supply by couples, and macroeconomic effects. 
Prerequisite: ECON 1110 or 1130. Enrollment limited to 30. Not open to 
first-year students. DPLL

ECON 1486. The Economic Analysis of Political Behavior. 
Slow economic growth, controversial policy, and over a decade of 
continuous war have led many to question the extent to which government 
is a force for the common good. Blame is often assigned to specific 
politicians or ideological perspectives. Public choice economics instead 
analyzes the incentive structure within which political decisions take place, 
seeking to uncover the forces guiding the behavior of voters, legislators, 
judges, and other political agents. This course will examine the insights 
and limitations of the public choice perspective in the context of electoral 
politics, legislation, bureaucracy and regulation, and constitutional rules. 
WRIT

ECON 1490. Designing Internet Marketplaces. 
How has the digital economy changed market interactions? The goal of 
this course is to help you think critically, using economic theory, about 
the future of the digital economy. 
What are important economic activities now being conducted digitally? 
How has digital implementation of these activities changed economists' 
classical views and assumptions? 
What are ways in which we can use economics to engineer “better” digital 
markets? 
We will focus on several real-world markets (e.g. eBay, Airbnb, Google 
advertising, Uber, Tinder, TaskRabbit) and topics (eg. market entry, pricing, 
search, auctions, matching, reputation, peer-to-peer platform design).

ECON 1500. Current Global Macroeconomic Challenges. 
Analysis of current economic challenges in the U.S., Europe, Japan, 
and China. Topics include fiscal and monetary policies, international 
trade, capital flows and exchange rate policy, and policies for long-run 
growth. Emphasis on macroeconomic policies in the individual nations 
and their interaction with each other. Prerequisites: ECON 1210. Also 
recommended: ECON 1550 and 1850. Enrollment limited to 100.

ECON 1510. Economic Development. 
This course is an introduction to development economics and related 
policy questions. It discusses the measurement of poverty and inequality; 
growth; population change; health and education; resource allocation 
gender; land and agriculture; and credit, insurance, and savings. 
The course provides a theoretical framework for the economic analysis of 
specific problems associated with developing economies, and introduces 
empirical methods used to evaluate policies aimed at solving these 
problems. By the end of the class, students will be able to discuss some of the 
“hot topics” in development, like microfinance, family planning, or the 
problem of “missing women” in South-East Asia. DPLL

ECON 1520. The Economic Analysis of Institutions. 
This course deals with the economic analysis of institutions, with a 
focus on developing countries. The first section covers institutions in 
traditional agrarian societies. Topics include consumption smoothing and 
the organization of land, labor and credit markets. The second section 
focuses on the role of the community in facilitating economic activity. 
Institutions include cooperatives, networks, marriage and the family. 
Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 
1630; or equivalent. Enrollment limited to 45. DPLL
ECON 1525. Privatization of State Owned Enterprises.
After world war II, many western economies (foremost the U.K and france) nationalized major industries, including the infrastructure sector (e.g. Electricity, Telecommunication and Rail. Thirty years later, due to miserable performance, an apposite trend started to shift ownership of state owned enterprises (SOE) to private ownership. We shall discuss the following major topics:
The Record on Performance and Reform of State-Owned Enterprises
The Rational for and problems of Public Ownership
Privalization of/natural Monopolies: Theory and Evidence Regulation:
Structure and Methods
Deregulation and Competition Policy
Labor and Privatization
Methods of Privatization: Auctions, Share Flotations, Concessions and Strategic Investors

ECON 1530. Health, Hunger and the Household in Developing Countries.
Microeconomic analysis of household behavior in low income societies emphasizing the economic determinants of health and nutrition and the evaluation of policy. The relationship among health, nutrition, fertility, savings, schooling, labor productivity, wage determination, and gender-based inequality. Emphasizes theoretically-based empirical research. Enrollment limited to 30. WRIT DPLL

ECON 1540. International Trade.
Theory of comparative advantage, trade, and income distribution. Welfare analysis of trade: gains from trade, evaluation of the effects of trade policy instruments-tariffs, quotas, and subsidies. Trade under imperfect competition. Strategic trade policy. Trade, labor markets, preferential trade agreements, and the world trading systems. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1550. International Finance.
The balance of payments; identification and measurement of surpluses and deficits; international monetary standards; the role of gold and paper money; government policies; free versus fixed exchange rates; international capital movements; war and inflation; the International Monetary Fund. Prerequisite: ECON 1210. Enrollment limited to 100.

ECON 1560. Economic Growth.
A theoretical and empirical examination of economic growth and income differences among countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Prerequisite: ECON 1110 or 1130; and MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200 or 0350; or advanced placement. Enrollment limited to 100.

ECON 1565. Income Inequality.
This course examines the macroeconomic dimensions of income inequality. How much of national income is paid to capital and how much to labor? What determines the gap in wages between workers with different skill levels, as well as variation in wages within skill groups? How have changes in technology, openness to trade, government policy, and the quantities of factors of production contributed to changes in these relative returns? What determines the aggregate quantities of different factors of production as well as their distribution among individuals? How does inequality feed back to affect macroeconomic stability and long term growth?

Recent histories, institutional structures, and performance of industrialized economies of the U.S., Europe and Asia. The Marxian critique of capitalism; the theory of centrally planned economies; the Soviet economy; and problems of reform and transition. Workers' self-management as an alternative industrial order. Prerequisite: EC 111 or 113.

ECON 1590. The Economy of China since 1949.
This course examines the organization, structure, and performance of the economy of mainland China, with a focus on urban and regional development. The course analyzes the changing economic system including the roles of planning and markets and government economic strategy and policies. The pre-reform period (1949-78) receives attention in its own right, but especially as it influences developments in the market-oriented reform period since 1978. Topics covered include rural and urban development, industrialization and FDI, housing and land markets, rural-urban migration, income inequality and growth, and the evolving spatial structure of cities. Both analytical and descriptive methods are used. Prerequisite: ECON 1110 or 1130. ECON 1210 and 1410 are helpful but not required. Enrollment limited to 100. DPLL.

ECON 1600. Economics of the Middle East.
A survey of the economies of the Middle East. Examines various aspects of the economic realities of the region, including economic and human development, water and food security, the economics and politics of oil, population growth and labor mobility, education, the role of the state, economic reform, the political economy of conflict and peace, and the prospects for regional integration. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1620. Introduction to Econometrics.
Probability and statistical inference. Estimation and hypothesis testing. Simple and multiple regression analysis. Applications emphasized. Prerequisite: ECON 0110 or advanced placement, or ECON 1110 or ECON 1130, and MATH 0090. Weekly one-hour computer conference required.

This class will cover the basics of applied research in economics. We will cover how we use economic theory to formulate a hypothesis to test and how we use data to test our hypothesis. As part of the coursework, students will be exposed to topics across multiple fields of applied economic research (e.g., health, labor, political economy, urban economics, development, etc) that can be explored in greater detail in more advanced classes. Students will read and discuss papers published in professional journals and perform data analysis as part of the course requirements. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630.

ECON 1630. Econometrics I.
Advanced introduction to econometrics with applications in finance and economics. How to formulate and test economic questions of interest. The multivariate linear regression model is treated in detail, including tests of the model's underlying assumptions. Other topics include: asymptotic analysis, instrumental variable estimation, and likelihood analysis. Convergence concepts and matrix algebra are used extensively. Prerequisites: ECON 0110 or advanced placement; and ECON 1110 or 1130; and APMA 1650 or CSCI 1450, MATH 1620, or ECON 1620; or equivalent.

ECON 1640. Econometrics II.
Continuation of ECON 1630 with an emphasis on econometric modeling and applications. Includes applied topics from labor, finance, and macroeconomics. Prerequisite: ECON 1630. Enrollment limited to 100.

Financial time series, for example, asset returns, options and interest rates, possess a number of stylized features that are analyzed using a specific set of econometric models. This course deals with an introduction to such models. It discusses time series models for analyzing asset returns and interest rates, GARCH models to explain volatility, models to explain extreme events which are used for the Value at Risk and models for options prices. Prerequisite: ECON 1630 or instructor permission. Enrollment limited to 100.
ECON 1660. Big Data. The spread of information technology has lead to the generation of vast amounts of data on human behavior. This course explores ways to use this data to better understand the societies in which we live. The course weaves together methods from machine learning (OLS, LASSO, trees) and economics (reduced form causal inference, economic theory, structural modeling) to answer real world questions in a sequence of projects. We will use these projects as a backdrop to weigh the importance of causality, precision, and computational efficiency. Knowledge of basic econometrics and programming is assumed.

ECON 1670. Advanced Topics in Econometrics. This class will present advanced topics in Econometrics. The focus will be on cross-sectional methods; the class will start with some basic results needed for any advanced econometrics work, before giving an introduction to asymptotic and identification techniques and concepts, with some applications.

ECON 1710. Investments I. The function and operation of asset markets; the determinants of the prices of stocks, bonds, options, and futures; the relations between risk, return, and investment management; the capital asset pricing model, normative portfolio management, and market efficiency. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650 or CSCI 1450.

ECON 1720. Corporate Finance. A study of theories of decision-making within corporations, with empirical evidence as background. Topics include capital budgeting, risk, securities issuance, capital structure, dividend policy, compensation policy, mergers and acquisitions, real options, financial engineering, securitization. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650 or CSCI 1450; and ECON 1710.

ECON 1730. Venture Capital, Private Equity, and Entrepreneurship. This course will use a combination of lectures and case discussions to prepare students to make decisions, both as entrepreneurs and venture capitalists, regarding the financing of rapidly growing firms. The course will focus on the following five areas: 1. Business valuation 2. Financing 3. Venture Capital Industry 4. Employment 5. Exit

ECON 1750. Investments II. Individual securities: forwards, futures, options and basic derivatives, pricing conditions. Financial markets: main empirical features, equity premium and risk-free rate puzzles, consumption based asset pricing models, stock market participation, International diversification, and topics in behavioral finance. Prerequisite: ECON 1110 or 1130; ECON 1620 or 1630 or APMA 1650 or CSCI 1450; and ECON 1710.

ECON 1759. Data, Statistics, Finance. An experimental course that prepares students for research of the type conducted in academic finance, hedge funds, and some advanced consulting firms and I-Banks. Nothing like this is offered at any other university as far as the instructor knows. Students that do well in this course should have a head start in academic finance PhD programs, as well as in MBA programs, quantitatively oriented investment funds, finance companies, and consulting firms. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650. CSC/0040 or equivalent also recommended as background. Enrollment limited to 20. S/NC

ECON 1760. Financial Institutions. This course analyzes the role of financial institutions in allocating resources, managing risk, and exerting corporate governance over firms. After studying interest rate determination, the risk and term structure of interest rates, derivatives, and the role of central banks, it takes an international perspective in examining the emergence, operation, and regulation of financial institutions, especially banks. Prerequisites: ECON 1110 or 1130; and 1210. Enrollment limited to 100.

ECON 1765. Finance, Regulation, and the Economy: Research. Analyzes the role of financial markets and institutions in allocating resources and exerting governance over firms, how regulation shapes finance, and how finance influences the enactment and impact of financial regulation. The class will use: economic theory to develop a solid conceptual framework for understanding how finance affects economic growth, income distribution, and stability; empirical evidence to assess theory; and history to put the role of finance into a long-term framework. Current events will be continuously used to keep the class relevant. Prerequisites: ECON 1110 or 1130; and ECON 1210; and ECON 1630; and ECON 1720 or 1760. Enrollment limited to 30 senior concentrators in Economics, BEO, Applied Math-Economics, Computer Science-Economics, and Math-Economics.

ECON 1770. Fixed Income Securities. The fixed income market is much larger than the stock market in the U.S. Topics covered in this course include basic fixed income securities, term structure, hedging interest rate risk, investment strategies, fixed income derivatives, mortgage-backed securities and asset-backed securities. Prerequisite: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650 or CSCI 1450; and ECON 1710 or 1720. Enrollment limited to 100.

ECON 1780. Corporate Strategy. This course teaches analysis of strategic decisions facing an organization. We cover traditional strategy topics such as capabilities and sustainability as well as modern game theory models of competition. A central integrating idea is anticipating the response of other actors in the economy and recognizing that often an organization’s profits depend on the actions of other firms. Prerequisites: ECON 1110 or 1130; and APMA 1650 or ECON 1620 or 1630; and ECON 1720.

ECON 1790. Corporate Governance and Management. A corporation’s economic success depends on access to human capital and other resources, effective management of these resources, and a governance system that ensures effective decision making. The course offers policy prescriptions in economic incentives and regulatory rules that attempt to align management with investors. Prerequisites: ECON 1110 or 1130; and ECON 1620 or 1630 or APMA 1650 or CSCI 1450; and ECON 1720; and ECON 0710. Enrollment limited to 40.

ECON 1800. Politics and Finance. This course examines how legislation and regulation influences the structure of financial markets and how players in these markets intervene in the political process to create or modify legislative and, regulatory outcomes. Particular emphasis will be placed on the environment in the United States. International comparisons will also be present. Prerequisites: ECON 1110 or 1130; and ECON 1770. Enrollment limited to 30.

ECON 1810. Economics and Psychology. This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers' behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as "Bayesian statisticians". Special emphasis will be put on the implications of "psychologically richer" models on market behavior. Prerequisite: ECON 1110 or 1130; and MATH 0100 or 0170 or 0180 or 0190 or 0200 or 0350 or advanced placement; and ECON 1620 or 1630 or APMA 1650 or MATH 1610. Enrollment limited to 100.

ECON 1820. Behavioral Economics. This course provides a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality, happiness and neuroeconomics. For each area of study we begin with the standard model of rational decision making, and discuss what behavior this model can explain. We then discuss the experimental evidence that indicates that the standard model is missing something important, and the models that have sprung up to account for these violations. Finally, we will look at the implications of these new models for our understanding of how the economy operates.
ECON 1850. Theory of Economic Growth. Analysis of the fundamental elements that determine economic growth. It examines the role of technological progress, population growth, income inequality, and government policy in the determination of (a) the pattern of economic development within a country, and (b) sustainable differences in per capita income and growth rates across countries. Prerequisites: ECON 1210 and either APMA 0330, 0350 (or equivalent), MATH 0180, 0200, or 0350 (or equivalent). Enrollment limited to 100.

ECON 1860. The Theory of General Equilibrium. Existence and efficiency of equilibria for a competitive economy; comparative statistics; time and uncertainty. Prerequisite: ECON 1110 or 1130. Enrollment limited to 100.

ECON 1870. Game Theory and Applications to Economics. Study of the elements of the theory of games. Non-cooperative games. Repeated games. Cooperative games. Applications include bargaining and oligopoly theory. Prerequisites: ECON 1110 or 1130; and MATH 0100, or 0170, or 0180, or 0190, or 0200, 0350, or advanced placement; and ECON 1620 or 1630 or APMA 1650 or CSCI 1450, or MATH 1610. Enrollment limited to 100.

ECON 1880. Introduction to Two-Sided Matching Markets. First, we will discuss the several elements that characterize a two-sided matching market and will model several of these markets under the game-theoretic approach. Then, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets. Prerequisites: ECON 1110 or 1130; and ECON 1870.

ECON 1900. Current Economic Research: Undergraduate Seminar. The purpose of this seminar is to bring to the undergraduates concentrating in economics, applied math-economics, mathematical economics and computer science-economics a taste of the first-rate research that is being done in the economics department at Brown. Prerequisites: ECON 1110 or 1130; ECON 1210; ECON 1620 or APMA 1650 or CSCI 1450 or MATH 1610 or 1620; ECON 1629 or 1630. Enrollment limited to 30.

Note this course does not count toward Economics concentration credit.

ECON 1960. Honors Tutorial for Economics Majors. Students intending to write an honors thesis in economics must register for this class. The goal is to help students with the process of identifying and defining feasible topics, investigating relevant background literature, framing hypotheses, and planning the structure of their thesis. Each student must find a thesis advisor with interests related to their topic and plan to enroll in ECON 1970 during the final semester of senior year. Note this course does not count toward Economics concentration credit.

ECON 1970. Independent Research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ECON 1994. Senior Thesis and Independent Research in Finance and Applied Economics. An opportunity for seniors in economics to pursue a research project in the areas of applied economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

ECON 1995. Senior Thesis and Independent Research in Finance and Applied Economics. An opportunity for seniors in economics to pursue a research project in the areas of Applied Economics and finance, broadly defined, within the context of a discussion group. Students writing honors theses may register for this course both fall and spring. Students pursuing one-semester research projects may register either fall or spring. Open only to seniors in an Economics concentration.

ECON 2020. Applied Economics Analysis. This course provides students with skills needed to integrate economic theory, econometric methods, and data management in the analysis of economic problems. Provides a hands-on perspective including assignments designed to derive testable propositions from simple economic models, illustrate the loading, cleaning and merging of complex survey data, and provide experience in the selection and interpretation of basic econometric methods.

ECON 2030. Introduction to Econometrics I. The probabilistic and statistical basis of inference in econometrics.

ECON 2040. Econometric Methods. Applications of mathematical statistics in economics. The nature of economic observations, cross-section and time series analysis, the analysis of variance and regression analysis, problems of estimation.

ECON 2050. Microeconomics I. Decision theory: consumer's and producer's theory; general competitive equilibrium and welfare economics: the Arrow-Debreu-McKenzie model; social choice and implementation.

ECON 2060. Microeconomics II. Economics of imperfect information: expected utility, risk and risk aversion, optimization under uncertainty, moral hazard, and self-selection problems. Economics of imperfect competition: monopoly; price discrimination; monopolistic competition; market structure in single shot, repeated and stage games; and vertical differentiation.

ECON 2070. Macroeconomics I. Consumption and saving, under both certainty and uncertainty; theory of economic growth; real business cycles; investment, and asset pricing.

ECON 2080. Macroeconomics II. Money, inflation, economic fluctuations and nominal rigidities, monetary and fiscal policy, investment, unemployment, and search and coordination failure.

ECON 2090. Topics in Microeconomics: Decision Theory and Evidence. Decision theory is the use of axiomatic techniques to understand the observable implications of models of choice. It is central to the incorporation of psychological insights into economics, and provides a vital link between theory and experimental economics. This course covers standard economic models of choice in different domains - choice under risk, choice under uncertainty and intertemporal choice. It looks at key topics from behavioral economics: choice with incomplete information, reference dependent preferences, temptation and self control, the Allais paradox, ambiguity aversion and neuroeconomics. In each case it relates the predictions of theory to experimental data on behavior.

ECON 2130. Topics in Monetary Economics. Business cycle analysis with an emphasis on heterogeneous-agent economics and the interaction between business cycles and economic growth.

ECON 2150. Market Design. This is a theoretical course in market design, specifically studying the theory and applications of matching. It is designed for students interested in market and mechanism design, and may also be of interest to students interested in utilizing applied theory in their research. The course will begin with an overview of matching markets, but will quickly move to recent advances and open research topics.

ECON 2160. Risk, Uncertainty, and Information. Advanced topics in the theories of risk, uncertainty and information, including the following: Decision making under uncertainty: expected and non-expected utility, measures of risk aversion, stochastic dominance. Models with a small number of agents: optimal risk-sharing, the principal-agent paradigm, contracts. Models with a large number of agents: asymmetric information in centralized and decentralized markets. Implementation theory.

ECON 2190A. Cooperative Game Theory.
No description available.

ECON 2190B. General Equilibrium Theory.
No description available.

ECON 2190C. Topics in Economic Theory.
No description available.

ECON 2190D. Topics on Game Theory.
First, we will discuss the several elements that characterize a two-sided matching market and the concept of setwise-stability versus core. Then, we will model several of these markets (one-to-one, many-to-one and many-to-many, in the discrete and continuous cases) under the game-theoretic approach and will define for all of them the stability concept, establishing its relationship with the core and the competitive equilibrium concepts. Afterwards, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching market.

ECON 2190E. Topics in Economics: Economics and Psychology.
This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a “richer psychology” than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers’ behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as “Bayesian statisticians”. Special emphasis will be put on the implications of “psychologically richer” models on market behavior.

ECON 2210. Political Economy I.
An introduction to political economy, focusing especially on the political economy of institutions and development. Its purpose is to give a good command of the basic tools of the area and to introduce at least some of the frontier research topics. The readings will be approximately evenly divided between theoretical and empirical approaches.

ECON 2260. Political Economy I.
This first course in political economy provides theoretical and empirical coverage of the application of economic analysis to political behavior and institutions. This course is designed for students wishing to specialize in political economy but may also be useful for students specializing in related areas, such as development economics and macroeconomics. After starting with a basic overview of candidates and voters, we then turn to specific topics in the areas of electoral systems, legislatures and legislative bargaining, the role of the media, local public finance, and fiscal federalism.

ECON 2270. Political Economy II.
This is the second course in the political economy sequence. It continues the theoretical and empirical coverage of the economic analysis to political behavior and institutions. This course is designed for students wishing to specialize in political economy. A variety of topics will be covered paying special attention to the formation of skills necessary to become a producer of research and moving away from being just a consumer.

ECON 2320. Economics of Labor and Population.
This course examines identification issues in empirical microeconomics. Focus on the sensible application of econometric methods to empirical problems in economics and policy research -- particularly labor and population economics. The course examines issues that arise when analyzing non-experimental data and provides a guide for tools that are useful for applied research. The course also emphasizes how a basic understanding of theory and institutions can help inform the analysis. By the end of the course, students should have a firm grasp of the types of research designs and methods that can lead to convincing analysis and be comfortable working with large-scale data sets.

ECON 2330. Topics in Labor Economics.
The course introduces students to procedures used to extract evidence from data and to perform rigorous causal inference in order to evaluate public policy on issues such as schooling, the return to education and returns on late intervention programs. Econometric methods, such as Instrumental Variable, Matching, Control Functions, Self Selection Models and Discrete Choice as well as Panel Data Methods, are discussed in detail.

ECON 2350. Inequality and Social Policy.
This is a survey course about economic and social inequality with a focus on the applied methods used to examine inequality. The course will provide a broad perspective on the causes and consequences of inequality, develop an understanding of the data and methods used to measure and analyze changes in income and wellbeing, and review selected topics relating to anti-poverty and social policy programs.

ECON 2360. Economics of Health and Population.
An introduction to current research in the economics of health and population. Focuses on studies of empirically-tractable and tested models of individual, household, and firm behaviors and how these behaviors interact through markets and other institutions. Among the subjects considered are the economics of fertility and marriage, the operation of the health services sector, and the implications of population aging.

ECON 2370. Inequality: Theory and Evidence.
This course uses economic theory to study the problems of inequality. The emphasis is two-fold: (1) to explain persistent resource disparities between individuals or social groups; and, (2) to assess the welfare effects of various equality-promoting policies. Topics include racial stereotypes, residential segregation, distributive justice, incentive effects of preferential policies, dysfunctional identity, and endogenous inequality due to the structure of production and exchange.

ECON 2410. Urbanization.
The first part of the course covers social interactions, productivity spillovers, systems of cities models, urban growth, and rural-urban migration. The second part of the course covers topics such as durable housing, land market regulation and exclusion, and local political economy. Besides covering basic theoretical models, emphasis is placed on working through recent empirical papers on both the USA and developing countries. Prerequisites: ECON 2050 and 2060.

ECON 2420. The Structure of Cities.
This course covers standard urban land use theory, urban transportation, sorting across political jurisdictions, hedonics, housing, segregation and crime. Empirical examples are taken primarily from the United States. After taking the course, students will have an understanding of standard urban theory and of empirical evidence on various important applied urban topics. In addition, students will gain practical experience in manipulating spatial data sets and simulating urban models.

ECON 2450. Exchange Scholar Program.

ECON 2470. Industrial Organization.
The focus of this course will be on empirical models for understanding the interactions between firms and consumers in imperfectly competitive markets. Lectures and problem sets will teach canonical models and methods; class discussion will focus on applications of these methods, especially applications outside of traditional areas of industrial organization. Students who take this class will be prepared to conduct research in industrial organization or to "export" methods from industrial organization to other areas of applied microeconomics.

ECON 2480. Public Economics.
Theoretical and empirical analysis of the role of government in private economies. Topics include welfare economics, public goods, externalities, income redistribution, tax revenues, public choice, and fiscal federalism.
ECON 2485. Public Economics I.
This course covers core issues in the design of optimal government policies, and the empirical analysis of those policies in the world. In addition, this course will familiarize students with the basic empirical methods and theoretical models in applied microeconomics. Emphasis is placed on connecting theory to data to inform economic policy. Specific topics include efficiency costs and incidence of taxation, income and corporate taxation, optimal tax theory, tax expenditures and tax-based transfer programs, welfare analysis in behavioral models, and social security and retirement policy.

ECON 2490. Public Finance II.
This course examines empirical work on (1) individual taxation and (2) human capital production. The goal of the course will be to provide graduate students with an overview of recent empirical methods and findings in these areas, and to identify promising research questions for their own work.

ECON 2510. Economic Development I.
This course covers issues related to labor, land, and natural resource markets in developing countries, in partial and general equilibrium settings. Topics covered include: The agricultural household model, under complete and incomplete market assumptions; household and individual labor supply, migration, self-employment, and the informal sector; rental market frictions and sharecropping arrangements; and environmental externalities (e.g., pollution, water usage, etc.), and sustainable development.

ECON 2520. Economic Development II.
This course deals with the economic analysis of institutions, with a particular focus on community-based institutions in developing countries. Institutions covered in this course includes cooperatives, ROSCAS, networks, marriage and the family.

ECON 2530. Behavioral and Experimental Economics.
An introduction to the methodology of experimental economics with an emphasis on experiments designed to illuminate problems in organizational design and emergence of institutions, and experiments investigating the operation of social and social-psychological elements of preference such as altruism, inequality aversion, reciprocity, trust, concern for relative standing, envy, and willingness to punish norm violators. Experiments studied will include ones based on the prisoners’ dilemma, dictator game, ultimatum game, and especially the voluntary contribution mechanism (public goods game) and the trust game.

ECON 2580. International Trade.
General equilibrium analysis of the theory of international trade and trade policy under perfect competition; trade under imperfect competition; strategic trade policy; trade and growth; and the political economy of trade policy determination. Empirical analysis of trade theories and policy. Additional topics include the theory of preferential trading areas, trade and labor, and the analytics of trade policy reform.

ECON 2590. Topics in International Economics.
Advanced theoretical and empirical research topics in international economics emphasizing positive and normative analysis of trade, trade policy and international trading agreements, policy reform and stabilization, exchange rate determination, sovereign debt and currency crises and optimum currency areas.

ECON 2600. Bayesian and Structural Econometrics.
This course will cover a number of topics in Bayesian econometrics and estimation of structural dynamic discrete choice models. The Bayesian econometrics part of the course will start with introductory textbook material (Geweke, 2005, Contemporary Bayesian Econometrics and Statistics, denoted by G). A list of 11 topics with corresponding readings is given below. Topics 1-5 will be covered. If time permits, a subset of topics 6-11 determined by interests of the course participants will be covered as well. Readings marked with asterisk * are not required.

ECON 2610. Applied Econometrics.
Topics in applied econometrics. Both cross-sectional and time series issues will be discussed. Special emphasis will be placed on the link between econometric theory and empirical work.

ECON 2630. Econometric Theory.
Standard and generalized linear models, simultaneous equations, maximum likelihood, Bayesian inference, panel data, nonlinear models, asymptotic theory, discrete choice, and limited dependent variable models.

ECON 2640. Microeconometrics.
Topics in microeconometrics treated from a modern Bayesian perspective. Limited and qualitative dependent variables, selectivity bias, duration models, panel data.

ECON 2660. Recent Advances in the Generalized Method of Moments.
Method of Moments (GMM) and Empirical Likelihood (EL). Kernel methods for density and regression estimation. Optimal instruments and local EL. Applications to non-linear time series models, Euler equations and asset pricing.

ECON 2820. Discrete Dynamical Systems and Application to Intertemporal Economics.
This course will focus on the qualitative analysis of discrete dynamical systems and their application for Intertemporal Economics.

ECON 2830. Economic Growth and Comparative Development.
There will be a focus on the determination of economic growth across countries, regions, and ethnic groups. The course will analyze the determinants of economic growth using the entire course of human history and will examine the role of deeply-rooted geographical, institutional, cultural, and genetic factors observed in the study of uneven development across the globe.

ECON 2840. Empirical Analysis of Economic Growth.
Examines economic growth, focusing on the effects of technological change, fertility, income inequality, and government policy. ECON 2830 is strongly recommended.

ECON 2850. Theory of Innovation-Based Growth.
Issues concerning innovation-based growth theory, including scale effects and effects of research and development versus capital accumulation. Interactions between growth and phenomena such as fluctuations, unemployment, natural resources, competition, regulation, patent policy, and international trade.

ECON 2860. Comparative Development.
Weighing the shadow of history on contemporary economic performance occupies an increasing part of the agenda among growth and development economists. This course will focus on recent contributions in the literature of the historical determinants of comparative development paying particular attention on how to integrate the use of Geographic Information Systems (GIS) in the research inquiry. The goal is to get you thinking about the big historical processes that have shaped the modern world. We will go over background concepts, critically review recent works and talk about new research designs, like that of spatial regression discontinuity.

ECON 2890D. Topics in Macroeconomics, Development and Trade.
This is a graduate class that covers selected topics at the intersection of macroeconomics, economic development and trade, for students in the second year of the PhD and above. The leading theme of the course is the determinants of the observed cross-country differences in income per capita and growth rates, with a focus on the long run. We start by reviewing theories where factor markets function perfectly and only aggregates matter. We then move to non-aggregative theories, placing special emphasis on theories of financial frictions. We spend some time studying the stochastic growth model with partially uninsurable idiosyncratic risk.
ECON 2920A. Advanced Econometrics - Microeconometrics from a Semiparametric Perspective.
This course is concerned with a rigorous, state-of-the-art introduction to Micro-econometrics. In particular, we will review many of the more recent contributions in Microeconometric Theory. While the focus of this course is theoretical, we will also be concerned with applications and the applicability of these methods. More specifically, we will consider nonparametric regression and density estimation methods, as well as methods and models for binary and categorical dependent variables, for limited dependent variables in general, and for models of selection. We will also discuss more general nonparametric IV models. Prerequisites are: Introductory Econometrics (at the level of the Wooldridge (2002)).

ECON 2920B. Topics in Game Theory.
No description available.

ECON 2930. Workshop in Applied Economics.
No description available.

ECON 2950. Workshop in Econometrics.
No description available.

ECON 2960. Workshop in Macroeconomics and Related Topics.
No description available.

ECON 2970. Workshop in Economic Theory.
No description available.

ECON 2971. Race and Inequality Seminar.
This is a workshop primarily for graduate students and faculty in the Department of Economics where original research on issues of race and inequality are presented by external visitors, along with Brown faculty and graduate students. No course credit.

ECON 2980. Reading and Research.
Individual research projects. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ECON 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Education
Chair
Kenneth K. Wong
The Department of Education focuses its scholarly and teaching efforts on the study of human learning and development, the history of education, teaching, school reform, and education policy. Students study education from a variety of disciplinary perspectives, including anthropology, economics, history, political science, psychology, and sociology. The department offers a wide range of courses designed for students seeking an understanding of the many facets of education from multidisciplinary perspectives.

For additional information, please visit the department's website: http://www.brown.edu/academics/education/

Education Studies Concentration Requirements
Education Studies takes a multidisciplinary, liberal arts approach to the field of education while focusing on the study of human learning and development, the history of education, teaching, school reform, and education policy. Concentrators choose an area of emphasis, either Policy-and-History or Human Development. Policy-and-History provides the historical underpinnings and intellectual skills for students to think critically about education issues in a number of settings. In the Human Development area, students learn about psychological, social, and cultural processes in a variety of contexts, including schools, families, peer groups, and neighborhoods, particularly in urban settings. Additionally, the Department offers teacher certification programs in elementary and secondary education. Finally, concentrators might also consider pursuing the Engaged Scholars Program, which allows students to connect theory and practice and gain hands-on experience working with community partners. Luther Spoehr (luther_spoehr@brown.edu) is the Director of Undergraduate Studies, and advisor to all seniors and to juniors on the Policy-and-History track. Yoko Yamamoto (yoko_yamamoto@brown.edu) advises juniors on the Human Development track and all sophomores.

Concentration Requirements
The concentration in Education Studies requires a total of 10 courses. At least eight must be taken in the Education Department at Brown University. One course must either be a qualitative methods course (EDUC 1100) or a quantitative methods course (EDUC 1110) or an approved equivalent in another department. Five courses must be taken in one of the two Areas of Emphasis, either Human Development or Policy-and-History. Electives may be additional Brown University Education courses, courses chosen from a list of pre-approved Brown University courses outside the Education Department, or courses at Brown or other universities that receive specific approval in advance from the Director of Undergraduate Studies.

Students in the Human Development Area of Emphasis should note that because they must take a foundational course in History and another in Policy, they will need only two additional Electives to meet the ten-course requirement. Students in the Policy-and-History Area of Emphasis must take one foundational course in Human Development plus one additional Education course outside Policy-and-History, plus two Electives. Electives may include any Education courses taken outside the Area of Emphasis or approved courses taken in other departments.

Concentrators are required to take at least one foundational course in each of four Core Categories: Human Development, History, Policy, and Research Methods. Foundational courses taken in the Area of Emphasis count toward the total of 5 required for that Area of Emphasis.

Foundational courses available in each of the required Core Categories:

**Human Development**

Courses in Policy-and-History Area of Emphasis

5 Courses in Policy-and-History (from the list below) 5

EDUC 0400  The Campus on Fire: American Colleges and Universities in the 1960's
EDUC 0410B  Controversies in American Education Policy: A Multidisciplinary Approach
EDUC 0410E  Empowering Youth: Insights from Research on Urban Adolescents
EDUC 0610  Brown v. Board of Education
EDUC 0850  History of Intercollegiate Athletics
EDUC 1020  The History of American Education
EDUC 1030  Comparative Education
EDUC 1035  Decolonizing African Education: Student Activism and Social Change, 1960-present
EDUC 1040  Sociology of Education
EDUC 1050  History of African-American Education
EDUC 1060  Politics and Public Education
EDUC 1130  Economics of Education I
EDUC 1150  Education, the Economy and School Reform
EDUC 1160  Evaluating the Impact of Social Programs
EDUC 1200  History of American School Reform
EDUC 1630  Strategic Management for School System Excellence
EDUC 1650  Policy Implementation in Education
EDUC 1720  Urban Schools in Historical Perspective
EDUC 1730  American Higher Education in Historical Context
EDUC 1740  Academic Freedom on Trial: A Century of Campus Controversies

1 Foundational course in Human Development 1
1 additional Education course outside Policy-and-History 1
1 Methods course 1
2 Electives 2

Total Credits 10

Additional Education courses available as Electives for either Area of Emphasis

EDUC 0900  Fieldwork and Seminar in Secondary Education
EDUC 0950  Learning About Learning: Classrooms in Context
EDUC 1010  The Craft of Teaching
EDUC 1090  Adolescent Literature
EDUC 1560  Philosophy of Teaching
EDUC 1690  Literacy, Community, and the Arts: Theory into Practice

Honors

Concentrators seeking to graduate with honors must apply for honors candidacy by the end of their sixth semester. Successful candidates must meet all requirements for the concentration; maintain a minimum grade average that includes more A's than B's in Education courses (a B must be counterbalanced by two A's); and successfully complete EDUC 1990 and EDUC 1991, in which they write a senior thesis under the guidance of a thesis advisor. Honors are awarded on the basis of thesis quality. Students whose theses meet or exceed the standards established in the Department Rubric earn honors upon graduation.

Capstone

Capstones are voluntary, student-initiated projects or experiences outside the classroom that build on and contribute to students’ Education Studies concentration. They can take various forms, including a research project, website design, curriculum design, policy analysis, or scholarly paper. Capstones can be designed and executed in the senior year, or can be based on a previous experience that the student wants to explore further in some way, such as an internship or teaching experience. While capstones do not confer academic credit or departmental honors, students who complete capstones will be recognized at the department graduation ceremony and will have the opportunity to present their work at a conference in the spring of their senior year. Through capstones, students have the opportunity to work closely with a faculty member in an area of their interest and are able to reflect on and extend their learning in the concentration.

Undergraduate Teacher Education Program (regardless of student start date)

Note: The Undergraduate Teacher Education Program is not a concentration. It consists of a series of courses which will prepare students for secondary teacher certification.

The Department of Education, in cooperation with other departments, offers a program of study in teacher education leading to certification in secondary school teaching; the Undergraduate Teacher Education Program (UTEPE). This program is offered in English, History/Social Studies, Science (Biology, Chemistry, or Engineering/Physics), and leads to state certification for public school teaching in these fields.

The Undergraduate Teacher Education Program consists of three components: courses in educational theory, courses in the teaching field, and student teaching. These are designed to complement and enhance the liberal education derived from concentration courses and electives. Students who are interested in completing the Undergraduate Teacher education Program must confer with the Education Department as early as possible in order to plan a coherent program. The program includes a methods course, offered during the summer in conjunction with teaching at Brown Summer High School, between Semesters VI and VII.

Courses in the teaching field

Because the program emphasizes the importance of knowledge in the teaching field, students are required to complete an academic concentration in the subject which they are preparing to teach or a closely related field. This does not mean that a student must elect a standard
concentration in the field. However, such a student must, as part of or in addition to his/her chosen concentration, elect a substantive number of courses in his/her teaching field. Students considering the program should consult with advisors both in the academic department and in the Education Department to design an appropriate program of study that meets Rhode Island state certification requirements and those of many other states.

All of the required courses in education must be taken at Brown. None can be transferred for credit from other institutions. Requirements of the program include:

An Education elective

Education Graduate Program

The Department of Education offers graduate programs leading to the Master of Arts in Teaching (M.A.T.) as well as a Master of Arts (A.M.) in Urban Education Policy. The MAT program offers a master's degree in either elementary education or in one of three secondary education disciplines (English, science, or history/social studies). Both programs have a one-year intensive format, beginning with a summer semester in June and ending the following May.

**MAT Program Information and Requirements**

The MAT programs are certification-eligible for Rhode Island state teacher certification in elementary (grades 1-6) or secondary education (grades 7-12). Rhode Island is a member of the Interstate Certification Compact (ICC) (http://www.ride.ri.gov/TeachersAdministrators/EducatorCertification.aspx), which has reciprocal agreements with 44 states.

**Elementary MAT Program**

Elementary MAT candidates complete 8 courses in total, including the summer practicum and academic-year student teaching.

The following five (5) courses are required of all elementary MAT students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 2110</td>
<td>Summer Practicum and Analysis</td>
</tr>
<tr>
<td>EDUC 2120</td>
<td>Practicum and Seminar in Elementary Education</td>
</tr>
<tr>
<td>EDUC 2140</td>
<td>Methods and Materials of Math, Science, and Technology</td>
</tr>
<tr>
<td>EDUC 2150</td>
<td>Language and Literacy in the Elementary School Classroom</td>
</tr>
<tr>
<td>EDUC 2280</td>
<td>Seminar: Principles of Learning and Teaching</td>
</tr>
</tbody>
</table>

In addition, elementary MAT students complete any 3 electives to be chosen by the student in conjunction with the faculty director in wide-ranging content areas of education and cultural and linguistic diversity.

**Secondary MAT Programs**

Secondary MAT program students complete 8 courses in total, including the summer practicum and academic-year student teaching.

**English - MAT**

The following five (5) courses are required of all secondary English MAT students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1450</td>
<td>The Psychology of Teaching and Learning</td>
</tr>
<tr>
<td>EDUC 2060A</td>
<td>Methods of Teaching: English</td>
</tr>
<tr>
<td>EDUC 2070A</td>
<td>Student Teaching: English</td>
</tr>
<tr>
<td>EDUC 2080A</td>
<td>Analysis of Teaching: English</td>
</tr>
<tr>
<td>EDUC 2090</td>
<td>Literacy Across the Curriculum</td>
</tr>
</tbody>
</table>

In addition, English MAT students must complete any three (3) elective courses, to be chosen by the MAT student in conjunction with his or her faculty director in the following content areas: English - English Department, Literary Arts, Comparative Literature.

**Social Studies - MAT**

The following five (5) courses are required of all secondary History/Social Studies MAT students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1450</td>
<td>The Psychology of Teaching and Learning</td>
</tr>
<tr>
<td>EDUC 2060B</td>
<td>Methods of Teaching: History and Social Studies</td>
</tr>
<tr>
<td>EDUC 2070B</td>
<td>Student Teaching: History and Social Studies</td>
</tr>
<tr>
<td>EDUC 2080B</td>
<td>Analysis of Teaching: History and Social Studies</td>
</tr>
<tr>
<td>EDUC 2090</td>
<td>Literacy Across the Curriculum</td>
</tr>
</tbody>
</table>

In addition, Social Studies/History MAT students must complete any three (3) elective courses, to be chosen by the MAT student in conjunction with his or her faculty director in the following content areas: History/Social Studies - History Department, Africana Studies, American Civilization, Anthropology, Economics, Political Science, Sociology.

**Science - MAT**

The following five (5) courses are required of all secondary Science MAT students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 1450</td>
<td>The Psychology of Teaching and Learning</td>

</tbody>
</table>

In addition, Science MAT students must complete any three (3) elective courses, to be chosen by the MAT student in conjunction with his or her faculty director in the following content areas: Biology - Division of Biology and Medicine, Chemistry - Chemistry Department, Engineering/Physics - Division of Engineering, Physics Department

For more information on MAT admission, program requirements, and state certification requirements, please visit the following website: https://www.brown.edu/academics/gradschoolprograms/education-master-arts-teaching

**Urban Education Policy Program Information and Requirements**

Urban Education Policy (UEP) program students complete nine (9) courses in total, including a required nine-month internship that counts as one course.

The following seven course are required of all UEP program students:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 2300</td>
<td>Structures and Systems in Urban Education</td>
</tr>
<tr>
<td>EDUC 2310</td>
<td>Introduction to Educational Research</td>
</tr>
<tr>
<td>EDUC 2320</td>
<td>Quantitative Research Methods and Data Analysis</td>
</tr>
<tr>
<td>EDUC 2330</td>
<td>Urban Politics and School Governance</td>
</tr>
</tbody>
</table>
In addition, UEP students must complete two (2) electives in areas that can include public policy, schools and school reform, social contexts of education, economic analysis, urban politics, quantitative analysis, research methods, schools and communities, and organization and leadership. A partial list of these elective courses could include any two of the following:

- PLCY 1700B: Social Welfare Policy in the United States
- EDUC 1010: The Craft of Teaching
- EDUC 1020: The History of American Education
- EDUC 1050: History of African-American Education
- EDUC 1200: History of American School Reform
- EDUC 1230: Urban Teachers and Educational Change in Historical Perspective
- EDUC 1720: Urban Schools in Historical Perspective
- EDUC 1750: Contemporary Social Problems: Views from Human Development and Education
- EDUC 1860: Social Context of Learning and Development
- EDUC 1040: Sociology of Education
- EDUC 1260: Emotion, Cognition, Education
- EDUC 1430: Social Psychology of Race, Class, and Gender
- EDUC 1450: The Psychology of Teaching and Learning
- EDUC 1580: Cross-Cultural Perspectives on Child Development
- POBS 1720: Literacy, Culture, and Schooling for the Language Minority Student
- POBS 1750: Language, Culture, and Society
- ECON 1110: Intermediate Microeconomics
- ECON 1210: Intermediate Macroeconomics
- ECON 1310: Labor Economics
- ECON 1410: Urban Economics
- ECON 1480: Public Economics
- ECON 1430: Population Economics
- ECON 1800: Politics and Finance
- PLCY 1600: Economics for Public Policy
- PLCY 1700R: Urban Revitalization: Lessons from the Providence Plan
- POLS 1310: African American Politics
- ECON 1620: Introduction to Econometrics
- ECON 1630: Econometrics I
- ECON 1640: Econometrics II
- ECON 2030: Introduction to Econometrics I
- ECON 2040: Econometric Methods
- ECON 2020: Applied Economics Analysis
- SOC 2010: Multivariate Statistical Methods I
- EDUC 1100: Introduction to Qualitative Research Methods
- SOC 1050: Methods of Research in Organizations
- SOC 1120: Market and Social Surveys
- POBS 2020D: Theories in First and Second Language Acquisition
- POBS 2020E: Research Seminar in ESL Education
- PHP 1740: Principles of Health Behavior and Health Promotion Interventions
- PHP 2360: Designing and Evaluating Public Health Interventions

For more information on the A.M. in Urban Education Policy admission and program requirements, please visit the following website: https://www.brown.edu/academics/gradschool/programs/education-urban-education-policy

**Courses**

**EDUC 0400. The Campus on Fire: American Colleges and Universities in the 1960’s.**
Ole Miss, Berkeley, Columbia, and Kent State: just a few of the campus battlegrounds where conflicts over civil rights, the Vietnam War, and other major issues were fought in the 1960’s. Students consult primary and secondary sources about higher education’s role in these conflicts, and why the consequences of its involvement still linger today. Enrollment limited to 20 first year students. FYS WRIT

**EDUC 0410A. New Faces, New Challenges: Immigrant Students in U.S. Schools.**
What challenges do immigrant students face in adapting to a new system of education? By comparing and contrasting the perspectives education stakeholders—students, teachers, administrators, and parents—this course examines a number of key contributions to the study of the immigrant experience in education, as well as a selection of memoirs and films about the pathways these newcomers take in navigating school and (trans)forming their developing identities. Enrollment limited to 20 first year students. FYS

**EDUC 0410B. Controversies in American Education Policy: A Multidisciplinary Approach.**
Introduces perspectives on education based in history, economics, sociology, and political science. Students engage foundational texts in each of these fields, using the insights gained to examine controversial issues in American education policy, including policies to address ethnic disparities in student achievement, test-based accountability, class-size reduction, and school choice. Enrollment limited to 20 first year students. FYS

**EDUC 0410C. The Literature of Children and Young Adults.**
This course considers the literary, dramatic, and visual qualities of the literature of young readers since the 18th century, with a dominant, but not exclusive, focus on literature in English. Topics covered will include dominant themes in visual and textual aspects of these literatures, as well as their history and relationship to societal economics and valuations of children, schooling, and moral codes. Enrollment limited to 20 first year students. FYS

**EDUC 0410E. Empowering Youth: Insights from Research on Urban Adolescents.**
Together, we consider the design, analysis, and interpretation of research on youth in urban settings. In doing so, we examine the roles of power, privilege, and multiculturalism in research. In the experiential component of the course, students engage in fieldwork in a local school or community-based youth organization. As part of their fieldwork, students design and undertake a research project, thereby bridging theory with practice. Reserved for First Year students. Enrollment limited to 20 first year students. Instructor permission required. FYS DPLL WRIT
EDUC 041OF. The Mind, Brain, and Education.
What do the brain and body have to do with learning? How can research findings from the brain and biological sciences inform educational practices? This first-year seminar will involve discussion of current research from multiple disciplines (e.g., education, neuroscience, neurobiology, psychology) on topics such as brain development, stress, sleep, rhythms, and emotion/motivation. Mini-lectures will provide students with a basic appreciation of the brain and basic bioregulatory systems. Students will gain an understanding of methods for studying brain/behavior interactions and explore implications of new biological/brain findings for learning and education during the preschool, elementary, middle-school, and high-school years. Enrollment limited to 20 first year students. FYS WRIT

EDUC 0450. The University: Defining Ideals and Ideas.
The course examines the concept of the university and the college in America, their foundations and development, and society's expectations of them and their leaders. Philosophical and religious heritage, ethical and moral issues, and major themes, changes, pressures, and their role of presidents embedded in the landscape and contributions of the university and its shape and future will be addressed. FYS

Using sources in history, education, and law this course will explore the landmark Supreme Court case of Brown v. Board of Education which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in Brown and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of Brown for education and explore the meaning of equity in the past and present. Enrollment limited to 20 sophomore students. DPLL WRIT SOPH

EDUC 0800. Introduction to Human Development and Education.
Introduces the study of human development and education from infancy through young adulthood. Provides a broad overview of scientific understanding of how children develop and how research is generated in the field. Major topics include biological foundations, mind, cognition, language, emotion, social skills, and moral understanding based on developmental theories and empirical research. The educational implications of research on human development are discussed. EDU 840. Public Policy and Public School Reform
Will examine and assess the strategies and policies fashioned-particularly at the state and district level-to address the complex and intractable issues facing public schools.

EDUC 0850. History of Intercollegetiate Athletics.
This team-taught course traces the changing place of intercollegiate athletics on the American college campus over the past 150 years. Topics examined include, among others, the historical relationship between academic and athletic pursuits; commercialization and professionalization; the role of the NCAA and of the media; the cult of the coach; and the significance of race, gender, and class. Emphasis on critical reading, active participation in discussion, and developing research and writing skills. The course will meet twice weekly, sometimes as a whole and sometimes in smaller groups, to discuss readings, films, and guest presentations. Enrollment limited to 30.

This course seeks to understand, analyze, and criticize sport—seen here as one of the primary institutions in the lives of Americans. Working from the basis of sporting events in the Durkheimian sense of symbolic community, we will elevate them to the status of educational and religious institutions in our everyday lives (as we interrogate them and see them in relation to these, and other, institutions as well). Using the primary lenses of gender and race this class examines sports at five different levels—professional, Olympic, NCAA, scholastic, and youth—to understand how athletics have impacted, and will continue to impact, American society.

EDUC 0900. Fieldwork and Seminar in Secondary Education.
Combines study of current educational issues with extensive fieldwork that allows the student to observe how these issues translate themselves into reality on a daily basis. Each student reads and discusses recent writing about educational history, theory, and practice, and observes a class in a local school for 32 hours. The final paper synthesizes reading and observations.

EDUC 0950. Learning About Learning: Classrooms in Context.
This course aims to provide a pedagogical and sociopolitical context for Brown students as they work as volunteers in the Providence Public schools. Through sharing of volunteer placement experiences, the in-class practice of methods, academic inquiry, analysis and reflection, students will develop their understanding of strategies and perspectives that will both improve their effectiveness as volunteers and develop their ability to thoughtfully enter the national dialogue on improving urban schools.

EDUC 1010. The Craft of Teaching.
What is the "craft of teaching"? A wide variety of texts are used to investigate the complexity of teaching and learning. Considering current problems as well as reform initiatives, we examine teaching and learning in America from the perspectives of history, public policy, critical theory, sociology, and the arts. Weekly journals and reading critiques; final portfolio presented to the class.

EDUC 1020. The History of American Education.
This course is an introduction to the history of American education with an emphasis on K-12 public schooling. Using primary and secondary sources, we will explore the development of public schools and school systems, debates over aims and curriculum, conflicts over school governance and funding, and struggles for equity and inclusion over time. We will analyze the relationship between schooling, capitalism, and democracy. Finally, in exploring how different generations have defined and tried to solve educational dilemmas, we'll consider how this history might help us approach education today.

EDUC 1030. Comparative Education.
National systems of formal education, over the past two centuries, have proliferated massively. International organizations, governmental and nongovernmental, have long promoted the universal provision of mass education as central goals in the modern way of life. At the same time, the way children are raised, and the kinds of adults they become, varies considerably. Comparative education seeks to explore this interplay of variety and uniformity. Enrollment limited to 40.

After many African countries gained political independence in the 1960s, students and teachers sought to transform education. Although relatively few people were well-educated, those who were used their influence to demand social change. Reading work by anthropologists, historians, and African students' own writings, we will examine the elements of the enduring colonial legacy, such as the language of instruction, and how Africans proposed curricular and structural reforms to "decolonize" education. Open to students enrolled in semesters 3-8 or by permission of the instructor. DPLL
EDUC 1040. Sociology of Education.
While the United States educational system is widely considered the main institution through which the nation delivers on its promise of social mobility, sociologists have long recognized that schools exacerbate—or even produce—social inequality. This course provides an introduction to the application of sociology to questions of education, with a focus on the United States education system. We will ask questions such as: What do schools teach besides academics? How do social class, gender, and racial/ethnic relations shape student experiences? How can we address critical social issues through education policy?

EDUC 1045. Sociology of Higher Education.
American higher education has often been characterized as the great equalizer and, thus, as one of the foundational pillars of the American Dream. In this course students will develop a sociological understanding of higher education, primarily in the United States. Using both theory and empirical evidence, we will explore issues relating to the impact of social factors on higher education. Particular attention will be paid to the role that higher education plays in promoting social mobility as well as social reproduction. Throughout we will ponder what policies might best fulfill the promise of higher education in the U.S.

EDUC 1050. History of African-American Education.
This course will examine the history of African-American education with particular emphasis on the twentieth century. We will explore African-Americans’ experiences with schooling under slavery and segregation, the struggle for desegregation and equity North and South, and the place of education in African-Americans’ quest for equal rights. We will also consider how the African-American experience with public schooling makes us rethink major narratives of American education, democracy, and equality of opportunity and how an historical understanding of these issues may help us engage contemporary debates. DPLL

EDUC 1060. Politics and Public Education.
Who exercises power in public education? This course examines the key institutions (e.g. school districts, states, Congress, and the courts) and actors (e.g. parents, teachers, interest groups, and the general public) shaping American K-12 education in order to understand recent policy trends and their consequences for students. Major policies discussed include school finance, textbook adoption, school accountability, and school choice. Particular attention is given to the federal No Child Left Behind Act of 2001 and debates over its reauthorization. Previous coursework in American politics or public policy is suggested but not required.

EDUC 1060D. Methods of Teaching Mathematics.
This summer-term course offers the student the unique opportunity to explore, through both readings and discussion, the current pedagogical theory and practice involved in teaching mathematics; apply what they learn to their own teaching at Brown Summer High School; and use their classroom experience to reflect back on theory. The course has three components:
1. a six-week methods course in mathematics content and pedagogy;
2. a four-week daily clinical experience in secondary mathematics teaching at Brown Summer High School;
3. and a daily debriefing session to analyze, critique, advise, and reflect on BSHS teaching.

EDUC 1070A. Student Teaching: English.
S/NC.
EDUC 1070B. Student Teaching: History and Social Studies.
S/NC.
EDUC 1070C. Student Teaching: Science.
S/NC.

EDUC 1080A. Analysis of Teaching: English.
S/NC.
EDUC 1080B. Analysis of Teaching: History and Social Studies.
S/NC.
EDUC 1080C. Analysis of Teaching: Science.
S/NC.

EDUC 1090. Adolescent Literature.
What are teens and tweens reading? What should they read? Do books that adults view as "trashy" ruin kids' literary sensibilities? Provide access to the wider world of academic discourse? How can reading adolescent literature provide adolescents with a path toward holding a reader identity?
This course will present a general overview of the historical, socio-cultural, academic, and political issues that provide context for the use and availability of adolescent literature today. It presents a strong introduction to contemporary texts that interest adolescents inside and outside of the classroom. Particular attention is paid to issues of reading engagement for striving adolescent readers, issues of access to literacy through adolescent literature, ways that adolescent literature can be paired with the classics, and issues of censorship in American public school classrooms and public libraries. Students in this course will walk away with an understanding of the place of adolescent literature in today's debates as well as a background in choosing, reading, and analyzing the literature itself. Written assignments include weekly reading responses, an annotated bibliography, and a short, 3-5 page paper. There is a substantial amount of independent self-selected reading as well as one collaborative group project with a presentation.

EDUC 1100. Introduction to Qualitative Research Methods.
Designed for sophomores or juniors concentrating in education studies, but also open to other undergraduates interested in qualitative research methods. Through readings, class exercises and discussions, and written assignments, examines issues related to the nature of the qualitative research methods that are commonly used in education, psychology, anthropology, and sociology. Enrollment limited to 20.

This course provides an introduction to applied statistics for conducting quantitative research in the social sciences, with a focus on education policy. Students will become acquainted with the fundamentals of probability, descriptive and summary statistics, tabular and graphical methods for displaying data, statistical inference, analytic methods for exploring relationships with both categorical and continuous measures, and multivariate regression. Concepts and methods are taught using real-world examples with multiple opportunities for students to apply these methods in practice. The course uses the statistical software program, STATA.

EDUC 1130. Economics of Education I.
How do we attract good teachers to public schools? What are the economic returns to early-childhood intervention policy programs? These are just two examples of important education policy questions. This course introduces key concepts of microeconomic theory and uses them to analyze these and other policy questions. Organized around a structured sequence of readings. First year students require instructor permission.

EDUC 1150. Education, the Economy and School Reform.
This seminar examines the linkages between educational achievement and economic outcomes for individuals and nations. We study a range of system, organizational, and personnel reforms in education by reviewing the empirical evidence and debating which reforms hold promise for improving public education and closing persistent achievement gaps. Understanding and critiquing the experimental, quasi-experimental and descriptive research methods used in the empirical literature will play a central role in the course. Prerequisites: Education and PP concentrators, EDUC 1130 and EDUC 1110 (or equivalent); Economics concentrators, ECON 1110 or ECON 1130, and ECON 1620. Enrollment limited to 20. WRIT

EDUC 1160. Evaluating the Impact of Social Programs.
Does a GED improve the earnings of dropouts? Do stricter gun laws prevent violent crime? Such "causal" questions lie at the heart of public policy decisions. This course examines both the difficulties involved in answering causal policy questions, and research designs that can overcome these difficulties. Prerequisite: EDUC 1110, POLS 1600, ECON 1630, SOC 1100 or equivalent. Enrollment limited to 32.
EDUC 1180. Education for Liberation.
Does education challenge inequality, or (re)produce it? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions at different levels—the classroom, the school, the community, the nation, and the global society. We first examine the proposition that education can be a tool of oppression, and then consider how communities have organized struggles to demand and define a liberatory education. Rather than evaluate any technical school "reform" efforts, we consider attempts at revolutionary alternatives to dehumanizing educational conditions and institutions. Enrollment limited to 25. S/NC

Examines a century of efforts to improve schooling in the U.S., from John Dewey to Theodore Sizer and E.D. Hirsch, from "social efficiency" to charter schools and No Child Left Behind. How have these movements been affected by the historical contexts in which they operated? Have they produced any lasting results? How, if at all, should current reform movements be informed by the experiences of the past? Enrollment limited to 40.

EDUC 1220. The Anthropology of Education.
Designed to introduce students to the many forms of "education" across the life-span and in different cultures, this course will call on students to step beyond their own schooling. Of particular importance will be the uses of materials, experts, space and time in different educational settings. Film and print materials will allow students to rethink the idea of "learner" and "teacher" in terms of varying needs, goals, and situations.

EDUC 1230. Urban Teachers and Educational Change in Historical Perspective.
Will explore the history of American teachers in the urban context from the rise of the common schools in the mid-nineteenth century to the present. Through the analysis of rich primary and secondary sources, students will examine the ways in which teachers have experienced and, in turn, shaped the schools. Focusing on public elementary and secondary school teachers of the nation’s urban centers, this historical inquiry draws from the history of education, labor history, and the history of identity.

EDUC 1260. Emotion, Cognition, Education.
Provides an understanding of the role of emotions in influencing cognitive and social development. Reviews selected topics in the growing area of emotions and social cognition. Discussions focus on critical reviews of the literature and the application of the literature to the education of basic knowledge of the area is not assumed, so students in various areas are invited to participate.

Both an individual and a collective perspective on adolescence are used to provide an understanding of how this life stage is differently experienced by youth cross-culturally. Readings include theoretical and empirical papers from such areas as psychology, sociology, anthropology, and education.

EDUC 1280. International Perspectives on Informal Education.
Internationally, informal learning figures centrally from early childhood through the lifespan. Voluntarily chosen areas of expertise, societally necessary tasks, and interpersonal relationships lead individuals, corporations, and communities to undertake informal education. Central to this course is examination of major means and conditions of such learning in international contexts through four primary themes — play, everyday science, social entrepreneurship, and community collaborations. DPLL

EDUC 1290. From Theory to Practice in Engaged Scholarship: Creating Community Based Learning Courses.
This course will explore theories of community-based learning and engaged scholarship within the context of higher education. The course is designed to provide students with an understanding of the possibilities in the teaching and learning exchange to address significant social concerns. Enrollment limited to 20.

EDUC 1360. Empire, Childhood, and Youth.
How did empires shape the childhoods of colonial subjects? What does this bring to our understanding of how children learn and develop? Constructed to reflect particular notions of race, class, gender, and culture, the children in colonial and postcolonial contexts both conform to and contradict universal definitions of childhood and youth. Focusing on the British and French empires in the twentieth century, we examine how children were implicated in empire. We also consider children’s own agency in defining their place in imperial regimes as well as how children and youth are involved in and affected by decolonization and post-imperial contexts. DPLL

EDUC 1430. Social Psychology of Race, Class, and Gender.
Focuses on the social construction of race, class, and gender and how this construction influences an individual's perception of self and other individuals. Topics include identity development, achievement, motivation, and sociopolitical development. Enrollment limited to 30. WRIT

EDUC 1450. The Psychology of Teaching and Learning.
Seeks both to demystify the process of teaching and to illuminate its complexities. Assists students with such questions as: What shall I teach? How shall I teach it? Will my students respond? What if I have a discipline problem? Focuses on the teaching-learning process and student behavior, as well as research, theory, and illustrations concerned with classroom applications of psychological principles and ideas. Enrollment limited to 50.

EDUC 1560. Philosophy of Education: Educational Thought and Practice.
Consideration of different philosophies of education (classical, progressive, radical, feminist, multicultural). This iterative inquiry-based collaboration locates knowledge constructively and relationally, emphasizing classroom discussion and presentation, careful reading and writing (including on-line), school-site observation, and midterm and final projects on our philosophies and praxes of education. Enrollment limited to 20. DPLL WRIT

EDUC 1580. Cross-Cultural Perspectives on Child Development.
Focus on role of culture in child development, infancy to young adulthood. Reviews contemporary theories and empirical research to examine various age periods and domains of development. Major topics: infant care, parenting, socialization, gender roles, cognition, moral development, affect, adolescence, and education and schooling in formal and informal settings. Enrollment limited to 50.

Combines intensive study of primary and secondary sources from American history and literature between 1945 and 1980 with extensive consideration of how to teach these topics to secondary school students. Topics include the Cold War, McCarthyism, consumer society, civil rights, the women’s movement, Vietnam, and Watergate, often studied through unconventional sources such as popular music, movies, television shows, and fiction. Recommended prerequisite: HIST 0520 or equivalent. Enrollment limited to 20. Instructor permission required.

Despite expending significant energy on education reform in this country and globally, most efforts fail to achieve their lofty ambitions, due to their reliance on "silver bullet" strategies and/or poor execution. This course will focus on management approaches to improving school system performance, enabling students to (a) explore key education reform strategies; (b) adopt a senior management mindset through weekly discussion of case studies; and (c) broaden their perspective through use of domestic and global school system examples. The course is appropriate for juniors, seniors and graduate students, who bring an interest in education and a commitment to active classroom discussion. Enrollment limited to 24.
EDUC 1650. Policy Implementation in Education. This course offers an "analytical foundation" for students interested in public policy implementation, with particular emphasis on education. Drawing on social science research, the course examines strengths and limitations of several frameworks, including the "policy typology" school of thought, the rational actor paradigm, the institutional analysis, the bargain model, the organizational-bureaucratic model, and the "consumer choice" perspective. Enrollment limited to 20. WRIT

EDUC 1690. Literacy, Community, and the Arts: Theory into Practice. An exploration of ways to improve student literacy skills through the performing arts in area schools. Students read about the theory and practice of literacy and the arts, research national and local initiatives, engage in arts activities, and spend time in area classrooms working with local teachers and artists to draft curriculum materials to be used in summer and school-year programs.

EDUC 1700. The Asian American Experience in Higher Education. This course is an inter-disciplinary exploration of Asian Americans in higher education and the impact of their participation on the broader academic landscape. It considers the historical roots of Asian American collective identity; the evolution of Asian American Studies programs; consequences of the model minority myth; and the psychosocial and structural barriers to participation and academic achievement across different Asian American groups as compared to other racial/ethnic minority groups. Enrollment limited to 20. DPLL

EDUC 1710. History and Theories of Child Development. An examination of child development from a historical and theoretical perspective, including key historical figures such as Darwin, Hall, Baldwin, Binet, Freud, Watson, Piaget, Vygotsky, Gesell, McGraw, Bowlby, and Bayley. Explores theoretical conceptualizations of children and adolescents and investigates the representations of children in popular culture, governmental legislation, education, and public policy.

EDUC 1720. Urban Schools in Historical Perspective. Why did urban schools, widely viewed as the best in the nation in the early twentieth century, become a "problem" to be solved by its end? How have urban schools been shaped by social, economic, and political transformations in cities and by other public policies? How have urban schools changed over time? This course will ask these and other questions to explore how historical perspective can help us better understand urban schools today. We will analyze the impact of changes in demographics, urban renewal and suburban development, the political economy of cities, educational expectations, and demands for equity.

EDUC 1730. American Higher Education in Historical Context. A study of 350 years of American higher education. The first part traces the growth and development of American higher education from premodern college to the modern research university. The second part examines issues facing higher education today and places them in historical context. Particular attention is given to: the evolution of curriculum; professionalism; student life; and the often competing priorities of teaching, research and service. WRIT

EDUC 1740. Academic Freedom on Trial: A Century of Campus Controversies. Inside and outside the classroom--for professors, students, administrators, and others--academic freedom has been contested by forces external and internal to the university. This course focuses on challenges to and changes in the definition and application of "academic freedom" from the end of the 19th century to the present day, with particular attention to academic freedom during times of crisis, especially wartime, and includes consideration of current issues such as speech codes, corporate and government funding of research, and the place of religion on campus. Enrollment limited to 40. WRIT

EDUC 1750. Contemporary Social Problems: Views from Human Development and Education. Explores social problems in terms of contemporary theories and research in human development and education. The class chooses issues for discussion and researches their mechanisms and possible solutions. Demands basic knowledge of theory and research in psychology, sociology, or anthropology, and background in educational issues. Prerequisite: EDUC 0800, 1270, or 1710; or any other two social science courses.

EDUC 1770. Student Culture in Higher Education. American higher education is unique because students as much as faculty have defined the undergraduate educational experience on campus. Through literary societies, Greek life, athletics, newspapers, clubs, rituals, protest movements, and social networks, students have created their own culture that has become for many a quintessential part of college education in America. This course looks at the historical development of student culture, its purpose, and current form while placing it in the larger American social context.

EDUC 1850. Moral Development and Education. Examines contending approaches to moral development and its fostering in the home, school and peer group. Topics include philosophical underpinnings of moral theory, cognitive and behavioral dynamics of moral growth, values climate of contemporary American society, the role of schooling, and variations attributable to culture and gender. Prerequisites: EDUC 0800, 1270, or 1710; or CLPS 0610 (COGS 0630), or CLPS 0610 (PSYC 0810). Enrollment limited to 30. WRIT

EDUC 1860. Social Context of Learning and Development. Focuses on the social environment that contributes to the development of children's minds, language, self-understanding, relations with others, affect, and attitudes toward learning. Examines the period from birth through young adulthood. Topics include children's social interactions, parental expectations and socialization practices, and the influences of family, peers, school, and media. Prerequisites: EDUC 0800, EDUC 1270, EDUC 1430, EDUC 1580, EDUC 1710, CLPS 0610 (COGS 0630), or equivalent. Enrollment limited to 30. WRIT

EDUC 1870. Education and Human Development in East Asia. This course examines education and human development in East Asia, mainly China, Japan, and South Korea, using international and comparative perspectives. We will examine the role of educational systems and key contexts such as family, school, and globalization in the development and educational processes of children and adolescents. We will also explore culturally unique concepts, diversity, and inequality in educational processes across and within these countries. The course draws on a range of contemporary studies from interdisciplinary social science fields, some of them theoretical and many of them empirical (both qualitative and quantitative). DPLL

EDUC 1880. Human Development in the Context of Immigration. An interdisciplinary approach to the study of child and adolescent development in the context of immigration. We will review the socio-political environments in post-industrial countries with large influxes of immigrant families and examine stressors involved in the process of immigration and the repercussions on family relationships and the children themselves. We will further consider relevant literature on community forces, marginality, and minoritized status along with new research on the various pathways of bicultural identity development. Lastly, we will explore the critical role of schools in the adaptation of immigrant origin youth and emerging adults. DPLL WRIT

EDUC 1890. Family Engagement in Education. How do families from diverse backgrounds support their children's schooling? What does research tell us about how families influence their children's educational processes and outcomes? Students in this course will examine theories and empirical studies of family processes and engagement in education drawing from psychology, sociology, anthropology, and educational studies. The course offers an in-depth look at focal topics across diverse groups within the U.S. as well as societies abroad to examine issues such as culture, ethnicity, immigration, and socioeconomic status. Elements and programs that promote partnerships between family and school are also discussed. DPLL
EDUC 1710 or EDUC 1750.

EDUC 1720. Politics and School Governance
This course is a requirement for students of the MA in Urban Education. It deals with the political science and public policy central question of: How can public institutions be redesigned to improve policy course with a foundation and understanding of basic statistical analyses so that they will be able to design and carry out their own research and will be able to use data to inform education policy and practice.

EDUC 2300. Structures and Systems in Urban Education
The aim of this course is to prepare future education policy leaders to understand, have the tools to investigate and be effective in the context of the many organizations that affect the well-being and ultimate success of urban students. Throughout the course, the city of Providence, along with nearby cities, will be a major “text.”

EDUC 2310. Introduction to Educational Research
Intensive six-week course designed to prepare future leaders in urban education policy with a fundamental understanding of basic concepts, techniques and strategies of social science research. The goal is for students to acquire skills and knowledge that enable them to inform the design, implementation and ultimate use of applied research in a policy setting and to appreciate its limitations.

EDUC 2320. Quantitative Research Methods and Data Analysis
The goal of this course is to provide students in the Urban Education Policy course with a foundation and understanding of basic statistical analyses so that they will be able to design and carry out their own research and will be able to use data to inform education policy and practice.

EDUC 2330. Urban Politics and School Governance
This course is a requirement for students of the MA in Urban Education Policy program. It deals with the political science and public policy central question of: How can public institutions be redesigned to improve accountability? Particular attention will be given to the governance and politics in urban public school systems.

EDUC 2340. Human Development and Urban Education
In this course we will learn relevant theories and research in the academic field of Human Development to urban education practice and policy from preschools to high schools. Special emphasis will be placed in areas where there is research convergence and that are relevant to urban populations and settings. Recommended prerequisites: EDUC 0800 or EDUC 1710 or EDUC 1750.
EDUC 2350. Economics of Education II.
Introduces students to the main economic theories and related applied work that inform education policy analysis. In so doing, the course combines economic theory, econometric studies, and education and institutional literature in an examination of current issues in U.S. education, particularly those issues that are most relevant to urban education. The course begins with examinations of key concepts and theories from microeconomics, labor economics, and public economics that are most relevant for studying questions in education. After laying this theoretical foundation the course then examines how these theories can illuminate and aid policy analysis around key topics in U.S. education. Open to graduate students only.

EDUC 2360. Policy Analysis and Program Evaluation for Education.
Informed education policymaking requires reliable information about the causal effects of government programs and other factors shaping educational outcomes. This course offers an overview of education policy analysis with an emphasis on econometric strategies for measuring program impacts. It aims to make students critical consumers of policy evaluations and to equip them with tools to conduct their own research. Topics covered include the political context for policy research, social experiments, alternative strategies for making causal inferences, and cost-benefit analysis. Prerequisites: EDUC 1110, POLS 1600, SOC 1100, or written permission of the instructor.

EDUC 2370. Internship.
Students in the Urban Education Policy Master's Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2380. Internship.
Students in the Urban Education Policy Master's Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

EDUC 2450. Exchange Scholar Program.

EDUC 2480. Studies in Education.
Independent study; must be arranged in advance. Section numbers vary by instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EDUC 2980. Studies in Education.

EDUC 2990. Thesis Preparation.
No description available.

EDUC XLIST. Courses of Interest to Concentrators in Education.

Education Alliance for Equity and Excellence in the Nation's Schools

The Education Alliance at Brown University is a reform support organization committed to advancing equitable educational opportunities that prepare all student populations to succeed in the 21st century. Our mission is to enhance learning for culturally and linguistically diverse students. We build partnerships with communities and educational organizations to apply research and transform instructional practice. We design and deliver expert services around data collection and analysis, professional learning, and research evaluations.

Since 1975, we have partnered with schools, districts and state departments of education to apply research finding in developing solutions to educational challenges. We focus on district and school improvement with special attention to underperformance and issues of equity and diversity.

The Executive Director of The Education Alliance is Dr. Maria Pacheco. For additional information please visit: www.brown.edu/education-alliance

Egyptology and Assyriology

Chair
John M. Steele

The Department of Egyptology and Assyriology is designed to explore the histories, languages, cultures and sciences of ancient Egypt, Mesopotamia and their neighbors. These regions, sometimes known collectively as the Ancient Near East, have a long history stretching back to the formation of the first complex societies and the invention of writing. As a field of higher learning, Egyptology and Assyriology are represented at most of the world's great universities. Their establishment at Brown, beginning the 2005-06 academic year, is a product of Brown's Plan for Academic Enrichment, a commitment to higher learning in the humanities and the sciences.

Faculty in the department teach undergraduate and graduate courses in Egyptology, Assyriology and the History of Ancient Science.

For additional information, please visit the department's website: http://www.brown.edu/academics/egyptology/

Egyptology and Assyriology
Concentration Requirements

The concentration in Egyptology and Assyriology offers students a choice of two tracks: Assyriology or Egyptology. The department promotes collaborations with other academic units at Brown devoted to the study of antiquity including Archaeology, Classics, Judaic Studies, and Religious Studies. Egyptology and Assyriology also collaborates with Brown’s Joukowsky Institute for Archaeology and the Ancient World.

Assyriology Track

Also known as the Near East or Middle East, Western Asia includes present-day Iraq, Syria, Turkey, and other neighboring states, a broad geographic area that was connected in antiquity with the wider world—the Mediterranean, North Africa, the Arabian Peninsula, Central Asia, and the Asian subcontinent. Students will be exposed to the critical study of the ancient cultures of this region (ca. 3400 B.C.E.–100 C.E.) using the tools of archaeology, epigraphy, and historical inquiry. A variety of interdisciplinary, comparative, and theoretical approaches will be introduced to give students the tools and methods to explore this region’s ancient languages and literatures, political and socio-economic modes of organization, art and architecture, religious traditions and other systems of knowledge, such as early science.

The Assyriology (ASYR) track requires a total of at least ten (10) courses that are determined in the following way:

Introductory courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASYR 0800</td>
<td>The Cradle of Civilization? An Introduction to the Ancient Near East</td>
<td></td>
</tr>

</tr>
</tbody>
</table>

Foundational Courses (at least one course from each of the following three areas):

| History and Culture of Ancient Western Asia: | 1 |
| ASYR 1100 | Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (WRIT) | |
| ASYR 1500 | Ancient Babylonian Magic and Medicine | |
| ASYR 2310B | Assyriology I (WRIT) | |
| ASYR 2310C | Assyriology II (WRIT) | |
| ASYR 2600 | Topics in Cuneiform Studies | |

Ancient Scholarship in Western Asia: | 1 |
| ASYR 1600 | Astronomy Before the Telescope | |
| ASYR 1650 | Time in the Ancient World (WRIT) | |
must be taken by all concentrators, but the remaining four can be chosen. The Egyptology track requires a total of at least ten courses. Six of these courses must be approved by the undergraduate concentration advisor. Such courses will normally be offered by Egyptology and Assyriology, the Joukowsky Institute for Archaeology and the Ancient World, Religious Studies, Classics, Judaic Studies, Anthropology, History of Art and Architecture, History, or Philosophy. Concentrators are welcome to take most courses offered by Egyptology and Assyriology (EGYT and ASYR), Archaeology (ARCH), or related departments, though some may require the instructor’s approval. Concentrators should consult with the concentration advisor to discuss the courses most suitable to their interests.

Total Credits 10

1 Required for all students pursuing the Egyptology track.
2 Or an EGYT or ARCH course in material culture.

Capstone

All concentrators in Egyptology and Assyriology are required to complete a capstone project. The project can take many forms, but the common feature shared among all possible projects will be a public presentation. Typically in the final semester before graduating, the concentrator will give this capstone presentation before faculty, fellow students, and other interested audiences. If the concentrator is writing an undergraduate honors thesis, the procedure for which is detailed below, this work should provide the content for the capstone presentation. Students not writing an honors thesis will base their presentation on a research project more in depth than a class project, though the topic may stem from a course project or paper. The format of the presentation may vary; suggestions range from an illustrated lecture to a video or an installation presented with discussion. Both the content and the format of the capstone project should be discussed with and agreed upon by the concentration advisor no later than the end of the first semester of the senior year.

Honors in Egyptology and Assyriology

1. Becoming an honors candidate

Students who wish to consider pursuing honors should meet with the Undergraduate Concentration Advisor in the first half of their sixth semester. Eligibility is dependent on:

• Being in good standing
• Having completed at least two thirds of the concentration requirements by the end of the sixth semester.
• Having earned two-thirds “quality grades” in courses counted towards the concentration. A “quality grade” is defined as a grade of “A” or a grade of “S” accompanied by a course performance report indicating a performance at the “A” standard.

To pursue honors candidacy, eligible students must:

• Secure a faculty advisor and discuss plans for the proposed thesis project well before the established deadline; this can be done by email when a student is abroad.
• Prepare a thesis prospectus (see below).
• Submit the prospectus to the advisor, one other proposed faculty reader (at least one of the readers must be in the department) and the department chair no later than the first week of the seventh semester.

The structure of a thesis prospectus:

An honors thesis in Egyptology or Assyriology is a substantial piece of research with some degree of originality that demonstrates the student’s ability to frame an appropriate question and deal critically with the range of original and secondary sources. A thesis prospectus is a short analytical document consisting of several parts. It will normally include a concise and focused research question; a justification for that question that demonstrates familiarity with previous research on the topic; a project description that includes a discussion of the types of evidence available and appropriate to answering the proposed question; a discussion of methods of collecting and analyzing that evidence; a conclusion that returns to the research question and assures the reader that the project will add value to our understanding of the topic; and a bibliography. The

Elective Course: Any course germane to ancient Egypt or the ancient Near East or Mediterranean world. Alternative and elective courses must be approved by the undergraduate concentration advisor. Such courses will normally be offered by Egyptology and Assyriology.
prospectus will ordinarily be in the range of 5-7 pages in length, exclusive of bibliography. The prospectus will include proper citations throughout. Determination of whether or not a student may pursue the proposed project will be made on review of the prospectus by the readers and department chair. Prospectuses will be evaluated on the following scale:

1. No concerns about the viability of the project.
2. No concerns about the viability of the project, but minor weaknesses in the execution of the prospectus.
3. Concerns about the viability of the project, but willingness to reevaluate a revised prospectus submitted within two weeks of receipt of evaluation.
4. Reservations that the prospectus does not describe an honors-worthy project.
5. Poorly conceived and shoddy work.

Prospectuses will be returned to the student with this numerical evaluation and comments one week after submission of the prospectus. A prospectus must receive an evaluation of 1 or 2 prior to the third week of the seventh semester for a student to be admitted to the honors track. Students who submit an original prospectus that is graded 4 or 5 will not be permitted to rework the prospectus for the second submission.

2. Developing, completing and submitting the honors project

Once accepted as honors candidates, students will pursue a course of study that goes beyond what is expected of a regular concentrator. This includes:

- Enrollment in two semesters of independent study in Egyptology or Assyriology (these do not fulfill course requirements towards the concentration).
- Twice-monthly meetings with the thesis advisor and once-monthly meetings with the second reader. These meetings will be scheduled at the beginning of each term.
- Submission of a comprehensive outline to both readers no later than October 15 (for May graduates)
- Regular submission of drafts. A partial draft including a complete version of at least one chapter or section is due before Reading Period of the seventh semester.
- A complete draft is due to both readers no later than March 15 (for May graduates).
- The revised final thesis is due in both electronic and physical form to both readers and department chair April 5 (for May graduates).

Failure to meet any deadline will result in automatic termination of the honors process. No extensions will be granted. If a thesis is turned in late but before the end of the term, credit and grade for the Independent Study may still be granted.

3. Evaluating the submitted work of honors candidates

In order to receive honors a student must be found to have:

- Remained in good academic standing throughout the academic year.
- Not violated the Academic Code of Conduct during honors candidacy.
- Complete or be about to complete all concentration requirements.
- Produced a thesis that is judged by the readers to meet the department's expectations for honors work (see below), and turned it in by the established deadlines.
- Successfully defended the thesis during a half hour public presentation held during the final exam period of the eighth semester.

Students who submit theses that are deemed to fall short of the expectations will graduate without honors. In that case, the theses will count as a capstone project.

4. Expectations for honors theses:

Originality:

An honors thesis in Egyptology or Assyriology is expected to add to existing scholarship. The thesis must be based on close work with primary sources (usually in publication rather than in person), supplemented by critical engagement with a substantial amount of relevant secondary literature. While the resulting study is not necessarily expected to be ground-breaking original, and may engage with a well-studied topic, it will usually include a new insight into or interpretation of the material considered.

Scope:

An honors thesis is not a book or dissertation. It is, however, a very serious piece of research and writing for which two dedicated study courses have provided substantial time to the honors student. The question upon which the honors thesis is based should be focused enough to allow an in-depth treatment, generally in under 100 pages or 30,000 words (exclusive of bibliography and illustrations). Appropriate length will vary considerably depending on the topic itself and the nature of the primary sources being considered, particularly if substantial translation of ancient textual sources is required.

Argument:

The thesis should present a sustained analytic argument in answer to its structuring question. A thesis should not be primarily descriptive or narrative in nature. Each chapter should contain a sub-argument that is clearly related to the overall argument of the thesis. The significance of the argument and its relationship to prior scholarship should be clearly articulated. Honors theses are not expected to demonstrate comprehensive familiarity with the secondary literature, but they are expected to engage critically and maturely with important works on the defined topic.

Methodology:

Egyptology and Assyriology are very broad fields, and the appropriate methods will be determined in conjunction with the thesis advisor on the basis of the questions and types of evidence - textual, archaeological, art historical - under consideration. With very few exceptions the methodology of the thesis is expected to be conventional rather than innovative, rooted in the accepted practices of the field in question.

Organization and writing:

An honors thesis must be well organized and written. It should include an introduction and conclusion as well as well-considered chapters that allow the reader to follow the line of reasoning easily. The relationship of any section to the larger whole should be clear, and segues should help the reader move between sections. Writing should be grammatically correct, well copy-edited, professional, and consistent. Citations and bibliography must be in an accepted style as determined in consultation with the advisor.

Egyptology and Assyriology Graduate Program

PhD Program in Egyptology and Assyriology

Brown is one of the premier institutions for the study of Egyptology, Assyriology, and the history of ancient science, and our PhD students train in the foundational areas of our disciplines: the languages, literatures, history, and material culture of Egypt and Mesopotamia in their wider environment. The department offers instruction in the core ancient languages that are essential for research in our fields: Akkadian (Babylonian and Assyrian, all stages), Egyptian (all stages), Hittite, and Sumerian; instruction in Arabic, Aramaic, Greek, Hebrew, Latin, Sanskrit, Syriac, and Ugaritic is available to our students at Brown as well. In addition to training in philology and critical research methods, our students also become conversant in the archaeological sequence, art and architecture, and repertoires of material culture found across the ancient Near East.

Brown's doctoral program in Egyptology and Assyriology has a number of distinguishing features:

- We offer in-depth disciplinary training that allows our students to pursue focused research in any one of our core fields: Assyriology, Egyptology, the history of ancient science, and the archaeology of Egypt and the Near East.
- We encourage creative interdisciplinary work, including but not limited to research that bridges Egyptology, Assyriology, and the history of ancient science in innovative ways. Our doctoral students have the opportunity to do coursework in and cultivate stimulating intellectual relationships with faculty from Anthropology, Classics, History, the Joukowsky Institute for Archaeology and the Ancient World, and Religious Studies. In addition
Brown’s Graduate School has an Open Graduate Program that allows interested doctoral students at Brown to pursue a concurrent master’s degree in a secondary field that is outside the scope of their doctoral program.

- We provide significant funding both in the department and across the university to support graduate students’ original research. Our doctoral students have recently used support from the department and university to carry out research in museum collections in the US, Europe, and Africa; to participate in archaeological fieldwork (survey and excavation) in Egypt, Sudan, and Turkey; and to present the results of their research at international conferences and symposia.

- We emphasize developing our students professionally and encourage students to reach important early career milestones during their time in the program, such as giving conference papers and submitting academic publications; to that end we have incorporated valuable professional academic skills into our curriculum and assessment.

- We provide a variety of opportunities for our PhD students to train as teachers and develop valuable teaching skills that will be useful in a wide variety of educational settings, including research universities, museums, or teaching colleges focused on the liberal arts.

A new area of particular interest to the department’s faculty includes: ancient science (astronomy and astrology, timekeeping and calendrics, divination and medicine); cultural interactions throughout the Mediterranean, Near East, and Africa in the second and first millennia BC; religion and ritual in the ancient Near East, from Egypt and Sudan to Anatolia and Mesopotamia; the history of the Egyptian language and its grammar; the origins and development of writing and the diffusion and reception of cuneiform, hieroglyphic, and alphabetic scripts in the ancient world; kingship and monarchy in ancient Egypt and Sudan; the integration of textual and archaeological methodologies; Coptic manuscripts; the ancient Near East in classical periods and Greek and Roman cultures’ perceptions of the more ancient past; Mesopotamian and Egyptian literature; ancient empires of the Near East in context; and the origins of Egyptian civilization.

**PhD Tracks**

The department currently offers three tracks to the PhD: (1) Assyriology, (2) Egyptology, and (3) History of the Exact Sciences in Antiquity. Each track has different course requirements, details of which may be found in the program’s Graduate Student Handbook. Students who enter the program in one track may switch to another track providing they are still able to complete the coursework requirements by the end of their third year.

Further details about our graduate program may be found at [http://www.brown.edu/academics/gradschool/programs/egyptology-and-assyriology](http://www.brown.edu/academics/gradschool/programs/egyptology-and-assyriology).

**Courses**

**Assyriology**

**ASYR 0300. Babylon: Myth and Reality.**

From the Hanging Gardens of Babylon to the Tower of Babel to Babylon 5, the city of Babylon in ancient Iraq holds an important place in contemporary culture. But how much of what is commonly known of Babylon is true? In this course we will explore the ancient city of Babylon through its texts and archaeological remains and investigate the ways Babylon has been viewed over the past two thousand years. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

**ASYR 0310. Thunder-gods and Dragon-slayers: Mythology + Cultural Contact - Ancient Mediterranean and Near East.**

This course is an exploration of the mythological imagination in the ancient Mediterranean and Near East. From cosmic origins to epic battles, mighty queens to baneful monsters, mythological motives and narratives crisscrossed the ancient world, bypassing seemingly rigid geographic and cultural boundaries. Particular attention will be devoted to the study of the dynamic reinterpretation of myths in situations of cultural contact. Primary evidence will include material from Mesopotamia, Egypt, Anatolia, the Levant, Greece and Rome. The course will span several millennia, from the earliest attestations of the Epic of Gilgamesh to the Christian and Muslim reinterpretation of so-called pagan myths. FYS WRIT

**ASYR 0350. Haunted Universe: Monsters and Demons at the Dawn of Civilization.**

This seminar explores the relationship between monsters and civilization, considering what exactly it is that monsters do for us; why we create, deploy, and ultimately destroy them; and what they tell us about the peoples among whom they sprang up and roamed. Emphasized is the developing civilization in Mesopotamia, and the place and functioning of monsters and demons in the visual arts and literary contexts, as well as in the worldview of the early cities of that region. Enrollment limited to 20 first year students. FYS

**ASYR 0400. Intimate Stories: Narrative in Ancient Visual Culture.**

Images tell stories that carry us to imaginary worlds. A story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity public monuments displayed visual narratives that animated public spaces, enthralled audiences and delivered state ideologies. This course involves reading narrative imagery from the Middle East and East Mediterranean including magical hunt scenes in prehistoric caves, political tales on Mesopotamian relief sculpture, visions of paradise in Egyptian tombs, Aegean frescoes and Assyrian reliefs of exotic landscapes. Using contemporary perspectives on art, we will explore the material power and everyday significance of pictorial representations as intimate spectacles. Enrollment limited to 20 first year students. FYS WRIT

**ASYR 0800. The Cradle of Civilization? An Introduction to the Ancient Near East.**

This course explores the cultures of ancient Mesopotamia and the Near East (present-day Iraq, Syria, Turkey, and Iran) from prehistory until the end of the first millennium BC. We will investigate the rich history and archaeology of this region through literary and historical texts (in translation) and archaeological evidence, including visual culture and architecture. Central to our discussion will be questions about how and why scholars study the Middle East in this early period. Topics include: early complex societies, state formation, the origins and development of writing, ancient empires, religion, culture and ethnicity, trade, diplomacy, warfare, agriculture, and craft production.

**ASYR 1000. Introduction to Akkadian.**

An intensive introduction to the cuneiform writing system and the basic grammar and vocabulary of Akkadian, a language first attested over four thousand years ago in Mesopotamia (modern Iraq). The earliest known member of the Semitic family of languages (like Arabic and Hebrew), Akkadian was in use for over two thousand years across a wide expanse of the ancient Near East. Students will learn the classical Old Babylonian dialect of Akkadian (ca. 1800 BCE) and read Mesopotamian texts in the original, including selections from the Laws of Hammurabi, as well as excerpts from myths, hymns, prayers, historical documents, and letters.

**ASYR 1010. Intermediate Akkadian.**

This course is the second semester of an intensive, yearlong introduction to the Akkadian (Babylonian/Assyrian) language. Students will deepen their knowledge of the cuneiform writing system and continue to develop their grasp of Akkadian grammar. Readings from Mesopotamian texts in the original language and script will include, among others, selections from the Laws of Hammurapi, Assyrian historical texts (such as the accounts of Sennacherib’s siege of Jerusalem), and the story of the Flood from the Standard Babylonian Epic of Gilgamesh. Prerequisite: Introduction to Akkadian (ASYR 0200 or ASYR 1000) or permission of the instructor.
ASYR 1100. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia
Creation, the Flood, the Tower of Babel—well-known myths such as these have their origins in ancient Mesopotamia, the land between the Tigris and Euphrates Rivers. Using both ancient texts in translation and archaeology, this course will explore categories of Mesopotamian culture labeled "myth" and "religion" (roughly 3300-300 BCE), critically examining the ancient evidence as well as various modern interpretations. Topics will include myths of creation and the flood, prophecy and divination, death and the afterlife, ritual, kingship, combat myths and apocalypses, the nature and expression of ancient religious experience, and representations of the divine. There are no prerequisites. WRIT DPLL

This course examines various facets of the relationship between art and developing social/political complexity in the ancient world, with case studies drawn primarily from the ancient Near East and Egypt between the rise of the first cities in the late fourth millennium BCE through to the fall of the Achaemenid "world empire" in the mid-fourth century BCE.

ASYR 1160. Color and Culture in the Ancient Near East.
This seminar investigates the meaning of color as a culturally mediated and culturally embedded phenomenon using case studies drawn from the civilizations of the ancient Near East and Aegean. Employing contemporary critical theories from cognition, phenomenology, linguistics and material culture studies, we will explore how human beings perceived, categorized and valued color in ways that vary cross-culturally.

The course will focus on the cultural and religious-historical interpretation of physical displacements among sacred places, including urban processions, visits to temples and journeys to sacred places within the context of the Ancient Near Eastern religions. We will attempt to sketch a map of the holy centers and cultic itineraries, focusing on case studies from Babylonia, Assyria and Syria from the third to the first millennium BC as well as comparative case studies from surrounding cultures. These topics will be explored with an emphasis on how written and archaeological sources can be interpreted with the help of theoretical literature.

ASYR 1300. The Age of Empires: The Ancient Near East in the First Millennium BC.
The first millennium BC saw a series of empires vying for control of the Near East: the Assyrians, the Babylonians, the Persians, and the Greeks of Alexander the Great and his successors. The course will explore the political, social and cultural history of Mesopotamia and the Ancient Near East under these empires, using evidence drawn from archaeology and ancient texts (in translation).

ASYR 1400. Introduction to Sumerian.
Over five thousand years ago the first cities emerged in southern Iraq, and around that same time writing was invented, most likely to record the language we now call Sumerian. Even after it was no longer spoken, Sumerian became a powerful conduit for the region's cultural heritage, preserving its literature and religious traditions for millennia. In this course students will learn the fundamentals of Sumerian grammar, develop a basic working vocabulary, and explore the cuneiform script through weekly readings in original texts. Selections will come from royal inscriptions, court cases, myths, magical incantations, and even ancient schoolwork. No prerequisites.

ASYR 1500. Ancient Babylonian Magic and Medicine.
A survey of ancient magic and medicine focusing on Mesopotamia (present-day Iraq, ca. 2500-300 BCE), with an emphasis on beliefs about the body, health, illness, and the causes of disease, such as witchcraft or angry gods. Topics will include the training of healers, exorcists, and herbalists; concepts of contagion and plague, modalities of treatment, incantations, prayers, and empirical remedies like prescriptions; ancient perceptions of problems like sexual dysfunction, the perils of pregnancy, tooth decay, epilepsy, and mental illness. Readings will be drawn from ancient texts (in translation), archaeology, and parallels with ancient Egypt, Greece, Rome, and the Bible. No prerequisites. Not open to first year students. WRIT

ASYR 1600. Astronomy Before the Telescope.
This course provides an introduction to the history of astronomy from ancient times down to the invention of the telescope, focusing on the development of astronomy in Babylon, Greece, China, the medieval Islamic world, and Europe. The course will cover topics such as the invention of the zodiac, cosmological models, early astronomical instruments, and the development of astronomical theories. We will also explore the reasons people practiced astronomy in the past. No prior knowledge of astronomy is necessary for this course. DPLL

ASYR 1650. Time in the Ancient World.
Time plays many roles in civic and everyday life: calendars provide a way of regulating activities ranging from gathering taxes to knowing when to perform religious rituals. This course will provide an introduction to the way time was measured, used, regulated and conceived in the ancient world. We will cover topics such as the calendars used in Mesopotamia, Egypt, Greece and China, sundials and other instruments used for measuring time in the ancient world, and the way time is used in scientific and non-scientific texts. WRIT

ASYR 1700. Astronomy, Divination and Politics in the Ancient World.
This course will explore the relationship between astronomy, divination and politics in the ancient world. The sky provided ancient cultures with many possibilities for observing occurrences that could be interpreted as omens. In many cultures, celestial omens were directed towards the king and his government. As a result, interpreting and controlling celestial omens became an important political activity. In this course, we will explore how and why astronomical events were used politically in ancient Mesopotamia, the Greco-Roman world, and ancient and medieval China. No prior knowledge of astronomy is necessary for this course. WRIT

ASYR 1725. Scientific Thought in Ancient Iraq.
This course will investigate a variety of ancient scientific disciplines using primary sources from ancient Mesopotamia (modern Iraq). By reading the original texts and studying the secondary literature we will explore the notion of scientific thought in the ancient world and critique our own modern interpretation of what "science" is and how different traditions have practiced scientific methods towards a variety of aims. Looking at a range of disciplines will allow us to compare and contrast the different ways in which scientific thinking is transmitted in the historical record. DPLL WRIT

ASYR 1750. Divination in Ancient Mesopotamia.
The interpretation of natural events as portents of good or bad outcomes played an important role in religious, political, scholarly and everyday life in ancient Mesopotamia. In this course we will study Mesopotamian omen literature from textual, scientific, philosophical and cultural viewpoints in order to understand how divination operated and what it was used for. WRIT

ASYR 1800. Scribes and Scholarship in the Ancient Near East.
This course will explore the development of written traditions among the scribes of the Ancient Near East. Topics covered include the mechanics of writing on clay tablets, the training of scribes and the scribe curriculum, the status of scribes in society, the development of literary and scholarly traditions, the creation of tablet archives, and the range of scholarship (eg science, medicine, ritual, literature) found in the ancient near east.

ASYR 2120. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler. Prerequisite: AWAS 0200. Open to graduate students only.
ASYR 2310. Historiography of Exact Sciences.
Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler.

ASYR 2310A. Ancient Scientific Texts: Akkadian.
Readings and analysis of a major scientific text in Akkadian. Prerequisite: AWAS 0200 or 0210. Open to graduate students only.

ASYR 2310B. Assyriology I.
The kings of Babylonia and Assyria took every opportunity to boast about their military victories, successful hunts, the completion of new cities, and the building and decoration of temples and palaces. But is there the only possible version of Mesopotamian history? This course examines episodes in the history of Babylonia and Assyria (ca. 2400-500BCE) by looking at the political and social relationships among kings, political elites, entrepreneurs, and commoners; emphasis is placed on reading Akkadian texts both in the original and in translation, with a focus on letters, royal inscriptions, and astrological reports. Prerequisite: AWAS0210 or instructor's permission. WRIT

ASYR 2310C. Assyriology II.
This seminar will focus on selected topics of Neo-Assyrian history (1000-612 BC), including: the royal family; the queen and her influence; celebrating New Year's festivals; hunting lions; conquering a city; constructing and decorating palaces and temples; urban renewal and the founding of new cities; the substitute king ritual; and scholarly life. Assyria in the first millennium BC will be examined principally from Assyrian texts in translation. WRIT

ASYR 2310D. Ancient Scientific Texts: Cuneiform Literature.

ASYR 2400. Akkadian Literary and Religious Texts.
Readings in Akkadian literary and religious texts in the original language and script. Possible genres include myths, proverbs, and literary miscellanea as well as prayers, hymns, incantations, rituals, prophecies, and divinatory texts. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Akkadian cuneiform is required. A reading knowledge of both German and French is recommended but not required.

ASYR 2500. Readings in Sumerian.
Advanced readings in Sumerian cuneiform texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Sumerian cuneiform is required. A reading knowledge of both German and French is strongly recommended but not required.

ASYR 2600. Topics in Cuneiform Studies.
Advanced readings in Akkadian and Sumerian cuneiform texts in the original script and language(s). The focus of this course will be on the close reading of a specific genre, period, and/or dialect. A rotating cycle of topics to be covered may include the following with a synchronic and/or diachronic approach: historical texts and royal inscriptions, legal and administrative texts, letters, literary and religious texts, medical texts, or scholastic texts. May be repeated for credit. Prerequisite: AWAS 0210 or instructor permission. Open to juniors, seniors, and graduate students.

ASYR 2700. Special Topics in Ancient Sciences.
This course will be a topics course containing a detailed technical and cultural study of an area of science in a culture of the ancient world. Although intended for graduate students, undergraduate students who have taken EGYT 1600 or AWAS 1600 or a similar course may be admitted at the instructor's discretion.

ASYR 2710. Babylonian Astronomy.
An advanced seminar on Babylonian astronomy, taking both a technical and a cultural perspective on the history of this ancient science.

ASYR 2750. Art and Visual Culture in the Ancient Near East.
Peoples of the Ancient Near East from prehistory to the Hellenistic period produced a unique corpus of production technologies and visual culture. Cultures from Anatolia to the Iranian southern alluvium, from the Levant to Iran and the Caucasus shared this common pictorial language in a variety of ways. In this seminar, we will investigate bodies of archaeological, architectural and pictorial evidence from the Near East while also debating relevant art and architecture historical methodologies and discourses in direct relationship to that material. Conceptual issues such as narrative, representation, perspective, agency, technology, style, symbolism, landscape, space, and power will be explored. Enrollment limited to 15.

ASYR 2800. Archaeologies of Text.
An interdisciplinary seminar that examines the interplay between ancient texts and archaeology in the study of the ancient world. Emphasis will be placed on articulating and analyzing the research methods and assumptions found in case studies set in the ancient Near East, Mediterranean, East Asia, and the Americas. Topics will include: canons of literature as/versus ancient inscriptions; materiality of text; texts on display, in deposits, in archives, in libraries, as refuse; literacy and education; practices of documentation and analysis; writing, language, and ethnicity; historical geography; fakes and forgeries; ancient texts and archaeological ethics. No prerequisites. Intended primarily for graduate students.

ASYR 2900. Introduction to Hittite Language and Literature.
This course is an introduction to Hittite language, literature, and culture. Hittite, the earliest attested Indo-European language (thus related to Greek, Latin, and Sanskrit) was used in Anatolia during the second millennium BCE. It survives in tens of thousands of tablets written in cuneiform script. Students will learn the basic grammar of the language and read in the original or in translation specimens from the fascinating textual legacy of the Hittites, which includes myths, prayers, laws, diplomatic texts as well as formal and informal letters. They will also become familiar with the cultural environment in which those texts were composed.

Interested students must register for RELS 2100F.

ASYR 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ASYR 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

ASYR XLIST. Courses of Interest to Concentrators in Egyptology and Assyriology.

Egyptology

EGYT 0300. In the Beginning: Cosmos and Creation in the Ancient World.
As in every human society, the people of ancient Mesopotamia (Iraq) and Egypt wondered about the universe, their world, and how it came about in the first place. Preserved for us in ancient texts and images, their ideas share some things in common with more familiar ancient traditions, such as the creation account in the Bible. In this course, you will look at these ancient texts and images and learn how to dissect them to find what their authors were thinking. In the process, you will discover some surprisingly sophisticated concepts that are still present in our own culture. DPLL FYS

EGYT 1200. Archaeology of Ancient Egypt.
A general survey of the archaeology of ancient Egypt in prehistoric and Pharaonic times. Covers such areas as the development of private and royal funerary monuments, private and royal dwellings, and temples. Attention is also paid to the principles of Egyptian art and architecture and, where appropriate, to archaeological connections with the surrounding cultures. Offered in alternate years.

EGYT 1210. Archaeology of Ancient Egypt.
See Archaeology of Ancient Egypt (EG0120) for description.
EGYT 1310. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I). Much of this two-semester sequence is spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology-essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. No prerequisites.

EGYT 1320. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II). Continuation of a two-semester sequence spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology-essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. Prerequisite: EGYT 1310.

EGYT 1330. Selections from Middle Egyptian Hieroglyphic Texts. Readings from the various genres of classical Egyptian literature, including stories and other literary texts, historical inscriptions, and religious compositions. Students will be expected to translate and discuss assigned texts. Prerequisite: EGYT 1310, 1320.

EGYT 1340. Selections from Middle Egyptian Hieratic Texts. Introduction to the hieratic script and readings from a variety of hieratic documents, including literary compositions, letters, and religious texts. Students will be expected to translate and discuss assigned texts. Prerequisite: EG 131, 132 (EGYT 1310, 1320).

EGYT 1410. Ancient Egyptian Literature. A survey of one of the most intriguing aspects of ancient Egyptian culture. Readings (in translation) of many of the most significant literary documents that survive from Egypt. Presentation of a reasonable amount of historical perspective. Class discussions concerning the nature, purpose, quality, and effectiveness of the works read. Two term papers. No prerequisites. Offered in alternate years. WRIT

EGYT 1420. Ancient Egyptian Religion and Magic. An overview of ancient Egyptian religion from both a synchronic and diachronic perspective. Examines such topics as the Egyptian pantheon, cosmology, cosmogony, religious anthropology, personal religion, magic, and funerary beliefs. Introduces the different genres of Egyptian religious texts in translation. Also treats the archaeological evidence which contributes to our understanding of Egyptian religion, including temple and tomb architecture and decoration. Midterm and final exams; one research paper.

EGYT 1430. History of Egypt I. A survey of the history and society of ancient Egypt from prehistoric times to the end of the Eighteenth Dynasty (ca. 5000-1300 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history. WRIT

EGYT 1440. History of Egypt II. A survey of the history and society of ancient Egypt from the Ramesside Period to the Roman conquest (ca. 1300-30 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history.

EGYT 1450. History of Egypt III, Libyans, Nubians, and Persians in Egypt. Continuation of EGYT 1430, 1440 (not prerequisites). Covers the Third Intermediate and Late Periods (ca. 1000-332 B.C.E.), from the end of the New Kingdom to Alexander's conquest. Characterized by internal conflict and long intervals of foreign domination, this era is often described as a period of decline, but closer study shows it to be eventful and rich in documentation. Offered in alternate years.

EGYT 1455. Black Pharaohs: Nubian Rule over Egypt in the 25th Dynasty. The course will cover Egypt's 25th Dynasty (728-657 BC), when rulers of Nubia, located in the region of modern Sudan, added Egypt to their territories. Using a wide range of textual and archaeological evidence, students will learn about the history of famous 'black pharaohs' such as Taharqa and study some of Africa's most impressive archaeological remains. This fascinating period is not well understood and has often been afflicted in the past by racist, colonialist scholarship; using primary sources and recent theory on ethnic identity, this class will re-examine the complex and changing relationship between Egypt and Nubia.

EGYT 1460. History of Egypt IV. The Age of Cleopatra. Continuation of EGYT 1430, 1440, and 1450 (not prerequisites). A survey of the history and society of ancient Egypt from Alexander's conquest to the Arab Conquest, ca. 332 B.C.E.-A.D. 600. Covers the Ptolemaic (323-30), Roman (30 B.C.E.-ca. A.D. 300), and Byzantine (ca. A.D. 300-640) periods. Focal point and pivot is the Ptolemaic period, from Alexander the Great to Cleopatra (332-30 B.C.E.). Offered in alternate years.

EGYT 1465. Daily Life In Ancient Egypt. Ancient Egypt is remembered for its grand temples and enduring tombs. Histories too often favor these examples of grandeur, forgetting the daily lives of non-royal ancient Egyptians. This class will investigate the daily lives of these underrepresented ancient Egyptians - craftsmen, servants, women, children - and address concerns such as illness, status, economy, magic and death. Additionally, we will look at the individual and discuss sexuality, love, style and fashion, religious practice and the family. Class format will include lectures and discussions, presentations, and tours through virtual temples which will enable us to reconstruct the daily lives of Ancient Egyptians.

EGYT 1470. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods. The history of Egypt may be famous for the tombs, pyramids and mummies of the Pharaonic periods. This course, however, offers a vision of a different Egypt, a later Egypt: one that evolved from the traditions of the past but was infused by Christianity, Islam, Arabic, and the emergence of one of the world's great cities: Cairo. Students will experience the heritage of Egypt that is contained in the mosque of al-Azhar, the monasteries of the Egyptian desert, and the pageantry and ritual of a new set of ruling elites. At the same time they will understand the continuities of this land which Egyptians refer to as Umm al-Duniya “Mother of the World”.

EGYT 1480. Egypt in the Global World. From the 4th to the 2nd millennium BC we see Ancient Egypt as part of a wider world in the Eastern Mediterranean. Egypt had diplomatic and trade contacts with the major powers and smaller political entities of this period as well as armed conflicts. These contacts left an abundance of material evidence in Egypt in the archaeological and epigraphical records such as foreign luxury items and pottery, and depictions of foreigners in Egyptian tombs and temples. The course will shed light on the varying intensity and character of the relationship between Egypt and her neighbors in the Levant, Nubia and Libya and wider Eastern Mediterranean world.

EGYT 1485. Medicine and Physicians in Ancient Egypt. The course explores medical practices and beliefs, including healing magic, in ancient Egypt, from the beginning of the Old Kingdom to the end of the Roman period, drawing evidence from both ancient texts (in translation) and archaeological sources. In addition to surveying ancient Egyptian medical practices, the course investigates the social world of the physicians and their patients, and their views on their bodies and illnesses. Topics surveyed include medical handbooks and recipes, physicians' equipment and training, gods, demons and disease, pregnancy and childbirth, veterinary medicine, the health effects of the ancient Egyptian diet, and later myths about Egyptian medical knowledge. DP LL WRIT
EGYT 1490. Calendars and Chronology in Ancient Egypt and the Ancient World.
Time is the dimension of history. Chronology studies how we know when events happened. Chronology is much more important to "BC history" than to "AD history." History books state that the great Ramses II ruled around the thirteenth century B.C.E. But how do we know this? The focus of this class is on the answers to such questions through the study of the foundations of the history of Egypt specifically and of the ancient world in general. Some prior knowledge of Egyptian language or civilization might be handy but is by no means required.

EGYT 1500. Ancient Egyptian Art and Architecture.
Ancient Egyptian art and architecture had a remarkably long history, and much that was produced is amazingly well preserved. This course will focus on the inception and development of these material expressions of high culture through detailed studies of monumental buildings and decorated private tombs, as well as the sculpture, painting, and minor arts from the Predynastic period through the end of the Middle Kingdom (c. 3700-1790 BC). Enrollment limited to 20.

EGYT 1510. Ancient Egyptian Art II.
Considers the art of ancient Egypt's New Kingdom or Empire Period (1500-1100 B.C.). The relief carving and painting of Theban temples and tombs are studied in detail, and the developments leading to the revolutionary Amarna style of art is carefully analyzed. Decorative arts, Tutankhamun's treasures, and recent exciting discoveries are all surveyed. WRIT

EGYT 1520. The Archaeology of Ancient Egyptian Household and Settlement.
Survey of the primary settlement remains from the Pharaonic Period of ancient Egypt, addressing the practices and problems in settlement and household archaeology. Not open to first-year students.

EGYT 1525. Living, Creating, Believing and Dying in the Village of the Royal Tomb Builders.
The site of Deir el-Medina was home to a community of skilled workers in charge of digging and decorating the tombs of both the Valley of the Kings and Valley of the Queens during the New Kingdom (ca. 1550-1069 B.C.). Deir el-Medina is usually considered the paradigmatic site-witness for studies of Egyptian daily life and benefits from a substantial material record. Through a multi-perspective analysis drawing on both tangible (archaeological structures) and intangible (textual/iconographical) sources, ancient and modern (excavation diaries and new discoveries recently made on the spot), this course aims at discovering the lifestyle, practices and culture of this community. DPLL

EGYT 1550. Ethnic Identity in Graeco-Roman Egypt.
Egypt under Greek and Roman rule (from c. 332 BC) was a diverse place, its population including Egyptians, Greeks, Jews, Romans, Nubians, Arabs, and even Indians. This course will explore the sometimes controversial subject of ethnic identity and its manifestations in the material and textual record from Graeco-Roman Egypt, through a series of case studies involving individual people and communities. Topics will include multilingualism, ethnic conflict and discrimination, legal systems, and gender, using evidence from contemporary texts on papyrus as well as recent archaeological excavations and field survey projects.

EGYT 1910. Senior Seminar.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 1920. Senior Seminar.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

EGYT 2210. Introduction to Coptic.
Coptic, the last stage of the ancient Egyptian language, was written with essentially Greek alphabetic characters. An introduction to Sahidic, which is perhaps the best represented of the Coptic dialects. Sahidic grammar is explained, and some texts, mainly of a biblical and patristic nature, are read. Open to undergraduates with the consent of the instructor. No prerequisites, but a knowledge of Middle Egyptian or Greek would be helpful.

EGYT 2300. Readings in Ancient Egyptian.
Advanced readings in ancient Egyptian texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of ancient Egyptian is required. A reading knowledge of both German and French is strongly recommended but not required.

EGYT 2310. History of the Ancient Egyptian Language.
Diachronic survey of ancient Egyptian from Old Egyptian through Coptic, covering changes in phonology and grammar and analyzing the processes through which these changes took place. Course requirements are short research papers to be presented in class and a final examination. Previous course work in at least one stage of the Egyptian language required; knowledge of Late Egyptian, Demotic (grammar) or Coptic preferable. Prerequisites: EGY 1310 and EGY 1320, plus either EGY 2210, EGY 2410 or EGY 2610.

EGYT 2320. Ancient Egyptian Phonology.
Examination of the evidence for the sounds of Ancient Egyptian, consonants, vowels, and phonological principles, beginning with Coptic and working backwards to Old Egyptian; using phonology to help explain morphology.

EGYT 2410. Late Egyptian.
Introduction to the grammar of the third historical phase of ancient Egyptian and readings from its various genres, including literary texts, letters, historical inscriptions, and tomb-robbing papyri. Students will be expected to translate and discuss assigned texts. Prerequisites: EGY 1310, 1320.

EGYT 2510. Social Life in Ancient Egypt.
This course will provide a valuable opportunity to link theory and data innovatively. Taking the lifecycle as its structure, it covers Egyptian life from conception to death and the afterlife, drawing together a range of data sources, such as material culture, iconography, textual data, and human remains. WRIT

EGYT 2530. The Perception of Time and Space in Ancient Egypt.
This seminar aims to explore how ancient Egyptian perceived time and space, how they described them, and how they experienced them. Topics covered will include, inter alia, the notion of eternity, the mechanisms of time counting and space organization, the issue of awareness of history, the question of gender-differentiation in the domestic sphere, and the creation of a place.

EGYT 2610. Introduction to Demotic.
Begins with discussions and exercises in the grammar and peculiar script of this late stage of the Egyptian language, followed by readings of actual ancient texts, including The Instructions of Onkhsheshonkhy, The Petition of Petiese, and The Story of Setne Khaemwas. Knowledge of Demotic remains essential for a proper understanding of Egypt during the Saite, Persian, Ptolemaic, and Roman periods. Open to undergraduates with consent of instructor. Prerequisites: EGY 2410 or 2210.

EGYT 2800. Ancient Egyptian Phonology.
Introduction into the phonology of the ancient Egyptian language, from its proto-Semitic cognates to its final stage, the six major dialects of Coptic. The course will concentrate not only on phonology but also on how the principles of Egyptian phonology can be used in understanding and interpreting written forms.

EGYT 2810. Late Egyptian.
Introduction to the grammar of the first historical phase of ancient Egyptian and readings from its two primary genres, the Pyramid Texts and autobiographical inscriptions. Students will be expected to translate and discuss assigned texts. Prerequisites: EG 131, 132 (EGY 1310, 1320).

EGYT 2980. Reading and Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
EGYT 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

EGYT XLJST. Courses of Interest to Concentrators in Egyptology and Assyriology.
Fall 2017
The following courses may be of interest to Egyptology concentrators. Please see the sponsoring department for the time and location of each course.

Archaeology and the Ancient World
ARCH 1630 Fighting Pharaohs: Ancient Egyptian Warfare
ARCH 2115 Ancient Mediterranean Scripts
ARCH 2725 The Making of Egypt

English
Chair
Philip Gould
Our department fosters the open understanding of the study of British, American, and Anglophone literature. We promote original work on new questions of criticism, theory, and analysis. We invite practices of reading and writing that challenge the ongoing creation of knowledge in our fields. English is a large concentration at Brown, and graduates of our Ph.D. program are recognized for their scholarship across the globe. Our nonfiction writing program includes a broad range of genres, styles and modes of writing.

For additional information, please visit the department’s website: http://www.brown.edu/academics/english/

English Concentration Requirements
We study how literature works, how we understand it, and how we write about it. We examine closely matters of language, form, genre, and critical method. We invite you to new practices of reading and writing that promote the understanding of literatures and cultures in English through history, criticism, and theory. We are committed to the understanding of literature from a transnational perspective, emphasizing the movement of texts and peoples across borders of nation, race, gender, and sexuality, now and in the past. And we encourage students to commit themselves to the creation of original knowledge in their reading and writing.

In addition to the English concentration, we offer an English concentration track in the practice of Nonfiction Writing. The concentration in English and the English/Nonfiction track follow the same core requirements, and students in the English concentration may elect Nonfiction Writing courses as electives. We invite applications from qualified juniors to the honors programs in both English and Nonfiction. One of the largest humanities concentrations at Brown, English provides a strong foundation for a liberal education and for work in many sectors of employment, especially in the many areas where new media creates demand for transformative writing: the press, publishing, advertising, visual media, public relations, public service, teaching, finance, government, corporate research and administration. English concentrators routinely go on to law, medical, and professional schools as well as to graduate education in literature and the arts.

About the Concentration
We encourage students interested in concentrating in English to come into the department offices at 70 Brown Street and speak with a concentration advisor. Students in English courses who are considering an English concentration are welcome to make an appointment to speak with their instructor. Concentration programs must be approved by a concentration advisor. To declare a concentration, students must fill out an online Concentration form via ASK and enter their plan of study indicating the requirements that each course fulfills.

Concentration Requirements (10 courses):
1. ONE course in “How Literature Matters” (ENGL0100): 1

Addressing topics about which professors are especially passionate, these introductory courses aim to deepen and refine students’ understanding of how literature matters: aesthetically, ethically, historically and politically. Students not only engage with larger questions about literature’s significance, exploring the particular kinds of insights and thinking it is especially suited for conveying, they also gain a deeper awareness of the critical methods we use to understand and analyze it, engaging with matters of form, genre and media. Finally, these courses help students develop their skills as close, careful readers of literary form and language.

ENGL 0100A How To Read A Poem
ENGL 0100D Matters of Romance
ENGL 0100F Devils, Demons, and Do Gooders
ENGL 0100G The Literature of Identity
ENGL 0100J Cultures and Countercultures: The American Novel after World War II
ENGL 0100M Writing War
ENGL 0100N City Novels
ENGL 0100P Love Stories
ENGL 0100Q How Poems See
ENGL 0100R American Histories, American Novels
ENGL 0100S Being Romantic
ENGL 0100T The Simple Art of Murder
ENGL 0100V Inventing Asian American Literature

2. ONE course in Medieval and Renaissance Literatures (Pre-1700):
   1

These courses, which center on Medieval and Renaissance literary works, cast light on periods that can come across to us as both familiar and strange. They focus our attention on how literatures from these periods depict concepts such as aesthetics, romance, gender, sexuality, race, power and politics in ways that are like and unlike how we tend to think of them today—on how pre-modern or early modern works can both defamiliarize the categories of experience and identity we tend to take for granted and also suggest something of their origins. Several courses under this rubric will also engage with recent literary and filmic adaptations of works from these eras, exploring how many such works continue to function as vibrant and at times ambivalent inspirations for the literary imaginings of later periods.

3. ONE course in Literatures of Modernity (Post-1700):
   1

These courses explore the many strands of writing in English that have emerged from the eighteenth century through the present, shaping the contemporary world. These literatures reflect on political, economic, and intellectual history, from the idea of the nation and the structures of capital through the rise and dissolution of empire and the emergence of postcolonial states, including the forms of race, gender and sexuality that cut across them. Courses also examine how aesthetic works can shape and critique their moment: they look at genres like the novel and short story, poetry, drama, essays, and new, hybrid forms that have arisen with expanding digital media; they also take up a multitude of literary movements whose influences remain with us today, including Romanticism, realism, naturalism, modernism, and post-modernism.

4. ONE course in Literatures of the Color Line (Literature Across Borders):
   1

Inventing Asian American Literature

Brown University
In 1903, W. E. B. Du Bois famously proclaimed in "The Souls of Black Folk" that "The problem of the twentieth century is the problem of the color-line,—the relation of the darker to the lighter races of men in Asia and Africa, in America and the islands of the sea." Courses in this category explore the complex ways in which literary texts have addressed American histories of race, ethnicity, and empire. They may do so from the vantage point of ideas about difference and hierarchy that predate the modern conception of race and by engaging with earlier histories of conflict and contact. These courses explore issues of intersectionality as well, highlighting how race operates in relation to other structures of difference such as gender, sexuality and class.

5. ONE course in Literary Theory and Cultural Critique: 1

The late-twentieth century saw a revolution in the field of literary studies in the United States, as critics turned their attention to the complex and historical nature of our categories of knowledge. This turn to theory was influenced by developments in psychoanalysis, linguistics, philosophy, political theory and sociology and by the emergence of social movements that challenged such structures as patriarchy, homophobia, racism, imperialism, economic inequality, and environmental violence. The avenues of inquiry opened up brought an increased awareness of the implication of literature in the operations of power and ideology; a sense of the potential for literary modes of presentation to challenge and displace such operations; and a new attention to the role of gender, race, empire, class, and sexuality in the formation of the literary work. Courses that satisfy the Literary Theory and Cultural Critique requirement explore some dimension of these issues – either directly, taking as their primary focus a set of theoretical questions or debates, or indirectly, by examining a compelling topical question of social and political significance through works of literature and literary theory.

6. FIVE electives 2

**Total Credits**: 10

1 Each course may fulfill ONE requirement. Five courses must be 1000-level courses. With advisor approval, two of the ten required courses may be taken in departments other than English.

2 Only TWO courses dealing primarily with the practice of writing at the 1000-level may be counted as electives.

All substitutions and/or exceptions must be approved by the concentration advisor in consultation with the Director of Undergraduate Studies. A substitution or exception is not approved until specified in writing in the student's concentration file housed in the English Department.

**English Concentration -- Nonfiction Writing Track (10 courses)**

The English concentration also includes a Nonfiction Writing Track. The requirements are the same as 1 through 6 above, but three of the five electives must be 1000-level Nonfiction Writing courses (only ONE of which may be intermediate). Only THREE Nonfiction courses may count toward the concentration.

**Honors in English**

The English Honors program is intended for students who have been highly successful in their English concentration coursework and who want the opportunity to pursue a research project in more depth than is possible in an undergraduate seminar. The program is intended for those students with a strong desire to conduct independent research under the supervision of a thesis advisor and culminates in the writing of a thesis during the senior year.

**Admission**

Students apply to the Honors Program early in the second semester of their junior year. December or mid-year graduates may apply in their 6th semester, but are encouraged to apply during their 5th semester and write their theses alongside May graduates. Interested concentrators should speak to the Honors Advisor early in their junior year to discuss their plans. Specific deadlines for admission are announced annually and are available on the department website. Students who are studying off campus are expected to meet the application submission deadline. Admission to the English Honors Program depends on evidence of ability and promise in the study of literature. To be eligible for admission, students must have received more As than Bs (and no Cs or below) in concentration courses completed. Students must complete an application; supply a brief writing sample, and request two letters of recommendation from English faculty with whom they have taken courses. If necessary, letters may come from faculty in related departments. Letters from teaching assistants may only serve as supporting recommendations.
Candidates must also submit a one-page project proposal signed by the faculty member who has agreed to serve as the thesis advisor. See procedures and application (http://brown.edu/academics/english/english-honors-procedures) for more details.

December or mid-year graduates who wish to apply to honors have two options, but the first is highly encouraged:

Option 1:
In their 5th semester (Spring), students apply to the honors program along with the other juniors. Accepted students will be incorporated into the regular honors cohort and must meet the same deadlines: i.e. they must complete their theses at the same time as the other honors students (though for mid-years this will be at the end of their 7th semester). They register for ENGL 1991 English Honors Seminar in the Fall, and ENGL 1992 Senior Honors Thesis in the Spring.

Option 2:
In the 7th semester (the Spring of their final year), students take an independent study with their thesis advisor, under whose direction they will begin to research and write their theses. This course must be taken S/NC. In the 8th semester (the Fall of their final year), as they complete their theses, students take ENGL 1992 for a grade. Mid-year graduates should consult with the Honors Director for information about deadlines.

Requirements
The course requirements for the English Honors Program are the same as those for the regular concentration, with the following additions:

As part of regular coursework, and counting toward the concentration requirements, honors candidates must complete at least three upper-level seminars or comparable small courses in which students have the opportunity to do independent research, take significant responsibility for discussion, and do extensive scholarly and critical writing. Students are encouraged to include at least one graduate seminar in their program. (Permission to take a graduate course must be obtained from the instructor.) Honors candidates should discuss their proposed course of study with the Honors Advisor.

During the Fall and Spring of the senior year, honors candidates must complete two additional courses beyond the ten courses required by the regular concentration: ENGL 1991 and ENGL 1992. ENGL 1991 is the Senior Honors Seminar, in which students begin to research and write their theses, as well as meet to discuss their work. This is a mandatory S/NC course. ENGL 1992, the Senior Honors Thesis is an independent research course that must be taken for a grade.

Honors candidates must continue to receive more As than Bs in courses taken as part of the concentration. Courses completed with a grade of C will not count toward an Honors concentration. A student who receives a “C” after admission to Nonfiction Honors and wishes to continue in the program must have earned more As than Bs (and no Cs or below) in other courses in the concentration plan. Students who are studying off campus are expected to meet the application submission deadline.

Admission
Students apply to the Nonfiction Writing Honors Program in the second semester of their junior year. December or mid-year graduates may apply in their 6th semester, but are encouraged to apply during their 5th semester and write their theses alongside May graduates. Interested concentrators should have already made contact with at least one member of the Nonfiction Writing faculty and should meet with the Honors Advisor early in their junior year to discuss their plans. Specific deadlines for admission are announced annually and are available on the department website. Students who are studying off campus are expected to meet the application submission deadline.

Admission to the Honors Program in Nonfiction Writing depends upon a student’s demonstrated superior ability in nonfiction writing. Students must have taken either one intermediate and one advanced writing course, or two advanced writing courses by the end of their sixth semester and completed each of them with an S. To be eligible for admission, students must have earned more As than Bs (and no Cs or below) in other courses in the concentration plan. Students must submit an application, three letters of recommendation, a writing sample from an advanced writing course, and a project proposal.

See procedures and application (http://brown.edu/academics/english/nonfiction-honors-procedures) for more details.

December or mid-year graduates who wish to apply for nonfiction honors have two options, but the first is highly encouraged:

Option 1:
In their 5th semester (Spring), students can apply to the nonfiction honors program along with the other juniors. Accepted students will be incorporated into the regular nonfiction honors cohort and must meet the same deadlines: i.e. they must complete their theses at the same time as the other honors students (though for mid-years this will be at the end of their 7th semester). They register for ENGL 1993 Nonfiction Honors Seminar in the Fall and ENGL 1994 Senior Honors Thesis in Nonfiction in the Spring.

Option 2:
In their 7th semester (the Spring of their final year) students take ENGL 1200 and in their 8th semester (the Fall of their final year) they take ENGL 1994. (Students choosing this option must consult with the Honors Advisor for information on deadlines.)

Requirements
Students in the Nonfiction Writing Honors Program take two additional courses beyond the ten courses required by the Nonfiction Writing Track -- ENGL 1993 Nonfiction Seminar and Nonfiction Writing (with the Honors Advisor) and ENGL 1994 Senior Honors Thesis in Nonfiction Writing; the Honors track will bring to twelve the total number of required courses. The ENGL 1993 grade option must be S/NC; ENGL 1994 must be taken for a grade. Honors candidates should discuss their proposed course of study with the faculty member they choose to direct their thesis.

Honors candidates must continue to receive more As than Bs in courses taken as part of the concentration. Courses completed with a grade of C will not count toward an Honors concentration. A student who receives a “C” after admission to Nonfiction Honors and wishes to continue in the
program must complete an additional course in a comparable subject area, with a grade higher than C.

The Honors Thesis
The Nonfiction Writing Honors thesis is an extended project, usually of between 50 and 80 pages, written under the supervision of one of the Nonfiction Writing faculty and a second reader (who can be from literature or another department). The specific topic and approach of the thesis are worked out between the student and the first reader, with assistance from the student's second reader. A good way to get an idea of what sorts of projects are possible is to visit the Hay Library, which stores theses from previous years, or to meet with the Honors Advisor. The work typically is in a genre chosen from Nonfiction Writing's spectrum: critical analysis, literary journalism, memoir, lyric essay, or narrative based on travel, science, history, or cultural critique.

Full thesis drafts are due by mid-March; final bound copies of the thesis are due in mid-April. Late theses will not be accepted for honors after the April deadline; students who hand in theses after the deadline and before the end of the term will receive a grade for the thesis course, but they will not be eligible for departmental honors. The completed thesis will be evaluated by its first reader and second reader, each of whom provides written commentary and suggests a grade for ENGL 1994.

Evaluation
The English Department reviews the academic record as well as the thesis evaluations for each senior completing the Nonfiction Writing Honors Program. Following a successful review, the student will be eligible to graduate with Honors in Nonfiction Writing.

English Graduate Program
The Department of English offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/english

Courses
ENGL 0100A. How To Read A Poem.
It is difficult/ to get the news from poems/ yet men die miserably every day/ for lack/ of what is found there. William Carlos Williams’s words begin to articulate this course’s focus on the power of poetic language to represent and to give shape to human experience. Designed for concentrators and non-concentrators, the semester’s work consists of both conceptual and practical matters conducive to understanding, analyzing, and writing about poems. The reading draws freely on texts from across historical and geographical boundaries, including works by Spenser, Shakespeare, Lanyer, Donne, Keats, Dickinson, Frost, Auden, Whitman, Eliot, Cummings, Bishop, and Heaney.

ENGL 0100B. Literature, Trauma, and War.
This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war—glorifying it, and representing its horrors. We’ll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Limited to undergraduates. Students should register for ENGL 0100B S01 and may be assigned to conferences sections by the instructor during the first week of class.

ENGL 0100C. Altered States.
A course about ecstasy, rapture, transport, travel, mysticism, metamorphosis, and magic in pre- and early modern verse, drama, and prose, including: Ovid (Metamorphoses), Shakespeare (A Midsummer Night’s Dream: Othello), Marlowe (Dr. Faustus), Mandeville’s Travels; the writings of the medieval female mystics Julian of Norwich and Margery Kempe; the ecstatic verse of Crashaw, and the erotic, at times pornographic, verse of Donne, Herrick, Carew, Rochester, and Behn.

ENGL 0100D. Matters of Romance.
Narratives (1100-1500) of men, women, and elves seeking identity on the road, in bed, and at court. Readings (in modern English) include Arthurian romances, Havelok, Isidra, De la France, and Caxton’s “Wife of Bath’s Tale.” Primarily for freshmen and sophomores. Students should register for ENGL 0100D S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0100E. Catastrophic Communities.
What becomes of communities and individuals in a catastrophe? This course considers the different literary, social and ethical formations that arise or are destroyed in disaster, and examines what it means to be both an individual and part of a collective in times of unprecedented upheaval. Readings by Blanchot, Camus, Sebald, Duras, Freud, Arendt, Jaspers, Orwell, and Eggers. WRIT

ENGL 0100F. Devils, Demons, and Do Gooders.
Who hasn’t struggled with the problem of good and evil? Who hasn’t wondered what lurks in the dark recesses of the soul? We will investigate how Milton, Mary Shelley, Melville, Poe, and Hawthorne, among others, grapple with these fundamental questions of judgment.

ENGL 0100G. The Literature of Identity.
This course will explore various conceptions of personal identity, with an emphasis on Romanticism. We’ll read Anglo-American philosophical and literary texts (mostly poetry) from the Renaissance through the 19th century, taking some excursions into contemporary theory (queer, feminist, post-structuralist). Writers may include Shakespeare, Montaigne, Locke, Hume, Rousseau, Wordsworth, Keats, Emerson, Browning, and Wilde.

ENGL 0100H. Fictions and Frauds: Literature and the Historical Imagination.
How does fiction reinvent history? What makes autobiography "true"? Readings focus on the slave narrative, Hawthorne, historical novels, and Jack Kerouac’s “On the Road.” Limited to undergraduates.

ENGL 0100I. American Fiction and the Sea.
This class examines one of the most distinctive of literary genres: the sea tale. These narratives are interested not only in how we know what we know, but in the ways we imagine what we don’t know. Novels and films to be discussed will include Moby-Dick; Lord Jim; Aguirre, the Wrath of God; Apocalypse Now; The Witness.

ENGL 0100J. Cultures and Countercultures: The American Novel after World War II.
A study of the postwar American novel in the context of the intellectual history of the 1950s, 1960s, and 1970s. We will read the postwar novel in relation to the affluent society, the vital center, the lonely crowd, the power elite, the one-dimensional man, the post-industrial society. Authors to be considered include Baldwin, Bellow, Ellison, Highsmith, McCarthy, O’Connor, Petry, Pynchon, and Roth. Two lectures and one discussion meeting weekly. Students should register for ENGL 0100J S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0100K. The Dead and the Living.
Explores ethical, historical, and personal dilemmas in modernism through the relation between the dead and the living. What claims do the dead have on the living? How do the living shape the lives of the dead? Readings in literature, psychoanalysis, and philosophy, including Henry James, Virginia Woolf, Walter Benjamin, Sigmund Freud, James Joyce, W. G. Sebald, and Julian Barnes. Students should register for ENGL 0100K S01 and may be assigned to a conference section by the instructor during the first week of class.

ENGL 0100L. What Was Postmodern Literature?
How compatible is the idea of the postmodern with the idea of a historical period? This course looks at recent British and American literature through the optic of postmodern theory, discussing how the theoretical problematization of both history and politics has an impact upon the very possibility of fiction. Readings include Doctorow, Pynchon, Amis, Jameson, Lyotard, Baudrillard. Students may be assigned to conference sections by the instructor during the first week of class.
ENGL 0100M. Writing War.
Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Hemingway, Woolf, Rebecca West, Graham Greene, Pat Barker, Tim O’Brien, Georges Perec. Students should register for ENGL 0100M S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0100N. City Novels.
This course examines 20th and 21st century novels to consider how these narratives envision the city, its possibilities and limits. How does the city shape how we think, wander, grow up, see and know each other? How does the city divide people? How does the novel imagine ways to bridge those divisions? Readings by Woolf, Chandler, Wright, Cisneros, Smith, Calvino, Adiga, Whitehead.

ENGL 0100P. Love Stories.
What do we talk about when we talk about love? We will see how writers have addressed this question from Shakespeare’s day to the present. Writers may include Shakespeare, Austen, Eliot, Flaubert, Graham Greene, Marilynne Robinson, and/or others. Students should register for ENGL 0100P S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0100Q. How Poems See.
What makes poems and pictures such powerful forms of life? Why do pictures have so much to tell us? How do we see things in words? How do graphic images, optical images, verbal images, and mental images together constitute ways of understanding the world? Looking at poems and images from Giotto and Shakespeare, Wordsworth and Dickinson and Turner through such modern poets and painters as Stevens, Ashberry, Warhol and Hejinian, we will study sensory and symbolic images, the uses and dangers of likeness, and the baffling confluence of concrete and abstract, literal and figurative, body and mind, matter and spirit.

ENGL 0100R. American Histories, American Novels.
How do novels make readers experience such traumatic American historical events as war, slavery, genocide, race riots and other forms of violent civil conflict? What kind of political or ethical perspective on such divisive and explosive events do literary narratives encourage their readers to take? How can novels function as memorials to such events? What forms of redress can come through literature? This course explores these questions by examining a number of important post-1945 works that offer powerful examples of how novels make us think and feel in particularly resonant ways about the histories they depict. DPLL WRIT

ENGL 0100S. Being Romantic.
“Romantic literature” and “Romantic art” are familiar concepts in the history of culture. But what does “Romantic” actually mean? Were Coleridge and Keats especially dedicated to writing about erotic love? Why would “Romantic” literature emerge during the period of the French Revolution and Industrial Revolution? What does early 19th-century “Romanticism” have to do with the meaning and status of the “Romantic” in our culture today? Readings in British and American writing from Blake and Mary Shelley to Ani DiFranco and Rage Against the Machine.

ENGL 0100T. The Simple Art of Murder.
A survey of the history of criminal enterprise in American literature. Authors to be considered include Poe, Melville, Hawthorne, Twain, Chandler, Wright, Petry, Highsmith, Millar, Harris, and Mosley. Students who have taken ENGL 0560D may not register for this course. Students should register for ENGL 0100T S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0100V. Inventing Asian American Literature.
What insights can literature provide into the complicated workings of race in America? What role can the invention of a literary tradition play in illuminating and rectifying past and present injustices? We explore these questions by examining how the idea of an Asian American literary tradition came into being and by reading influential works that have become part of its canon. Students should register for ENGL 0100V S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0150A. Elizabeth I: The Queen and the Poets.
Queen Elizabeth I, a poet herself, adorned her aging body as the symbolic object of desire for a circle of ambitious male poets. Considers the poetic means by which Sidney, Spenser, and Shakespeare overcome the obvious obstacles to desire presented by her uncertain health and imperious temperament and court their Virgin Queen. FYS

ENGL 0150B. Objects of Beauty in Renaissance Culture.
What made a poem or a play as beautiful in 16th-century England as a hat or the right pair of shoes? Literary history and aesthetics from Wyatt, Surrey, and More, through Sidney, Shakespeare, Jonson, and Donne. FYS

ENGL 0150C. The Medieval King Arthur.
Where did stories of King Arthur come from and how did they develop in the Middle Ages? We will read the earliest narratives of King Arthur and his companions, in histories and romances from Celtic, Anglo- Norman, and Middle English sources, to examine Arthur’s varying personas of warrior, king, lover, thief. Enrollment limited to 20 first-year students. FYS WRIT

ENGL 0150D. Shakespeare’s Present Tense.
Shakespeare in Love suggests how Shakespeare was clued in to elite and popular cultures. Current adaptations like O and 10 THINGS I HATE ABOUT YOU demonstrate how Shakespeare provides anachronistic clues to issues of the present. This course will trace such clues by examining the cultural origins and ongoing adaptations of Romeo and Juliet, Hamlet, Othello, Twelfth Night, Henry V, and the sonnets. Enrollment limited to 20 first-year students. FYS

ENGL 0150E. Love and Friendship.
What do we talk about when we talk about love? This course poses this question in various ways. How, for instance, can we tell the difference between love’s various forms—between love that is friendly and love that is romantic? How do the different forms of love differently shape people? How does love work when it involves sex, or marriage, or children, or divinity? And what must love involve to be called “good”? Why? Materials will range from Plato and St. Augustine to Leo Bersani and Allen Bloom and will also include popular filmic representations of love. Limited to 20.

ENGL 0150F. Hawthorne and James.
An introduction to a pair of writers whose work continues to shape our understanding of American literature and American identity. Focusing on much of their most important work, our aim will be to understand how their conceptions of the relationship between writing and history both complicate and complement each other. Limited to 20 first-year students.

ENGL 0150G. Lincoln, Whitman, and The Civil War.
An introduction to the literature of the American Civil War: Whitman, Lincoln, Melville, Stowe, and other autobiographical and military narratives.

ENGL 0150H. Literature of The American South.
The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of “the South.” Explores the sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Faulkner.

ENGL 0150I. The Simple Art of Murder.
This course surveys the history of criminal enterprise in twentieth-century American culture. Drawing from a broad range of sources (“literary” novels and pulp fiction, B-movies and auteurist features), we will assess the role of crime as object of aesthetic attention and attend to the questions that can arise about the idea of the criminal when one takes it up outside of its usual home in courts. Authors: Poe, Hammett, Fitzgerald, Chandler, Wright, Petry, Hughes, Butler. Directors: Hitchcock, Wilder, Huston, Truffaut, Pake, Lupino. Limited to 20 first-year students.
ENGL 0150J. Inventing America.
The one of distinguishing features of American literature may be its seemingly constant struggle with the idea of America itself. For what, these authors wonder, does/should America stand? We will examine the rhetorical battles waged in some major works over the meaning and/or meanings of America’s national identity. Authors may include Franklin, Hawthorne, and Fitzgerald. Limited to 20 first-year students. Instructor permission required. FYS WRIT

ENGL 0150K. The Transatlantic American Novel.
This course reads American literature across national boundaries, focusing on the novel genre and the question of “American” identity as a problem in itself. The course takes up this problem in a wide array of novels spanning the period between the late eighteenth and twentieth centuries. Writers include Crevecoeur, Susanna Rowson, Poe, Melville, Twain, and Nella Larsen. Limited to 20 first-year students. FYS

ENGL 0150L. The Sensational and the Real in Victorian Fiction.
This course will explore two modes through which Victorian novels engaged the turbulent experience of their time: realism and sensation. We will examine how these different genres tackled issues of gender, sexuality, class, and personal and community identity. Enrollment limited to 20 first-year students. FYS

ENGL 0150M. “Model Minority” Writers: Cold War Fictions of Race and Ethnicity
Explores the construction of race and ethnicity in U.S. writings of the 50s, paying particular attention to how literary texts negotiate the ideological demands of Cold War anti-communism. Writers may include Saul Bellow, Carlos Bulosan, Ralph Ellison, Jack Kerouac, Norman Mailer, John Okada, and Jade Snow Wong. FYS

ENGL 0150N. Black Atlantic Narratives of Africa
We will study fiction, drama, and autobiography by black writers who have used the motif of a literal or symbolic journey to Africa to explore powerful ways issues of the trans-Atlantic slave trade, Africa as land and concept, individual and collective memory. Writers will include Maryse Condé, Charles Johnson, George Lamming, Paule Marshall, Toni Morrison, and Derek Walcott. FYS

ENGL 0150O. Englishness and Britishness in Contemporary Fiction.
How have writers of fiction responded to recent developments in British political culture? How has the category of Englishness changed during that period? This course offers an overview of some of the most important British writers of the last twenty years and an introduction to theories of culture and ideology. Readings include Ishiguro, Kelman, Caryl Phillips, Zadie Smith. FYS

ENGL 0150P. Is There a Theory of the Short Story?
This course considers the question in the title by looking at works of short fiction by Melville, Conrad, Bierce, Joyce, Lawrence, Kafka, Wicomb, Paley, O’Connor, Beckett, White, and literary theories by figures such as Lukacs, Bakhtin and Delleuze. Enrollment limited to 20 first-year students. Banner registrations after classes begin require instructor approval. FYS

ENGL 0150Q. Realism and Modernism.
The novel as a genre has been closely identified with the act of representation. What it means to represent “reality,” however, has varied widely. This seminar will explore how the representation of reality changes as modern fiction questions the assumptions about knowing, language, and society that defined the great tradition of realism. English and American novels will be the primary focus of our attention, but influential French, German, and Russian works will be studied as well. Limited to 20 first-year students. Banner registration after classes begin requires instructor approval. FYS

ENGL 0150R. The Problem of Women’s Writing.
Combines a survey of British and American women writers with an interrogation of the concept of women’s writing. Authors will include Austen and Bronte, Walker and Viramontes; theoretical topics will include the figure of the author, subjectivity and ideology, the concept of a separate women’s canon or tradition, and the complex differences within “feminine” writing and “feminist” reading. FYS

ENGL 0150S. The Roaring Twenties.
The 1920s helped solidify much of what we consider modern in 20th-century U.S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to think about the period’s important topics: the rise of mass culture and of public relations, changes in women’s position, consumerism, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker. Enrollment limited to 20 first-year students. Instructor permission required. FYS

ENGL 0150T. Arms and the Man.
"Mother Green and her killing machine!" So enthuses a grunt in Full Metal Jacket about the Marine Corps. This seminar explores the romance of man and machine: the individual man’s body as a machine and group relations with each man as a cog in a larger body/machine. We’ll also consider other sites—including the gym—infiltrated, at least figuratively, by militarism. Texts: Crane, The Red Badge; Herr, Dispatches; Swofford, Jarhead; Paul Fussey, The Great War and Modern Memory; Samuel Fussey, Muscle. Films: Full Metal Jacket; The Hurt Locker; GI Jane; Three Kings; Pumping Iron. Enrollment limited to 20. Instructor permission required. FYS

ENGL 0150U. The Terrible Century.
Although the term "terrorism" was coined in the 18th century, and although its contemporary resonance has reached an unprecedented pitch, the truly terrible century was arguably the 20th. This course introduces 20th century literature in English through a historical and philosophical examination of terror and terrorism. We will focus on several historical contexts, including: British colonialism in Ireland and Africa, South African apartheid, and the post 9/11 world. Readings include Conrad, Bowen, Farrell, Gordimer, Coetzee, Foulks, Walters, Hamid. Enrollment limited to 20 first-year students. FYS

ENGL 0150V. James and Wharton.
Friends, rivals, fellow ex-pats, and close correspondents for 15 years, Henry James and Edith Wharton had much in common. Their names are often coupled together in much the manner as Hemingway and Fitzgerald, since their fiction has often thought to deal with the same set of concerns: the societal and emotional ups and downs of well-to-do people in London, Paris, and New York. This class will read James and Wharton side by side in order not only to see in what ways they shed light on each other, but in what ways they differ. Limited to 20 first-year students. FYS

ENGL 0150W. Literature and the Visual Arts.
How do words and images represent? Are the processes by which literature and the visual arts render the world similar or different? Is reading a novel or a poem more like or unlike viewing a painting, a sculpture, or a film? This seminar will analyze important theoretical statements about these questions as well as selected literary and visual examples. Limited to 20 first-year students. FYS

ENGL 0150X. The Claims of Fiction.
This course explores the interplay of tropes of strangeness, contamination, and crisis in a range of novels and shorter fiction, in English or in translation. We will ask why social misfits and outsiders somehow become such fascinating figures in fictional narratives. How do these figures entice and equip readers to reflect on collective assumptions, values, and practices? Writers will likely include Baldwin, Brontë, Condé, Conrad, Faulkner, Greene, Ishiguro, Lessing, Morrison, Naipaul, Salih. Limited to 20 first-year students. DPLL FYS

ENGL 0150Y. Brontës and Brontëism.
The novels of Anne, Charlotte, and Emily Brontë alongside works (fiction and film) influenced by or continuing their powerful (and competing) authorial visions: Wide Sargasso Sea (Rhys), Rebecca (Hitchcock), The Piano (Campion), and Suspiria (Argento). Among other questions, we will discuss the role of Romanticism, feminism, the bodily imaginary, colonialism, and genre. Enrollment limited to 20 first-year students. FYS
ENGL 0200A. All Eyes On You: Voyeurism and Surveillance Culture. Can one both fear and delight in the knowledge of being watched? How is desire produced in voyeurism or exhibitionism? This course will explore the importance, danger and seduction of voyeuristic observation and surveillance culture through the lens of several 20th century American novels and films. Authors include Nobokov, James and Pynchon. Films include "Lolita," "Rear Window" and "Brokeback Mountain." Enrollment limited to 17.

ENGL 0200B. Queer and Feminist Poetics: Hybrid Forms, 1969 to Present. How do queer and feminist text engage formal experiment? This course will explore the political, conceptual, and rhetorical uses of queer and feminist discourses in contemporary hybrid-genre writing. William S. Burroughs, Kathy Acker, Allen Ginsberg, Sylvia Plath, Gloria Anzaldúa, Jack Spicer, Alice Notley, C.A.Conrad, Christian Hawkey, and Ronaldo Wilson. Enrollment limited to 17. WRIT

ENGL 0200C. The Art of Catastrophe: Crisis and Collapse in the American Literary Landscape. How have contemporary thinkers grappled with great crises -- environmental, economic, spiritual, terrorist -- in the 20th century? From catastrophic events like 9/11 to volatile conflicts involving race and gender, this course assesses contemporary literary and cinematic representations of crisis by probing their political and aesthetic significance. Authors may include: West, Ward, DeLillo, Hamid, Ozeki; Films include Soyient Green, Dawn of the Dead, The Reluctant Fundamentalist. Enrollment limited to 17. WRIT

ENGL 0200D. Intimate Horrors: Encountering the Uncanny in Literature and Film. The horrifying is often times uncomfortably close, even familiar. Alongside theoretical discussions of Gothic literature, psychoanalysis, media, and genre, this course examines the unsettling effects and affects of what makes our skin crawl. We will discuss crazed limbs, possessed voices, evil mothers, creaking houses, ghostly doubles, and creepy children. Works by: Freud, Shelley, Poe, Hawthorne, Melville, Wilde, Lovecraft, Cronenberg, Hitchcock, Kubrick, Lynch. Enrollment limited to 17. WRIT

ENGL 0200E. Fictional Brains: Reading Artificial Intelligence and Cognition. Reading high and popular literature (e.g. detective fiction and science fiction), this course investigates how we think about and construct fictional characters. This course will introduce students to applying classical and recent philosophical, psychological, and neuroscientific research to the study of literary texts. Possible authors/work: Poe, Melville, Kafka, Asimov, Blade Runner, and Sherlock. Enrollment limited to 17. WRIT

ENGL 0200F. The Spectacle of War in 20th-Century American Literature and Film. This course examines the mediated experience of war from Vietnam forward in light of traditional representations beginning with the Civil War. We will consider the ways in which war is made visible (or invisible), and the position of the reader/spectator as voyeur, consumer, and citizen. Authors: Crane, Herr, O'Brien, Huong, Iraq War veterans, Guantnamo detainees. Directors: Griffith, Kubrick, Coppola, Scott. Enrollment limited to 17. WRIT

ENGL 0200H. Writing the Black Diaspora: Speaking Truth to Power. What can slave narratives tell us about speech, power, and truth? What are the relationships between self-expression, genre, and questions of truth under conditions of disempowerment? This course introduces contemporary thinking about race and colonial encounters alongside fiction and life-writing by African-American, Canadian, and Caribbean authors from a range of historical periods. Authors: Harriet Jacobs, Audre Lorde, Toni Morrison, Dionne Brand, Lawrence Hill. Enrollment limited to 17. WRIT

ENGL 0200J. Violence and Secrecy in Victorian Fiction. How is violence actually depicted in Victorian fiction? Often these novels are oriented around violence but are structured by the figure of the secret, a figure that invites and refuses knowledge. This course examines the relation between violence and secrecy in Victorian fiction and its afterlife. Authors: Brontë, Stevenson, Dickens, Collins, Wilde. Films: The Prestige, Psycho, A History of Violence. Enrollment limited to 17. WRIT

ENGL 0200K. Race, Dystopia, and Contemporary Fiction. What happens to race after the end of the world as we know it? We will study dystopian literature written by black and Asian North American authors to investigate how they (re)imagine race in relation to questions of the human, citizenship, and state violence. Authors include Colson Whitehead, Chang-rae Lee, Octavia Butler, Karen Tei Yamashita, Nalo Hopkinson, and Larissa Lai. Enrollment limited to 17. WRIT

ENGL 0200L. Trial and Error: Law in American Literature and Film. What does our cultural fascination with law suggest about the limits of justice in America? From crime to capital punishment, this course investigates law’s fragile relation to personhood and citizenship, examining tensions between the human body and the terms by which it is legislated and disciplined. Authors: Capote, Eggers, Faulkner, Lee, Morrison, Twain. Film/TV: Dead Man Walking, Milk, The Wire. Enrollment limited to 17. WRIT

ENGL 0200M. A Brief History of Technophobia. From the printing press to CGI, novels and films depend upon machines for their existence. So why do they often depict technology as something sinister? From Mary Shelley to Terminator, we’ll explore the anxiety aroused by technology: considered as machinery, a mode of thought, and a principle of social organization. Marx, Dickens, Melville, Orwell, Kafka, Coetzee, Chaplin, Kubrick, Kathryn Bigelow. Enrollment limited to 17. WRIT

ENGL 0200N. Obscenity. The term “obscene” describes the extreme, the offensive, but also gestures toward that which is “offstage.” How can something offend if it takes place out of sight? Courting potential discomfort, we will tarry with obscenity in various guises and try to cope with its effects. Texts by Catullus, Shakespeare, Sade, Baudelaire, Henry Miller, Beckett, Delany, Jelinek. Films by Fassbinder, Breillat. Enrollment limited to 17. WRIT

ENGL 0200O. Monsters in America. Monsters reveal our deepest fears and our greatest insecurities, and every society creates the monsters that it needs. Probing the shifting terrains of sexual, racial, and cultural otherness that monsters represent, this course examines depictions of monstrosity in 19th- and 20th-century American literature and film. Possible authors/films include: Hawthorne, Lovecraft, Stephen Crane, Octavia Butler, Asimov, The Elephant Man, and Alien. Enrollment limited to 17. WRIT

ENGL 0200Q. Opting Out: Social Withdrawal and the Reclusive Life. How do borders, migration, and naturalization figure into 20th century American Empire? This course will explore the political, conceptual, and rhetorical uses of queer and monstrosity, as well as their place in contemporary hybrid-genre writing. William S. Burroughs, Kathy Acker, Allen Ginsberg, Sylvia Plath, Octavia Butler, Karen Tei Yamashita, Nalo Hopkinson, and Larissa Lai. Enrollment limited to 17. WRIT

ENGL 0200R. Reading With Feeling. How do we feel with our bodies? Starting from the Enlightenment and moving to romanticism this course examines various literary and philosophical accounts of sympathy and sentimentality as modes that complicate the self and its relation to society. Authors include: Adam Smith, Goldsmith, Sterne, Austen, Wordsworth, Joanna Baillie, Keats. Films include Bridget Jones’s Diary and Atonement. Enrollment limited to 17. WRIT

ENGL 0200S. Fresh Off the Boat: Immigration and Border-Crossings in American Empire. How do borders, migration, and naturalization figure into 20th century American Empire? This course examines various literary and philosophical accounts of sympathy and sentimentality as modes that complicate the self and its relation to society. Authors include: Adam Smith, Goldsmith, Sterne, Austen, Wordsworth, Joanna Baillie, Keats. Films include Bridget Jones’s Diary and Atonement. Enrollment limited to 17. WRIT

ENGL 0200T. To Be Young, Gifted, and Black. This course will consider various expressions of African-American childhood and adolescence across literature and film. We will contemplate notions of joy, sorrow, love, shame, and pride and strive to better understand the influence of these feelings on modes of representation, perception, and experience. Authors/filmmakers will include: Wright, Baldwin, Morrison, Spike Lee, and Antoine Fisher. Enrollment limited to 17. WRIT
ENGL 0200U. Avengers, Vigilantes and Detectives: Revenge in Fiction. From Hamlet to Batman, the figure of the “avenger” has gripped the public imagination. Why does the desire for revenge speak to us across time? What parallels can we see between vigilantes and detectives, and what is their role in state and society? Works by: William Shakespeare, Thomas Middleton, Emily Brontë, Gaston Leroux, Agatha Christie, Alan Moore and Quentin Tarantino. Enrollment limited to 17. WRIT

ENGL 0200V. Shakespeare Rewrites Shakespeare. How did Shakespeare’s drama develop thematically, rhetorically, and historically over the span of his literary career? This course offers students a representative introduction to Shakespeare’s work, paying particular attention to how later plays reinvent linguistic, historical, and theatrical materials worked out in earlier plays. Plays include Othello and The Winter’s Tale; Romeo and Juliet and Two Gentlemen of Verona; and Titus Andronicus and Hamlet. Requirements include critical essays, an in-class presentation, and a final examination.

ENGL 0200W. Tragic Variations: Classical, Early Modern, Contemporary. The genre of tragedy has been one of the most hotly contested and theorized topics in the Western canon, yet today, commonplace events are routinely deemed tragic. This seminar examines the history of tragedy by considering representative and foundational literary and philosophical texts (Shakespeare, Aristotle, Sophocles, Milton, Marlowe, and Nietzsche) to understand the “tragic”: catharsis, revenge, fate, pity, etc. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0200X. Unrealism: Science Fiction and Speculative Literature. What can other worlds and other species tell us about how we see our own? This course will explore issues of gender, sexuality, technology and identity across sci-fi and fantasy literature, in addition to comics, TV and film. Texts will likely include: China Mieville, Ursula LeGuin, Octavia Butler, Samuel Delany, Sandman, Doctor Who, Star Trek, Sense8. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0200Y. Graphic Memories: Form and Representation in the Contemporary Graphic Novel. How do graphic novels tell stories—whether personal or historical—through their visual-literary form? This course critically examines the representation of identity and difference, traumatic memory, and perspectival experience within memoir and documentary genres. May include works by: Alison Bechdel, Art Spiegelman, Marjane Satrapi, Shaun Tan, Keiji Nakazawa, and Lynda Barry; Butler, Barthes, and Cathy Caruth. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0200Z. Who Are You to Judge? Modernist Fiction and Judgment. Literature both judges and is judged. It features scenes of judgment, and calls on readers to judge and interpret it. This course examines the ways in which early twentieth-century texts scrutinize ethical assumptions, form verdicts, and interrogate the position from which one judges. Authors: Melville, Kafka, Nabokov, Ford, Hurston, Ishiguro, Wright, Brecht, and Larson. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201A. Discourse/Intercourse: Recognizing Desire in Novels and Film. Sexuality and sex are not the same, although they are often mistaken for one another. Focusing on realism fiction and media, psychoanalysis, and Marxist theory, this course investigates novels and films that leave the representation of identity and difference, traumatic memory, and intersubjectivity within memoir and documentary genres. May include works by: Spike Lee and Dave Chappelle. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201B. Wrong Girls: Unwelcome, Unnerving and Undesirable Genders. Unpleasing women appear throughout fiction: this course will address novels, films and critical theory from the Victorian to the contemporary which align the nasty, the ugly and the unwelcome with gender. Authors and critics include Eliot, Brontë, James, Ford, Atwood, Tan, Barthes, Butler, hooks and Gilbert & Gubar. Films include Whatever Happened to Baby Jane?, Rosemary’s Baby and Princess Mononoke. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201C. Birds, Beasts, and Bots: American Literature between the Wild and the Wired. 19th- and 20th-century American writers have often contemplated the relation of human beings to nature and machinery. This course examines the diverse ways American writers of this period have represented human interactions with natural elements (animals, wilderness) and artificial components (robots, factories, cities). We will focus especially on the question of whether human life is characterized in these texts as increasingly natural or programmed. Readings include works by Thoreau, Dickinson, Crane, London, Sinclair, Stevens, Eliot, Bradbury, Dick, and Dillard. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201D. Feeling Queerly. Explores “queerness” in all of its connotations in American and European literature from the late nineteenth to the mid-twentieth century. Analyzes the ways that a range of embodied feelings and emotional states (like shame, disgust, envy, embarrassment, and passivity) shapes formal aspects of literary works and effectively hinders speech, action, and self-expression. Authors include Melville, Woolf, Stein, Beckett, Baldwin, Crane, Genet. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201E. World Wide: Globalization from Shakespeare to Rushdie. Explores the idea of globalization and its resonances with 17th and 18th century conceptions of a global network. How did early modern authors treat the ideas of cosmopolitanism, competing loyalties between home and the world, conflicts between self and other? How do contemporary authors take up or respond to these issues? Readings include Shakespeare, Milton, Dryden, Swift, Kant, Amitav Ghosh, and Salman Rushdie. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201F. Ravishing Verse: The Lyric and Spiritual Crisis. This seminar explores the tension between the language of the spiritual and the language of the sensual in lyric poetry. How does a poet’s inner struggle over questions of belief engage the individual with the larger community? How does this struggle confront the lyric tradition? Poetry and prose readings will include Spencer, Donne, Herbert, Marvell, Milton, Hopkins, Mahon, and Longley. Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201G. Killing them Softly: Satire and Stereotype in African-American Literature. Examines the possibilities and limitations of satire within the field of 20th-century African-American literature. We will consider the ways in which the satirical form is deployed by writers seeking to examine questions of authenticity, community, and stereotypical representation. Authors include Schuyler, Elisson, Killens, Reed, Beatty, and Everett. Screenings of works by Spike Lee and Dave Chappelle. Enrollment limited to 17 undergraduate students. WRIT DPLL

ENGL 0201H. Green Shakespeare: Literature, Ecology, and the Nonhuman. How did Renaissance writers conceive of nature, human autonomy, and the nonhuman agencies of the environment? What ecological futures might they invite us to imagine? This course seeks to address these and other questions by exploring the strange and paradoxical writings of some of English literature’s earliest ecological thinkers. Readings will include a variety of materials from plays (The Tempest, Titus Andronicus, The Winter’s Tale) to poetry (Donne, Milton, Marvell), history, and theory (eco-criticism, animal studies, science studies). Enrollment limited to 17 undergraduate students. WRIT

ENGL 0201J. Shakespeare’s Secret Agents. Whether it’s women playing men or kings playing paupers, Shakespeare’s characters frequently use the art of disguise to right wrongs and wield authority in critical situations. But how far is “too far” for a disguised maiden pursuing her true love’s hand in marriage, or for an undercover ruler seeking to unify his fractured country? When do their well-intentioned deceptions blur into reality, and at what personal and political cost? Using a combination of historical and critical approaches, this course will explore how secret identities test the boundaries between public good and private deception across Shakespeare’s dramatic genres.
ENGL 0201K. Mad in America.
Examines the figure of madness in nineteenth and twentieth century American literature. Mad characters and mad writers raise questions about the vexed relation between self and society, desire and excess, form and disorder, and liberty and the institution. Authors include Poe, Brown, Melville, Gilman, Nabokov, Kesey, Plath, and films by Forman, Kubrick. Enrollment limited to 17. WRIT

An examination of novels and other works of literary prose from American protest novels concerned with the struggle of groups defined in terms of race or class to postmodern narratives characterized by formalist attempts to transcend the unbridgeable gap between politics and writing. Authors may include Stowe, Sinclair, Hammett, Agee, Ellison, Pynchon, and Reed. Enrollment limited to 17. WRIT

ENGL 0201M. No Futures: Extinction and the Nation in American Literature.
American literature often narrates the achievement of national identity as an organic process that will be realized in the future. Yet many authors obsess over broken blood lineages, atavism, lost property, and various forms of extinction. This course examines this tension, and asks why the disruption of "futurity" provokes such persistent aesthetic reflections. Readings include Whitman, Hawthorne, Cather, Faulkner, McCarthy. Enrollment limited to 17. WRIT

ENGL 0201N. Reading Against the Grain in Nineteenth-Century Literature.
Examines literature that leads the reader to identify and empathize with what the text says, yet also to be suspicious and distrustful about what the text leaves unsaid. How do we reconcile these two conflicting ways of reading? We will explore how nineteenth-century works use this tension to express anxieties of industrial modernity. Works include Coleridge, James, Hardy, Dickens, Melville, Freud, Hitchcock. Enrollment limited to 17. WRIT

ENGL 0201O. Kids on the Run: Literary Outcasts and Outsiders.
How do we grow, and when do we "grow up"? This seminar focuses on uneasy transitions from childhood into adulthood in literature. From paupers to punks, we will rethink alienation, gender and normacy through changing conceptions of adolescence across two centuries. Authors will include Dickens, Bellow, Nabokov, Welsh, Clowes, Haddon and Aita. Screenings of The 400 Blows, Ratcatcher and Dogtooth. Enrollment limited to 17. WRIT

ENGL 0201P. Disabling Desire: The Erotics of Impairment in Literature and Film.
By alternately demonizing, sentimentalizing, and fetishizing the disabled body throughout modern history, has Western society misrepresented the erotic desires of the physically impaired? Could these desires, if represented, in turn disable "normal" desire? Authors include Milton, Shakespeare, Tennessee Williams, and Ursula LeGuin. Screenings include John Cameron Mitchell's Hedwig and the Angry Inch and Mark and Michael Polish's Twin Falls Idaho. Enrollment limited to 17. WRIT

ENGL 0201Q. American Hybrides: Poetry After Modernism.
What formal possibilities were available to poets working after the experimental period of High Modernism? How do their departures from the Modernist definition of the lyric encourage us to re-think the idea of "the poetic?" This course will examine late modern texts that blur the lines between poetry, fiction, and non-fiction. Texts include Berryman, Plath, Merrill, Ashbery, Howe, contemporary writers. Enrollment limited to 17. WRIT

ENGL 0201R. Weird Sisters and Fairy Queens: Women in Shakespearean Drama.
How does Shakespeare write women? To what extent do his plays destabilize or reify conventional assumptions about gender? And how do modern productions and adaptations interpret (or even re-write) his female characters? Texts will include Taming, Midsummer, Hamlet, Macbeth, and several modern adaptations. Film screenings likely to include Hamlet 2000, Midsummer Nights Dream, 10 Things I Hate About You. Enrollment limited to 17. WRIT

ENGL 0201S. Dragon Ladies, Curry and Kung Fu: Readings in Asian American Film and Literature.
Tracing the contours of Asian America through literature, slam poetry, and pop culture, we will examine how racism has defined East and South Asian American bodies, sexualities, and identities in terms of invisibility, illegitimacy, homelessness, and exoticism—and how artists have responded. Readings include Kingston, Lahiri, Kogawa, Hwang, Fanon, Said, and the films, Better Luck Tomorrow and The Namesake. Enrollment limited to 17. WRIT

ENGL 0201T. Strangers in a Strange Land: traveling bodies, traveling tales.
What role does the traveler play in the western imagination? How do the encounters and experiences of the traveling body map onto the larger body politic or its colonial projects? In answering these questions, this course examines hybridity, conversion, identity constructions—racial, religious, and national—and the politics of place. Authors include Shakespeare, Fletcher, Milton, Behn, Defoe, Swift, Melville, Achebe and Coetzee. Enrollment limited to 17. WRIT

ENGL 0201U. Songs of the Self: Poetry as a Way of Life.
How does poetry create the self? In this course, we shall engage this vast question by encountering the past, present, and future of poetic expression on and off the page. Using the resources of poetry as a creative and critical tool for academic writing and beyond, we will engage poetry from antiquity to the contemporary as well as the poetry in/of popular music, film, and television. Responding to poetic language, we rethink the language we use (and misuse) all the time. Self-making is full-time business. However, this class will be more than mere work, will be an inspiration and a delight.

ENGL 0201V. Queering Modernism.
What role does modernist literature play in queer history? How might queer sexuality inflect modes of poetic and narrative expression? Reading American and Western European literature from the 1920s on, this course explores the literary shifts that we have come to call "the modernist turn" and mines poems and novels for bodies, identities and emotions that push against the forms that contain them. Along the way, we will complicate and challenge the descriptive capacity of the terms "queer" and "modern." Enrollment limited to 18.

For American authors, the crime novel has provided a critique of capitalism, a vision of queer desire, a record of racial violence and an experiment in modernist form. This course uses the detective genre to examine major movements in American literary and political history ranging from prohibition to postmodernity. Authors: Hammett, Chandler, Highsmith, Himes, Nabokov, Auster. Films: Rear Window, Chinatown. Enrollment limited to 17. WRIT

ENGL 0201X. The Great American Campus Novel.
Attracting some of the finest authors of 20th-century American literature, the "campus novel" presents a vision of university life, by turns comic and tragic, that also critiques society beyond its walls. The course explores how the genre is bound up with questions posed by liberalism, the Cold War, and popular culture. Authors include Fitzgerald, Nabokov, DeLillo, Roth, Bellow, Chabon, and Eugenides. Enrollment limited to 17. WRIT

ENGL 0201Y. Dark Matter: Black Literature in the 20th Century.
We live in the "afterlife of slavery," an age in which Black lives remain terrorized by slavery's specter. Reading works by Cornelius Eady, Dionne Brand, Toni Morrison, Ralph Ellison, Richard Wright, and others, this course examines how 20th century African-American writing and thinking about blackness struggle within and against a world haunted by the afterlife of slavery. Enrollment limited to 17. DPLL WRIT
ENGL 0202A. Poetry and Things: From Romanticism to the Contemporary
Poetry often deals with the private human self, but it also depicts inanimate objects that spring to life in the background. We will study poetic backdrops from the Romantic lyric to the contemporary avant-garde, exploring the aesthetic, social, and ecological modes through which poets have envisioned the nonhuman world. Authors include Wordsworth, Keats, Byron, Poe, Thoreau, Dickinson, Stein, and Beckett. Enrollment limited to 17. WRIT

ENGL 0300B. The Romance of Travel.
Considers the role of the strange, new, and fantastic in travel accounts of the Medieval period and Renaissance. If travel writers offered their stories as "windows to the world," we will treat them as representations that expose, reinforce, and subvert the author's cultural, political, and social attitudes. Works by Marco Polo, Chaucer, Columbus, Raleigh, Shakespeare, Defoe, and Swift. Enrollment limited to 30.

ENGL 0300C. English Drama 1350-1700.
This course presents great plays not written by Shakespeare, from the mystery plays of the late Middle Ages through Restoration drama. We will address these questions: What kinds of plays spoke to what kinds of audiences? How do changes in theatrical style relate to social change? How do genre, convention, staging, and acting style shape a dramatic text? Enrollment limited to 30.

ENGL 0300E. Three Great Poets: Shakespeare, Donne, Milton.
We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. Enrollment limited to 30.

ENGL 0300F. Beowulf to Aphra Behn: The Earliest British Literatures.
Major texts and a few surprises from literatures composed in Old English, Old Irish, Anglo-Norman, Middle English, and Early Modern English. We will read texts in their historical and cultural contexts. Texts include anonymously authored narratives like Beowulf and Sir Gawain and the Green Knight, selected Canterbury Tales by Chaucer, and texts by Sir Thomas Malory, Spenser, Shakespeare, and Aphra Behn. Enrollment limited to 30.

ENGL 0300G. Angels and Demons, Heavens and Hells: The Otherworld from the Middle Ages to the Early Modern Era.
Wonder about what happens after death is among the most fascinating and gripping subjects of human inquiry. We will explore concepts of heaven, hell, purgatory, Satan, angels, ghosts, the soul, virtue and vice, the poetry of salvation, and the power of melancholy. Texts will include Old and Middle English Otherworld narratives, and writings by Dante, Milton, Browne, Marlowe, and others. Enrollment limited to 30.

ENGL 0300H. New Selves, New Worlds.
How did pre-modern and early modern writers imagine the self? How were these notions of the self transformed when individuals traveled to unfamiliar places? How do these new selves imagine certain fundamental questions, such as the power one has to control one's emotions, social environment, and ultimate fate. Authors may include Chaucer, Shakespeare, and Milton. Enrollment limited to 50.

ENGL 0300I. The Arrival of English: Medieval, Renaissance, Early Modern.
In these literary periods, something arrives in England, whether it is the Anglo-Saxon invasions, Christianity, French medieval romance, or the continental example of renaissance. Readings include Beowulf, Wanderer, Dream of the Rood, Chaucer's Canterbury Tales, Spenser's Shepheards Calendar and Faerie Queene, and Milton's Paradise Lost. Enrollment limited to 30. WRIT

ENGL 0310A. Shakespeare.
We will read a representative selection of Shakespeare's comedies, tragedies, histories, and romances, considering their historical contexts and their cultural afterlife in terms of belief, doubt, language, feeling, politics, and form. Students should register for ENGL 0310A S01 and may be assigned to conference sections by the instructor during the first week of class. WRIT

ENGL 0310D. Violence, Sacrifice, and Medieval Narrative.
This course will introduce students to medieval prose and poetry that centralize the problematic nature of violent conflict and its attendant horrors. We will study literature from medieval England, Wales, Ireland, and Iceland, including Beowulf, two Old Icelandic sagas and Edda poetry, Irish and Welsh texts, and part of Malory's Morte Darthur. Topics will include sacrifice, religion, chivalry, horror, and contemporary critical approaches. Open to undergraduates only.

ENGL 0310E. Shakespeare: The Screenplays.
It's been said that if Shakespeare were alive today he'd be working in Hollywood. We will read five or six plays (including at least one representative of each of Shakespeare's genres: comedy, history, tragedy, romance) and then study film adaptations of them. The course is especially concerned with various approaches to the Shakespeare film: not just the straightforward adaptation, but also the Shakespeare spin-off ("10 Things"); "My Own Private Idaho"); the Shakespeare film as a star-turn (Helen Mirren as "Prospera" in Taymor's "Tempest"); and the Shakespeare film as an auteur-tum (Orson Welles's "Chimes at Midnight"; Polanski's "Macbeth").

ENGL 0310F. Prose Sagas of the Medieval North.
In this course, we will read long prose fiction from medieval Iceland, Ireland, and Wales, considering how it is similar to and different from the modern novel. We will consider plot, characterization, and style in each linguistic tradition. Texts may include The Cattle Raid of Cooley, The Mabinogin, Njal's Saga, Egil's Saga, Grettir's Saga, and Gisli's Saga.

ENGL 0310G. Gender and Genre in Medieval Celtic Literatures.
This course traces images of masculinity and femininity in Welsh, Cornish, Breton, and Irish narratives within and around early medieval Britain. You will be introduced to the genres of saga, romance, and the short poetic lai as you consider how the nature and gender of the hero changes in specific cultural and linguistic moments.

ENGL 0500A. Literature and the Fantastic.
Considers the changing ways Renaissance, Romantic, Victorian, and late-nineteenth-century authors incorporate non-realistic and fantastic themes and elements in literature. Special attention to the relationship between realism and fantasy in different genres. Readings include stories (gothic, ghost, and adventure), fairy tales, short novels, plays, and poems. Shakespeare, Swift, Brothers Grimm, Blake, Wordsworth, Coleridge, Keats, Tennyson, Robert Browning, Christina Rossetti, Stoker, Lewis Carroll, Dickens, Henry James. Enrollment limited to 30.

ENGL 0500B. Introduction to British and American Romanticism.
An exploration of "Romanticism" in literature written and read on both sides of the Atlantic between 1775 and 1865. Poetry, fiction, and essays by writers such as Blake, Wollstonecraft, Wordsworth, Coleridge, Byron, Percy Shelley, Mary Shelley, Keats, Thoreau, Emerson, Fuller, Hawthorne. Enrollment limited to 30.

ENGL 0500C. Inventing America.
Even before there was a United States, American authors argued over just what distinguished "America" from other communities. For what, they wondered, did or should America stand? Examines the rhetorical battles waged in some key pre-Civil War American literary texts over the meaning and/or meanings of America. Authors studied may include Bradstreet, Franklin, Douglass, and Melville. Enrollment limited to 30.

ENGL 0500E. Foundations of the Novel.
Introduces students to the first stages of novel writing in England and to historical and theoretical issues relating to the novel's "rise" to the dominant genre of the modern era. Eighteenth-century works of fiction are long; however, texts selected for this course are less long. They include Defoe's Moll Flanders, Richardson's Pamela and Fielding's Joseph Andrews. Enrollment limited to 30.

ENGL 0500G. Literature and Revolutions, 1640-1840.
Key developments in British and American literature understood in relation to the historical and cultural forces that produced the English Revolution, the American Revolution, the French Revolution, and the Industrial Revolution. Readings in major writers such as Milton, Paine, Blake, Wollstonecraft, Emerson, Barrett Browning, and Dickens, and in some of their non-canonical contemporaries. Focus on the emergence of a transatlantic literary culture. Enrollment limited to 30. WRIT
ENGL 0500H. Mariners, Renegades, and Castaways: American Fiction and the Romance of the Sea.
Examines one of the most distinctive of literary genres: the sea novel. Ostensibly stories of mystery and adventure, these texts are also meticulous accounts of working life at sea. Reads a number of well-known and lesser known American tales of the sea, including Poe's *The Advenures of A. Gordon Pym*, Melville's *Moby-Dick*, London's *The Sea-Wolf*, and Crane's *The Open Boat.* Enrollment limited to 30.

ENGL 0500I. The Literature and Politics of Friendship.
Considers changing concepts of friendship as a key to major developments in British and American literature from the Renaissance through the 19th century. Special attention given to the ways the literary history of friendship intersects with leading political questions of the day. Shakespeare, Donne, Milton, Defoe, Wordsworth, Keats, Percy and Mary Shelley, Dickens, Poe, Melville, and Henry James. Enrollment limited to 30.

ENGL 0500K. The Transatlantic Novel: Robinson Crusoe to *Connecticut Yankee*.
How does the "American" novel change if we read it across national borders? This course reads novels written in/about America with this question in mind, focusing on such topics as slavery, exploration, seduction, and cosmopolitan ideals. Readings range from Aphra Behn to Mark Twain. Enrollment limited to 30. Students should register for ENGL 0500K S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0500L. Literature, Trauma, and War.
This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war--glorifying it, and representing its horrors. We'll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Enrollment limited to 30. Open to undergraduates only.

ENGL 0510A. Literature and Print Culture.
The cultural impact of widely circulating printed material -- books of poetry, essays, and fiction but also newspapers, stock certificates, and advertisements -- makes the period 1660-1740 the first technologically enabled information age. The production and consumption of published texts changed the world for the restored monarch and his licentious court, for the rising bourgeoisie, and for the newly literate classes. We will follow several controversies, experiments, and innovations of the print revolution in works as apparently diverse as Milton's epic poetry, Manley's erotic secret histories, and the ads in *The Spectator.* Other canonical and non-canonical writers include Rochester, Behn, Dryden, Swift, Manley, Haywood, and Defoe.

ENGL 0510B. The Gothic.
The course will investigate the origins and development of Gothic literature from its invention during the eighteenth century to its postmodern forms. We will consider conventional figures (monsters, distressed heroines, moldering castles), common themes (fear, horror, the supernatural, the irrational, the transgressive), and the cultural work they do. Readings include Walpole, Lewis, Radcliffe, Shelley, James, and King.

ENGL 0510C. The Victorian Novel.
Considers the Victorian novel with an emphasis on its many forms, including the social-problem novel, bildungsroman, sensation novel, detective novel, and multiplot novel. Topics covered include the nature of realism, serial publication, empire, the "new woman," industrialization, the "condition of England," science and technology, and the role of the artist. Novels by Charlotte Brontë, Charles Dickens, Elizabeth Gaskell, George Eliot, Wilkie Collins, Thomas Hardy, Anthony Trollope. Students should register for ENGL 0510C S01 and may be assigned to conference sections by the instructor during the first week of class. Banner registrations after classes begin require instructor approval.

ENGL 0510D. Mark Twain's America.
A course for all kinds of readers of Twain and his contemporaries. Close readings of fiction and essays that focus on race, slavery, capitalism, and the development of "modern" literature. Works include *Puddnhead Wilson*, *Huck Finn*, and *Connecticut Yankee*.

ENGL 0510H. Victorian Self and Society.
This multi-genre course is an introduction to literature and culture of the Victorian period, looking at the changing ideas of society and the individual's place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, the "great stink" of London, women's suffrage and the condition of women, and the Great Exhibition of 1851. Readings will include Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll.

ENGL 0510M. Madness and Enlightenment: Literature 1660-1800.
The term "enlightenment" has been used to emphasize the power of reason in the development of intellectual freedom, democracy, capitalism, class mobility, and other aspects of 18th-century experience. However, the period's major writers were fascinated by unreason, by aberrant states of mind from love melancholy to outright madness. Readings include Swift's *Tale of a Tub*, Pope's *Dunciad*, Johnson's *Rasselas*, Sterne's *Tristram Shandy*, Boswell's *Hypochondriack*, and Godwin's *Caleb Williams*.

ENGL 0510N. Victorian Modernity: Literature 1880-1900.
"Modernity" in the *fin-de-siécle* period meant progress, the "march of the intellect," technological innovation, urban growth, female emancipation, but it also meant fears of degeneration, moral decline, the rise of the crowd, and the degradation of the individual. This course considers how these contradictions come to a climax in the literature, art, and culture of the 1880s and 1890s. Authors include G. B. Shaw, Oscar Wilde, Thomas Hardy, Charles Algener Swinburne, H. G. Wells, Olive Schreiner, George Egerton.

ENGL 0510P. Fiction from Dickens to James.
An introduction to nineteenth-century fiction in English by eight major authors--four British and four American. Emphasis will be placed on the careful reading and interpretation of the novels and short stories in historical context. Issues to be addressed include the rise of the mass media, transatlantic literary relations, literature and ethics, and aestheticism. Works by Dickens, Poe, Eliot, Melville, Stevenson, Twain, Wilde, and James. Students should register for ENGL 0510P S01 and may be assigned to conference sections by the instructor during the first week of class.

What are the stakes involved in defining (African) American literature through a racialized authorial framework? Should we adhere to this prescribed and contentious categorization when considering writers who only incidentally identify as "black," and whose works challenge any critical or aesthetic alignment based upon racial affiliation? More broadly, this course seeks to question the lingering persistence of race as an ontological marker within the literary arts. Writers include but are not limited to Fran Ross, Darryl Pinckney, Andrea Lee, David Henry Hung, Maurice Manning, and Colson Whitehead. DPLL.

ENGL 0510S. Good, Evil, and Inbetween.
Are humans born naturally good, evil, neither, or all of the above? Does evil lurk deep within the heart of all that is good, or can the forces of good eradicate those of evil? Is evil an inextricable part of what it means to be human in the first place? We'll examine these and related questions by reading some especially provocative literature, including Frankenstein, Jekyll and Hyde, and works by Hawthorne, Poe, and Fitzgerald. We'll also view several relevant movies, including Young Frankenstein.

ENGL 0510W. Coupling: The Literature of Courtship.
This course examines the courtship plot in the Anglo-American literary tradition, concentrating on novels of the eighteenth and nineteenth centuries but extending forward to twentieth-century and contemporary novels, and explores how these fictions have constructed and challenged normative narratives of gender and sexuality.
ENGL 0510Y. Nineteenth-Century British Fiction.
This course focuses on the fiction of nineteenth-century Britain, with particular attention to its exploration of gender and sexuality, class, national and imperial cultures, the familiar and the strange. Readings will include novels and short stories by Jane Austen, Mary Shelley, Emily Brontë, Elizabeth Gaskell, Charles Dickens, Robert Louis Stevenson, Rudyard Kipling, and Thomas Hardy.

ENGL 0510Z. Worldly Victorians: Victorian Literature at Home and Abroad.
This course explores how Victorian literature engaged questions animated by Britain’s experience of conflict and triumphalism at home, and imperial power and anxiety on the global stage. Authors we read will include Alfred, Lord Tennyson; Charlotte Brontë; Elizabeth Gaskell; Rider Haggard; Olive Schreiner; and Bram Stoker.

ENGL 0511A. Dickens: The Novel and Society.
This course rehabilitates Charles Dickens from his reputation as a mainstream writer paid by the word, most famous as the author of sentimental, implausible works for children, such as A Christmas Carol. We will be looking at Dickens’s social novels as a formally innovative response to the urban and industrial capitalism of his time. Issues will include: realism, the relation of his fiction to his journalism, serial form, and representations of work, the city, and bureaucracy.

A study of major novelists of the period, through the question: How did the novel develop as a form of social understanding? We will be looking at novels as bearers of social values, especially around questions of property, class, marriage, work, bureaucracy and the state, and childhood. Authors studied: Jane Austen, Emily Brontë, Charles Dickens, Anthony Trollope, and Thomas Hardy.

ENGL 0511C. Fantastic Places, Unhuman Humans.
What can the grotesque, monstrous, and even alien creatures found lurking in an extraordinary range of literature across many centuries reveal about the different ways humans have imagined what it means to be human in the first place? Is the human a unified, single category of being at all? Authors may include Shakespeare, Mary Shelley, and Poe. DPLL WRIT

ENGL 0511E. Melville, Conrad, and the Sea.
Stories begin with the sea: Jason and the Argonauts, Sinbad and the Seven Seas, Odysseus trying to sail home. The sea is the place of “tall tales,” of adventure, and of terror, but also of industrial labor and modern commerce. This class reads the sea narratives of Herman Melville and Joseph Conrad within this larger narrative and historical context.

ENGL 0511F. Literature Reformatted.
We’ll put literary works produced for digital environments (novels on Twitter, poems with hyperlinks, collaborative fiction on chat forums) in conversation with works of literature, such as Shakespeare’s First Folio, produced in traditional forms. Do these new forms offer empowering extensions of the literary, or do they threaten the very forms of literature from which we can profit the most?

ENGL 0511G. Introduction to Native and Indigenous Literatures.
This course will familiarize students with the study of Native and Indigenous literatures in North America. Focusing on a range of genres, geographic locations, and historical moments, students can expect to acquire both a working knowledge of the history of Native literatures in English and a critical methodological approach to the study of American literature.

ENGL 0700A. Introduction to African American Literature, 1742-1920.
Surveys African American writing from the beginnings to the Harlem Renaissance, reading both poetry and prose (primarily slave narratives, speeches, essays, and fiction). Attention to how African American authors have shaped a literature out of available cultural and aesthetic resources. Enrollment limited to 30.

ENGL 0700B. Introduction to African American Literature, 1920-Present.
All genres of literature from the Harlem Renaissance to the present, tracing the development of an African American literary tradition. Enrollment limited to 30. DPLL
ENGL 0700Q. Poetic Cosmologies.
This course will examine how various traditions within modern and contemporary poetry have addressed the question of materiality. Readings will range from poetic explorations of the archaeologies of place by William Carlos Williams and Charles Olson, to the investigations of non-human materialities of crystals, clouds and bacteria by writers such as Clark Coolidge, Christian Bök and Lisa Robertson. Enrollment limited to 30.

ENGL 0710B. African American Literature and the Legacy of Slavery.
Traces the relationship between the African American literary tradition and slavery from the antebellum slave narrative to the flowering of historical novels about slavery at the end of the twentieth century. Positions these texts within specific literary, historical, and political frameworks. Authors may include Frederick Douglass, Harriet Jacobs, Charles Chesnutt, Octavia Butler, and Toni Morrison. DPLL

ENGL 0710E. Postcolonial Tales of Transition.
This course focuses on postcolonial British, Caribbean, and Southern-African works that exemplify, complicate, or refashion the category of the bildungsroman, the "novel of education." Issues to be considered include the ways the texts rework archetypal tropes of initiation, rebellion, development, and the interplay of contradictory passions. We will also think about ways in which issues of race, gender, and sexuality emerge in the texts, and the connections or disjunctions between literature and "the real world." Writers will likely include Dangarembga, CLR James, Ghosh, Ishiguro, Joyce, Kincaid, Lamming, Naipaul, Rhys, Wicomb. DPLL

ENGL 0710F. Being There: Bearing Witness in Modern Times.
What is the significance of one who says, "I was there"? This course explores the ethical, literary and historical dimensions of witnessing in an era when traumatic events are increasingly relayed secondhand or recorded in sound and image. Texts include Forster, Woolf, Camus, Freud, Celan, Coetzee; films by Hitchcock and Kurosawa; and readings in law and psychology. WRIT

ENGL 0710I. Global South Asia.
This course provides an introduction to contemporary fiction by South Asia and its diaspora. We will read novels written in North America, the Caribbean, Australia, Africa, the United Kingdom, and of course South Asia, paying particular attention to issues of identity, ethnicity, and transnational circulation. Authors include Adiga, Hanif, Lahiri, Meeran, Mistry, Naipaul, Roy, Rushdie, Selvadurai, and Sinha. DPLL

ENGL 0710J. Introduction to Asian American Literature.
This course is intended to familiarize students with key issues that have shaped the study of Asian American writings and to provide a sense of the historical conditions out of which those works have emerged. As a literature course, it will focus on textual analysis—on how particular texts give representational shape to the social, historical and psychological experiences they depict. Readings consist primarily of works that have a canonical status within Asian American literary studies but also include newer works that suggest new directions in the field. It also strives to provide some coverage of the major ethnic groups. DPLL

ENGL 0710L. Ishiguro, Amongst Others.
Kazuo Ishiguro is one of the most distinctive and enigmatic voices in contemporary fiction. He has few obvious precursors, and there is little consensus among literary critics about the meanings of his works. This course will try to establish principles for reading Ishiguro's works by seeking alliances for his writing in works of philosophy, literature and cinema. Such interlocutors will include Ozu, Kiarostami, Kierkegaard, Sartre, Hadžihalilović, Dostoevsky, Pasolini.

ENGL 0710M. Impressionism, Consciousness, and Modernism.
This course explores the role of the "literary impressionists" (Crane, James, Conrad, and Ford) in the transformation of the novel from realism to modernism (especially the "post-impressionists" Stein, Joyce, and Woolf). "Impressionism" is defined by its focus on consciousness, the inner life, and the ambiguities of perception. What happens to the novel when writers worry about whether the way they tell their stories is an accurate reflection of how we know the world? Attention will also be paid to how the literary experiments of impressionist and post-impressionist writers relate to simultaneously occurring innovations in the visual arts.

ENGL 0710Q. American Literature in the Era of Segregation.
This course examines how American literature intersects with the legal, ethical, and racial discourses that defined the system of racial segregation. The class will assess literary works in relation to the discourses employed historically to rationalize segregation. In addition the course will explore the ways that literary style and genre became inseparable from the culture of segregation. Authors include Mark Twain, Nella Larsen, William Faulkner, and Ralph Ellison. DPLL

ENGL 0710S. The Eighties: Earnestness to Irony.
From "White Noise" to "Working Girl," Duran Duran to Public Enemy, this course explores the culture, rhetoric, and politics of the 1980s through literature, film, music, and television. What kind of counterculture, if any, emerges from a decade of conservatism, greed and the AIDS epidemic? What, in short, made the 80s unique—and what is the decade's afterimage? Students should register for ENGL 0710S S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 0710U. Funny/Not Funny: Taking Comedy Seriously.
What does comedy do, and how does it work? How does comedy compel us to confront matters of great urgency? We consider these questions by examining satire, slapstick, sitcom, sketch comedy, and standup in Jonathan Swift, P.G. Wodehouse, Dorothy Parker, Martin Amis, Fran Lebowitz, Paul Beatty, Sherman Alexie, Richard Pryor, Amy Schumer, Louis C.K., Jon Stewart, and Wanda Sykes.

ENGL 0900. Critical Reading and Writing I: The Academic Essay.
An introduction to university-level writing. Students produce and revise multiple drafts of essays, practice essential skills of paragraph organization, and develop techniques of critical analysis and research. Readings from a wide range of texts in literature, the media, and academic disciplines. Assignments move from personal response papers to formal academic essays. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 0930. Introduction to Creative Nonfiction.
Designed to familiarize students with the techniques and narrative structures of creative nonfiction. Reading and writing focus on personal essays, memoir, science writing, travel writing, and other related subgenres. May serve as preparation for any 1000-level nonfiction writing course. Writing sample may be required. Enrollment limited. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1030A. The Thoughtful Generalist.
This ONLINE section of "ENGL1030: Critical Reading and Writing II: Research" will prepare you for academic and real-world discourse. In Canvus, you will discuss essays demonstrating deep research distilled into engaging intellectual journey. You will research and revise four explanatory, analytical, persuasive essays, using varied sources to explore subjects or issues of your choice. Mandatory peer reviews and conferences ONLINE and in person. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1030C. Writing Science.
This course explores how science, as an academic way of thinking and a method, affects our critical thinking and expression of culture. Readings examine the various dialects of scientific discourse. Students write three major research essays on self-selected scientific topics from both within and outside their fields of study. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1030D. Myth + Modern Essay.
A writing and research focused course, in which students read a small selection of ancient texts (including The Epic of Gilgamesh and Ovid's Metamorphoses) and use the myths retold to illuminate the contemporary world and to inform the essays they write. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.
ENGL 1030E. Testaments of War.
Discovery is at the heart of research. In this course, we will discover how and why literary texts reflect and illuminate the intellectual and social worlds around them. We will use a variety of primary and theoretical sources and research tools, identify powerful research problems, and craft questions and sophisticated thesis statements. The course will also enable you to refine a critically sensitive, informed, and persuasive writing style that will be key to the success of your scholarly work. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1030F. The Artist in the Archives.
While artists can benefit greatly from archival work, they are not typically given the tools to make use of these institutions. This writing intensive course takes a two pronged approach to the problem: embedding students in archives both at Brown and RISD to produce creative, lyrical, and multimedia essays; and exploring how artists have used these institutions for information and inspiration. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050A. Narrative.
This course offers a broad exploration of the many kinds of essays you can write in creative nonfiction. We will be looking at how authors structure their pieces and the range of narrative techniques they often use. You can expect workshops, in-class prompts and readings by Jamaica Kincaid, John McPhee, David Foster Wallace, Annie Dillard, David Sedaris and others. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050B. True Stories.
This class will allow confident writers to explore and develop their creative nonfiction writing. We’ll focus on two structures—nonfiction narratives and essays—with occasional forays into other forms. Students will work simultaneously on several small assignments and two larger, self-directed pieces. Readings will include cultural reportage, lyric memoir, science and nature writing, standard and hybrid essays. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050C. Creative Nonfiction: Practice and Criticism.
What is Creative Nonfiction? It has a long history and recently writers have flocked to it; scholars have questioned it: Academic enough? Harm the truth? Narrative with too much “I” and too little “Eye”? Literary? Significant? By reading historical and contemporary examples along with critics, we will explore persistent questions about form, method, ethics, and significance. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050D. Lifewriting.
We explore writing’s various forms—memoir, diary, essay, graphic narrative, film, and autobiography—while crafting personal narrative. Students read sample texts, view films, and keep an electronic diary. Projects include a memoir, personal critical essay, and final autobiography, as well as shorter assignments. This is a writing workshop, so students read & critique each other’s work. Individual conferences with the instructor also provide feedback. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050E. Sportswriting.
This course introduces students to the practice of sportswriting, including writing sports news, features, and columns. Readings will include works by Rick Rielly, Bill Simmons, Frank Deford, Karen Russell, Allison Glock, Tom Wolfe, Hunter S. Thompson, W.C. Heinz, and others. Students will develop skills in analyzing, researching, writing, revising, and workshopping in the genre. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050G. Journalistic Writing.
This course, taught by a Pulitzer Prize-winning reporter, teaches students how to report and write hard news and feature stories. Students learn to gather and organize material, develop in-depth interviewing techniques, use public records to report stories and become better observers of everyday life. The first half of the semester focuses on hard news and investigative reporting—crime, government and court news. The second half is devoted to feature writing—profiles and the art of narrative storytelling. Class list will be reduced to 17 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050H. Journalistic Writing.
This course teaches students how to report and write hard news and feature stories for newspapers and online. Students learn to gather and organize material, develop interviewing techniques, and hone their writing skills—all while facing the deadlines of journalism. The first half of the semester focuses on “hard” news: issues, crime, government, and courts. The second half is devoted to features, profiles, and narrative story telling. Writing sample required. Class list will be reduced to 17 after writing samples are reviewed in first week of classes. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050J. Multimedia Nonfiction.
Through a series of short assignments, we will learn what audio, visual, and performative tools are available to us and how these different mediums can affect our stories. The course culminates in a final project where each student will pursue a long-form story of their choice of subject and medium. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050L. Writing in Place: Travel, Ecology, Locality.
To explore the relationships among people, places and language, this course will incorporate science and nature writing, environmental/ecological writing, travel writing, psychogeography and architectural writing. Assignments and practices will include diaries, observational writing, reporting, criticism and more lyrical forms. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050M. Music Writing.
Music writing asks that we take readers across a space not entirely tangible. To listen—with care—and then articulate, with words written, what was heard and what was experienced. Music writing is a big genre, encompassing journalism (especially criticism), memoir (by listeners and by direct participants), long-form essay, and lyric forms. This course will touch upon these categories. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1050N. Writing for Today’s Media.
This course introduces students to the practice of reporting for television news, radio, and their online equivalents—online news and podcasts. Exploring the world of communications for contemporary media, the course features hands-on work in writing news, features, and opinion pieces for television, radio, online news, and podcasts. Students will develop skills in analyzing, writing, revising, and workshoppping in these media. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1140A. The Literary Scholar.
“Literary detective work” aptly describes English literature scholarship. We pick up clues and chase down leads to meet the demands of scholarly yet personally engaged interpretation. We will develop methods of reading sufficiently diverse to read, credibly and richly, a range of literary texts from Beowulf to Descartes. Theoretical interpretation will be informed by cognitive poetics. Writing centered. Enrollment limited to 12. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. S/NC.
ENGL 1140B. The Public Intellectual.
This course offers advanced writers an opportunity to practice sophisticated, engaged critical writing in academic, personal, and civic modes. Emphasis will be on writing "public" essays (general audience essays that do intellectual work or academic essays that address public topics), ideally in fluid, "hybrid," audience-appropriate forms. Areas of investigation will include (but are not limited to) the review essay, the cultural analysis essay, literary documentary, and the extended persuasive/analytic essay. It will include some brief "touchstone" investigations into rhetorical theory, with the aim of helping to broaden our concepts of audience, analyze the constitutive and imaginative effects of language, increase the real-world effectiveness of our own language practices, and situate our writing within current political, cultural, aesthetic and intellectual debates. Students must have sophomore standing or higher in order to be admitted to the class. A writing sample will be administered on the first day of class. Prerequisite: ENGL 0930, 1030, or 1050. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1140D. Writing Diversity: A Workshop.
This course explores various forms of writing that address the broad spectrum of human experience, including issues of race, gender, varying physical and mental ability, social class, and inequities resulting from colonization, among others. Students will attempt to understand the issues and each other through class readings and articulating personal responses in writing. Writing sample required. Pre-requisite: ENGL 0900, ENGL 0930, or any 1000-level nonfiction writing course. Class list reduced to 12 after writing samples are reviewed during the first week of classes. S/NC. DPLL.

ENGL 1160A. Advanced Feature Writing.
For the advanced writer. Nothing provides people with more pleasure than a "good read." This journalism seminar helps students develop the skills to spin feature stories that newspaper and magazine readers will stay with from beginning to end, both for print and on-line publications. Students will spend substantial time off-campus conducting in-depth interviews and sharpening their investigative reporting skills. The art of narrative storytelling will be emphasized. Prerequisite: ENGL1050G or 1050H, or published clips submitted before the first week of classes. Class list reduced to 17 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160B. Editors/Producers.
On-site workshop for editors/producers of campus or local journalism that aspires to professional standards. Students must be chosen by peers to edit a campus publication such as the BDH, or to produce a radio show at WBSR or WBRU; or they must have an internship at a local newspaper, radio or TV station. Required: Minimum 20 hours a week editing/producing; participation in skill-building workshops for staff. All issues/shows evaluated. Enrollment limited to 17. Instructor permission required. S/NC.

ENGL 1160C. Radio Nonfiction.
For advanced writers only. Introduction to radio writing and producing. Students find and research stories, interview, draft, edit and fine-tune for radio presentation. Genres include news, profile, feature and personal narratives, editorial and review. Weekly labs focus on recording equipment, digital editing and mixing, and music use. Final project: half-hour radio feature ready for broadcast. Preference given to students who have taken ENGL0160, advanced nonfiction writing courses, English concentrators, or students who have worked at WBSR or WBRU. A writing sample will be administered on the first day of class. Class list will be reduced to 12 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160D. The Common Critic.
For the advanced writer. Aimed at the cultivated consumer of books, magazines and newspapers—what has traditionally been called the common reader. Students will attend films, plays, art shows, concerts or dance performances and write weekly reviews based on these experiences. Readings include Orwell, Woolf, Shaw, Kael, Tynan, Clive James, Zbigniew Herbert, and current reviews. Writing sample submitted at first class; also a previous sample, if possible, submitted at the same time. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160E. Advanced Journalism: Investigative and Online Reporting.
The goal of this class is to rigorously test and improve the reporting and nonfiction writing abilities of students seriously considering a career in journalism. By reading award-winning articles; reporting and writing five nonfiction pieces on campus or in Providence; and rigorously critiquing each other's writing, students will gain a sense of the promise and perils of journalism. Prerequisite: ENGL 0160. Enrollment limited to 17.

ENGL 1160F. Reporting Crime and Justice.
Crime and justice stories are people stories. The drama of everyday life is played out every day in courthouses. This advanced journalism course will get students into the courtrooms, case files and archives of Rhode Island's judicial system and into committee hearings at the State House where they will report on stories that incorporate drama, tension, and narrative storytelling. Prerequisite: ENGL1050G, ENGL1050H or ENGL1160A (Advanced Feature Writing). Enrollment limited to 17. Instructor permission required. Preference will be given to English concentrators. S/NC.

ENGL 1160G. Literary Journalism: Writing about Politics and Culture.
Students are introduced to procedures and techniques of cultural journalism through reading and discussing work of notable practitioners and writing their own reviews, profiles, and reportage. Enrollment limited to 12. Prerequisites: ENGL0900, ENGL0930, or any intermediate or advanced nonfiction course. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160H. Social Justice Journalism.
Students will investigate perceived injustices and write carefully crafted nonfiction pieces that present complex stories in a fair, balanced, and accurate way. Students will complete several short pieces and a full-length article suitable for publication. Class list will be reduced to 17 after writing samples are reviewed during first week of classes. Preference will be given to English concentrators. Prerequisites: ENGL0930 or any 1000-level nonfiction writing course. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160J. Advanced Journalistic Nonfiction.
For experienced writers. We will study and emulate the works of journalists who write across genres. We will focus on observational skills, narrative arc, the capturing of critical detail, scene setting, character, anecdote, thematic development, precision with words, and voice. Because all such writing is dependent upon quality reporting, we will explore the relationship between fidelity to fact and creativity. Class list will be reduced to 12 after writing samples are reviewed during first week of classes. Preference will be given to English concentrators. Prerequisites: ENGL0930 or any 1000-level nonfiction writing course. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160K. Advanced Reportorial Nonfiction.
For experienced writers. How does a writer go into the world, observe closely, and turn those observations into something artful? Students will read and discuss works in the genre, and produce their own. Enrollment limited to 12. Prerequisites: ENGL0900, ENGL0930, or any intermediate or advanced nonfiction course. Preference will be given to English concentrators. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1160L. Literary Reporting: Writing Literature on Deadline.
How does a writer go into the world, observe closely, and turn those observations into something artful? Students will read and discuss works in the genre, and produce their own. Enrollment limited to 12. Prerequisites: ENGL0900, ENGL0930, or any intermediate or advanced nonfiction course. Preference will be given to English concentrators. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.
ENGL 1180A. Crime Writing
This course offers students the opportunity to study crime reportage. We will read and analyze excerpts from classics in the genre, magazine articles, and newspaper accounts. Students will develop semester-long individual writing projects covering a particular crime, and can work either with Providence and Brown University police on a local incident, or research a case through secondary source material.

ENGL 1180B. Digital Nonfiction.
In this class, we will join the host of other artists, activists, and writers that have used Twitter bots, iPhone apps, virtual reality experiences, and more to tell compelling stories. No previous digital writing experience is necessary, however, as an advanced creative nonfiction class, Digital Nonfiction requires students to have completed ENGL 0930 or any 1000-level nonfiction writing course. Enrollment is limited to 17. Instructor permission required. S/NC.

ENGL 1180C. Advanced Creative Nonfiction: Writing with Food.
This course examines writing about food and how writing affects food and food culture. We shall explore the relationship of food to the pen through reading classic texts, writing in and out of class, guest lectures, and touring culinary archives. The goal is to polish personal voice in menus, recipes, memoir, history, reportage, and the lyric essay. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180D. Concealing and Revealing: Writing the Unsaid.
We'll read and write works that voice what often goes unvoiced, challenge taboos or build silence into their structures. Creative and critical writing assignments, class discussions reading responses and in-class writing will allow us to enter and question these texts, their motives, and their methods. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180E. Lifewriting.
Features theoretical and practical study of lifewriting's various forms--memoir, diary, essay, and autobiography--and the crafting of personal narrative. Students read books, view films, and keep an electronic diary and paper notebook. Requirements include a personal critical essay and autobiography.

Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180F. Literary Journalism.
Focusing on the craft of literary techniques in a range of journalistic modes, we will read John McPhee, Diane Ackerman, Ian Frazier, Susan Orlean and Tracy Kidder, among others. Workshops and conferences on student work, which can include personal essays, immersion journalism, researched argumentative essays and magazine-style feature articles. Complete and polish several shorter pieces and one longer feature-length article.

ENGL 1180G. Lyricism and Lucidity.
For the advanced writer. This course will explore two subsets of the personal essay that blur or cross boundary lines—the lyric essay and the photographic essay—in both traditional and experimental formats. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Not open to first year students. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180H. Satire and Humor Writing.
For the advanced writer. This course will introduce students to the practice of writing satire and humorous essays. Readings will include works by Jonathan Swift, Mark Twain, Garrison Keillor, Bill Bryson, David Foster Wallace, David Sedaris, and others, and students will develop skills in analyzing, writing, and workshopping in the genre. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval.

ENGL 1180I. Writing Medical Narrative.
This class will examine the recent turn toward the use of narrative in medicine and the recent trend of published medical narrative. We’ll look at literary and cultural narratives of sickness and health and how they shape perceptions and treatments, while keeping the science and politics of health care—and its public discourse—in view. Writing sample required. Prerequisite: ENGL0900, ENGL0930, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1180J. Tales of the Real World.
For the advanced writer, this section offers a chance to practice the pleasures and challenges of nonfiction story-telling in the forms of literary journalism, personal essay, and audio narrative. Inspirations include Gay Talese, James Baldwin, Joan Didion, David Foster Wallace, and This American Life. Intensive practice in researching, interviewing, revising, and audio editing. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1050, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180K. The Art of Literary Nonfiction.
For the advanced writer. Based on Roland Barthes' notion of the fragment, this workshop features an incremental, literary approach to writing nonfiction, in both traditional and experimental formats. In response to daily assignments, students will produce numerous short pieces and three extended "essays," to be gathered into a chapbook at the end of the course. Writing sample required. Prerequisite: ENGL0930 or any 1000-level nonfiction writing course. Not open to first year students. Class list reduced to 17 after writing samples are reviewed during first week of classes. Preference given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180L. Travel Writing: In the Domain of the Other.
For the advanced writer. Huck Finn's intention "to light out for the Territory" reflects a pervasive desire to be somewhere else. Restless curiosity about the Other affects travel, writing about travel, and reading about travel. Will concentrate on contemporary travel writers (Heat-Moon, Didion, Chatwin, numerous others) and experiment with various types of narrative structures.

Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1180M. Special Delivery: Letters and Diaries.
For the advanced writer. While letters and diaries are constrained by "dailiness"--the writer's informal situation in time--they often form the basis of more formal communications, including the novel. We will keep diaries as self-conscious intellectual enterprises and write letters to address their roles in various literary modes. The final project will be an epistolary essay incorporating structures and motifs from both sub-genres. Writing sample required. Prerequisite: ENGL 0130, 0160, or 0180, or instructor permission. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission.
ENGL 1180N. The Longer Literary Essay.
We will focus on reflective essays and researched investigations for the non-scholarly reader, like those in *The New Yorker*, *Science Times*, and *Harper's*. Students learn to develop lengthier pieces, translate technical information, and sustain reader interest. Class consists of discussion of readings, workshops, and occasional visits by professional writers. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1180P. Further Adventures in Creative Nonfiction.
For the advanced writer. A workshop course for students who have taken ENGL 0180 or the equivalent and are looking for further explorations of voice and form. Work can include personal essays, literary journalism and travel writing. Readings from Ian Frazier, Joan Didion, David Sedaris, John McPhee and others. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180Q. Narrating History.
For the advanced writer: the protocols of historical narrative and essay for a general audience. Using the archives of Brown, the Rhode Island Historical Society, and the student's family (if feasible), each writer will research primary and secondary sources, use interviews and oral histories, to help shape three engaging, instructive true stories of the past. Intensive library work, revisions, and peer editing.

Writing sample required. Prerequisite: ENGL0930 or any 1000-level nonfiction writing course. Class list reduced to 17 after writing samples are reviewed during first week of classes. Preference given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180R. Travel Writing: Personal and Cultural Narratives.
For the advanced writer. Helps students build skills in the growing genre of travel writing, including techniques for reading, composing, and revising travel pieces. Students will read the best contemporary travel writing in order to develop their own writing in areas like narrative, setting, characters, and voice. The course will feature interactive discussions, instructor conferences, and workshops. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

Memoir is an ancient form (Augustine, Rousseau) and an American literary standby (Thoreau, Henry Adams) which has exploded in popularity in the past twenty years. We will study its political implications and experiment with this controversial form whose dimensions have barely been explored. We will write new kinds of memoir, stretching our stories of a person, idea, place, or thing. We consider old and new forms of biography, experiment with those forms, and practice them as a method of inquiry as well as presentation of self. We also explore biography's connection to journalism, autobiography, memoir, and history. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180T. A Slice of Life: Writing the Full Length Memoir
This course, intended for advanced nonfiction writers, will focus on reading and writing successful book-length memoirs. By studying masters of the form, students will develop a sense of what makes a compelling memoir work and how to approach their own. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1180U. Testimony.
How does the creative nonfiction writer bear witness to profound political, social, and environmental change? In this course students engage with the world as writers. They will conduct extensive interviews within the Brown community and beyond and will turn those first hand testimonials into a suite of creative nonfiction pieces in various genres including the lyric, personal, “found,” and multi-media essay. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190A. "The Arrangement of Words": Liberating Fiction(s).
We read fiction because we enjoy stories. As critical or astute readers, we are often drawn into something more than the story itself: into the way it is told, into the inflections and constructions of language. Concentrating on American fiction writers 1918-1945 (Hemingway, Faulkner, Welty, O'Connor, others), we will examine their fiction and non-fictional prose to see what they do and how and why. Writing will range from critical exposition to annotated fictional experiments. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. S/NC.

ENGL 1190B. Real Language: Poetics, Romantics, Writing.
For the advanced writer. Concentrates on the first generation Romantics (Wordsworth and Coleridge) and their poetic/aesthetic experiments to correlate "the real language of men" with poetic perception. Along with primary sources (prose and poetry), we read scholarly, critical, and theoretical texts to construct ways of reading English Romantic poetry and then work on different kinds of writing that derive from those readings. Writing sample required. Prerequisite: ENGL 0130, 0160, or 0180, or instructor permission. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission. S/NC.

ENGL 1190C. Advanced Creative Nonfiction: Biography.
Biography, one of the oldest forms of creative nonfiction, tells the life story of a person, idea, place, or thing. We consider old and new forms of biography, experiment with those forms, and practice them as a method of inquiry as well as presentation of self. We also explore biography's connection to journalism, autobiography, memoir, and history. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1190D. Writing About Sports in America.
For the advanced writer. Writing about any sport involves one in complex cultural issues that transcend the sport itself. We'll examine work by such authors as Bissinger, Halberstam and Maraniss for voice, craft, and research methods. Students will be required to produce their own pieces of sports writing that explore, through critical research and analysis, the place of sports within the larger culture. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). S/NC.

ENGL 1190F. My So-Called Life: The Art of the Literary Memoir.
The literary memoir offers students inspiration and warning as to the possibilities and limits of using their own experience as text. We study personal essays, narratives, and prose poems by a variety of writers. Advanced writers only. Writing sample required on first day of class.
ENGL 1190G. Science as Writing, Scientists as Writers.
For the advanced writer. Investigates the ways science, scientists, and science-related issues have been represented in fiction and nonfiction written for general audiences. Writing assignments include an informal online journal, literary/cultural analyses, fiction or personal essay, and scientific journalism. Readings from literary, journalistic, and scientific writers. A background in science is useful but not required. Science and humanities students welcome. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: ENGL 0130, 0160, or 0180. Banner registrations after classes begin require instructor permission. S/NC.

ENGL 1190H. Writing Science, Writing the Sacred.
Explores the relationships between two dominant intellectual paradigms—science and religion—and asks students to respond by writing their own "sacred" and science-related texts. Genres to read and write will be poetry and critical/literary nonfiction. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190I. Writing the Southeast Asian War.
It was the Vietnam War, the American War, the Southeast Asian diaspora. By reading varied genres responding to the experience of the war in Southeast Asia and its aftermath, we will study how any experience is multitudinous and how genres manipulate experience in different ways. Analysis and practice of memoir, fiction, poetry, and oral history. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190J. Narrative Poetics.
A study of literary language from the writer's perspective that draws on Chomsky's universalist linguistics to refashion structuralist poetics and narratology. Small written experiments with literary word choice and literary sentence structure prepare for a final experiment with narrative structure. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). S/NC.

ENGL 1190K. Literary Biography.
For the advanced writer. How does one narrate the twists and turns of a life while simultaneously doing justice to whatever literature the subject managed to produce as he or she plodded through each day? We will examine examples of literary biographies for, among other things, voice, form, and research methods. Students will be required to produce their own pieces of literary biography. Prerequisite: ENGL 0130, 0160, or 0180. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission. Enrollment limited. S/NC.

ENGL 1190L. Creative Nonfiction: Practice and Criticism.
For advanced writers. What is Creative Nonfiction? Writers have flocked to it; scholars have questioned it. Does it harm the truth? Is it narrative with too much "I" and too little "Eye"? What makes it significant? To help us explore persistent questions about form, point of view, method, and ethics, readings will include historical examples, recent practitioners, editors, and critics. Intensive reading responses, research, drafting, and revision. Two critical essays; one piece of creative nonfiction. Prerequisite: ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1190M. The Teaching and Practice of Writing: Writing Fellows Program.
This course prepares students for their work as Writing Fellows. Course readings, activities, and assignments introduce students to: post-process writing theory and pedagogy; data-based investigations of the revision habits of experienced and inexperienced writers; and effective methods for responding to student writing and conferencing with student writers. Enrollment is restricted to undergraduates who have been accepted into the Writing Fellows Program in the preceding July. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1190N. Brown: Writing the Archive.
The archives at and around Brown are primary sources for discovering stories—institutional, historical, personal—of our life across time through local history, personal memory, biography, and cultural critique, combining scholarship, media, and the arts. What opportunities for new writing lies behind doors to be opened across the street? Writing sample required. Prerequisite: ENGL0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

ENGL 1190P. The Art of Memoir in Theory and Practice.
The course introduces students to the historical and theoretical nuances of memoir. You will critically engage with a variety of readings and develop an appreciation of your creative role as a memoirist. In the process of crafting a portfolio of work you will explore the complexities of remembering and experiment with the style of narrative voice and structure. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190Q. The Essay.
This course offers a feel for the essay and its versatile range, from the informative to the personal to the philosophical. We will study tone and style, meaning, beginnings and endings, and use of historical and personal information. Our focus will be on the craft of writing rather than on literary criticism. Readings include essays by two dozen accomplished writers. Writing sample required. Prerequisite: ENGL 0110, 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190S. Poetics of Narrative.
Narratives are everywhere, simply there, like life itself, Roland Barthes says; we structure our experiences with narratives that we either infer or create. We will read different literary genres to see how narratives work behind doors to be opened across the street? Writing sample required. Prerequisites: ENGL 0900, 0930, or any 1000-level nonfiction writing course. S/NC.

ENGL 1190T. Writing the Mythic Life: The Use of Traditional Narrative.
This course explores the theory and practice of traditional narrative structures such as fairy-tale, myth, and legend in creating stories about ourselves. We will read fiction and nonfiction by Tolkien, C.S. Lewis, A.S. Byatt, and others, engaging critically with the texts as well as creating new ones modeled on them. Writing assignments will include several short papers and a longer end-of-term project. Writing sample required. Prerequisite: ENGL 0900, 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.
ENGL 1190U. Nature Writing.
This course seeks to develop your skills as a sensitive reader and writer of the natural world. You will build a portfolio of revised work through a process of workshops, tutorials, and conferences, and engage in discussion of a range of written and visual narratives with reference to their personal, political, and ecological contexts. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

ENGL 1190V. Languages of Conscience: Slave Narratives, Prison Writing, and Abolition.
We'll read and respond to nonfiction writings that arise from chattel slavery in the U.S. and one element of its afterlife, the prison system: their goals, their styles, their strategies. Writings will include analytical and creative responses to these works. The Center for Slavery and Justice will be a resource for us. Class list reduced to 17 after writing samples are reviewed during first week of classes. No pre-requisites. Writing sample required. S/NC.

ENGL 1200. Independent Study in Nonfiction Writing.
Tutorial instruction oriented toward some work in progress by the student. Requires submission of a written proposal to a faculty supervisor. Section numbers vary by instructor. Instructor permission required. S/NC.

ENGL 1310A. Firing the Canon: Early Modern Women's Writing.
Rediscovery and reconsideration of works by early modern women have changed the literary canon; these once-neglected works are becoming mainstream, and they are changing the way we read 'traditional' texts. The reading in this course includes poetry, letters, drama, essays, fiction, and life-writing by authors including Lanyer, Wroth, Cavendish, Behn, Manley, Haywood, Scott, and Montagu.

ENGL 1310B. American Degenerates.
Colonial British-Americans were called, among other names, monstrous, wild, impotent, and grotesque. They could not, it was said, produce writing worth reading. We will explore the ways in which American writers embraced and/or challenged these charges of cultural and bodily degeneracy. In the process, we will examine the development of modern notions of literature and identity. Students should register for ENGL 1310B S01 and may be assigned to conference sections by the instructor during the first week of classes. WRIT

ENGL 1310C. Arguments of Form in Renaissance Poetry.
In the literatures of the European Renaissance, stylistic innovation is a marker of cultural change. The production of sonnets, of neoclassical epigrams, and of poems aspiring to be Ovidian or Vergilian opens up a theoretical space for arguments about faith, thought, words, the self, and society. Readings from Wyatt, Surrey, Gascoigne, Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and others.

ENGL 1310D. Between Gods and Beasts: The Renaissance Ovid.
Ovid's Metamorphoses, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton.

ENGL 1310E. Border Crossings in Renaissance Drama.
Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe's Tamburlaine, Fletcher's Island Princess, Heywood's Fair Maid of the West, the anonymous Stukeley play, Shakespeare's Othello, and Daborne's A Christian Turned Turk to observe what dangers and freedoms these plays ascribe to specific geographies.

ENGL 1310F. Early Modern Utopias.
Why does the early modern period witness a flourishing of utopias from More to Milton? We will explore this question, in reading a range of utopias by writers such as Montaigne, More, Raleigh, Bacon, Hall, and Cavendish, engaging them not just as visions of ideal societies, but as efforts to reform of England and Englishness.

ENGL 1310G. The Origins of American Literature.
Where does American literature begin? Can it be said to have a single point of origin? Can writings by people who did not consider themselves American be the source of our national literary tradition? Does such a tradition even exist and, if so, what are its main characteristics? How does one understand the various diverse traditions that constitute American literature, including African-American, Native American, and many others, into a single object of study—or does one even need to? Authors may include de Vaca, Anne Bradstreet, Benjamin Franklin, and Phillis Wheatley. WRIT

ENGL 1310H. The Imagining of the Individual in Renaissance England.

ENGL 1310I. Restoration and Early Eighteenth-Century Literature.
A survey of writing and cultural history in England between 1660 and 1750, emphasizing innovation and experimentation in drama, satire, poetry, and fiction. Readings include work by Behn, Rochester, Swift, and Defoe.

ENGL 1310J. Women and the Book in the Middle Ages.
We will read texts authored by medieval women such as Marie de France, Marjorie Kempe, Julian of Norwich, and Christine de Pizan, and we will explore other textual roles of women, including book ownership and patronage, translation and scribal transmission. The result? A complex picture of mediated and mediating female participants in manuscript culture. Some readings in Middle English.

ENGL 1310K. Chaucer.
Texts in Middle English by Geoffrey Chaucer including the romance Troilus and Criseyde; dream vision poems Book of the Duchess, House of Fame, and Parliament of Fowls; Chaucer's translation of Boethius's Consolation of Philosophy; his shorter poems; and two Canterbury Tales. Prior knowledge of Middle English not required. Not open to first-year students.

ENGL 1310L. Monsters, Giants, and Fantastic Landscapes in Early Modern English Literature.
More to Milton? We will explore this question, in reading a range of utopias by writers such as Montaigne, More, Raleigh, Bacon, Hall, and Cavendish, engaging them not just as visions of ideal societies, but as efforts to reform of England and Englishness.

ENGL 1310M. Monsters, Giants, and Fantastic Landscapes in Early American Literature.
Monsters, giants, "exotic natives," and unknown continents fill the pages of early American writing. Examines how the well-known and obscure writers of early America used the strange and the fabulous to suggest new ways of being normal.

ENGL 1310N. The Canterbury Tales.
Middle English narratives by Geoffrey Chaucer's band of fictional pilgrims, read in their 14th-century historical and literary contexts. Prior knowledge of Middle English not required. Not open to first-year students.
ENGL 1310W. English Poetry and the Renaissance.
The names of Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and other poets inscribe a golden age of poetry in the cultural mythography of English-language literature. Who are these poets and what stories are told about them? In their time? During the long eighteenth century? By Wordsworth and Browning? By Eliot, the high modernists, and postmoderns?

ENGL 1310Y. Besides Paradise Lost: Milton's Other Poems.
A study of Milton's lyric and dramatic poetry, including the sonnets, Latin poems, L'Allegro, II Penseroso, the Nativity Ode, Lycidas, Comus, the verse epistles and Samson Agonistes.

ENGL 1310Z. Three Great Poets: Shakespeare, Donne, Milton.
We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. It is recommended that students should have already taken a course in reading poetry, such as ENGL0910A How to Read a Poem or ENGL0400A Introduction to Shakespeare. Students who have taken ENGL0210C may not register for this course.

ENGL 1311A. Milton's Paradise Lost: Poetry and Belief.
Milton, Blake wrote, was of the devil's party without knowing it, and this course offers close reading of the language of Paradise Lost as poetry of belief: how does the poetry of Milton's major poem embody belief and doubt for him, in history, and for his readers?

ENGL 1311B. Medieval Zoographies and the Origins of the Human.
This course engages with medieval texts and contemporary theory to attempt to understand the shifting boundaries between humans and animals, as we examine the premodern roots of the discussion over what it has historically meant to be human, and what might come next. Topics will include beast fables and epics, nature and artifice, emotions, the soul, simulacra, sacrifice, and hunting.

ENGL 1311C. Milton.
A close examination of the poetry and prose of John Milton, from the early lyrics to the polemical prose writings of the 1640s and 50s, to the masterpieces Paradise Lost, Paradise Regained, and Samson Agonistes. Not open to first-year students.

ENGL 1311E. History of the English Language.
Provides an introduction to the study of the English language from a historical, linguistic, and philological perspective, and an overview of the study of the "Englishes" that populate our globe. While providing students with the ability to identify and explain language change through historical periods, also examines language as a social and political phenomenon.

This course traces evolutions of the hero in Old English, Norse, Welsh, and Irish narratives within and around early medieval England. Introduction to genres of saga, romance, and the short poetic lai, as students consider how the nature of the hero changes in specific cultural and linguistic moments. Texts in modern English translation. Essays will focus on close textual readings. Not open to first-year students.

ENGL 1311L. From Meat-Hall to Mordor: The Celtic and Germanic Roots of Tolkien's Fiction.
This course traces the sources used by J.R.R. Tolkien in writing The Hobbit and The Lord of the Rings, including tales drawn from Old English, Norse, Welsh, and Irish literatures. You will be introduced to different medieval genres as you consider how the nature and gender of the hero change in specific cultural and linguistic moments.

ENGL 1360A. The Stage and Globe in Renaissance Drama.
Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe's Tamburlaine, Fletcher's Island Princess, Heywood's Fair Maid of the West, the anonymous Stukeley play, Shakespeare's Othello, and Daboure's A Christian Turned Turk to observe what dangers and freedoms these plays ascribe to specific geographies. Enrollment limited.

ENGL 1360B. Inventing Britain.
Focusses on the internal colonization of the British Isles as represented by chronicle histories, drama, masques, and epic and lyric poetry: How do the English define themselves as a center striving to incorporate the British periphery? Authors may include Spenser, Shakespeare, King James I, Bacon, Jonson, Milton, and Marvel.

ENGL 1360C. Language and Form in Shakespearean Studies.
Shakespeare's poems and plays are a working dictionary of early modern English and an inventory of the possibilities of formal invention in early modern culture. How can we reach a historically informed awareness of form and formality in Shakespeare? What is the history of formalism in Shakespearean studies? What new modes of inquiry issue from questions of form?

ENGL 1360D. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.
How to read a medieval manuscript. Students will learn to transcribe and date 5th- through 16th-century scripts in Old and Middle English and some Latin texts, and will learn about interpretive methods. Prior course work in Middle English recommended, and acquaintance with Latin and/or Old English and/or Old French and/or medieval Spanish helpful.

ENGL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives.
Medieval texts explored ideas of self, love, rite-of-passage, spirituality, and group identity through narratives of travel, both imagined and real. We will read romance quests that foray to fairlands and wastelands, visionary journeys to hell, pilgrimages of self discovery, an epic exodus that founds King Arthur's nation, and a 14th-century round-the-world traveller. Chaucer, Malory, Kempe, Mandeville, Layamon, Anonymous. Middle English readings. Not open to first-year students. Enrollment limited.

ENGL 1360H. Introduction to the Old English Language.
This course offers a thorough introduction to the earliest period of English language and literature. We begin with an intensive coverage of grammar and syntax before reading short texts and a few Old English poems, including The Battle of Brunanburh and Judith. Enrollment limited to 20.

ENGL 1360J. Middle English Literature.
In the age of Chaucer, literature in Middle English ranged from lyrics to romance narratives to mystery plays and medieval genres like dream visions and debate poems. This course will introduce students to reading texts like Sir Gawain and the Green Knight and The Owl and the Nightingale in their original Middle English. No prerequisites. Not open to first-year students. Enrollment limited to 20.

ENGL 1360K. Shakespeare and Company.
Shakespeare belonged to a community of actors and playwrights who competed for audiences in a fledgling entertainment industry. How do his plays compare to those of Marlowe or Jonson, Middleton or Webster? Reading Shakespeare in tandem with his contemporaries, we will consider the genres, sources, styles and conventions they shared, the issues that concerned them, and their differing artistic perspectives. Prerequisite: ENGL0310A or equivalent. Enrollment limited to 20 juniors and seniors. WRIT

ENGL 1360L. Spenser, Milton, and the Politics of the English Epic.
We will read the literary and political writings of England's two major authors of epic -- Spenser and Milton -- assessing their investment in contemporary debates about nation and conquest, rule and liberty, and sexuality and selfhood. Along with the major poems, we will read these authors' shorter literary and political writings.

ENGL 1360N. Shakespeare and European Culture.
How do Shakespeare's works embody and transform the cultures of Europe? What is his relationship to ancient Greece and Rome? To the moral and political philosophies of the sixteenth century? To contemporary literary fashion?

ENGL 1360O. The Ties that Bind: Renaissance Revenge Plays.
From revenge plays to domestic tragedies, family is a value to kill and die for in Renaissance drama. This course considers the cultural pressures such violence responds to, the contaminations it guards against, and explores the political life of these violent domestic affairs. Works by Kyd, Shakespeare, Heywood, Webster, and Middleton. Not open to first-year students. Enrollment limited to 20.
ENGL 1360P. Shakespearean Tragedy.
We will read in depth early, middle and late tragedies by Shakespeare, attending to the genre as understood in the Renaissance and as Shakespeare developed it, along with critical readings that explore tragic form. Oral presentations, short papers, and a final research paper. Prerequisite: ENGL 0310A or equivalent. Enrollment limited to 20 juniors and seniors. WRIT

ENGL 1360R. Modernism and the Early Modern: 17th-Century. Did human nature become modern in the seventeenth century or did modern people just think so? This course will study style, science, politics and cultural transactions in this period of revolution and restoration, examining such texts as Donne's satires and epistles and Eliot's high modernist essays on the division of human nature in this period. Enrollment limited to 20.

ENGL 1360S. Between Gods and Beasts: The Renaissance Ovid. Ovid's Metamorphoses, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton. Students who have taken ENGL 1310D may not register for this course. Enrollment limited to 20. WRIT

ENGL 1360T. Eco-Shakespeare. Do Shakespeare's plays register and respond to the ecological crises of his day, including deforestation, land enclosure, climate change, and animal exploitation? Or, are they complicit in the ideologies that instated these practices? What kind of relation do Shakespeare's plays envision as underpinning the natural and the cultural realms and how does this differ from modern conceptions? We will seek answers to such questions by considering the plays' use of pastoral tropes and green worlds, but also by analyzing the inter-animating dynamics they stage between subject and environment. Enrollment limited to 23. Not open to first-year students.

ENGL 1360U. Europe in the Vernacular. Why did a few early medieval European authors write not in Latin or Arabic but in vernacular languages like Castilian, Early Middle English, Old Icelandic, or Old French? We will read primary texts by Layamon, Alfonso X, Dante, troubadours and anonymous others, and assess previous claims about the "rise of the individual" and various proto-nationalisms as we rewrite the story of how, why, and for whom multilingual vernacular writings came to be. Readings in modern English supplemented by medieval languages. Enrollment limited to 20 students. Not open to first-year students. Sophomores require instructor permission to register.

ENGL 1360Z. Shakespeare and Embodiment. Consideration of a number of Shakespearean texts including the erotic narrative poem "Venus and Adonis," the early revenge drama Titus Andronicus, the history Henry IV, pt. 1, the tragedy of Othello, among others, and their various representations of the body; as subject to violence, gender and desire, sovereignty and history. Attention to Shakespeare's rewriting of Ovid, novelle, and chronicle history. Enrollment limited to 20. Not open to first-year students.

ENGL 1361A. Fantasies of Milton. Paradise Lost has served as the basis for numerous fantasy novels. Even Comus has become a (supposedly inappropriate) children's story. How can a seventeenth-century poet's treatment of temptation, disobedience, reason and self-regard come to seem relevant in the present? What do contemporary writers feel compelled to preserve and to change? How might we reimagine Milton? Enrollment limited to 20.

ENGL 1361D. Women's Voices in Medieval Literature. This course explores literary works from the early medieval period, both literature by women and literature that represents women's voices and desires. Traditions examined will include the Old and Middle English, Norse, Welsh, and Irish. The course provides insight into the construction of premodern sexualities as well as into the cultural and social histories of multiple national traditions.

ENGL 1361G. Tolkien and the Renaissance. This course explores the work of J.R.R. Tolkien alongside Renaissance forbears such as Shakespeare, Spenser, Milton and others. Topics to include love and friendship, good and evil, violence and nonviolence, and how literature offers distinctive forms of life. Enrollment limited to 20.

ENGL 1361H. Shakespearean Comedy. We will read a selection of Shakespeare's comedies with attention to his European sources and analogues. Consideration of both formal and historical questions including genre, convention, the Shakespearean text, gender, sexuality, status and degree, and nation. Not open to first-year students. Enrollment limited to 20.

ENGL 1361J. Seminar in Old Norse-Icelandic Language and Literature. This course offers a thorough introduction to a language both closely related to Old English and in which survives one of the richest medieval literatures. We will start with an extensive coverage of grammar and syntax before reading short excerpts from sagas including Egil's Saga and Grettir's Saga. Enrollment limited to 20; knowledge of Old English, Latin, or German advised.

ENGL 1380. Undergraduate Independent Study in Medieval and Early Modern Literatures. Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor permission required.

ENGL 1510A. Jane Austen and Her Predecessors: The Other History of the Novel. This course considers the "rise" of the novel during the "long" eighteenth century. Beginning with Behn and Defoe, readings include works by Poe, Dickens, Melville, Stevenson, and James. How and why did the novel become the dominant literary mode? This course considers the "rise" of the novel during the "long" eighteenth century. Beginning with Behn and Defoe, readings include works by Richardson, Fielding, Sterne, Lewis, Watt, Lukacs, McKeon, and Bakhtin.

ENGL 1510B. Liberalism and American Culture. A course in the relationship between the rise of liberalisms and American literary history. Writings from Franklin, Jefferson, Emerson, Fuller, Rowson, Twain, and Charlotte Perkins Gilman.

ENGL 1510D. The Literature of the American South. The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of "the South." Explores sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Twain.

ENGL 1510E. American Renaissance. An intensive reading in American literature between 1820 and 1860, with special attention to Romanticism, race and slavery, and the historical novel.

ENGL 1510H. Why the Novel Happened. Readings in "early" novels of 18th-century England and in more recent explanations of the novel's rise to dominance as a popular modern genre. How have changing ideas of truth, virtue, gender, money, politics, history, or the human subject interacted with the practices of narrative fiction? Writers to be considered include Behn, Haywood, Defoe, Richardson, Fielding, Sterne, Lewis, Watt, Lukacs, McKeon, and Bakhtin.

ENGL 1510I. The Novel from Defoe to Austen. How and why did the novel become the dominant literary mode? This course considers the "rise" of the novel during the "long" eighteenth century. Beginning with Behn and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin.

ENGL 1510J. Eighteenth-Century Women Writers. Rediscovery and reconsideration of works by women during the eighteenth century are changing the literary canon: works by women are becoming mainstream, and they are changing the way we read 'traditional' texts. This course includes poetry, drama, fiction, letters, diaries, and essays by writers including Manley, Haywood, Centlivre, Scott, Fielding, Montagu, Sheridan, Burney, Radcliffe, and Wollstonecraft.

ENGL 1510L. Fiction and Mass Media in Nineteenth-Century England and America. Explores critiques of the mass media from Carlyle and Arnold to Benjamin and McLuhan by way of a reading of important works of popular Anglo-American fiction of the 19th century. Criticism includes essays by Carlyle, Arnold, Benjamin, and McLuhan; literature includes fiction by Poe, Dickens, Melville, Stevenson, and James.
A survey of American fiction in the latter half of the nineteenth century. We will examine the ways narrative form helped shape modern America's increasingly fractured sense of identity, focusing specifically on questions of imitation and authenticity, race and nationalism. Writers will include Twain, Stein, Wharton, Crane, Chopin, and Chesnutt.

ENGL 1510O. Inventing Race in America.
What is "race"? Where does it come from? This course argues that categories of racial difference—far from being fixed or natural—have emerged from within writing. We trace the emergence of "race" in America from the late 16th century to the present day by reading 17th-century British colonial writing, 18th-century racial scientists, Jefferson, Crevecoeur, Melville, Faulkner, Mukherjee, and Silko.

ENGL 1510R. Location and Dislocation in the Late Nineteenth-Century American Novel.
Focuses on the two dominant literary modes of the late 19th century: realism and naturalism. We try to generate working definitions of these two methods in order to understand the ways narrative form shaped Americans' increasingly fractured sense of identity. Writers include Twain, James, Crane, Cahan, Jewett, Chopin, and Chesnutt.

ENGL 1510S. Pre-Raphaelites, Aesthetics, and Decadents.
Looks at both Pre-Raphaelite literature and painting, and the reading includes Browning, the Rossettis, Morris, and Swinburne. The painters include both early hard-edge photographic Pre-Raphaelites and the erotic medievalism of Rossetti, Burne-Jones, and the followers. The course will focus on the tensions in Pre-Raphaelitism between realism and fantasy, fact and symbol, body and spirit.

ENGL 1510T. Swift and His Contemporaries.
Swift's works are central to this course's investigation of literature, politics, and society, Anglo-Irish relations, and the great outpouring of satire in English in the early 18th century. Irony, parody, and mock-heroics inventively transform genres while challenging "abuses" of learning, government, religion, colonialism, and even love. Other writers include Congreve, Manley, Addison, Steele, Montagu, Pope, and Gay.

ENGL 1510V. Civil Rights and American Literature.
An examination of the relations between legal theory and practice and literature, with a particular emphasis on the nature and significance of those relations in the historical development of American discourses of civil rights. Readings include Thoreau, Douglass, Wright, and Perry, and legal theorists such as Dworkin, Unger, Cardozo, and Fish.

ENGL 1510W. George Eliot.
The course will study George Eliot's major works, including Adam Bede, Middlemarch, and Daniel Deronda, as well as examples of her essays and criticism. We will consider her experiments with literary realism, which helped secure for the novel form a position as high art. Giving attention to George Eliot's emphasis on conflicting ethical systems, from sympathy, utilitarian economics, and theology, to theories of physiological necessity, we will also examine the question of choice—including personal, women's social, professional, and marriage choices—that lies at the heart of many of her novels.

ENGL 1510X. The Early American Novel.
A reading of diverse genres of the early American novel, between 1790 and 1860, including the seduction novel, frontier romance, historical fiction, and the antiSlavery novel. What was the novel's cultural role? Writers include Susanna Rowson, Brocken Brown, Hawthorne, Stowe, and William Wells Brown.

ENGL 1510Z. The Realist Age: American Literature at the Turn of the Century.
What do we mean when we call a novel realistic? When did the term first start being used, and why? This class attempts to answer these questions by studying the emergence of realism as the dominant American literary form at the turn of the century. Writers will include Mark Twain, Henry James, Stephen Crane, Edith Wharton, and Charles Chesnutt.

ENGL 1511A. American Literature of The Civil War.
An examination of the way the Civil War is represented in American literature from Reconstruction to the present. Authors to be considered include Grant, Twain, Dixon, Chesnutt, DuBois, Faulkner, Morrison, and Ellison.

ENGL 1511B. The Victorian Novel.
Challenges the notion of a Great Tradition or mainstream Victorian novel by looking at the proliferation of subgenres—such as sensation fiction, crime fiction, thug fiction, colonial adventures stories—for which the period is known. Includes novels by Mary Shelley, the Brontës, Dickens, Mrs. Henry Wood, Eliot, Hardy, Stevenson, Haggard, Stoker, and Wilde.

ENGL 1511C. Lincoln, Whitman, and The Civil War.
A literary and cultural history of the Civil War with special emphasis on Whitman's poetry and Lincoln's addresses and letters. It focuses on issues of race, democracy, and modernity.

ENGL 1511E. Monsters, Giants, and Fantastic Landscapes.
Monsters, giants, and exotic landscapes fill the pages of much writing in English before 1900. We will examine the ways in which a number of writers before 1900 use the strange and the fabulous to suggest new ways of understanding what it means to be normal. Authors may include Columbus, Shakespeare, Mary Shelley, and Poe. WRIT

ENGL 1511G. Dickens and Others.
An introduction to the novels of Charles Dickens (1812-1870) that considers these works in relation to other important intellectual, historical, and literary developments of mid-19th-century England. Special attention given to the political, social, and philosophical significance of "others" in Dickens's writing and in related works from the period. In addition to a set of Dickens's novels, readings include selections from Mill, Arnold, Marx, Tennyson, Eliot, and others.

ENGL 1511H. Literature of the American Renaissance.
A survey of the major figures of mid-19th-century American literature, with a particular emphasis on how the writers of the period engaged the political and legal issues informing the sectional conflict on the eve of the Civil War. Authors to be considered include Poe, Hawthorne, Melville, Dickinson, Stowe, Douglass, Brown, Jacobs, and Whitman. Students who have taken ENGL 0600F may not register for this course.

ENGL 1511I. Culture and Anarchy.
This course will trace the development of the concept of culture from its origin in conflict generated by the universalizing mission of the Enlightenment into a variety of literary and philosophical writings in 19th-century British literature. Readings from Rousseau, Kant, Herder, Burke, Wordsworth, Percy Shelley, Carlyle, Thoreau, Emerson, Tennyson, Arnold, and George Eliot.

ENGL 1511J. The Rise of American Realism.
Realist fiction is traditionally associated with France (Honoré Balzac, Émile Zola) and England (Jane Austen, Charles Dickens, George Eliot). We will read a number of important American realist writers (including Stephen Crane, Edith Wharton, Henry James, and Theodore Dreiser) in order to understand what might be distinctive about American realism and what it might owe to its European forerunners.

ENGL 1511K. Gothic Novels and Romantic Poems.
The difference between "high Romantic" poetry and Gothic popular fiction blurs when we look closely at these haunted and haunting texts. This seminar will examine some major Romantic poems by Wordsworth, Coleridge, Keats, Shelley, and Byron in tandem with Gothic novels by Ann Radcliffe, Matthew Lewis, Jane Austen, and Mary Shelley.

ENGL 1511L. On Being Bored.
This course explores texts/films that represent and formally express states of non-productivity or non-desire. Beginning with the Enlightenment and romantic periods, we will reflect on narratives with neither progress nor plot, characters that resist characterization, and poems that deny assertion and revelation. Authors include: Kleist, Kant, Rousseau, Coleridge, de Quincey, Keats, Blanchot, Levinas, Beckett, Ashbery, Schuyler.
ENGL 1511M. Victorian Self and Society.
This multi-genre course studies literature and culture of the Victorian period, looking at the changing ideas of society and the individual's place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, women's suffrage and the condition of women, and the Great Exhibition of 1851. Readings (essays, poems, stories, plays, and novels) by Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll.

ENGL 1511N. Liberalism, Empire, and the American Novel.
An historical consideration of how the novel in the United States addresses the relations between American liberalism and the projection of US sovereign authority into international contexts. Topics to be considered include: Manifest Destiny and the frontier; Reconstruction and the rise of imperial America; World War II and the Cold War; and the United States at the end of History.

ENGL 1511O. American Poetry I: Puritans through the Nineteenth Century.
Survey of the invention and development of American poetic traditions. Readings include Bradstreet, Taylor, Wheatley, Freneau, Bryant, Emerson, Poe, Whitman, Melville, Dickinson, and Frost.

ENGL 1511R. Scandalous Victorians.
This course examines the literature and culture of Victorian Britain through the lens of scandal. Particular attention will be paid to questions of gender, sexuality, class and social mobility, and national and imperial identity, as well as to the dynamics of scandal and the processes of social change.

ENGL 1511S. The Victorian Novel and/as the History of Sexuality.
Might the modern hetero- and homosexual be Victorian constructions that have really "stuck"? We will explore how the Victorian novel contributed to the cultural labor of joining sexuality to a sense of the self, and then pitched in on the effort to meld romance, love, and sexuality into marital relationships. Domesticity, obsession, heterophobia, the Malthusian unconsciousness, and erotic versus romantic friendship will be some of the issues discussed. We will also branch out into issues of pleasure and desire more broadly in Victorian culture. Authors will include Brontë, Dickens, Eliot, Hardy, Charlotte Yonge, and Wilde.

ENGL 1511T. Victorian Inequality.
From "Dickensian" workhouses to shady financiers, Victorian literature has provided touchstones for discussions of inequality today. This course will investigate how writers responded to the experience of inequality in Victorian Britain. Considering multiple axes of inequality, we will explore topics such as poverty and class conflict, social mobility, urbanization, gender, education, Empire, and labor.

ENGL 1511U. Melville, Poe, and American Modernity.
The class will be guided by the premise that the writings of Poe and Melville reflect mid-19th century modernity. To support this claim we will look into their experimentation with narrative structure and ask whether the absence of clearly delineated characters in their stories is related to the emergence of urban crowds, practices of dehumanization employed in New York and Philadelphia prisons and hospitals.

The major works of Victorian poetry, spanning from the end of the Romantic period to the beginnings of Modernist poetry: roughly 1840 to 1890. We will be reading Matthew Arnold, Robert Browning, Thomas Hardy, Gerard Manley Hopkins, and Alfred Tennyson in detail, as well as critical writing and political poetry from the period.

ENGL 1511X. Capital and Culture.
An introduction to the literature and culture of the Victorian period through the categories and questions of political economy: especially the making of the working class, finance, and industrialization. The objective is twofold: to examine novelists, poets, and prose writers in the light of Karl Marx's influential analysis of capitalist society, but also to contextualize and situate Marx as a Victorian, who lived in London for the majority of his life.

ENGL 1511Y. Emily Dickinson and the Theory of Lyric Form.
This class examines the extraordinary work of Emily Dickinson in an attempt to understand what lyric poetry is and how it works. We will read a generous sampling of Dickinson's poetry as well as a number of the major theoretical accounts of the lyric. Enrollment limited to 20 seniors and juniors.

ENGL 1560A. Jane Austen and George Eliot.
A survey of the major novels of Austen and Eliot. Readings will also include contemporary reviews and responses, letters, and Eliot's critical prose, as well as literary theory and criticism addressing questions such as novelistic form, realism and narrativity, the problem of the subject, the politics of aesthetics, and the changing status of the woman writer in the 19th century. Enrollment limited to 20 seniors and juniors. Instructor permission required.

ENGL 1560B. Melville.
A seminar looking closely at the relation between the life and literary work of Herman Melville, with an extended reading of his masterpiece, Moby-Dick. The course will look at the history of writing and publishing during Melville's era and consider some of his contemporaries like Hawthorne and Harriet Beecher Stowe. Enrollment limited to 20.

ENGL 1560E. The Modern Self and Its Others.
How do eighteenth-century representations of personal and public identity mark the emergence of the modern 'subject' as defined by gender, race, nation, language, and the body? Readings will include selections by Swift, Pope, Montague, Stern, Johnson, and Bernry.

ENGL 1560F. Nineteenth-Century American Imperialism.
Examines a number of different types of texts—novels, essays, journalism, oral narratives—in order to trace the connections between the internal colonialism of America in the nineteenth century and U.S. colonial ventures in the Caribbean, Asia, and Latin America. Writers to include Melville, Twain, Marti, Black Elk, Crane, Du Bois, and Roosevelt.

ENGL 1560G. Romantic Orientalism.
Representations of "the East" in British writing and visual art from 1775 to 1825. Historical and theoretical accounts of "orientalism" and analysis of the political and ideological sources and consequences of "orientalist" representation. Readings in Wordsworth, Coleridge, Owenson, DeQuincey, Byron, Percy Shelley, and Mary Shelley.

ENGL 1560H. The Victorian Novel.
What specific historical conditions can be seen to have led to the emergence of the novel as a leading literary form in the Victorian era? What cultural work was it called upon to perform? How does it address broader philosophical, economic, political and social questions of the Victorian era? Authors include Dickens, Eliot, Hardy, Stevenson, and Conrad.

ENGL 1560M. Orientalism and the Place of Literature.
Literary representations of "the East" from the Enlightenment through Modernism and their relation to changing conceptions of the meaning and value of "literature" itself. Thinking about "place" in representational, geopolitical, and institutional terms. Readings from the "Arabian Nights," Mary Wortley Montagu, Oliver Goldsmith, Coleridge, Byron, De Quincey, Kipling, Michael Ondaatje, and others; theoretical and historical perspectives from Said, Williams, Eagleton, and others.

ENGL 1560N. Eighteenth-Century Novel.
The 18th century marks the beginning of the novel as we know it. This course considers the "rise" of fiction during the "long" eighteenth century. Beginning with Behn, Haywood and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin.

ENGL 1560O. Slavery and American Literature.
This course examines the ways in which slavery is represented in 19th-century American literature. We will consider efforts to delineate the social practices and effects of chattel slavery and deployments of slavery as a form of political rhetoric. Readings include works by Douglass, Jacobs, Stowe, Melville, Howells, Twain, and DuBois.
ENGL 1560Q. The Poetry of Politics: Baudelaire, Arnold, Whitman. Explores the special challenge to the traditional form of lyric poetry posed by the post-industrial modern city of the mid-19th century. We will study the poetry and prose of Charles Baudelaire, Matthew Arnold, and Walt Whitman as responses to the urban conditions represented by mid-19th-century Paris, London, and New York. Motifs to be considered include modernity, commodification, and crowds. Priority will be given to junior and senior concentrators in English, Comparative Literature, Modern Culture and Media, and French Studies. First-year students and sophomores may request permission by email to take the course.

ENGL 1560R. From Frankenstein to Einstein: Literature and Science from 1800 to 1950. Science and literature as interrelated ways of knowing and learning, focusing on questions of language, observation, interpretation, and value. Themes include utopias and dystopias, evolution and degeneration, man and machine, entropy and chaos, and the relationship between literary imagination and scientific creativity. Readings include poems, plays, novels, and essays (Shelley, Arnold, Doyle, Poe, Wells, Kafka, Stoppard) alongside a range of scientific writing (Darwin, Huxley, Freud, Gould, James Watson) and philosophy of science (Popper, Feyerabend, Kuhn). Enrollment limited to 20 juniors and seniors. Banner registrations after classes begin require instructor approval.

ENGL 1560S. Forms of American Realism, 1865-1945. An inquiry into the nature of realism and an examination of its various historical manifestations—literary, legal, political, and aesthetic—between the Civil War and World War II. Authors to be considered include DeForest, Chesnutt, Twain, Howells, Norris, Gilman, Wharton, Hemingway, Steinbeck, Hurston, and Wright. Enrollment limited.

ENGL 1560T. Literature, Religion, and "Culture Wars" in America. This course examines important moments where religious and literary histories converge. It reads "classic" American literary works in context of ongoing conflicts between evangelical and secular forces in American life, and it thinks about literature as an arena where these very categories are contested and revised. Major readings will include works by John Winthrop, Benjamin Franklin, Harriet Beecher Stowe, African American women preachers, Emerson, Mark Twain, and Flannery O'Connor. Enrollment restricted.

ENGL 1560U. Radicals and Conservatives: the later 18th Century. The relationship between literature and society is demonstrated by conservatives like "Dictionary" Johnson as well as by radicals like visionary Blake. Readings include works by Johnson, Boswell, Burke, Gibbon, Sterne, Bunyan, Wollstonecraft, Godwin, and Blake. Enrollment limited to 20.

ENGL 1560V. The Lives of a Text. Books are composed not merely of concepts. They are material objects whose forms, functions, and value can vary widely. We will make use of rare editions at the John Hay Library to help us explore both the literary content of works and their production and dissemination in various formats and for various audiences. Authors may include Shakespeare, Poe, and Fitzgerald. Enrollment limited to 15. Not open to first year students.

ENGL 1560W. Getting Emotional: Passionate Theories. This course examines connections between emotion, feeling, and affect in several key texts from 18th-, 19th-, and 20th-century literatures. We will ask how and why affect becomes a central concept for writers and thinkers in the Enlightenment, and chart the ways in which affect productively opens up onto contemporary theorizations of identity, gender, sexuality, and race. Possible authors include: Wordsworth, Austen, Blake, Equiano, Coleridge, Keats, Shelley, Wilde, Pater, Kant, Melville, Hofmannsthal, Hume. Films by Todd Haynes, McQueen, Campion, Frampton. Theoretical readings by Berlant, Ellison, Terada, Deleuze, Stewart. Enrollment limited to 20 juniors and seniors.

ENGL 1560X. Transatlantic America. What was "transatlantic" culture in colonial and 19th-century America? How did American writers continue to engage and respond to English culture? Franklin, Emerson, Sedgwick, Paine, Addison and Steele, Carlyle, and others. Enrollment limited.

ENGL 1560Y. The Ethics of ROMANTICISM. An exploration of the intersections of moral philosophy and Romantic literature and culture. Writers studied may include Smith, Hume, Bentham, Hazlitt, Hegel, Wordsworth, Coleridge, Keats, Shelley, Byron, Godwin, Equiano, Austen. We will consider how writings of the Enlightenment and Romantic period differently reflect upon problems of knowledge, otherness, identity, community, and aesthetics, and how these reflections are related to the ethical imagination. We will also juxtapose our selections with several recent theoretical debates. Enrollment limited to 20.

ENGL 1560Z. Time and Narrative. This course studies fiction that experiments with the representation of time alongside philosophical and critical texts on the theory of time. We will consider how engagements with the question of time shape the structures, language, characters, plots, themes, and goals of narrative, looking at topics such as time and language, story and narration, memory and history. We will also consider the impact of technological and social developments on the sense of time (the wristwatch, the telegraph, railway timetables). Authors include St. Augustine, Laurence Sterne, John Locke, David Hume, Ambrose Bierce, Charles Dickens, H.G. Wells, Thomas Hardy, Henry James, Virginia Woolf. Enrollment limited.

ENGL 1561A. Swift and His Contemporaries. Jonathan Swift's works are central to this course's investigation of early 18th-century literature and culture. The reading focuses on the period as an "information age" energized by issues not unlike those of our own time: partisan politics, money, proliferation of new forms of textuality, globalization, changing views on gender and sexuality, love, religion, and war. The emphasis will be on irony, parody, and satire. Other writers include Congreve, Defoe, Manley, Pope, Gay, Montagu, Addison, and Steele. Students who have taken ENGL 1510T may not register for this course. Not open to first-year students or students who have taken ENGL1510T. Enrollment limited.

ENGL 1561B. Writing and the Ruins of Empire. An exploration of literary representations of "empire" and "imperialism" from the 18th century to the present. Readings in Gibbon's Decline and Fall of the Roman Empire, Volney's Ruins of Empire, and a wide range of 19th- and 20th-century texts. Some consideration of theories of imperialism and of visual representations of cultures of empire. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised. WRIT

ENGL 1561C. Swift's Time and Narrative. An examination of the formula Western in American fiction, art, and cinema, with a view toward situating the genre within urban middle-class culture in the late 19th- and 20th-century United States. Authors to be considered include Twain, Harte, Crane, Austin, Cather, Doctorow, Reed, Leonard, and L'Amour. Films: Destry Rides Again, Stagecoach, Rio Bravo, The Seven Samurai, Fistful of Dollars, Dirty Harry, The Man from Laramie, Paint your Wagon, Act of Violence, among others. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised. WRIT

ENGL 1561D. Writing and the Ruins of Empire. An exploration of literary representations of "empire" and "imperialism" from the 18th century to the present. Readings in Gibbon's Decline and Fall of the Roman Empire, Volney's Ruins of Empire, and a wide range of 19th- and 20th-century texts. Some consideration of theories of imperialism and of visual representations of cultures of empire. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised. WRIT

ENGL 1561E. The Western. An examination of the formula Western in American fiction, art, and cinema, with a view toward situating the genre within urban middle-class culture in the late 19th- and 20th-century United States. Authors to be considered include Twain, Harte, Crane, Austin, Cather, Doctorow, Reed, Leonard, and L'Amour. Films: Destry Rides Again, Stagecoach, Rio Bravo, The Seven Samurai, Fistful of Dollars, Dirty Harry, The Man from Laramie, Paint your Wagon, Act of Violence, among others. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised. WRIT

ENGL 1561F. Sacred Readings: The Bible, Biblical Interpretation, and Victorian Literature. Biblical reading in terms of apocalyptic and other prophetic permeates Victorian literature, coloring ideas of politics, gender, character, and the arts in ways that seem a secret code. The course therefore reads works by Charlotte Brontë, the Brownings, Carlyle, Hopkins, Newman, the Rossettis, Ruskin, and Swinburne in light of once common ideas of typology, prophecy, and apocalypse. Enrollment limited to 20. WRIT

ENGL 1561G. Swift, Pope, Johnson. The course provides in-depth study of three major writers of the eighteenth century and will include cultural contexts. Readings include Gulliver's Travels, The Rape of the Lock, and Rasselas. Enrollment limited to 20.
ENGL 1561H. The Brain and the Book: Thinking and Reading in the Victorian Novel.
Consider two nineteenth-century novels in light of theories of cognition, both nineteenth-century and contemporary. This course proposes to study how some of the foundational questions of literary study—the nature of language, the location of meaning, the experience of reading, the power of metaphor, and the sources of creative thought—can also be studied from the perspective of mental science. We will read two Victorian novels in serial installments simultaneously, alongside shorter readings. Limited to juniors and seniors only. Banner registrations after classes begin require instructor approval. Enrollment limited to 20.

ENGL 1561I. Gender, Narrative, and the 19th-Century Novel.
Like Freud, Victorian novelists tell stories of desire that often center on a female character. This seminar examines some of the contexts, conventions, and tensions that go into the making of a "portrait of a lady" in this novelistic tradition. Texts to be studied include Freud's case history Dora, and novels by Brontë, Collins, Eliot, and James. Enrollment limited to 20.

ENGL 1561J. The Poetics of Confession.
This course explores the theoretical structures and models of confession in various literary and cinematic sources, with a special emphasis on work from the nineteenth and twentieth centuries. Authors might include: St. Augustine, Rousseau, De Quincey, Foucault, Wordsworth, Bronte, Wilde.

ENGL 1561K. Restoration and Eighteenth-Century Drama.
After almost two decades of closure, public theaters re-opened in 1660. This new beginning occasioned new plays, new kinds of performance and production, and new intersections between the stage and society. We will study works by Etherege, Wycherly, Congreve, Dryden, Behn, Gay, Lillo, Sheridan, and others. Not open to first-year students.

ENGL 1561L. Revolution, War, Poetry: Wordsworth in the 1790s.
William Wordsworth's poetic experiments during the 1790s are often said to have invented modern poetry as the poetry of consciousness; they are also efforts to find language adequate to a time of revolution, war, and modernity. This seminar examines texts by various writers of the revolutionary era, but focuses on Wordsworth's poetry from the early 1790s to the 1805 Prelude. Enrollment limited to 20. Not open to first-year students.

ENGL 1561M. American Literature and the Corporation.
A study of the development of the American novel from the Civil War to the present in light of the emergence of the corporation as the principal unit of economic enterprise in the United States. We will survey corporate theory from Lippmann to Collins, and use it to frame the novel's development from realism through modernism into postmodernism. Corporate theorists to be considered: Lippmann, Dewey, Berle, Drucker, Mayo, Deming, Friedman, Coase. Novelist to be considered: Twain, Dreiser, Wharton, Stein, Faulkner, Steinbeck, Wright, Ellison, McCullers, Reed, Gaddis, Morrison. Enrollment limited to 20.

ENGL 1561N. Gender and Sexuality in Victorian Literature.
This seminar explores the constructions and the highly charged cultural significance of gender and sexuality in the literature of Victorian Britain. Readings include a selection of fiction, poetry, and prose writing by authors such as Alfred, Lord Tennyson; Emily Bronte; Elizabeth Barrett Browning; Mary Elizabeth Braddon; Dante Gabriel Rossetti; Christina Rossetti; Robert Louis Stevenson; and Thomas Hardy. Enrollment limited to 20.

ENGL 1561T. The Sensational and the Real In Victorian Fiction.
This course will focus on the Victorian novel, which has been called the period's greatest artistic achievement. In particular we will explore two modes through which novels engaged the turbulent experience of their time: realism and sensation. We will examine how these different novelistic modes tackled the issues of gender, sexuality, class, and personal and community identity. Enrollment limited to 20.

ENGL 1561U. Oedipus in Myth, Tragedy, and Theory.
This course is an intensive study of Oedipus Rex, as well as an introduction to the debates and responses it has occasioned. It spans several disciplines, from the classics to philosophy to psychoanalysis to literary theory, following the trajectory of this single figure. Readings: Sophocles, Aristotle, Hegel, Rancière, Girard, Foucault, Freud, and Bernard Williams. Enrollment limited to 20.

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required.

Examines Asian American writings that are difficult, complex, and/or experimental—that are, in Kingston's phrase, "extravagant." Explores the issue of what is at stake-politically and aesthetically-in writing that explicitly challenges the generic conventions with which much Asian American literature is linked: autobiography, the Bildungsroman, ethnography, realism, and sentimentalism.

ENGL 1710B. American Vertigo: How the World Sees the U.S.
Why does America exercise such an extraordinary attraction for foreign writers? And why, moreover, is the America that appears in those writings so often recognizable? This class examines the representation of American life from DeToqueville to Henry-Levy, looking at work by Amis, Antonioni, Adorno, Nabokov, Kincaid, and others. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class.

ENGL 1710C. Race and Nation in American Literature.
From the heyday of literary realism through the rise of modernism, race definitively shaped the national literature of the U.S. This course will consider representations of racial identities in relation to key historical and aesthetic developments within these two periods. Authors include Mark Twain, Frances Harper, Charles Chesnutt, Stephen Crane, William Faulkner, and John Fante.

After examining the relations between fiction and nonfiction, the class will consider the work of Tom Wolfe, Joan Didion, Annie Dillard, and others within contexts created by essayists (Montaigne), satirists (Swift), and Nineteenth-century sages (Carlyle, Thoreau, Nightingale, and Ruskin). The class will become acquainted with various nonfictional forms including prose satire, the meditative essay, sage-writing, autobiography, and travel literature. WRIT

Focusing on pairs of African American and Asian American works that address parallel concerns, we explore the continuities and discontinuities between these literary traditions. Authors we examine may include: James Weldon Johnson and Winnifred Eaton, Richard Wright and Carlos Bulosan, Chang-rae Lee and Toni Morrison, Karen Tei Yamashita and Cary Phillips.

How do major African novelists represent the interplay of tribe, nation, and race in African societies? This course will introduce students to key themes and contexts of African literature in English. We will read the work of the writers for the historical sources and conceptual implications of these categories in modern Africa. Writers include Achebe, Emecheta, Farah, Ngugi, and Vera. DPLL

ENGL 1710G. Faulkner.
In examining Faulkner's major works from the early stream-of-consciousness novels through the history-driven and race-inflected texts of the 30s and 40s, this course will evaluate Faulkner's practice as a writer working both in and against Southern culture, and as Modernist writing within an international context. Issues include narrative experimentation, race, class, gender, and the evolution of Faulkner's work. Students should register for ENGL 1710G S01 and may be assigned to conference sections by the instructor during the first week of class.
ENGL 1710H. Black Internationalism and African American Literature. The notion that African Americans are an extension of a global racial community has been a fixture of black politics and culture for more than a century. In this course, we will consider how the concept of global racial alliance has shaped black political resistance, literary practice, and critical theory. Likely writers include DuBois, Hughes, McKay, and Wideman. DPLL

ENGL 1710I. Harlem Renaissance: The Politics of Culture. The Harlem Renaissance was a remarkable flowering of culture in post-war New York as well as a social movement that advanced political agendas for the nation. This course takes up the relationship between literature and politics by exploring such matters as the urbanization of black America, the representation of the black poor, the influence of white patronage, and the rise of primitivism. Writers may include Hughes, Hurston, Larsen, Fisher, Locke, and McKay. DPLL

ENGL 1710J. Modern African Literature. This course considers themes, antecedents, and contexts of modern African literature and related forms. Our readings will include fiction in English or in translation, traditional oral forms like panegyric and festival poetry, and some films. We will examine how these diverse materials explore the interplay of ethnicity, nationality, and race. We will also address the issue of "tradition" in contexts where nationalisms of various stripes are becoming stronger, even as the world becomes more interconnected through trade, immigration, and digital technology. Authors include Achebe, Cole, Dangarembga, Farah, Gordimer, Ngugi, Salih, Soyinka, Wicomb. Films by Blomkamp, Loreau, Sembéne. DPLL

ENGL 1710K. Literature and the Problem of Poverty. Explores poverty as a political and aesthetic problem for the American novelist. Examines the ways that writers have imagined the poor as dangerous others, agents of urban decay, bearers of folk culture, and engines of class revolt. Also considers these literary texts in relation to historical debates about economic inequality. Writers may include Crane, Faulkner, Wright, Steinbeck, and Hurston.

ENGL 1710L. Modernism and Everyday Life. We will examine modernist literature in the context of contemporary art, psychology, and theories of everyday life to ask how this period understood ordinary objects and events. Could they be the proper subject matter of art? In the right circumstances, might they actually be art? Writers may include Woolf, Joyce, Williams, Eliot, Stein, James, Freud, deCerteau. One previous literature class required.

ENGL 1710M. Nationalizing Narratives: Race, Nationalism, and the 20th-C. American Novel. An advanced survey that examines how 20th-century American novels construct the nation as “imagined community” and as “fictive ethnicity.” We focus on the central role that conceptions of race—as well as those of gender and sexuality—play in the novelistic visions of America projected by such authors as Ralph Ellison, William Faulkner, Jessica Hagedorn, and Chang-rae Lee. Not open to first-year students. DPLL WRIT

ENGL 1710N. Photography and the American Novel. Traces the impact made by the emerging medium of photography on American fiction from its very beginnings until the present. Our focus will be on the varying strategies adopted by novelists in response to the representational challenges posed by photography. Writers include Hawthorne, Nabokov, Faulkner, Hurston, Citron, Eugenides, and Barthes. Students should register for ENGL 1710N S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 1710O. The Dead and the Living. Readings in literature, theory, psychoanalysis, philosophy and law examine how the relation between the dead and the living shapes the concerns of modernist narrative and thought. Topics include “Living with the Dead,” “Haunting and Knowing,” “Writing Lives,” “Dreaming and Waking,” and “Picturing the Dead.” Readings include Joyce, Conrad, Woolf, Forster, and Greene as well as Freud, Lacan, Benjamin, and Barthes.

ENGL 1710P. The Literature and Culture of Black Power Reconsidered. This course reexamines the Black Power movement as a signal development in American literature and culture. We will read classics from the period with a view toward reassessing the nuances and complexities of their form and politics. At the same time, we will recover less familiar texts that complicate conventional understandings of what defines this movement. Authors include Malcolm X, Huey P. Newton, Angela Davis, Eldridge Cleaver, John Edgar Wideman, Ernest Gaines, and Amiri Baraka. DPLL

ENGL 1710S. Writing War. Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Barbusse, Brittain, Woolf, Rebecca West, Graham Greene, Pat Barker, Marc Bloch.

ENGL 1710W. Literary Impressionism. An examination of the role of "literary impressionism" in the transformation of the novel from realism to modernism. Writers studied include Henry James, Joseph Conrad, Stephen Crane, Ford Madox Ford, and Virginia Woolf. Close analysis of their narrative methods for dramatizing consciousness, with attention to the political and ethical implications of impressionism’s focus on the inner life.

ENGL 1710Y. American Literature and the Cold War. A study of American literature in the context of the broad intellectual culture—strategic, ideological, philosophical, aesthetic, and economic—engendered by the conflict between the United States and the Soviet Union from 1945 to 1991. We will assess the role of the bomb, McCarthyism, game theory, the military industrial complex, and strategic doctrines of containment and deterrence in the rise of postmodernism in American literature. Authors to be considered include Bellow, Highsmith, Millar, Ellison, McCarthy, Mailer, Pynchon, Wideman, Cooper, Delillo. Students should register for ENGL 1710Y S01 and may be assigned to conference sections by the instructor during the first week of class.

ENGL 1711A. American Poetry II: Modernism. Study of modernist American poetry. Readings include Pound, Eliot, Stevens, Williams, H.D., Moore, Hughes, and others.

ENGL 1711B. Modernist Fiction. Readings in British and American fiction and culture in the early 20th century, with particular attention to the relationships between modernist literary experiment and contemporary questions about empire, race, the changing status of women, and the grounds of literary authority. Writers may include Conrad, H.D., Joyce, Larsen, Lawrence, Rhyms, Toomer, Woolf. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class.

ENGL 1711C. Modernist Henry James. How consciousness knows the world was a topic of endless fascination to Henry James. By dramatizing the workings of consciousness, James transformed the novel and led the way to modernism. In addition to the aesthetic significance of his experiments with point of view, the course will also analyze the ethical consequences of his insistence on life’s ambiguities.

ENGL 1711E. African American Literature After 1975. This course examines major authors and currents in African American literary writing from 1975 through the present. The class positions these works in relation to historical developments such as the rise of black nationalism, the evolution of a distinctive black feminist tradition, and the growing social divisions within the African American community. Authors include Toni Morrison, Jamaica Kincaid, Colson Whitehead, and John Wideman. DPLL

ENGL 1760A. Joyce and Woolf. Intensive study of two of the most innovative and influential modern British novelists, with an emphasis on the relation between their formal experiments and their political engagements. Enrollment limited to 20.
ENGL 1760B. Contemporary African American Literature and the End(s) of Identity
African American writers and intellectuals have begun to question the wisdom of defining black identity in terms that overemphasize the shared racial and cultural heritage of black people. Course assesses a range of literary and scholarly writing that engages these concerns. Explores such topics as the growing class division among African Americans, the effects of integration, the decline of nationalism, and the visibility of sexual minorities. Likely authors include Johnson, Morrison, Wideman, Beatty, and Senna. Enrollment limited. DPLL

ENGL 1760C. Body and Event in Contemporary Fiction
Discusses the recent turn to the body and mortality in contemporary fiction, and considers the proposition that episodes of dismemberment in contemporary fiction stand in for the dismantlement of the literary text itself. Readings include Selby, Ellis, Cooper, Acker, Frame, Deleuze, Butler, Blanchot. Enrollment limited to seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

ENGL 1760D. Race and Detection: American Crime Narratives
We examine American crime narratives, focusing on their representations of race, class, gender, and sexuality. Writers studied may include James M. Cain, Raymond Chandler, William Faulkner, Sue Grafton, Sue Himes, Walter Mosley, and Mark Twain.

ENGL 1760E. Who's Afraid of Virginia Woolf?
We will read novels, essays, diaries, and letters by Woolf in order to ask how and why Virginia Woolf haunts our culture and to consider her status as a cultural icon. The seminar will explore her work in the contexts of history, modernism, and literary influences, and it will examine the dimensions of Woolf's afterlife—a posthumous dynamic that shapes issues in art, politics, and gender. Enrollment limited to 20 seniors and juniors.

ENGL 1760F. City, Culture, and Literature in the Early Twentieth Century
How did changes in the city shape early 20th-century literature? How does the literature of this period—whether avant-garde or documentary, progressive or conservative—shape the way we imagine the city? Topics may include urban spectacle, mobility and segregation, the neighborhood and the crowd. Authors include Dos Passos, Eliot, Larsen, Orwell, Woolf, Wright. Prerequisite: two previous literature courses. Priority to English and Urban Studies concentrators.

ENGL 1760G. American and British Poetry Since 1945

ENGL 1760H. "Terrible Beauty": Literature and the Terrorist Imaginary
Why does terrorism fascinate literary writers in the modern period? Is terrorism the figure of something that is unrepresentable in fiction, or is it a type of direct political action that fiction writers aspire to? Can literature's humanistic role of allaying terror survive an age of spectacular politics? How susceptible is terrorism to "aestheticization"? Texts will include works by Conrad, Flannery O'Connor, Naipaul, Dennis Cooper, Franz Fanon, and Ngugiwa Thiong'o. Enrollment limited to 20 seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

ENGL 1760J. Pynchon and His Precursors
A study not of how Thomas Pynchon's work has influenced American literature, but of how his novels have influenced the way we read writers who came before him. We will read V and Gravity's Rainbow, as well as work by Borges, Highsmith, Ellison, Nabokov, Fitzgerald, Kafka, and Rilke. Limited to 20 senior and junior concentrators in English and Comparative Literature. Others admitted by permission only.

ENGL 1760K. Reading New York
We will explore narratives of New York City, both fictional and nonfictional, from the early 20th century to the present. Topics to be addressed include immigration, segregation and mobility, cosmpolitanism and the neighborhood, celebrity and postmodernism. Authors may include John Dos Passos, Ann Petry, E.B. White, Jane Jacobs, Rem Koolhaas. Registration limited to English and Urban Studies concentrators. Students from other concentrations should attend class on the first day and will be admitted if space is available. Enrollment limited to 20. Not open to first-year students. Prerequisite: two previous literature classes.

ENGL 1760L. Bloomsbury and Modernism
This course will explore the contribution of the so-called "Bloomsbury Group" to the development of modernism in Britain. The focus will be on the central literary figures (Virginia Woolf, E. M. Forster, T. S. Eliot), but attention will also be paid to the visual arts (especially Roger Fry and Post-Impressionism) and social criticism (Lynton Strachey, Leonard Woolf, and John Maynard Keynes). A major question will be how the controversies swirling around Bloomsbury exemplify important debates about modernism. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval.

ENGL 1760N. Henry James
James is a pivotal figure in the history of the novel. His explorations of the workings of consciousness and conventions in representation transformed realism and announced the preoccupation of modernism with interpretation, signs, and narrative experimentation. An intensive study of his most important novels from Daisy Miller to The Golden Bowl.

ENGL 1760O. American Orientalism
Examines Orientalism as central motif and thematic concern for American writers from Emerson to DuBois to Kingstone. Issues to be addressed include the distinctions between U.S., European, and Afro-Orientalism; how intra-Asian differences (i.e., China-Japan, East/South Asia) shape conceptions of the Orient; how whiteness and blackness are constructed via a vis yellowness; the relationship between Orientalism and racism; how "nativist" Asian American literary texts, on the one hand, and diasporic texts, on the other, negotiate the legacy of Orientalism. Enrollment limited. DPLL

ENGL 1760P. "Extravagant" Texts: Experiments in Asian American Writing
We examine Asian American writings that are difficult, complex, and/or experimental: texts that are, in Maxine Hong Kingston's phrase, "extravagant." By looking at works that explicitly challenge the generic conventions with which much Asian American literature is usually linked—autobiography, the Bildungsroman, ethnography, realism, and sentimentality—we try to arrive at a more expansive sense of what the ends of Asian American cultural politics might be. Enrollment limited to 20. Not open to first-year students. DPLL WRIT

ENGL 1760Q. James Joyce and the Modern Novel
One measure of James Joyce's achievement as a writer is his influence (as an inspiration, an antagonist, or a competitor) on novelists who came after him. Our primary concern will be with Joyce's formal innovations: his most important novels from Ulysses to the End of the Tether. The course will explore the contribution of the so-called "Bloomsbury Group" to the development of modernism in Britain. The focus will be on the central literary figures (Virginia Woolf, E. M. Forster, T. S. Eliot), but attention will also be paid to the visual arts (especially Roger Fry and Post-Impressionism) and social criticism (Lynton Strachey, Leonard Woolf, and John Maynard Keynes). A major question will be how the controversies swirling around Bloomsbury exemplify important debates about modernism. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval.

ENGL 1760R. The Roaring Twenties
The 1920s crystallized much of what we consider modern in 20th-century U.S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to analyze the period's central features: the rise of mass culture and of public relations, changes in women's position, consumerism, car culture, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker. First-year students and students who have taken ENGL 0650K may not register for this course. Enrollment limited.
ENGL 1760S. Law and Literature: From Response to Responsibility. 
Explores modernism as it is shaped by the normative and ethical concerns of a rapidly changing world through literary works, legal writing, and legal opinions. Examines the conceptual, psychological and rhetorical connections between literature and law, and considers how both disciplines shape the imagination but also aim to elicit response and responsibility. Authors include Walter Benjamin, Joseph Conrad, Virginia Woolf, Rebecca West, Chinua Achebe; legal texts include Blackstone, Holmes, Bentham. Cover and a number of legal opinions. Enrollment limited to 20 juniors and seniors.

ENGL 1760T. The Texts of Africa. 
This seminar considers the various ways in which “Africa” has been depicted in fictional and non-fictional writing from the nineteenth-century on. We begin with classic travel writing by European missionaries (Park, Livingstone, Moffat), and their African and black diasporic counterparts (Crowther, Freeman, Sims, Soga). We then turn to twentieth-century literature and non-fiction (Abrahams, Conrad, Dinesen, Greene, Ndebele, Wright), closely following the rhetorical devices used to evoke the continent as geographical or subjective reality. We will pay particular attention to questions of history, linguistic representation, and the vagaries of intercultural encounter. DPLL

ENGL 1760U. American Modernism and its Aftermaths. 
An interdisciplinary study of the rise of modernist aesthetic theory in the United States, its dissemination across various aesthetic (poetry, fiction, various plastic arts) and intellectual (economics, sociology, political theory) fields, and its persistence in United States intellectual life in the various permutations of postmodernism that have succeeded it. Authors to be considered include: poets such as Eliot, Williams, Bishop, Brooks, and Ashbery; novelists such as Faulkner, Hurston, O’Connor, and Didion; aesthetic theorists such as Greenberg, Rosenberg, Fried, Baraka and Kraus; and social theorists such as von Neuman, Rawls, Cavell, Kuhn, Samuelsohn, Drucker, and Friedman. Enrollment limited to 20.

ENGL 1760V. Lying, Cheating, and Stealing. 
Explores literature's treatment of transgression in large and small, with particular attention to the way in which modernist narratives expose, obstruct, condone, or condemn acts of wrongdoing. What is the relationship between a lied or its retelling? Does writing right the story of a wrong? Readings from Rousseau, Graham Greene, Oscar Wilde, Lauren Slater, Nietzsche, Freud, as well as film, television, and select readings from law. Enrollment limited to 20 seniors and juniors.

Focuses on the complex relationship between the genre of the novel and nationalistic rhetoric in the modern U.S. Gives particular attention to how literary discourses of nationalism articulate with those of race, gender, and sexuality.

ENGL 1761C. Race, Writing, Manhood: Rhetorics of the “Authentic” in 20th-Cent African + Asian American Literature. 
Explores the interrelatedness of racial, sexual, and literary identity in works by U.S. black and Asian male writers. Particular interest given to how the issue of homosocial desire frames literary accounts of racial authenticity. Writers and theorists studied may include James Baldwin, Frank Chin, Ralph Ellison, Frantz Fanon, David Henry Hwang.

ENGL 1761L. Reading the Black Masses in Literature and Critical Practice. 
African American literary and critical practice in the twentieth century was definitively shaped by claims about the linkages between literature and mass politics. We will unpack the continuities and divides that constituted such assertions. Historical nodal points in our investigations will include racial uplift, the Harlem Renaissance, the Black Power Movement, and the post-identity debates.

ENGL 1761M. Asian American Travel Narratives.
Examines mobility and movement as key motifs in Asian American fiction. The course will focus on Asian American literary texts that are structured around travel, both in relation to the United States and to Asia. Our approach will draw from Americanist and Asian Americanist cultural theories about narratives of mobility and from postcolonial theories about travel writing. Enrollment limited. DPLL

ENGL 1761N. Natural and Supernatural: Issues in the Study of Science and Religion. 
Religion has been studied in a number of fields (anthropology, classics, history, philosophy, psychology, sociology) as a complex of human cultural phenomena to be examined and explained naturalistically or, as it is said, “scientifically.” The course focuses on a set of key classic and contemporary texts in this tradition and on the issues they raise for current understandings of science, religion and the relations—historical, intellectual, cultural and political—between them. Enrollment limited to 20 juniors, seniors, and graduate students.

ENGL 1761O. “Everything that must be destroyed”: American Modernism. 
This class will attempt to discover whether there is such a thing as American modernism, examining the connections between works and movements as different as Gertrude Stein’s highly experimental Three Lives, the Harlem Renaissance (Larsen, Hurston), American Gothic (Anderson, Faulkner), social realism (Wharton, Wright), the cosmopolitan fiction of Fitzgerald and Hemingway, and the proto-postmodern work of Barnes and West. Enrollment limited.

ENGL 1761P. Yeats, Pound, Eliot. 
Readings in the poetry and selected prose of Yeats, Pound, and Eliot. Enrollment limited to 20.

ENGL 1761Q. W. G. Sebald and Some Interlocutors. 
The works of W. G. Sebald have received a huge amount of critical attention since his death in 2001, particularly from critics interested in the question of the ethics of literature after Auschwitz. But what is Sebald’s literary heritage, and who are his interlocutors? What internal and external connections do his works establish? Besides Sebald’s works, readings will include Stendhal, Kafka, Walser, Borges, Bergson, Resnais, Lanzmann. Banner registrations after classes begin require instructor approval. Enrollment limited to 20. Not open to first-year students.

This course examines influential autobiographies and other non-fictional literary works about the meaning of race in America across the 20th century. Writers we examine may include W.E.B. DuBois, Sui Sin Far, Maxine Hong Kingston, N. Scott Momaday, Richard Rodriguez, Maxine Hong Kingston, Richard Rodriguez, and Malcolm X. Enrollment limited to 20 juniors and seniors. DPLL WRIT

ENGL 1761S. The Fifties in Color: Race, Empire, and the U.S. Cold War Culture.
In this seminar, we examine a range of cultural texts of the 1950s that provide some productive points of entry into the study of U.S. culture in the early part of the Cold War. We give particular attention to issues of race and ethnicity as they were shaped both by domestic and foreign policy concerns. Enrollment limited to 20. DPLL

ENGL 1761T. Conrad and Naipaul: The Supremacy of the Visible?.
The reception of Conrad's works turns on a critical quandary: are his commitments primarily sensory, celebratory and imperialist, or conceptual, subdued and self-critical? This course will examine Conrad's works in detail, and the critical and literary responses to them: most notably, the work of his most direct successor, the British-Caribbean novelist V. S. Naipaul. Other readings include Said, Achebe, Jameson, Badiou, Rancière, Deleuze. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval.

ENGL 1761V. The Korean War in Color. 
We examine US and South Korean representations of the Korean War. We look at how this event was depicted in US films of the 1950s with a focus on how it occasioned a transformation of American understandings of race, both domestically and transnationally. We then look at how this event has been memorialized by contemporary American authors as well as in South Korean literature and film. Authors we read include: Susan Choi, Ha Jin, Chang-rae Lee, Toni Morrison, Jayne Anne Phillips and Hwang Sok-Yong. Enrollment limited to 20. Not open to first-year students. DPLL WRIT
ENGL 1761W. Modern South Asia: Literature and Theory. This seminar provides an overview of 20th and 21st century writing from and about South Asia. It will serve, in addition, as an introduction to postcolonial studies. Theoretical readings will focus on issues of diaspora; transnational cultural circulation; and subaltern historiography. Fiction will be primarily Anglophone (Anand, Du Bois, Forster, Naipaul, Rushdie, etc.), with some vernacular texts in translation (Chughtai, Limbare, Premchand, Tagore). Enrollment limited to 20. DPLL

ENGL 1761Y. Issues in World Literature. What is world literature? How does it relate to fields like comparative literature and postcolonial studies? We will read fiction and drama usually featured in this canon, including works by Achebe, Coetzee, Homer, Kafka, Rushdie, Shikibu, and Walcott. We will also attend to the critical paradigms that constitute the field, from Goethe's Weltliteratur to more recent theorizations by Casanova, Damrosch, Deleuze, Moretti, Spivak, etc. Enrollment limited to 20. Not open to first-year students. DPLL

ENGL 1762A. Perverse Cinema. A seminar on movies that pursue and spectacularize the perverse, as well as on how viewing movies is itself a perverse pleasure. We will study film genres that traffic in what's sensational, excessive, uncanny, and transgressive, such as the detective film, thriller, melodrama, sex film, horror, and sci-fi. Special emphasis on the movies of Hitchcock, Kubrick, Lynch, and Cronenberg. Enrollment limited to 20 concentrators in English, Comparative Literature, MCM, Gender and Sexuality Studies, and Theatre and Performance Studies. Not open to first year students.

ENGL 1762B. The Ekphrastic Mode in Contemporary Literature. Ekphrasis—the extended description of a visual work of art in a work of literature—is as old as Homer and as modern as McEwan; however, in contemporary literary criticism the concept has been eclipsed by terms such as “self-reflexivity” and “metafiction.” This course proposes a rediscovery of ekphrasis as a key feature of contemporary works of literature and film. Includes texts by Sebald, Alan Bennett, Godard, Starmore, Panahi, McEwan. Enrollment limited to 20. Not open to first year students.

ENGL 1762C. Image, Music, Text. This course examines a number of novels and short stories alongside their various cinematic, theatrical, or musical adaptations in order to ask what a medium is and what distinctive formal features might define literature, cinema, theater, and music. Writers will include Melville, Conrad, Maupassant, Mann, and Cortazar; filmmakers will include Hitchcock, Antonioni, Godard, Visconti, and Coppola; critics will include Barthes, Deleuze, and Ranciere. Limited to 20 junior and senior concentrators in English, Comparative Literature, MCM, Hispanic Studies, Italian Studies, French Studies, German Studies, Literary Arts.

ENGL 1780. Undergraduate Independent Study in Modern and Contemporary Literatures. Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required.

ENGL 1900A. “Literature” and the Ideology of the Aesthetic. Theoretical and historical analysis of the idea of “literature” as writing that has the status of art, in relation to the emergence and elaboration of discourses of the “aesthetic.” Readings in 18th- and 19th-century German and British sources (Kant, Schiller, Hegel, Nietzsche; Coleridge, Shelley, Arnold, Wilde) and in 20th-century literary and aesthetic theory (Benjamin, Adorno, Barthes, Foucault, Derrida, Williams, Eagleton). Enrollment limited to 20. Priority given to English concentrators. All other students must obtain instructor's permission.

ENGL 1900D. Literature and Politics. Literature as a changing historical formation that often represents and is always shaped by the practices of organizing, asserting, and controlling power in society. Sustained focus on writings by Raymond Williams, Leon Trotsky, Michel Foucault, Edward Said, Gayatri Spivak, and Terry Eagleton, and on literary texts read from the perspectives of these six theorists (possibly Shakespeare, Milton, Marvell, Swift, Dickens, Gaskell, the Brontës, Victor Serge, Anna Akhmatova). Enrollment limited to 20. WRIT

ENGL 1900E. Aesthetics and Politics. Considers the shifting relationship between art and politics beginning with the formation of aesthetics in the Enlightenment and continuing through such 20th-century historical moments as Nazism, modernism, impressionism, socialist realism, postmodernism, and such thinkers as Kant, Hegel, Marx, Adorno, Lyotard, Cixous, Deleuze.

ENGL 1900F. Interpretation. This course will introduce students to the central issues in the theory of interpretation and their implications for critical practice. Topics will include the causes and consequences of interpretive conflict, the availability of tests for validity, the roles of the author and the reader, and the historical, social, and political dimensions of understanding. Readings will include major theoretical statements as well as critical essays and background materials related to three controversial novels.

ENGL 1900I. Critical Methodologies: Contemporary Literary Theory. A survey of theories of literature from the early 20th century to the present, with particular attention to relations between “literary theory” and the broader phenomena of cultural studies and Critical Theory writ large. We will examine the New Critics; structuralism, poststructuralism and new historicism; cultural theory, including psychoanalysis, Marxism, and aesthetic theory. Topics will include literariness and textuality, the reader and subjectivity, narrative and mimesis, and the reemergence of form in contemporary literary studies. Enrollment limited to 20. Not open to first-year or graduate students.

ENGL 1900L. The Problem of American Literature. Considers questions such as: what are the distinctive qualities (if any) of American literature, and how do the various writers from diverse cultural settings fit into a single literary tradition called “American” (or do they fit in)? In order to examine the assumptions and implications of studying literature as a national phenomenon, focuses reading on various critical and theoretical texts.

ENGL 1900M. Twentieth-Century Reconceptions of Knowledge and Science. Significant critiques of classic and prevailing (rationalist, realist, positivist) ideas of scientific truth, method, objectivity, and progress and the development of alternative (constructivist, pragmatist, historicist, sociological) accounts; the dynamics of knowledge; the relations between scientific and other cultural practices. Readings include works by Fleck, Popper, Kuhn, Foucault, Rorty, and Latour. Prerequisite: UC 49 (An Introduction to Science Studies) or college-level work in critical theory, science, or philosophy.

ENGL 1900Q. Women In/And the Novel. An advanced survey of 20th-century feminist literary theory with an emphasis on U.S., British, and French traditions. Topics include canon formation, “resisting readers,” and the category of “women’s writing,” as well as the relation of feminist criticism to problematic such as critical race theory, poststructuralism, psychoanalysis, and postcolonialism.

ENGL 1900P. History of Criticism from Plato to Postmodernism. A survey of the major theorists of literature in the western tradition, from the Greeks to the contemporary period. Recurrent issues will include the definition of literary value, the distinctiveness of the aesthetic experience, and the moral and social uses of literature. Enrollment limited. Banner registrations after classes begin require instructor approval.

ENGL 1900Q. Women In/And the Novel. An introduction to the novel through feminist theory, considering social and historical reasons why women read, wrote, and figured in novels, from the 18th century to the 20th. Novels by Defoe, Austen, George Eliot, Rhy's Woff; readings in feminist theory and criticism. Priority will be given to concentrators in English and Gender Studies. Others will be admitted only with permission of the instructor.

ENGL 1900R. Queer Relations: Aesthetics and Sexuality. A study of the relationship between aesthetic thought and sexuality in a variety of literary and cinematic works. We will supplement our readings with ventures into queer theory, emphasizing how art is related to identity, community, race, gender, and ethics. Authors include Wilde, Pater, James, Winterson, Cole, Guibert, Foucault, Bersani, Edelman. Films by Julien and Jarman. DPLL
ENGL 1900T. The Postcolonial and the Postmodern.
Explores the contexts and conceptual implications of theories of postmodernism and postcolonialism. Particular attention to intersections and disjunctions between both concepts as attempts to grapple with the challenges of modernity from the vantage point of the late-20th century. Course will end with two novels that address related issues with the tools of fictional narrative: Coetzee's *Foe* and Rushdie's *Midnight's Children*. Readings include: Butler, Hall, Jameson, Laclass, Lycotard, Spivak. Not open to first-year students. Enrollment limited to 20.

ENGL 1900U. Word and Image.
How do words and images represent? This course will examine major statements about the relation between verbal and visual representation from Lessing's classic study *Laocoon* to contemporary theories of the semiotic and social construction of images. Theoretical readings will be accompanied by analyses of examples from literature and the visual arts, ranging from painting to film and graphic novels. Not open to first-year students. Banner registration after classes begin requires instructor approval.

ENGL 1900V. Camera Works: The Theory and Fiction of Photography.

ENGL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.
How do you read a medieval manuscript? This course teaches hands-on methodologies for deciphering the material text, including paleography (history of scripts) and codicology (archeology of the book); contemporary models of interpreting scribal texts, including editorial theory and analysis of readers' reception; and medieval concepts of textuality and interpretation, including medieval theories of authorship and the arts of memory. Prior course work in Middle English or Latin or other medieval language recommended. Not open to first-year students. Enrollment limited to 20. Instructor permission required.

ENGL 1900Z. Neuroaesthetics and Reading.
Analysis of the theories of art, reading, and aesthetic experience proposed by neuroscience and cognitive science in light of traditional aesthetics and contemporary literary theory. Enrollment limited to 20. Prerequisite: At least one course on neuroscience or cognitive science and one 1000-level literature course. Instructor permission required.

ENGL 1901B. Politics and the Novel.
This course will explore how various realist and modernist novels represent political life, both in its practical dimensions and as forms of consciousness (ideologies, world views, attitudes). We will also explore theoretical and critical writings on the topic of literature and politics. Authors will include Elizabeth Gaskell, E.M. Forster, Lionel Trilling, Ralph Ellison, Doris Lessing, and Viet Thanh Nguyen. Enrollment limited to 20.

ENGL 1901E. Reading Literature in a Digital World.
We will explore the implications of using digital technologies to study literature. How does our understanding of literature and literary study change—if it does—in light of recently developed digital methods for studying such works? How do such methods compare with traditional ways of studying literature? How might literary studies be reconceived in relation to new media studies? Enrollment limited to 20.

ENGL 1901F. Art of Criticism.
This course explores the art of literary criticism through analysis of individual critics as well as larger schools of criticism. Focusing on the twentieth century, we will read works by those affiliated with high theory as well as those who stood outside that influential development. The goal will be to understand literary criticism as a form of thinking, and an art, in its own right, one with philosophical, social, and literary dimensions. Authors include: Oscar Wilde, Kenneth Burke, Mary McCarthy, Lionel Trilling, Raymond Williams, Paul de Man, Eve Sedgwick, D. A. Miller, John Guillery. Enrollment limited to 20.

ENGL 1902A. Dreamworlds: Utopia from Plato to the Present.
Can acts of writing change the world? This course looks at a number of famous utopias and dystopias from classical time to the modern period and analyzes how the genre's literary experiments transform reading into a political act. Works by Plato, More, Montaigne, Shakespeare, Swift, H.G. Wells, and Le Guin. Films will include *Blade Runner* and *Pleasantville*.

ENGL 1902B. Great Books and Good Movies.
Since the first silent pictures, the film industry has turned to "great books." This course uses films based on "great books" to examine differences between the genres. Frequent screenings; reading and screen journals; critical essays and screenplays. Films/texts include *Sense and Sensibility*, *Great Expectations*, *Beloved*, and *The English Patient*.

ENGL 1902E. Lyric Language: Renaissance Forms and Modern Poetry.
Tracing poetic forms from Renaissance to modern—stubby models like the sonnet (Shakespeare/Barryman), the ode (Jonson/Creely), and the sestina (Sidney/Bishop); soft forms like blank/free verse (Milton/Wordsworth/Eliot); generic containers like elegy, epigram, and satire (Herrick/Donne/Keats/Auden); low and nonsense verse (Skelton/Carroll/hip-hop); and the functions of repeatable forms like line and stanza (Spenser/Tennyson/Dr. Sues/Heijjiaen).

ENGL 1950A. Form and Feeling in Renaissance Poetry.
*Pending Approval.* Renaissance poets laid claim to the ethical power of poetry to move people through imagination. How does formal imitation and innovation create fields of feeling in the poetry of Spenser, Sidney, Shakespeare, Donne, Jonson, and Milton? Enrollment limited to 20 seniors.

ENGL 1950B. Literature and the Ideology of the Aesthetic.
*Pending Approval.* Theoretical and historical exploration of the idea of literature understood as writing that has the status of art—and of the relation of this idea to the emergence and elaboration of discourses of the aesthetic. First six weeks: decisive eighteenth- and nineteenth-century developments in the meaning of literature as it relates to the aesthetic. Second six weeks: recent positions (especially poststructuralist and Marxist) that figure prominently in current debates. Enrollment limited to 20 seniors.

ENGL 1950G. Reading Narrative Theory.
Narrative is a powerful category of analysis spanning genres, historical periods, media forms, and the distinction between the "fictional" and the "real." This course examines major narrative theorists of the twentieth and twenty-first centuries. We will focus on literary examples, such as theories of the folk tale and novel, and scholarship that interrogates the work of narrative in historiography, in cinema and television, and in extra-literary contexts (in the struggle of political campaigners to "control the narrative" or debates on narrative in gaming, medical research, law, and theory itself). Limited to 20 senior English concentrators. Others admitted by instructor permission only.

ENGL 1950H. The Recent Novel and its Cultural Rivals.
A careful consideration of several major late twentieth- and early twenty-first century anglophone novels in terms of their relationship to rival aesthetic forms and media—film, television, radio, video games, and the like. Writers to be considered included: Morrison, Lee, Rushdie, Smith, Didion, Díaz, Pynchon, and Egan. Enrollment limited to 20 senior English concentrators. Others admitted by instructor permission only.

ENGL 1990. Senior Honors Thesis in Nonfiction Writing.
*Independent writing project under the direction of a faculty member.* Permission should be obtained from the Honors Director for Nonfiction Writing. Enrollment limited to English concentrators whose application to the Honors in Nonfiction Writing program have been accepted.

ENGL 1991. Senior Honors Seminar in English.
Weekly seminar led by the Advisor of Honors in English. Introduces students to sustained literary-critical research and writing skills necessary to successful completion of the senior thesis. Particular attention to efficient ways of developing literary-critical projects, as well as evaluating, incorporating, and documenting secondary sources. Enrollment limited to English concentrators whose applications to the Honors in English program have been accepted. Permission should be obtained from the Honors Advisor in English. S/NC
Independent research and writing under the direction of a faculty member. Permission should be obtained from the Honors Advisor in English. Open to senior English concentrators pursuing Honors in English. Instructor permission required.

ENGL 1993. Senior Honors Seminar in Nonfiction Writing.
This course is designed for students accepted into the Nonfiction Honors Program. It will be run in workshop format, and will focus on research skills and generative and developmental writing strategies for students embarking on their thesis projects. Weekly assignments will be directed toward helping students work through various stages in their writing processes. Students will be expected to respond thoughtfully and constructively in peer reviewing one another's work. Open to seniors who have been admitted to the Honors Program in Nonfiction Writing. Instructor permission required.

Independent research and writing under the direction of the student's Nonfiction Writing honors supervisor. Permission should be obtained from the Honors Advisor for Nonfiction Writing. Open to senior English concentrators pursuing Honors in Nonfiction Writing. Instructor permission required.

ENGL 2210. Proseminar.
This seminar, required for first-year graduate students in English, considers the state and stakes of literary studies today. The course aims to familiarize students with contemporary critical debates and stances in the wider discipline, and to engage with current methodologies, theories, and analytical tensions. We also address issues of professionalization as they relate to the first years of graduate work. Enrollment limited to 10. S/NC.

ENGL 2360A. Renaissance Drama.
This course explores Early Modern drama: its styles of representation, material conditions, and political engagements, in Marlowe, Jonson, Middleton, Webster, Ford, Beaumont and Fletcher, and others. Drawing on current scholarship, it posits the stage as the site of contests over national identity, royal power, gender ideology, social mobility, nascent capitalism, religious and ethnic differences. Enrollment limited to 15 graduate students. Undergraduate English concentrators may request permission of the instructor.

ENGL 2360B. Before Holinshed: The English Brut Chronicle Tradition.
Holinshed's 16th-century history drew from 400 years of manuscript chronicles, most in verse, which founded the "modern" history of England on a Trojan/Celtic ancient Britain. We will read the medieval versions of these historical narratives from Geoffrey of Monmouth, Wace, and Layamon to the popular 15th-century Middle English prose Brut. Critical engagements with manuscript/print cultures and the "Brut" narrative as a vocabulary for nationalism. Enrollment limited to 15.

ENGL 2360C. Beowulf.
This course will consist of a careful reading and analysis of Beowulf in its original language. In addition to developing language competence, we will also discuss the poem through comparison to other Old English poems and Scandinavian analogues. Themes will include the manuscript context, heroism, gender, sacrifice, lamentation and elegy, the monstrous, material culture, and contemporary theoretical approaches to the poem. Prerequisite: 2000-level Introduction to Old English or its equivalent. Enrollment limited to 15.

ENGL 2360D. Early Modern Drama.
An intensive introduction, for specialists and others, to the great classics and some less-known gems of a stellar period in English drama. Plays by Marlowe, Middleton, Webster, Jonson, and Ford, among others. Topics: the popular theatre and its audience; urban culture; English nationhood; boy actors and the representation of gender and sexuality; play texts in print culture. Enrollment limited to 15.

ENGL 2360F. Introduction to Medieval Studies.
Equips students with critical, linguistic, and historical knowledge to interpret Middle English texts (1066-1500). Primary texts by Chaucer and others, to be read in contexts of current critical debates (on topics including textuality, sexuality, and political formations) and medieval conceptual systems (including dream theory, alchemy, arts of memory). Priority to graduate students; no prior Middle English required. Enrollment limited to 15.

ENGL 2360G. Medieval Manuscript Studies: Paleography and Interpretation.
How to read and understand a medieval manuscript text. Methodologies include paleography, codicology, editorial theory. Hands-on analysis and interpretation of specific Middle English texts in their manuscript medium (in microfilm, facsimile, digital representation, and when accessible, actual manuscripts). For students already acquainted with Old English and/or Middle English; Latin helpful. Textual projects in other medieval languages possible with instructor's consent. Enrollment limited to 15.

ENGL 2360H. Race and Place in Renaissance Literature.
Reads early modern English drama, poetry, and prose depicting the migration of groups to foreign places (England, the Indies, the Americas) to consider how such writing defines the connection between space and identity. We will consider how this literature values environment as against blood, soil against seed, as determinants of identity capable of marking people as "strange," "alien," or "natural." Authors will include Marlowe, Shakespeare, Fletcher, Massinger, Drayton, Jonson, and Bacon. Enrollment limited to 15 graduate students. All others will be admitted only with permission of the instructor.

ENGL 2360I. Renaissance Embodiments.
Considers Renaissance representations of self in pre-modern terms that is, ineparable from the physical conditions of climate and region. How did early modern culture draw the line between culture and nature? Where do these theories connect with or depart from modern paradigms of self in such authors as Elyot, Shakespeare, Calvin, Luther, Burton, Donne, Montaigne, Jonson, and Browne? Enrollment limited to 15.

ENGL 2360J. Renaissance Embodiments.
Consider Renaissance representations of self in pre-modern terms that is, inseparable from the physical conditions of climate and region. How did early modern culture draw the line between culture and nature? Where do these theories connect with or depart from modern paradigms of self in such authors as Elyot, Shakespeare, Calvin, Luther, Burton, Donne, Montaigne, Jonson, and Browne? Enrollment limited to 15.

ENGL 2360K. The Renaissance and Modernity.
Modernism restages 17th-century cultural and political revolution and restoration. An examination of the problem of style and modernity, looking at practices in poetic and prose style and at the emergence of the term "modernity" at the moment of high modernism and after. Enrollment limited to 15.

ENGL 2360L. The Pearl Manuscript in Context.
Close translation of the Middle English alliterative poems in British Library Manuscript Cotton Nero A.x, Pearl, Cleanness, Patience, and Sir Gawain and the Green Knight, with attention to their medieval theological, generic, and codicological contexts. Enrollment limited to 15.

ENGL 2360M. Irony and Satire.
Works of irony and satire (from the Civil Wars to the death of Swift) allow an investigation of current issues in the study of Civil War, Restoration, and Early 18th-C. texts, including revisionist history, the public sphere, Anglo-Irish relations, print culture, mercantilism, and gender construction. Enrollment limited to 15.

ENGL 2360N. Thinking with Romance in the Renaissance.
Modernity defines romance as escapist, a mode that flies from the "real." Yet Renaissance writers placed it at the center of debates about politics, ethics, and knowledge. Tracking its generic fingerprint in Spenser's romance-epic, we will consider its adaptation for the stage as tragicomedy and its relation to epistemological shifts dividing science from fiction, knowledge from pleasure. Authors include Ralegh, Spenser, Shakespeare, Fletcher, Massinger, Bacon, Cavendish. Open to graduate students only.

ENGL 2360Q. Manuscript, Image, and the Middle English Text.
This seminar will engage with the interpretive issues raised by considering manuscript images in relation to manuscript text. Selected Middle English texts will include Pearl, works by Chaucer, and the popular Middle English prose Brut, in the context of twelve historiated manuscripts of the fourteenth and fifteenth centuries. Enrollment limited to 15 graduate students.
ENGL 2360R. Civil Wars, Restoration, and Early Georgian Literature. The seminar will consider major works from the English Civil Wars to the first years of the eighteenth-century, with attention to cultural and theoretical contexts for understanding important developments such as print culture, war, nation-formation, the marketplace, and public/private spheres. Writers will include Milton, Rochester, Behn, Restoration playwrights, Dryden, Swift, and others. Additional readings will include selections from Adorno, Pocock, Anderson, Zizek, Brown, Johns, and others. Enrollment limited to 15 graduate students.

ENGL 2360S. Alternative Miltons. This seminar undertakes a close reading of Milton's monumentally significant epic "Paradise Lost." We will also consider the current state of Milton criticism. What's new in Milton criticism? What approaches have been holding fort? Has Milton criticism been slower to take to critical and theoretical innovation than Shakespeare criticism? If so, why, and what might we do about it? On that account, the seminar will engage a range of newer approaches—disability studies, queer theory, trauma theory, eco-criticism, animal studies, technoculture studies, and popular culture studies—to consider what they have to offer by way of new perspectives on Milton. Enrollment limited to 15 graduate students.

ENGL 2361A. Is There Renaissance Lyric?. Lyric poetry, like the renaissance, is a repeat offender: I had to do it. By examining inaugural forms—Sappho, Petrarch, Skelton, Spenser, Shakespeare, Donne, Jonson—alongside romantic and post/modernist understandings of lyric, we will display the pleasures of their differences, alternative theories of form, and work by W.R. Johnson, B. Johnson, Culler, R. Greene, Jackson, Prins, Jarvis, Scarry, Stewart. Enrollment limited to 15.

ENGL 2380. Graduate Independent Study in Medieval and Early Modern Literatures. Section numbers vary by instructor. May be repeated for credit. Instructor's permission required.

ENGL 2450. Exchange Scholar Program.

ENGL 2560A. American Exotics. From the beginning of colonization all the way up to the American Revolution, America is consistently figured as a remote and alien place. We will explore the figurative transformation of "America" by examining the use of images of the "remote" and "exotic" in British American colonial writing, including poems, plays, maps, travel narratives and natural histories. Enrollment limited to 15.

ENGL 2560C. Early American Studies. A critical introduction for graduate students to the scholarly field of early American studies, from the colonial era to the late 19th century. Enrollment limited to 15.

ENGL 2560E. Liberalism. An interdisciplinary approach to American culture and literary history through the lens of liberal ideologies. Readings include Franklin, Thoreau, sentimental novel, and Ellison's Invisible Man. Enrollment limited to 15 graduate students. Exceptions with permission by instructor.

ENGL 2560F. Realism. Begins with European theories of realism, including Lukacs, Watt, Jameson, and others, who define realism by linking it to some aspect of modernization. Moves to theories that expose the limits of classical realism in the name of someone as some aspect of history it systematically subordinates or excludes, e.g., women, colonial subjects, minority cultures. Enrollment limited to 15.

ENGL 2560G. Romantic Orientalism. Representations of the "Orient" in British and transatlantic literary culture during the "Romantic" period (c. 1770-c. 1830). Connections between cultural representation and both assertions of and challenges to British colonial and imperial power. Theorized by historical and political analysis by Said, Barrell, and others; poetry by Coleridge, Southey, Byron, P.B.Sherley; prose by Sydney Owenson, Charlotte Dacre, Thomas DeQuincey. Enrollment limited to 15.

ENGL 2560H. Romanticism and the Ideology of the Aesthetic. Historical development of discourses of the "aesthetic" as they relate to the problem of "romanticism" as the name of a distinctive era in British and European literature and culture. Ideas about the autonomy of art in the period of the French and the Industrial Revolutions. Readings in Baumgarten, Kant, and Hegel; in Coleridge, W. Wordsworth, P. B. Shelley, and Keats. Enrollment limited to 15.

ENGL 2560K. The Transatlantic Enlightenment. A graduate seminar in literatures and cultures of the long 18th century in transatlantic context. Emphasis on print culture, the Black Atlantic, colonialism and slavery, as well as the American Revolution. Enrollment limited to 15.

ENGL 2560L. The Victorian Novel. An intensive seminar on the Victorian novel. The aim will be historically contextualized, theoretically informed interpretations of some leading examples of this complex literary form. Will focus on the role of the (British) novel, as distinct from the (American) short story, in rise of mass culture, and on recent formalist, stylistic, and historical approaches to the Victorian novel as a literary form. Enrollment limited to 15.

ENGL 2560N. American Literature and the Corporation. An examination of 19th-century American literature in the context of the rapid growth of corporate forms in American economic, political, and social life from the mid-1830s through the turn of the century. How does literature participate in the debate this process of incorporation occasioned, and in what ways was it shaped by the process of incorporation occasioned, and in what ways was it shaped by the process? Readings include Hawthorne, Melville, Harper, Grant, Alcott, Crane, and Chesnutt. Enrollment limited to 15.

ENGL 2560Q. Victorian Fictions of Consciousness. Victorian novels, Bronte through James, with an emphasis on the ways in which novels engage 19th-century theories of mind and psychology, looking at such central concepts as memory, will, sensation, and perception. Examines the importance of form and the subgenres of Victorian fiction (Bildungsroman, sensation novel, multiplot novel) in the construction of concepts of selfhood and consciousness. Attention also to the place of consciousness in Victorian and 20th-century theories of the novel. This course will also serve as an introduction to working on topics in science and literature. Enrollment limited to 15.

ENGL 2560R. Romantic Dispossession: Subjectivity and Agency. This course examines the diverse arguments made by writers of the Romantic era concerning nonidentity, and focuses on the kinds of ethical, political, and aesthetic considerations that arise once identity is forfeited. Reading the place of consciousness in Victorian and 20th-century theories of the novel. This course will also serve as an introduction to working on topics in science and literature. Enrollment limited to 15.

ENGL 2560T. The Realist Imagination. A study of American literary realism. We will situate realism in the context of the realist turn in American artistic, political, legal, and economic enterprise from the Civil War to World War II, and measure the realist novel's relations to alternative aesthetic ideologies such as transcendentalism, regionalism, naturalism, and modernism. Authors to be considered include Emerson, DeForest, Grant, Twain, Cable, Chesnutt, Dreiser, Wharton, Cather, Anderson, Dos Passos, Faulkner, and Hurston. Enrollment limited to 15 graduate students. Undergraduate seniors will be admitted only with the permission of the instructor.

ENGL 2560U. The Transatlantic Enlightenment. A graduate seminar in literatures and cultures of the long 18th century in transatlantic context. Emphasis on print culture, the Black Atlantic, colonialism and slavery, as well as the American Revolution. Enrollment limited to 15.

ENGL 2560V. Transatlantic Studies. This course offers a theoretical and historical examination of "transatlantic" models of literary analysis as an alternative to traditionally national ones. It will look at a recent criticism theorizing the field, including both literary and historical scholarship. Primary readings will be from Rowson, Equiano, Franklin, Emerson, and Twain, among others. Enrollment limited to 15.
ENGL 2760F. Metaphoric Expression: Emerson, James, Stein. According to William Carlos Williams, metaphoric vision continually blinds Americans to the actual conditions of their world. In an attempt to answer this charge, we will read these three densely metaphorical writers against their varied historical backgrounds, hoping in the process to better understand the role played by figurative language in the shaping of American society, culture, and identity. Enrollment limited to 15.

ENGL 2760G. Modernist Fiction and Theories of Modernism. Examines a range of modernist fiction—including work by Conrad, Dos Passos, H.D., Joyce, Larson, Rhodes, Toomer, Woolf—alongside selected theories of modernism. Considers approaches ranging from theories of reification and the aesthetic to more recent considerations of modernism's relation to gender, nation, race, empire, and professionalism. Enrollment limited to 15 graduate students.

ENGL 2760H. Nationalizing Narratives: Studies in the Twentieth-Century U.S. Novel. In this seminar, we will examine a number of important 20th-century U.S. novels for the ways in which they conjure the nation both as “imagined community” and “fictive ethnicity.” Particular focus will be given to how the category of national identity becomes intertwined issues of race, gender, sexuality, and region as well as with ideologies of the aesthetic. Enrollment limited to 15.

ENGL 2760I. Possession and Dispossession in the Modern Novel. Examines modernist sentimentality as it is figured in notions of property. By exploring the legal and literary relationship between owning and being, we will consider how writers such as Forster, Woolf, Joyce, and Lawrence use property to conceive of human relationships—and by extension, social justice—in dramatically new ways. Enrollment limited to 15.

ENGL 2760K. Postcolonial Theory and Africanist Discourse. Explores central questions in current Anglo-American postcolonial theory, and examines how related questions emerge with specific inflections in writings by Africanist philosophers, historians, and creative writers. Issues included: variety of connotations of the idea of "Africa"; ideology and subjectivity; constructivism and essentialism; nationalism and globalization; aesthetics and politics. Texts by Amilcar Cabral, Frantz Fanon, Stuart Hall, Paulin Hountondji, Fredric Jameson, Ernesto Laclau, Ngugi wa Thiong'o, Wolof Soyinka, Gayatri Spivak, Yvonne Vera. Enrollment limited to 15 graduate students. Undergraduate seniors may be admitted with instructor's permission.

ENGL 2760L. Literature and Photography. Since the invention of photography in 1839, novelists have often claimed the camera as an important model for their work. We will endeavor to investigate this claim, asking in the process what the links between modernism and the visual arts have to tell us about the nature of fictional representation. Readings include a number of theoretical discussions of photography. Enrollment limited to 15 graduate students.

ENGL 2760M. Postcoloniality and Globalism. Seminar addresses intersections and disjunctions between two currents in contemporary literary and cultural criticism: "postcolonial theory" and "world literature theory." We read "theory" alongside imaginative literature by writers and critics associated with concepts of postcoloniality, globalization, and diaspora. Themes include: race, identity and subject-position, and the problem of "literature" itself, understood as mode of thought and act of will. Readings will include: Césaire, Damrosch, Fanon, Hall, Jameson, Naipaul, Said, Soyinka, Spivak, Walton, Wright, Wynter. Enrollment limited to 15.

ENGL 2760N. The Politics of Modernism. An exploration of the controversies that have surrounded the political implications of modernist form. Topics will include the Brecht-Lukács debate, surrealism and the politics of the avant-garde, the so-called "great divide" between innovative and popular art, and the relation of modernism to postmodernism. In addition to examining important theoretical statements, we will test their arguments against selected literary examples. Enrollment limited to 15.

ENGL 2760O. Shame, Colonialism, Ethics. This course constructs a dialogue between debates on post-Holocaust aesthetics ("Is poetry possible after Auschwitz?") and the central questions of postcolonial theory ("Can the Subaltern Speak?") and considers the ethical and aesthetic salience of shame. It is organized around three writers whose work suggests that the novel form itself might require decolonization: Naipaul, Coetzee and Cary Phillipps. Enrollment limited to 15.

ENGL 2760P. The Fifties in Color: Race, Empire, and U.S. Cold War Culture. Examines U.S. cultural texts of the 50's in relation to both domestic race politics and foreign policy concerns. Explores issues of assimilation, conflict, containment, development, and integration in a transnational as well as a national framework. Writers we study may include Ralph Ellison, Jack Kerouac, Philip Roth, John Okada and Jade Snow Wong. This course is limited to 15 graduate students.

ENGL 2760Q. Ways of Seeing: Modern American Fiction and Photography. Read a number of important modernist novels alongside the work of early 20th-century American photographers, focusing on what this fiction's engagement with photography has to teach us about the reproduction and circulation of American identity and history. Writers include James, Dos Passos, Hurston, Agee, Welty, and Ellison; photographers include Steiglitz, Strand, and Weston. Enrollment limited to 15.

ENGL 2760R. Realism and the American Novel. An inquiry into the form, purpose, longevity, and afterlife of American realism. In what way did it differ from its British counterpart? In what ways was it different from naturalism, modernism, and romanticism? What was its aesthetic and political legacy? How has it been read by critics? Writers include Melville, Dreiser, Norris, James, Chestnutt, Wharton, Jewett, and Wright. Enrollment limited to 15.

ENGL 2760T. Postmodernism and Literary Form. Intended for graduate students interested in the relationship between socio-historical conditions and literary form, and for those interested in thinking beyond a narrowly periodized notion of the postmodern. Beginning with Lukács's The Theory of the Novel, considers the problematic of literary representation as it emerges in the modern age. Readings include Beckett, Nabokov, Burroughs, Amis, Rushdie, McEwan, Lyotard, and Moretti. Enrollment limited to 15.

ENGL 2760U. Reading the Black Masses in Literature and Critical Practice. For more than a century, African American literature and criticism have been definitively shaped by claims about the linked fate of the black masses and the world of letters. These contested assertions provide occasions for rethinking the traditional ends of black literary production. Class conflict, the waning of black nationalism, and diasporic identity politics, are among the topics examined under this rubric. Likely literary writers include Washington, Larsen, Ellison, Brooks, and Wideman. Enrollment limited to 15 graduate students.

ENGL 2760V. Neo-Victorianism: Rewriting the Long Nineteenth Century. This seminar examines recent novelists rewriting canonical 19th-century texts by Dickens and others, playing with matters of postcoloniality and gender. Jack Maggs, for example, answers the questions, "Can the subaltern speak?" and "Does the empire write back?" while Fingersmith offers a lesbian version of the Victorian sensation novel. Patchwork Girl rewrites Frankenstein, stitching together fiction, gender, and identity. Enrollment limited to 15.

ENGL 2760W. American Literature and the Visual Arts. With the publication of several recent studies of cinema and modernism, interest in the relation between literature and the visual arts has never been higher. We will chart the forms this relation takes in the modern era by reading both theoretical attempts to diagnose it (Benjamin, Barthes, Derrida, Rancière) and literary attempts to enact it (James, Stein, Ellison, Williams, Agee). Enrollment limited to 15 graduate students.
ENGL 2760X. After Postmodernism: New Fictional Modes.
What happens when the "postmodern," the period that did away with periodization, is over? This class will discuss issues such as contemporaneity, materiality, subtraction, subjectivity, the event, and the frame in approaching British and American literature at the turn of the 21st century. Readings include Ishiguro, Cooper, Toussaint, Seth, Coetzee, Chatwin, Danielewski, Deleuze, Bergson, Badiou, Lukács, Voloshinov, Adorno, Pasolini, Nancy. Enrollment limited to 15 graduate students. Banner registrations after classes begin require instructor approval.

ENGL 2760Y. American Orientalism and Asian American Literary Criticism.
We examine critical studies of American Orientalism, influential works of Asian Americanist cultural criticism, American Orientalist texts by white and black authors, and literary texts by Asian American authors. Critics, cultural historians and writers we read may include: Christina Klein, Vijay Prashad, Elaine Kim, Frank Chin, Lisa Lowe, W.E.B. DuBois, Susan Choi, Nam Le, Karen Tei Yamashita. Enrollment limited to 15 graduate students.

ENGL 2760Z. African American Literature After 1965: Nationalism and Dissent.
Since the late 1960s, major theoretical and literary currents in African American letters have been profoundly influenced by black nationalism. This seminar examines the persistence of nationalist thought in ongoing debates about racial authenticity, gender inequality, black aesthetics, and diasporic politics. In so doing we will attend to both the complexity of nationalist ideology and the dissent generated by it. Authors include Baraka, Cruse, Giovanni, Morrison, Senna, Whitehead, and Gilroy. Open to graduate students only.

ENGL 2761B. Temporalities.
Centered on modernism and the early 20th century, this course will investigate the varied models of time pulsing through literary and theoretical texts, and consider a range of issues, including memory and forgetting, historical progress and decay, utopian futurity, and queer temporalities. Readings include work by Freud, Bergson, Nietzsche, Benjamin, Joyce, Woolf, Barnes, Stein, Faulkner. Enrollment limited to 15.

ENGL 2761F. The Racial Lives of Affect.
This course explores both dominant and emergent theoretical paradigms that animate the affective dimensions of racialized subjectivity in the US with a particular emphasis on recent scholarship that is linked with the field of affect theory. Rather than attempting an exhaustive or definitive mapping of that field, this seminar focuses on those thinkers whose works enhance our understandings of race. Enrollment limited to 15.

ENGL 2761M. Photographic Memory.
This class examines the relation between photography, memory, narrative, and indexicality. Readings range from classic studies of photography and film to more recent reflections on the role of the camera in a digital age, including the fiction of Eileen, Sebald, and James; the films of Antonioni, Kiarostami, and Bresson; the theoretical work of Bergson, Benjamin, Deleuze, Rancière, Mulvey, and Silverman. Enrollment limited to 15.

ENGL 2780. Graduate Independent Study in Modern and Contemporary Literatures.
Section numbers vary by instructor. May be repeated for credit. Instructor's permission required.

ENGL 2900A. Contemporary Feminist Theory: Feminist Address.
Recent feminist theory addresses identity politics and the critique of the subject; problematics of race, class and gender; the challenge of queer theory; the demand for materialist analysis. We consider these topics in light of the problematics of address. What are the forms of feminist address? How are they received or refused? Who are the subjects of contemporary feminisms? Enrollment limited to 15.

ENGL 2900C. Theories of Literature: From Classical Antiquity to Postmodernity.
Investigates theories of literature in two self-conscious historical epochs: classical antiquity, represented by figures such as Plato, Aristotle, and Horace, and by practices such as marginal notation of texts, literary commodities, and performance techniques; and the 20th century, represented by figures such as Adorno, Barthes, and Bakhtin, with special attention to the intersections between philosophy and literature and poststructuralist conceptions of textuality. Enrollment limited to 15.

ENGL 2900D. Walter Benjamin and Modern Theory.
Intensive study of Walter Benjamin's essays on modern culture and literature (in particular Goethe, Baudelaire, Proust, and Kafka). Explores the consequences of his thinking for problems in contemporary literary and cultural theory. German and/or French helpful but not required. Enrollment limited to 15.

ENGL 2900E. Deleuze: Literature and Aesthetics.
How does Deleuze help us read modern culture? This course will focus on Deleuze's writings on literature, painting and cinema as a point of entry to the work of one of the most original and intriguing thinkers of the late 20th century. We will look at the reasons for Deleuze's fascination with Anglo-American literature, and discuss the extent to which Deleuze's model of literary analysis breaks with--while remaining fundamentally indebted to--Marxism and psychoanalysis. Other readers include Melville, Kafka, T. E. Lawrence, as well as films by Antonioni, Godard and Sembene. Enrollment limited to 15.

ENGL 2900F. Form and Content.
Readings in aesthetics, literary theory, structuralism-poststructuralism, and cultural studies that address the form/content distinction in one of its many avatars. Topics will include the sign, thematics, formlessness, formalism and historicism, tenors and vehicles, structure, and defamiliarization, among others. Previous work in literary or cultural theory strongly recommended. Enrollment limited to 15.

ENGL 2900G. History and Form.
An exploration of the relation between historical and formalist approaches to literary interpretation, from the New Critics to the so-called "New Formalism." What is the role of form in historically and politically oriented criticism (examples will be taken from Marxism, the New Historicism, feminism, cultural studies, and post-colonial theory)? What happens to history when form takes center stage (for example, in structuralism and deconstruction)? Is it possible (and desirable) to avoid a pendulum swing between the poles of historicism and formalism and to mediate the conflicting claims of history and form? Or is a focus on one at the expense of the other the necessary cost of an incisive interpretive strategy? In addition to theoretical readings that exemplify the conflict between history and form, attention will be paid to the history of reception of one or more literary works in order to articulate the practical implications of their opposition and interdependence. Enrollment limited to 15.

ENGL 2900H. Queer Passivity.
A study of the concept of passivity in queer theory, literature, and film. Subjects will include AIDS and temporality; the senses and dissolution; ascesis and chastity; pornography and sovereignty. We will explore poststructuralist theories and continental philosophies (Agamben, Cavarero, Deleuze, Derrida, Marion, Nancy) that resonate with the kind of queer receptivity that will be the object of study. Enrollment limited to 15.

ENGL 2900K. Nietzsche, Foucault, Latour.
The seminar will trace a line of radical thought about truth, language, knowledge and power—and their interrelations—in the writings of Friedrich Nietzsche, Michel Foucault and Bruno Latour. Particular attention will be given to the significance of their work for poststructuralist language theory, constructivist epistemology and science studies, and current issues involving the relations between science and religion. Enrollment limited to 15 graduate students.

ENGL 2900M. The Reading Effect and the Persistence of Form.
This course examines the "reading effect" as it emerges in work on the question of form and contemporaneous scholarship on the problematics of reading. We will trace the ways in which these related but distinct critical idioms negotiate concepts of mutual concern (interpretation, representation, the reading subject/reading brain). Topics include "new formalism," cognitive studies, symptomatic reading. Theorists from Althusser and deMan to Marcus, Wolfson and Sunshine. Enrollment limited to 15 graduate students; undergraduate seniors may enroll with instructor permission.
ENGL 2900N. Ethical Turns.
Examines the relationship between literature and ethics through the notions of responsibility, conviction, obligation, knowledge, ignorance, and complicity. Readings by Barthes, Benjamin, Arendt, Freud, Lacan, Winnicott, Derrida, de Man, Miller, Butler. Enrollment limited to 15 graduate students.

ENGL 2901G. Ultimate Dial logicality: Thinking With Bakhtin.
"In Dostoevsky’s polyphonic novel we are dealing not with ordinary dialogic form … [but] with an ultimate dial ogicality, … a dialogicality of the ultimate whole … " With this claim, Bakhtin’s writing on literature arguably leaves the realm of criticism and becomes philosophy. In so doing it also anticipates some of the most challenging and significant developments in contemporary literature. Besides Bakhtin’s major works, readings include Deleuze, Rancière, Flusser, Woolf, Sebald, Kelman. Enrollment limited to 15.

ENGL 2901H. Genres of Critique.
Debate about the nature and effects of reading resonates across the disciplines and beyond. It may be articulated with interests in formal questions of genre and style or philosophical traditions that draw upon Kantian, marxist or post-colonial canons. This course addresses three genres of critique: philosophical, ideological, and literary, addressing each in its engagements with problems of reading. We will interrogate the distinctiveness and incompatibilities of their discourses as well as their intersections and examine the question of genre itself, in literary avatars and as a trope for critique. Readings include Kant, Althusser, Spivak, Eliot, Gaskell. Enrollment limited to 15.

ENGL 2940. Scholarly Writing for Journal Publication.
Writing and professionalism workshop intended for graduate students in literary studies. Topics covered include selection of journal; framing, structuring and composition of the article; the logistics of peer review; sharing and workshopping drafts; working with academic mentors and advisors. Every passing student will have a publishable article under consideration by the end of the semester. Enrollment limited to 12 English Ph.D. students. Instructor permission required. S/NC.

ENGL 2950. Seminar in Pedagogy and Composition Theory.
An experimental and exploratory investigation into writing as a preparation for teaching college-level writing. Reviews the history of writing about writing, from Plato to current discussions on composition theory. Against this background, examines various processes of reading and writing. Emphasizes the practice of writing, including syllabus design. Enrollment restricted to students in the English Ph.D. program.

ENGL 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ENGL 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

ENGL XLIST. Courses of Interest to Students Concentrating in English.
Fall 2017
These courses, offered in other departments, are cross listed with the English Department and do not require advisor approval to count toward the concentration for English concentrators. Please refer to the primary department for registration details.

Cogut Center for Humanities
HMAN 1972X Kubrick's Work
HMAN 2400B Trans/Passing, In Theory
HMAN 2971D Caring for the Truth
Hispanic Studies
HISP 12400 Theater of Renaissance England and Spain

Spring 2018
These courses, offered in other departments, are cross listed with the English Department and do not require advisor approval to count toward the concentration for English concentrators. Please refer to the primary department for registration details.

Comparative Literature
COLT 0510P Reading the Renaissance

Director of Graduate Studies
Scott A. Frickel
Director of Undergraduate Studies
Dawn King

The Institute at Brown for Environment & Society supports research to understand the interactions between natural, human and social systems. Our teaching programs prepare future leaders to envision and build a just and sustainable world. Our engagement programs take research from the lab to the statehouse, the hospital and the public sphere.

Undergraduate and graduate students can study conservation science and policy, water and food security, environmental health, climate science and meteorology, biogeography and evolution, and more. Research is conducted in laboratories, on supercomputers and at field sites around the world.

For additional information, please visit the Institute's website: http://www.brown.edu/academics/institute-environment-society/

Environmental Studies Concentration Requirements
Many of the most pressing challenges of the 21st Century are environmental ones. We must find ways to feed a growing human population while maintaining the natural life support system provided by the Earth’s ecosystems; to make built environments more efficient as urban areas continue to grow dramatically in size; and to meet the challenges posed by rising sea-level and increasing global temperatures. These challenges are complex, multifaceted and can best be solved with expertise from multiple, relevant disciplines. To prepare students to meet these challenges, the Institute at Brown for Environment and Society (IBES) offers two undergraduate degrees: an A.B. in Environmental Studies and a Sc.B. in Environmental Science. The two degrees vary primarily in the number of course requirements; the Sc.B. is a more in-depth treatment of a single field. Both degrees provide interdisciplinary
exposure to the natural and social sciences, as well as public policy. Both degrees also develop depth in a primary field by requiring students to select one of four tracks of study. Concentrators might also consider pursuing the Engaged Scholars Program, which allows them to connect theory and practice and gain hands-on experience working with community partners.

Through a rigorous set of core courses, track requirements, and a course or project-based capstone experience, our students are primed to make meaningful contributions to environmental scholarship and outreach at local, national and global scales.

If you have administrative questions regarding theses concentrations or wish to be added to the email directory listing upcoming events, then please contact Jeanne Loewenstein (jeanne_loewenstein@brown.edu), the administrative manager.

**Standard program in Environmental Studies and Environmental Science:**

The Institute at Brown for Environment and Society administers two concentrations, one offering an A.B. degree in Environmental Studies (requires 14-15 courses) and the other a Sc.B. degree in Environmental Science (requires 19-20 courses). Below are a set of course offerings arranged into four tracks:

1. Air, Climate & Energy
2. Conservation Science & Policy
3. Environment & Inequality (New)
4. Land, Water & Food Security
5. Sustainability in Development

**Requirements for the A.B. Degree**

**Core Requirements**

### Track 3 – Environment and Inequality (New)

**Tools: Select One**
- GEOL 1320 Introduction to Geographic Information Systems for Environmental Applications
- GEOL 1330 Global Environmental Remote Sensing
- SOC 1340 Principles and Methods of Geographic Information Systems

**Track 5 - Sustainability in Development**

**Sociology and Politics: Select One**
- SOC 1870K Demographics and Development
- POLS 0400 Introduction to International Politics
- ENVS 1755 Globalization and the Environment

**Critical Perspectives on Development: Select One**
- AMST 1700I Community Engagement with Health and the Environment
- ANTH 0110 Anthropology and Global Social Problems: Environment, Development, and Governance
ENVS 0150. Climate Futures and a Sociology of Just Transitions.
This course, team-taught with Professor Damian White of RISD, seeks to build a reconstructive environmental sociology of the sustainable transition, incorporating debates from political ecology, critical design studies and energy/technology studies. It debates the merits of green capitalist and post-capitalist, socio-centric and technocentric visions of the transition away from fossil fuels. Class will be meet on the RISD campus.

ENVS 0220. Physical Processes in Geology (GEOL 0220).
Interested students must register for GEOL 0220.

ENVS 0240. Earth: Evolution of a Habitable Planet (GEOL 0240).
Interested students must register for GEOL 0240.

ENVS 0241. Climate and Climate Change (GEOL 0030).
Interested students must register for GEOL 0240.

Interested students must register for RELS 0260.

ENVS 0300. Environment and Society in Africa (SOC 0300L).
Interested students must register for SOC 0300L.

ENVS 0410. Environmental Stewardship.
Challenges students to address the economics and logistics of implementing strategies to conserve resources and reduce the negative impacts of the built environment. The goal is to learn the rationale, process and technical aspects of the practice of environmental stewardship. Topics include sustainable design, institutional change, and corporate environmental responsibility. Students collaborate in interdisciplinary teams on applied projects. Permission by instructor by application process prior to enrollment in the class.

Interested students must register for BIOL 0420.

ENVS 0460. Restoration Ecology.
This intermediate-level, writing intensive course will enable students to master fundamental ecological concepts and understand how this knowledge can be used to inform ecological restoration and stewardship, particularly in urbanized coastal areas of New England. Through case studies, discussions and field trips to active restoration sites, students will deepen their scientific knowledge and experience the challenges and opportunities of ecological restoration. This course is particularly appropriate for students interested in engaged research as they will meet and collaborate with environmental professionals. Course capped at 15 - admission by application only. Contact Prof. Leslie, Heather_Leslie@brown.edu by May 1, 2015 to apply. Pre-requisite: BIOL 0200 or equivalent. WRIT
ENVS 0490. Environmental Science in a Changing World. Introduces students to environmental science and the challenges we face in studying human impacts on an ever-changing earth system. We will explore what is known, and not known, about how ecosystems respond to perturbations. This understanding is crucial, because natural systems provide vital services (water and air filtration, climate stabilization, food supply, erosion and flood control) that can not be easily or inexpensively replicated. Special emphasis will be placed on climate, food and water supply, population growth, and energy.

ENVS 0495. Introduction to Environmental Social Science. This course introduces students to core areas of theory and research in the environmental social sciences. It also challenges students to think carefully about what we learn and don’t learn when we apply different disciplinary lenses to interdisciplinary environmental challenges.

ENVS 0510. International Environmental Law and Policy. Introduces students to principles of international environmental law and examines how international organizations, national governments and non-state actors interact to address human impacts on the global environment. Considers effects of treaties, trade agreements and foreign aid on resolution of trans-boundary environmental problems including climate change, marine governance, biodiversity loss and trade in endangered species and hazardous waste. Students negotiate a mock treaty (NEWORLD) to mitigate some aspect of human impact on global change from the perspective of different state and non-state actors. Introductory coursework that addresses some aspects of environmental studies or environmental science is recommended. WRIT

ENVS 0520. Wild Literature in the Urban Landscape. Combines deep study of ecological poetry, fiction, essays and other writing with service to schools in the community through exploration of local ecological challenges through both creative and more discursive expressions. The field-work or community component to this course will involve students in conducting workshops that combine literature and ecology in order to better elucidate and understand local issues related to, for one example, eco-industrial histories associated with Gorham Silver in Providence and the current state of Maspsapug Pond on the Reservoir Triangle, where a public high school, Alvarez, now sits on contaminated soil. Enrollment limited to 22 undergraduates. S/NC.

ENVS 0700A. New England Environmental History. Explores the environmental history of New England from the arrival of people circa 10,000 years ago to the present day. Topics include Native American and colonial environmental interactions and 20th century environmental transformations. From abandoned textile mills to Northern forests, understanding the history of a place can help us plan for its future.

ENVS 0700C. Extinction: A Global History. In the past five centuries, about 800 species of animals and plants have gone extinct. And many more are at risk of extinction in the last one hundred years. Recent estimates suggest that 41 percent of described amphibians, 26 percent of mammals, and 13 percent of birds currently face the threat of extinction. We will examine the current global extinction crisis as a biological, historical, cultural, economic, and political phenomenon. This course adopts an interdisciplinary approach by examining the issue of extinctions from the perspectives of the humanities and environmental sciences.

ENVS 0700D. Food for Thought: Food and Agriculture in the History of the Americas. This course is an introduction to the history of food and agriculture in the Americas. We will examine key topics such as the domestication of plants and animals several thousand years ago, food production + consumption in pre-Columbian societies, the impact of European colonialism + colonial systems of food production across the Americas farming in the 19th century, the industrialization of agriculture in the 19th and early 20th centuries in the US and Latin America, the Green Revolution, organic agriculture and alternatives to industrial agriculture in the Americas in the past few decades, and the future of food + agriculture.

ENVS 0705. Equity and the Environment: Movements, Scholarship, Solutions. The environmental justice movement emerged in the U.S. South from the observation that African-Americans were more exposed to toxics than whites. It spurred decades of academic and activist efforts to understand and address the relationship between inequality and environment. The issue has expanded around the world, and beyond unequal exposures to “bads”, to unequal access to “goods,” along lines of equity by race, class, gender, ethnicity, indigenous identity, and position in the global economy. Issues of assigning responsibility and applying theories of justice with legal instruments have made environmental justice policy difficult. This course seeks to serve first-years and sophomores. DPLL

ENVS 0710. Powering the Past: Environmental Histories of Energy Use and Social Change. From wood, water, and muscles, to coal, oil, and nuclear power, humans have a long history of reshaping their environments to access energy. The nature of these energy sources also influences the form and distribution of political and economic power. Using environmental history methods, this course examines the ties between energy, power, environmental change, and inequality, from before the agricultural revolution to the present. Readings and lectures link the United States and Europe to the rest of the globe, with particular emphasis on the nineteenth and twentieth centuries. Each class combines lecture and discussion. No prerequisites. WRIT

ENVS 0900. Quantitative Methods in Psychology (CLPS 0900). Interested students must register for CLPS 0900.

ENVS 0930A. Appropriate Technology (ENGN 0930A). Interested students must register for ENGN 0930A.

ENVS 1000. Fieldwork in the Urban Community (URBN 1000). Interested students must register for URBN 1000.

ENVS 1070. The Burden of Disease in Developing Countries (PH 1070). Interested students must register for PH 1070.

ENVS 1110. Estuarine Oceanography (GEOL 1110). Interested students must register for GEOL 1110.

ENVS 1180. Feminist Thoughts for a Heated Climate (POLS 1180). Interested students must register for POLS 1180.

ENVS 1270. From Magic Mushrooms to Big Pharma: Anthropology of Drugs (ANTH 1880). Interested students must register for ANTH 1880.

ENVS 1331. Weather and Climate (GEOL 1350). Interested students must register for GEOL 1350.

ENVS 1350. Environmental Economics and Policy. This course equips students with theoretical and empirical tools to analyze environmental issues from the perspective of economics. First, we review when and why the markets fail, competing policy solutions (e.g., cap-and-trade), and cost-benefit analysis. Second, we survey methods to quantify the benefits of environmental regulations, including revealed and stated preference methods, a primer on climate-economy modeling, and a real-world application in a class research project. Third, we study the costs of environmental regulations. We conclude with advanced policy considerations (e.g., trans-boundary pollutants), private market solutions/ corporate social responsibility, and select special topics (e.g., resources and economic development).

ENVS 1355. Environmental Issues in Development Economics (ECON 1355). Interested students must register for ECON 1355.

ENVS 1356. Health, Hunger and the Household in Developing Countries (ECON 1530). Interested students must register for ECON 1530.
ENVS 1370. Environmental Geochemistry (GEOL 1370).
Interested students must register for GEOL 1370.

ENVS 1400. Sustainable Design in the Built Environment.
Provides students with an in-depth understanding of sustainability, as it relates to planning, engineering, architecture, landscape architecture and green buildings. Students conduct economic and environmental analyses to examine planning, design and building problems and opportunities holistically. Interdisciplinary teams work on applied design projects.

ENVS 1410. Environmental Law and Policy.
Introduces students to environmental law in the United States. Uses legal decisions and policy frameworks to consider the roles of non-governmental actors in formation and implementation of environmental policy. Students will become familiar with major federal environmental laws and regulatory databases and see how legal precedent, differing understandings of risk and alternative regulatory and market-enabling strategies have shaped solutions to environmental problems. Provides opportunity to apply legal skills to local environmental legislation or legal problem. Intermediate coursework in Environmental Studies, Political Science, Community Health, Urban Studies or other environmentally-related coursework is recommended. First year students need instructor permission.

ENVS 1415. Power, Justice, and Climate Change.
Climate change creates injustices in who caused the problem, who is suffering worst and first, and who is taking action. Power differences between nations and social groups drives unequal disaster risks and "compounded vulnerabilities" for poor peoples and nations, and has led to gridlock in United Nations negotiations. The course reviews social and political dimensions of climate change, including local and national adaptation and mitigation efforts, media dynamics, collective and individual denial, negotiations, and the rise of climate social movements. Enrollment limited to 40. WRIT

ENVS 1440. Conservation Biology (BIOL 1470).
Interested students must register for BIOL 1470.

ENVS 1450. Ecosystem Analysis.
Develops ability to measure and characterize important biological and physical parameters of terrestrial ecosystems. Weekly field trips to explore measurement techniques and develop testable questions and/or hypotheses about different forested ecosystems. Qualitative and quantitative writing exercises explore how to describe the patterns and processes associated with the ecosystems visited. One Saturday field trip to central Massachusetts and one weekend field trip to New Hampshire are required. A background in environmental issues, as evidenced by taking BIOL 0420, is strongly recommended.

Students will develop an interdisciplinary understanding of ocean ecosystems and how humans are connected to them socially, economically, and ecologically. Integration of the scientific and human dimensions of marine ecosystems is achieved through analysis of the current status, trends, and threats to ocean ecosystems, and the range of solutions to mediate these threats. This course is designed for advanced juniors, seniors and graduate students; participating students are expected to have background in at least one related field (e.g., biology, geosciences, sociology, economics, or political science) beyond the intermediate level. Suggested prerequisites include ENVS 0490, BIOL 0420 or 1470.

This is a lecture and discussion based course that focuses on the role of microbes in biological, geological, and environmental processes. This includes: introductory concepts, origins of life, bacterial evolution, role in climate change, metabolic diversity of biogeochemical cycles, microbial communities and interactions, habitat specific examples, and applications in the environment and human health. Recommended background courses: BIOL 0200, CHEM 0330 and an intermediate science course (e.g., BIOL 0280, GEOL 0240, or ENVS 0490). WRIT

ENVS 1490. SES-Independent Study/Science Writing.
The culmination of the Semester in Environmental Sciences at the Marine Biological Laboratory is an independent research project that builds on the topics covered in the aquatic and terrestrial ecosystem analysis core courses. In addition students participate in a seminar designed to help improve their ability to tell a lay reader about science. Enrollment is limited to students in this program. Instructor permission required.

ENVS 1491. SES-Terrestrial Ecosystem Analysis.
Team-taught course examining: the structure of terrestrial ecosystems; fundamental biogeochemical processes, physiological ecology, impacts of environmental change on the landscape; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required.

ENVS 1492. SES-Aquatic Ecosystem Analysis.
Team-taught course examining the structure of freshwater, estuarine and marine ecosystems; impacts of environmental change on the landscape at local, regional and global scales; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems such as coastal eutrophication, fisheries exploitation. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required.

ENVS 1493. SES-Environmental Science Elective.
Two environmental science electives are offered each fall semester as part of the Semester in Environmental Science at the Marine Biological Laboratory, including: aquatic chemistry, mathematical modeling of ecological systems and microbial ecology. Enrollment is limited to students in this program. Instructor permission required.

ENVS 1500. Environmental Justice and Climate Change in Rhode Island TRI-Lab Engaged Research.
The TRI-Lab (Teaching, Research, Impact) on Climate Change and Environmental Justice in Rhode Island will be taught by a team including two experts from the RI state Department of Health. It will investigate ways to reduce the climate change-related public health risks to vulnerable individuals in three targeted neighborhoods in Providence, and increase the capacities of these neighborhoods to respond to climate change threats. Content topics to be covered include: projected climate change impacts in RI; public health risk assessment; risk outreach and communications strategies; state and federal policies, design and evaluation of adaptive responses; community-based research methods.

ENVS 1510. Environmental Theory and Philosophy.
Each student develops his or her own concept of "socially better." The task is to understand conceptions of "socially better" belonging to various authors and others in the class, to put one's own concept in context with the readings and class discussion, and explain why that concept is sensible and should be taken seriously by others. Prerequisite: ENVS 1350 or permission of the instructor.

ENVS 1530. From Locke to Deep Ecology: Property Rights and Environmental Policy.
Examines the evolution of property law and tenure in land, water, the atmosphere and natural resources, and the consequences of these property rights regimes for environmental protection. Readings drawn from the scientific, legal, public policy and popular literature are used to consider the development of American attitudes about the relationship between people and nature; the relationship between public and private rights in the land, sea, freshwater, atmosphere and wildlife; and the use of innovative property rights regimes in environmental policy. Intermediate coursework in Environmental Studies, Urban Studies, American Civilizations or other environmentally-related coursework is recommended. WRIT

ENVS 1540. Technology and Material Culture in America: The Urban Built Environment (AMST 1520).
Interested students must register for AMST 1520.
ENVS 1545. The Theory and Practice of Sustainable Investing. 21st century businesses and investors face a broadening and deepening array of Environmental, Social, and Governance (ESG) risks and opportunities. Climate change, water scarcity, community conflicts, resource depletion, supply chain breakdowns, worker well-being and economic inequality pose present material challenges that make sustainability an imperative for successful corporations and investors. We will examine current ESG strategy, trends, future scenarios, players, and frameworks and integrate that theory with practical investment performance analysis, metrics, and study of screens, asset classes, and diversification.

ENVS 1555. Urban Agriculture: The Importance of Localized Food Systems. This is an engaged scholar course. Urban agriculture has a critical function in a small but increasing movement toward more localized and sustainable food systems. This course focuses on research and readings from multiple disciplines addressing urban agriculture and local food systems' role in shaping food policies, labor practices, sustainable agricultural practices, and human health (to name a few). More importantly, students will work with community partners to actively engage in a local food system project. Enrollment limited to 40. Instructor permission required. Email Prof. King to request override (Dawn_King@brown.edu).

ENVS 1570. Guts of the City: Perspectives on Urban Infrastructure and Environmental Planning (URBN 1570). Interested students must register for URBN 1570.

ENVS 1575. Engaged Climate Policy at the UN Climate Change Talks. Twelve undergraduate students will study a group of core readings, conduct independent and group projects, and attend the United Nations Framework Convention on Climate Change's (UNFCCC) 23rd Conference of the Parties (COP23) and related climate change events in Bonn, Germany in November 2017. Students will critically analyze contemporary political events; develop and addresses pertinent research questions; engage with and interview experts in the field; craft policy-relevant and empirically grounded publications; and develop experience in using social media. Team-based research may be shared at the climate negotiations in Bonn. Contact J. Timmons Roberts for an application - j_timmons_roberts@brown.edu. WRIT

ENVS 1580. Environmental Stewardship and Resilience in Urban Systems. This course investigates current environmental impacts and risks related to urban infrastructure systems. Students analyze efforts to minimize negative environmental, health and economic impacts of the built environment. The course explores urban initiatives to increase sustainability and resiliency of infrastructure systems in anticipation of increased risks related to climate change. The goal is to learn the rationale, process and technical aspects of the practice of environmental stewardship and resilience planning in an urban context. Students will develop competence in technical analysis, policy analysis, and program implementation through case studies and systems analyses.

ENVS 1615. Making Connections: The Environmental Policy Process. The diminishing quantity and quality of the resources of the Earth carries profound implications for the fulfillment of human rights and aspirations. But even as we understand better the intrinsic interdependencies between humans and the environment, policy gridlock persists. Indeed, the findings of fundamental environmental science are regularly contested on political grounds. The purpose of this course is to learn how to apply knowledge to map the relevant policy context in environmental issues, and to develop the tools and approaches to address any problem of decision in the environmental arena more creatively, effectively, and responsibly. Enrollment limited to 20. WRIT

ENVS 1650. Statistical Inference I (APMA 1650). Interested students must register for APMA 1650.

ENVS 1660. Instrumental Analysis with Environmental Applications (GEOL 1660). Interested students must register for GEOL 1660.

ENVS 1700B. Watershed Policy + Management: Governance Beyond Borders. Changes in land use at parcel and landscape scales have altered water cycles, water quality and water-dependent ecosystems. Governance Beyond Borders examines the management of water, land use and aquatic life in coastal watersheds. We will consider the accomplishments of the top-down, expert-driven federal laws of the 1960s and 1970s. However we will focus on integrated, trans-boundary approaches to governance of land, water, pollutants and aquatic life and become immersed in thinking like a watershed. ENVS1410 is desirable but not required. Other relevant courses could include BIOL1470, ENVS1350, ENVS1530, ENVS1615. Enrollment is limited to 18 students. Instructor's approval is required.

ENVS 1710. Environmental Health and Policy. Provides an overview of environmental health methods and their application to policy and regulation. Students will learn the basic tools of environmental health sciences, including toxicology, epidemiology, and risk assessment, as well as the scientific basis for regulation. Traditional environmental health concerns will be discussed, as well as emerging discourses on environmental health issues, including urban pollution and its concomitant health concerns, climate change, issues of health disparities and environmental injustice, and the interrelationship between humanitarian crises and environmental degradation. Open to both undergraduate and graduate students of all fields, space permitting. Prerequisite: ENVS 0110 or instructor permission.

ENVS 1711. Current Topics in Environmental Health (PHP 1700). Interested students must register for PHP 1700.

ENVS 1720. Environmental Justice: The Science and Political Economy of Environmental Health and Social Justice. Provides an overview of environmental justice history, theory and definitions. Students will review quantitative, qualitative, and theoretical approaches for understanding the origins and persistence of environmental discrimination. Examines the regulatory, institutional, structural, political, and economic forces that underlie patterns of race and class-based discrimination and their implications for environmental health among diverse communities. Case examples of environmental justice organizing will inform students of positive efforts by people of color in protecting their communities. Not open to first year students. Prerequisite: ENVS 0110.

ENVS 1725. Political Economy of the Environment in Latin America (INTL 1450). Interested students must register for INTL 1450.

ENVS 1755. Globalization and the Environment. What are the effects of globalization on the environment? Can globalization be greened? Corporations, civil society, international organizations and states are in a race to globalize their rules, sometimes working together, and others times in bitter conflict. This course seeks to understand this set of issues through a mix of examining concrete social/environmental problems and studying theories of globalization and social change. While addressing global issues and the impacts of wealthy nations, this course focuses most on the developing countries, where the impacts of these global issues appear to be worst, and where resources are fewest to address them. Enrollment limited to 20 juniors and seniors. WRIT

ENVS 1820. Environmental Health and Disease (BIOL 1820). Interested students must register for BIOL 1820.

ENVS 1824. Environmental Political Thought (POLS 1824L). Interested students must register for POLS 1824L.

ENVS 1890. Native American Environmental Health Movements (ETHN 1890J). Interested students must register for ETHN 1890J.
ENVS 1900. Introduction to Geographic Information Systems for Environmental Applications (GEOL 1320).
Interested students must register for GEOL 1320.

Scholars in many disciplines have begun using the term the Anthropocene to signal a geological epoch defined by human activity. This seminar examines the Anthropocene idea from the perspective of environmental history. What activities might have changed the planet—the use of fire thousands of years ago, or agriculture, or fossil fuels? Is the Anthropocene another term for climate change, or does it include pollution and extinction? Is it a useful concept? Drawing on anthropology and the sciences as well as history, we will use the Anthropocene to think through environmental change and the human relationship with the non-human world. WRIT

This course provides an introduction to a wide range of research approaches in the social and environmental sciences. We will cover the epistemological and theoretical foundations of various research approaches and discuss implications of these foundations for what research questions are answerable and what evidence one can bring to bear to answer such questions. By the end of the semester, students will be able to write a clear and answerable research question, and know what methods are appropriate to use to answer such a question. Enrollment limited to ENVS Juniors. ENVS seniors must receive instructor override from Professor VanWey, leah_vanwey@brown.edu. WRIT

From coal power to solar power, energy drives economies and increases quality of life world-wide. However, this same energy use can, and often does, lead to severe environmental destruction/pollution and global warming. This course serves as an introduction to energy policy in the United States and also explores global attempts to solve energy problems. This course examines different types of energy sources and uses, different ideological paths driving energy policy, the environmental impacts of energy use, current global and domestic attempts to solve energy problems, and the role of renewable and alternative forms of energy in future energy policy. WRIT

ENVS 1929. The Fate of the Coast: Land Use and Public Policy in an Era of Rising Seas.
For the last few decades, there has been a land-rush on the ocean coasts of the United States. Unfortunately, this swamps the coast at a time when sea levels are on the rise. In some places the rise is natural, in some places the rise is exacerbated by human activities and everywhere it is fueled by climate change. This course will examine the causes of sea level rise, the effects it produces on land, the steps people have taken to deal with these effects and their consequences, and possible remedies. Enrollment limited to 20. Preference given to juniors and seniors. WRIT

ENVS 1930. Land Use and Built Environment: An entrepreneurial view (ENGN 1930S).
Interested students must register for ENGN 1930S.

Interested students must register for ENGN 1930U.

ENVS 1931E. Writing the Environment.
Few issues are more important than restoring and preserving our environment, but also few are more complex and politicized. Researchers must know how to convey the substance and importance of their work; not just in the language of scholarly journals, but also in ways that engage a lay audience while maintaining scientific accuracy. This seminar focuses on writing about subjects including new findings, the people who make them, scientific disputes, calls to action and policy debates. Participants will produce news and feature articles, profiles, op-ed pieces, essays, policy papers, web pages and the like. Enrollment limit 15. WRIT

ENVS 1965. Engaged Environmental Scholarship and Communication.
This upper level seminar will enable to students to place their research in the context of environmentally relevant policy and practice. Development of an environmentally-focused thesis or independent research project is a prerequisite. Students will hone practical professional skills, e.g. how to communicate scientific findings to the media and policy audiences; oral presentation skills, and tips on professional interactions. Required of all Brown Environmental Fellows (http://blogs.brown.edu/bef/), and open to others engaged in environmentally relevant projects from the natural and social sciences and humanities. Enrollment is limited to 15 seniors and graduate students, by application only (available Fall 2011). Instructor permission required. Contact Heather_Leslie@brown.edu for more information. WRIT

First semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

Second semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

ENVS 2010. Special Topics in Environmental Studies.
A mandatory seminar for graduate students in environmental studies. This course develops group problem-solving skills by addressing a current local, national or global environmental issue. We will work on problem definition, identifying options for addressing the problems, and crafting potential solutions. In all stages we work closely with non-profit groups, government agencies, or firms, who have the capacity to implement solutions. Students learn basic research design and begin the process of developing a research question and possible methods for conducting their Master’s thesis research.

ENVS 2110B. Radical American Romanticism:Democratic, Environmental, + Religious Traditions in America(RELS 2110B).
Interested students must register for RELS 2110B.

ENVS 2420. The Structure of Cities (ECON 2420).
Interested students must register for ECON 2420.

ENVS 2450. Exchange Scholar Program.

ENVS 2980. Reading and Research.
First semester of thesis research during which a thesis proposal is prepared. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

ENVS 2981. Reading and Research.
Second semester of thesis research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

ENVS 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

Center for Fluid Mechanics, Turbulence and Computation

Center for Fluid Mechanics, Turbulence and Computation

"Fluids at Brown" as the Center is known serves to promote research at Brown University in fluid mechanics, through the development of research collaborations, seminars, the sharing of intellectual knowledge and the coordination of graduate courses. Participating members of the Center include faculty from the Division of Applied Mathematics, School of Engineering, Department of Earth, Environmental & Planetary Sciences and
the Department of Physics. The Center organizes regular seminars on topics relating to fluid mechanics.

Fluid mechanics is an enabling science that describes dynamics over a wide spectrum of scales, ranging from the global scales of climate and ocean dynamics to the transport of suspended proteins through nanopores. New fundamental research challenges involving fluid dynamics continue to emerge in engineering, the physical or biological sciences, mathematics and scientific computation.

Current information on activities and research may be found at the Center’s website at http://www.brown.edu/research/projects/fluids

French Studies

Interim Chair
Janet A. Blume

The Department of French Studies at Brown promotes an intensive engagement with the language, literature, and cultural and critical traditions of the French-speaking world. The Department offers both the B.A. and the Ph.D in French and Francophone Studies. Courses cover a wide diversity of topics, while placing a shared emphasis on language-specific study, critical writing skills, and the vital place of literature and art for intellectual inquiry. Undergraduate course offerings are designed for students at all levels: those beginning French at Brown, those continuing their study of language and those undertaking advanced research in French and Francophone literature, culture and thought. Undergraduate concentrators and non-concentrators alike are encouraged to avail of study abroad opportunities in their junior year, through Brown-sponsored and Brown-approved programs in France or in another Francophone country. Graduates in French and Francophone studies go on to pursue careers in a number of fields, including translation, public service, college and secondary education, publishing and the media.

For additional information, please visit the department's website: http://www.brown.edu/Departments/French/

French and Francophone Studies

Concentration Requirements

The concentration in French and Francophone Studies is committed to the pursuit of an interdisciplinary, linguistically rigorous, and textually informed understanding of French and Francophone literatures and cultures. Concentrators engage actively through their coursework with a wide range of texts and critical perspectives, pertaining to multiple literary genres, media, and contexts. They have opportunities to study different periods of French history as well as Francophone cultures beyond France. By the time they graduate, concentrators will have learned to read with knowledge and nuance and produced a varied body of critical work in French.

The concentration in French and Francophone Studies is committed to the interdisciplinary and textually informed study of the language, literature, and cultural and critical traditions of the French-speaking world. Concentrators engage actively through their coursework with a wide range of texts and critical perspectives, pertaining to multiple literary genres and media (the novel; theater; poetry; cinema; special topics in contemporary politics and culture). They have opportunities to study different periods of French literature and intellectual history (from the Renaissance to the present) as well as Francophone cultures beyond France (West Africa, the Maghreb and the Caribbean). Courses cover a wide diversity of topics, while placing a shared emphasis on language-specific study, critical writing skills, and the vital place of literature and art for intellectual inquiry. The concentration program is designed to encourage and support language-specific study. Literary texts and cultural documents are read principally in the original. Likewise, in most courses, French is the language of class discussions, presentations and research/critical papers.

Concentrators in French and Francophone Studies are strongly encouraged to spend one or two semesters (usually in their junior year) in France or in a Francophone country to derive the richest benefits of linguistic and cultural immersion. Information on Brown in France and approved alternative programs in French-speaking countries is available from the Office of International Programs (http://www.brown.edu/Administration/OIP) office and the OIP website. Other summer programs can be found on the French Embassy website.

Students who have an outstanding record in their concentration courses, have completed at least six concentration courses by the first semester of their senior year, and are highly recommended by two professors, are eligible to apply for admission to the Honors program (http://www.brown.edu/academics/french-studies/undergraduate/honors-program).

Concentration Requirements

A minimum of 10 courses is required for the concentration in French and Francophone Studies. Concentrators must observe following guidelines when planning their concentration. It is recommended that course choices for each semester be discussed with the department’s concentration advisor.

Note: A maximum of four courses from study in France or a Francophone country may count toward the concentration, from either a single semester or an entire year. A year or semester of study abroad in France or a Francophone country is considered an integral part of the concentration and is therefore highly recommended. Our concentrators are strongly encouraged to spend one or two semesters (usually in their junior year) in France or in a Francophone country to derive the richest benefits of linguistic and cultural immersion. Through the Brown-in-France program administered by OIP and departmental faculty, students can enroll directly in French institutions.

FREN 0600 Writing and Speaking French II (is accepted for concentration credit)

Required Courses

One (and no more than two) of the following 0720,0750,0760 1
series gateway courses:

FREN 0720A De l’Amour courtous au désir postmoderne
FREN 0720B The French Novel Today
FREN 0750D Nous et les autres: les Français et le monde de la Renaissance à la Révolution
FREN 0750F L’idée de l’empire dans l’imaginaire français
FREN 0750G L’animal dans la culture contemporaine
FREN 0760A Introduction à l’analyse littéraire

One of the following:

FREN 1510A Advanced Oral and Written French: Traduction
FREN 1510F Advanced Written and Oral French: Regards sur la France actuelle
FREN 1510C Advanced Oral and Written French: A table!
FREN 1510J Advanced Oral and Written French: Photographie

The senior seminar (senior year spring) 1

FREN 1900H La France en guerre

Electives

At least two 1000-level courses offered in the Department of French Studies (excluding FREN 1510 and FREN 1900) are required

Up to two 1000-level courses taught in English offered by French Studies or other departments at Brown are eligible for concentration credit. (Appropriate courses on French or Francophone topics from other departments must be approved by the concentration advisor. Departments in which electives are typically taken include African Studies, Anthropology, Art History, Comparative Literature, English, History, Linguistics, Modern Culture and Media)

At least one course must cover a pre-Revolutionary period 1

FREN 1000A Littérature et intertextualité: du Moyen Âge jusqu’à la fin du XVIIème s
FREN 100B | Littérature et culture: Chevaliers, sorcières, philosophes, et poètes
FREN 103A | L’univers de la Renaissance: XVe et XVIIe siècles
FREN 103B | The French Renaissance: The Birth of Modernity?
FREN 104A | Civilite et litterature
FREN 104B | Pouvoirs de la scène: le théâtre du XVIIe siècle
FREN 104C | Le Grand Siècle à l’écran
FREN 104D | Molière et son monde
FREN 105A | "Family Values": Représentations littéraires de la famille au 18ème siècle
FREN 105B | Fictions de l’individu
FREN 105D | The Age of Voltaire: Culture, Pensée, Société
FREN 105E | French Lovers: Séduction et libertinage sous l’Ancien Régime
FREN 105F | Espace public; espace privé
FREN 105G | Le corps des Lumières
FREN 105H | The Age of Voltaire: Lumières et modernité
FREN 1100F | Contes et nouvelles du Moyen Age
FREN 1410I | Sorcellerie et Renaissance: le sort de la sorcière

At least one course a post-Revolutionary period 1
FREN 1130E | Le Poétique et le quotidien
FREN 1060A | Décadence
FREN 1060B | Gender and the Novel
FREN 1060D | L’Orient littéraire
FREN 1060E | Genre, sexualité, et le roman du XIXe siècle
FREN 1060F | Paris: Capital of the 19th Century
FREN 1070A | Avant-Gardes
FREN 1070B | Emergent literature: Postcolonial Nations and Cultural Identity
FREN 1070C | Figures du roman français au XX siècle
FREN 1070E | Littérature, appartenance et Identité
FREN 1330A | Fairy Tales and Culture
FREN 1330C | Fashion, Mode, and Modernity
FREN 1410D | L’identité française
FREN 1420C | Gender Theory and Politics in France
FREN 1610C | Advanced Written French: Atelier d’écriture

Total Credits 10

1 Or another appropriate course as agreed to by concentration advisor

Honors
Students who have received all "A’s" in their concentration courses, have completed at least six concentration courses by the first semester of their senior year, and are highly recommended by two professors are eligible to apply for admission to the honors program. For more information, consult the requirements on the Department’s website: http://www.brown.edu/academics/french-studies/undergraduate/honors-program

French Studies Graduate Program
The department of French Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. Under most circumstances, the A.M. degree is only awarded as part of the Ph.D. track.

For more information on admission and program requirements, please visit the following website: http://www.brown.edu/academics/gradschool/programs/french-studies

Courses
FREN 0100. Basic French.
This is the first half of a two-semester course. Four meetings a week for oral practice. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). Enrollment limited to 18.

FREN 0200. Basic French.
This is the second half of a two-semester course. Four meetings a week for oral practice plus one conversation hour. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). An accelerated track enables qualified students to go directly to FREN 0500 after FREN 0200. Enrollment limited to 18.

FREN 0220. Reading French in the Arts and Sciences.
Designed to develop the reading competence in French for graduate students (or advanced undergraduates with permission of the instructor). Fundamentals of grammar and syntax are emphasized as well as reading skills in the fields of individual students. Successful completion should satisfy the foreign language requirement for graduate students in other departments. (Consult the relevant department.) No prerequisites. Not for graduate-level credit.

FREN 0300. Intermediate French I.
A semi-intensive elementary review with emphasis on all four skills (listening, speaking, reading and writing). Class activities include drills, small group activities, and skits. Class materials include videos, a French film, short stories, and various other authentic documents. Prerequisite: FREN 0200 or placement (Previous experience with French is required to take this class). Four meetings per week, plus a 50-minute conversation section with TAs.

FREN 0400. Intermediate French II.
Continuation of FREN 0300 but may be taken separately. A four-skill language course that stresses oral interaction in class (three meetings per week plus one 50-minute conversation section). Materials include audio activities, film, and a novel. Short compositions with systematic grammar practice. Prerequisite: FREN 0300, FREN 0200 with permission, or placement.

FREN 0500. Writing and Speaking French I.
A four-skill language course that stresses oral interaction in class. Thematic units will focus on songs, poems, a short novel, a graphic novel, films and a longer novel. Activities include a creative project using Comic Life, and a systematic grammar review. Prerequisite: FREN 0400, FREN 0600 with written permission, or placement.

FREN 0520. Introduction to the Literary Experience.
Pre-requisite: FREN 0400; equivalent to FREN 0500 in language sequence. Language course in which discussions and writing exercises are based on readings in French and Francophone literature and film, focusing on geographic displacement and the relationship between place and identity. With grammar review and short papers. Texts include: Baudelaire, Maupassant, Eberhardt, van Cauwelaert, Ernaux.

FREN 0600. Writing and Speaking French II.
Prerequisite for study in French-speaking countries. Class time is devoted mainly to conversation and discussion practice. Writing instruction and assignments focus on essays, commentaries, and to a lesser degree, on story writing. Apart from reading assignments for discussion (press articles and literary excerpts), students select two novels to read. Prerequisite: FREN 0500 or placement. Enrollment limited to 18. WRIT

FREN 0610. Writing and Speaking French II: International Relations.
Prerequisite for study in French-speaking countries. Continuation of FREN 0500. Class time is devoted mainly to conversation and discussion practice. Same level as FREN 0600. This course is designed for students who are interested in international relations. Discussions and writing assignments are related to global politics from French and Francophone perspectives and introduce students to the discourse of international relations in French. Prerequisite: FREN 0500. Enrollment limited to 18. WRIT
FREN 0620. Writing and Speaking French II: Literature. Prerequisite for study in French-speaking countries. Continuation of FREN 0500. Class time is devoted mainly to conversation and discussion practice. Same level as FREN 0600. This course is designed for students who are interested in literature. Discussions and writing assignments are based on a selection of literary texts from the Francophone world and introduce students to the analysis of literature. Prerequisite: FREN 0500. Enrollment limited to 18. WRIT

FREN 0720A. De l'Amour courtous au désir postmoderne. From twelfth-century courtly literature to contemporary film, this course explores the enduring romance between French culture and Eros. The ambiguities of desire are brought to the fore across changing religious and social contexts. Readings include Duras, Flaubert, Freud, and Baudrillard. Open to students who receive a 5 (AP test), 700 and above (SAT II) or with instructor's permission. First Year Seminar, open to first year students only. Please email Virginia_Krause@brown.edu if you have questions. Taught in French. FYS WRIT

FREN 0720B. The French Novel Today. What does today's French novel look like? Reading ten prominent short novels (in English translation) from the last 20 years, students will be acquainted with the novelistic landscape of contemporary France, while also learning to approach through analysis and narrative theory the novel as genre. We will consider what kinds of questions these novels pose and how - be it regarding conditions specific to our time (human/inhuman, identity, technology, the globalized world, the everyday, dystopia...) or those unceasing questions of life, time, love, predication, that every novel must ask, even while sometimes seeming not to. Taught in English. FYS WRIT

FREN 0720C. Down and Out in Paris. This freshman seminar focuses on the culture and literature of the Parisian underbelly from the 19th century to the present. It looks at representations of the laboring, marginal, and criminal classes from both high and low literary perspectives, taking pains to anchor these readings in lived contexts. Authors studied will include Hugo, Baudelaire, Zola, Orwell, Dabit, Carco, Hemingway, Genet, Vargas. Taught in English. WRIT FYS

FREN 0720D. Contes et identités francophones. An introduction to the French-speaking world through folk- and fairy tales, we will examine how folktales have been used to define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada and consider how the study and rewriting of these traditions have redefined these identities. We will explore these questions by studying tale-types from all of the above regions, tales specific to each, and literary reworkings of folktales by writers, including d'Aulnoy, Perrault, Nothomb, Ben Jelloun, Diop, and Chamoiseau. Prerequisites: 5 on Advanced Placement testing, 700 and above SAT II, or instructor's permission. Taught in French. FYS WRIT

FREN 0750D. Nous et les autres: les Français et le monde de la Renaissance à la Révolution. An exploration of early French encounters with and reactions to non-European cultures from 1500 to 1800. Studying travel narratives, essays, and fictional texts, we will examine the multiple ways that French identity attempts to come to terms with its "Others" during this crucial period of European colonial expansion. Texts by Cartier, Thevet, and Choisy; Montaigne, Molière, and Montesquieu, among others. WRIT

FREN 0750F. L'idée de l'empere dans l'imaginaire français. From the early nineteenth century to the 1931 Colonial Exposition in Paris and the Algerian Revolution, ideas and debates about slavery, race, and colonialism informed the ways in which French writers and intellectuals thought about empire and its relationship to national identity. This course examines how these debates took shape through contrasting imaginative conceptions of empire from the 1800s until the 1960s, when France lost most of her colonies. How did visions of empire contribute to the formation of French colonial identity, and what kind of purchase do these ideas have on contemporary French cultural and political life? In French. WRIT

FREN 0750G. L'animal dans la culture contemporaine. From reports of animals stranded in conflict zones and natural calamities, to cute or clever animals cast in advertisements and popular media, from the rat of Ratatouille to the caged orangutan of Nénette, the new interest in the animal marks an age of heightened awareness of the costs and ironies of the human story. We will consider in this course significant representations of the animal in contemporary French and Francophone literature, film, visual art, cultural theory and media representations. We will also revisit earlier moments linking the animal to modernity, including early film/photography and urban history. Taught in French. WRIT

FREN 0760A. Introduction à l'analyse littéraire. On what terms and with what tools can we "read" a literary text? An introduction to major genres (the short story, the novel, poetry, theater) of French and Francophone literature and to a range of analytical approaches to the text, including narrative theory, poetics and psychoanalysis. Readings will feature select 19th and 20th century works (Maugassant, Apollinaire, Ionesco, NDIaye) and excerpts from key analytic/theoretical writings (Benveniste, Todorov, Freud, Barthes, Bakhtin). Taught in French. WRIT

FREN 0980. Becoming French: Minorities and the Challenges of Integration in the French Republic (HIST 0980B). Interested students must register for HIST 0980B.

FREN 1000A. Littérature et intertextualité: du Moyen-Age jusqu'à la fin du XVIIème s. A chronological survey of French literature from the Grail romance to neoclassical tragedy. Topics will include the birth of courtly love, the Crusades, lyric poetry, and Humanism. Course discussions will be devoted to the close reading of texts by writers such as Marie de France, Chrétien de Troyes, Ronsard, Louise Labé and Montaigne. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1000B. Littérature et culture: Chevaillers, sorcières, philosophes, et poètes. From the Middle Ages to the Age of Versailles, this course examines 6 foundational moments in French civilization: the Crusades, courtly love, humanism, the witch hunts, Cartesian reason, and the emergence of the autonomous self. Close scrutiny of literary texts and films will provide a window onto French civilization before the Revolution. Readings include medieval epic, Montaigne, and Descartes. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1010A. Littérature et culture: Margins of Modernity. A survey of French and Francophone works from the 18th century to the present that reflects on a number of cultural shifts, of challenges but also resistances to hierarchies (social, sexual, political); the urban context; legacies of colonization. Various figures of marginality to be studied: vagabonds and parvenus, dandies and courtesans, outcasts and pariahs. Authors to be studied include Prévost, Marivaux, Balzac, Baudelaire, Maupassant, Duras, Camara Laye and Rachid O. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French. WRIT

FREN 1010B. Modernités Littéraires: Du 18ème siècle jusqu'à nos jours. A chronological survey of French literature introducing seminal texts from the last 300 years. Classes devoted to discussion and to the development of skills in close textual analysis. Authors to be studied include Graffigny, Balzac, Baudelaire, Zola, Apollinaire, Duras, and Ben Jelloun. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT
A study of the evolution of the French language from the Middle Ages to the present. We will trace the main periods of this linguistic, social, historical and political development. Among topics to be explored: France's encounter with English from the Norman conquest to the current so-called English "invasion," the French Revolution's destruction of dialects (patois), and the status of French in France's former colonial empire. Through a variety of French and francophone texts we will investigate the transformations brought about by Feminists and by youth from the banlieues and examine the status of French outside of France. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1030A. L'univers de la Renaissance: XVe et XVIe siècles.
An exploration of the cultural cosmos of Renaissance France through literature, visual culture, history, and film. What projects, fantasies, and nightmares characterize this stormy period in French history, from the birth of Humanism to the Wars of Religion? Other topics include the trial of Martin Guerre, court life, madness, and the New World. Readings in Montaigne, Louise Labé, among others. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1030B. The French Renaissance: The Birth of Modernity?.
This class will read works from the French Renaissance in historical and cultural context. Did the Renaissance mark the birth of what we call the modern period? So much of twentieth and twentieth-century thought relies on the notion that our modern paradigm came into being with the Renaissance. We will read literary works by writers such François Rabelais, Louise Labé, Marguerite de Navarre and Agrippa d’Aubigné in relation to both medieval and Renaissance writers and philosophers such as Jean Calvin, Martin Luther, Marsilio Ficino and Erasmus and political actors such as Francis Ist, Charles IX and Henry IV. Enrollment limited to 40. WRIT

FREN 1040A. Civilité et littérature.
How should one burp, pass gas, and spit in public? Should people use utensils when eating? How should a young woman react when a man speaks to her without her parents' consent? Questions such as these preoccupied 17c France, which defined much of what we understand today to be civility. We will examine how literature makes civility seem either natural or normal or artificial and deceptive. Readings will include selections from conduct manuals (Faret, Courtin), comedies (Corneille and Molière), letters (Voiture,Sévigné), fairy tales (d'Aulnoy, Perrault), "moralist" writing (Pascal, La Rochefoucauld, La Bruyère), and cultural history (Chartier, Elias, Foucault). Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1040B. Pouvoirs de la scène: le théâtre du XVIIe siècle.
This course examines how 17th-century theater both reinforces and undermines the ideologies of absolutism, national identity, the nuclear family, and emerging bourgeois consciousness, among others. Special consideration will be given to the theory and performance of theater in the 17th century and the present. Readings will be supplemented with screenings of videos for the plays studied (as available). In addition to papers and oral presentations, students will stage selections from some of the plays studied. Plays by Rotrou, Corneille, Molière, Racine, and an opera by Quinault/Lully. Taught in French. Prerequisite: a course at the 600 or 700 level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1040C. Le Grand Siècle à l'écran.
Why is the "Grand Siècle" depicted so frequently in contemporary French film? To answer this question we will explore the roles 17th-century culture plays in French identity through readings in history and literature and recent films focusing on 17th-century texts, personalities, or events. We will highlight both continuities and discontinuities between the 17th century and our own time. Readings by Corneille, Cyrano de Bergerac, Lafayette, Maintenon, Molière, Pascal, Racine, Sévigné. 10 films. Two short papers, two oral presentations, a weekly blog, and a final project (paper or multimedia project). Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not take French at Brown. WRIT

FREN 1040D. Molière et son monde.
In-depth study of Molière's theater and its cultural contexts. We will examine how Molière uses a variety of theatrical forms to portray the monarchy, social class, religion, medicine, and gender relations of seventeenth-century France. Plays by Molière will be studied alongside other literary texts and documents of the period as well as films (performances of plays, historical fiction). Prerequisite: a course at the 600 or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1050A. "Family Values": Représentations littéraires de la famille au 18e siècle.
This course will study the "invention" of the bourgeois family in 18th-century literature. It will examine particularly the ideological construct that supports this literature. Special attention will be given to the way in which this literature defines and orders family relationships around the notions of state, hierarchy, nature, and gender. Readings in Prévost, Diderot, Rousseau, Mme de Chatelet, and Sade. WRIT

FREN 1050B. Fictions de l'individu.
Explores various expressions of the self in the 18th century, especially with regard to conflicts with social constraints, hierarchical gendering, the ordering of class structures, and the effort to normalize sexuality. Notions of autonomy, freedom, and happiness, the chief pursuits of the Enlightenment, are examined. Authors studied include Manvieux, Voltaire, Rousseau, Casanova, Diderot, and Mme de Châtelet. Prerequisite: a course at the 600 or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1050D. The Age of Voltaire: Culture, Pensée, Société.
A presentation of various aspects of the eighteenth century through its most representative texts. This course examines the period in its diversity, from its preoccupation with philosophy to its discovery of sensibility, from the development of libertinism to the affirmation of women and claim of liberty. Authors to be read include Montesquieu, Rousseau, Sedaine, Beaumarchais, Diderot, and Françoise de Graffigny. WRIT

FREN 1050E. French Lovers: Séduction et libertinage sous l'Ancien Régime.
A study of love and relationships in the Old Regime. The course will concentrate on the major actors (the libertine, the fop), on the spaces and settings in which sexual relationships were performed, and the ordering of individuality. Authors will include Molière, Mme de Lafayette, Crébillon fils, Laclos and Sade. WRIT

FREN 1050F. Espace public; espace privé.
This course will study the "invention" of the bourgeois family in 18th-century literature. It will examine particularly the ideological construct that supports this literature. Special attention will be given to the way in which this literature defines and orders family relationships around the notions of state, hierarchy, nature, and gender. Readings in Prévost, Diderot, Rousseau, Mme de Chatelet, and Sade. WRIT

FREN 1050G. Le corps des Lumières.
This course will examine various representations of the body during the Age of the Enlightenment. We will study how these representations are influenced by notions of race and nation, discipline (Foucault), and by the Revolution. Texts by Montesquieu, Graffigny, Voltaire, Foucault, and historical context provided by Foucault, Outram and Hunt. WRIT
FREN 1050H. The Age of Voltaire: Lumières et modernité.
A presentation of various aspects of the eighteenth century through its principal representative texts. This course examines the period in its various preoccupations: with philosophy, its discovery of sensibility, the development of libertinism, and the pursuit of liberty. Authors to be read include Voltaire, Marivaux, Rousseau, Sedaine, Diderot, and Françoise de Graffigny. WRIT

FREN 1060A. Décadence.
Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Péladan, Lorrain, Rachilde, Mendès, and Nordau. WRIT

FREN 1060B. Gender and the Novel.
This course explores how major authors represented gender and sexuality. Obsessed with unlocking the mystery of femininity, novelists attempted to represent truths about sexual difference while new scientific discourses (psychiatry, sexology, criminology) aimed to analyze gender and sexual deviance in objective terms. Authors include: Balzac, Flaubert, Zola, Rachilde, Foucault, and 19th-century scientific texts. WRIT

FREN 1060C. La texte réaiste.
This course will focus on realism, both as a literary movement of the second half of the 19th century and as a style present during other eras (such as romantic realism) and in other "non-realist" genres (poetry, science fiction, literature of the fantastic). How does a literary text convince its readers that it accurately copies reality? Does the realist novel have privileged themes (sexuality, the modern city, corruption)? Readings by Stendhal, Balzac, Gautier, Jules Verne, Flaubert, Coppée, Zola, Maupassant. WRIT

FREN 1060D. L’Orient littéraire.
This course is a study of the representations of the Orient (Turkey, Arabia, Persia) in the imaginary of classical French writers of the nineteenth century. Through the analysis of the phantasms pertaining to the representations of Sexuality and Power, this course will also study a series of figures associated with the Orient like travestissement, melancholia, nostalgia, etc. in the novels of Montesquieu, Chateaubriand, Flaubert, Gautier, and others. WRIT

FREN 1060E. Genre, sexualité, et le roman du XIXe siècle.
Examines novelistic constructions of gender and sexuality in relation to 19th-century French culture and literary movements, including romanticism, realism and naturalism, decadence, and the popular novel. Topics include constructions of homosexuality in literature and non-fiction, fatal femininity, besieged masculinity, sexuality and race, prostitution, boarded housewives. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, accompanied by non-fictional sources in early sexology and criminology. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

Nineteenth century Paris in interdisciplinary perspective—literature, art, history, politics, Haussmann’s transformations of the city, revolution. Works by Balzac, Baudelaire, Flaubert, Rimbaud, Marx, Benjamin, Bernard Marceand, Ingres, Delacroix, Courbet, Manet, Caillebotte, Daumier. Classes in English, readings in original or translation depending on language proficiency of the student. WRIT

FREN 1070A. Avant-Gardes.
We examine avant-garde groups and movements, including surrealism, Collège de Sociologie, Oulipo, existentialism, Tel Quel, situationnisme, Théâtre du Soleil, politique et psychanalyse, while trying to assess their aesthetic/political platforms and their performative strategies. Readings include (poetic) manifestoes, novels, plays and essays by Breton, Calliois, Bataille, Colette Peignot, Queneau, Satre, Sollers, Kristeva, Guy Debord, Cixous, Wittig, Iriaray, Catherine Clément. WRIT

Does a writer belong to a “nation”? To which nation does one belong when one writes in the language of one’s former colonizer? Does political independence warrant the existence of a new nation? Finally: How does literature contribute to the emergence and consolidation of a new nation? Many writers faced these questions after the independence of their countries from French colonial rule. Analyzes the answers Francophone writers offered to these perplexing questions in their novels and essays. Two short papers and a final essay. WRIT

FREN 1070C. Figures du roman français au XX siècle.
We will analyse novels by Marcel Proust, Jean Giono, Julien Gracq, Samuel Beckett, Marguerite Duras, Nathalie Sarraute, Le Clézio, Philippe Sollers, Annie Ernaux and Marie Redonnet while trying to assess the main tendencies of the contemporary French novel and the cultural evolution that led to it. WRIT

FREN 1070E. Littérature, appartenance et identité.
In this course, the analysis of a series of significant literary and critical texts written by French and Francophone contemporary writers will allow us to study the meaning of the emergence of new forms of identity and belonging in 20th-century modern French and Francophone writers. Three short papers. WRIT

This course explores social aspects of the French novel in the 1920s that have earned this period between the two world wars the name “Les Années Folles.” We will first focus on the liberation of women, frivolity, sexual ambiguity and conceptions of love at the time. We will then discuss the demobilized writers, whose disarray, procrastination, suicidal tendency are the characteristics of a generation disillusioned by a society that no longer offers exciting prospects. Our meetings will also be punctuated by reflections on new autobiography as well as on new narrative techniques illustrated by the studied works. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French. WRIT

FREN 1070L. Islam, Immigration et Identité nationale dans le roman français contemporain.
This course examines how Muslim immigration into France is represented in the contemporary French and Francophone novel. We will introduce some of the major themes of anti-colonialism, such as the opposition between primitive harmony and modern alienation, and the necessity of rehabilitating the role of mythologies in modern Western culture. Then, we will discuss the French social science fiction where special consideration will be given to themes such as the decline of the sense of religious belonging in France, the disarray generated by postmodernity, dynamism of religion versus apathy of consumer society, and the mechanisms of conversion to Islam. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1100F. Contes et nouvelles du Moyen Age.
Storytelling in medieval French courts, villages, and towns. Works read (in modern French translation) include love tales, fables, chivalric adventures, comic escapades, earthy anecdotes, stories of warfare and politics. Class discussions investigate the tales and consider how medieval listeners and readers responded to them. Brief lectures on questions of cultural context. WRIT

FREN 1110B. Gender, Sexuality and the Novel.
Examines constructions of gender and sexuality in relation to the schools and styles of the 19th- and early 20th-century French novel, including romanticism, realism, decadence, and the popular novel. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, and Marguerite, accompanied by non-fictional sources in early sexology. WRIT
FREN 1110F. Le Roman contemporain.
In this course we will read a selection of French and Francophone novels from 1985 to 2015. Authors include Patrick Modiano, Marie NDiaye, Lydie Salvayre, Marie Redonnet, Jean-Philippe Toussaint and Laurent Mauvignier. Placing these novels in dialogue with key voices from critical theory (Cixous, Barthes, Derrida, Kristeva), we will pursue through the semester a sustained reflection on major contemporary “problems” including identity, subjection, hospitality, history, genealogy, gender, memory and ghosts. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1120F. L’enfer, c’est les autres.
In this course we will read a selection of plays by notable 20th century French and Francophone writers, and consider how the dramatic form organizes and complicates questions of representation, subjectivity, body, politics and voice. Authors include Sartre, Camus, Genet, Beckett, Césaire, Koltès, Duras, Sarraute, NDiaye, Redonnet. Secondary readings by Adorno, Deleuze, Kristeva amongst others. Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1130B. Révolution poétique - à la française: Baudelaire, Rimbaud, Mallarmé.
Primary emphasis: intensive study of the poetic production and theoretical texts of three writers who substantially contributed to the radical transformation of modern Western poetry. Additionally: attention to historical contexts and to influences on later writers and theories. Enrollment limited to 20. WRIT

FREN 1130E. Le Poétique et le quotidien.
In this course on the relationship between the poetic and the ordinary, unremarkable or otherwise apparently “non-lyric” matters and textures of modern living, we will consider formal and conceptual innovations in French poetry through the last 100 years as it has responded to a changing world, and continually reimagined the place of poetry in it. After situating certain coordinates of our investigation in the early decades of the 20th century (Apollinaire, Cendrars, Char, technology, war, speed, time) we will read works by later and contemporary poets including Francis Ponge, Jacques Roubaud, Michelle Grangaud, Sabine Macher. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French. WRIT

FREN 1130G. Modernismes poétiques.
Poetry begins with (more) white space on the page. The modernist remaking of poetry - beginning somewhere in the second half of the 19th century and lasting more or less through the first half of the 20th – brought about an exponential increase in the volume of that space, and in various other extensions of it (e.g. into design and drawing, into the unconscious). The course will follow those transformations by reading poems and other writings by selected poets from Rimbaud and Mallarmé to the surreacists and Ponge. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1150A. Literature and Cinema.
Introduces the fertile relationships that exist between literature and cinema. The study of several cinematographic adaptations of novels helps to answer the following questions: How does a novel translate into a film? What characterizes each medium? What kind of aesthetic impact did cinema have on literary works? Novels by Cocteau, Balzac, Zola, Maupassant, Flaubert, and Gide and films by Renoir, Truffaut, Chabrol, Rivette, and others. WRIT

FREN 1150B. Introduction to French Cinema.
French Cinema: The First 50 Years. This course explores the history of French cinema and its relation to politics, history, technology and art during the first half of the 20th Century. Readings, discussions, and lectures in French and English. Films with English and French subtitles. WRIT

“New wave” was coined by a journalist to refer to an “outburst” of filmmaking in France beginning in 1959. Never a movement, and short-lived in terms of whatever aesthetic uniformity it may have had, its effects spread across various European cinemas and became the emblem for a series of American filmmakers well into the 1970s. We will analyze work by a range of French and other cinéastes, in an attempt to understand what perhaps appears—from the current perspective—as one of the last gasps of “high cultural” production against the reality of corporate necessity and new forms of media. Taught in English. WRIT

FREN 1210C. Reading Proust at the Turn of the Century.
Proust's enduring masterpiece A la recherche du temps perdu, viewed from different perspectives: philosophical, psychological, and cultural. Open to undergraduate and graduate students interested in the rich rewards of reading this complex novel and in considering the impact of narrative fiction on our lives. WRIT

FREN 1310D. L'Orient littéraire.
Examines the representations of the Orient (Turkey, Arabia, Persia) in the imagery of French and Francophone writers of the 19th and 20th centuries. Through the analysis of the fantasies pertaining to the representations of Sexuality and Power, this course will study the dominant figures associated with the Orient. Two short papers and an oral presentation. WRIT

FREN 1310E. Paris, ville des Lumières.
Representations of the city; the crowd; the rise of the individual; the narrator as spectator and promeneur; narratives of social mobility; speed and circulation; sex and the city; Paris as a cultural place. Various authors to be studied: Marivaux, Fougerot de Monbron, Rousseau, Diderot, Mercier. Restif de la Bretonne. Taught in French. WRIT

FREN 1310F. Penser la France et l'Europe.
We will read philosophers (e.g. Levinas, Irigaray, Lipvetsky, Ferry, Renault, and Le Doveuf), anthropologists (Dumont and Favret-Saada), and historians (Duby and Perrot) while debating such issues as individualism versus holism, modernity versus postmodernity, autonomy versus freedom, democracy, feminism, violence, fashion, and France versus Europe. WRIT

FREN 1310G. War, Image, Text.
This course treats literary and film narratives of war from the 19th-century to the present (Franco-Prussian War, WWI, WWII, colonial wars, the Gulf war.) Topics include the uses and limits of realism in war narratives; issues of nationalism, patriotism, collaboration, resistance, civil rights, and the politics of gender in wartime. Students will research non-fictional sources to supplement class readings. WRIT

FREN 1310H. Contes et identités francophones.
How do folktales define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada? How have the study and rewriting of these traditions redefined such identities? We will consider these questions by studying tale-types from all of the above regions, tales specific to each, and literary reworkings of folktales by writers, including d'Aulnoy, Perrault, Pourrat, Diop, and Chamioseu. WRIT

FREN 1310J. Special Topics in French Studies I: Ecritures du Moi: Disclosures of the Self.
A study of autobiographical writings beginning with the classics (Rousseau, Stendhal) and continuing with the legacy of the genre by contemporary writers. They will include Marguerite Duras, Annie Ernaux, Jean-Claude Charles, Frédéric Neyergans, Catherine Cusset. Notions to be covered include memory and forgetting, fiction and reconstruction, writing, desire, and loss. WRIT

FREN 1310K. Short Stories.
What sort of story is the short story? What kinds of possibilities and pressures distinguish it from other forms? Attentive to its contained – and constrained – narrative economy, we shall study a range of examples of the genre, from 19th century realist and fantastic literature (Maupassant, Flaubert, Perval) to modern French and Francophone texts (Camus, Sartre, Djebbar, Condé, NDiaye). WRIT
FREN 1310M. Le fantastique.
Ghosts, spirits and specters populate the French "fantastique". Starting with the precursors of the genre in the 18th century (Jacques Cazotte’s Le Diable amoureux), we will read major works of "littérature fantastique" of the 19th century, including Balzac's La Peau de chagrin (1831), Contes cruels by Villiers de l'Isle-Adam (1883) and Maupassant’s Le Horla (1886). Select readings from critical theory and philosophy will accompany the readings (Todorov, Bergson, Derrida). We will also consider examples of the fantastic in 20th century cinema (Epstein's La Chute de la Maison Usher (1928) and Franju’s Les Yeux sans visage (1960). Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1320A. Apocalypses and Millennia.
A multidisciplinary investigation of figures such as Rimbaud, Van Gogh, the Surrealists, Simon, Blanchot, and Duras in the perspectives of history, philosophy, mysticism, literature, and the visual arts. WRIT

FREN 1320B. Du côté de la passion.
Focuses on the representation of emotions and passions in French novels from the 17th century to the present. In working out a new approach to characters in narrative fiction, the emphasis will be on perception and affect. In addition to novels, students read short essays on the nature of narrative, on emotions, and on aesthetic response. Novelists include Madame de Lafayette, Rousseau, Balzac, Flaubert, Proust, Colette, and Sarraute. WRIT

FREN 1320D. Ecrire au féminin: Women Writing in France.
Both introduces students to important female-authored texts from the 18th century to the present and addresses theoretical issues pertaining to women and writing. Topics include: the relation of gender to genre; the écriture féminine debate; development of feminist thought; women's relation to masculine literary traditions and the canon. Readings include Graffigny, Gouges, Staël, Desbordes-Valmore, Sand, Colette, Beauvoir, Duras, Bâ, Wittig, and Cixous. WRIT

FREN 1320I. Literature and Social Thought: L’Utopie Littéraire.
For centuries literary utopias have been considered a means to reinvent the world’s ideal desires/values. We will attempt to understand the role utopian texts have played in shaping the imaginary of generations of people in Europe, particularly in France. Entire texts or excerpts from novels, essays, cartoons or films by Campanella, Voltaire, Marivaux, Mercier, and others will be discussed. WRIT

FREN 1330A. Fairy Tales and Culture.
Fairy tales, which occur is almost every culture, encapsulate in (usually) succinct form many of the pressing concerns of human existence: family conflict, the struggle for survival, sexual desire, the quest for happiness, etc. This course explores why writers and readers have been attracted to the fairy-tale form through a study of its key elements and its uses in adult and children's literature, book illustration, and film. Special attention given to French contes de fées, along with North American, English, German, Italian and selected non-Western fairy tales. Discussions and readings in English with French, German, and Italian originals on reserve. WRIT

FREN 1330B. Masterpieces of French Literature.
This course will study principally the most accomplished genre of the French literature, the novel. We will analyze the major representative novels from the 17th century to the present, and we will attempt to study their access to canonicity. We will also evaluate their continued interest by focusing on the major contemporary interpretations that they have provoked. Readings in Mme de la Fayette, Laclos, Stendhal, Flaubert, Genet, and Duras. WRIT

FREN 1330C. French Women Writers.
This class analyzes the relationship between gender and literary genre through the study of texts authored by women from the 19th through the 21st century. We will read novels and poetry by George Sand, Desbordes-Valmore, Colette, Beauvoir, Marguerite Duras, Monique Wittig, Annie Ernaux, among others. Screenings of work by women filmmakers will complement readings. Course taught in English. WRIT

FREN 1410D. L’identité française.
We discuss different ways of defining French identity across centuries by stressing catholicism, the génie de la langue française, Cartesianism, French Revolution, les droits de l’homme, the French Presidency, Francophonie, and the exception française, or, in a minor key, l’esprit guerlais, French cuisine, French chanson, cafés philosophiques, and French film. WRIT

FREN 1410H. Révoltes et opposition en France.
Why are strikes and protest marches more common in France than in the United States and many other countries? A good part of the answer lies in the traditions of social and political opposition that have existed in France since the Revolution. In this course we will examine the development of labor and social unrest during the Révolution, the Commune, the Occupation, and the 1968 uprisings. WRIT

FREN 1410I. Sorcellerie et Renaissance: le sort de la sorcière.
An interdisciplinary exploration of witches and witchcraft in Renaissance France based on close analysis of primary texts-confessions from trials, iconography, literary texts, and witchcraft topic. Topics include: the trial of Joan of Arc; the science of demons, skepticism, and the nature of belief. Readings in Montaigne, Massa, among others. Enrollment limited to 20. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1410J. War, Culture, Politics.
Armed conflict in and involving France, from World War I to the war in Iraq. We will consider the socio-political climates giving rise to armed conflict, as well as the cultural products (journalism, memoirs, film, novels) resulting from the experience of war. Issues include colonialism, nationalism, collaboration, resistance, civil rights, international relations, and the politics of gender in wartime. WRIT

FREN 1410K. French Culture and Civilization: La pensée française au XVe siècle.
We will address XXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Luc Ferry and Alain Badiou, Paul Valéry, Roger Caillois, and Paul Ricoeur. Emile Durkheim, Raymond Aron, and Pierre Bourdieu; Luce Irigaray and Michèle Le Doeuf. Two oral presentations and one final paper. WRIT

FREN 1410N. Présence française en Amérique du Nord au XXe siècle.
We will examine varieties of French spoken in Northern America (Acadian French, chic, jous, creole) as well as the French culture and literature of Quebec, New England and Louisiana. Students will choose between fieldwork in a New England francophone community of their choice or writing a solid essay on North-American francophone culture/literature. WRIT

FREN 1410S. Les Français au travail: chômage et précarité dans la société contemporaine.
This course focuses on a crucial contemporary French social issue by examining the question of unemployment and the rise of so-called precarious jobs through their representations in literature, culture, and film. Special attention will be given to questions of identity, gender, race, socioeconomic factors, and politics. Authors read include Bon, Deck, Foenkinos, and Oster. In addition we will analyze several films and read the work of journalists and sociologists. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1410T. L'expérience des réfugiés/immigrés.
An exploration of the experience of refugees and immigrants with two components. The first component consists of close study of the French context from Decolonization up through the current refugee crisis based on literature, film, the press, and critical essays. The second component of this course will give students the opportunity to work with refugee/recent immigrant communities in Providence. This is a community-engaged course requiring substantial commitment beyond the classroom. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT
FREN 1420B. France at War.
This course treats armed conflict from the Franco-Prussian war to the war in Iraq through readings of essays (Aubrac, Camus), fiction (Maupassant, Duras), press articles, correspondence, and film viewings (Tavernier, Chabrol, Pontecorvo). Topics include: nationalism and patriotism, collaboration, resistance, torture, civil rights, international relations, and the politics of gender in wartime. WRIT

FREN 1420C. Gender Theory and Politics in France.
This course explores thought, activism, and public policy in contemporary France pertaining to issues of gender and sexuality. Attention will be paid to intellectual and cultural differences between France and the US, as well as Franco-American exchanges in critical theory related to these domains (e.g. Foucault, Butler). Topics include Beauvoir’s legacy and 1970’s feminisms (Cixous, Iriigaray, Wittig, Delphy); recent public policy debates (representative parity, marriage equality, surrogacy); sexual violence; feminism and multiculturalism (gender and national identity, anti-sexism/anti-racism, French secularism and the headscarf debate). Taught in English. WRIT

After an intensive week of training, students choose a specific topic of research and work independently during the rest of the course. They meet with the instructor and present partial results of their research in the weekly seminar. Projects include collecting oral history in Woonsocket; research on (and in) Franco-American institutions located in the vicinity; and studies on Franco-American history, onomastics, literature, film, and press. While not required for all of the projects, a basic knowledge of French is strongly recommended. Conducted in English. WRIT

FREN 1510A. Advanced Oral and Written French: Traduction.
An introduction to the theory and practice of translation, this course will be designed to expand students’ range and appreciation of written styles and registers and will be based on translation exercises and texts reflecting different types of written and oral communication. Texts will range from literary texts (excerpts from novels, plays, comic books...) to journalistic texts (articles from newspapers...). Class activities will also include comparative studies of translated texts, as well as grammar review and vocabulary work. Course taught in French. Written translations to and from French. Prerequisite: FREN 0600 or equivalent. Enrollment limited to 18. Instructor permission required. WRIT

FREN 1510C. Advanced Oral and Written French: A table!.
Thematic units with different approaches to French cuisine and the French meal, such as regional cuisine, meals in literature and at the movies, radio-TV culinary shows, political and economical considerations, and, of course, a practical unit on how to compose, prepare and eat a French meal. Follows FREN 0600 in the sequence of language courses. Development of oral skills via presentations, debates, conversation, and discussion based on the various topics. Writing activities: essays, translations, commentaries, journals, creative descriptions and stories, etc. Taught in French. Pre-requisites include FREN 0600 and FREN 0610 and FREN 0620. WRIT

FREN 1510D. Advanced Oral and Written French: L’animal Post-Moderne.
This course will focus on depictions of animals in the present day French (and Francophone) public and cultural sphere — in literature, journalism, cinema, advertisements, the visual arts, etc. Through presentations, class discussion and reading and writing assignments (essays, short responses, a journalistic piece, an interview) students will develop their linguistic and critical skills in French while engaging thoughtfully with the course’s materials and questions. Follows FREN 600 in the sequence of language courses. Enrollment limited to 18. WRIT

FREN 1510F. Advanced Written and Oral French: Regards sur la France actuelle.
This course will use contemporary and classic works, newspaper articles, and film – all “made in France” – to explore and analyze the myths, realities, and contradictions of France today. Through in-class discussions, debates, and presentations, students will gain a deeper understanding of the enigma and legacy of this European country that once was the center of the cultural world and an early model of democracy. Follows FREN 0600 in the sequence of language courses. Writing activities, essays, commentaries, journals, etc. May be repeated for credit. Prerequisite: FREN 0600. Enrollment limited to 18. WRIT

FREN 1510G. Advanced Written and Oral French: La Sociabilité à la Française.
An exploration of French sociability, this course is designed to expand students’ oral skills through discussions and presentations, as well as to help them develop their writing skills via essays, creative projects, blog entries, and use of Twitter. Students will experience the different modes of sociability through a variety of texts (novel excerpts, comic books, newspaper articles) and films, ranging from 17th-century fairytale to contemporary thinkers (Sartre, Bergson), and will be invited to reflect on their own practice of social networks through essays and debates. Taught in French. Prerequisite: FREN 0600 or equivalent. Enrollment limited to 18. Instructor permission required. WRIT

FREN 1510H. A nous deux la mode.
A bird’s eye view of the fashion world, we will explore the birth and evolution of the French fashion industry (from the development of department stores to the birth and rise of Haute Couture), its impact on society and social change, as well as its relationship with art and advertisement. Materials range from literary excerpts to journalistic texts, online resources, and films, and will include portraits of fashion designers, studies of iconic fashion pieces, descriptions of techniques and crafts, and analyses of fashion shows. Activities include presentations, discussion, essays, commentaries, and the creation of a trend book. Taught in French. WRIT

FREN 1510J. Advanced Oral and Written French: Photographie.
Follows FREN 0600 in the sequence of language courses. Development of oral and written skills via presentation, debate, conversation and discussion on a variety of topics. Through novels, articles, photographs and discussions, this course will explore the world of photography from its beginnings until today. Theory and practice; professionals and amateurs; famous people and paparazzi; photo reportage and photo studio; argentic and digital; your own photos, etc. Taught in French. Pre-requisites include FREN 0600 and FREN 0610 and FREN 0620. WRIT

FREN 1610B. To Be Determined.
No description available. WRIT

FREN 1610C. Advanced Written French: Atelier d’écriture.
An advanced course in (functional or creative) writing. The workshops range from practice in interpersonal communication (letters) to essays and various forms of narration. Recommended to students returning from a study-abroad program, students with a native French background who lack formal training in writing, or post-FREN 1510 students. Exercises for each workshop plus a final writing project. Prerequisite: FREN 1510. Enrollment limited to 15. Instructor permission required. Taught in French. WRIT

FREN 1710A. France-Afrique/Afrique-France: Je t’aime moi non plus.
Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature and film to reflect on the historical events and, socio-political processes that have shaped the encounter between France and Africa. How are African and French novelists/filmmakers responding to this relationship? Topics include: the Colonial Encounter, “World War II”, Decolonization, Negritude and Immigration. WRIT
FREN 1710B. Black, Blanc, Beur.
This course examines how the ethnic make up of contemporary French society challenges its republican ideals of Liberty, Equality and Fraternity. Violent clashes involving teenagers from immigrant desents and the police are recurrent. Anti immigration policies have also become a major component of political discourse. We will use literature; film, newspapers and popular musical forms to reflect on issues such as integration, identity, violence, race and class. WRIT

FREN 1710E. Machines de guerre: Violence et société en Afrique francophone.
From civil war in Ivory Coast to terrorism in Mali, war and violence in Francophone Africa both provoke and respond to debates about France’s colonial legacy and continued presence on the continent. Yet these phenomena have much to tell us about emerging social relations, new forms of politics, and how ordinary Africans view the future—their own, that of their countries, and of the continent as a whole. This course studies these and related questions in a variety of media, including anthropological texts, written testimonies, novels, documentary films, philosophy, and investigative journalism. Anglophone Africa will also be considered. Taught in English. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1710F. Politique, démocratie, et corruption en Afrique francophone.
What do representations of democracy (its promises as well as its shortcomings) and corruption have to tell us about postcolonial and postmillennial politics in contemporary Francophone Sub-Saharan Africa? How have these interrelated problems and discourses been negotiated in French and African literature, film, journalism, and anthropology? This course will address these and related questions in a number of national and historical contexts, paying special attention to the ways in which current events on the continent both complement and complicate our understandings of Francophone African cultural production. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French. WRIT

FREN 1720A. Disenchantment and Melancholia in Postcolonial Africa.
In the decades following independence, African novels and films were characterized by euphoria. This optimism has since been replaced by narratives of hopelessness. Rather than assuming that disenchantment and melancholia lead inevitably to pessimism, we will explore ways in which artistic forms engage the idea of a better future through a careful examination of the predicaments facing the African continent. In English. WRIT

FREN 1720B. Foreign Bodies/Forbidden Sexualities in Africa and the Caribbean.
The practice of homosexuality is a crime in several Caribbean and African countries. In Uganda, it is referred as "carnal knowledge of another against nature" while Zimbabwe's president Mugabe claimed homosexuals are "worse than pigs and dogs." We will explore ways in which artistic forms engage the LGBT experience within predominantly heterosexual societies. Topics include: psychoanalysis, Black feminism, Black Queer theory, HIV/AIDS, gender role socialization. WRIT

FREN 1720C. Black Paris.
This course is a study of Black Paris, as imagined by three generations of Black cultural producers from the United States, the Caribbean and Africa, who lived in Paris. We will investigate how the representation of Paris functions in the construction of black identities from Josephine Baker to Shay Youngblood. WRIT

FREN 1720E. Melancholia Africana: Loss Mourning and Survival in Africa and the Diaspora.
Traditional beliefs, historical and cultural circumstances construct how the African understands himself/herself in relation to the world. From this construction resonates a theme of loss - loss of land; of freedom; of language; of self. Melancholia Africana incorporates loss but moreover, grapples with the external world. We will explore ways in which literature, film and music portray loss, resilience and survival. DPLL WRIT

FREN 1900B. Figures de l'étranger dans la littérature française.
From Montaigne to Marguerite Duras, Segalen to Jean Genet, modern French literature has been haunted by a specter: the figure of the Other (the foreigner, the "immigrant," the "bon sauvage," etc.) Various literary and philosophical texts will help us study the historical status and the various forms of these figures in modern French literature. Two short papers. WRIT

FREN 1900F. Senior Seminar: L'Identité française.
This course examines different ways of defining French identity across centuries by alternately or simultaneously stressing Catholicism, le génie de la langue française, Cartesianism, French Revolution, individualism and les droits de l'homme, France in the European Union, l'exception française, and Francophonie or, in a minor key, l'esprit gaulois, French cuisine, French chanson, cafés philosophiques and French films. WRIT

FREN 1900G. French Feminisms.
Analysis of feminist thought, activism, and creative work in France from the middle ages to the present day. Topics include: proto-feminisms, revolution and women's rights, utopian feminism, suffrage, psychoanalysis and other "new French feminisms," reproductive rights, la parité, Islamic and Muslim feminisms. Authors include: Christine de Pisan, Gournay, Poullain de la Barre, Gouges, Sand, Démar, Beauvoir, Irigaray, Wittig, Halimi, Amara. WRIT

FREN 1900H. La France en guerre.
Studies the rise of far-right tendencies (nationalism, anti-Semitism, legitimism, racism), beginning with the Franco-Prussian war and its aftermath, and examining key moments up to the present day. Topics include the Dreyfus Affair, the Vichy regime, the Front national. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. WRIT

FREN 1900K. Extrême droite en France.
Studies the rise of far-right tendencies (nationalism, anti-Semitism, racism, Islamophobia, homophobia) in France from the 3rd Republic to today. Topics covered include the Dreyfus Affair, the Vichy regime, the Front national. While the main focus is on France, we will also give comparative consideration to questions related to political extremism that resonate in the US and other European nations, such as national identity, populism, immigration, exclusion, religious intolerance. This course will draw on a variety of sources, fictional and non-fictional, including print journalism, novels, historical essays, and film. For senior French Studies concentrators; instructor permission required for others. In French. WRIT

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

Independent study in an area of special interest to the student, with close guidance of a member of the staff, and leading to a major paper. Required of candidates for honors, and recommended for all senior concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

FREN 2110A. La Naissance du roman Français.
From the origins of medieval romance in the 12th century, this course traces the history of the genre through the end of the sixteenth century. What was the fate of the knight errant in the modern era and how did the invention of printing transform medieval romance cycles? Did the humanist novel offer a corrective to the vagaries of chivalric romance? Literary works will be read in light of theories of the novel. Readings in Chrétien de Troyes, the prose Lancelot, Rabelais, Bakhtin, Lukács, and others. Taught in French.

FREN 2110B. Pratiques de l'aveu.
This course examines Renaissance literature in light of confessional practices in early modern France, focusing on notions of secrecy, sexuality, and guilt as well as on knowledge and the self. The primary corpus includes not only literary texts, but also confessor's manuals, judicial handbooks, and confessions from witch trials. Readings in Foucault, Labé, Montaigne, Marguerite de Navarre, among others.
FREN 2110C. Rhétorique et polémique à la Renaissance.
An exploration of the performative modes of literature in light of the Renaissance's rhetorical tradition. Examines the text in a variety of rhetorical situations from poetic seduction, to the courtier's pursuit of royal favor, to the Religious Wars. Also engages contemporary theories of discourse while confronting early modern rhetorical theory with contemporary speech act theory (Austin and others). Writers include les grands rhétoriqueurs, Labé Montaigne, Du Bellay, Ronsard, pseudo-Longinus.

FREN 2110D. Humanisme et Renaissance (humain, inhumain, non-humain).
Erasmus famously wrote: "one is not born human, one becomes human." For Renaissance humanists, how does one become human, and what role do the "Humanities" play in this process? This course explores Renaissance understandings of the "human" as well as its antitheses, the inhuman, non-human, and animal. Readings include Rabelais, Marguerite de Navarre, Du Bellay, Montaigne, and La Boétie.

FREN 2110E. "Sorcellerie et Renaissance".
Drawing on literary studies, history, and anthropology, this course explores witchcraft from the Late Middle Ages through the Renaissance. What cultural dynamic produced the figure of the witch, caught up in the interplay of power and knowledge? Close readings of works by demonologists and their critics offer a lens for examining the making of witchcraft theory as well as its eventual demise. Other topics include the imagination and dreams, violence and the sacred. Special attention will be paid to the methodological challenges facing the scholar of early modern literary studies. Readings in Montaigne, Rabelais, Ronsard, Foucault, and Mauss, among others.

FREN 2130A. Civilité et subjectivité au XVIIème siècle.
This course explores the effect of civilité on subjectivity in 17th-century France. After considering pertinent theories of subjectivity, we examine how civility links the sense of "distinction" to disgust and, more precisely, the "abject," and how this linkage changes over the course of the century under the influence of political, economic, and aesthetic forces. We pay particular attention to the ways civility constructs language, the body, sexuality, gender, and class.

FREN 2130B. Civilité, littérature, et différences sexuelles.
How did "politeness" shape gender identities in 17th-century France? What role did civilité play in the period's conceptions of the body, sexuality, and relations between the sexes? How did literature both implement and contest the norms of civility? These questions are explored by examining conduct literature, salons and the art of conversation, "galant" poetry, male melancholy, and female cross-dressing.

FREN 2130C. Fictions du masculin.
The aesthetics and politics of masculine identities in seventeenth-century France. Both literary representations and case studies of historical figures are considered. Topics include: the picaresque hero, male melancholy, effeminacy, salons and women's cultural authority, sodomy, the king's body. In addition to critical readings in gender theory and cultural studies, texts by Sorel, Molière, Lafayette; iconography; satirical literature.

By examining how recent thinkers have used the period to (re)define "classicism," "modernity," "modernism," or the "post-modern" and confronting these interpretations with selected 17th-century texts, we will explore the crucial role the century plays in French cultural, literary and theoretical debates. Readings include Barthes, Bourdieu, Derrida, Foucault and Descartes, Cyran de Bergerac, Pascal, La Rochefoucauld, Racine, La Bruyère, and Perrault.

FREN 2130E. Corps et esprits libertins.
Throughout the 17th century, writers flouted religious, philosophical, political, sexual, and social norms/dogmas, provoking debate, censorship, and even persecution. This seminar will explore the themes and contexts of libertine thought and practice, as well as the attacks it occasioned in both philosophy and literature. We will study debates about skepticism, Epicureanism, sexual freedom, religious and political dissent, and will read, among others, Montaigne, Charron, Vial, Garasse, Gassend, Cyrano de Bergerac, La Mothe Le Vayer, Ninon de L'Enclos, Pascal, Molière, La Fontaine, Saint-Evremond, and Deshoulières.

FREN 2130F. Façons d'aimer: Discourses of Sexuality in Early Modern France.
This course will examine both the connections and tensions among the legal, literary, philosophical, medical, and religious discourses of sexuality in early modern France. Topics such as Neoplatonism, erotomania, one-gender theory, conjugal love, cuckoldry, impotence, sodomy, and tribadism will be studied in their historical, social, and literary contexts. In addition to primary sources (selections from edicts, essays, treatises) and secondary readings (theoretical and critical), literary texts by Rabelais, Ronsard, Labé, Montaigne, Vial, Molière, Choisy, among many others. Class discussions in English or French, depending on preparation of students. Enrollment limited to graduate students or advanced undergraduates (with instructor's permission only).

FREN 2130H. Au-delà de l'Europe: La France et le monde au XVIIe siècle.
In the 17th century, contact with the Middle East, India, the Far East, North and South America, and the Caribbean profoundly changed the ways the French understood themselves and their place in the world. We will study 17th-century depictions of the non-Western world in travel narratives, early ethnographic writing, drama, and fiction, including representations of religious difference, race, slavery, gender, and Orientalism. Readings: Bernier, Champlain, Choisy, Le Code noir, Galland, Marie de l'Incarneation, Les Mille et une nuits, Molière, Montaigne, Racine, the Relations des Jésuites de la Nouvelle-France, Scudéry, Tavernier. Theoretical readings by Anderson, Chakrabarty, Glissant, Said, i.a. In French.

FREN 2150A. Bodies of Enlightenment.
An exploration of the body in the eighteenth-century in its multiple guises: foreign and national; disciplined and idle; natural and mechanical; libertine and political. Readings in Prévost, Diderot, Rousseau, Boyer d'Argens, Sade. Critical essays by: Michel Foucault, Lynn Hunt, David Cottom, Dorinda Outram.

FREN 2150B. Foucault et les Lumières.
An examination of Foucault's key writings on the French Enlightenment and the confrontation of his criticism with the major works of that period. We will consider how other French theoreticians differ with Foucault in examining the Enlightenment, particularly Lyotard and Ferry. Readings in Histoire de la folie, Les Mots et les choses, Survêtement, and Histoire de la sexualité and texts by Prévost, Rousseau, Diderot, Sade and others. Open to qualified undergraduates.

FREN 2150C. Le Roman libertin: approches critiques.
We will attempt to study the evolution of the different genres of the libertine novel in the 18th century: roman de séduction, the conte, roman de la prostitution. We will also examine how current approaches around issues of gender, sexuality, pornography allow for new contextualization of that novel. Authors to be read are Crébillon fils, Duclos, Godard d'Aucour, La Morlière, Boyer d'Argens, Denon and Laclos. Taught in French.

FREN 2150D. Qu'est-ce que les Lumières?.
A critical examination of the authors of the French Enlightenment from the point of view of the capital ideas that will forge the century: notions of universalism and otherness, notions of politics (such as reason and violence), notions of gender and race. Examines the critical reception of the Enlightenment by contemporary theorists and historians, principally Foucault, Hunt and Darnton. Readings in Graffigny, Boyer d'Argens, Diderot, Rousseau, and Sade.
FREN 2150E. Théories et fictions des Lumières.
This course seeks to examine the idea of "Lumières" in Eighteenth-century France through the reading of some of the major authors of the period. Focusing on the relationship between theory and fiction we will analyze the concepts central to the French Enlightenment: happiness, progress and freedom as they are formulated both in fiction (novels and plays) and in theoretical texts. Readings will include major texts by Montesquieu, Voltaire, Diderot, Rousseau, as well as other writers and philosophers. Conducted in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

FREN 2170A. Courants poétiques du XIX siècle, Romantisme, Modernisme, Symbolisme.
Special attention to Hugo, Baudelaire, Rimbaud, and Mallarmé.

FREN 2170B. Crimes écrits.
This course focuses on fictional crime, literary criminals, and criminalized literature in 19th-century France. Topics include the romantic murderer, popular literature, the aesthetics of evil, literary trials of the Second Empire, naturalism and legal transgression. Authors to be studied include Balzac, Lacenaire, Sue, Baudelaire, Flaubert, Barbery d'Auréville, Zola, Maupassant, Foucault.

FREN 2170C. Sexualités décadentes.
A study of fin-de-siècle literature and ideology. Topics include: degeneration and the new sciences of sexology and criminology; representations of homosexuality, prostitution, and the femme fatale; and masculinity in crisis. Texts by Huysmans, Nordau, Rachilde, Zola, Lorrain, Verlaine, Krafft-Ebing, Lombroso. Secondary sources in literary criticism and contemporary theories of sexuality.

FREN 2170D. Lyrisme et différence sexuelle.
Seminar exploring the relationship between gender and the lyric, often deemed a "masculine" genre. We will read male and female poets of the 19th century (including Desbordes-Valmore, Hugo, Baudelaire, Verlaine, Rimbaud, and Vivien) and examine the gendering of the poem on various levels. Topics include the construction of masculine poetic identity, the possibility of a female lyric voice, homosexual traditions, gender and form.

FREN 2170G. Decadence.
Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Péladan, Lorrain, Rachilde, Mendès, and Nordau.

FREN 2170I. Naturalisme et positivisme.
This seminar studies the naturalist literary "method" and its ideological implications in relation to 19th-century positivist thought and the disciplines it informed. Topics include scientism, anti-clericalism, republicanism, gender and social reform, and the birth of sociology. In addition to several novels from Zola’s cycle, Les Rougon-Macquart: Histoire naturelle et sociale d’une famille sous le Second Empire, primary sources include texts by Maupassant, Comte, Taine, Littre, Durkheim. Secondary readings in the sociology of literature and cultural history.

FREN 2170J. Naturalisme et décadence.
In this seminar we will read seminal works associated with these two nineteenth-century literary tendencies. We will explore the antithetical nature of their aesthetic programs and the ideological implications of their differences. Moving beyond the literary text, we will consider corresponding cleavages that divided France along similar lines between the old guard (Catholic monarchists) and the new (republican secularists), between science and the Church, between Dreyfusards and anti-Dreyfusards, among other conflicting viewpoints that polarized France at the end of the century. Works by Zola, Maupassant, Huysmans, Lorrain, Péladan, Mendès.

FREN 2170M. L’Art de l’excès.
This seminar considers the late 19th-century idea of decadence, understood as extravagant reaction to perceived social dissipation and political decline. We will focus on the esthetics, politics, and practices of excess in fin-de-siècle fiction. Topics include: decadent estheticism, proto-fascism, altered states, and non-normative sexualities. Authors include Eekhoud, Lorrain, Huysmans, Péladan, Rachilde, Lemonnier, Vivien. Fictional texts will be accompanied by contemporary non-fictional sources (Nordau, Bourget, Krafft-Ebbing, Lombroso). Taught in French.

Does a writer belong to a “Nation”? To which nation does a writer belong when he or she writes in the language of his or her former colonizer? Does political independence warrant the existence of a new nation? How does literature contribute to the emergence and consolidation of a new nation? How does Francophone literature relate to French literature? Readings of major contemporary Francophone writers.

FREN 2190E. Le sujet en procès.
An engagement with 20th century literature and critical theory through a series of perspectives on the subject, including the narrative, the lyrical, the historical, the feminine, the specular. Reading fiction and poetry (Michaux, Beckett, Ponge, Simon, Djabar) alongside key theoretical writings (Deleuze, Derrida, Benveniste, Kristeva), we will consider some of the trials/processes (procès) that have marked the fate of the modern subject.

FREN 2190F. L’Honneur des poètes.
This course will focus on 20th century narrative attempts to give form to war, as historical and traumatic event and scene of a protagonist/narrativity in crisis. Starting with the paradigmatic battlefields of Stendhal’s La Chartreuse de Parme and Céline’s Voyage au bout de la nuit, we will then consider major post-1945 novels (and films) dealing notably with the second world war and the Vichy years (Perec, Simon, Duras, Resnais, Modiano, Littell, Jenni, Echenoz), along with theoretical writings on war, representation and the military-industrialized present (Baudrillard, Virilio, Chamayou, Scarry, Butler). Taught in French.

FREN 2450. Exchange Scholar Program.

FREN 2600A. À quoi pense la littérature?.
In this seminar we will study the relationship between literature and philosophy to clarify the following questions: What kind of relationship does literature have with philosophical discourse? Does literature produce any philosophical knowledge? What kind of thought is produced in literary texts? This course will draw on works borrowed from French and Francophone literary fiction and modern philosophy. One exposé, a midterm and a final paper.

FREN 2600B. Gender and Sexuality in Contemporary France.
Critical theory in France focusing on changes in the last decade in approaches to feminism, gender and sexuality. Topics include 1970s feminisms (Cixous, Irigaray); history of sexuality (Foucault); contemporary political debates such as the Pacs and la parité (Agasinsky, Fraisse, Borrilo, Halimi); masculine domination (Bourdieau); gay and lesbian studies (Eribon, Bourcier).

FREN 2600C. Théories de la littérature.
This seminar considers the late 19th-century idea of decadence, understood as extravagant reaction to perceived social dissipation and political decline. We will focus on the esthetics, politics, and practices of excess in fin-de-siècle fiction. Topics include: decadent estheticism, proto-fascism, altered states, and non-normative sexualities. Authors include Eekhoud, Lorrain, Huysmans, Péladan, Rachilde, Lemonnier, Vivien. Fictional texts will be accompanied by contemporary non-fictional sources (Nordau, Bourget, Krafft-Ebbing, Lombroso). Taught in French.

FREN 2600D. Théories du texte.
Examines the major theoretical approaches to the notion of text in literature and cinema. Compares the works of literary critics (Barthes, Starobinski) to those of philosophers and film theorists (such as Deleuze, Derrida, Ropars-Willeumier). Significant literary works and films by Blanchot, Duras, Beckett, Godard, and Robbe-Grillet are put to the task.
FREN 2600F. French Feminisms meet Queer Theory.
Feminist and GLBTQ thought and activism in contemporary France, their conflicts and compatibilities, and their exchanges with American critical theory. Topics include Beauvoir's legacy and 1970's feminisms (Cixous, Irigaray, Wittig); Foucault on the history of sexuality; Bourdieu on masculine domination; recent public policy debates (le PaCS and la parité); the impact of US queer theory on GLBTQ studies in France.

FREN 2600K. Politique et fiction en Afrique.
This seminar investigates the political aesthetics of fiction in Francophone Africa with a special focus on our post-millennial period. We will examine new and established writers, filmmakers, and theorists as they rework conventions of postcolonial satirical and protest fiction and address contemporary problems of globalization, corruption, and social violence. How does current Francophone African fiction speak to contemporary political theory, and in what ways does this fiction address and constitute a politics of genre? And how does African fiction use politics to mediate its complicated relationship to theories of world literature? Taught in French.

FREN 2600L. Au croisement des événements (de mai 68).
Nearly 50 years ago France was living through the “events” of May ’68, a “revolution” that was not only cultural and political but at the same time artistic and intellectual. We will try—to analyze a series of texts—first to understand the stakes of movements such as Situationism, Structuralism and Tel Quel, and second, to examine the relevance of those groups and their ideas in the very different context of the present time. Texts by Debord, Barthes, Sollers, Derrida, Deleuze, Foucault and others. Taught in French.

FREN 2600Z. Cinema and Deconstruction.
Though there are only a few texts by Jacques Derrida on cinema, his thought allows us to grasp the contemporary regime of cinematic images. Reading Derrida and other authors with whom he has been in dialogue, we will use such philosophical concepts as auto-immunity or spectrality in order to analyze various filmic texts and contexts. How do images circulate, how do they contaminate each other? How can we understand the dissemination and connectedness of screens? Is it possible for a film to testify or be a witness? These are some of the questions we will approach from a deconstructive perspective.

FREN 2610A. Discours amoureux.
Confrontation of literary, philosophical, and psychoanalytical discourses on love in the 20th century. Authors discussed include Claudel, Proust, Bataille, Gracq, Duras, and Sarraste. Secondary readings from Foucault, Derrida, Barthes, Irigaray, Levinas, and Kristeva.

FREN 2610C. Le récit post-moderne.
‘Postmodernism’ is a word much used and misused in a variety of disciplines, including literature, visual arts, film, architecture, literary theory, history, and philosophy. Drawing from the theoretical work of essayists such as Baudelaire, Jean-Francois Lyotard, Antoine Compagnon, Roland Barthes, and Linda Hutcheon, this course will attempt to analyze defining characteristics of postmodern thought—storytelling, autobiography, anecdote, localization, etc.—in the works of major contemporary French and Francophone writers of fiction.

FREN 2610D. Théories de l'action communicative et de l'intersubjectivité.
Approaches communicative action from the perspectives of literary criticism, pragmatics, political philosophy, feminist criticism etc. and examines the interplay between speech and silence, politeness and directness, reciprocity and domination etc. Authors include Benveniste, Barthes, Kristeva, Merleau-Ponty, Irigaray, Bourdieu, Molère, Balzac, and Duras. Open to qualified undergraduates.

FREN 2610E. Littérature française et cinéma.
This course considers the relationship between cinema and literature from the perspective of adaptation. The passage from writing to screen is most often discussed in terms of fidelity of a film to an original literary work. The study of texts and films will allow us to analyze the theoretical, stylistic, and ideological stakes of adaptation. We will propose a typology in three parts: the desire for fidelity of images to text; creative interpretation and adaptation; the limits, even impossibility, of adaptation. Enrollment limited to 40.

FREN 2620B. Groupes littéraires et esthétiques communautaires au XXe siècle.
Examines avant-garde groups and movements, including surrealism, Collège de Sociologie, Oulipo, existentialism, Tel Quel, situationnisme, Théâtre du Soleil, politique et psychanalyse, and Féministes révolutionnaires. Attempts to assess their aesthetic and political platforms to evaluate their representative strategies. Readings include (poetic) manifestos, novels, plays, and essays by Breton, Bataille, Sartrre, Lacan, Barthes, Derrida, Kristeva, Cixous, Wittig, and Irigaray.

FREN 2620C. Théories de la Production Textuelle et de l’intersubjectivité.
Approaches textual production from the perspectives of literary pragmatics, political philosophy, or feminist criticism and examines the interplay between speech and silence, politeness and directness, reciprocity and domination, etc. Authors include Austin, Wittgenstein, Benveniste, Barthes, Kristeva, Merleau-Ponty, Ducrot, Irigaray, Bourdieu, Molère, Balzac, and Duras.

FREN 2620D. La pensée française au XXe siècle.
We will address XXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Maurice Merleau-Ponty, Luc Ferry and Alain Badiou; Paul Valéry, Roger Caillois, and Paul Ricoeur; Émile Durkheim, Raymond Aron, and Pierre Bourdieu; Lucie Irigaray and Michèle Le Doeuff. Two oral presentations and one final paper.

FREN 2620E. Discours amoureux.
We will discuss love novels/plays (by Proust, Claudel, Bataille, Duras, Sollers, Ernoux, Redonnet) and essays on love by Barthes, De Rougemont, Bataille, Kristeva, Lévinas, Irigaray.

FREN 2620F. France-Afrique / Afrique-France: Je t’aime moi non plus. Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature to reflect on the historical events and socio-political processes that have shaped the encounter between France and Africa. Topics include: the Colonial Encounter, "World War II", Decolonization, Negritude and Immigration.

FREN 2620H. The Francophone Routes of Postcolonial Thought.
One of the more striking omissions from the founding theoretical work of postcolonial studies, The Empire writes Back (1989), is Francophone writing in general and the Francophone Caribbean in particular. Nevertheless, the Francophone Caribbean maintains a shadowy yet powerful presence in postcolonial thought. The course sets out both to resituate francophone writing in the blindspots of postcolonial theory and to explore the way in which a postcolonial approach liberates writing in French from what some see a the neocolonial label of francophonie.

FREN 2900. Theory and Methods of Foreign Language Teaching.
Introduction to the theoretical and practical aspects of foreign language learning and teaching. Specific topics include theories of language acquisition, an overview of teaching practices and the principles underlying them, selection and evaluation of textbooks, teaching materials, and learner variables. Students observe beginning language courses and do micro-teaching. Taught in English. Undergraduates may enroll with instructor's permission.

FREN 2970. Preliminary Examination Preparation.
For graduate students who have completed their course work and are preparing for a preliminary examination.

FREN 2980. Reading and Research.
Work with individual students in connection with special readings, problems of research, or preparation of theses. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

FREN 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.
Center for Geometric Computing

The Center for Geometric Computing, founded in the summer of 1995, consists of members of the faculty of the Department of Computer Science and their students. The Center was initially established to enhance the visibility of a major research effort funded by the Army Research Office and the National Science Foundation. The main objective of the Center is to facilitate the transfer from basic research in computational geometry to several applied areas.

Over the years, the Center has expanded its core geometric computing research focus into new strategic directions with significant potential for technological and economic impact, including applied cryptography, computer security, cloud computing, data security, graph drawing information visualization, and metrology. Funding for research in the above areas is currently provided by NSF and NetApp. Members of the Center are Professors Roberto Tamassia (Director), Franco P. Preparata (past Director), and Bernardo Palazzi. The Center frequently hosts internationally known visitors participating in joint projects.

German Studies

Chair
Gerhard H. Richter

The Department of German Studies is a vibrant intellectual community with strong ties to the full range of critical inquiry that characterizes the humanities at Brown. It focuses its research and teaching on German literature, culture, and critical thought (from German Idealism and Romanticism to the Frankfurt School and beyond), with a comparative and transdisciplinary orientation. It offers both the B.A. and the Ph.D. in German Studies, affording its students – from beginning language learner to advanced doctoral researcher – the opportunity to combine their interests in the literary, cultural, and intellectual production of the German-speaking countries with a wide variety of complementary pursuits, including philosophy, aesthetics, history, music, cultural theory, psychoanalysis, and film, among others. The Department encourages this approach through its flexible yet rigorous curriculum; intense research and teaching collaboration with faculty in related Brown departments and from partner institutions in Europe; rich and varied course offerings in both German and English; as well as attractive study abroad opportunities in Berlin and Tübingen.

For additional information, please visit the department’s website: https://www.brown.edu/academics/german-studies/

German Studies Concentration Requirements

German Studies exposes students to the language, literature, and culture of the German speaking areas of Central Europe. Concentrators combine intensive study of the German language with interdisciplinary studies by complementing courses from the German Studies core program with courses from other departments that deal with topics from the German cultural tradition. The quest for national identity that dominated German history in the nineteenth and twentieth centuries has been augmented by contemporary Germany’s efforts to come to terms with its past and create new ways of dealing with diversity. Our curriculum therefore looks back at the German literary, cultural, and historical tradition, examining figures from Goethe or Christa Wolf to Marx, Freud, Nietzsche, and Heidegger, alongside the “texts” of contemporary German media, including television, film, and music. Most concentrators study abroad for one or two semesters.

*In spring 2017, Professor Jane Sokolosky will serve as concentration advisor. Professor Kristina Mendicino will return as concentration advisor in fall 2017.

Standard program for the A.B. degree

Many students elect to complete a double concentration, combining German Studies with one of the above areas, or with fields such as International Relations or Economics, Comparative Literature or History of Art and Architecture.

Knowledge of the German language is not required for declaring a concentration in German Studies. However, since language fluency is the basis for sophisticated understanding of German culture, students must meet a language requirement by the time they graduate.

Concentration Requirements

- Nine courses beyond GRMN 0400 or GRMN 0450;
- At least six of the nine courses must be at the 1000-level (or higher);
- Two of the 1000-level courses must involve writing assignments in German, and students must obtain at least a grade of B in these courses;
- At least five of the nine courses must be taken in the Department of German Studies (or four if a student spends a whole year in Germany on Study Abroad);
- Completion of a Senior Seminar during the senior year (i.e. a course from the German Studies 1900 series) as part of the five courses within the Department of German Studies; and
- If a student studies abroad for one semester, as many as four courses, in the case of two semesters, as many as five courses, from study abroad may count toward the concentration.

Honors

Candidates for honors will be expected to have a superior record in departmental courses and will have to be approved by the Department of German Studies. Honors candidates must take one additional course at the 1000-level from the German studies offerings and present an acceptable Senior Honors Thesis. The additional course may be used for preparation of the honors thesis. Students are encouraged to discuss their thesis topics with the concentration advisor no later than the third week of classes in Fall of their Senior year.

German Studies Graduate Program

The department of German Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The A.M. degree is only awarded as a transitional degree for Ph.D. candidates and is not open for admission for non-Ph.D. applicants.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/german-studies

Courses

German Studies

GRMN 0100. Beginning German.
A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate successfully about everyday topics. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in GRMN 0200 covers the entire year and is recorded as the final grade for both semesters.

FREN XLIST. Courses of Interest to French Concentrators.

Fall 2017
The following courses may be of interest to French concentrators. Please see the sponsoring department for the time and location of each course.

Cogut Center for Humanities
HMAN 2971D Caring for the Truth
Comparative Literature
COLT 1814T Maghrebi Fiction and Psychoanalysis

Brown University
469
GRMN 0110. Intensive Beginning German.
An intensive, double-credit language course that meets five days a week for 9 hours and focuses on speaking, listening, reading and writing skills and the cultures of the German-speaking countries. At the end of the semester, students will be able to communicate successfully about everyday topics relating to the university, jobs, daily life and traveling. Ideal for undergraduate students interested in learning German for study abroad or for concentration requirements and for graduate students interested in starting their foreign language requirements. The course is designed for new students of German, regardless of any previous experience with German.

GRMN 0120. German for Reading.
This course prepares students to read and understand German texts from a variety of disciplines and in various genres. This intensive introduction to German grammar and syntax is for students without prior knowledge of German, but also for those students with some background in German who wish to review and master German grammar. The student who successfully completes this course will have the necessary foundation for reading and translating texts from German into English.

GRMN 0200. Beginning German.
A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate about everyday topics and participate in the annual film festival. This is the second half of a year-long course. Students must have taken GRMN 0100 to receive credit for this course. The final grade for this course will become the final grade for GRMN 0100.

GRMN 0300. Intermediate German I.
Focuses on deepening students’ understanding of modern German culture by reading texts and viewing films pertinent to Germany today. Intended to provide a thorough review of German grammar and help students develop their writing, reading, listening, and speaking skills. Frequent writing assignments. Four hours per week. Recommended prerequisite: GRMN 0200.

GRMN 0400. Intermediate German II.
An intermediate German course that stresses improvement of the four language skills. Students read short stories and a novel; screen one film; maintain a blog in German. Topics include German art, history, and literature. Frequent writing assignments. Grammar review as needed. Four hours per week. Recommended prerequisite: GRMN 0300. WRIT

GRMN 0450. Intensive Intermediate German.
Open to students participating in Brown in Berlin or Tübingen, this is an intensive intermediate course which meets 20 hours per week for one month in Berlin. Students work on all four language skills through daily reading, writing and speaking assignments. The course introduces students to contemporary German literature, culture and politics. Prerequisite: GRMN 0300 or equivalent. May not be taken for credit by students who have completed GRMN 0400.

GRMN 0500A. Cold War Germany's and the Aftermath.
The year 1990 unifies Germany and divides two decades in German history. The course investigates how self-identification and the experience of present time were depicted in German literature and film in East and West in the 80s and 90s. Oral and written skills in German are furthered while deepening participants’ understanding of Germany’s cultural and social situation. In German. Prerequisite: GRMN 0400 or permission. WRIT

GRMN 0500B. From Zero Hour to the Wende.
An exploration of postwar German culture through the study of literary and film texts. Oral and written skills in German are furthered while deepening participants’ understanding of the prehistory of contemporary Germany. In German. Prerequisite: GRMN 0400 or permission. WRIT

GRMN 0505E. The Presence of the Past: German Literature and Film (1945-present day).
Exploration of ways in which the German past, through cultural materials, including literature and film, played a role in the construction and deconstruction of the Berlin Wall, the two Germanys, and contemporary Germany. German oral/written skills are furthered while deepening participants’ understanding of present-day Germany. In German. Prerequisite: GRMN 0400 or permission. WRIT

GRMN 0506F. Twentieth-Century German Culture.
A broad exploration of twentieth-century German culture using many kinds of written and visual texts (e.g. literature, journalism, film, art). While continuing to work on all four language skills (speaking, listening, reading, writing) students will gain more intensive knowledge about German culture, society, and history. In German. Recommended prerequisite: GRMN 0400. WRIT

GRMN 0600B. Was ist Deutsch?.
In this course we will examine some of the ideas and myths that became entangled with the emerging notion of a "German" identity in the eighteenth and nineteenth centuries. Some of the terms that we will discuss include 'Kultur,' 'Bildung,' 'Freiheit' and 'Gesellschaft,' all of which have rich semantic histories. Conducted in German. Recommended prerequisite: one course in the GRMN 0500 series. WRIT

GRMN 0600C. From Faust to Freud: Germany's Long 19th Century.
In the 19th century, a fundamental renegotiation took place about what it means to be German. Literary, aesthetic, and philosophical discourses played a decisive role in these deliberations on German identity. We will study seminal texts from these fields and discuss how they shaped German self-understanding in the 20th century and beyond. Readings by Goethe, Büchner, Stifter, Wagner, Nietzsche, Raabe, Fontane, George, Freud, among others. In German. Prerequisite: GRMN 0500.

GRMN 0750A. Faust and the Faust Legend.
Variations on the Faust theme focus on the role of knowledge in modern society. How do we define what we know? How do we accommodate knowledge with belief? What are the limits of human knowledge and can they satisfy us? Texts from the Reformation to the present: Marlowe, Calderon, Goethe, Turgenev, Mann, Bulgakov, Kerouac, Havel. In English. Enrollment limited to 20 first year students.

GRMN 0750B. Tales of Vampirism and the Uncanny.
This course compares literary texts of horror and haunting in English and German Romanticism. The psychoanalytic foundations of vampirism are discussed to enable students to boldly go beyond mere fandom and engage these texts on a more sophisticated level. Readings by Walpole, Coleridge, Poe, Tieck, E.T.A. Hoffmann and others. In English. Enrollment limited to 20 first year students.

Twenty-five percent of all new literary books worldwide are crime fiction. As a means of a society to reflect upon itself, crime fiction reflects how certain cultures deal with the dialectics of threatening and securing civic order, how they depict mentalities, traditions, topographies, or cultural chance. In English.

GRMN 0750D. The Poetics of Murder: Crime Fiction from Poe to the Present.
In this course, we will trace the literary and cinematic depiction of mystery and mayhem from the earliest manifestations of the genre to the present. Texts will include examples from the "Golden Age," the hard-boiled mode, the police procedural, and historical crime fiction. Enrollment limited to 20 first year students.

GRMN 0750E. Reading Film: An Introduction to German Cinema.
What is it that fascinates us about cinema? What desires and drives have held us in thrall to the moving image? This seminar introduces you to writing about film, not just within the specific field of media studies but within the humanities as a whole. We will examine 12 filmic examples (ranging from early silent film to contemporary popular cinema) alongside a selection of theoretical and historical readings. The course will impart the basic skills needed to write in a critical, reflective, and rigorous way about film. For those interested in film in the context of any humanities field. Enrollment limited to 20 first year students.
GRMN 0750F. Historical Crime Fiction.
There is almost no time period that has not been covered by historical crime fiction. From ancient Egypt and Rome to 18th century China, historical crime fiction has complemented and contested our knowledge of history. In this seminar, we will do some extensive time travel and explore how crime fiction explores the past and challenges our understanding of bygone times. Readings of texts by Ellis Peters, Umberto Eco, Peter Tremayne, Lindsey Davis, Alan Gordon, Robert van Gulik, Laura Rowland, among others. FYS WRIT

GRMN 0900B. Great Works from Germany.
Cultural and historical analysis of some of the most significant German texts from the past two centuries. Writers: Lessing, Thomas Mann, Günter Grass, Christa Wolf. Philosophers: Kant, Marx, Nietzsche, Freud. Sections: Enlightenment and its limits, liberation and oppression, and love and death. Students will give one presentation in class and write a final essay. In English.

GRMN 0900C. Introduction to German Literature.
This survey course will give a historical overview of the main periods and genres of literature in German from the eighteenth to the early twentieth century. We will also consider how literature relates and contributes to the cultural, intellectual, and political history of Germany. In English. WRIT

GRMN 0900D. History of the Holocaust (JUDS 0902).
Interested students must register for JUDS 0902.

GRMN 0990B. The German Novel in the 19th and 20th Century.
The modern and postmodern German novel provides some of the most intriguing reading in the history of Western culture. From 19th century realism to 20th century postmodernism, these authors have commented on political events, provided historical hindsight, analyzed the German psyche, and initiated literary innovations that would have a profound impact on world literature and captivate readers worldwide. Works by Fontane, Kafka, Hesse, Mann, Grass, and Sebald, among others. In English.

GRMN 0990C. Introduction to Scandinavian Literature.
An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Ibsen, Strindberg, Munch, Hamsun, Josephson, Sodergran, Lagerkvist, Vesaas, Cronqvist, August and Vinterberg, as well as children's books by Astrid Lindgren and Tove Jansson. In English.

GRMN 0990D. The German Novel From Classicism to Realism.
What is a novel, and how did it emerge as such a dominant genre in the course of the 18th and 19th centuries? This course introduces some of the most important German prose works prior to the 20th century, including texts by Goethe, Novalis, Hoffmann, Droste-Hülshoff, and Stifter. We will begin with the novel's earliest classical forms, follow its development in tandem with genres such as the fantastic tale and the novella, and end with a discussion of realism. All readings and discussions in English; no German language proficiency required.

GRMN 0990E. The Rhine River: An Aesthetic, Environmental, and Political History.
From Hölderlin to Hugo, cannons to canalization, this course examines representations of Europe's most important waterway in the modern period. Although it has long been seen as a "natural" border between France and Germany, the Rhine River has been anything but undisputed. Both the French and German nationalist movements claimed the river as their own, spawning a bi-lingual catalogue of songs, poems, and historical legends. We will approach the Rhine from an interdisciplinary perspective, with readings from economists, environmentalists, historians, and cultural studies scholars. We will be aided by a vast array of primary source material. Taught in English.

GRMN 0999M. Marx and Money in Modern Germany.
No critique of capitalism has been more enduring than Karl Marx's nineteenth-century account of European finance and industry. We will engage Marx's work alongside a close reading of the societies Marx sought to critique. We will also contextualize the work of Marx's contemporaries and successors, including Engels, Simmel, Sombart, as well as look at the continuation of the "capitalism debate" in Weimar and Nazi Germany. Our focus on the societies in which these writings emerged, allows for a less obstructed view onto these economic and social ideas. Issues of religion, gender, politics, militarism, and globalization will be considered. In English.

GRMN 1090. Advanced Written and Spoken German.
Designed to increase the range, fluency, and accuracy of idiomatic expression through written and oral practice, and to improve students' reading skills of progressively more difficult authentic texts from a variety of subject areas. Discussions, group projects, and oral reports. Review of selected grammar topics, systematic vocabulary building. Not to forget: "Deutsch macht Spass!" In German. Recommended prerequisite: one course in the GRMN 0600 series. WRIT

GRMN 1200C. Nietzsche - The Good European.
Nietzsche prided himself on his transnational identity. He loved German literature and was himself a writer of the first rank. Yet he was critical of the culture and the politics of his nation and he loved the literatures and cultures of many other nations. We will study his philosophical works with a view to his criticisms of Deutschum and his affirmation of other traditions — starting with the Greeks, for by profession he was a classicist. We will also study Nietzsche's journeys—for he was convinced that the places in which he thought and wrote were essential to his thinking and writing. Enrollment limited to 40.

GRMN 1200G. Repetition: Kierkegaard, Nietzsche and Freud (COLT 1814W).
Interested students must register for COLT 1814W.

GRMN 1200H. Writers in Exile: Addressing Fascism in America.
Having fled Nazi Germany, Ernst Bloch wrote of fascism: "The masks of the Ku Klux Klan were thus the first fascist uniform." He was among many diverse writers in exile to be reminded of the political and social formations s/he was seeking to escape. Even Thomas Mann, the erstwhile White House guest and bourgeois advocate of American democracy, aroused the suspicions of the FBI and came to view in Cold War politics tendencies towards a "fascist dictatorship." In this course, we will closely read texts that emerged from German exiles with a view to their implications regarding fascism and America.

GRMN 1320A. German Aesthetics from Lessing to Heidegger.
A survey of some of the most important German-language contributions to theories of art. Authors include Lessing, Kant, Schiller, Hegel, Nietzsche, Benjamin, Adorno, and Heidegger. Emphasis will be on how aesthetics intersects with literary theory and the idea of critique, and also how it contributes to discussions about knowledge, subjectivity, and power. All readings in English translation.

GRMN 1320C. Goethe's Children.
The name "Goethe" looms large over modern German literature, but what are founding figures without the daughters and sons that question and challenge their authority? This course offers a broad introduction to Goethe's life and work, focusing on themes and questions of youth and childhood in his writings. Readings include canonical works such as The Sorrows of Young Werther, Iphigenia in Tauris, Wilhelm Meister's Apprenticeship, Faust, and Elective Affinities. We will also examine Goethe's legacy by looking at musical, theatrical, and philosophical responses to images of youth and childhood in his works. [Taught in German; all students welcome.]

GRMN 1320D. Goethe.
Selected readings of Goethe's theater plays, novels, and poetry. Explores the meaning of reading Goethe today, at the 250th anniversary of his year of birth, and investigates the activities around the celebration of this anniversary. Time permitting, we consider versions of Goethe's texts in film and other media. In German. Prerequisite: GRMN 0600 or permission.
GRMN 1320E. Classical German Literature: Goethe und die Klassik. The anthropology and aesthetics of Weimar Classicism. Readings of major works by Johann Wolfgang Goethe and Friedrich Schiller, with discussion of selected texts by Herder, Humboldt, and Kant. In German. Pre-requisite: GRMN0600 or placement. Prerequisite: GRMN 0600 or permission.

GRMN 1320F. Eighteenth-Century German Aesthetics. A survey of important aesthetic writings from the period, including some texts of Winckelmann, Lessing, Schiller, Goethe, and Hamann. Major questions to be treated include the role of imitation, the concept of form, the relationship between the beautiful and the good, and formation of aesthetic judgments. Course will conclude with selections from Kant’s Critique of Judgment. In English.

GRMN 1320G. Drama and Religion. Lessing used the stage as his “pulpit” when forbidden to publish in religious disputes. Some dramatists addressed particular religious views in tragedies or satirical comedies; others staged religious themes more generally or in metaphysical imagery. We examine the variety, nature and context of these stagings in texts by major German authors: L. Gottsched, Gellert, Lessing, Schiller, Goethe, Kleist, and Hölderlin. In English, with a German section (TBA) for those able and interested.

GRMN 1320O. Freudian Inspirations: Psychoanalysis and the Arts. This course engages with the central concepts and motifs of Freud’s psychoanalytic theory and how they relate to works of literature, art, and film. What do Sophocles, Ovid, and Hoffmann tell us when we read Oedipus Rex, The Metamorphoses, and The Sandman today? How does our understanding of these texts differ from or resemble Freud’s reading of them? And when we engage art that cites psychoanalytic concepts—such as Hitchcock’s Marnie or Lars von Trier’s Melancholia—do we recognize the Freud we encounter in our readings of his own texts? (In English; all students welcome)

GRMN 1330A. The Individual in the Age of Industry. This seminar discusses the second part of the 19th century, which is distinguished by nation building, industrial revolution, advance of science, realism and belief in progress but also nihilism and cultural pessimism. We investigate how the new age of pragmatism and the “technological sublime” is reflected in short stories by major German writers such as Adalbert Stifter, Karl Gutzkow, Theodor Storm, Gottfried Keller, Wilhelm Raabe, Theodor Fontane, Arno Holz and Gerhart Hauptmann. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340A. Crime and Punishment- Introduction to German Mystery Texts and Films. This course provides an exploration of German crime, detective and mystery texts and films ranging from the early 19th century to contemporary fiction. In addition to exercising hermeneutic skills, this course aims at improving proficiency in oral and reading comprehension, as well as speaking and writing skills, with an emphasis on vocabulary expansion, advanced Grammar review and stylistic development. This course is recommended for students interested in a combined introduction to literature and high-level language learning. Prerequisite: GRMN 0600 or permission.

GRMN 1340B. Guilt Management: Postwar German Culture. The central theme of postwar German Culture, from the so-called “Zero-Hour” in 1945 to postunification, was dealing with the Nazi past. We discuss how writers, filmmakers, and critics tried to establish a public discourse on guilt. Films and readings by Mitscherlich, Syberberg, Reitz, Müller, Grass, Christa Wolf, Sichrovsky, Biller, Chaim Noll, and others. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340D. Modern German Prose, 1978-1998. Since the end of the 1970s, East and West German prose has tended to concentrate more on everyday life than on the overbearing questions of memory that were so central to immediate postwar authors. The changing function of literature in Germany is explored by reading representative prose fiction by major authors such as Becker, Delius, Hein, Strauss, and Walser. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340I. Turn of the Century. The most important issues in literature around 1900 will be discussed: the critique of language, media, psychoanalysis, urbanization, technical progress, the construction of the subject and a growing sense of isolation. Texts by Hofmannsthal, Rike, Schnitzler, Robert Walser, Georg Simmel, Freud, Nietzsche, Hermann Bahr and others. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340J. The Works of Franz Kafka. We will read a selection of texts by Kafka (including short stories, a novel, and journal entries) in order to explore his importance for the aesthetics of modernity. Topics include: representation of the law, literature and religion, the role of the paternal, and guilt. Frequent short papers based on close reading of texts, and a longer final paper. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340K. Unmittelbar nach 1945: Literatur und Film in Deutschland. Often called “Zero Hour,” the period immediately following the end of the Second World War was one of turmoil and uncertainty in Germany. An enormous cultural production sprang up under extremely difficult conditions. Texts and films by Heinrich Böll, Wolfgang Borchert, Alfred Andersch, Wolfgang Staudte, Helmut Käutner, and others. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1340L. The Modern Period. Explores the fascinating flowering of modernity in Germany, including the period around 1900 (adolescent Angst and the new Broadway version), Weimar culture (revolution, women’s emancipation), Nazi culture, and exile literature in socio-historical context; including examples from film, art, and popular culture. Authors may include: Wedekind, Brecht, Kafka, T. Mann, Toller, Keun. In German. Recommended prerequisite: GRMN 0600 or equivalent.

GRMN 1340M. Kafka's Writing. Writing—vocation or duty, gift or curse, poison or antidote? This course provides an introduction to Kafka's stories, novels, journal entries, and letters, with a focus on his complicated, tortured relationship to the idea and practice of writing. We will explore how the difficulties of this relationship generate an enigmatic, tragic-comic oscillation between hope and despair that continues to fascinate readers today. This is a writing-intensive course, and the frequent short assignments will involve drafts, revisions, and individual consultations, with the aim of getting you to think critically about your own relationship to writing about literature. In English. Enrollment limited to 40. First year students require instructor permission. WRT

GRMN 1340Q. Vergangenheitsbewältigung: German Literature of Memory. This course will examine one of the most loaded terms in German Studies, "the coming to terms with the past" or rather "the mastering of the past", which concerns German strategies of dealing with the atrocities of World War II and the Holocaust. Thus, this course will focus on the literary engagements with issues of trauma, memory, and remembrance. Authors include Adorno, Celan, Klüger, Grass, Weiss, Wolf, Müller, Timm, Kluge, and Sebald. The course will also have a closer look at contemporary debates regarding "Vergangenheitsbewältigung" and the culture of memory in Germany itself. In German. Prerequisite: GRMN 0600.

GRMN 1440A. Dada-Performance and Digital-Interactivity. This course investigates the invention of performance art in German Dada and its legacy and further development in contemporary interactive art in digital media. Both phenomena are discussed with respect to their aesthetic, philosophical, and social roots and intentions. In German. Prerequisite: GRMN 0600 or permission.
GRMN 1440C. Poetry and the Sublime.

We will examine some theories of the sublime, and read them alongside selected poets who take up certain related questions about representation, perception, and power. The goal will be to come to a better understanding of why the sublime is important as a category in thinking about the relationship between literature, philosophy, and history. Texts may include: Longinus, Schiller, Kant, and Paul de Man on the theory of the sublime, and poetry by Hölderlin, Wordsworth, Rilke, and Celan. In English; reading knowledge of German helpful but not required.

After the failed revolution of 1848, the German bourgeoisie had to curb its desire to control the sphere of politics. At the same time, the effects of modernization started to manifest themselves in full force. We will discuss how the revolutionary changes of the second half of the 19th century in Germany were worked through in literature, and specifically in the realist novella. Readings by C.F. Meyer, Keller, Stifter, Storm, Raabe, Fontane, Mörike, and Heyse. In German. Recommended prerequisite: one course in the GRMN 0600 series.

GRMN 1440E. Märchen.

Fairy tales in German are usually associated with the Grimm brothers, but there is a rich tradition of popular (Volksmärchen) and literary (Kunstmärchen) fairy tales going back further and continuing into the present. We read a representative sample, consider typical features of the genre, and discuss the role of Märchen in shaping ideology. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1440F. Lyric Poetry From the Middle Ages to the Present.

Broad exploration of German poetry, including intersections between poetry/music/art: spiritual/worldly (medieval troubadours, Baroque); classical Greece/modern Germany (Goethe, Schiller, romantics, art songs), poetry/politics (Heine, Brecht), expressions/symbols (Rilke, expressionism), poetry after Auschwitz (Celan, Bachmann), contemporary reflections on history (V. Braun), poetry between cultures (Turkish-German poets, hip-hop). Intensive reading, discussions and vocabulary building. In German. Recommended prerequisite: one course in the GRMN 0600 series.

GRMN 1440G. Talking Animals and the Politics of World Literature.

We have encountered talking animals within literature for over four thousand years. Alongside the Fables of Aesop, there are comparable animal stories from Ancient Babylon, Egypt, and from the Indian-Arabian-Persian cultural space, whose distribution was just as far-reaching. Animal fables appear easy to understand and universally valid. But do we really understand what it means when animals talk in texts? This course will employ current approaches to human-animal-studies alongside concepts of world literature to examine why animals are made to talk, what functions animal stories have, and what the conditions for their dissemination are. [In English; all Brown students welcome.]

GRMN 1440H. Projections of America.

Since its discovery, 'America' has served as a projection screen for a variety of images of the 'New World': as utopia, as harbinger of modernity, and as the origin of political, economic, and cultural imperialism. Readings of the changing and shifting image of America in German literary and journalistic texts from the 18th century to the present (Lenau, Goethe, Heine, Sealsfield, May, Frisch, and others). In German. Prerequisite: GRMN 0600 or permission.

GRMN 1440L. German Lyric Poetry: From Goethe to Heine.

A survey of German lyric poetry during what Heine calls "die Kunstperiode." Focus on rhetoric of the lyric: apostrophe, prosopopeia, metaphor, metonymy and allegory. Close reading, frequent writing assignments. Reading in German; class discussion in English.

GRMN 1440N. Kunstmaerchen: the Literary Fairy Tale in the Nineteenth Century.

"Das Kunstmaerchen" or literary fairy-tale occupies a central place in the literature of late romanticism. Focusing on major examples from writers such as Tieck, Eichendorff, and Brentano, we will examine how the content and the representational structure of these texts contribute to debates on categories like the "natural," the "fantastic," and the "moral." In German. Prerequisite: GRMN 0600 or permission.

GRMN 1440O. Modern German Drama.

Explores the fascinating modern German dramatic tradition from the 19th century to the present, emphasizing plays that are still a part of the stage repertory today and authors that have exerted a strong international influence. Authors may include: Büchner, Wedekind, Brecht, Toller, Dürenmatt, Frisch, Weiss, Heiner Müller. In German. Recommended prerequisite: GRMN 0600 or permission.

GRMN 1440P. Heroes, Failures and Other Peculiar Characters-The German Novel from Goethe to Kafka.

Readings in the tradition of the German novel, including the Bildungsroman, Realism and modernist fiction. Consideration especially of failed heroes and the failure of the novel genre. Authors include Goethe, Hoelderlin, Novalis, Stifter, Fontane, Musil and Kafka. Readings and class discussions in English.

GRMN 1440S. Grimms' Fairy Tales.

"One doesn't know the sorts of things one has in one's house," says the servant girl in Kafka's "A Country Doctor," as a stranger, who will soon act violently towards her, emerges on all fours from an unused sty. The precarious moment of finding more than one seeks in one's midst is among the key motifs of Grimms' "Household Tales" that we will trace, following the way they move writers of literature, psychoanalysis, and critical theory. Reading the Grimms among others, we will find: what was "once upon a time" is not finished, nor can these uncanny tales be domesticated.

GRMN 1440U. Migrantenliteratur.

Literature written by migrants and their descendants has become a vital part of post-war German language and culture. Since the arrival of the so-called guest workers in the 1950s, the Jewish immigrants from the former Soviet Union during the 1990s, and recent Syrian refugees, Germany has become an "Einwanderungsland" (a country of immigration) and an increasingly multicultural society. This has triggered anxieties and phobias, exploited by populist politicians and movements, but it has also profoundly changed the literary landscape. The class will explore the contributions of authors such as Rafik Schami, Feridun Zaimoglu, Emine Özdamar, Zafer Senocak, and others.

GRMN 1440V. Armut / Poverty.

Eros, according to a legend told by Diotima in Plato's Symposium, is the son of Poverty – Penia – and Resoure – Poros –. Poverty is the other side of the development of (economic, linguistic) wealth and riches. Our seminar will unfold certain aspects of (the love for) this other side. Readings include texts by Bonaventura (Apologia pauperum/Defense of the Mendicants), Hans Sachs (Die tugentreich fraw Armut), Heinrich Heine (Die Tugend der Armut), Franz Grillparzer (Der arme Spielmann); fairy tales by the Grimm brothers; Karl Marx; Bertolt Brecht (Vom armen B.B.), Walter Benjamin (Erfahrung und Armut), and Martin Heidegger (Die Armut).

GRMN 1440W. The European Novel from Goethe to Proust (COLT 1420).

Interested students must register for COLT 1420.

GRMN 1440X. "Stranger Things: The German Novella".

Goethe's famous description of the novella as an "unheard-of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? [In English. All students welcome.] WRIT
GRMN 1450B. Die Berliner Republik und die Vergangenheit.
The opening of the Berlin Wall and the reunification of Germany brought with them a dramatic rethinking of both the past and the present of the German nation. Literature, film, architecture, visual art, and music have played important parts in this process. This course will consider a range of documents from the contemporary Berlin Republic and the way they negotiate the Cold War and pasts. All readings and class discussion in German. Prerequisite: GRMN 0600 or equivalent. Enrollment limited to 20.

GRMN 1450C. National Socialism and the Shoah in Recent German Prose.
Since Germany's reunification in 1990, German discourse on National Socialism and the Shoah has changed significantly. With the generation of the eye-witnesses disappearing, the third generation after World War II renegotiated issues such as perpetratorship, guilt, and responsibility on the one hand, wartime-suffering on the other. During the last decade, German literature represented voices from different generations/groups. This seminar will examine literature by Grass (b. 1927), Klüger (b. 1931), Timm (b. 1940), Schlink (b. 1944), Biller (b. 1960) and Erpenbeck (b. 1967) to situate these literary interventions within the framework of characteristic debates of the last few years. Enrollment limited to 40.

GRMN 1450F. 20 Years After: The End of GDR and German Reunification.
The fall of the Berlin Wall heralded the German reunification rather than the reformation of the GDR as an example of "democratic socialism." The 20th anniversary gives reason to discuss the development of Germany since 1990. Readings of Volker Braun, Christa Wolf, Thomas Brussig, Ingo Schulze, Clemens Meyer, Yadé Kara. Films: Goodbye Lenin, Das Leben der anderen, Willenbrock. Issues discussed: Cold War, Perestroika, Reunification, East-/West-German identity, Migration and Globalization. In German. Prerequisite: GRMN 0600 or permission. DPLL

GRMN 1450G. Love and Death.
The course will examine the theme of love and death in four texts from around 1800: Lessing's Emilia Galotti, Goethe's Werther, Kleist's Penthesilea and Büchner's Woyzeck. We will focus on historical changes in the understanding and theory of emotions. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1450H. Images of America in German Literature.
What was, has been, and is America to Germans? Some believe America to be moving in the right direction, and others imagine America as thoroughly evil from the very beginning. Literature, however, does not say this or that. It displays complex images, plays with prejudices, idols, ideals, and stereotypes to show their inner mechanisms and conceptual limits. And, of course, it generates images and counter-images. By examining some canonical texts on this topic, the seminar reconstructs the major perceptions, attributions and ascriptions with which German authors over times have envisioned the United States – even without travelling there.

GRMN 1640C. German National Cinema from 1917 to 1989, and Cold War Germans in Film.
Examines three phases of German national cinema in competition with Hollywood's early dominance of film production, from the founding of the UFA in 1917 through National Socialist Cinema, the "New German Cinema," and the cinema of East Germany. Explores representations of Germans during the Cold War, 1949-1989, a mythical Germany cast as the locus of "world evil." Weekly screenings. In English.

GRMN 1660B. Berlin: A City Strives to Reinvent Itself.
Contemporary Berlin buzzes with energy, yet this metropolis is characterized by the legacy of fascism and divided government. The city as cultural space will be interrogated in interdisciplinary ways. Topics range from Weimar culture and Nazi architecture to the Cold War and German reunification. In English with possible extra session for students who have completed GRMN 0400 or higher.

GRMN 1660C. German Culture in the Nazi Era.
Explores the variety and the contexts of German cultural production during the Nazi era. We will examine party sanctioned mass-mediated culture in the Third Reich including literature, film, theater, and public spectacle; as well as "unofficial" cultural productions including exile literature, literature of "inner emigration," "degenerate" art, and concentration camp poetry. We'll inquire into the effects of the political ministration of culture in the Nazi era, asking to what degree continuities in cultural production were sustained after 1933, and investigating the hallmarks and the legacies of a distinctive "Nazi culture." Previous course work in German history and/or the Holocaust recommended but not required. In English.

GRMN 1660F. After Hitler: German Culture and Politics, 1945 to Present.
From the country that produced Hitler and the Holocaust to today's democratic, peaceful Germany, this course explores the enormous cultural and political transformations since 1945 in both German states and reunified Germany. Topics include: responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, popular culture, socialism in East Germany, political and intellectual debates, recent assertions that Germany is now a "normal" country. In English.

GRMN 1660G. Kafka.
This course will analyze both the uncanny and comical aspects of Kafka's writings. It offers an exercise in literary analysis discussing methodological approaches as diverse as literary theory, media studies, and cultural studies. It also presents an overview of one of the twentieth century's most haunting writers who in many ways determined for our postmodern mind what we call "literature". In German. Prerequisite: GRMN 0600 or permission.

GRMN 1660H. Literary Discourse of Minority Cultures in Germany.
During the last thirty years or so, strong minority cultures have emerged in Germany. Writers from diverse cultural backgrounds have given voice to the problems and challenges of living among a dominant German culture that only reluctantly started to listen to their concerns. Authors discussed include Schami, Oren, Atabay, Dirschereit, Monikova, Müller, and others. Focuses on questions of cultural and ethnic identity as expressed in and through literary texts. In German. Prerequisite: GRMN 0600 or permission.

GRMN 1660L. Literature and Other Media.
When looking at literature and other media, the question is not, whether one will be replaced by the other, but rather, what one medium can do that the other cannot do so well or at all. Study of twentieth-century Media Theory Made in Germany with special emphasis on the relationships of literature to audio-visual media. Readings by Brecht, Benjamin, Adorno, Enzensberger, Kittler, Hörisch and others. In English.

GRMN 1660K. Thinking After Philosophy.
What does it mean when, after Nietzsche, we speak of the "end of philosophy"? Contemporary critical discourse in many fields of the Humanities and social sciences is profoundly impacted by a skeptical break with philosophical traditions that can be traced back to 18th- and 19th-century Germany. This course will follow the development of this break through a range of major paradigms, schools, and critical methods from the time of Goethe to the twentieth century. All readings and class discussion in English. First year students require instructor permission to enroll.

GRMN 1660L. German Jews and Capitalist Markets in the Long Nineteenth Century.
This course focuses on the commercial lives of German Jews, 1798-1918. While the classic historiographical debates surrounding assimilation, emancipation, and anti-Semitism will not be ignored, our spotlight will remain on capitalist markets, where Germans and Jews most often encountered one another. Our study will begin and end in the Franco-German borderlands, with revolution and warfare. In between, we will traverse the German landscape, meeting, among others, bankers in Frankfurt, wine merchants in the Rhineland, and department store magnates in Berlin, all in an attempt to understand the complexities of cross-cultural (dis)integration. Readings and instruction in English.
Brown University

GRMN 1660P. Having Beethoven Over in 1970.
In 1970, Beethoven arrives in Bonn to visit his birthplace. A tour guide shows him around. It is a journey that begins with the museum one knows, but which gets weirder with each subsequent room. There is a jukebox in the basement. A gully is burning. There are strange utensils on display in the kitchen. As the demarcation between documentary and fiction become blurry, we realize that somebody must have added more rooms to the original floorplan. Our course will analyze TV crime series, Hollywood feature films, the Peanuts, radio pieces, and artworks surrounding Beethoven’s bicentennial. Taught in English.

GRMN 1660Q. Film and the Third Reich.
This course explores the cinema of the Third Reich as well as filmic responses to World War II and the Holocaust. Sections will be dedicated to propaganda films by Leni Riefenstahl and others; to the relationship between Third Reich cinema and Hollywood; to propaganda films produced by the Allied forces, and to movies about the Holocaust such as Shoah and Schindler’s List. We will discuss key concepts of film theory, cinema’s political efficacy, Holocaust representation in film, music, and language, and questions of trauma, commemoration, and victimhood. [Taught in English; students from diverse fields welcome.]

GRMN 1660R. Freud.
Introduction to Freud’s theories of the unconscious and its manifestations, Freud’s thinking on culture and aesthetics, his theory of sexuality, his view of religion, and of fascism. In English.

GRMN 1660S. Mord und Medien. Krimis im intermedialen Vergleich.
The genre of the mystery novel has proven exceedingly productive in German speaking countries. At the same time, the new and the newest media have discovered the mystery genre as one of the most appealing narrative structures in contemporary culture. Readings of mystery narratives in book form, on television, on CD-ROM, and on the Internet. In German. Prerequisite: GRMN 0600 or permission.

From emancipation to anti-Semitism and from the ‘Golden Age’ to the Shoah, Jewish life in Germany has experienced extremes comparable to no other cultural exchange. Widespread philo-Semitism and the official taboo on anti-Jewish sentiments indicate that the relationship between Jewish and non-Jewish Germans today remains one of mutual nonunderstanding and distrust. Texts by Lessing, Mendelssohn, Heine, Kafka, and others. In English.

GRMN 1660U. What was Socialism? From Marx to “Goodbye Lenin”.
The international socialist movement was born in Germany, and many of Germany's most important cultural figures were attracted to its striving for social justice. But socialism seems to have come to a tragic end. Course includes theoreticians such as Marx and Luxemburg, writers such as Heine and Brecht, and a focus on East German culture (film, art, literature) and its aftermath since the fall of the Berlin Wall. In English. Prerequisite: GRMN 0600 or permission.

GRMN 1660V. Nietzsche.
This course will provide an introduction into Nietzsche’s thinking. Discussion of the major works from Thus Spoke Zarathustra to Thus Spoke Zarathustra: No pre-requisites. In English.

GRMN 1660W. Early German Film and Film Theory.
We will study the interference/interface of cinema and theory in the 20th century. Includes analysis of classical German films and texts by critics such as Eisenstein, Balazs, Vertov, Arnim, Kracauer, Benjamin. In English.

GRMN 1661A. Race and Classical German Thought.
Thought about race has a complex history in modern intellectual culture; crucial paradigms regarding culture, identity, and biology have roots in the philosophy, science, and arts of eighteenth-century Germany. This course will give in-depth consideration to ideas and paradigms from classical German intellectual culture, and will trace their resonances within African, Francophone, French, and North American race theory in the twentieth century. All readings in English. Not open to first year students.

GRMN 1661E. Germany, Alcohol, and the Global Nineteenth Century.
This course examines the German "long nineteenth century" through the lens of the production, sale, and consumption of alcohol. The cultural resonance of alcohol allows us to better situate Germany in an increasingly global context, where its exchange reflected broader patterns of modernization, social transformation, and nationalism. Whether brewing beer in Chinese Tsingtao, harvesting grapes in California’s Napa Valley, or celebrating Purim with wine in Palestine, Germans engaged the nineteenth-century world through their own historical traditions and trades. Our endeavors will be aided by the remarkable "Alcohol and Addiction Studies" special collections at the John Hay Library.

GRMN 1661F. Music, Religion, Politics (MUSC 1675).
Interested students must register for MUSC 1675. Interested students must register for JUDS 1713.

GRMN 1700A. Introduction to Yiddish Culture and Language (JUDS 1713).
Interested students must register for JUDS 1713.

GRMN 1770A. Introduction to Yiddish Culture (JUDS 1713).
Interested students must register for JUDS 1713.

GRMN 1800. Posthumanism and the Ends of Man (COLT 1814Y).
Interested students must register for COLT 1814Y.

GRMN 1800A. Berlin: Dissonance, Division, Revision (COLT 1813J).
Interested students must register for COLT 1813J.

GRMN 1892. Kafka and the Philosophers.
Kafka’s writings take as a central concern the philosophical interpretability of what we call literature. What is one to make, for instance, of a text that begins with a protagonist awakening one morning to realize that he has been transformed into a monstrous vermin? Or another awakening protagonist unexpectedly detained by officers waiting in his apartment? For Kafka, “correct understanding of something and misunderstanding of the same thing are not entirely mutually exclusive.” We will study some of Kafka’s greatest texts alongside key attempts at interpreting Kafka philosophically, including Benjamin, Adorno, Derrida, Deleuze/Guattari, and Agamben. In English; diverse fields welcome.

GRMN 1900A. The Weimar Republic (1918-1933).
Advanced students of German culture will pursue their own interests in researching this fascinating period in German culture and political history. Common readings, general discussions, and individual class presentations will facilitate the development of individual projects. Covered areas include literature, art, music, film, politics, etc. Required for concentrators, written permission required for others. Prerequisite: at least 3 100-level GRMN courses or equivalent. In German and English.

GRMN 1900B. Sites of Memory.
The seminar explores the connection between representation and management of space and memory in the German context. Readings drawn from literary works, philosophy, public discourse about monuments and memorials, and so on. Assignments include individual presentations and final research project. Required for concentrators, open to others with instructor’s permission. In English and German.

GRMN 1900C. Cultural Industry and the Aesthetics of the Spectacle.
This course explores mass culture and distraction as conceptualized by the Frankfurt School. Readings and discussions will engage with the emergence of distraction as a specific category of experience; the function of entertainment in the culture industries of Nazi Germany; the critique of mass culture in post war Germany, and the reformulation of spectacle and distraction in Culture Studies and postmodern discourse. Readings: Schiller, Adorno, Benjamin, Kracauer, Debord, Baudrillard, Postman, Virilio, Norbert Bolz. In German.

GRMN 1900D. Fleeing the Nazis: German Culture in Exile, 1933-1945.
When the Nazis came to power in Germany in 1933 this caused one of the biggest brain drains in history. We will trace the lives of leading experts in a variety of fields such as literature, music, philosophy, and the sciences and ask questions such as: Why did they leave? Where did they go? How did they do in their new environment? What did they say about their exile afterwards? Specific persons and places of exile will be studied according to the interests of the seminar participants. In German. Recommended prerequisite: one course in the GRMN 0600 series. Open to seniors only.
GRMN 1900E. Made in Germany - A Cultural History of Science, Technology, and Engineering.
In this seminar, we will examine the German technological imagination in literature and film. The material to be studied reaches from nineteenth and early twentieth century German Science Fiction to the history of engineering giants such as Volkswagen or BMW and will also include philosophical reflections of technology, the role of the German engineer as hero, and the image of the mad scientist. A field trip to Germany during spring break is planned. In German. Prerequisite: GRMN 0600. Enrollment limited to 20; first year students require an instructor override prior to registering.

GRMN 1900K. Bleibende Irritationen: Heinrich Heine und Deutschland.
Heinrich Heine (1797-1856) has filled many roles in the history of German culture: a poet who wrote some of the most "Romantic" poems in the German language, an author who effortlessly switched between journalistic and literary writing; and a "wound" (Theodor W. Adorno) that cannot stop refusing to heal. We will conduct extensive readings from Heine's poetic, essayistic, and narrative oeuvre which will result not only in a better understanding of the development of post-classical German literature, but also in a deeper knowledge of German culture as a whole.

Independent study on a particular topic related to German culture. In German or English. At the discretion of the instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

GRMN 1981A. Introduction to Yiddish Culture and Language (JUDS 1713).
Interested students must register for JUDS 1713.

GRMN 1990. Senior Conference.
Special work or preparation of an honors thesis under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

GRMN 2081A. Realism, Idealism, and Modernity (II) (PHIL 2080D).
Interested students must register for PHIL 2080D.

GRMN 2320A. 1700.
Comparing language (rhetoric, style), literature (poetry, drama, novel), and other cultural phenomena (theater, dictionaries, emblem books, professionalization), we will consider shifts in cultural paradigms from the early modern to the modern period. Grimmelhausen and Gellert; Gryphius and Gottsched; Opitz and Haller. Readings in German. Discussion in German or English.

Kleist's writings continue to pose interpretive and theoretical riddles for the modern reader nearly 200 years after their composition. We will review a selection of his major texts (dramatic, narrative, and journalistic) alongside some modern American and German criticism, covering methodological approaches such as deconstruction, psychoanalysis, and discourse analysis. Readings in German, with discussion in English.

GRMN 2320C. Enlightened Laughter.
We follow the development of German comedy and theory of comedy and laughter from the late Baroque to the Enlightenmenm, comparing comedies and theoretical texts with foreign examples. What kind of laughter is appropriate for a bourgeois stage? A German stage? Why is laughing important? What kind? Texts by Weise, Prehauser, the Gottscheds, Gellert, J. A. Schlegel, Lessing, also Mollière, Destouches, Farquhar, Graffigny. German texts read in German. Prerequisite: Graduate standing or permission.

GRMN 2320D. Kafka in English.
No description available.

GRMN 2320E. Political Romanticism.
What, if anything, is political about Romanticism? We will read the literary and non-literary writings of British and German romantic authors, with a focus on their complex relationship to political ideas, political practice, and the very concept of "the political." We will also consider why the question of Romanticism's relationship to politics has been re-visited with such insistency in the 20th century. Authors include W. Wordsworth, P. B. Shelley, Coleridge, Friedrich Schlegel, Novalis, and Kleist. All readings and discussions in English.

GRMN 2330A. Vision and Narration in the 19th Century.
Explores the relationship between vision and techniques of linguistic representation in selected literary texts from late romanticism to the fin-de-siecle. Special attention will be paid to the idea of "realistic" representation and to problems that afflict both seeing and speaking in the texts. Authors include Kleist, Stifter, Storm, Keller, Hofmannsthal, Rilke, and Musil. Readings in German, discussions in English. Open to seniors with instructor's permission.

GRMN 2340A. German Literature 1968-1989.
Discussion of major trends in literature in German: New Subjectivity, postmodernism, feminist literature, the role of mythology, post-histoiere. Authors to be discussed include Botho Strauss, Elfriede Jelinek, Thomas Bernhard, W.G. Sebald, among others. In German.

GRMN 2340B. Poetik der AutorInnen.
This course will examine postwar literary aesthetics as put forth in the so-called "Poetikvorlesungen" which several universities in German-speaking countries have instituted since 1959. These lectures have featured important contemporary authors thinking about their work - from poetical practices and aesthetic theories to biographic considerations and the technicalities of writing literature in today's world. In German.

GRMN 2340C. German Modernism.
This seminar will explore German literary modernism from around 1880 to the 1930s. Schools and authors to be studied will include Naturalism (Hauptmann, Holz, Schlaf), Neo-Romanticism and Symbolism (Hofmannsthal, Rilke, George), Expressionism (Toller, Benn, Kaiser, Brecht), and New Objectivity (Kästner, Döblin, Fallada). In German. Required proficiency: GRMN 0600.

GRMN 2340D. Nietzsche's Philology.
In September 1869, Friedrich Nietzsche delivers his inaugural lecture as a professor of philology at the University of Basel: Homer und die klassische Philologie. Our seminar will reconsider the Homeric question as it unfolds in Giambattista Vico (Scienza nuova), and Friedrich August Wolff (Prolomena ad Homerum); its transformation in Nietzsche's inaugural lecture; and the continuous quest for philology in Nietzsche's later writings.

GRMN 2450. Exchange Scholar Program.

GRMN 2460A. German Literature 1945-1967.
Examines the literature and the literary debates in postwar Germany, East and West. Authors to be discussed include those of the Gruppe 47 and those excluded from the group in the West; Brecht, Seghers, Becher and the new generation in the East. Emphasis on cultural politics and the role of literature in postwar German society (the work of the mourning, political restauration).

GRMN 2460C. Literature of the German Democratic Republic.
Against the background of the history of socialism in Germany, an intensive study of GDR authors and East German authors since reunification, with opportunities to explore other areas such as film and art. Authors may include: Brecht, Müller, C. Wolf, Reimann, Hein, Braun, Tellkamp. Readings in German, discussion in English or German.

GRMN 2460D. Thomas Mann: Die Romane.
In this course, we will read and discuss Thomas Mann's novels, from Buddenbrooks (1900) to Bekenntnisse des Hochstaplers Felix Krull (1954). Emphasis on narratological analysis and historical contextualization. In German.

GRMN 2500A. Rethinking the Bildungsroman (COLT 2520G).
Interested students must register for COLT 2520G.
**GRMN 2660A. On the Sublime.**
Survey of major theories of the sublime from antiquity to modern times, with emphasis on German, British, and French texts from the 18th to 20th centuries. Authors to be read include Longinus, Immanuel Kant, Edmund Burke, Jean-Francois Lyotard, and Neil Hertz. Readings and discussions in English, with optional readings in original languages provided. Open to seniors with instructor's permission.

**GRMN 2660C. Socialism and the Intellectuals.**
The international socialist movement was born in Germany, and many of Germany's most important intellectuals were attracted to its striving for social justice. Against the background of 19th century politics and theory, the course focuses on the Weimar Republic, the cultural politics of the German Democratic Republic and the New Left in the Federal Republic, and developments since reunification. Authors may include Heine, Marx, Hauptmann, Brecht, Müller, C. Wolf. Readings in German, discussions in English and/or German.

**GRMN 2660G. Reading (in) German Literature.**
What is reading? We will discuss theories of reading from reader-response-theory to performativity and its history. Beginning with Goethe's novel "Werther," we will read German literature since the 18th century. We will focus on the emerging conditions and techniques of reading (extensity, accessibility, popularity) which still shape text-reader-relations and on the double-bind of reading as a bourgeois model for subject-formation alongside profound ambivalence towards its pleasures. Finally: How is our own experience and performance of reading German literature? In German.

**GRMN 2660H. Historicism, Photography, Film.**
How does the emergence of photographic media—photography and film—affect concepts of historicity and historical experience? And how do philosophical concepts of history and historicity inform the aesthetics of film and of documentary film in particular? Taking Kracauer's critique of photography and Benjamin's work on film, photography and the philosophy of history as its point of departure and focusing on longitudinal documentaries from the former GDR, West Germany and Switzerland, this course proposes an inquiry into the relationship of photographic media and philosophical concepts of historicity. Readings and discussions in English. Open to graduate students. Juniors and seniors may enroll with instructor permission.

**GRMN 2660L. Speaking of Appearances: Phenomenology and Its Fictions.**
We will first attempt to discover what happens to a translation, as well as to the translator, when a text asks for asylum in the guest house of another language: "domestication" or "foreignization," as Lawrence Venuti puts it? Or is it appropriation, acculturation, adoption? Or rather estrangement, alienation, defamiliarization? Next we will investigate different models of derivative, parasitic, and translational writing by authors as diverse as J. Franzen, E. Fried, Ch. Hawkey, E. Jelinek, T. Tawada, P. Waterhouse, and others. Finally, we will examine translational writing as a means of decolonizing world literature.

**GRMN 2661F. Textual Border Crossings: Translational Literature.**
We will first attempt to discover what happens to a translation, as well as to the translator, when a text asks for asylum in the guest house of another language: "domestication" or "foreignization," as Lawrence Venuti puts it? Or is it appropriation, acculturation, adoption? Or rather estrangement, alienation, defamiliarization? Next we will investigate different models of derivative, parasitic, and translational writing by authors as diverse as J. Franzen, E. Fried, Ch. Hawkey, E. Jelinek, T. Tawada, P. Waterhouse, and others. Finally, we will examine translational writing as a means of decolonizing world literature.

**GRMN 2661J. Art, Philosophy, and Truth: A Close Reading of Benjamin's Essay on Goethe's Elective Affinities.**
This course will be devoted to a close reading of one of the most rewarding, and also most intricate, essays about aesthetics written in the first half of the twentieth century, Benjamin's 1924 essay on Goethe. Rather than discuss the pertinence of the interpretation Benjamin proposes of Goethe's famous novel, we will focus on the ideas he develops in relation to art and philosophy, and the conceptual distinctions he introduces, such as the distinction between commentary and criticism, or the distinction between an artwork's material content and its truth content.

**GRMN 2661K. Thinking Tradition: Heidegger, Arendt, Adorno.**
Our modes of being in the world, along with our languages, institutions, and most fundamental assumptions and practices, are determined by the dead who preceeded us. Through close readings of key texts that address the rich and vexed concept of "tradition"—Arendt's Between Past and Future, relevant passages from Heidegger's Being and Time, Adorno's "On Tradition" and pertinent sections from Negative Dialectics—we will address issues of fundamental significance to critical thought today. To interrogate the concept of tradition, we also will attempt to understand the stakes of Arendt's and Adorno's fundamentally divergent interpretations of Benjamin's philosophy of history.

**GRMN 2661L. Speaking of Appearances: Phenomenology and Its Fictions.**
How does Husserl's oeuvre open other ways to think through the relation of language and phenomena than those admitted by the traditions of logic he receives? Especially in his late writings, he seeks to retrace the passive preconditions for every thesis on the world. This radical questioning of origins should establish logic more firmly; however, it lies on a fiction—"wir machen eine Fiktion eines Subjektes." Husserl writes in one introduction—rendering phenomenology contingent upon poetics in a fashion that opens other inroads into Husserl's analyses and methods, which we will pursue via close readings of Husserl's writing, among others.

**GRMN 2900. Theory and Methods of Foreign Language Teaching.**
No description available.

**GRMN 2970. Preliminary Examination Preparation.**
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing for a preliminary examination.

**GRMN 2980. Reading and Research.**
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**GRMN 2990. Thesis Preparation.**
For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing for a thesis.
We offer:
The Sheridan Center supports the Brown teaching and learning website: http://brown.edu/sheridan.
opportunities for engagement and innovation through our consultations, serve the Brown community and advance teaching and learning. We offer with and between faculty, graduate students, and undergraduates to an inclusive teaching and learning community. We encourage partnerships learning, fosters evidence-based practices, and supports the success of The Sheridan Center promotes a collaborative culture of teaching and learning, Continuing Swedish. Recommended prerequisite: SWED 0300.

Harriet W. Sheridan Center for Teaching and Learning

The Sheridan Center promotes a collaborative culture of teaching and learning, fosters evidence-based practices, and supports the success of an inclusive teaching and learning community. We encourage partnerships with and between faculty, graduate students, and undergraduates to serve the Brown community and advance teaching and learning. We offer opportunities for engagement and innovation through our consultations, programs, and resources. To learn more about the Center, see our website: http://brown.edu/sheridan.
The Sheridan Center supports the Brown teaching and learning community by providing:
- Practical advice and programs about evidence-based practices to enhance teaching and learning.
- Writing, academic tutoring, and English language support to help all students develop as learners and communicators.
- A hub for faculty, graduate student, and undergraduate instructors to connect around teaching and learning practices across disciplines.
We offer:
- Consulting Services – classroom observations; consultations on course design, writing pedagogy, student evaluations, and TA training.
- Teaching and Learning Resources - course development grants, online resources addressing a wide range of topics.
- Programs - orientations, workshops and lectures, institutes and seminars, certificate programs, classroom-based writing workshops.
- Support for Educational Research and Assessment – support for guiding course and curricular assessment, consultations on scholarship on teaching and learning, assistance with evaluation sections of postsecondary educational grants.
- Communities and Services to Support Students – Writing Fellows program, academic tutoring programs, language learning partners program, workshops for and consultations with English language learners.
- Community - Programs and projects that bring together faculty, graduate students, postdocs, and undergraduates from across the disciplines.

Hispanic Studies

Chair
Laura R. Bass
The Department of Hispanic Studies at Brown is dedicated to teaching the literatures and cultures of Spain, Latin America, and the Hispanic U.S. in all their complexity and interconnectedness. Our undergraduate program offers basic through advanced language classes and a wide selection of literature and culture courses, many of them cross-listed. Our graduate program balances generalist training with individually tailored specialization and keeps a firm commitment to professional development and mentoring. All students, both undergraduate and graduate, work closely with faculty members, and peer collaboration is encouraged to further intellectual, creative, and academic growth.
For additional information, please visit the department's website: http://www.brown.edu/academics/hispanic-studies/

Hispanic Literatures and Culture

Concentration Requirements
Spanish is the second most widely spoken language in the world and the second language of the United States. In our society, knowing Spanish is not just an asset; it is increasingly a necessity. The Spanish language program offers a sequence of courses ranging from basic to advanced. Students at all levels develop proficiency in speaking, listening, reading, and writing while also studying the cultures and societies of the contemporary Spanish-speaking world. The Hispanic Literatures and Culture concentration enables students to develop advanced Spanish skills while acquiring a solid background in the complex history, literature, cultures, and intellectual traditions of Spain, Latin America, and the Latino-U.S. The department offers a variety of courses on topics related to literary history and theory; multicultural contact; linguistics and the history of the language; visual culture, film, and performance studies. Interdisciplinarity is a hallmark of the department, and students in this concentration are encouraged to broaden their perspectives by taking relevant courses in other departments. Most choose to strengthen their academic preparation by participating in a study abroad program in Spain or Latin America and by engaging with Hispanic communities in the United States.
The concentration requires a minimum of ten courses. 700-level courses provide fundamental tools for critical analysis and opportunities for developing advanced skills in the Spanish language. In courses at the 1000 level, students explore particular authors, genres, periods, or special topics and continue to hone their skills in literary and cultural analysis.

Prerequisite
HISP 0600 Advanced Spanish II (Pre-requisite)

Required courses: one of the following 0700 level courses
HISP 0730 Encounters: Latin America in Its Literature and Culture
HISP 0740 Intensive Survey of Spanish Literature
HISP 0760 Transatlantic Crossings: Readings in Hispanic Literatures

Up to two more 0700 level courses including, additionally:
The department of Hispanic Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The A.M. is ordinarily received as a part of the Ph.D. program.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/hispanic-studies

**Honors Thesis or Project**

Students with an excellent record in their Hispanic Studies courses will be eligible to write an Honors Thesis or write and produce an Honors Project. Typically the Honors Thesis is a major research paper of approximately 40 to 80 pages in Spanish, depending on the topic and treatment necessary. Alternatively, a student may, with prior permission of the Hispanic Studies Concentration Advisor, present a film, gallery exhibition, or other appropriate project, together with a paper that clearly demonstrates the academic foundations and relevance of the project. For additional details regarding Honors Thesis in Hispanic Studies, please refer to our website or consult with the Concentration Advisor.

**Concentration Advisor:**
Silvia Sobral

**Hispanic Studies Graduate Program**

This fast-paced beginning course provides a solid foundation in the development of communicative skills in Spanish (speaking, listening comprehension, reading and writing) as well as some insight on the cultures of the Spanish-speaking world. Individual work outside of class prepares students for in-class activities focused on authentic communication. Placement: students who have never taken Spanish before, or have scored below 390 in SAT II, or below 240 in the Brown Placement Exam. Students who have taken Spanish before and those with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0100. Basic Spanish.**

A highly-intensive, two-semester sequence in one semester that carries 10 contact hours per week. Primarily for students with knowledge of Spanish, who have scored below 450 in SATII or below 340 in Brown Placement Exam. Students with little or no preparation in Spanish should consult with the Course Supervisor. Focused on acquisition of communicative skills (speaking, listening comprehension, reading and writing), and development of cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern day life, health, art and culture, nature and the environment, and relationships) and write simple texts with good command of grammar and sentence structure. Ideal for students interested in fast-tracking their language learning to meet study abroad requirements. Double credit. Instructor permission required. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0110. Intensive Basic Spanish.**

A continuation of HISP 0100. This course continues to focus on acquisition of communicative skills (speaking, listening comprehension, reading and writing) as well as cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern day life and its pressures, health, art and culture, nature and the environment, and relationships) and write simple texts with good command of grammar and sentence structure. Prerequisite: HISP 0100 or placement: SAT II scores between 400 and 450; Brown Placement Exam scores between 241 and 340. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0200. Basic Spanish.**

A continuation of HISP 0100. This course continues to focus on acquisition of communicative skills (speaking, listening comprehension, reading and writing) as well as cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern day life and its pressures, health, art and culture, nature and the environment, and relationships) and write simple texts with good command of grammar and sentence structure. Prerequisite: HISP 0100 or placement: SAT II scores between 400 and 450; Brown Placement Exam scores between 241 and 340. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.
HISP 0300. Intermediate Spanish I

This course continues to develop and strengthen students’ proficiency in the Spanish language, as well as to help them increase their cultural understanding. It seeks to develop both fluency and accuracy and to teach students to express, interpret, and negotiate meaning in context. Through the exploration of themes such as the individual and the community, health issues, traveling, multiculturalism and human rights, students focus on communication and learn to appreciate cultural differences. Prerequisite: either HISP 0200, HISP 0110, or placement. SAT II scores between 460 and 510, or Brown Placement Exam scores between 341 and 410. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

HISP 0310. Spanish for Social Service Applications

Provides unique language skills for students interested in health care, social service, and community action. It develops speaking skills and cultural awareness through discussions, readings, interviews, oral presentations, and internships. Topics include case management, substance abuse, HIV and STD prevention, sexual abuse, domestic violence, mental health issues, anger management, and medical treatment. Some advanced grammar points reviewed. Prerequisite: 2-3 semesters of college Spanish, placement in HISP 0300 or 0400.

HISP 0400. Intermediate Spanish II

This course offers an exploration of the Spanish language and Hispanic cultures through a variety of thematic foci: the world of work, the arts, globalization and technology, leisure, and celebrations. It focuses on vocabulary building, the examination of some of the more difficult points of grammar, and moving students towards a more sophisticated level of comprehension and expression. Students work with readings, including literary texts; songs; film; and the visual arts. Prerequisite: HISP 0300 or placement: SAT II scores between 520 and 590 or Brown Placement Exam scores between 411 and 490. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

HISP 0490A. Spanish for Health Care Workers

This course is designed to provide students with the linguistic and cultural competencies necessary to communicate with and help treat Spanish speaking patients with limited English. The course includes a general review of pertinent grammar and vocabulary relating to the health care professions, assessment, and vocabulary useful for establishing patient rapport. Students will practice communicating in common medical situations, conducting patient interviews, and increase their understanding of possible responses from patients. We will broaden knowledge of different cultures, explore health care systems’ professions in a variety of settings, and have pertinent speakers invited to class. Please note: this course does not qualify as a pre-requisite for study abroad or for HISP 0600. Students who complete 0490A successfully can continue in our program with HISP 0500 as the next level.

HISP 0500. Advanced Spanish I

Offers comprehensive work in listening, speaking, reading, and writing, with targeted grammar review. Students work with a variety of readings (literature, newspaper articles, etc.) and with art forms such as music and film, in order to develop oral and written expression and to explore issues relevant to the Hispanic world. Students explore topics of their own interest through student-led activities and presentations. Prerequisite: HISP0400 or placement: SAT II scores between 600 and 660, Brown Placement Exam scores between 491 and 570, or AP score of 4 in language or literature. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

HISP 0600. Advanced Spanish II

Offers continued, advanced-level work in speaking, listening, reading, and writing skills, with focused review of challenging aspects of Spanish grammar. Course materials include films, music, art works, and a variety of written texts (articles, stories, plays, a novella, etc.) chosen to promote class discussion and in-depth written analysis. There will be individual and group activities, including in-class presentations and creative writing projects. Prerequisite: HISP0500 or placement: SATII scores between 670 and 740, Brown Placement Exam scores between 571 and 650, or AP score of 5 in language. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

HISP 0710A. Cultura gastronómica de España

Spain has a rich and varied culinary culture — both steeped in its multicultural history and at the cutting edge of new culinary movements. In this course, you will learn about la cocina española in all its dimensions and at the same time develop your linguistic skills in written and oral Spanish. Topics include: the Mediterranean diet (and its threat from fast food), the culture of tapas, the wine regions of Spain, Spain’s new star chefs, the olive oil industry, Spanish food products abroad. We will explore these topics through documentaries, recipes, interviews, films, music, short stories, and hands-on food preparation. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

HISP 0710C. Introducción a la lingüística hispánica

This course introduces students to the study of language and deepens their knowledge of Spanish in its main linguistic components. After briefly considering the nature of language, we will study the sounds of Spanish (phonology and phonetics), word and sentence structure (morphology and syntax), and the elements and mechanics to express and interpret meaning (semantics and pragmatics). We will then turn our focus to linguistic phenomena such as changes in Spanish over time (historical linguistics), variations in the language according to region and social group (sociolinguistics), and bilingualism, with special attention to Spanish in the U.S.

HISP 0710D. History of the Spanish Language

We will study of the development of Spanish from the first manifestations to the present, and the development of the language beyond the Iberian Peninsula (in the Sephardic diaspora and in the Americas). Includes the historical and cultural events that deeply influenced the shaping of Castilian language. We will examine the most relevant contributions as well as other languages (Arabic in particular) in shaping the Spanish language. Taught in Spanish.
HISP 0730. Encounters: Latin America in Its Literature and Culture.
An introduction to major authors, movements, and themes of Spanish American literature from the Discovery to the present. This course also aims to develop students' oral and written expression in Spanish. Students are expected to engage in close reading and discussion of texts, as well as to revise their papers. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above. WRIT DPLL

HISP 0740. Intensive Survey of Spanish Literature.
An introduction to the major authors and literary movements of Spanish literature from the Middle Ages to contemporary times. Focuses on building critical vocabulary. Also aims to develop students' written and oral expression in Spanish. Preparatory course for 1000-level courses for students who achieve the highest placement in Spanish. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above. WRIT

HISP 0750B. The Latin American Diaspora in the US.
Designed to bridge academic learning about Hispanic/Latino culture and volunteer work in agencies serving Hispanics in Providence. Readings, films, and guest presentations focus on issues of concern to these groups. Spanish language learning occurs in the classroom and the community, where students have the opportunity to enrich and test course content. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 651 and over in the Brown Placement Exam.

HISP 0750C. Love and War in Medieval and Contemporary Spanish Fiction.
Examines presentations of Medieval Iberian culture in literature and film. This subject interrogates the persistent popularity of medieval themes and stories in contemporary film and fiction. It will consider some medieval narratives, such as El Cid, medieval chronicles and ballads, and La Celestina, which inspire a tradition of revisionist re-writing, as well as modern "inventions" of the medieval in a range of cultural forms. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam. FYS

HISP 0750E. Topics in Hispanic Culture and Civilization.
This course provides an overview of the culture and history of Spain from medieval times to the present, drawing from literature, art, music, and film. We will study Islamic al-Andalus, Judeo-Spanish culture (including the Sephardic diaspora), Christian Spain, the conquest and colonization of the "New World," the decline of empire, the Civil War and its aftermath. Historical and cultural connections between Spain and Europe, and Spain and America will also be examined. Taught in Spanish. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam. FYS

With the death of General Francisco Franco in November of 1975, Spain began the period of transition from a forty-year dictatorship to a modern democracy. This course focuses on cultural production of the transition period, including literature and other high art forms as well as popular culture, in order to assess the way in which these discourses worked simultaneously to both reflect and effect change. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

HISP 0750G. Wildeyed Stories.
Students will study a wide-range of stories from cultures of the Spanish-speaking world in literature and film: tales, fables, and humorous stories of heroism, deception and revenge. Class discussions will seek to situate the works examined within the political and cultural currents and debates of their time. Emphasis will be placed on both the historical context and on the development of close reading skills. Conducted in Spanish. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam. FYS

Spanish film has experienced a total renewal after Franco's death. In this course we will analyze recent developments in Spanish film paying special attention to the way film directors have exploited a very rich and well established literary tradition from Luis G. Berlanga, and Carlos Saura, to Victor Erice and Pedro Almodóvar. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

HISP 0750M. The Spanish Civil War: Image, Text, and Memory.
The Spanish Civil War (1936-1939) has inspired a vast trove of scholarly and artistic production. In this course, we will analyze documentary and feature-length Spanish films in order to understand the social and political causes of the war and its central players. We will complement our film discussions with relevant poetry, novels, and art works to expand our critical perspectives on ways of representing and remembering the Civil War. In Spanish for first-year students with SAT II of 750 or above, a 5 on the AP Literature exam, or a Brown Placement Test score of 651 or above. Enrollment limited to 20 first year students. FYS

HISP 0750N. Muslims, Jews, and Christians in Medieval Iberia.
The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian cathedrals, Islamic palaces, and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. This convivencia of Jews, Muslims, and Christians will be examined from the perspectives of literature, art, architecture, archaeology and history. FYS WRIT

HISP 0750O. Cultural Studies in Spanish America.
This is a culture class, taught in Spanish, in which we will explore the origins and meanings of the terms "culture" and "cultural studies," a particular approach to culture, as it is manifested in a Spanish American context. This critical approach crosses conventional disciplinary boundaries and so will we, examining a variety of texts, phenomena, and themes that extend traditional concepts of "culture." Topics considered will include: sports—fútbol and lucha libre—music in literature, melodrama and the telenovela, manifestations of Indian and mestizo identities in the late 20th-21st centuries, tourism, and contemporary urban existence.

HISP 0750P. Contemporary Social Justice Cinema of the Spanish-Speaking World.
This course engages students with social justice issues in the Spanish-speaking world (the US, Latin America, and Spain) from multiple perspectives. It analyzes recent films addressing topics including: racial, gender, and sexual identities; socioeconomic (in)equality; immigration, the border, and displacement; civil conflict, dictatorship, and their aftermath; the environment and climate change; postcolonial legacies and the impact of neoliberalism and globalization. We will analyze the stories these films tell and how they tell them, asking whether film can be considered an activist project, and what effect it might have on legal, political, and social debates outside the walls of the cinema. Conducted in English, though students may elect to complete written assignments in Spanish. FYS DPLL

HISP 0750Q. Health, Illness and Medicine in Spanish American Literature and Film.
In this class we will read/see, discuss and write about texts and films that deal with health, illness, death and medicine in primarily Spanish American contexts. Our approach will be informed by principals of Narrative Medicine that demonstrate how attending to, representing, and affiliating oneself with other human beings by studying literature and the arts can transform relationships between patients and healthcare professionals. We will be honing our reading and analytic skills as we confront the subjective dimensions of illness and medicine from humanistic and cross-cultural perspectives. IN SPANISH.
HISP 0760. Transatlantic Crossings: Readings in Hispanic Literatures. This course provides students a comprehensive introduction to literature and culture of the Spanish-speaking world, through exploration of a wide range of genres (short story, poetry, theater, novel, and film) and periods of production. The course not only gives students a contextualized historical panorama of literature in Spanish, it also equips them with strategies for reading, thinking, and writing about texts and films in Spanish, preparing them for more advanced literature and culture courses in Hispanic Studies. The course is conducted entirely in Spanish. WRIT

HISP 1020A. Spanish Civil War in Literature and the Visual Arts. The Spanish Civil War (1936-39) would culminate with the military overthrow of the Republican government and the beginning of Francisco Franco's long dictatorship. This course examines artistic representations of the war, from film (documentary and fictional), through painting (Picasso), to the written works of both Spanish and foreign authors including Orwell, Hemingway, Neruda, Cola, Sender, Rodoreda. Readings and discussion in English.

HISP 1020B. The Spanish Realist Novel in Translation. The course will include the two major Spanish novels of the 19th-century in fine recent translations—Leopoldo Alas's *The Regenta* and Galdós's *Fortunata and Jacinta*—and other supporting texts. In both novels the problematical situation of women in society is especially important. They will therefore be studied in relation with the overall themes of the subordination of women and the novel of adultery. Parallels will be drawn with such classical texts as *Madame Bovary* and Anna Karenina.

HISP 1210A. Judeo-Spanish Literature and Culture. Focuses on Judeo-Spanish literature from the 10th century to the first years of the Spanish Jewish diaspora (end of the 15th century). Poetry and narrative are read as works of moral instruction rooted in traditional modes of art and thought. Considers also the preservation of Judeo-Spanish culture in the Sephardic diaspora through ballads and songs recorded from oral traditions.

HISP 1240A. Fashion and the Fictions of Identity in Early Modern Spain. In the early modern period, styles of clothing and fabrics were meant to provide visible markers of status, gender, ethnicity, and nationality. Yet, as dramatists, novelists, and poets were keenly aware, clothing could conceal as much as reveal. It could trick the eye and seduce it. It could blur hierarchies of difference even as it constructed them. In other words, clothing often created fictions of identity, and fiction itself frequently made clothing the focus of action and thematic exploration. The purpose of this course is to trace the connections between fashion and fiction in a period of Spanish history of unprecedented social and economic change. Close readings of literary texts will be complemented by studies of visual sources (e.g., portraits and cityscapes), as well as samples of legislation and moral debates related to fashion. Prerequisite: HISP 0730 or 0740.

HISP 1240C. Golden Age Short Stories. We will examine the spatial itinerary of main literary figures (the picaro or rogue, the morisco, the soldier, the courtesan, the witch, the indiano) and the spaces they inhabited in Spain's short stories throughout the 16th and 17th centuries. Violence, sexual transgression, and social conflicts are themes of inquiry. Emphasis on Cervantes' *Novelas ejemplares*.

HISP 1240L. Cervantes and Don Quijote in the Context of Golden Age Spain. This course seeks to understand the first part of Don Quijote (1605) within the context of the social, literary and political contexts from which it sprang. We will undertake a close reading of the 1605 text supplemented by secondary readings that focus on such topics as the vogue for the romances of chivalry, the role of the oppressed in Spanish Society in the novel and in Cervantes's Spain, the place of books and reading in Golden Age Spain, etc. The point of departure for the course will be an in-depth consideration of Marcellin Defourneaux's book, *Daily Life in Spain in the Golden Age* (Stanford UP, latest). Taught in Spanish.

HISP 1240O. Theater of Renaissance England and Spain. Protestant England and Catholic Spain were political rivals for much of the sixteenth and seventeenth centuries. Yet for all their differences, the two countries developed remarkably similar theatrical cultures. Both gave rise to the first commercial playhouses. Plays in both combined popular and learned traditions, and audiences came from diverse sectors of society, raising the concern of moralists convinced of the theater's pernicious effects. This seminar will juxtapose English and Spanish plays with similar themes—e.g., class conflict, gender identity, nationhood—by Shakespeare, Lope de Vega, and others to explore the commonalities and highlight the particularities of these two theatrical traditions. Taught in English.

HISP 1250A. Madrid: History, Literature, and Culture. This course explores cultural production in and about Madrid during key moments of the city's history from its establishment as the capital of imperial Spain in the 16th century through its reinvention as a major international tourist destination in the late 20th. Multimedia in orientation, the course draws on representations of the Spanish capital in literature, painting, photography, maps, music, and film. Topics include: self-invention in the court city, modernization and its discontents, Madrid and Spanishness, provincialism versus internationalism. In Spanish.

HISP 1250B. Hispanic Culture Through Film. This course examines major trends of Hispanic cinema through a representative selection of culturally diverse films from Spain, Latin America and the USA. Among the course objectives are: to learn about Hispanic history and culture through film, to understand cinema's strengths and limitations for representing culture and history, to gain an understanding of Hispanic cinema in a broader context of globalization, and to learn to write film analyses in Spanish.

HISP 1250C. Art and Literature. The interaction between the arts plays a significant role in 20th-century aesthetics. We discuss from a theoretical and analytical perspective, among others, Picasso and Dalí as writers (and painters), or García Lorca as painter (and writer). We also pay special attention to other cases such as the museum as revered space, and the impact of film on literature.

HISP 1250D. Contra Franco vivíamos mejor? Literature and Culture of the Spanish Dictatorship (1939-1975). The end of the Spanish Civil War inaugurated one of the longest dictatorships of the twentieth century. This course will examine the interaction between the arts plays a significant role in 20th-century aesthetics. We discuss from a theoretical and analytical perspective, among others, Picasso and Dalí as writers (and painters), or García Lorca as painter (and writer). We also pay special attention to other cases such as the museum as revered space, and the impact of film on literature.

HISP 1250F. Entre todas las mujeres: Women Writers of Modern and Contemporary Spain. In Spain, organized feminism is a relatively late (20th-century) development, subsequently weakened further by the ideological constraints of franquismo. We will study female authors from the nineteenth century to the present to assess how women entered and fit into the literary and cultural fields, how they changed them, what they wrote about and how it expanded the Spanish literary repertoire.
HISP 1290G. Generación del '98. To what extent does a national crisis, the Spanish defeat of 1898 by the United States, provoke a movement of patriotic revaluation, the so-called "Generation of '98"? Or are the symptoms of crisis more in accord with fin de siècle aesthetics, which incites literary experimentation in all the traditional genres? These crucial questions will be studied in such typical authors as Unamuno, Baroja, Azorín, Antonio Machado, and Ramón del Valle-Inclán.

HISP 1290J. Spain on Screen: 80 Years of Spanish Cinema. This course traces major developments in Spanish cinema from silent films of the 1930s to globalized commercial cinema of the 21st century. In this 80-year period, Spain has undergone sweeping political, social, economic, and cultural changes, many of which we see reflected in its cinema. By critically examining films by Spain's most well-known and influential directors – Rey, Berlanga, Buñuel, Bardem, Saura, Ence, Almodóvar – as well as less canonical filmmakers, we will ask what representations of Spain we see on screen in the last eight decades, interrogating notions of nation, race, class, gender, sexuality, and political ideology, among others. Prerequisite: HISP 0730 or 0740. WRIT

HISP 1290K. The Spanish Novel since 1975. In 1975, the death of General Francisco Franco opened the door to a new democratic Spain. In the novel, the social and political novelties generated a change both thematic and formal. This course pays attention to issues such as the diverse genres that have gained strength, such as the groups that have acquired a literary voice, and the portrayal of current preoccupations. Prerequisite: HISP 0730 or 0740.

HISP 1290P. Federico García Lorca, 1898-1936. Federico García Lorca (1898-1936) embodies Spanish Modernity. While his innovative poetry and drama established him as a crucial figure in the 20th Century Spanish cultural landscape, his brutal murder by Fascist supporters at the beginning of the Civil War made of him a symbol of the lost freedom. This class will study his artistic evolution: from his youth in Granada, and his studies in Madrid-where he met and befriended filmmaker Luis Buñuel and painter Salvador Dalí-to his trip to New York and Latin America. The focus of the class will be the study of his poetry, theatre, and essays, but will also explore both the construction of the Lorca myth, and the period of cultural splendor that is encapsulated in his biographical dates: from the loss of the empire in 1898, to the beginning of the Civil War in the summer of 1936.

HISP 1290U. The Spanish Civil War in Visual Culture. No other event marked contemporary Spain as profoundly as the Spanish Civil War (1936-39). This course will study the history of the war itself and trace the multiple ways it has been remembered and represented from its immediate aftermath through to the present. Materials will include films and documentaries, paintings and photography, propaganda posters and newsreels, radio and television, monograms and comics, oral histories and fiction. In addition, we will read critical and theoretical texts on historical trauma and individual and collective memory as well as amnesia. This course will be conducted in Spanish. WRIT

HISP 1330A. Bodies of Resistance. An exploration of sexuality in 19th and 20th century Latin American poetry, fiction and prose. Specifically, we examine the subtle, vilified, or denigrated bodies and sexualities that are frequently represented in its immediate aftermath through to the present. Materials will include films and documentaries, paintings and photography, propaganda posters and newsreels, radio and television, monograms and comics, oral histories and fiction. In addition, we will read critical and theoretical texts on historical trauma and individual and collective memory as well as amnesia. This course will be conducted in Spanish. WRIT

HISP 1330C. Indigenous Literatures of Latin America. This course explores the presence of indigenous cultures in Latin American literature over the last five centuries. Blending historical and literary analysis, we will delve into foundational indigenous narratives (with a stress on Nahua, Mayan and Quechua variants); the vision of Colonial mestizo and bilingual go-betweens; othering discourses in antiquarian, archeological and travel narratives; and the indigenous imprint in contemporary novels, short stories and poetry, including indigenous, women and transnational authors. Through this journey, marginalized cultures throughout the continent show their resilience as the multicultural plot of Latin American history comes to the fore. In Spanish.

HISP 1330D. Patriots, Rogues, and Lovers. Nineteenth-century Spanish American writers were committed to educating their readers, yet they delighted in entertaining them with melodrama. We critically examine patriotic novels and stories with a focus on tales of love and/or adventure. We consider the breakdown of this trend in the first quarter of the 20th century as well as feminist critiques of it.

HISP 1330E. Rediscovering New Worlds: The Conquest of the Americas in Contemporary Literature and Film. Studies the problematic relation between truth and falsehood, history and fiction, in a broad range of works on the conquest. We draw from witnesses like Columbus, Cabeza de Vaca, Carvajal, and Lefy to interpret novels like Carpentier's El arpa y la sombra, Posse's El largo adarce del caminante, and Saer's El entenado, as well as films like Herzog's Aguirre, Joffé's The Mission, and Dreamwork's The Road to Eldorado.

HISP 1330F. The Nineteenth-Century Crisis of Modernity. The late nineteenth-century witnessed the intensification of dependent capitalism in Latin America, bringing with it the growth of the city, class tensions and a sense of alienation among artists. We explore how two different movements, Modernismo and Naturalism, framed social criticism. Topics include representations of the middle class, flights of fancy, prostitution, and biological determinism.

HISP 1330G. The Mexican Revolution: Film and Literature. The Mexican Revolution is a powerful wellspring of myth and contradiction that has defined Mexico until the present. We focus on the "Golden Age" of Mexican film and its treatment of the Revolution, as well as essays, novels and oral traditions. We also explore the reformation of the Revolution in Chicano culture and in the current Zapatista movement.

HISP 1330H. Transatlantic Colonial Encounters. Studies foundational accounts of the 'discovery,' conquest, and colonization of the Americas. We will address their status as 'historical' works and, particularly, their problematic representation of indigenous peoples. In addition, we will consider their impact not only on Golden Age literature, but also on contemporary mass culture - from travel advertising and adventure game shows, to Hollywood and Disney.

HISP 1330I. Venezuelan and Caribbean Short Story and Popular Culture. This course will focus on the Venezuelan and Caribbean short story and popular culture. Texts and authors will be discussed in the modernization framework, including such topics as the rural and the city, migration, ethnicity, and the popular arts.

HISP 1330J. Wordscapes of Colonial Spanish America: Nature and City. An introduction to 16th and 17th century Spanish American lettres through examination of place - from paradisical landscapes to spectacular citiescapes - and its configuration in colonial writings. Special attention to Mexico and its historiography. Authors may include: Columbus, Cortés, Cabeza de Vaca, Las Casas, Inca Garcilaso, Sor Juana. Readings in Spanish.

HISP 1330K. Contemporary Poetry of Latin America. An exploration of some representative poets and movements in modern Latin American poetry, with special emphasis on the Latin American Modernists, the Avant-Garde and contemporary trends. Topics include: analytical techniques, historicity, poetry and translation, and a creative writing workshop. For advanced students only. Prerequisites: HISP 0740, or HISP 0600 and HISP 0730. Previous experience in 1000-level Spanish courses desirable.
HISP 1330P. The Philosophy of Borges.
Jorge Luis Borges devoted several essays during his youth to developing his philosophical understanding of concepts like "personality," "memory," "reality," "narrative" and "style." At some point later in his literary career, he attempted to erase the memory of those years from his public existence, to the extent that most of the books published during the 1920s were never reprinted during Borges' lifetime. Nevertheless, it was in those years that he developed the entire philosophical grounding of his future literary work. We will work to decipher Borges' philosophy through the reading and interpretation of his essays, narratives and poems, including several key texts from his first three suppressed prose volumes (Inquisiciones, El tafí de mi esperanza, and El idioma de los argentinos). In English, with some Spanish readings. Prerequisite: HISP 0730 or 0740.

HISP 1330Q. Short Forms: Major Works in a Minor Key.
This course will explore short masterworks by major Latin American writers of the twentieth century and beyond (Borges, Onetti, Cortaza, García Márquez, Boal, Aria, Zambrano and others) alongside some of their major influences (e.g. Poe, Conan Doyle, Hemingway, Faulkner), with side-trips into the work of contemporary writers on whom they leave their own imprint. Readings will primarily involve short stories, but will also include novellas, poems, films, visual art, and music. Reading in Spanish, with discussion in English.

HISP 1330T. El amor en español.
This course will visit a series of famous, colorful and controversial couples (novios, esposos y amantes) from the literature and history of Spain and Latin America. We will consider such themes as courtly love, erotic love, commonplace ideas about love and distortions of them, the degradation of idealized love, and the renunciation of human love in favor of divine love in the medieval and Renaissance periods. We will also address contemporary rites of passage in the formation of couples, traditional and modern views of love and marriage, as well as the "death of the couple," love and melancholy, melodrama and hysteria.

HISP 1330V. Gender Trouble in Spanish America.
This course will explore the construction of gendered identities in Spanish American literature and film after 1940. Questioning normative constructions of gender roles, we will see how masculinities and femininities are represented and respond to changing politics and power, often redefining earlier "gender contracts." Works studied will include novels by Angeles Mastretta, Jés Donoso, Mario Bellatin and Diemela Ellit, short stories, theater, poetry, and 2-3 films, as well as pertinent theoretical and critical approaches to the study of gender in Latin America. In Spanish.

Throughout history, conquest and colonization have implied different kinds of appropriations: control over new lands, new bodies, new languages. With the appropriation of new languages came the confrontation between different ways of organizing the world and, in particular, alternative ways of understanding mankind's relationship to nature. This course explores the scientific literatures that emerged in the wake of Spanish conquest and colonization of the Americas (1500-1800). These hybrid scientific literatures, written in Spanish but also in Nahuat, Maya, Quechua and graphic forms, illustrate the lasting cross-pollination between Old and New World notions about American nature.

HISP 1330Y. "Us" and "Them": Cross-Cultural Representations in Spanish American Literature and Film.
This class will study the construction of self and other in Latin American cultural production. By examining examples from colonial times to today in a variety of literary genres and in three particular countries - Mexico, Argentina and Peru - we will examine ethnic, racial, and national identities (primarily). Our study will include some of the theoretical ideas associated with the confrontation between "them" and "us" and changes in these positions: the concept of the contact zone, of acculturation, and cultural hybridity, among others.

HISP 1330Z. Tropical Fictions: Geography and Literature in Latin American Culture.
Tropical nature in Latin America has been represented in conflicting ways: a place of leisure and sensuality, but also of depravity and sloth; a place of infinite riches but also a space where disease and racial degeneration thrive. Tracing the variations and endurance of these tropes in 18th- to 21st-century Western consciousness, this course aims to re-think the tropics in literature, film and the arts from a vantage point different to that of temperate-climate European civilization. Readings include canonical fictions such as La voragine (1924), 19th-century European travelogues from the region, as well as contemporary indigenous art.

HISP 1370A. "One Hundred Years of Solitude": Culture and Politics in García Márquez's Work.
This course will focus on García Márquez's masterpiece in order to analyze its modes of representation, discursive strategies, and fictional construction as well as its interactions with history, politics, and literary and popular traditions. Other related work by the Colombian Nobel Prize winner will be discussed, as will his journalistic pieces and movies. The novel may be read in Spanish or English; discussion will be mainly in Spanish.

HISP 1370B. Gaborium: Memory, Fiction, and Reading in Gabriel García Márquez.
Departing from some formats of writing and reading (myth, history, legend, journalism, memoirs) in García Márquez writings, we plan to study the representation (magical, carnivalesque, political) unfolding in his novels, stories, and essays. From this processing of information and exchange, our course will analyze the cultural history of abundance, scarcity, and Utopia in Latin America. Prerequisite: HISP 0730 or 0740. Enrollment limited to 40.

HISP 1370C. Imagining the Latin American Past.
Departing from some formats of writing and reading (myth, history, legend, journalism, memoirs) in García Márquez writings, we plan to study the representation (magical, carnivalesque, political) unfolding in his novels, stories, and essays. From this processing of information and exchange, our course will analyze the cultural history of abundance, scarcity, and Utopia in Latin America. Prerequisite: HISP 0730 or 0740. Enrollment limited to 40.

HISP 1370E. La creatividad en América Latina.
This course will explore the constructive and creative processes that has resulted in the development of new literatures, new ideas, and new forms of expression. We will study the evolution of Latin American literature from the colonial period to the present, focusing on the work of some of the most important writers of the twentieth century and beyond (Borges, Onetti, Cortaza, García Márquez, Bolaño, Aira, and others) alongside some of the major works of contemporary Latin American literature. The course will also consider the influence of other cultures on Latin American literature, as well as the role of Latin American literature in the development of new literary forms and genres. Readings will include novels, short stories, poetry, and film. The course will be conducted in Spanish.

HISP 1370F. Modernity and Memory in Latin America.
Contemporary cultural history proposes that memory is not an archive or a museum of history but a past evoked to amplify the present. We examine the rewriting and transformation of history in texts that illustrate issues of tradition/modernity, countrieside/culture, center/margins, migration/exile, feminine/masculine, and popular culture/media culture.

HISP 1370G. "One Hundred Years of Solitude": Culture and Politics in García Márquez's Work.
This course will focus on García Márquez's masterpiece in order to analyze its modes of representation, discursive strategies, and fictional construction as well as its interactions with history, politics, and literary and popular traditions. Other related work by the Colombian Nobel Prize winner will be discussed, as will his journalistic pieces and movies. The novel may be read in Spanish or English; discussion will be mainly in Spanish.

This course will explore the history of the end, the catastrophe, and the literary sceneries of the new aesthetics. Departing from a comparison between the "fin de siècle" and the current "end of the century," we will pass to the apocalyptic views of the millenium and focus on current essays on the topic (Calvino, Baudrillard) as well as on new trends, ideas, and narratives related to this subject in the Americas. This could be the first course on the literature of the 21st century.

HISP 1370K. Literatura latinoamericana del siglo XXI.
Estudiaremos las tendencias innovativas de la narrativa latinoamericana reciente. Veremos la literatura como un trabajo sobre la resignificación de lo nuevo. Nuevas voces, nuevos textos y géneros, y nuevas ideas proponen una visión del futuro que buscamos documentar. Los libros y textos que leeremos son un mapa del futuro. Algunos temas: el sindrom familiar, violencia y crisis del proyecto moderno, la saga de la migración, la conciencia transatlántica, el mundo emotivo y los afectos, la ética de la solidaridad.

HISP 1370L. Gabriel García Márquez and the Politics of Magic Realism.
Estudiaremos las principales novelas del autor, desde El coronel no tiene quien le escriba hasta Cien años de soledad, con especial atención al realismo mágico y las ideas sobre la novela que cultivó el autor. Nuestra discusión se situará en el proceso social y político latinoamericano así como en las mitologías de la cultura popular. Prerequisite: HISP 0730 or 0740.
HISP 1370N. Carlos Fuentes and the New Mexican Narrative.
This seminar will focus on close-readings and conceptualization of Fuentes' innovative works of fiction and main ideas on Mexico and its cultural history. We will discuss a selection of his short-stories, novels and essays, moving from the political to the Gothic, from history to the Baroque. We will follow with new Mexican fiction writers who renew and debate Fuentes practices and ideas. Among them, Carmen Boullosa, Jorge Volpi, Pedro Ángel Palou, Cristina Rivera Garza and Yuri Herrera. The seminar will be in Spanish, and is limited to 40 students.

HISP 1370P. Contemporary Cuban Literature and Visual Culture.
In this course we will read novels, short stories, essays and poetry; examine art work, performances and blogs, and watch films produced in Cuba or in the Cuban diaspora during the "Special Period," or since the 1990s. Authors, filmmakers and artists may include Ena Lucía Portela, Juan Carlos Tabio, Fernando Pérez, Carlos Garaiaca, Belkis Ayán, Antonio José Ponte, Pedro Juan Gutiérrez, Iván de la Nuez, Reina María Rodríguez, Victor Fowler, Antón Arrufat, Ana Lydia Vega Sergova, Jesús Díaz, Zoé Valdés.

HISP 1370Q. Caribbean Messiahisms and Utopias.
This course explores messianic and utopian thought in and about the Caribbean, broadly construed. We will pair a range of literary and historical readings with philosophical considerations of messianism's and utopia's relation to politics and texts. Texts may include Columbus's diaries, Vargas Llosa's La guerra del fin del mundo; Carpentier's El reino de este mundo; a novel about Dominican cult leader Oliverio Mateo; literature and films from the Cuban Revolution; and lyrics by salseros-turned-pentacostals, Richie Ray and Bobbie Cruz. Prerequisite: HISP 0740, or both HISP 0730, and 0750, or instructor permission. Taught in Spanish.

HISP 1370R. Peruvian Literature: Historical Memory and Human Rights.
Este curso busca explorar las representaciones de la violencia y la "guerra sucia" en la reciente literatura peruana. Estudiaremos un conjunto de novelas, testimonios de las víctimas de la violencia, y teatro sobre los derechos humanos. Nos interesa analizar el debate sobre la conciencia jurídica, las migraciones y el lenguaje popular, así como los nuevos agentes sociales, y las nuevas formas de expresión y negociación cultural. Estudiaremos novelas, películas y obras de teatro, fotografías y arte plásticas.

HISP 1370S. Tango: A Forgotten History Revealed.
Tango is the original music of the Rio de la Plata countries. It was born and it evolved in Buenos Aires and Montevideo—and other minor cities—from the 1880s on. In this course we will read and interpret tango, considering both its music and its lyrics. We will study the urban atmosphere that provided the context for these lyrics and dancing. Images and music are central resources for this course. This course is aimed at those who are interested in the culture of Latin America and the Rio de la Plata, including tango, immigration, suburban and urban cultures, and connections between literature and music. Analysis and interpretation of tango lyrics will provide an opportunity to learn and understand the "lunfardo" language, a local "rioplatense" slang widely employed by tango singers from Carlos Gardel on.

This course will explore new trends and authors from the Hispanophone world: Spanish, Latin American and Latino narratives of migration, bilingualism, globalization and innovative forms and techniques. This course will be dedicated to Borges global. We will follow his imprint on the international literature and literary ideas. We will read, in Spanish and English, Borges' stories and essays.

HISP 1370U. Cuba: Historia y Literatura.
Este curso constituye un viaje literario a lo largo de la historia de Cuba, desde el siglo dieciséis hasta el presente. Nuestro objetivo central es complejizar la relación entre historiografía y ficción narrativa. Entre los textos que analizaremos se incluyen tres novelas, un testimonio, una docena de cuentos y un número similar de ensayos y poemas.

HISP 1370V. Mujeres Malas.
This seminar will analyze the notion of "bad women" in Pre-modern and Latin American Literature and visual texts. Perception, representation, and stereotyping of these women, both historical and fictional, as Mad, Witch, Femme fatal, Hysterical, and Crazy, will allow us to follow the ideological narrative that produced these characters. Some of them are based on medical, primitive, political, and even psychoanalytic conceptions. We will discuss the primitive Castilian epic cycle, Celestina, Carmen, the novel and the opera, Malinche, Cortez' translator in the conquest of Mexico; and novels and short stories from contemporary authors as well as Luis Buñuel' films. Prerequisite: HISP 0730 or 0740.

HISP 1370W. La Cultura Política de la Transición y DDHH en el mundo Hispánico.
This course will discuss literary representations of "transitions" as the social and cultural mechanisms by which a country or region (Spain, Argentina, Chile, Peru, Cuba) moves from tradition to modernity, from the rural to urban, and from authoritarian regimes to democracy. We will also analyze the role of borders, social spaces, political negotiation, mapping and networks in the sagas of migration. Prerequisite: HISP 0730 or 0740.

HISP 1370Y. Literature and Film of the Cuban Revolution.
Cuba's revolution of 1959 gained extraordinary visibility internationally, motivating images of bearded rebels, jubilant crowds and middle-class flight. Yet even as the Cuban Revolution became an object of representation abroad, it guided the domestic production of new forms of literature and cinema. Over the course of the semester, we will trace the relationship between fiction and film, and between art and the revolutionary project, from 1959 to the present day.

HISP 1371A. Lorca, Vallejo, Neruda.
This course delves into the work of three towering figures of modern poetry in Spanish: Spain's Federico García Lorca, Peru's César Vallejo, and Chile's Pablo Neruda. We will explore their evolution from avant-garde experiment to increasing political commitment, paying particular attention to questions of gender, indigeneity, and modernity, seeing how each poet strives to entwine aesthetics with politics without sacrificing an extraordinary lyricism. Our readings will include side-trips into their prose, theater, and visual art, and into experiments in poetry, performance, and politics by some of their contemporaries (and ours).

HISP 1371B. Sports and Culture in Latin America.
Sports in Latin America are big, and in some cases huge, and their significance goes way beyond pure entertainment. They are a contemporary theater of sorts where underlying social tensions are relieved and sometimes exacerbated. This course studies soccer, boxing, baseball and lesser-known sports (e.g., ultramarathons and women's wrestling) in relation to Latin American national narratives, politics, race, and gender. Using tools of sociology and anthropology, among others disciplines, we will study the representation of and discourse about sports in cinema, literature, television, and other media. IN ENGLISH.

HISP 1500L. Theory and Practice of Translation.
The objectives of the course are to give students a firm grounding in the theory of translation studies as well as extensive experience in the practice of literary translation, working closely with several canonical Spanish texts as well as texts of the student's choice. Throughout the course of the semester, students will also be called upon to reflect actively on their experience as translators, and dialogue on this experience with their peers. This course is structured as a workshop, with students sharing their work – both translations and reading reflections – and collaborating with their peers. Pre-requisite: HISP 0600 or equivalent. WRIT

Este curso está dedicado a estudiar el lenguaje literario y sus estilos en los relatos orales, leyendas y mitos, así como cuentos y microrelatos, de narradores fundamentales en este género: Quiroga, Borges, Rufio, Cortázar, Arreola, Monterroso, Ribeyro, Ampuero, y autores más recientes. El análisis será formal y metódico, y estudiaremos el funcionamiento del estilo y la lengua literaria para ejercitarnos en la creatividad del español.
HISP 1700A. Dismantling the Clockwork: Creative Writing and Narrative Techniques.
This class focuses on creating literary texts in Spanish, which involves the development of a sensibility to appreciate narrative texts and the skills to employ writing techniques, e.g., use of the first person, free indirect speech or the stream of consciousness. Drawing from theoretical reflections on writing made by Latin American and Spanish canonical writers as well as examples of its use, we'll explore the creative possibilities of narrative forms: aphorisms, prose poetry and short stories. Our objective is to strengthen students' skills as individual and collaborative authors through exercises in literary production and techniques, strategies, and habits of good writing. In Spanish. WRIT

HISP 1700B. Rhythm and Silence: A Creative Writing Workshop.
The course focuses on learning the craft of creative writing in Spanish across genres. We will study underlying principles of writing through lectures, readings, discussions, and exercises. As we reflect upon the creative process, we will examine the relationship between author and text and explore narrative techniques used to construct complex characters, dialogue, and imagery. The object will be to expand our creative writing skills and discuss the works of influential contemporary Latin American authors such as Jorge-Luis Borges, Alejo Carpentier, Angelina Muñiz-Huberman, Elena Poniatowska, Ernesto Sabato, Juan Rufio, and Cesar Vallejo. WRIT DPLL

HISP 1900A. Ethnicity.
We explore the notion of ethnic difference in Hispanic cultural production across periods, movements, media and continents. Possible topics include: the concept of the "other", gender and ethnicity, violence and marginality, ethnic nationalism(s), exoticism and racism. We begin with theoretical and methodological considerations before proceeding with case studies from all periods. Senior concentrators only.

HISP 1900B. Literature and the Empire.
No description available.

HISP 1900C. Muslims and Jews Between the Old and New World.
No description available.

HISP 1900D. Transatlantic Explorations: Intercultural Dialogue Between Spain and Latin America.
Required of all concentrators in Hispanic studies in their junior or senior year, after they have completed 100-level courses in the department; other students may take the course with written permission. A pre-seminar covering topics of broad relevance to all Hispanic literatures and cultures. Several faculty contribute to the seminar; each student develops and presents a final project on an intercultural topic.

HISP 1900E. Voices of Dissent.
No description available.

HISP 1900F. Spanish Myths and Icons.
The Spanish culture has often been identified through the centuries by certain myths and icons which reveal a mode of thinking, of behavior and of social status. Such is the case of the go-between (la Celestina), the picaro who lives in the margins of society and becomes its major critic (Lazarillo), or the figure of don Juan. The objective of this course is to study in depth these signs of identity and their rich literary and cultural tradition. Lectures and discussion groups will be conducted in Spanish.

HISP 1900G. Identities, Regions and Nationalities.
Spain and Latin America have a rich and complex process of national formation. It was based on regional conflicts and negotiations. Modern literature documents this process in novels and essays. This course is intended for concentrators and senior students in Hispanic Studies.

HISP 1900L. Theories of Literature and Culture in a Hispanic Context.
Introduces key contemporary perspectives in the fields of literary and cultural theories from a transatlantic perspective. Emphases will be on definition of literature, theories of the novel and of literary genres, theories of interpretation, Latin American and Spanish theoretic perspectives like hybridism, "transculturacion" and the theory of Baroque, and a revision of modern approaches to culture (critical theory, ecology, gender theory, post-structuralism, etc.). Spanish and Latin American texts will be used as a counterpoint to theory. Offered for senior concentrators in the Hispanic Studies department in their last semester. Readings by Carpentier, Nietzsche, Aristotle, Derrida, Foucault, Deleuze, Simmel, Paz, Borges, Abram, Rama and others. Open to senior Hispanic studies concentrators.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HISP 2013. Dissertation/Professional Development.
This is intended for advanced graduate students in Hispanic Studies at the prospectus or dissertation stages. Its main purpose is to help students conceptualize or refine projects (including corpus of investigation, scholarly approaches, and principal guiding questions) and develop strategies for research and writing. Conducted as a workshop, the seminar provides ample opportunities for participants to give and receive feedback on each other's work and thus acquire important skills in peer review. While focused primarily on the dissertation (prospectus), the seminar also offers guidance on various aspects of professional development such as preparation for the job market and article publication.

HISP 2030A. Arthurian and Carolingian Romances of Medieval Iberia.
Arthurian and Carolingian romances captured the public's imagination throughout the European Middle Ages. This course explores the theme of separation and reunion in Medieval Iberian romances: its origins, development, and success. Texts studied include Castilian adaptations of Arthurian and Carolingian romances as well as the first indigenous Spanish romances, the Libro del cavalleria Zifar, and Amadis de Gaula.

HISP 2030B. History and Fiction: Literature of the 15th Century.
The goal of this course is to familiarize students with major literary works of the Fifteenth Century, and their socio-cultural background. Major works of three outstanding poets of this period (Juan de Mena, Ifigo Lopez de Mendoza, and Jorge Manrique), satirical and historical writings, romances, (ballads sung with instrumental accompaniment), Alfonso Martinez de Toledo's Corbacho and Fernando de Rojas' Celestina will be presented in the context of the distinct cultural traditions that coexisted in Spain.

HISP 2030C. Medieval Masterpieces.
Examines three medieval Spanish masterpieces: Cantar de Mio Cid, Libro de buen amor, and Celestina. Other works are read to explore lines of continuity and discontinuity in these three works and their respective genres.

HISP 2030D. Fifteenth-Century Sentimental Romances and Celestina.
The fifteenth-century sentimental romances establish narrative innovations and a literary climate that lead inevitably to the creation of the "novele". With their consistent portrayal of the sufferings of love, romances by Padrón, Flores, San Pedro, and Rojas represent an essential step in the evolution of the modern novel.

HISP 2030E. Medieval Spanish Epic.
A study of the medieval Spanish epic poems and narratives. This seminar will move through a series of topics or events and texts from the 10th to the 15th centuries, exploring the relation between heroic narratives and history. Four medieval cycles (Castilain Counts, Cid, Carolingian, and anti-Carolingian) based on oral traditions will be studied and compared with their ballad congeneros printed in the 16th century. We will examine the different contexts and channels in which historical epic narratives were produced, consumed and transmitted.
HISP 2100. Literary Theory and its Relation to Hispanic Studies. Provides a basic theoretical foundation in matters relating to the literary act and system (representation, literary change, contextualizations), to the subject (voice, biography, readers), and to the cultural configuration (models, innovation, translation). Texts: Bakhtin, Jakobson, Lotman, Barthes, Derrida, Kristeva, De Certeau, and Eco. Cases and texts from Spain, Latin America, and their interactions. Five short papers. Seminar.

HISP 2150D. Gongora's Poetry and Poetics: Breaking from Literary Conventions. Gongora is the greatest revolutionary of Hispanic lyric of all time. He created a style and a school still prevailing. He assimilated a poetical convention (Petrarca, Garcilaso) and, at the same time, violently destroyed it. He has been the most commented on and also the most condemned poet. The course will focus on the great books of the Gongorine corpus (Soledades, Políntico) and also on the paradox method that systematically carnavalizes and deconstructs its own creations. This is the other hillside of his poetry yet to be explored.

HISP 2160B. Garcilaso's Poetics. Spanish poetry has known through its history two great revolutionary movements: the one formulated by Garcilaso and the other, four centuries after, by Rubén Darío. This seminar, based on a close reading of Garcilaso's works, studies the incorporation and assimilation of the Petrarchan tradition as a source of poetic renewal, consistently reappropriating his work.

HISP 2160F. Questioning the Canon: Golden Age Theatre. The canonical dramatic texts of the Spanish Golden Age - from Lope de Vega's El caballero de Olmedo and El castigo sin venganza to Tirso de Molina's El burilador de Sevilla and Calderón's La vida es sueno will be opened to new critical inquiry. Dramatic discourse, construction of characters, social and moral issues such as justice versus revenge, reality versus dream, courtey love versus erotic love, chastity versus incest, will be at issue. Each play will also be studied in relation to its social background and as metaphors of power and political crisis.

HISP 2160G. Don Quijote: Contexts and Constructions. This seminar offers an in-depth study of El ingenioso hidalgo Don Quijote de la Mancha in its "own right" and through an exploration of its affinities (editions, translations, interpretations, imitations). On the one hand, we will examine the novel in its narrative complexity and engagement with early modern Spanish literature and history. On the other, we will trace its modern critical reception, with particular focus on its paradoxical canonization both as a "universal" masterpiece and a cornerstone of constructions of Spain and the study of Spanish and the Hispanic world.

HISP 2160J. The Poetics and Practice of Space in the Theater of the Spanish Baroque. This seminar will explore the real and virtual spaces of seventeenth-century Spanish drama. We will examine the diverse spaces in which theatrical performances took place (public playhouses, city streets, court theaters, convents), as well as the various types of spaces represented on the stage (domestic and public, urban and rural, worldly and supernatural, familiar and distant). How did dramatic space articulate the boundaries of the public and private in the Spanish baroque? How did it function in the configuration of social hierarchies, subjectivities, and marginal as well as normative identities? In the theatrical world of seventeenth-century Spain, how did spatial practices on stage shape the experience of space off stage?

HISP 2160N. Antiquity and Innovation in the Hispanic Renaissance. The artistic and literary florescence of the Siglo de Oro paralleled a broader current of cultural innovation, which extended beyond peninsular Spain to other parts of Europe and the Americas – a movement which can be conceived as a Hispanic Renaissance. After an introductory overview, the seminar will highlight four major tendencies, through close examination of some foundational authors and texts. The course will be organised thematically, but texts will generally be approached in chronological sequence, beginning with Antonio de Nebrija’s investigations in the 1490s and ending with Carlos de Sigüenza y Góngora’s showcasing of New Spain’s complex legacies.

HISP 2160P. The Invention of the Novel: Fiction and Society in Renaissance Spain. In the space of ten years, at the mid-sixteenth century, four genres made their first appearance in Spain: the picarosque, pastoral and Moorish (or captivity) novels, and the novel of foreign customs and adventures. This course examines how and why these novels, and the more complex novels that followed, became key instruments for commentary and dissent in a society with little tolerance for both pursuits. Working individually and in groups, we will also undertake a series of exercises in close and critical reading to hone analytical skills. All readings, discussions and assignments will be done in Spanish.

HISP 2160Q. Stage and Page in Early Modern Spain: A Seminar on the Comedia Nueva. This seminar studies the development and florescence of early modern Spain’s most popular form of entertainment, the comedia nueva, from both literary and performance perspectives. We will read works by the principal playwrights of the period (Lope de Vega, Tirso de Molina, Calderón de la Barca, and others); examine the comedia’s main sub-genres (honour plays, comedias de capa y espada, and autos sacramentales, etc.); and consider the institutional regulation and social and material dimensions of theatrical activity (including the configuration of playhouses and composition of acting companies). Key critical approaches to the comedia, past and present, will also be explored.

HISP 2250B. Galdós and the Nineteenth-Century Spanish Literary Field. Literary history knows Benito Pérez Galdás as the initiator of the modern Spanish novel. Through analysis of Galdós's theoretical and literary texts, we will explore this claim in relation to the preceding state of the novel, to the author's relationship with contemporary writers, and to his own work in other genres, to assess his contribution to the evolution of the figure of the writer, and of the Spanish literary field.

HISP 2250F. The Construction of Womanhood in Nineteenth-Century Spanish Literature. In 19th-century Spain, literature, law, medicine, sociology, anthropology, and popular culture came together to institute and consolidate a new ideal of "woman" that would serve as one of the foundations of the modern bourgeois order. We examine the establishment of this gendered model, as well as the challenges to it that begin to appear with the emergence of a nascent feminism.

HISP 2250G. The Eighteenth Century: Neoclassicism and the Enlightenment. A studies course examining the main features of the development of 18th-century thought and literary expression in the Spanish empire, with special attention to the themes of neoclassicism and enlightenment. Writers discussed include Feijoo, Jovellanos, Cadalso, Meléndez Valdés, and Moratín.

HISP 2250H. The Letter of the Law: Crime and Culture in Modern and Contemporary Spain. From the nineteenth-century causa célebre to the contemporary detective novel and film, crime has fascinated Spanish society. This production brings up cultural anxieties about order and authority, the state and the individual, good and evil; and problems of ontology and epistemology, and high vs. low culture. We will research these problems in their Spanish context through primary works, criticism, and theory.

HISP 2250N. Madrid's Modern Landscapes (1780-1900). A seminar to study the changing relationship between landscape, architecture, and society during Madrid's modernization, from the late eighteenth century to the early twentieth. Considers representations of gardens, parks, and "natural" landscapes around the Spanish capital as expressions of how writers, planners, and intellectuals envisioned changes in ideas of national identity, gender relationships, class consciousness, and artistic perception. Readings, presentations, and group discussions are designed to promote a sustained analysis of such concepts as modernization, nature, the city and the country, with an eye not only to Madrid's past but also to our own relationship to landscape in the present.
HISP 2350B. Fictions of Modernity, 1845-1950.
What does it mean to be modern in Latin America? We look for answers in the 19th century, examining Sarmiento's programmatic voice as well as writers that question the meta-narratives of progress. Topics include historicity, bodies in crisis, literary realism, "Modernismo" and regionalism. We also discuss theories of modernity and explore popular culture, with special attention to early Mexican Film.

HISP 2350C. La nueva novela de América Latina.
Este curso está dedicado a algunos textos fundadores: Rayuela de Julio Cortázar, Pedro Páramo de Juan Rulfo, La muerte de Artemio Cruz de Carlos Fuentes, Los ríos profundos de José María Arguedas, Cien años de Soledad de Gabriel García Márquez; pero también a otros que literaria iniciaran nuevas rutas: La guaracha del macho Camacho de Luis Rafael Sánchez, Un mundo para Julius de Alfredo Bryce Echenique, Los vigilantes de Diemela Elitt, y La ingratitude de Matilde Sánchez.

HISP 2350D. Nineteenth-Century Latin American Prose.
Departing from the national representations of the early fiction and later realism and romanticism, we will focus on the fundamental novels and stories of the nineteenth century. Some of the issues discussed are national formation, the family romance, nature and history, as well as the political dimension of these texts.

HISP 2350E. Novela latina contemporánea: Crítica Textual y Ediciones Críticas.
Estudiaremos la constelación de novelas fundamentales (Pedro Páramo, Los ríos profundos, Rayuela, La muerte de Artemio Cruz, Cien Años de Soledad entre otras) que configuran un sistema literario hecho de innovación formal, ampliación de la lectura, y puesta en crisis de la representación.

HISP 2350F. Queering Latin American Literature.
Until the 19th century, homosexuality was vilified in Latin America as the ‘pecado contra natura.’ With the medicalization of sexuality at the turn of the century, homosexuality emerged as a contested identity. We explore the representation of gay themes in relation to power, violence and political resistance. Topics include: archival work, Queer Studies, autobiography, postmodern bodies. For graduate students only.

HISP 2350G. Teoría y Práctica Poética en César Vallejo.
Seminario dedicado a estudiar en profundidad la poesía hermética de Vallejo. Analizaremos su práctica poética así como su teoría del poema a través de la evolución de su obra y pensamiento.

HISP 2350H. The History of Wonder in Colonial Spanish American Literature.
The notion of wonder (asombro, maravilla) played a determining role in the Spanish and Creole writings of the Spanish American colonial period. The volatile aesthetic of wonder raises and implicates such important issues as otherness, exoticism, category crisis, and identity formation. A studies course examining the role of wonder in New World historiographic and literary writings of the 16th and 17th centuries.

HISP 2350I. Vallejo y sus contemporáneos.
Este seminario monográfico tiene como finalidad explorar la obra poética de César Vallejo en relación a los contextos del modernismo, la vanguardia, y la poesía contemporánea. Partiremos de un análisis formal del lenguaje poético y su organización semántica, de modo de ejercitarnos en el análisis textual de la poesía.

The figures of the intellectual and the artist in turn of the century Latin America (1880-1910). The difference between the artist and intellectual provides a new point of view for the discussion about modernization. During the years 1880-1910 the concepts of intellectual, cultural autonomy, and a Saxon-Latin divide gained centrality. Those years also witnessed a clash between Positivism and a new Spiritualistic reaction. Reason, Aesthetics, and the Occult were three strong traditions in tension with each other during those years. How did cultural agents deal with this tension? How did they represent it? These questions suggest the importance that the end of 19th century has had on our present discussions within and about Latin America. Readings by Martí, Dario, Herrera y Reissig, Róod, Lugones, Colmo, Ingenieros, Ramos Mejía, and others.

HISP 2350L. Románticos y Modernos: un proyecto para el “individuo” en el XIX latinoamericano.
No description available.

HISP 2350M. Poetics of the Avant-Garde in Latin America.
This course traces the shocks and flows of avant-garde activities through Latin America, beginning in the first decades of the twentieth century and weaving our way to the present. We will explore manifestoes, poetry, artworks, and film from Argentina, the Caribbean, Chile, Brazil, Mexico, and Peru, from creacionismo through Brazilian modernismo, ultralismo and estridentismo, poesía afroantillana and tecnocinjigeniso, with occasional detours into Iberian experiments, culminating with studies of the neo-avant-gardes of the 1960s and of the nostalgia for the avant-gardes which characterizes the early twenty-first century.

HISP 2350P. Teoría Literaria: la literatura Transatlántica.
Dedicado a la teoría del texto transatlántico, en este seminario trabajaremos sobre la historia intelectual de la interculturalidad Atlántica. A partir de los modelos, contactos, apropiación, debate y dialogismo que entre Europa y América Latina configuran un sistema literario, nos detendremos en la construcción del Sujeto, la Representación y la Lectura. Estudiaremos a Guamán Poma de Ayala y Garcilaso de la Vega, la saga de Calibán, los modelos de la formación nacional en Martí y Sarmiento, y la genealogía de la mezcla como la diferencia moderna de la producción cultural latinoamericana. En español.

HISP 2350V. The Politics of Romanticism in Spanish American Literature.
This course postulates Romanticism as a regime of representation employed by second-generation citizens of the new Latin American republics to organize time-space in post-Independence Spanish America. Through readings of national romances, periodicals, poetry, cuadros de costumbres and travelogues, we will discuss what Romanticism and being Romantic meant for mid-19th-century writers and readers in Spanish America. Weekly readings will be organized around a word from a glossary of Romantic keywords: lengua, pueblo, indio, España, among others. Finally, the course will examine connections between 19th-century Romanticism, 20th century criollismo and Populism.

HISP 2450. Exchange Scholar Program.

HISP 2520C. Historia Cultural del Sujeto Hispano-americano.
Investigaremos la genealogía del Sujeto americano a partir de textos contemporáneos. Seguiremos sus huellas en las relaciones, relativos, poemas, y ensayos que documentan el habla, la escritura, la representación, y los saberes de este héroe de la Modernidad. Algunos ejes de esta exploración: la heterogeneidad, la cuestión del Otro, ideologías y nación, marginalidad y migración, memoria y diferencia.

HISP 2520D. La Ciudad Modernista.
Este seminario estudiará las representaciones, funciones y estilos de la ciudad como espacio del Modernismo hispanoamericano. A partir del debate ciudad vs. campo, característico de la instancia formativa de las nacionalidades (Martí y Sarmiento), analizaremos el proceso de la modernidad urbana en la poesía del Modernismo (Dario, Lugones), así como el relato y la crónica que lo propician (Gutiérrez Nájera, Julián del Casal) y la teoría cultural que lo debate (Rodó, González Prada). El arte y la iconografía, la estética del “fin de siglo” y el cosmopolitanismo son otros temas.

HISP 2520E. La cultura escolástica Y el debate sobre el indio americano en el encuentro transatlántico.
Este curso examina las estructuras de conocimiento que conectan la tradición medieval con el descubrimiento de América, el debate jurídico sobre los derechos de los indios, y la producción etnográfica de los siglos XVI y XVII. Textos de Marco Polo, Pedro Alíaco, Cristóbal Colón, Francisco de Vitoria, Juan Ginés de Sepúlveda, y Bartolomé de las Cases.

HISP 2520F. La Vision Transatlantica en las Cronicas Indigenas y Historia de Tlaxcala.
Este curso examina las estructuras de conocimiento que conectan la tradición medieval con el descubrimiento de América, el debate jurídico sobre los derechos de los indios, y la producción etnográfica de los siglos XVI y XVII. Textos de Marco Polo, Pedro Alíaco, Cristóbal Colón, Francisco de Vitoria, Juan Ginés de Sepúlveda, y Bartolomé de las Cases.

HISP 2520G. La nueva novela de América Latina.
Este curso contempla la contribución de los cronistas 'indio' y 'mestizos' sobre los derechos de los indios, y la producción etnográfica de los siglos XVI y XVII. Textos de Marco Polo, Pedro Alíaco, Cristóbal Colón, Francisco de Vitoria, Juan Ginés de Sepúlveda, y Bartolomé de las Cases.

HISP 2520H. The History of Wonder in Colonial Spanish American Lettres.
The notion of wonder (asombro, maravilla) played a determining role in the Spanish and Creole writings of the Spanish American colonial period. The volatile aesthetic of wonder raises and implicates such important issues as otherness, exoticism, category crisis, and identity formation. A studies course examining the role of wonder in New World historiographic and literary writings of the 16th and 17th centuries.

HISP 2520I. Vallejo y sus contemporáneos.
Este seminario monográfico tiene como finalidad explorar la obra poética de César Vallejo en relación a los contextos del modernismo, la vanguardia, y la poesía contemporánea. Partiremos de un análisis formal del lenguaje poético y su organización semántica, de modo de ejercitarnos en el análisis textual de la poesía.
HISP 2520G. Modernismo and Its Discontents.
Spanish-American Modernismo articulated pointed critiques of the nation-state, liberalism, and middle class values. We explore Modernista prose and poetry with special attention to Rubén Darío, José Martí, and Delmira Agustini. Themes include gender, travel writing, urban life, Art Nouveau, and the rise of the fantastic. Theoretical readings by Benjamin, Said, Hall, and Freud.

HISP 2520H. Sor Juana Inés de la Cruz in Her Literary Context.
Intensive study of Sor Juana’s major writings in a variety of genres; comparisons with other writers of her extended literary milieu.

HISP 2520I. Teoría y práctica del texto transatlántico.
Este curso propone varios escenarios teóricos sobre el texto transatlántico. Partiendo de modelos de teoría literaria formal trabajaremos sobre un conjunto de textos de ambas orillas del idioma. Revisaremos las cuestiones del género, representación, lectura y recepción, mezcla y heterogeneidad archivo y cambio.

HISP 2520K. La Picaresca Entre Dos Mundos.
Este seminario considera la crisis espiritual, epistemológica, e institucional que acompañó el surgimiento de la picaresca en España, así como las condiciones que dieron lugar a la asimilación y transformación de este género en la América colonial.

HISP 2520L. Latin American Existential Literature.
European existentialism had a strong impact on Latin American literature, though that impact remains under-explored. The course begins with European existentialism and Latin American identity politics. It then explores the particular constructions of European existentialism effected by Argentine, Uruguayan, Mexican, and Brazilian writers of prose fiction in the mid-twentieth century. Readings in Spanish and English. Instructor override needed for registration.

HISP 2520M. The Poetry and Discursive Strategies of Spanish American Modernismo.
The development of Modernismo was a turning point in the elaboration of the continental self-image. Modernista poets like Rubén Darío, Leopoldo Luigones, Julio Herrera y Reissig, Julián del Casal, Manuel Gutiérrez Nájera and José Asunción Silva were among the first original Hispanic American creators of literature, but they did not share a common view on continental problems and solutions. The relevance of Modernismo for the shaping of Latin American self image cannot be overstated. Modernista’s conceptions on new intellectuals, aestheticism, l’art pour l’art, racism, immigrants, science and the occult, modernization, decadence, dandyismo, the body, sex, feminism, anarchism, cosmopolitanism, pan-Latinism, universalism and nationalism will be discussed.

HISP 2520N. La Reinvenção de América en la Nueva Novela Hispanoamericana.
Este curso estudia perspectivas recientes de los primeros encuentros entre Europa y América en la nueva novela histórica hispanoamericana. Considera no sólo la relación entre estas ficciones y las fuentes del período colonial, sino también su diálogo con el presente a través de la reconfiguración del pasado. Las lecturas incluyen El arpa y la sombra de Carpentier, Son vacas, somos puerco de Boullosa y Ursua de William Ospina.

HISP 2520O. The Old Science in the New World: Nature, Culture, and Empire in the Age of Exploration.
Studies how Spain’s exploration and conquest of the Americas tested European understandings of the natural world; of nature’s bearing on human psycho-physiology and, thereby, on culture; and of the balance between normalcy and deviance in natural and human domains. Topics range from changing theories about the distribution of land and life around the globe to “natural” and “moral” histories implicated in a debate over Spain’s rights to the Americas and its peoples. Readings: Aristotle, Strabo, Pliny, Ptolemy, Columbus, Vespucci, Oviedo, Las Casas, and Acosta. Students will be able to read primary texts in either Spanish or English. Discussion in English. Undergraduates welcome.

HISP 2520P. Narrativa latinoamericana contemporánea (De Juan Ruflo a Diameia Elit).
Estudiaremos los modos de representación, prácticas de escritura y lectura, redes culturales, tramas sociales y políticas de los relatos de la modernidad crítica y diferencia latinoamericana. Autores: Cortázar, García Márquez, Fuentes, Bryce, Rodríguez, Juliá.

HISP 2620A. Entre nosotros: Representing the Family in Modern and Contemporary Spain.
This course reflects on the representation of the family in Spanish literature and film since the Civil War, spanning texts and films from the period 1939-2009. Some of the themes we will explore over the course of the semester include: the family as a space for the formation of identities and subjectivities; the symbolic relationship between family and nation; religion; gender roles and the concepts of maternity, fatherhood, and childhood; monstrous families and the specter of incest; modern "found" families constructed outside biological bonds. Texts and films by Sender, Buero Vallejo, Delibes, Cela, Laforet, Buñuel, Boraú, Almodóvar, Saura, among others.

HISP 2620P. The Urbanization of Culture: BCN-MAD from Modernity to Postmodernity.
The way you live is the way you represent reality, David Harvey argued in The Urban Experience (1989). Any change in aesthetics, he continued, it should therefore imply a change in the perception of space leading to what Harvey described as the urbanization of consciousness. Playing out of this concept, this class will examine the ways by which two Iberian cities (Barcelona and Madrid) have been both represented and re-imagined in contemporary culture through novels, films, painting and photography.

HISP 2900. Theory and Methods of Foreign Language Teaching.
How are second languages acquired? How can instruction optimize acquisition? How do we evaluate, improve or create effective teaching materials? This course introduces the theory of foreign language learning and teaching and seeks to help language teachers implement communicative language teaching through reflective practice. Written permission required for undergraduates.

HISP 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

HISP 2980. Research in Spanish and Latin American Literature.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HISP 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

HISP 2991. Thesis Preparation.

HISP XLIST. Courses of Interest to Concentrators in Hispanic Studies.

History

Chair
Robert O. Self
As one of the first institutions in the United States to provide for historical studies, Brown University has long valued and nurtured research in the Department of History. The faculty’s high standard of scholarship and excellence in teaching are well known, and members of the department are committed to the value a rigorous education in the humanities confers upon students. The department trains students in the fundamentals of historical thinking: skills and attitudes that will provide a foundation for excellence in a wide range of careers and professions, including teaching, law, medicine, business, public service, and advanced historical research.

For additional information, please visit the department’s website: https://www.brown.edu/academics/history/
History Concentration Requirements

History is the study of how societies and cultures across the world change over time. History concentrators learn to write and think critically, and to understand issues from a variety of perspectives. The department offers a wide variety of courses concerned with changes in human experience through time, ranging from classical Greek and Roman civilizations to the histories of Europe, the Americas, and Asia. While some courses explore special topics, others concentrate on the history of a particular country (e.g. Russia or France) or period of time (e.g. the Middle Ages or the Renaissance). By taking advantage of our diverse course offerings, students can engage in and develop broad perspectives on the past and the present.

Concentration Requirements

1. **Basic Requirement**: A concentration in History consists of a minimum of ten semester-long courses; of these, at least eight must be offered by the Brown University History Department, including cross-listed courses. (Students who spend more than one semester at another institution, must take at least 7 HIST courses - see “Transferring Courses” below.)

2. **Courses below 1000**: Students may count no more than four courses numbered below 1000 toward the concentration requirements. Students considering a concentration in History are encouraged to take First Year and Sophomore seminars, as well as courses in the HIST 0150 and 0200 series, for an introduction to historical reasoning, discussion, and writing.

3. **Field of Focus**: Upon declaring a concentration in History, students must define the area that will be the primary focus of their program. The primary field of focus must include a minimum of four courses. Students who choose a geographical focus must provide a thematic or chronological rationale for the coherence of courses with a broad chronological span. Students who are interested in a thematic or transnational focus (such as Science, Technology, Environment and Medicine or the Ancient World) may include courses from different geographic areas. All students should consult a concentration advisor early in the process. All fields are subject to approval by the concentration advisor.

4. **Geographical Distribution**: Concentrators must take at least two courses in three different geographic areas. These are:
   - Africa
   - East Asia
   - Europe
   - Global
   - Latin America and the Caribbean
   - Middle East and South Asia
   - North America

   “Global” courses are defined as those that deal with at least three different regions of the world.

For details on which courses count toward which geographical distribution requirement click here (https://docs.google.com/spreadsheets/d/1NT5f7z2AuqKDCivZCxTdsceSnMD5v28ke6550tnBmE/edit?#gid=2138711521)

5. **Chronological Distribution**: All concentrators must complete at least two courses designated as “P” (for pre-modern).

For a listing of which courses count as “P” courses click here

6. **Capstone Seminar**: All concentrators must complete at least one capstone seminar (these will be HIST 1960s and HIST 1970’s series courses in the new numbering system.) These seminars are designed to serve as an intellectual culmination of the concentration. They provide students with an opportunity to delve deeply into a historical problem and to write a major research and/or analytical paper which serves as a capstone experience. Ideally, they will be taken in the field of focus and during the student’s junior or senior year. Students considering writing a senior honors thesis are advised to take an advanced seminar in their junior year.

7. **Transferring Courses**: The History Department encourages students to take history courses at other institutions, either in the United States or abroad, as well as history-oriented courses in other departments and programs at Brown. Students may apply two courses taken in other departments/programs at Brown to the ten-course minimum for the History concentration. Students who spend one semester at another institution may apply to their concentration a maximum of two courses from other departments or institutions, and those who spend more than one semester at another institution may apply to their concentration a third course transferred from another institution.

Students wishing to apply such courses must present to their concentration advisor justification that those courses complement some aspect of their concentration. Courses from other Brown departments may not be applied toward the chronological distribution requirement; courses transferred from other institutions may be applied toward the chronological distribution requirement so long as they clearly are history courses.

It is normally expected that students will have declared their intention to concentrate in History and have their concentration programs approved before undertaking study elsewhere. Students taking courses in Brown-run programs abroad automatically receive University transfer credit, but concentration credit is granted only with the approval of a concentration advisor. Students taking courses in other foreign-study programs or at other universities in the United States must apply to the Transfer Credit Advisor.

8. **Regular Consultation**: Students are strongly urged to consult regularly with their concentration advisor or a department advisor about their program. During the seventh semester, all students must meet with their concentration advisor for review and approval of their program.

HIST 1965N  "Furies from Hell" to "Femi-Nazis": A History of Modern Anti-Feminism
HIST 1965O  'Naturally Chic': Fashion, Gender, and National Identity in French History
HIST 1965Q  Anti-Semitism, Anti-Judaism, Anti-Zionism: Historical Connections and Disconnections
HIST 1965R  The Monarch in Modern Britain: Constitution and Celebrity
HIST 1966Q  Colonial Encounters and the Creation of Latin America
HIST 1967C  Making Revolutionary Cuba, 1959-Present
HIST 1967E  In the Shadow of Revolution: Mexico Since 1940
HIST 1967F  The Maya in the Modern World
HIST 1979Q Japanese Film and Animation of the 20th Century
HIST 1979R Scientific Controversies from Creationism to Climate Change
HIST 1979S History of Life Itself: Biopolitics in Modern Europe
HIST 1979T Modernism and Its Critics
HIST 1979U The Business of Empire: History of Capitalism and U.S. Foreign Relations, 1900 to the Present
HIST 1979V Technologies of the Soul: The History of Healing
HIST 1979W Debates on the Holocaust
HIST 1979X Modern Enchantments: Science, Religion, and Magic in Modernizing America
HIST 1979Y Peace, Justice and Human Rights in a Global Age
HIST 1979Z The World in Revolution: America and the Global South during the Long 1970s
HIST 1990 Undergraduate Reading Courses
HIST 1992 History Honors Workshop for Prospective Thesis Writers
HIST 1993 History Honors Workshop for Thesis Writers, Part I
HIST 1994 History Honors Workshop for Thesis Writers, Part II

Honors (OPTIONAL):
History concentrators in the 5th or 6th semester may apply for honors. To be admitted, students must have achieved two-thirds “quality grades” in History department courses. A “quality grade” is defined as a grade of “A” or a grade of “S” accompanied by a course performance report indicating a performance at the “A” standard. Students who wish to enroll in honors are recommended to take HIST 1992, “History Honors Workshop for Prospective Students.” Students who complete honors may count HIST 1992 as one of the 10 courses required for graduation in history. HIST 1992 students who prepare a prospectus that receives a grade of A- or above will be admitted to the honors program. Students in their 7th semester who have not taken HIST 1992 (including but not limited to those who are away from Brown during that semester) may apply to the program by submitting a prospectus no later than the first day of that semester. All honors students must complete one semester of HIST 1993 “History Honors Workshop for Thesis Writers, Part I” and one semester of HIST 1994 “History Workshop for Thesis Writers, Part II.” Students who contemplate enrolling in the honors program in History should consult the honors section of the department website. They are also encouraged to meet with the Director of Undergraduate Studies, who serves as the honors advisor.

History Graduate Program
The department of History offers graduate programs leading to the Master of Arts (A.M.) degree and Doctor of Philosophy (Ph.D.) degree. For more information about the Ph.D. program please visit the following website:
http://www.brown.edu/academics/gradschool/programs/history
For more information about the A.M. program please visit the following website:
https://www.brown.edu/academics/history/graduate/master-arts-ma
For more detailed information:
Guidelines for Master's Students
The one-year History M.A. program is designed to be intellectually rigorous yet also flexible enough to permit students to adapt it to a variety of professional contexts and goals. The intellectual rigor is achieved through M.A.-specific coursework, particularly the Historical Crossings
seminar, and its combination with Ph.D. seminars. The flexibility is achieved through a choice of one of two tracks:

- **The Professional Track** incorporates two "skills" courses (in, for example, writing, language, computer science, design, or public history) designed to help students meet individual professional goals.
- **The Academic Track** is designed to prepare students to continue work at the PhD level. It replaces one of the "skills" courses with a research credit in the spring for which the student will produce an article-length research paper. The second "skills" course could be a language or another PhD seminar, as appropriate.

**Historical Crossings**

The cornerstone of the M.A. program for students on both tracks is the Historical Crossings seminar in the fall. “Historical crossings” is a rough translation of histoire croisée, a term that has emerged in recent decades in European scholarship. It refers to global configurations of events and shared history, rather than to a traditional comparative history. The rise of global capitalism, for instance, is a shared history. People in different places experienced that rise in distinct ways yet their histories are united by the social and political formations that emerged within capitalism. Empire is another.

The Historical Crossings Seminar is a Fall course in which the entire M.A. cohort enrolls, along with interested Ph.D. students. The seminar will not serve as a traditional historical methods course but instead will focus on training students to read and think on various scales of historical analysis—from the cross-cultural and trans-geographic to the granularity of social and cultural specificity. It will require students to think both globally and locally and will introduce them to an advanced level of historical inquiry, debate, and exploration.

All students will complete 8 credits:

**Fall seminar in “Historical Crossings (required)**

- **HIST 2970H** Special Topics Seminar: American Political History
- **HIST 2971E** Latin American Historiography
- **HIST 2971J** Topics in 19th c. U.S. History
- **HIST 2971V** 19th and 20th Century European History
- **HIST 2971W** Readings in Environmental History
- **HIST 2980W** First Person History in Times of Crisis: Witnessing, Memory, Fiction

**1000 or 2000 level courses (2 credits)**

**1000 level "skills" courses outside History, chosen in consultation with the History DGS OR 1 research credit for MA paper and 1 1000 level "skills" course, chosen in consultation with the History DGS, typically either a language course or an additional PhD seminar (2 credits)**

**Courses**

**HIST 0150A. History of Capitalism.**

Capitalism didn’t just spring from the brain of Adam Smith. Its logic is not encoded on human DNA, and its practices are not the inevitable outcome of supply and demand. So how did capitalism become the dominant economic system of the modern world? History can provide an answer by exploring the interaction of culture and politics, technology and enterprise, and opportunity and exploitation from the era of the Atlantic Slave Trade to the 2008 Financial Crisis. HIST 0150 courses introduce students to methods of historical analysis, interpretation, and argument. This class presumes no economics background, nor previous history courses.

**HIST 0150B. The Philosophers’ Stone: Alchemy From Antiquity to Harry Potter.**

Alchemy today conjures Harry Potter or Full Metal Alchemist, not the serious scholarly tradition that captivated Isaac Newton and Carl Jung. We will explore alchemy’s long history, examining how it has endured and adapted to different cultural, social, intellectual, economic, and religious contexts. What did alchemists do? How did they explain their art? And why has alchemy come to represent fraud and folly in some circles and wisdom in others? Students will answer these questions by conducting research in the Hay. HIST 0150 courses introduce students to methods of historical analysis, interpretation, and argument. Presumes no previous history courses. WRIT

**HIST 0150C. Locked Up: A Global History of Prison and Captivity.**

A long history lies behind the millions of men and women locked up today as prisoners, captives and hostages. Beginning in antiquity and ending in the present, this course draws on materials from a variety of cultures across the world to explore incarceration’s centuries-old past. In examining the experience and meaning of imprisonment, whether as judicial punishment, political repression, or the fallout of war, the class will ask fundamental questions about liberty as well. History 150 courses introduce students to methods of historical analysis, interpretation and argumentation. This course presumes no previous history courses.

**HIST 0150D. Refugees: A Twentieth-Century History.**

Refugees are arguably the most important social, political and legal category of the twentieth century. This introductory lecture course locates the emergence of the figure of the refugee in histories of border-making, nation-state formation and political conflicts across the twentieth century to understand how displacement and humanitarianism came to be organized as international responses to forms of exclusion, war, disaster and inequality.

**HIST 0150F. Pirates.**

As long as ships have sailed, pirates have preyed upon them. This course examines piracy from ancient times to present, from the Mediterranean Sea to the Indian Ocean and the Caribbean. We will explore questions: How did piracy evolve over time? Where, why, and how did people become pirates, and what (if anything) made them different from other seafarers? How is piracy related to other historical processes, notably imperialism and nation-building? What explains the resurgence of piracy in the twenty-first century? Why have pirates become the stuff of legend, and how accurately are they portrayed in books and films?

**HIST 0150G. History of Law: Great Trials.**

Through discussion of a variety of precedent-setting trials throughout history, this course will probe the nature of demonstrative justice, the relationship between ideology and law in different societies, the politics of trials, and the relationship of trials to terror(ism) and social marginalization. Cases to be covered include: Socrates, Jesus Christ, the mythical Japanese Okuninushi, witch trials, the French Revolutionary Terror, the Dreyfus Affair, the Scopes (monkey) trial, the Stalinist show trials, the war crimes trials at Nuremberg, the Chinese Gang of Four, and the trials of Nelson Mandela and Saddam Hussein.

**HIST 0150H. Foods and Drugs in History.**

What we consume connects us to the worlds of both nature and culture. Bodily and socially, “you are what you eat,” but if your well-being suffers, you often seek out other ingestible substances. In many times and places, changing what you eat is thought to be healing, while in other times and places drugs – either remedial or recreational – are thought to be distinct and more immediately restorative. Few human interactions with the larger world are more important or interesting than how comestibles and medicines have been discovered, mixed, transformed, distributed, and how those processes have changed us. WRIT
HIST 0202. African Experiences of Empire. This is a "flipped" course on sub-Saharan Africa from the mid-nineteenth through the mid-twentieth centuries. It presupposes no knowledge of Africa and serves as an introduction to the continent. It focuses on daily life, families, and popular culture. Students will analyze change, question perspectives, and imagine life, and question what "Africa" was during the period of European imperialism. Most readings are primary sources, which include photographs, songs, and oral histories. The course is "flipped"; students first introduce to the content before class meetings through the text and multi-media sources. Class meetings are dedicated to discussion and exercises, including role-playing.

HIST 0203. Modern Africa: From Empire to Nation-State. This course examines the major historical developments in Africa from 1945 to the present and pays special attention to the diversity of experiences within the vast continent. The first part focuses on Africans' varied responses to the waning European imperial project and explores different ways in which African nationalist leaders and everyday people challenged colonial administrations to ultimately achieve their independence. The second part of the course investigates the consequences and opportunities of decolonization, including questions of political legitimacy, state-building, structural adjustment programs and international aid, human rights, and civil conflicts. D PLL

HIST 0212. Histories of East Asia: China. China's ascendency as a global economic power in recent decades has been regarded by many as a reclaiming of its former glory. In introducing the history of China from earliest times to the present, this course aims to provide an understanding of the making and remaking over millennia of what we call Chinese civilization, with its changes, contingencies, and continuities, its various claims to greatness, and its many recurring challenges. This course is open to all students and assumes no prior knowledge of Chinese culture, history, or language. Readings consist of both a textbook and relevant primary sources.

HIST 0214. Histories of East Asia: Japan. This is a course for students who have always been curious about Japan but haven't had an opportunity to explore that interest fully, for anyone in search of a better understanding of the historical contexts that shaped Japan's complex relationships with China, Korea and the West, and for all those who wish to broaden their exposure to the histories of East Asia. Open to all students, this course assumes no prior knowledge of Japanese culture, history, or language. WRIT

HIST 0215. Modern Korea: Contending with Modernity. This course examines the extraordinarily rapid revolution of Korea from isolated, agrarian society into a culturally modern, industrialized, and democratic nation that is an important actor on the world stage. It also will investigate how a non-Western society generates its own inspiration for human relations, social structure, political and cultural values. Includes coverage of North Korea. WRIT

HIST 0218. The Making of Modern East Asia. This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions and emphasizes Asians as historical actors via written, visual and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, birth of mass politics, new mechanisms of war, the language of self-determination, changing views of gender, shifting types of media and consumption, etc. WRIT

HIST 0228A. War and Peace in Modern Europe. This course explores the relationship between war, culture, and society in modern Europe. The two world wars changed the political, social, and cultural landscape of Europe, and by extension, the rest of the world, not least the United States. We will not delve into the military history of these vast conflicts; instead, we will examine how the experience of total war remolded European understanding and practices of memory and commemoration, culture and representation, humanity and civilization, utopia and revolution, catastrophe and identity. We will read influential scholarly texts and literary works, and watch important contemporary films.

HIST 0232. Clash of Empires in Latin America. Examines Latin America as the scene of international rivalry from the 16th to the 19th century. Topics include comparative colonization, the transatlantic slave trade, privatizing and piracy in the Caribbean, and the creation of an "Atlantic world." P

HIST 0233. Colonial Latin America. Colonial Latin America, from Columbus's voyage in 1492 to Independence in the nineteenth century, was the creation of three peoples: Europeans, Native Americans, and Africans. Spanish and Portuguese conquerors brought with them the world of the Crusades, the Inquisition, and the Renaissance. Native Americans lived there already, in rich empires and hunter-gatherer bands. Africans came as slaves from Senegal, Nigeria, Congo and Angola, bringing old traditions and creating new ones. These diverse peoples blended together to form a new people. This was a place of violence, slavery and oppression -- but also of art, faith, new societies, new ideas. P WRIT

HIST 0234. Modern Latin America. This course is an introduction to the history of modern Latin America. Through lectures, discussions, shared readings, we will explore major themes in the past two hundred years of Latin American history, from the early nineteenth-century independence movements to the recent "Left Turn" in Latin American politics. Some of the topics we will examine include the racial politics of state-formation; the fraught history of U.S.-Latin American relations; the cultural politics of nationalism; how modernity was defined in relation to gender and sexuality; and the emergence of authoritarian regimes and revolutionary mobilizations, and the role of religion in shaping these processes.

HIST 0243. Modern Middle East Roots: 1492 to the Present. The goal of this course is to provide students with a broad overview of Modern Middle Eastern history. Following the expulsion of the Moors and Jews of Iberia, we journey to the opposite end of the Mediterranean with continued Turkic expansions into southeastern Europe, the Arab world, and Iran. Then, the "long" nineteenth century: an era of profound transformation culminating in the Ottoman Empire's partition, primarily by British and French colonial rule. Finally, we explore forces shaping the twentieth century Middle East, from nationalism to oil, Islamism to "street" politics, and military interventions by the US, USSR, and regional powers.

HIST 0244. Understanding the Middle East: 1800s to the Present. This course is an introduction to the history of the modern Middle East from the mid-19th C to the present. Readings and topics are structured chronologically, and emphasize the key events and turning points in the political and economic history of the region. The goal of the course is to understand how the Middle East, as it is today, has been shaped by the events of the past.

HIST 0247. Civilization, Empire, Nation: Competing Histories of the Middle East. The "Middle East" is a recent invention. 100 years ago, virtually none of the states currently populating the region's map existed. This course considers how historians (and others) have used the concepts of civilization, empire, and nation to construct competing narratives about this pivot region's past from the rise of Islam to the present. Since facts acquire meanings through interpretative frameworks, we ask: What is privileged and what is hidden in these narratives? And what would the history of this region look like if we could see it through the eyes of the peoples who have long lived there?

HIST 0250. American Exceptionalism: The History of an Idea. For four centuries, the theme of America having a special place in the world has dominated American politics and culture, though many have questioned or challenged American distinctiveness. This course examines articulations and critiques of American exceptionalism, using sources from American history and literature, from comparative history and literature, and from modern American culture and politics. It is intended both as an introduction to American history and as a thematic class, focused on the U.S. in a global context, which is different from a traditional high school or first-year college American history class. WRIT
HIST 0252. The American Civil War.
An examination of the American Civil War and related topics in international law, international relations, and popular culture (this is not purely a course on military history). Students will learn about the American Civil War in a global context while also learning to analyze documents of different genres; and learning to make optimal use of online databases. The course assumes no background knowledge, yet it acknowledges that students may have a strong background in U.S. history, so it focuses especially on topics of current relevance that fall outside of typical history courses—international conflict and international law in particular. WRIT

HIST 0253. Religion, Politics, and Culture in America, 1865 - Present.
Religion has played an undeniable role in the contemporary American cultural landscape. This course lends some perspective on the present by investigating the various and, at times, surprising role religion has played in history in the shaping of American culture from 1865 to the present. WRIT

HIST 0257. Modern American History: New and Different Perspectives.
Rather than a survey, this course uses specific episodes and events to reveal different modes of analysis. Examples of questions are: What do gender perspectives tell us about men on the frontier and women in dance halls? What is the importance of baseball to American culture? How do a historian and a lawyer differ in their analysis of a sensational crime case? How can we understand why the U.S. dropped two atomic bombs on Japan? How did scandals in television and popular music signal an end to American innocence? How has the Baby Boom generation altered American society? And more. WRIT

HIST 0270A. From Fire Wielders to Empire Builders: Human Impact on the Global Environment before 1492.
This is a new lecture course intended to introduce the field of environmental history to students with no previous experience in it. The study of prehistoric, ancient and medieval environments is a heavily interdisciplinary research field, and the course will emphasize the variety of sources available for studying it. We will combine textbook readings with primary source readings from scientific and archaeological reports and, especially, contemporary texts. P

HIST 0270B. From the Columbian Exchange to Climate Change: Modern Global Environmental History.
Environmental stories are constantly in the news, from weird weather to viral outbreaks to concerns about extinction and fracking. In this course, we put current events in the context of the past 500 years, exploring how climate, plants, animals, and microbiota—not just humans—acted as agents in history. From imperialism to the industrial revolution and from global capitalism to environmental activism, we will examine how nature and culture intermingled to create the modern world. This is an introduction to environmental history and assumes no prior courses.

This course surveys history of Portuguese empire in Asia, Africa, and Brazil from fifteenth to early nineteenth centuries. Portugal pioneered the European expansion in the fourteenth century, laying the groundwork for several historical phenomena that defined modernity: the formation of colonial coastal enclaves in Africa and Asia, the colonization of the Americas, and the beginning of large-scale trade across the Atlantic and Indian oceans. The class analyzes the economic, religious and technological factors behind Portugal’s pioneering role in European expansion. We focus on patterns of socio-cultural and religious interaction between Portuguese and native peoples in Asia, Africa, Brazil. P

HIST 0276B. Science and Capitalism.
We will explore the longstanding relationship between science and commerce from the 17th century to our own asking when the modern notion of science as a disinterested pursuit of objective truth took root. We will also explore how knowledge of the natural world has been shaped by personal, financial, and other kinds of self-interest in a number of diverse contexts ranging from Galileo’s invention of the telescope in Renaissance Italy to the patenting of genetically engineered organisms in today’s world, paying special attention to the diverse mechanisms that have been devised to guard against fraud and disinformation. WRIT
HIST 0521A. Christianity in Conflict in the Medieval Mediterranean. Students in this class will learn about medieval history by taking on roles, informed by classic texts, in elaborate games set in the past. Drawing on the innovative “Reacting to the Past” curriculum, this class explores two dramatic moments in medieval history: the debate about Christian belief held at Nicaea in 325 and the deliberations about crusading held at Acre in 1148. Students will adhere to the intellectual beliefs of the medieval figures they have been assigned to play, and will learn skills—speaking, writing, critical thinking, leadership, and teamwork—in order to prevail in difficult and complicated situations. FYS P

HIST 0521M. The Holy Grail and the Historian’s Quest for the Truth. Dan Brown’s wildly successful novel The Da Vinci Code has recently given a feminist twist to an enduringly popular medieval legend also captured in big-screen antics of Monty Python and Indiana Jones: the quest for the Holy Grail. Beginning with Brown’s novel and other modern representations of the search for the Grail then turning back to texts from the Middle Ages, this seminar will unravel the truth - or truths - behind the legend. One central question will be how historians can use legends to understand the cultures they study. Instructor permission required. FYS WRIT P

HIST 0522G. An Empire and Republic: The Dutch Golden Age. Between about 1580 and 1690, a new nation emerged in Europe that became a bastion of liberty, ideas in ferment, fine art, military power, science and technology, and global economic reach: the Dutch Republic. A nation that thought of itself as peaceful, yet was constantly at war; as Protestant, yet was composed of people of many faiths; as personally aspirational, yet derived much wealth from the conquest and slavery of others. Its people and institutional arrangements greatly influenced Britain and America on their paths to power, too. Its rise and eclipse may be instructive. Enrollment limited to 20 first-year students. FYS WRIT P

HIST 0522N. Reason, Revolution and Reaction in Europe. First year seminar designed to introduce students to the study of history through a focused look at the French Revolution. It will be divided into two very different parts. The first part will be organized as a traditional history seminar in which we explore together the eighteenth-century developments that preceded the outbreak of the French Revolution. In the second half of the class, students will be assigned different roles in order to re-enact the discussions in the National Assembly that, from 1791 to its collapse in 1792, tried to create a constitution for the new French Nation. FYS WRIT P

HIST 0522O. The Enlightenment. The Enlightenment: Introduction to the Enlightenment as a fragmented series of projects that aimed at human liberation and the understanding of the social and natural worlds, with massive implications for the way that we conceive of ourselves today. Readings explore philosophy, science, slavery, economics, gender relations, and politics in the 18th century. FYS WRIT

HIST 0523A. The Holocaust in Historical Perspective. The course will examine the history and historiography of the Holocaust from early accounts to recent reconstructions of the origins, implementation, and aftermath of the “Final Solution.” We will also analyze documents, testimonies, memoirs, trial records, and various forms of representations and commemorations of the Shoah. Enrollment limited to 20 first year students. FYS WRIT

HIST 0523B. State Surveillance in History. How and why do states watch their citizens? This course explores historical practices of state surveillance from the perspective of both the “watchers” and the “watched.” Special emphasis will be given to twentieth-century Europe, but examples from other parts of the world and the US will also be featured in the readings. Some of the readings will be primary sources: memoirs, diaries, surveillance files. Other sources will include films and short fiction and some scholarly pieces on the workings of state security and secret police organizations. FYS WRIT

HIST 0523O. The Academic as Activist. Since the late nineteenth century, the modern research university has struggled with questions about When is the researcher participating in engaged scholarship? When does engagement suggest, instead, a lack of objectivity? How have economists, anthropologists, biologists, and historians tried to contribute to the common good, and where have their efforts broken barriers of privilege, and when have their efforts contributed to further oppression? This seminar will look at debates over the role of academics in political life. Topics may include: Fabian socialism, libertarianism and development economics, pan-African movements, and the Green Revolution. WRIT FYS

HIST 0535A. Atlantic Pirates. This seminar explores piracy in the Atlantic from the sixteenth to the early nineteenth centuries. We will examine everyday life on pirate vessels; the pirates’ role in emerging colonial societies and economies; the complex links between piracy, imperialism, and nation-building; and the image of pirates as both villains and figures of legend. Enrollment limited to 20 first year students. FYS WRIT P

HIST 0537A. Popular Culture in Latin America and the Caribbean. From tango to plastic surgery, Donald Duck to reggaeton, this course places popular culture at the center of modern Latin American and Caribbean history. How, will we ask, did popular culture reflect and shape struggles over national belonging? How did foreign cultural products come to bear on international relations and transnational flows? In what contexts has culture served as a vehicle of resistance to dominant ideologies and systems of power? Far from a mere “diversion,” popular culture instead offers a compelling lens onto the relationship between state and society in Latin America and beyond. Enrollment limited to 20. FYS DPLL

HIST 0537B. Tropical Delights: Imagining Brazil in History and Culture. Examines the many ways that Brazilians and foreigners have understood this vast continent-size country, ranging from early European explorers’ anxieties about Cannibalism to modern images of the Amazonian rainforest, Rio De Janeiro’s freewheeling Carnival celebrations, and the array of social movements mobilizing for social justice. Through an examination of historical sources, literature, movies, and popular culture, this seminar will consider how multiple images and projections of Brazil have shaped national and international notions about the country. Enrollment limited to 20. FYS WRIT

HIST 0540F. Women in the Middle East, 7th-20th C.: Patriarchal Visions, Revolutionary Voices. This course provides an historical approach to women’s lives, status, and perceptions. It focuses on women in the Middle East, from the seventh century emergence of Islam to the twentieth century revolutions and struggle for new identities. It examines the contested roles of women in society and the ways women were culturally crafted. In particular, we will discuss the modes by which women’s lives were narrated (by themselves and others); women’s use of the “patriarchal bargain” to deal with the shift from so-called “traditional” to so-called “modern” culture; and the encounter between “Eastern” and “Western” societies. FYS WRIT

HIST 0550A. Object Histories: The Material Culture of Early America. History is not just about people; it is also about things! Come explore the world of early America through the lens of objects—boats, dresses, plows, houses, wagons, watches, silver cups, wigs, blankets, land, gardens, hammers, desks—and the cultures that produced and consumed them. As a first year seminar, this course is designed to engagingly introduce students to the basic concepts of historical study. We will take several field trips to local historical sites, both on and off campus. Our primary focus will be specific objects and their contexts and histories. Enrollment limited to 20 first year students. FYS WRIT P
HIST 0551A. Abraham Lincoln: Historical and Cultural Perspectives.
This seminar uses life, legacy, myth of Abraham Lincoln to explore central themes such as frontier in early republic, nature of political leadership, law/legal culture, and emergence of sectionalism, slavery, anti-slaslavery, Civil War. Frequent short writing assignments and research investigations allow students in-depth explorations of Lincoln’s works, the writings of his contemporaries, and modern non-fiction, fiction, and film. The course enables us to consider two larger themes: 1) the relationship between memory and history; and 2) the function of history in modern society. The course has no prerequisites and does not presuppose special knowledge of American history. WRIT FYS

HIST 0555B. Robber Barons.
Today, the United States looks a lot like it did at the turn of the 20th century. Much like it is now, America’s economy at that time saw tremendous growth interrupted by periodic financial crises. Moreover, both are periods of immense inequality. Whereas we have the one per cent, the late 19th century witnessed a small group of capitalists amass unprecedented fortunes, which provided immense political power. In this class, we will explore what the lives of these “robber barons” can tell us about the role of economic privilege in shaping America’s social, cultural, and political history. FYS WRIT DPLL

HIST 0556A. Sport in American History.
This course covers the relationship of sports to aspects of American culture since 1900. Topics include gender, race, amateurism, professionalism, intercollegiate athletics, and sports heroes. Enrollment limited to 20 first year students. FYS WRIT

HIST 0557A. Slavery and Historical Memory in the United States.
How has America chosen to remember and forget the enslavement of millions of its own people? What are appropriate ways to acknowledge slavery in monuments, museum exhibitions, film, literature, and public policy? By approaching these questions through a wide range of visual and textual sources, we will explore the indeterminate space between history and memory. Enrollment limited to 20 first year students. FYS WRIT

HIST 0557B. Slavery, Race, and Racism.
This seminar will address the history of race and racism as it relates to the history of slavery in America. We will trace the emergence of slavery in the New World, with a heavy emphasis on slavery in the U.S. South. The course is broad in scope, beginning with the emergence of the slave trade and concluding with a look forward to the ways that the history of slavery continues to impact the way race structures our lives today. In short, this course provides an introduction to slavery studies and to the history of race in America. FYS DPLL WRIT

HIST 0557C. Narratives of Slavery.
This course will uncover the history of the slave trade, the labor regimes of slavery in the Caribbean and North America, and the rise of the Cotton Kingdom through the voices of the very people who lived through it: enslaved people themselves. We will read slave narratives, court documents, abolitionist treaties, oral histories of formerly enslaved people, and fictional accounts produced in the period. We will give special attention the ways that different kinds of historical sources-different types of narratives-shape what we know and how we know it in the history of slavery. FYS WRIT DPLL

HIST 0559A. Culture and U.S. Empire.
This seminar examines the relationship of American culture to U.S. imperial project. We will look at how cultural ideologies such as those about race, gender, and American exceptionalism have not only shaped Americans’ interactions with other peoples but also justified the spread of U.S. power. Enrollment limited to 20 first year students. FYS WRIT

HIST 0559B. Asian Americans and Third World Solidarity.
As historian Vijay Prashad puts it, “The Third World was not a place. It was a project.” During the 20th century struggles against colonialism, the peoples of Africa, Asia, and Latin America believed that another world was possible. Here, too, in the United States, minorities and their allies dreamed of dignity, democracy, and justice. Looking through the experiences of Asian Americans, this course examines the domestic freedom movements in the context of global decolonization. Topics include: campus activism, immigration, capitalist labor regimes, neocolonialism, cultural hegemony, and Afro-Asian connections. FYS DPLL

HIST 0574A. The Silk Road, Past and Present.
The Silk Road has historically been the crossroad of Eurasia; since the third-century BCE it has linked the societies of Asia—East, Central, and South—and Europe and the Middle East. The exchange of goods, ideas, and peoples that the Silk Road facilitated has significantly shaped the politics, economies, belief systems, and cultures of many modern nations: China, Russia, Afghanistan, Uzbekistan, and India. This course explores the long history (and the mythologies or imaginations) of the Silk Road in order to understand how the long and complex pasts of the regions it touches are important in the age of globalization. FYS WRIT

Why are there Chinese in the US, Canada, Mexico, Cuba, Peru? Singapore, Indonesia, Thailand, Vietnam, the Philippines? Australia, New Zealand, Fiji, Guam, Samoa? Mozambique, Zimbabwe, Cape Verde, Ghana? Spain, Germany, France, Russia, Czech Republic? Mauritius, Madagascar? India, Sri Lanka, Myanmar? Hong Kong, Macau, Taiwan? How and when did 50 million Chinese find their way around the world during the past 500 years, from the Ming Dynasty to the present moment? We will explore worldwide distribution of ethnic Chinese through Time (history) and Space (culture) in the so-called “Chinese diaspora,” and examine questions of migration, identity, belonging, politics and conflict. FYS WRIT DPLL

HIST 0580M. The Age of Revolutions, 1760-1824.
In the middle of the eighteenth century, the Americas belonged to a handful of European monarchies; within a few decades, most of the Americas was composed of independent republics, some of the European monarchs were either deposed or quaking on their thrones. Usually considered separately, revolutions in British North America, France, Saint-Domingue (Haiti) and Spanish America had diverse local circumstances yet composed a single cycle of intellectual ferment, imperial reform, accelerating violence and, forging of new political communities. We will examine revolutions that helped create the world we live in. Enrollment limited to 20 first year students. FYS WRIT P

This seminar will focus on the life and work of one of the most influential thinkers of the twentieth century, examining both his role in the Indian nationalist movement, as well as the global impact of his ideas on leaders such as Martin Luther King Jr. and Nelson Mandela. Enrollment limited to 20 first year students. FYS

HIST 0582A. Animal Histories.
Animals have been people’s energy, food, wealth, gods, hobbies, icons, and companions. Wild and domesticated non-human animals are essential yet often invisible historical subjects. This seminar makes them visible by tracking them through time—ancient, modern, and contemporary—on every continent. They are often symbols, but we look beyond animals as represented by people. We are more interested in them as actors and subjects with agency. By pushing at the boundaries of what constitutes legitimate topics, this seminar serves as a critical introduction to the historical discipline. FYS WRIT
HIST 0582B. Science and Society in Darwin’s England
This course is a first-year seminar designed to introduce students to the study of history. It will be divided into two very different parts. The first part will be organized as a traditional history seminar in which we explore together the world in which Darwin developed his theory of the Origin of Species. The second part will be a historical re-enactment of an 1863 discussion in Britain’s Royal Society about whether to award Darwin their highest honor, the Copley Medal. Enrollment is limited to 20 first-year students. FY S WRIT

HIST 0621B. The Search for King Arthur.
The King Arthur legend is one of the most enduring stories to emerge from medieval Britain. Drawing evidence from written and archaeological sources, we’ll delve into shadowy period in which legend is based, between the collapse of Roman imperial power in Britain and establishment of the Anglo-Saxon and Celtic kingdoms that would succeed the empire. We’ll also take students inside the historian’s workshop, exposing them to the tools, texts, and objects from which historians and archaeologists construct their interpretations of how the inhabitants of Arthur’s Britain lived and died. Enrollment is limited to 20 sophomores. WRIT SOPH P

HIST 0623A. British Social History.
What is the role of history in imagining progress, identity, and political movements? This course begins by reading classic nineteenth-century historians From Trevelyan to E. P. Thompson, asking about the politics implicit in their choice of subject and archive. It then turns to contemporary history, asking, how have debates about race, gender, and the environment in the past thirty years shaped how we look at history? How have different tools like digital history or the analysis of culture changed what we look at or why? How is the study of history changing today? SOPH WRIT

HIST 0623M. Becoming French: Minorities and the Challenges of Integration in the French Republic.
Recent controversies around Muslim integration, including debates around the headscarf and uprisings in the working class suburbs of French cities, point to difficulties France has faced in integrating minority populations. We’ll explore the encounter between France and its immigrant, religious, and racial minorities from the Revolution to contemporary times. By comparing paths of integration and debates around minority inclusion and consider how minorities negotiated their identities as they struggled to internalize France’s cultural and historical legacy. We’ll addresses political and historiographical debates over the relationship between political citizenship and religious/cultural identity. Enrollment is limited to 20 sophomores. SOPH

HIST 0637A. History of Jews in Brazil.
This sophomore seminar studies the history of Jews in Brazil from early colonial rule to the present. We first focus on the role of Jews and New Christians in the economic development of the Portuguese colony. We then examine the presence of the Inquisition, North African immigration in the nineteenth century, the larger Eastern European immigration in the twentieth century, and the formation of communities and institutions over the course of the last hundred years. Finally, we consider the role of Jewish opposition to the military regime and in the consolidation of democracy in the late twentieth century. DPLL

HIST 0654A. Welfare States and a History of Modern Life.
History of the American welfare state, from its origins in nineteenth-century industrial capitalism to contemporary debates about health care, in comparative perspective. Why did welfare states appear and what form did the U.S. version take? Considerations of social inequality, labor relations, race, gender, family policy, the social wage, and the relationship between markets and the state are all considered. Some comparison with European models. SOPH WRIT

HIST 0658D. Walden + Woodstock: The American Lives of Ralph Waldo Emerson and Bob Dylan.
Emerson and Dylan are cultural icons. Emerson has been called “Mr. America” and Dylan has just won the Nobel Prize for Literature. Both had boundless energy for public performance and self-representation; both actively supported turning points in the civil rights struggle; both raged against American military aggression; both were at the epicenter of a wide circle of intellectuals, while denying their own centrality. What is the celebrity intellectual’s responsibility to society while remaining true to oneself? Poems, essays, autobiographies, songs, and movies provide insight into these eternally fascinating geniuses and their times. SOPH WRIT

HIST 0685A. The Social Lives of Dead Bodies in China and Beyond.
The dead are all around us, but how do we know it? This course aims to uncover how corpses interact with the living as participants in social relations, especially during times of community upheaval. We’ll take China and Taiwan as jumping off points, but also look elsewhere in Africa, the Americas, Asia and Europe since the 19th century, when the broadening scale and nature of warfare; state expansion; rapid development; global circulation of technology; and the interplay of international philanthropies with older forms of charity and ritual pacification significantly affected the treatment, conceptions, and actions of the dead. WRIT SOPH

HIST 0720. The Romans.
The Romans established the only successful pan-Mediterranean empire in history, lasting nearly 1,000 years, with a legacy living everywhere today, from the U.S. Constitution to the English alphabet. Who were these people? We will study their social-political history from the city’s founding in 753 BCE to its fall in 476 CE, confronting the opinions of ancient authors directly to study historical questions such as: what challenges and problems did empire create? How did gender shape Roman lives? Or what does the decline of Rome’s democracy reveal about the state of American democracy? WRIT

This course considers how individuals and societies have constructed the idea of evil. We examine evil’s origins in religious traditions and review how those interpretations have been deployed and how the concept of evil has changed over time. Is it possible to offer a universal definition of evil? Is it true that “When a woman thinks alone, she thinks evil”? Does evil exist in “the Other” or oneself? To answer these questions, we engage in activities and discussion about sin, hell, pacts with the devil, witches, torture, lynching, genocide, psychopaths, empathy, and representations of evil in music, literature, and film.

HIST 0930A. Word, Image and Power in Renaissance Italy (ITAL 0580).
Interested students must register for ITAL 0580.

HIST 0930E. Sacrifice and Suffering: Rhetorics of Martyrdom Compared (RELS 0640).
Interested students must register for RELS 0640.

HIST 0930F. Twentieth-Century Africa (AFRI 0160).
Interested students must register for AFRI 0160.

HIST 0930G. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 0050M).
Interested students must register for JUDS 0050M.

HIST 0930I. History of the Holocaust (JUDS 0902).
Interested students must register for JUDS 0902.

HIST 0930J. The World of Byzantium (CLAS 0660).
Interested students must register for CLAS 0660.

HIST 0930M. Brothers Betrayed: Jews and Poles from 1500 until Today (JUDS 0901).
Interested students must register for JUDS 0901.

HIST 0930N. War and Society in the Ancient World (CLAS 0560).
Interested students must register for CLAS 0560.

HIST 0930P. Powering the Past (ENVS 0710).
Interested students must register for ENVS 0710.

HIST 0940A. History of Intercollegiate Athletics (EDUC 0850).
Interested students must register for EDUC 0850.
Students will also discover, analyze, and edit two new primary sources. These primary sources, supplemented by articles on history and social science, will help students understand how different perspectives, and imagine life during the age of European expansion. The majority of the reading assignments are drawn from the late-nineteenth through the mid-twentieth centuries. With a critical awareness of the ways that Africa's past has been narrated, it balances the mid-nineteenth through the mid-twentieth centuries. In addition to lectures, discussions, and papers, students will have the opportunity to create research presentations using multiple media formats. DPLL discussions and papers, students will have the opportunity to create research presentations using multiple media formats. DPLL
When Japan ratified the United Nations’ International Covenant on Civil and Political Rights, its representative reported, “The right of any person to enjoy his own culture…practice his religion or to use his own language is ensured under Japanese law. Minorities…do not exist in Japan.”
NOT! Many minority communities are present in Japan today. This course examines how several came into existence in the modern era, struggled to maintain distinctive lifestyles in a society that often defines itself as one of the world’s most homogenous, and influenced the flow of Japanese history.

HIST 1149. Imperial Japan.
This course is for students interested in exploring the changing ideas, technologies and practices that shaped Japan’s history from the 1850s, when it confronted the power of an encroaching West, to the 1930s when its choices led the nation to the edge of ruin. Lectures and readings will address the collapse of the Tokugawa regime, the Meiji Restoration, the construction of empire, and the emergence of new forms of cultural and political expression. Students will also learn how ideas about gender, race, and tradition were understood and made use of in Imperial Japan. Open to all students. WRIT

HIST 1150. Modern Japan.
Japan is a rich site for an exploration of many of the key processes and concepts that have shaped, and continue to transform, the modern world. These include the creation of the nation as the fundamental structure for social and political organization, a development that came late to Japan and had profound effects on its relationships with its neighbors, the crafting of its own histories, and with the emergence of debates about what it meant to be “Japanese.” The course also explores how ideas about gender, race, and tradition have been understood and made use of in modern Japan. WRIT

Uses film, oral histories, historical fiction, and more traditional forms of historical interpretation to explore the events, ideas, and legacies of Japan’s Pacific War. The armed conflict began in 1937 with the Japanese invasion of China and ended in 1945 with the atomic bombing of Hiroshima and Nagasaki. Some attention is paid to military developments, but the principle concerns fall into the areas of mutual images, mobilization, and memory. WRIT

HIST 1200B. The Fall of Empires and Rise of Kings: Greek History to 478 to 323 BCE.
The Greek world was transformed in less than 200 years. The rise and fall of Empires (Athen and Persia) and metamorphosis of Macedon into a supreme power under Philip II and Alexander the Great provide the headlines. The course covers an iconic period of history, and explores life-changing events that affected the people of the eastern Mediterranean and the topics that allow us to understand aspects of life and culture of the peoples of the eastern Mediterranean. and through these transformations, offers insights into the common pressures that communities confronted. No prior knowledge of ancient history is required. P

HIST 1200C. History of Greece: From Alexander the Great to the Roman Conquest.
In 334 BCE, the 22-year-old Alexander crossed over to Asia and North Africa perhaps already in his own mind to conquer the known world, thus changing the history of the West forever. The values of a small, if intensely introspective, people (the Greeks) became the cultural venuer for much of West, as the period became known as the Hellenistic (“Greekish”) Age. It led to the spread of a monotheistic idea, a profound belief in individualism, alienation from central power, and yet, conversely, the creation of natural law and human rights, along with a deep desire for universalism. P WRIT

HIST 1201A. Roman History I.
No description available.

HIST 1201B. Roman History II: The Empire.
The social and political history of the Roman Empire (14-565 CE). Focuses on expansion, administration, and Romanization of the empire; crisis of the 3rd century; militarization of society and monarchy; the struggle between paganism and Christianity; the end of the Empire in the West. Special attention given to the role of women, slaves, law, and historiography. Ancient sources in translation. WRIT

Explores essential social, cultural, and religious foundation blocks of Western Civilization, 200 BCE to 800 CE. The main theme is the eternal struggle between universalism and particularism, including: Greek elitism vs. humanism; Roman imperialism vs. inclusion; Jewish assimilation vs. orthodoxy; Christian fellowship vs. exclusion, and Islamic transcendence vs. imminence. We will study how ancient Western individuals and societies confronted oppression and/or dramatic change and developed intellectual and spiritual strategies still in use today. Students should be prepared to examine religious thought from a secular point of view. There is no prerequisite or assumed knowledge of the period. P WRIT

HIST 1205. The Long Fall of the Roman Empire.
Once thought of as the "Dark Ages," this period of western European history should instead be seen as a fascinating time in which late Roman culture fused with that of the Germanic tribes, a mixture tempered by a new religion, Christianity. Issues of particular concern include the symbolic construction of political authority, the role of religion, the nature of social loyalties, and gender roles. P

HIST 1210A. The Viking Age.
For two centuries, Viking marauders struck terror into hearts of European Christians. Feared as raiders, Norsemen were also traders and explorers who maintained a network of connections stretching from North America to Baghdad and who developed a complex civilization that was deeply concerned with power and its abuses, the role of law in society, and the corrosive power of violence. This class examines the tensions and transformations within Norse society between AD 750 and 1100 and how people living in the Viking world sought to devise solutions to the challenges that confronted them as their world expanded and changed. P

HIST 1211. Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages.
Popes named Joan, Gothic cathedrals, and crusaders—all these were produced by rich world of the western European Middle Ages. The cultural, religious, and social history of this period are explored with special attention to the social construction of power, gender roles, and relations between Christians and non-Christians. WRIT P

HIST 1230A. Revolution and Romanticism in 19th century Europe.
A lecture course, primarily for juniors and seniors, that focuses on salient philosophic, artistic, and ideological currents of 19th-century Europe. Beginning with the crisis of political and cultural legitimacy posed by the French Revolution, it concludes with the consolidation of bourgeois culture in the 1860s and 1870s and the two great scientific systematizers of these decades: Darwin and Marx. WRIT

HIST 1230B. Modern European Intellectual and Cultural History: The Fin de Siecle, 1880-1914.
A sequel to HIST 1230A focusing on radical intellectual and cultural currents that challenged and destabilized the assumptions of Victorian high culture during the fin de siecle. Through a careful reading of primary texts by Hobhouse, Nietzsche, Weber, and Freud. The course explores issues such as the rise of mass consumer culture, neoliberal and neofascist politics, philosophic irrationalism, psychoanalysis, and the woman question. WRIT

HIST 1230C. The Search for Renewal in 20th century Europe.
The overarching theme of the course is the relationship between modernity and the primitive as manifested in major cultural, aesthetic and political movements in the 20th century. Films are an integral part of the course. WRIT

HIST 1235A. Making A "Second Sex": Women and Gender in Modern European History.
This course deals with the history of European women and gender from the Enlightenment to the present. It will focus on large historical themes and questions, especially shifting constructions of femininity and masculinity. It will begin with an analysis of eighteenth-century philosophies regarding women and gender, and it will move to examinations of specific topics such as industrialization, Victorian femininity, the suffrage movements, gender and the Great War, interwar sexuality, fascism, gender and the Second World War, and the sexual revolution.
HIST 1240A. Politics of Violence in 20C Europe.
Europe's 20th century saw the emergence of forms of violence unthinkable in a world without mass politics. To better understand the changes in European states and societies that gave rise to total war and the violence associated with totalizing ideologies such as fascism and communism, we will read Lenin, Mussolini, Hitler, Fanon and others who sought to interpret violence as an extension of ideology. We will also read selections from more recent works by state leaders, historians and cultural figures from Ukraine to France, from Turkey to Great Britain who have reinterpreted past violence for present political ends.

HIST 1260D. Living Together: Muslims, Christians, and Jews in Medieval Iberia.
A pressing issue in today's pluralistic societies is how people of different identities (religious, ethnic, etc.) can live together. This course explores a slice of history that can help us think through questions of difference in our world: medieval Spain, where for centuries Muslims, Christians, and Jews lived in close proximity. Through explicit juxtaposition with modern debates, this course examines how these people understood and structured their relations with each other in the Iberian Peninsula between 711 and 1492. Themes include: identity and cultural definition; power and religious violence; tolerance and intolerance; acculturation and assimilation; gender and sexuality. WRIT P

HIST 1262M. Truth on Trial: Justice in Italy, 1400-1800.
Why do we think that one human being can judge another? How did this activity, enshrined in legal and political systems, profoundly shape society? We'll examine the changing face of justice, from the medieval ordeal to judicial torture; expansion of inquisitorial and state law courts; and the eventual disillusionment with the use of torture and the death penalty in the eighteenth century. Using Italy as focus, the course explores how law courts defined social, political, scientific, and religious truth in Italy. Students may pursue a project on another geographical area for their final project for the course. WRIT P

HIST 1266C. English History, 1529-1660.
Examines politics, religion, and society from the Protestant Reformation to the Puritan Revolution—a period of rapid and dramatic change when the world, for most English people, was turned upside down. Considers the experiences and concerns of ordinary men and women, as well as the elite. Takes in Scotland, Ireland, and the great migration to New England. P WRIT

HIST 1266D. British History, 1660-1800.
A survey of British history from the restoration of monarchy to the Wilkes affair and the loss of the American colonies. In addition to political developments such as the Glorious Revolution and the rise of party, the course examines political ideology (including the great political theorist, John Locke) and various themes in social history (such as crime, popular protest, the sexual revolution, and the experiences of women). P WRIT

HIST 1268A. The Rise of the Russian Empire.
This course provides a broad survey of Russian history from Kievan Rus' to the Crimean War. Topics include the rise of Moscow, the Time of Troubles, the reforms of Peter the Great and Catherine the Great, the Napoleonic Wars, and the conservative reign of Nicholas I. The following themes are emphasized in the lectures and readings: the changing stratification of society; the expansion of the Russian empire; Russia and the West (including diplomatic and cultural relations); economic development; and the origins and growth of the Russian intelligentsia and radical opposition to the autocracy. P

HIST 1268B. Russia in the Era of Reforms, Revolutions, and World Wars.
This course examines the rapid industrialization, modernization, and urbanization of Russia from the era of the "Great Reforms" (1860s) through the Second World War. We will examine both the growing discontentment among the population with autocracy's efforts to maintain power and the Bolshevik effort to recreate the economy, society, and everyday life. Topics will include Russian Marxism and socialism, terrorism, the Russian revolutions of 1917, the rise and consolidation of Soviet socialism, famine, the red terror, and World War II. WRIT

This course examines late Soviet socialism, the collapse of the USSR, and the emergence of the new Russia. The following themes are emphasized in lectures and readings: the major features of de-Stalinization; Soviet and Russian foreign policy during and after the Cold War; the domestic and international causes and consequences of the collapse of the Soviet Union; and the emergence of a new Russian government and national identity during the 1990s and early 2000s. WRIT

HIST 1270C. German History, 1800-1945.
This course examines the development of German history from the dissolution of the Holy Roman Empire to the end of World War II. During that time the German states went from being a sleepy backwater to being the conquers of Europe, finally conquered themselves by the Allied Forces. Through lecture, readings, and discussion we will examine post-Napoleonic Germany, Prussia's role in uniting Germany, the Wilhelmine Empire, the Weimar Republic, and finally National Socialism. The class will take into account politics, economics, war, and culture in painting a full picture of the development of a distinct German state and society.

This course follows the history of France from the time of Louis XIV to the present, focusing on social and cultural trends, with particular emphasis on the boundaries of French national identity. It asks who belonged to the French nation at key moments in French history, including the Enlightenment, the French Revolution, the Napoleonic era, industrialization, imperialism, and the two world wars, as well as the complex questions presently facing France. We will examine how inclusions and exclusions during these moments reveal larger themes within French history, such as those dealing with race, class, gender, immigration, and anti-Semitism, amongst others.

HIST 1272D. The French Revolution.
This course aims to provide a basic factual knowledge of the French Revolution, an understanding of the major historiographic debates about the revolutionary period, and a sense of the worldwide impact of events occurring in late-eighteenth century France. A strong historiographic focus will direct our attention to the gendered nature of the revolutionary project; the tension between liberty and equality that runs throughout French history; the intersection of race and citizenship in the Revolution; and the plausibility of competing social, political, and cultural interpretations of the Revolution. DPLL

HIST 1280. Death from Medieval Relics to Forensic Science.
From CSI: Crime Scene Investigation to Ghost Busters to murder mysteries, western society finds death and dead bodies both fascinating and horrifying. This lecture course considers how the western world has dealt with life's most fundamental truth—all humans die—by looking at the history of death and dead bodies from the Middle Ages up to the early twentieth century. Topics include the worship of Christian relics, Catholic and Protestant conceptions of the "good death," body snatching and dismemberment, society's fascination with murder, execution as legalized death, forensic science and dead bodies, and ghosts.

HIST 1310. History of Brazil.
This course charts the history of Brazil from Portuguese contact with the indigenous population in 1500 to the present. It examines the country's political, economic, social, intellectual, and cultural development to understand the causes, interactions, and consequences of conflict, change, and continuity within Brazilian society. WRIT

HIST 1312. Brazil: From Abolition to Emerging Global Power.
How did Brazil transform itself from a slave society in 1888 to rising international economic and political force? This course will examine the history of Brazil from the end of slavery to the present. We will analyze the reasons for the fall of the Empire and the establishment of a Republic, the transformations that took place as immigrants arrived from Europe, Japan, and the Middle East in the early twentieth century, and the search for new forms of national identity. We will study the rise of authoritarian regimes and the search for democratic governance in more recent years.
HIST 1313. Brazilian Biographies.
How do the famous Brazilian singers Carmen Miranda and Caetano Veloso fit into any comprehensive understanding of Brazilian history? Do the life stories of the eighteenth-century freed slave Xica da Silva or the twentieth-century favela dweller and best-selling author Carolina Maria de Jesus represent unique characters or larger social phenomena of different times and places? How have Brazilian and foreign authors written the history of Brazil through portraits of individuals. This course will examine life stories of Brazilians of all races and social classes through texts, documents, and films to see what these biographical portraits reveal about Brazilian history/culture. P

HIST 1320. Rebel Island: Cuba, 1492-Present.
Cuba, once the jewel in the Spanish imperial crown, has been home to some of the world’s most radical revolutions and violent retrenchments. For two centuries, its influence has spread well beyond its borders, igniting the passion of nationalists and internationalists as well as the wrath of imperial aggression. This course traces the history of Cuba from its colonial origins through the present, foregrounding the revolutionary imaginary that has sustained popular action—from anti-slavery rebellions through the Cuban Revolution and its discontent—in addition to the historical processes that have forged one of the world’s most vibrant socio-cultural traditions. DPLL

HIST 1331. The Rise and Fall of the Aztecs: Mexico, 1300-1600.
This course will chart the evolution of the Mexica (better known as the Aztecs) from nomads to the dominant people of central Mexico; examine their political, cultural, and religious practices (including human sacrifice); explore the structure and limitations of their empire; and analyze their defeat by Spanish conquistadors and their response to European colonization. We will draw upon a variety of pre- and post-conquest sources, treating the Aztecs as a case study in the challenges of ethnohistory. P

HIST 1332. Reform and Rebellion: Mexico, 1700-1867.
This course focuses on Mexico’s difficult transition from colony to nation. We will examine the key political, social, economic, and cultural developments during this period. Major topics will include: the paradoxical eighteenth century, which saw Mexico emerge as the most prosperous region of the Spanish empire, even as social and economic tensions deepened; the outbreak of peasant rebellions in the early nineteenth century; the elite-led movement for independence; the economic decline and political turmoil of the early republic; foreign interventions by the United States and France; and the rise of the Liberals as Mexico’s dominant political force. P

HIST 1333. The Mexican Revolution.
To study the Mexican Revolution is to examine the sweeping history of Modern Mexico: from the Liberal reforms of Benito Juárez to the enduring power of the Partido Revolucionario Institucional (PRI); from peasant revolutionary Emiliano Zapata to his namesake Zapatistas of Chiapas; from Pancho Villa’s mass revolutionary army to transnational mystic Teresita Urrea; from the landlord Francisco Madero who led the insurgency to Lázaro Cárdenas who enacted land and labor reforms; from the constant flows of migrants crossing the border back and forth to Mexico’s defiance against Trump’s wall. P

HIST 1370. The United States and Brazil: Tangled Relations.
This lecture course explores the complex relations between Brazil and the United States from the American Revolution to the present. Through the use of documents, films, literature, and historical monographs, we will examine the diplomatic, political, economic, and cultural interactions between the largest nations in the Americas, paying particular attention to the growing influence of the United States. We will focus on the “Special Relationship” that developed during World War II, the effects of Washington’s foreign policy during the Cold War, U.S. involvement over the course of the military dictatorship, and new forms of interactions after the return to democracy. M

HIST 1381. Latin American History and Film: Memory, Narrative and Nation.
This course provides an introduction to cinematic interpretations of Latin American history. Together we will explore how (and why) filmmakers have used motion pictures to tell particular narratives about the Latin American past. We will critically examine a broad range of films dealing with historical questions, and explore what these films have to say about how gender and sexuality, imperialism, slavery, the church, revolution and repression shaped the history of the region. In order to explore these topics we will examine films in relation to academic, autobiographical, and popular texts, all of which provide different ways of representing the past. M

HIST 1440. The Ottomans: Faith, Law, Empire.
This course explores the rise and fall of the longest-lived Muslim dynasty in history, the Ottoman Empire (1299-1923). From Turkish nomads in Asia Minor to multiethnic empire spanning three continents, the Ottomans were the premier power of southern Europe, northern Africa, and the eastern Mediterranean in the early modern world. From medieval “Turko-Persia” to the catastrophes of World War I, we shall engage difficult historical questions surrounding law and empire, religion and secularism, nationalism and statebuilding, and the legacy of Ottoman rule in and outside today’s Turkey—from Sarajevo to Baghdad, Crimea to Mecca, and ‘where East meets West’: Constantinople/Istanbul.

HIST 1445. The Making of the Ottoman World, 15th - 20th Centuries.
This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans, Anatolia, the Middle East and North Africa emerged during the twentieth century. At the center of the course is the transformation of the “classical” Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be covering the beginnings from the 15th century and end with the analysis of the making of the modern Ottoman society in the early 20th century. M

HIST 1455. The Making of the Modern Middle East.
From North Africa to Afghanistan, Turkey to the Arabian peninsula, the goal of this course is to provide students with a robust background in modern Middle Eastern history, broadly defined. We begin in the long nineteenth century, an era of intense social and economic transformation that led to the collapse of the Ottoman empire and emergence of a new state system, primarily under British and French colonial rule. We then explore forces shaping the contemporary region, including nationalism, oil, regional conflicts and the Cold War, Islamism and mass politics, and military interventions by the US and other world powers. M

HIST 1460. Modern Turkey: Empire, Nation, Republic.
This course will treat some of the major themes of Turkish history and society, one of world’s Muslim majority countries today. Since Turkey unfolded from the Ottoman Empire in the early 20th century, Turkish nationalism and its many shapes and forms has been at the center of the country’s uneasy history of democratization. Mapping the political, socio-economic and cultural landscape, this ventures through Turkish history to study state and society through political thought and economy of democracy, exploring secularism, Islam, feminism, Kurdish question, memory and popular culture. M

HIST 1501. The American Revolution.
This course will explore the period of the American Revolution from the 1760s through the turn of the nineteenth century. Taking a broad view of the conflict and its consequences, we will situate the American colonies in their North American and Atlantic context, examine the material and ideological concerns that prompted the Revolutionary War, and trace the consequences of the conflict for the nation that followed. Students will be invited to look beyond the Founders to the experiences of women, slaves, Native Americans, common soldiers, and Loyalists. M

HIST 1503. Antebellum America and the Road to Civil War.
Surveys society, culture, and politics between 1800 and 1860. Topics include the social order of slavery, the market revolution and its impact, abolition and other evangelical reform movements, and the development of sectional identities.
HIST 1505. Making America Modern.
This course surveys a crucial period in American history between the end of Reconstruction and the beginning of World War I. During this time, the United States transitioned from a relatively fragmented, traditional, and largely agricultural society into one that was remarkably diverse, increasingly urban, and highly industrialized. In surveying this important transitional period, we will pay particular attention to far-reaching changes in the nation's business and economic life, its social movements, as well as its cultural developments, all with an eye to understanding how the United States became one of the world's most commanding economic, political, and cultural powers. DPLL WRIT

This course explores the history of the United States between the end of World War II and the present. Major themes and topics include WWII; the rise and decline of New Deal liberalism; the Cold War and anti-communism; mass consumption; race, civil rights and liberation movements; women's rights and feminism; the New Right; Vietnam and foreign policy; the service economy; immigration; and neoliberalism.

HIST 1511. Sinners, Saints, and Heretics: Religion in Early America.
This course considers the major people, events, and issues in the history of religion in North America, from pre-contact Native cosmologies to the tumultuous events of the Civil War. Attention will be given to "religion as lived" by ordinary people, as well as to the ways that religion shaped (or not) larger cultural issues such as immigration, public policy, social reform, warfare, democracy, slavery, and women's rights. Prior knowledge of religion in North America is not required; there are no prerequisites to this course, and it is open to all students. P WRIT

This course explores the history of North America through the eyes of the original inhabitants from pre-contact times up through 1800. Far from a simplistic story of European conquest, the histories of Euroamericans and Natives were and continue to be intertwined in surprising ways. Although disease, conquest, and death are all part of this history, this course also tell another story: the big and small ways in which these First Nations shaped their own destiny, controlled resources, utilized local court systems, and drew on millennia-old rituals and practices to sustain their communities despite the crushing weight of colonialism. WRIT P

HIST 1513. U.S. Cultural History from Revolution to Reconstruction.
What does it mean to survey a country's history? In this course, it means setting out in several different directions in order to determine the form, extent, and situation of the United States from the 1750s to the 1870s. It means looking carefully at the nation's past through its cultural productions (ideas, beliefs, and customs expressed in print, material, and visual forms). And it means paying close attention to the details. Each week, students will examine one object, text, or idea in order to track broader developments in American history during this time period.

HIST 1514. Capitalism, Slavery and the Economy of Early America.
The simultaneous expansion of capitalism and slavery witnessed intense struggle over the boundaries of the market, self-interest, and economic justice. This course traces those arguments from Colonization through Reconstruction and asks how common people navigate the shifting terrain of economic life. The approach is one of cultural and social history, rather than the application of economic models to the past.

HIST 1515. American Slavery.
This lecture course will address the history of slavery in America. We will trace the emergence of slavery in the New World, with a heavy emphasis on slavery in the U.S. South, and a focus on the relationship of slavery to the emergence of systems of racial and gendered power. The course is broad in scope, beginning with the emergence of the slave trade and concluding with a look forward to the ways that the history of slavery continues to impact the way race and gender (as well as sexuality and class) structure our lives today. DPLL

HIST 1520. Women in Early America.
This course examines the major social and cultural developments of early America through the lens of women's history. We will explore differences among representations of women, constructions and ideals of womanhood, and lived experiences, as we engage such topics as: cross-cultural exchange and conflict; citizenship and enslavement; work and cultural expression; and women's varying degrees of access within social, civic and legal arenas. Relying heavily on sources like letters, diaries, legal records, and artifacts, we will work to identify strategies and best practices for recovering the voices and experiences of early American women buried in the archive.

HIST 1530. The Intimate State: The Politics of Gender, Sex, and Family in the U.S., 1873-Present.
Examines the "intimate politics" of gender norms, sex and sexuality, and family structure in American history, from the 1870s to the present, focusing on law and political conflict. Topics include laws regulating sex and marriage; social norms governing gender roles in both private and public spheres; the range of political perspectives (from feminist to conservative) on sex, sexuality, and family, and the relationship of gender to notions of nationhood and the role of the modern state. Some background in history strongly recommended.

HIST 1531. Political Movements in Twentieth-Century America.
Political movements in the United States in the twentieth century. History and theory. Highlights of the course include: populism, progressivism, segregationism, first wave feminism, labor movement, civil rights, new left, second wave feminism, new right. The course focuses on the origins, nature, ideologies, and outcomes of major political movements on both left and right in the twentieth century United States. WRIT

Examines the extended history of the Civil Rights Movement in the U.S. with a range of primary sources. Starting at World War II, the course considers the roles of the courts, the government, organizations, local communities, and individuals in the ongoing struggle for African American equality, focusing on African American agency. Sources include photographs, documentaries, movies, letters, speeches, autobiography, and secondary readings. Must have taken at least one post-1865 U.S. history course demonstrating a foundation in this time period. Enrollment limited to 50.

HIST 1550. American Urban History, 1600-1870.
Both a survey covering urbanization in America from colonial times to the present, and a specialized focus exploring American history from an urban frame of reference. Examines the premodem, "walking" city from 1600-1870. Includes such topics as cities in the Revolution and Civil War, the development of urban services, westward expansion, and social structure. P

A survey with a specialized focus exploring American history from an urban frame of reference. Topics include the social consequences of the modern city, politics, reform, and federal-city relations. WRIT

HIST 1553. Empires in America to 1890.
In this class, we'll consider some of the forms of empire-building by various groups of indigenous and colonizing peoples in what is now the United States in order to understand the development of Imperial U.S. power in both domestic and international contexts. Rather than resting upon a foregone conclusion of European settler colonial "success," the course explores the contingent and incomplete nature of empire-building even within unbalanced power relationships. DPLL WRIT

HIST 1554. American Empire Since 1890.
This survey of twentieth-century US foreign relations will focus on the interplay between the rise of the United States as a superpower and American culture and society. Topics include: ideology and U.S. foreign policy, imperialism and American political culture, U.S. social movements and international affairs, and the relationship between U.S. power abroad and domestic race, gender and class arrangements.
HIST 1570. American Legal and Constitutional History
History of American law and constitutions from European settlement to the end of the 20th century. Not a comprehensive survey but a study of specific issues or episodes connecting law and history, including witchcraft trials, slavery, contests over Native American lands, delineations of race and gender, regulation of morals and the economy, and the construction of privacy.

HIST 1640. Inequality + Change: South Asia after 1947.
With a focus on inequality and change this lecture course will survey South Asia’s history post-1947, with the end of colonial rule and the making of nation-states. With a historical attention to ‘inequality’, we will interrogate the inequalities cast by rural poverty, environment, religion, caste, gender and ethnicity and the remarkable contestations of people in the region that have challenged state power, and have thus shaped South Asia’s postcolonial histories. We will particularly focus on histories from below, and engage historical and literary writings, newspapers as well as documentary films.

This seminar will trace the growth of European images of the “other” in early modern Africa, Europe and the Americas. Using the tropes of “cannibal”, “barbarian” and “noble savage”, it explores evolving theories about human nature, human difference and race. Alongside critical analyses drawn from several disciplines, the main readings will be primary sources. These vivid, enigmatic accounts are both portraits of a world alien to the writer, and also mirror the writer’s own culture. WRIT

There were multiple forms of slavery in the Early Modern world. We will look at three major systems: Mediterranean slavery and the Barbary Corsairs, Black Sea slavery and slave elites of the Ottoman Empire, and the Atlantic triangular trade. We will examine the religious, political, racial, and economic bases for these slave systems, and compare the experiences of individual slaves and slave societies. Topics discussed include gender and sexuality (e.g. the institution of the Harem and the eunuchs who ran it), the connection between piracy and slavery, and the roles of slavery in shaping the Western world. WRIT DPLL P

The choice of how we allocate land and water shapes famine, drought, war, homelessness and poverty. Over the centuries, utopians and empires have looked to very different systems of allocation, from village communalism to plantation systems to state provision of infrastructure to free-market systems. This course mixes histories of political economy, theology, literature, and anthropology, asking how imaginary landscapes become the material realities of farm and highway. Themes will include the rise of modern, surveying, engineering, cities, infrastructure systems, and land reform. It will ask about the consequences of history in an era of environmental disaster, famine, mortgages, and evictions.

HIST 1741. Capitalism, Land and Water: A World History: 1848 to the present.
The choice of how we allocate land and water shapes famine, drought, war, homelessness and poverty. Over the centuries, utopians and empires have looked to very different systems of allocation, from village communalism to plantation systems to state provision of infrastructure to free-market systems. While an economist or political scientist might study these regimes through abstraction, the historian dives into the social context of different systems, reading government documents, social protests, as well as architecture, maps, and the landscape itself, as an archive that testifies as to the nature of consent, participation, and resistance in a political system. WRIT

HIST 1820A. Environmental History.
Environmental history examines the changing relationship between human beings and their physical surroundings. We will actively question the boundary between nature and culture, showing how social and natural history mutually inform one another. We will do so by asking three interrelated questions. First, how has the material context in which history unfolded impacted the development of our culture, society, and economy? Second, how and why did people’s ideas and representations of the natural world change over time? Finally, in what ways and to what ends have human beings actively though not always intentionally altered their physical surroundings?

HIST 1820B. Environmental History of East Asia.
This is a lecture course on the environmental history of East Asia from prehistory to the present aimed at students with no background in either Asian or environmental history. Because little has been written about Korean or Vietnamese environmental history, it will mostly concern China and Japan, for which there are good textbooks. The course will also incorporate weekly primary source readings, or analysis of artifacts.

HIST 1820G. Nature on Display.
This course will explore the different ways in which people have represented the natural world in a variety of context and time periods from the 16th to the 21st century. We will look at the depiction of nature in museums, gardens, documentary films, and municipal parks, as well as the science of biology and ecology. As we do so, we will explore our changing attitudes towards nature and the place that we occupy in it, thinking through the complex and philosophically fraught question of what nature is, and what, if anything, distinguishes it from the rest of our world. WRIT

This course connects natural knowledge to larger developments in Renaissance Europe such as noble court culture, artistic innovation, commercial exchange, exploration and colonization. Topics include: alchemy, early museums, the visual culture of science, and the impact of New World nature on Old World knowledge systems. P WRIT

HIST 1825H. Science, Medicine and Technology in the 17th Century.
This course examines the development of science and related fields in the period sometimes called ‘the scientific revolution’. It will both introduce the student to what happened, and ask some questions about causes and effects. The new science is often associated with figures like Harvey, Galileo, Descartes, Boyle, Leeuwenhoek, and Newton. But it is also associated with new ways of assessing nature that are mingled with commerce. The question of the relationship between developments in Europe and elsewhere is therefore also explored. P

HIST 1825L. The Roots of Modern Science.
This course explores the ways theories of physics, chemistry, biology and mathematics grew in relation to the natural, cultural and social worlds of the 18th and 19th centuries. There are no formal pre-requisites for the course, which is designed to be equally open and accessible to science and humanities students. WRIT

HIST 1825M. Science at the Crossroads.
This course will look closely at the dramatic developments that fundamentally challenged Western Science between 1859 and the advent of the Second World War in the 1930s. Its primary focus will be on a variety of texts written in an effort to understand and interpret the meanings of fundamentally new ideas including from the biological side--evolutionary theory, genetic theory, and eugenics; from the physical side relativity theory, and quantum mechanics. The class should be equally accessible to students whose primary interests lie in the sciences and those who are working in the humanities. WRIT
HIST 1825S. Science and Capitalism.
We will explore the longstanding relationship between science and commerce from the 17th century to our own asking when the modern notion of science as a disinterested pursuit of objective truth took root. We will also explore how knowledge of the natural world has been shaped by personal, financial, and other kinds of self-interest in a number of diverse contexts ranging from Galileo’s invention of the telescope in Renaissance Italy to the patenting of genetically engineered organisms in today’s world, paying special attention to the diverse mechanisms that have been devised to guard against fraud and disinformation.

HIST 1830M. From Medieval Bedlam to Prozac Nation: Intimate Histories of Psychiatry and Self.
Humankind has long sought out keepers of its secrets and interpreters of its dreams: seers, priests, and, finally, psychiatrists. This lecture course will introduce students to the history of psychiatry in Europe, the United States, and beyond, from its pre-modern antecedents through the present day. Our focus will be on the long age of asylum psychiatry, but we will also consider the medical and social histories that intersect with, but are not contained by, asylum psychiatry: the rise of modern diagnostic systems, psychoanalysis, sexuality and stigma, race, eugenics, and pharmaceutical presents and futures.

Interested students must register for EDUC 1200.

HIST 1930B. Academic Freedom on Trial: A Century of Campus Controversies (EDUC 1740).
Interested students must register for EDUC 1740.

HIST 1930C. The Century of Immigration (AMST 1611Z).
Interested students must register for AMST 1611Z.

Interested students must register for AMST 1611A.

Interested students must register for GNSS 1960B.

HIST 1930F. Renaissance Italy (ITAL 1360).
Interested students must register for ITAL 1360.

HIST 1930G. Black Freedom Struggle Since 1945 (AFRI 1090).
Interested students must register for AFRI 1090.

Interested students must register for EDUC 1620.

HIST 1930I. American Higher Education in Historical Context (EDUC 1730).
Interested students must register for EDUC 1730.

HIST 1930J. Word, Image and Power in Renaissance Italy (ITAL 1580).
Interested students must register for ITAL 1580.

HIST 1930N. Germany, Alcohol, and the Global Nineteenth Century (GRMN 1661E).
Interested students must register for GRMN 1661E.

Interested students must register for AFRI 1640.

HIST 1930Q. History of the State of Israel: 1948 to the Present (JUDS 1711).
Interested students must register for JUDS 1711.

HIST 1930R. Roman History I: The Rise and Fall of an Imperial Republic (CLAS 1310).
Interested students must register for CLAS 1310.

HIST 1930S. Roman History II: The Roman Empire and Its Impact (CLAS 1320).
Interested students must register for CLAS 1320.

Interested students must register for EDUC 1050.

HIST 1930U. Slavery in the Ancient World (CLAS 1120E).
Interested students must register for CLAS 1120E.

HIST 1930V. History of Zionism and the Birth of the State of Israel (JUDS 1712).
Interested students must register for JUDS 1712.

HIST 1930W. Introduction to Yiddish Culture (JUDS 1713).
Interested students must register for JUDS 1713.

Interested students must register for JUDS 1740.

HIST 1931B. Money, Power, Sex and Love: the Modern Jewish Family in Europe and America (JUDS1722).
Interested students must register for JUDS 1722.

HIST 1931C. The End of Modern Jewish History (JUDS 1716).
Interested students must register for JUDS 1716.

HIST 1931D. Society and Population in Ancient Greece (CLAS 1130).
Interested students must register for CLAS 1130.

HIST 1931E. The Culture of Death in Ancient Rome (CLAS 1420).
Interested students must register for CLAS 1420.

HIST 1931F. History of Greece from Archaic Times to the Death of Alexander (CLAS 1210).
Interested students must register for CLAS 1210.

HIST 1931G. Roman Religion (CLAS 1410).
Interested students must register for CLAS 1410.

HIST 1960A. African Environmental History (AFRI 1060M).
Interested students must register for AFRI 1060M.

HIST 1960B. Alien-nation: Latino/a Im/migration in Comparative Perspective (AMST 1903B).
Interested students must register for AMST 1903B.

HIST 1960C. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative (AMST 1904D).
Interested students must register for AMST 1904D.

HIST 1960D. Africa Since 1950 (AFRI 1060A).
Interested students must register for AFRI 1060A.

Interested students must register for POBS 1600S.

HIST 1960F. The Portuguese Colonial Empire in a Comparative Perspective (XIX-XX Centuries) (POBS 1600Y).
Interested students must register for POBS 1600Y.

HIST 1960G. The Teen Age: Youth, Society and Culture in Early Cold War America (AMST 1700D).
Interested students must register for AMST 1700D.

Interested students must register for RELS 1530B.

HIST 1960I. Portuguese Discoveries and Early Modern Globalization (POBS 1600D).
Interested students must register for POBS 1600D.

Interested students must register for HMAN 1970Z.

Interested students must register for POBS 1600I.
HIST 1960L. Conflicts, Diasporas and Diversities: Religion in the Early Portuguese Empire (POBS 1600J). Interested students must register for POBS 1600J.

HIST 1960N. South Africa since 1990 (AFRI 1060T). Interested students must register for AFRI 1060T.

HIST 1960Q. Medicine and Public Health in Africa. This course explores the major debates in the history of medicine in Africa during the nineteenth and twentieth centuries and highlights the coexistence of a variety of healing traditions and medical understandings across the continent. It will focus on the following questions: What are some of the ways Africans practice and understand medicine? How have these practices interacted with other medical systems? What impact did colonialism have on the production of medical knowledge? How were practices and treatments evaluated and deemed effective? By whom and on what grounds? And how have independent African states addressed these critical issues?

HIST 1960R. South Africa Since 1990. South Africa transformed after 1990, but the past remains powerful. This seminar offers a study of this dynamic and complicated country as well as an exercise in contemporary history. It explores the endurance and erosion of the apartheid legacy and the emergence of new problems. A quarter century isn’t enough for a full body of academic historical work to have developed, so the syllabus features journalism, opinion pieces, social science, and biographies – works that provide the “first draft” of history. In addition to the political history, we will focus on the Truth and Reconciliation Commission and HIV-AIDs. WRIT

HIST 1961B. Cities and Urban Culture in China. Treats the development of cities and urban culture in China from roughly the sixteenth century (the beginning of a great urban boom) to the present. We will look at the physical layout of cities, city government and social structure, and urban economic life, often from a comparative perspective. The course focuses, however, on the changing culture of city life, tracing the evolution of a vernacular popular culture from the late imperial period, through the rise of Shanghai commercial culture in the late nineteenth and early twentieth centuries, to the diverse regional urban cultures of contemporary China.

HIST 1961E. Medieval Kyoto - Medieval Japan. In the Western historical lexicon, the term “medieval” often conjures up images of backwardness and stagnation. Japan, however, pulsed with political, economic, and cultural creativity during its middle ages. This course explores topics central to Japan’s medieval revolution: - The emergence of a samurai-led shogunate and the creation of new warrior values ; -The appearance of Zen and popular religious sects ; -The creation of innovative “Zen arts” such as noh drama and the tea ceremony, and; -The destruction of Kyoto and its subsequent resurgence in the sixteenth century as a city shared by aristocrats, merchants, and artisans. P WRIT

HIST 1961H. Korea: North and South. This course offers a systematic investigation of the political, economic, and social histories of Korea, North and South, from the inception of the two governments following liberation from Japanese occupation in 1945 to the present day. Enrollment limited to 20. WRIT

HIST 1961L. Conflicts, Diasporas and Diversities: Religion in the Early Portuguese Empire (POBS 1600J). Interested students must register for POBS 1600J.

HIST 1961N. South Africa since 1990 (AFRI 1060T). Interested students must register for AFRI 1060T.

HIST 1961Q. Medicine and Public Health in Africa. This course explores the major debates in the history of medicine in Africa during the nineteenth and twentieth centuries and highlights the coexistence of a variety of healing traditions and medical understandings across the continent. It will focus on the following questions: What are some of the ways Africans practice and understand medicine? How have these practices interacted with other medical systems? What impact did colonialism have on the production of medical knowledge? How were practices and treatments evaluated and deemed effective? By whom and on what grounds? And how have independent African states addressed these critical issues?

HIST 1961R. South Africa Since 1990. South Africa transformed after 1990, but the past remains powerful. This seminar offers a study of this dynamic and complicated country as well as an exercise in contemporary history. It explores the endurance and erosion of the apartheid legacy and the emergence of new problems. A quarter century isn’t enough for a full body of academic historical work to have developed, so the syllabus features journalism, opinion pieces, social science, and biographies – works that provide the “first draft” of history. In addition to the political history, we will focus on the Truth and Reconciliation Commission and HIV-AIDs. WRIT

HIST 1962B. Life During Wartime: Theory and Sources from the Twentieth Century. This course asks how we are to understand war as everyday experience, and what separates war from, or connects it to, the other great movements of mass social and political disruption that the twentieth century has seen. The first part of the semester will examine different frameworks scholars and thinkers have proposed for understanding war as modern experience (militarization, trauma, collective memory, states of exception, etc.) In the second part we will investigate the uses and limitations of specific types of primary sources, drawn from China’s war with Japan. Students will choose their own topics for final projects.

HIST 1962C. State, Religion and the Public Good in Modern China. In late imperial China, religion formed an intrinsic part of public life, from the cosmological ritual of the state to the constitution of family and communities of various kinds. This arrangement was challenged in the twentieth century by the fall of the dynastic system and the introduction of new definitions of religion, modernity, sovereignty, and secularism. We will explore the ramifications of this change in greater China and its border areas during the past hundred years, looking at how people have sought to create a good public and the public good. Enrollment limited to 20.

HIST 1962D. The Social Lives of Dead Bodies in China and Beyond. Corpses, much like the living, are not neutral bodies, but are managed into structures of social meaning. This course aims to uncover corpses as signifiers and actors during times of community upheaval. We will take modern China as our focal point, but also look elsewhere in the Americas, Europe, Africa and Asia since the 19th century, when the broadening scale and nature of warfare; state expansion; rapid urban and rural development; global circulations of technology; and the ins and outs of international philanthropies with older forms of charity and ritual pacification significantly affected the treatment, conceptions, and actions of the dead. DPLL WRIT

HIST 1963L. Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050. This class explores the transition from antiquity to the Middle Ages through the lens of western North Africa. Divided internally by theological disputes and inter-communal violence, and subjected to repeated conquests and reconquests from the outside, in this period North Africa witnessed the triumph of Islam over Christianity; the rise and fall of ephemeral kingdoms, empires, and caliphates; the gradual desertion of once-prosperous cities and rural settlements; the rising strength of Berber confederations; and the continuing ability of trade to transcend political boundaries and to link the southern Mediterranean littoral to the outside world. WRIT
HIST 1963M. Charlemagne: Conquest, Empire, and the Making of the Middle Ages.
The age of Charlemagne sits at the nexus of antiquity and the middle ages. For two hundred years Charlemagne’s family, the Carolingians, welded together fragments of splintered Roman imperial tradition and elements from the Germanic world to forge a new, medieval European civilization. This seminar examines that process by exposing students to the primary sources, archaeological evidence, and modern scholarly debates surrounding the Carolingian age. Topics include the Carolingians’ rise to power; Charlemagne’s imperial coronation; interactions with the Islamic and Byzantine worlds; the revival of classical learning; the Church; warfare; the economy; Vikings; and collapse of the Carolingian Empire. P WRIT P

Cross-dressing knights, virgin saints, homophbic priests, and mystics who speak in the language of erotic desire are but some of the medieval people considered in this seminar. This course examines how conceptions of sin, sanctity, and sexuality in the High Middle Ages intersected with structures of power in this period. While the seminar primarily focuses on Christian culture, it also considers Muslim and Jewish experience. Enrollment limited to 20. P WRIT P

HIST 1964A. Age of Impostors: Fraud, Identification, and the Self in Early Modern Europe.
Alchemists claiming to possess the philosophers’ stone; basilisks for sale in the market; Jews pretending to be Catholics; women dressing as men: early modern Europe appeared to be an age of impostors. Officials responded to this perceived threat by hiring experts and creating courts, licenses, passports, and other methods of surveillance in an era before reliable documentation, photography, DNA. And yet one person’s fraud was another’s self-fashioning. We will examine instances of dissimulation, self-fashioning, and purported fraud, efforts to identify and stem deception, and debates about what was at stake when people and things were not what they seemed. P WRIT

European fascination with the unseen world reached its highpoint alongside the Renaissance, Reformation, Scientific Revolution, and Enlightenment. Between 1500 and 1800, theologians, natural philosopher, princes, and peasants devoted enormous energy to understanding, communicating with, and eliminating a host of ethereal creatures, including ghosts, angels, demons, vampires, nature spirits, and witches. Some also sought to access the praternatural powers that these creatures seemed to command. This course explores the intellectual, social, political, and religious origins of the interest in this unseen world, the structures Europeans created to grapple with it, as well as the factors that ultimately led to its demise. P WRIT

Selected topics in the social history of early modern England (c.1500-1800), with particular emphasis on the experiences of women. Themes to be addressed will include the family, working life, education, crime, politics, religion, and the early feminists. Not open to freshmen sophomores. P WRIT

HIST 1964E. The English Revolution.
Looks at the origins and nature of the English Civil War and Republican experiment in government (1642-1660) through a close examination of primary source materials. Considers not only the constitutional conflict between the crown and parliament, but also the part played by those out-of-doors in the revolutionary upheaval, the rise of popular radicalism, and the impact of events in Scotland and Ireland. P WRIT

HIST 1964F. Early Modern Ireland.
This seminar will cover various themes in the political, religious, social and cultural history of Ireland between c. 1500 and the later eighteenth century. Topics to be discussed will include the Reformation, the Irish Rebellion, Cromwell’s rule, the War of the Two Kings, popular protest, the beginnings of the Irish nationalism, and the experiences of women. P WRIT

Examines the revolutionary upheavals in England, Scotland and Ireland of the later 17th-century through a close examination of primary source materials. Topics covered include: high and low politics, the rise of the public sphere, the politics of sexual scandal, government spin, persecution and toleration, and the revolutions of 1688-91 and their aftermaths. Enrollment limited to 20. P WRIT

HIST 1964K. Descartes’ World.
An exploration of history and historical fiction through examination of the early life of René Descartes, one of the most famous “French” philosophers of the 17th century. Little is known about his personal life, however, especially before he left France for good in 1628, despite many hints about his years as a soldier, his extensive travels in Europe, and his possible political and occult associations. This seminar is designed as a collective exploration into the small pieces of evidence about his early life and the lives of his friends and enemies in order to understand it imaginatively but truthfully. P

The Polish-Lithuanian Commonwealth was the largest state in early-modern Europe, home to a diversity of ethnic and religious groups. We will examine how they lived together and interacted in this unique setting. The rise of the nobility and development of Poland’s constitutional monarchy show how Polish identity was transformed. The interaction of Germans, Italians, Scots, and Jews as “national” groups within urban society, and the economic dynamism of Jews and Armenians reveal the possibilities and problems of social integration. The experiences of Protestants, the Ukrainian Orthodox population, and the Muslim Tatars demonstrate the meaning and limitations of Polish religious tolerance. P

Modernity as a distinct kind of cultural experience was first articulated in the Paris of the 1850s. The seminar will explore the meaning of this concept by looking at the theories of Walter Benjamin, as well as historical examples of popular urban culture such as the mass circulation newspaper, the department store, the museum, the café concert and the early cinema. Enrollment limited to 20. P WRIT

HIST 1965B. Fin-de-Siècle Paris and Vienna.
We will examine two great imperial capitals facing similar set of challenges at the end of a century dominated by Europe. Austria-Hungary and France were forced to reckon with declining status as great powers, made manifest by their defeat at the hands of Prussia in 1867/1870 respectively. Both struggled with place of ethnic and religious minorities in modern states, and both responded with outbursts of political anti-Semitism that emerged. We will not only gain a basic factual knowledge of fin-de-siècle urban life but also explore some of the works and problems animating the intellectual life of the twentieth century. P

HIST 1965C. Stalinism.
In this course students will examine in detail one of the most deadly and perplexing phenomena of the twentieth century: Stalinism. Readings will introduce students to major events of Soviet history from the mid-1920s to the mid-1950s as well as debates among historians about how to interpret those events?

HIST 1965D. The USSR and the Cold War.
This seminar will examine in detail the Soviet Union’s involvement in the Cold War, the defining international conflict between the end of the Second World War and the collapse of communism in Europe. Topics include cultural phenomena, economic organizations, and ideology, in addition to diplomatic crises and the indirect military confrontations in Asian, Africa, and the Americas. Enrollment limited to 20.

This course will concentrate on European thinkers’ engagement with the politics of the 20th century. Discussion will cover a range of cultural and intellectual currents and ideologies—modernism, fascism, communism, “dissidence,” “internal” migration, “anti-politics”—as well as genres (essays, letters, fiction, criticism, poetry, film). P WRIT
HIST 1965F. The Crisis of Liberalism in Modern History.
Liberalism has long been synonymous with a delicious cuisine, one with no equal in the world. This seminar will examine the development of French cuisine as a tool for national greatness, beginning with its origins under the Sun King, Louis XIV. We will trace subjects such as the global dissemination of French food after the French Revolution, the food shortages common to French people as the country industrialized, and the feeling that France was losing its culinary hold in the twentieth century. Today, French food again serves as a nexus for the anxieties of the nation, including Americanization and immigration.

HIST 1965M. Double Fault! Race and Gender in Modern Sports History.
From 1936 Berlin Olympics to infamous East German swimmers of the Cold War to 1989 French soccer team, sport culture has consistently helped define overall societal values. We will examine how early modern societies defined the ideal sporting participant, and how shifts over time included and excluded various groups. These shifts, including the promotion of masculinity through duels, the fears of women’s emancipation via cycling, and the exclusion of Jews from competition, were based on perceived national needs. Through the study of sports, we will study who we have been as a community—as well as who we aspire to be.

HIST 1965N. "Furies from Hell" to "Femi-Nazis": A History of Modern Anti-Feminism.
Women have faced a deep antipathy at nearly every turn in their struggles for civic and social inclusion. These denials of women’s rights often take the form of commentaries—sometimes vicious ones—about women’s general natures, bodies, and fitness for public life. Women are consistently tagged with various labels of otherness: opponents of women’s rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to today, as well as how women have fought back to assert their rights and independence.

HIST 1965O. ‘Naturally Chic’: Fashion, Gender, and National Identity in French History.
From its beginnings, the fashion industry in France has been synonymous with the international reputation of the nation. Similarly, being “chic,” having an innate sense of discernment and style, became synonymous with French femininity. This seminar will explore the interconnectedness of the history of fashion in France, the requirements it placed on French women, and the pressures the fashion industry has borne since the 1700s. We will look at how fashion reflected and created the moods of various periods, and we will also see how French women’s national belonging has been innately tied to ability to display French fashion. WRIT

HIST 1965R. The Monarch in Modern Britain: Constitution and Celebrity.
In this seminar, students will explore the evolution of the British monarchy from the 18th-century to the present day, covering the dynasty known at different times as Hanover, Saxe-Coburg-Gotha, and Windsor. Alternating between topical investigation of the monarchy as an institution and biographical cases, primary emphasis will be given to the 19th and 20th centuries in order to focus on the evolving role(s) of constitutional monarchy in a modernizing and democratizing state.

HIST 1966Q. Colonial Encounters and the Creation of Latin America.
This seminar examines interactions between Europeans and indigenous peoples shaped the formation of early Latin America. From Florida to Brazil, invasion led to widely varied outcomes, including outright failures. Students will come to see colonization as a difficult, uneven process, as Europeans struggled to comprehend and engage unfamiliar natural and human environments; the new societies that emerged reflected complex transatlantic exchanges. Our readings will consist of primary sources from the sixteenth century, supplemented by academic texts. Students will write a series of three-page response papers, along with a ten to twelve-page essay on major themes from the course.

In January 1959, the forces of rebel leader Fidel Castro entered Havana and forever altered the destiny of their nation and world. We will examine the question of political hegemony and the many silences built into the achievement of Revolution—from race to sexuality to culture—even as we acknowledge that popular support for that Revolution has often been both genuine and heartfelt. It is this counterpoint between the Revolution’s successes in the social, economic, and political spheres and its equally patent exclusions that have shaped Cuba’s history in the past and will continue to guide its path to an uncertain future.

HIST 1967E. In the Shadow of Revolution: Mexico Since 1940.
This course traces political, social, and economic developments in Mexico since the consolidation of the revolutionary regime in the 1930s. The topics addressed include: the post World War II economic “miracle”; the rise of new social movements; the Tlatelolco massacre; the deepening crisis of the PRI (the governing party) in the 1980s and 1990s; the Zapatista rebellion; violence and migration on the northern border; and the war against narcotraficantes.

This seminar focuses on the Maya in postcolonial Guatemala. The main theme is the evolving relationship between indigenous peoples and the nation-state. Topics include peasant rebellions in the nineteenth century, the development and redefinition of ethnic identities, the military repression of the 1970s and 1980s, the Rigoberta Menchu controversy, and the Maya diaspora in Mexico and the United States. Enrollment limited to 20. WRIT

This course will focus on the political, social, economic, and cultural changes that took place in Brazil during the military dictatorship that ruled the country from 1964-85. We will examine why the generals took power, the role of the U.S. government in backing the new regime, cultural transformations during this period, and the process that led to democrratization.

From colonial outpost to capital of the Portuguese Empire, from sleepy port to urban megalopolis, this seminar examines the history of Rio de Janeiro from the sixteenth century to the present. Using an interdisciplinary perspective rooted in historical analyses, we will analyze multiple representations of the city, its people, and geography in relationship to Brazilian history, culture, and society.

HIST 1967T. History of the Andes from the Incas to Evo Morales.
Before the Spanish invaded in the 1530s, western South America was the scene of the largest state the New World had ever known, Tawantinsuyu, the Inca empire. During almost 300 years of colonial rule, the Andean provinces were shared by the “Republic of Spaniards” and the “Republic of Indians” - two separate societies, one dominating and exploiting the other. Today the region remains in many ways colonial, as Quechua- and Aymara-speaking villagers face a Spanish-speaking state, as well as an ever-more-integrated world market, the pressures of neoliberal reform from international banks, and the melting of the Andean glaciers.
HIST 1968. Approaches to The Middle East.  
This seminar introduces students to the interdisciplinary field of Middle East Studies in the broader context of the history of area studies in the humanities and social sciences. Why and when did the Middle East become an area of study? What are the approaches and topics that have shaped the development of this field? And what are the political implications of contending visions for its future? The readings sample canonical and alternative works and the classes feature visits by leading scholars who research and write on this region. WRIT

HIST 1968A. Approaches to the Middle East.  
This seminar introduces students to the interdisciplinary field of Middle East Studies in the broader context of the history of area studies in the humanities and social sciences. Why and when did the Middle East become an area of study? What are the approaches and topics that have shaped the development of this field? And what are the political implications of contending visions for its future? The readings sample canonical and alternative works and the classes feature visits by leading scholars who research and write on this pivotel and amorphous region. WRIT

This course is an analysis of where the Mediterranean region fits in the evolving capitalist world-economy in the aftermath of the so-called Age of Discovery. The context of the Mediterranean is set in our own age's "globalization" as histories of capitalism push on the "world" in new ways challenging our mental maps for historical change. The seminar takes on a critical approach to the European historiography on the rise of capitalism and the view that the Mediterranean collapsed with the rise of the Baltic and the Atlantic.

1000 years ago, Constantinople was the splendor of Eastern Christendom. 500 years later it was the capital of history's greatest Muslim empire. Today, it is Europe's largest city and financial hub of a secular republic. Eschewing generic treatments of a monolithic, timeless "Islam" this course explores questions of Muslim faith and politics, empires and nationalism, as well as race, gender, and belonging in an undeniably pivotal country of Europe and Asia: Turkey. From the life and times of the world's best-known sufı saint, to NATO's second-largest military, this course historicizes the medieval beginnings and modern transformations within Turkish Islam.

HIST 1968V. America and the Middle East: Social and Cultural Histories in Tandem.  
This seminar explores the evolving relations between the diverse states and peoples of the Middle East and North America through the lenses of social and cultural historians. While our course proceeds chronologically tracing primarily US foreign relations with the "Middleast", we will not stop there. Rather, we'll read closely for underlying socioeconomic and cultural processes—including trade patterns, migrant networks, and evolving conceptions of race, religion, and citizenship—themes often ignored by conventional histories that dwell on watershed events, personalities, and conflict. Our goal: to recognize how US-Mideast relations are far more complex, rich, and deep-rooted than is generally assumed.

HIST 1969A. Israel-Palestine: Lands and Peoples I.  
This advanced undergraduate seminar seeks to provide a deeper understanding of the links between the region now known as Israel and Palestine and the peoples that have inhabited it or have made it into part of their mental, mythical, and religious landscape throughout history. The course will be interdisciplinary at its very core, engaging the perspectives of historians, geologists, geographers, sociologists, scholars of religion and the arts, politics and media. At the very heart of the seminar is the question: What makes for the bond between groups and place - real or imagined, tangible or ephemeral? No prerequisites required. WRIT

HIST 1969B. Israel-Palestine: Lands and Peoples II.  
This advanced undergraduate seminar seeks to provide a deeper understanding of the links between the region now known as Israel and Palestine and the peoples that have inhabited it or have made it into part of their mental, mythical, and religious landscape throughout history. The course will be interdisciplinary at its very core, engaging the perspectives of historians, geologists, geographers, sociologists, scholars of religion and the arts, politics and media. At the very heart of the seminar is the question: What makes for the bond between groups and place - real or imagined, tangible or ephemeral? No prerequisites required. WRIT

HIST 1969C. Debates in Middle Eastern History.  
This seminar investigates the historical bases of some of the major debates which continue to dominate contemporary discussions on the Middle East. These include debates on colonialism and its legacies; problems associated with the post-colonial Middle Eastern state (the "democracy deficit": human rights; oil; political Islam); and arguments about the causes and consequences of some of the major events in Middle Eastern history (the Israel-Palestinian conflict; the Iranian revolution; the Lebanese civil war; 9/11 and the Iraq invasion; and the Arab Spring). DPLL WRIT

HIST 1969D. Palestine versus the Palestinians.  
Strange as it may sound, there is a tremendous tension between the concepts "Palestine" (territory) and the "Palestinians" (identity). Historically, one exists only at the expense of the other. Similarly, Palestinians and Israelis claim to be separate entities, but they are best understood in relation to each other. To explore these paradoxes, students are introduced to alternative frameworks for understanding the colonial ideologies and practices that transformed Palestine into Israel and that still govern the relationship between Palestinians and Israelis. Students will have an opportunity to attend planned workshops on Palestinian-Israeli studies and Mellon Sawyer Seminar on Displacement.

This seminar examines the major themes and events in the history of the Middle East in the 20th century through a close reading of literary texts and, in some cases, films. Throughout the course we will try to locate the perspectives of the "ordinary people" of the region, and will pay special attention to the voices of those who are rarely heard from in discourses on the Middle East: religious minorities, sexual minorities, women, children, but also criminals, misfits, misanthropes and others who have been deemed social outcasts. DPLL WRIT

This seminar explores Native American histories and cultures in North America, primarily through the multiple and overlapping points of contact and coexistence with Europeans from the sixteenth through the eighteenth centuries. Although we will be reading widely in the very interesting recent literature in the field, a major component of the class is to investigate in a practical way the problem of sources for understanding and writing about American Indian history. As a senior capstone seminar, the final project is a substantial research paper. Enrollment limited to 20. P WRIT

This course examines the varieties of Indian and African enslavement in the Atlantic world, including North America, up through 1800. Reading widely in recent literature in the field as well as in primary sources from the colonial period, we will ponder the origins, practices, meanings, and varieties of enslavement, along with critiques and points of resistance by enslaved peoples and Europeans. Special emphasis will be given to the lived nature of enslavement, and the activity of Indians and Africans to navigate and resist these harsh realities. A final project or paper is required, but there are no prerequisites. P
HIST 1970D. Problem of Class in Early America.
This seminar considers economic inequality in colonial British North America and the new United States. Studying everyone from sailors, servants, and slaves in the seventeenth century to industrial capitalists and slaveholders in the nineteenth century, this course will look at the changing material structures of economic inequality and the shifting arguments that legitimated or challenged that inequality. Readings will explore how historians have approached the subject of inequality using class as a mode of analysis. Students will write extended papers that place primary research in conversation with relevant historiography. Enrollment limited to: 20. Written permission required. WRIT

HIST 1971D. From Emancipation to Obama.
This course develops a deep reading knowledge of significant issues and themes that define African American experiences in the 20th century, experiences that begin with the years following Emancipation and culminate with the election of President Obama. Themes include citizenship, gender, labor, politics, and culture. The goal is to develop critical analysis and historiographical depth. Some background in twentieth century United States history is preferred but not required. Assignments include weekly reading responses, class participation and presentation, and two written papers. Enrollment limited to 20. DPLL WRIT

Undergraduate seminar on the United States and international law. Focuses mainly on the period before the twentieth century. Examines subjects such as the right of revolution; the evolution of U.S. Constitution law; law as an instrument of economic development and exploitation; and the evolution of rights-consciousness—all within the context of international law. Enrollment limited to 20. Students should contact the instructor before the beginning of the semester if they are interested in taking the course. Instructor permission required. WRIT

HIST 1972E. Theory and Practice of Local History.
Examines the theory and practice of local history, evaluating examples from a variety of genres ranging through micro history to folk music, from genealogy to journalism. Work with primary documents, evidence from the built environment and visits to local historic sites and archives will enable students to evaluate sources and develop their own ideas about writing history and presenting it to a public audience. Enrollment limited to 20. Instructor permission required.

HIST 1972F. Consent: Race, Sex, and the Law.
In the context of recent student organizing on college campuses, the word “consent” has become headline news. But what is “consent” and what does it have to do with the history of race and sexuality in America? In this course, we will use history, law, and feminist theory to understand the origins of consent, to trace its operation as a political category, and to uncover the many cultural meanings of “yes” and “no” across time. Themes addressed include: slavery, marriage, sex work, feminism, and violence, from the founding of American democracy to the present.

HIST 1972G. Settler Colonialism + US Military Empire in the Pacific.
For students already familiar with the history of U.S. empire and settler colonialism on the continent, this Wintersession course—which will meet in Providence and Honolulu—provides an introduction to the wider dynamics of settler colonialism and U.S. empire in the Pacific. Students will examine not only the history of settler colonialism and militarization of Hawai‘i, but also examine past and contemporary movements to resist colonization and the degradation of the environment. Other topics include: the sovereignty movement, labor and tourism industry, and solidarity work across the Pacific. Meets Jan 3 - 23; travel dates, Jan 10-17.

Examines how the U.S. has shaped or been shaped by global human rights struggles. Topics include: indigenous rights in the U.S. Early Republic; Antislavery in the early Atlantic World; anti-imperialism in U.S. wars with Mexico and Spain; U.S. and human rights conventions; the Cold War and Civil Rights; and recent U.S. policies concerning human migration. No prerequisites. Priority given to seniors and juniors and those who have not taken the related course HIST 1972A (though students may take both courses). Instructor permission required (email professor before end of registration period).

HIST 1974A. The Silk Roads, Past and Present.
The Silk Road has historically been the crossroad of Eurasia; since the third-century BCE it has linked the societies of Asia—East, Central, and South—and Europe and the Middle East. The exchange of goods, ideas, and peoples that the Silk Road facilitated has significantly shaped the polities, economies, belief systems, and cultures of many modern nations: China, Russia, Afghanistan, Uzbekistan, and India. This course explores the long history (and the mythologies or imaginations) of the Silk Road in order to understand how the long and complex pasts of the regions it touches are important in the age of globalization. P WRIT DPLL

A seminar examining how the categories of “war” and “peace” have emerged over time and place. How does a society decide that a war exists or has ended, or that there is peace, or that peace has been violated? How has the practice of war and the practice of peace changed over the course of history? We approach these questions by looking at a series of case studies, from Greek-Persian relations of the fifth century BCE to the Mongol imperial system of the thirteenth century to the twentieth-century World Wars and recent efforts (successful and failed) at global governance.

HIST 1974G. Nonviolence in History and Practice.
This advanced history seminar will begin with exploring sources of Mahatma Gandhi’s conception of nonviolent civil disobedience and go on to explore the transformation of those ideas in different contexts of protest and resistance in different parts of colonial India, as well as the US and South Africa. In addition to thinking historically, we will look at the details of strategies and practices that have been developed over the last half century, into the present.

This seminar is an experiment in thinking a global history of the making of the modern world. We read texts that track the movement of ideas, peoples and goods, the formation of political and economic inequalities and the continuous struggles of ordinary people against them. From empires to nation-states, from anti-imperialist nationalist struggles to transnational radical movements, this seminar grapples with the politics of knowledge for drawing out “fugitive” lineages of the past that we need to shape our collective future. No overrides will be given before the semester begins. Interested students must attend first class meeting.

The human fascination with maps is perennial, but it has been transformed in recent decades from a field for antiquarian map-lovers to a bona fide domain of intellectual inquiry. Maps are now understood as instruments of power and domination rather than value-free representations of territory. Using the world-renowned cartographic collection of the John Carter Brown Library, this seminar will examine the role of maps and other graphic representations of space in the consolidation and contestation of imperial dominions, introducing students to the idea of using maps as primary source materials for historical and cultural analysis. Winter session. P

What can the experience of a minority group like the Jews teach us about roots of globalization? What were the economic, political, and cultural conditions that allowed early modern Jewish merchants to create economic networks stretching from India to the New World? We will answer these questions by examining the connections and interactions between four major Jewish centers: Ottoman Jewry in the Eastern Mediterranean, the Port Jews of Amsterdam and London, Polish-Jewish estate managers in Ukraine, and the Court Jews of central Europe. We will see how European expansion exploited - and was exploited by - these Jewish entrepreneurs. P
HIST 1974S. The Nuclear Age.  
This is a course for students interested in questions about the development of atomic weapons, their use on Hiroshima and Nagasaki, the Cold War arms race that followed, and debates over the risks associated with other nuclear technologies. We will look carefully at the scientific and military imperatives behind the Manhattan Project, the decisions that led to the use of atomic weapons on Japan, and subsequent efforts to reflect on the consequences of those choices. We will also explore how popular protest and popular culture after 1945 shaped our understanding of the terrors and promise of the nuclear age. WRIT

HIST 1976A. Native Histories in Latin America and North America.  
From Alaska to Argentina, Native people have diverse histories. Spain, Portugal, England and France established different colonial societies; indigenous Latin Americans today have a different historical legacy than Native Americans in the United States. But the experiences of conquest, resistance and adaptation also tell a single overarching story. In colonial times, Native Americans and Europeans struggled over and shared the land. After Independence, however, the new American republics tried to destroy American Indians through war and assimilation. But in the last century Native peoples (both North and South) reasserted their identities within modern states: the "vanishing Indian" refused to vanish. WRIT

This seminar explores the history of animals and people that are no more or whose existence is threatened. To come to terms with these histories, we will study classification of species and cultures, frontiers of exploitation and appropriation, and violence against lives and ways of life. Extinction itself is also an idea: when is it just an evolutionary phenomenon and when is it a historical moment worth marking? We will consider claims about intervention for the good of humans or others. Finally, we will observe forms of mourning. Course requirements include a major independent research project.

This seminar will explore the role of energy in shaping our past, and uses energy consumption and production as an entry into central questions in environmental history. Beginning with the regimes of wood, water, and muscle in early human history, the course moves on to explore fossil fuels, nuclear power, and alternative energy sources around the world. While attentive to issues of environmental impact, we will also examine the broader implications of energy use for social, economic, and political developments and challenges. Readings are drawn from anthropology, geography, ecology as well as history. This course presumes no previous history courses. WRIT

HIST 1976E. The Anthropocene: Climate Change as Social History.  
This seminar will explore ramifications of the concept of the Anthropocene. The Anthropocene has been proposed as a new human-driven geologic age that began with the increased exploitation of fossil fuels in the late eighteenth century. Its proponents emphasize transformations through anthropogenic climate change, but we will also consider the effects of population growth, pollution, habitat destruction, and extinction. To assess the historical validity of the concept, we will discuss the impact of humans on the environment before 1800, the extent of transformation since 1800, and whether human-environmental interactions can be usefully generalized to our species as a whole. WRIT

The transition from an energy regime based on biomass and animal muscle to another based on fossil fuels is an epochal transformation whose importance is on a par with the Neolithic transition from hunter-gathering to agriculture. For most of their history, human societies relied on the sun’s energy locked up in plants and animals for their livelihood. In the late eighteenth century, some societies began to transcend the limits of the established energy regime. This course examines the implications of the modern energy transition from the old energy regime to a new one based on fossil fuels around the world.

Participants in this seminar are invited to explore human and non-human relations in the global past. The history of human-animal relations is huge, so rather than attempt a general survey, we situate our discussion around selected topics. We begin with one animal, the wolf, and move through established and less-familiar historical topics, building toward our final question: how does the inclusion of animals enhance the discipline? The anthropologist Claude Lévi-Strauss said, "animals are good to think with." So is history. In this seminar we think through those things together. WRIT

HIST 1976H. Environmental History of Latin America 1492-Present.  
From the development of sugar as the major slave commodity of the 18th century Caribbean to the "Water Wars" in the Bolivian highlands at the turn of the 21st century, race, labor, and imperialism in Latin America have been shaped in relation to the natural environment. This course explores the role of the environment in the colonial and modern history of Latin America. Together, we will examine how the environment shaped the processes of conquest, displacement, settlement, and trade, as well as how these processes transformed the natural environment throughout the hemisphere. WRIT

This course will focus on the work of Isaac Newton in the context of his times and its impact in the centuries that followed. WRIT

HIST 1976N. Topics in the History of Economic Thought.  
This is a reading intensive seminar that exposes students to the history of economic thought by working through a number of texts about the workings of capitalism. We will make our way through a different set of authors that touch upon a variety of topics, including theories of value, property, markets, labor, inequality, and prices. We will also ask how ideas about the relationship between capitalism and other forms of production have changed over time. In the Spring of 2018, we will devote the entire seminar to Marx, especially the English translation of his seminal work, Das Kapital. WRIT

This course is for students interested in how ideas about what the future of human societies would look like have developed over time, and in the impact of those ideas on cultural, social and political norms. We will look carefully at examples of early modern prophecy before turning to the more recent emergence of theories of economic and social progress, plans for utopian communities, and markedly less optimistic and often dark visions of where we’re headed. We will also explore the roles capitalism, popular culture, and science have played in shaping the practices and vocabularies associated with imagining the future. WRIT

This course will provide grounding in the emerging field of critical animal studies by surveying how we know and interact with one diverse and charismatic class of animals: the Aves. Inspiring science, art, and conservation, traded as resources, kept as hunters or pets, and eaten as meat, birds provide an excellent avenue into animal studies. We will explore birds channeled through ethnography, ornithology, behavioral sciences, musicology, visual arts, and the history of science. In addition to reading and discussion, we also will experience the many forms of birds around us through indoor and outdoor "laboratory" sessions.

HIST 1977I. Gender, Race, and Medicine in the Americas.  
This seminar explores the gendered and racial histories of disease and medicine in nineteenth and twentieth century Latin America and the United States. From the dark history of obstetrics and slavery in the antebellum U.S. South to twentieth-century efforts to curb venereal disease in revolutionary Mexico or U.S.-occupied Puerto Rico, to debates over HIV policy in Cuba and Brazil— together we will explore how modern medicine has shaped both race and gender in the Americas. Topics we will explore include environmental health and the body; infant mortality; the medicalization of birth; and the colonial/imperial history of new reproductive technologies.
HIST 1978B. Modern Southeast Asian History, 18th Century to Present: A Reading Seminar.
This reading seminar explores the history of modern Southeast Asia (the region comprising the contemporary nation-states of Brunei, Burma, Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, and Vietnam) from the 18th century to the present. Crossing both national and disciplinary boundaries, this seminar will engage students in discussions on European colonization, globally linked trade networks, migration and ethnic relations, material and visual culture, formation of nationalism, war and mass violence, gender and sexuality. Students will also be able to read on specific interests of their own, individually or in small groups.

HIST 1979C. Putin, Stalin and “Friends”: Understanding Eurasia Today through its History and Personalities.
This course uses the past to understand the present in Russia and its neighboring states. Each week we will use a “friend” (a person drawn from current events) as a window into events past and present. We will read a few contemporary articles about these notables alongside historical works that give us the necessary background to explore key aspects of their story. In the middle of the semester, you will choose an event or theme and execute an independent research project using contemporary and historical sources. Topics explored include gender, political activism, terrorism, immigration and battles to control the past.

What does art, architecture and material culture reveal about South Asia’s history? This course explores the significance of images, objects, architecture and other forms of material and visual culture to South Asian societies as well as their transformation during the 19th and 20th centuries under pressure from British colonial rule. We will consider how shifts in the meanings of architectural sites (like temples), images and material objects under colonial rule animated political and religious conflict in South Asia between 1880 and 1947. Topics include nationalist cartography; Hindu-Muslim violence around temples and mosques; public performance and anti-colonial activism. WRIT

HIST 1979E. Wise Latinas: Women, Gender, and Biography in Latinx History.
Last summer the Brown community reflected on Supreme Court Justice Sonia Sotomayor’s autobiography that documents how her experience as a Bronx-raised Puerto Rican and “wise Latina” shaped her illustrious legal career. This course will provide historical context for reading Latinx biographies and locate them within a broader history of women, gender, and sexuality in Latinx histories of the United States. We will examine life histories, oral histories, and biographies. Units will explore the histories of Mexican Americans, Puerto Ricans, Cubans, Dominicans, and Central Americans, paying close attention to race and gender and highlighting struggles for social justice.

HIST 1979F. Sex, Gender, Empire.
Despite brutal violence at their core, European empires were imagined as families consisting of European colonials and their “native” subjects. We’ll position sex, gender, family at the heart of the imperial enterprise, examining how boundaries of imperial territory were imagined in terms of a shared household. What a family was and who was part of it became a source of imperial debate which intersected with anxieties around racial mixing and sexuality. In turn, diverse formations of imperial families shaped questions of sex and gender in Europe pursuing this global history of inter-cultural relationships that continue to shape our present day. WRIT

HIST 1979G. The Unwinding: A History of the 1990s.
This course will carefully consider the history of a recent decade -- the 1990s. We will reflect on grand historical narratives – the end of the Cold War, the two-term presidency of a centrist Democrat, and the large challenges faced by the United States at home and abroad. But we will also explore less conventional topics, including the effects of new technology, and the ways in which new media and new tactics reshaped a political consensus that had endured for decades. Finally, we will consider the decade’s rich cultural expression, including its music, film, literature and journalism. WRIT

HIST 1979H. Prostitutes, Mothers, + Midwives: Women in Pre-modern Europe and North America.
Today’s society often contrasts stay-at-home moms with working women. How did women in Europe and North America navigate the domestic and public sphere from the late medieval period to the start of the twentieth century? How did gender affect occupational identity? Were women excluded from the professional class? This seminar investigates gender in the workplace, looks at gender-specific employment, and considers how families functioned. Readings include passages from classical, religious, and medical texts as an introduction to medieval gender roles. Students will explore texts, images, and film to understand pre-modern work and the women who did it.

HIST 1979I. Race and Inequality in Metropolitan America from Urbanization to #blacklivesmatter.
There is nothing natural about the state of race and inequality in American cities today. Urban inequities — around residential segregation; access to housing, schools, jobs; state violence — are overwhelmingly the result of decades of choices made by individuals and policymakers. This course will examine this history. We will trace how race has shaped metropolitan America from the late nineteenth century to present day. The course will explore how institutions, government policies, and individual practices developed and perpetuated race and class-based inequalities. We will also examine examples throughout this history of individuals who fought collectively for racial and economic justice. DPLL

This course explores London’s emergence as a major European capital in the eighteenth century, its international pre-eminence in the nineteenth, its experiences of war in the twentieth century and its encounters with immigration, social change and urban discontent in the postwar period. We will focus on themes in the social and cultural life of London, including popular culture, poverty, urban space, crime, and street life. We will discuss how scholars have approached these histories and use contemporary sources—visual and material culture, court records, newspaper accounts, and literature—to explore the lives of Londoners of the past.

HIST 1979K. The Indian Ocean World.
Oceans cover two-thirds of the surface of the earth. They are the world’s great connectors. Rather than political boundaries of empire and nation-state, this course focuses on an enduring geography of water as the central shaper of history. Drawing together the history of three continents this course explores the Indian Ocean world as a major arena of political, economic and cultural contact during the nineteenth and twentieth centuries. As we map the contours of this history we study how race, gender and sexuality were shaped across the Indian Ocean. Major topics include Islam, imperialism, indentured labor migration, liberalism and anti-colonialism. HISTGlobal

HIST 1979L. Urban History of Latin America.
Latin America is the world’s most urbanized region. 80 percent of Latin Americans live in cities, and iconic cities such as São Paulo and Mexico City are among the world’s largest conurbations. The city has long played a key role in the region’s history, serving as nodes of imperial power, as religious centers, and as markets from pre-Columbian to colonial times. The 20th century witnessed both the achievement and failure of modernization, as cities industrialized rapidly but grew haphazardly, struggling with poverty and pollution. Today, Latin American cities are multifaceted spaces where both real advancement and daunting problems coexist.

HIST 1979M. Piracy, Patents and Intellectual Property.
Intellectual ownership is one of the most intractable problems in contemporary social and economic life. This course explores the emergence and significance of intellectual ownership in the domains of art, architecture, literature, scientific innovation, media, and law. We are particularly interested in the different social, geographic and national contexts in which regimes of intellectual ownership surfaced, and how different national agencies, individuals, and corporate formations variously construct and enforce understandings of ownership and infringement. We will also canvass contemporary enforcement and implementation mechanisms, global north versus global south wealth disparities, and the fate of intellectual property in the digital world.
HIST 1979N. American Charters.
This seminar will read deeply in thirteen seminal texts from American history. Exploring the context in which each document was written, the intentions of the author(s), the medium of publication, the way audiences experienced the document, and its reception throughout history, arguing that charter documents have assumed high importance in the United States, a nation with little precedent to build upon. From John Winthrop's "City Upon a Hill" speech, which may never have been given, to Second Inaugural of Barack Obama, we'll consider the ways in which ambitious writers/speakers have tried to claim authorship for the narrative of American history.

HIST 1979O. Comparative Black Power.
Fifty years ago, in 1966, Stokely Carmichael made his legendary call for "Black Power!" That call was global, marked by its diversity. How did the idea of Black Power travel? Why did it emerge when and where it did, and what were its meanings in different contexts? This course examines the manifestations of black power movements in the Caribbean and in Africa, in the United States and in India. With the 50th anniversary in mind, this course will critically explore the dreams, international dimensions, gender politics, and legacies of Black Power.

In the past several decades consumer discontent with Western medicine has prompted an unprecedented interest in other methods of healing. As the longest continuous literate tradition on the planet Chinese culture has enduring experience in healthcare provision, making it an attractive alternative to biomedicine. In this course we survey the depth and complexity of the Chinese medical tradition through the lens of indigenous techniques and their permutations in diverse locales. Proceeding from the earliest written records on oracle bones to present day ethnographies of clinical practice, we will complement close readings of canonical texts with a focus on lived experience.

HIST 1979Q. Japanese Film and Animation of the 20th Century.
Recent years have seen an explosion of worldwide interest in Japanese popular media, including manga (comics), anime (animation), and films. Yet Japan's current success in exporting films/anime abroad is by no means just a recent phenomenon. We will explore Japanese live action film/animation from its origins through turn of 21st century. Students will learn to read films as narrative texts, and critiquing them on multiple levels. In the process, we will attempt to seek out what about Japanese cinematic art has caught the attention of Western critics, keeping our eyes on questions of identity and responses to historical events.

HIST 1979R. Scientific Controversies from Creationism to Climate Change.
This course examines scientific controversies from the mid-nineteenth century to the present. Topics will include evolution, telepathy, eugenics, lobotomy, recovered memories, vaccination, cloning, and global warming. We will study what these controversies tell us about the shifting relationship between science and society, how changes in scientific paradigms occur, why some controversies resolve, and why others persist, even in the face of long-standing scientific consensus. Students will learn to see science not as a progressive series of discoveries in the eternal pursuit of truth, but as an often messy historical process fully embedded in the politics and culture of its time.

HIST 1979S. History of Life Itself: Biopolitics in Modern Europe.
Life has long existed, but also has a history of its own. With the development of the natural sciences and state governance of its own populations, human life can be said to have entered into history. Homo Sapiens became the subject of medical science, political philosophy, and state law. In looking at the intersecting histories of science, politics, and theories of life, this seminar will examine the origins and effects of political economy, biology, public health, racism, eugenics, state violence, and ultimately democracy. We will read meta-histories from theorists, case studies from historians, and classic works of political philosophy.

HIST 1979T. Modernism and Its Critics.
This course explores how European writers interpreted modern art and manners between 1850 and 1940. As a crucial figure in emerging modern world, the cultural critic aimed to explain the meaning of style for society. Consequently, cultural critics created rich primary resources for understanding politics, beliefs, and everyday life activities. We will especially focus on anxiety about modern life expressed in controversies over avant garde movements from impressionists to expressionists, realists to the surrealists. We will cover issues like hysteria, men's fashion, music, vacations, sexuality, and advertising. In addition to lesser known figures, selected readings include Baudelaire, Nietzsche, Benjamin, Kafka.

This course explores the intersections between American business and American Empire during the twentieth century. From the United Fruit Company in Latin America to the arms manufacturers at Lockheed Martin, the interests of capital have shaped U.S. foreign relations. As students race this history across the twentieth century, they will learn how the rise of American business to global preeminence depended upon a supportive, interventionist government. This course will appeal to history, IR, and Economics concentrators among others.

HIST 1979V. Technologies of the Soul: The History of Healing.
Movements that sought to heal society formed a distinct counterpoint to establishment science, religion and culture throughout modernity. In this course, we will examine distinctly modern, non-medical forms of healing from the late 18th until the mid twentieth centuries. This course engages cultural history and theory, science, opera and religion asking whether movements such as Mesmerism, Wagnerism, or Anthroposophy formed a hopeful expansion of the healing role of science art and religion? Or did such developments subvert established norms that provoked anxiety? Ultimately we will probe the limits of the humanities while exploring movements that have challenged such boundaries.

HIST 1979W. Debates on the Holocaust.
Few topics in Modern European History have so heavily engaged historians while producing so little consensus as the Holocaust. Several debates have emerged in scholarship around several major issues such as motivation, collaboration, ideology, as well as larger questions around genocide itself. In this course, we will examine each debate and the links to specific methods within history such as periodization, causality and disciplinary boundaries. This course presents a unique entry to gain exposure to foundational historical categories and methods. Students will gain a knowledge of concepts critical to historical debate and foundation in a variety of approaches to history.

Scholars have long equated modernity with "disenchantment," the subordination of magic and mysticism to the forces of science and secularization. Recent scholarship, however, has challenged this view, suggesting that the persistence of magical worldviews has been integral to the development of modernity itself. In this course, we will explore the various interactions, both conflicting and complementary, between science, religion, and magic in the nineteenth- and early twentieth-century United States. Topics will include spiritualism, hypnosis, phrenology, optical illusions, alternative medicines, stage magic, and the early psychology of religion. Throughout, we will interrogate the concept of modernity and the narrative of disenchantment.

This course explores the history of the major themes, problems and ideals of global peace, justice and human rights. We investigate the theoretical, social and political elements within these ideas and practices, spanning broad temporal and spatial genealogies of human thought. From biopolitics to geopolitics, we uncover attempts to demand food security, health care, and dignity as universal human rights. We highlight philosophies of peace and ethics, and unpack competing conceptions of “justice.” Among other topics, the political economy of global survival plays an important role in this perspective, especially within bioethics and environmental justice.
HIST 1979Z. The World in Revolution: America and the Global South during the Long 1970s. We'll explore varied relationships between Americans and Global South during the long 1970s—from the wave of revolutionary movements of the late 1960s to the Reagan "offensive" of 1981. As we trace these relationships across the decade, students will learn how Americans from all walks of life encountered the revolutionary "Third World." While many on the American Left—from Black Nationalists to feminists such as Bella Abzug—sought cooperation with the revolutionary movements in the Global South, others became determined to reassert U.S. hegemony abroad following the Vietnam War. We will try to understand why this latter group's antagonistic attitude towards the Global South ultimately came to define U.S. foreign policy.

HIST 1980Y. Jews and Revolutions (JUDS 1701). Interested students must register for JUDS 1701.

HIST 1981G. Intellectual Change: From Ottoman Modernization to the Turkish Republic (MES 1300). Interested students must register for MES 1300.

HIST 1990. Undergraduate Reading Courses. Guided reading on selected topics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIST 1992. History Honors Workshop for Prospective Thesis Writers. Prospective honors students are encouraged to enroll in HIST 1992 during semesters 5 or 6. HIST 1992 offers a consideration of historical methodology and techniques of writing and research with the goal of preparing to write a senior thesis in history. The course helps students refine research skills, define a project, and prepare a thesis prospectus, which is required for admission to honors. Students who complete honors may count HIST 1992 as a concentration requirement. Limited to juniors who qualify for the honors program. WRIT

HIST 1993. History Honors Workshop for Thesis Writers, Part I. HIST 1992 and HIST 1993 students meet together as the History Honors Workshop, offered in two separate sections per week. All students admitted to the History Honors Program must enroll in HIST 1993 for two semesters of thesis research and writing. They may enroll in the course during semesters 6 and 7, or 7 and 8. Course work entails researching, organizing, writing a history honors thesis. Presentation of work and critique of peers’ work required. Limited to seniors and juniors who have been admitted to History Honors Program. HIST 1993 is a mandatory S/NC course. See History Concentration Honors Requirements.

HIST 1994. History Honors Workshop for Thesis Writers, Part II. This is the second half of a year-long course, upon completion the grade will revert to HIST 1993. Prerequisite: HIST 1993. WRIT

HIST 2050. Proseminar in Late Medieval History. Macrohistory/Microhistory. A comparison of two different approaches to the study of the past, especially of late medieval and early modern Europe, focusing on the works of Fernand Braudel and Carlo Ginzburg.

HIST 2080. Seminar in European Social History in the Eighteenth and Nineteenth Centuries. Methods of analysis for current topics in social, economic, demographic, family, and gender history. Depending on sources available, papers may be on Italian topics of the 16th-19th centuries, or on French or English topics of the 18th-19th centuries. Language requirement depends on area of specialization.

HIST 2090. Proseminar on European Social History in the Eighteenth and Nineteenth Centuries. Selected readings on changes of social life in European cities in the period of transition from the preindustrial to the industrial economy. Primary focus is on developments in France, England, and Italy. Language requirement depends on area of specialization.

HIST 2450. Exchange Scholar Program.

HIST 2890. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

HIST 2910. Reading and Research. Section numbers vary by instructor. Please see check Banner for the correct section number and CRN to use when registering for this course.

HIST 2930. Colloquium. Required of all first-year graduate students; includes participation in Thursday Lecture Series. E

HIST 2935. Historical Crossings: Empires and Modernity. "Historical crossings" is a rough translation of histoire croisée, referring to global configurations of events and a shared history, rather than to a traditional comparative history. This Seminar is designed to be the cornerstone of the M.A. program. It will not serve as a traditional historical methods course but instead focus on training students to read and think on various scales of historical analysis—from cross-cultural and trans-geographic to the granularity of social and cultural specificity, requiring students to think both globally and locally and introducing them to an advanced level of historical inquiry, debate, and exploration.

HIST 2940. Writing Workshop. Required of all 3rd semester Ph.D. students.

HIST 2950. Professionalization Seminar. Required of all second year Ph.D. students.

HIST 2960. Prospectus Development Seminar. This required course open only to second-year students in the History Ph.D. program focuses on the development of a dissertation prospectus. The seminar will include considering the process of choosing a dissertation topic, selecting a dissertation committee, identifying viable dissertation projects, articulating a project in the form of a prospectus, and developing research grant proposals based on the prospectus. E

HIST 2970A. New Perspectives on Medieval History. Over the past several decades, the field of medieval history has been reshaped radically. New approaches have changed the ways that medievalists think about old subjects. Our understanding of medieval society itself has expanded as previously marginal or unexplored subjects have become central to medievalists' concern. This seminar explores how the ways in which medieval historians practice their craft have altered in response to these developments. Readings in classic older works are juxtaposed with newer ones on their way to becoming classics themselves.
HIST 2970B. Race, Ethnicity and Identity in the Atlantic World.
Explores questions of identity in the Atlantic world from the sixteenth to the nineteenth century, focusing on three types of identity: 1) ethnicity; 2) race; 3) nationality. How are such identities created and maintained? Are they “natural” or “artificial”? How do they change over time, and why? Throughout the seminar, we will consider both internal/external boundaries, how social actors - particularly subalterns - see themselves and how they are imagined by outsiders. Finally, we will examine how identity is expressed in a wide variety of media - codices, paintings, maps, oral histories, diaries, etc. - and how scholars make use of such sources.

HIST 2970C. Rethinking the Civil Rights Movement.
This graduate course encourages a rethinking of the complex components, arguments and activities that have characterized what we have come to know as the Civil Rights Movement, concentrating primarily on African American agency, actions and politics, through careful reading of recent scholarship in the field. While knowledge of U.S. history is preferred, this course asks larger thematic questions about protest movements (the role of the state, relationships with and between oppressed groups and organizations, and periodization), that will interest non-Americanists also. Some of the topics covered include: gender, organizing and strategies, the local, global ramifications and interactions, organizational structures and politics, and the recent conception of the Long Civil Rights Movement. M

HIST 2970D. Modernity and Everyday Culture - Reading.
No description available.

HIST 2970E. Early Modern Continental Europe - Reading.
This course is designed to introduce graduate students to some major topics and debates in early modern European history, as well as a range of geographical, methodological, and historiographical perspectives. Readings combine recent works and classics to give a sense both of where the field has been and where it is going. Topics covered include political history, religious interactions (among Christians and between Christians, Jews and Muslims), urban history, the history of the book, Atlantic history, the history of science, and the Enlightenment. The class also provides the opportunity to explore a single topic of choice in greater depth.

HIST 2970F. Problems in Modern Jewish History - Reading.
This course examines significant issues in the history and historiography of modern European Jewry from the mid-18th century to WWII. It is divided into four units, each of which considers a thematic question that has been of interest to European Jewish historians, including: emancipation, integration, and acculturation; gender and the study of modern Jewish history; approaches to minority identity; and history and memory. Written permission required.

HIST 2970G. Early Modern European Empires.
This course addresses both the history and historiography of the most relevant European imperial experiences in Africa, Asia and America c. 1400-1800. It will focus on the structure and dynamics of the Iberian case(s), as well as in the profile of the so-called Second European expansion led by the Dutch, the English and a number of other (minor) European examples. Particular emphasis will be given to the relations between these imperial bodies and other (non-European) Empires, by focusing on cross-cultural contacts and conflicts, hybrid societies and images. Restricted to juniors, seniors, and graduate students only. P

HIST 2970H. Special Topics Seminar: American Political History.
This graduate seminar will explore a range of approaches to the study of America’s political past from the colonial period to the late twentieth century, including scholarship on electoral politics, the state, political culture, grassroots politics and resistance, the politics of gender and family, and American political development. We will analyze how scholars have defined and redefined the field over time and throughout we will interrogate the question, “what is political history?”

HIST 2970I. Early Modern British History-Reading.
No description available. Open to graduate students only.

HIST 2970J. Early Modern British History-Reading.
No description available.

HIST 2970K. Core Readings in Eighteenth Century European History.
Provides an introduction to the central issues of eighteenth-century European history. It has two purposes: first, to help you refine your abilities to think historiographically; second, to assist you in preparing for your comprehensive exams. To that end, we will read both standard interpretations and newer scholarship.

HIST 2970L. Race and U.S. Empire.
No description available.

HIST 2970M. Japan, from Tokugawa to Meiji - Reading.
Compares the organization and exercise of political authority, the production and distribution of wealth, and norms of cultural expression during the Tokugawa and Meiji periods as a way of understanding the dynamics of Japanese modernization.

HIST 2970N. Modern Latin American History - Reading.
No description available.

HIST 2970P. Nineteenth and Twentieth Century American History - Reading.
No description available.

HIST 2970Q. Core Readings in 20th Century United States History.
Major topics and themes in 20th-century U.S. history. M

HIST 2970R. U.S. Social/Cultural History, 1877-present - Reading.
Case studies of prominent public intellectuals spanning the century from John Reed to George Wills, Mary McCarthy to Frances Fitzgerald.

HIST 2970S. Western and Frontier History - Reading.
An introduction to recent work on the history of North American frontiers and the region of the American West.

HIST 2970T. Representations of Suffering and Victimhood in History and Memoirs.
How have historians approached the representation of suffering in their work? How have attitudes toward representations of suffering and atrocities in historical narratives changed since the Second World War? More generally, how do human rights narratives construct the identities of victims? This seminar will explore these questions in the context of the genocide of European Jewry. Requirements: One in-class presentation of weekly readings; one 20-25 page paper. Class participation required.

HIST 2970U. Topics in Nineteenth and Twentieth Century American History.
M

HIST 2970V. Atlantic Empires.
No description available.

HIST 2970W. Graduate Readings in Early American History.
No description available.

HIST 2970X. Topics in the History of Empire and Culture.
No description available.

HIST 2970Y. History and Theory of Secularity.
No description available.

HIST 2970Z. Core Readings in Nineteenth Century Europe.
Provides an introduction to the central issues of nineteenth-century European history. It has two purposes: first, to help you refine your abilities to think historiographically; second, to assist you in preparing for your comprehensive exams. To that end, we will read both standard interpretations and newer scholarship.

HIST 2971A. Science in a Colonial Context.
This graduate seminar will consider the politics of science in colonies societies. Subjects covered include: the relationship between science and local (indigenous) knowledges, science and the “civilizing” mission, social relations in knowledge production, science and development, racial science and subject bodies, science and nationalism. Assignments will include book review, a review essay and leading discussion.

HIST 2971B. Topics in Twentieth Century Europe.
This course will introduce graduate students to current scholarship on major issues in twentieth century European history. Topics will include (but are not limited to) the causes and consequences of the two world wars; the emergence, workings, and collapse of authoritarian societies; the spread of mass culture and consumerism; Americanization; de-colonization; the European Union, and the collapse of the bi-polar political system. In the interest of introducing students to the significant historiographical debates of the field, they will read both standard historical interpretations and newer scholarship. M
HIST 2971C. Readings in American History.
Topics in American social and cultural history in the nineteenth and twentieth centuries.

HIST 2971D. Passion, Dispassion, and the Scholar.
What role should passion and the imagination play in intellectual endeavor? Is the dispassionate, objective, and objectifying voice the only appropriate one in the arena of scholarship? How much can or should the scholar let his or her personality and personal investment in a subject appear on the page? The seminar will explore these and related questions by examining non-traditional modes of scholarly writing (primarily but not exclusively drawing on historians and anthropologists). This is not a seminar about theory and method, although such issues will inevitably be part of our discussions. It is a seminar about writing and scholarly voice. 

HIST 2971E. Latin American Historiography.
This course examines the development of historical writings on Latin America produced in the United States from the late nineteenth century until the present. We will focus on themes, such as race, gender, labor, subaltern studies, dependency theory, postcolonial analysis, and post-modernism, to understand the diverse approaches to Latin American history. 

HIST 2971F. Gender & Knowledge in Early Modern Europe.

HIST 2971G. Notions of Public & Private in Late Modern Europe.

HIST 2971H. Politics and Society in the 20th Century.

HIST 2971I. New Perspectives on Medieval History.
No description available.

This state-of-the-field course will introduce students to nineteenth-century U.S. history, with specific attention to how recent transnational, imperial, institutional, and cultural approaches have reframed older debates over the "Age of Jackson," "Manifest Destiny," and the "Market Revolution."
This seminar offers core readings for students preparing a comprehensive exam field, while providing others with content knowledge to teach this period of American history.

Readings of theoretical and empirical studies in interstate and inter-ethnic relations in borderland regions throughout the world, with an emphasis on the modern period in East-Central. Open to graduate students only.

HIST 2971L. History of Medicine.
The history of medicine is a topic that can shed light on any period and place, since all aspects of human life are intertwined parts of the story: ideas, religion, culture, material life, economy, politics, social organization and legal institutions, etc. This reading course is meant to introduce graduate students to the main subjects debated in the field, so that by the end of the semester you will be able to read in the literature and to take up any related archival work with confidence. Open to graduate students only.

HIST 2971M. Critical Perspectives on Public and Private.
No description available. Open to graduate students only.

HIST 2971N. Graduate Preliminary Readings.
No description available.

HIST 2971P. Diasporas and Transnationalism.
This reading seminar is designed to familiarize students with the most cited and current theories on diaspora and transnationalism, to examine a few exemplary case studies from around the world, and to allow students to develop and discuss their individual interests and reading lists around these broad themes and concepts, towards a prelim field or dissertation prospectus.

HIST 2971R. Approaches to Middle East History.
An overview of canonical and recent scholarship on the Middle East, beginning with neo-Orientalist and Modernization-theory writings that ruled until the early 1960s, then a consideration of two turns often in productive tension with each other: materialist approaches that lead to social history and political economy, and discursive approaches that lead to cultural and post-colonial studies. We then consider works on the environment and technopolitics, gender and sexuality, and law and society, among others. Throughout, we consider how theoretical trends in other disciplines shaped the writing of history. Requirements include weekly essays, oral presentations, and a literature review.

HIST 2971V. 19th and 20th Century European History.
This is a graduate field seminar designed to introduce students to the historiography and recent scholarship of 19th and 20th century Europe. The primary goal of the seminar is to help students prepare for preliminary examinations in modern European history and to provide the essential conceptual tools for further research in the field. Each week will focus on a large theme or set of debates, which will be explored through in-depth explorations of assigned texts as well as recommended readings.

HIST 2980B. Legal History.
An introduction for graduate students to the significance and methods of legal history, broadly defined. Students will engage with works in legal history from a variety of time periods and geographical areas, and they will be guided to sources related to their specific research interests. A major research essay will be required that draws from the models of legal history given and is based on original research into legal sources.

HIST 2980C. Race, Ethnicity and Identity in Atlantic World.
This seminar examines the meaning of racial and ethnic identity in colonial Latin America. Our primary approach will be historiographical; we will begin with colonial concepts of racial hierarchy, then move on to national ideologies of mestizaje and indigenismo, the emergence of "race mixture" as a scholarly topic, the "caste vs. class" debate of the 1970s and 1980s, and finally recent works on the African diaspora.

HIST 2980D. Topics in Violence in Modern Europe: Interethnic Relations and Violence in Eastern Europe.
This seminar will examine recent studies on interethnic coexistence, violence, and genocide in East-Central and Eastern Europe in the 20th century. Readings will range from works on definitions of ethnicity and the making of nations to studies of communities and interpersonal relations. We will also read and listen to testimonies and analyze contemporary documents.

HIST 2980E. Social History in Early Modern England - Research.
Readings on select topics in early modern English social history. Topics include: marriage formation, crime, social unrest, gender issues, and popular culture. Open to graduate students and advanced undergraduates.

HIST 2980F. Modern British History - Research.
No description available.

HIST 2980G. Topics in Violence in Modern Europe - Research.
No description available.

HIST 2980H. Early American History - Research.
Research seminar.

HIST 2980I. Problems in American Social History - Research.
An advanced examination of the issues and methodology of American urban and social history plus primary research in specific topics.
HIST 2980J. U.S. Women's/Gender History - Research
Focus is 20th-century history. Open only to graduate students.

HIST 2980K. Passion, Dispassion, and the Scholar
What role should passion play in intellectual endeavor? Should the scholar's personal involvement in a subject appear on the page? What is the value of the dispassionate voice as opposed to a narrative voice of immediacy? The seminar explores such issues in modes of scholarly writing (primarily but not exclusively historical and anthropological).
Although questions of theory and method inevitably arise, this is a seminar about scholarly voice.

HIST 2980L. Research and Pedagogy
This research seminar is geared to help graduate students think about the ways in which they can incorporate their own research into the courses they will teach. The final product for the seminar is a primary source unit and an accompanying essay that can conceivably serve as a "teacher's guide." All fields and periods welcome. E

HIST 2980M. Nature, Space and Power: Environmental History
No description available.

HIST 2980N. Gender and Knowledge
No description available.

HIST 2980P. Theory of Everyday Life
What do we mean by the "everyday" and how can we study it in the social sciences and represent it in the arts? We will focus on attempts to answer this question both on the theoretical and the empirical levels. Readings will include philosophers of everyday life and examples of recent scholarship in "everyday life studies" that have revolutionized the study of leisure, entertainment, national identity, decolonization and gender.

HIST 2980Q. Seminar in Early Modern British History
No description available.

HIST 2980R. Cultures of Empire
The goal of this course is to research and produce a piece of original historical scholarship, drawing on methodologies developed during the cultural turn in the study of empires. Early semester readings address approaches to studying empire (Marxian, Subaltern Studies, Cultural Studies, etc.) and various locations: British India, Japanese Manchuria, and Netherlands Indies, among others. The course then evolves into a history writing workshop for the rest of the semester, paying attention also to historical writing, including style, form, and narrative strategies. Relevant to historical inquiry into cross-cultural encounters in any time period.

HIST 2980S. Hannah Arendt and Her World
This seminar will explore key concerns and paradigms in 20th-century intellectual history via a critical consideration of the thinking of Hannah Arendt (1906-75). In recent years, Arendt's work has earned renewed attention for its multidisciplinary, multicontinental importance as well as for its uncanny currency to the present political and academic moment. Her thinking is thus in many ways "migratory thinking." Migratory thinking involves first the diaspora and exchange of thinkers, most specifically through political exile and emigration during the Nazi period and after. It thus involves both the experience and theorization of "worldliness"; the Enlightenment value that remains a key principle for Arendt, with special reference to Lessing. Migratory thinking also involves discursive movement among disciplines and cultures, for example from German philosophy to American political theory/science, and the complications of intellectual and cultural subjectivity of émigré as well as German Jewish thinking. Finally, the history and historical contingency that support this style of thinking emphasize the drive to thinking, responsibility, and judgment at a moment of danger. Readings and seminar discussions will focus on Arendt's work, read in dialogue with the work of thinkers with whom she was in dialogue (Benjamin, Broch, Heidegger, Scholem) and with the later work of thinkers whose own subject positions might be considered comparable with the concerns in the paragraph above (G. Rose, S. Neiman, S. Ascheim, J. Derrida et al.). Themes will include cosmopolitanism, nationalism, and totalitarianism, the global politics of race, capitalism, and exchange, religious/secular tensions, and the relations of society and politics to art and the imagination.

HIST 2980T. Minorities, Citizenship and Nation
No description available.

HIST 2980U. Power, Culture, Knowledge
"Truth isn't outside power, or lacking in power... [it] is a thing of this world," wrote Michel Foucault in the mid 1970s. In this course we will read and examine Foucault's seminal works on knowledge and power, and the kinds of scholarship it has engendered at the intersections of history, art history, anthropology, political science and social theory. In addition to Foucault's major interlocutor, Edward Said, we will read Antonio Gramsci, Derrida and Walter Benjamin. We will end the semester with facing the challenge of historicizing our own political present through a number of contemporary thinkers.

HIST 2980V. Early Modern Empires
This seminar will explore various approaches to understanding the rise, expansion, and contraction of empires in the early modern period (ca. 1500-1800). Students will be required to write a major research essay based on primary sources.

HIST 2980W. First Person History in Times of Crisis: Witnessing, Memory, Fiction
This seminar examines the relationship between History as a narrative of events and history as individual experience. Postulating that historical events as related by historians were experienced in numerous different ways by their protagonists, the seminar focuses on the complementary and contradictory aspects of this often fraught relationship at times of crisis, especially in war and genocide. While much time will be spent on World War II and the Holocaust, the seminar will engage with other modern wars and genocides across the world. Materials will include eyewitness reports, postwar testimonies and trial records, memoirs and relevant works of fiction. Open to graduate students only.

HIST 2981C. The Frontiers of Empire
This class will look at interactions along and across imperial frontier zones throughout the world, with an emphasis on the pre-modern and early modern period. Readings will be both theoretical and empirical in nature, and will focus on themes including the conceptualization of space; practices and consequences of warfare, captive-taking, and slavery; identity- and secondary state-formation; economy and society; diplomacy and the negotiation of claims to authority.

HIST 2981E. Environmental History
A topical seminar with global and chronologically broad scope, "Environmental History" surveys classic works and recent writing on explicitly environmental themes such as agriculture, conservation, energy, and anthropogenic change. Equally, it considers environmental treatments of major topics in other sub-fields such as war, science, imperialism, the body and senses, and animals. In examining this broad range of topics, we will seek what is distinctive about environmental history and how environmental considerations can enhance the students' own research.

HIST 2981F. The Politics of Knowledge
The seminar offers an introduction to fundamental theoretical texts and exemplary works in the interdisciplinary field of Science and Technology Studies. Readings will be drawn from a range of time periods and geographical areas, and students will be asked to deploy the theoretical insights of our readings in working with sources in their own fields for a final research paper. Topics include: the gendered dimensions of knowledge, the moral economy of science, claims to expertise, and the stakes of "objectivity."

HIST 2981I. Theory From The South
This course will consider various approaches to understanding the political and cultural stakes of "objectivity." The "global south" is a working category today for a diversity of intellectual projects centered on the non-European postcolonial world. While this category is embodied in histories of empire and culture, critical thinking since the 1970s has already done much to " provincialize Europe" and interrogate the ways in which power and knowledge have been imbricated in the making of universal claims, institutional processes and historical self-understanding. This graduate seminar will draw upon lineages of anti-colonial thought and postcolonial critique to relocate and rethink the "south" as a generative source for theory and history.
HIST 2981J. The Body.
This seminar will consider theories of the body as a site of knowledge, politics, culture, gender, and identification in a broad range of temporal and geographic contexts. We will also examine how historians have written the history of the body, and what sources they have used to do so.

HIST 2981P. Legal and Constitutional History: Methods and Approaches in Comparative Perspective.
This seminar explores what it means to research and write legal history—broadly construed and incorporating constitutional history and sociological history. After selecting “canonical” readings across geographic and chronological fields, we turn to cutting-edge themes, including the laws of war and human rights; religion and secular authority; race, gender, and legality; and comparative/transnational approaches to justice and the rule of law. Open to graduate students pursuing questions of law and society or the history of legal ideas and institutions, this seminar seeks diverse interpretative methods and approaches to legal history, including but not limited to the use of court records.

HIST 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

History of Art and Architecture
Chair
Sheila Bonde
Work in the department of the History of Art and Architecture at Brown is conceived as an interdisciplinary undertaking, in which students are encouraged to become familiar with the variety of methodologies and practices that have historically been, and continue to be productive in our fields. We also maintain a longstanding commitment to museum studies and the study of objects through a close working relationship with the Museum of the Rhode Island School of Design. Interested students in this department have the opportunity to hold internships and (in the case of graduate students) proctorships at the museum.

For additional information, please visit the department’s website: http://www.brown.edu/academics/art-history/

Architecture Concentration Requirements
The Architecture concentration allows students to develop a broad understanding of the concepts and methods for the planning and design of buildings, landscapes, and cities. The concentration was planned with the explicit goal of connecting architectural training firmly with the humanities and providing a greater awareness of global, environmental, social and economic issues in the built environment. This approach to the education of architects and urban planners is meant to provide them with the tools needed in today’s urban global society. Students who complete the concentration will have the option of transitioning into a 2-year Masters of Architecture program at the Rhode Island School of Design or several other architecture schools.

Concentration Requirements
Two RISD double-credit Design Studios: Students will take the courses at the Rhode Island School of Design but will register at Brown.

History of Art and Architecture

Concentration Requirements

The concentration in History of Art and Architecture introduces students to the history of art, architecture, and visual culture. Students in HIAA explore Western and non-Western areas ranging over a wide period of time (Ancient, Medieval, Islamic, East Asian, Latin American, Early Modern, Modern/Contemporary). Concentrators often focus on a particular period (e.g., ancient, modern architecture), a particular branch of the field (e.g., urbanism), or a methodology (e.g., semiotics, critical interpretation, archaeology), but students may choose to create their own program of study. Concentrators will receive essential training in perceptive, historical, and critical analysis. Concentrators often study abroad for first-hand knowledge of works of art and monuments as well as for exposure to foreign languages and cultures. Because foreign language skills are essential for pursuing art historical studies in a professional environment or in graduate school, HIAA requires two years of foreign language study.

History of Art and Architecture Requirements

To complete the concentration, you will be expected to take a minimum of ten courses (11 for honors). Our goal in setting out these requirements is to welcome students into a lively and diverse department that also shares a cohesive and strong commitment to the field. We as a faculty want students to cultivate their special interests and also to venture into areas that may not be so familiar but that will open new and exciting possibilities for them. Ten courses are only the minimum requirement. Beyond that students are encouraged to take courses at RISD, participate in study abroad programs, and take courses in other Brown departments. As we are a truly interdisciplinary department, you will also find that our faculty collaborates with members of other departments to teach courses that bring together the strengths of different disciplines. We encourage both experimentation and concentration.

Our general survey in history of art and architecture (HIAA 0010) is an excellent foundation for the concentration. It is not a prerequisite for taking other lecture courses but you can count it as one of the 4 non-core courses required for the concentration (see below for core and non-core courses).

Since the history of art and architecture addresses issues of practice within specific historical contexts, concentrators are encouraged to take at least 1 studio art course. Courses in history also train students in methods and approaches that are highly relevant to the history of art and architecture. Study abroad can be a valuable enrichment of the academic work available on campus, in that it offers opportunities for first-hand knowledge of works of art and monuments as well as providing exposure to foreign languages and cultures. Study abroad should be planned in consultation with the concentration advisor in order to make sure that foreign course work will relate meaningfully to the concentrators program of study.

Honors

For students in the concentration who intend to go to architecture school afterwards, typically their design project in their double credit second RISD studio will be ideal for a capstone or honors project. For others, who might tend towards theory or history of architecture, an honors thesis is still a valid option.

Four core general lecture courses, numbered HIAA 0020 - HIAA 0940. The courses should be distributed between three of the seven available areas of the discipline: Ancient; Medieval; Islamic; East Asian; Latin American; Early Modern (ca. 1400-1800); Modern, Contemporary

HIAA 0010 A Global History of Art and Architecture
HIAA 0011 Introduction to the History of Architecture and Urbanism
HIAA 0012 Theories of Architecture from Vitruvius to Venturi
HIAA 0013 Introduction to Indian Art
HIAA 0031 Pre-Islamic Empires of Iran
HIAA 0041 The Architectures of Islam
HIAA 0042 Islamic Art and Architecture

</table>

Four elective courses. These can include courses taught in the department, cross-listed courses from other departments, or courses in other departments approved by the concentration advisor. HIAA 0010 may count as one of these courses but cannot count as one of the four core lecture courses. Students are encouraged to take a studio class as part of this requirement.

Total Credits: 10

1 The six core lecture and seminar courses must be taken in the History of Art and Architecture department and cannot be replaced with independent study, honors thesis or classes taken in other departments, universities, or high schools.

2 A maximum of two (2) credits may be allowed for courses taken at other universities (transfer credits or from study abroad) or courses that also count toward a second concentration. No concentration credit will be granted for AP/A-level scores, or for language classes.

Architectural Studies Track

The Optional Architectural Studies track within the History of Art and Architecture concentration blends a variety of disciplines toward the study of buildings and the built environment. The concentration prepares students for the continued study of architecture and the history of architecture in graduate school as well as careers in related areas such as urban studies.

Because the architectural studies program was especially designed for students wishing to gain greater experience in the practical skills necessary for a career in architecture or a related field, concentrators are required to take a course in design from the Visual Arts Department, the Rhode Island School of Design or an introduction to architectural design, theatre set design at Brown University.

Four lecture courses. These courses will be numbered between HIAA 0020 and HIAA 0940 and will be marked with an "A" in the course description. The courses must be distributed over three of seven areas in architectural history: Ancient; Medieval; Islamic; East Asian; Latin American; Early Modern (ca. 1400-1800); Modern/Contemporary.
HIAA 0040  Introduction to Medieval Art and Architecture
HIAA 0042  Islamic Art and Architecture
HIAA 0031  Pre-Islamic Empires of Iran
HIAA 0041  The Architectures of Islam
HIAA 0061  Baroque
HIAA 0062  The Age of Rubens and Rembrandt: Visual Culture of the Netherlands in the Seventeenth Century
HIAA 0070  Introduction to American Art: The 19th Century
HIAA 0074  Nineteenth-Century Architecture
HIAA 0075  Introduction to the History of Art: Modern Photography
HIAA 0081  Architecture of the House Through Space and Time
HIAA 0089  Contemporary Photography
HIAA 0321  Toward a Global Late Antiquity: 200-800 CE
HIAA 0340  Roman Art and Architecture: From Julius Caesar to Hadrian
HIAA 0400  Early Christian, Jewish, and Byzantine Art and Architecture
HIAA 0440  Gothic Art and Architecture
HIAA 0460  Muslims, Jews and Christians in Medieval Iberia
HIAA 0550  Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany
HIAA 0560  Popes and Pilgrims in Renaissance Rome
HIAA 0570  The Renaissance Embodied
HIAA 0580  Word, Image and Power in Renaissance Italy
HIAA 0600  From Van Eyck to Bruegel
HIAA 0630  Cultural History of the Netherlands in a Golden Age and a Global Age
HIAA 0710  The Other History of Modern Architecture
HIAA 0770  Architecture and Urbanism of the African Diaspora
HIAA 0771  African American and Caribbean Architectures: Domestic Space
HIAA 0801  Art After '68
HIAA 0810  20th Century Sculpture
HIAA 0830  Revolutionary Forms: 100 Years of Art and Politics in Latin America
HIAA 0840  History of Rhode Island Architecture
HIAA 0850  Modern Architecture
HIAA 0860  Contemporary Architecture
HIAA 0861  City and Cinema
HIAA 0870  20th Century British Art: Edwardian to Contemporary
HIAA 0881  City and Cinema

One seminar or independent study in architectural history, numbered between HIAA 1100 and HIAA 1890, and marked with an "A" in the course description. 1

HIAA 101  Introduction to Architectural Design Studio
HIAA 101A  Illustrating Knowledge
HIAA 1101B  Seeing and Writing on Contemporary Arts
HIAA 1102  Architectural Drawing and Sketching
HIAA 1103  Introduction to Architectural Design
HIAA 1120B  History of Urbanism, 1300-1700
HIAA 1120C  History of Western European Urbanism 1200-1600

HIAA 1150C  El Greco and Velazquez
HIAA 1150D  El Greco and the Golden Age of Spanish Painting
HIAA 1170B  Twentieth-Century American Painting
HIAA 1181  Prefabrication and Architecture
HIAA 1200A  Ancient Art in the RISD Collection
HIAA 1200D  Pompeii
HIAA 1201  Brushwork: Chinese Painting in Time
HIAA 1300  Topics in Classical Art and Architecture
HIAA 1301  The Palaces of Ancient Rome
HIAA 1302  Women and Families in the Ancient Mediterranean
HIAA 1303  Pompeii: Art, Architecture, and Archaeology in the Lost City
HIAA 1310  Topics in Hellenistic Art
HIAA 1360X  The Aesthetics of Color: History, Theory, Critique (GNSS 1960X)
HIAA 1400F  Research Seminar Gothic Art
HIAA 1410A  Topics in Islamic Art: Islamic Art and Architecture on the Indian Subcontinent
HIAA 1430A  The Visual Culture of Medieval Women
HIAA 1440B  Architecture of Solitude: The Medieval Monastery
HIAA 1440D  The Gothic Cathedral
HIAA 1460  Topics in Medieval Archaeology
HIAA 1550A  Prints and Everyday Life in Early Modern Europe
HIAA 1550B  Topics in the Early History of Printmaking: Festival and Carnival
HIAA 1560A  Italy and the Mediterranean
HIAA 1560B  Mannerism
HIAA 1560C  Renaissance Venice and the Veneto
HIAA 1560D  Siena from Simone Martini to Beccafumi
HIAA 1560E  The Arts of Renaissance Courts
HIAA 1560F  Topics in Italian Visual Culture: The Visible City, 1400-1800
HIAA 1600C  Italian Baroque Painting and Sculpture
HIAA 1600D  The Art of Peter Paul Rubens
HIAA 1600A  Bosch and Bruegel: Art Turns the World Upside Down
HIAA 1600B  Caravaggio
HIAA 1600E  The World Turned Upside Down
HIAA 1600F  Antwerp: Art and Urban History
HIAA 1600G  Art + Religion in Early Modern Europe
HIAA 1600H  Comedy in Netherlandish Art From Hieronymus Bosch to Jan Steen
HIAA 1600I  Collections and Visual Knowledge in Early Modern Europe: 1400-1800
HIAA 1770  Architecture and Visual Culture of Empire
HIAA 1850A  Frank Lloyd Wright
HIAA 1850D  Film Architecture
HIAA 1850E  Architecture, Light and Urban Screens
HIAA 1850G  Contemporary American Urbanism: City Design and Planning, 1945-2000
HIAA 1850H  Berlin: Architecture, Politics and Memory

A project seminar from the HIAA 1910 series. This must be taken in the junior or senior year. 1, 2

HIAA 1910A  Providence Architecture

One studio art course in design. 3
Three elective courses. These can include other courses taught in the History of Art and Architecture department and cross-listed courses in other departments that are pertinent to architectural studies. They may also include a select number of non-cross-listed courses approved by the concentration advisor.

Total Credits 10

1. The two seminars cannot be replaced with independent study, honors thesis, or classes taken in other departments or universities.
2. In years where no project seminar is offered, any seminar that qualifies for architectural studies can become the starting point for a senior project.
3. The studio course may be taken at Brown, RISD, Harvard Career Discovery and similar six week + summer programs.
4. The non-cross-listed courses include but are not limited to MATH 0090, MATH 0100, PHYS 0030, PHYS 0040, ENGN 0030, Urban Studies and Engineering courses, and scenic design and technical production courses offered by the department of Theatre Arts and Performance Studies.
5. A maximum of two credits may be awarded for courses taken at other universities or for courses that count toward a second concentration. No concentration credit is awarded for high school AP/A-level courses or for language courses.

The below pertains to ALL concentrators in the department:

Language Requirement

You will be expected to demonstrate reading proficiency in a language other than English. By learning the language of another culture you will gain a deeper understanding of its art, literature and history. Aside from this, knowledge of a foreign language will equip you with a skill essential for pursuing art historical studies in a professional environment or graduate school. The requirement can be fulfilled by either passing an 0500 level language course at Brown or by demonstrating an 0500 level reading ability in a placement test administered by Brown University language department (Students who declared their concentration before August 2013 are expected to demonstrate proficiency at the 0400 level).

Self Assessment

All concentrators are required to write an essay when they file for the concentration that lays out what they expect to gain from the course of study they propose. All second semester seniors will be required to write a final essay that takes measure of what they have learned from the concentration, including their capstone and other experiences relating to their study of the history of art and architecture. For students doing a capstone, their capstone director will read this essay. A department subcommittee will read essays written by students not electing to do a capstone. The self-assessment should be turned in with a revised list of courses actually taken and the final paperwork for concentration approval.

Capstone Project

At the beginning of your senior year you will be actively encouraged to propose and undertake a Capstone Project. The Capstone Project is intended to challenge you with an opportunity to synthesize at a high level of achievement the knowledge and understanding you have gained by concentrating in the History of Art and Architecture or Architectural Studies. To propose and work on a Capstone Project you will need the support of a faculty sponsor. Capstone Projects embrace many possibilities. You can perfect a seminar paper in which you have developed a strong interest. You can participate in a graduate seminar to which the instructor has admitted you. You can serve as an undergraduate TA. You can work as an intern in museums and auction houses such as Christie’s. You might work on an archaeological excavation. You can participate in the Honors Program. Beyond these opportunities, the Department is open to other approaches. You should work with a faculty sponsor and with the Undergraduate Concentration Advisor to decide what will work best for you.

Honors

The Honors program in History of Art & Architecture and Architectural Studies will be administered as follows: accepted students will sign up for HIAA 1990 in the Fall and in the Spring. In the Fall, students will meet regularly with the whole Honors group and HIAA faculty to discuss methodology and general research and writing questions. In the Spring, students will continue to meet to present their research in progress to each other for comment and feedback. They will also be meeting regularly with their advisors and second readers throughout the year. Finished drafts of the thesis (which will generally be no more than 30-35 pages in length (exceptions to be determined in consultation with the instructor), not counting bibliography and visual materials) will be due to the advisor and second reader on April 1 of the Spring semester. Comments will be returned to the students for final corrections at that point. There will be a public presentation of the Honors work at the end of the Spring semester. Students wishing to write an honors thesis should have an ‘A’ average in the concentration. It is advisable for them to have taken at least one seminar in the department and written a research paper before choosing to undertake a thesis. While acceptance into the Honors program depends on the persuasiveness of the thesis topic as well as the number of students applying, students may refine their proposals by speaking in advance with potential advisors. No honors student may take more than four classes either semester of their senior year—being considered one of your four classes. Students who are expecting to graduate in the middle of the year are encouraged to discuss a different capstone project with individual advisors or the concentration advisor.

Honors Application Process

During the second semester of the junior year all concentrators will be invited to apply for admission to the Honor Program in History of Art and Architecture and Architectural Studies.

Admission to the Honors Program

1. To be admitted to the Honors Program you should have produced consistently excellent work and maintained a high level of achievement in all your concentration course. You should have earned an A grade in most of your concentration courses.
2. The key project for honors is to write an honors thesis. When you apply for admission you will be asked to submit a proposal of no more than two double-spaced pages that states the topic (subject and argument) of the research to be undertaken as clearly as possible, and add a one-page bibliography of the most relevant books and major articles to be consulted for the project. This three page application should be submitted, along with a resumé and a printout of the student’s most recent available transcript and submitted to the Department with a short cover letter stating who you feel the most appropriate advisor and second readers are for the thesis and why, and what your preparation is for this project. Clarity and brevity are considered persuasive virtues in this process. Applicants will be notified about the success of their applications at the end of the semester.
3. For admission to the Honor Program you must include with your proposal a letter of support from a faculty member of the History of Art and Architecture Department who has agreed to serve as your thesis advisor. You should discuss the thesis topic with your advisor before you submit your proposal. During the process of researching and writing you will meet regularly with your advisor to discuss your work.

Writing the Honors Thesis

1. If you are accepted into the Honors Program you will register for HIAA 1990 during the two semesters when you are working on a thesis. This is a seminar led by the Department Undergraduate Concentration Advisor in which all honors students meet once a month to present the current progress of their work. It is a valuable opportunity to share ideas and receive feedback from your fellow honors students and faculty alike. The honors seminar also offers a practical framework around which you can organize the progress of your work.
2. You will meet regularly with your thesis advisor and with a second reader to develop your ideas and writing.
3. Finished drafts of the thesis, which will generally be no more than 30-35 pages in length (exceptions to be determined in consultation with the instructor), not counting bibliography and visual materials, will be due to the advisor and second reader by April 1 of the Spring semester or by November 1 of the Fall semester if you plan on graduating in December. Comments will be returned to the students for final corrections at that point. There will be a public presentation of the Honors work at the end of the Spring semester.

History of Art and Architecture Graduate Program

The department of History of Art and Architecture offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/history-art-and-architecture

Courses

HIAA 0001. Architectural Design.
Design principles presented in the first semester are further developed through a series of projects involving actual sites with their concomitant physical and historic-cultural conditions. Issues of context, methodology, program and construction are explored for their possible interrelated meanings and influences on the making of architectural form. Estimated Cost of Materials: $55.00

HIAA 0002. Advanced Design Studio.
These studios, three of which are required for graduation, are offered by individual instructors to students who have successfully completed the core curriculum. They are assigned by lottery on the first day of classes. Once assigned to an advanced studio, a student may not drop studio.

This course introduces the beginning student to the origins, media, geometries and role(s) of projection drawing in the design and construction process. The student will learn systems of projection drawing from direct experience, and be challenged to work both from life and to life. Subjects such as transparency, figure/ground, sciagraphy, oblique projection, surface development, volumetric intersections, spatial manipulation and analytic operations will build on the basics of orthographic and conic projection. The course involves line and tone drawing, hand drafting, computer drawing(Autocad) and computer modeling(Rhino).

HIAA 0004. Architectural Analysis.
This course will develop one’s ability to critically read and understand architecture through formal, geometric, tectonic and spatial analytic processes. Analysis acts as an intermediary between observation, expression, and understanding, offering deep insights into works of architecture. The course builds upon the processes introduced in Architectural Projection. Through various conceptual and representational frameworks, the issues of mapping-layers. Point of view, scale, morphology, topography and tectonics will be explored as part of a larger creative process, embracing visual imagination, communication and critique.

Estimated Material Cost: $50.00.

HIAA 0005. Structural Analysis.
The basic content will be statics and strength of materials. The first portion will deal with force vectors, trusses, cross-sectional properties, and shear/ moment diagrams, followed by stresses, strains, material applications and the analysis procedures necessary to compute structural behaviors. This class is foundational to all future structural design classes such as Wood Structures and Steel Structures. A math test will be given prior to the first class to determine which students are required to attend a supplemental lecture class instructed by the teaching assistant. This course is a prerequisite for Steel Structures, Wood Structures, and Concrete Structures.

HIAA 0006. Wood Structures.
This course will review the fundamentals of wood in architecture with a focus on wood materials and construction systems and lumber and timber structural analysis and design. Work includes timber systems consisting of conventional framing trusses, laminates, built-up sections and connections. In addition, this course will review the principles of structural loads; gravity, lateral, live and dead. The concept of lateral resistance through standard wood framing systems will be explored. Manufactured lumber has become a major part of today’s wood construction industry and the design and detailing of these materials will be explored in depth.

HIAA 0007. Environmental Design II.
The study of basic concepts of Human Environmental Comforts. Inherent within ‘physio-environ’ considerations are principles of temperature, humidity, heat transfer, air movement, and hydrostatics. These principles will be studied in terms of their abstract physics and mathematics, through empirical benchmarking and as the basis for a design proposal that includes considerations of larger scale strategies as well as assemblies. Emphasis will be placed on the principles behind the technology, the behavioral characteristics and the qualities of the systems’ operation considered in making building design decisions.

Introduction to the global history of art, architecture and material culture from cave paintings to installation art. The course is both an historical survey as well as an analysis of case study examples. In addition to examining visual strategies of representation, the course explores the varied ways in which art shapes and reflects cultural, social, religious, and political concerns. Weekly one-hour conference required. Limited to 225. A

Western architecture and urbanism from classical antiquity through the eighteenth century: patterns of development; major architects and monuments; methods of interpretation. Does not presume previous knowledge or special skills. A

HIAA 0012. Theories of Architecture from Vitruvius to Venturi.
Theories and Design from Classicism to Postmodernism: An inquiry into the ways in which the nature of architecture has been thought, both inside the profession and outside, since Vitruvius first defined its study and practice as an "interdisciplinary discipline." The seminar will study selected texts and designs in the culture of western architecture from antiquity to the present. Drawn from works in architectural, social, political, and aesthetic theory the seminar will deepen our understanding of historical architecture and open up ways of interpreting contemporary design culture. A WRIT

HIAA 0013. Introduction to Indian Art.
This course presents aspects of Indian art over a period of 2,000 years, and introduces the art of Buddhism, Jainism, Hinduism, Islam, and colonial and post-colonial India. Emphasis is placed on characteristic features, functions and socio-political contexts of stupas, temples, mosques, churches, and other architectural sites as well as sculptures, painted manuscripts, paintings, and photography. A

HIAA 0021. Arts of Asia.
From sacrificial cauldrons to sunflower seeds, and Roman Buddhas to five-toed dragons, this course introduces the incredible diversity of traditions that collectively constitute the arts of Asia. Organized around a series of case studies of exemplary objects, the course explores the temporal, geographic, material, and thematic range of Asian art through the life stories of individual things. Tracing histories of human ingenuity and value, we will examine the ways these things changed the people who saw them and were themselves changed in the process of being seen. And we will come to know them through the ways they change us. WRIT
HIAA 0022. The Art of Enlightenment.
This course surveys the history of Buddhist art-making from the earliest representations of the Buddha to the curatorial practices of modern museums. Ranging from the great mandala of Borobudur in Java to the Zen monasteries of Japan, we will examine the complex ways in which theology and scripture interacted with the particularities of time and place in the long development of Buddhist art. Throughout these inquiries, the sensorial qualities of the art will remain at the forefront of our analysis. Together, we will explore the mechanisms by which artists transformed inert matter into powerful implements of the Buddhist dharma. WRIT

HIAA 0031. Pre-Islamic Empires of Iran.
Introduction to art and architecture of the Ancient Near Eastern empires that flourished between the 6th century BCE and the Islamic conquests of c. 630 CE. We will consider the material culture of the Achaemenids, Seleucids, Parthians, and Sasanians, empires that inhabited primarily the areas of Mesopotamia and the Persian plateau, but spread at times as far afield as the Mediterranean coast, Egypt, the Caucasus, and the Indus Valley. Lectures will prioritize close analysis of the most illuminating art and architecture, so that you leave the course knowing not only the material evidence but also current approaches to interpreting it. A WRIT

HIAA 0040. Introduction to Medieval Art and Architecture.
A comparative examination of the three artistic cultures of the medieval Mediterranean: Islam, the Byzantine empire, and the predominantly Christian regions of western Europe. Medieval Jewish art is also treated. Topics include medieval attitudes toward the use of images, the architecture of worship (churches, synagogues, and mosques), royal and domestic art, and instances of contact among all three cultures. Weekly one-hour conference required. A

HIAA 0041. The Architectures of Islam.
Through selected case study examples, the course examines the varied manifestations of Islamic architectures. The course spans fourteen centuries and three continents, and examines religious as well as secular buildings. We will trace the sources and 'invention' of Islamic architecture in the Umayyad dynasty of the seventh and eighth centuries, and will explore its varied manifestations up to the contemporary period. By examining cross-cultural and trans-regional interactions, we will also investigate the relationship between Islamic and non-Islamic architectural traditions. A WRIT

HIAA 0042. Islamic Art and Architecture.
The formation of an Islamic artistic expression in art and architecture and the regional manifestations of that art from central Asia and the Middle East to Sicily and Spain. Weekly one-hour conference required. A

HIAA 0061. Baroque.
The course surveys the visual culture of Rome from 1564-1700. During that time Rome became the center of Artistic change in Europe, the seat of the Counter-Reformation Catholic Church and the dominant source of classical learning. All media that participated in these historical developments are included: from papal urban plans to Bernini's fountains and Caravaggio's paintings. WRIT

HIAA 0062. The Age of Rubens and Rembrandt: Visual Culture of the Netherlands in the Seventeenth Century.
Survey the amazing art in Holland and Flanders that revolutionized all media. We will see how paintings, sculpture, and architecture formed the historical environment of life in the 17th-century Netherlands. The work of such artists as Rubens, Rembrandt, Van Dyck, and Vermeer is presented as part of this history of art in a "golden age." Weekly one-hour conference required. WRIT

This undergraduate lecture course traces the rise of American painting in the period from the Revolution to the dawn of modernism in the 20th century. Major figures, such as Thomas Cole, Frederick Church, Winslow Homer and Albert Pinkham Ryder, will be examined, as will significant movements, such as the Hudson River School and Tonalism. Discussion will help place American art within the context of history, the invention of national identity, and parallel developments in popular visual culture. Enrollment limited to 50.

Surveys stylistic developments, new building types, and the changing conditions of architectural production through the 19th century. Special emphasis placed on the social context in which buildings were designed and used. Weekly one-hour conference required. WRIT A

HIAA 0075. Introduction to the History of Art: Modern Photography.
This class will survey the history of photography as an art form and means of visual communication in the modern era. The photograph will be considered from both esthetic and social perspectives; photography's rise as a medium of personal expression will be examined, as will technology's role in the creation of new regimes of spectatorship, and the mass dissemination of visual information. The class follows the rise of photography's acceptance as an art form in the twentieth century, and culminates with its prominence within the phenomenon of postmodernism. Prior coursework in modern history or art history is helpful. Enrollment limited 80.

Over the long nineteenth century (1789-1900) revolutions replaced kings with citizens. Capitalist and colonial expansion mobilized armies, goods, and slaves across continents. New class and gender dynamics changed patterns of sociability. Technological innovations mass produced images and goods. In this course, we will discern such social and historical factors in Europe and across the globe alongside artistic ones to interrogate what makes art in this period irreplaceably modern. We will study the turbulence that has defined the century, including the art historical swings in style from Classicism to Romanticism to Impressionism, with care. Course includes visits and assignments in museums.

This undergraduate lecture course focuses on one building type, the house, through time in Mesopotamia, China, Japan, the Islamic world, the African diaspora, India, Britain, Rhode Island, and Germany and France. Houses can be minute or monumental, vernacular or high art, provide minimal shelter or afford the material and psychic satisfaction of home. By studying houses, we can bypass some of architectural history’s biases, and explore some of the major debates in the discipline: What is architecture? Who determines what is included/excluded in this category? And on what basis do they make these claims? WRIT A

HIAA 0089. Contemporary Photography.
This course surveys the rise of photography in the art world in the period after 1960. It examines both the development of photography as an independent medium and the appropriation of lens-based imagery by Pop Art, conceptual art, minimalism, and eventually Postmodernism.

HIAA 0321. Toward a Global Late Antiquity:200-800 CE.
Competing empires, the division of the eastern and western halves of Roman territory; long distance trade, the rise of monotheism, the spread of Buddhism: how did these factors affect the art and architecture associated with the Roman west, Constantinople, Ctesiphon, Alexandria, the Han Dynasty capitals, and Gandhara? This course takes an expanded view of Late Antiquity, extending beyond typical that associate the period with the post-classical west, to explore the dynamic creativity and intercultural connectivity of an era once considered a “Dark Age” in a world history.

HIAA 0340. Roman Art and Architecture: From Julius Caesar to Hadrian.
An introduction to the major monuments in Roman art at the point when the Empire emerged up to the time of the creation of the Pantheon. No prior background required. A

No description available. A

HIAA 0440. Gothic Art and Architecture.
Examines Gothic art and architecture to explore its sources and "invention" in mid-12th-century France and to trace its varied manifestations in European art to the 16th century. Special attention is given to cathedral architecture and decoration. Weekly one-hour conference required. A
HIAA 0460. Muslims, Jews and Christians in Medieval Iberia. The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian churches, Islamic mosques and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. For almost eight centuries (711-1492) writers, scholars and artists emerged from a cultural environment of intellectual borrowing nurtured by uninterrupted contact through marriage, conversion, commerce and travel. This convivencia of Jews, Muslims and Christians will be examined from the perspectives of literature, music, art, architecture, archaeology, and history. WRIT FY S

HIAA 0550. Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany. Examines the paintings, sculpture, graphic art, and architecture of Tuscany in the 15th century, primarily in Florence but also venturing into Siena, Arezzo, Borgo San Sepolcro. Using Renaissance critical terms and analytical tools, we take into account the technical and commercial habits of craftspeople, the economy of the cities and towns, and the forms and functions of art in domestic, civic, and religious spheres. Weekly one-hour conference required. WRIT A

HIAA 0560. Popes and Pilgrims in Renaissance Rome. Examines Renaissance Roman painting, sculpture, and architecture in the context of the unique urban character of the city: site of antique myth, religious pilgrimage, and a cosmopolitan court. Beginning with Filarete and Fra Angelico, we move through the Renaissance (Michelangelo and Raphael), looking at the formation of artists’ workshops and academies, ending with the urbanization programs of Sixtus V. WRIT A

HIAA 0570. The Renaissance Embodied. Renaissance depictions of the body range from muscularized, idealized nudes to decaying, but ambulatory, corpses. Artists dissected human cadavers and, for the first time since antiquity, reflected the use of living models in their workshops and studios. In this course, we examine art that embodied power and sexuality, death and disease, the divine and demonic, the marginalized and the fantastic. We consider a diverse set of bodies as they were represented in paintings, sculpture, drawings, decorative arts and prints in relation to contemporary religious, political and social concerns.

HIAA 0580. Word, Image and Power in Renaissance Italy. This class is designed to introduce cultural and historical perspectives on Italy from Siena in the Middle Ages to Venice in the High Renaissance. Taught by professors of Italian Literature, Art History and History, we will move across Italy and the centuries focusing on monuments of literature, art, architecture, and history through different disciplinary lenses. WRIT A

HIAA 0600. From Van Eyck to Bruegel. Artists of Flanders and Holland effected a revolution in the techniques and subjects of painting during the 15th and 16th Centuries. This course explores the roots of artistic change in religion, urban history, politics, Italian humanism, economics, and craft traditions. The focus is on the great works of such artists as Jan van Eyck, Hieronymus Bosch, and Pieter Bruegel the Elder.

HIAA 0630. Cultural History of the Netherlands in a Golden Age and a Global Age. Between 1580 and 1690 two nations emerged in Europe from what had been one unified region. To the north, the Dutch Republic gained its independence from Spain and developed as a bastion of liberty, ideas in fermentation, visual arts, Calvinist faith, science, technology, and global economic reach. To the south, the "loyal" Netherlands, now Belgium, returned to the Spanish and Catholic fold, but sustained its leading position in the art, competed in global trade, and negotiated a new compromise of government. In this course we present an interdisciplinary, comparative view of the "two" Netherlands and their legacy in the world. WRIT A

HIAA 0660. Giotto to Watteau: Introduction to the Art of Europe from Renaissance to French Revolution. Giotto to Watteau introduces the great works of European art from the Renaissance to French Revolution. What ideas and forms enabled artists such as Leonardo da Vinci, Hieronymus Bosch, El Greco, Caravaggio, and Rembrandt to transform the visual world so profoundly that their innovations still radiate onwards through history into the present? What are the best terms and concepts to describe and understand the new styles that developed between 1300 and 1800? Lectures, discussion, reading, and direct looking consider these questions in a way that works for students at an introductory level.

HIAA 0701. The Other History of Modern Architecture. This lecture course presents modern architecture as the product of the cultural, technological, political, and intellectual developments associated with capitalist expansion across the globe. By exploring the trans-Atlantic slave trade and its effects on Western industrialization, European Jesuit gardeners in China, modernization efforts in 19th century Turkey and Japan, and tropical climate and colonial policy in India, Nigeria, and other global sites; the course will expose students to the "99 percent" who are frequently excluded from discussions about modern architecture, but whose labor and cultural traditions were crucial to the heroic modernism of the West. WRIT A

HIAA 0710. Architecture and Urbanism of the African Diaspora. This lecture course introduces the built environments in and of "Africa," from the earliest known examples to the contemporary moment. Through a consideration of texts and images, we will interrogate "Africa" as both a construct and concrete geographical entity characterized by diverse cultures, contexts, and histories. In addition to exploring the content of various architectural and urban traditions, we will approach our topic from the point of view of the theoretical paradigms that have governed the historiographical interpretation of particular periods, regions, and cultures. Readings will be arranged thematically and according to chronology and geography. Weekly one-hour section required. A DPLL WRIT

HIAA 0770. African American and Caribbean Architectures: Domestic Space. This course explores domestic landscapes occupied by African-Americans between the earliest years of slavery and the Second World War. We will examine some of the most common housing forms that diasporic Africans inhabited during those years—plantation slave quarters, tenant shacks, and urban tenements, to name a few. Our premise is that study of domestic life can reveal how political, economic, and social forces inform everyday life. The goals of the class are twofold: to improve our understanding of the social history of diasporic Africans and to develop sensitivity to the study of ordinary, everyday landscapes— or "vernacular architecture." WRIT A

HIAA 0801. Art After '68. The tumultuous social unrest of the 1960s was concretized in a worldwide succession of civic revolts in 1968. Throughout this period, art was an organizing tool for various political events. In turn, the concept of 1968 generated an aesthetic response that supported, documented and historicized the period. This course will examine the art and new art forms created in the wake of 1968. We will also look closely at the strategies of contemporary art making that are influenced by the spirit of 1968. WRIT A

HIAA 0810. 20th Century Sculpture. Writing in 1937, sculptor Naum Gabo posed the question, “What are the characteristics which make a work of art a sculpture?” Gabo’s question has a general resonance for the entirety of the twentieth century, where the medium of sculpture formed many of the significant debates within art. This lecture course is a survey of sculpture in the twentieth century. We will examine the medium through its definitions, material (metal, paper, plastic, stone, wood, etc.), methods (carving, casting, modeling, welding, etc.), practitioners, movements, theories and related practices, like architecture. WRIT
HIAA 0820. Art and Technology from Futurism to Hacktivism.
This course will introduce students to the central role of technological media in art of the twentieth and twenty-first centuries. From telephones to computers, the Sony Portapak to the Internet, artists have creatively engaged technology to transform how their art was made, circulated, and received. We will pay equal attention to technology as a medium and the ways artists responded to broader technological change. Looking at works from Europe, the Americas, and Japan, we will interrogate the varying social conditions and political motivations that drove artists to use technology in order to radically change the making and meaning of art.

HIAA 0830. Revolutionary Forms: 100 Years of Art and Politics in Latin America.
This course surveys Latin American art within the context of socio-political and intellectual concerns in the region. We will consider a wide variety of media with an eye to local and global events that prompted their production. We will examine how artworks embodied, challenged, and helped to shape history. We will survey major trends in art production: from photography during the Mexican Revolution to participatory and activist art in the beginning of the 21st century. Students will acquire visual and critical analysis skills in order to actively engage with their visual surroundings. Previous knowledge of art history is not required.

HIAA 0840. History of Rhode Island Architecture.
This course examines the historical development of architecture and building in Rhode Island within the larger context of colonial and national trends and with a focus on important manifestations of a distinct regional identity. Emphasis will be placed on stylistic developments, new building types and technologies, and the social and economic influences on the creation of the built environment.

HIAA 0850. Modern Architecture.
The "classic" period of European and American modern architecture from the turn of the century to the 1950s. Presents both the established canon of masterpieces by among many others, Frank Lloyd Wright, Mies van der Rohe, and LeCorbusier, and counterbalances this approach with information about new building materials, changing conditions of architectural production, and the "mechanisms of fame." A

HIAA 0860. Contemporary Architecture.
Stylistic, technological, and theoretical developments in architecture from the 1960s to the present. Analyzes movements such as "Brutalism," "Postmodernism," and "Deconstruction" and works by architects such as Frank Gehry, I. M. Pei, and Zaha Hadid. Emphasizes the complex conditions of architectural production in different parts of the world. Complements HIAA 0850, but may be taken independently. A WRIT

HIAA 0861. City and Cinema.
An examination of the mutual influence between two of the major art forms of the 20th century: film and architecture. Concentrates on European and American film sets throughout the 20th century and explores their formal and iconographical sources in contemporary architectural discourse. Presentation and examination of sketches, paintings, still photographs, and film clips as well as writings by directors, set designers, critics, and architects (Eisenstein, Reimann, Kracauer, Bunuel and many others). A

HIAA 0870. 20th Century British Art: Edwardian to Contemporary.
The field of British art offers a wide view onto the history of art and aesthetics. This survey of British art in the twentieth century will examine the nation's art, artists, and art movements alongside its current events. Readings will be drawn from periodicals, primary documents (artist's letters and manifestos) and secondary texts (Alloway, Hall, Read and others). Architecture, literature (Martin Amis, Joseph Conrad, Lynton Kwesi Johnson and others) and music will be considered throughout the course. WRIT

HIAA 0881. City and Cinema.
An examination of the mutual influence between two of the major art forms of the 20th century: film and architecture. Concentrates on European and American film sets throughout the 20th century and explores their formal and iconographical sources in contemporary architectural discourse. Presentation and examination of sketches, paintings, still photographs, and film clips as well as writings by directors, set designers, critics, and architects (Eisenstein, Reimann, Kracauer, Bunuel and many others). A

HIAA 0931. Eco-aesthetics.
This course examines a movement in contemporary art and visual culture – termed "eco-aesthetics" – that works to raise awareness of global climate change and to resist forces of environmental degradation. We will begin by tracing a history of emerging artistic-ecological consciousness in the US and Europe in the 1960s and 70s, and then take a more global, interdisciplinary look at shifting methods of photographic, filmic, and new media documentation and representations of a "post-natural" landscape in the Anthropocene Age. We will analyze collective eco-aesthetic activism in the 21st century, exploring artistic collaborations in various local, regional, and global contexts. WRIT

HIAA 1020. Topics in East Asian Art.
Topics in East Asian Art. Topics will be listed separately. WRIT

HIAA 1090. Writing About the Arts.
Writing is a critical skill for those who engage in the practice of art history, art criticism, and art theory. This writing-intensive workshop/seminar will offer students the opportunity to encounter various kinds of art in various real-world settings, then write about them. Different genres of art writing will be explored (reviews, museum wall texts, scholarly analyses, etc.) and, through frequent short assignments, participants will be learn to write with greater clarity, precision, and organization. Readings will explore the problems entailed in art historical description and what happens when visual ideas become texts. WRIT

HIAA 1101. Introduction to Architectural Design Studio.
Introduces students to basic tools and strategies in architectural design. A number of exercises will introduce students to questions about form, function and structure and teach them to learn from close observation of the built environment. The second half of the semester is devoted to the design of a small house by each student, which will be presented in a scale model and a full set of drawings at the end of the semester. A jury of invited architects and professors will conduct a discussion of each project. Enrollment limited to 12. Instructor permission required.

HIAA 1101A. Illustrating Knowledge.
This seminar will investigate the history of illustration from the first manuscript maps and printed herbals to the present, including paintings, photographs, and computer imaging. We will investigate the role of pictures in the exchange of scientific ideas, and modes of representation developed in both the arts and the sciences. Enrollment limited to 20 first year students. FYS WRIT

HIAA 1101B. Seeing and Writing on Contemporary Arts.
The purpose of this writing intensive seminar (especially designed for freshmen) is to train the students in both seeing and writing on contemporary art. The class will be based on looking at specific works of art of the twentieth century in museum context (using nearby collections, notably) and on how to translate visual observations into analytical and critical writing. FYS WRIT

HIAA 1102. Architectural Drawing and Sketching.
There are two primary objectives for architectural drawing and sketching. First, it is a tool to record and document visual encounters with natural and man-made environments, artifacts and buildings. Second, it is the ability to transmit thoughts and ideas on paper (or the tablet). It is the initial spontaneous recording of the creative act in progress.

HIAA 1103. Introduction to Architectural Design.
From tectonics and program to aesthetics and theory, architecture is regulated by a complex set of interlocking priorities that can shift radically from one project to another. Architectural design is the process by which architects bring clarity, order and meaning to this complexity. It is laborious, uniquely fulfilling, and can be learned only through doing. Unlike classroom instruction, studio education is based not in didact but in dialogue. Its aim is to develop in each student the concepts, methods and skills necessary to create and successfully communicate their designs. Studio requires an active approach to learning, a high degree of motivation and self-discipline.
HIAA 1105. Otherworldly and Other Worlds: Representing the Unseen in Early Modern Europe
This course will examine European beliefs about vampires, witches, angels, demons, "monstrous races" and other enchanted and unseen beings between 1500-1800—the era of the famous witch hunts and a period of confrontation between belief and disbelief about these figures. Spurred by new instruments like the telescope, new technologies in printing and cartography, and unprecedented travel across the globe, knowledge about the universe increasingly expanded in this period to incorporate new discoveries and observations. Close analysis of several case studies will highlight how dramatic debates about these creatures played out in visual form in early modern Europe. FYS WRIT

HIAA 1120B. History of Urbanism, 1300-1700.
Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g. the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g. fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required.

HIAA 1120C. History of Western European Urbanism 1200-1600.
Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g. the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g. fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required.

HIAA 1150C. El Greco and Velázquez.
This course will study the great Spanish artists El Greco and Velázquez in relation to the major developments in 16th- and 17th-century European painting and in the context of the social, political, and intellectual concerns of Habsburg Spain, as well as the particular cultural milieu in which they each worked. We will trace El Greco's career from his native Crete to Venice and Rome and finally to Toledo, and Velázquez's from the commercial metropolis of Seville to the court in Madrid. In addition, we will examine their modern reception by art historians, artists, and collectors in Spain and beyond.

HIAA 1150D. El Greco and the Golden Age of Spanish Painting.
This seminar examines the career of the Greek painter from Crete known as El Greco in Spain where he worked in the late sixteenth and early seventeenth centuries. Emphasis will be given to the interaction of various European traditions in the culture of Counter Reformation Europe. Weekly readings and discussion and individual projects required. Enrollment limited to 25 students.

HIAA 1170B. Twentieth-Century American Painting.
HIAA 0800 is a suggested prerequisite. Weekly one-hour section required.

HIAA 1181. Prefabrication and Architecture.
Architects have been captivated by prefabrication since the Industrial Revolution revealed the benefits of mechanized human labor. This undergraduate project seminar will examine the provenance and relevance of prefabrication. We will consider the prefabricated traditions of Africa and Asia as the foundation for the discipline of "vernacular architecture"; and conceptualize prefab as a technology of colonial expansion, solution to the postwar housing crisis, expression of 1960s counterculture, and response to climate change. Case studies will be drawn from Africa, Australia, Asia, Europe, and North America. A WRIT

HIAA 1182. Spaces and Institutions of Modernity.
This undergraduate seminar will explore canonical and emerging theories of modernity as they intersect with our understanding of space and the role of the built environment and designed objects within it. The seminar will be organized as a series of case studies of the iconic sites and institutions of modernity (the metropolis, the world's fair, the museum, the prison) as well as others that have also come to exemplify it (the ship, the plantation, the railroad, the colony). Class time will include analysis of primary documents and field trips to local sites.

HIAA 1200A. Ancient Art in the RISD Collection.
The RISD Museum's ancient collection will be studied firsthand and in light of recent scholarship in Greek and Roman art and archaeology. Using the collection as a springboard, the course will explore original contexts for museum objects; issues of cultural property and museum ethics; conservation, restoration and display in museums; and notions of historical interpretation in museum display.

HIAA 1200D. Pompeii.
Pompeii and its neighboring towns are the best examples for studying the life, art, and architecture of a Roman town. This seminar covers the works of art and the life in the town as reflected in the monuments excavated over the past 250 years. Instructor permission required. A WRIT

How did the tenor of the individual brushstroke become the locus of value in traditional Chinese painting? What other possible standards of excellence—such as verismimilete—were displaced in the process? This course pursues these questions by analyzing the great monuments of Chinese painting from the perspective of the aesthetic debates that defined them over the centuries. Proceeding from the famous Six Laws of Painting down to the aesthetic watershed of the Northern and Southern Schools, the course traces the fraught interplay of artistic practice and critical judgment in China over more than a thousand years. No prior knowledge required. WRIT

HIAA 1300. Topics in Classical Art and Architecture.
No description available. Topic courses listed separately. WRIT

HIAA 1301. The Palaces of Ancient Rome.
This seminar addresses the palatial art and architecture of the ancient Roman Empire. Key themes include the architectural articulation of political power; the role of international relations in expressing cultural power; the interplay of influence among palaces and villas; the art of adornment, luxury, and collecting; the interaction of architecture and landscape, including interior gardens and urban environments; the critical analysis of archaeological evidence, reconstruction, and legacy. A WRIT

HIAA 1302. Women and Families in the Ancient Mediterranean.
What was life like for the women of the ancient Mediterranean? What rights, roles, responsibilities, and expectations defined their lives? Why is the examination of art and architecture such an important source for answering these questions? This course will provide a comparative perspective exploring Greek, Etruscan, and Roman case studies. WRIT

HIAA 1303. Pompeii: Art, Architecture, and Archaeology in the Lost City.
Buried by the eruption of Vesuvius in 79 CE, Pompeii stands as a time capsule of city life in the Roman Empire of the 1st century. Exploring the city's grand public baths, theaters, and amphitheaters, its seedy bars and businesses, its temples for Roman and foreign gods, and its lavishly decorated townhomes and villas, this seminar will reconstruct a panoramic view of Roman daily life and consider the Vesuvian region's modern reception since its rediscovery in the 18th century. A WRIT

HIAA 1304. Spectacle! Games, Gladiators, Performance, and Ceremony in the Roman World.
Theaters, amphitheaters, baths, circuses, and imperial residences pepper the former territory of the Roman Empire. Modern films conjure the fantastic, yet ephemeral, events of days long past, amplifying the fascination of these ubiquitous ruins. For the Romans, however, spectacle was not only about fun and games. What really took place in these spaces, and why? Learn to separate fact from fiction as we consider artistic, architectural, and archaeological evidence to understand how and why spectacles were fundamental to Roman daily life. WRIT

HIAA 1305. Pre-Columbian Art + Architecture.
Survey of ancient art and building in ancient America, with a focus on Mexico, Central America, and the Andes. Underlying concepts include: meaning and method, cosmos and kingship, narrative and symbol, personality and authorship, empire and royal court. Rich collections of the Haffenreffer museum will form the focus of work in the class. WRIT DPPL

HIAA 1310. Topics in Hellenistic Art.
Topics course. Topics listed separately. WRIT
Interested students must register for GNSS 1960X.

HIAA 1400F. Research Seminar Gothic Art.
No description available. WRIT

This course focuses on architecture, manuscript paintings, and decorative arts produced under the patronage of Islamic rulers, who dominated the Indian subcontinent between 1192 and 1858. The class will examine works of art as instruments in the process of establishing an empire as well as expressions of political and religious power. A

HIAA 1410B. Painting in Mughal India 1550-1650.
The Mughal (Muslim) rulers of north India in the sixteenth and seventeenth centuries presided over what was then the richest, most cosmopolitan culture in the world. The earliest rulers were open-minded and intellectually voracious; they brought together Persian, Turkish, and a variety of indigenous Indian traditions to create a distinctive new way of representing and living in the world. This cultural interaction, and the important role played by Portuguese missionaries and English traders, will be the focus of this seminar.

HIAA 1430A. The Visual Culture of Medieval Women.
Considers women as patrons and producers of medieval art and architecture, and examines the imaging of women in medieval works of art. Topics include: feminist perspectives in medieval history and art history, patronage by royal and aristocratic women, costume and textile production, and the art and architecture of female monastic communities. Optional FLAC French conference offered.

HIAA 1440B. Architecture of Solitude: The Medieval Monastery.
Religious men and women, as well as their patrons, sought to establish places of devotion and learning across the medieval landscape. This course examines the rise and development of the medieval monastery from its late antique beginnings in the deserts of Africa to the rise of the preaching orders in early thirteenth-century Europe. Emphasis will be placed upon the material expressions of western monasticism and upon the notion of the monastery as an architectural, archaeological and historical research problem through examination of individual case study examples. Instructor permission required. Enrollment limited to 12. A

HIAA 1440D. The Gothic Cathedral.

HIAA 1440F. Architectural Reuse: The Appropriation of the Past.
This seminar will consider the survival, revival and adaptive reuse of older objects, texts and built spaces in the visual and material culture of successor cultures. We will look critically at the literature on the archaeology of memory, “Renaissance and revival” spolia studies and adaptive reuse. The seminar will examine selected case studies, including the reuse of sculptural elements in the Arch of Constantine, the conversion of Pantheon into a church and Hagia Sophia into a mosque, appropriated elements in the Qub mosque in Delhi and the adaptation of the Bankside Power Station as the Tate Gallery. WRIT

HIAA 1460. Topics in Medieval Archaeology.
No description available.

HIAA 1550A. Prints and Everyday Life in Early Modern Europe.
Uses the resources of the RISD Museum in graphics and decorative arts (weaponry, embroidery, textiles, and ceramics) from the early modern period. Examines the use of ornament and mythological and sacred themes as they relate to crafts and the transmission of culture, focusing on the making, distribution, materiality, and histories of objects of everyday life. WRIT

This course looks at the printed festival books made for recording ideal versions of royal entries, funerals, weddings and other printed expressions of regal celebration, alongside printed, painted and otherwise recorded evidence of popular celebrations such as carnival, and civic and religious festivals such as the Sienese palio. Although beginning with circulated prints and books, we will also look at the material culture of these events in their widest sense to investigate the advertisement and control of festival cultures. The class will focus on early modern Italy but students are welcome to broaden our geographic horizons. Enrollment limited to 20.

HIAA 1550C. Dreaming of Food in the Early Modern World.
Floods, wars, trade, climate change, class distinctions, carnivals and public feasts kept food at the forefront of the early modern imagination. Focusing on Italy, but including its global connections, we will look at the cultures of food as the material of art and literature in markets, vineyards, courts, recipe books, medicine, kitchens, and the dreams of the hungry. Investigating the cultivation, presentation and consumption of food through related arts and the evolution of manners allows us to consider the design of tableware, food sculpture, and tapestries alongside more canonical arts. Some previous art history required, languages helpful. Upperclass seminar. WRIT

HIAA 1560A. Italy and the Mediterranean.
Sicily, Venice, and Rome were Medieval and Renaissance international centers whose populations of pilgrims, traders, soldiers, and diplomats occasioned opportunities for cultural cooperation and violence between East and West. We will study mosaics and architecture of the multi-ethnic Norman rule following the Islamic conquest of Sicily; Venetian relations with the Ottoman Empire and its Greek colonies in goods, painting styles, architecture and atlases; and in Rome obsessions with Egyptian engineering, the vitality of Arabic studies, and reports of travelers resulting from papal efforts to incorporate Eastern Christians under the umbrella of the Roman church. Enrollment limited to 20 juniors and seniors. WRIT

HIAA 1560B. Manierism.
This class provides an opportunity to study courtly painting, sculpture, prints, drawing and architecture of the movement that became known as Manierism. The material will focus most strongly on the art of Florence and Rome, but we will also be looking at France and Bohemia, and at the history, literature and literature of art of those centers. WRIT

HIAA 1560C. Renaissance Venice and the Veneto.
This course explores the visual culture, theater, ritual, architecture, and urban development of Venice and the Veneto from the late medieval period through the 16th century, tracing the development of painting, sculpture, architecture and a literature of art within the city’s unique physical configuration and relationship with the East. For advanced students, written permission required and given at first meeting. A WRIT

HIAA 1560D. Siena from Simone Martini to Beccafumi.
This course will focus on the art and architecture of republican Siena over the 250 year period before its annexation to Tuscany in 1555. We will study the relationships between piety, work, and politics in a rich period of building and decorating that has determined the look and, to an extent, the culture of the city until the present day. WRIT

HIAA 1560E. The Arts of Renaissance Courts.
Courts were active patronage centers in the areas of secular and religious painting, sculpture and architecture, book illumination, rich narrative textiles for interior use and ornamental ones for costume, as well as ephemeral works for theatrical productions, triumphal entries and festivities. Artists working at court were able to ignore guild regulations, and acquired a status for themselves that set them apart from other urban practitioners. Centering our investigation on primary sources as far as possible, we will study a wide range of works, materials, ideologies and practices that contributed to the reputation of the Italian courts as centers of opulence and power. Final project and weekly class meetings required. Enrollment limited to 20. Instructor permission required. WRIT
HIAA 1560F. Topics in Italian Visual Culture: The Visible City, 1400-1800.
We will look at the image of the city in all media, attending to the contexts in which they are illustrated, the technologies of representation and the reasons for imagining cities, taking into account iconic and symbolic representations, personifications, maps and views, and comparing visual and textual descriptions of the places of early modern urban life. Prerequisite: HIAA 0010 or 0500.

HIAA 1600A. Bosch and Bruegel: Art Turns the World Upside Down.
An in-depth look at the work of these two enigmatic Netherlandish artists. After seeing how art history uses various methods to establish what they actually painted and drew, we will move outwards to interpretation and historical study of their images of comedy, proverb, religion, and landscape. Artworks in local museums will be important focuses of discussion. Prerequisite: HIAA 0010 or 0500.

HIAA 1600B. Caravaggio.
Caravaggio is one of the great revolutionary artists and a real cultural phenomenon in his own time and ours. This seminar considers in-depth the nature of his work, the different historical strategies used to explain it, and possible new approaches. Prerequisites: HIAA 0010 or HIAA courses in early modern art.

HIAA 1600C. Italian Baroque Painting and Sculpture.
Examines developments in painting and sculpture in 17th century Italy with focus on the impact of the Catholic church and the rediscovery of antiquity on church and palace decoration, public and private commissions, and the rhetoric of Baroque style and iconography. Study of individual artists, including Caravaggio, Artemisia Gentileschi, and Gian Lorenzo Bernini, as well as art communities, the mechanics of patronage and writings about art and artists.

HIAA 1600D. The Art of Peter Paul Rubens.
The seminar will study the seminal work of Rubens in all its aspects.

HIAA 1600E. The World Turned Upside Down.
Seminar examining the comic and satirical traditions in Netherlandish art, including works by Hieronymus Bosch, Pieter Bruegel the Elder, Adriaen Brouwer, and Jan Steen. How do visual images connect with writers such as Erasmus and Rabelais, with polemical satires of the Reformation, and with popular literature along the lines Renard the Fox. What historical developments were at play in the formation of comic stereotypes and the representation of charged events such as the celebration of carnival?

HIAA 1600F. Antwerp: Art and Urban History.
No description available.

HIAA 1600G. Art + Religion in Early Modern Europe.
In this seminar we will reconstruct the various ways in which visual communication participated in the practice and changes of religious life during the early modern period (1400-1800). Topics will range from the role played by prints in the spread of the Reformation to the design of new kinds of architecture for the implementation of the Catholic Counter Reformation. Close attention will be given to the significance of iconoclasm (destruction of images), ideals of visual communication for religious persuasion, the invention of new methods of meditation with visual focus, and the relationship between sacred words and images. Enrollment limited to 20.

HIAA 1600H. Comedy in Netherlandish Art From Hieronymus Bosch to Jan Steen.
No description available.

HIAA 1600I. Collections and Visual Knowledge in Early Modern Europe: 1400-1800.
Examines the ways in which collections organized and developed new kinds of knowledge and practices. Collections were decisive in the formation of art, history, science, religion, politics, and international relations. We will discuss the rationales behind these different kinds of collections, the order in which things were placed, the visual organization and architecture that created the first museums, and the economics of collections. Attention to the collections of kings, artists, natural scientists, middle class citizens, humanists, and the devout will provide examples from a wide variety of perspectives. Enrollment limited to 20.

HIAA 1600J. Rembrandt.
This seminar will concentrate on art of Rembrandt. We will study his technique, development, and varied subject matter in all media from drawings to etchings and paintings. Rembrandt’s work will be related to the historical contexts in which it was created and displayed. Prerequisite: previous courses in History of Art and Architecture. Enrollment limited to 20.

About Face: English Portraiture, 1660-1800: This course will consider the function and meaning of portraiture in England from Sir Peter Lely’s ‘Beauties’ of Charles II to James Gillray’s social and political satires. We will pay particular attention to the interrelationships between official portraiture and unofficial forms such as caricature.

HIAA 1650B. Visualizing Revolutionary Bodies 1785-1815.
The French Revolution was accompanied by crisis in representation that was both political and cultural. This seminar will examine the problem of how artists and their publics sought to image, or literally to “embody” new forms of individual and communal identity in painting, prints, public festivals, and sculpture. Students will be encouraged to draw on the resources of the John Hay Library, the RISD museum, and other local museums and archives for their research projects.

HIAA 1650C. Visual Culture and the Production of Identity in the Atlantic World, 1700-1815.
This seminar will examine the production, reception and circulation of visual culture within the vortex of the 18th century Atlantic world (including such sites as Britain, France, colonial America, Mexico and the Caribbean). Enrollment limit 20.

HIAA 1650D. Souvenirs: Remembering the Pleasures and Perils of the Grand Tour.
Examines visual image and objects, ranging from portraits, landscape watercolors and graphic satires, to corks models of antiquities, which served to remind and remake travelers’ ideas of Italy and other sites on the eighteenth century Grand Tour of the European continent. We will examine the role of anxiety, laughter, pleasure and danger in a rite of passage that was designed to elevate and educate young men, artists, and increasingly, women and men from the middling orders. Enrollment limited to 20. WRIT

Examines forms of visual culture—paintings, prints, photographs, sculpture—that participate in the formation of racial, social, and national identity in the U.S. from c. 1776-1930. Focuses on how visual culture figured African and African Americans in their interrelationships with each other and with other social groups in the U.S. WRIT

HIAA 1770. Architecture and Visual Culture of Empire.
This combined undergraduate and graduate seminar examines important urban and architectural concepts and practices that accompanied the expansion of colonial rule across much of the world during the 19th and 20th centuries. Topics to be considered include: how early cultural encounters prefigured later representations of colonizing/colonized communities and their corresponding material cultures; colonial spatial orders and their implied relationship to forms of governance; debates on colonial domesticity and the proper arrangement of the home; and post-colonial architectural developments that grew out of the historical experience of de-colonization. We will consider primarily territories formerly under British, French, and German rule. WRIT A

HIAA 1810. Contemporary Art and Activism.
This seminar will trace the ways that art has been conceived as a form of political activism since 1989. We will analyze strategies such as social practice, relational aesthetics, new genre public art, tactical media, critical geography, useful art, and the interactions among artists and Occupy. Emphasis will be on these recurrent issues: the relationship between aesthetics and politics, conceptions of community and the public, and the practical aims of art, both intended and actual. Close readings, class discussion, and weekly response papers will culminate in a final research paper interrogating the political implications of a single artist or artwork. WRIT
HIAA 1850A. Frank Lloyd Wright.
Seminar concentrating on the architecture of Frank Lloyd Wright—usually considered the most important architect in American history—and the critical discourse surrounding it. Selected scholarship serves as a paradigm for broader discussions about the history, contemporary roles, and shortcomings of architectural criticism and historiography. Examines the Frank Lloyd Wright Foundation's approach to critical scholarship and the commercialization of Wright's oeuvre.

HIAA 1850D. Film Architecture.
Since the 1920s, a far-reaching discussion about the mutual influence between the two most important art forms of the 20th century—film and architecture—has engaged set designers, architects, cinematographers and critics. Apart from a fascination with the impact that the techniques of the new medium, such as montage, slow motion, close-ups and camera movements, would have on the perception and presentation of architecture, there continuously has been an enormous interest in the potential of film sets as a realm where visionary, historic, mystical or psychological space could be developed. This seminar will study selected chapters in the history of cinematic set design through the twentieth century and examine masterpieces, major movements, protagonists, and crucial theoretical debates. In addition, the course looks at the depiction of the city through film and the role of the movies as a reflection, commentary, and experimental laboratory for contemporary architecture. A

HIAA 1850E. Architecture, Light and Urban Screens.
This seminar explores the history, theory, and practice of architectural illumination and the notion of electric light as a "building material." We will also consider the current interest in urban screens and media facades. The course will follow a historic trajectory from ca. 1900 to the present and will introduce the students to the most important techniques, protagonists and critical debates over the past 100 years. We will critically examine the broader implications of lighting design, the tension between luminous advertising and architectural illumination, the relationship to stage lighting, the implications of a "nocturnal modernity" and the use of light for propaganda purposes. Enrollment limited to 20. Instructor permission required. A

Examines the history of American urban planning from the canonization of the modernist tradition following WWII to its effect on urbanism over the remainder of the twentieth century. We will examine the influence of the modernist tradition on major urban processes of the time period, including urban renewal, sprawl, suburbanization, and downtown revival. The class considers how modernism was received and will include discussion on postmodern urban analysis and contemporary approaches to green planning. No prerequisites, but prior courses in twentieth century architecture, art, or visual culture will be helpful. Enrollment limited to 20. Instructor permission required. A

HIAA 1850H. Berlin: Architecture, Politics and Memory.
This course deals with the architecture and urbanism of the German capital and the way the city's traditions of commemoration in different phases of its history and under different political regimes. Students will research historic structures and sites of the 19th through 21st Centuries and engage with the intense German debate about historic preservation and commemoration. Depending on the approval of a GELT grant, one section of the course will be taught in Berlin during spring break. There we would meet with local architects, politicians and artists to discuss the city's engagement with its dramatic past. A WRIT

HIAA 1870. Cannibalism, Inversion, and Hybridity: Creative Disobedience in the Americas.
This seminar examines how artists and intellectuals have depicted, constructed, and deified the notion of “America”. While focusing on Latin America in the 20th and 21st centuries, we will also consider Chicano/a artistic production in the U.S. We will look at a series of concepts—cultural cannibalism, inversion, hybridity, in-betweeness, and tropicality—that shape our present understanding of the continent and subvert the legacy of colonialism and imperialism. This seminar considers these terms as current theoretical modes of inquiry and as recurring themes in cultural production, including literature and the visual arts. WRIT DPLL

HIAA 1870B. SoCal: Art in Los Angeles, 1945 to the Present.
Recent exhibitions, scholarship and media have turned to Los Angeles as a site of exploration of both American art and the larger frameworks of the Americas and international contemporary art. The character of media is directly connected to the circumstances of Los Angeles as a creative community built around an industry of visuality (film). This undergraduate seminar will examine postwar architecture, exhibitions, installation, land art, painting, performance, photography, public art and sculpture in Los Angeles and its impact on art history. This course may be open to a limited number of graduate students. WRIT

HIAA 1890E. SoCal: Art in Los Angeles, 1945-Present.
Recent exhibitions, scholarship and media have turned to Los Angeles as a site of exploration of both American art and the larger frameworks of the Americas and International contemporary art. The character of media is directly connected to the circumstances of LA as a creative community built around an industry of visuality (film). This UG seminar will examine postwar architecture, exhibitions installation, land art, painting, performance, photography, public art and sculpture in LA and its impact on art history. This course may be open to a limited number of graduate students. WRIT

HIAA 1890G. Contemporary Art of Africa and the Diaspora.
Will explore the art of contemporary Africa and its diaspora with an eye towards understanding the political and economic context in which it is produced and consumed. Our approach will be interdisciplinary, putting key theoretical texts from anthropology on the political economy of Africa in dialog with the works of contemporary artists. However, the intent here is not to reduce creativity to an economic activity alone, though we will be addressing the topic of art markets. Rather, we will explore artistic practices that surmount “the tyranny of the ‘already,’” as Malian writers Konate and Savane have eloquently said. Enrollment limited to 20 juniors, seniors, and graduate students.

HIAA 1910A. Providence Architecture.
Seminar examining selected aspects of the architecture of downtown Providence from the late 19th century to the present. Projects require research at local archives, libraries, and architectural drawings collections. Instructor permission required. A

HIAA 1910B. Project Seminar: The Architecture of Bridges.
No description available.

HIAA 1910D. Water and Architecture.
The seminar explores the varied ways in which water is manipulated in architecture and urban planning. We examine several case studies, including Roman aqueducts such as the Pont du Gard, medieval urban and monastic hydraulic systems, Renaissance and early modern garden (and fountain) design, and the local examples of Slater Mill and the Providence water supply. A

HIAA 1910E. Project Seminar for Architectural Studies Concentrators.

HIAA 1910F. City Senses: Urbanism Beyond Visual Spectacle.
Architecture and urbanism provide synesthetic experiences of space that don't necessarily privilege visual perception. This project seminar explores alternative approaches to design and an understanding of the city through explorations of all the senses. We will examine case studies of cities through the sounds of church bells, traffic, and water fountains; the smells of foods, plants, and sewers; or even the feelings of light and shade. Students are encouraged to work on projects that map the city through unconventional sensory markers, record sounds, distill scents, or film different corporal means of navigating the urban environment.

Reading and reports on an approved topic, supervised by a member of the staff. Project proposals must be submitted and approved no later than the first week of the semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
HIAA 1930. The History and Methods of Art Historical Interpretation. This seminar provides an overview of the methods and theories used by art historians and introduction to the history of the discipline. Through readings and discussions, we will examine how art history emerged as an intellectual pursuit and humanistic discipline in the modern era, and review its foundations in the Western philosophical tradition. The transformations wrought by the advent of critical theory and the incorporation of approaches from outside the discipline of art history will receive particular attention in the second half of the course. Open to juniors and seniors concentrating in History of Art and Architecture or Architectural Studies.

HIAA 1931. Museums, Histories, Critiques. This course offers a historical and theoretical examination of the art museum from its eighteenth century inception to contemporary expectations and institutional critiques. We will explore the philosophical and social implications of collection and classification, architecture and display practice; institutional mission and audience experience; interpretive strategies and educational goals; curatorial practice and the artist as curator. This critical framework will offer a means to examine the museum's role in structuring knowledge and facilitating experience and its place within intellectual discourse and public life. WRIT

HIAA 1990. Honors Thesis. The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

HIAA 2300B. Research Seminar in Roman Art and Architecture: Topography of Rome. Major monuments of the city of Rome from the Republic to the rise of Christianity.

HIAA 2300C. Allegories/Symbols in Roman Art, Origins in Hellenistic Art, Augmentation in Early Christian Art. Roman historical relief sculpture.

HIAA 2400A. The Visual Culture of Medieval Women. The course treats the history of women as commissioners, creators and subjects of medieval art. Case studies will be drawn from western Europe, Byzantium and Islam. Weekly seminars consider feminist perspectives in medieval history and art history; imaging of women in medieval art; archaeological approaches to gender and the analysis of gendered spaces; and the art and architecture of female spirituality.

HIAA 2410C. Representing the Past: Archaeology Through Image and Text. The archaeological past exists for us through intermediaries that may be written or visual. Drawings, descriptions, photographs, graphs, charts and computer visualizations all display a considered image of the past. This seminar takes a critical look at the literature on visualization, and at the strategies by which scholars have re-presented the archaeological past of a range of cultures.

HIAA 2430B. The Afterlife of Antiquity. Examines the survival and revival of classical art and architecture in the Middle Ages. Discussion focuses on selected case studies from across Europe and critically engages the secondary literature on classical revival.

HIAA 2440A. Recent Approaches to the Gothic Cathedral. No description available.

HIAA 2440B. Architecture of Solitude: The Medieval Monastery. Religious men and women, as well as their patrons, sought to establish places of devotion and learning across the medieval landscape. This course examines the rise and development of the medieval monastery from its late antique beginnings in the deserts of Africa to the rise of the preaching orders in early thirteenth-century Europe. Emphasis will be placed upon the material expressions of western monasticism and upon the notion of the monastery as an architectural, archaeological and historical research problem through examination of individual case study examples. Instructor permission required. Enrollment limited to 12.

HIAA 2440C. Recent Approaches to the Gothic Cathedral. No description.

HIAA 2440D. Architectural Reuse: The Appropriation of the Past. This seminar will consider the survival, revival and adaptive reuse of older objects, texts and built spaces in the visual and material culture of successor cultures. We will look critically at the literature on the archaeology of memory, "Renaissance and revival, spolia studies and adaptive reuse." The seminar will examine selected case studies, including the reuse of sculptural elements in the Arch of Constantine, the conversion of Pantheon into a church and Hagia Sophia into a mosque, appropriated elements in the Qubbi mosque in Delhi and the adaptation of the Bankside Power Station as the Tate Gallery. Limited to 15.

HIAA 2450. Exchange Scholar Program

HIAA 2540C. Illustrating Knowledge in Early Modern Europe. We will look at the history of scientific illustration in the age of the first printed books, using works in special collections libraries to investigate the exchange of ideas and the development of specializations in the arts and sciences from about 1450-1800. Focusing primarily on Italian examples, comparative projects may be chosen from any country in which the student can read the language.

HIAA 2540D. The Theater that was Rome. "The Theater that was Rome" is a digital research site uniting text and images to portray the development of Rome (1500-1800) in the flood of printed information that proceeded from interest in the physical and mythological city. Our goal is to provide historical and critical interpretation of these illustrated books and prints that created Rome as a theater for the most advanced technological and decorative feats of an international group of artists, architects, engineers, authors, and publishers, looking at their productive collaborations, and using original materials, often in languages other than English, at the Hay Library and on the website. For graduate students; qualified upper-level undergraduates should contact the instructor. Enrollment limited to 15.

HIAA 2550A. The Visual Cultures of Southern Italy. A workshop devoted to the visual cultures of Southern Italy, a geographical location with an unstable ruling population and sense of cultural identity from the late medieval through the early modern period. Projects about any aspect of art/architecture of Italy from south of Rome to Sicily are welcome. Research requires reading ability in Italian, Spanish, or French.

HIAA 2550B. Art and Charity in the Renaissance. This seminar looks at the roles of art and architecture in commissioning charitable works in the service of maintaining a healthy civic body, including the design and decoration of hospitals, orphanages, ghettos, homes for women, immigrants and the poor, in the context of institutional structures that provide for marginal people. Examples will be from Italy, but students may work in other areas.

HIAA 2550C. Color. How do we understand color as an integral part of a visual object? How shall we think about the artist's decision and the viewer's responsibility? This seminar will look at color (and its purposeful repression) in painting, sculpture and the decorative arts of the early modern period, also considering the discourses of color in 20th-century painting and other eras, such as antiquity, when color was a profitable topic through which to discuss the senses. We will also look at the economy and science of pigments, and the value of color in different discourses and objects. Graduate students, or by permission.
This course examines art and other forms of visual representation that imaged the colonial exchange between Europe and the Caribbean from the late 17th through the early 19th centuries. Readings include current scholarship in postcolonial theory devoted to theorizing colonial relationships in terms of transculturation and exchange. Students are encouraged to select research topics that allow them to take advantage of the rich trove of primary resources at the John Carter Brown and John Hay libraries.

HIAA 2850C. Architecture, Urbanism, and Post-Colonial.
This graduate seminar explores the relationship among architecture and urban design, colonial empire, and national development, via a comparative analysis of cultural interactions between Europe and its non-western "others" from ca. 1800 to the present. We will draw upon recent critical debates on orientalism, colonialism and empire, and politics of representation as well as interdisciplinary studies of modernity and identity.

HIAA 2850D. Ludwig Mies van der Rohe.
This seminar will explore the work of Ludwig Mies van der Rohe, one of the most influential architects of the 20th Century. While Mies has been continually discussed and exhibited (the Museum of Modern Art alone held 7 exhibitions about him since 1947, most recently in 2001), to this day, his work has neither been contextualized sufficiently nor has its reception been critically examined. Apart from studying and understanding Mies van der Rohe's work in its context, this seminar will explore responses by contemporary critics and compare those to later interpretations.

HIAA 2850E. Architectural History's Future.
Through readings of new, cutting edge texts, this graduate seminar will reconsider how we write and teach architectural history. We will explore provocative recent frameworks such as the "global," the shift from considering objects to thinking about processes, systems, networks, institutions etc. Our goal is to develop a self-reflexive praxis as historians, teachers, designers, and cultural workers.

HIAA 2860A. The Museum and the Photograph.
This graduate seminar examines the relationship between two rapidly evolving modern institutions: the history of photography and the modern art museum. Through readings, discussions, and independent research, we will look at how the history of photography has been affected by its unique association with the museum, and what this means for it as a field of intellectual inquiry. Enrollment limited to 18.

HIAA 2860D. Photography and Objectivity.
From the moment of its arrival in Western culture, the photograph has been characterized as the product of a machine, of optics and chemistry. The mechanical nature of the medium seemed to guarantee it a special relation to its subject: the photograph showed something real, through an analog technology that was essentially objective. This graduate level seminar will investigate the notion of objectivity, as it has been analyzed in the history of science and other fields, and as it has been discussed in relation to photography. Enrollment limited to 15 graduate students.

HIAA 2870H. What is Contemporary Art History?
Contemporary art history is a field in formation. As such, it is often contested and embraced, misunderstood and championed. Is contemporary art history a radical new field with a discrete set of practices, methodology and historiography? Or is contemporary art history simply a study of the present? Is the study of the contemporary relevant to other areas of art history? Is contemporary art history a model for other disciplinary approaches to the present? Throughout the term, this graduate seminar will discuss each of these questions. This course is open to students of all art historical periods.

HIAA 2930. Practicum Working with Wood in the Middle Ages.
The graduate Practicum for 2015 will engage with the significant and understudied collection of medieval and early modern wooden sculpture at the RISD Museum. We will examine the collection from the perspective of its changing contexts: from forest to workshop, to the decorative, devotional and ceremonial roles objects played in medieval and early modern spaces. We will then consider the later contexts of these works: their use and reuse in early modern and modern sites, the circumstances of their transfer to collections of individuals and institutions and finally their installation as single works of art in the RISD museum.
**International Relations Concentration Requirements**

The objective of the International Relations concentration is to foster creative thinking about pressing global problems and to equip students with the analytic tools, language expertise, and cross-cultural understanding to guide them in that process. To this end, the concentration draws on numerous departments including political science, history, economics, anthropology, sociology, psychology, religious studies, and area studies. The IR concentration is organized around a multidisciplinary core and two sub-themes: security and society, and political economy and society. It has a three-year language requirement that must be linked to the student’s selected region of the world. All concentrators are required to undertake a capstone project using research in a second language. **Prospective concentrators should visit the IR site** (http://watson.brown.edu/ir/advising) for next steps.

**Requirements**

The IR concentration requires 14 courses and the equivalent of 3 years study of a second language. Regardless of track, all IR concentrators must take all five core courses, research methods, regional focus, and capstone courses.

**Security and Society track**

**Core Courses**

Students must take all 5 core courses, preferably during freshman or sophomore year. AP credit does not count toward the concentration.

Students may choose from the following:

Must be taken senior year. Must incorporate language skills.

Capstone Course, from the following options:

- AMIST 1904V Decolonizing Minds: A People's History of the World
- ANTH 1224 Human Trafficking, Transnationalism, and the Law
- ANTH 1251 Violence and the Media
- ANTH 1910G Senior Seminar: Politics and Symbols
- FREN 1900H La France en guerre
- HIST 0150D Refugees: A Twentieth-Century History
- HIST 1969B Israel-Palestine: Lands and Peoples II
- HIST 1974J Decolonizing Minds: A People's History of the World
- HMAN 1970K Law and Religion
- INTL 1802W International Journalism: Foreign Reporting in Practice
- INTL 1803K Media Wars: The Middle East
- INTL 1803L Humanitarianism in Uniform
- INTL 1803M Reassessing Contentious Politics, and Social Movements
- INTL 1803N The Politics of Food Security
- POLS 1821L International Relations of Russia, Europe and Asia
- INTL 1803G Global Women's Issues: Investing in women as strategy for sustainable growth and global development
- INTL 1803K Media Wars: The Middle East
- INTL 1803L Humanitarianism in Uniform
- INTL 1803M Reassessing Contentious Politics, and Social Movements
- INTL 1803N The Politics of Food Security

Total Credits: 14

Political Economy and Society Track

Core Courses
Students must take all 5 core courses, preferably during freshman or sophomore year. AP credit does not count toward the concentration.

- ANTH 0110 Anthropology and Global Social Problems: Environment, Development, and Governance
- ECON 0110 Principles of Economics
- HIST 0244 Understanding the Middle East: 1800s to the Present
- HIST 1121 The Modern Chinese Nation: An Idea and Its Limits
- POLS 0400 Introduction to International Politics

Track Requirements (five courses from distributed between the sub-themes):

Economics (two or three courses): All students MUST take Micro and Macro.

- ECON 1110 Intermediate Microeconomics
- ECON 1210 Intermediate Macroeconomics
- Plus an International Economics course:
  - ECON 0510 Development and the International Economy
- ECON 1500 Current Global Macroeconomic Challenges
- ECON 1510 Economic Development
- ECON 1540 International Trade
- ECON 1550 International Finance
- ECON 1590 The Economy of China since 1949
- ECON 1760 Financial Institutions
- ECON 1765 Finance, Regulation, and the Economy: Research

Political Economy (two or three courses):

- ANTH 1320 Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress
- ENVS 1350 Environmental Economics and Policy
- INTL 1802V Diplomacy, Economics & Influence
- INTL 1803G Global Women's Issues: Investing in women as strategy for sustainable growth and global development
Students may choose from the following:

- **Capstone Course**, from the following options:

- **Regional Focus**

- **Language**

- **Research Methods**

Prior to 7th semester. Quantitative or qualitative course from the following approved list.

- **Department, Center, Program and Institute**

- **Total Credits**

**COURSES**

**INTL 1101. China and the Global Political Economy.**

Can (or Should) China Save the World? The program features an academic focus on Political Economy through comparative study of China and the US. US students engage with Chinese students throughout the 8 weeks, spending 4 weeks in Hong Kong and 4 weeks at Brown. Courses are taught by CUHK and Brown faculty, resulting in two course credits. Students are required to register for both courses (INTL 1101 and INTL 1102).

**INTL 1102. The US and the Global Political Economy.**

Can (or Should) China Save the World? The program features an academic focus on Political Economy through comparative study of China and the US. US students engage with Chinese students throughout the 8 weeks, spending 4 weeks in Hong Kong and 4 weeks at Brown. Courses are taught by CUHK and Brown faculty, resulting in two course credits. Students are required to register for both courses (INTL 1101 and INTL 1102).

**INTL 1280. Global Security After the Cold War.**

Analyze major contemporary issues of global security utilizing current theories of international politics, emphasizing both continuity and change in global security since the end of the Cold War. Issues examined include proliferation of weapons of mass destruction and of conventional weapons, terrorism, recent arms control and disarmament initiatives, and the changing role of alliances and regional and global security institutions. Prerequisite: POLS 0400. This course is open to Senior and Junior concentrators in IR and Political Science, and to other students by permission of the instructor. Enrollment limited to 40.

**INTL 1350. History and Theory of International Relations.**

Examines the struggles of power and knowledge which have constituted international relations history and theory. This survey stretches from the beginnings of the Western states system and its early exemplar thinkers like Machiavelli, Grotius, and Kant, to the current issues and contemporary theories of international relations. Focuses primarily on the ‘classical’ and ‘post-classical’ theories of international relations.

**INTL 1355. Contemporary Global Politics.**

This course provides an overview of contemporary topics in international politics and themes related to Irish politics and society. The international system is a complex and constantly evolving environment. Interactions between states and non-state actors, such as multinational corporations and international non-governmental organizations, produce outcomes that we read about in the news every day. This module offers the student a set of theoretical tools to help understand why these outcomes emerge.
INTL 1400. Religion and Global Politics.
Examines the increasingly visible role of religion in international affairs and global politics. What are the political manifestations of different religious traditions? What kind of a role does religion play in conflict, economic development, peace-building and diplomacy? Why was religion ignored as a political force in the western world? This course reviews multiple ways religion has been affecting world affairs and delves into specific faith traditions and their histories. Not open to first year students.

It is not possible to understand international relations without a concrete understanding of decision-making mechanisms. The course covers major themes in foreign policy analysis; it examines past foreign policy decisions of major actors and investigates the dynamics of crisis decision-making in international politics. How do politicians behave when they need to take an important decision in limited time? Which factors influence how political actors choose one policy over another? We will study the possible explanations in the foreign policy analysis literature and we will analyze cases to gain an understanding of mechanisms behind international politics.

This course will study the politics and economics of globalization, in particular the spectacular rise of the Asian economies and their impact on the global economy, financial markets, and the balance of power. The analytic goals of the course are twofold. First, to examine the key problems rapidly developing nations have faced and continue to struggle with in an interdependent world economy, and why some nations have succeeded in moving into a period of unprecedented growth while others have not. Second, to analyze how the rise of the Asian economies will affect the U.S. and other developed nations. Enrollment limited to 35.

INTL 1440. Ethnicity and Inequality in Global Perspectives.
Drawing on literature in sociology, politics, international relations, economics, and development studies, this course will critically examine the institutions, beliefs, ideas and practices that have engendered ethnic inequality in many parts of the world. Our aim is to help students gain a deeper understanding of how ethnicity, identity and religion interact with the institutions of modern societies so as to produce sustained social and economic disparity along group lines. Another goal is to gain an understanding of how ethnic inequality within countries can translate into global threats.

INTL 1442. Empathy in International Relations: Humanitarianism, Justice and Global Citizenship.
This class draws on classic and recent work in a range of academic disciplines to explore the intellectual roots and political routes of empathy, equity and cosmopolitan thinking. The course examines the phenomenon of empathy as deep-rooted and potentially hard-wired human disposition to imaginatively inhabit the world-view of others, and through case studies from human rights, labor justice and environmentalist movements examines how, why and when humans come to respect the claims of distant strangers. This attention to empathy and social recognition and thus imagine themselves and others as fellow-citizens of the world.

This course reviews modern history through the study of invasions, coups, and other interventions carried out by the United States. From the Marine assault on Tripoli in 1805 to the bombing of Tripoli in 2011, there have been scores of these episodes. They have shaped American history and the history of the wider world. We examine a variety of them, and try to answer three questions about each one. (1) Why did the United States decide to carry out a particular intervention? (2) How was the intervention executed? (3) What have been its long-term effects?

INTL 1444. Comparative Development (SOC 1600).
Interested students must register for SOC 1600.

INTL 1445. International Political Economy (POLS 1730).
Interested students must register for POLS 1730.

INTL 1446. Political Research Methods (POLS 1600).
Interested students must register for POLS 1600.

Introduces students to the political economy of the environment in Latin America. Readings survey topics on resource-based development, environmental conflict, and green governance. Lectures present theoretical accounts of development and the environment and assess their validity in light of the Latin American experience. Relies on history-based analytics and case studies. Topics include conservation of the Amazon, rights of indigenous peoples, mining and environmental well-being in the Andes, and the green revolution in tropical Latin America. Knowledge of Latin American history and politics, political-economy, and environmental studies recommended. Open to juniors, seniors, and graduate students.

INTL 1550. Chinese Foreign Policy.
The objective of the course is to enable students to gain familiarity with the evolution of modern Chinese politics as it related to international relations, as well as a comprehensive understanding of Chinese foreign policy priorities and institutional processes. Exploring various historical explanations, developing critical reading skills, and employing policy analytical tools will enable students to better evaluate the numerous dilemmas confronting academics and policymakers in understanding and responding to China’s rise. Students will emerge from the course with a more sophisticated understanding of China’s rise and the implications of this momentous development for the international system. Enrollment limited to 40.

INTL 1700. International Law.
This introduction to public international law covers the nature of legal reasoning in international relations, the interplay of international law and international politics, and the international legal process. Examines selected substantive fields such as state responsibility, the use of force, international human rights, and the U.S. and international law.

The main objective of the seminar is to enable students to understand the different and competing conceptions of human rights present in the contemporary humanitarian agenda. In particular, topics such as the problem of enforcement and the role human rights in foreign policy, genocide, torture, women’s rights, humanitarian intervention, and the international criminal court. At the end of the course students will be better equipped to assess critically the potential and shortcomings of the international human rights system.

Surveys the Chinese democracy movement in the 20th century and up to the present. Examines key leaders, events and development, including the Chinese Democracy Wall movement and the Chinese democratic party. Taught in Chinese. Readings in English and Chinese. Advanced Chinese language skills necessary. Instructor's permission required. Enrollment limited to 20.

INTL 1800N. Global Media: History, Theory, Production.
Explores the historical and contemporary roles of media in international affairs as a source of information and as an important medium of war and diplomacy. Three tracks: historical, focusing on the dual development of colonial and media empires from early days of print media to the Internet; theoretical, using classical IR and critical theory to examine media as product and instrument of cultural, economic and political struggles; and practical, using biweekly ‘Global Media Labs’ in which guest media practitioners teamed with media theorists present master classes in print, photography, radio, cinema, television, and online convergences. Instructor permission required. Enrollment limited to 20. WRIT

INTL 1800R. Post-Soviet States From the Past into the Future.
Examines in historical context the emergence of the new post-Soviet states from the disintegrating USSR, the development of their foreign policies, and the evolution of their mutual relations in the political, economic, security, and environmental spheres. Devotes special attention to the functioning of the Community of Independent States and other multilateral institutions. Instructor's permission required. Enrollment limited to 20.
INTL 1800V. The United States in World Politics.
Examines major aspects of American foreign policy after the Cold War and 9/11 in terms of domestic and international challenges. Discussions of the United States as 'empire' and 'republic,' with independent research and a foreign policy game. Emphasis is on the connections between the processes of policy making and the substance of policies pursued. Prerequisite: POLS 0400 required; POLS 1560 highly recommended. Enrollment limited to 20 juniors and senior concentrators. WRIT

INTL 1801E. War in Anthropological Perspective.
Examines war, peace, and militarization using anthropological frameworks. Centers on case studies from several areas of the world, as well as contemporary theories of violence. Enrollment limited to 20 students.

INTL 1801H. Amazon Governance.
Studies the political economy of Amazon governance in comparative perspective. Readings trace distinct national and local paths of Amazon governance. Topics include the colonial history of deforestation, the impacts of globalization and nation-state modernization projects, the evolution of environmentalisms and Amazonian contentious movements, and selected case studies of good governance at the grassroots level. Relies on history-based research and multidisciplinary perspectives. Enrollment limited to 20 juniors, seniors, and graduate students. Instructor permission required.

INTL 1801I. Public Theologies of Governance and Secularism in World Politics.
Public theology of a particular issue includes human interpretation of what is relevant and to what extent particular religious premises can be experienced in the public arena. In the analyses of international politics, what we call "religion" is usually the sum of clashing or converging public theologies. This course comparatively investigates these different religious perspectives towards issues of political governance with case studies from Islam, Christianity, Judaism, Hinduism and Buddhism. The course also focuses on modes of secularism and the challenges they pose to political theologies of faith traditions. Enrollment limited to 20 juniors and seniors. Instructor permission required.

INTL 1801J. War and Human Rights.
How nations and their adversaries treat civilians and other non-combatants in wartime has become an increasingly central issue in global politics. This seminar will explore the intersection of war, human rights, and the laws of war (also known as the law of armed conflict or international humanitarian law). It will focus especially on how civilians and other non-combatants are protected (or not) in times of war and the politics and institutions of enforcement. Topics include war crimes, genocide, targeted killings, torture, humanitarian intervention, and the international criminal court. Prerequisite: POLS 0400; prior coursework in human rights or international law desirable. Enrollment limited to 20 junior and senior concentrators in International Relations and Political Science. Instructor permission required.

INTL 1801K. China and the World.
The rise of China has emerged as one of the most important developments in world politics during the early 21st century. Chinese foreign policy will have an important impact on the U.S. economy as well as on U.S. national security. Moreover, China's influence now touches upon every continent of the globe. This course surveys the cultural underpinnings, modern history, institutional structures, and vital regional contexts for contemporary Chinese foreign policy. Students will emerge from the course with a more sophisticated understanding of China's rise and the implications of this momentous development for the international system. Prerequisite: POLS 0400. Enrollment limited to 20 seniors. Instructor permission required.

INTL 1801L. Religion and Secularism: Affinities and Antagonisms.
Global events in recent years seem to defy simple ideas of the confinement of religion to a wholly private or otherworldly domain. Is secularism a failed ideal? Or was it simply an inadequate concept to understand modern ethics and politics? In what ways are conceptions of the secular being contested and reformulated in Euro-American and postcolonial contexts? We address these questions by taking up key texts of recent religion/secularism debates, in the process returning to canonical texts by Weber, Schmitt, Nietzsche, Thoreau and others, to reexamine the affinities and antagonisms between religious and secular ideas of morality and power. Enrollment limited to 20 seniors in International Relations. Instructor permission required. WRIT

This course introduces the politics and economics of globalization and, in particular, the spectacular rise of the Asian economies and their impact on the global economy, financial markets, and the balance of power. Course goals are: First, examine the key problems rapidly developing nations have faced, and continue to struggle with, in an interdependent world economy, and why some nations have succeeded in moving into a period of unprecedented growth. Second, analyze how the rise of the Asian economies will affect the U.S. and other developed nations. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT

INTL 1801N. Global Security After 9-11.
Analyzes major contemporary issues of global security utilizing current theories of international politics, emphasizing both continuity and change in global security since the end of the Cold War with emphasis on security issues after the September 11, 2001 terror attacks. Issues examined include proliferation of weapons of mass destruction and of conventional weapons, terrorism, role of intelligence, special military forces and covert action, and the changing role of alliances and regional and global security institutions. Senior (followed by Junior) concentrators in IR have enrollment priority. Other students may enroll on a space-available basis by instructor permission. Enrollment limited to 20. Instructor permission required. WRIT

INTL 1801P. Conflict Resolution and Peacebuilding.
In this seminar, we will study the dynamics of conflicts, causes of violence and the efforts of the individuals/states/institutions to manage conflict and build peace. Moving from contemporary cases such as Bosnia, Kosovo, Rwanda, Somalia, Lebanon, Israeli/Palestine, we will discuss the lessons that were learnt in conflict management and the policies to be devised in the future. Understanding the frameworks of such conflicts and the accumulated knowledge on peace-building is essential, as any career in today’s world will touch upon conflict settings and negotiations at some point. Enrollment limited to 20 seniors in International Relations. Instructor permission required. WRIT

INTL 1801R. Natural Resources and the Environment in the Developing World.
Is resource abundance blessing or curse? Are developing countries too poor to be green? This course surveys topics of resource-based development and the modern environmental history of the Global South, with a historically grounded, inter-disciplinary perspective. Enrollment limited to 20 seniors in International Relations. Instructor permission required. WRIT

INTL 1801S. All the News That's Fit to Post: Grappling with Issues for Content Creators in the Global News World.
Journalists operate today in an increasingly global and increasingly digital media environment, confronting new challenges and also seizing new opportunities that simply did not exist a generation ago. The new news world lacks traditional mentoring and editorial frameworks. This seminar focuses on threshold dilemmas that journalists confront, often independently, in news gathering, writing, and publishing decisions. Through class dialogue and opinion essay writing assignments, the seminar will stress interaction, debate and international sensibilities. It will include real life case studies from Newsweek, newsweek.com and MSNBC. Enrollment limited to 20 seniors. WRIT
INTL 1802A. The Laws of Violence: Lawful Killings in Law Enforcement, Punishment, War and the War on Terror.
This seminar introduces the basic elements of conventional theories of law and state, and explores the centrality that legalized violence plays in both the constitution of law and the state. The goal of the seminar is to identify and examine the constitutive relation between law and violence. Enrollment limited to 20 seniors. Instructor permission required. WRIT

Since 1953, the United States and South Korea have maintained a formal security alliance, and the peninsula remains home to 28,500 U.S. troops. Developments in Korea have an important impact on the region and the world making knowledge of the Koreas and their challenges vital for understanding the dynamics of the region. This course will explore the history, politics, economics, and security of North and South Korea and their role in the larger security context of East Asia. Enrollment limited to 20 seniors concentrating in International Relations. WRIT

INTL 1802C. Cyber Conflict and Internet Freedom.
This course will examine the problems confronting the United States and its international partners in addressing network and computer insecurity while upholding privacy, civil liberties and other fundamental values. While technical topics will be addressed, it is not a technical course but a course that examines the public policy challenges associated with a major technology issue. Enrollment limited to 20 seniors concentrating in International Relations. WRIT

INTL 1802D. Religion, Politics and Society: Israel in a Comparative Perspective.
This course explores contemporary dilemmas of religion and politics in Israel, drawing from different theoretical sources and using other case studies it allows a study of Israel in a comparative perspective and hopes to engage in debates relevant to all. During the course we discuss general theories of secularization, religious revival, politics and religion and different models of church and state. We explore the history and institutionalization of religion in Israeli public life, and engage with contemporary dilemmas of religion and/or politics salient in Israel and elsewhere. Enrollment limited to 20 juniors and seniors. Priority given to IR seniors. WRIT

INTL 1802E. Citizenship, Nationalism, Migration.
What are the contemporary parameters of political belonging? How do we make a contract with states regarding our rights and responsibilities to the society? When do we move across borders for alternative arrangements and contracts? Moving from these questions, we will investigate the evolution of nationalism and citizenship in history as well as the challenges immigrants and policymakers face in a world where identities are more fluid than ever. We will also explore political, economic and social implications of the attitudes towards citizenship and immigration. Enrollment limited to 20 seniors in International Relations. WRIT

INTL 1802F. History of American Intervention.
This course reviews modern history through the study of invasions, coups, and other interventions carried out by the United States. From the Marine assault on Tripoli in 1805 to the bombing of Tripoli in 2011, there have been scores of these episodes. They have shaped American history and the history of the wider world. Enrollment limited to 20 seniors. WRIT

INTL 1802G. Reading Global: International Relations through Fiction.
"Any book thoughtfully read sharpens the mind and improves on an individual's professional potential." So declared U.S. General James Amos when he reinvigorated the Marine Commandant's reading list in October 2012. This capstone course is designed in a similar spirit for Brown IR students, built around 20th century works of fiction from around the world which won recognition for the insights they offer on core issues in international relations and development studies. Enrollment limited to 20 juniors and seniors. Priority given to IR seniors. WRIT

INTL 1802H. Human Security.
In this course, we will engage the definitional debate that challenges traditional notions of national security. We will trace the normative, political and intellectual history of this policy lens, and we will examine its real world implications across several key issue areas. What are the conceptual and practical consequences of a concern with human security, as opposed to national security or human rights? Enrollment limited to 20 seniors concentrating in International Relations. WRIT

INTL 1802J. Regulation of the International Financial Services Sector.
Course examines from a regulatory perspective the modern international financial services sector, its principal players and activities, concerns which they raise for regulatory authorities and the rationales for the different regulatory responses which such concerns have provoked. Focus will be the US financial services sector as a forceful proponent of change in the context of European and Asian political economies which have not always been accepting of the specific initiatives of US commercial actors. Students must show up 1st day to obtain override. Priority given to IR concentrators. WRIT

INTL 1802K. Empathy in International Relations: Humanitarianism, Justice and Global Citizenship.
This class draws on classic and recent work in a range of academic disciplines to explore the intellectual roots and political routes of empathy, equity and cosmopolitan thinking. Seeking to extend Benedict Anderson's insight, that all communities larger than the face-to-face are distinguished by their style of imagining, the course examines the phenomenon of empathy as deep-rooted and potentially hard-wired human disposition to imaginatively inhabit the world-view of others. Students must show up 1st day for override. Priority given to IR concentrators. WRIT

INTL 1802L. Norms of Humanity.
This seminar will explore the origins and impact of four types of international standards of humane conduct: human rights, humanitarian law (also known as the law of war/armed conflict,) accountability and justice for past rights violations or war crimes, and humanitarian intervention. Many commentators increasingly refer to these branches of norms as if they belonged to a single “tree,” comprising a so-called “law of humanity.” Taking a different tack, this course encourages a deeper understanding of these international norms’ related-but-distinct sources, development and effects. Students must show up on 1st day for override. Priority given to IR concentrators. WRIT

INTL 1802M. Rwanda Past and Present.
In the mid-1990s, few countries on earth were as devastated as Rwanda. As many as one million people or more had been killed in a 100-day genocide, and the fleeing regime had left the country in ruins. Today, however, Rwanda is not only at peace but full of ambition. Some believe it is poised to rise from poverty and become an example for developing countries everywhere. Others worry that trouble is brewing, and that another apocalypse could lie ahead. Students must show up 1st day for override. Priority given to IR concentrators. WRIT

INTL 1802N. Arab Revolutions in Comparative Perspective.
This course provides an introduction to one of the greatest locomotives of change in human societies: revolutionary movements. Students will learn the major theoretical perspectives that have been developed to understand these complex phenomena. These tools will be used to analyze a number of different types of revolutionary movements, with a focus on the Arab world. Students must show up first day for override. Priority to IR. WRIT

INTL 1802O. Global Corporate Accountability: Issues of Governance, Responsibility and NGOs.
How does the international system hold corporations accountable? As the global value chain engages increasingly greater sections of the economy, how do we understand the role of corporations in shaping the ethical and political issues of environment, human rights, labor conditions, equality and opportunity, gender, and community rights. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT
INTL 1802Q. Iran and the Islamic Revolution. Shattering events of 1978-80 in Iran unfolded against the backdrop of the previous decades of Iranian history, knowing that history is essential to understanding the revolution. The revolution cannot be appreciated without studying the enormous effects it's had over the last 35 years. This course places the anti-Shah movement and the rise of religious power in the context of Iran's century of modern history. We conclude by focusing on today's Iran, the upheaval following the 2009 election, reformist president election in 2013, and prospects for reconciliation with the US. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT

INTL 1802R. After Snowden: Spying in International Relations. This course examines the special problems of surveillance and spying for democratic societies, with a particular focus on the United States and its experience as the world's oldest constitutional democracy administering the world's most pervasive intelligence apparatus. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT

INTL 1802S. Politics of International Finance. The purpose of this course is to present the fundamental variables that shape modern international finance. We will introduce and examine the technical forces that determine international transactions and capital flows, as well as the problems caused by unsustainable imbalances and the subsequent domestic and international political responses. Given the important role that finance plays in international relations, the material will allow the student to establish a conceptual framework to understand the political dynamics and constraints of the global economy. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT

INTL 1802T. Nuclear Weapons and International Politics (POLS 1822A). Interested students must register for POLS 1822A.

INTL 1802U. International Relations of Russia. This class provides students with an overview of the sources of contemporary Russian foreign policy (including the legacies bequeathed by the Soviet Union) and from there examines Russia’s position in the international system, the challenges she faces in the global environment of the 21st century, and her relationships with the great powers and with her immediate neighbors. WRIT

INTL 1802V. Diplomacy, Economics & Influence. This course examines a dozen diplomatic situations and identifies the players, their interests, and their tools -- and how those produced outcomes. Particular attention is paid to economic factors -- pressures, incentives, and influences -- that contribute to the outcome. By examining these elements students will understand the economic tools of diplomacy and power, and how to wield them. The course concludes with a close look at China's growing role in the world economy and considers how that will change China's role in world affairs. Enrollment limited to 20 Juniors & Seniors. Priority given to IR seniors. WRIT

INTL 1802W. International Journalism: Foreign Reporting in Practice. Objective: give juniors and seniors direct experience with the job of being a foreign correspondent. Classes focus on two themes—the practice of international journalism and the history and contemporary reality of Cuba. Seminar includes reporting trip to Cuba during spring break. The seminar is valuable to two types of students—those interested in a career in international journalism and students who are not pursuing a career in journalism but who want to learn journalistic skills. Many fields need people who know how to research, conduct interviews, distill information, and write clearly. This is especially important to careers that involve international work. WRIT

INTL 1802X. Global Problems, Global Solutions: From Ebola to Climate Change. This seminar examines the international responses to the challenges posed by complex global problems like climate change, the Ebola outbreak, migration, poverty, labor conditions, humanitarian crises, and fair trade. Students explore some of the central reasons explaining the international community's inability to effectively confront global problems and study a series of policy initiatives to solve some of these global problems, initiatives that go beyond the traditional division between international and domestic political spheres and that challenge the idea of an international order formed exclusively by states and international institutions. WRIT

INTL 1802Y. India in the World. This course is designed to introduce students to the role of India in the world. From being a newly independent country in the nineteen forties, India is today a globally re-emergent power. The world’s largest democracy and third-largest economy is grappling with linguistic and religious diversity, economic growth and inclusive development, the politics of the Centre-versus-States, uneasy neighborhood relationships, the threat of terror, and the redefinition of her role in the Indo-Pacific world. The Course aims at deepening understanding of the priorities that define India’s global outreach. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors. WRIT

INTL 1803. Risk, Regulation and the Comparative Politics of Finance. The course introduces students to the comparative history of finance as well as to alternative theories of regulation. It thereby develops students’ ability to compare the role played by financial institutions in different historical periods and national contexts. This comparative perspective puts the recent financial crisis into a broader perspective, allowing students to see the structural as well as more proximate causes of recent financial instability in the industrialized democracies. Enrollment limited to 20 juniors and seniors. Priority given to IR, DS, and Public Policy seniors. WRIT

INTL 1803C. Violence in Latin America: Causes, Consequences and Possibilities for Change. This capstone seminar focuses on the causes, consequences and possible solutions of violence in Latin America. Students will be asked to grapple with the question: What are the sources of violence in Latin America? How much is the drug war to blame? What about economic inequality, legacies of dictatorship, or cultures of violence? What are some possible solutions -- should the international drug control regime be changed? What are other policy and citizen-led alternatives? Enrollment limited to 20 juniors and seniors. Priority given to IR seniors. WRIT

INTL 1803D. Questioning Growth: Should Nations Get Rich?. This course examines growth as a guiding ideology of modern economic practice. How is the dream of growth produced? We take a broadly interdisciplinary view, grounding our investigation in anthropological ethnographies and tracing the outlines of the historic social theory that lead to the economic growth models of the mid-20th century. We review neoclassical economic approaches and consider dissidents in the ecological, Marxist, and feminist traditions. Enrollment limited to juniors and seniors. Priority given to IR seniors. WRIT

INTL 1803F. Foreign Policy and the 2016 Presidential Election Campaign. This seminar focuses on the relationship between national security policy and presidential politics, with a special focus on the 2016 campaign. We survey scholarly and popular literature on the role of foreign policy in American politics. From there we narrow our focus to presidential politics, and then further to the 2016 campaign. Since much of this campaign's foreign policy debate will be about questions of intervention in foreign conflicts—when, how, and where to intervene—we will give special attention to varying views on this question. Enrollment limited to juniors and seniors. Priority given to IR seniors. WRIT
INTL 1803G. Global Women’s Issues: Investing in women as strategy for sustainable growth and global development.

In this course, we ask and answer the questions: What are women’s issues around the world? What policies and programs are designed to engage the issues and improve outcomes? What role does and can the private sector play in harnessing the untapped potential of 50% of the globe’s population? Is there evidence to support the need for investment—of resources, focus, and political capital—and to quantify the results of its impact? Enrollment limited to juniors and seniors. Priority given to IR seniors. WRIT

This course provides an introduction to problems of contemporary Asian security and the strategies and foreign policies pursued by the four major powers in Asia: India, China, Japan, and the United States. Enrollment limited to juniors and seniors. Priority given to IR seniors. WRIT

INTL 1803I. Richard Holbrooke and the Rise and Fall of American Power.

To an uncanny extent, the life of Brown graduate and American diplomat Richard Holbrooke mirrors the rise and fall of American power in the late 20th and early 21st centuries. After leaving College Hill, Holbrooke worked for every Democratic president since John F. Kennedy. Over the course of the semester, his career will be used to explore three pivotal US military interventions – Vietnam, Bosnia and Afghanistan – and how they revealed the promise and limits of American power. Enrollment limited to juniors, seniors. Priority given to IR seniors. WRIT

INTL 1803J. Russia’s Escape from Communism.

This seminar introduces students to the economic and political transformation of Russia from the early days of Gorbachev to current-day Putin. The course is policy-oriented and empirical, and there are substantial reading assignments each week. Students are expected to participate in classroom discussions, make oral presentations, and prepare several writing assignments. Enrollment limited to 20 juniors and seniors. Priority given to IR seniors. WRIT

INTL 1803K. Media Wars: The Middle East.

In the last fourteen years, the Middle East has occupied a disproportionate degree of attention in news and social media in the United States and Western Europe, in comparison to other regions of the world today. While some of that media have served to elucidate certain aspects of societies and cultures in the Middle East, other media have further simplified the region to clichés. In this course, we address these themes via media: U.S. news production; television; digital media and cyberterrorism; religion; music; and ISIS. Enrollment limited to 20. Preference given to IR juniors, seniors. WRIT

INTL 1803L. Humanitarianism in Uniform.

The goal of this senior seminar is to explore the relationship between militarism and humanitarianism. When the US Army and Marine Corps released the Counterinsurgency Field Manual in 2006, military officials referred to NGOs as ‘force multipliers’ and soldiers as ‘armed social workers.’ In this course, we will develop a framework to understand military humanitarianism. We will also examine how military humanitarianism exceeds the contemporary geography of terrorism, investigating cases in Europe, Asia, Africa, Latin America and the Caribbean. Enrollment limited to 20. Preference given to IR juniors, seniors. WRIT

INTL 1803M. Reassessing Contentious Politics, and Social Movements.

This course introduces the major theories of social movements that explain the origins, dynamics, and consequences of contentious politics. We concentrate on the Middle East, the First and Second Palestinian Intifadas, and Arab Spring uprisings; examining how social movement theory helps us to understand these major episodes of mass mobilization and how these episodes prompt us to change our way of thinking about social movements and contentious politics more generally. We investigate social movement attributes such as movement emergence, member recruitment, leadership, organization, tactics, targets, and goals. Enrollment limited to 20. Priority to IR seniors and juniors. WRIT

INTL 1803N. The Politics of Food Security.

There is enough food on the planet to feed everyone, and yet currently approximately 875 million people go hungry. Why is this the case? This course explores the politics of international food security, dividing the semester into four sections to examine food through the lens of development, human rights, governance, and security concerns. Enrollment limited to 20 seniors, juniors. Priority given to IR seniors. WRIT

INTL 1803O. Bilateral and Multilateral Policy and Diplomacy.

This course examines the practice and profession of diplomacy and its relationship to the policy process. Focus will be on bilateral and multilateral diplomacy; while the practice will focus on a U.S. context, the lessons learned apply to other nation states. We review history of inter-state relations, including international legal basis for diplomatic relations. The practice has evolved over the years; however, it continues to incorporate such common functions as policy formulation, representation, reporting, negotiation, intercultural contacts and interaction with the media, parliamentary bodies and other external actors. Limited to 20 juniors, seniors. Priority given to IR seniors. WRIT

INTL 1803P. Grey Markets: The Illegal but Legitimate Economy.

This course investigates grey markets — commerce that is technically illegal, yet socially permitted and largely inoffensive. Unauthorized sales, intellectual property crimes (e.g. piracy, bootlegging, counterfeits), and evading customs tariffs and monitoring are constitutive examples of the grey market. These transactions skirt the interests of various actors, including firms, states, and societies. Limited to 20 juniors, seniors. Priority given to IR seniors. WRIT

INTL 1803Q. Spheres of Influence: A Comparative Analysis.

This seminar exposes students to a concept that has played an important role in the history of international relations, was supposed to fade away when the Cold War ended, and has unexpectedly returned to play a central role in global politics. We study the origin of sphere-of-influence geopolitics and review episodes when it promoted stability or instability. This allows us to compare the ways that great powers have used this concept, and to predict how they may do so in the future. Enrollment limited to 20 juniors and seniors. Priority given to IR seniors. WRIT

INTL 1804A. Computers, Freedom and Privacy: Current Topics in Law and Policy.

This course puts into context arcane debates about surveillance, privacy and cyber conflict, explaining and critiquing arguments put forward by and intelligence officials, civil liberties and privacy advocates, and companies. Double-listed with CSCI 1951F. Enrollment limited to 10 IR juniors and seniors. WRIT

INTL 1910. Senior Honors Seminar.

Open only to Senior students accepted into the honors program in international relations. Instructor permission required. WRIT

Open only to Senior students accepted into the honors program in international relations. Instructor permission required. WRIT

Limited to juniors and seniors. Section numbers vary by instructor.

Required: A completed proposal form and syllabus, sponsor’s and concentration advisor’s approval, and written permission from Dr. Elliott (following review of the proposal) prior to registering for any section of this course. Banner overrides will be given by the IR Program manager only, and no overrides will be issued after the Registrar’s course add deadline.

INTL XLIST. Courses of Interest to Students Concentrating in International Relations.

Italian Studies

Chair

Caroline Castiglione

Italian Studies at Brown not only teaches language and literature to students but guides their research toward problems that are cross-disciplinary in both content and method, rather than merely confirming a fixed canon or predetermined field of study. To investigate these problems,
we can draw at Brown on traditional alliances with Anthropology, Art History, Classics, Comparative Literature, History, Musicology, and Philosophy, but we also join forces with disciplines such as History of Science, Film Studies, Cultural Studies, and Gender Studies.

For additional information, please visit the department's website: https://www.brown.edu/academics/italian-studies/

**Italian Studies Concentration Requirements**

Inherently interdisciplinary, the Italian Studies concentration allows students to strengthen their language skills in Italian and deepen their knowledge of Italian literature, history, art, and culture. Most concentrators have some background in Italian language. However, it is possible to concentrate in Italian studies without having studied the language before coming to Brown, although doing so requires an early start. After fulfilling the language requirement by completing up to Italian 0600 (or the equivalent), students enroll in a variety of advanced courses, reflecting the interdisciplinary nature of the concentration. Junior concentrators often study abroad in the Brown Program in Bologna. All senior concentrators participate in the "senior conference" by delivering brief presentations on academic topics of their choice in Italian Studies. Concentrators might also pursue capstone research, writing, or multimedia projects.

The concentration requires that students demonstrate proficiency in the Italian language by completing up to Italian 0600 (or the equivalent in Bologna). ITAL 0600 is the first language course that counts toward the eight required courses for the concentration. At least four of the eight courses should be taken in Italian.  

**ITALIAN STUDIES COURSES**

| ITAL 0550 | Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany (HIAA 0550) |
| ITAL 0560 | Constructing the Eternal City: Popes and Pilgrims in Renaissance Rome (HIAA 0560) |
| ITAL 0600 | Advanced Italian II |
| ITAL 0750 | Truth on Trial: Justice in Italy |

| HIAA 1560A | Italy and the Mediterranean |
| HIAA 1560C | Renaissance Venice and the Veneto |
Italian Studies Concentration and the Brown Program in Bologna

Concentrators who enroll in the Brown in Bologna program should fulfill the requirements according to the following sequence: Prior to departure, the student should complete the level of Italian language study required (ITAL 0300) and enroll in one of the courses in the four distribution areas -- Italian literature; Italian history; history of Italian art and architecture; film or performance. Upon return from Bologna, the student should enroll in at least one advanced course offered by the department, preferably a course taught in Italian. Any student returning from the Bologna program must enroll in a course above the language level of ITAL 0600. Credits toward the Italian Studies concentration may also be transferred from the Brown in Bologna Program. Concentrators may count three courses per semester toward the concentration (or six courses total for the year), although the course content must focus on Italy if the student wishes to count the course toward the concentration requirements.

Concentrators should consult the concentration advisor to know which courses may or may not transfer as credits toward the concentration.

Honors in Italian Studies

Concentrators are encouraged to expand their understanding of Italian language, history, or culture through independent research that will result in a thesis, a translation, or a multimedia project, developed in consultation with the undergraduate concentration advisor and the individual faculty member who will advise the student's project. The Honors thesis in Italian Studies is a two-semester thesis. Students who intend to complete an honors project should enroll for the first semester in ITAL 1920 (Independent Study), and have their project approved by their advisor by October 15. During the second semester, honors students enroll in ITAL 1990 and continue to work with their advisor to complete the project. ITAL 1990 does not count as one of the eight courses required for the concentration.

Capstone Experiences in Italian Studies

A Capstone experience in Italian Studies would consist of a course or project that a student, in consultation with the undergraduate advisor, feels would integrate the various intellectual engagements of this interdisciplinary concentration, and constitute a culminating experience in Italian Studies at Brown. Such experiences are strongly encouraged, and should be arrived at through conversations with the concentration advisor or a professor in the department. This could include the Brown Program in Bologna, typically taken in the Junior year, and/or the honors thesis in the senior year. However, students may also apply early in the Fall or Spring semester of their senior year for permission to designate one of their courses (1000-level or above) a Capstone course. In consultation with the professor, students in Capstone courses complete an independent research, writing, or multimedia project that is well beyond the required assignment for the course. ITAL 1920 (Independent Study) may also be designated a Capstone course with the permission of the instructor.

Italian Studies Graduate Program

The department of Italian Studies offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

Italian Studies at Brown not only teaches language and literature to students, but guides their research toward problems that are cross-disciplinary in both content and method, rather than merely confirming a fixed canon or predetermined field of study. The interdisciplinary program in Italian Studies offers students the opportunity to study the literature, history and culture of Italy under the guidance of internationally renowned scholars in Anthropology, History, History of Art, Literature and Media. Our program draws on traditional alliances with Comparative Literature, Musicology, and Philosophy, but we also join forces with disciplines such as History of Science, Film Studies, Cultural Studies, Women's Studies, and the use of Computers for the Humanities. Recent Ph.D. graduates have consistently published their dissertations on topics ranging from medieval to contemporary literature and culture, and currently teach at such institutions as the University of Massachusetts, the University of Pennsylvania, Stanford University and Wellesley College.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/italian-studies

Courses

ITAL 0100. Elementary Italian.
Elective for students without previous training in Italian. No credit for first semester alone. Fundamentals of Italian grammar and development of skills in speaking, comprehension, and writing. Overview of contemporary Italian society. Four meetings per week, audio and video work, two Italian films. Note: This is a year course.

ITAL 0110. Intensive Elementary Italian.
Covers the same material presented in Italian 100-200. One semester equivalent to the standard two-semester sequence. Daily meetings plus audio and video assignments.

ITAL 0200. Elementary Italian.
See Elementary Italian (ITAL 0100) for course description.

ITAL 0300. Intermediate Italian I.
Review of the fundamentals of grammar, with emphasis on speaking and writing. Reading of representative short stories. Weekly compositions, presentations, and a paper. Three Italian films. Prerequisite: ITAL 0100-0200, or ITAL 0110, or placement by examination. Requirement for enrollment in the Bologna Program.

ITAL 0400. Intermediate Italian II.
Review of specific grammar problems. Reading of one novel and newspaper articles. Compositions and oral presentations. Three Italian films. Prerequisite: ITAL 0300, or placement by examination.

ITAL 0500. Advanced Italian I.
The purpose of this advanced course is to improve speaking and writing skills by offering extensive practice in a variety of styles and forms. Students will discuss various aspects of contemporary Italian culture. Reading, analysis and class discussion of texts (articles, songs, pictures, short stories, movies and television), oral presentations, based on research, and a writing portfolio (compositions, essays, blog and a journal). Prerequisites: ITAL 0400, or placement by examination.

Interested students must register for HIAA 0550.

ITAL 0560. Constructing the Eternal City: Popes and Pilgrims in Renaissance Rome (HIAA 0560).
Interested students must register for HIAA 0560.

ITAL 0600. Advanced Italian II.
A sixth semester course with intensive practice in speaking and writing. Short stories, poems, music, and movies will be used to discuss Italian Society from the Second World War through the present. We will explore some important themes—family, religion, gender, and politics. Class discussion, compositions, oral presentations, and a final paper. Prerequisite: ITAL 0500, placement by examination.

ITAL 0750. Truth on Trial: Justice in Italy.
This seminar analyzes controversial trials in Italy between 1500 and 1800. From the persecution of heretics to the trial of Galileo and the increasing use of courts by marginal members of society, the judicial arena was crucial in defining political, social, scientific, and religious truth. Were law courts successful sites for the resolving what constituted deviance, legitimate knowledge and individual rights? FYS
ITAL 0751. When Leaders Lie: Machiavelli in International Context
This course examines the writing of Niccolò Machiavelli, a Renaissance author praised and condemned for his insistence on analyzing the realities of politics, rather than the ideals of political behavior. Machiavelli’s view of the tenuous relationship of ethics to politics has cast him as the founder of political science and the proponent of “consequential morality” or the notion that the ends justify the means. We will also examine precedents for his ideas in the Greek and Islamic world and conclude by examining the relevance of Machiavelli’s insights for understanding political practices and ethics in the twenty-first century. Enrollment limited to 20 first year students. Instructor permission required. FYS WRIT

ITAL 0950. Introduction to Italian Cinema: Italian Film and History
How do we visualize the past? How has cinema influenced our understanding of contemporary history? The course will focus on how key moments of 20th-century History (Fascism, WWII, the Mafia and Terrorism) have been described or fictionalized by major Italian filmmakers (including Benigni, Bertolucci, Cavani, Fellini and Pasolini). Subtitled films, readings and discussion groups. Reserved for First Year students. Enrollment limited to: 20. FYS WRIT

ITAL 0951. The Grand Tour, or a Room with a View: Italy and the Imagination of Others
Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this “grand tour.” Readings, both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, and films like “A Room With a View” - all in order to determine the ways in which Italy “means” for the cultural imagination of Western civilization. Enrollment limited to 20 first year students. FYS WRIT

ITAL 0981. When Leaders Lie: Machiavelli in International Context
This course examines the writing of Niccolò Machiavelli, a Renaissance author praised and condemned for his insistence on analyzing the realities of politics, rather than the ideals of political behavior. Machiavelli’s view of the tenuous relationship of ethics to politics has cast him as the founder of political science and the proponent of “consequential morality” or the notion that the ends justify the means. We will also examine precedents for his ideas and conclude by examining the relevance of Machiavelli’s insights for understanding political practices and ethics in the twenty-first century. WRIT

ITAL 0985. Visions of War: Representing Italian Modern Conflicts
This interdisciplinary course addresses issues of war within Twentieth century Italy. As a phenomenon that crucially defines the “short century,” war occupied a central role in various cultural products. This class will embrace fictional, non-fictional, musical, and visual texts that recount the experience of conflicts as seen through the eyes of Italian intellectuals. We will discuss works by authors such as Ungaretti, Calvino, Levi, and Monicelli, and analyze sources such as soldier’s songs and military posters. Readings will range from literary theory and trauma studies to history. Prerequisite: ITAL 0600 or Brown in Bologna Program. The course will be conducted in Italian.

ITAL 1000A. Luigi Pirandello: Masks and Society.
Twentieth century Italian society as seen through the eyes of an outstanding contemporary author, Nobel Prize winner Luigi Pirandello. Focuses on the relationship between literature, theatre, and social reality through linguistic and stylistic analysis of texts (fiction and play) and their filmic or other media (e.g. radio) adaptations. Conducted in Italian, as a seminar-type discussion followed by writing assignments.

ITAL 1000B. Reading Recent Italian Fiction.
Readings of contemporary Italian fiction. The course aims to develop students written and oral expression in Italian. A broad range of themes will be discussed. Prerequisite: ITAL 0600, a semester in Bologna, or by placement.

ITAL 1000C. Nord - Sud e Identità Italiana.
This course investigates Italian identity since its inception in 1860 to the present through multiple perspectives: literature, history, politics, film, music and art. We will focus on important crisis points in this trajectory: the founding of the national state, the collapse of liberalism and the fascist experiment, the birth of the republic and Italy in the new Europe. In English.

ITAL 1000E. Masterpieces of Italian Cinema - Capolavori del cinema italiano.
The course will consist of a broad and varied sampling of classic Italian films. We will consider the works which typify major directors such as Rossellini, De Sica, Visconti, Fellini, Pasolini, Antonioni, Gemi, Risi, Scota, Olmi, and Rosi. The aims of the course is offering a historical survey, and discuss the way how Italian cinema has reflected, amplified, and criticized important moments of Italian history, books and national identity. Classes will include close visual analysis of films, and its relations with the sisters arts (literature, painting, music). The course will be taught in Italian. Prerequisite: ITAL 0600.

ITAL 1000F. 20th Century Italian Poetry.
This course examines representative poets and poetic movements of Italy from the late 19th through the 20th centuries within and cultural and historical context. We will read works by internationally renowned poets such as D’Annunzio, Montale, Quasimodo, Marinetti, Ungaretti and Pasolini, and look into the development of Italian poetry through the major literary and artistic movements of the 20th century, including Crepuscularism, Futurism, Hermeticism, Neo-Realism and the Neo Avant-garde. We will address issues related to the shaping of a literary canon and consider the ways in which poetry reflects and defines a culture. The course will also incorporate translation and composition exercises as a technique of text analysis. Intensive practice in spoken and written Italian is an essential component of this course. Conducted in Italian. Advanced knowledge of Italian required. Prerequisites: ITAL 0600 or permission by the Director of the Italian Language Program.

ITAL 1000G. Italian Identity.
This course examines the process of the construction of Italian identity from National Unification until today. Through a close reading of Manzoni, De Amicis, Verga and Lampedusa’s works, we investigate the formation of Italian identity through language, literature, food, and opera. We will also examine the problems of Post-Unification Italy: the economic and cultural gap between North and South and the Southern Issue. Finally, we will examine documentaries and readings that assess Italy today to analyze the feeling of not-belonging and estrangement, and the problematic search for a cohesive identity in a multicultural Italy within the European Union. Taught in Italian.

ITAL 1000H. Resounding Cinema.
This course explores the significance of sound, noise and music in Italian film: from recording, editing, mixing, to spatializing, emotionalizing and politicizing through the score. We will watch, and listen to, films by major Italian directors (Fellini, Antonioni and Pasolini) who worked ‘ear to ear’ with such award-winner composers as Nino Rota and Ennio Morricone. Materials include also exemplary horror and comedy genre films. The synergetic impact of sound will be discussed drawing upon critical listening and elaboration of most influential sound theories.
ITAL 1010. Dante in English Translation: Dante's World and the Invention of Modernity.
Primarily for students with no knowledge of Italian. Given in English. Concentrators in Italian should enroll in ITAL 1610; they are expected to read the material in the original. Close study and discussion of Dante's deployment of systems of retribution in the Inferno and rehabilitation in the Purgatorio with a view to imagining a society based on love and resistant to the effects of nascent capitalism and the money economy. Dante's work summarizes and transforms the entire ancient and medieval tradition of literature, philosophy, and science. WRIT

ITAL 1020. Boccaccio’s Decameron.
Close study and discussion of Boccaccio's collection of 100 tales told by ten young Florentines over a period of two weeks, while in flight from the devastating plague of 1348. The Decameron defined the standard of Italian prose narrative for four centuries and deeply influenced Renaissance drama. We will also pay particular attention to visualizations and adaptations of the Decameron into a variety of media, from manuscript illumination to painting, theatre and film. Students will contribute to the Decameron Web, the award-winning Boccaccio web site administered by the department of Italian Studies. Sections in English and Italian. Enrollment limited to 40. WRIT

ITAL 1029. World Cinema in a Global Context.
Introduction to World Cinema and history through an original lens: The Cinema Ritrovato film festival at the Cineteca of Bologna, one of Europe's most renowned film restoration centers. Looking at World Cinema as a polycentric global phenomenon, students will become acquainted with recently restored mainstream, art house, alternative, experimental and avant-garde films, ranging from the silent period to world classics and Italian neorealism. Students will also attend a production workshop at the Bologna Cineteca, with of one of Italy's young award winning directors. Lectures and seminars in English by Brown and University of Bologna scholars and screenings. WRIT

ITAL 1030A. Fellini.
The career of one of the undisputed masters of 20th-century film, revisited on the 20th anniversary of his death: from his contributions to neo-realism (Oscar nomination as screenwriter of Rossellini's Open City) to the "magic" realism of the 1950s (Fellini's first of four Oscars for La strada); and from his modernist masterpieces (La Dolce Vita, 8112) to his meta-cinematic films (Intervista, The Voice of the Moon). In reviewing Fellini's oeuvre, we will focus on issues of authorship, art film and psychoanalysis, myth and memory, realism and hyperrealism. Taught in English with a discussion group in Italian.

ITAL 1030B. Modernity, Italian Style.
The Golden Age of Italian Film. The legacy of Neo-Realism and the rise of the New Wave, against the backdrop of the neo-capitalist modernization of Italian society in the 1960s. Review the cinematic construction of the Modern in 11 B/W films from a six year-period (1960-66), focusing on issues of space/composition, time/narrative, fashion/form, and genre/gender. Analyze and discuss major works by Fellini, Antonioni, Rossellini, Olmi, Germi, Bertolucci and Boccaccio within the context of European Art cinema and the politics of Autore, and in light of the most influential critical theories of the 1960s (Bazin, Metz, Pasolini and Deleuze). Taught in English. All films subtitled. Discussion group in Italian.

ITAL 1310. Literature of the Middle Ages.
Readings in early Italian literature, including religious writers and love poets of the 13th century, Petrarch, Boccaccio, the Humanists of 15th-century Florence, Ferrara, etc.

ITAL 1320. Great Authors and Works of Italian Renaissance.
The major authors and trends of 16th-century Italy (Machiavelli, Guicciardini, Ariosto, Tasso, classicism and anti-classicism, petrachism, mannerism).

ITAL 1340. The Panorama and 19th-Century Visual Culture. Throughout the 19th-century, the Panorama was a wildly popular 'vision machine,' the model for many later attractions from theme park rides to immersive educational spectacles like IMAX movies. In this course, we will use 21st-century vision technology to study the role of these cultural artifacts, optical media and storytelling devices in the shaping of 19th-century "virtual reality." We will focus on three case studies: the Garibaldi panorama at the Brown library; the panorama of the Pilgrim's Progress at the Saco, Maine museum; and the Whaling Voyage 'round the world, at the New Bedford Whaling Museum. Taught in English.

ITAL 1350A. Italian Mysteries and the New Italian Epic. "New Italian Epic" describes a body of literary works published in Italy between 1993 and 2010. Blending fiction and non-fiction, many of these works investigate shady aspects of Italian history and society, such as organized crime and political corruption. The term has also been applied to cinematic works such as Garrone's film Gomorrha (based on Saviano's best seller of the same name) and other multi-media hybrids such as TV series and "narrative theatre." We will explore this textual/visual minicorpus, within the context of the Berlusconi era. Taught in Italian.

ITAL 1350B. Non Fiction. What is fiction and what is nonfiction? How to read a nonfictional text (diary, description, memoir, etc). Examples from well known Italian writers and further examples from photo and documentary cinema. Taught in English.

ITAL 1360. Renaissance Italy.
This course explores the history of the Italian Renaissance, a period of remarkable intellectual, artistic, and cultural change between the fourteenth and the sixteenth centuries. Renaissance innovations will be considered in a broad context: how did the Renaissance happen and how far did its transformations extend in society? Course topics include the changes in learning, art, political theory, and science, as well as transformations in family life, court culture, urban and rural society. Enrollment limited to 40.

ITAL 1380. Italy: From Renaissance to Enlightenment.
Between 1500 and 1800, Italians made significant contributions to European debates about the boundaries between orthodoxy and heresy; the legitimacy of social and gender hierarchies; the future of republics in an age of empires; and the possibilities for reform. Works by Machiavelli, Bemini, Galileo, Tarabotti, Goldoni, and Beccaria (among others) enrich this survey of ealry modern Italian history.

ITAL 1390. Modern Italy.
Examination of Italian society, culture, and politics over the past two centuries. Topics include: the struggle to unify Italy in the 19th Century; the creation of a national identity; the political role of the Catholic Church; changing family life and gender relations; conflict between North and South; Mussolini and the fascist venetronic; and the struggle for political stability over the past 50 years.

ITAL 1400A. "Italian (Mediterranean) Orientalisms" Major Italian Writers and Filmmakers. Major Italian writers and filmmakers (including Amelio, Antonioni, Bertolucci, Celati and Pasolini) have attempted to incorporate non-European (African, American, Asian or Balkan) perspectives in their work (fiction, travelogues, documentaries etc.). The course will discuss these works, giving particular attention to their reception in the cultures they portray. Subtitled films, readings and discussion group in English.

ITAL 1400B. Fascism and Antifascism: Culture and Literature between the Two World Wars.
Introduces and examines the most significant aspects of literary, cultural, and political life in Italy between the two world wars. The most significant tendencies in the various literary genres (novel, descriptive prose, mass market fiction, propaganda, poetry) are considered against the backdrop of a general historical and literary overview and situated in the context of the debate carried forward by the most important literary periodicals of the '20s, '30s, and '40s, from La Ronda to Solar. 
ITAL 1400C. Literature and Adolescence.
From Collodi's *Pinocchio* and De Amicis's *Cuore* to works by Saba, Pavese, D'Arzo, Moravia, and Calvino, the course focuses on some of the most remarkable literary treatments of childhood and coming of age in late 19th- and 20th-century Italian literature. In Italian.

ITAL 1400D. Photography and Literature: Italian Examples of an Uncanny Relationship.
The course will explore the interrelation of Italian Literature and Photography from early Moderism (Luigi Pirandello) to post-Modernism (Antonio Tabucchi). Major theoretical essays on photography (Sontag, Barthes) will set the stage for close readings of narrative texts by two of the most important authors of Twentieth Century Italian literature.

ITAL 1400F. Twentieth Century Italian Culture.
Contact the department for course information.

ITAL 1400H. Early Modern Italy.
A survey of Italian history between 1500 and 1800. Italy's varied political cultures from absolutism to republicanism; impact of Catholic reformation and the baroque; the woman's question and transformations in family life and the social order; the contribution of Italian writers to the debates of the Enlightenment and ordinary people to social change in the eighteenth century.

ITAL 1400I. Rituals, Myths and Symbols.
The course will analyze the diverse forms of sacralization and the esthetics of politics utilized by nationalism and Italian fascism to encourage participation by the masses in a collective liturgy. The study will begin with the Risorgimento and the nationalization of the Italians. It will then turn to the end of the nineteenth century and the period preceding the First World War with the birth of futurism and the Nationalist Party. It will look at the fascist creation of a symbolic-monumental machinery capable of inventing new rituals of or re-elaborating old myths and giving life to innovative symbolic forms. The final part will be dedicated to the years of the regime and the progressive acceleration of its fascistization of society. The analysis from inside the symbolic universe of these political movements will instead be effected through the study of culture, art, the collective imaginary, the lifestyles, the dispositions, the ceremonies, the cults and the rites of these two new lay and secular religions.

ITAL 1400J. The Many Faces of Casanova.
Philosopher or charlatan, magician or trickster, seducer or seduced, Casanova's life contains multitudes. His name, unlike those of Sade or Sacher Masoch, does not designate a " perversion," but a sort of exuberant hetero-sexual "normalcy." He is the Venetian alter-ego (and possibly real- life inspiration) of Mozart's Don Juan. In this course, we will dissect the myth of Casanova, from his own monumental autobiography to novels, films and plays which cast him as protagonist (films by Federico Fellini, Ettore Scola, Lasse Hallström, impersonations by Donald Sutherland, Marcello Mastroianni and Heath Leger). Lectures in English; discussion group in Italian.

ITAL 1400K. Italy as Other.
This course traces the variety of ways in which Italy has been viewed as the Other of the European and American imagination. We will read some of the key texts in a long tradition that traverses a broad spectrum of disciplinary fields: literature, art history, travel narrative and cinema. Works include the writings of De Stael, Goethe, Stendhal, James among others.

ITAL 1400L. History of Masculinity and Femininity from the Unification to 1968.
The first part of the course will concentrate on gender and queer studies to provide students with a general theoretical framework of these topics. It will then focus more specifically on the analysis of the evolution of sexuality, homosexuality, masculinity and femininity from the Unification of Italy until 1968. An interdisciplinary approach will be adopted using novels, films, newswreels, paintings, sculptures, manifestoes and advertising posters. Anthropology, art, literature, politics and history will be interwoven in order to reveal changes and continuities in the image of woman and man and the dynamics of the relationship of couples. Finally ample space will also be given to the medical and judicial treatment of these topics and to the transformation in lifestyles and the collective imaginary. Using this historical approach fosters understanding of how the dichotomous and hierarchic distinction between sexual norm and transgression becomes an essential paradigm of scientific, political, religious, judicial and artistic thought. Course is taught in Italian. DPLL

ITAL 1400M. Giorgio Agamben and Radical Italian Theory.
This course is dedicated to a close reading of the work of the Italian philosopher Giorgio Agamben and to an analysis of what has come to be known as "radical Italian theory." We will read the major works by Agamben, some key texts by other thinkers who were influential for Agamben (Carl Schmitt, Walter Benjamin, Michel Foucault etc), as well as other theorists who play an important role today in Italy: Roberto Esposito, Antonio Negri, Paolo Virno among others.

ITAL 1400P. The Southern Question and the Colonial Mediterranean.
This course examines Antonio Gramsci's interpretation of the Southern Question (quistione) in an attempt to better understand the politics and culture informing the colonial Middle East. Through an analysis of Gramsci's critique of Southernism—the representation of Southern Italy as a semi-barbarous territory inhabited by "biologically inferior beings"—and his sociological description of pre-World War II Italy, we will acquaint ourselves with some of the key-concepts characterizing his political thought. Next, we will examine how critics of European colonialism in the Mediterranean have adopted this rich epistemological and analytical vocabulary. DPLL WRIT

ITAL 1400Q. From Neorealism to Reality TV.
This course explores the development of the aesthetic of reality in audiovisual media from film to television and portable screens in the context of modern Italian history while tackling notions of the pervasive infiltration of mass mediatic imagination into reality. The appeal and power of the medium to capture, show, and imbricate reality is intricately related with modes of production and distribution, social/ethical discourse, and any current political order. We will analyze the deployment of 'reality' on screen from the post WWII neorealist redemptive project after Fascism, through the contaminated explorations of art cinema, to television's twisted tales of reality.

This course examines the politics of sexuality and the sexuality of politics in Italy between the Renaissance and the Enlightenment. Italy's urban settings saw the development of some of the most sophisticated political systems in Europe, and issues of gender identity and sexual practices figured prominently in the political symbolism, political criticism, legal and social orders of these regimes. Lectures and course discussions also explore everyday practices and their implications for defining and defying the social and political norms of gender and sexuality in early modern Italy. Suggested prerequisites are HIST 0010 or any Italian Studies course at level 1000 or above. No prerequisites are required. Lectures in English. Discussion groups in English and Italian.
From folktales to rebel songs, carnival play and everyday rituals, popular culture shaped the lives of ordinary people of the early modern world. In this course we explore the materials available at Brown for examining popular culture before 1800. Students write a final paper from the materials they select. Italy will be examined comparatively with other geographical areas in order to prepare students for their research. Topics will include the multiplicity of popular cultures; the relationship between popular culture and elite culture; transformations in the beliefs, rituals, and practices that provided meaning for peoples of the early modern world. (P) WRIT
ITAL 1431. Truth on Trial: Justice in Italy, 1400-1800 (HIST 1262M).
Interested students must register for HIST 1262M.
ITAL 1550. Italian Representations of the Holocaust.
A survey of some of the most important texts (fiction, history, philosophy, films) that deal with both the Holocaust in Italy, and representations of the Holocaust by Italians. Readings include Levi, Bassani, Loy, Agamben; films those of Benigni, Caveni, Wertmuller. There will also be discussion of the aesthetic and political complexities regarding portrayals of the Holocaust, such as trauma, witnessing, historical truth, kitsch. Taught in English, with the possibility of a section in Italian. WRIT
ITAL 1550B. Topics in the Early History of Printmaking: Festival and Carnival (HIAA 1550B).
Interested students must register for HIAA 1550B.
ITAL 1560A. Italy and the Mediterranean (HIAA 1560A).
Interested students must register for HIAA 1560A.
ITAL 1580. Word, Image and Power in Renaissance Italy.
This undergraduate lecture class is designed to introduce cultural and historical perspectives on Italy from Siena in the Middle Ages to Venice in the High Renaissance. Team taught by professors of Italian Literature, Art History and History, we will move across Italy and the centuries focusing on monuments of literature, art, architecture, and history through different disciplinary lenses. In English. WRIT
ITAL 1590. Word, Media, Power in Modern Italy.
The role of media (print, news, art, music, photography, cinema, radio, television) in shaping national identity, nationalistic agendas, imperial aspirations, democratic revivals and populist consensus in Italy, from the post-Risorgimento age to the Fascist regime, and from the post-WW2 renaissance to the "decadent" Berlusconi era. The most influential genres and trends in Italian culture, from opera to futurism, from neo-realist cinema and literature to post-modern fashion and industrial design, will be analyzed against the backdrop of the most important social and political turning points of Italian and European history.
ITAL 1610. The Divina Commedia: Inferno and Purgatorio.
A close reading of the first two canticles of Dante's poem in the light of contemporary European and American critical interpretations. In Italian. Enrollment limited to 40.
ITAL 1620. The Divina Commedia: Dante's Paradiso: Justifying a Cosmos.
Close study of the third and final part of Divine Comedy, in which Dante unfolds how, in his view, the planetary and stellar spheres condition human life and fashion the Providential plan of history. There will be ancillary readings from Dante's other works: Convivio, the Monarchia, and the Epistles. In Italian. Prerequisite: ITAL 0500 or 0600, or instructor permission. Enrollment limited to 40.
ITAL 1920. Independent Study Project (Undergraduate).
Undergraduate Independent Study supervised by a member of the Italian Studies Faculty. Students may pursue independent research in order to prepare for their honors thesis or honors multimedia project, or they may enroll in the course in order to work individually with a faculty member on a specific area of Italian Studies not covered in the current course offerings. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
ITAL 1990. Senior Conference.
Special work or preparation of an honors thesis under the direction of a member of the staff. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.
ITAL 2050. Microhistory.
Microhistory emerged in the 1970s in Italy, but was quickly embraced by scholars across the globe. Microhistory questioned totalizing explanations of historical change; rejected anachronism in all forms; and recovered the voices of individuals left out of traditional historical narratives. This course explores and critiques the method. Participants write an article in their area of interest, informed by microhistory.
ITAL 2100. Introduction to Italian Studies.
This seminar, a requirement for graduate students in Italian Studies, has three objectives: 1) to provide a panoramic view of the current research in the interdisciplinary field of Italian studies (literature, history, arts and media); 2) to provide a picture of the professional state of the field, within the framework of more global developments in academia and the job markets; 3) to provide useful information about the resources and the new tools and techniques for research available to students at Brown and elsewhere (special collections in the Brown libraries, digital resources such as data bases, electronic journals, web projects, etc.).
ITAL 2130A. Dante's Paradiso.
A close reading of the third canticle of the Commedia in its medieval context. While not essential, a knowledge of the Inferno and the Purgatorio would be desirable. Open to qualified undergraduates.
ITAL 2130B. The Lyric of Petrarch.
The style and structure of Petrarch's Canzoniere and Triumphi and their relationship to Latin and Romance precedents. In Italian.
ITAL 2150C. Monographic Studies in Major Sixteenth- and Seventeenth-Century Authors.
Renaissance thought. From Pico della Mirandola to Giordano Bruno.
ITAL 2160. Family History: Early Modern Methods and Sources.
This course examines the world's oldest institution during the early modern period (1500-1800). Italian scholars have been especially innovative in advancing our understanding of the early modern family, relying on legal, quantitative, religious, literary, and visual sources in their efforts. Students may concentrate in their longer essay on controversies in family history currently debated in or beyond the Italian context.
ITAL 2170A. Seminar on Giacomo Leopardi.
Word and image, thought and feeling in the poetry (Canti), dialogues (Operette Morali), and philosophical writings (Pensieri, Zibaldone) of one of the major figures of European Romanticism. In Italian.
This course examines the world’s oldest institution during the early modern period (1500-1800). Italian scholars have been especially innovative in advancing our understanding of the early modern family, relying on legal, quantitative, religious, literary, and visual sources in their efforts. Students may concentrate in their longer essay on controversies in family history currently debated in or beyond the Italian context.
ITAL 2190A. Carducci, Pascoli and D'Annunzio.
Close textual reading of the poetic works of the three great Italian Victorians. In Italian.
ITAL 2190B. Fascism and Antifascism: Culture and Literature between the Two World Wars.
No description available.
ITAL 2190C. La Poesia del Novecento (Twentieth-Century Italian Poetry).
No description available.
ITAL 2190D. Non Fiction. What is fiction and what is nonfiction? How to read a nonfictional text (diary, description, memoir, etc). Examples from well-known Italian writers (Campana, Ortese, Delfini, Calvino, Celati, Bompiani) and further examples from photo and documentary cinema. All texts, films, and lectures are in Italian.

ITAL 2190E. Problems and Figures from 1860 to the Present. Modern Italian poetry.

ITAL 2190F. Reading Recent Italian Fiction. "Reading" here implies a special kind of attention to the linguistic formulation of the text and the construction of an imaginary hypertext based on the stimuli the text provides. The instructor exemplifies the process and students construct hypertexts of their own based on the texts. Of particular interest is the openness and interpretive richness derived from the readers not belonging to the cultural context in which the texts were produced.

ITAL 2220. New Perspectives on Fascism. Examines the new light shed by recent research on Italian Fascism, placing Italy’s Fascist ventennio (1922-45) in a larger European context. Among the questions to be addressed: What explains Mussolini’s rise to power and his ability to stay in power? To what extent did Italians become Fascist? What role did force play in ensuring popular allegiance to the regime? What role did the Church play? Did Fascism remake concepts of gender? Attention will be paid to the role of the media, writers, intellectuals, and the arts. Comparison with Nazi Germany and other regimes labeled “Fascist” will be explored.

ITAL 2300. Seminar in Italian Literature, Culture, and Criticism. This seminar focuses on some of the most important contributions made to critical theory made by modern Italian thinkers, beginning with Antonio Gramsci and ending with Giorgio Agamben. Readings include, other than Gramsci and Agamben, works by Antonio Negri, Roberto Esposito and Adriana Cavarero. Open to juniors, seniors, and graduate students.

ITAL 2450. Exchange Scholar Program.

ITAL 2540D. The Theater that was Rome (HIAA 2540D). Interested students must register for HIAA 2540D.

ITAL 2550. Gender Matters. This course examines the impact of gender as a category of historical analysis. Beginning with Joan Scott’s seminal work on the topic (1986), students assess its subsequent global impact. Two Italian issues are considered in this comparative context: Is gender analysis still gender analysis? How has the study of masculinity, sexuality, and queer studies opened new lines of inquiry? The recasting of women as moral beings and the experiences of Benvenuto Cellini will be used as case studies to examine these questions. Students work in their own geographical area for their final project. Open to seniors and graduate students.

ITAL 2820. Italian Studies Colloquium. The Italian Studies Colloquium is a forum for an exchange of ideas and work of the community of Italian scholars at Brown and invited outside scholars. Graduate students present their work in progress, and engage the work of faculty and visitors. They are expected to come prepared with informed questions on the topic presented. Presentations in both Italian and English. Instructor permission required.

ITAL 2900. Theory and Methods of Foreign Language Teaching. Theory and practice of foreign language learning and teaching (theory of language, language learning and acquisition, approaches, methods and techniques, curriculum design, materials development, testing and evaluation). In English.

ITAL 2970. Preliminary Examination Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ITAL 2980. Reading and Research. Courses on special subjects individually planned and supervised. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ITAL 2990. Thesis Preparation. For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

John Nicholas Brown Center for Public Humanities and Cultural Heritage

The John Nicholas Brown Center for Public Humanities and Cultural Heritage supports and strengthens the work of arts and cultural organizations that strive to preserve, interpret, and make the humanities meaningful and accessible. We do this through teaching, research and public engagement initiatives that connect individuals and communities to art, history, and culture. The Center offers innovative hands-on projects and educational programs, including professional development workshops and an Masters degree program, that help practitioners, students, and scholars who want to better understand and contribute to a vibrant culture.

The A.M. Program in Public Humanities

The Center for Public Humanities administers the master’s program in Public Humanities, degree granted by the department of American Studies (http://bulletin.brown.edu/americanstudies). This program offers a dynamic interdisciplinary opportunity for students interested in careers in museums, historical societies, cultural planning agencies, heritage tourism, historic preservation, and community arts programs.

Public Humanities Courses

The Center lists courses under the American Studies rubric: AMST. Our flexible program draws on Brown University’s open curriculum. Elective courses can be selected from approved 1000 and 2000 level courses offered at Brown or RISD. The disciplinary field or departments are not limited to Public Humanities/American Studies course offerings sponsored by the Center for Public Humanities, list as follows:

- AMST 1550 Methods in Public Humanities
- AMST 1903G Oral History and Community Memory
- AMST 1903Z Shrine, House or Home: Rethinking the House Museum Paradigm
- AMST 1904I Art/Place
- AMST 1904L Cultural Heritage, Curation and Creativity
- AMST 1904R New Narratives, New Media, New Museums
- AMST 1904U Museum Collecting and Collections
- AMST 2220D Museums in Their Communities
- AMST 2540D Methods in Public Humanities *required for the A.M.
- AMST 2650 Introduction to Public Humanities *required for the A.M.
- AMST 2651 The Responsive Museum
- AMST 2652 Community Documentary and Storytelling
- AMST 2653 Public Art: History, Theory, and Practice
- AMST 2656 Cultural Policy Planning
- AMST 2658 Releasing the Imagination in Public Humanities Practice
- AMST 2660 Projects in Public Humanities
- AMST 2680 Practicum in Public Humanities *required for the A.M.
- AMST 2690 Management of Cultural Institutions
- AMST 2691 Poetry in Service to Schools and the Community
- AMST 2693 Community Arts with Young People
- AMST 2695 Museum as Idea
- AMST 2697 Museum Interpretation Practices
AMST 2699 Digital Storytelling

Public Humanities Faculty

The Center appoints visiting faculty to teach Public Humanities curriculum via the Department of American Studies (http://bulletin.brown.edu/americans). For more information on the John Nicholas Brown Center for Public Humanities & Cultural Heritage, our current courses, faculty, events, exhibits, and initiatives, please visit our website at http://www.brown.edu/Research/JNBC/.

Joukowsky Institute for Archaeology and the Ancient World

Director

Peter van Dommelen

The Joukowsky Institute for Archaeology and the Ancient World is dedicated to the academic study and public promotion of the archaeology and art of the ancient Mediterranean, Egypt, and the Near East (the latter broadly construed as extending from Anatolia and the Levant to the Caucasus); our principal research interests lie in the complex societies of the pre-modern era.

Although the core efforts of the Joukowsky Institute are archaeological in nature and are located within this broadly defined zone, close ties with all individuals interested in the ancient world, and with archaeologists of all parts of the globe, are welcome and actively encouraged. Joukowsky Institute faculty and students are from a wide range of countries and backgrounds -- and Brown University’s fieldwork and research in archaeology and the ancient world reflects and builds on that multiplicity of perspectives.

The goal of the Institute is to foster an interdisciplinary community of interest in the archaeology of the ancient world, and in the discipline of archaeology more generally. Its mandate is to promote research, fieldwork, teaching, and public outreach, with the Institute’s associated faculty, students, and facilities serving as a hub for this activity.

For additional information, please visit the Institute’s website: http://brown.edu/go/archaeology

Archaeology and the Ancient World Concentration Requirements

The concentration in Archaeology and the Ancient World provides an opportunity to explore the multi-faceted discipline of archaeology while examining the critical early civilizations of the so-called ‘Old World’ – that is, the complex societies of the Mediterranean, Egypt, and Ancient Western Asia. Students will learn about the art, architecture, and material culture of the ancient world, exploring things of beauty and power, as well as the world of the everyday. Concentrators will also learn "how to do" archaeology - the techniques of locating, retrieving and analyzing ancient remains - and consider how material culture shapes our understanding of the past. Concentrators are encouraged to pursue research opportunities through summer fieldwork, museum experience, or independent study projects.

While the core focus of Archaeology and the Ancient World at Brown University is archaeology and art of the ancient Mediterranean, Egypt, and the Near East, this concentration encourages students to reach beyond this geographic area, to engage with Brown’s many strengths in history, epigraphy, art, ethics, engineering, religious studies, and the sciences – to name just a few. The concentration, with its three distinct but overlapping tracks, is intended to allow students flexibility in structuring their own path through this diverse field of study. All three tracks begin with the same introductory courses to upper-level seminars. It is expected that, in completing the requirements for this concentration, students will incorporate courses that offer new perspectives on the complex dynamics of social inequity, exclusion, and difference, and which encourage engagement with the community – both by enrolling in classes designated as Diverse Perspectives in Liberal Learning (DPLL) and through non-DPLL classes that explore similar themes. Research opportunities, through summer fieldwork, internships, museum experience, or independent study projects, are strongly encouraged.

Within this concentration, the three tracks are:

- **Archaeology and the Ancient World**: the most flexible of the concentration tracks, allowing students to explore any region or time period, and to develop their own areas of focus, such as museum studies, ethics and politics of the past, engineering and materials analysis, cultural heritage, or environmental studies.

- **Classical Archaeology**: for those interested chiefly in the ‘classic’ civilizations of the Mediterranean (especially Greece and Rome), as well as for those interested in both earlier (prehistoric) and later (medieval) periods in that geographic region.

- **Egyptian and Near Eastern Archaeology**: for those interested chiefly in the cultures of Egypt and the ancient Near East – Anatolia, the Levant, Mesopotamia – from prehistoric through Islamic times.

**Required Courses:**
The student must take a total of 10 courses, including:

**CORE REQUIREMENTS:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 0100</td>
<td>Field Archaeology in the Ancient World</td>
<td>1</td>
</tr>
<tr>
<td>ARCH 0150</td>
<td>Introduction to Egyptian Archaeology and Art</td>
<td>1</td>
</tr>
<tr>
<td>ARCH 0520</td>
<td>Roman Archaeology and Art</td>
<td>1</td>
</tr>
</tbody>
</table>

One introductory course in archaeological methodology and/or scientific approaches, preferably:

- ARCH 0100 Field Archaeology in the Ancient World
- ARCH 1900 The Archaeology of College Hill
- ANTH 0500 Past Forward: Discovering Anthropological Archaeology

One introductory course in ancient art history, preferably:

- ARCH 0030 Art in Antiquity: An Introduction
- ARCH 0150 Introduction to Egyptian Archaeology and Art
- ARCH 0520 Roman Archaeology and Art

One introductory ARCH course in Egyptian or Near Eastern archaeology, art, and/or architecture, for example:

- ARCH 0152 Egyptomania: Mystery of the Sphinx and Other Secrets of Ancient Egypt
- ARCH 0360 East Meets West: Archaeology of Anatolia

One introductory ARCH course in Classical or Mediterranean-archaeology, art, and/or architecture, for example:

- ARCH 0270 Troy Rocks! Archaeology of an Epic
- ARCH 0420 Archaeologies of the Greek Past

**TRACK REQUIREMENTS:**

In addition to the Core Requirements above, each of the three tracks requires six additional courses, which allow students to define their own areas of geographic and/or topical specialty.

**Archaeology and the Ancient World:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 0315</td>
<td>Heritage In and Out of Context: Museum and Archaeological Heritage</td>
<td>6</td>
</tr>
</tbody>
</table>

One ARCH course, of any level, that focuses on a particular thematic or theoretical topic pertaining to archaeology, for example:
One ARCH course, of any level, that focuses on a part of the world OTHER than Mediterranean, Egyptian, or Near Eastern OR focuses on a particular thematic topic pertaining to archaeology, for example:

- **ARCH 0335**  Archaeology of the Andes
- **ARCH 1170**  Community Archaeology in Providence and Beyond

One non-ARCH course which EITHER relates to the study of the ancient world OR to the discipline of archaeology. Outside courses are chosen with the approval of the Concentration Advisor from appropriate 1000 level (or above) offerings in other departments such as, but not limited to: Anthropology, Classics, Egyptology and Assyriology, Environmental Studies, Geological Sciences, History, History of Art and Architecture, Religious Studies.

**TOTAL (including Core and Track Requirements):** 10

1. All formally cross-listed courses, regardless of home department, can be considered ARCH courses and can fulfill the relevant concentration requirement(s). There is no limit on the number of cross-listed courses that can count toward the completion of a concentration.
2. Students who are doing a double concentration are allowed up to two courses that are also counted toward (i.e., overlap with) their second concentration to fulfill Archaeology concentration requirements.

**Fieldwork, Study Abroad, and Capstone Experiences**

Students are strongly encouraged to consider participating in a field project, most typically after sophomore or junior year. The Concentration Advisor and other faculty members can provide suggestions about how to explore and fund possible field projects. For each of the tracks, a capstone experience may be substituted for one of these required courses. With the permission of the Concentration Advisor, up to three successfully completed courses, from relevant and accredited study abroad programs, may be counted towards the concentration requirements. Field school courses that provide formal university transfer credit, and official transcripts, may also be used to fulfill concentration requirements.

**Honors Concentrations**

An Honors concentration in any of these tracks requires the successful completion of all the standard requirements with the addition of an Honors thesis. For the preparation of this thesis, students will ordinarily enroll in ARCH 1970 during the first semester of the senior year and ARCH 1990 during the second semester of the senior year (these courses may not be taken S/NC, nor may they be used to satisfy the standard requirements of the concentration). In order to qualify for honors, students must have received more A's than B's in concentration courses completed.

Honors concentrations are recommended for students considering graduate work in the discipline of archaeology. Any student interested in a course of graduate study should speak to the undergraduate concentration advisor as soon as possible, not least for advice about additional forms of preparation. Graduate work in the archaeology of the ancient world, for example, requires knowledge of appropriate ancient, as well as modern, languages. Students should start work on acquiring these skills as early as possible.

**The Honors Thesis**

The Honors thesis is an extended essay, usually of between 40 and 60 pages in length, researched and written under the supervision of a faculty advisor and second reader during the senior year (during which the student must be enrolled in ARCH 1970 in the Fall and ARCH 1990 in the Spring semester). Where appropriate, the advisor or the reader, but not both of them, may be in a unit other than the Joukowsky Institute for Archaeology and the Ancient World. The specific topic and approach of the thesis are worked out between the student and the thesis advisor, with assistance from the student's second reader. This process should begin in the latter part of the student's junior year.
A preliminary title and one page outline of the proposed Honors thesis is due to the Concentration Advisor and the thesis advisor by May 15th of the junior year.

The deadlines for thesis drafts, and for final thesis submission, will be agreed between the student and the faculty advisors. The deadline for final thesis submission typically should be on or before April 15th, and must be no later than the first day of Reading Period in the final semester of senior year. Both a bound and an electronic version of the final thesis must be submitted to the Joukowsky Institute by May 1, via email to joukowsky_institute@brown.edu.

The completed thesis will be evaluated by the advisor and second reader, who will discuss its strengths and weaknesses in a joint meeting with the student; they will then make a recommendation concerning Honors, and also agree a grade for ARCH 190.

The Honors concentrators will be asked to make a short public presentation about their work; this event will be organized by the Concentration Advisor, and usually occurs during or shortly after Reading Period.

Evaluation

The Director of Undergraduate Studies will review the student’s overall record, in addition to the thesis evaluations. If all requirements have been successfully met, the recommendation will be made that the student graduates with Honors.

Archaeology and the Ancient World Graduate Program

The Joukowsky Institute offers graduate study leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) in Archaeology and the Ancient World.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/archaeology-and-ancient-world-0

Courses

ARCH 0030. Art in Antiquity: An Introduction.
What went into the creation of the Parthenon? Who lived in the Tower of Babel? Why do we still care? This course offers an introduction to the art, architecture, and material culture of the ancient world. Things of beauty and of power will be explored, from Egyptian pyramids and Near Eastern palaces, to the ‘classical’ art of Greece and Rome.

ARCH 0033. Past Forward: Discovering Anthropological Archaeology (ANTH 0500).
Interested students must register for ANTH 0500.

ARCH 0050. Archaeological Field Work.
Focuses on the aims, scope, and tools of field archaeology, and the nature of archaeological evidence. Emphasizes interdisciplinary field work techniques and the composition, function, and responsibilities of an excavation staff. Examines systematic versus ad hoc excavations and their respective problems of preservation. Students excavate model sites in a laboratory and present a team report upon completion.

ARCH 0100. Field Archaeology in the Ancient World.
Always wanted to be Indiana Jones? This course, focusing on the Mediterranean world and its neighbors in antiquity, interprets field archaeology in its broadest sense. In addition to exploring “how to do” archaeology - the techniques of locating, retrieving, and analyzing ancient remains - we will consider how the nature of these methodologies affects our understanding of the past.

ARCH 0150. Introduction to Egyptian Archaeology and Art.
An introductory survey of the archaeology, art and architecture of ancient Egypt, ranging in time from the prehistoric cultures of the Nile Valley through the period of Roman control. While the course will examine famous features and characters of ancient Egypt (pyramids, mummies, King Tut), it will also provide a wide-ranging review of the archaeology of this remarkable land.

ARCH 0152. Egyptomania: Mystery of the Sphinx and Other Secrets of Ancient Egypt.
The pyramids, tombs, and mummies discovered during the first excavations in Egypt created a colorful but highly romanticized image of this Land of the Pharaohs. More recent archaeological research has unearthed new details about the daily lives of the workers who built those pyramids, or Egypt’s cultural and economic connections throughout the Mediterranean. This course will explore how both early and recent archaeology has enriched our perception of the Gift of the Nile, while still leaving more mysteries yet to solve. FYS WRIT

ARCH 0155. People Without History: Archaeology of Atlantic Africa and the Diaspora.
Too often ‘Western’ historical narratives consider Africans and African Diasporans as ‘People Without History’. Such a notion also refers to peoples who cultures do not, or possess few formally written histories. This class employs archaeological evidence in order to dismantle the colonial library, exploring local histories that have been erased, silenced and marginalized, investigating histories of imperialism, colonialism, genocide, slavery, resistance and black nationalism. Enrollment limited to 50.

Interested students must register for HIAA 0770.

ARCH 0160. Buried History, Hidden Wonders: Discovering East Asian Archaeology.
What do Peking Man, human sacrifice, buried armies, lost cities, and silk routes have to do with one another? All are part of the rich and variegated legacy of East Asian archaeology, which is today being re-written by spectacular new discoveries little known to the West. Beginning with Asia’s earliest hominin inhabitants, this course will explore the origins of agriculture, early villages and cities, ancient writing systems, and changes in ritual practice through time. We will also discuss the current state of archaeological research in Asia, focusing on site preservation and the political roles of archaeology.

ARCH 0162. Introduction to Chinese Art and Culture (HIAA 0040).
Interested students must register for HIAA 0040.

ARCH 0200. Sport in the Ancient Greek World.
Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education. FYS

ARCH 0201. Sport in the Ancient Greek World (CLAS 0210O).
Interested students must register for CLAS 0210O.

ARCH 0201L. Who Owns the Classical Past? (CLAS 0210L).
Interested students must register for CLAS 0210L.

ARCH 0203. Who Owns the Past? (ANTH 0066D).
Interested students must register for ANTH 0066D.

What is a fake? Who gets to decide what is authentic? Greek statues, Chinese bronzes, Maya glyphs. Have fraudulent objects always existed? Galleo’s signature, a centaur’s skeleton, Buddhas bearing swastikas. Are all fakes the same? If not, how are they different? Why do people make forgeries? This course explores the history of the inauthentic through a diachronic exploration of objects. FYS WRIT

Interested students must register for HMAN 0900B.

ARCH 0250. Intimate Stories.
Images tell stories that carry us to imaginary worlds other than our own. An arresting story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity many architectural monuments displayed pictorial narratives that animated public spaces and enthralled broad audiences. This course explores cultural aspects of visual narrative imagery from Western Asian and Mediterranean worlds. FYS
ARCH 0270. Troy Rocks! Archaeology of an Epic.
What do Brad Pitt, Julius Caesar, Dante, Alexander the Great, and countless sports teams have in common? The Trojan War! This course will explore the Trojan War not only through the archaeology, art, and mythology of the Greeks and Romans but also through the popular imaginings of cultures ever since, to figure out what “really” happened when Helen ran off and Achilles got angry and the Greeks came bearing gifts. Enrollment limited to 20 first year students. FYS.

ARCH 0293. Postcolonial Matters: Material Culture between Colonialism and Globalization (ANTH 0066T).
Interested students must register for ANTH 0066T.

The manufacture of artifacts distinguishes us from all other species. However, archaeologists often struggle with interpreting material culture. This course will use case-studies to examine the artifacts that archaeologists most commonly recover: lithics, pottery and metallurgy, as well as glass, wood and bone. Students will consider the importance of archaeological material culture and the technological processes that produce these artifacts in aiding us to comprehend our human past. Enrollment limited to 20.

The course will explore a range of approaches -- material culture studies, science studies, design studies, consumption studies, the sociology of technology, archaeology, phenomenology -- in dealing with 13 things: the wheel, a Neolithic Megalith, an Ancient Greek perfume jar, the castle of Acrocorinth, Greece, a Moroccan watermill, a map, the pocket watch, barbed wire, the light bulb, a surgical blade, the portable radio, a Leica IIC 35mm camera, and the personal computer. Returning to the etymology of a thing, the course argues that things are best conceived as gatherings of achievements that are neither wholly exclusive to any single era nor any immediate set of relations.

ARCH 0302. Object Histories: The Material Culture of Early America (HIST 0550A).
Interested students must register for HIST 0550A.

ARCH 0303. tiny: Miniature Might and Meaning.
Egyptian pyramids, Roman aqueducts, Easter Island heads—colossal artifacts are immediately recognizable as embodiments of power. The diminutive—though less theorized among archaeologists, anthropologists, and art historians—is just as potent and alluring. Even across vast stretches of space and time, tiny things enchant and incite wonder. A microscopic Bible, a Renaissance micro-mosaic, a sculpture of hell complete with sinners carved out of a human tooth. This course is a cross-cultural exploration of the power of the miniature, the undersized, the teeny-weeny.

ARCH 0305. Glass from the Past: Glimpses into the History, Technology, and Artistry of Molten Material Culture
Glass is unquestionably a fundamental part of modern life, but what is the story of glass and what makes it special? We will trace the 5000-year history of glass, from its discovery in the third millennium BC to its mass production in the 19th-20th centuries, exploring themes like technology, innovation, and craft. Archaeological and art historical evidence will be combined with anthropological and ethnographic approaches, including discussions with artisans, museum visits, and trips to the RISD "hot shop" to see glassblowers in action. Enrollment limited to 20.

ARCH 0307. Gold: The Culture of a “Barbarous Relic” (ANTH 0250).
Interested students must register for ANTH 0250.

ARCH 0311. Death and the Afterlife in the Ancient World (RELS 0750).
Interested students must register for RELS 0750.

ARCH 0315. Heritage In and Out of Context: Museum and Archaeological Heritage.
We understand the past in part through a complex blend of artifacts, monuments, and landscapes. Yet each of these categories poses major issues regarding their preservation, conservation and curation, and how we use them to educate and to indoctrinate. This course will not preach any specific line, but encourage students to debate these highly complicated issues. Case studies will include the international diaspora of antiquities from the Enlightenment to the present, the impact of war and revolution, and numerous aspects of museum practice. Enrollment limited to 50.

ARCH 0320. Media in Archaeology, or Archaeology in Media?.
Indiana Jones, Lara Croft, the Discovery Channel: media has, to an unprecedented degree, shaped public perceptions of the discipline of archaeology, its practices and its values. This course will build critical awareness of how the media uses archaeology and how archaeologists use the media, for good and ill. Students will create digital narratives from their own research, and become competent ambassadors for presenting archaeological research and work in a scientific and engaging way. Enrollment limited to 40.

ARCH 0325. Dead White Guys: Greco-Roman Civilization and American Identity.
Why does classical antiquity matter? How did a group defined as white and European come to represent America’s ancestors? And by emphasizing this “heritage,” who do we exclude? This course looks at film, popular non-fiction, education policy, public art, architecture, and archaeology, to understand how the myth of Greco-Roman origins was adopted by America’s founders, and how this affects issues of race and belonging today.

ARCH 0332. Classic Mayan Civilization (ANTH 0520).
Interested students must register for ANTH 0520.

ARCH 0334. Introduction to South American Archaeology (ANTH 0505).
Interested students must register for ANTH 0505.

ARCH 0335. Archaeology of the Andes.
Provides a survey of the archaeology of the Andean region of South America (parts of modern-day Peru, Bolivia, Ecuador, Chile, Colombia, and Argentina). From the arrival of the first Americans to the transformation of indigenous societies under Spanish rule, the course will introduce vital “new World” civilizations such as the Moche and Inka. The course will also explore the politics and practice of archaeological research in the region today. Enrollment limited to 55.

ARCH 0338. An Archaeology of Native American Art (ANTH 0066U).
Interested students must register for ANTH 0066U.

ARCH 0340. Bad Things: Archaeologies of New World Vices.
Drinking, smoking, prostitution, gambling, chocolate, and witchcraft – this may sound like a lot of fun, but are these bad things? Since the first European contact in the Americas, colonists were introduced to new substances, practices, and worldviews and brought their own vices to new territories. This course will use material culture to analyze the everyday lives of these New World inhabitants who were so good at being so bad; we will also discuss how colonial discourse and histories affect our lives today. WRIT

ARCH 0351. Introduction to the Ancient Near East (ASYR 0800).
Interested students must register for ASYR 0800.

ARCH 0360. East Meets West: Archaeology of Anatolia.
The crossroads between East and West in the ancient Mediterranean, Anatolia (modern Turkey) gave rise to the great Hittite Empire, the legendary kings Croesus and Masis, and was the scene of battles between Greeks, Persians, Romans, Byzantines, and Turks for world supremacy. In this course, we survey the archaeological history of human settlement in Anatolia from the Ice Age to the Middle Ages, tracing changes in art, economy, landscape, and religion.
ARCH 0370. Before the Islamic State: The Archaeologies of Ancient Mesopotamia
Front-page news stories report the often-horrific actions and assertions of the Islamic State of Iraq and Syria (ISIS). This part of the world -- ancient Mesopotamia, the "cradle of civilization" -- is home, however, not only to modern geopolitical conflict, but to the world's often equally violent earliest states and empires. This class introduces students to the archaeology and history of this extraordinarily rich region, whose cultures also pioneered the development of writing, astronomy, mathematics, urbanism, and beer.

ARCH 0380. Archaeology of Iran.
An archaeological survey of the origins and development of the Iranian civilizations. Analysis of settlements, history, art, architecture, and characteristics of specific archaeological sites and their artifacts ranging from prehistoric to the Hellenistic period.

ARCH 0382. Pre-Islamic Empires of Iran (HIAA 0031).
Interested students must register for HIAA 0031.

ARCH 0390. Archaeology of Palestine.
Traces the prehistory of Palestine (modern Israel, Syria, Lebanon, Jordan) from its beginnings in the Paleolithic to end of the Byzantine period. Surveys history of archaeological research in this area, emphasizing significant excavations and their artifacts. Develops an understanding of the art, architecture, and modes of life of humankind from age to age, the changes introduced from one period to another, and causes and effects of those changes.

ARCH 0400. City and Sanctuary in the Ancient World.
Examines the physical dimensions of the ancient city and the ancient sanctuary through archaeological evidence with special attention to aesthetic planning, urban planning and management, and the concept of public monumental art as developed in the ancient world.

ARCH 0402. Muslims, Jews and Christians in Medieval Iberia (HIAA 0460).
Interested students must register for HIAA 0460.

ARCH 0405. State of Siege! Walls and Fortifications in the Greek and Roman World.
Warfare was endemic in the ancient world, and walls were therefore ubiquitous. This course will examine the most spectacular fortifications of the Graeco-Roman world, from Bronze Age citadels in Greece to the Roman frontiers. We will learn how to build walls and fortresses, how to defend them, and how to breach them by studying some of the best walls and famous sieges of Antiquity. Enrollment limited to 50.

ARCH 0407. Hadrian's Wall: Archaeological Skills, Methods, and History on the Northern Roman Frontier.
Explore the archaeology of one of Great Britain's grandest monuments, Hadrian's Wall, from the beginning of the fortification in 122AD to the present. Students will learn the basics of archaeological excavation, survey, and illustration, through hands-on, in-class labs -- to understand the real, tangible ways archaeology can teach us about religion, race, the military, politics, architecture, and the everyday lives of people in Roman Britain. Note: this course can fulfill the archaeological methodology (field archaeology) requirement for Archaeology concentrators. WRIT

ARCH 0410. Mediterranean Bronze Age
Snake goddesses and bull leaping, labyrinths and gold masks, Linear B and Homeric heroes: these are only some of the most famous things about the Minoan and Mycenaean cultures of Bronze Age Crete and Greece. This class will also explore questions about the historicity of the Trojan War, trade and exchange; ritual landscapes; the origins of writing; death and burial; the eruption of the Thera volcano; and the collapse of the Mycenaean palaces.

ARCH 0412. From Gilgamesh to Hector: Heroes of the Bronze Age.
Swift-footed Achilles, god-like Hektor, and Gilgamesh the tall, magnificent, and terrible! They are heroes of the Bronze Age, which produced the world's first cities, empires, and texts. This class explores the concept of "hero" by placing it within its eastern Mediterranean Bronze Age context, using archaeological evidence alongside contemporary and later textual evidence. WRIT

This course is about the Mediterranean Iron Age. It examines indigenous communities of the first millennium BC in order to assess critically conventional and often stereotypical representations of Iron Age societies. Themes to be explored include the ever increasing social complexity of chieftains and states, princely burials and warriors, and urban settlements and monumental architecture that allegedly mark the transfer of "civilization" from East to West.

ARCH 0420. Archaeologies of the Greek Past.
The Onion once reported that ancient Greek civilization was a complete modern fraud, since obviously no one culture could have invented so much, not least all that Great Art and Architecture. But they did. This course will explore the material world of ancient Greece, from the monumental (the Parthenon) to the mundane (waste management), and everything in between. Enrollment limited to 50. WRIT

ARCH 0423. Monuments and Monsters: Greek Literature and Archaeology (COLT 0811H).
Interested students must register for COLT 0811H.

ARCH 0425. The Agora: History at the Heart of Athens.
Part city hall, part church, part mall, part stadium, part law court, part red light district, the Agora of ancient Athens has seen it all, from Neolithic to modern times. This "marketplace" is most famous for its Classical history, when figures such as Pericles, Socrates, and Demosthenes walked and talked there. This course, however, will consider the long life and impact of this civic space, including its ongoing and often problematic archaeological heritage. Enrollment limited to 50.

ARCH 0440. Archaeologies of the Ancient "Middle East".
What were Neanderthals really like? Why stop hunting and start farming? This course will explore these and other questions through an examination of the earliest archaeologies of the Middle East. Topics will include the evidence for the first hominids and humans in the region, the nature of hunter-gatherer existence, the origins of cultivation and pastoralism, and the rise of social inequality.

ARCH 0450. Archaeology of Jerusalem.
Examines the archaeology of the city of Jerusalem from David's conquest in ca. 1000 B.C.E. through the Crusaders' defeat in 1187 A.D. The contemporary literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods.

ARCH 0520. Roman Archaeology and Art.
Anyone who has ever watched 'Gladiator', ' Spartacus', 'Life of Brian' or 'Bugs Bunny: Roman Legion Hare' has some image of Rome, the Romans and their empire. This course, while exploring and assessing these influential popular preconceptions, introduces a more balanced view of Roman archaeology and art, examining not only the 'eternal city' of Rome, but its vast and diverse imperial domain.

ARCH 0523. Roman Art and Architecture: From Julius Caesar to Hadrian (HIAA 0340).
Interested students must register for HIAA 0340.

ARCH 0525. The Other Side of Rome: Daily Life in the Roman Empire.
What did the Romans ever do for us? Toilets, bars, firefighters, and dry cleaning, to name just a few things. Surprisingly, daily life in the Roman empire was not too different from our own. This course will examine numerous aspects of Roman life -- including housing, street life, shopping, military, sanitation, and even sex -- largely from the perspective of the archaeological evidence, especially from some of the best preserved cities, Rome and Pompeii.

ARCH 0530. Hannibal ad Portas! Fact and Fiction on Carthage and the Punic World.
"Hannibal stands at the gates": Roman parents would terrify their children with these words. And many others have been haunted by Hannibal Barca: the Carthaginian general still fascinates the European imagination, not least his epic trek over the Alps with three dozen elephants. This course explores fact and fiction about Hannibal and his world, holding up historical and mythical records against hard archaeological evidence. Enrollment limited to 50.
ARCH 0535. Labor and Technology in the Roman World.
Recent television programs like the History Channel's "Engineering an Empire" depict the Romans as geniuses pursuing a "remarkably advanced" lifestyle, but who were the people behind these technological accomplishments and what were the implications for the average Roman? This course investigates the implications of Roman technology on daily life and labor. Topics include transportation and trade, agriculture, crafts production, mining, sanitation, and warfare. We will also explore issues concerning ancient and modern perspectives on Roman technology and labor. Enrollment limited to 20. WRIT

ARCH 0540. Ancient Rome: Art, Archaeology and Civic Life from the End of the Republic through the Early Empire.
This survey course will familiarize students with the art and architecture of Rome during the early Imperial era (ca. 40 BC – AD 140), through investigation of significant sites, monuments and museum collections in Rome and locations throughout southern Italy. Items considered will include both monumental and domestic architecture, wall painting, mosaics, sculpture, coins, epigraphic evidence, as well as maps and ancient sources.

ARCH 0542. The Visual Culture of Early Modern Rome (HIAA 0560).
Interested students must register for HIAA 0560.

ARCH 0550. Late Roman and Early Christian Art and Architecture.
An introduction to the relationship between Roman art and the art of emerging Christianity. The course begins with the Pantheon and ends with the Hagia Sophia.

ARCH 0563. Toward a Global Late Antiquity: 200-800 CE (HIAA 0321).
Interested students must register for HIAA 0321.

ARCH 0600. Archaeologies of the Muslim World.
Muslim societies are built upon a rich archaeological heritage that spans a region from Spain to China. Since the spread of Islam in the 7th century, its legacy of cities, monuments, and artifacts trace more than a millennium of cultural transformations among the various peoples and traditions of the Mediterranean, Middle East and beyond. Through discussion of major sites and hands on work with a collection of artifacts this course explores that heritage for what it can tell us about the social practices and historical processes that have formed the Muslim world.

Interested students must register for HIAA 0041.

ARCH 0650. Islamic Civilizations.
This introduction to early Islamic civilization will examine the interrelationship between the emerging Islamic religious tradition and the development of specifically Muslim social institutions, the role of ethnic and religious minorities, and the flowering of Islamic thought and material culture. Students will study archaeology, political and social histories, visual arts, and textual traditions to explore the evolution and institutionalization of Islam from Spain to Central Asia.

ARCH 0666. Cult Archaeology: Fantastic Frauds and Meaningful Myths of the Past.
The pyramids and Stonehenge built by aliens? The power of the Mummy's Curse? These myths couldn't be true... or could they? Cult Archaeology examines popular and fantastic interpretations of archaeological remains presented in the press and popular media. This course finds the logical flaws in pseudoscientific explanations and the biases that underlie them. Discover the "truth" about archaeology!

Avast ye scurvy dogs! Come study the barbarous buccaneers that roved the high seas of the Caribbean from the sixteenth to the eighteenth century: their daily lives and plundered goods, their ships and hideaways. We will explore the havoc piracy caused, and the legends left behind -- Blackbeard, Captain Morgan, and even Captain Jack Sparrow. Just as importantly, we will investigate the economics and geopolitics behind the rise of piracy, with an emphasis on the trans-Atlantic slave trade.

ARCH 0677. Pirates! Archaeologies of Piracy in the Atlantic World (ANTH 0515).
Interested students must register for ANTH 0515.

Shipwrecks, sunken cargoes, coastal ports: all contribute to our understanding of the maritime world of the past, not least that of the Mediterranean Sea. This course will explore the Mediterranean's ancient seafaring heritage over time, in particular by studying ancient ships and harbors as remarkable examples of social and technological innovation and enterprise. The methodological challenges faced by archaeologists working on underwater and coastal 'sites' will also be examined. Enrollment limited to 50.

ARCH 0680. Water, Culture and Power.
Water is the source of life. In the midst of global climate change, environmental crises over water resources, and increasingly ubiquitous political debates over water, we are beginning to recognize humans' complete dependence on water. This course investigates our long-term attachment and engagement with water using archaeology, environmental history, and visual, literary and historical sources. From sacred spaces around springs to ancient cities by the sea, we will explore the cultural and political aspects of water beginning with the Last Ice Age and ending with late antiquity. Enrollment limited to 50 undergraduates.

Interested students must register for HIAA 0081.

ARCH 0720. Pilgrimage and Travel in the Ancient World.
From Canterbury to Mecca, Rome to Lake Titicaca, throughout history people have traveled far and wide, often under difficult conditions, to visit sacred places. But who were these people, where and why did they go, and how did they get there? This course will explore the practice and pragmatics of pilgrimage, relying on material and literary evidence from modern and ancient case studies around the world. Enrollment limited to 20. WRIT

ARCH 0730. The Secrets of Ancient Bones: Discovering Ancient DNA.
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins and migrations, diseases, agriculture, and even the slave trade. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesopotamia and from the Paleolithic through recent history. Topics will include: genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; diasporas; extinction and de-extinction; and plant and animal domestication.

ARCH 0740. Revolutions and Evolutions in Archaeology.
Humankind has had a "revolutionary past" -- or so archaeology would lead us to believe. The earliest evidence for language, ritual, and the arts -- dating back to the extinction of the Neanderthals -- is known as the "Human Revolution". The time when hunter-gatherers became farmers? The "Neolithic Revolution". And when they started living in cities? The "Urban Revolution". This course will explore the historical reasons for these revolutionary labels, and consider instead these "revolutions" as gradual processes (or evolutions). Enrollment limited to 50. WRIT

ARCH 0750. Women in the Ancient Mediterranean World.
Women represent half of humanity, but they have been greatly underrepresented in studies of past cultures. This course examines not only what women of the Near East, Egypt, Greece, and Rome actually did and did not do, but also how they were perceived in society. Focusing on material and visual cultures, but also incorporating historical and literary evidence, we will investigate the complexities of women's lives in the ancient Mediterranean, as well as the roots of modern conceptions and perceptions of women. DPLL

ARCH 0770. Food and Drink in Classical Antiquity.
Everybody eats - but patterns of eating (and drinking) vary dramatically from culture to culture. This course traces the mechanics of food production and consumption in the ancient Mediterranean world, considers how diet marked symbolic boundaries and gender differences, and in general explores the extent to which the ancient Greeks and Romans "were what they ate."
ARCH 0771. Foragers, Farmers, Feasts, and Famines: An Anthropology of Food (ANTH 0880).
Interested students must register for ANTH 0680.

ARCH 0775. Farm to Table: Foodways and Gastro-Politics in the Ancient Near East. This course provides an introduction to the culture, economy, and politics of food in the ancient Near East. We will not only investigate the day-to-day mechanics of food production, cooking, and consumption; we will also develop an appreciation for changing food fashions, for the etiquette of eating and drinking, and for the complex world of gastro-politics. We will even explore the ancient kitchen using our own hands, mouths, and stomachs as a guide. WRIT

ARCH 0800. Alexander the Great and the Alexander Tradition. This course focuses on a single historical figure, Alexander the Great, using him as a point of departure for exploring a wide range of problems and approaches that typify the field of Classical Studies. How knowledge of Alexander has been used and abused provides a fascinating case study in the formation and continuous reinterpretation of the western Classical tradition.

ARCH 0801. Alexander the Great and the Alexander Tradition (CLAS 0810A).
Interested students must register for CLAS 0810A.

ARCH 1050. Old World and New World Perspectives in Archaeology. This course examines how archaeologists working on different sides of the world study the past. Archaeology in the Old World and New World has developed on parallel, but separate, trajectories. While these approaches share methods and theories, they often interpret archaeological data in alternative or even contradictory ways. In this course we will view archaeological topics from both perspectives, using examples from the Mediterranean and Mesoamerica, to try to better understand, and perhaps bridge the gap between, some of our differences. Prerequisite: An introductory course in archaeology, either through the Joukowsky Institute or the Anthropology department.

ARCH 1052. Global Historical Archaeology (ANTH 1620).
Interested students must register for ANTH 1620.

Interested students must register for ANTH 1670.

ARCH 1054. Indians, Colonists, and Africans in New England (ANTH 1624).
Interested students must register for ANTH 1624.

ARCH 1056. Indigenous Archaeologies (ANTH 1125).
Interested students must register for ANTH 1125.

ARCH 1100. Archaeology in the Age of Augustus. Rome's first Emperor, Gaius Octavian Augustus, ruled an empire stretching from Spain to Syria, from Britain to Egypt. Students will explore the social, artistic, and political successes and failures of this "golden age" of Rome's past. The course will assess a broad range of topics -- such as the creation of empire, art as propaganda, and the role of women -- within the context of Augustan ideology and history.

Interested students must register for CLAS 1120T.

ARCH 1105. The Face of Power: Representing Roman Emperors. The inoffible Augustus; Nero fiddling as Rome burns; Constantine the Christian emperor; the roster of Roman rulers includes some of ancient history's most beloved and notorious characters. Meet the men (and women!) who ran the Roman state, discover how art and architecture were used to craft a public impression of imperial power, and learn how material and literary sources have shaped emperors' post-classical reputations. This course will give special attention to how emperors attempted to appeal to diverse factions at home, while ensuring their power was legible to enemy competitors abroad.

ARCH 1107. Spectacle! Games, Gladiators, Performance, and Ceremony in the Roman World (HIAA 1304).
Interested students must register for HIAA 1304.

ARCH 1120. Pompeii. Pompeii is a dead city. Or is it? This course will explore what we can learn from Pompeii, and the neighboring communities also destroyed by the eruption of Vesuvius in AD 79. We will look at art, architecture (public and domestic), and all the many remains of "daily life" so uniquely preserved in these buried, but not forgotten, places.

ARCH 1120L. Archaeology of Feasting (CLAS 1120L).
Interested students must register for CLAS 1120L.

ARCH 1121. Archaeology of Feasting (CLAS 1120L). Interested students must register for CLAS 1120L.

ARCH 1121. Pompeii: Art, Architecture, and Archaeology in the Lost City (HIAA 1303).
Interested students must register for HIAA 1303.

Interested students must register for CLAS 1750S.

ARCH 1125. Building an Empire: The Sacred and Civic Architecture of Ancient Rome. The Colosseum, Pantheon, and imperial palaces loom large in our impression of Roman civilization. Roman architecture set the standard for some of the most iconic buildings in the West. This course will examine the rise and development of Roman architectural principles and analyze how they were employed to create such a lasting image of empire. We will consider technological advancements and territorial expansion, as well as the shifting political and religious dynamics that shaped Rome's buildings.

ARCH 1128. The Long Fall of the Roman Empire (HIST 1205).
Interested students must register for HIST 1205.

ARCH 1140. The Death of the Ancient City? Roman Cities After the Fall of Rome. As in our own increasingly urban-based world, cities were the engines driving the political and economic success of the Roman empire. But what happened to such places after the empire disintegrated and "fell"? This course will explore the varied fate of Roman cities in Late Antiquity (4th-7th centuries C.E.), a period witnessing numerous changes — from political fragmentation and "barbarian" invasion to "Christianization" — that directly impacted both the roles of cities and the organization of urban space.

ARCH 1150. Cities and Urban Space in the Ancient World. Using contemporary approaches to cities and urban space, this course will explore cities of the ancient Near Eastern and Mediterranean world. What makes a city and how do we define "urban"? How do cities start? Do cities die? What are the primary factors that affect their development? We will analyze not only how the development of cities responded to specific historical and geographical conditions, but also how cities in different times and places were surprisingly similar in form and social activity.

ARCH 1155. Cities, Colonies and Global Networks in the Western Mediterranean. How did cities develop? This course will explore the connections between colonialism and urbanism in the West Mediterranean of the first millennium BCE. It is taught in close conjunction with a parallel class in Barcelona, and includes a week-long field trip to Barcelona and Catalunya, with practical work at the site and museum of the ancient Greek foundation of Emporion (Spain). Enrollment limited to 12. Instructor permission is required.

ARCH 1160. The World of Museums: Displaying the Sacred. This course will examine critically the collection and display of ancient objects, especially those of a sacred nature. Through functional, historical, material and aesthetic lenses an analysis of the relationships between the cultural contexts of objects will be examined. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, and ethical implications of displaying archaeological objects. Enrollment limited to 15 undergraduates.

ARCH 1162. Anthropology in/of the Museum (ANTH 1901).
Interested students must register for ANTH 1901.

ARCH 1163. The Art of Curating (MCM 1700R).
Interested students must register for MCM 1700R.

Interested students must register for AMST 1550.
ARCH 1170. Community Archaeology in Providence and Beyond. Modern archaeology is about far more than just digging in the dirt. During this seminar, we will discuss how archaeologists can engage with the public—including collaborations with indigenous and local communities, increased multivocality in interpretations, the mass media, museums, educational outreach programs, and the use and abuse of the past by governments and others in power. The second half of this course will involve a hands-on project in the Providence public school system.

ARCH 1175. Archaeology Matters! Past Perspectives on Modern Problems. This is not the first era to face many of today’s global problems—rising temperatures, sea-level change, sustainability, pollution, fire, water scarcity, urban blight, social violence, and more. Archaeology is more than the understanding of peoples long ago and far away, but a discipline whose long-term perspective could offer potential solutions to current crises. Through case studies and discussion of key issues, this class asks how archaeology—and archaeologists—might just change the world.

WRIT

ARCH 1177. Occupy Archaeology! Interrogating Inequality, Past and Present. We are the 99%! Black Lives Matter! These rallying cries bring inequality to the front-and-center of western political and media discourses. Yet a social system dividing the haves and have-nots is hardly a modern phenomenon. This course considers injustice diachronically and on a global scale, examining ways in which the material world studied by archaeologists creates—and is created by—social divisions, and critiquing the ways that archaeology as a discipline is a part of the problem. DPLL WRIT

ARCH 1200A. Early Italy. Focuses on the Bronze Age background to the emergence of Greek, Roman, and Etruscan Italy in the Iron Age. Emphasizes the results of recent excavations, the problems of contact between the Aegean and Tyrrhenian areas in the Bronze Age, Greek colonization, and the urban development of the Etruscan/Latian region.

ARCH 1200B. Pompeii (HIAA 1200D). Interested students must register for HIAA 1200D.

ARCH 1200C. Roman Iberia. The archeology, art, and architecture of Iberia during the Roman presence from the Punic Wars to the beginning of the Arab conquest. The artifacts and monuments discussed will not only represent artistic production from Roman administrative expressions, but also a mixture of styles between indigenous art (such as Celtic) or expressions of syncretism or other cultural symbioses.

ARCH 1200E. Topography and Monuments of Rome. Rome has been the scene of notable recent discoveries. This course will concentrate on the evidence for the so-called “regal period” but other topics, among them commemorative arches, the topography of the Campus Martius, and Christian basilicas, will also be taken up. A reading knowledge of Italian is highly recommended.

ARCH 1200F. City and the Festival: Cult Practices and Architectural Production in the Ancient Near East. This course will explore urbanization, formation of urban space, and architectural projects in relation to cult practices and commemorative ceremonies in the Ancient Near East. Investigating case studies from early cities of fourth millennium BC Mesopotamia to Iron Age Syria and Anatolia, we will study the processes of the making of urban and extra-urban landscapes in the socio-religious context of festivals.

ARCH 1200G. Arabia and the Arabs: The Making of an Ethnos. This course will survey the archaeology and history of the Arabs and Arabia from before their emergence in the historical record to the modern period. Our particular focus concerns their relationship with the rise of Islam as well as the imperial politics of the pre-Islamic Near East. A major issue that frames these inquiries is the concept of ethnicity and its projection into the past.

ARCH 1200H. Islamic Landscapes: Cities, Frontiers and Monuments. This course will examine the built environments of the Islamic Period Middle East through the growing archaeological and historical record of its cities, monuments, and other spaces. We will explore what these landscapes tell us about the diverse nature of Muslim societies, relations between Muslim and non-Muslim inhabitants, and ways in which cultures engage with space and place through their physical, emotional, and intellectual resources. Prerequisites: At least two courses in either archaeology, anthropology, art history, or Middle East studies. DPLL

ARCH 1200I. Material Worlds: Art and Agency in the Near East and Africa. This course investigates technological processes of artifact production in the material culture of ancient and contemporary Near East and Africa. Archaeological and ethno-graphic case studies will be explored to understand the social relations behind skilled craftsmanship in architecture and “art.” Circulation of craft knowledge, cultural biography of artifacts, constitution of cultural identities and memory through material processes will be central topics. Enrollment limited to 20.

ARCH 1209. The Visual Culture of Medieval Women (HIAA 1430A). Interested students must register for HIAA 1430A.

ARCH 1213. The Medieval Monastery (HIAA 1440B). Interested students must register for HIAA 1440B.

ARCH 1220. Byzantine Archaeology and Art: Material Stories of a Christian Empire. The world of Byzantium is often considered as a dark age separating the glories of Rome and the Renaissance. Yet Byzantium was among the longest living empires in world history, with an artistic and cultural impact felt far beyond its borders. The course will introduce students to a series of art works, architectural masterpieces, and archaeological discoveries that illuminate our understanding of the much underestimated, and much misunderstood, Byzantine Empire. Enrollment limited to 50. WRIT

ARCH 1231. Kings, Courts, and Aristocracy (ANTH 1231). Interested students must register for ANTH 1231.

ARCH 1232. The City, the Maroon and the Mass Grave (ANTH 1630). Interested students must register for ANTH 1630.

ARCH 1233. Ancient Maya Writing (ANTH 1650). Interested students must register for ANTH 1650.

ARCH 1235. Vertical Civilization: South American Archaeology from Monte Verde to the Inkas (ANTH 1505). Interested students must register for ANTH 1505.

ARCH 1238. Classic Mayan Civilization (ANTH 1031). Interested students must register for ANTH 1031.

ARCH 1250. Minoans and Mycenaeans: Greece in the Bronze Age. This class offers an introduction to the archaeology and art of the civilizations that arose on mainland Greece, Crete, the Aegean and Cyprus in the third and (especially) the second millennium B.C. The principal emphasis is on understanding the rise and collapse of palatial/state-level societies in these regions, with consideration of their sociopolitical, ideological and economic organization, and their interactions with neighboring cultures.

ARCH 1282. Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC (CLAS 1210). Interested students must register for CLAS 1210.

ARCH 1283. Society and Population in Ancient Greece (CLAS 1130). Interested students must register for CLAS 1130.

ARCH 1287. Holy Places and Sacred Spaces in Ancient Greece (CLAS 1750R). Interested students must register for CLAS 1750R.
ARCH 1300. Greek Architecture.
This course will trace the history of Greek Architecture from the Bronze Age through the Hellenistic Period. Emphasis is placed on the Archaic and Classical Periods and on the formation and implementation of the three major Greek orders (Doric, Ionic, Corinthian). Importance is placed on understanding construction techniques and the intricate relationship between form and function of the Greek orders.

ARCH 1310. Ancient Painting.
Examines selected topics in ancient painting with emphasis on the remains of ancient fresco decoration. Topics are Palaeolithic Painting, Aegean Bronze Painting, Etruscan Painting, Greek Painting of the Fifth and Fourth Centuries (text evidence), Roman Painting, Roman Painting as reflected in Mosaic.

ARCH 1430. The Philistines.
The Philistines were long considered to be trouble-makers and uncultured; however, recently their true character has been revealed. The origin, culture, social organization, political affiliations, religion, artwork, and technology of the Philistines, who inhabited Palestine during the Iron Age (ca. 1200-734 B.C.E.), will be elucidated through the examination of archaeological data and some textual evidence and pictorial representations.

ARCH 1436. The Archaeology of Jerusalem: From the Origins to the Ottomans (JUDS 1610).
Interested students must register for JUDS 1610.

ARCH 1437. The Archaeology of Palestine (JUDS 1615).
Interested students must register for JUDS 1615.

ARCH 1438. Jerusalem since 1850: Religion, Politics, Cultural Heritage (JUDS 1620).
Interested students must register for JUDS 1620.

ARCH 1440. Synagogues, Churches, and Mosques.
Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development.

ARCH 1441. Ancient Synagogues, Churches, and Mosques in Palestine (JUDS 1670).
Interested students must register for JUDS 1670.

ARCH 1443. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).
Interested students must register for RELS 1520.

ARCH 1450. Qumran and the Dead Sea Scrolls.
Examines the scholarly interpretations of the site and the scrolls. Attempts to determine the relationship between the archaeological and textual evidence.

ARCH 1475. Petra: Ancient Wonder, Modern Challenge.
The rose-red city of Petra in southern Jordan is a movie star (Indiana Jones and the Last Crusade). It is a tourist mega-hit (over half a million visitors annually). It was recently voted one of the New 7 Wonders of the World. This class will explore the history and archaeology of Petra and debate how best to present and preserve the site, as well as discussing (and planning!) Brown's ongoing fieldwork at this beautiful, but fragile, place. Enrollment limited to 15. Not open to first or second year students.

ARCH 1482. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).
Interested students must register for ANTH 1540.

ARCH 1484. Attachment to Objects in Chinese Literature (EAST 1950P).
Interested students must register for EAST 1950P.

ARCH 1490. The Archaeology of Central Asia: Alexander in Afghanistan, and Buddhas in Bactria.
Central Asia (from ca. 500 BC to AD 200) has tended to be treated as the ultimate frontier zone -- on the fringes of the Mediterranean, the Near East, and India. Scholarly perspectives today are radically changing, with Central Asia emerging as a cultural and political entity in its own right. This course will explore the archaeology, art and history of what is today modern Afghanistan and the formerly Soviet Central Asian Republics, considering the region's development under the Persian empire, the rule of Alexander the Great, and finally of his Greek-named successor kings. Enrollment limited to 50.

ARCH 1500. Classical Art in the RISD Museum.
The RISD Museum's collection of Greek, Etruscan and Roman art will be studied firsthand and in light of recent scholarship in art history, archaeology and museum studies. The course will explore original contexts for museum objects; issues of cultural property and museum ethics; conservation and restoration; design and education components of exhibitions; and notions of historical interpretation in museum display. Enrollment limited to 15.

ARCH 1518. Women and Families in the Ancient Mediterranean (HIAA 1302).
Interested students must register for HIAA 1302.

ARCH 1525. Struggle and Domination in the Prehistoric Mediterranean: Sex Power God(s).
Humans seek to survive, adapt, develop, and thrive. Yet our species is also prone to power struggles, violence, and domination. This strife can be seen in the findings of the latest archaeological and ethnographic research – which casts doubt on the peaceful, egalitarian societies sometimes imagined in the prehistoric past. This course will examine power and inequality in the prehistoric Mediterranean, considering such vectors as religion, human-nonhuman relationships, monument building, technological innovations, death, and sexuality. WRIT

From Antarctica to Zimbabwe, cultural heritage encompasses the very old and the still in use, the man-made and the natural, the permanent and the ephemeral -- even the invisible and the edible. This course will explore issues of modern threats to cultural heritage such as tourism and development, questions of authenticity and identity, and archaeology's intersection with law, ethics, public policy, and economics.

ARCH 1541. ISIS, NAGPRA, and the Academy: Archaeology and Global Issues in Cultural Heritage (ANTH 1580).
Interested students must register for ANTH 1580.

Interested students must register for MGRK 1220.

ARCH 1550. Who Owns the Classical Past?.
The purpose of this course is to offer a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.).

Now more than ever we are in need of new perspectives on the value and meaning of money. This course examines the origins of a metal-based financial system in ancient Mesopotamia and the development of finance over time -- including not only the valuation of metal but also of gifts and other commodities. We will prioritize archaeological and anthropological approaches as a way to offer both time depth and insight into today's troubled financial climate. Enrollment limited to 50.

Interested students must register for CLAS 1930E.
ARCH 1575. Lost and Found: Coinage and Culture in the Roman Empire.
Coins tend to be overlooked as sources of information about the ancient world, being used principally to date other objects. This is quite short sighted, for coins are themselves rich and revealing archaeological artifacts. Evidence of how coins were made, used, and lost will be explored during the seminar, in connection with recent debates about the ancient economy, the expression of identity through material culture, Roman colonialism and ethics of collecting cultural property. WRIT

ARCH 1600. Archaeologies of the Near East.
Writing, urbanism, agriculture, imperialism: the ancient Near East is known as the place where earliest agriculture flourished, cities were developed and writing was invented. This course offers a detailed examination of the region's archaeological history and current archaeological practice, in connection with its political engagements including Western colonialism and the formation of nation states. The social and cultural history of the Near East from prehistory to the end of Iron age (300 BC) will also be discussed. Studying the material remains of the ancient past, we will investigate various interpretive approaches and concepts used within Near Eastern archaeology. The main goal of the course is to develop a critical understanding of ancient societies and their material culture from an interdisciplinary, post-colonial perspective.

ARCH 1603. Color and Culture in the Ancient Near East (ASYR 1160).
Interested students must register for ASYR 1160.

Looking at ancestor veneration in both the ancient and the modern world – from Mesopotamia and Egypt, to the Classical World and the Americas – this course will focus on three different angles: individual, communal, and material. We will consider grief, mourning, loss, and death’s impact on families, kin, or elites. How did ancestors shape communities’ social memories, identities, and religious practices? Finally, we will explore spirits’ material traces, examining specific ancestral monuments and landscapes. WRIT

ARCH 1606. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (ASYR 1100).
Interested students must register for ASYR 1100.

ARCH 1609. Ancient Babylonian Magic and Medicine (ASYR1500).
Interested students must register for ASYR 1500.

The course introduces students to the central ideas and controversies in African art and material culture (pre-colonial, colonial and post-colonial). We will explore visual and spatial representations of Africa, such as personal adornment, utilitarian objects, sculpture, textiles, painting, masquerade, rock art, and architecture. Paying attention to issues such as identity, religion, politics, collecting practices, and activist art, students will examine African material culture through the multiple lenses of cultural biography, primitive art, tourist art, heritage ethics, and repatriation. Students will have the opportunity to study, handle, and curate African objects from the Haffenreffer Museum’s collections. Enrollment limited to 20. First year students require instructor permission to enroll.

From the early stages of human evolution to the present, this course explores the deep past of North Africa. Rejecting the colonialist perspectives typical of the study of the region, we will study its indigenous peoples and their long-term relationships with the Mediterranean, the Near East, the Sahara and Tropical Africa. Students are encouraged to bring their own interests (art, music, literature, technology) to their experience of the class. WRIT

Interested students must register for HIST 1963L.

How did the Arabs, originally a small group of tribes, come to conquer and rule a vast region from Spain to Iran? And how did their faith – Islam – become a major world religion? Moving between past to present, we will use the evidence of texts, landscapes, architecture and images to examine how an Arab state emerged, to explore what it meant to be Muslim and/or Arab, and to follow the spread of Islam. WRIT

ARCH 1621. History of Egypt I (EGYT 1430).
Interested students must register for EGYT 1430.

ARCH 1623. Ancient Egyptian Art and Architecture (EGYT 1500).
Interested students must register for EGYT 1500.

ARCH 1624. Ancient Egyptian Art II (EGYT 1510).
Interested students must register for EGYT 1510.

ARCH 1625. Temples and Tombs: Egyptian Religion and Culture.
Religion was central to life in ancient Egypt, and this course will examine Egyptian religion through its material culture. Students will explore temples and tombs as the physical settings for priestly ritual and private devotion, including feeding and clothing the gods and communication with the dead. The course will also address evidence for private domestic cult and the overlap between religious and magical practice.

ARCH 1627. Daily Life In Ancient Egypt (EGYT 1465).
Interested students must register for EGYT 1465.

ARCH 1630. Fighting Pharaohs: Ancient Egyptian Warfare.
When and why did the ancient Egyptians engage in war? Who was fighting? What were their weapons like and what were their military strategies? What were the political situations that caused them to go to war? How did warfare impact Egyptian society? In studying Egyptian history and society through the pervasive motif of war, we will gain an understanding of the forces that shaped Egyptian culture. Enrollment limited to 55.

Interested students must register for EGYT 1455.

ARCH 1635. The Great Heresy: Egypt in the Amarna Period.
At the height of Egypt's power in the New Kingdom, King Amenhotep IV initiated a religious revolution that affected all aspects of Egyptian high culture. Declaring the sun-disc, Aten, to be the sole god, this king changed his name to Akhenaten and moved the capital city to a new site at Amarna. Along with this move came massive shifts in everything from temple worship to art, international relations to funerary religion. This course will set the Amarna period in its context, examining remains from the reign before Akhenaten to the restoration of traditional Egyptian religion under his immediate successors, including King Tutankhamun. Enrollment limited to 50. Not open to graduate students.

ARCH 1637. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods (EGYT1470).
Interested students must register for EGYT 1470.

ARCH 1650. The Etruscans: Italy before the Rise of the Romans.
The Etruscan people dominated the Italian peninsula for centuries before the Romans became a Mediterranean power, but left behind little textual evidence of their culture. Focusing on architecture, artistic production, and funerary practice, we will study the "enigmatic" Etruscans and their contacts with the Greeks and early Romans, and consider their impact on Rome and on modern Italian archaeological scholarship.

ARCH 1666. Archaeologies Out of the Mainstream: Representing the Past from Ancient Aliens to Modern Nationalism.
Have you ever wondered what's beyond academic archaeology? Have you ever watched "Ancient Aliens" or "Searching for the Lost Giants", or read "Chariots of the Gods"? "Alternative" archaeologies are the most popular form of presenting the human past. This course will take a critical look at different types of alternative archaeologies, both past and present, to understand how they intersect and interface with academic understandings of archaeology and human history. Be prepared to quell academic prejudices and rattle your comfort zone... WRIT
ARCH 1700. Architectural Sculpture of Ancient Greece and Rome. What would Times Square or Rockefeller Center have looked like in antiquity? What would have been advertised, and by whom? This course examines the themes, style, and contexts of the sculptural programs that decorated public buildings from the Greco-Roman world, their connections to other visual media and to the landscape, and their reflections of different cultural, civic, and elite identities.

ARCH 1703. Water and Architecture (HIAA 1910D). Interested students must register for HIAA 1910D.

ARCH 1705. The Palaces of Ancient Rome (HIAA 1301). Interested students must register for HIAA 1301.

ARCH 1707. Seven Wonders of the Ancient World (CLAS 1120Q). Interested students must register for CLAS 1120Q.

ARCH 1710. Architecture and Memory. Buildings and monuments have been mediators of the past, with their powerful presence and often turbulent histories. Stories cling to their stones, which become residues of the human lives that shape them. Memories, imaginations and experiences, collectively shared or individual, give meaning to architectural spaces. This course explores the intersections of memory and architecture through various archaeological case studies from the ancient world.

ARCH 1715. Building Big! Supersized Architectural and Engineering Structures From Antiquity. Sometimes size does matter. The need and desire to "build big", to create colossal architectural or sculptural things, was a constant feature of antiquity, from temples to portraits, from tunnels to fortifications. Who and what lay behind this apparent architectural megalomania? What practical challenges to construction had to be overcome? And how have such monuments affected our understanding, both of the ancient world and of modern means of self-representation? Enrollment limited to 50.

ARCH 1720. How Houses Build People. Archaeologists usually worry about how people in the past built houses. This course will flip the question on its head and ask: how do houses build people? Just what is a 'house'? What is a 'home'? Making use of an array of regional case studies, from different time periods, we will question how cultural values and norms can be extracted from, and explore the idea of the domestication of humans through architecture. Enrollment limited to 50. Not open to first year students.

ARCH 1764. Under the Microscope: 250 Years of Brown's Material Past. An archaeologist will tell you that to learn a university's history, you must uncover and investigate its treasures, trash, tools and toys. An engineer will tell you that to understand such objects, you must study how these things were made, in what materials and with what technologies. This co-taught course unites these two disciplines for a unique exploration of Brown's past, combining interdisciplinary discussions, hands-on laboratory work, and individual historical and material analysis of an artifact selected from 250 years of life on College Hill.

ARCH 1768. The Culture of Death in Ancient Rome (CLAS 1420). Interested students must register for CLAS 1420.

ARCH 1770. Grave Matters: The Archaeology of Death, Decay, and Discovery. How do archaeologists study coffins, tombs, and human remains to learn about ancient societies? This course will explore the theory and practice of the archaeology of death. Topics will include the inference of social organization from mortuary remains, the experience of death and dying, social memory, identity, and others. Students will learn approaches to mortuary excavation and consider the politics and ethics of conducting burial archaeology globally. Enrollment limited to 55. Not open to first year students.

ARCH 1771. Archaeology of Death (ANTH 1623). Interested students must register for ANTH 1623.

ARCH 1772. The Human Skeleton (ANTH 1720). Interested students must register for ANTH 1720.

ARCH 1775. Animals in Archaeology. Food, foe, friend: animals play all these roles, and more, in their relationship to humans, in the past as well as the present. This course will explore how zooarchaeology -- the study of animal remains (bones, teeth, and shells) -- allows us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and analytical techniques, including hands-on sessions for the identification and quantification of faunal remains. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice. Enrollment limited to 20. Not open to first year students.

ARCH 1777. Animals in the Ancient City: Interdependence in the Urban Environment (ERLY 1155). Interested students must register for ERLY 1155.

ARCH 1780. Violence and Civilization: A Deep History of Social Violence. Why do we do violence to one another? This course will foster a sustained and critical reflection on social violence, history and humanity. We will explore social orders through time, together with their practices and moral economies of permissible and impermissible violence. Different conceptions of violence ("symbolic," "structural," and "routine") will be considered, in conjunction with their intersections with the many, ambivalent meanings of "civilization." No prerequisites required.

ARCH 1787. Alcohol in the Ancient World. From the earliest Neolithic experiments with fermentation to the elaborate drinking cultures of the Classical world, alcohol has infused and influenced social life for thousands of years. This course provides an introduction to the production and consumption of beer, wine, and other beverages in the ancient world. Case studies from across the globe demonstrate that alcohol was (and is) a uniquely potent form of material culture, embedded within complex webs of social, political, economic, and ritual activity. WRIT

ARCH 1790. The Nature and Culture of Disaster. Our view of nature forms the basis of environmental studies, ecotourism, heritage management, and contemporary debates over global warming that impact both public policy and the very way we lead our lives. This course draws from theorists (such as Douglas, Latour, Strathern and Spivak), as well as recent anthropological test cases from Amazonia, Papua New Guinea, and South Africa to look at how humans in the 21st century view nature in terms of stability, instability and disaster. How should we assess the 'risk culture' in which we currently live?

ARCH 1791. Slavery, Materiality, and Memorialization (AFRI 1050X). Interested students must register for AFRI 1050X.

ARCH 1792. The Archaeology of Slavery. No one would question that slavery leaves invisible and painful marks on all individuals and societies touched by it. But slavery leaves behind many physical, recoverable traces as well: plantations, slave forts, slaving wrecks, burial grounds. From such evidence, this course will explore four centuries of slavery in the Atlantic world, asking not only about how people coped in the past, but about the legacy of slavery in our world today. DPLL WRIT

ARCH 1793. Slavery in the Ancient World (CLAS 1120E). Interested students must register for CLAS 1120E.

ARCH 1794. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World (ANTH 1625). Interested students must register for ANTH 1625.

ARCH 1797. A Migration Crisis? Displacement, Materiality, and Experience (MGRK 1210). Interested students must register for MGRK 1210.
ARCH 1800. Contemporary Issues in Archaeological Theory. This course will explore how archaeologists have placed material remains in the context of human practices, cultural processes and long-term history. Following a brief review of the history of the discipline as a social science, contemporary issues such as social complexity, technology and agency, ideology and narrative, gender and sexuality, production of space and construction of landscapes will be discussed. Case studies of archaeological materials will be drawn mostly from the ancient Western Asian and Mediterranean worlds. Enrollment limited to 15.

ARCH 1805. The Archaeology of Use: A Material Approach to the Contemporary World. Archaeology is traditionally seen as exclusively concerned with the past. However, the budding field of contemporary archaeology considers that our own material culture and built environment are equally important to examine archaeologically. This course explores materially-oriented approaches to analyzing our contemporary world, from the study of garbage to the destruction of heritage sites by ISIS. Course material will examine geopolitical crises including migration, militarism, inequality, and environmental devastation. Students will engage with local communities and the Providence area.

ARCH 1810. Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East. Present-day political ideologies profoundly impact our understanding of the past. Here we will explore the use and abuse of archaeological pasts in the modern nation states of the Middle East. What do pharaohs mean to modern Egyptians? Why did Saddam Hussein consider himself the last Babylonian king? This course will explore the role of imagined ancient pasts and cultural heritage in the making of collective identities and state ideologies.

ARCH 1817. Ancient Christianity and the Sensing Body (RELS 1300). Interested students must register for RELS 1300.

ARCH 1821. (De)Constructing the Other: The Subjectivity of Objects. Archaeologists rely on interpretation of material remains to construct conceptions of humans in the past. This course explores this creation of archaeology’s subjects, with a critical eye toward the inherently political nature of this inventive process. Topics include the deconstruction of the “pots to people” analogy, racial and gendered disciplinary bias, and exposing the problems of unequal representation in the discipline. In connecting past, present, and future, this course seeks to develop strategies for building a more equitable and inclusive brand of archaeological method and thought. DPLL WRIT

ARCH 1822. Anthropology of Place (ANTH 1910B). Interested students must register for ANTH 1910B.

ARCH 1835. Inventing the Past: Amulets, Heirlooms, Monuments, Landscapes. Long before archaeology and art-history were academic disciplines, individuals and communities manipulated the physical traces of the past in order to imagine and explain their own antiquity. Who cared about these objects and why? What did pre-modern excavations, catalogues, and collections look like and what do they tell us about our own engagements with antiquities? This course delves into the origins of antiquarianism and archaeology, from pre-history to the Renaissance. Enrollment limited to 50.

ARCH 1850. Comparative Empires and Material Culture. The political, military, and cultural unit of “empire” has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of a range of different empires -- the Roman, the Chinese, the British, and the American -- and their unique political, social, and cultural contexts. Enrollment limited to 25.

ARCH 1852. Material Culture Practicum (ANTH 1621). Interested students must register for ANTH 1621.

ARCH 1854. Handmade: An Archaeological Exploration of Materials and Making. This interactive course provides an introduction to the archaeology of materials and making. With the goal of developing an embodied appreciation for the archaeological record, we will engage in a series of hands-on activities, each dedicated to the exploration of a different type of material (e.g., clay, stone, wood, and bone). We will also examine theoretical perspectives on the topic and archaeological case studies that highlight the range of techniques employed to transform these materials into objects of use and value. Enrollment is limited to 15. WRIT

ARCH 1855. Archaeology and Craft: Experimental Archaeology and the Materials Science of Ancient Technologies. How did people in the past make the things that archaeologists find today? How can archaeologists learn about processes of design, engineering, and technological change from ancient objects? Students will approach production questions cross-culturally through firsthand involvement with craft processes and materials analysis - from raw materials to finished objects. Practicums will range from participation in blacksmithing and kiln design to learning about pyrotechnology, mechanical properties, and archaeometric techniques. The final class project will be an exhibit affiliated with the Haffenreffer Museum. Enrollment limited to 15. First year students require instructor permission.

ARCH 1860. Engineering Material Culture: An Introduction to Archaeological Science. Unlikely bedfellows? No way! This course demonstrates how well archaeology (the humanities) and engineering (the hard sciences) can do business together. An introduction to the world of archaeological science, presented from the dual perspectives of material culture studies and materials science. Students will be introduced to a range of methodologies, instrumentation, and interpretive approaches through a combination of hands-on laboratory work, guest lectures, and interdisciplinary group research. Student must have already completed at least two university courses in archaeology, engineering, or any related discipline. Enrollment is limited to 20. Priority will be given to admitting a proportional number of students from archaeology, engineering and related fields.

ARCH 1870. Environmental Archaeology. From Neanderthals on the brink of extinction to the smog of the Industrial Revolution, humans have been impacted by the environment for millions of years. How has climate change affected the development of human society? How have people adapted to their environments in the past? What does “sustainability” mean over the long term? Environmental archaeology is the study of these questions through the use of scientific techniques to analyze soils, plants, artifacts, and human and animal remains from ancient archaeological contexts. These methods will be introduced with an eye toward how they allow us to interpret human-environmental interactions in the past, as well as the present and future.

ARCH 1878. Illustrating and Interpreting the Past: Visual Representation in Archaeology (ANTH 1470). Interested students must register for ANTH 1470.

ARCH 1880. Archaeo-Geophysical Survey and Visualization. Geophysical survey data act as primary information for locating archaeological sites, and contribute new perspectives when investigating existing sites. This course will develop students’ understanding of basic geophysical processes, through hands-on field-based data acquisition with ground penetrating radar, magnetometry, and resistance survey techniques. We will also experiment with approaches to data management and visualization. The course will conclude with students conducting a comprehensive multi-technique field survey of an archaeological site. Enrollment limited to 20 juniors, seniors, and graduate students.

ARCH 1881. An Introduction to GIS and Spatial Analysis for Anthropologists and Archaeologists (ANTH 1201). Interested students must register for ANTH 1201.
ARCH 1882. Introduction to Geographic Information Systems for Environmental Applications (GEOL 1320). Interested students must register for GEOL 1320.

ARCH 1900. The Archaeology of College Hill. A hands-on training class in archaeological field and laboratory techniques. Topics include the nature of field archaeology, excavation and survey methodologies, archaeological ethics, computer technologies (such as GIS), and site and artifact analysis and conservation. Students will act as practicing archaeologists (i.e., actually dig and analyze the results!) through the investigation of local historical and archaeological sites in the College Hill area (e.g. the First Baptist Church of America and Brown University's Quiet Green).

ARCH 1902. Material Culture Practiceum (ANTH 1621). Interested students must register for ANTH 1621.

ARCH 1970. Individual Study Project in Old World Archaeology and Art. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 1990. Senior Honors Thesis in Archaeology and the Ancient World. Honors students in Archaeology and the Ancient World who are completing their theses should enroll in this course in their final semester. The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 2000. Research Methods in Archaeology. Familiarizes beginning old world archaeology and art graduate students and graduate students from neighboring disciplines, as well as advanced undergraduate students, with the methods, history, and bibliography of the field.

ARCH 2010A. Ancient Numismatics. Deals with problems in ancient numismatics from these topics: introduction of coinage, major coinages of archaic Greece, coinage of 4th C.B.C. in the Greek west and Roman coinage of 3rd C.B.C.

ARCH 2010B. Approaches to Archaeological Survey in the Old World. Recent decades have witnessed a marked development of interest in regional approaches to the ancient world and its landscapes. This seminar will explore the history of this development, as well as survey's impact on the work of both ancient historians and archaeologists. Topics to be covered include survey design and methodology, and the wider implications and lessons of regional analysis.

ARCH 2010C. Architecture, Body and Performance in the Ancient Near Eastern World. This seminar investigates the relationship between bodily practices, social performances, and production of space, using case studies drawn from ancient Mesopotamia, Anatolia, and Syria. Employing contemporary critical theories on the body, materiality, and social practices, new theories of the making of architectural spaces and landscapes will be explored with respect to multiple geographical, historical contexts in the Ancient Near East.

ARCH 2010D. Archaeology and Religion: Excavating the Sacred from Prehistory to Islam. This course explores methodological approaches and theoretical underpinnings of scholarly (and sometimes unpopular) interpretations of the archaeological record as evidence for the religious life of past societies, considering how archaeologists have treated the analytical categories of ritual, religion, ideology, and the sacred. These discussions will be examined through Mediterranean case studies as a key region in the archaeology of religion.

ARCH 2010E. Archaeology in the Information Age. Archaeology must circulate the material past in two dimensions. The right combination of image (maps, plans, photographs) and text has long defined professional archaeology. However, the current explosion of digital media has spurred profound shifts in all domains of archaeological practice and documentation. This course encourages reevaluation of archaeological media, which pertains to information technology across the humanities and sciences.

ARCH 2010F. GIS and Remote Sensing: Advanced Applications in Archaeology. Geographical Information Systems (GIS) and various forms of remote sensing are increasingly essential components of good archaeological practice. This advanced course is intended primarily for students with some background in GIS software, and who have evolved a relevant research project to develop over the course of the term. Less advanced graduate students may enroll with permission of the instructor and will be provided with additional tutorial instruction.

ARCH 2010G. Ethical Issues in Archaeology. Graduate students will certainly confront ethical, legal, and professional issues in the course of their own doctoral research and subsequent careers. This seminar offers a forum for open, but well-informed, discussion of a variety of significant ethical problems and dilemmas currently facing the discipline of archaeology worldwide. We will give attention to practical matters arising from archaeological field research, as well as a wide range of difficult questions concerning ownership and presentation of the past. Open to graduate students only.

ARCH 2020A. Greek Vase Painting. No description available.

ARCH 2020B. Topography of the City of Athens. No description available.

ARCH 2020D. Greek Painting. Major developments in the history of Greek painting with special emphasis on archaic and classical Greek culture as reflected in vase painting. There will be field trips to area museums which may take longer than class time.

ARCH 2020E. Economy and Trade in the Later Bronze Age Aegean and East Mediterranean. Beginning with an examination of the workings of the Mycenaean palace economy, including the evidence of Linear B documents, this seminar will then turn to a more inclusive consideration of trade and exchange involving Aegean states and their counterparts further east, and of the nature and extent of cultural interaction between them during the later Bronze Age (ca. 1600-1100 BC).

ARCH 2030A. Late Roman and Early Christian Mosaics. Study of Christian, Jewish, and secular mosaics of the Late Roman period.

ARCH 2030G. Wall Paintings from Pompeii. Interpretations of Campanian frescoes.

ARCH 2040D. Genealogies of Complexity in East Asia (3000-221 BCE). Despite East Asia's rich archaeological and historical record, its early political (pre)histories have been more sites for theoretical projection than theoretical innovation. Focusing on mainland East Asia, we will engage political theory and its applications in case studies from the Neolithic to the first Empires. Topics will range from mortuary rituals to practices of social violence and sources include both material culture and text.
ARCH 2040E. International Cultural Heritage: Creating a Future for the Past.
From the Parthenon to Puccini to pizza, cultural heritage can be defined as places, objects, and ideas from the past that have survived to the present. This course will examine the theories, methods, and questions that shape the effort to protect and interpret cultural heritage today as well as responses to them. We will explore issues such as current threats to cultural heritage, the role of tourism and impacts of development, questions of authenticity and identity, international law, ethics, and emerging and non-traditional areas of the field.

ARCH 2040F. Public Culture and Heritage in Postapartheid South Africa.
This course examines the complex processes whereby issues of culture, race, identity/subjectivity, globalization, memory and heritage are being reframed and rethought in post-apartheid South Africa. We will be guided by three broad themes: public histories; archives and knowledges; and questions of performance. Of all possible settings, post-apartheid South Africa may present one of the most challenging - at times troubling - contexts through which to consider such public negotiations and meanings.

ARCH 2040G. Designing Heritages: From Archaeological Sensibilities to Relational Heritages (AMST 2654).
Interested students must register for AMST 2654.

ARCH 2040H. Imperial Cities.
What does Athens have to do with Jerusalem? Tenochtitlan with London? Beijing with Rome? Cuzco with Persepolis? All are capital cities of imperial systems, each shaping and reflecting the nature of the empire, its ruling ideology, and its social and economic infrastructure. The category of "imperial cities", however, must extend beyond these primate centers, to consider the urban networks in play across each empire's territorial reach, and beyond.

ARCH 2041. Mesoamerican Archaeology and Ethnohistory (ANTH 2520).
Interested students must register for ANTH 2520.

This course explores the relationships between people and things. From archaeology to material culture studies, from philosophy to science studies, we will examine a wide variety of approaches to the world of objects, artifacts, and material goods. Perspectives will include materialist approaches, consumption studies (including notions of fetish), phenomenology, social constructivism, cognitive approaches, actor-network-theory, and more.

ARCH 2105. Ceramic Analysis for Archaeology.
The analysis and the interpretation of ceramic remains allows archaeologists to accomplish varied ends: establish a time scale, document interconnections between different areas, and suggest what activities were carried out at particular sites. The techniques and theories used to bridge the gap between the recovery of ceramics and their interpretation within anthropological contexts are the focus of this seminar. This course will include hands-on, lab-based materials analysis of ceramics and their raw materials.

ARCH 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).
Interested students must register for GREK 2110F.

ARCH 2112. Roman Epigraphy (LATN 2120A).
Interested students must register for LATN 2120A.

ARCH 2114. Archaeologies of Text (ASYR 2800).
Interested students must register for ASYR 2800.

Writing systems abounded in the ancient Mediterranean: Egyptian hieroglyphs, Mesopotamian cuneiform, and the linear scripts of the Aegean and only dozens of systems that people in the region have used to record language over millennia. Who wrote first and why? What "killed" hieroglyphs and cuneiform? What happens when a literate culture comes into contact with another without writing? Why do these questions matter now that the alphabet seems to reign supreme?

ARCH 2140. The Marriage of Archaeological Science and Social Theory.
What do ceramics, lithics, building materials and metals tell us about the people who used them? Do high-tech analytical methods contribute to a deeper understanding of the past or simply muddy the waters? Theoretically, we will challenge the objectivity of 'science' and the value of archaeological taxonomies, as they relate to the construction of archaeological narratives. The ultimate objective in this course is to access the symmetrical social relationships between people and things, through the medium of the archaeological materials, as understood through the application of scientific techniques. Enrollment limited to 15.

An intensive focus on theoretical approaches to technology and production that have shaped archaeological thinking over the past century and have formed the basis of many of the contemporary issues in the field. Students will read and critically assess key works about concepts of production and technology in various cross-cultural archaeological contexts. Seminar themes include political economy, specialization, technology transfer, cross-craft production, power dynamics, ritual, and tool use. Enrollment limited to 20 seniors and graduate students.

ARCH 2150. Theoretical Issues in Archaeology.
The goal of this seminar is to examine the state of archaeological theory, with special emphasis on archaeological practice and interpretation in the Mediterranean, Egypt and ancient western Asia. While providing some measure of historical overview, the class chiefly offers an opportunity for students to read and critique recent writings that exemplify the variety of contemporary approaches to this subject.

ARCH 2155. History, Anthropology, and Archaeology: Disciplinary Dialogues.
Archaeology has always occupied an uneasy space between the fields of anthropology and history. This seminar examines the interplay of theories and methods in all three spheres of scholarship, with an emphasis on current inter- and trans-disciplinary research. Several fundamental 20th century dialogues between anthropologists and historians will be reviewed, and key topics in contemporary archaeology explored in relation to those debates.

ARCH 2160. The Archaeology of Democracy: Social Transformations in Ancient Greece, ca. 900-323 BCE.
Between 900 and 600 BCE, profound social transformations took place in Greece, setting the stage for a revolution in political form: by 500, Athens was collectively governed by its citizen body. This course engages with the everyday materialities underlying Greek democracy of this era. Focusing on relationships among people and things, students will reassess the composition of the demos from the ground up.

ARCH 2165. The "Second Sophistic": Archaeological and Literary Approaches.
The cultural phenomenon of the "Second Sophistic" affected both the material fabric and the intellectual life of the eastern Roman empire of the second/third centuries CE. This course will examine how awareness of "Greek" learning (pайдеia) and the "Greek" past informed people's literary and artistic tastes, as well as their responses to changing political and religious pressures, affecting everything from civic coinage to elite dining habits and even bodily comportment. Enrollment limited to 15.

ARCH 2170. Archaeology of Greek and Punic Colonization.
This course investigates cultural interaction at local and regional scales between 'colonists' and locals, introducing students to a range of case study material across the Mediterranean. This will focus on material from the eighth to sixth centuries BC from Iberia, France, Italy, North Africa, and the Black Sea. Examples of Etruscan colonization will also be explored. The concept of 'colonization' will be critically examined, along with how it was collectively governed by its citizen body. This course engages with the everyday materialities underlying Greek democracy of this era. Focusing on relationships among people and things, students will reassess the composition of the demos from the ground up.

Interested students must register for HIAA 2440D.
ARCH 2180. Memory and Materiality.
What is the difference between memory, facts, and knowledge? This course uses memory as a lens through which to view recent critical theory and questions how theories of memory and materiality can be used by archaeologists to better understand the past.

How do the senses shape our experience? How many senses are there? How do ancient and modern art and material culture relate to bodily senses? What is material and sensorial memory, and how does it structure time and temporality? Using media and objects, including archaeological and ethnographic collections at Brown and beyond, this course will study how a sensorial perspective on materiality can reshape and reinvigorate research dealing with past and present material culture. Furthermore, we will explore how sensoriality and affectivity can decenter the dominant western modernist canon of the autonomous individual.

How did the Greeks and Romans perceive and discuss the beautiful and the ugly? The fragrant or malodorous? The ticklish and the tart? These may seem like difficult questions, even bizarre, and yet, in many ways, those past opinions inform our own experience of the world. This course is an exploration, through archaeological and literary primary sources, of the many ways in which ancient men and women interacted through their senses with the world around them and how they reflected upon that interaction.

ARCH 2225. Beyond Decline and Fall: New Perspectives on the Late Antique Mediterranean.
This seminar will examine the Mediterranean from the fall of Rome to the Arab conquests (AD400-700), interrogating models of decline, catastrophe and transformation through the most recent archaeology of the region. We will explore key themes such as decline and fall, post-Roman stateformation, urbanism, rural settlement, Christianization and ethnic, social and religious identities, and compare the different trajectories of Europe, Northern Africa and the Eastern Mediterranean in this period.

This seminar explores the phenomenon of interaction in the Medieval Mediterranean. We will study how, even in times of conflict, Byzantines created and maintained networks of ideological, commercial and artistic communication with the Arabs, the Slavs, the Latins, and the Ottomans. How did such encounters, among people of such different faiths, languages, and world-views, influence the political, economic and social transformations of the Medieval world? Enrollment limited to 15 juniors, seniors, and graduate students.

ARCH 2240. Key Issues in Mediterranean Prehistory.
This course’s scope is the entire Mediterranean basin, from its first peopling until ca. 500 BC. The focus is on key transformations in economic, social, and political structures and interactions; on explanations for these changes; and on current issues where fresh data or new approaches are transforming our understanding. This seminar is intended for students both with and without prior knowledge of this field, and particularly for those preparing for the Joukowsky Institute’s Mediterranean Prehistory field exam. Enrollment limited to 15 juniors, seniors, and graduate students.

ARCH 2245. Rural Landscapes and Peasant Communities in the Mediterranean.
The aim of this course is to explore rural settlement and agrarian production in the Mediterranean, both in the ancient and the recent past. The archaeological starting-point is provided by the numerous scatters of surface remains that archaeological surveys across the Mediterranean have collected and that are usually interpreted as ‘farmsteads’ broadly datable to Classical Antiquity. We will look beyond these scatters to examine the social and economic significance of rural settlement through comparison with ethnographic and historical rural studies from across the Mediterranean and to explore household and community organisation and agrarian production in Classical Antiquity. Enrollment limited to 15.

ARCH 2250. Island Archaeology in the Mediterranean.
The Mediterranean is a world of islands, par excellence, and the island cultures that have developed there over the millennia have great archaeological distinctiveness. This seminar will consider the concept of insularity itself, in cross-cultural archaeological, anthropological, and historical perspective. We will then turn to the rich, specifically Mediterranean literature on island archaeology (exploring issues of colonization, settlement, interaction).

ARCH 2255. Coastal Values: Archaeology and Paleoecology of Coastal and Island Environments.
People like to live by the water. What characteristics (social, economic, environmental) make coastal environments so attractive? What are the effects of human settlement on these environments? How do societies adapt (or not) to changing coastal environments? This seminar takes an interdisciplinary approach to these questions, applying the lessons of the past to the challenges of the present through an explicitly diachronic, cross-cultural, and data-driven approach to examining human-environmental interaction in coastal settings. Enrollment limited to 15.

ARCH 2300. The Rise of the State in the Near East.
A seminar on the origins of food production and complex societies in the period from ca. 9000 to 2200 B.C. Topics will include: the first domestication of plants and animals, the earliest village communities in the Levant, Anatolia, and Mesopotamia, and the economic and social transformations accompanying the emergence of urbanized state societies in fourth and third millennia B.C. Mesopotamia.

Images of legendary Mesopotamian cities, now wired with explosives or pockmarked with looters’ pits, fall daily across our screens. For more than a century, archaeologists have been working to uncover these early urban centers in Iraq and Syria, where the very idea of the city was first imagined. This seminar offers an introduction to the archaeology of urbanism and a detailed examination of the cities of Mesopotamia—from Ur and Ur to Babylon and Baghdad.

ARCH 2320. Household Archaeology in the Ancient Near East and Beyond.
House, home, household, family: defining these terms is not as easy as it might seem, especially across space and through time. After introducing the principles of household archaeology, this class will explore the state of this growing archaeological subfield in the Near East and eastern Mediterranean. We will also draw on developments in New World archaeology in analyzing the potential and problems of household archaeology and in articulating its future directions.

ARCH 2330. Roman Asia Minor: The Empire Goes East.
If one is curious about the dynamics of life within the Roman empire, the province of Asia makes an excellent case study. Its numerous urban centers and rural landscapes were socially and economically differentiated and frequently monumentally elaborated, as an increasing amount of varied archaeological data reveal. Asia offers a rich laboratory for exploring issues of provincial development, and ultimately decline, over the course of the empire.

ARCH 2335. In the Wake of Empire: Anatolia After the Hittites, Before Alexander.
Kings Croesus, Midas, and the much lesser known Warpalawas... Who were these people, when and where did they rule, and why does any of this matter? During the first millennium BCE, Anatolia was an astonishingly varied, multicultural and multilingual environment. This course will tackle head on the myriad archaeological, historical, and even linguistic challenges posed by this fascinating, but often-overlooked period in the history of the region. Enrollment limited to 15 juniors, seniors, and graduate students.
ARCH 2340. The Archaeology of the Assyrian Empire: Cities, Landscapes and Material Culture.
Ritual, war and conquest! The Assyrian Empire was a powerhouse in the ancient Near East with fearsome military expeditions, sumptuous cult festivals, grand cities, and complex governing systems. This course investigates the archaeology of Assyria from the trading center of Ashur in the second millennium BCE to the collapse of the empire in the 7th c. BCE. Using published excavations, surveys, and texts, we will explore Assyria’s material culture, landscape, cult practices and state ideology. Enrollment limited to 15 seniors and graduate students.

ARCH 2350. Archaeology of the Caucasus.
The goal of this seminar is to provide students with an overview of the long-term archaeological record from the Caucasus and its near neighbors, as well as an understanding of the history of research in this area during Imperial Russian, Soviet, and contemporary times. Readings will cover a range of periods, prehistoric and historic, following the interests of the class.

Innumerable cultures, past and present, have singled out specific locales and even whole landscapes as powerful vectors for communicating with the divine. This course will analyze such spaces for their ability to transform body, escape the material plane, and reconstitute social relations and bodily practice. Case studies will largely be drawn from the Mediterranean world and will employ an archaeological attention to the materiality of these sacred spaces. Key concepts will include: ritual practice, landscape production, memory and agency. Prerequisites: three upper-level courses in Archaeology and the Ancient World, Religious Studies, or Anthropology.

ARCH 2406. The Body in Medieval Art and Architecture (HIAA 2440B).
Interested students must register for HIAA 2440B.

ARCH 2407. Lived Bodies, Dead Bodies: The Archaeology of Human Remains (ANTH 2560).
Interested students must register for ANTH 2560.

ARCH 2410. Archaeologies of Place.
Places are understood as sites of human interaction in and with the material world. This course explores how archaeological and ethnographic research addresses material complexities and cultural meanings of places in the context of broader landscapes. We will investigate critical theories of place and landscape, while working with fieldwork data from the ancient Near East, particularly Hittite Anatolia. Enrollment limited to 20.

ARCH 2425. In Ruins: Traces of the Past in the Present.
Ruins -- the debris and skeletons of monuments from the past -- constitute the leftovers of people and places that once were. Yet archaeologists have not thought critically about this seemingly essential concept. Ruins and ruination are fundamental to deeper understandings of culture contact, gender, materiality, and cultural meanings of spaces that once were habitable. This course will examine, across a broad geographic and temporal scope, ruins as things, as well as ongoing processes, that affect the landscape.

ARCH 2450. Comparative Empires and Material Culture.
The political, military, and cultural unit of "empire" has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires, that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of four different empires - the Roman, the Chinese, the British, and the American - and their unique political, social, and cultural contexts. The creation of a "virtual exhibit" of a range of illustrative artifacts is currently envisioned as an outcome of the class.

ARCH 2500. Art and Archaeology of Civic Identity.
Every urban community in the Greco-Roman world presented itself in a specific way to other communities and to foreign entities. Looking at coins, public monuments, programmatic sculpture, and epigraphic and textual evidence, we will address different concerns related to the formation and propagation of civic identities. Comparative material from other historical periods and theoretical and anthropological literature on group identity, social cohesion, and empire will contextualize the visual and archaeological evidence. Prerequisites: three previous courses in Archaeology and the Ancient World.

ARCH 2501A. Problems in Archaeology: Culture, Contact and Colonialism (ANTH 2500A).
Interested students must register for ANTH 2500A.

ARCH 2501C. GIS and Remote Sensing in Archaeology (ANTH 2500C).
Interested students must register for ANTH 2500C.

ARCH 2502. Historical Archaeology: From Colony to City (ANTH 2540).
Interested students must register for ANTH 2540.

ARCH 2540. Roman, Byzantine and Early Islamic Jerusalem.
Jerusalem constitutes one of the most important archaeological sites connected to the origins of Judaism, Christianity, and Early Islam. Early and recent studies and discoveries, as well as old and new theories, will be examined in the seminar with special emphasis on the Roman, Byzantine, and Early Islamic periods. Prerequisite: knowledge in archaeological methodology.

ARCH 2550. Qumran and its Archaeological Context.
This course is structured as a seminar on the archaeology of Qumran and the Dead Sea Scrolls. The site will be examined in its larger geographical, historical, and archaeological context. The goal is to become familiar with the different scholarly interpretations of the site. Prerequisites: solid background in at least one of three fields: archaeology, Judaism, and Early Christianity.

ARCH 2551. Archaeological Research Methods, Theory and Practicum (ANTH 2550).
Interested students must register for ANTH 2550.

ARCH 2552. Museums in Their Communities (AMST 2220D).
Interested students must register for AMST 2220D.

ARCH 2553. Introduction to Public Humanities (AMST 2650).
Interested students must register for AMST 2650.

ARCH 2600. Gender and Sexuality in Roman Art.
The study of the body and embodiment in Roman art encourages us to make use of multiple theoretical models for interrogating both the art and the bodies involved. Gender and sexuality provide the lenses through which this course will explore a variety of topics (for example, the homoerotic gaze, sexualized spectacles of pain, gendered architectural typologies, and the body in raving imagery) in Roman imperial art. Open to graduate students only.

ARCH 2601. Approaching Women and Gender in Roman Culture.
Gender as a hierarchical concept was a fundamental basis of Roman culture, but women often played active roles in shaping political, religious, and social ideologies in both public and private contexts. Drawing on material, visual, and literary evidence, as well as theoretical concepts of gender in the ancient world, this course will examine not only how the concepts of women and gender were constructed and perpetuated, but also how they were simultaneously resisted and subverted.

ARCH 2620. All Italia: City and Country in Ancient Italy.
This seminar approaches the urban and rural landscapes of peninsular Italy from the Early Iron Age until the Gothic Wars, with the goal being to examine key points of intersection (and departure) between the spheres of ‘town’ and ‘country’. Overall the seminar aims to contextualize Italian landscapes across both time and space and to that end we will consider issues pertaining to urbanism, economy, production, infrastructure, administration, architecture, and iconography. Enrollment limited to 20 seniors and graduate students.
How were Roman provinces created and incorporated into the Roman Empire? What traces exist in the archaeological record of the bonds between the provinces and the metropolis? This course approaches the complex issue of colonialism, material culture, change and continuity in connection with the Roman conquest of new territories in the Mediterranean, taking as an example the impressive pool of new archaeological data available from Roman Spain. Restricted to Juniors, Seniors, and Graduate students.

ARCH 2710. The Archaeology of Nubia and Egypt.
Egypt and Nubia share the distinction of ancient civilizations along the Nile river, but Nubia remains much more poorly known than Egypt. This seminar will examine the archaeology of Nubia, including its relationship to Egypt, from the introduction of ceramics and agriculture to the medieval period. This long-term perspective will allow comparative study of issues such as state formation, imperialism and religious change. Enrollment limited to 15 graduate students.

ARCH 2725. The Making of Egypt.
In the late 4th millennium, a state and culture recognizably pharaonic in structures rose in the Nile Valley. How was Egypt made, and how can we study the process? This seminar will examine this exceptional convergence of the development of monumental architecture, writing, canonical art, and kingship during Egypt’s formative centuries from c. 3200-2600 BC. We will study the rapid changes at the start of the First Dynasty in the context of state formation over the longer span of late-Predynastic to Old Kingdom Egypt.

ARCH 2851. Skills Training in Material Culture Studies I.
When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes; what techniques are appropriate in what cases? How should all this information be securely stored and promulgated? This “hands on” class, intended for students in multiple disciplines, will consider the study of particular types of material or bodies of evidence (e.g., pottery, lithics, epigraphy, numismatics). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC.

ARCH 2852. Skills Training in Material Culture Studies II.
When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes, what are the appropriate techniques? How should all this information be securely stored and promulgated? This “hands on” class, intended for students in multiple disciplines, will revolve around techniques of documentation and analysis (e.g. architectural drawing, GIS [Geographic Information Systems], data bases and digital media). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC.

ARCH 2970. Preliminary Examination Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

ARCH 2980. Individual Reading.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 2981. Thesis Research.
Individual reading for the Master’s degree. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 2982. Individual Reading for Dissertation.
Reading leading to selection of the dissertation subject. Single credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 2983. Dissertation Research.
Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

ARCH 2990. Thesis Preparation.
For graduate students who are preparing a thesis and who have met the tuition requirement and are paying a registration fee to continue active enrollment.

Judaic Studies
Director - Fall 2017
Saul Olyan
Acting Director - Spring 2018
David C. Jacobson

The Program in Judaic Studies is dedicated to the study of Jewish history, literature, language, politics and religions. Offering an interdisciplinary undergraduate concentration, the program provides students with the opportunity to explore Jewish culture and civilization across the ages. Since Christianity and Islam have deep roots in Judaism, and the Western world has been profoundly shaped by a deep and abiding tension with both Jewish religious tradition and the Jewish communities in its midst, the concentration puts particular importance on studying the interactions of Jews and non-Jews in both ancient and modern periods. The history and culture of the State of Israel and its place in the Middle East is also a major focus of study. These are all issues with significant contemporary resonance, so the concentration offers its students many new insights on the world in which we live.

The critical reading of texts-from the Hebrew Bible to contemporary Israeli poetry, from the kabbalah to modern Jewish autobiography, from philosophical treatises to communal record books-is central to the Judaic Studies concentration. Students are required to complete at least one year of course work in Hebrew, the language of foundational Jewish texts from antiquity to modern-day Israel. They are also encouraged to further improve their Hebrew, and where feasible, to study other appropriate languages such as Yiddish, Aramaic, ancient Greek, Arabic, or contemporary European languages.

For additional information, please visit the department’s website: http://www.brown.edu/academics/judaic-studies/

Judaic Studies Concentration Requirements
Jews have lived and flourished over thousands of years in a variety of social contexts, stretching from the Land of Israel and the eastern Mediterranean to Asia, Africa, Europe, and the Americas. Concentrators will have the opportunity to study Jews in these contexts, getting to know their social structures, and what they have created. The subjects of study cover an astonishing range, including history and society, Jewish law and philosophy, and Jewish literature and ritual. Students will learn to unlock this wealth in both the ancient and the modern worlds through a number of academic disciplines - History, Religious Studies, and Literature. These also provide tools for studying and analyzing human societies and cultures in general, for which Jewish experiences provide an important perspective.

PROGRAM IN JUDAIC STUDIES
Required Coursework
The Program in Judaic Studies offers two paths (detailed below). Please note that the following apply to each concentrator:
1) All students are required to take a total of ten courses.
2) All students must take one full year of Hebrew (two of the ten required courses). Generally, this requirement will consist of two courses in Elementary Hebrew (HEBR 0100/HEBR 0200) or the equivalent as determined by a proficiency examination. Fulfillment of the Hebrew requirement through examination does not reduce the requirement to take ten courses for the concentration.
3) Upon declaring a concentration in Judaic Studies, each student must define his or her primary disciplinary track (History, Religious Studies, or Language/Literature). Concentrators will then be assigned a
faculty mentor in that discipline (within the Judaic Studies faculty) to help students select courses and construct a coherent concentration plan.

Program in History or Religious Studies:

For this track, students are expected to complete a minimum of four courses in their area of disciplinary focus (History or Religious Studies), at least one of which must and no more than two of which may be outside the Program in Judaic Studies in the department of disciplinary focus (preferably methods courses, such as in the History department or RELS 1000). Students in this track, in consultation with the concentration adviser and faculty mentor, may apply up to two additional language courses (HEBR 0300, HEBR 0400, or HEBR 0500) to the additional four required courses for the concentration.

Program in Language/Literature:

For this track, students are expected to complete five courses in Hebrew language (HEBR 0100 / HEBR 0200; HEBR 0300/HEBR 0400; HEBR 0500). In addition, students will take issues in Israel in Hebrew (HEBR 0600) and one further course in Judaic Studies (within the disciplinary focus). Two additional courses in the disciplinary focus, at least one of which must be outside the Program in Judaic Studies in a department of shared disciplinary focus (e.g. English or Comparative Literature), are also required. Fulfillment of the Hebrew requirement through proficiency examination does not reduce the requirement to take ten courses for the concentration.

4) Of the courses required in the Program in Judaic Studies, at least one should focus on the ancient period and one should focus on the modern period.

5) Each student, in discussion with his/her mentor, is required to designate an advanced course (1000 level) in his/her senior year either within the Judaic Studies program or in the corresponding disciplinary department as the capstone for his/her concentration. Within the frame of this capstone course, the concentrator will write a final paper on a topic in Judaic Studies that displays in an appropriate way the theoretical and interpretive issues of the concentration focus. If a student opts to fulfill this requirement in a course outside the Program in Judaic Studies, the student must get permission in advance both from his/her mentor and from the professor of the course in question since the student’s final project will address a Judaic Studies topic or theme.

6) Students who study at other institutions, either in the United States or abroad, may apply a maximum of four courses (two topical and two language courses) to the concentration.

7) Double concentrators may count up to two courses that they have used to complete their concentration requirements in another department towards their concentration in Judaic Studies.

Honors Program

Any student who wishes to engage more deeply in research related to Judaic Studies in any of its disciplines or branches is invited to consider writing an Honors Thesis.

The Honors Thesis

The goal of the thesis is to add to the existing scholarship in the field of Judaic Studies. It should be based on original research, involving the close reading of primary sources. The honors thesis is expected to present an argument based on the student’s own analysis and will engage an ongoing debate or discussion in the field, demonstrating an awareness of the major research done until now and clearly identifying its own contribution, however limited. Since it is the equivalent of two semester-long courses, it should be a substantial piece of work (typically between 35,000-55,000 words) containing a sustained and consistently supported argument. To be successful, the student needs to adopt both a critical research methodology and a logical research strategy, both of which should be discussed in the thesis itself. In addition to being assessed in all these aspects, the thesis will also be graded on its organization (the way in which it is structured into separate and clearly defined chapters to support the main argument) as well as the quality and precision of its writing.

Work that simply describes and summarizes its sources along with previous research is not acceptable. The goal here is original research and analysis.

Entering the Program

In order to be considered a candidate for Honors, students will be expected to have maintained an outstanding record (at least A in Judaic Studies courses. The Honors thesis, which fulfills the capstone requirement, will normally be written as a two-semester individual study project (numbered JUDS 1975/JUDS 1976) during the senior year.

A student contemplating a thesis should approach the faculty member with whom he or she hopes to work during the sixth semester. Once he or she has agreed to be the advisor (or helped find another member of the program better suited to the project), the student begins a process of consultation in order to determine a topic for the thesis, its sources, and proposed methodology. The contours of the project should also be laid out so that the student can commence productive research at the very beginning of the seventh semester. After this, a second reader for the thesis should be chosen by the advisor in consultation with the student.

This may be a faculty member of the Judaic Studies program, one of the affiliate faculty, or, should the topic require it, a member of a different department. By the last week of the semester, the student should submit a thesis information form detailing the thesis topic with a short description of the proposed project, countersigned by advisor and second reader.

Thesis Proposal

During the first three weeks of the seventh semester, the student should work with the faculty advisor to write a thesis proposal. This should be a brief document (1,500-2,000 words) explaining the topic chosen for the thesis and its significance to the field of Judaic Studies, with reference to previous research on the subject. The proposal should detail the questions to be asked and the kind of argument that will be made as well as explaining the primary sources and research methodology that will be employed. The proposed research strategy (i.e. the stages by which research and writing will be done) and timetable should be appended together with a brief, one page bibliography of primary sources and major research to be consulted.

Once the advisor is satisfied with the proposal, the student will be considered fully accepted into the Honors program and can enroll in the required independent study course by the last day to add a course in the fourth week of the term.

Research and Writing

It is the responsibility of the student to carry out the research program outlined in the proposal, as well as to write the thesis in an organized and timely fashion. During the process of research and writing, the advisor will continue to work closely with the student, providing guidance on research methods and suggesting further secondary reading. A regular meeting schedule will be set up to help the student meet the short- and long-term deadlines he or she has set. The advisor will also evaluate the progress of the research, providing any necessary direction and detailed feedback on written drafts.

The second reader will also be available to provide a measure of input and guidance during the process of research and writing. This may be particularly important in those areas where the primary advisor has limited expertise. The second reader may also be willing to help with giving feedback on various sections of the thesis drafts. All these roles should be determined by a process of consultation involving the advisor, the student, and the second reader him/herself.

The final thesis should have a complete scientific apparatus - citations and a full bibliography - in a form determined by the advisor. It should be submitted no later than April 15 for May graduates and November 15 for December completers.

Assessment

The thesis will be assessed independently by the advisor and the second reader in written reports. In order to receive Honors, it should be deemed excellent according to the following standards:

• Is the scope of the work appropriate for an Honors thesis?
• To what extent does it qualify as original research?
• To what degree does it sustain an analytic argument throughout?
• To what degree is it rooted in an engagement with previous research?
• How well does it reflect critically on its method and process?
• To what extent is the organization adequate to the argument presented?
• How well is the thesis rooted in the common conventions of the field?
• To what degree is the writing clear, cogent, and free of errors of grammar, tone, and style?

The two reports will be circulated to all faculty members in the program, who will review them before making the final determination at the next faculty meeting whether the thesis merits Honors. The meeting must be held, the decision reached, and the candidate informed before the Registrar’s deadline for that semester.

Further Information

Students who are interested in further information about the concentration should contact the Judaic Studies Office at 163 George Street to make an appointment with the undergraduate concentration advisor. [Tel: 401.863.3912] or Judaic@brown.edu.

Courses

Biblical Hebrew

BHBR 0100. Introduction to Biblical Hebrew.
An intensive introduction to the fundamentals of biblical Hebrew grammar and vocabulary intended to prepare students to read biblical texts in the original language. For students with little or no prior knowledge of Hebrew.

BHBR 0200. Readings in Biblical Hebrew.
An introduction to the reading of biblical texts in Hebrew. Reading of selected texts from narrative, law, and poetry in the Hebrew Bible, with a few texts in post-classical Hebrew (the Dead Sea Scrolls and the Mishnah) introduced late in the semester. Intended for students who have completed BHBR 0100; others should consult the instructor.

Hebrew

HEBR 0100. Elementary Hebrew.
An introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in various periods and to a variety of cultural issues. If registration is closed, please contact the professor and a wait list will be created. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special permission. Enrollment limited to 20.

HEBR 0200. Elementary Hebrew.
This is the second half of a year-long course, an introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in various periods and to a variety of cultural issues. Prerequisite: HEBR 0100. Students must have taken HEBR 0100 for credit to receive credit for this course. Exceptions must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 20.

HEBR 0300. Intermediate Hebrew.
Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: HEBR 0200 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration, please contact the professor and a wait list will be created.

HEBR 0400. Intermediate Hebrew.
Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: HEBR 0300 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

HEBR 0500. Writing and Speaking Hebrew.
Enables students to improve their skills in speaking and writing Hebrew on a variety of topics. Features advanced work on language structure and active language practice in the classroom. Class discussions of Israeli current events draw on Israeli stories, poems, television programs, and films and on the Israeli press. Students also compose essays and stories in Hebrew. Prerequisite: HEBR 0400 or equivalent. Enrollment limited to 20.

HEBR 0600. Issues in Contemporary Israeli Society, Politics, and Culture in Hebrew.
An exploration of current issues in contemporary Israeli society, politics, and culture: the Israeli-Palestinian conflict, tensions between ultra-orthodox and secular Jews, religion and state, Israel as a Jewish and democratic state, the economic gap between rich and poor, the integration of citizens from a variety of backgrounds (Jews of Middle Eastern, North African, Russian, and Ethiopian origin; Arab citizens of Israel), gender relations. Sources include films, television programs, Internet news, works of literature. Conducted in Hebrew. Emphasizes strengthening Hebrew reading, writing, and speaking skills. Prerequisite: HEBR 0500. Students who have not taken HEBR 0500 should see instructor for permission to enroll. DPLL

Judaic Studies

JUDS 0050A. Believers, Agnostics, and Atheists in Contemporary Fiction and Memoirs.
In recent decades, there has been a resurgence of religiosity in contemporary society, while at the same time many have been skeptical and even hostile to religious belief and practice. Others are just not sure what to believe. We will study selections of fiction and memoirs by writers of Christian and Jewish background that explore such situations as the affirmation or negation of the existence of God, the role of religious ritual in a person’s life, and the positive and negative impacts on society of religious institutions and the clergy who lead them. Enrollment limited to 20 first-year students. DPLL WRIT FYS

JUDS 0050E. From Amsterdam to Istanbul: Christians, Muslims, and Jews.
This course combines text, picture, and music to study the history of Europe and the wider world in the early modern period through the eyes of a minority. Examines the new Jewish centers in the Atlantic world, the Ukrainian steppe, and the Middle East from 1500-1800, and how they shaped these environments. Students study cultural revolutions, such as the spread of printing, the renaissance and new religious movements. See how the development of the modern state and the blurring of social, religious, and gender boundaries created new definitions of religious and cultural identity. Enrollment limit: 20 first year students. FYS WRIT

JUDS 0050H. Israel's Wars.
Israel’s history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. This first year seminar will survey the military aspect of this conflict. The major aim of the course is to present an historical survey of the Israeli-Arab wars and Jewish-Palestinian encounters in the 20th century. This will provide some of the necessary background for understanding the present phase of the Arab-Israeli conflict in the Middle East, and help in comprehending the roots and causes of contemporary controversies between Israel and the Palestinians and/or its Arab neighboring states. Enrollment limited to 20 first year students. FYS

JUDS 0050J. Friendship in the Ancient World (RELS 0090F).
Interested students must register for RELS 0090F.
How have Jews come to terms with dynamic nature of the Modern World? How has life in new places and new times affected Jewish life? We will look at the changing structures of Jewish identity in the modern period as the Jews came to terms with their new, and ever changing situation in society. Each week a different form of Jewish identity will be examined in its specific historical setting. Among others we will look at a Court Jew, an Enlightened Jew, a Jewish Nationalist, a Jew in a Nazi Ghetto, an Israeli Jew, and a contemporary American Jew. Enrollment limited to 20 first year students. DPLL FYS WRIT

JUDS 0050M. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present.
Jewish and Christian identity in Europe has traditionally been closely connected to the ways the two religions view each other. Mutual admiration, influence, and hatred have combined together in a difficult relationship, fundamental to European history. In this course, we will survey that relationship, examining some key issues and events which shaped it. The Jews' attitudes and actions will be examined alongside those of their Christian neighbors. Topics covered include: medieval revulsion and attraction; early modern re-evaluations of Judaism and Christianity; modern Christian anti-Semitism, Jewish diplomacy, and the Holocaust; the effects of Vatican II; Israel and the contemporary Christian world. FYS WRIT DPLL

JUDS 0050N. Death and Afterlife in the Biblical Tradition (RELS 0090J).
Interested students must register for RELS 0090J.

JUDS 0060. The Bible and Moral Debate.
How was the Bible employed in past moral debates that divided American society, e.g., debates over the legitimacy of slavery? How is the Bible used in contemporary moral discourse, e.g., concerning abortion, capital punishment and gay rights? What does the Bible really have to say about such issues? This course will consider these and other questions through a close reading of pertinent texts which address topics such as abortion, homosexuality, capital punishment, immigration, gender, family violence, race and slavery, disability, genocide, the environment and inequality of wealth. No prerequisites. DPLL WRIT

JUDS 0061. Foreigners, Refugees, and the Ethics of Minority.
This class investigates the legal and ethical definitions of persons and homelands by examining the relationship between concepts of native and foreigner, hospitality and neighbour, refuge and exile, minority and majority. We will adopt historical, philosophical, and legal perspectives and take the Jewish historical experience of exile and minority as a jumping off point for discussing the contemporary refugee and migration crisis. The goal of this class is to contextualize liberal democratic debates over rights to migration and mobility with historical religious and moral sources as well as to explore the possibilities for social integration of difference within pluralism. DPLL WRIT

Interested students must register for RELS 0022.

JUDS 0080A. Ethics After Auschwitz.
Can we still speak of a "human condition"—a moral term—when human beings are capable of genocide? Does ethical responsibility have meaning if another's death can be manufactured by the state? Can traditional morality and religion still find a place in a world of which it cannot make sense? In this class, we will take the Holocaust as the beginning of a tragic account of contemporary humanity and examine the possibilities for human life and morality in light of the social and political orchestration of mass killing and oppression. Authors include, Adorno, Agamben, Arendt, Fackenheim, Foucault, Levi, and Levinas. SOPH DPLL WRIT

JUDS 0090C. Intermediate Biblical Hebrew.
An intermediate course for those who have completed JUDS 0090A and 0090B, the introductory level courses. Focus on reading a single biblical book (translation, grammar and syntax, interpretation). Interested students must register for RELS 0022.

JUDS 0090D. Intermediate Biblical Hebrew II.
An intermediate course: the continuation of JUDS 0090C. Focuses on reading a single biblical book (translation, grammar and syntax, interpretation). Intended for students who have completed JUDS 0090C; others should consult the instructor.

JUDS 0601. Authority and Autonomy.
This course will introduce the history of Jewish thought, focusing upon the problems of authority and autonomy, normativity and agency, law and freedom. We will investigate the relationship between legally mandated actions and an individual's responsibility to tradition and community and question whether the concept of revealed "law" imposes a "necessary" obligation upon ethical agency or rather serves a pedagogical function (virtue). By focusing upon Jewish philosophical critiques and endorsements of the modern conception of autonomy, we will ask whether "I" am the legitimate authority of my own actions or whether I require tradition or community to set an example. DPLL WRIT

JUDS 0602. Gender in Early Jewish and Christian Texts (RELS 0195).
Interested students must register for RELS 0195.

The most "secular" presidential election in American history saw the language of Christian America apparently yield to a rhetoric of racism, misogyny, and white identity. But racialization and secularization are very much intertwined. In an effort to understand how "whiteness" is tied to the history of Christianity and secular, liberal democracies, this class will trace the figure of the "Jew" in the Christian imagination, and examine the racial and religious othering of Judaism as an entry point for reflecting upon contemporary American social and political struggles surrounding religious and racial identities. WRIT DPLL

JUDS 0625. Israelite Religion (RELS 0320).
Interested students must register for RELS 0320.

JUDS 0630. The Old Testament/Hebrew Bible and Its World.
An introduction to the historical-critical study of the Hebrew Bible and a reconstruction of the history of Israel to the end of the Persian period (332 B.C.E.). Topics include biblical source criticism; Israel's obscure origins; reconstructing the settlement period; an imperial Israel under David and Solomon; institutions-law and authority, covenant, prophecy, temple cult and priesthood. All readings in translation. No prerequisites.

JUDS 0670. War and Peace in the Hebrew Bible and its Environment.
An examination of the role of war and peace in the Hebrew Bible and in texts and art of ancient Israel's neighbors. Topics include divine beings, war and peace-making; peace treaties; explaining defeat and victory; ideologies of warfare; the treatment of prisoners, corpses and captured bones; the warrior as masculine ideal; civil war and coups; treaty obligations; ritual dimensions of war and peace (e.g., mourning, animal sacrifice, child sacrifice, divination, memorializing war); visual representations of war as propaganda; the idea of a future, eschatological war between the forces of good and the forces of evil. No prerequisites. WRIT

JUDS 0671. Sex and Gender in Ancient Israel.
An investigation of Israelite views of the sexes, restrictions on sexual expression, and the construction of gender as evidenced by biblical sources and archeological data. Topics include creation stories on human origins and the human condition, including the origin of the two sexes and reproduction; marriage and family life (inheritance, intermarriage, divorce, the widow, status of the fetus); sexual boundaries (adultery, rape, incest, prostitution, homoeroticism); purity and sexual expression; male and female religious professionals and votaries; constructing gender: masculine and feminine behaviors. WRIT, DPLL

JUDS 0680. Judaism, Christianity, and the Bible.
No book in human history has exercised as much influence as the Bible. Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of the Hebrew Bible (Old Testament) from its origins in ancient Israel to its development about five hundred years later as a foundational text of both Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible. WRIT
A survey of classic Jewish texts, from the Bible to modern literature. Each text will be discussed from the perspective of both its own historical and social context and its engagement with earlier ones. Attention will be paid on how these authors address perennial issues of human concern and how their answers are shaped by their experience as Jews. DPLL WRIT

JUDS 0682. How Bible Became Holy.
Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of the Hebrew Bible (Old Testament) from its origins in ancient Israel to its development about five hundred years later as a foundational text of both Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible. DPLL WRIT

JUDS 0863. Jews and Money.
In the West, there has always been a complicated relationship between Jews and money. In the first part of this course, we will examine, both theoretically and empirically, the complex relationship between Jews, capitalism, socialism, nationalism, and anti-Semitism. In the second part of the course, we will return to the one aspect of the “cultural capital” that is sometimes said to have helped Jews to prosper: their religious tradition. We will put these religious teachings into conversation with pressing modern questions such as: What is “wealth” and “ownership”? Do the rich and poor have obligations to each other? DPLL WRIT

JUDS 0864. Great Jewish Books (RELS 0323).
Interested students must register for RELS 0323.

JUDS 0865. Judaism, Christianity, and Islam (RELS 0088).
Interested students must register for RELS 0088.

JUDS 0868. The Ten Commandments.
A history of the Ten Commandments from the Bible to today. How have the commandments been understood by Jews and Christians throughout time? What symbolic importance have they had? WRIT

JUDS 0700. A Game of Thrones: Religion and Nationalism, 1789-1933.
While contemporary liberal democracy takes a neutral stance toward different religions, it was modern European conflict over religion that gave rise to this political theory. Supposed “friends” such as 19th-century German Protestants and Catholics fought bitterly about whose version of Christianity should be the basis of the modern state. “Enemies” such as the Jews were thought to be incapable of civic participation in the liberal state and undeserving of equal rights. This course will examine, both philosophically and historically, the tensions between religion and politics in modernity that led to the emergence of the theory of state neutrality. DPLL WRIT

JUDS 0820. God and Poetry.
Throughout recorded history, poetry has expressed a variety of religious experiences. In this seminar we will read selections from biblical psalms, the biblical book of Job, and contemporary Christian and Jewish poetry, and explore how the language of poetry can serve as a means to convey the nature of relations between humanity and God. We will also seek to understand the underlying universal human psychological experiences reflected in the poems and how religiosity provides a framework for people to deal with those experiences. In our discussion of the contemporary Christian and Jewish poems, we will seek to understand the attempt of the poet to write about religious experience in a secular age. Students with a variety of cultural backgrounds and religious orientations (believers, agnostics, and atheists) are welcome. Enrollment limited to 20.

JUDS 0830. The Bible as Literature.
Explores how methods of literary analysis can be applied to the reading of narratives of the Old Testament/Hebrew Bible (in English translation). Also compares the ways that modern writers have transformed biblical stories into new interpretive literary works. For students interested in an introduction to the Bible, as well as students with a knowledge of the Bible who want to deepen their understanding of biblical narratives and investigate the influence of the Bible on modern literature. All readings in English. DPLL

JUDS 0840. “Coming Out” Jewish, Gay or Black: Mistaken Identity in Literature from USA and Brazil (POBS 0820).
Interested students must register for POBS 0820.

JUDS 0901. Brothers Betrayed: Jews and Poles from 1500 until Today.
Jews have lived on Polish lands for some nine hundred years. In that time, they and their non-Jewish neighbors have interacted in a wide range of ways, from friendship and co-operation to hatred and violence. In this course, we examine this centuries long relationship, focusing particularly on how peaceful co-existence between Poles and Jews could rapidly change to bitter hostility. Topics include: Jews and the early-modern nobility; the nineteenth-century “Polish-Jewish Brotherhood”; the exclusionary politics of the interwar Polish republic; Poland’s role in the Holocaust; the post-war Communist regime and the Jews; Polish-Jewish relations following the collapse of communism. DPLL WRIT

JUDS 0902. History of the Holocaust.
Explores questions raised by the Holocaust regarding how such barbarism erupted in our so-called civilized and enlightened age. Attempts to analyze the meaning of the Holocaust from three vantage points: that of European, and more particularly, German history; that of Jewish history; and that of those states and religious institutions which shared responsibility. Enrollment limited to 40. If unable to enroll because of closed registration please contact the professor and a wait list will be created. DPLL WRIT

JUDS 1530. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE.
The exile of Judah’s elite to Babylon elicited profound and conflicting literary responses. We will undertake a literary and historical analysis of a number of the most important works produced in response to the crisis of exile, including Jeremiah, Ezekiel, Second Isaiah, Lamentations, Psalm 137, the Priestly Writing, and the work of the exilic deuteronomists. Enrollment limited to 20.

The modern engagement with the many ways that we construct identity has been matched by a similar wave of studies about identity construction in the ancient world. In this course we will discuss the rise of “Judaism” and “Jewish identity” in the ancient period (looking at roughly 400 BCE-200 CE), and compare it with the movement of the followers of Jesus as a negotiation of a new identity within Judaism (roughly 30 CE-200 CE). We will conclude with the question of the “Parting of the Ways” of these two groups.

JUDS 1602. Mishnah and Tosefta.
An examination and close reading of the Mishnah and Tosefta, two third-century CE documents foundational to rabbinic Judaism. The class will focus on both contemporary scholarly understandings of these texts and readings, in the original Hebrew, of the text itself. Knowledge of Hebrew (biblical, rabbinic, or two years of modern or its equivalent) required. DPLL WRIT

JUDS 1610. The Archaeology of Jerusalem: From the Origins to the Ottomans.
Jerusalem earned a special eminence among the world’s famed ancient cities. Its sanctity to Jews, Christians, and Muslims made the city a focus of discussions and controversies regarding the evolving and changing identities throughout its long urban history. 1700+ archaeological excavations and surveys in and around the Old City have been conducted over the last 150 years. Examine the material remains of the city from the beginnings in the Chalcolithic period through the Ottoman period, 1917 CE. The contemporary literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods.

JUDS 1611. The Dead Sea Scrolls.
The Dead Sea scrolls have been rightly celebrated as changing our fundamental understanding of ancient Jewish and Christian history as well as the Bible. But what is in them, and why do they matter? In this course we will read through most of the scrolls in English translation and cover topics such as: authorship; historical context; religious practice; and scripture and its interpretation. The course will develop skills in analytical writing, close reading, and historical reasoning. Enrollment limited to 20. WRIT
JUDS 1613. Religion and Postcolonialism.
When eighteenth- and nineteenth-century Western scholars turned their gaze toward the East they began fetishizing the wonders and mysteries of the “Orient”. This powerful myth of the Orient helped to reimagine the Jews of Europe as an “internal colony” and also helped justify the colonization of and Christian missionizing among peoples abroad. This course will examine the social, political, and scholarly representations of religious and cultural otherness of Jews, Muslims, and Hindus who experienced Christianity as both a colonizing force as well as a model for imagining the nationalist projects of their post-colonial states. DPLL WRIT

JUDS 1614. Heidegger, the Jews, and the Crisis of Liberalism.
This class explores the enduring legacy of Heidegger’s critique of Western philosophy in political, theological, and social thought. Focusing primarily upon Heidegger’s reception in 20th-century Jewish philosophy, we will explore the allure of Heideggerian thought and its implication in both left and right political critiques of liberalism. Topics include onto-theology, phenomenology, and radical historicism; science, hermeneutics, and methodology in the humanities; liberalism and the secular; ethics, politics, action; de-structuration and deconstruction; time and the Other. Authors include Adorno, Arendt, Butler, Derrida, Levinas, Löwith, Marcuse, Rosenzweig, Schmitt, Strauss. DPLL WRIT

JUDS 1615. The Archaeology of Palestine.
Palestine constitutes one of the most important archaeological regions connected to the origins of Judaism, Christianity and Islam. In this class we will examine the material remains of the region beginning in pre-historic times until the end of the Ottoman period in 1917. Literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods. WRIT

JUDS 1616. Adam and Eve in Early Biblical Interpretation (RELS 1144).
Interested students must register for RELS 1144.

This seminar surveys the history of archaeological exploration, discovery, and interpretation in the contexts of social, political, and religious debates from the mid-nineteenth century to the present, with an emphasis on the post-1967 period. It examines the legal settings and ethical precepts of archaeological activity and the developing discourse of cultural heritage. It analyzes the ongoing struggle to discover and define the city’s past, to expose its physical legacy, and to advance claims of scientific validity and objectivity against the challenges of religious zeal and political partisanship, the latter both intimately related though not necessarily limited to the ongoing Israeli-Palestinian conflict. WRIT

JUDS 1625. Problems in Israelite Religion and Ancient Judaism.
A series of topics in Israelite religion and ancient Judaism which are of current scholarly interest are explored in a seminar setting. Students are encouraged to read widely and pursue individual research interests. The course assumes a basic knowledge of biblical literature and scholarly criticism. Enrollment limited to 20.

JUDS 1630. The Talmud.
Written from the first - seventh centuries CE, the Talmud (which runs to 20 volumes) contains law, lore, theological speculation, and complex argumentation. We will read a selection in depth and examine both traditional and modern critical (e.g. historical and literary) approaches to this fundamental text. No prerequisites; all texts in English translation. Enrollment limited to 20. DPLL WRIT

JUDS 1635. Problems in Israelite History.
Topics of recent and current debate among specialists in the field of Israelite history. Problems include (1) the historicity of the patriarchs and matriarchs; (2) the historical evidence relevant to the question of an exodus; (3) the nature of Israel’s settlement in Canaan; (4) the 10th century, era of empire or literary fiction? (5) the land of Judah after the Babylonian conquest. Enrollment limited to 20.

Surveys the major practices, traditions, and beliefs of the Jews, with an emphasis on modern Jewish Communities. How does a Jewish community shape its practices and beliefs against its own specific historical circumstances to create a coherent and meaningful religious system? What is “Judaism,” and how do scholars of religion explain and interpret it? DPLL WRIT

JUDS 1645. Jews and Judaism in the Greco Roman Mediterranean.
An advanced survey of the evidence for Jews and Judaism in the Greco-Roman Mediterranean (Egypt, Asia Minor, Rome, North Africa, etc.). Sources include synagogue mosaics, burial and donor inscriptions, personal documents, and references in non-Jewish writers, including Christians. Also considers what theoretical models best enable us to reconstruct the identity, practices and beliefs of the ancient diaspora Jewish communities. Enrollment limited to 20.

JUDS 1650. Religion and Sexuality.
For millennia, religious thinkers have wrestled with the nature of sexuality. This class will examine how these thinkers have dealt with the essential questions that sexuality raises. Why do humans have sexual desire? Are there proper limits to sexual activity? While the focus of this class will be on Judaism and Christianity from antiquity to the present, we will also discuss Hindu, Muslim, and Tantra views. Topics to be addressed include: the nature and purpose of human sexual desire; contraception; adultery; homosexuality; abortion; and masturbation. No prerequisites. WRIT

JUDS 1654. Russian Jewish Literature and Film (RUSS 1900).
Interested students must register for RUSS 1900.

JUDS 1655. Religion in the Dead Sea Scrolls (RELS 1150).
Interested students must register for RELS 1150.

Interested students must register for HMAN 1970I.

Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development. WRIT

JUDS 1675. Parting of the Ways: The Separation of Judaism and Christianity.
Jesus may have been Jewish, but for many centuries, Jews and Christians alike have considered their religions and their self-identifications to be mutually exclusive. When, why and how did these differences become definitive? Some modern scholars argue that “the ways parted early”; others contend that they never parted at all! We focus on the period before Christianity becomes the official religion of the Roman Empire (late 4th century C.E.), with attention to persons in antiquity who contested these distinctions, and even to some in our own time (“Hebrew Christians,” “Messianic Jews,” and “Jews for Jesus”). Enrollment limited to 20. WRIT

JUDS 1680. The Archaeology of Qumran and the Dead Sea Scrolls.
Qumran is one of the most prominent archaeological sites in the world. Its fame derives from its proximity to a series of caves in which some 800 ancient scrolls were found. Scholars have debated the relevance of this site to the histories of Judaism and Christianity. This seminar will examine the debates regarding the character of Qumran through the material finds from old and new excavations conducted at the site itself and in the Dead Sea region. The lectures and readings are intended to stimulate a discussion about how to use texts and material culture for reconstructing the past. Enrollment limited to 20.

JUDS 1690. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE.
The exile of Judah’s elite to Babylon elicited profound and conflicting literary responses. We will undertake a literary and historical analysis of a number of the most important works produced in response to the crisis of exile, including Jeremiah, Ezekiel, Second Isaiah, Lamentations, Psalm 137, the Priestly Writing, and the work of the exilic deuteronomists. Enrollment limited to 20.
JUDS 1695. Philo (RELS 1130). Interested students must register for RELS 1130.

JUDS 1701. Jews and Revolutions in the 20th Century. The 20th century was an age of revolutions, both political and social, in which Jews played pivotal roles. The student uprisings of the 1960s, the Feminist revolution, and the rise of the LGBTQ movement were crucial moments of change in the development of the western world. We will discuss the Jews’ roles in all these revolutionary movements, as well as in the great political revolutions of the time. WRIT DPLL

JUDS 1702. Creating the Global Economy: Entrepreneurial Jews, 1690-2010. What can the experience of the Jews teach us about the growth of the modern economy in the era of globalization? What were the economic, political, and cultural conditions that allowed Jewish bankers to create the economic networks that helped underpin the modern world? We will answer these questions by examining the careers and interactions of the major Jewish bankers and banking dynasties such as the Rothschilds, Jacob Schiff, and Gerson Bleicheroder. We will see how these Jewish economic networks helped create - and were exploited by - the modern European economic systems of Europe, the United States and Israel. DPLL WRIT

JUDS 1711. History of the State of Israel: 1948 to the Present. This course surveys the history of Israel from its Proclamation of Independence in 1948 until today. Israel’s history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. At the same time, an entirely new, vibrant and dynamic society and culture has developed there. This course aims to familiarize the student with the major outlines of Israel’s development, and with different narratives and interpretations of that history. The reading materials and class discussions will examine not only the Arab-Israeli conflict, but also its influence on Israeli politics, society and culture. WRIT

JUDS 1712. History of Zionism and the Birth of the State of Israel. Examines the history of the Zionist movement within the context of the history of European nationalism and as one of numerous Jewish political responses to rising anti-Semitism. Explores the ideological and political foundations of the Zionist movement until Israel’s establishment as well as broader concerns of Jewish politics in the late 19th and early 20th centuries. WRIT

JUDS 1713. Introduction to Yiddish Culture and Language. Yiddish was the language spoken by most Jews in Eastern Europe and the countries to which they emigrated (including the U.S., England, South Africa, South American countries, and Israel) from the nineteenth century until after the Holocaust. It was the basis for a transnational Jewish culture and literature, and it played a central role in modern Jewish political life. We will explore the history of Yiddish culture and the development of the Yiddish press, literature, and cinema. The connection between Yiddish and modern Jewish politics will also be discussed. Students in this course will also have the opportunity to develop a basic knowledge of the Yiddish language. DPLL

JUDS 1714. Memoirs and Memory: The Individual Experience of Modern Jewish Life. By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as eastern, central and western Europe, North Africa, the U.S., and Palestine/Israel, this course considers how Jews in different historical settings have understood their “Jewishness” and their relationship to their past, as well as the historian’s role in this relationship. Enrollment limited to 20.

JUDS 1715. Women and Gender in the Modern Jewish World. This course will focus on Jewish women’s encounters with modernity in a variety of contexts: Western and Eastern Europe, United States, and Israel. The goal of this course is to uncover the experiences of Jewish women and to use gender analysis as a means of enriching our understanding of Jewish life. Students will consider how gender has shaped Jewish women’s experience in the context of immigration, assimilation, religious observance, home, work, motherhood, family, and feminism.

JUDS 1716. The End of Modern Jewish History. This course addresses the changes to the Jewish diaspora throughout the second half of the twentieth century. It begins by considering the constellation of processes that defined modern Jewish history from the 1750s until the 1940s, including demographic growth; geographic spread; the struggle for political and legal emancipation; cultural, social, and economic integration; and the birth of modern anti-Semitism. The course then asks in what ways the Holocaust and the birth of Israel transformed Jewish life in the diaspora, positing that in the 1940s a new era of Jewish history began. DPLL WRIT

JUDS 1717. Modernity, Jews, and Urban Identities in Central Europe. The course will explore the distinct cultural identities that Jewish modernist intellectuals like Walter Benjamin, Gershom Scholem, Sigmund Freud, Franz Kafka and Karl Kraus forged for themselves in response to the conflicting challenges of assimilation, anti-Semitism and modernization. Readings will be based on primary sources and special emphasis will be placed on the historical contexts of Berlin, Vienna, Budapest and Prague where these thinkers lived their lives. DPLL WRIT

JUDS 1718. Modernity, Jews, and Urban Identities in Central Europe. The course will explore the distinct cultural identities that Jewish modernist intellectuals like Walter Benjamin, Gershom Scholem, Sigmund Freud, Franz Kafka and Karl Kraus forged for themselves in response to the conflicting challenges of assimilation, anti-Semitism and modernization. Readings will be based on primary sources and special emphasis will be placed on the historical contexts of Berlin, Vienna, Budapest and Prague where these thinkers lived their lives. DPLL WRIT

JUDS 1719. Making Sparks Fly: Mysticism and Politics in the History of Hasidism. Hasidism was a social movement founded on mystical ideas. Using the texts of its greatest masters, we will learn how revolutionary new ideas about God and the world became a powerful movement for social change. We will examine Hasidism’s kabbalistic background, and the mystical ideology of the Ba’al Shem Tov and his followers. We will focus on the development of the Zaddik and the Hasidic Court, as well as their conflicts with the rabbinic and community establishments in the eighteenth and nineteenth centuries. The seminar will involve critical reading of primary sources in translation and class discussions of historiography. WRIT

JUDS 1720. Money, Power, Sex and Love: The Modern Jewish Family in Europe and America. What roles did the family play in modern Jewish society and how did Jewish women participate in them? These questions are at the heart of this seminar. Through discussions of primary sources (in translation) and modern research, we will use the tools of gender analysis to examine the history of the Jewish family from the mid-seventeenth century until today. Topics discussed include: Jewish law and the family, women and the politics of the family economy, sex and the erotic, women’s spirituality, the bourgeois Jewish family in imperial Germany, Jewish family life before the Holocaust, and intermarriage in the contemporary USA. WRIT

JUDS 1721. Jews and Muslims. This course considers interactions between Muslims and Jews in various historical settings from the early Islamic world, to Medieval Spain, to contemporary Europe and the Middle East. The goal is to move beyond simplistic histories of interfaith utopia, Islamic persecution, and Zionist domination to consider the complexities of ethno-religious interaction in a variety of social, cultural, economic and political contexts. WRIT

JUDS 1722. Jews and Muslims. This course considers interactions between Muslims and Jews in various historical settings from the early Islamic world, to Medieval Spain, to contemporary Europe and the Middle East. The goal is to move beyond simplistic histories of interfaith utopia, Islamic persecution, and Zionist domination to consider the complexities of ethno-religious interaction in a variety of social, cultural, economic and political contexts. WRIT

JUDS 1726. Jewish Humor and Commercial Entertainment in Early 20th-Century Europe and America. The seminar explores the relationship between humor, popular culture and Jewish ethnic identity in early 20th-century Europe and America. It argues that self-deprecating humor and satiric performance of Jewish stereotypes were not expressions of self-hatred, but complex cultural gestures that led to in integration within mainstream society. Topics to be considered are: the joke as a social gesture; the Jewish music hall as an urban institution; the politics of blackface in American Vaudeville; the East-European Jews in Hollywood. DPLL
Interested students must register for HIST 1551.

Being a diasporic people without a nation-state until the mid-20th century, the Jews in Eastern Europe created Jewish cultures that were also influenced by the non-Jewish environment. How did these cultures develop in the age of mass migrations? How did the new Jewish cultures express the ideas of "homeland" and "diaspora?" Was the Jewish/Hebrew culture created in Israel part of the Jewish cultural discourse, or did it define itself separately? During the course, we will explore Jewish culture in four cities, also examining their relations with each other, in order to understand the transnational nature of these unique Jewish cultures. Enrollment limited to 40.

Interested students must register for HIST 1976R.

Interested students must register for GRMN 1660L.

Interested students must register for HMAN 1971U.

What are the relationships between Man, God, and the World? Over the centuries, Jewish mystics have sought and found many different answers to this question. In doing so, they created new spiritual formations for Judaism to supplant rational philosophy as bearer of the truth about the Cosmos. We will examine the most important mystical texts produced by Jews to understand this crucial strand of Jewish - and Human - religious, spiritual, and cultural development. Among other books, we will read from the Zohar, Lurianic Kabbalah, the false messianic testimonies of the Sabathean movement, Hasidism, and the thought of Martin Buber. Enrollment limited to 20. DPLL

JUDS 1742. Modern Jewish History and Society.
The study of Jews in their historical and contemporary communities of western and eastern Europe, the U.S., and Israel. Major themes include emancipation and assimilation; secularization and new religious expressions; the Holocaust and modern anti-Semitism; Zionism; immigration, ethnicity, and nationalism; family and intermarriage; education, Jewish culture, and politics.

JUDS 1743. American Jewish History.
By the mid-20th century, the U.S.'s Jewish population was one of the world's largest and most important. In 1654, however, when 23 Jews landed in New Amsterdam, their position was far from assured. The history of American Jewish settlement is considered by exploring the interaction between the political, social, and cultural environment and successive waves of Jewish migrants. WRIT

JUDS 1745. History of the Holocaust.
Examines questions raised by the Holocaust regarding how such barbarism erupted in our so-called civilized and enlightened age. Attempts to analyze the meaning of the Holocaust from three vantage points: that of European, and more particularly, German history; that of Jewish history; and that of those states and religious institutions which shared responsibility. Enrollment limited to 50. If unable to enroll because of closed registration please contact the professor and a wait list will be created. WRIT

What were the different experiences for Jews living among Christians and Muslims? How did Islam and Christianity affect the development of Jewish society and culture? Examine these questions by looking at two flourishing Jewish centers from 1500-1800: one in the Muslim Ottoman Empire, the other in the Christian Polish-Lithuanian Commonwealth. Topics to be discussed include: Christian and Muslim attitudes towards Jews and the Jews' response to them; Jewish communities in Polish and Ottoman towns; the development of Jewish law in both settings; Christianity, Islam, and anti-Jewish violence; the interactions of Jewish, Muslim, and Christian mystical movements. Enrollment limit: 20.

In Jewish historical memory, Zionism is seen as the dominant Jewish national ideology throughout the 20th century. However, emerging in 1897, the Zionist movement aroused significant Jewish opposition. Many different Jewish ideologies developed, ranging from non-Zionism to anti-Zionism. This course will discuss the different arguments used by both Zionists and their opponents. We will look at the various options: Zionism, Diaspora Nationalism, Socialism and Communism, and Reform Judaism (before 1967), as well as Israeli Zionism and the opposition it aroused from Post-Zionists. Our focal question will be: why did Zionism evoke so much opposition among different Jewish groups, DPLL WRIT

JUDS 1753. Blacks and Jews in American History and Culture.
African Americans and American Jews have helped reshape popular culture in twentieth-century America. Indeed, we cannot properly understand developments in popular music, theater, literature, film, or television without considering the peculiar dynamics of Black-Jewish relations. But what was the nature of their relationship? Was it collaborative or exploitative -- or both? How did the creative aspects function in conjunction with the business side of things? These are some of the key questions to be addressed in this course. WRIT DPLL

JUDS 1810. Israeli Literature in Hebrew.
For students interested in reading selections of Hebrew fiction, drama, and poetry. Concentrates on major issues of the State of Israel, for example: the relationship between modernity and tradition, responses to the Holocaust, the Arab-Israeli conflict, and other cultural, social, and political issues. Israeli feature films are viewed and discussed. Conducted in Hebrew. Emphasizes strengthening Hebrew reading, writing, and speaking skills. Prerequisite: JUDS 0500. Students who have not taken JUDS 0500 should see instructor for permission to enroll.

JUDS 1820. Holocaust Literature.
Readings in works of prose and poetry by victims and survivors of the Holocaust that portray experiences in ghettos, in concentration camps, and in hiding. Additional readings in works of the post-war era by survivors and their offspring. Discussion of the moral, psychological, religious, and cultural dimensions of the Holocaust and its ongoing impact on humanity. WRIT

JUDS 1830. Esthers of the Diaspora (POBS 1500H).
Interested students must register for POBS 1500H.

JUDS 1840. The 'New Jew' and the Diaspora: Voices from Israel, Brazil and America (POBS 1500W).
Interested students must register for POBS 1500W.

Section numbers vary by instructor. Please see Banner for the correct course reference number (CRN) to use when registering for this course.

JUDS 1975. Honors Thesis Semester I.
First of two semesters working with a faculty member in the Program in Judaic Studies to complete an honors thesis. Instructor permission required.

JUDS 1976. Honors Thesis Semester II.
Second of two semesters working with a faculty member in the Program in Judaic Studies to complete an honors thesis. Instructor permission required.
JUDS 2040. Yiddish for Research.
This is a course in Yiddish reading for research purposes designed primarily for advanced undergraduates and graduate students. This means that the emphasis will be on learning how to read and decipher a range of texts in modern Yiddish in different genres written. We will read the Yiddish classics and discuss their language, style and content, as well as newspaper articles published at the beginning of the 20th century and various historical documents. We will learn to read and understand non-standard pre-1930s Yiddish as well as American and Soviet Yiddish. Participation in this course requires the instructor's permission. Enrollment limited to 40.

JUDS 2060B. Methods in Ancient History (HIST 2970I).
Interested students must register for HIST 2970I.

JUDS 2450. Exchange Scholar Program.

Center for Language Studies
Director
Ercan Balci

Members of the Center for Language Studies share intellectual interests in issues of learning and teaching second languages and their cultures. The mission of the center is to facilitate contact and cooperation among second language faculty across individual department boundaries. CLS aims to promote research in the field of language study, to develop experimental or innovative language teaching materials, and to design new curricular configurations which stress the central position and interdisciplinary nature of language study. The center supports the application of emerging technologies to language learning, it seeks to improve the professional development of graduate and undergraduate teaching assistants, and it strives to forge new links within the second language community as a whole.

The Center for Language Studies is dedicated to improving the study of languages at Brown University, to extending the field of second language study, and to increasing the collaboration between language specialists and faculty and students in other disciplines. Such collaboration may be pursued: 1. through the development of interdisciplinary programs (e.g., the “Languages Across the Curriculum” program); 2. through collaborative grants and research projects; 3. through lectures and conferences involving professionals in language education; and 4. through community-oriented initiatives and projects. Individuals interested in creating new opportunities for language study are invited to share their ideas with us.

For additional information please visit the Center’s website at: https://www.brown.edu/academics/language-studies/

Courses

American Sign Language

SIGN 0100. American Sign Language I, II.
An immersive approach using authentic communication inside and outside of the classroom will be used to develop introductory communicative skills in American Sign Language. Authentic materials from diverse sources will provide an overview of the American Deaf community. Basic media literacy skills will be taught.

This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in SIGN 0200 covers the entire year and is recorded as the final grade for both semesters.

SIGN 0200. American Sign Language I, II.
Introduces basic ASL conversation. Features core vocabulary, common signing phrases, non-manual components (facial expression, body postures), signing space, fingerspelling, numbers, loan signs, cultural protocols, rules of ASL grammar and structure. Deaf cultural behavior is introduced in the classroom and through readings, videotapes, and Deaf community events.

This is the second half of a year-long course. Students must have taken SIGN 0100 to receive credit for this course. If SIGN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

SIGN 0300. American Sign Language III.
This course will use an immersive approach incorporating authentic communication to develop intermediate communicative skills in American Sign Language. Through authentic materials from diverse sources, students will engage in classroom discussion and produce media to explore Deaf cultural topics related to family dynamics, language and literacy, and education. Prerequisite SIGN0200 or placement interview.

SIGN 0400. American Sign Language IV.
Intensive use of expressive and receptive skills in complex grammatical structures, advanced classifiers, dialogues, and storytelling techniques. Discussion of social factors that give rise to code-switching; regional and ethnic sign variations; social, political, and cultural evolution of U.S. Deaf community. Interaction with Deaf community in directed and non-directed activities. Prerequisite SIGN 0300 or placement interview.

SIGN 0500. American Sign Language V
This courses increases American Sign Language skills by introducing advanced vocabulary and grammar in various registers and settings, including informal and formal discussions, presentations, and storytelling. Through authentic materials from diverse sources, students will explore American Sign Language literature and oral traditions. Prerequisite SIGN0400 or placement interview.

SIGN 0900. Introduction to Deaf Studies.
Introduction to the Deaf Community and Deaf Culture. Discussion of similarities to, and differences from, mainstream hearing culture. Supplemental videotapes focus on aspects of the culture including Deaf education and history, autobiographical sketches, Deaf norms and values, and Deaf literature, art and folklore. Theoretical issues of culture and linguistics applied to Deaf culture, American Sign Language, and the variety of cultural perspectives of the Deaf community. Students also engage in a research project related to course content. Voice interpreter will be provided; all students are welcome; no previous knowledge of American Sign Language or Deaf Studies is needed. DPLL

Independent study in an area of special interest to the student, with close guidance by a member of the faculty, and leading to a major paper/project. Required of candidates for honors, and recommended for third year students. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: SIGN 0500 or instructor permission. DPLL

Arabic

ARAB 0100. First-Year Arabic.
Builds basic listening, speaking, reading, and writing skills, introducing the Arabic language in its cultural environment. Five contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0200 covers the entire year and is recorded as the final grade for both semesters. If course is full, please sign the wait list in Room 205, 195 Angell Street. Enrollment limited to 18.
ARAB 0110. Egyptian Arabic. This course will introduce students to one of the major colloquial variants of contemporary Arabic. The native language of Egyptian citizens, used predominantly in everyday communication, has long since become widely understood throughout the Arab world, since popularized by the media and pop culture. The beginning oral proficiency that students will acquire in this course, by examining a range of sources, from textbooks to short stories, movies, social media posts and personal accounts by guest-speakers, and by practicing conversation in class, will facilitate their communication with native speakers of Arabic in a variety of informal situations. Prerequisite: ARAB 200. Enrollment limited to 18.

ARAB 0120. Intensive Summer Arabic. This intensive summer course (Equal to ARAB 0100 and ARAB 0200) is an introductory course designed to build basic listening, speaking, writing, and reading skills in Arabic. MSA is the medium of formal oral and written communication used throughout the Arab world, and the course will mainly focus on this form of the language. This course will also draw upon the major colloquial form, Egyptian, to introduce essential colloquial vocabulary and grammar necessary for understanding and conducting simple acts of communication with native speakers.

ARAB 0200. First-Year Arabic. Builds listening, speaking, reading, and writing skills, at the low intermediate level of Arabic proficiency. Five contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the second half of a year-long course. Students must have taken ARAB 0100 to receive credit for this course. If ARAB 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 18.

ARAB 0210. Egyptian Arabic. This course will introduce students to one of the major colloquial variants of contemporary Arabic. The native language of Egyptian citizens, used predominantly in everyday communication, has long since become widely understood throughout the Arab world, since popularized by the media and pop culture. The beginning oral proficiency that students will acquire in this course, by examining a range of sources, from textbooks to short stories, movies, social media posts and personal accounts by guest-speakers, and by practicing conversation in class, will facilitate their communication with native speakers of Arabic in a variety of informal situations. Prerequisite: ARAB 200.

ARAB 0300. Second-Year Arabic. Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes a better understanding of the Arabic cultural traditions. Five contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0200. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0400 covers the entire year and is recorded as the final grade for both semesters. If course is full, please sign the wait list in Room 205, 195 Angell Street.

ARAB 0400. Second-Year Arabic. Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes a better understanding of the Arabic cultural traditions. Five contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0300. This is the second half of a year-long course. Students must have taken ARAB 0300 to receive credit for this course. If ARAB 0300 was taken for credit, then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 18.

ARAB 0500. Third-Year Arabic. Offers comprehensive training in listening, speaking, reading, and writing, with grammar review as needed. Broadens students’ perspective of Arabic culture using selections from the classical and modern traditions of Arabic writing and various art forms. Four contact hours weekly. Prerequisite: ARAB 0400.

ARAB 0600. Third-Year Arabic. Offers comprehensive training in listening, speaking, reading, and writing with grammar review as needed. Broadens students’ perspective of Arabic culture with selections from the classical and modern traditions of Arabic writing and various art forms. Four contact hours weekly. Prerequisite: ARAB 0500.

ARAB 0700. Advanced Arabic: Tales of the City. The Arab city, current site of a major political upheaval, is the central theme of this integrated-skill language and culture course. Images of cities, as multifaceted as the people who inhabit them, animate cinema screens and daily news reports, inspire masters of writing, artists, and musicians, arouse political activism. By engaging the complex representation of the urban theme in contemporary discursive and art forms, this course will enhance students’ understanding of the dynamics of urban politics and culture in the Middle East, while building a content-specific lexicon and advanced communicative ability. Prerequisite: ARAB 0600, or an equivalent. Enrollment limited to 12.

ARAB 0800. Advanced Arabic Language + Culture. This advanced content course entitled "Arab Women's Voices" invites students to delve into the female experience in Arab societies as articulated in stories, poems, films, interviews, and art work by and about women. Their multiple voices speak of old traditions and new realities, love and marriage, work and childbearing, war and freedom. They explore the male-female dynamics, question aged customs, and assert their own aspirations. The investigation of that complex theme promotes advanced linguistic capacity and cross-cultural awareness. Prerequisite: ARAB 0700, or an equivalent. Enrollment limited to 12. DPLL

ARAB 1100. Love, Revolution and Nostalgia in Modern Arabic Poetry. This course aims to introduce students to the most prominent Arabic poets of the 20th and 21st century. Students will strengthen their language skills while reading and discussing texts by major modern poets from the Middle East and North Africa, including Nizar Qabbani, Darwish and Adonis. Through the works of these poets, they will explore a range of themes from politics and oppression, to love and eroticism, personal freedom and women's liberation. Conducted in Modern Standard Arabic; designed for students with advanced language skills. Prerequisite: Four years of Arabic, or by instructor permission. DPLL

ARAB 1200. Modern Arabic Literature in Exile. Modern Arabic Literature in Exile is a course that aims to improve the students' skills in reading and critical writing through studying and analyzing narrative texts in their linguistic, cultural, historic and literary contexts. In this course, students will read short stories, critical essays, and chapters from novels written by some of the most important Arab writers living in exile, including but not limited to Taieb Salih, Gassan Kanafani, Hanan al-Sheick, Abdulhadi Saadoun and Ibtissam Azem. Conducted in Modern Standard Arabic; designed for students with advanced language skills. DPLL

ARAB 1990. Special Topics in Arabic Language, Literature, and Culture. Advanced level integrated skill course focusing on specific reading and writing topics derived from the traditions and arts of the Arabic language. Course prerequisites include advanced capacity in Arabic grammar and reading comprehension. Enrollment limited to 10.
ARAB 1990B. Advanced Egyptian Arabic: Displacement and Diaspora in a Modernizing Egypt. This is a course offered to students with at least six semesters of language study experience. Students must be comfortable with the script, sounds, structure and grammar of the language. The course will familiarize students with one of the major colloquial variants of contemporary Arabic. Egyptian Arabic is the dialect of Egyptian citizens and is used predominantly in everyday communication. Students will acquire proficiency by examining content-based sources related to its theme of displacement. Sources will range from books and articles to video clips, social media posts and accounts by speakers and guests.

ARAB 2450. Exchange Scholar Program.

Catalan

CATL 0100. Introduction to Catalan. CATL100 will provide students with a basic foundation in Catalan through the practice of the four fundamental communicative skills: speaking, listening, comprehension, reading and writing, but also by mediating and interacting in class. Students can expect to be able to maintain simple conversations by the end of the course. Additionally, the subject will provide an exploration of the Catalan culture, which will be carried out through cinema, performance art, architecture, design, literature and sociopolitical contents. Additionally, academic bibliography on various subjects will be available, opening the doors to the fascinating artistic heritage and current production in the Catalan-speaking areas.

CATL 0200. Catalan Language and Culture. An intermediate course which introduces students to Catalan culture and allows them to review and extend their knowledge of all basic patterns (e.g. grammar, vocabulary, phonetics, sociocultural norms) of the language. Students will develop their oral and written skills by describing, narrating, and presenting arguments. They will work with texts and audio-visual material that will provide them with a deeper understanding of Catalan literature, culture, and contemporary society. Classes will be conducted in Catalan. Therefore a basic knowledge of Catalan literature is a prerequisite or students may request the instructor's permission to take the course.

CATL 0300. Catalan Language and Culture. This course continues to develop and strengthen students' proficiency in the Catalan language. The cultural component plays a central role in these classes, as a means to access diverse uses of the language within a cultural context. Varied cultural sources will be explored, such as Catalan cinema, music, artistic expressions, sociocultural elements and literature. These will play a role in enhancing the student’s confidence in their knowledge of the Catalan language and the context in which it is inserted. Students can expect to develop their language skills further, and to be active agents in their learning process.

CATL 1910. Independent Study in Catalan. An open content course, which may be offered each semester. Offered as an Independent Study, this course will be adapted to students' needs that are not currently covered by our curricular offerings.

English for Internationals

EINT 2100. Academic Discourse for Internationals. This course develops the English skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their listening comprehension and fluency in conversational interactions typical of academic settings. Areas of spoken English that are addressed include pronunciation, stress patterns, intonation, vocabulary, and structure. Instructor permission required.

EINT 2200. Academic Interactions. This course develops the English language skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their fluency and expression of complex ideas in a variety of linguistic situations typical of classroom interactions. Students also increase their control of vocabulary, pronunciation and listening comprehension when communicating with American undergraduates. Instructor permission required.

EINT 2300. Negotiating an American Classroom. In this course, international graduate students increase their abilities to communicate accurately and fluently in English with American undergraduates. International students develop their ability to interact, in culturally appropriate ways, in a variety of teaching situations common to an institution of higher education, where they are responsible for expressing and explaining complex information and ideas in English. Instructor permission required.

EINT 2400. Speaking Professionally for Internationals. This course develops the English communication skills of international graduate students with an emphasis on intelligibility of speech and clarity of expression in a variety of teaching and professional situations (e.g. presenting material, responding to questions, directing discussions). Students develop increased facility of English in extended discourse when they are the authority in a teaching or other professional context. Instructor permission required.

EINT 2500. Advanced Articulation Tutorial. This course is an advanced pronunciation tutorial for international graduate students who have achieved a near-native speaker level of fluency in English, but who require greater precision of English articulations, pronunciation, fluency and/or expression. Instructor permission required.

Haitian Creole

CROL 0100. Basic Haitian Creole. Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18.

CROL 0200. Early Intermediate Creole. Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18. Prerequisite: Beyond basic level of reading, writing and comprehension or having successfully completed CROL 0100.

CROL 0300. Advanced Intermediate Haitian Creole. Fast-paced course for advanced/intermediate students of Haitian Creole. Designed for those who speak and understand Haitian Creole with some fluency but are seeking ways of perfecting their language skills, overcoming grammatical snags, increasing vocabulary, and mastering the idiomatic use of the language and proverbs. Reading and responding to authentic literature in Haitian Creole will be the focus of the course. Prerequisite: CROL 0200. Enrollment is limited to 18.

CROL 0400. Advanced Haitian Creole. Designed for those who wish to develop more advanced level conversational, reading, and writing skills. Students work with a variety of readings (stories, poems, plays), films, interviews, and popular songs that promote in-class discussion and written analysis. Extensive practice in translating from English to Haitian and vice versa, with the aim of developing accuracy, speed, and appropriateness (lexical, grammatical, and cultural). Prerequisite: CROL 0300. Enrollment limited to 20.

Hindi-Urdu

HNDI 0100. Beginning Hindi or Urdu. Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor's permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor.

HNDI 0200. Beginning Hindi or Urdu. Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor's permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor. Prerequisite: HNDI 0100.
HNDI 0300. Intermediate Hindi-Urdu.
A continuation of HNDI 0100-0200, which is a prerequisite. Introduces the variation of the Arabic script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly.

HNDI 0400. Intermediate Hindi-Urdu.
A continuation of HNDI 0100-0200. Introduces the variation of the Persian script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly. Prerequisite: HNDI 0300.

HNDI 1080. Advanced Hindi-Urdu.
Each student follows an independent reading list determined in consultation with the instructor. The readings may include folk tales, journalistic prose, 20th-century literature, classical Urdu poetry of the 17th to 19th centuries, or subjects in nonfiction. The class meets together three hours weekly for discussion. Each student also spends one hour weekly with the instructor. Prerequisite: HNDI 0400.

Language Studies

LANG 2900. The Theory and Practice of Foreign Language Learning and Teaching.
The course is intended for graduate students in departments of foreign languages and literatures, who are interested in acquiring a theoretical understanding of second language acquisition (SLA) and language teaching methodologies and, by extension, developing a pedagogically sound teaching practice, grounded in research.

This course is intended for graduate students in departments of foreign languages and literatures. The course introduces graduate students to the use of instructional technology in foreign language education, otherwise known as Computer-Assisted Language Learning (CALL). Specifically, the students will learn to evaluate, design, create, and implement a variety of technology-enhanced teaching and learning materials. A particular focus will be placed on forming the essential connections between Second Language Acquisition theories, sound pedagogical approaches, and cutting-edge technologies. Technologies to be explored in this class include, but are not limited to: software, interactive multimedia, Web 2.0 tools and learning management systems.

Persian

PRSN 0100. Basic Persian.
Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture.

PRSN 0200. Basic Persian.
Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture.

This is the second half of a year-long course. Students must have taken PRSN 0100 to receive credit for this course. If PRSN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

PRSN 0300. Intermediate Persian Language and Culture.
Expands students' proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0200.

Expands students' proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0300.

PRSN 0500. Advanced Persian Language and Culture I.
For students who have completed PRSN 0400 or have acquired language skills above the intermediate level through contact with Persian in other ways. The main goal of this course is to improve speaking, listening, reading and writing skills and promote exposure to the culture. It will enable students to expand their knowledge of the language by studying samples of modern and classical Persian literature in order to advance toward mastery of contemporary literature. The course will motivate students to communicate both in written and spoken Persian by utilizing the adequate grammatical order and correct vocabulary. Prerequisite: PRSN 0400.

PRSN 0600. Advanced Persian Language and Culture II.
Designed for students who have completed PRSN 0500 or have acquired language skills above the advanced level through other means. The main goal of the course is to improve speaking, listening, reading and writing skills and promote exposure to the language and culture through in depth study of samples of Persian literature, history, journals, newspapers, radio and TV material to advance toward mastery of contemporary literature. Students will be motivated to communicate both in written and spoken Persian by utilizing adequate grammatical order and vocabulary. Activities will include poetry reading, informal gatherings and translation from and into Persian. Prerequisite: PRSN 0500.

This course provides an overview of Iranian Cinema in general and explores in detail Iranian cinema after the Iranian revolution. It explores the politics, history, techniques and the art of cinema of the past several decades in Iran. Classes consist of screenings, discussions and lectures. Conducted in English, open to all students. Enrollment limited to 25. DPLL

PRSN 2980. Reading and Research.
Work with individual students in connection with special readings, problems of research, or preparation of theses. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Turkish

TKSH 0100. Introduction to Turkish Language and Culture I.
This is a proficiency oriented introductory course to Turkish Language and Culture. It adopts and integrated skills approach and is designed for students with little or no prior knowledge of Turkish. The course combines an emphasis on the development of communicative competences with an understanding of language structures and grammar as well as insights into Modern Turkish society and culture. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. Enrollment limited to 18. DPLL

TKSH 0200. Introduction to Turkish.
This is the second semester of a proficiency oriented introductory course to Turkish Language and Culture. It adopts an integrated skills approach and is designed for students who have taken Turkish 0100 or have placed into the class after consultation with the instructor or a placement exam. The course combines an emphasis on the development of communicative competences with an understanding of language structures and grammar as well as insights into Modern Turkish society and culture.

TKSH 0300. Intermediate Turkish.
This course is the continuation of TKSH 0200 designed for students who are interested in learning about other cultures and languages. New students can place into it, after special arrangements with the instructor. The course places equal emphasis on the development of the four language skills: speaking, listening, reading and writing. It combines an emphasis on the development of communication skills with an understanding of language structures and grammar and insights into Modern Turkish society and culture.
The concentration in Latin American and Caribbean Studies (LACA) leads to a strong, interdisciplinary understanding of culture, history, and contemporary issues in Latin America, the Caribbean, and the Latino/a diaspora. Requirements are intentionally broad and flexible to accommodate the focused interests of students in understanding the diverse reality of this region. Concentration requirements include four themes: language, area studies, independent research, and out of classroom experience. Only the Senior Thesis qualifies as primary advisor on the project. If a concentrator chooses to do neither a senior thesis nor a senior project, then a research paper must be written in an advanced undergraduate seminar (1000-level). The seminar must be among the approved area studies courses listed in Appendix B of the Latin American Studies Concentration Guide, and will count as one of the ten courses required for the concentration. Research papers will typically be 20-30 pages in length and must be approved by the Concentration Advisor. Students who choose this option do not take or LACA 1990 - LACA 1991. The seminar counts as the research component of the program. The distribution requirements for this option are: 2 language courses, 7 area studies courses and 1 research course (i.e. the seminar for which the paper is written).
Internships/Community Service

The Concentration in Latin American and Caribbean Studies requires students to complete an internship or volunteer service work in Latin America or with a local organization that works primarily with Spanish or Portuguese speaking peoples. The Center maintains a database of local and international internship opportunities. Students are also strongly encouraged to consult with the Swearer Center for Public Service. Internships and community service work are available to Brown students who study abroad at the Brown programs in Mexico (Universidad de las Americas) and in Brazil (Catholic University of Rio de Janeiro). Examples of local service work performed by concentrators in previous years include: helping compile a Spanish language guide to welfare service agencies, developing a culturally appropriate adaptation of a health testing and education program, and ESL instruction to Latin American immigrants. Such extracurricular work can be rewarding in itself; in consultation with a faculty member, it can often be used to earn academic credit and furnish material for either a Senior Thesis or Project.

A minimum of one semester or a summer of internship or volunteer service work is required. Students need to submit an internship/service work proposal form to the Latin American and Caribbean Studies Concentration Advisor for approval prior to starting the internship or service work. Upon completion of the internship or service work, students are required to submit to the Concentration Advisor a brief summary report of their experience, which must be signed by the supervisor of the student’s internship or service work.

Honors

Qualified undergraduates may pursue work towards the B.A. with Honors. The requirements for graduation with Honors are the following:
1. Maintenance of at least a B+ average in the ten courses counting for the concentration.
2. Maintenance of at least a B+ average in all course work done for the B.A. at Brown.
3. Completion of a Senior Thesis approved by the primary advisor and reader as acceptable for Honors. The senior thesis should be "A" level work, although an "A" thesis does not automatically qualify for honors.

Prizes and Awards: Graduating seniors in Latin American Studies are eligible for an award administered by the concentration for outstanding Senior Thesis.

Foreign Study

Study abroad (normally in the junior year) is encouraged as an important part of the concentration. Interested students should begin early to prepare for such a venture. Popular programs with Latin American concentrators include Universidad de las Americas-Puebla, Mexico, and the Catholic University (PUC-Rio) of Rio de Janeiro, Brazil. Up to three courses taken abroad may be counted toward the ten courses required for the concentration. A list of Brown programs and approved non-Brown programs is available from the Office of International Programs (OIP) located in Rhode Island Hall. Feel free to consult the Latin American and Caribbean Studies concentration advisor about study abroad.

Latin American and Caribbean Studies Graduate Program

Brown offers no advanced degree in Latin American Studies, but our faculty work closely with interested graduate students in other departments such as Hispanic Studies, History, Economics, American Civilization, Anthropology, Sociology, Political Science, Portuguese and Brazilian Studies, and the A.M. in Development Studies. Information about these degrees may be obtained directly from these departments or programs.

Courses

LACA 0030. Health of Hispaniola (PHP 0030).
Interested students must register for PHP 0030.

LACA 0210. Afro Latin Americans and Blackness in the Americas (AFRI 0210).
Interested students must register for AFRI 0210.

LACA 0233. Colonial Latin America (HIST 0233).
Interested students must register for HIST 0233.

LACA 0234. Modern Latin America (HIST 0234).
Interested students must register for HIST 0234.

LACA 0271. Introduction to Latina/o History (ETHN 0271).
Interested students must register for ETHN 0271.

Interested students must register for COLT 0510F.

LACA 0537A. Popular Culture in Latin America and the Caribbean (HIST 0537A).
Interested students must register for HIST 0537A.

LACA 0537B. Tropical Delights: Imagining Brazil in History and Culture (HIST 0537B).
Interested students must register for HIST 0537B.

LACA 0610. Mapping Portuguese-Speaking Cultures: Brazil (POBS 0610).
Interested students must register for POBS 0610.

LACA 0610E. Crisis and Identity in Mexico, 1519-1968 (COLT 0610E).
Interested students must register for COLT 0610E.

LACA 0637A. History of Jews in Brazil (HIST 0637A).
Interested students must register for HIST 0637A.

LACA 0646. Brazilian Choro Ensemble (MUSC 0646).
Interested students must register for MUSC 0646.

LACA 0710N. A Comparative Introduction to the Literatures of the Americas (COLT 0710N).
Interested students must register for COLT 0710N.

LACA 0711G. The Realist Novel (Europe, America, Latin America) (COLT 0711G).
Interested students must register for COLT 0711G.

LACA 0730. Encounters: Latin American in its Literature and Culture (HISP 0730).
Interested students must register for HISP 0730.

LACA 0750B. The Latin American Diaspora in the US (HISP 0750B).
Interested students must register for HISP 0750B.

LACA 0760A. Rastafarianism (AFRI 0760A).
Interested students must register for AFRI 0760A.

LACA 0850. Comparative Approaches to the Literatures of Brazil and the United States (POBS 0850).
Interested students must register for POBS 0850.

LACA 0901W. The Space Within: Contemporary Borderland Moving Image Practice (MCM 0901W).
Interested students must register for MCM 0901W.

LACA 0990. Mapping Cross-Cultural Identities (POBS 0990).
Interested students must register for POBS 0990.

LACA 1031. Classic Mayan Civilization (ANTH 1031).
Interested students must register for ANTH 1031.

LACA 1050W. Transnational Hispaniola: Haiti and the Dominican Republic (AFRI 1050W).
Interested students must register for AFRI 1050W.

LACA 1070. The Burden of Disease in Developing Countries (PHP 1070).
Interested students must register for PHP 1070.

LACA 1080. Performing Brazil: Theater, Language and Culture (POBS 1080).
Interested students must register for POBS 1080.

LACA 1120. Peoples and Cultures of the Americas (ANTH 1120).
Interested students must register for ANTH 1120.
LACA 1210. Afro-Brazilians and the Brazilian Polity (AFRI 1210). Interested students must register for AFRI 1210.

LACA 1310. History of Brazil (HIST 1310). Interested students must register for HIST 1310.

LACA 1312. Brazil: From Abolition to Emerging Global Power (HIST 1312). Interested students must register for HIST 1312.

LACA 1320. Rebel Island: Cuba, 1492-Present (HIST 1320). Interested students must register for HIST 1320.

LACA 1330T. El Amor en Español (HISP 1330T). Interested students must register for HISP 1330T.

LACA 1330X. The Nature of Conquest: Scientific Literatures of the Americas (HISP 1330X). Interested students must register for HISP 1330X.

LACA 1330Z. Tropical Fictions: Geography and Literature in Latin American Culture (HISP 1330Z). Interested students must register for HISP 1330Z.

LACA 1333. The Mexican Revolution (HIST 1333). Interested students must register for HIST 1333.

LACA 1370B. Gabrion: Memory, Fiction, and Reading in Gabriel García Márquez (HISP 1370B). Interested students must register for HISP 1370B.

LACA 1381. Latin American History and Film: Memory, Narrative and Nation (HIST 1381). Interested students must register for HIST 1381.

LACA 1501A. Exclusion, Gender and Respect: Understanding Youth Violence in Latin American Cities. Urban crime and fear is perhaps the most important concern for Latin Americans in countries across the region such as Colombia, Brazil, Mexico, and Venezuela. In this course we will develop a thorough analysis of youth violence departing from the structural forces that drive youths to violent lifestyles. We will then pass through cultural dispositions associated with gender identities and the lived experience of violence, youth subjectivities and emotions expressed (such as the sense of hopelessness engendered by these experiences). Finally we will discuss the possibility of alternatives to violence for youths.

LACA 1503F. Art and the Global City: Buenos Aires, Rio de Janeiro and Mexico City. This seminar studies recent literature and visual art through a strategic focus on the cities of Buenos Aires, Rio de Janeiro and Mexico City. Artistic inquiry and evolving issues in contemporary art are discussed. The very limits of literary forms are also explored, inviting questions on the intersections of images and words, or art and literature. Although the history of key artworks and movements in 20th-century Latin America will provide a foundation for our seminar, special attention will be paid to the present. We will examine recent experimentation, looking into the ideas that animate art practices today.

LACA 1503G. Music, Gender + Sexuality in the Americas. This course studies popular music as a space in which gender and sexuality are performed, focusing on the ways in which popular music has both reflected and challenged gender constructs and norms. The course is structured as a series of case studies illustrating a range of popular music styles from throughout the Americas (Cuban, Mexican, and Puerto Rican bolero, Argentine tango and cumbia, and United States R&B, disco, and pop duets), and the performance of a rainbow of gender and sexual identities (including heterosexual femininity and masculinity, gay and lesbian identities, and queer subjectivities).

LACA 1503H. Sexuality, Human Rights and Health: Latin American Perspective and Brazilian Experiences. This course is presented in 4 sections. Section 1. Provides an overview on how sexuality and health, both defined by biological paradigms, met social constructionism and human rights perspectives which flourished in Latin America. Section 2. Provides an overview of the human rights based health approach and provide Brazilian cases. Section 3. Provides an overview to the multicultural human rights based approach to sexuality education. Section 4. Expands the dialogical approach of this course by discussing sexuality research and human rights health based interventions in relation with students brought cases.

LACA 1503I. Fiction and Methods in Social Research: Debates on Inequality, Poverty, and Violence. In this course, students will read, comment, and discuss renowned novels on inequality, exclusion, poverty, and (political, religious, racial, and gender) violence in cases as diverse as Nigeria, India, and Afghanistan. These novels will submerge students in some of the complexities and richness of the selected cases. By reading them, students will explore and discuss concepts, stories and historical context, political and socioeconomic processes, the roles of characters, and arguments.

LACA 1503J. Latin American Urban Interventions. This seminar engages with narratives of modernization and their relation to time and space in Latin America through cultural artifacts that represent urban interventions designed to improve “the human condition.” Is there an informal Latin American mode of modernity? Are urban interventions condemned to reproduce social exclusion? We review literature on Latin American urban complexes and a case study on a massive residential and commercial complex built in downtown Caracas in the 1970s called Parque Central, including original brochures, shorts stories, poems, excerpts from novels, photos, artwork, films, plays, songs, and performances. Readings will be in English and Spanish and the course will be conducted in Spanish.

LACA 1504A. Violence and Urban Poverty in Latin America: Ethnographic and Qualitative Perspectives. Living in a barrio, favela, villa, or colonia means living in a state of emergency, caught in the middle of armed confrontations between state and non-state actors. This course has three main objectives: 1) to understand urban violence from the perspective of people living in poor and marginalized areas; 2) to analyze how ethnographic and interpretive research on urban violence in Latin America is presented; and 3) to consider the ethnographic narrative, the voice of the ethnographer and the challenges of conducting research in violent settings where the research itself is a social problem.

LACA 1504B. Indigenous Politics in Latin America. Indigenous peoples began participating politically in Latin America in the early 1990s, and have dramatically changed the political dynamics of most countries in the region ever since. In the last two decades, Latin America has experienced mass indigenous mobilizations and the rise of ethnic parties. This course covers a wide range of issues related to ethnicity in Latin America, including indigenous movements and parties, ethnodevelopment and environmental politics, ethnic radicalization and violence, transnational ethnic activism, and indigenous groups and gender politics, among others. This class introduces students to the main empirical and theoretical debates about indigenous politics in Latin America. DPLL

LACA 1504C. Representation and Governance in the Federations of Latin America. This course analyzes the relationships between federalism and four large topics: political stability in plural societies, economic development, democratic representation, and equality. The discussion focuses on the evolution of Latin American federations. Students will learn where federations come from, what they do, and why it matters. They will be able to compare alternative approaches to federalism and to recognize the normative problems at stake in the organization of federations. The course is intended for advanced undergraduate students in political science or international relations. It could also be useful for students majoring in economics, sociology and history.
LACA 1505. Vertical Civilization: South American Archaeology from Monte Verde to the Inkas (ANTH 1505). Interested students must register for ANTH 1505.

LACA 1510B. Environment and Development in Latin America. This seminar introduces a "developmental challenges approach" to thinking about resource-based development. The approach is critically used to survey the development of extractive industries and other environmental issues in Latin America.

The main questions to be examined are:
Is resource abundance a curse?
Is Latin America too poor to be green?
Do institutions end up defining these issues, and how?

Assignments will help students develop a research project to study one case or a set of cases in comparative perspective (countries or sub-national units).

LACA 1510C. Ethnicity and the Politics of Development in Latin America.
Over the past decades, the realities of ethnicity and the politics of development have repeatedly presented themselves for reflection in Latin America. This course seeks to identify the interfaces and interactions among the two. During the semester, we will examine four questions: First, why is ethnic inequality so persistent in the region? Second, why and how do ethnic boundaries become politicized in the region? Third, can national development and local and indigenous livelihoods coexist? Fourth, is ethnic and environmental contentious politics driving institutional transformation in Latin America?

LACA 1510D. Popular Music and Social Change in Latin America.
This course is designed to illuminate the many ways that popular musicians shape, and are shaped by, the broader social milieu within which they act. Focusing largely on twentieth-century case studies from Cuba, Brazil, and Peru, it illustrates how social dynamics particular to Latin America have constrained popular musicians' efforts to communicate, circumscribed their artistic and political goals, and enabled them to intervene in sociocultural debates in specific ways. Issues to be considered include the sanctioning of musical styles as national symbols; the harnessing of music to project promoting racial diversity; its use as a medium of political protest as well as a vehicle for populist politics; the importance of media dissemination and commercialization, both in driving musical change and in determining its scope of influence; and the ambivalent role of the processes variously dubbed "westernization," "Americanization," and "globalization." DPLL

LACA 1510E. Race, Music and Literature in the Spanish Caribbean.
The course provides an interdisciplinary approach to racial representations in the Literature and Popular Music of the Spanish Caribbean. It explores the different definitions and representations of the Spanish Caribbean cultures and identities from a comparative view of the Anglo and French Caribbean writers. DPLL

LACA 1510F. Institutions of Justice and Democracy in Latin America.
The course will examine the relationship between democracy building and the performance of Institutions of Justice in Latin America. We will address issues of human rights violations, globalization and its threats, and the Challenges that Latin American regimes face to build democratic institutions and the rule of Law. The course will focus will be both on the normative and sociological analysis of the institutions of Justice in Latin America.

LACA 1510G. Literature and Popular Culture in Latin America.
Latin American cultures were built on the humanistic and intellectual perspectives exposed by José Enrique Rodó and José Martí, among many others, which propose the artistic aesthetic as a social ideal and the spreading of education as a sign of progress. But these cultural and national projects were developed in "the era of mechanical reproduction" and their literary project soon was menaced by the "cultural industry." This course explores the dialogues and tensions between what has been branded as the "lettered" and the "real city" in Latin American societies in a selection of literature, film, television, and popular music. This course will be given in Spanish. DPLL

LACA 1510H. Shaping the Brazilian Nation through Music.
This course provides an introduction to the music of Brazil, with a particular emphasis on its role in creating and contesting visions of nationhood during the twentieth century. Focusing upon a limited number of musical practices, from different regions and periods, it is not intended to provide a comprehensive survey. Rather, using a small set of case studies, it highlights key dynamics that have shaped the relation between Brazilian music and Brazilian society more broadly. Topics range from traditional practices, such as candomblé and folias de reis; to samba, bossa nova, and Northeastern regional styles; to the work of composer Heitor Villa-Lobos; to the contemporary hip hop scene of São Paulo. There are no prerequisites, but it is recommended that students have either some knowledge of Latin American culture and/or history, or some musical background. Enrollment will be limited to twenty people, with preference given to those matching these criteria. DPLL

LACA 1510I. Urban Latin America.
This course will analyze the crucial dynamics, contradictions and consequences of urbanization in contemporary Latin America. Themes to be addressed include: urban culture, sports, national and ethnic identities, religion and violence. Prerequisite: at least one other class in Anthropology or other social sciences.

LACA 1510J. The Making of Modern Brazil.
Will focus on the building of the Brazilian nation and the meanings of social phenomena involved in this process. Based on studies of contemporary Brazilian society, it will analyze different aspects of that country: urbanization, popular culture, revival of tradition, hybridization, imageries, symbolic aspects of money and consumption, popular music.

LACA 1510K. Human Rights in Twenty-First Century Latin America.
Course offers a multidisciplinary introduction to the key advances in and challenges for the protection of human rights in contemporary Latin America. In contesting autocratic governments in the 1970's and 1980's, Latin America social movements and non-governmental organizations (NGOs) played a central role in the creation of the institutions and norms that constitute the international human rights system today. Enrollment limited to 20.

LACA 1510L. The Politics of Latin America: Dilemmas and Opportunities.
A survey course on the politics of Latin America which aims at exploring the transformations experienced by the region in the last few decades. The course combines the discussion of themes (the emergent economic realities, the quality of democracy) with a more detailed look at countries of particular relevance because of their importance (Brazil, Mexico, Argentina) their unique trajectories (Chile, Cuba) and their relationship with the United States (Venezuela). Enrollment limited to 20.

LACA 1510M. New Latin American Populisms in Comparative Perspective: Bolivia, Argentina, Venezuela + Ecuador.
Seminar: this course is based on the notion that there is more to populism and old dichotomies such as rational/irrational, rural/urban or modern/traditional. It will discuss and identify a more precise definition of populism, characterize the "new Latin American populism" and compare it with the classic populisms of the Post War era and the "neo-populisms" of the nineties. It will discuss the commonalities and differences of these regimes in terms of their coalitions of support and their public policies. Limited to 25 juniors and seniors.

LACA 1510N. Political Systems and Political Parties in Latin America.
This course will explore the seemingly contradictory reality of Latin American political systems and political parties. The goals of the course are to analyze the transformations of the political parties and the political party systems in Latin America from the year 2000 to the present day and to highlight the manner in which the party systems transformations had to do the transformations in the representative linkage between the political parties and the civil and political societies that they are rooted in.
LACA 1601A. Latin American Literature in an Era of Globalization.
This course will explore the impact of globalization on contemporary Latin American Literature. We will analyze novels, short stories and critical discourses produced by Latin American writers in the past thirty years and shed light on how the awareness of the globalized world has transformed writing practices as well as the setting and the construction of narratives. The course will examine the trade-offs associated with the process of globalization, highlighting the beneficial aspects of hypermobility, fluidity, and transnationalism, as well as the dark sides of globalization linked to the rise in inequality and the intensification of narcotrafficking and illegal migration.

LACA 1650. Ancient Maya Writing (ANTH 1650).
Interested students must register for ANTH 1650.

LACA 1700. Beyond Sun, Sea and Sand: Exploring the Contemporary Caribbean (DEVL 1700).
Interested students must register for DEVL 1700.

LACA 1800E. The Brazilian Puzzle: Confronting the Post-Colonial Legacy (POBS 1800E).
Interested students must register for POBS 1800E.

LACA 1803R. Bringing Small States In: How and Why They Matter (DEVL 1803R).
Interested students must register for DEVL 1803R.

Interested students must register for MUSC 1935.

LACA 1966Q. Colonial Encounters and the Creation of Latin America (HIST 1966Q).
Interested students must register for HIST 1966Q.

Interested students must register for HIST 1967F.

Interested students must register for HIST 1967L.

Interested students must register for HIST 1967T.

Interested students must register for HMAN 1972C.

Interested students must register for HIST 1976H.

LACA 1979L. Urban History of Latin America (HIST 1979L).
Interested students must register for HIST 1979L.

For Latin American + Caribbean Studies concentrators writing senior projects or honors theses.

For Latin American + Caribbean Studies concentrators writing senior projects or honors theses.

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. Open to senior Latin American Studies concentrators. Instructor permission required.

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. Open to senior Latin American Studies concentrators. Instructor permission required.

For upper-division students interested in pursuing topics in Latin American and Caribbean Studies not currently taught in the Brown curriculum. Students must have significant prior coursework, language skills, and sufficient background knowledge to put together a comprehensive reading list and to produce a final paper that meets the research requirement in the LACA concentration.

Class requirements include weekly meetings with the instructor, reading responses submitted before each meeting, and a self-assessment at the end of the semester by the student. The independent study will culminate in a research paper of sufficient depth and sophistication to meet the research requirement for the concentration in Latin American and Caribbean Studies.

Registration requires a comprehensive reading list developed by the student in consultation with the faculty member and a written agreement on course requirements. The concentration advisor’s approval is required if the course is to count toward the concentration.

No more than two (2) semesters of LACA 1994/1995 may be used toward concentration requirements in Latin American and Caribbean Studies.

LACA 2520L. Latin American Existential Literature (HISP 2520L).
Interested students must register for HISP 2520L.

Program in Literary Arts

Chair
Leigh Cole Swensen
Since 1968, Literary Arts at Brown University has been a creative and intellectual center for the U.S. literary avant-garde. Along with a handful of other writing programs nationwide, Brown provides a home for innovative writers of fiction, poetry, digital language arts and cross-disciplinary. Established in the mid-1960s by poet, translator and critic Edwin Honig, Literary Arts at Brown continues its tradition of hiring and retaining a faculty comprised of nationally and internationally known authors. Each year, the program offers 60 – 70 classes, awards the M.F.A. degree to approximately 12 graduate student writers, and confers Honors on about 35 talented seniors who will have completed the undergraduate concentration in Literary Arts.
For additional information, please visit the department's website: http://brown.edu/academics/literary-arts/home/literary-arts

**Literary Arts Concentration Requirements**

Brown’s Program in Literary Arts provides a home for innovative writers of fiction, poetry, playwriting, screenwriting, literary translation, electronic writing and mixed media. The concentration allows student writers to develop their skills in one or more genres while deepening their understanding of the craft of writing. Many courses in this concentration require a writing sample; students should consult a concentration advisor or the concentration website for strategies on getting into the appropriate course(s).

Candidates for the Bachelor of Arts degree with concentration in Literary Arts will be expected to complete the following course work:

1. At least four creative writing workshops from among the following series: LITR 0100, LITR 0110, LITR 0210, LITR 0310, LITR 0610, LITR 1010, LITR 1110, LITR 1150 and LITR 1410. At least two genres must be covered within the four courses taken. An independent study in literary arts (LITR 1310 and LITR 1510) may count toward the workshop requirement. Other writing-intensive courses may also count, at the discretion of the advisor.

2. Six elective reading and research in literary arts courses, which must include:
   - a course in literary theory or the history of literary criticism
   - a course that primarily covers readings and research in literary arts created before 1800
   - a course that primarily covers readings and research in literary arts created between 1800 and 1900
   - a course that primarily covers readings and research in literary arts created after 1900

   These courses, selected in consultation with a concentration advisor, may come from (but are not limited to) the following departments: Africana Studies, American Civilization, Classics, Comparative Literature, East Asian Studies, Egyptology, French Studies, German Studies, Hispanic Studies, Italian Studies, Judaic Studies, Linguistics, Literatures and Cultures in English, Middle East Studies, Modern Culture and Media, Music, Portuguese and Brazilian Studies, Slavic Studies, South Asian Studies, Theatre, Speech and Dance, Visual Arts. With approval from the concentration advisor, courses covering pre-20th century time periods may be distributed in a variant manner, so long as they cover two distinct literary time periods that precede the 20th century.

3. Among the ten required courses, at least four must be at the 1000-level or above. At least six classes (workshops and reading/research courses) that shall count toward the concentration must be taken at Brown through the Literary Arts Department. No more than two of the ten required courses for the concentration may also count toward fulfilling a second concentration.

4. During the senior year, all students must take at least one course within the Literary Arts course offerings (courses with LITR designation by the Registrar, or courses approved by the concentration advisor).

Honors in Creative Writing: Course requirements are the same as those for the regular concentration (four workshops, six elective literature-reading courses), with the following changes and additions: honors candidates must include two 1000-level workshops or independent studies among their courses; and complete a thesis. Students who are enrolled in or have completed at least one 1000-level workshop (or independent study) may submit honors applications to the Literary Arts Department from the first day of the fall semester to 25 September. Interested students should obtain information from the office of the Literary Arts Department.

**Literary Arts Graduate Program**

The Graduate Program in Literary Arts offers a Master of Fine Arts (M.F.A) degree with courses in fiction, poetry, digital language arts and work that cross the boundaries of discipline.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/literary-arts

**Courses**

LITR 0100A. Introduction to Fiction.
A workshop for first year students, introducing them to the art of writing fiction. This course is reading and writing intensive. Enrollment limited to 17. S/NC required. FYS WRIT

LITR 0100B. Introduction to Poetry.
A workshop for first year students, introducing them to the art of writing poetry. This course is reading and writing intensive. Enrollment limited to 17. S/NC required. FYS WRIT

LITR 0110A. Fiction I.
A workshop for students who have little or no previous experience in writing fiction. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC. WRIT

LITR 0110B. Poetry I.
A workshop for students who have little or no previous experience in writing poetry. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC. WRIT

LITR 0110D. Digital Language Art I.
Project-oriented workshop for writers, visual/sound artists, filmmakers and programmers who wish to explore digital media techniques. No experience working in this field (or with computer programming) required. You’ll learn through doing, reading, talking and collaborating on works in various traditions. Enrollment limited to 17. S/NC. WRIT

LITR 0110E. Screenwriting I.
This workshop introduces the fundamentals of screenwriting through a variety of readings, exercises and assignments. Our main focus will be on students’ writing, with particular emphasis on exploring the cinematic potential of your stories and themes, and on developing structures that best suit your material and intentions. This course is limited to undergraduates. S/NC. Enrollment limited to 17. WRIT

LITR 0200Z. Faking It: Literature in the Age of the Hoax.
How is society simultaneously constructed and undermined by the persistence of fakes? With its cousins the hoax and the forgery, the fake plays the straw man in much of political, religious, and philosophical discourse, but the fake’s insistence on re-conceiving notions of originality and purity is more substantial. Pursuing a definition of the fake, we will consider its many forms in contemporary society alongside novels that parody and complicate the history of these particular deceptions. Authors include: Borges, Bolano, Ishiguro, Byatt, and McCarthy. Enrollment limited to 17.

LITR 0201A. Fiction Writing II.
Topics often include stylistic matters related to tone and point of view, and structural matters like controlling switches in time. See general course description above for course entry procedures for all intermediate workshops. Enrollment limited to 17. Instructor permission required. S/NC. WRIT

LITR 0201B. Poetry Writing II.
Emphasis is placed on verse strategies, meter, rhythm, imagery and rhyme. Writing includes frequent exercises in various poetic traditions. See general course description above for course entry procedures for all intermediate workshops. Written permission required. S/NC. WRIT

LITR 0210D. Digital Language Art II.
Project-oriented workshop for writers, visual/sound artists, filmmakers, and programmers wishing to explore techniques for effective and innovative use of text in digital media. Topics include hypertext narrative, kinetic poetry, and recombinant and computer-generated texts. Collaboration encouraged. Work sample (writing, programming, website) due on first day of semester. Enrollment limited to 17. Instructor permission required. S/NC. WRIT
LITR 0210E. Screenwriting II.
Emphasis is placed on filmic devices, such as dialogue, voice-over, montage and time. Writing includes frequent exercises. See general course description above for course entry procedures for all intermediate workshops. This course is limited to undergraduates. Enrollment limited to 17. Instructor permission required. S/NC. WRIT

LITR 0310A. Poetry in Service to Schools and the Community.
We shall be reading, writing and talking about poetry and letting this medium reflect back on other artistic practices -- what it means to live, work & think (in) this way; another key component will be an engagement with community practice through bringing poetry to local schools, a direct personal and enlightening exchange of enlightening ideas and experience. Participants will work independently, in groups, in classes (including this one); you produce, and work with others to produce, art individually as well as communally; you are the gaffer, you are also, and simply, a member of the guild. This feels more like a teacher's enterprise, though I call it, simply, community practice-- what happens when people just put themselves in the position to give their gifts, while allowing, at the same time, others to give equally of themselves. Limited to 17. S/NC. Permission will be granted by the instructor after the first class session. WRIT

LITR 0310B. City/Spaces: An Introduction to Psychogeography.
Psychogeography is an artistic discipline concerned with the subconscious ways in which we respond to and interact with the physical environment of the city. This course will focus on the intersection of psychogeography and text-both narrative and non-narrative- and the possibilities for walking to inform text and narrative. WRIT

LITR 0310C. Ethnic Writing (ETHN 0300).
Interested students must register for ETHN 0300.

LITR 0310D. Imagining the City: Visions from Film and Literature.
This course will look at representations of urban space both in films and fiction, and through the lens of critical writings on the intersections between city space, architecture, film, and narrative. How do cities affect us aesthetically and emotionally? How have film and fiction examined, reinvented and revolutionized urban space in the twentieth century? What is the future of cities? These are some of the questions we'll address through readings, screenings, and discussion. As a class we will do weekly creative writing exercises inspired by the films and designed to explore the ways in which poetic space might be evoked through text.

LITR 0310E. Making the Written Word.
While our primary focus will be on language, we shall explore its relationship to sound, video, and performance. Although no prerequisites are required, students should be competent in visual and language arts -- we shall work with equal sensitivity in both. Works created shall interrogate the space between image and text as a single composite medium, and find new ways of experiencing the world through sound and image. WRIT

LITR 0310F. Visual Poetry.
This interdisciplinary workshop explores the visual possibilities of language. Considering the page as a starting point, we'll create new works between writing and visual art. Through researching early writing systems, concrete poetry, asemic writing and contemporary works, students will gain a deeper understanding of their own practices. We'll examine the works of Dieter Roth, Carl Andre, Sol Lewitt, Aram Saroyan, Kenneth Goldsmith, Rosmarie Waldrop and more. All visual media welcome. [Blank space on a page means] freedom. The possibility of anything happening. Every mark on that paper is an interruption, an insertion into a kind of peace." -Susan Howe WRIT

LITR 0310H. Art of Film: An Introduction to Filmmaking.
This is a course in the art of film writing, directing, editing picture and sound, and producing, be it narrative or avant-garde. Students will engage the theory and practice of the art of filmmaking via readings, viewings, writings, and making their own films. S/NC required. WRIT

LITR 0310J. The Voice of Text.
The Voice of Text will explore the voice as mediator among text, sound and performance. The vocal instrument will be thoughtfully investigated with exammination of extreme and unorthodox iterations of voice/text/sound, including: castrato repertoire, extended technique ranging from Diamanda Galas to black metal, cabled shortwave radio transmissions, electronic vocal synthesis and the ecstatic speech of glossolalia. Additionally, voiced text will be given historical context through fiction and poetry, film, theater and music. Through individual and collaborative projects, students will explore a variety of techniques and technologies, harnessing the expressive potential of the voice across a wide variety of disciplines. WRIT

LITR 0510A. Masters and Servants.
We will consider the relationship between servants and masters as portrayed in fiction and films. We shall examine the basic relation of servitude to sovereignty, extrapolating to the broader power dynamics of two-person relationships. Beginning with the Hegelian dialectic of the master and the servant, and building as well on a philosophical framework provided by Nietzsche, Kojeve and Bataille, we shall look at the complexities of the relationship between masters and servants, exploring the psychological, social and ethical dimensions of two-person relationships that value each person differently. We shall focus on issues of class and power and look at literature and film in which there are explorations of several complicated manifestations of servitude and mastery: overlaps into gender power dynamics and fetishism, power dynamic reversals both to comic and tragic effect, and questions of boundaries and violation of social propriety and human communication. Core texts will include work from Ishiguru, Wodehouse, D.H. Lawrence, Miabeau, Richardson, Broné, and Stanley Crawford, and film texts will include Joseph Losey's The Servant and Luis Bunuel's Diary of a Chambermaid. FYS

LITR 0510B. Into the Machine.
Starting from Turing's work on artificial intelligence, we shall examine the cultural and artistic ramifications of the rise of the machine, using Marx and Walter Benjamin to provide a framework. We will look at how machines generate anxiety, with special emphasis on robots, puppets and automatons; and we shall also consider utopian and dystopian images of machines, and visions of near and distant futures. Finally we will look at authors who utilize machine models of operation to generate artistic work. Authors and filmmakers include: Capek, E.T.A. Hoffman, Asimov, Lem, Breton, Redonnet, Fritz Lang, Chaplin, Tati. Enrollment limited to 20 first year students. FYS

LITR 0510C. The Pleasures of the Text.
Enter the radiance of literature, music and film through devotional readings, viewings and listening experiences that will result in a series of weekly creative writing experiments. Dissolve into a narrative or sound or image the way a writer might and return from these experiences inspired and changed. Be prepared for the awe and wonder that only art can afford. Texts may include stories, poems and/or novels by Adler, Baldwin, Breton, the Bible, Coetzee, Cortazar, Gluck, Muller, Munro, Morrison, Pancake, Rankine, Schwartz, Wolf and others. Films by Akerman, Anderson, Kurosawa and Herzog. Music by classical, jazz and hip-hop artists. FYS WRIT

LITR 0510D. Why Don't We Fall In Love?.
How do we fall in love? Why? The title of our seminar was inspired by the 2002 summer pop-hit, written and produced by Rich Harrison, and famously performed by Amerie Rogers. Through poetry, film, and music, we will be critical, clinical, and sometimes implicated observers of the dynamics which structure erotic desire, the selfless (or selfish) ambition of love, and its representations. FYS WRIT

LITR 0610A. Unpublishable Writing.
This workshop explores writing projects which do not fit into conventional avenues of print publication (i.e. books). Through a series of prompted artistic projects we will explore how writing can interweave in new relationships with time, materials, sequence, procedural approaches, performance, and collaboration. Independent research will support your creative projects throughout the semester. Enrollment limited to 12. S/NC. FYS
LITR 0610B. Fiction Through Poetry. This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as a means to think about fiction and the borderlands of storytelling. Students will be given weekly writing exercises. Enrollment limited to 12 first year students. S/NC. FYS

LITR 0610C. Books By Hand. We shall explore small press publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects throughout the semester as well as research particular concerns in the field. Enrollment limited to 12 first year students. S/NC. FYS WRIT

LITR 0710. Writers on Writing Seminar. Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer’s way of reading. This course will include visits to the course by contemporary writers who will read to the class and talk about their work. Enrollment limited to 20 first year students. FYS WRIT

LITR 0900A. Classic Short Stories. This course will introduce you to a selection of works by important writers of short fiction. We shall explore the richness and diversity of short fiction through close reading and discussion, both of which should give you an appreciation of the short story in general and of our writers’ countries and histories in particular. Our focus will be on authorial strategies and themes explored. Artistic and political movements will be introduced as they impact the works. Furthermore, you will learn the appropriate terminology as tools for textual and critical analysis. Finally, this course will develop your capacity for self-expression. WRIT

LITR 0999. Graphic Novels and Comic Masterworks. Focused on the influence of graphic novels and comic art, this course examines graphic novels and comic art from seminal texts like Art Spiegelman’s Maus through a range of mainstream and independent comics from Marjane Satrapi, Grant Morrison, Alan Moore, David B., Lynda Barry, Daniel Clowes, Frank Miller, and many others, including graphic memoir, reportage, and Indie and DIY zines. The course explores image and language in collaboration, seeking a better understanding of this influential genre. Assignments are critical and creative, both individual and collaborative, and will involve daily reading and writing assignments. Enrollment limited to 20. WRIT

LITR 1010A. Advanced Fiction. The writing of short stories or longer works in progress in regular installments, along with appropriate exercises and reading assignments. See general course description above for course entry procedures for all advanced workshops. Written permission required. S/NC. WRIT

LITR 1010B. Advanced Poetry. Course work includes a body of exercises, close reading of poetry, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Instructor permission required. S/NC. WRIT

LITR 1010C. Advanced Playwriting. Course work includes a body of exercises, significant reading, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Enrollment limited to 12. Instructor permission required. S/NC. WRIT

LITR 1010D. Advanced Digital Language Arts. An advanced writing working for which participants produce, individually or in collaborative arrangements, a significant work of language-driven, digitally-mediated art in networked and programmable media. This work will be given historical and critical context, as participants become more aware of what it is they are doing when they use digital systems to write, or when they create instruments for and of writing. Throughout the course — and especially before final projects become the focus — there will be seminar-style reading and discussion: readings from other works of digital language art and from selected critical writing in the field. WRIT

LITR 1010E. Advanced Screenwriting. The writing of short screenplays or a longer work in progress in regular installments, along with a body of exercises, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Instructor permission required. S/NC. WRIT

LITR 1010F. Advanced Translation. Translation draws from many fields including linguistics, comparative literature, literary studies, anthropology, cultural studies, cognitive science, and creative writing. While we consider different theories and approaches to translation, students will embark on a semester-length translation project. Expect to read and energetically discuss readings, to give a presentation on your ongoing translation, and to write a critical essay and numerous translation exercises on your way toward completing a manuscript in translation (the length of which will be determined by the work itself and an agreement between professor and student). Enrollment limited to 12. Instructor permission required. S/NC. WRIT

LITR 1101G. Writing3D. An advanced experimental workshop for writing in immersive 3D, introducing text, sound, spatial poetics, and narrative movement into Brown’s Legacy Cave (now house in the Granoff Center for the Creative Arts) with links to the YURT (Yurt Ultimate Reality Theater in the Center for Computation and Visualization). An easy-to-learn and easy-to-use application allows non-programmers to create projects on laptops and then to run them in immersive 3D audiovisually without the necessity for specialist support. Broadly interdisciplinary, the course encourages collaboration between students with different skills in different media, who work together to discover a literary aesthetic in artificially rendered space. WRIT

LITR 1110B. American Political Drama. What exactly is an American political play? We’ll examine issues of personal freedom, community rights, and the positioning of public power. Are we different from the myths of America? Political theater enables us to see our moral choices and aspirations. From Aristophanes to Suzan-Lori Parks, we will look at various political texts while we attempt to create new approaches to the writing of American Political Theater. WRIT

LITR 1110E. Innovative Narrative. Stereotexts: a project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or texts and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., are all welcome. Writing samples and project descriptions required. WRIT

LITR 1110F.Narrative Strategies. A course essentially geared to the creative and critical writer interested in experimenting with some of the narrative structures suggested by the great films. To include films of Akerman, Antonioni, Eisenstein, Hou Hsiao, Hsin, Goddard, marker, Tarkovsky and others and texts by Duras, Sebald and Vittorini. Instructor permission required. WRIT

LITR 1110G. Narrative Voice: Fact and Fiction. No description available. WRIT

LITR 1110J. The Short Story. Experiments in writing; extensive reading in traditional and experimental collections of fiction in shorter forms. Writing samples of no more than ten pages should be left at 68 1/2 Brown Street on the first day of the semester. Instructor permission required. S/NC. WRIT

LITR 1110L. Aspects of Contemporary Prose Practice. Using Chimamanda Ngozi Adichie’s Purple Hibiscus, Tayeb Saleh’s The Wedding of Zein and Other Stories, Luis Bernard Honwana’s We Killed Mangy Dog, and Our Sister Killjoy, this course will look at prose narrative in experimental contemporary African Literature, for a background to general narrative practice. Among areas of special interest, the course will examine the contents and structure of the short story, not as an abbreviated novel, but as an autonomous genre. We shall also look at literature in translation, and discuss what the reader loses in the process if anything, and how much that matters, if at all. Students will be expected to work on short stories and novel chapters. Instructor permission required. Enrollment limited to 12. S/NC. WRIT
LITR 1110M. Stereotexts: Experimental Multidimensional Fiction Workshop. 
A project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or text and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., all are welcome submissions. WRIT

LITR 1110N. Workshop for Potential Literature. 
A novel without the letter "E", 100,000-billion sonnets by permutation and texts that take the shape of a Mobius-Strip-- all this time and more, as workshop participants try their hands at writing in response to problems created by and inspired by a group of writers engaged in strange constraints and procedures. Instructor permission required. S/NC. WRIT

LITR 1110O. Hybrid Texts, Hybrid Thinking. 
In neither being fiction, poetry, memoir, theory, nor art writing but a crossing of these genres, the hybrid text proffers an open and complexly layered environment for engaging questions of perception, knowledge and articulation. In this course, we will study exemplary works of literature and venture briefly into visual art. Both critical and creative responses will be required. WRIT

LITR 1110P. Alternative Scriptwriting: Writing Beyond the Rules. 
This course will consider various screenwriting genres and how to write against genre or extend the traditional screenwriting forms. Students applying must have already completed either a 90+ page screenplay or have taken Advanced Playwriting (LITR 1010C) or Advanced Screenwriting (LITR 1010E) at Brown. S/NC. WRIT

LITR 1110R. Performance Dimensions of Text. 
This workshop (modeled on a traditional "ateliers") explores the relationships between the performative and the printed/textual, asking in particular how the page can serve as a dynamic blueprint for sound, video, movement, and theatrical practice. Weekly examples of works that have pushed the boundaries of literary genres by incorporating performative elements will be combined with student experimentation in long and short pieces. As an interdisciplinary workshop, this course invites students from all backgrounds. S/NC. Instructor's permission required. Enrollment limited to 12. WRIT

LITR 1110S. Fiction into Film. 
A study of various directors' attempts to transfer masterpieces of fiction into film. Concerning both genres we will ask Gertrude Stein's question: What are masterpieces, and why are there so few of them? Includes fiction by Austen, Bierce, Carter, Cowley, Doyle, Faulkner, Forster, Fowles, Kesey, Joyce, McCullers, Morrison, Nabokov, O'Connor, Thompson, Walker, Spielberg, Woolf, Yamamoto as directed by Burton, Forman, Fellini, Gilliam, Huston, Jordan, Kurasaawa, Lee, Potter, and others. Class and weekly screenings. Enrollment limited to 12. S/NC. WRIT

LITR 1150A. Ecopoetics in Practice. 
What we have perpetrated on our environment has certainly affected a poet's means and material. But can poetry be ecological or display values that acknowledge the economy of interrelationship between human and non-human realms? Aside from issues of theme and reference, how might syntax, line break, or the shape of the poem on the page express an ecological ethics? How might poetry register the complex interdependency that draws us into a dialogue with the world? Readings, discussion, essays and creative writing. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC. WRIT

LITR 1150B. The Foreign Home: Interdisciplinary Arts. 
Project-centered workshop for exploration beyond one's "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. See general course description above for course entry procedures for all special topics workshops/seminars. Written permission required. S/NC. WRIT

LITR 1150C. Unpublishable Writing. 
Before becoming the dominant form of book-marking, "the codex" meant a tree stump where criminals were tied. After examining conventions of western print culture, we will explore literary practices which are performative, sculptural, multimedia, or out-scale. Through the course is primarily for creative projects, critical research will also be expected. WRIT

LITR 1150E. Strange Attractors: Adaptations/Translations. 
A workshop for students from all genres and disciplines to explore adaptation as creative process. Adaptation can be between any genres and from any source. See general course description above for entry procedures for all special topics workshops/seminars. Written permission required. S/NC. WRIT

LITR 1150F. Home and Abroad. 
This course combines seminar and workshop sessions for students with special interest in the writing of novels and short fiction. Attention will be given to the ways certain English and American writers - Herman Melville, Joseph Conrad, E. M. Forster, Graham Greene - have interpreted the lives of people in other and foreign cultures. These are classic examples of the meeting of insiders and outsiders in the house of fiction. Instructor permission required. Enrollment limited to 12. WRIT

LITR 1150G. Books by Hand. 
As both a seminar and workshop, this course will explore small press publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects throughout the semester as well as research particular concerns in the field. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC. WRIT

LITR 1150H. Latin American Poetry Live. 
We focus on 18 essential poets from Latin America. If you do not weep and run naked shouting through the streets of Providence you will not have read the poems closely. Bilingualism is not a prerequisite, but all the texts are bilingual and we will consider translation issues in a way that is accessible to and engaging for everyone. Several of the poems we consider are book length magisterial works. The poems are political, erotic, domestic, colloquial, innovative, or incendiary, and sometimes all at once. This section does not require permission from instructor. WRIT

LITR 1150I. The Lyric Essay. 
Advanced level workshop for graduates and undergraduates to explore the possibilities of creative nonfiction in a radical or hybrid mode. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC. WRIT

LITR 1150J. The Cinematic Essay. 
A creative writing seminar in which we take the Essay Film as the primary inspiration for weekly writing exercises. Works by Marker, Godard, Ivens, Resnais, Varda, Akerman, Herzog, Morris, Su Friedrich, Sadie Benning and Trihn Mon-Ha to be included. Also writing by Czonnetti, Gass, Handke, Cha, Hong Kingston and more. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC. Students MUST register for the lecture section and the screening. WRIT

LITR 1150M. Short Fiction Experiments. 
A course in fiction which pushes against the very definitions of stories and fictions. Using short forms, we will examine our habits and assumptions of story telling and engage in willful adventures of mind, spirit, and language. Projects will include a passion for trying everything and anything once. No prior writing experience needed. Written permission required. WRIT

LITR 1150N. The Novella: An Adventure in Writing. 
In this workshop/seminar, we will explore the ever elusive world of the novella - how to think of this work, what the rules are, where the boundaries lay. Alongside their reading of writers such as Marguerite Dumas and Michael Ondaatje, students will embark on their own novella-writing journeys. Written permission required. S/NC. WRIT
LITR 1150P. John Cage and Meditative Poetics.
Primarily an interdisciplinary literature course, we will experience the writing and thinking of John Cage in the context of a wider exploration of creative process with a basis in American and European interpretations of Buddhist practice and thought. We will explore the work of contemporary artists such as Bill Viola, Philip Glass, Meredith Monk, Allen Ginsberg and Anne Waldman, as well as Samuel Beckett and others. Students in the course will be expected to write in both creative and critical modes. Instruction in basic meditation practice is recommended but optional throughout the semester. Written permission required. WRIT

LITR 1150Q. Reading, Writing and Thinking for the Stage
Composed of contemporary dramatic literature for playwrights. Contemporary texts are studied. Use of each author’s dramatic techniques, the influence of the times on his drama, his themes, the demands of market driven theater and popular art considered. Simultaneously students will write an original 60-page manuscript. Students applying must have already completed plays of 60 pages or have advanced playwriting experience. Written permission required. S/NC. WRIT

LITR 1150R. Exemplary Ancient Fictions.
We shall discuss and examine a selection of pre-Gutenberg narratives from Gilgamesh and Genesis through Ovid and fairytales and medieval romance, with a focus on the ancient art of narrative. We shall also try our hands at exercises in the alternative fictional strategies these works suggest. Course entry based on the submission of a writing sample (and in-class writing in response to an assignment) at the first class session. WRIT

LITR 1150S. What Moves at the Margins.
A multi-genre seminar/workshop based on fiction, non-fiction and dramatic literature that has been banned or otherwise marginalized because it is critical, interrogative and alternative. Weekly writing exercises based on readings and discussions in class. A term project is required. For students who love literature. For admission, students may submit fiction, non-fiction or drama. Enrollment limited to 12. S/NC. WRIT

LITR 1150T. Foreign Home.
Project-centered workshop for exploration beyond one’s “home” genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and “beginner’s mind”. Collaborative and individual work expected. Instructor’s permission required. WRIT

LITR 1150U. Prose City: The Making of Spatial Texts.
In this workshop/seminar, we will explore, through selected reading and writing exercises, some basic questions of “writing city”: how is place captured, encompassed, how can the city emerge in language as a character, an event, as reflective space; how do we enter the city; how do we recognize its borders? Students will be asked to create a portfolio of texts for an imagined city, as well as to think through concepts such as “structure,” “location,” “encounter,” and “identity” as they occur in the paragraph. Instructor’s permission required. WRIT

LITR 1150V. The Novel in Brief.
This workshop/seminar takes the novel form on a wild ride as it investigates concepts such as compression, fragmentation, miniaturation, and sequencing in the construction of narratives. Students will be required to write their own brief novel over the course of the semester. Writing sample due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12. WRIT

LITR 1150W. Clown Aesthetics.
Clown as literary structure and trope as well as character will be our focus. We will ask if this “clown aesthetic” exists, could exist, should or might continue to exist — in fiction, performance, and film in particular. Clowning of all kinds considered from history, theory, literary and performance arts. Graduate and undergraduate students from all disciplines invited. This workshop course includes individual research as well as collaborative projects. Come to first class for permission. Enrollment limited to 12. S/NC. WRIT

LITR 1150X. Reading, Writing and Thinking.
We will explore various ways to engage with a work of art in order to fuel one’s imagination and projects. Close textual reading of several books with writing assignments based on the readings. Writers will include Woolf, Stein, Beckett, Coetzee, Kertesz and others. Writing samples due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12. S/NC. WRIT

LITR 1150Y. Fiction Through Poetry.
This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as means to think about fiction, and the borderlands of storytelling. Instructor permission required (bring a writing sample to the first class meeting). Enrollment limited to 12. S/NC WRIT

LITR 1150Z. Reading for Writers.
We will look closely and deeply and with a writer’s passion and agenda to the various formal decisions used in a variety of astonishing and evocative texts with the objective of utilizing some of these strategies in weekly compositions of our own. Writers include: Aria, Berssenbrugge, Coetzee, Kertesz, Kincaid, Lispector, Mueller. DPLL WRIT

LITR 1151A. Figures of Thought.
What can you say about what can’t be said, and what form does such a saying take? From the gnostic gospels to Agamben, Yeats to Yves Bonnefoy, we’ll follow these fleeting figures of thought and their messages. We will read a variety of writings from the deep past to the present. These writings will come in a variety of forms but illuminate a path ahead of the one we daily follow. Students will keep journals that respond to the world and writing and bring these as material for discussion in class. Each one will give a presentation during the term. WRIT

LITR 1151C. Virginia Woolf: Four Novels.
This is a class for writers and will entail close devotional readings of the texts and weekly writing experiments based on methods, motions, patterns, rhythms, abstractions and other narrative strategies employed by the novels. We'll read the following books by Woolf: Jacob's Room, Mrs Dalloway, To the Lighthouse, and Between the Acts. S/NC required. Writing samples due at first class meeting. WRIT

LITR 1151D. Art of Film.
This is a course in the art of film writing, directing, editing picture and sound, and producing, be it narrative or avant-garde. Students will engage the theory and practice of the art of filmmaking via readings, viewings, writings, and making their own films. Each student will complete four films from initial conception to the final film in a collaborative environment. DPLL WRIT

LITR 1151E. Latin American Death Trip.
Death is the subject of many of the greatest (most moving, innovative, funny, haunting, political, oneiric) Latin American poems of the 20th century, from Gorostiza’s Death without End to Villaaurutia’s Nostalgia for Death to Saenz’ The Night. What particularities of culture, gender, age, faith or experience might account for the visionary clarity of death as constant companion or permeable border, etc.? What makes the poems great? Our class will read classic Latin American books in bilingual editions (so Spanish literacy is not a requirement, but we will talk about translation issues). DPLL WRIT

LITR 1151F. Choose Your Own Adventure.
This game is lit. I mean this Lit is a game. How do the design elements of interactive [video] games resemble the design elements of a game? And to what extent have interactive [video] games been designed with novistic conceits? Your adventure begins here, starting with what lies at the dark heart of the literary adventure genre (Defoe, Conrad, Behn). We’ll sojourn at contemporary indie video games (Undertale, Walking Dead, Broken Age, Gone Home), along the way analyzing how “choice” is utilized to build reciprocal fictions. We will also undertake semester-long projects—creating our own “Choose Your Own Adventure”'s.
LITR 1151G. Everything Emily
This is a course that wallows in Emily Dickinson—one of the most important poets at the foundations of American poetry and, still today, one of our most exacting and most experimental practitioners. No one in the ensuing 150 years has surpassed her radical modes of expression, invention, and vision. We will engage with her poetry, her letters, her biography, and many of the works of criticism, visual art, film, and poetry that her work has inspired, as well as exploring the Dickinson collections in Brown’s Hay Library and visiting her Amherst home. WRIT

LITR 1151H. Discomfort.
Comfort is overrated! This course is an invitation to leave our comfort zones and dive into texts that invite us to rethink the way we view history, the world, fiction, writing, race relations etc. We will read recommended texts and discuss them in class. Discussions will include but not be limited to the narrative techniques employed by the writers and our response to the texts, both as readers and as writers. DPLL WRIT

LITR 1151L. Remaster + Remix.
This workshop/seminar will use the intuition, logic and esthetics of popular music forms such as punk, house, dub step, reggae and blues to delve into the complex connections between a selection of classic novels and versions of these novels retold. What tensions get reset when writers on an empire’s margin write back? What assumptions get shifted when women refocus a novel’s concerns? What are the possibilities and dangers in reconstructing classics while trying to mash them up? And why are we breathless when a stylist riffs? French Antillean notions of créolité will offer guidance. Main guide—the books. WRIT

LITR 1151J. Bob Marley: Lyrics and Legend.
Bob Marley is one of the most accomplished songwriters of all time. We’re going to engage with the lyrics of this postcolonial Caribbean writer; contemplate him as a subject of memoirs, biographies and documentaries; and explore him as a figure in the creative imaginations of novelists and poets such as Marlon James and Lorna Goodison. We’re also going to look at reggae as an important literary esthetic. And of course listen to a lot of his music. Special attention will be paid to the albums and singles produced under the guidance of Lee “Scratch” Perry. DPLL WRIT

LITR 1151K. Art of Assemblage: Collage, Reportage + Re-Appropriation.
In this class we will examine works of literature that challenge and re-imagine the poetic form using re-purposed text, research, fragment and image to enter into conversation with history and contemporary culture, and illuminate the every day realities of life. We’ll explore the use and effect of collage in visual work and music, and investigate how the form operates when transformed for the page through reading, class discussion, and creative writing exercises. DPLL

LITR 1151L. World Tour: Recent Poetry in Translation.
This is a reading, writing, translation, and discussion class. Commit to a vigorous combination of all four. Some translation theory will be reviewed, but the emphasis of the course is upon models of translations. Texts will include translations of books by Laszló Krasznahorkai, Jean Fremon, Yoshimasu Gozo, Kim Hysoon, Anja Utler, Adonis, and others. Enrollment limited to 12. S/NC DPLL WRIT

LITR 1151M. Cross-Fertilizations: Text-Based Performance.
Gabrielle Civil is a conceptual and performance artist whose stated aim is to “open up space.” With that in mind, the aim of this course is to open up — and engage — multiple spaces of language as it operates in the interstices of poetry, visual art, music, performance, shamanism, documentation, and activism. Among the texts we shall read are those by Theresa Hak Kyung Cha, Guillermo Gómez-Peña, Yoko Ono, LaTasha N. Nevada-Diggs — through them, we shall consider how performed language can activate various forms of engagement, perception, dissemination and understanding. DPLL WRIT

LITR 1151N. Zoologic: Wild Animals in the Surveillance State.
This interdisciplinary wintersession course asks students to research and deeply engage with the current status of wild animals in various states of surveillance (either through conservation and preservation, or for entertainment), trafficked for the pet trade, or living essentially as “refugees” in the human world. Original critical research will result in creative and collaborative projects. Site visits to animal sanctuaries, and lectures from people working with animals in a number of disciplines will be featured, as well as a final curated public exhibit and either an online or print publication. Course runs online from approx. 12/22/17-1/11/18 and continues on campus from 1/28/17-1/19/18. By application due in Nov. (see brown.edu/go/winter). Selection will prioritize seniority and relevant experience (any discipline.) WRIT

LITR 1151O. Ideas of Narration Before Don Quixote.
We shall read fictional narratives (and some narrative poetry) from the first moments of preserved literature up to Don Quixote, for clues about how earlier writers thought about form and narration. Of what was narrative fashioned before “omniscience” was a relevant term? Before there was a science of psychology that could speak to the protagonists? What can we say about the diversity and unpredictability of early narrative writing, and how does that contrast with the more consistent look and feel of the nineteenth century? How can these ‘ancient fictions’ inform an interest in narrative innovation and formal ingenuity today?

LITR 1151P. Documentary Poetics.
This course will explore 20th and 21st century documentary poetic texts to provide points of discussion and inspiration for our own investigative poetry. We’ll look at a range of works, from those confronting the legal record to those creating their own record of the infraordinary quotidian (Perec’s term), and discuss the various aesthetic, ethical, social, and procedural questions raised. Participants will be asked to develop and create their own final documentary poetry projects. Readings will include works by Reznikoff, Niedecker, Williams, M. NourbeSe Philip, C.D. Wright, Bernadette Mayer, Cole Swensen, Raúl Zurita, Anne Carson, Cristina Rivera-Garza, and many others.

LITR 1151Q. Great Adventure.
This hybrid seminar/prose workshop will take you to Antarctica, Japan, France, Cambodia, outer space—and to other places too. But much of your writing will be about yourself. Your cross-genre wandering through novels, essays, and indefinable hybrid works by a fascinating list of thinkers and stylists, will lead to questions about your own sense of place, belonging, contextual otherness, and the pleasures, powers and implications of your gaze. You’ll search for answers through the medium of your own creative work—lyric essays, fictional vignettes, pictures. WRIT

LITR 1151R. Ecstatic Alphabets: Poetry by Other Means.
How to do things with words? How to do words with things? The latter is a question whose answers might prove as—if not more—compelling than its familiar inverse. Both are at the core of this course focusing on interdisciplinary works for which notions intrinsic to poetry serve as either springboard or endpoint. We will study contemporary examples as well as historical antecedents, and will experiment with producing genre-defying works that animate the written word. Among the strategies we will cover are verbivocovisual works, cut-ups and collage, sound poetry and concrete poetry. We’ll look at a range of works, from those confronting the legal record to those creating their own record of the infraordinary quotidian (Perec’s term), and discuss the various aesthetic, ethical, social, and procedural questions raised. Participants will be asked to develop and create their own final documentary poetry projects. Readings will include works by Reznikoff, Niedecker, Williams, M. NourbeSe Philip, C.D. Wright, Bernadette Mayer, Cole Swensen, Raúl Zurita, Anne Carson, Cristina Rivera-Garza, and many others.

LITR 1151S. History and Practice of English Versification.
This course will explore a variety of poetic eras and traditions. S/NC.

LITR 1200. Writers on Writing.
Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer’s way of reading. This course will include visits to the course by contemporary writers, who will read to the class and talk about their work. Enrollment is limited to 30 students.

LITR 1220A. History and Practice of English Versification.
An opportunity to study through reading and imitating poems that represent a variety of poetic eras and traditions. S/NC.

LITR 1220B. Samuel Beckett.
This course will mark the centenary of the author by reading and discussing a range of works from Samuel Beckett’s substantial output of fiction, poetry, drama and translation.
LITR 1220C. The Cantos in their Environment. 
A reading of Pound's Cantos, with attention to their origin and development, their background and influence.

LITR 1220D. The Bible as Literary Source. 
A survey of the English Bible and its presence in English and American literature. Students will learn to notice and account for Biblical echoes in a wide variety of writings from several cultures.

LITR 1220E. Dada and Surrealism. 
Two of the most famous modernist movements, studied through their writings, their visual arts, their performances, and their manifestoes; their origins and influence; their place in history. S/NC.

LITR 1220F. Restoration Drama. 
A survey of English drama and theatrical practice from the reopening of the theaters at Restoration to the early eighteenth century. Works of the major playwrights, including Dryden, Congreve, Wycherly, Gay. S/NC.

LITR 1220G. The Waste Land and After. 
We shall examine Eliot's poem, and then deal with early poems by W.H. Auden and the work of Charles Williams and David Jones. S/NC.

LITR 1230C. Poetry Newly in Translation in English. 
This is a reading, writing, translation, and train class. Commit to a vigorous combination of all four. Some translation theory will be reviewed, but the emphasis of the course is upon models of translations. Texts will include works by Iva Blatny, Inger Christensen, Luljeta Lleshanaku, David Huerta, Takashi Hiroade; new translations of Rimbaud and Baudelaire and others. Enrollment limited to 20. S/NC.

LITR 1230D. Poetry, Mind, World. 
How does the poetic mind negotiate between an account of itself and an account of the world? How have poets used landscape as a model of mind, as an erotic, as a logic? Merleau-Ponty, Hardy, Houle, Alexander, Dewdney, Haas, D'Aquino, Audubon and others. Presentation, several short essays, a poem, and one final essay.

LITR 1230E. Form and Theory of Fiction. 
"Form and Theory of Fiction" offers an exploration of narrative theories directed particularly at creative writers, in conjunction with a hands-on examination of contemporary fictional narrative practices. Theoretical readings include historical essays on fiction and work by Gaston Bachelard, Mieke Bal, Gilles Deleuze, and others. Enrollment limited to 20.

LITR 1230F. Writing, Reading City. 
In this course, we will explore correlations, points of convergence, and possible mismesis between city and text. Students will be expected to keep a weekly journal, to have a city in question, and to write both imaginatively and critically in response to readings and class discussion.

With the theme of "Slavery and Justice" in recent Brown University reviews, [4] "Master Poets of Apartheid Streets: Perpetual Resistance against de jure and de facto Segregation" is the formal and precise embouchure as Critical Realism which legislates as antidote to pernicious social, economic and educational racism: the aesthetic stance of this seminar is "An Integer Is a Whole Number." Through close attention to the conventions of poetry as praxis by these four master poets, in social context, the modality of this study is poetic discourse (what Frederick Douglass called "a sacred effort" in Douglass' description of President Lincoln's "Second Inaugural." Peripatetic insights will be provided by Brown University researchers of the past: Charles H. Nichols, Winthrop Jordan, Richard Slotkin, in their three dissertations, and James R. Patterson's most recent book on "Brown v. Board of Education." Written permission required. Enrollment limited to 20. S/NC.

LITR 1230H. Being in Time. 
In this discussion-based course, we will examine the many roles time plays in the building of narratives as well as its impact on contemporary concepts of self. We will use both literary and philosophical texts to explore the spaces between time and perception, time and memory, time and experience, and time and grammar. Written permission required.

LITR 1230L. Eros: Hot and Sour. 
Literature, early and late, distant and near, at the intersection of love and loathing. A seminar on selected texts deriving their blood from poetry, their flesh from fiction, their anatomy from form and theory. Including works by Rikki Ducornet, Anne Carson, Roland Barthes, Helen Cixous, Gertrude Stein, Catullus, Henry Miller, et al. Enrollment limited to 20.

LITR 1230M. Poetry and Ethics (COLT 1812J). 
Interested students must register for COLT 1812J.

LITR 1230N. Robert Coover -- Foremost Storyteller. 
We shall examine the works of contemporary American fiction writer, Robert Coover. During his long, celebrated career, Coover has imaginatively responded to writers and forms that have come before him. We'll investigate how Coover appropriates earlier traditions and think about how he simultaneously preserves and subverts literary traditions. We shall consider such concepts as myth, religion, and history, and determine how Coover applies these. We'll focus on authorial strategies and themes explored. Furthermore, we'll define literary terminology as a tool for textual and critical analysis. Finally, through this experience you can develop or refine the capacity for self-expression and communication. Enrollment limited to 20. WRIT

LITR 1230O. Suppression and Invention in Modern Persian Literature.
This course begins with symbolic elements from classical mystic Persian literature and journeys into pre- and post-revolution Persian short fiction and poetry. We shall analyze creative responses to restricted expression, study efforts to modernize in a variety of genres, and finish with the rise of the woman writer in Iran. Enrollment limited to 20.

LITR 1230P. The New Wave in Iranian Cinema. 
We shall explore this movement that produced remarkable award-winning films in Iran. Applying author (auteur) theory, we will study new Iranian movies, analyzing "signs and meaning" in their cinematic language, also investigating effects of Iranian culture on this new artistic wave. Enrollment limited to 20. S/NC.

LITR 1230Q. London Consequences. 
This course focuses upon a selection of British prose from the 1960s and 1970s, and gives particular attention to post-war literary history in Britain, autobiographical fiction and the legacy of neo-modernism. We'll consider the work of, among others, Anna Kavan, J. G. Ballard, Nicholas Mosley, Muriel Spark, Christine Brooke-Rose, Stefan Themerson, Ann Quin and B.S. Johnson, along with (if available) London Consequences, a collaborative novel co-edited by Johnson. WRIT
LITR 1230T. The Origins of the Detective Story.
This class will explore the development of the Detective genre, focusing on its roots in the 19th century and considering more broadly how genres develop and change. Readings include E.T.A. Hoffmann's "Mademoiselle de Scudery", Edgar Allan Poe's Auguste Dupin stories, Wilkie Collins, Arthur Conan Doyle, Martin Hewett, and selections from Detection by Gaslight and The Penguin Book of Gaslight Crime. We will also work theoretically, including Franco Moretti's "Clues". This course fulfills Literary Arts' pre-20th-century literature requirement. Enrollment limited to 20.

LITR 1230U. Samuel Beckett.
This course will examine the works of Samuel Beckett—novels, plays and stories—from the beginning of his career to his death. We will read the majority of Beckett's work, with a major focus on his novel trilogy (Molloy, Malone Dies, and The Unnamable) and on the other work Beckett published between 1948 and 1961 (especially Endgame and How It Is). WRIT

LITR 1230V. Why Don't We Fall in Love?
We focus here on intersections of the erotic and poetry. How do we fall in love? Why? We will explore joy and happiness, love and lust, devotion and seduction. We will also, unfortunately, explore longing, heartbeat, jealousy, unrequited love. We will explore, through literature and film, the ageless enigma that prompted Ruth Stone to proclaim, "there is no choice among the voices / of love..." WRIT

LITR 1230W. Spectroscopy: [Identifying] Black Bodies in Narrative.
We shall focus on character development and narrative structure through the formation and presence of textual and cinematic black bodies. Our discussions will focus on the identification of that which is not allowed to speak -- the prototypical foil (Caliban), the other (Man Friday), the black body (Jim). How are narratives (how are we) shaped by that which cannot be acknowledged? DPLL WRIT

LITR 1230X. The New Long Poem.
An energetic study of powerful, book-length poems recently published in English, including texts as core to 20th c. literature as Juan Rulfo's Pedro Paramo to books as archly exacting as John Ashbery's Flow Chart, as affably innovative as Lyn Hejinian's My Life, as ingeniously formal as Inger Christiansen's alphabet and as unruly as Frank Stanford's The Battlefield Where the Moon Says I Love You. Also: Bernadette Mayer's Midwinter Day, Evan S. Connell's Notes Found in a Bottle on a Beach at Carmel, W.S. Merwin's The Folding Cliffs, and the intra-genre Cecilia Vicuña's Spit Temple. WRIT

LITR 1230Z. Syncretic Gods.
Is it possible to kill a God? What happens within a generation to change the face of a God? To change the nature of a God itself? In this course we will research the various transformations of the myths of Yoruba deities as they too traverse middle passage in the suffocating holds of merchant ships. We will commit to the (subversive) task of imagining and re-imagining the myths of the Orishas. Using as a foundation the seventeen drawings in Cuban artist Alberto del Pozo's Orichas series, we will cover the storied lives of these our immortal and syncretic Gods. DPLL WRIT

LITR 1231A. Time Mechanics: Poetry as Translation.
This seminar focuses on experimental translations and transcreation in the spirit of Spicer's claim in After Lorca: "A poet is a time mechanic not an embalmer." Various approaches to leading a text across the time and space divide will be studied. If for Pound to "make new" is to look elsewhere, for Zukofsky it's to listen closely. If Hawkey's Ventrakl posits the poem's decomposition over time, Bang gives us a current, self-obsolescencing version of Dante's hell. And while Hsia Yu's poems stage the clash of analogue and digital transmission technologies, Brandon Brown offers contemporary readers Fleur du mal version 2.0. WRIT

LITR 1231B. The Enchantment of Re-Imagining.
The author, Sam Leith, likened the recent Jane Austen project (in which six authors are tasked with rewriting Jane Austen for a modern audience) to "writing fiction as literary criticism." In this course, we are invited to think more speculatively about the role of re-imagination in literature and society by reading texts which do not only re-imagine the past by reframing history but which also re-imagine life and the present to offer us an alternate view. In some cases, these texts re-write existing classics. We will engage closely with the texts and relevant works of criticism. DPLL WRIT

LITR 1231C. Experimental Poets of Color.
In this course we'll read and critically engage with contemporary experimental poets of color writing in English in the US and Canada. Exploring the intersection of poetics, aesthetics, critical race (and mixed race) theory, and social justice activism in the arts, we will question the modernist and post-modernist assumptions that experimentation and innovation are exclusively the domain of whiteness. We will explore how racism, colonialism, and other contemporary systems of oppression condition responses to poets of color, and consider how poets of color respond to and engage with these systems both overtly and through their aesthetic experimentation. DPLL WRIT

LITR 1231D. Narrative Possession: spirits, shamans and the walking dead.
Narrative Possession offers a creative and critical investigation of the nature of possession as it manifests in film, fiction, and theory, exploring narrative depictions of possession across a wide range of international cultural practices including shamanism, voodoo, Spiritualism and séance. We will explore the theoretical and political ramifications of possession as it pertains to embodiment, sovereignty, private property and personal identity. Texts include works by Toni Morrison, Muriel Spark, Antoine Volodine, Zora Neale Hurston, Lafcadio Hearn, Ishmael Reed, Cesar Aira, kobo Abe, Derrida, Sartre, and De Certeau. Films include works by Cocteau, Camus, Tourneur, and Russell. WRIT

LITR 1231E. Rereading Writing.
We will study writing and, more generally, language art in terms of reading, both reexamining theories and practices of writing — in linguistics, the philosophy of language, and in the actual making of literature — and also by proposing that reading is constitutive of language regardless of its medium. What is reading, historically, theoretically, and in the digitally mediated future of culture? If reading brings language into being, then how should we read and what should we compose to be read? Readings from Saussure and Ong to Hayles, Derrida, and beyond. Optional critical-creative project. WRIT

LITR 1231F. Listening/Voicing.
"How you sound??" the poet Amiri Baraka once asked. This seminar is concerned with acts of communication as pertains to voicing and listening. How do poets sound out in the world, and to whom? We will explore notions of voice as more than a site of identity production, looking at, for example, the various fractures possible in Sappho's "voice" and what is carried to us through history, while also considering forms of singular and collective sounding via a range of poet and writers. On the other side of voice, we'll read into and experiment with acts of deep listening.

LITR 1231G. Traditions of Rupture: the Latin American Avant-Garde.
We will read and write creative responses to poetry and hybrid works by the generation of early 20th-century Latin American writers who shaped a distinct corpus owing as much to the European tradition as to the region's postcolonial history and vernacular. Huidobro, Vallejo, Neruda, Borges, and Guillén, and the Brazilian Modernists. We will also study postwar innovators—Berenguer, di Giorgio, Paz, Pizarnik, Parra, and the Brazilian Concrete Poets—as well as contemporary writers' contributions to the expansion of the field. Special focus will be devoted to translation matters, indigenous writing, and ecopoetics. Knowledge of Spanish and/or Portuguese is not necessary.

LITR 1300. Independent Study in Reading, Research, and Writing About Literature.
Provides advanced students with an opportunity to pursue tutorial instruction oriented toward a literary research topic.
LITR 1310. Independent Study in Creative Writing.
Offers tutorial instruction oriented toward some significant work in progress by the student. Typically taken by honors or capstone candidates in the antepenultimate or penultimate semester. See instructor to seek permission during the semester before undertaking the course of study. One advanced-level workshop is prerequisite. S/NC.

LITR 1410A. Fiction Honors.
A workshop setting for the completion of theses by advanced writers of fiction. See general course description above for course entry procedures for all honors workshops. Instructor permission required. Enrollment limited to 12 senior Literary Arts concentrators. S/NC.

LITR 1410C. Playwriting Honors.
A workshop setting for the completion of theses or capstone projects by advanced writers of dramatic literature. See general course description above for course entry procedures for all honors/capstone workshops. Written permission required. S/NC.

LITR 1510. Honors Independent Study in Creative Writing.
Provides tutorial instruction for students completing their theses or capstone projects. Typically taken by honors or capstone candidates in their final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC.

LITR 2010A. Graduate Fiction.
Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

LITR 2010B. Graduate Poetry.
Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

LITR 2010C. Graduate Playwriting.
Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

LITR 2110A. Theatrical Styles on Stage and Page.
An investigation of theatrical forms and for collaborations among actors, directors and playwrights. This course is limited to participants in the MFA programs in acting, directing and playwriting. Instructor permission required. S/NC.

LITR 2110C. Reading, Writing and Thinking.
A course for graduate prose writers. We will explore various ways to engage with a work of art in order to fuel one's imagination and projects. Close textual reading of several books with writing assignments based on the readings. Writers will include Woolf, Stein, Beckett, Coetzee, Kertesz and others. Written permission required. S/NC.

LITR 2110E. The Foreign Home: Interdisciplinary Arts.
Project-centered workshop for exploration beyond one's "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. Written permission required. S/NC.

LITR 2110F. Essays Without Borders.
A workshop for writing, performing, or media artists exploring essay or non-fiction forms in any genre. No project too strange, no essay too fanciful. Readings and research into experimental non-fiction. Individual and group work as well as critical and artistic projects. Literary Arts MFAs will be given priority. Come to first meeting for permission. Enrollment limited to 12. Permission required. S/NC.

LITR 2110G. Writing The Novel.
For advanced fiction writers who wish to work in long form. Through this course, participants will read a selection of novels and investigate the form; the primary emphasis will be placed on the work being undertaken by the members of the workshop itself. S/NC.

LITR 2110H. Embodying the Book.
What are the limits of the book? How far can it go? Alternatively, what is its essence? What is absolutely essential to it? This collaborative class brings writers together with RISD industrial designers and graphics artists to consider these questions and to create inventive book structures. Focus will be on collaboration itself, with texts addressing various aspects, such as the ethics of cooperation and group dynamics, as well as on the history and nature of the book as a cultural tool and force. Working in teams of three, students will invent their own structures and work together to embody them.

Geographically and/or aesthetically suspect, often shelved under the wrong rubric. Word-works by hermits and wanderers, sots and sot nots, whose language confirm, as Sister Rosetta Tharpe sang: Strange Things Happening Every Day. Including work by Besmhir Brigham, Wong May, Bernadette Mayer, Mary Reuille, Frank Stanford, David Fisher, a new translation of Beowulf (by an American! A Woman!), and others. There may also be music.

LITR 2110M. Challenging the Single Story: Reading Africa.
In recent years, there has been an explosion of new writing from Africa on the international scene, even as the single narrative of the continent persists. In this course, we will engage with fiction published in the last 15 years as well as critical texts and essays. Students will read fiction written in different genres. We will examine, among other things, how these writers negotiate their themes without compromising the integrity of their craft with a view to excelling in our own writing.

LITR 2110N. Drive, he sd: Robert Creeley & Co.
This is a reading, writing, and discussion class. Robert Creeley was one of the signal North American writers in the last 50 years. His voluminous correspondence, collaborations, and friendships altered the landscape of 20th Century Poetry in English and in other languages. We will read his poems, letters, and see interviews and collaborative projects. Students will write poems, letters, and do collaborations and presentations. Field trip to Creeley's grave; guest speakers; etc. etc. Enrollment limited to 12. S/NC.

LITR 2110O. Dialogue, Monologue, & Dialect.
This graduate-level hybrid workshop/seminar will use works of fiction, cinema, theater, and narrative poetry as beginning points for experiments and discussions centered on a wide range of concepts and practices designed to widen how they hear and see the possibilities of voice and body language in their work. Special attention will be paid to regional and international, especially hybrid, forms of English. Writing assignments will be short but varied in form and constraint. Students will be encouraged to use works-in-progress as material for play and trial-and-error. Some assignments will be written. Others will involve live "off-book" storytelling and improv.

LITR 2110P. World of Echoes: The Poet as Translator.
How is a poet's translation different from other translations? What factors determine a poet's choice to translate a specific author? For this seminar we will read innovative poetry recently translated by a diverse group of poets. Examples include Jennifer Scapettone's rendering of Amelia Rosselli's Locomotrix, Sawako Nakayasu's translations of Chika Sagawa, and Daniel Borzutzky's version of Raúl Zurita's The Book of Planks. Besides the translated materials, we will consider their relationship to the translator/poets' own works and the politics of cultural transmission. Students may engage in translation projects themselves or respond creatively to the materials, thereby also engaging in translation.

LITR 2210A. House Language.
We shall explore the house and its adjacent places and categories, with a focus upon narrative mannerism, terror and the grotesque, and the creation of literary form. We'll discuss stories, essays, household artifacts and etiquette, architectural plans and dangerous parlor games. Works by, among others: Georges Perec, H.G. Wells, Shirley Jackson, Isabella Beeton, Alain Robbe-Grillet, Frank Lloyd Wright, Rube Goldberg and Edith Wharton.
LITR 2230. Graduate Independent Study in Reading, Research, and Writing About Literature.
Provides graduate students with an opportunity to pursue tutorial instruction oriented toward a literary research topic.

LITR 2310. Graduate Independent Studies in Literary Writing.
Offers tutorial instruction oriented toward some significant work in progress by the graduate student. S/NC.

LITR 2410. Graduate Thesis Independent Study in Literary Writing.
Provides tutorial instruction for graduate students completing their graduate creative theses. Typically taken in the final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC.

LITR 2450. Exchange Scholar Program.

LITR 2600. Seminar in Teaching Creative Writing.
A course focused on how to design and lead a creative writing workshop. Reading, writing and laboratory workshop sessions. Designed for first-year Literary Arts graduate students. S/NC.

Mathematics
Chair
Jeffrey F. Brock

The Mathematics Department at Brown balances a lively interest in students and teaching with a distinguished research reputation. Our several strong research groups, Analysis, Algebraic Geometry, Geometry and Topology, and Number Theory, all have active weekly seminars that draw speakers ranging from the local to the international. We support 40 to 50 graduate students in a Ph.D. program whose graduates populate top mathematics departments and prominent positions in industry. Our joint graduate courses and seminars with the adjacent Division of Applied Mathematics add to the breadth of offerings available to our graduate students. The undergraduate program in mathematics at Brown is designed to prepare students for careers in the mathematical sciences and other careers requiring strong analytical skills, while engaging more ambitious students in creative projects that can culminate in a senior thesis.

For additional information, please visit the department’s website: http://www.math.brown.edu/

Mathematics Concentration Requirements
Mathematics is a grouping of sciences, including geometry, algebra, and calculus, that study quantity, structure, space, and change. Mathematics concentrators at Brown can explore these concepts through the department’s broad course offerings and flexible concentration requirements. The concentration leads to either the Bachelor of Arts or Bachelor of Science degree (the latter is strongly recommended for students interested in pursuing graduate study in mathematics or related fields). Concentrators begin their learning with multivariable calculus, linear algebra, and abstract algebra. Beyond these prerequisites, students take a variety of advanced topics on the 1000 and 2000 level based on their interests. Students also have the option of completing a thesis project.

Concentrators in mathematics should complete the prerequisites by the end of their sophomore year. It is strongly recommended that students take MATH 1010 before taking MATH 1130.

Standard program for the A.B. degree
Prerequisites:
- Multivariable calculus and linear algebra (choose one of the following sequences):
  - MATH 0180
  - MATH 0520
  - And Honors Calculus
  - MATH 0540
  - Linear Algebra
  - Or the equivalent

Program:
- MATH 1530 Abstract Algebra
- Five other 1000- or 2000-level Mathematics courses
- Total Credits 8

Standard program for the Sc.B. degree
Prerequisites:
- Multivariable calculus and linear algebra (choose one of the following sequences):
  - MATH 0180 Intermediate Calculus
  - MATH 0520 and Linear Algebra
  - MATH 0180 Intermediate Calculus
  - MATH 0540 and Honors Linear Algebra
  - MATH 0200 Intermediate Calculus (Physics/Engineering)
  - MATH 0520 and Linear Algebra
  - MATH 0350 Honors Calculus
  - MATH 0540 and Honors Linear Algebra
  - Or the equivalent

Program:
- MATH 1130 Functions of Several Variables
- MATH 1140 and Functions Of Several Variables
- MATH 1530 Abstract Algebra
- MATH 1540 Topics in Abstract Algebra
- MATH 1560 Number Theory
- Four other 1000- or 2000-level Mathematics courses.
- Four additional courses in mathematics, science, economics, or applied mathematics approved by the concentration advisor.
- Total Credits 14

Honors
Honors degrees may be recommended for students who have exhibited high achievement in mathematics. Candidates must complete at least eight mathematics courses at the 1000 or 2000 level with sufficiently good grades and must write an honors thesis under the guidance of a faculty member. The honors thesis is usually written while the candidate is enrolled in MATH 1970. The candidate should consult with the concentration advisor for the precise grade requirements.

Those interested in graduate study in mathematics are encouraged to take:
- MATH 1130 Functions of Several Variables
- MATH 1140 Functions Of Several Variables
- MATH 1260 Complex Analysis
- MATH 1410 Combinatorial Topology
- MATH 1540 Topics in Abstract Algebra

Mathematics-Computer Science Concentration Requirements
Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (http://www.cs.brown.edu/ugrad/concentrations/
The requirements for the Standard Track of the Sc.B. degree.

**Prerequisites**

Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350.

MATH 0520 Linear Algebra

or MATH 0540 Honors Linear Algebra

**Core Courses**

MATH 1530 Abstract Algebra

Select one of the following series:

<table>
<thead>
<tr>
<th>Series A</th>
<th>Series B</th>
<th>Series C</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 0150 &amp; CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSCI 0170 &amp; CSCI 0180 Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSCI 0190 Accelerated Introduction to Computer Science and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level CS course</td>

</tbody>
</table>

Three 1000-level Mathematics courses

Three advanced courses in Computer Science

Three additional courses different from any of the above chosen from Mathematics, Computer Science, Applied Mathematics, or related areas

A capstone course in Computer Science or Mathematics

Note: CSCI 1450 may be used either in place of CSCI 220 or 1010 in the core courses or as an advanced course. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650, Applied Math 1655, and CSCI 1450.

**Total Credits**

19

---

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

---

### Mathematics-Economics Concentration Requirements

The Mathematics Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself. Students may choose either the standard or the professional track, both award a Bachelor of Arts degree.

#### Standard Mathematics-Economics Concentration

1 Or ECON 1110 with permission.
2 No course may be “double-counted” to satisfy both the mathematical-economics and data methods requirement.

Honors and Capstone Requirement:
Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website). Beginning with the class of 2016, students not writing an honors thesis must complete an alternative senior capstone project and obtain approval of a faculty sponsor.

Professional Track
The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer’s work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Mathematics Graduate Program
The department of Mathematics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. Ph.D. students may also earn a transitional A.M. or Sc.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:
http://www.brown.edu/academics/gradschool/programs/mathematics

Courses

**MATH 0010A. First Year Seminar: A Taste of the Infinite.**
The concept of infinity occurs in many disciplines - philosophy, mathematics, physics, religion, art, and so on. This class will focus on the mathematical aspects of infinity, surveying some of the ways that the infinite arises in mathematics. Topics will include: the sizes of infinity, rates of growth, computational complexity, construction of the real numbers, the notion of compactness, geometric spaces, transcendental numbers, and fractal sets. I will not assume any prior knowledge of mathematics beyond a good grounding in high school algebra and geometry. FYS

**MATH 0010B. Exploring the Fourth Dimension.**
This interdisciplinary seminar explores all the mathematics students have seen or ever will see, concentrating on an engaging topic that begins with elementary geometry and branches out to literature, history, philosophy, and art as well as physics and other sciences. Guideposts to the fourth dimension include Salvador Dali’s Corpus Hypercubicus, Edwin Abbott Abbott's Flatland, and Jeff Weeks' The Shape of Space. Students will investigate new mathematical topics such as combinatorics, regular polytopes, topology, and non-Euclidean geometry. Although students will use computers for visualization, no computer experience is required. There are no specific mathematical prerequisites except curiosity and a willingness to participate actively. Students considering concentrations in humanities, social sciences, and the arts are especially invited to this first-year seminar. Enrollment limited to 20 first year students. FYS

**MATH 0010C. From 'Flatland' to the Fourth Dimension.**
No description available. Enrollment limited to 15 first year students. Instructor permission required, after initial placement of students. FYS

**MATH 0050. Analytic Geometry and Calculus.**
MATH 0050 and 0060 provide a slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. May not be taken for credit in addition to MATH 0070 or MATH 0090. S/NC only.

**MATH 0060. Analytic Geometry and Calculus.**
A slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. Prerequisite: MATH 0050 or written permission. May not be taken for credit in addition to MATH 0070 or MATH 0090. S/NC only.

**MATH 0070. Calculus with Applications to Social Science.**
A one-semester survey of calculus for students who wish to learn the basics of calculus for application to social sciences or for cultural appreciation as part of a broader education. Topics include functions, equations, graphs, exponentials and logarithms, and differentiation and integration; applications such as marginal analysis, growth and decay, optimization, and elementary differential equations. May not be taken for credit in addition to MATH 0050 or MATH 0060 or MATH 0090. S/NC only.
MATH 0090. Introductory Calculus, Part I.
An intensive course in calculus of one variable including limits, differentiation, maxima and minima, the chain rule, rational functions, trigonometric functions, and exponential functions. Introduction to integration with applications to area and volumes of revolution. MATH 0090 and MATH 0100 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics. May not be taken for credit in addition to MATH 0050 or MATH 0060 or MATH 0070. S/NC only.

MATH 0100. Introductory Calculus, Part II.
A continuation of the material of MATH 0090 including further development of integration, techniques of integration, and applications. Other topics include infinite series, power series, Taylor's formula, polar and parametric equations, and an introduction to differential equations. MATH 0090 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics.

MATH 0170. Advanced Placement Calculus.
This course covers topics in calculus such as limits, derivatives, integrals, and series, with a focus on applications in physics and engineering. Students with a special interest in physics or engineering are recommended to take this course. The course includes 1 hour of recitation per week.

MATH 1010. Analysis: Functions of One Variable.
This course covers the fundamentals of calculus, including completeness properties of the real number system, topology of the real line, and an introduction to basic theorems in calculus such as the mean value theorem and the intermediate value theorem.

MATH 1040. Fundamental Problems of Geometry.
This course covers the basic principles of geometry, including Euclidean and non-Euclidean geometries, and the axiomatic approach to geometry.

MATH 1110. Ordinary Differential Equations.
This course covers the theory and applications of ordinary differential equations, including existence and uniqueness theorems and the theory of linear systems.

MATH 1120. Partial Differential Equations.
This course covers the theory and applications of partial differential equations, including existence and uniqueness theorems and the theory of linear systems.

MATH 0200. Intermediate Calculus (Physics/Engineering)
This course covers advanced topics in calculus, including functions of two or three variables, partial derivatives, multiple integrals, line integrals, Green's theorem, Stokes' theorem, and the divergence theorem. Prerequisite: MATH 0100, 0170, or 0190.

MATH 0350. Honors Calculus.
This is a second-semester calculus course for students of greater aptitude and motivation. Topics include vector analysis, multiple integration, partial differentiation, Lagrange multipliers, double surfaces and triple integrals, vector analysis, Stokes' theorem, and the divergence theorem, with applications to electrostatics and fluid flow. The extra hour is a weekly problem session. Recommended prerequisite: MATH 0100, 0170, or 0190.

MATH 0520. Linear Algebra.
This course covers vector spaces, linear transformations, matrices, systems of linear equations, bases, projections, rotations, determinants, and inner products. Applications may include differential equations, difference equations, least squares approximations, and models in economics and in biological and physical sciences. MATH 0520 or MATH 0540 is a prerequisite for all 1000-level courses in Mathematics except MATH 1260 or MATH 1610. Recommended prerequisite: MATH 0180, MATH 0200, or MATH 0350. May not be taken in addition to MATH 0540.

MATH 0540. Honors Linear Algebra.
Linear algebra for students of greater aptitude and motivation, especially mathematics and science concentrators with a good mathematical preparation. Matrices, linear equations, determinants, and eigenvalues; vector spaces and linear transformations; inner products; Hermitian, orthogonal, and unitary matrices; and Jordan normal forms. Provides a more extensive treatment of the topics in MATH 0520. Recommended prerequisites: MATH 0180, 0200, or 0350.

MATH 0580. Mathematical Forms in Architecture.
This course explores the application of mathematical concepts in architecture, focusing on computational methods. Students will learn how to use optimization libraries in Mathematica to explore solutions to various problems.

MATH 0750. Introduction to Higher Mathematics.
This course provides an introduction to higher mathematics for students intending to concentrate in the sciences or mathematics. It covers topics such as number theory, algebra, and geometry. The course includes 4 weeks of problem sessions.

MATH 0760. Introduction to Higher Mathematics.
This course covers the fundamentals of higher mathematics, including number theory, algebra, and geometry. The course includes 4 weeks of problem sessions.

MATH 0790. Analysis: Functions of One Variable.
This course covers the fundamentals of calculus, including completeness properties of the real number system, topology of the real line, and an introduction to basic theorems in calculus such as the mean value theorem and the intermediate value theorem.

MATH 0800. Advanced Placement Calculus (Physics/Engineering).
This course covers advanced topics in calculus, including functions of two or three variables, partial derivatives, multiple integrals, line integrals, Green's theorem, Stokes' theorem, and the divergence theorem. Prerequisite: MATH 0100, 0170, or 0190.

MATH 0900. Advanced Placement Calculus (Physics/Engineering).
This course covers advanced topics in calculus, including functions of two or three variables, partial derivatives, multiple integrals, line integrals, Green's theorem, Stokes' theorem, and the divergence theorem. Prerequisite: MATH 0100, 0170, or 0190.

MATH 1020. Advanced Placement Calculus (Physics/Engineering).
This course covers advanced topics in calculus, including functions of two or three variables, partial derivatives, multiple integrals, line integrals, Green's theorem, Stokes' theorem, and the divergence theorem. Prerequisite: MATH 0100, 0170, or 0190.

MATH 1080. Poetry and Mathematics.
This course explores the connection between mathematics and poetry, focusing on the use of mathematical concepts in poetry.

Department of Mathematics.
This course covers advanced topics in mathematics, including number theory, algebra, and geometry. The course includes 4 weeks of problem sessions.

MATH 1100. Ordinary Differential Equations.
This course covers the theory and applications of ordinary differential equations, including existence and uniqueness theorems and the theory of linear systems.

MATH 1110. Partial Differential Equations.
This course covers the theory and applications of partial differential equations, including existence and uniqueness theorems and the theory of linear systems.

MATH 1120. Mathematical Forms in Architecture.
This course explores the application of mathematical concepts in architecture, focusing on computational methods. Students will learn how to use optimization libraries in Mathematica to explore solutions to various problems.

MATH 1130. Mathematical Forms in Architecture.
This course explores the application of mathematical concepts in architecture, focusing on computational methods. Students will learn how to use optimization libraries in Mathematica to explore solutions to various problems.
MATH 1130. Functions of Several Variables.
A course on calculus on manifolds. Included are differential forms, integration, and Stokes' formula on manifolds, with applications to geometrical and physical problems, the topology of Euclidean spaces, compactness, connectivity, convexity, differentiability, and Lebesgue integration. It is recommended that a student take a 1000-level course in analysis (MATH 1010 or MATH 1260) before attempting MATH 1130.

MATH 1140. Functions Of Several Variables.
See Functions Of Several Variables (MATH 1130) for course description. Prerequisite: MATH 1130 or instructor permission.

MATH 1230. Graph Theory.
This course covers important material about graph theory, such as spanning trees, network flow problems, matching problems, coloring problems, planarity, Cayley graphs, spectral theory on graphs, and Ramsey Theory. The emphasis will be on a combination of theory and algorithms. Depending on the instructor, connections to such fields as combinatorics, geometry, or computer science might be emphasized. Prerequisite: MATH 0180, 0200 or 0350 and MATH 0520 or 0540 are recommended. Enrollment limited to 40.

MATH 1260. Complex Analysis.
Examines one of the cornerstones of mathematics. Complex differentiability, Cauchy-Riemann differential equations, contour integration, residue calculus, harmonic functions, geometric properties of complex mappings. Prerequisite: MATH 0180, 0200, or 0350. This course does not require MATH 0520 or 0540.

MATH 1270. Topics in Functional Analysis.
Infinite-dimensional vector spaces with applications to some or all of the following topics: Fourier series and integrals, distributions, differential equations, integral equations, calculus of variations. Prerequisite: At least one 1000-level course in Mathematics or Applied Mathematics, or permission of the instructor.

MATH 1410. Combinatorial Topology.
Topology of Euclidean spaces, winding number and applications, knot theory, fundamental group and covering spaces. Euler characteristic, simplicial complexes, classification of two-dimensional manifolds, vector fields, the Poincaré-Hopf theorem, and introduction to three-dimensional topology. Prerequisite: MATH 0180, 0200, or 0350. This course does not require MATH 0520 or 0540.

MATH 1530. Abstract Algebra.
An introduction to the principles and concepts of modern abstract algebra. Topics include groups, rings, and fields; applications to number theory, the theory of equations, and geometry. MATH 1530 is required of all students concentrating in mathematics.

MATH 1540. Topics in Abstract Algebra.
Galois theory together with selected topics in algebra. Examples of subjects which have been presented in the past include algebraic curves, group representations, and the advanced theory of equations. Prerequisite: MATH 1530.

MATH 1560. Number Theory.
A basic introduction to the theory of numbers. Unique factorization, prime numbers, modular arithmetic, quadratic reciprocity, quadratic number fields, finite fields, Diophantine equations, and additional topics. Prerequisite: MATH 1530 or written permission.

MATH 1580. Cryptography.
The main focus is on public key cryptography. Topics include symmetric ciphers, public key ciphers, complexity, digital signatures, applications and protocols. MATH 1530 is not required for this course. What is needed from abstract algebra and elementary number theory will be covered. Prerequisite: MATH 0520 or MATH 0540.

MATH 1610. Probability.
Basic probability theory. Sample spaces; random variables; normal, Poisson, and related distributions; expectation; correlation; and limit theorems. Applications in various fields (biology, physics, gambling, etc.). Prerequisites: MATH 0180, 0200 or 0350.
MATH 2250. Complex Function Theory.
Introduction to the theory of analytic functions of one complex variable. Content varies somewhat from year to year, but always includes the study of power series, complex line integrals, analytic continuation, conformal mapping, and an introduction to Riemann surfaces.

MATH 2260. Complex Function Theory.
See Complex Function Theory (MATH 2250) for course description.

MATH 2370. Partial Differential Equations.
The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Semester II concentrates on special topics chosen by the instructor.

MATH 2380. Partial Differential Equations.
The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Semester II of this course concentrates on special topics chosen by the instructor.

MATH 2410. Topology.
An introductory course with emphasis on the algebraic and differential topology of manifolds. Topics include simplicial and singular homology, de Rham cohomology, and Poincaré duality.

MATH 2420. Topology.
See Topology (MATH 2410) for course description.

MATH 2450. Exchange Scholar Program.

MATH 2510. Algebra.
Basic properties of groups, rings, fields, and modules. Topics include: finite groups, representations of groups, rings with minimum condition, Galois theory, local rings, algebraic number theory, classical ideal theory, basic homological algebra, and elementary algebraic geometry.

MATH 2520. Algebra.
See Algebra (MATH 2510) for course description.

MATH 2530. Number Theory.
Introduction to algebraic and analytic number theory. Topics covered during the first semester include number fields, rings of integers, primes and ramification theory, completions, adeles and ideles, and zeta functions. Content of the second semester varies from year to year; possible topics include class field theory, arithmetic geometry, analytic number theory, and arithmetic K-theory. Prerequisite: MATH 2510.

MATH 2540. Number Theory.
See Number Theory (MATH 2530) for course description.

MATH 2630. Probability.
Introduces probability spaces, random variables, expectation values, and conditional expectations. Develops the basic tools of probability theory, such fundamental results as the weak and strong laws of large numbers, and the central limit theorem. Continues with a study of stochastic processes, such as Markov chains, branching processes, martingales, Brownian motion, and stochastic integrals. Students without a previous course in measure theory should take MATH 2210 (or APMA 2110) concurrently.

MATH 2640. Probability.
See MATH 2630 for course description.

MATH 2710A. Probability, Quantum Field Theory, and Geometry.

MATH 2710B. Solitary Waves.

MATH 2710C. Gluing Constructions in Differential Geometry.

MATH 2710D. Lie Groups and Lie Algebras.

MATH 2710E. Arithmetic Groups.

MATH 2710F. Stable Homotopy Theory.
No description available.

MATH 2710G. Topics in Free Boundary Problems in Continuum Mechanics.

MATH 2710H. Topics in Complex and p-adic Dynamics.
No description available.

MATH 2710I. Topics in Effective Harmonic Analysis.

MATH 2710J. Harmonic Analysis on Polytopes and Cones.
Graduate Topics course in harmonic analysis.

MATH 2710K. Problems of the Uncertainty Principle in Harmonic Analysis.
Graduate Topics course in harmonic analysis.

MATH 2720A. Topics in Harmonic Analysis.

MATH 2720B. Multiple Dirichlet Series.

MATH 2720C. Curves on Surfaces and the Classification of Finitely Generated Kleinian Groups.
This is a course in the study of geometry and topology of hyperbolic 3-manifolds.

MATH 2720D. Piecewise Isometric Maps.
This class will cover a variety of topics, all more or less related to dynamical systems that are defined by piecewise isometric maps. Topics may include: polygonal billiards and flat cone surfaces; outer billiards; interval exchange maps; The Gauss map and continued fractions; aperiodic tilings, such as the Penrose tiling; cut and paste theorems about polyhedra; and Ashwin’s conjecture about piecewise rotation maps. A fairly large part of the class will be devoted to the explanation of the instructor’s proof of the Moser-Neumann conjecture for outer billiards. For this part, the instructor will use his book on the subject. For other parts of the course, a variety of sources will be used.

MATH 2720E. Advanced Topics in Mathematics.

MATH 2720F. Topics in Geometric Analysis.
No description available.

MATH 2720G. Introduction to Hodge Structures.
No description available.

MATH 2720H. Discrete Groups, Ergodic Theory and Hyperbolic Geometry.
No description available.

MATH 2720I. Automorphic Representations for GL(2).
Graduate topics course in automorphic representations for GL(2).

MATH 2720J. Groups Acting on Trees.
This course will be an introduction to geometric group theory from the viewpoint of groups acting on trees. Some topics that may be covered include Bass-Serre theory, R-trees and the Rips machine and groups acting on quasi-trees.

MATH 2720K. Interfaces in Fluids.
The course will explore the description of the motion of interfaces in fluids from the points of view of modeling, numerical simulation and rigorous analysis. We will focus primarily on planar vortex sheets, but we also discuss other examples of interfaces.

MATH 2970. Preliminary Exam Preparation.
No description available.
MATH 2980. Reading and Research
Independent research or course of study under the direction of a member of the faculty, which may include research for and preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

MATH 2990. Thesis Preparation.
For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

MATH XLIST. Courses of Interest to Graduate Students Majoring in Mathematics.

---

**Medieval Studies**

**Director**

Efstratios Papaioannou

Medieval Studies offers two distinct areas of historical focus: the Medieval and the Late Antique. The former focuses on the sixth through the fifteenth centuries, combining interdisciplinary perspectives with in-depth study of one or two related disciplines. Late Antique Cultures deals with the third through the ninth centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The first undergraduate degree of its kind in this country, Late Antique Cultures facilitates the study of human activity in all of its variety. A traditional area of study in Medieval Cultures is Western Europe, but students are encouraged to work in other cultural areas such as Byzantine, Islamic, Judaic and Slavic. The concentration serves students interested in the changing relation of cultural practices, social patterns, political and economic forms, and artistic and literary traditions in this important transitional period.

For additional information, please visit the department’s website: http://www.brown.edu/Departments/Medieval_Studies/

**Medieval Cultures Concentration Requirements**

Medieval Cultures offers two distinct areas of historical focus: the Medieval and the Late Antique. The former focuses on the sixth through the fifteenth centuries, combining interdisciplinary perspectives with in-depth study of one or two related disciplines. Late Antique Cultures deals with the third through the ninth centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The first undergraduate degree of its kind in this country, Late Antique Cultures facilitates the study of human activity in all of its variety. A traditional area of study in Medieval Cultures is Western Europe, but students are encouraged to work in other cultural areas such as Byzantine, Islamic, Judaic and Slavic. The concentration serves students interested in the changing relation of cultural practices, social patterns, political and economic forms, and artistic and literary traditions in this important transitional period.

---

**Medieval Cultures Track**

It is recommended that prospective concentrators take the introductory course, Medieval Perspectives, during their freshman or sophomore year.

---

**Requirements**

Ten courses approved by the Program in Medieval Studies, including two courses in medieval history and one 1000- or 2000-level course that uses primary texts in a medieval language other than Middle English. Interested students are invited to discuss their plans with an appropriate faculty member of the Program. A concentration proposal should be prepared in consultation with the faculty advisor and submitted to the Program Chair for approval.

Under the supervision of the director of the program, students may choose courses from the following:

- **CLAS 0660** The World of Byzantium
- **CLAS 1120G** The Idea of Self
- **CLAS 1120V** The Age of Constantine: The Roman Empire in Transition
- **CLAS 1750L** Erotic Desire in the Premodern Mediterranean
- **COLT 0510K** The 1001 Nights
- **COLT 1813P** Captive Imagination: Writing Prison in the Middle Ages
- **ENGL 0100D** Matters of Romance
- **ENGL 0150C** The Medieval King Arthur
- **ENGL 0300F** Beowulf to Aphra Behn: The Earliest British Literatures
- **ENGL 0310F** Prose Sagas of the Medieval North
- **ENGL 1310T** Chaucer
- **ENGL 1310V** Chaucer: The Canterbury Tales
- **ENGL 1311E** History of the English Language
- **ENGL 1311H** Sagas Without Borders: Multilingual Literatures of Early England
- **ENGL 1311L** From Mead-Hall to Mordor: The Celtic and Germanic Roots of Tolkien’s Fiction
- **ENGL 1360F** Quest, Vision, Diaspora: Medieval Journey Narratives
- **ENGL 1360H** Introduction to the Old English Language
- **ENGL 1360J** Middle English Literature
- **ENGL 1360U** Europe in the Vernacular
- **ENGL 1361D** Women’s Voices in Medieval Literature
- **ENGL 1900Y** Medieval Manuscript Studies: Paleography, Codicology, and Interpretation
- **ENGL 2360Q** Manuscript, Image, and the Middle English Text
- **GREEK 1110Q** Greek Erotic Literature: From Plato to the Medieval Romances
- **GREEK 1110T** Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World
- **GREEK 2110F** Greek Palaeography and Premodern Book Cultures
- **HIAA 0321** Toward a Global Late Antiquity: 200–800 CE
- **HIAA 0460** Muslims, Jews and Christians in Medieval Iberia
- **HIAA 1440B** Architecture of Solitude: The Medieval Monastery
- **HISP 2030D** Fifteenth-Century Sentimental Romances and Celestina
- **HIST 0150B** The Philosophers’ Stone: Alchemy From Antiquity to Harry Potter
- **HIST 0521A** Christianity in Conflict in the Medieval Mediterranean
- **HIST 0521M** The Holy Grail and the Historian’s Quest for the Truth
Honors
This is awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. The thesis permits the student to synthesize various disciplines or interests, or to pursue a new interest in greater depth. To be eligible for Honors, candidates must complete a minimum of six approved courses in Medieval Studies by the end of their third year with more grades of A than B. Students should apply for admission to Honors and should meet with their faculty advisor(s) no later than spring of the junior year to plan the thesis project. Accepted candidates write the thesis in a two-semester course sequence under the supervision of a director and second reader drawn from the Medieval Studies faculty.

Interested students should contact the concentration advisor for further details or consultation (863-1994).

### Honors

When in Late Antique Cultures, these are awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. Application for admission to honors should be made in the spring of the junior year, by which time honors candidates must have completed a minimum of six approved courses in Late Antique Studies. Accepted candidates write the thesis in a two-semester course sequence (MDVL 1990) under the supervision of a director and a second reader to be determined in consultation with the advisor.
MDVL 0640. Dying to Be With God: Jihad, Past and Present (RELS 0640).
Interested students must register for RELS 0640.

MDVL 0660. The World of Byzantium (CLAS 0660).
Interested students must register for CLAS 0660.

Interested students must register for JUDS 0681.

MDVL 0683. Jews and Money (JUDS 0683).
Interested students must register for JUDS 0683.

MDVL 0710D. History of the Spanish Language (HISP 0710D).
Interested students must register for HISP 0710D.

MDVL 0812H. Literary Bestsellers of the Islamic World (COLT 0812H).
Interested students must register for COLT 0812H.

MDVL 0910. Medieval and Renaissance Music (MUSC 0910).
Interested students must register for MUSC 0910.

MDVL 1010. Dante in English Translation: Dante’s World and the Invention of Modernity (ITAL 1010).
Interested students must register for ITAL 1010.

MDVL 1020. Living Together: Muslims, Christians, and Jews in Medieval Iberia (HIST 1020).
Interested students must register for HIST 1020.

MDVL 1030. The Long Fall of the Roman Empire (HIST 1030).
Interested students must register for HIST 1030.

MDVL 1100C. Medieval Arabic Philosophy (PHIL 1100C).
Interested students must register for PHIL 1100C.

MDVL 1100F. Fortunatus (LATN 1100F).
Interested students must register for LATN 1100F.

MDVL 1110G. En Marge: Exilés et Hors-la-Loi au Moyen Age (FREN 1110G).
Interested students must register for FREN 1110G.

MDVL 1110H. Literature at the Court of Charlemagne (LATN 1110H).
Interested students must register for LATN 1110H.

MDVL 1110L. Medieval Latin Lyric (LATN 1110L).
Interested students must register for LATN 1110L.

MDVL 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances (GREK 1110Q).
Interested students must register for GREK 1110Q.

MDVL 1110T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World (GREK 1110T).
Interested students must register for GREK 1110T.

MDVL 1120C. Survey of Late and Medieval Latin (LATN 1120C).
Interested students must register for LATN 1120C.

MDVL 1120D. Alcuin (LATN 1120D).
Interested students must register for LATN 1120D.

MDVL 1120G. The Idea of Self (CLAS 1120G).
Interested students must register for CLAS 1120G.

MDVL 1120V. The Age of Constantine: The Roman Empire in Transition (CLAS 1120V).
Interested students must register for CLAS 1120V.

MDVL 1205. The Long Fall of the Roman Empire (HIST 1205).
Interested students must register for HIST 1205.

MDVL 1210C. History of the Spanish Language (HISP 1210C).
Interested students must register for HISP 1210C.

MDVL 1211. Crusaders and Cathedrals: Europe in the High Middle Ages (HIST 1211).
Interested students must register for HIST 1211.

Interested students must register for ARCH 1220.

MDVL 1260D. Living Together: Muslims, Christians, and Jews in Medieval Iberia (HIST 1260D).
Interested students must register for HIST 1260D.

MDVL 1280. Death from Medieval Relics to Forensic Science (HIST 1280).
Interested students must register for HIST 1280.

MDVL 1300. Ancient Christianity and the Sensing Body (RELS 1300).
Interested students must register for RELS 1300.

MDVL 1310E. A Classical Islamic Education: Readings in Arabic Literature (COLT 1310E).
Interested students must register for COLT 1310E.

MDVL 1310T. Chaucer (ENGL 1310T).
Interested students must register for ENGL 1310T.

MDVL 1310V. Chaucer: The Canterbury Tales (ENGL 1310V).
Interested students must register for ENGL 1310V.

MDVL 1311E. History of the English Language (ENGL 1311E).
Interested students must register for ENGL 1311E.

Interested students must register for ENGL 1311H.

MDVL 1325C. The Virgin Mary in Christian Tradition (RELS 1325C).
Interested students must register for RELS 1325C.

MDVL 1325D. Byzantine Desires (RELS 1325D).
Interested students must register for RELS 1325D.

MDVL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives (ENGL 1360F).
Interested students must register for ENGL 1360F.

MDVL 1360H. Introduction to the Old English Language (ENGL 1360H).
Interested students must register for ENGL 1360H.

MDVL 1360J. Middle English Literature (ENGL 1360J).
Interested students must register for ENGL 1360J.

MDVL 1360U. Europe in the Vernacular (ENGL 1360U).
Interested students must register for ENGL 1360U.

MDVL 1361D. Women’s Voices in Medieval Literature (ENGL 1361D).
Interested students must register for ENGL 1361D.

MDVL 1361J. Seminar in Old Norse-Icelandic Language and Literature (ENGL 1361J).
Interested students must register for ENGL 1361J.

MDVL 1440. The Ottomans: Faith, Law, Empire (HIST 1440).
Interested students must register for HIST 1440.

MDVL 1440B. Architecture of Solitude: The Medieval Monastery (HIAA 1440B).
Interested students must register for HIAA 1440B.

MDVL 1520. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).
Interested students must register for RELS 1520.

MDVL 1530. Methods and Approaches to Islamic Studies (RELS 1530).
Interested students must register for RELS 1530.

MDVL 1530D. Islamic Sectarianism (RELS 1530D).
Interested students must register for RELS 1530D.

MDVL 1560A. Italy and the Mediterranean (HIAA 1560A).
Interested students must register for HIAA 1560A.

MDVL 1600. Astronomy Before the Telescope (ASYR 1600).
Interested students must register ASYR 1600.
MDVL 1630. The Talmud (JUDS 1630).
Interested students must register for JUDS 1630.

MDVL 1744. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 1744).
Interested students must register for JUDS 1744.

MDVL 1750L. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).
Interested students must register for CLAS 1750L.

MDVL 1813P. Captive Imaginations: Writing Prison in the Middle Ages (COLT 1813P).
Interested students must register for COLT 1813P.

MDVL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation (ENGL 1900Y).
Interested students must register for ENGL 1900Y.

Interested students must register for HIST 1963L.

Interested students must register for HIST 1963Q.

Tutorial instruction on an approved topic in Late Antique and/or Medieval cultures, supervised by a member of staff. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. May be repeated once for credit.

Interested students must register for HMAN 1971U.

Interested students must register for HIST 1972H.

Interested students must register for HIST 1976R.

Interested students must register for HIST 1979H.

Independent research and writing on a topic of special interest to the student, under the direction of a faculty member. Required of candidates for honors. Permission should be obtained from the Director of the Program in Medieval Studies.

MDVL 2030D. Fifteenth-Century Sentimental Romances and Celestina (HISP 2030D).
Interested students must register for HISP 2030D.

MDVL 2040D. Arts du récit, 1100-1400 (FREN 2040D).
Interested students must register for FREN 2040D.

MDVL 2110F. Greek Palaeography and Premodern Book Cultures (GRIK 2110F).
Interested students must register for GRIK 2110F.

MDVL 2360Q. Manuscript, Image, and the Middle English Text (ENGL 2360Q).
Interested students must register for ENGL 2360Q.

MDVL 2400J. Stories of the Prophets in Medieval Islamic Literature (RELS 2400J).
Interested students must register for RELS 2400J.

MDVL 2970A. New Perspectives on Medieval History (HIST 2970A).
Interested students must register for HIST 2970A.

MDVL 2971L. New Perspectives on Medieval History (HIST 2971L).
Interested students must register for HIST 2971L.

---

**Middle East Studies**

**Director**

Beshara B. Doumani

Middle East Studies at Brown University promotes knowledge, understanding, and informed discussion about the Middle East, Islam, and Muslim societies through research, teaching, and public engagement.

Housed in the Watson Institute and supported by the Dean of Faculty, Middle East Studies (MES) has, since 2012, grown from an undergraduate concentration into one of the top programs in the country. Eschewing the hothouse legacy structures of the conventional Oriental and Area Studies models, MES is driven by thematic research initiatives that tap into Brown’s tradition of interdisciplinary, critical, and engaged scholarship. Organized through partnerships, MES seeks to integrate Middle East and Islamic Studies into the larger streams of intellectual life at Brown University by building a cutting-edge research community, producing innovative programming, and offering an exciting array of courses and opportunities for undergraduate and graduate students.

Middle East Studies is organized around niche research initiatives that seek to shape fields of knowledge through annual workshops, publications, pedagogy, and public outreach.

- Displacement and the Making of the Modern World
- Islamic Humanities
- New Directions in Palestinian Studies
- Engaged Scholarship in Zones of Conflict
- Arts and Social Change

For more information please visit: http://middleeastbrown.org

**Middle East Studies Concentration Requirements**

Middle East Studies (MES) is an interdisciplinary concentration that draws upon courses offered by a distinguished core faculty in the humanities and the social sciences. Regardless of one’s passions – whether history, religion, politics, culture, literature, modern media, philosophy or practices of everyday life – the Middle East is an ideal site for considering the diversity and complexity of the human experience. A growing number of exciting courses, creative and relevant programming, and a steady stream of post-docs and visiting professors offer unparalleled opportunities for MES concentrators who wish to understand this region and to engage with a broad range of issues that affect our world.

**Standard Program for the AB Degree - Effective for the Class of 2020**

Language Semesters: Basic competence in at least one of the modern Middle Eastern Languages is required. This entails taking at least six semesters of coursework in one of the modern Middle Eastern languages such as Arabic, Persian, Hebrew, Turkish, etc.

Electives: Two courses chosen from the list of courses that are cross-listed by Middle East Studies and approved by the Concentration advisor. Students should acquire a good balance of courses by taking courses in the humanities and social sciences. Students should also seek a good balance between courses whose primary subject matter is pre-modern (ancient and medieval) and modern and contemporary Middle East.

Capstone/Honors Project: This can take many forms such as:

1. A paper of approximately 30 pages for an existing concentration-eligible (MES-coded or X-Listed) WRIT-designated course, undertaken with the permission of the instructor.
2. An independent study or project (artistic, research, or otherwise) supervised by at least one faculty member for at least one semester under MES 1970 - Independent Study designation.

Honors

To be eligible for honors, students will have earned an "A" in the majority of courses for the concentration. Honors students will be required to have at least six semesters of language study (Advanced), two semesters of which may be counted toward the elective requirement. Two semesters of Independent Study (MES 1970) towards the Honors Thesis with the thesis advisor(s) are required. This is typically done during senior year and will raise the total number of required courses to 13.

Courses

MES 0155. Cultures of the Contemporary Middle East.
In our exploration of Middle Eastern social movements, this course addresses the role of culture and art in social change; the relationship between faith and politics; as well as the impact of national, regional, and transnational discourses on identity, ethics, and citizenship. The study of social movements in the region will address the impact of technology, media, women's rights and LGBT movements, as well as economic liberalization, entrepreneurship, and the politics of oil. Finally, we will trace the emergence and consequences of the "Arab Spring." DPLL

MES 0165. How Did We Get Here: Middle East City from Antiquity to the Present.
This course explores the relationship between the visual arts and social change in the contemporary Middle East. By combining essential and original texts in religion, law, and politics with studies of architectural form and urban morphology we explore the cultural significance and ethical claims from historically situated cities. From the ancient Levantine household to the contemporary Gulf megalopolis, analysis of the relationships between subtle and articulated cultural meanings and corresponding concrete architectural embodiments reveals rich depth in each case. While we might see ancient hierarchies long buried by modernity's desire for a capitalist city, our analysis shows they are very much alive and struggling. DPLL

MES 0170. Visual Expressions of Social Change in the Contemporary Middle East.
This course examines the origins, evolutions, and radical transformations of Middle Eastern cities. By combining essential and original texts in religion, law, and politics with studies of architectural form and urban morphology we explore the cultural significance and ethical claims from historically situated cities. From the ancient Levantine household to the contemporary Gulf megalopolis, analysis of the relationships between subtle and articulated cultural meanings and corresponding concrete architectural embodiments reveals rich depth in each case. While we might see ancient hierarchies long buried by modernity's desire for a capitalist city, our analysis shows they are very much alive and struggling. DPLL

DPLL
MES 0850. The Wall, the Drone and the Tunnel-Theaters of Sovereignty and Resistance
Israel/Palestine is a site for experimenting with technologies of security and warfare, including those serving resistance and insurgency. The seminar examines three technologies: drones used for collecting intelligence and “targeted killings;” heavily surveilled separation walls used to enforce a strict regime of movement; tunnels used by insurgency forces for undercover movement. We will study these technologies’ modes of operation; the discourse that represents and justifies their actual deployment; the local and global economy of violence in which they are embedded; the system of state sovereignty which they enable or undermine; and the political regime which they help reproduce or destabilize. DPLL

MES 0950. Cultures, Societies and Resistance in the Arab World.
This course examines the manifestations of counter-hegemony, resistance and dissent in the Middle East and North Africa. It studies the ways in which dominant forms are countered in cultural production and every day cultural practices, analyzing how subcultures, social movements and individuals have negotiated with, subverted and resisted these forms of social and political hegemonies through the use of art forms such as writing, poetry, music, political film, political posters and pamphlets, performance art and public art and the mixed outcomes of many of these struggles. The readings cover major issues in cultural theory, cultural sociology, cultural studies. DPLL

Examines Persian and Iranian musical approaches to tradition and protest. First half focuses on traditional Iranian music. Students will learn the basic cultural and musical traditions underpinning Persian/Iranian musical styles. Through directed reading and listening, and occasional in-class performance by the instructor, students will learn the primary characteristics of Iran’s classical music traditions and instruments; relevant musical concepts and terminology, and develop critical listening skills. Second half examines how modern Iranian musicians are disrupting these traditional concepts as a form of protest, making the music relevant to modern listeners while fundamentally changing conceptions of classical poetry in the process.

MES 1001. Revolution and Poets: Content and Form in Iranian Poetry.
Explains classical rules of Persian poetry and development of poetic content by several different modern Iranian poets. Examines how modern poets such as Shamlou, Akhavan, and Forough have been influenced by Nima Yooshij, the father of modern poetry in Iran. We will explore different formalistic approaches to poetry in Iran from the 1960’s to present, and examine various literary movements and their relation to the Islamic Revolution and post revolutionary context. We will examine the new postmodern poets from the 1990’s to present and the ways in which classical form is repurposed to achieve social commentary in subversive ways. DPLL

This is an introductory course to the question of Israel/Palestine. The course uses a series of alphabetically ordered and carefully selected concepts as a way to cut through the dense history of the region and the conflicting forces that shape its present. From “Colonialism” to “Zionism”, each concept will be surveyed with respect to its history, the pattern of its present usages, the discursive formations to which it belongs, and its political impact, taking into account the inevitable, conflicting ideological biases and discursive constraints of the many kinds of knowledge about Israel/Palestine. DPLL WRIT

MES 1055. Zionism and some of its Jewish Critics: Political, Philosophical, and Theological Perspectives.
Zionism is an idea, an ideology, a national movement that sought to solve “the Jewish question” in Europe, a political project that morphed into a political regime, a mighty colonial force, a form of Jewish secularization and an engine for religious revival. As such Zionism has been accompanied with criticism from its inception. The first part of the seminar will study of Zionism through the eyes of some of the major thinkers who shaped its ideology and practices. The second part will look at Zionism through the eyes of some of its (more and less sympathetic) Jewish critics. DPLL

The course examines visual politics in contemporary Middle Eastern society and grapples with fundamental debates in the study of cultural politics and visual cultures of the Arab region in a global context. We will contextualise the region’s contemporary visual cultures within wider debates and scholarship on the construction of subjectivities, the distribution of power, the formation of identity and belonging, and culture and representation. Emphasis is on translation and reception in a global context and transnational frame by focusing on how states and security, conflicts and displacements, social movements and revolution, aesthetics, art and global media are linked, characterized, analyzed. DPLL

MES 1300. Intellectual Change: From Ottoman Modernization to the Turkish Republic.
A critical survey of Ottoman intellectual history in the 19th and early 20th centuries. Modernization, formation of the modern state and issues of nationalism and other ideologies of the time form the main framework, analyzing their political, social and cultural impact on intellectual production in the Ottoman Empire and through the making of Republican Turkey. It is a history of mentalities organized around thematic/chronological modules, each representing a set of ideas, movements as well as facts and problems, which will be compared to the larger world of modern state formation both in thought and practice.

MES 1350. Israel/Palestine: The One State Condition.
This course follows the formation and transformation of the Israeli Regime, since its inception in the last years of the British Mandate in Palestine. At the theoretical level, we shall explore the difference between State and regime, ask what is a political regime, how to classify types of regimes and how to determine the regime of any given state. At the historical level we shall reconstruct and question the structural transformations and continuities of the Israeli regime, giving special attention to the impact of Palestinians’ civic status and almost half a century of “occupation” of Palestinian territories. DPLL

MES 1450. The Archival of Gestures
Often people think about archives as static spaces. How to develop a gestural archive able to translate instances and desires of justice? This course provides students with a theoretical and practical background on the archival of gestures in performance and the role that artists-archivists can play in contributing to change through exploring and problematizing social and political memories. We explore how Arab artists have sought and investigated this role after the “Arab Spring” and of civil disobedience against Arab regimes. We then look closely at a series of performance works, by Arab, Israeli and international artists. No dance experience required. DPLL

MES 1650. The Pen and the Gun: Literature and the Political Body.
This course will examine the sphere and influence of literature and film as vehicles of expression and memory reconstruction during and following periods of dictatorship. We will explore themes such as history and/as fiction, the structuring of truth and national narrative, the intersection of human rights and medicine, and discourse of the nation as a body. Taking a transnational and cross regional approach, we will include prominent writers from Latin America (with a focus on the political ‘disappearances’ of the 1970’s), Africa (post-colonial and civil war texts), and the Middle East (writing of, within, and through the Arab Spring). DPLL

MES 1790. Individual Research Project
Limited to juniors and seniors. Section numbers vary by instructor. Please check Banner for the correct section and CRN to use when registering for this course. Required: all proposals for independent study must be approved by the faculty sponsor and the MES program director. Students should not register for any section of MES 1970 without this approval.

MES 1971. Senior Honors Thesis
Open only to Senior students accepted into the honors program in MES. Instructor permission required. WRIT
MES 1995. Shahs, Clerics and Poets: Cultural Representation in Modern Iran.
This course examines the history of modern Iran through primary historical documents, secondary studies and cultural production, beginning with an historical overview and attempts at historical narrative in the modern era, from the latter half of the Qajar dynasty (~1850) until today. Topics include modernist reform in the late-nineteenth and early twentieth centuries, Iranian identity, attempts at political reform, women's movement and foreign affairs. The course emphasizes the debates of Iranian intellectuals and artists and how cultural representations of major historical events and socio-political changes contribute to and challenge historical narratives and how contemporary history and politics affect cultural representation.

MES 1990. Middle East Studies Pro-Seminar.
This course explores the current state of Middle East Studies scholarship with an eye to its current moment of crisis. We will begin by situating MES within its institutional history, then survey classic works from its core disciplines. The second half of the course will trace contemporary debates over the significance and origin of political Islam.

MES 1994A. Islamic Economics.
Despite the fact that the scriptural and early historical legacy of Islam is widely considered to be market-friendly, debates about the relationships between Islam and capitalism abound. This course moves beyond simplistic concerns of compatibility or conflict, and delves into the diverse ways by which Muslims from around the globe have devised a range of social, cultural, religious, legal and fiscal strategies that enable them to both remain true to their faith and live in today's swiftly-evolving economic context. DPLL

Zionism has been an idea, an ideology, a national movement, a political project morphed into a political regime, and a colonial force that transformed the history of the Middle East and the landscape of Palestine. It was a Jewish response to the persecutions of Jews in Europe, a renaissance of the Hebrew language and Jewish culture, and a form of Jewish secularization that has yielded religious revival and transformation. The ideology and practice of Zionism, its politics and political theology will be studied from the perspectives of four great thinkers: Martin Buber, Hannah Arendt, Edward Said and Judith Butler. DPLL

Seizing land in Israel/Palestine, colonizing it, shaping its boundaries, and reconstructing it as a governed space have played a major role in the struggles between Jews and Palestinians. Space has been a medium of domination and resistance, a scene of dispossession, construction and destruction, and its governmentalization has become a powerful state apparatus. Using concepts drawn from political theory, human geography, and postcolonial studies we shall examine and contrast the mental geographies and actual government of land and space(s) in Israel/Palestine and use space as a privileged perspective for understanding the history and structure of the Land's political predicament. DPLL

This course examines a new development in the contemporary novel: the rise of the Arab-British novel from the late 1980s onwards. The aim is to understand this emerging genre in its historical and aesthetic specificity, and to determine how Arab immigrant writers responded to a time of profound cultural and political change. At the intersection of such processes, and in a literary culture marked by postmodernism and cosmopolitanism, does the Anglo-Arab novel develop a distinctive aesthetic form? Writers studied are: Ahdaf Soueif, Jamal Mahjoub, Leila Aboulela, and Hisham Matar. WRIT

Are Islam and human rights compatible? Both human rights and Islam raise universal claims that may conflict in some cases. We will consider various attempts by religious and legal theorists to reconcile these claims through reinterpreting Islam or deriving human rights from Islamic sources. We will explore the practical side of these issues by examining legal documents and legal practices in various Muslim countries, paying special attention to the status of women and non-Muslim minorities. We will examine tensions arising from Muslims living in Europe and N.America, such as recent debates over secularism and religion, multiculturalism and the scope of tolerance.

MES 1997B. Visualizing the Middle East.
How has the capacity to visualize been both an enabling and limiting condition in relation to the post-colonial production of knowledge in the Middle East? The act of seeing is taken up in its practical dimension in the ways that it requires one to pay attention to the cultural and historical specificity of mechanisms of visibility and modes of representation. Through readings and discussions, we will take heed of the following questions: What is allowed to be seen? By whom? Under what circumstances? How is the visible structured? DPLL

Media coverage presents two ways of thinking and approaching modern Islam. One assumes Islam to be an entire way of life and single set of religious beliefs with compulsive adherence to the Quran and the Prophetic Sunna. The other reduces Islam to a set of essentialist principles, rules and spiritual values that even many Muslims have trouble grasping.
Recent anthropological scholarship makes every-day practical interpretations, practices and living social relationships central towards understanding Islam. This class will explore socio-historical and cultural specificities by which Muslims grapple with their faith, and how they shape these resources into everyday beliefs and practices. DPLL

Western media has pervasively portrayed the Middle East as “a-historical”, “timeless”, an “Other” that is beyond the logic of modern time. Simultaneously, it is also considered the cradle of “Western Civilization” where vital elements of “world” patrimony may be traced. But how do those who inhabit the region relate to their past and what are the various ways by which its discourses are drawn upon to embody different socio-political and ethical life-worlds? This course explores recent texts on heritage and memory while offering insights of ways in which modalities of history and memory have shaped the postcolonial dynamics of this region. DPLL

MES 1998. The Arab Spring.
The Middle East has witnessed significant socio-cultural, political, and economic transformations in recent decades. This seminar will explore the role of both state and non-state actors in these processes. In the face of globalization, liberalization, democratization, conflicts, and regional instability, what social movements have emerged and in what specific contexts? Additionally, how have civil society, mass media, global discourses, and Islamist groups and ideologies shaped the contemporary reality? What are the prospects for security, prosperity, and pluralism in the region? These are central questions we will attempt to address in this course.

MES 1999. Arab Youth: Movements, Cultures, and Discourses.
"Youth" has become a central social concept in the contemporary global economy. In the wake of 9/11, the discussion of "youth" in the Arab world became a global priority. This course takes an anthropological and sociological approach to studying youth. Why has "youth" become a focus of concern now? How does this shape our thinking about social, economic, political, and historical issues in the Arab world, and what issues does it obscure? The course examines the historical emergence and transformation of categories of "youth," "teen" and "adolescent" in the contexts of capitalist industrialization, nationalism, post/colonialism, state formation and globalization. Enrollment limited to 20.
MES 1999A. Cultures of Neoliberalism in the Middle East.
The course focuses on debates in the social sciences in the Arab world around contradictions of the cultures of neoliberalization in contemporary Arab culture(s), society (ies) and economy (ies). We will explore the relevance of neoliberalism to the increasing relevance of consumption and consumerism, for citizens and scholars alike, in shaping selfhood, society, identity and even epistemic reality, the concomitant eclipse of such modernist categories as social classes, the burgeoning importance of generation, ethnicity, gender, identity and social movements. Also covered, the relation of political Islam to neoliberalism, and the rise of labour migration in/out of the Arab world.

MES 1999B. Colonialism and Human Rights.
Are anti-colonial struggles human rights struggles? Is emancipation the objective of these struggles? Where and when do anti-colonial and human rights discourses converge and diverge? What is the role of violence in the moral, political and discursive trajectories of anti-colonialism and human rights? This course takes up these questions, starting with the reconstruction of the historical relationship between colonialism, anti-colonial struggles and the post-World War II formation of the international human rights regime. We then turn to discuss different authors who developed their anti-colonial thought and dealt with, appropriated or ignored human rights in their different conceptions of anti-colonial justice.

MES 1999C. Elites in Arab Culture and Society.
Social science studies the marginalized while ignoring elites and their role. This is especially the case with “Arab” Elites. Yet, to understand the conditions of the poor and marginalized, one must study elites. Elites are a lens to historically understand class formation in the Arab World, and influences beyond. We will consider how and why we study elites, different theories and methodologies of studying elites, and focus on elites in Arab societies. The course will deal with elites in the mandate period and early independence. The last part of the course will focus on elites in contemporary Arab society.

MES 1999D. Anthropology /Sociology of Development in the Arab World.
After the Second World War, questions of economic growth, poverty, and inequality were internationalized, leading to the rise of national and international agencies which aimed to promote development in the “Third World.” This course examines the anthropological study of development. Touching on development theory (and the political context of each model), we examine connections to anthropological models of socio-cultural change, and consider the relationship between anthropology and the development industry. How can cultural relativist and applied anthropology approaches be reconciled? Can anthropologists and anthropological knowledge contribute to improving development interventions and outcomes, or are they merely critical of such interventions?

MES 1999E. Displacement and Refugees in the Middle East.
Displacement and refugees constitute one of the most significant sources of upheaval, instability, and uncertainty in our time. In 100 years, the Middle East saw waves of displaced persons, with no singular explanation and no end in sight: Armenians, Circassians, Palestinians, Iraqis, Yazidis, Kurds, and Syrians. The impetuses for displacement include wars, fall of empires and nations, crafting of new states, and modernization attempts and environmental disasters. These stories of displacement are distinctive for their multitude of causes and protracted defiance of resolutions. They challenge the narratives of the durability of nation-states, ascendance of capitalism, and emplaced, “timeless” Arab populations.

MES 2000A. Decolonizing the Racialized Female Subject: Black and Indigenous Women’s Self-Making Under Empire.
This study grapples with conceptions of freedom and humanity emergent in Black and Indigenous women’s practices under empire. Colonialism is prefaced on construction of an “other,” Aimé Césaire refers to this as “thingification,” whereby colonial subjects are dehumanized and the colonizer “decivilized”. Totalizing dehumanizing forms are resisted by praxes and epistemologies which challenge the prevailing symbolic order and assert the humanity of those regarded as subhuman. We will examine how epistemological and political contestations of the human inform discourses on freedom and sovereignty and interrogate how various categories of identity refract and re-frame conceptions of humanity, freedom, and sovereignty.
Modern Culture and Media Concentration

Modern Culture and Media (MCM) is committed to the study of media in the context of the broader examination of modern cultural and social formations. Our curriculum proposes a distinctive subject matter, stresses comparative analysis and theoretical reflection, and highlights the integration of theory and practice, creative thought and critical production. In research and teaching at both the graduate and undergraduate level, MCM combines the analysis of diverse texts — visual and verbal, literary and historical, theoretical and popular, imaginative and empirical — with the study of contemporary theories of representation and cultural production and creative practice in a range of media. Through studying MCM, students will become critically sophisticated and knowledgeable about the theory, history, and analysis of media and cultural forms. They will also learn to produce innovative work — whether in theory, media practice, or both — that is informed by and engages with the real world.

For additional information, please visit the department's website: http://www.brown.edu/academics/modern-culture-and-media/

Modern Culture and Media Concentration Requirements

Modern Culture and Media (MCM) is an interdisciplinary concentration that explores the ties between media and broader cultural and social formations. We stress creative thinking and critical production: comparative analysis and theoretical reflection, as well as work that integrates practice and theory. We thus bring together aspects of modern culture that are normally separated by departmental structures such as film and media studies, fine art, literature, literary arts and philosophy. This concentration offers the student a range of possible specializations. A student might decide to focus on the critical study and production of a certain type or combination of media (print, photography, sound recording, cinema, video, television, and digital media); or they might focus on certain cultural, theoretical and/or social formations (for example, gender/sexuality in post-Cold War television, postcolonial theory and film, the changing form of the novel, theories of subjectivity and ideology, video games and theories of representation).

These paths are united by a commitment to critical thinking/practice: rather than reproducing conventions, MCM concentrators learn how conventions emerge, what work they do, and explore ways to change them.

Track I

Track I concentrators may choose to study a particular historical moment, a medium, or a mode of textual production, in combination with theoretical studies that examine the categories of cultural analysis: for example, the distinction between high and low culture. Examples of areas of interest include but are not limited to film, gender/sexuality, digital media, television, post-coloniality, the novel, modern thought, the modern arts, sound, and theories of ideology and subjectivity. Productive work in some modern medium or textual mode is encouraged for all concentrators. MCM’s approach to production recognizes the inextricable link between theory and practice, and the possibility of a fruitful complicity between them. Production, in the sense defined here, is a theoretically informed sphere or practice, one within which acknowledged forms of cultural creation are tested and extended in close complementarity with the analyses conducted elsewhere in MCM.

Track I consists of 11 courses.

Core courses

<table>
<thead>

</table>

Select two of the following:

- MCM 0150
- Text/Media/Culture: Theories of Modern Culture and Media
- MCM 0220
- Print Cultures: Textuality and the History of Books
Track II consists of 11 courses:

- MCM 0230  |  Digital Media
- MCM 0240  |  Television Studies
- MCM 0250  |  Visuality and Visual Theories
- MCM 0260  |  Cinematic Coding and Narrativity
- MCM 1110  |  The Theory of the Sign

**Additional courses**

- One must be an upper level course from the MCM 1200 series
- Two must be senior seminars from the MCM 1500 or MCM 1700 series
- Two must be at any level in MCM above MCM 0260
- Three additional courses. These courses must be in MCM or in related departments.  

**Total Credits** 11

1 No more than three courses from this list may count for concentration requirements.
2 The specific courses must be approved by an MCM concentration advisor as part of a coherent program of study.

**Other Requirements:**

1. **Focus Area:** Of the 11 courses required for the concentration, at least 3 courses must be in a focus area approved by a concentration advisor. These courses may be MCM courses, related courses, or a combination of the two, and they must represent a focus on some aspect of modern literature, theory, media, art or culture. Examples of possible focus areas are: mass/popular culture, gender/sexuality, language/representation/subjectivity, narrative, digital media, film, modern thought, television, the modern arts, the novel, colonialism and post-colonialism. This is not an exhaustive list. Production courses may be in the focus area but must be in addition to the minimum 3 courses.

2. **Production:** Work in production is encouraged but not required for Track I concentrators. Of the 11 courses required for concentration, as many as 3 may be in production. These may be production courses offered by MCM (film, video, digital media) or courses in creative writing, painting, photography, journalism, etc., provided they do not bring the total number of concentration courses taken outside MCM to more than 3.

**Honors:**

The honors program in MCM is designed for students who wish to integrate their skills in a special project. Students who qualify for Honors in Track I are eligible to apply to do an Honors project or thesis. Students should submit a letter of intent in their 6th semester, and a formal proposal by the first day of their 7th semester. Applications will be screened by the MCM Honors Committee. (Application forms are available in the MCM office.) If approved, a student must then register for MCM1970, a one-credit course which can count towards their Focus Area requirements, and MCM1990, a one-credit thesis course in which they complete the Honors project/thesis.

**Track II**

Track II concentration combines production courses with the critical study of the cultural role of practice. It aims to engage students in the analysis of theories of production elaborated within philosophical, artistic, and technological traditions, while encouraging them to produce works that interrogate these traditions.

**Track II consists of 11 courses:**

- **Two core courses:**
  - MCM 0150  |  Text/Media/Culture: Theories of Modern Culture and Media
  - MCM 0710  |  Introduction to Filmic Practice: Time and Form

- **Medium courses:**

**Honors:**

The honors program in MCM is designed for students who wish to integrate their skills in a special project. Students who qualify for Honors in Track II are eligible to apply to do an Honors project or thesis. Students should submit a letter of intent in their 6th semester, and a formal proposal by the first day of their 7th semester. Applications will be screened by the MCM Honors Committee. (Application forms are available in the MCM office.) If approved, a student must then register for MCM1970, a one-credit course which can count towards their Focus Area requirements, and MCM1990, a one-credit thesis course in which they complete the Honors project/thesis.

**Modern Culture and Media Graduate Program**

The department of Modern Culture and Media offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. There is no terminal Master’s program, but students who enter the doctoral program only with an undergraduate degree may earn an A.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:

http://www.brown.edu/academics/gradschool/programs/modern-culture-and-media
Courses

MCM 0110. Theory and Analysis of Modern Culture and Media. An introduction to critical theory, cultural studies, and media analysis that addresses print, photography, film, television, and digital media. We will examine these media in relationship to influential theoretical approaches such as structuralism and post-structuralism, ideological analysis and psychoanalysis, feminist and queer theory, critical race theory and theories of post-colonialism and globalization, and media and technology studies. WRIT

MCM 0150. Text/Media/Culture: Theories of Modern Culture and Media. An introduction to the theoretical foundations of contemporary cultural criticism. We will study theories of representation, signification and culture; image and narrative; ideology and discursive power; and modernity and postmodernity. Such theories are crucial to understanding modern culture and media (including print, photographic, film, television, and digital media texts). Readings from theorists such as Saussure, Benjamin, Levi-Strauss, Derrida, Barthes, Marx, Freud, Fanon, Arendt, Foucault, Irigaray, Appadurai, and Butler. Students must register for both the lecture and one screening; a signup sheet will be available for discussion sections after the first class meeting. Open to undergraduates only. WRIT

MCM 0220. Print Cultures: Textuality and the History of Books. Print media are ubiquitous, appearing in myriad forms, material configurations, and genres. This course investigates the concept of print as a mass medium, the first produced by means of mechanical reproduction. We will give particular attention to the theoretical problematics that govern its analysis and to competing concepts of print as a form. The course will trace the emergence of mass literacy and reading habits, print culture and the public sphere, the rise of the novel and history of the book, as well as concepts of literariness and representation, mediation and signification, narrativity and virtuality, the work and the text. WRIT

MCM 0230. Digital Media. This course introduces students to the critical study of digital media. From sampling to simulation, technological anxiety to fully-automated luxury, surveillance to social media, and cyberpunk to cyberwar, we will analyze the aesthetics, politics, protocols, history, and theory of digital media as it intersects with various fields of knowledge and practice. Special attention will be paid to its impact on socio-cultural formations and its compromising of boundaries between the public and private, self and other, utopia and dystopia, and work and leisure, as well as to the interplay between technological and historical developments in the 1960s, 1990s, and the present. WRIT

MCM 0240. Television Studies. Introduces students to the rigorous study of television, concentrating on televisional formations (texts, industry, audience) in relation to social/cultural formations (gender, generational, and family dynamics; constructions of race, class, and nation; consumerism and global economic flows). That is, this course considers both how television has been defined and how television itself defines the terms of our world. Students MUST register for the lecture section, the screening, and a conference section. Open to undergraduates only. WRIT

MCM 0250. Visuality and Visual Theories. Theories of visual representation in such traditional media as painting, in photography, and in emergent digital media (VR, robotics, etc.). Connects problems of representation to issues of power, information, subjectivity. These media are read as historically constituted and specific to particular cultures through complex forms of mediation. WRIT

MCM 0260. Cinematic Coding and Narrativity. Introduces students to rigorous study of the structural and ideological attributes of cinema concentrating on the dominant narrative model developed in the American studio system and alternatives to that model. Attention to film theory in relation to questions of representation, culture, and society. Students become conversant with specific elements and operations of the cinematic apparatus (e.g. camerawork, editing, sound-image relations) and how they produce discursive meanings. Students MUST register for the lecture, section and one screening. A sign-up sheet will be available for conferences after the first class meeting. Open to undergraduates only.

MCM 0700. Introduction to the Moving Image. The purpose of this course is to provide a basic introduction to film and video production and to begin to consider the kinds of texts that might be produced using these media. Students are expected to work in an intelligent manner, take risks with the content and form, engage in empirical research of the medium, and in so doing, examine common presumptions about media production. Students will utilize 16mm non-sync film cameras and small format video to produce a series of short projects emphasizing the creative use of these media in various social and visual arts contexts. Classes will consist of screenings and discussion of a wide variety of works, basic technical demonstrations, and critiques of student work. No previous production experience necessary. Prerequisites (two of the following or equivalent): MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Application required. Enrollment limited to 15. Written permission required. Mandatory S/NC.

MCM 0710. Introduction to Filmic Practice: Time and Form. A studio-style course on working with time based media, focused specifically on the technology of 16mm film production. With its focus on photographic and montage processes, as well as lighting and sound, the principles established in this course provide a solid foundation for all subsequent work in media, whether cinematic, video or new media, and it is strongly advised as a foundation level, skills oriented media course. Students produce a series of short, non-sync films. No previous experience required. Screenings, demonstrations and studio work.

MCM 0720. Intermediate Filmmaking: Cinematic Space. Introduces more sophisticated film production techniques, including sync sound and lighting technique. Explores the influence of digital technologies on cinematic practice. Studio work supplemented by screenings, demonstrations, and discussions. Group and individual projects. Prerequisite: MCM 0710. Application required. Application is available in the MCM office or from http://www.brown.edu/Departments/MCM/. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 12. Instructor's permission required. S/NC.

MCM 0730. Introduction to Video Production: Critical Strategies and Histories. Provides the basic principles of independent media production through a cooperative, hands-on approach utilizing digital video. Emphasizes video as a critical intervention in social and visual arts contexts. A major project, three shorter works, and in-class presentations of work-in-progress required. Weekly screenings contextualize student work. No previous experience required. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. Up to 40 students can apply, but the final class list of 12 will be determined after this meeting, with permission of the instructor.

MCM 0740. Intermediate Video Production: Sound, Image, Duration. Expanded principles of independent video production utilizing small format video (Mini DV). Emphasizes video as a critical intervention in social and visual arts contexts. A major project (10-20 minutes) and a class presentation concerning your project are required. Prerequisite: MCM 0730. Application required. Application is available in the MCM office or from http://www.brown.edu/Departments/MCM/. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 15. Instructor's permission required. S/NC.

MCM 0750. Art in Digital Culture. How do we produce, disseminate, and exchange images in a global networked society? How do digital technologies challenge conventions about art making, authorship, and audience? This production course introduces students to the practice, and critical inquiry into art in digital culture. The class will engage in contemporary debates on art and new media arts, and will experiment with digital photography, video, and coding. Throughout the semester, students will work on a series of short projects, and a final individual or collaborative work. Artist case studies include Harun Farocki, Oliver Laric, and anonymous-memes-creators; readings include, Hito Steyerl, David Joselit, and Boris Groys.
MCM 0750A. Art in Digital Culture.
