Computer Science

Computer science is now a critical tool for pursuing an ever-broadening range of topics, from outer space to the workings of the human mind. In most areas of science and in many liberal arts fields, cutting-edge work depends increasingly on computational approaches. The undergraduate program at Brown is designed to combine breadth in practical and theoretical computer science with depth in specialized areas. These areas range from traditional topics, such as analysis of algorithms, artificial intelligence, databases, distributed systems, graphics, mobile computing, networks, operating systems, programming languages, robotics and security, to novel areas including games and scientific visualization.

Requirements for the Standard Track of the Sc.B. degree

Prerequisites (1 or 2 courses)

Two semesters of Calculus, for example:

MATH 0100  Introductory Calculus, Part II
or MATH 0170  Advanced Placement Calculus

Concentration Requirements (15 courses)

Core-Computer Science:

Select one of the following introductory course Series: 2

Series A
- CSCI 0150 & CSCI 0160  Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

Series B
- CSCI 0170 & CSCI 0180  Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction

Series C
- CSCI 0190  Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or an advanced course)

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented: 3

- CSCI 0220  Introduction to Discrete Structures and Probability (math)
- CSCI 0320  Introduction to Software Engineering (systems)
- CSCI 0330  Introduction to Computer Systems (systems)
- CSCI 1010  Theory of Computation (math) 3
- CSCI 1450  Probability and Computing (math) 4

Additional Computer Science Courses: 1

Select one theoretical computer science course: 2

- CSCI 1010  Theory of Computation 3
- CSCI 1510  Introduction to Cryptography and Computer Security
- CSCI 1550  Probabilistic Methods in Computer Science
- CSCI 1570  Design and Analysis of Algorithms
- CSCI 1590  Introduction to Computational Complexity
- CSCI 1760  Multiprocessor Synchronization
- CSCI 1950H  Computational Topology
- CSCI 1820  Algorithmic Foundations of Computational Biology

Select one artificial intelligence course: 2

- CSCI 1410  Artificial Intelligence
- CSCI 1420  Machine Learning
- CSCI 1430  Computer Vision
- CSCI 1450  Probability and Computing
- CSCI 1460  Computational Linguistics

Select one computer science systems course: 4

- CSCI 1230  Introduction to Computer Graphics
- CSCI 1260  Compilers and Program Analysis
- CSCI 1270  Database Management Systems
- CSCI 1300  User Interfaces and User Experience
- CSCI 1320  Creating Modern Web Applications
- CSCI 1380  Distributed Computer Systems
- CSCI 1600  Real-Time and Embedded Software
- CSCI 1660  Introduction to Computer Systems Security
- CSCI 1670  Operating Systems
- CSCI 1680  Computer Networks
- CSCI 1730  Design and Implementation of Programming Languages
- CSCI 1900  csciStartup

Four additional advanced computer science or related courses. 4

Five of the 8 advanced courses must be from CS. In addition to those listed above, students can choose:

- CSCI 1250  Introduction to Computer Animation
- CSCI 1280  Intermediate 3D Computer Animation
- CSCI 1370  Virtual Reality Design for Science
- CSCI 1780  Parallel and Distributed Programming
- CSCI 1800  Cybersecurity and International Relations
- CSCI 1810  Computational Molecular Biology
- CSCI 1900  csciStartup
- CSCI 1950A  Computational Modeling and Algorithmic Thinking
- CSCI 1950B  Computational Topology and Discrete Geometry
- CSCI 1950N  2D Game Engines
- CSCI 1950R  Compiler Practice
- CSCI 1950T  Advanced Animation Production
- CSCI 1950U  Topics in 3D Game Engine Development
- CSCI 1950X  Software Foundations
- CSCI 1950Y  Logic for Systems
- CSCI 1950Z  Computational Methods for Biology
- CSCI 1951A  Data Science
- CSCI 1951C  Designing Humanity Centered Robots
- CSCI 1951F  Computers, Freedom and Privacy: Current Topics in Law and Policy
- CSCI 1951G  Optimization Methods in Finance
- CSCI 1951H  Software Security Exploitation
- CSCI 1951J  Interdisciplinary Scientific Visualization
- CSCI 1970  Individual Independent Study

A capstone course 5

Math: Two semesters of Mathematics or Applied Mathematics beyond MATH 0100/0170. One of these courses must be a linear algebra course

- MATH 0520  Linear Algebra
- MATH 0540  Honors Linear Algebra
- CSCI 0530  Directions: The Matrix in Computer Science

Total Credits 15
Computer Science

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

Requirements for the Standard Track of the A.B. degree

Prerequisites
Two semesters of Calculus, for example:
- MATH 0100 Introductory Calculus, Part II
- MATH 0170 Advanced Placement Calculus

Concentration Requirements (9 courses)
Core Computer Science:
Select one of the following series:

**Series A**

- CSCI 0150 Introduction to Object-Oriented Programming and Computer Science
- CSCI 0160 Introduction to Algorithms and Data Structures

**Series B**

- CSCI 0170 Computer Science: An Integrated Introduction
- CSCI 0180 Computer Science: An Integrated Introduction

**Series C**

- CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or an advanced course)

Three intermediate courses from the following, of which one must be math-oriented and one must be systems-oriented:

- CSCI 0220 Introduction to Discrete Structures and Probability (math)
- CSCI 0320 Introduction to Software Engineering (systems)
- CSCI 0330 Introduction to Computer Systems (systems)
- CSCI 0530 Directions: The Matrix in Computer Science (math)
- CSCI 1010 Theory of Computation (math)
- CSCI 1450 Probability and Computing (math)

Four additional 1000-level courses in computer science or related areas are required. 3 of the 4 courses must be in CS.

Total Credits

1. CSCI 1010 may be used as either a math-oriented intermediate course or as an advanced course, but not as both. It was formerly known as CSCI 0510.

2. Three must be advanced courses (at the 1000-level or higher), the fourth may be either an intermediate-level course not used to satisfy a core requirement or an advanced course. These three courses must include a pair of courses forming a coherent theme. A list of pre-approved pairs may be found at the approved-pairs web page (http://cs.brown.edu/ugrad/concentrations/approvedpairs.html). You are not restricted to pairs on this list, but any pair not on the list must be approved by the director of undergraduate studies.

3. CSCI 1450 may be used as a math-oriented intermediate course or as an advanced course. CSCI 1450 was formerly known as CSCI 450. They are the same course and hence only one may be taken for credit. Applied Math 1650 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650 and CSCI 1450.

Requirements for the Professional Track of the A.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
