Geology-Chemistry

Geochronology involves two different emphases. Low-temperature geochronology involves study of chemical and biochemical processes on and near Earth’s surface, including land, oceans and freshwater bodies, and how the geochemical record reflects climate conditions. High-temperature geochronology includes study of formation and evolution of the Earth and other planets, magma formation and properties, volcanic activity, and metamorphism. The AB degree requires a total of 14 courses, including 5 geoscience courses and 4 chemistry courses, and a few supporting math and physics courses. The ScB degree requires a total of 20 courses, including 7 geoscience courses and 4 chemistry courses, either with an organic or an inorganic focus, plus some supporting math and physics courses and one research course. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work for pay during the academic year or in the summer, in areas such as experimental studies of magma formation, and analyzing lunar rock samples for water content.

Standard program for the A.B. degree
Recommended for students seeking a liberal education and interested in applying physical and chemical principles toward an understanding of Earth history, Earth processes, and environmental and resource issues.

Basic supporting science courses
Select two courses in mathematics at the level of: 2
MATH 0900  Introductory Calculus, Part I (or more advanced)
MATH 1000  Introductory Calculus, Part II (or more advanced)

CHEM 0300  Equilibrium, Rate, and Structure
PHYS 0050  Foundations of Mechanics (or a more advanced course)
or ENGN 0030  Introduction to Engineering

Concentration courses
GEOL 0220  Physical Processes in Geology
GEOL 0230  Geochemistry: Earth and Planetary Materials and Processes
GEOL 0240  Earth: Evolution of a Habitable Planet
Three additional chemistry courses 3
Select one of the following Series: 2
GEOL 1410  Mineralogy
& GEOL 1420  Petrology
GEOL 1130  Ocean Biogeochemical Cycles
& GEOL 1370  and Environmental Geochemistry

Two additional courses from upper level geological sciences, math, or supporting sciences with approval from the department concentration advisor. 2
Total Credits 14

Standard program for the Sc.B. degree
This program is recommended for students interested in graduate study and careers in geochemistry and related fields.

Basic Supporting Science Courses:
Select two courses in mathematics at the level of: 2
MATH 0900  Introductory Calculus, Part I (or more advanced)
MATH 1000  Introductory Calculus, Part II (or more advanced)
CHEM 0300  Equilibrium, Rate, and Structure
Select one of the following series: 2

Concentration Courses:
Either the geochemistry/inorganic option or the geochemistry/organic option:

Geochemistry/Inorganic Option:
GEOL 0220  Physical Processes in Geology
GEOL 0230  Geochemistry: Earth and Planetary Materials and Processes
GEOL 0240  Earth: Evolution of a Habitable Planet
GEOL 1130  Ocean Biogeochemical Cycles
or GEOL 1370  Environmental Geochemistry
GEOL 1410  Mineralogy
GEOL 1420  Petrology
Plus one from:
GEOL 1240  Stratigraphy and Sedimentation
GEOL 1330  Global Environmental Remote Sensing
GEOL 1450  Structural Geology
Three from:
CHEM 0350  Organic Chemistry
CHEM 0500  Inorganic Chemistry
CHEM 1060  Advanced Inorganic Chemistry
CHEM 1140  Physical Chemistry: Quantum Chemistry
CHEM 1150  Physical Chemistry: Thermodynamics and Statistical Mechanics

Geochemistry/Organic Option:
GEOL 0220  Physical Processes in Geology
GEOL 0230  Geochemistry: Earth and Planetary Materials and Processes
GEOL 0240  Earth: Evolution of a Habitable Planet
GEOL 1130  Ocean Biogeochemical Cycles
GEOL 1370  Environmental Geochemistry
GEOL 1410  Mineralogy
Plus one from:
GEOL 1240  Stratigraphy and Sedimentation
GEOL 1330  Global Environmental Remote Sensing
GEOL 1380  Environmental Stable Isotopes
Three Chemistry courses:
CHEM 0350  Organic Chemistry
CHEM 0360  Organic Chemistry
CHEM 0380  Advanced Organic Chemistry
Plus one additional chemistry course
Four additional courses from upper level geological sciences, mathematics, or supporting sciences with approval of the departmental concentration advisor:
GEOL 1970  Individual Study of Geologic Problems
Total Credits 20

1 Advanced placement may be substituted for the first semester of physics.
